(A) The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the school.

(B) The governing board finds that corrective measures required under an existing order by another jurisdiction which has jurisdiction over the facilities will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes this finding, the governing board shall also make a subsequent finding, prior to the occupancy of the school, that the emissions have been mitigated to these levels.

(d) As used in this section:

(1) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substance identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(2) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(3) "Acutely hazardous material" means any material defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(4) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(5) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(6) "Administering agency" means any agency designated pursuant to Section 25502 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

SEC. 2. Section 39120 of the Education Code is amended to read:

39120. (a) The governing board of a school district shall not approve a project for the construction of a new school building, as defined in Section 39141, unless the project and its lead agency comply with the same requirements specified in subdivision (a) of Section 39003 for schoolsite acquisition.

(b) For purposes of this section, the acceptance of construction bids shall constitute approval of the project.

SEC. 3. Section 65759 of the Government Code is amended to

191220

read:

65759. In any action brought under this section:

(a) The California Environmental Quality Act, Division 13 (commencing with Section 21000) of the Public Resources Code, does not apply to any action necessary to bring its general plan or relevant mandatory elements of the plan into compliance with any court order or judgment under this article.

(1) The local agency shall, however, prepare an initial study, within the time limitations specified in Section 65754, to determine the environmental effects of the proposed action necessary to comply with the court order. The initial study shall contain substantially the same information as is required for an initial study pursuant to subdivision (c) of Section 15080 of Title 14 of the California Code of Regulations.

(2) If as a result of the initial study, the local agency determines that the action may have a significant effect on the environment, the local agency shall prepare, within the time limitations specified in Section 65754, an environmental assessment, the content of which substantially conforms to the required content for a draft environmental impact report set forth in Article 9 (commencing with Section 15140) of Title 14 of the California Code of Regulations. The local agency shall include notice of the preparation of the environmental assessment in all notices provided for the amendments to the general plan proposed to comply with the court order.

(3) The environmental assessment shall be deemed to be a part of the general plan and shall only be reviewable as provided in this article.

(4) The local agency may comply with the provisions of the California Environmental Quality Act, Division 13 (commencing with Section 21000) of the Public Resources Code, in any action necessary to bring its general plan or the plan's relevant mandatory elements into compliance with any court order or judgment under this section so long as it does so within the time limitations specified in Section 65754.

(b) The court for good cause shown may grant not more than two extensions of time, not to exceed a total of 240 days, in order to meet the requirements imposed by Section 65754.

SEC. 4. Section 65850.2 of the Government Code is repealed:

SEC. 5. Section 65850.2 is added to the Government Code, to read:

65850.2. (a) Each city and each county shall include in its information list compiled pursuant to Section 65940 for development projects, or application form for projects which do not require a development permit other than a building permit, both of the following:

(1) The requirement that the owner or authorized agent shall indicate whether the owner or authorized agent will need to comply with the applicable requirements of Sections 25505, 25533, and 25534

with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

SEC. 19. Sections 3, 5, 10, 10.5, 11, 14, 15, and 17 of this act shall not apply to projects for which an application is submitted pursuant to Section 65943 of the Government Code prior to January 1, 1992.

SEC. 20. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution for those costs which may be incurred by a local agency or school district because this act creates a new crime or infraction, changes the definition of a crime or infraction, changes the penalty for a crime or infraction, or eliminates a crime or infraction.

Moreover, no reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution for other costs because the local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for those other costs.

However, notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars (\$1,000,000), reimbursement shall be made from the State Mandates Claims Fund. Notwithstanding Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

SEC. 21. If any provision of this act or its application to any person or circumstances is held invalid, that invalidity shall not affect other provisions or applications of the act which can be given effect without the invalid provision or application, and to this end the provisions of this act are severable.

BILL NUMBER: SB 1562 CHAPTERED 07/25/96

CHAPTER 277
 FILED WITH SECRETARY OF STATE JULY 25, 1996
 APPROVED BY GOVERNOR JULY 24, 1996
 PASSED THE ASSEMBLY JULY 11, 1996
 PASSED THE SENATE APRIL 25, 1996
 AMENDED IN SENATE APRIL 18, 1996

INTRODUCED BY Senator Greene

FEBRUARY 15, 1996

An act to add Part 10.5 (commencing with Section 17211) and Part 23 (commencing with Section 38000) to, to repeal and add Part 10 (commencing with Section 15100) of, and to repeal Part 10.5 (commencing with Section 17900) and Part 23 (commencing with Section 39001) of, the Education Code, and to repeal Sections 53080, 53080.1, 53080.15, 53080.2, 53080.3, 53080.4, 53080.6, and 53081 of the Government Code, relating to school facilities.

LEGISLATIVE COUNSEL'S DIGEST

SB 1562, Greene. School facilities.

(1) Existing law includes various state general obligation bond acts, as approved by the voters, that provide for the issuance of bonds to raise revenues for, among other purposes, elementary and secondary school facility construction.

This bill would repeal and reenact the provisions governing state school bonds including the State School Building Aid Law of 1949, the State School Building Aid Law of 1952, the State School Construction Law of 1957, and the Urban School Construction Aid Law of 1968.

(2) Existing law, the Leroy F. Greene State School Building Lease-Purchase Law of 1976, provides bond funding for the construction, reconstruction, modernization, and replacement of school facilities and the performance of deferred maintenance activities on school facilities.

This bill would repeal and reenact this law and would make technical, nonsubstantive changes in those provisions.

(3) Existing law also provides for the Emergency School Classroom Law of 1979, school district revenue bonds, the Archie-Hudson and Cunneen School Technology Revenue Bond Act, and the California School Finance Authority.

This bill would repeal and reenact those bodies of law and would make technical, nonsubstantive changes in those provisions.

(4) Existing law sets forth specific requirements for the location and construction of school buildings including, among other provisions, the Field Act.

This bill would repeal and reenact those provisions and would make technical, nonsubstantive changes in those provisions.

(5) Under existing law, the governing board of any school district is authorized to levy a fee, charge, dedication, or other requirement against any development project within the boundaries of the school district for the purpose of funding the construction or reconstruction of school facilities.

This bill would repeal and add those provisions and would make technical, nonsubstantive changes in those provisions.

of any of the matters permitted by this section or any other provision of this chapter. Notwithstanding any other provision of law, the agent shall have the powers granted by the resolution for purposes of this chapter. The resolution shall be deemed to bind the school district or community college district, as the case may be, to any contract, agreement, instrument, or other document executed by the agent on behalf of the school district or community college district, and all duties, obligations, or responsibilities contained therein on the part of the school district or community college district, to the same extent as if duly authorized, executed, and delivered by the school district or community college district.

(d) This section shall be deemed to provide a complete, additional, and alternative method for accomplishing the acts authorized by this section, and the issuance of bonds to, borrowing of money from, or sale or purchase or lease of educational facilities from or to, the authority. Any agreement entered into in connection with the issuance of bonds, the borrowing of money or the sale, purchase, or lease of educational facilities, including, without limitation, any agreement for liquidity or credit enhancement under this section, need not comply with the requirements of any other law applicable to issuance of bonds, borrowing, selling, purchasing, leasing, pledge, encumbrance, or credit, as the case may be, by a school district or community college district, or by a county or city board of education or superintendent of schools or the Board of Governors of the California Community Colleges or Chancellor of the California Community Colleges.

17199.2. An action may be commenced under Chapter 9 (commencing with Section 860) of Title 10 of Part 2 of the Code of Civil Procedure to determine the validity of any issuance or proposed issuance of revenue bonds, the loan of the proceeds thereof, the sale, purchase, or lease of facilities under this chapter, or the legality and validity of any proceedings previously taken or proposed in a resolution of the authority to be taken for the authorization, issuance, sale, and delivery of the bonds, for the use of the proceeds thereof, or for the payment of the principal and interest thereon.

17199.3. (a) The total amount of revenue bonds which may be issued and outstanding at any time under this chapter shall not exceed four hundred million dollars (\$400,000,000).

(b) For purposes of subdivision (a), bonds which meet any of the following conditions shall not be deemed to be outstanding:

- (1) Bonds which have been refunded pursuant to Section 17188.
- (2) Bonds for which money or securities in amounts necessary to pay or redeem the principal, interest, or any redemption premium on the bonds have been deposited in trust.
- (3) Bonds which have been issued to provide working capital.

SEC. 3. Part 10.5 (commencing with Section 17211) is added to the Education Code, to read:

PART 10.5. SCHOOL FACILITIES
 CHAPTER 1. SCHOOLSITES
 Article 1. General Provisions

17211. Prior to commencing the acquisition of real property for a new schoolsite or an addition to an existing schoolsite, the governing board of a school district shall evaluate the property at a public hearing using the site selection standards established by the State Department of Education pursuant to subdivision (b) of Section 17251. The governing board may direct the district's advisory committee established pursuant to Section 17388 to evaluate the

property pursuant to those site selection standards and to report its findings to the governing board at the public hearing.

17212. The governing board of a school district, prior to acquiring any site on which it proposes to construct any school building as defined in Section 17283 shall have the site, or sites, under consideration investigated by competent personnel to ensure that the final site selection is determined by an evaluation of all factors affecting the public interest and is not limited to selection on the basis of raw land cost only. If the prospective schoolsite is located within the boundaries of any special studies zone or within an area designated as geologically hazardous in the safety element of the local general plan as provided in subdivision (g) of Section 65302 of the Government Code, the investigation shall include any geological and soil engineering studies by competent personnel needed to provide an assessment of the nature of the site and potential for earthquake or other geologic hazard damage.

The geological and soil engineering studies of the site shall be of such a nature as will preclude siting of a school in any location where the geological and site characteristics are such that the construction effort required to make the school building safe for occupancy is economically unfeasible. No studies are required to be made if the site or sites under consideration have been the subject of adequate prior studies. The evaluation shall also include location of the site with respect to population, transportation, water supply, waste disposal facilities, utilities, traffic hazards, surface drainage conditions, and other factors affecting the operating costs, as well as the initial costs, of the total project.

For the purposes of this article, a special studies zone is an area which is identified as a special studies zone on any map, or maps, compiled by the State Geologist pursuant to Chapter 7.5 (commencing with Section 2621) of Division 2 of the Public Resources Code.

17212.5. Geological and soil engineering studies as described in Section 17212 shall be made, within the boundaries of any special studies zone, for the construction of any school building as defined in Section 17283, or if the estimated cost exceeds twenty thousand dollars (\$20,000), for the reconstruction or alteration of or addition to any school building for work which alters structural elements. The Department of General Services may require similar geological and soil engineering studies for the construction or alteration of any school building on a site located outside of the boundaries of any special studies zone. No studies need be made if the site under consideration has been the subject of adequate prior studies.

No school building shall be constructed, reconstructed, or relocated on the trace of a geological fault along which surface rupture can reasonably be expected to occur within the life of the school building.

A copy of the report of each investigation conducted pursuant to this section shall be submitted to the Department of General Services pursuant to Article 3 (commencing with Section 17280) of this chapter and to the State Department of Education. The cost of geological and soil engineering studies and investigations conducted pursuant to this section may be treated as a capital expenditure.

17213. The governing board of a school district shall not approve a project involving the acquisition of a schoolsite by a school district unless all of the following occur:

(a) The lead agency, as defined in Section 21067 of the Public Resources Code, determines that the property purchased or to be built

upon is not any of the following:

(1) The site of a current or former hazardous waste disposal site or solid waste disposal site unless, if the site was a former solid waste disposal site, the governing board of the school district concludes that the wastes have been removed.

(2) A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(3) A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

(b) The lead agency, as defined in Section 21067 of the Public Resources Code, preparing the environmental impact report or negative declaration has consulted with the administering agency in which the proposed schoolsite is located and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed schoolsite which might reasonably be anticipated to emit hazardous air emissions, or to handle hazardous or acutely hazardous materials, substances, or waste. The lead agency shall include a list of the locations for which information is sought.

(c) The governing board of the school district makes one of the following written findings:

(1) Consultation identified none of the facilities specified in subdivision (b).

(2) The facilities specified in subdivision (b) exist, but one of the following conditions applies:

(A) The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the school.

(B) The governing board finds that corrective measures required under an existing order by another jurisdiction which has jurisdiction over the facilities will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes this finding, the governing board shall also make a subsequent finding, prior to the occupancy of the school, that the emissions have been mitigated to these levels.

(d) As used in this section:

(1) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located.

As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substance identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(2) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(3) "Acutely hazardous material" means any material defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(4) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(5) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(6) "Administering agency" means any agency designated pursuant to Section 25502 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

17215. (a) In order to promote the safety of pupils, comprehensive community planning, and greater educational usefulness of schoolsites before acquiring title to property for a new schoolsite, the governing board of each school district, including any district governed by a city board of education, shall give the Department of Transportation written notice of the proposed acquisition and shall submit any information required by the department if the proposed site is within two miles, measured by air line, of that point on an airport runway or a potential runway included in an airport master plan that is nearest to the site.

(b) If the Department of Transportation is no longer in operation, the governing board of the school district shall, in lieu of notifying the Department of Transportation, notify the United States Department of Transportation or any other appropriate agency, in writing, of the proposed acquisition for the purpose of obtaining from the department or other agency any information or assistance that it may desire to give.

(c) The Department of Transportation shall investigate the proposed site and, within 30 working days after receipt of the notice, shall submit to the governing board a written report and its recommendations concerning acquisition of the site. As part of the investigation, the Department of Transportation shall give notice thereof to the owner and operator of the airport who shall be granted the opportunity to comment upon the proposed schoolsite.

(d) The governing board shall not acquire title to the property until the report of the Department of Transportation has been received. If the report does not favor the acquisition of the property for a schoolsite or an addition to a present schoolsite, the governing board shall not acquire title to the property until 30 days after the department's report is received and until the department's report has been read at a public hearing duly called after 10 days' notice published once in a newspaper of general circulation within the school district or, if there is no newspaper of general circulation within the school district, in a newspaper of general circulation within the county in which the property is located.

(e) Except as provided in subdivision (e), if the Department of Transportation in its report submitted to a governing board of a school district does not favor acquisition of a proposed site that is within two miles of the centerline of an active runway, no state funds or local funds shall be apportioned or expended for the acquisition of that site, construction of any school building on that site, or for the expansion of any existing site to include that site.

(f) This section does not apply to sites acquired prior to January 1, 1966, nor to any additions or extensions to those sites.

(g) If the recommendations of the Department of Transportation are unfavorable, the recommendations shall not be overruled without the express approval of the State Allocation Board.

17216. No action undertaken by the State Department of Education or by any other state agency or by any political subdivision pursuant to this chapter, or in compliance with this chapter, shall be construed to affect any rights arising under the provisions of

Section 19 of Article 1 of the California Constitution.

17217. The governing board of a school district may acquire a site for a school building contiguous to the boundaries of the district and upon the acquisition of the site it shall become a part of the district. The site shall not be acquired until the county committee on school district organization of the county or of each of the counties concerned has received the proposal for acquisition of the site and reported its recommendations thereon to the governing boards of the districts concerned and to each county superintendent of schools concerned. The report of the county committee shall be made within 60 days from the time the proposal for acquisition of the site was submitted to it. The power of eminent domain may be used for the purposes of this section.

A schoolsite is contiguous for the purpose of this section although separated from the boundaries of the district by a road, street, stream, or other natural or artificial barrier or right-of-way.

17218. The governing board of a school district which has been included in a school district unification proposal approved by the electors of the territory involved pursuant to Chapter 2 (commencing with Section 4206) of Part 3, may, prior to the time the new unified school district becomes effective for all purposes, acquire a site for a school building at any place within the new unified school district, and upon the acquisition of the site it shall become a part of the district pending the date when the new unified school district becomes effective for all purposes. The site shall not be acquired until the county committee on school district organization of the county or of each of the counties concerned has received the proposal for acquisition of the site and reported its recommendations thereon to the governing boards of the districts concerned and to each county superintendent of schools concerned. The report of the county committee shall be made within 60 days from the time the proposal for acquisition of the site was submitted to it.

17219. (a) Whenever a school district acquires or has acquired a site for school purposes, as determined by the State Allocation Board, and does not use the site within (1) five years of the date of acquisition for the kindergarten, if any, and any of grades 1 to 8, inclusive, maintained by an elementary school district or a unified school district, or, (2) seven years of the date of acquisition for any of grades 7 to 12, inclusive, maintained by a high school district or a unified school district, or if a school district has a site at any grade level that has previously been used but has not been used for school purposes within the preceding five years, the school district shall be subject to nonuse payments, unless the State Allocation Board, from time to time, makes a determination that the school district will utilize the property for the purpose for which it was intended within a reasonable period of time, in a specific amount for each additional year in which the site is retained and not used by the district beyond the foregoing specified periods, except the first additional year shall be deemed to end not earlier than April 30, 1973.

(b) Payment shall not be required under this section as to any site having a value of twenty thousand dollars (\$20,000) or less. Commencing on January 1, 1988, and annually thereafter, the State Allocation Board shall increase this exemption figure by the amount of the current fiscal year inflation adjustment specified in Section 42238.1, if any.

(c) The payments required shall be computed by the Executive Officer of the State Allocation Board and certified to the Controller, and payments shall be equal to one one-hundredth (1/100)

the retrofitting of the school buildings to ensure that the project satisfies the recommendations of the preaudit.

17653. School districts taking action under this chapter shall contract with qualified businesses capable of retrofitting school buildings. To the extent that lists of qualified businesses are made available to school districts by investor-owned or municipal utility companies or federal or state regulated financial institutions, school districts may utilize the services of these businesses.

SEC. 4. Part 10.5 (commencing with Section 17900) of the Education Code is repealed.

SEC. 5. Part 23 (commencing with Section 38000) is added to the Education Code, to read:

PART 23. SUPPLEMENTAL SERVICES

CHAPTER 1. SECURITY DEPARTMENTS

38000. (a) The governing board of any school district may establish a security department under the supervision of a chief of security or a police department under the supervision of a chief of police, as designated by, and under the direction of, the superintendent of the school district. In accordance with Chapter 5 (commencing with Section 45100) of Part 25, the governing board may employ personnel to ensure the safety of school district personnel and pupils and the security of the real and personal property of the school district. In addition, a school district may assign a school police reserve officer who is deputized pursuant to Section 35021.5 to a schoolsite to supplement the duties of school police personnel pursuant to this section. It is the intention of the Legislature in enacting this section that a school district police or security department is supplementary to city and county law enforcement agencies and is not vested with general police powers.

(b) The governing board of a school district that establishes a security department or a police department shall set minimum qualifications of employment for the chief of security or chief of police, respectively, including, but not limited to, prior employment as a peace officer or completion of any peace officer training course approved by the Commission on Peace Officer Standards and Training. A chief of security or chief of police shall comply with the prior employment or training requirement set forth in this subdivision as of January 1, 1993, or a date one year subsequent to the initial employment of the chief of security or chief of police by the school district, whichever occurs later. This subdivision shall not be construed to require the employment by a school district of any additional personnel.

38001. Persons employed and compensated as members of a police department of a school district, when appointed and duly sworn, are peace officers, for the purposes of carrying out their duties of employment pursuant to Section 830.32 of the Penal Code.

38002. Moneys transferred into the general fund of any school district pursuant to Section 1463.12 of the Penal Code may be made available for the following purposes:

(a) The training of persons employed and compensated as members of a police department of a school district, pursuant to the requirements or approval of the Commission on Peace Officer Standards and Training.

(b) The training of persons employed and compensated as members of a police department of a school district in other public safety skills, including, but not limited to, all of the following:

- (1) First aid.
- (2) Rescue.

instructor certified pursuant to Section 38156 if either of those departments finds that the instructor's certificate would have been suspended, revoked, or canceled for any of the reasons designated in subdivision (e), (f), or (g).

38166. (a) A school pupil activity bus (SPAB), transit bus, schoolbus, or farm labor vehicle driver instructor with no instructional limitations shall conduct at least 20 hours of instruction each 12 months that includes at least 10 hours of behind-the-wheel and 10 hours of classroom training, which need not be given in a single session. A school pupil activity bus (SPAB), transit bus, schoolbus, or farm labor vehicle driver instructor limited to either classroom or behind-the-wheel training only shall conduct at least 10 hours of instruction each 12 months that includes at least 10 hours of behind-the-wheel or classroom training depending on the limitation. The training need not be given in a single session. A school pupil activity bus (SPAB), transit bus, schoolbus, or farm labor vehicle driver instructor limited to in-service training only shall conduct at least 10 hours of in-service training each 12 months. All school pupil activity bus (SPAB), transit bus, schoolbus, and farm labor vehicle driver instructor training conducted by department staff may be accepted in lieu of the requirements of this subdivision.

(b) A school pupil activity bus (SPAB), transit bus, schoolbus, or farm labor vehicle driver instructor may be limited to classroom instruction, behind-the-wheel training or in-service training only, and prohibited from recording, documenting, or signing for any training required by this article, as determined by the department.

(c) A school pupil activity bus (SPAB), transit bus, schoolbus, or farm labor vehicle driver instructor shall be limited to behind-the-wheel instruction in vehicles that the instructor is qualified to drive.

(d) All school pupil activity bus (SPAB), transit bus, schoolbus, or farm labor vehicle driver instructor training required by subdivision (a) shall be properly documented on a State Department of Education Training Certificate T-01, and signed by the state-certified instructor at the end of each 12-month training period. The signature certifies that the required instruction was conducted during the 12-month training period. Upon renewal of the instructor driver's license, endorsement, or certificate, the completed instructor training record, recorded on the State Department of Education Training Certificate, shall be submitted to the department in Sacramento.

38167. The department may assess fees to any instructor applicant who will be training drivers of any vehicle as defined in Section 642 of the Vehicle Code. The fee shall not be more than necessary to offset the department's reasonable costs.

38168. Employers shall take all action necessary to make available to every transit busdriver required to be trained pursuant to Section 38158 or 38162 the opportunity to be trained without the loss of wages or benefits.

SEC. 6. Part 23 (commencing with Section 39001) of the Education Code is repealed.

SEC. 7. Section 53080 of the Government Code is repealed.

SEC. 8. Section 53080.1 of the Government Code is repealed.

SEC. 9. Section 53080.15 of the Government Code is repealed.

SEC. 10. Section 53080.2 of the Government Code is repealed.

SEC. 11. Section 53080.3 of the Government Code is repealed.

SEC. 12. Section 53080.4 of the Government Code is repealed.

SEC. 13. Section 53080.6 of the Government Code is repealed.

SEC. 14. Section 53081 of the Government Code is repealed.

SEC. 15. To the extent that the provisions of this act are substantially the same as existing statutory provisions relating to the same subject matter, the provisions shall be construed as restatements and continuations of existing statutory provisions and not as a new enactment.

SEC. 16. The Legislature finds and declares that the enactment of this act, in view of the nonsubstantive statutory changes made, will not result in new or additional costs to local agencies charged with any duties or responsibilities in connection therewith.

SEC. 17. Any section of any act enacted by the Legislature during the 1996 calendar year prior to the enactment of this act, that amends, amends and renumbers, adds, repeals and adds, or repeals a section, article, chapter, or part, that is amended, amended and renumbered, added, repealed and added, or repealed by this act, shall prevail over this act until January 1, 1998, at which time Sections 1 to 16 of this act shall become operative.

SEC. 18. The provisions of this act are severable. If any provisions of this act or its application is held invalid, that invalidity shall not affect other provisions or applications that can be given effect without the invalid provision or application.

CHAPTER 992
FILED WITH SECRETARY OF STATE OCTOBER 10, 1999
APPROVED BY GOVERNOR OCTOBER 10, 1999
PASSED THE SENATE SEPTEMBER 10, 1999
PASSED THE ASSEMBLY SEPTEMBER 9, 1999
CONFERENCE REPORT NO. 1
PROPOSED IN CONFERENCE SEPTEMBER 3, 1999
AMENDED IN SENATE JULY 13, 1999
AMENDED IN SENATE JULY 8, 1999
AMENDED IN ASSEMBLY JUNE 2, 1999
AMENDED IN ASSEMBLY APRIL 28, 1999
AMENDED IN ASSEMBLY APRIL 6, 1999
AMENDED IN ASSEMBLY MARCH 15, 1999

INTRODUCED BY Assembly Member Wildman

FEBRUARY 11, 1999

An act to amend Sections 17070.50 and 17268 of, and to add Sections 17072.13, 17213.2, and 17213.3 to, the Education Code, relating to school facilities.

LEGISLATIVE COUNSEL'S DIGEST

AB 387, Wildman. School facilities: site contamination.

Under Leroy F. Greene School Facilities Act of 1998, an eligible school district may receive funding for new construction of school facilities.

This bill would provide that in addition to this funding for new construction and subject to certain limitations, that funding may be provided for 50% of the cost of the evaluation of hazardous materials, as defined, at a site to be acquired by the school district and for 50% of the response cost of removal of hazardous waste or solid waste, the removal of hazardous substance, or other remedial action in connection with hazardous substances at that site and up to 100% of these costs in the case of financial hardship assistance, as defined. This bill would permit a school district with a site that meets an environmental hardship criteria, as described, to apply to the State Allocation Board for site acquisition funding for that site prior to having construction plans for that site approved by the Division of the State Architect and the State Department of Education. The bill would require the State Allocation Board to develop regulations that allow school districts with financial hardship site acquisition funding prior to ownership of the site or evidence that the site is in escrow.

Existing law prohibits the governing board of a school district from approving a project involving the acquisition of a schoolsite or the construction of a school by the school district unless specified actions are taken with regard to potential contamination of the site, including a determination by the lead agency, as defined, that the property purchased or to be built upon is not the site of a current or former hazardous waste disposal site or solid waste disposal site, or a hazardous substance release site.

The bill would require a school district that owns a proposed schoolsite as a condition of receiving state funds to enter into an

agreement with the Department of Toxic Substances Control to oversee response action if a preliminary endangerment assessment discloses the presence of a hazardous material release, or threatened release, or the presence of naturally occurring hazardous materials, at a proposed schoolsite at concentrations that could pose a significant risk to children or adults, and the school district owns the proposed schoolsite. The bill would also require the school district to take response action pursuant to the Carpenter-Presley-Tanner Hazardous Substance Account Act as may be required by the Department of Toxic Substances Control.

This bill would make certain prohibitions inapplicable to schoolsites acquired prior to January 1, 2000.

The bill would require the State Department of Education to monitor the performance of the Department of Toxic Substances Control in meeting timeframes under its provisions and would require a report of findings to the Department of General Services and the Department of Finance. The bill would also require the State Department of Education to report to the Department of General Services and the Department of Finance every 6 months for a period of 2 years, the amount of fees or other charges of any state agency review paid by school districts regarding schoolsites, and any concerns about those fees or charges.

This bill would provide that it would not become operative unless and until SB 162 is chaptered and becomes operative.

THE PEOPLE OF THE STATE OF CALIFORNIA DO ENACT AS FOLLOWS:

SECTION 1. Section 17070.50 of the Education Code is amended to read:

17070.50. The board shall not apportion funds to any school district, unless the applicant school district has certified to the board that the services of any architect, structural engineer, or other design professional for any work under the project have been obtained pursuant to a competitive process that is consistent with the requirements of Chapter 10 (commencing with Section 4525) of Division 5 of Title 1 of the Government Code and has obtained the written approval of the State Department of Education that the site selection, and the building plans and specifications, comply with the standards adopted by the department pursuant to subdivisions (b) and (c), respectively, of Section 17251.

SEC. 2. Section 17072.13 is added to the Education Code, to read:

17072.13. In addition to the amounts provided pursuant to Sections 17072.10 and 17072.12, the board may provide funding as follows:

(a) For 50 percent of the cost of the evaluation of hazardous materials at a site to be acquired by a school district and for 50 percent of the other response costs of the removal of hazardous waste or solid waste, the removal of hazardous substances, or other remedial action in connection with hazardous substances at that site.

Except as provided in subdivision (b), the funding provided pursuant to this section may not exceed 50 percent of a number calculated by subtracting the school district's cost of the site from what the appraised value of the site would be after the response action is completed.

(b) The board may provide funding for up to 100 percent of the cost of the evaluation of hazardous materials at a site to be acquired by a school district eligible for financial hardship

assistance pursuant to Article 8 (commencing with Section 17075.10) and for up to 100 percent of the other response costs for the site. The funding provided pursuant to this subdivision may not exceed 100 percent of a number calculated by subtracting the school district's cost of the site from what the appraised value of the site would be after the response action is completed.

(c) A school district with a site that meets the environmental hardship criteria set forth in paragraph (1) may apply to the State Allocation Board for site acquisition funding for that site prior to having construction plans for that site approved by the Division of the State Architect and State Department of Education.

(1) A project is eligible for environmental hardship site acquisition funding if both the following apply:

(A) The remedial action plan for the site approved by the Department of Toxic Substances Control, pursuant to Section 17213, is estimated by the Department of Toxic Substances Control to take six months or more to complete.

(B) The State Department of Education determines that the site is the best available alternative site.

(2) The initial site-specific reservation pursuant to this subdivision shall be for a period of one year. Extension may be approved in one-year intervals upon demonstration to the State Allocation Board of progress toward acquisition. In the event there is not demonstrable progress, the State Allocation Board shall have the option of rescinding the reservation.

(3) Environmental hardship site acquisition funds approved by the State Allocation Board can be used only for the site identified in the remedial action plan approved by the Department of Toxic Substances Control.

(4) The date that the State Allocation Board approves the environmental hardship site acquisition funding will become the State Allocation Board approval date for the project's construction funding for that site.

(5) A school district may apply to the State Allocation Board for construction funding for the environmental hardship site when the project has received final Division of the State Architect plan approval and final State Department of Education site and plan approval.

(d) The cost incurred by the school districts when complying with any requirement identified in this section are allowable costs for purposes of an applicant under this chapter and may be reimbursed in accordance with Section 17072.12.

(e) The State Allocation Board shall develop regulations that allow school districts with financial hardship site acquisition funding prior to ownership of the site or evidence that the site is an escrow.

SEC. 3. Section 17213.2 is added to the Education Code, to read:

17213.2. As a condition of receiving state funds pursuant to Chapter 12.5 (commencing with Section 17070.10), all of the following apply:

(a) If a preliminary endangerment assessment prepared pursuant to Section 17213.1 discloses the presence of a hazardous materials release, or threatened release, or the presence of naturally occurring hazardous materials, at a proposed schoolsite at concentrations that could pose a significant risk to children or adults, and the school district owns the proposed schoolsite, the school district shall enter into an agreement with the Department of Toxic Substances Control to oversee response action at the site and shall take response action pursuant to the requirements of the state and as may be required by the Department of Toxic Substances Control.

(b) Notwithstanding subdivision (a), a school district need not take action in response to a release of hazardous material to groundwater underlying the schoolsite if the release occurred at a site other than the schoolsite and if the following conditions apply:

(1) The school district did not cause or contribute to the release of a hazardous material to the groundwater.

(2) Upon the request of the Department of Toxic Substances Control or its authorized representative the school district provides the Department of Toxic Substances Control or its authorized representative with access to the schoolsite.

(3) The school district does not interfere with the response action activities.

(c) If at anytime during the response action the school district determines that there has been a significant increase in the estimated cost of the response action, the school district shall notify the State Department of Education.

(d) A school district that is required by the Department of Toxic Substances Control to take response action at a proposed schoolsite is subject to both of the following prohibitions:

(1) The school district may not begin construction of a school building until the Department of Toxic Substances Control determines all of the following:

(A) That the construction will not interfere with the response action.

(B) That site conditions will not pose a significant threat to the health and safety of workers involved in the construction of the school building.

(C) That the nature and extent of any release or threatened release of hazardous materials or the presence of any naturally occurring hazardous materials have been fully characterized.

(2) The school district may not occupy a school building following construction until it obtains from the Department of Toxic Substances Control a certification that all response actions, except for operation and maintenance activities, necessary to ensure that hazardous materials at the schoolsite no longer pose a significant risk to children and adults at the schoolsite have been completed and that the response action standards and objectives established in the final removal action work plan or remedial action plan have been met and are being maintained. After a school building is constructed and occupied, a school district may continue with ongoing operation and maintenance activities if the Department of Toxic Substances Control certifies before occupancy that neither site conditions nor the ongoing operation and maintenance activities pose a significant risk to children or adults at the schoolsite.

(e) If, at any time during construction at a schoolsite, a previously unidentified release or threatened release of a hazardous material or the presence of a naturally occurring hazardous material is discovered, the school district shall cease all construction activities at the sites notify the Department of Toxic Substances Control, and take actions required by subdivision (a) that are necessary to address the release or threatened release or the presence of any naturally occurring hazardous materials. Construction may be resumed if the Department of Toxic Substances Control determines that the construction will not interfere with any response action necessary to address the hazardous material release or threatened release or the presence of a naturally occurring hazardous material, determines that the site conditions will not pose a significant threat to the health and safety of workers involved in

the construction of the schoolsite, and certifies that the nature and extent of the release, threatened release, or presence of a naturally occurring hazardous material have been fully characterized.

(f) Construction may proceed at any portions of the site that the Department of Toxic Substances Control determines are not affected by the release or threatened release of hazardous materials, or presence of any naturally occurring hazardous materials, provided that all of the following apply:

(1) Those portions of the site have been fully characterized.

(2) The Department of Toxic Substances Control determines that the construction will not interfere with any response action necessary to address the release or threatened release of hazardous materials, or presence of any naturally occurring hazardous materials.

(3) The site conditions will not pose a significant threat to the health and safety of workers involved with construction.

(g) The Department of Toxic Substances Control shall notify the State Department of Education, the Division of the State Architect, and the Office of Public School Construction when the Department of Toxic Substances Control certifies that all necessary response actions have been completed at a schoolsite.

(h) The school district shall reimburse the Department of Toxic Substances Control for all response costs incurred by the department.

(i) The costs incurred by the school districts when complying with this section are allowable costs for purposes of an applicant under Chapter 12.5 (commencing with Section 17070.10) of Part 10 and may be reimbursed in accordance with Section 17072.13.

SEC. 4. Section 17213.3 is added to the Education Code, to read:

17213.3. (a) The State Department of Education shall monitor the performance of the Department of Toxic Substances Control in meeting the timeframes applicable to the Department of Toxic Substances Control specified in subdivision (a) of Section 17213.1 and shall report its findings to the Department of General Services and the Department of Finance on a quarterly basis.

(b) The State Department of Education shall also report to the Department of General Services and the Department of Finance every six months for a period of two years, the amount of fees or other charges of any state agency review paid by school districts pursuant to this chapter, and any concerns about those fees or charges.

SEC. 5. Section 17268 of the Education Code is amended to read:

17268. (a) The governing board of a school district that elects not to receive state funds pursuant to Chapter 12.5 (commencing with Section 17070.10) may not approve a project for the construction of a new school building, as defined in Section 17283, unless the project and its lead agency comply with the same requirements specified in subdivision (a) of Section 17213 for schoolsite acquisition.

(b) As a condition to receiving state funds pursuant to Chapter 12.5 (commencing with Section 17070.10), the governing board of a school district may not approve a project for the construction of a new school building or schoolsite on leased or acquired land unless the project and the school district comply with the requirements specified in Sections 17213.1 and 17213.2.

(c) The project shall not be subject to subdivision (b) for a minor addition to a school if the project is eligible for a categorical or statutory exemption under guidelines issued pursuant to Section 21083 of the Public Resources Code, as set forth in the California Environmental Quality Act.

(d) "School building," as used in this section, means any building designed and constructed to be used for elementary or secondary

school purposes by a school district.

(e) The requirements of Sections 17213, 17213.1 and 17213.2 shall not apply to a schoolsite if the acquisition occurred prior to January 1, 2000, to the extent a school district is subject to the requirements set forth in those sections pursuant to a judicial order or an order issued by, or an agreement with the Department of Toxic Substances Control regarding that site, and the school district is in full compliance with that order or agreement.

(f) For purposes of this section, the acceptance of construction bids shall constitute approval of the project.

SEC. 6. If a task force is created in Assembly Bill 1207 of the 1999-2000 Regular Session by the addition of Section 105515 to the Health and Safety Code, that task force shall evaluate the effectiveness of this act in ensuring that the health and learning abilities of children attending California's schools are adequately protected. Among its recommendations to the Governor, the task force shall include any changes and improvements to the provisions of this act that would be necessary to protect the health and learning abilities of children attending California's schools.

SEC. 7. Sections 1 to 6, inclusive, of this act shall not become operative unless and until Senate Bill 162 of the 1999-2000 Regular Session is chaptered and becomes operative.

BILL NUMBER: SB 162 CHAPTERED 10/10/99

CHAPTER 1002

 AMENDED IN SENATE APRIL 14, 1999
 AMENDED IN SENATE MARCH 22, 1999
 AMENDED IN SENATE MARCH 1, 1999

INTRODUCED BY Senator Escutia

JANUARY 11, 1999

An act to add Sections 17210, 17210.1, and 17213.1 to, the Education Code, relating to school facilities.

LEGISLATIVE COUNSEL'S DIGEST

SB 162, Escutia. School facilities: contamination.

Under the Leroy F. Greene School Facilities Act of 1998, an eligible school district may receive funding for new construction of school facilities.

Existing law prohibits the governing board of a school district from approving a project involving the acquisition of a schoolsite or the construction of a school by the school district unless specified actions are taken with regard to potential contamination of the site, including a determination by the lead agency, as defined, that the property purchased or to be built upon is not the site of a current or former hazardous waste disposal site or solid waste disposal site, or a hazardous substance release site.

This bill would provide that, as a condition of receiving funding under the Leroy F. Greene School Facilities Act of 1998, the governing board of a school district is prohibited from approving the acquisition of a schoolsite, or if the school district owns or leases a schoolsite, from proceeding with the construction of a project, unless the governing board causes certain environmental assessments to be conducted that are reviewed and approved by the Department of Toxic Substances Control.

This bill would require the school district to reimburse the Department of Toxic Substances Control for all of its response costs and would provide that these costs may be reimbursed under the Leroy F. Greene School Facilities Act of 1998.

This bill would provide that a school district is not liable in any action filed against the district for making a preliminary endangerment assessment available for public review.

This bill would provide that the Carpenter-Presley-Tanner Hazardous Substance Account Act applies to schoolsites of school districts electing to receive state funds where naturally occurring hazardous materials are present, regardless of whether there has been a release of a hazardous material.

This bill would provide that it would not become operative unless and until AB 387 is chaptered and becomes operative.

THE PEOPLE OF THE STATE OF CALIFORNIA DO ENACT AS FOLLOWS:

SECTION 1. Section 17210 is added to Chapter 1 (commencing with Section 17210) of Part 10.5 of the Education Code, to read:

17210. As used in this article, the following terms have the following meanings:

(a) "Administering agency" means any agency designated pursuant to Section 25502 of the Health and Safety Code.

(b) "Environmental assessor" means a class II environmental assessor registered by the Office of Environmental Health Hazard Assessment pursuant to Chapter 6.98 (commencing with Section 25570) of Division 20 of the Health and Safety Code or a licensed hazardous substance contractor certified pursuant to Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code. A licensed hazardous substance contractor shall hold the equivalent of a degree from an accredited public or private college or university or from a private postsecondary educational institution approved by the Bureau for Private Postsecondary and Vocational Education with at least 60 units in environmental, biological, chemical, physical, or soil science; engineering; geology; environmental or public health; or a directly related science field. In addition, a contractor who conducts Phase I environmental assessments shall have a least two years experience in the preparation of those assessments and a contractor who conducts a preliminary endangerment assessment shall have at least three years experience in conducting those assessments.

(c) "Handle" has the meaning the term is given in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(d) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located.

As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substance identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(e) "Hazardous material" has the meaning the term is given in subdivision (d) of Section 25260 of the Health and Safety Code.

(f) "Operation and maintenance," "removal action work plan," "respond," "response," "response action" and "site" have the meanings those terms are given in Article 2 (commencing with Section 25310) of the state act.

(g) "Phase I environmental assessment" means a preliminary assessment of a property to determine whether there has been or may have been a release of a hazardous material, or whether a naturally occurring hazardous material is present, based on reasonably available information about the property and the area in its vicinity. A Phase I environmental assessment may include, but is not limited to, a review of public and private records of current and historical land uses, prior releases of a hazardous material, data base searches, review of relevant files of federal, state, and local agencies, visual and other surveys of the property, review of historical aerial photographs of the property and the area in its vicinity, interviews with current and previous owners and operators,

and review of regulatory correspondence and environmental reports. Sampling or testing is not required as part of the Phase I environmental assessment.

(h) "Preliminary endangerment assessment" means an activity that is performed to determine whether current or past hazardous material management practices or waste management practices have resulted in a release or threatened release of hazardous materials, or whether naturally occurring hazardous materials are present, which pose a threat to children's health, children's learning abilities, public health or the environment. A preliminary endangerment assessment requires sampling and analysis of a site, a preliminary determination of the type and extent of hazardous material contamination of the site, and a preliminary evaluation of the risks that the hazardous material contamination of a site, may pose to children's health, public health, or the environment, and shall be conducted in a manner that complies with the guidelines published by the Department of Toxic Substances Control entitled "Preliminary Endangerment Assessment: Guidance Manual," including any amendments that are determined by the Department of Toxic Substances Control to be appropriate to address issues that are unique to schoolsites.

(i) "Proposed schoolsite" means real property acquired or to be acquired or proposed for use as a schoolsite, prior to its occupancy as a school.

(j) "Regulated substance" means any material defined in subdivision (g) of Section 25532 of the Health and Safety Code.

(k) "Release" has the same meaning the term is given in Article 2 (commencing with Section 25310) of Chapter 6.8 of Division 20 of the Health and Safety Code, and includes a release described in subdivision (d) of Section 25321 of the Health and Safety Code.

(l) "Remedial action plan" means a plan approved by the Department of Toxic Substances Control pursuant to Section 25356.1 of the Health and Safety Code.

(m) "State act" means the Carpenter-Presley-Tanner Hazardous Substance Account Act (Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code).

SEC. 2. Section 17210.1 is added to the Education Code, to read:

17210.1. (a) Notwithstanding any other provision of law:

(1) For sites addressed by this article for which school districts elect to receive state funds pursuant to Chapter 12.5 (commencing with Section 17070.10), the state act applies to schoolsites where naturally occurring hazardous materials are present, regardless of whether there has been a release or there is a threatened release of a hazardous material.

(2) For sites addressed by this article for which school districts elect to receive state funds pursuant to Chapter 12.5 (commencing with Section 17070.10), all references in the state act to hazardous substances shall be deemed to include hazardous materials and all references in the state act to public health shall be deemed to include children's health.

(3) All risk assessments conducted by school districts that elect to receive state funds pursuant to Chapter 12.5 (commencing with Section 17070.10) at sites addressed by this article shall include a focus on the risks to children's health posed by a hazardous materials release or threatened release, or the presence of naturally occurring hazardous materials, on the schoolsite.

(4) The response actions selected under this article shall, at a minimum, be protective of children's health, with an ample margin of safety.

(b) In implementing this article, the Department of Toxic Substances Control shall comply with Sections 25358.7 and 25358.7.1

of the Health and Safety Code.

(c) Nothing in this article shall be construed to limit the authority of the Department of Toxic Substances Control or the State Department of Education to take any action otherwise authorized under any other provision of law.

(d) The Department of Toxic Substances Control shall comply with Chapter 6.66 (commencing with Section 25269) of Division 20 of the Health and Safety Code when recovering its costs incurred in carrying out its duties pursuant to this article.

(e) Article 11 (commencing with Section 25220) of Chapter 6.5 of Division 20 of the Health and Safety Code does not apply to schoolsites at which all necessary response actions have been completed.

SEC. 3. Section 17213.1 is added to the Education Code, to read:

17213.1. As a condition of receiving state funding pursuant to Chapter 12.5 (commencing with Section 17070.10) the governing board of a school district shall comply with subdivision (a), and is not required to comply with subdivision (a) of Section 17213, prior to the acquisition of a schoolsite, or if the school district owns or leases a schoolsite, prior to the construction of a project.

(a) Prior to acquiring a schoolsite the governing board shall contract with an environmental assessor to conduct a Phase I environmental assessment of the proposed schoolsite.

(1) The Phase I environmental assessment shall contain one of the following recommendations:

(A) A further investigation of the site is not required.

(B) A preliminary endangerment assessment is needed, including sampling or testing, to determine the following:

(i) If a release of hazardous material has occurred and, if so, the extent of the release.

(ii) If there is the threat of a release of hazardous materials.

(iii) If a naturally occurring hazardous material is present.

(2) If the Phase I environmental assessment concludes that further investigation of the site is not required, the assessment together with all documentation related to the proposed acquisition or use of the proposed schoolsite shall be submitted to the State Department of Education. A school district may submit a Phase I environmental assessment to the State Department of Education prior to its submission of other documentation related to the proposed schoolsite acquisition or use. Within 10 calendar days of receipt of the Phase I environmental assessment, the State Department of Education shall transmit the Phase I environmental assessment to the Department of Toxic Substances Control for its review and approval, which shall be conducted by the Department of Toxic Substances Control within 30 calendar days of its receipt of the assessment. If the Department of Toxic Substances Control concurs with the conclusion of the Phase I environmental assessment that a further investigation of the site is not required, the Department of Toxic Substances Control shall approve the Phase I environmental assessment and shall notify the State Department of Education and the governing board of the school district of the approval.

(3) If the Phase I environmental assessment concludes that a preliminary endangerment assessment is needed, or if the Department of Toxic Substances Control concludes that a preliminary endangerment assessment is needed, the school district shall either contract with an environmental assessor to prepare a preliminary endangerment assessment of the proposed schoolsite and enter into an agreement with the Department of Toxic Substances Control to oversee the preparation of the preliminary endangerment assessment or elect not to pursue the acquisition or construction project. The preliminary

endangerment assessment shall contain one of the following conclusions:

(A) A further investigation of the site is not required.

(B) A release of hazardous materials has occurred, and if so, the extent of the release, that there is the threat of a release of hazardous materials, or that a naturally occurring hazardous material is present, or any combination thereof.

(4) The school district shall submit the preliminary endangerment assessment to the Department of Toxic Substances Control for its review and approval. The school district shall also make the preliminary endangerment assessment available to the public for review for not less than 30 calendar days.

(5) The Department of Toxic Substances Control shall complete its review within 60 calendar days of receipt of the preliminary endangerment assessment and shall either approve or disapprove the preliminary endangerment assessment.

(6) If the Department of Toxic Substances Control disapproves the preliminary endangerment assessment, it shall inform the district of the decision, the basis for the decision, and actions necessary to secure the Department of Toxic Substances Control approval of the preliminary endangerment assessment. The school district shall take actions necessary to secure the approval of the Department of Toxic Substances Control of the preliminary endangerment assessment or elect not to pursue the acquisition or construction project.

(7) If the preliminary endangerment assessment determines that a further investigation of the site is not required and the Department of Toxic Substances Control approves this determination, it shall notify the State Department of Education and the school district of its approval. The school district may then proceed with the acquisition or construction project.

(8) If the preliminary endangerment assessment determines that a release of hazardous material has occurred, that there is the threat of a release of hazardous materials, that a naturally occurring hazardous material is present, or any combination thereof, that requires further investigation, and the Department of Toxic Substances Control approves this determination, the school district may elect not to pursue the acquisition or construction project. If the school district elects to pursue the acquisition or construction project, it shall do all of the following:

(A) Prepare a financial analysis that estimates the cost of response action that will be required at the proposed schoolsite.

(B) Assess the benefits that accrue from using the proposed schoolsite when compared to the use of alternative schoolsites, if any.

(C) Obtain the approval of the State Department of Education that the proposed schoolsite meets the schoolsite selection standards adopted by the State Department of Education pursuant to subdivision (b) of Section 17251.

(D) Evaluate the suitability of the proposed schoolsite in light of the recommended alternative schoolsite locations in order of merit if the school district has requested the assistance of the State Department of Education, based upon the standards of the State Department of Education, pursuant to subdivision (a) of Section 17251.

(9) The school district shall reimburse the Department of Toxic Substances Control for all of the department's response costs.

(b) The costs incurred by the school districts when complying with this section are allowable costs for purposes of an applicant under Chapter 12.5 (commencing with Section 17070.10) of Part 10 and may be reimbursed in accordance with Section 17072.13.

(c) A school district that releases a preliminary endangerment assessment, or information concerning a preliminary endangerment assessment, required by this section, may not be held liable in any action filed against the school district for making the preliminary endangerment assessment available for public review.

SEC. 4. Sections 1 to 3, inclusive, of this act shall not become operative unless and until Assembly Bill 387 of the 1999-2000 Regular Session is chaptered and becomes operative.

BILL NUMBER: AB 2644 CHAPTERED 09/14/00

CHAPTER 443

FILED WITH SECRETARY OF STATE SEPTEMBER 14, 2000
 APPROVED BY GOVERNOR SEPTEMBER 13, 2000
 PASSED THE ASSEMBLY AUGUST 29, 2000
 PASSED THE SENATE AUGUST 22, 2000
 AMENDED IN SENATE AUGUST 18, 2000
 AMENDED IN SENATE AUGUST 8, 2000
 AMENDED IN SENATE JUNE 28, 2000
 AMENDED IN SENATE JUNE 26, 2000
 AMENDED IN ASSEMBLY MAY 3, 2000
 AMENDED IN ASSEMBLY APRIL 11, 2000

INTRODUCED BY Assembly Member Calderon

FEBRUARY 25, 2000

An act to amend Sections 17210, 17210.1, 17213.1, and 17213.2 of, and to add Section 17072.18 to, the Education Code, relating to school facilities, and declaring the urgency thereof, to take effect immediately.

LEGISLATIVE COUNSEL'S DIGEST

AB 2644, Calderon. School facilities: contamination.

(1) Existing law defines "environmental assessor" for purposes of assessing proposed schoolsites for environmental hazards as a class II environmental assessor registered by the Office of Environmental Health Hazard Assessment or a licensed hazardous substance contractor.

This bill would include in that definition a registered professional engineer, a registered geologist, and a registered certified engineer geologist.

(2) Existing law defines a "Phase I environmental assessment."

This bill would provide that a Phase I environmental assessment conducted pursuant to the requirements adopted by the American Society for Testing and Materials for due diligence for commercial real estate transactions satisfies the requirements for conducting a Phase I environmental assessment unless and until the Department of Toxic Substances Control adopts final regulations that establish guidelines for a Phase I environmental assessment for purposes of schoolsites that impose different requirements from those imposed by the American Society for Testing and Materials.

(3) Existing law requires the Department of Toxic Substances Control to comply with provisions of law regarding public participation in response actions undertaken for certain listed sites and community advisory groups established to review and comment on the response actions conducted in affected communities.

The bill would require a school district to provide a notice to residents in the immediate area, approved in form by the Department of Toxic Substances Control, prior to the commencement of work on a preliminary endangerment assessment, thereby imposing a state-mandated local program.

(4) Existing law requires the Department of Toxic Substances Control to comply with certain provisions of law when recovering its costs incurred in carrying out its duties with regard to schoolsites.

which is otherwise eligible to receive funds under this chapter.

SEC. 2. Section 17210 of the Education Code is amended to read:

17210. As used in this article, the following terms have the following meanings:

(a) "Administering agency" means any agency designated pursuant to Section 25502 of the Health and Safety Code.

(b) "Environmental assessor" means a class II environmental assessor registered by the Office of Environmental Health Hazard Assessment pursuant to Chapter 6.98 (commencing with Section 25570) of Division 20 of the Health and Safety Code, a professional engineer registered in this state, a geologist registered in this state, a certified engineering geologist registered in this state, or a licensed hazardous substance contractor certified pursuant to Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code. A licensed hazardous substance contractor shall hold the equivalent of a degree from an accredited public or private college or university or from a private postsecondary educational institution approved by the Bureau for Private Postsecondary and Vocational Education with at least 60 units in environmental, biological, chemical, physical, or soil science; engineering; geology; environmental or public health; or a directly related science field. In addition, any person who conducts Phase I environmental assessments shall have at least two years experience in the preparation of those assessments and any person who conducts a preliminary endangerment assessment shall have at least three years experience in conducting those assessments.

(c) "Handle" has the meaning the term is given in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(d) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located.

As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substance identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(e) "Hazardous material" has the meaning the term is given in subdivision (d) of Section 25260 of the Health and Safety Code.

(f) "Operation and maintenance," "removal action work plan," "respond," "response," "response action" and "site" have the meanings those terms are given in Article 2 (commencing with Section 25310) of the state act.

(g) "Phase I environmental assessment" means a preliminary assessment of a property to determine whether there has been or may have been a release of a hazardous material, or whether a naturally occurring hazardous material is present, based on reasonably available information about the property and the area in its vicinity. A Phase I environmental assessment may include, but is not limited to, a review of public and private records of current and historical land uses, prior releases of a hazardous material, data base searches, review of relevant files of federal, state, and local agencies, visual and other surveys of the property, review of historical aerial photographs of the property and the area in its vicinity, interviews with current and previous owners and operators, and review of regulatory correspondence and environmental reports. Sampling or testing is not required as part of the Phase I environmental assessment. A Phase I environmental assessment conducted pursuant to the requirements adopted by the American Society for Testing and Materials for due diligence for commercial

real estate transactions and that includes a review of all reasonably available records and data bases regarding current and prior gas or oil wells and naturally occurring hazardous materials located on the site or located where they could potentially effect the site, satisfies the requirements of this article for conducting a Phase I environmental assessment unless and until the Department of Toxic Substances Control adopts final regulations that establish guidelines for a Phase I environmental assessment for purposes of schoolsites that impose different requirements from those imposed by the American Society for Testing and Materials.

(h) "Preliminary endangerment assessment" means an activity that is performed to determine whether current or past hazardous material management practices or waste management practices have resulted in a release or threatened release of hazardous materials, or whether naturally occurring hazardous materials are present, which pose a threat to children's health, children's learning abilities, public health or the environment. A preliminary endangerment assessment requires sampling and analysis of a site, a preliminary determination of the type and extent of hazardous material contamination of the site, and a preliminary evaluation of the risks that the hazardous material contamination of a site may pose to children's health, public health, or the environment, and shall be conducted in a manner that complies with the guidelines published by the Department of Toxic Substances Control entitled "Preliminary Endangerment Assessment: Guidance Manual," including any amendments that are determined by the Department of Toxic Substances Control to be appropriate to address issues that are unique to schoolsites.

(i) "Proposed schoolsite" means real property acquired or to be acquired or proposed for use as a schoolsite, prior to its occupancy as a school.

(j) "Regulated substance" means any material defined in subdivision (g) of Section 25532 of the Health and Safety Code.

(k) "Release" has the same meaning the term is given in Article 2 (commencing with Section 25310) of Chapter 6.8 of Division 20 of the Health and Safety Code, and includes a release described in subdivision (d) of Section 25321 of the Health and Safety Code.

(l) "Remedial action plan" means a plan approved by the Department of Toxic Substances Control pursuant to Section 25356.1 of the Health and Safety Code.

(m) "State act" means the Carpenter-Presley-Tanner Hazardous Substance Account Act (Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code).

SEC. 3. Section 17210.1 of the Education Code is amended to read:

17210.1. (a) Notwithstanding any other provision of law:

(1) For sites addressed by this article for which school districts elect to receive state funds pursuant to Chapter 12.5 (commencing with Section 17070.10), the state act applies to schoolsites where naturally occurring hazardous materials are present, regardless of whether there has been a release or there is a threatened release of a hazardous material.

(2) For sites addressed by this article for which school districts elect to receive state funds pursuant to Chapter 12.5 (commencing with Section 17070.10), all references in the state act to hazardous substances shall be deemed to include hazardous materials and all references in the state act to public health shall be deemed to include children's health.

(3) All risk assessments conducted by school districts that elect to receive state funds pursuant to Chapter 12.5 (commencing with Section 17070.10) at sites addressed by this article shall include a

focus on the risks to children's health posed by a hazardous materials release or threatened release, or the presence of naturally occurring hazardous materials, on the schoolsite.

(4) The response actions selected under this article shall, at a minimum, be protective of children's health, with an ample margin of safety.

(b) In implementing this article, a school district shall provide a notice to residents in the immediate area, approved in form by the Department of Toxic Substances Control, prior to the commencement of work on a preliminary endangerment assessment.

(c) Nothing in this article shall be construed to limit the authority of the Department of Toxic Substances Control or the State Department of Education to take any action otherwise authorized under any other provision of law.

(d) Unless the Legislature otherwise funds its costs for overseeing actions taken pursuant to this article, the Department of Toxic Substances Control shall comply with Chapter 6.66 (commencing with Section 25269) of Division 20 of the Health and Safety Code when recovering its costs incurred in carrying out its duties pursuant to this article.

(e) Article 11 (commencing with Section 25220) of Chapter 6.5 of Division 20 of the Health and Safety Code does not apply to schoolsites at which all necessary response actions have been completed.

SEC. 4. Section 17213.1 of the Education Code is amended to read:

17213.1. As a condition of receiving state funding pursuant to Chapter 12.5 (commencing with Section 17070.10) the governing board of a school district shall comply with subdivision (a), and is not required to comply with subdivision (a) of Section 17213, prior to the acquisition of a schoolsite, or if the school district owns or leases a schoolsite, prior to the construction of a project.

(a) Prior to acquiring a schoolsite the governing board shall contract with an environmental assessor to supervise the preparation of and sign a Phase I environmental assessment of the proposed schoolsite unless the governing board decides to proceed directly to a preliminary endangerment assessment, in which case it shall comply with paragraph (4).

(1) The Phase I environmental assessment shall contain one of the following recommendations:

(A) A further investigation of the site is not required.

(B) A preliminary endangerment assessment is needed, including sampling or testing, to determine the following:

(i) If a release of hazardous material has occurred and, if so, the extent of the release.

(ii) If there is the threat of a release of hazardous materials.

(iii) If a naturally occurring hazardous material is present.

(2) If the Phase I environmental assessment concludes that further investigation of the site is not required, the assessment together with all documentation related to the proposed acquisition or use of the proposed schoolsite shall be submitted to the State Department of Education. A school district may submit a Phase I environmental assessment to the State Department of Education prior to its submission of other documentation related to the proposed schoolsite acquisition or use. Within 10 calendar days of receipt of the Phase I environmental assessment and of the fee to be forwarded to the Department of Toxic Substances Control for its review of the Phase I environmental assessment, the State Department of Education shall transmit the Phase I environmental assessment to the Department of Toxic Substances Control for its review and approval, which shall be

conducted by the Department of Toxic Substances Control within 30 calendar days of its receipt of the assessment and of sufficient information to allow the Department of Toxic Substances Control to confirm that the environmental assessor signing the assessment meets the qualifications set forth in subdivision (b) of Section 17210. In those instances in which the Department of Toxic Substances Control requests additional information after receipt of the Phase I environmental assessment pursuant to paragraph (3), the Department of Toxic Substances Control shall conduct its review and approval within 30 days of its receipt of the requested additional information. If the Department of Toxic Substances Control concurs with the conclusion of the Phase I environmental assessment that a further investigation of the site is not required, the Department of Toxic Substances Control shall approve the Phase I environmental assessment and shall notify the State Department of Education and the governing board of the school district of the approval.

(3) If the Department of Toxic Substances Control determines that the Phase I environmental assessment is not complete or disapproves the Phase I environmental assessment, the department shall inform the school district of the decision, the basis for the decision, and actions necessary to secure department approval of the Phase I environmental assessment. The school district shall take actions necessary to secure the approval of the Phase I environmental assessment, elect to conduct a preliminary endangerment assessment, or elect not to pursue the acquisition or the construction project. To facilitate completion of the Phase I environmental assessment, the information required by this paragraph may be provided by telephonic or electronic means.

(4) If the Phase I environmental assessment concludes that a preliminary endangerment assessment is needed, or if the Department of Toxic Substances Control concludes after it reviews a Phase I environmental assessment pursuant to this section that a preliminary endangerment assessment is needed, the school district shall either contract with an environmental assessor to supervise the preparation of and sign a preliminary endangerment assessment of the proposed schoolsite and enter into an agreement with the Department of Toxic Substances Control to oversee the preparation of the preliminary endangerment assessment or elect not to pursue the acquisition or construction project. The agreement entered into with the Department of Toxic Substances Control may be entitled an "Environmental Oversight Agreement" and shall reference this paragraph. A school district may, with the concurrence of the Department of Toxic Substances Control, enter into an agreement with the Department of Toxic Substances Control to oversee the preparation of a preliminary endangerment assessment without first having prepared a Phase I environmental assessment. Upon request from the school district, the Director of the Department of Toxic Substances Control shall exercise its authority to designate a person to enter the site and inspect and obtain samples pursuant to Section 25358.1 of the Health and Safety Code, if the director determines that the exercise of that authority will assist in expeditiously completing the preliminary endangerment assessment. The preliminary endangerment assessment shall contain one of the following conclusions:

(A) A further investigation of the site is not required.

(B) A release of hazardous materials has occurred, and if so, the extent of the release, that there is the threat of a release of hazardous materials, or that a naturally occurring hazardous material is present, or any combination thereof.

(5) The school district shall submit a preliminary draft of the

preliminary endangerment assessment to the Department of Toxic Substances Control for its review and approval and to the State Department of Education for its files. The school district may entitle a document that is meant to fulfill the requirements of a preliminary endangerment assessment a "preliminary environmental assessment" and that document shall be deemed to be a preliminary endangerment assessment if it specifically refers to the statutory provisions whose requirements it intends to meet and the document meets the requirements of a preliminary endangerment assessment.

(6) The Department of Toxic Substances Control shall complete its review within 60 calendar days of receipt of the preliminary endangerment assessment and shall either return the preliminary draft to the school district with comments and requested modifications or requested further assessment or approve the preliminary endangerment assessment as a final draft preliminary endangerment assessment. If the final draft preliminary endangerment assessment is approved and the school district proposes to proceed with site acquisition or a construction project, the school district shall make the final draft preliminary endangerment assessment available to the public on the same basis and at the same time it makes available the draft environmental impact report or negative declaration pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) for the site, unless the document developed pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) will not be made available until more than 90 days after the final draft preliminary endangerment assessment is approved, in which case the school district shall, within 60 days of the approval of the final draft of the preliminary endangerment assessment, separately publish a notice of the availability of the final draft for public review in a local newspaper of general circulation. The school district shall hold a public hearing on the final draft preliminary endangerment assessment and the draft environmental impact report or negative declaration at the same time, pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code). All comments pertaining to the final draft preliminary endangerment assessment and the draft environmental impact report or negative declaration shall be forwarded to the Department of Toxic Substances Control immediately. If the district has complied with the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) prior to initiating the preliminary endangerment assessment, the district shall reconsider the adequacy of its approved environmental impact report or negative declaration in light of the approved final draft of the preliminary endangerment assessment and determine whether a further environmental document is necessary. The district shall hold a public hearing on the final draft preliminary endangerment assessment and its determination on the adequacy of the existing environmental documents at the same time and in the same manner as it would for a draft environmental impact report or draft negative declaration as previously set forth in this section. The Department of Toxic Substances Control shall approve or disapprove the final preliminary endangerment assessment within 30 days of the district's approval action on the environmental document prepared under the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) and shall issue notice of its determination accompanied by a statement of the basis of the determination. The school district shall consider whether any changes between the final draft and final preliminary endangerment

assessment require any change in its determination pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code). The school district shall not file its notice of determination under the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) until after the Department of Toxic Substances Control has approved the final preliminary endangerment assessment. The public participation process set forth in this section shall be used by the school district and the Department of Toxic Substances Control instead of procedures set forth in Sections 25358.7 and 25358.7.1 of the Health and Safety Code with respect to preliminary endangerment assessments. If further response actions beyond a preliminary endangerment assessment are required and the district determines that it will proceed with the acquisition or construction project, the district shall comply with the public participation requirements of Sections 25358.7 and 25358.7.1 of the Health and Safety Code and other applicable provisions of the state act with respect to those response actions.

(7) If the Department of Toxic Substances Control disapproves the final draft preliminary endangerment assessment, it shall inform the district of the decision, the basis for the decision, and actions necessary to secure the Department of Toxic Substances Control approval of the preliminary endangerment assessment. The school district shall take actions necessary to secure the approval of the Department of Toxic Substances Control of the preliminary endangerment assessment or elect not to pursue the acquisition or construction project.

(8) If the preliminary endangerment assessment determines that a further investigation of the site is not required and the Department of Toxic Substances Control approves this determination, it shall notify the State Department of Education and the school district of its approval. The school district may then proceed with the acquisition or construction project.

(9) If the preliminary endangerment assessment determines that a release of hazardous material has occurred, that there is the threat of a release of hazardous materials, that a naturally occurring hazardous material is present, or any combination thereof, that requires further investigation, and the Department of Toxic Substances Control approves this determination, the school district may elect not to pursue the acquisition or construction project. If the school district elects to pursue the acquisition or construction project, it shall do all of the following:

(A) Prepare a financial analysis that estimates the cost of response action that will be required at the proposed schoolsite.

(B) Assess the benefits that accrue from using the proposed schoolsite when compared to the use of alternative schoolsites, if any.

(C) Obtain the approval of the State Department of Education that the proposed schoolsite meets the schoolsite selection standards adopted by the State Department of Education pursuant to subdivision (b) of Section 17251.

(D) Evaluate the suitability of the proposed schoolsite in light of the recommended alternative schoolsite locations in order of merit if the school district has requested the assistance of the State Department of Education, based upon the standards of the State Department of Education, pursuant to subdivision (a) of Section 17251.

(10) The school district shall reimburse the Department of Toxic Substances Control for all of the department's response costs.

(b) The costs incurred by the school districts when complying with

this section are allowable costs for purposes of an applicant under Chapter 12.5 (commencing with Section 17070.10) of Part 10 and may be reimbursed in accordance with Section 17072.13.

(c) A school district that releases a Phase I environmental assessment, a preliminary endangerment assessment, or information concerning either of these assessments, any of which is required by this section, may not be held liable in any action filed against the school district for making either of these assessments available for public review.

SEC. 5. Section 17213.2 of the Education Code is amended to read:

17213.2. As a condition of receiving state funds pursuant to Chapter 12.5 (commencing with Section 17070.10), all of the following apply:

(a) If a preliminary endangerment assessment prepared pursuant to Section 17213.1 discloses the presence of a hazardous materials release, or threatened release, or the presence of naturally occurring hazardous materials, at a proposed schoolsite at concentrations that could pose a significant risk to children or adults, and the school district owns the proposed schoolsite, the school district shall enter into an agreement with the Department of Toxic Substances Control to oversee response action at the site and shall take response action pursuant to the requirements of the state act as may be required by the Department of Toxic Substances Control.

(b) Notwithstanding subdivision (a), a school district need not take action in response to a release of hazardous material to groundwater underlying the schoolsite if the release occurred at a site other than the schoolsite and if the following conditions apply:

(1) The school district did not cause or contribute to the release of a hazardous material to the groundwater.

(2) Upon the request of the Department of Toxic Substances Control or its authorized representative the school district provides the Department of Toxic Substances Control or its authorized representative with access to the schoolsite.

(3) The school district does not interfere with the response action activities.

(c) If at anytime during the response action the school district determines that there has been a significant increase in the estimated cost of the response action, the school district shall notify the State Department of Education.

(d) A school district that is required by the Department of Toxic Substances Control to take response action at a proposed schoolsite is subject to both of the following prohibitions:

(1) The school district may not begin construction of a school building until the Department of Toxic Substances Control determines all of the following:

(A) That the construction will not interfere with the response action.

(B) That site conditions will not pose a significant threat to the health and safety of workers involved in the construction of the school building.

(C) That the nature and extent of any release or threatened release of hazardous materials or the presence of any naturally occurring hazardous materials have been fully characterized.

(2) The school district may not occupy a school building following construction until it obtains from the Department of Toxic Substances Control a certification that all response actions, except for operation and maintenance activities, necessary to ensure that

hazardous materials at the schoolsite no longer pose a significant risk to children and adults at the schoolsite have been completed and that the response action standards and objectives established in the final removal action work plan or remedial action plan have been met and are being maintained. After a school building

is constructed and occupied, a school district may continue with ongoing operation and maintenance activities if the Department of Toxic Substances Control certifies before occupancy that neither site conditions nor the ongoing operation and maintenance activities pose a significant risk to children or adults at the schoolsite.

(e) If, at anytime during construction at a schoolsite, a previously unidentified release or threatened release of a hazardous material or the presence of a naturally occurring hazardous material is discovered, the school district shall cease all construction activities at the sites notify the Department of Toxic Substances Control, and take actions required by subdivision (a) that are necessary to address the release or threatened release or the presence of any naturally occurring hazardous materials. Construction may be resumed if the Department of Toxic Substances Control determines that the construction will not interfere with any response action necessary to address the hazardous material release or threatened release or the presence of a naturally occurring hazardous material, determines that the site conditions will not pose a significant threat to the health and safety of workers involved in the construction of the schoolsite, and certifies that the nature and extent of the release, threatened release, or presence of a naturally occurring hazardous material have been fully characterized.

(f) Construction may proceed at any portions of the site that the Department of Toxic Substances Control determines are not affected by the release or threatened release of hazardous materials, or presence of any naturally occurring hazardous materials, provided that all of the following apply:

- (1) Those portions of the site have been fully characterized.
- (2) The Department of Toxic Substances Control determines that the construction will not interfere with any response action necessary to address the release or threatened release of hazardous materials, or presence of any naturally occurring hazardous materials.
- (3) The site conditions will not pose a significant threat to the health and safety of workers involved with construction.

(g) The Department of Toxic Substances Control shall notify the State Department of Education, the Division of the State Architect, and the Office of Public School Construction when the Department of Toxic Substances Control certifies that all necessary response actions have been completed at a schoolsite. The Department of Toxic Substances Control shall also notify the Division of the State Architect whenever a response action has an impact on the design of a school facility and shall specify the conditions that must be met in the design of the school facility in order to protect the integrity of the response action.

(h) The school district shall reimburse the Department of Toxic Substances Control for all response costs incurred by the department.

(i) The costs incurred by the school districts when complying with this section are allowable costs for purposes of an applicant under Chapter 12.5 (commencing with Section 17070.10) of Part 10 and may be reimbursed in accordance with Section 17072.13.

SEC. 6. Notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains

costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars (\$1,000,000), reimbursement shall be made from the State Mandates Claims Fund.

SEC. 7. This act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting the necessity are:

In order to ensure that school districts receive state funding by complying with the Phase I environmental assessment requirement, it is necessary that this act take effect immediately.

BILL NUMBER: SB 662 CHAPTERED 08/09/01

CHAPTER 159
FILED WITH SECRETARY OF STATE AUGUST 9, 2001
APPROVED BY GOVERNOR AUGUST 8, 2001
PASSED THE SENATE JULY 21, 2001
PASSED THE ASSEMBLY JUNE 29, 2001
AMENDED IN ASSEMBLY JUNE 25, 2001

INTRODUCED BY Committee on Judiciary (Senators Escutia (Chair),
Kuehl, O'Connell, Peace, and Sher)

FEBRUARY 23, 2001

An act to amend Sections 27, 113, 130, 144, 350, 1647.11, 2570.6, 2570.8, 2570.19, 2995, 3059, 3364, 3403, 4059, 4312, 4980.80, 4980.90, 4996.6, 5111, 5536, 6403, 6716, 6730.2, 6756, 7092, 7583.11, 8027, 8773.4, 10167.2, and 21702 of the Business and Professions Code, to amend Sections 1748.10, 1748.11, 1810.21, 2954.4, 2954.5, and 3097 of, and to amend and renumber Section 1834.8 of, the Civil Code, to amend Sections 403.020, 645.1, 674, and 699.510 of the Code of Civil Procedure, to amend Sections 9323, 9331, and 9408 of the Commercial Code, to amend Sections 2200, 6810, 17540.3, 25102, 25103, and 25120 of the Corporations Code, to amend Sections 313, 406, 426, 427, 11700, 17071.46, 17210, 17317, 17610.5, 22660, 22950, 25933, 33126.1, 37252, 37252.2, 37619, 41329.1, 42239, 44114, 45023.1, 48664, 52054, 52270, 52485, 54749, 56045, 56845, 69432.7, 69434.5, 69437.6, 69439, 69613.1, 87164, and 92901 of, and to amend and renumber Sections 45005.25 and 45005.30 of, the Education Code, to amend Sections 1405, 8040, 9118, and 15375 of the Elections Code, to amend Section 17504 of the Family Code, to amend Sections 761.5, 4827, 16024, 16501, and 18586 of the Financial Code, to amend Sections 1506, 2921, and 8276.3 of the Fish and Game Code, to amend Sections 492, 6046, and 75131 of the Food and Agricultural Code, to amend Sections 3543.4, 3562.2, 3583.5, 6254, 6516.6, 6599.2, 7074, 18935, 20028, 20300, 20392, 21006, 21547.7, 30064.1, 31461.3, 31681.55, 31835.02, 38773.6, 55720, 65584, 65585.1, and 75059.1 of the Government Code, to amend Sections 444.21, 1358.11, 11836, 11877.2, 17922, 25358.6.1, 39619.6, 104170, 105112, 111656.5, 111656.13, 114145, 123111, and 124900 of, to amend and renumber Section 104320 of, and to amend and renumber the heading of Article 10.5 (commencing with Section 1399.801) of Chapter 2.2 of Division 2 of, the Health and Safety Code, to amend Sections 789.8, 1215.1, 1871, 1872.83, 10123.135, 10178.3, 10192.11, 10231.2, 10236, 10506.5, 11621.2, 11784, 11786, 11787, and 12698 of the Insurance Code, to amend Sections 90.5, 129, 230.1, 4455, and 4609 of the Labor Code, to amend Section 1048 of the Military and Veterans Code, to amend Sections 272, 417.2, 646:94, and 3058.65 of the Penal Code, to amend Sections 1813 and 16062 of the Probate Code, to amend Sections 10129 and 20209.7 of the Public Contract Code, to amend Sections 5090.51, 14581, 36710, and 42923 of the Public Resources Code, to amend Sections 383.5, 2881.2, 7943, 9608, 9610, and 12702.5 of, and to amend and renumber Section 399.15 of, the Public Utilities Code, to amend Sections 75.11, 75.21, 97.3, 214, 23622.8, 23646, 44006, and 45153 of the Revenue and Taxation Code, to amend Section 1110 of the Unemployment Insurance Code, to amend Section 4000.37 of the Vehicle Code, to amend Sections 1789.5, 4098.1, 5614, 8102, 10082, 14005.28, 14005.35, 14008.6, 14087.32, and 14105.26 of the Welfare and Institutions Code, and to amend Section 511 of the San Gabriel Basin Water Quality Authority Act (Chapter 776 of the Statutes of 1992),

(d) The Center for International Education Synergy shall be established only upon approval by the California Postsecondary Education Commission based on a needs study and subsequent approval from the Department of Finance.

SEC. 55. Section 17071.46 of the Education Code is amended to read:

17071.46. (a) When an applicant school district proposes to demolish a single story building and replace it with a multistory building on the same site, the State Allocation Board shall provide a supplemental grant for 50 percent of the replacement cost of the single story building to be demolished, if all of the following conditions are met:

(1) The school at which the building demolition and replacement is to occur is operating on a multitrack year-round education schedule.

(2) The cost of the demolition and replacement is less than the total cost of providing a new school facility, including land, on a new site for the additional number of pupils housed as a result of the replacement building, as determined by the State Allocation Board.

(3) The school district will maximize the increase in pupil capacity on the site when it builds the replacement building, subject to the limits imposed on it pursuant to paragraph (4).

(4) The State Department of Education has determined that the demolition of an existing single story building and replacement with a multistory building at the site is the best available alternative and will not create a school with an inappropriate number of pupils in relation to the size of the site, as determined by the State Department of Education.

(b) The State Allocation Board shall establish additional requirements it deems necessary to ensure that the economic interests of the state and the educational interests of the children of the state are protected.

SEC. 56. Section 17210 of the Education Code is amended to read:

17210. As used in this article, the following terms have the following meanings:

(a) "Administering agency" means any agency designated pursuant to Section 25502 of the Health and Safety Code.

(b) "Environmental assessor" means a class II environmental assessor registered by the Office of Environmental Health Hazard Assessment pursuant to Chapter 6.98 (commencing with Section 25570) of Division 20 of the Health and Safety Code, a professional engineer registered in this state, a geologist registered in this state, a certified engineering geologist registered in this state, or a licensed hazardous substance contractor certified pursuant to Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code. A licensed hazardous substance contractor shall hold the equivalent of a degree from an accredited public or private college or university or from a private postsecondary educational institution approved by the Bureau for Private Postsecondary and Vocational Education with at least 60 units in environmental, biological, chemical, physical, or soil science; engineering; geology; environmental or public health; or a directly related science field. In addition, any person who conducts phase I environmental assessments shall have at least two years' experience in the preparation of those assessments and any person who conducts a preliminary endangerment assessment shall have at least three years'

experience in conducting those assessments.

(c) "Handle" has the meaning the term is given in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(d) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located.

As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substance identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(e) "Hazardous material" has the meaning the term is given in subdivision (d) of Section 25260 of the Health and Safety Code.

(f) "Operation and maintenance," "removal action work plan," "respond," "response," "response action," and "site" have the meanings those terms are given in Article 2 (commencing with Section 25310) of the state act.

(g) "Phase I environmental assessment" means a preliminary assessment of a property to determine whether there has been or may have been a release of a hazardous material, or whether a naturally occurring hazardous material is present, based on reasonably available information about the property and the area in its vicinity. A phase I environmental assessment may include, but is not limited to, a review of public and private records of current and historical land uses, prior releases of a hazardous material, data base searches, review of relevant files of federal, state, and local agencies, visual and other surveys of the property, review of historical aerial photographs of the property and the area in its vicinity, interviews with current and previous owners and operators, and review of regulatory correspondence and environmental reports. Sampling or testing is not required as part of the phase I environmental assessment. A phase I environmental assessment conducted pursuant to the requirements adopted by the American Society for Testing and Materials for due diligence for commercial real estate transactions and that includes a review of all reasonably available records and data bases regarding current and prior gas or oil wells and naturally occurring hazardous materials located on the site or located where they could potentially effect the site, satisfies the requirements of this article for conducting a phase I environmental assessment unless and until the Department of Toxic Substances Control adopts final regulations that establish guidelines for a phase I environmental assessment for purposes of schoolsites that impose different requirements from those imposed by the American Society for Testing and Materials.

(h) "Preliminary endangerment assessment" means an activity that is performed to determine whether current or past hazardous material management practices or waste management practices have resulted in a release or threatened release of hazardous materials, or whether naturally occurring hazardous materials are present, which pose a threat to children's health, children's learning abilities, public health or the environment. A preliminary endangerment assessment requires sampling and analysis of a site, a preliminary determination of the type and extent of hazardous material contamination of the site, and a preliminary evaluation of the risks that the hazardous material contamination of a site may pose to children's health, public health, or the environment, and shall be conducted in a manner

that complies with the guidelines published by the Department of Toxic Substances Control entitled "Preliminary Endangerment Assessment: Guidance Manual," including any amendments that are determined by the Department of Toxic Substances Control to be appropriate to address issues that are unique to schoolsites.

(i) "Proposed schoolsite" means real property acquired or to be acquired or proposed for use as a schoolsite, prior to its occupancy as a school.

(j) "Regulated substance" means any material defined in subdivision (g) of Section 25532 of the Health and Safety Code.

(k) "Release" has the same meaning the term is given in Article 2 (commencing with Section 25310) of Chapter 6.8 of Division 20 of the Health and Safety Code, and includes a release described in subdivision (d) of Section 25321 of the Health and Safety Code.

(l) "Remedial action plan" means a plan approved by the Department of Toxic Substances Control pursuant to Section 25356.1 of the Health and Safety Code.

(m) "State act" means the Carpenter-Presley-Tanner Hazardous Substance Account Act (Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code).

SEC. 57. Section 17317 of the Education Code is amended to read:

17317. (a) The Department of General Services shall, in consultation with the Seismic Safety Commission, conduct an inventory of public school buildings that are concrete tilt-up school buildings and school buildings with nonwood frame walls that do not meet the minimum requirements of the 1976 Uniform Building Code. Priority shall be given to the school buildings identified in the act that added this section that are in the highest seismic risk zones in accordance with the seismic hazard maps of the Division of Mines and Geology of the Department of Conservation.

(b) The Department of General Services shall submit a report by December 31, 2001, to the Legislature and the Governor that summarizes the findings of the seismic safety inventory and makes recommendations about future actions that should be taken to address the problems found by the seismic safety inventory. The report shall not identify individual schoolsites on which inventoried school buildings are located.

SEC. 58. Section 17610.5 of the Education Code is amended to read:

17610.5. Sections 17611 and 17612 shall not apply to a pesticide product deployed in the form of a self-contained bait or trap, to gel or paste deployed as a crack and crevice treatment, to any pesticide exempted from regulation by the United States Environmental Protection Agency pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. Sec. 136 et seq.), or to antimicrobial pesticides, including sanitizers and disinfectants.

SEC. 59. Section 22660 of the Education Code is amended to read:

22660. (a) The nonmember spouse who is awarded a separate account under this part shall have the right to designate, pursuant to Sections 23300 to 23304, inclusive, a beneficiary or beneficiaries to receive the accumulated retirement contributions under the Defined Benefit Program and to designate a payee to receive the accumulated Defined Benefit Supplement account balance under the Defined Benefit Supplement Program remaining in the separate account of the nonmember spouse on his or her date of death, and any accrued allowance or accrued benefit under the Defined Benefit Supplement Program that is

(3) Within six months after the completion of the revision of all housing elements in the region, the council of governments, with input from the cities and county within its jurisdiction, the housing element advisory committee, and qualified consultant shall report to the Legislature on the use and results of the self-certification process by local governments within its jurisdic

BILL NUMBER: AB 1478 CHAPTERED 10/02/01

CHAPTER 422

FILED WITH SECRETARY OF STATE OCTOBER 2, 2001

APPROVED BY GOVERNOR OCTOBER 1, 2001

PASSED THE ASSEMBLY SEPTEMBER 13, 2001

PASSED THE SENATE SEPTEMBER 10, 2001

AMENDED IN SENATE JUNE 27, 2001

INTRODUCED BY Assembly Member Salinas

FEBRUARY 23, 2001

An act to amend Sections 17212.5 and 17295 of the Education Code, relating to school facilities.

LEGISLATIVE COUNSEL'S DIGEST

AB 1478, Salinas. School construction approval.

Existing law establishes various requirements regarding the siting and construction of school facilities, including, but not limited to, the requirement that prescribed geological and soil engineering studies be conducted for the construction of any school building, as defined, within the boundaries of special studies zones or if the costs of construction exceeds \$20,000.

This bill would increase that amount to \$25,000, would require an annual inflation adjustment for this amount, and would make technical, nonsubstantive, changes in related provisions.

THE PEOPLE OF THE STATE OF CALIFORNIA DO ENACT AS FOLLOWS:

SECTION 1. Section 17212.5 of the Education Code is amended to read:

17212.5. Geological and soil engineering studies as described in Section 17212 shall be made, within the boundaries of any special studies zone, for the construction of any school building as defined in Section 17283, or if the estimated cost exceeds twenty-five thousand dollars (\$25,000), for the reconstruction or alteration of or addition to any school building for work which alters structural elements. The Department of General Services may require similar geological and soil engineering studies for the construction or alteration of any school building on a site located outside of the boundaries of any special studies zone. No studies need be made if the site under consideration has been the subject of adequate prior studies.

No school building shall be constructed, reconstructed, or relocated on the trace of a geological fault along which surface rupture can reasonably be expected to occur within the life of the school building.

A copy of the report of each investigation conducted pursuant to this section shall be submitted to the Department of General Services pursuant to Article 3 (commencing with Section 17280) of this chapter and to the State Department of Education. The cost of geological and soil engineering studies and investigations conducted pursuant to this section may be treated as a capital expenditure. The dollar amount set forth in this section shall be increased on an

annual basis, according to a construction costs inflation index recognized and selected by the department.

SEC. 2. Section 17295 of the Education Code is amended to read:

17295. (a) (1) The Department of General Services shall pass upon and approve or reject all plans for the construction or, if the estimated cost exceeds twenty-five thousand dollars (\$25,000), the alteration of any school building.

(2) To enable the Department of General Services to pass upon and approve plans pursuant to this subdivision, the governing board of each school district and any other school authority before adopting any plans for the school building shall submit the plans to the Department of General Services for approval, and shall pay the fees prescribed in this article.

(b) Notwithstanding subdivision (a) of Section 17295, where the estimated cost of the reconstruction or alteration of, or an addition to, any school building exceeds twenty-five thousand dollars (\$25,000) but does not exceed one hundred thousand dollars (\$100,000), a licensed structural engineer shall examine the proposed project to determine if it is a nonstructural alteration or a structural alteration. If he or she determines that the project is a nonstructural alteration, he or she shall prepare a statement so indicating. If he or she determines that the project is structural, he or she shall prepare plans and specifications for the project which shall be submitted to the Department of General Services for review and approval. A copy of the engineer's report stating that the work does not affect structural elements shall be filed with the Department of General Services.

(c) If a licensed structural engineer submits a report to the Department of General Services stating that the plans or activities authorized pursuant to subdivision (b) do not involve structural elements, then all of the following shall apply to that project:

(1) The design professional in responsible charge of the project undertaken pursuant to this subdivision shall certify that the plans and specifications for the project meet any applicable fire and life safety standards, and do not affect the disabled access requirements of Section 4450 of the Government Code, and shall submit this certification to the department. The letter of certification shall bear the identifying licensing stamp or seal of the design professional. This provision does not preclude a design professional from submitting plans and specifications to the department along with the appropriate fee for review.

(2) Within 10 days of the completion of any project authorized pursuant to subdivision (b), the school construction inspector of record on the project, who is certified by the department to inspect school buildings, shall certify in writing to the department that the reconstruction, alteration, or addition has been completed in compliance with the plans and specifications.

(3) The dollar amounts cited in this section shall be increased on an annual basis, commencing January 1, 1999, by the department according to an inflationary index governing construction costs that is selected and recognized by the department.

(4) No school district shall subdivide a project for the purpose of evading the limitation on amounts cited in this section.

(d) For purposes of this section, "design professional in responsible charge" or "design professional" means the licensed architect, licensed structural engineer, or licensed civil engineer who is responsible for the completion of the design work involved with the project.

BILL NUMBER: AB 972 CHAPTERED 10/14/01

CHAPTER 865
FILED WITH SECRETARY OF STATE OCTOBER 14, 2001
APPROVED BY GOVERNOR OCTOBER 13, 2001

PASSED THE SENATE SEPTEMBER 6, 2001
AMENDED IN SENATE SEPTEMBER 4, 2001
AMENDED IN SENATE JUNE 25, 2001
AMENDED IN ASSEMBLY MAY 25, 2001
AMENDED IN ASSEMBLY MAY 2, 2001
AMENDED IN ASSEMBLY MARCH 27, 2001

INTRODUCED BY Assembly Member Calderon

FEBRUARY 23, 2001

An act to amend Sections 17210.1 and 17213.1 of the Education Code, relating to school facilities, and declaring the urgency thereof, to take effect immediately.

LEGISLATIVE COUNSEL'S DIGEST

AB 972, Calderon. School facilities: preliminary endangerment assessment: Phase I environmental assessment.

(1) Existing law requires a school district, in implementing provisions of law concerning the selection of schoolsites, to provide a notice to residents in the immediate area, approved in form by the Department of Toxic Substances Control, prior to the commencement of work on a preliminary endangerment assessment.

This bill would instead require a school district to provide this notice utilizing a format developed by the Department of Toxic Substances Control.

(2) Existing law requires the governing board of a school district, as a condition of receiving state funding under the Leroy F. Greene School Facilities Act (Greene Act) of 1998, to conduct a Phase I environmental assessment of a proposed schoolsite before acquiring the site. A school district is required to submit a Phase I environmental assessment to the State Department of Education, if that assessment concludes that further investigation of the site is not required.

This bill would require the school district to additionally submit proof of the environmental assessor's qualifications to the state department, thereby imposing a state-mandated local program by imposing new duties upon school districts with regard to the submission of a Phase I environmental assessment.

The bill would exempt a schoolsite acquisition project or a school construction program from the changes made by this bill if the final preliminary endangerment assessment for the schoolsite acquisition or construction project is approved by the Department of Toxic Substances Control, or a public hearing for the project is completed, pursuant to the law in effect on that date of the approval or hearing, and if the hearing or approval took place on or before the effective date of the bill.

(3) Existing law requires the Department of Toxic Substances Control to complete its review within 60 calendar days of receipt of a preliminary endangerment assessment from a school district and to return the preliminary draft to the school district with comments and

request modifications, request further assessment, or approve the preliminary endangerment assessment as a final draft preliminary endangerment assessment. Existing law specifies procedures for the public review and approval of the final draft preliminary endangerment assessment and requires the school district to reconsider the adequacy of its approved environmental impact report or negative declaration in light of the approved final draft of the preliminary endangerment assessment, if the district has complied with the California Environmental Quality Act prior to initiating the preliminary endangerment assessment.

This bill would repeal those provisions regarding the review of the final draft preliminary endangerment assessment by the department and the reconsideration of the adequacy of the environmental impact report or negative declaration. The bill would instead require a school district, at the same time the school district submits a preliminary endangerment assessment to the Department of Toxic Substances Control, to publish a notice of submission in a local newspaper of general circulation, to post the notice at the proposed schoolsite, and to choose one of 2 specified procedures for making the preliminary endangerment assessment available to the Department of Toxic Substances Control and the public for review and comment.

The bill would impose a state-mandated local program by imposing new duties upon school districts with regard to the review of a preliminary endangerment assessment.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

THE PEOPLE OF THE STATE OF CALIFORNIA DO ENACT AS FOLLOWS:

SECTION 1. Section 17210.1 of the Education Code is amended to read:

17210.1. (a) Notwithstanding any other provision of law:

(1) For sites addressed by this article for which school districts elect to receive state funds pursuant to Chapter 12.5 (commencing with Section 17070.10) of Part 10, the state act applies to schoolsites where naturally occurring hazardous materials are present, regardless of whether there has been a release or there is a threatened release of a hazardous material.

(2) For sites addressed by this article for which school districts elect to receive state funds pursuant to Chapter 12.5 (commencing with Section 17070.10) of Part 10, all references in the state act to hazardous substances shall be deemed to include hazardous materials and all references in the state act to public health shall be deemed to include children's health.

(3) All risk assessments conducted by school districts that elect to receive state funds pursuant to Chapter 12.5 (commencing with Section 17070.10) of Part 10 at sites addressed by this article shall

include a focus on the risks to children's health posed by a hazardous materials release or threatened release, or the presence of naturally occurring hazardous materials, on the schoolsite.

(4) The response actions selected under this article shall, at a minimum, be protective of children's health, with an ample margin of safety.

(b) In implementing this article, a school district shall provide a notice to residents in the immediate area prior to the commencement of work on a preliminary endangerment assessment utilizing a format developed by the Department of Toxic Substances Control.

(c) Nothing in this article shall be construed to limit the authority of the Department of Toxic Substances Control or the State Department of Education to take any action otherwise authorized under any other provision of law.

(d) Unless the Legislature otherwise funds its costs for overseeing actions taken pursuant to this article, the Department of Toxic Substances Control shall comply with Chapter 6.66 (commencing with Section 25269) of Division 20 of the Health and Safety Code when recovering its costs incurred in carrying out its duties pursuant to this article.

(e) Article 11 (commencing with Section 25220) of Chapter 6.5 of Division 20 of the Health and Safety Code does not apply to schoolsites at which all necessary response actions have been completed.

SEC. 2. Section 17213.1 of the Education Code is amended to read:

17213.1. As a condition of receiving state funding pursuant to Chapter 12.5 (commencing with Section 17070.10), the governing board of a school district shall comply with subdivision (a), and is not required to comply with subdivision (a) of Section 17213, prior to the acquisition of a schoolsite, or if the school district owns or leases a schoolsite, prior to the construction of a project.

(a) Prior to acquiring a schoolsite, the governing board shall contract with an environmental assessor to supervise the preparation of, and sign, a Phase I environmental assessment of the proposed schoolsite unless the governing board decides to proceed directly to a preliminary endangerment assessment, in which case it shall comply with paragraph (4).

(1) The Phase I environmental assessment shall contain one of the following recommendations:

(A) A further investigation of the site is not required.

(B) A preliminary endangerment assessment is needed, including sampling or testing, to determine the following:

(i) If a release of hazardous material has occurred and, if so, the extent of the release.

(ii) If there is the threat of a release of hazardous materials.

(iii) If a naturally occurring hazardous material is present.

(2) If the Phase I environmental assessment concludes that further investigation of the site is not required, the assessment, together with all documentation related to the proposed acquisition or use of the proposed schoolsite, shall be submitted to the State Department of Education. A school district may submit a Phase I environmental assessment to the State Department of Education and proof that the environmental assessor meets the qualifications specified in subdivision (b) of Section 17210 prior to its submission of other documentation related to the proposed schoolsite acquisition or use. Within 10 calendar days after the State Department of Education receives the Phase I environmental assessment, the proof of the environmental assessor's qualifications, and the fee to be forwarded to the Department of Toxic Substances Control for its review of the

Phase I environmental assessment, the State Department of Education shall transmit that assessment and that proof of the environmental assessor's qualifications to the Department of Toxic Substances Control for its review and approval, which shall be conducted by the Department of Toxic Substances Control within 30 calendar days of its receipt of that assessment and that proof of qualifications. In those instances in which the Department of Toxic Substances Control requests additional information after receipt of the Phase I environmental assessment pursuant to paragraph (3), the Department of Toxic Substances Control shall conduct its review and approval within 30 days of its receipt of the requested additional information. If the Department of Toxic Substances Control concurs with the conclusion of the Phase I environmental assessment that a further investigation of the site is not required, the Department of Toxic Substances Control shall approve the Phase I environmental assessment and shall notify the State Department of Education and the governing board of the school district of the approval.

(3) If the Department of Toxic Substances Control determines that the Phase I environmental assessment is not complete or disapproves the Phase I environmental assessment, the department shall inform the school district of the decision, the basis for the decision, and actions necessary to secure department approval of the Phase I environmental assessment. The school district shall take actions necessary to secure the approval of the Phase I environmental assessment, elect to conduct a preliminary endangerment assessment, or elect not to pursue the acquisition or the construction project. To facilitate completion of the Phase I environmental assessment, the information required by this paragraph may be provided by telephonic or electronic means.

(4) If the Phase I environmental assessment concludes that a preliminary endangerment assessment is needed, or if the Department of Toxic Substances Control concludes after it reviews a Phase I environmental assessment pursuant to this section that a preliminary endangerment assessment is needed, the school district shall either contract with an environmental assessor to supervise the preparation of, and sign, a preliminary endangerment assessment of the proposed schoolsite and enter into an agreement with the Department of Toxic Substances Control to oversee the preparation of the preliminary endangerment assessment or elect not to pursue the acquisition or construction project. The agreement entered into with the Department of Toxic Substances Control may be entitled an "Environmental Oversight Agreement" and shall reference this paragraph. A school district may, with the concurrence of the Department of Toxic Substances Control, enter into an agreement with the Department of Toxic Substances Control to oversee the preparation of a preliminary endangerment assessment without first having prepared a Phase I environmental assessment. Upon request from the school district, the Director of the Department of Toxic Substances Control shall exercise its authority to designate a person to enter the site and inspect and obtain samples pursuant to Section 25358.1 of the Health and Safety Code, if the director determines that the exercise of that authority will assist in expeditiously completing the preliminary endangerment assessment. The preliminary endangerment assessment shall contain one of the following conclusions:

(A) A further investigation of the site is not required.

(B) A release of hazardous materials has occurred, and if so, the extent of the release, that there is the threat of a release of hazardous materials, or that a naturally occurring hazardous material is present, or any combination thereof.

(5) The school district shall submit the preliminary endangerment

assessment to the Department of Toxic Substances Control for its review and approval and to the State Department of Education for its files. The school district may entitle a document that is meant to fulfill the requirements of a preliminary endangerment assessment a "preliminary environmental assessment" and that document shall be deemed to be a preliminary endangerment assessment if it specifically refers to the statutory provisions whose requirements it intends to meet and the document meets the requirements of a preliminary endangerment assessment.

(6) At the same time a school district submits a preliminary endangerment assessment to the Department of Toxic Substances Control pursuant to paragraph (5), the school district shall publish a notice that the assessment has been submitted to the department in a local newspaper of general circulation, and shall post the notice in a prominent manner at the proposed schoolsite that is the subject of that notice. The notice shall state the school district's determination to make the preliminary endangerment assessment available for public review and comment pursuant to subparagraph (A) or (B):

(A) If the school district chooses to make the assessment available for public review and comment pursuant to this subparagraph, it shall offer to receive written comments for a period of at least 30 calendar days after the assessment is submitted to the Department of Toxic Substances Control, commencing on the date the notice is originally published, and shall hold a public hearing to receive further comments. The school district shall make all of the following documents available to the public upon request through the time of the public hearing:

- (i) The preliminary endangerment assessment.
- (ii) The changes requested by the Department of Toxic Substances Control for the preliminary endangerment assessment, if any.
- (iii) Any correspondence between the school district and the Department of Toxic Substances Control that relates to the preliminary endangerment assessment.

For the purposes of this subparagraph, the notice of the public hearing shall include the date and location of the public hearing, and the location where the public may review the documents described in clauses (i) to (iii), inclusive. If the preliminary endangerment assessment is revised or altered following the public hearing, the school district shall make those revisions or alterations available to the public. The school district shall transmit a copy of all public comments received by the school district on the preliminary endangerment assessment to the Department of Toxic Substances Control. The Department of Toxic Substances Control shall complete its review of the preliminary endangerment assessment and public comments received thereon and shall either approve or disapprove the assessment within 30 calendar days of the close of the public review period. If the Department of Toxic Substances Control determines that it is likely to disapprove the assessment prior to its receipt of the public comments, it shall inform the school district of that determination and of any action that the school district is required to take for the Department of Toxic Substances Control to approve the assessment.

(B) If the school district chooses to make the preliminary endangerment assessment available for public review and comment pursuant to this subparagraph, the Department of Toxic Substances Control shall complete its review of the assessment within 60 calendar days of receipt of the assessment and shall either return the assessment to the school district with comments and requested modifications or requested further assessment or concur with the

adequacy of the assessment pending review of public comment. If the Department of Toxic Substances Control concurs with the adequacy of the assessment, and the school district proposes to proceed with site acquisition or a construction project, the school district shall make the assessment available to the public on the same basis and at the same time it makes available the draft environmental impact report or negative declaration pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) for the site, unless the document developed pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) will not be made available until more than 90 days after the assessment is approved, in which case the school district shall, within 60 days of the approval of the assessment, separately publish a notice of the availability of the assessment for public review in a local newspaper of general circulation. The school district shall hold a public hearing on the preliminary endangerment assessment and the draft environmental impact report or negative declaration at the same time, pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code). All public comments pertaining to the preliminary endangerment assessment shall be forwarded to the Department of Toxic Substances Control immediately. The Department of Toxic Substances Control shall review the public comments forwarded by the school district and shall approve or disapprove the preliminary endangerment assessment within 30 days of the district's approval action of the environmental impact report or the negative declaration.

(7) The school district shall comply with the public participation requirements of Sections 25358.7 and 25358.7.1 of the Health and Safety Code and other applicable provisions of the state act with respect to those response actions only if further response actions beyond a preliminary endangerment assessment are required and the district determines that it will proceed with the acquisition or construction project.

(8) If the Department of Toxic Substances Control disapproves the preliminary endangerment assessment, it shall inform the district of the decision, the basis for the decision, and actions necessary to secure the Department of Toxic Substances Control approval of the assessment. The school district shall take actions necessary to secure the approval of the Department of Toxic Substances Control of the preliminary endangerment assessment or elect not to pursue the acquisition or construction project.

(9) If the preliminary endangerment assessment determines that a further investigation of the site is not required and the Department of Toxic Substances Control approves this determination, it shall notify the State Department of Education and the school district of its approval. The school district may then proceed with the acquisition or construction project.

(10) If the preliminary endangerment assessment determines that a release of hazardous material has occurred, that there is the threat of a release of hazardous materials, that a naturally occurring hazardous material is present, or any combination thereof, that requires further investigation, and the Department of Toxic Substances Control approves this determination, the school district may elect not to pursue the acquisition or construction project. If the school district elects to pursue the acquisition or construction project, it shall do all of the following:

(A) Prepare a financial analysis that estimates the cost of response action that will be required at the proposed schoolsite.

(B) Assess the benefits that accrue from using the proposed schoolsite when compared to the use of alternative schoolsites, if any.

(C) Obtain the approval of the State Department of Education that the proposed schoolsite meets the schoolsite selection standards adopted by the State Department of Education pursuant to subdivision (b) of Section 17251.

(D) Evaluate the suitability of the proposed schoolsite in light of the recommended alternative schoolsite locations in order of merit if the school district has requested the assistance of the State Department of Education, based upon the standards of the State Department of Education, pursuant to subdivision (a) of Section 17251.

(11) The school district shall reimburse the Department of Toxic Substances Control for all of the department's response costs.

(b) The costs incurred by the school districts when complying with this section are allowable costs for purposes of an applicant under Chapter 12.5 (commencing with Section 17070.10) of Part 10 and may be reimbursed in accordance with Section 17072.13.

(c) A school district that releases a Phase I environmental assessment, a preliminary endangerment assessment, or information concerning either of these assessments, any of which is required by this section, may not be held liable in any action filed against the school district for making either of these assessments available for public review.

(d) The changes made to this section by the act amending this section during the 2001 portion of the 2001-02 Regular Session do not apply to a schoolsite acquisition project or a school construction project, if either of the following occurred on or before the effective date of the act amending this section during the 2001 portion of the 2001-02 Regular Session:

(1) The final preliminary endangerment assessment for the project was approved by the Department of Toxic Substances Control pursuant to this section as this section read on the date of the approval.

(2) The school district seeking state funding for the project completed a public hearing for the project pursuant to this section, as this section read on the date of the hearing.

SEC. 3. Notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars (\$1,000,000), reimbursement shall be made from the State Mandates Claims Fund.

SEC. 4. This act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting the necessity are:

In order to expeditiously construct new classrooms and school facilities for pupils, while ensuring that these new facilities are subject to an environmental assessment to determine if these facilities could be affected by any potential hazardous materials releases, thereby protecting the health and safety of those pupils and the environment, it is necessary that this act take effect immediately.

BILL NUMBER: AB 14 CHAPTERED 09/27/02

CHAPTER 935

FILED WITH SECRETARY OF STATE SEPTEMBER 27, 2002

APPROVED BY GOVERNOR SEPTEMBER 26, 2002

PASSED THE SENATE AUGUST 30, 2002

PASSED THE ASSEMBLY AUGUST 30, 2002

CONFERENCE REPORT NO. 1

PROPOSED IN CONFERENCE AUGUST 27, 2002

AMENDED IN SENATE AUGUST 23, 2001

AMENDED IN ASSEMBLY MAY 31, 2001

AMENDED IN ASSEMBLY APRIL 16, 2001

INTRODUCED BY Assembly Members Goldberg and Strom-Martin and
Senators Alpert and Chesbro

DECEMBER 4, 2000

An act to amend Sections 17071.75, 17072.13, 17072.18, 17072.20, 17072.35, 17074.15, 17074.16, 17077.45, 17078.20, 17078.30, and 17213.1 of, to add Sections 17070.46, 17070.73, 17073.25, and 17180.5 to, and to add Article 12 (commencing with Section 17078.50) to Chapter 12.5 of Part 10 of, the Education Code, to add Section 53097.3 to the Government Code, and to amend Sections 51451.5, 51453, and 51455 of, and to add Section 51453.5 to, the Health and Safety Code, relating to school facilities, and making an appropriation therefor.

LEGISLATIVE COUNSEL'S DIGEST

AB 14, Goldberg. School facilities.

(1) Existing law, the Leroy F. Greene School Facilities Act of 1998 (Greene Act of 1998), makes funding available to eligible school districts for various purposes related to school facilities, including construction and modernization.

This bill would specify that prescribed agencies are not "lead agencies" in this process for the purposes of the California Environmental Quality Act, would declare that the state special schools for the deaf and for the blind are eligible for modernization funding, and would make certain transitional changes regarding the funding of projects pursuant to subsequently approved state bonds.

(2) Existing law establishes, as a condition of receipt of state funding under the Greene Act of 1998, that the governing board of a school district comply with prescribed provisions relating to the environmental assessment of a proposed schoolsite prior to acquisition of the site, including, but not limited to, submission of the assessment, and related documents, through the State Department of Education to the Department of Toxic Substances Control for its review and approval.

This bill would, instead, require the submission directly to the Department of Toxic Substances Control, would require that notification be given to the State Department of Education and to the governing board of the school district if the Department of Toxic Substances Control determines that a preliminary endangerment assessment is needed, and would make related conforming and technical changes.

Existing law, the Greene Act of 1998, authorizes the board to

for charter school pupils as set forth in Article 12 (commencing with Section 17078.50) of Chapter 12.5.

(b) Notwithstanding any provision of law to the contrary, including, but not limited to, Section 17197, with regard to the authority's implementation of funding for charter school facilities, Article 12 (commencing with Section 17078.50) shall control over conflicting provisions, if any, in this chapter.

SEC. 16. Section 17213.1 of the Education Code is amended to read:

17213.1. As a condition of receiving state funding pursuant to Chapter 12.5 (commencing with Section 17070.10), the governing board of a school district shall comply with subdivision (a), and is not required to comply with subdivision (a) of Section 17213, prior to the acquisition of a schoolsite, or if the school district owns or leases a schoolsite, prior to the construction of a project.

(a) Prior to acquiring a schoolsite, the governing board shall contract with an environmental assessor to supervise the preparation of, and sign, a Phase I environmental assessment of the proposed schoolsite unless the governing board decides to proceed directly to a preliminary endangerment assessment, in which case it shall comply with paragraph (4).

(1) The Phase I environmental assessment shall contain one of the following recommendations:

(A) A further investigation of the site is not required.

(B) A preliminary endangerment assessment is needed, including sampling or testing, to determine the following:

(i) If a release of hazardous material has occurred and, if so, the extent of the release.

(ii) If there is the threat of a release of hazardous materials.

(iii) If a naturally occurring hazardous material is present.

(2) If the Phase I environmental assessment concludes that further investigation of the site is not required, the signed assessment, proof that the environmental assessor meets the qualifications specified in subdivision (b) of Section 17210, and the renewal fee shall be submitted to the Department of Toxic Substances Control. The Department of Toxic Substances Control shall conduct its review and approval, within 30 calendar days of its receipt of that assessment, proof of qualifications, and the renewal fee. In those instances in which the Department of Toxic Substances Control requests additional information after receipt of the Phase I environmental assessment pursuant to paragraph (3), the Department of Toxic Substances Control shall conduct its review and approval within 30 calendar days of its receipt of the requested additional information. If the Department of Toxic Substances Control concurs with the conclusion of the Phase I environmental assessment that a further investigation of the site is not required, the Department of Toxic Substances Control shall approve the Phase I environmental assessment and shall notify, in writing, the State Department of Education and the governing board of the school district of the approval.

(3) If the Department of Toxic Substances Control determines that the Phase I environmental assessment is not complete or disapproves the Phase I environmental assessment, the department shall inform the school district of the decision, the basis for the decision, and actions necessary to secure department approval of the Phase I environmental assessment. The school district shall take actions necessary to secure the approval of the Phase I environmental assessment, elect to conduct a preliminary endangerment assessment, or elect not to pursue the acquisition or the construction project. To facilitate completion of the Phase I environmental assessment, the

information required by this paragraph may be provided by telephonic or electronic means.

(4) (A) If the Department of Toxic Substances Control concludes after its review of a Phase I environmental assessment pursuant to this section that a preliminary endangerment assessment is needed, the Department of Toxic Substances Control shall notify, in writing, the State Department of Education and the governing board of the school district of that decision and the basis for that decision. The school district shall submit to the State Department of Education the Phase I environmental assessment and requested additional information, if any, that was reviewed by the Department of Toxic Substances Control pursuant to that subparagraph. Submittal of the Phase I assessment and additional information, if any, to the State Department of Education shall be prior to the State Department of Education issuance of final site or plan approvals affect by that Phase I assessment.

(B) If the Phase I environmental assessment concludes that a preliminary endangerment assessment is needed, or if the Department of Toxic Substances Control concludes after it reviews a Phase I environmental assessment pursuant to this section that a preliminary endangerment assessment is needed, the school district shall either contract with an environmental assessor to supervise the preparation of, and sign, a preliminary endangerment assessment of the proposed schoolsite and enter into an agreement with the Department of Toxic Substances Control to oversee the preparation of the preliminary endangerment assessment or elect not to pursue the acquisition or construction project. The agreement entered into with the Department of Toxic Substances Control may be entitled an "Environmental Oversight Agreement" and shall reference this paragraph. A school district may, with the concurrence of the Department of Toxic Substances Control, enter into an agreement with the Department of Toxic Substances Control to oversee the preparation of a preliminary endangerment assessment without first having prepared a Phase I environmental assessment. Upon request from the school district, the Director of the Department of Toxic Substances Control shall exercise its authority to designate a person to enter the site and inspect and obtain samples pursuant to Section 25358.1 of the Health and Safety Code, if the director determines that the exercise of that authority will assist in expeditiously completing the preliminary endangerment assessment. The preliminary endangerment assessment shall contain one of the following conclusions:

(i) A further investigation of the site is not required.

(ii) A release of hazardous materials has occurred, and if so, the extent of the release, that there is the threat of a release of hazardous materials, or that a naturally occurring hazardous material is present, or any combination thereof.

(5) The school district shall submit the preliminary endangerment assessment to the Department of Toxic Substances Control for its review and approval and to the State Department of Education for its files. The school district may entitle a document that is meant to fulfill the requirements of a preliminary endangerment assessment a "preliminary environmental assessment" and that document shall be deemed to be a preliminary endangerment assessment if it specifically refers to the statutory provisions whose requirements it intends to meet and the document meets the requirements of a preliminary endangerment assessment.

(6) At the same time a school district submits a preliminary endangerment assessment to the Department of Toxic Substances Control pursuant to paragraph (5), the school district shall publish a notice that the assessment has been submitted to the department in a

local newspaper of general circulation, and shall post the notice in a prominent manner at the proposed schoolsite that is the subject of that notice. The notice shall state the school district's determination to make the preliminary endangerment assessment available for public review and comment pursuant to subparagraph (A) or (B):

(A) If the school district chooses to make the assessment available for public review and comment pursuant to this subparagraph, it shall offer to receive written comments for a period of at least 30 calendar days after the assessment is submitted to the Department of Toxic Substances Control, commencing on the date the notice is originally published, and shall hold a public hearing to receive further comments. The school district shall make all of the following documents available to the public upon request through the time of the public hearing:

(i) The preliminary endangerment assessment.

(ii) The changes requested by the Department of Toxic Substances Control for the preliminary endangerment assessment, if any.

(iii) Any correspondence between the school district and the Department of Toxic Substances Control that relates to the preliminary endangerment assessment.

For the purposes of this subparagraph, the notice of the public hearing shall include the date and location of the public hearing, and the location where the public may review the documents described in clauses (i) to (iii), inclusive. If the preliminary endangerment assessment is revised or altered following the public hearing, the school district shall make those revisions or alterations available to the public. The school district shall transmit a copy of all public comments received by the school district on the preliminary endangerment assessment to the Department of Toxic Substances Control. The Department of Toxic Substances Control shall complete its review of the preliminary endangerment assessment and public comments received thereon and shall either approve or disapprove the assessment within 30 calendar days of the close of the public review period. If the Department of Toxic Substances Control determines that it is likely to disapprove the assessment prior to its receipt of the public comments, it shall inform the school district of that determination and of any action that the school district is required to take for the Department of Toxic Substances Control to approve the assessment.

(B) If the school district chooses to make the preliminary endangerment assessment available for public review and comment pursuant to this subparagraph, the Department of Toxic Substances Control shall complete its review of the assessment within 60 calendar days of receipt of the assessment and shall either return the assessment to the school district with comments and requested modifications or requested further assessment or concur with the adequacy of the assessment pending review of public comment. If the Department of Toxic Substances Control concurs with the adequacy of the assessment, and the school district proposes to proceed with site acquisition or a construction project, the school district shall make the assessment available to the public on the same basis and at the same time it makes available the draft environmental impact report or negative declaration pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) for the site, unless the document developed pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) will not be made available until more than 90 days after the assessment is approved, in which case the school district

shall, within 60 days of the approval of the assessment, separately publish a notice of the availability of the assessment for public review in a local newspaper of general circulation. The school district shall hold a public hearing on the preliminary endangerment assessment and the draft environmental impact report or negative declaration at the same time, pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code). All public comments pertaining to the preliminary endangerment assessment shall be forwarded to the Department of Toxic Substances Control immediately. The Department of Toxic Substances Control shall review the public comments forwarded by the school district and shall approve or disapprove the preliminary endangerment assessment within 30 days of the district's approval action of the environmental impact report or the negative declaration.

(7) The school district shall comply with the public participation requirements of Sections 25358.7 and 25358.7.1 of the Health and Safety Code and other applicable provisions of the state act with respect to those response actions only if further response actions beyond a preliminary endangerment assessment are required and the district determines that it will proceed with the acquisition or construction project.

(8) If the Department of Toxic Substances Control disapproves the preliminary endangerment assessment, it shall inform the district of the decision, the basis for the decision, and actions necessary to secure the Department of Toxic Substances Control approval of the assessment. The school district shall take actions necessary to secure the approval of the Department of Toxic Substances Control of the preliminary endangerment assessment or elect not to pursue the acquisition or construction project.

(9) If the preliminary endangerment assessment determines that a further investigation of the site is not required and the Department of Toxic Substances Control approves this determination, it shall notify the State Department of Education and the school district of its approval. The school district may then proceed with the acquisition or construction project.

(10) If the preliminary endangerment assessment determines that a release of hazardous material has occurred, that there is the threat of a release of hazardous materials, that a naturally occurring hazardous material is present, or any combination thereof, that requires further investigation, and the Department of Toxic Substances Control approves this determination, the school district may elect not to pursue the acquisition or construction project. If the school district elects to pursue the acquisition or construction project, it shall do all of the following:

(A) Prepare a financial analysis that estimates the cost of response action that will be required at the proposed schoolsite.

(B) Assess the benefits that accrue from using the proposed schoolsite when compared to the use of alternative schoolsites, if any.

(C) Obtain the approval of the State Department of Education that the proposed schoolsite meets the schoolsite selection standards adopted by the State Department of Education pursuant to subdivision (b) of Section 17251.

(D) Evaluate the suitability of the proposed schoolsite in light of the recommended alternative schoolsite locations in order of merit if the school district has requested the assistance of the State Department of Education, based upon the standards of the State Department of Education, pursuant to subdivision (a) of Section 17251.

(11) The school district shall reimburse the Department of Toxic Substances Control for all of the department's response costs.

(b) The costs incurred by the school districts when complying with this section are allowable costs for purposes of an applicant under Chapter 12.5 (commencing with Section 17070.10) of Part 10 and may be reimbursed in accordance with Section 17072.13.

(c) A school district that releases a Phase I environmental assessment, a preliminary endangerment assessment, or information concerning either of these assessments, any of which is required by this section, may not be held liable in any action filed against the school district for making either of these assessments available for public review.

(d) The changes made to this section by the act amending this section during the 2001 portion of the 2001-02 Regular Session do not apply to a schoolsite acquisition project or a school construction project, if either of the following occurred on or before the effective date of the act amending this section during the 2001 portion of the 2001-02 Regular Session:

(1) The final preliminary endangerment assessment for the project was approved by the Department of Toxic Substances Control pursuant to this section as this section read on the date of the approval.

(2) The school district seeking state funding for the project completed a public hearing for the project pursuant to this section, as this section read on the date of the hearing.

SEC. 17. Section 53097.3 is added to the Government Code to read:

53097.3. Notwithstanding any other provision of this article, no school district may render a city or county ordinance inapplicable to a charter school facility pursuant to this article, unless the facility is physically located within the geographical jurisdiction of that school district.

SEC. 18. Section 51451.5 of the Health and Safety Code, as added by Chapter 33 of the Statutes of 2002, is amended to read:

51451.5. The Homebuyer Down Payment Assistance Program of 2002 is hereby established, to provide assistance in the amount of the applicable school facility fee on affordable housing. The Homebuyer Down Payment Assistance Program of 2002 shall, with funds provided by the Kindergarten-University Public Education Facilities Bond Acts of 2002 and 2004 (Part 68.1 (commencing with Section 100600) of the Education Code; and Part 68.2 (commencing with Section 100800) of the Education Code), provide the following assistance:

(a) Downpayment assistance to the purchaser of any newly constructed residential structure in a development project in an economically distressed area in the amount of school facility fees paid pursuant to Section 65995.5 or 65995.7 of the Government Code, less the amount that would be required pursuant to subdivision (b) of Section 65995 of the Government Code, notwithstanding Sections 65995.5 and 65995.7 of the Government Code, if all of the following conditions are met:

(1) The development project is located in a county with an unemployment rate that equals or exceeds 125 percent of the state unemployment rate.

(2) Five hundred or more residential structures have been constructed in the county during 2001.

(3) A building permit for an eligible residential structure in the project is issued by the local agency on or after January 1, 2002.

(4) The eligible residential structure is to be owner occupied for at least five years. If a structure is owner occupied for fewer than five years, the recipient of the assistance shall repay the School Facilities Fee Assistance Fund the amount of the assistance,

million dollars (\$25,000,000) which is made available pursuant to subparagraph (B) of paragraph (1) of subdivision (a) of Section 100820 of the Education Code, shall be transferred to the School Facilities Fee Assistance Fund and, notwithstanding Section 13340 of the Government Code, is hereby continuously appropriated to the department for allocation for the agency for administrative costs and to make payments to purchasers of newly constructed residential structures pursuant to Section 51451.5 from that fund, as follows:

(a) Twelve million five hundred thousand dollars (\$12,500,000) shall be available for the program set forth in subdivision (a) of Section 51451.5, except that if less than 50 percent of these funds are expended within 24 months, all or part of those funds shall be available for the program set forth in subdivision (b) of Section 51451.5 at the discretion of the executive director of the agency.

(b) Twelve million five hundred thousand dollars (\$12,500,000) shall be available for the program set forth in subdivision (b) of Section 51451.5, except that if less than 50 percent of these funds are expended within 24 months, all or part of those funds shall be available for the program set forth in subdivision (a) of Section 51451.5 at the discretion of the executive director of the agency.

(c) If after 48 months, more than 20 percent of the funds identified in subdivisions (a) and (b) are not expended, the executive director of the agency may make all or part of those funds available to the California Homebuyer's Downpayment Assistance Program, as authorized under Chapter 11 (commencing with Section 51500).

(d) All repayments of disbursed funds pursuant to this chapter or any interest earned from the investment in the Surplus Money Investment Fund or any other moneys accruing to the fund from whatever source shall be returned to the fund and is available for allocation by the agency to the program established pursuant to Section 51451.5.

SEC. 21. Section 51455 of the Health and Safety Code, as amended by Chapter 33 of the Statutes of 2002, is amended to read:

51455. (a) Except as provided in subdivision (b), Sections 51450, 51451, 51452, and 51454 shall not be operative on and after January 1, 2002.

(b) Except as provided in Section 51453 and 51453.5, the School Facilities Fee Assistance Fund established by Section 51452 and the programmatic authority necessary to operate the programs authorized by Section 51451 shall continue on and after January 1, 2002, only with respect to any repayment obligation pertaining to that assistance or to any regulatory agreement imposed as a condition of that assistance.

SEC. 22. Notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars (\$1,000,000), reimbursement shall be made from the State Mandates Claims Fund.

SEC. 23. The provisions of this act are severable. If any provision of this act or its application is held invalid, that invalidity shall not affect other provisions or applications that can be given effect without the invalid provision or application.

Exhibit 3
Copies of Code Sections Cited

§ 17072.13. Site acquisition and hazardous materials evaluation and response action funding

In addition to the amounts provided pursuant to Sections 17072.10 and 17072.12, the board may provide site acquisition and hazardous materials evaluation and response action funding for proposed new schoolsites as follows:

(a)(1) For 50 percent of the cost of the evaluation of hazardous materials at a site to be acquired by a school district and for 50 percent of the other response action costs of the removal of hazardous waste or solid waste, the removal of hazardous substances, or other response action in connection with hazardous substances at that site. Except as provided in subdivision (b), the funding provided pursuant to this section may not exceed 50 percent * * * of the total evaluation and response action costs, including, but not limited to, the costs of the removal of hazardous waste or solid waste, the removal of hazardous substances, or other response action, as determined by the Department of Toxic Substances Control, in connection with hazardous substances at that site, pursuant to standards adopted by the board.

(2) For projects eligible for funding under this subdivision, the total state share of the site acquisition costs, including evaluation and response action, shall not exceed 50 percent of 1½ times the appraised value of the uncontaminated site. However, the board may exceed this maximum for projects that demonstrate circumstances of extreme need.

(b)(1) The board may provide funding for up to 100 percent of the cost of the evaluation of hazardous materials at a site to be acquired by a school district eligible for financial hardship assistance pursuant to Article 8 (commencing with Section 17075.10) and for up to 100 percent of the other response action costs for the site. The funding provided pursuant to this subdivision may not exceed 100 percent of * * * the total evaluation and response action costs, including, but not limited to, the costs of the removal of hazardous waste or solid waste, the removal of hazardous substances, or other response action, as determined by the Department of Toxic Substances Control, in connection with hazardous substances at that site, pursuant to standards adopted by the board.

(2) The board may provide funding pursuant to this subdivision only if the State Department of Education certifies that the site is the best available site considering all of the following factors in relation to other available sites:

(A) The total costs of the project, including, but not limited to, costs of evaluation and response action.

(B) The desirability of the site, considering its proximity to pupils and suitability for meeting the educational and safety needs of the school district.

(C) The time required to fully complete the project in relation to the current and projected need for school facilities.

(3) For projects eligible for funding under this subdivision, the total state share of the site acquisition costs, including evaluation and response action, shall not exceed 100 percent of 1½ times the appraised value of the uncontaminated site. However, the board may exceed this maximum for projects that demonstrate circumstances of extreme need.

(c) A school district with a proposed site that meets the environmental hardship criteria set forth in paragraph (1) may apply to the board for site acquisition, including, but not limited to, evaluation and response action, funding for that site prior to having construction plans for that site approved by the Division of the State Architect and State Department of Education * * *.

(1) A project is eligible for environmental hardship site acquisition funding if both of the following apply:

(A) The * * * preparation and implementation of a response action * * * for the site, to be approved by the Department of Toxic Substances Control * * * pursuant to Section 17213, is estimated by the Department of Toxic Substances Control to take six months or more to complete.

(B) The State Department of Education determines that the site is the best available alternative site.

(2) The initial site-specific reservation pursuant to this subdivision shall be for a period of one year. Extension may be approved in one-year intervals upon demonstration to the State Allocation Board of progress toward acquisition, including, but not limited to, evaluation or response, as the case may be. In the event there is not demonstrable progress, the State Allocation Board shall have the option of rescinding the reservation.

(3) Environmental hardship site acquisition funds approved by the State Allocation Board can be used only for the site identified in the response action approved by the Department of Toxic Substances Control.

(4) The date that the State Allocation Board approves the environmental hardship site acquisition funding will become the State Allocation Board approval date for the project's construction funding for that site.

(5) A school district may apply to the State Allocation Board for construction funding for the environmental hardship site when the project has received final Division of the State Architect plan approval and final State Department of Education site and plan approval.

(d) The cost incurred by the school districts when complying with any requirement identified in this section are allowable costs for purposes of an applicant under this chapter and may be reimbursed in accordance with * * * this section.

(e) The State Allocation Board shall develop regulations that allow school districts with financial hardship site acquisition, including, but not limited to, evaluation and response action, funding prior to ownership of the site or evidence that the site is in escrow.

(Amended by Stats.2002, c. 935 (A.B.14), § 4.)

§ 17210. Definitions

As used in this article, the following terms have the following meanings:

(a) "Administering agency" means any agency designated pursuant to Section 25502 of the Health and Safety Code.

(b) "Environmental assessor" means a class II environmental assessor registered by the Office of Environmental Health Hazard Assessment pursuant to Chapter 6.98 (commencing with Section 25570) of Division 20 of the Health and Safety Code, a professional engineer registered in this state, a geologist registered in this state, a certified engineering geologist registered in this state, or a licensed hazardous substance contractor certified pursuant to Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code. A licensed hazardous substance contractor shall hold the equivalent of a degree from an accredited public or private college or university or from a private postsecondary educational institution approved by the Bureau for Private Postsecondary and Vocational Education with at least 60 units in environmental, biological, chemical, physical, or soil science; engineering; geology; environmental or public health; or a directly related science field. In addition, any person who conducts phase I environmental assessments shall have at least two years' experience in the preparation of those assessments and any person who conducts a preliminary endangerment assessment shall have at least three years' experience in conducting those assessments.

(c) "Handle" has the meaning the term is given in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(d) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substance identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(e) "Hazardous material" has the meaning the term is given in subdivision (d) of Section 25260 of the Health and Safety Code.

§ 17210

(f) "Operation and maintenance," "removal action work plan," "respond," "response," "response action," and "site" have the meanings those terms are given in Article 2 (commencing with Section 25310) of the state act.

(g) "Phase I environmental assessment" means a preliminary assessment of a property to determine whether there has been or may have been a release of a hazardous material, or whether a naturally occurring hazardous material is present, based on reasonably available information about the property and the area in its vicinity. A phase I environmental assessment may include, but is not limited to, a review of public and private records of current and historical land uses, prior releases of a hazardous material, data base searches, review of relevant files of federal, state, and local agencies, visual and other surveys of the property, review of historical aerial photographs of the property and the area in its vicinity, interviews with current and previous owners and operators, and review of regulatory correspondence and environmental reports. Sampling or testing is not required as part of the phase I environmental assessment. A phase I environmental assessment conducted pursuant to the requirements adopted by the American Society for Testing and Materials for due diligence for commercial real estate transactions and that includes a review of all reasonably available records and data bases regarding current and prior gas or oil wells and naturally occurring hazardous materials located on the site or located where they could potentially effect the site, satisfies the requirements of this article for conducting a phase I environmental assessment unless and until the Department of Toxic Substances Control adopts final regulations that establish guidelines for a phase I environmental assessment for purposes of schoolsites that impose different requirements from those imposed by the American Society for Testing and Materials.

(h) "Preliminary endangerment assessment" means an activity that is performed to determine whether current or past hazardous material management practices or waste management practices have resulted in a release or threatened release of hazardous materials, or whether naturally occurring hazardous materials are present, which pose a threat to children's health, children's learning abilities, public health or the environment. A preliminary endangerment assessment requires sampling and analysis of a site, a preliminary determination of the type and extent of hazardous material contamination of the site, and a preliminary evaluation of the risks that the hazardous material contamination of a site may pose to children's health, public health, or the environment, and shall be conducted in a manner that complies with the guidelines published by the Department of Toxic Substances Control entitled "Preliminary Endangerment Assessment: Guidance Manual," including any amendments that are determined by the Department of Toxic Substances Control to be appropriate to address issues that are unique to schoolsites.

(i) "Proposed schoolsite" means real property acquired or to be acquired or proposed for use as a schoolsite, prior to its occupancy as a school.

(j) "Regulated substance" means any material defined in subdivision (g) of Section 25532 of the Health and Safety Code.

(k) "Release" has the same meaning the term is given in Article 2 (commencing with Section 25310) of Chapter 6.8 of Division 20 of the Health and Safety Code, and includes a release described in subdivision (d) of Section 25321 of the Health and Safety Code.

(l) "Remedial action plan" means a plan approved by the Department of Toxic Substances Control pursuant to Section 25356.1 of the Health and Safety Code.

(m) "State act" means the Carpenter-Presley-Tanner Hazardous Substance Account Act (Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code).

(Added by Stats.1999, c. 1002 (S.B.162), § 1. Amended by Stats.2000, c. 135 (A.B. 2539), § 31; Stats.2000, c. 443 (A.B.2644), § 2, eff. Sept. 14, 2000; Stats.2001, c. 159 (S.B.662), § 56.)

§ 17210.1. Application of state act; hazardous materials; risk assessments; compliance with other laws

(a) Notwithstanding any other provision of law:

(1) For sites addressed by this article for which school districts elect to receive state funds pursuant to Chapter 12.5 (commencing with Section 17070.10) of Part 10, the state act applies to schoolsites where naturally occurring hazardous materials are present, regardless of whether there has been a release or there is a threatened release of a hazardous material.

(2) For sites addressed by this article for which school districts elect to receive state funds pursuant to Chapter 12.5 (commencing with Section 17070.10) of Part 10, all references in the state act to hazardous substances shall be deemed to include hazardous materials and all references in the state act to public health shall be deemed to include children's health.

(3) All risk assessments conducted by school districts that elect to receive state funds pursuant to Chapter 12.5 (commencing with Section 17070.10) of Part 10 at sites addressed by this article shall include a focus on the risks to children's health posed by a hazardous materials release or threatened release, or the presence of naturally occurring hazardous materials, on the schoolsite.

(4) The response actions selected under this article shall, at a minimum, be protective of children's health, with an ample margin of safety.

(b) In implementing this article, a school district shall provide a notice to residents in the immediate area prior to the commencement of work on a preliminary endangerment assessment utilizing a format developed by the Department of Toxic Substances Control.

(c) Nothing in this article shall be construed to limit the authority of the Department of Toxic Substances Control or the State Department of Education to take any action otherwise authorized under any other provision of law.

(d) Unless the Legislature otherwise funds its costs for overseeing actions taken pursuant to this article, the Department of Toxic Substances Control shall comply with Chapter 6.66 (commencing with Section 25269) of Division 20 of the Health and Safety Code when recovering its costs incurred in carrying out its duties pursuant to this article.

(e) Article 11 (commencing with Section 25220) of Chapter 6.5 of Division 20 of the Health and Safety Code does not apply to schoolsites at which all necessary response actions have been completed.

(Added by Stats.1999, c. 1002 (S.B.162), § 2. Amended by Stats.2000, c. 443 (A.B. 2644), § 3, eff. Sept. 14, 2000; Stats.2001, c. 865 (A.B.972), § 1, eff. Oct. 14, 2001.)

§ 17211. Public hearing for evaluation prior to acquisition in accordance with site selection standards

Prior to commencing the acquisition of real property for a new schoolsite or an addition to an existing schoolsite, the governing board of a school district shall evaluate the property at a public hearing using the site selection standards established by the State Department of Education pursuant to subdivision (b) of Section 17251. The governing board may direct the district's advisory committee established pursuant to Section 17388 to evaluate the property pursuant to those site selection standards and to report its findings to the governing board at the public hearing.

(Added by Stats.1996, c. 277 (S.B.1562), § 3, operative Jan. 1, 1998.)

§ 17212. Investigation of prospective schoolsite; inclusion of geological and engineering studies

The governing board of a school district, prior to acquiring any site on which it proposes to construct any school building as defined in Section 17283 shall have the site, or sites, under consideration investigated by competent personnel to ensure that the final site selection is determined by an evaluation of all factors affecting the public interest and is not limited to selection on the basis of raw land cost only. If the prospective schoolsite is located within the boundaries of any special studies zone or within an area designated as geologically hazardous in the safety element of the local general plan as provided in subdivision (g) of Section 65302 of the Government Code, the investigation shall include any geological and soil engineering studies by competent personnel needed to provide an assessment of the nature of the site and potential for earthquake or other geologic hazard damage.

The geological and soil engineering studies of the site shall be of such a nature as will preclude siting of a school in any location where the geological and site characteristics are such that the construction effort required to make the school building safe for occupancy is economically unfeasible. No studies are required to be made if the site or sites under consideration have been the subject of adequate prior studies. The evaluation shall also include location of the site with respect to population, transportation, water supply, waste disposal facilities, utilities, traffic hazards, surface drainage conditions, and other factors affecting the operating costs, as well as the initial costs, of the total project.

For the purposes of this article, a special studies zone is an area which is identified as a special studies zone on any map, or maps, compiled by the State Geologist pursuant to Chapter 7.5 (commencing with Section 2621) of Division 2 of the Public Resources Code.

(Added by Stats.1996, c. 277 (S.B.1562), § 3, operative Jan. 1, 1998.)

§ 17212.5. Geological and soils engineering studies

Geological and soil engineering studies as described in Section 17212 shall be made, within the boundaries of any special studies zone, for the construction of any school building as defined in Section 17283, or if the estimated cost exceeds twenty-five thousand dollars (\$25,000), for the reconstruction or alteration of or addition to any school building for work which alters structural elements. The Department of General Services may require similar geological and soil engineering studies for the construction or alteration of any school building on a site located outside of the boundaries of any special studies zone. No studies need be made if the site under consideration has been the subject of adequate prior studies.

No school building shall be constructed, reconstructed, or relocated on the trace of a geological fault along which surface rupture can reasonably be expected to occur within the life of the school building.

A copy of the report of each investigation conducted pursuant to this section shall be submitted to the Department of General Services pursuant to Article 3 (commencing with Section 17280) of this chapter and to the State Department of Education. The cost of geological and soil engineering studies and investigations conducted pursuant to this section may be treated as a capital expenditure. The dollar amount set forth in this section shall be increased on an annual basis, according to a construction costs inflation index recognized and selected by the department.

(Added by Stats.1996, c. 277 (S.B.1562), § 3, operative Jan. 1, 1998. Amended by Stats.2001, c. 422 (A.B.1478), § 1.)

§ 17213. Approval of site acquisition; hazardous or solid waste disposal sites or hazardous substance release sites; hazardous air emissions; findings

The governing board of a school district shall not approve a project involving the acquisition of a schoolsite by a school district unless all of the following occur:

(a) The lead agency, as defined in Section 21067 of the Public Resources Code, determines that the property purchased or to be built upon is not any of the following:

(1) The site of a current or former hazardous waste disposal site or solid waste disposal site unless, if the site was a former solid waste disposal site, the governing board of the school district concludes that the wastes have been removed.

(2) A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(3) A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

(b) The lead agency, as defined in Section 21067 of the Public Resources Code, preparing the environmental impact report or negative declaration has consulted with the administering agency in which the proposed schoolsite is located and with any air pollution control district or air quality management

§ 17213

district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed schoolsite which might reasonably be anticipated to emit hazardous air emissions, or to handle hazardous or acutely hazardous materials, substances, or waste. The lead agency shall include a list of the locations for which information is sought.

(c) The governing board of the school district makes one of the following written findings:

(1) Consultation identified none of the facilities specified in subdivision (b).

(2) The facilities specified in subdivision (b) exist, but one of the following conditions applies:

(A) The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the school.

(B) The governing board finds that corrective measures required under an existing order by another jurisdiction which has jurisdiction over the facilities will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes this finding, the governing board shall also make a subsequent finding, prior to the occupancy of the school, that the emissions have been mitigated to these levels.

(d) As used in this section:

(1) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substance identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(2) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(3) "Acutely hazardous material" means any material defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(4) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(5) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(6) "Administering agency" means any agency designated pursuant to Section 25502 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(Added by Stats.1996, c. 277 (S.B.1562), § 3, operative Jan. 1, 1998.)

§ 17213.1. **Environmental assessment of proposed schoolsite; preliminary endangerment assessment; costs; liability**

As a condition of receiving state funding pursuant to Chapter 12.5 (commencing with Section 17070.10), the governing board of a school district shall comply with subdivision (a), and is not required to comply with subdivision (a) of Section 17213, prior to the acquisition of a schoolsite, or if the school district owns or leases a schoolsite, prior to the construction of a project.

(a) Prior to acquiring a schoolsite, the governing board shall contract with an environmental assessor to supervise the preparation of, and sign, a Phase I environmental assessment of the proposed schoolsite unless the governing board decides to proceed directly to a preliminary endangerment assessment, in which case it shall comply with paragraph (4).

(1) The Phase I environmental assessment shall contain one of the following recommendations:

(A) A further investigation of the site is not required.

(B) A preliminary endangerment assessment is needed, including sampling or testing, to determine the following:

(i) If a release of hazardous material has occurred and, if so, the extent of the release.

(ii) If there is the threat of a release of hazardous materials.

(iii) If a naturally occurring hazardous material is present.

(2) If the Phase I environmental assessment concludes that further investigation of the site is not required, the signed assessment, * * * proof that the environmental assessor meets the qualifications specified in subdivision (b) of Section 17210 * * *, and the renewal fee shall be submitted to the Department of Toxic Substances Control * * *. The Department of Toxic Substances Control * * * shall conduct its review and approval, * * * within 30 calendar days of its receipt of that assessment * * *, proof of qualifications, and the renewal fee. In those instances in which the Department of Toxic Substances Control requests additional information after receipt of the Phase I environmental assessment pursuant to paragraph (3), the Department of Toxic Substances Control shall conduct its review and approval within 30 calendar days of its receipt of the requested additional information. If the Department of Toxic Substances Control concurs with the conclusion of the Phase I environmental assessment that a further investigation of the site is not required, the Department of Toxic Substances Control shall approve the Phase I environmental assessment and shall notify, in writing, the State Department of Education and the governing board of the school district of the approval.

(3) If the Department of Toxic Substances Control determines that the Phase I environmental assessment is not complete or disapproves the Phase I environmental assessment, the department shall inform the school district of the decision, the basis for the decision, and actions necessary to secure department approval of the Phase I environmental assessment. The school district shall take actions necessary to secure the approval of the Phase I environmental assessment, elect to conduct a preliminary

Additions or changes indicated by underline; deletions by asterisks * * *

endangerment assessment, or elect not to pursue the acquisition or the construction project. To facilitate completion of the Phase I environmental assessment, the information required by this paragraph may be provided by telephonic or electronic means.

(4)(A) If the Department of Toxic Substances Control concludes after its review of a Phase I environmental assessment pursuant to this section that a preliminary endangerment assessment is needed, the Department of Toxic Substances Control shall notify, in writing, the State Department of Education and the governing board of the school district of that decision and the basis for that decision. The school district shall submit to the State Department of Education the Phase I environmental assessment and requested additional information, if any, that was reviewed by the Department of Toxic Substances Control pursuant to that subparagraph. Submittal of the Phase I assessment and additional information, if any, to the State Department of Education shall be prior to the State Department of Education issuance of final site or plan approvals affect by that Phase I assessment.

(B) If the Phase I environmental assessment concludes that a preliminary endangerment assessment is needed, or if the Department of Toxic Substances Control concludes after it reviews a Phase I environmental assessment pursuant to this section that a preliminary endangerment assessment is needed, the school district shall either contract with an environmental assessor to supervise the preparation of, and sign, a preliminary endangerment assessment of the proposed schoolsite and enter into an agreement with the Department of Toxic Substances Control to oversee the preparation of the preliminary endangerment assessment or elect not to pursue the acquisition or construction project. The agreement entered into with the Department of Toxic Substances Control may be entitled an "Environmental Oversight Agreement" and shall reference this paragraph. A school district may, with the concurrence of the Department of Toxic Substances Control, enter into an agreement with the Department of Toxic Substances Control to oversee the preparation of a preliminary endangerment assessment without first having prepared a Phase I environmental assessment. Upon request from the school district, the Director of the Department of Toxic Substances Control shall exercise its authority to designate a person to enter the site and inspect and obtain samples pursuant to Section 25358.1 of the Health and Safety Code, if the director determines that the exercise of that authority will assist in expeditiously completing the preliminary endangerment assessment. The preliminary endangerment assessment shall contain one of the following conclusions:

(i) A further investigation of the site is not required.

(ii) A release of hazardous materials has occurred, and if so, the extent of the release, that there is the threat of a release of hazardous materials, or that a naturally occurring hazardous material is present, or any combination thereof.

(5) The school district shall submit the preliminary endangerment assessment to the Department of Toxic Substances Control for its review and approval and to the State Department of Education for its files. The school district may entitle a document that is meant to fulfill the requirements of a preliminary endangerment assessment a "preliminary environmental assessment" and that document shall be deemed to be a preliminary endangerment assessment if it specifically refers to the statutory provisions whose requirements it intends to meet and the document meets the requirements of a preliminary endangerment assessment.

(6) At the same time a school district submits a preliminary endangerment assessment to the Department of Toxic Substances Control pursuant to paragraph (5), the school district shall publish a notice that the assessment has been submitted to the department in a local newspaper of general circulation, and shall post the notice in a prominent manner at the proposed schoolsite that is the subject of that notice. The notice shall state the school district's determination to make the preliminary endangerment assessment available for public review and comment pursuant to subparagraph (A) or (B):

(A) If the school district chooses to make the assessment available for public review and comment pursuant to this subparagraph, it shall offer to receive written comments for a period of at least 30 calendar days after the assessment is submitted to the Department of Toxic Substances Control, commencing on the date the notice is originally published, and shall hold a public hearing to receive further comments. The school district shall make all of the following documents available to the public upon request through the time of the public hearing:

(i) The preliminary endangerment assessment.

(ii) The changes requested by the Department of Toxic Substances Control for the preliminary endangerment assessment, if any.

(iii) Any correspondence between the school district and the Department of Toxic Substances Control that relates to the preliminary endangerment assessment.

For the purposes of this subparagraph, the notice of the public hearing shall include the date and location of the public hearing, and the location where the public may review the documents described in clauses (i) to (iii), inclusive. If the preliminary endangerment assessment is revised or altered following

Additions or changes indicated by underline; deletions by asterisks * * *

the public hearing, the school district shall make those revisions or alterations available to the public. The school district shall transmit a copy of all public comments received by the school district on the preliminary endangerment assessment to the Department of Toxic Substances Control. The Department of Toxic Substances Control shall complete its review of the preliminary endangerment assessment and public comments received thereon and shall either approve or disapprove the assessment within 30 calendar days of the close of the public review period. If the Department of Toxic Substances Control determines that it is likely to disapprove the assessment prior to its receipt of the public comments, it shall inform the school district of that determination and of any action that the school district is required to take for the Department of Toxic Substances Control to approve the assessment.

(B) If the school district chooses to make the preliminary endangerment assessment available for public review and comment pursuant to this subparagraph, the Department of Toxic Substances Control shall complete its review of the assessment within 60 calendar days of receipt of the assessment and shall either return the assessment to the school district with comments and requested modifications or requested further assessment or concur with the adequacy of the assessment pending review of public comment. If the Department of Toxic Substances Control concurs with the adequacy of the assessment, and the school district proposes to proceed with site acquisition or a construction project, the school district shall make the assessment available to the public on the same basis and at the same time it makes available the draft environmental impact report or negative declaration pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) for the site, unless the document developed pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) will not be made available until more than 90 days after the assessment is approved, in which case the school district shall, within 60 days of the approval of the assessment, separately publish a notice of the availability of the assessment for public review in a local newspaper of general circulation. The school district shall hold a public hearing on the preliminary endangerment assessment and the draft environmental impact report or negative declaration at the same time, pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code). All public comments pertaining to the preliminary endangerment assessment shall be forwarded to the Department of Toxic Substances Control immediately. The Department of Toxic Substances Control shall review the public comments forwarded by the school district and shall approve or disapprove the preliminary endangerment assessment within 30 days of the district's approval action of the environmental impact report or the negative declaration.

(7) The school district shall comply with the public participation requirements of Sections 25358.7 and 25358.7.1 of the Health and Safety Code and other applicable provisions of the state act with respect to those response actions only if further response actions beyond a preliminary endangerment assessment are required and the district determines that it will proceed with the acquisition or construction project.

(8) If the Department of Toxic Substances Control disapproves the preliminary endangerment assessment, it shall inform the district of the decision, the basis for the decision, and actions necessary to secure the Department of Toxic Substances Control approval of the assessment. The school district shall take actions necessary to secure the approval of the Department of Toxic Substances Control of the preliminary endangerment assessment or elect not to pursue the acquisition or construction project.

(9) If the preliminary endangerment assessment determines that a further investigation of the site is not required and the Department of Toxic Substances Control approves this determination, it shall notify the State Department of Education and the school district of its approval. The school district may then proceed with the acquisition or construction project.

(10) If the preliminary endangerment assessment determines that a release of hazardous material has occurred, that there is the threat of a release of hazardous materials, that a naturally occurring hazardous material is present, or any combination thereof, that requires further investigation, and the Department of Toxic Substances Control approves this determination, the school district may elect not to pursue the acquisition or construction project. If the school district elects to pursue the acquisition or construction project, it shall do all of the following:

(A) Prepare a financial analysis that estimates the cost of response action that will be required at the proposed schoolsite.

(B) Assess the benefits that accrue from using the proposed schoolsite when compared to the use of alternative schoolsites, if any.

(C) Obtain the approval of the State Department of Education that the proposed schoolsite meets the schoolsite selection standards adopted by the State Department of Education pursuant to subdivision (b) of Section 17251.

(D) Evaluate the suitability of the proposed schoolsite in light of the recommended alternative schoolsite locations in order of merit if the school district has requested the assistance of the State

Additions or changes indicated by underline; deletions by asterisks * * *

EDUCATION CODE

Department of Education, based upon the standards of the State Department of Education, pursuant to subdivision (a) of Section 17251.

(11) The school district shall reimburse the Department of Toxic Substances Control for all of the department's response costs.

(b) The costs incurred by the school districts when complying with this section are allowable costs for purposes of an applicant under Chapter 12.5 (commencing with Section 17070.10) of Part 10 and may be reimbursed in accordance with Section 17072.13.

(c) A school district that releases a Phase I environmental assessment, a preliminary endangerment assessment, or information concerning either of these assessments, any of which is required by this section, may not be held liable in any action filed against the school district for making either of these assessments available for public review.

(d) The changes made to this section by the act amending this section during the 2001 portion of the 2001-02 Regular Session do not apply to a schoolsite acquisition project or a school construction project, if either of the following occurred on or before the effective date of the act amending this section during the 2001 portion of the 2001-02 Regular Session:

(1) The final preliminary endangerment assessment for the project was approved by the Department of Toxic Substances Control pursuant to this section as this section read on the date of the approval.

(2) The school district seeking state funding for the project completed a public hearing for the project pursuant to this section, as this section read on the date of the hearing.

(Amended by Stats.2002, c. 935 (A.B.14), § 16.)

§ 17213.2. Hazardous materials present at schoolsite; response action

As a condition of receiving state funds pursuant to Chapter 12.5 (commencing with Section 17070.10), all of the following apply:

(a) If a preliminary endangerment assessment prepared pursuant to Section 17213.1 discloses the presence of a hazardous materials release, or threatened release, or the presence of naturally occurring hazardous materials, at a proposed schoolsite at concentrations that could pose a significant risk to children or adults, and the school district owns the proposed schoolsite, the school district shall enter into an agreement with the Department of Toxic Substances Control to oversee response action at the site and shall take response action pursuant to the requirements of the state act as may be required by the Department of Toxic Substances Control.

(b) Notwithstanding subdivision (a), a school district need not take action in response to a release of hazardous material to groundwater underlying the

§ 17213.2

schoolsite if the release occurred at a site other than the schoolsite and if the following conditions apply:

(1) The school district did not cause or contribute to the release of a hazardous material to the groundwater.

(2) Upon the request of the Department of Toxic Substances Control or its authorized representative the school district provides the Department of Toxic Substances Control or its authorized representative with access to the schoolsite.

(3) The school district does not interfere with the response action activities.

(c) If at anytime during the response action the school district determines that there has been a significant increase in the estimated cost of the response action, the school district shall notify the State Department of Education.

(d) A school district that is required by the Department of Toxic Substances Control to take response action at a proposed schoolsite is subject to both of the following prohibitions:

(1) The school district may not begin construction of a school building until the Department of Toxic Substances Control determines all of the following:

(A) That the construction will not interfere with the response action.

(B) That site conditions will not pose a significant threat to the health and safety of workers involved in the construction of the school building.

(C) That the nature and extent of any release or threatened release of hazardous materials or the presence of any naturally occurring hazardous materials have been fully characterized.

(2) The school district may not occupy a school building following construction until it obtains from the Department of Toxic Substances Control a certification that all response actions, except for operation and maintenance activities, necessary to ensure that hazardous materials at the schoolsite no longer pose a significant risk to children and adults at the schoolsite have been completed and that the response action standards and objectives established in the final removal action work plan or remedial action plan have been met and are being maintained. After a school building is constructed and occupied, a school district may continue with ongoing operation and maintenance activities if the Department of Toxic Substances Control certifies before occupancy that neither site conditions nor the ongoing operation and maintenance activities pose a significant risk to children or adults at the schoolsite.

(e) If, at anytime during construction at a schoolsite, a previously unidentified release or threatened release of a hazardous material or the presence of a naturally occurring hazardous material is discovered, the school district shall cease all construction activities at the sites notify the Department of Toxic Substances Control, and take actions required by subdivision (a) that are necessary to address the release or threatened release or the presence of any naturally occurring hazardous materials. Construction may be resumed if the Department of Toxic Substances Control determines that the construction will not interfere with any response action necessary to address the hazardous

§ 17213.2

material release or threatened release or the presence of a naturally occurring hazardous material, determines that the site conditions will not pose a significant threat to the health and safety of workers involved in the construction of the schoolsite, and certifies that the nature and extent of the release, threatened release, or presence of a naturally occurring hazardous material have been fully characterized.

(f) Construction may proceed at any portions of the site that the Department of Toxic Substances Control determines are not affected by the release or threatened release of hazardous materials, or presence of any naturally occurring hazardous materials, provided that all of the following apply:

(1) Those portions of the site have been fully characterized.

(2) The Department of Toxic Substances Control determines that the construction will not interfere with any response action necessary to address the release or threatened release of hazardous materials, or presence of any naturally occurring hazardous materials.

(3) The site conditions will not pose a significant threat to the health and safety of workers involved with construction.

(g) The Department of Toxic Substances Control shall notify the State Department of Education, the Division of the State Architect, and the Office of Public School Construction when the Department of Toxic Substances Control certifies that all necessary response actions have been completed at a schoolsite. The Department of Toxic Substances Control shall also notify the Division of the State Architect whenever a response action has an impact on the design of a school facility and shall specify the conditions that must be met in the design of the school facility in order to protect the integrity of the response action.

(h) The school district shall reimburse the Department of Toxic Substances Control for all response costs incurred by the department.

(i) The costs incurred by the school districts when complying with this section are allowable costs for purposes of an applicant under Chapter 12.5 (commencing with Section 17070.10) of Part 10 and may be reimbursed in accordance with Section 17072.13.

(Added by Stats.1999, c. 992 (A.B.387), § 3. Amended by Stats.2000, c. 443 (A.B.2644), § 5, eff. Sept. 14, 2000.)

§ 17251. Powers and duties concerning buildings and sites

The State Department of Education shall:

(a) Upon the request of the governing board of any school district, advise the governing board on the acquisition of new schoolsites and, after a review of available plots, give the governing board in writing a list of the recommended locations in the order of their merit, considering especially the matters of educational merit, safety, reduction of traffic hazards, and conformity to the land use element in the general plan of the city, county, or city and county having jurisdiction. The governing board may purchase a site deemed unsuitable for school purposes by the State Department of Education only after reviewing the department's report on proposed sites at a public hearing. The department shall charge the school district a reasonable fee for each schoolsite reviewed not to exceed the actual administrative costs incurred for that purpose.

(b) Develop standards for use by a school district in the selection of schoolsites, in accordance with the objectives set forth in subdivision (a). The department shall investigate complaints of noncompliance with site selection standards and shall notify the governing board of the results of the investigation. If that notification is received prior to the acquisition of the site, the governing board shall discuss the findings of the investigation in a public hearing.

(c) Establish standards for use by school districts to ensure that the design and construction of school facilities are educationally appropriate and promote school safety.

(d) Upon the request of the governing board of any school district, review plans and specifications for school buildings in the district.

The department shall charge governing boards of school districts, for the review of plans and specifications, a reasonable fee not to exceed the actual administrative costs incurred for that purpose.

(e) Upon the request of the governing board of any school district, make a survey of the building needs of the district, advise the governing board concerning the building needs, suggest plans for financing a building program to meet the needs. The department shall charge the district, for the cost of the survey, a reasonable fee not to exceed the actual administrative costs incurred for that purpose.

(f) Provide information relating to the impact or potential impact upon any schoolsite of hazardous substances, solid waste, safety, hazardous air emissions, and other information as the department may deem appropriate.

(Added by Stats.1996, c. 277 (S.B.1562), § 3, operative Jan. 1, 1998.)

§ 17315. Certificate of compliance; verified reports

(a) When a school building constructed in accordance with plans and specifications approved by the Department of General Services is completed, the notice of completion is filed, and all final verified reports and all testing and inspection documents, as required by this article or as required by the rules and regulations adopted pursuant to this article, are submitted to and on file with the Department of General Services, and all required fees paid by the school district, the department shall issue a certification that the school building complies with the requirements of this article. Nothing in this article shall prevent beneficial occupancy by a school district prior to the issuance of this certification.

(b) When a school building, constructed in accordance with approved plans and specifications, is completed but final verified reports, as are required under Section 39151, have not been submitted to the Department of General Services due to the incapacitating illness, death, or the default of any persons required to file such reports; the Department of General Services shall, upon written request of the school district, review all of the project records and make such examinations as it deems necessary to enable it to certify that the school building otherwise complies with the requirements of this article. The Department of General Services may request the school district to have made, reported, and verified any other tests and inspections which the department deems necessary to complete its examinations of the construction.

(c) The costs incurred by the Department of General Services in connection with this section shall be paid by the school district. The actual costs to perform the examinations, tests, and inspections shall be an appropriate cost of the project to be paid from the building funds of the district. Certification of the project by the Department of General Services shall be withheld until all the costs have been paid by the school district.

(d) This section shall not relieve any individual of his or her responsibility to file verified reports, as required in Section 17309, or any other documents required by the rules and regulations adopted pursuant to this article. This section shall not abrogate the provisions of Section 17312.

(Added by Stats.1996, c. 277 (S.B.1562), § 3, operative Jan. 1, 1998.)

HEALTH AND SAFETY CODE

§ 25358.7. Public participation in response actions

(a) The department or the regional board, as appropriate, shall take the actions specified in this section to provide an opportunity for meaningful public participation in response actions undertaken for sites listed pursuant to Section 25356.

(b) The department, or the regional board, as appropriate, shall * * * inform the public, and in particular, persons living in close proximity to * * * a hazardous substance release site listed pursuant to Section 25356, of the existence of the site and the department's or regional board's intention to conduct * * * a response action at the site, and shall conduct a baseline community survey to determine the level of public interest and desire for involvement * * * in the department's or regional board's activities, and to solicit * * * concerns and information regarding the site from the affected community. Based on the results of the baseline survey, the department or regional board shall develop a public participation * * * plan that shall establish appropriate communication and outreach measures commensurate with the level of interest expressed by survey respondents. The public participation * * * plan shall be updated as necessary to reflect any significant changes in the degree of public interest as the site investigation and cleanup process moves toward completion.

(c) The department or regional board shall provide any person affected by a response action undertaken for sites listed pursuant to Section 25356 with the opportunity to participate in the department's or regional board's decisionmaking process regarding that action by taking all of the following actions:

(1) Provide * * * access to information which the department or regional board is required to release pursuant to the California Public Records Act (Chapter 3.5 (commencing with Section 6250) of Division 7 of Title 1 of the Government Code), relating to the action, except for the following:

(A) Trade secrets, as defined in subdivision (a) of Section 25358.2.

(B) Business financial data and information, as specified in subdivision (c) of Section 25358.6.

(C) Information which the department or regional board is prohibited from releasing pursuant to any state or federal law.

(2) * * * Provide factsheets, based on the expressed level of public interest, regarding plans to conduct the major elements of the site investigation and response actions. The factsheets shall present the relevant information in nontechnical language and shall be detailed enough to provide interested persons with a good understanding of the planned activities. The factsheets shall be made available in languages other than English if appropriate.

(3) Provide * * * notification, upon request, of any public meetings held by the department or regional board concerning the action.

(4) Provide the * * * opportunity to attend and to participate at those public meetings.

(5) Based on the results of the baseline community survey, * * * provide opportunities for public involvement at key stages of the response action process, including the health risk assessment, the preliminary assessment, the site inspection, the remedial investigation, and the feasibility study stages of the process. If the department or regional board determines that public meetings or other opportunities for public comment are not appropriate at any of the stages listed in this section, the department or regional board shall provide notice of that decision to the affected community.

(d) The department or regional board shall develop and make available to the public a schedule of activities for each site for which remedial action is expected to be taken by the department or regional board pursuant to this chapter and shall make available to the public any plan provided to the department or regional board by any responsible party, unless the department is prohibited from releasing the information pursuant to any state or federal law.

(e) In making decisions regarding the methods to be used for removal or remedial actions taken pursuant to this chapter, the department or regional board shall incorporate or respond in writing to the advice of persons affected by the actions.

(f) This section does not apply to emergency actions taken pursuant to Section 25354.

(Added by Stats.1999, c. 23 (S.B.47), § 2, eff. May 26, 1999. Amended by Stats.2000, c. 912 (S.B.667), § 19, eff. Sept. 29, 2000.)

HEALTH AND SAFETY CODE

§ 25358.7.1. Community advisory groups

(a) At each site, a community advisory group may be established by the affected community to review any response action and comment on the response action to be conducted in that community. The department or regional board shall regularly communicate, and confer as appropriate, with the community advisory committee. The department or regional board shall also advise local environmental regulatory agencies and other appropriate local agencies of planned response actions and provide opportunities for review and comment. If the department or regional board, whichever is overseeing a response action, receives a petition signed by at least 50 members of a community affected by the response action at a site or a resolution adopted by the legislative body of the jurisdiction within which the response action has been or will be initiated, the department or regional board shall assist the petitioners or the legislative body to establish a community advisory group to review the response action at the site.

(b) To the extent possible, the composition of each community advisory group shall reflect the composition of the affected community and the diversity of interests of the community by including all of the following types of individuals on the community advisory group:

(1) Persons owning or residing on property located near the hazardous substance release site or in an adjacent community, or other persons who may be directly affected by the response action.

(2) Individuals from the local business community.

(3) Local political or government agency representatives.

(4) Local citizen, civic, environmental, or public interest group members residing in the community.

(c) The following entities may participate in community advisory group meetings in order to provide information and technical expertise:

(1) The department or regional boards.

(2) Representatives of local environmental regulatory agencies.

(3) The potentially responsible parties or other persons who are conducting the response action.

(d) The existence of a community advisory group shall not diminish any other obligation of the department or regional board with respect to public participation requirements specified in Section 25358.7. Nothing in this section shall affect the status of any citizen advisory group formed before the enactment of this section, a federal Department of Defense Restoration Advisory Board, or a federal Department of Energy Advisory Board.

(Added by Stats.1999, c. 23 (S.B.47), § 2, eff. May 26, 1999.)

STATE MANDATES**

Ms. Paula Higashi
Executive Director
Commission on State Mandates
980 Ninth Street, Suite 300
Sacramento, California 95814

RE: Department of Toxic Substances Control's Opposition to
Clovis Unified School District's Test Claim No. 02-TC-43

Dear Ms. Higashi:

The Department of Toxic Substances Control (DTSC) submits this letter as our opposition to and comments on the Clovis Unified School District's Test Claim (Clovis' Claim) under Government Code section 17553, subdivision (a). DTSC reserves the right to submit additional comments on Clovis' Claim as may appear necessary and proper.

DTSC opposes the claim that the geological, soil and environmental assessment and cleanup ("Hazardous Material Assessment") conditions constitute a reimbursable state mandate on school districts (districts) on four grounds. First, district participation in the underlying program is elective or optional, and neither a compulsory nor a de facto mandate under *Department of Finance v. Commission on State Mandates* (2003) 30 Cal.4th 727, 731-735 (hereafter *DOF-2003*). Second, school districts have authority to levy fees to fund their share of costs under Education Code section 17620, among others, thus disqualifying them for reimbursement under Government Code section 17556, subdivision (d), and *Connell v. Superior Court (Santa Margarita Water District)* (1997) 59 Cal.App.4th 382 (*Santa Margarita Water District*). Third, jointly funded programs such as school funding are outside the coverage of Section 6, article XIII B of the California Constitution (Section 6) under *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal. App.4th 1264 (*County of Sonoma*). Fourth, compliance with these funding conditions fails to provide a new program or increased level of service to the public to qualify as a reimbursable state mandate under *County of Sonoma*. Consequently, DTSC maintains that these geological, soil and environmental assessment and cleanup (hazard assessment requirements) are not reimbursable state mandated costs under Constitution, article XIII B, section 6.

REVEREND

DEAR SIR,

NO MORE OF THIS
KIND OF LETTERS

INTRODUCTION

Clovis' Claim asserts that these hazard assessment procedures impose reimbursable, state-mandated costs on grant applicants for state school construction funds under Education Code sections 17072.13, 17212, 17213.1, and the various associated sections added and amended by various legislation between 1976 and 2002. These procedural safeguards effect safety standards in that they provide informed, interim decision points for districts to withdraw or proceed with school site acquisition and construction projects after checking for hazards associated with the site. These hazard assessment requirements apply only to applicants for state money, and are conditions on state funds under the School Facilities Program (Educ. Code § 17070.10 et seq.) to assure that resulting school sites are safe for their intended population -public school children - as noted in the sections quoted by Clovis' Claim, itself. Districts that do apply for state funding may fund their share of the project costs with local bonds, developer fees, Mello-Roos fees, improvement district levies, and certificates of dedication. (Educ. Code § 17620; Gov. Code § 53311 et seq.; Educ. Code § 15350 et seq.)

The Schools Facilities Program funds local construction in equal shares with the district under Education Code section 17072.13. When a school district applies for state funds from the School Facilities Program for school construction projects, including site acquisition, the district must check for possible hazardous conditions at the site using the process specified at Education Code sections 17072.13 and 17210 et seq. Education Code section 17212 continues the pre-1975 condition that districts must investigate prospective school sites using competent personnel. The district may choose at any time to stop pursuing a prospective school site. To assure that state construction money funds a reasonably safe environment, the Education Code sections 17072.13, 17212 and 17213.1 require inquiry into the possible geological, soil and environmental hazards of the site. The applying district must conduct a Phase I assessment for environmental hazards (including contamination from hazardous substances) using existing documents, materials and studies, and must submit the review with \$1,500 for DTSC oversight. DTSC refunds to the district any unused portion of this \$1,500.

If the Phase I indicates that contamination may be present and the applying district chooses to continue pursuing the site, Education Code section 17213.1 requires the district to conduct a Preliminary Endangerment Assessment (PEA) under an environmental oversight agreement with DTSC that includes reimbursement. This PEA may include limited or extensive sampling, depending on the results of the Phase I. If the district decides to acquire or construct on a contaminated site, it must also conduct an appropriate response to render the site usable by children under Education Code section 17213.2. As part of the response activities, the district must fund DTSC oversight as well as the necessary public comment and participation activities required by Health and Safety Code sections 25358.7 and 25358.7.1.

BASES FOR OPPOSITION

1. As conditions of an optional state funding program, hazard assessments are neither actual nor de facto reimbursable state mandates under DOF-2003.

A. Hazard assessment requirements are not compulsory

The Clovis Unified School District (District) properly quotes Education Code sections 17210.1 and 17213.1, at pages 33-34, including language noting that the section applies to state funded entities. (Test Claim, pages 18, 19, 23.) Education Code section 17210.1 expressly addresses only sites for which “school districts elect to receive state funds.” Education Code section 17213.1 also states, “[a]s a condition of receiving state funding” and clearly applies these requirements to districts seeking state funding of their projects. However, the District overlooks this state funding condition precedent in its analysis and omits any reference to the *County of Sonoma* and *DOF-2003* case decisions rejecting claims that such elective activities’ costs are state mandates. The District also fails to mention the existing state funding for part or all of the hazard assessment work under Education Code sections 17072.12 and 17072.13 that reduces the unfunded costs or invalidates their grounds for reimbursement as an unfunded mandate. The School Facilities Program provides optional, joint state and local funding for school facilities construction as demonstrated by the language limiting application of the sections to applicants for funds. (E.g., Educ. Code § 17072.13, 17072.18, et al.)

The state-funded School Facilities Program conditions in Clovis’ test claim are analogous to the state-funded educational programs at issue in *DOF-2003*. In that case, the California Supreme Court examined and rejected various school districts’ claims that the statutes compelled participation in the various programs, making the program’s meeting and agenda posting requirements reimbursable unfunded state mandates. (*DOF-2003, supra*, 30 Cal.4th 727, 732.) In the *DOF-2003* case, the California Supreme Court found that participation in the underlying programs was neither mandated nor legally compelled by requirement or by a penalty for non-participation (de facto). In addition, to the extent that participation in the last of the nine programs was not optional, the district could claim reimbursement under that program, and thus the state had funded any new costs. (*Id. at* p. 730-731.) As a consequence, the meeting and agenda posting requirements in that case were not reimbursable mandates because the participation in the underlying program was optional, and the state would fund any additional costs. (*DOF-2003, supra*, 30 Cal.4th at p. 731.)

The hazard assessment requirements are not rendered mandates because the state funds only part of the total costs under Education Code sections 17072.1, 17213.13 and 17213.18. The *DOF-2003* court noted, “[w]e reject the suggestion, implicit in claimants’ argument that the state cannot legally provide school districts with funds for voluntary programs, and then effectively reduce that funding grant by requiring school districts to incur expenses in order to meet conditions of program participation.” (*DOF-2003, supra*, 30 Cal.4th at p. 754.)

Here the geological, soil and hazardous material assessment requirements are analogous to this aspect of the *DOF-2003* case. Since the districts elect to apply for state funds, participation in the Schools Facilities Program is not compulsory, and therefore does not qualify for reimbursement as a state mandate under Section 6.

B. Participation is not compelled de facto.

The Supreme Court in *DOF-2003* also rejected the districts' claim that participation in the educational programs at issue was de facto compulsory, in that the districts had no true choice but to continue participation, having already begun to participate. (*DOF-2003, supra*, 30 Cal.4th at p. 748, 751-754.) The court reasoned that, since there was no showing that withdrawal would result in severe penalties, double taxation, or other draconian consequences to the districts, no de facto compulsion existed. (*DOF-2003, supra*, 30 Cal.4th at p. 754.) Regarding Clovis' Claim, the School Facilities Program statute contains no penalties for failing to apply for funds, nor any tax or fee imposed for failure of a district to participate. Furthermore, the Phase I and PEA provide advance notice of possible contamination on the site, allowing the district to cease pursuing a school site at any time without penalty. The hazard assessment requirements inform district decision-making without dictating school siting choices.

The District might claim a de facto reimbursable state mandate because there is no feasible alternative to participation in the state funding program for school construction projects where hazard assessment costs are sizable. The *DOF-2003* court acknowledged that some programs could have compliance costs so great that funded program benefits would not cover the compliance costs or might violate a spending limitation in the applicable regulations or statutes. In that case, "a compulsory program participant likely would be able to establish the existence of a reimbursable state mandate under . . . section 6." (*DOF-2003, supra*, 30 Cal.4th at p. 751-754.) Again, however, DTSC would point out that districts may elect to stop pursuing such a high cost site at any time without compulsion or penalty.

As further discussed below, any costs borne by the district are also partially funded, if not fully funded, by the state, thus also disqualifying the hazard assessment requirements as reimbursable state mandates.

I. Districts' existing authority to fund these hazard assessments through fees, levies, taxes and assessments disqualifies them for reimbursement under Government Code section 17516, subdivision (d).

A. Districts have Authority to Levy Fees, Assessments and Taxes under Education Code 17620 to fund the local share of costs.

Government Code section 17556, subdivision (d), prohibits the commission from determining costs are mandated by the state if it finds that the district "has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service." *Connell v. Superior Court (Santa Margarita Water District)* (1997) 59 Cal.App.4th 382 (*Santa Margarita Water District*) addressed

the meaning of these phrases under Revenue and Taxation Code section 2253.3, subdivision (b)(4), with respect to water quality requirements for certain irrigation uses of recycled water. The court expressly notes that the same provision is now contained in Government Code section 17556, subdivision (d). (*Id.* at 398.) The Third District Court of Appeal in *Santa Margarita Water District* found that "sufficient" referred to the authority being sufficient to levy the fees and charges to fund the local costs at issue. (*Id.* at 400, 403.) The court ruled that the test was not whether actual revenues levied are sufficient to cover the costs of the program. (*Id.* at 400.)

For Clovis' Claim, we refer the Commission to Education Code section 17620 which states in pertinent part:

(a) (1) The governing board of any school district is authorized to levy a fee, charge, dedication, or other requirement against any construction within the boundaries of the district, for the purpose of funding the construction or reconstruction of school facilities, subject to any limitations set forth in Chapter 4.9 (commencing with Section 65995) of Division 1 of Title 7 of the Government Code.

In addition, the Mello-Roos Community Facilities Act of 1982 (Gov. Code § 53311, et seq.) allows a district to form a community facilities district to assess fees to generate school facility funding. Furthermore, the Legislature also authorizes districts to generate funds through bond issues for school facilities improvement districts under Education Code section 15350 et seq.

Based on these references alone, the districts have the means to generate revenues to cover the local share of costs required as conditions on state funding under the School Facilities Program. To the extent a district is unable to cover the local share, it may also apply for additional economic hardship grants from the state as noted below.

B. The state also funds local costs in economic hardship cases under Education Code section 17072.13.

The state School Facilities Program routinely funds half of the hazard assessment requirements, and funds them wholly in cases of economic hardship under Education Code sections 17072.12, 17072.13 and 17072.18. State funds also cover response costs to address actual contamination in the same proportion. (Educ. Code § 17072.18.) Districts unable to fund the local share of construction project costs, may also apply for economic hardship funding to defray part of or the entire remaining local share. (Educ. Code § 17072.13, subdivision (e).) Therefore, the state actually funds these hazard assessment costs under the existing School Facilities Program, sometimes funding 100 percent of project costs. Even if the hazard assessment requirements force a reallocation of funds between entities already jointly responsible for providing a service, the requirements do not create a reimbursable state mandate under *Los Angeles v. Commission of State Mandates*. (*Los Angeles 2003, supra*, 110 Cal.App.4th at pp. 1193-1194.) For these reasons, the hazard assessment

requirements remain voluntary, are fully or partially state-funded, and thus, are not reimbursable state mandates.

II. The *County of Sonoma* court opined that the California Constitution's Section 6 of article XIII B does not cover jointly-funded programs such as the School Facilities Program.

School construction was locally funded, with the state acting as a bank in the 1950s. (*Whittier Elementary School Dist. of Los Angeles County v. Kirkwood* (1956) 147 Cal.App.2d 330, 333-334 (*Whittier*.) School construction became a jointly-funded effort after 1975 with the Leroy F. Green School Lease-Purchase Law of 1976. (Educ. Code § 17000 et seq.) In 1979, the State Allocation Board restructured the Lease Purchase Program into a grant-based program under which school districts submitted cost proposals for which they would be given grants. However, the state funds had numerous spending limitations and controls. (California Research Bureau (CRB), *School Facility Financing: A History of the Role of the State Allocation Board and Options for the Distribution of Proposition 1A Funds*, page 13 citing formerly Educ. Code § 17730.2, 17732; presently Educ. Code § 17030, 17032). The districts continued to be responsible for up to 10 percent of the projects' costs. (*Ibid.*) School funding has long been a jointly-funded effort with the local share funded by local bonds, fees, assessments, and taxes. (*County of Sonoma, supra*, 84 Cal. App.4th 1264, 1286; Educ. Code § 17620.)

Therefore, since Section 6 became effective in 1980, districts have borne or shared school facility costs with the state whether through local bonds, fees or taxes, analogous to educational program funding examined in the *County of Sonoma* case. (*County of Sonoma v. Commission on State Mandates* (2000) 84 Cal.App.4th 1264, 1289.) "These joint budget allocations are not subject to Section 6." (*Ibid.*) The *County of Sonoma* case found that public school education was a jointly-funded venture between state and local government and was, therefore, outside the scope of Section 6. (*Ibid.*) Furthermore, as noted above, when the state reduces or reallocates funding, the loss suffered by the local entity is not a reimbursable mandate. (*Ibid.*) For these additional reasons, the Clovis test claim does not qualify as a reimbursable state mandate.

III. Hazard Assessments are part of the District's continuing duty to provide safe school sites, not a new program shifted from the state to the district.

Here, the program at issue concerns school facility safety, an area that the state has long regulated to assure safety of school children in facilities for compulsory education. (Former Educ. Code § 39002; *Hall v. City of Taft* (1956) 47 Cal.2d 177, 185-186.) A mandate is a new program if the local entity had not previously been required to implement it. (*County of Los Angeles v. Commission on State Mandates* (2003) 110 Cal. App.4th 1176 at p. 1189 (*Los Angeles 2003*.) However, to qualify for reimbursement, the program must be one that the state previously funded in whole and would newly be funded solely by local tax revenues and not by other levies. (*Los Angeles 2003, supra*, 110 Cal. App.4th at p. 1193, citing *County of Sonoma v.*

Commission on State Mandates (2000) 84 Cal. App.4th 1264 at p. 1289). The state did not fund these site acquisition and investigation costs, including the hazard assessments, before 1975 so the state did not shift state program costs to the districts.

If anything, these hazard assessment requirements merely clarify and specify how districts may assure proper use of public funds in providing reasonably safe venues for public education. Upon entering the field, the state has directed its money to provide reasonably safe facilities for their intended purpose: here, the compulsory education of children. (See former Educ. Code § 15002.1 protecting against earthquake danger.) The state has exclusive authority to set safety standards for compulsory education. (*Hall v. City of Taft* (1956) 47 Cal.2d 177, 185-186 [partially superseded by subsequent legislation requiring compliance with local ordinances].) The various subsequent enactments and revisions to the Education Code create no new program or increased level of service to the public. If anything, the new requirements merely give criteria and procedures to clarify how districts ascertain a site's fitness for use as a school. Consequently, under *Connell v. Superior Court (Santa Margarita Water District)* (1997) 59 Cal.App.4th 382, the hazard assessment requirements merely clarify safety standards, and do not comprise a new program or increased level of service to the public to qualify as a reimbursable state mandate under Constitution, article XIII B, section 6.

DTSC would also note to the Commission that a mandate for safe school sites was in effect on January 1, 1975 (former Education Code section 15002.1) and remains in Education Code section 17212. (Clovis' Claim, page 2.) Education Code section 15002.1 was originally enacted in 1967, and was renumbered as 39002 and now is 17212. Education Code section 15002.1 required the governing board of a school district to have a building site investigated by competent personnel, prior to acquisition, to ensure that the final site selection was determined by an evaluation of all factors affecting the public interest and not limited to selection on the basis of raw land cost only. Now, more specific measures to achieve those ends accompany such acquisitions. The District correctly asserts that the environmental hazard assessment requirements for school site evaluation at issue here were enacted after January 1, 1975. The claim omits, however, to reference the general school safety duties from statutory or case law.

As section 39002, the section referred to section 39101, requiring the California Department of Education to develop standards for school district use in the selection of school sites considering safety, along with educational merit and conformity with local general plans. (Educ. Code § 39101(a), derived from former section 15302, and ultimately from former section 18102 in, the School Code.) The state has specified facility standards for occupancy of school sites since 1933 when the School Code was in force as noted also in *Hall v. City of Taft* (1956) 47 Cal.2d 177, 185-186. (Educ. Code § 17365, formerly Educ. Code § 39210.) In 1956, the California Supreme Court considered school safety issues in *Hall v. City of Taft* and found that the state fully occupied the field in specifying construction requirements for schools to be sure they were reasonably safe for their intended use as schools. (*Hall v. City of Taft* (1956) 47 Cal.2d 177, 185-186.) Subsequently, building standards for school facilities were

enacted under the Field Act (Educ. Code § 17281 et seq.) "to expedite the provision of safe educational facilities for California school children." (Educ. Code § 17366, formerly Educ. Code § 39211.) Districts had to consider and evaluate all costs of site acquisition under Education Code section 15002.1 (subsequently Education Code section 39002, presently section 17212) before 1975, and therefore have no claim to a new reimbursable state mandate on those grounds.

The hazard assessments do not provide a new service to public. Instead, they require research and periodic evaluation at key decisions points, such as the Phase I and PEA, to help inform public spending decisions to assure reasonable use of state school facility funds. This increased level of information also protects against commitment to sites with unknown contamination levels. In addition, these processes assure that the site is reasonably safe for its intended use: occupancy by children for compulsory education. The situation here is similar to *County of Los Angeles v. Department of Industrial Relations* where the court found costs of complying with new elevator fire and earthquake safety standards were not reimbursable as state mandates because they provided no new or increased level of service to the public. (*County of Los Angeles v. Department of Industrial Relations* (1989) 214 Cal.App.3d 1538, 1546.)

Similarly, Education Code sections 17072.13, 17212 and the School Facilities Program statutes (Educ. Code § 17070.10 et seq.) merely clarify and further specify the means to be employed in providing safe schools, as intended by the Legislature as far back as 1933. (See annotations to Educ. Code § 39101, *Hall v. City of Taft* (1956) 47 Cal.2d 177, 185-186.) Here the hazard assessment requirements specify procedures and oversight mechanisms to assure consideration of various hazards without providing a new service to the public. To the extent that the public comment process in hazard assessment requirements are a service to public, the state shares the incremental costs as project costs under the schools facilities program (Educ. Code § 17213.18), thus preventing these costs from becoming either an unfunded mandate or a de facto state mandate under *DOF-2003*.

CONCLUSION

The Commission on State Mandates has numerous grounds to reject the District's Claim that hazard assessment conditions on state funding are reimbursable state mandates.

First, because the districts have the option to apply for state school site funding from the School Facilities Program, their participation in the underlying program is voluntary, optional and not compulsory. Given that districts may choose to stop pursuing a contaminated site at any time, they can avoid the exorbitant hazard assessment costs and are not compelled to participate in the School Facilities Program, which would create a reimbursable mandate. Furthermore, to the extent that local funding sources prove insufficient, the state provides additional economic hardship funding for these hazard assessment requirements under Education Code section 17072.13, subdivisions (d) and (e). For these reasons, therefore the School Facilities Program hazard

assessment requirements are optional and do not qualify as reimbursable state mandates in fact or de facto under *DOF-2003*.

Second, Education Code section 17620, among others, authorizes districts to levy fees, charges, and dedications to fund the local share of school site costs. The multiple levying authorities appear sufficient to cover local costs and the district could withdraw from site acquisition if the costs became exorbitant. Whether the district chooses to levy fees in sufficient quantity is not the proper test. Therefore, the levying authority disqualifies the hazard assessment requirements from being reimbursable under Government Code section 17556, subdivision (d) and the *Santa Margarita Water District* case.

Third, *County of Sonoma* held that shared funding programs such as the school facilities program were not within the ambit of Section 6 of article XIII B of the California Constitution. Therefore the School Facilities Program, a shared state local funding program, is outside the realm of reimbursable mandates. Even if it were not, costs associated with participation in the program do not arise from shifting costs from state to local entities to provide the same services to the public.

Fourth, providing safe school sites was and remains the fiscal and legal duty of the district before 1975 under the various enactments. The hazard assessment conditions on state funding work to provide necessary information to prevent the resulting facility from being unhealthful to children obtaining their compulsory public education. As public safety and health standards, the hazard assessment conditions do not provide a new program or increased level of service to the public as contemplated under the California Constitution's Section 6 of article XIII B, Government Code section 17514, *County of Los Angeles v. Department of Industrial Relations* or *Santa Margarita Water District*.

For all the reasons noted above, as well as any other grounds the Commission may deem proper, the DTSC respectfully urges denial of Clovis Unified School District's Test Claim No. 02-TC-43.

Respectfully submitted,

Antonette Benita Cordero
Chief Counsel and Deputy Director

WHITTIER ELEMENTARY SCHOOL DISTRICT
OF LOS ANGELES COUNTY, Plaintiff and
Respondent,

v.

Robert C. KIRKWOOD, as Controller of the State of
California, Defendant and
Appellant.

Civ. 21915.

Dec. 31, 1956.

Declaratory judgment action by school district against State Controller to determine authority of State Allocation Board to amend order apportioning funds from Public School Building Loan Fund so as to permit district to retain proceeds from sale of replaced school site instead of applying such proceeds toward repayment of the state allocation as required by the resolution which initially approved the allocation. The Superior Court, Los Angeles County, Philip H. Richards, J., entered judgment adverse to Controller and Controller appealed. The District Court of Appeal, Fourt, J., held that Board was authorized to amend the original order so that school district would be entitled to retain the proceeds from sale of the replaced school site.

Judgment affirmed.

Where State Allocation Board had, in original order apportioning funds from Public School Building

Loan Fund for construction of school, required that proceeds from sale of replaced school site be applied toward the repayment of the state allocation, board was thereafter authorized to amend the original order so that school district would be entitled to retain the proceeds from sale of the replaced school site. West's Ann.Education Code, § § 5041 et seq., 5044.5, 5045, 5048, 5050, 5053-5063, 5058, 5059, 5071-5073.

****111 *331** Edmund G. Brown, Atty. Gen., Richard L. Mayers, Deputy Atty. Gen., for appellant.

Harold W. Kennedy, County Counsel, Wm. E. Lamoreaux, Asst. County Counsel, Los Angeles, for respondent.

FOURT, Justice.

This is an appeal by the defendant from a judgment in an action in declaratory relief brought to determine the authority of the State Allocation Board to amend an order apportioning funds from the Public School Building Loan Fund so as to permit the respondent School District to retain the proceeds from the sale of a replaced school site, instead of applying such proceeds toward the repayment of the state allocation, as set forth in the resolution initially approving such allocation.

On about June 5, 1950, respondent, pursuant to the provisions of chapter 1.6 of Division 3 of the Education Code, filed a written application with the State Allocation Board for an allocation of \$2,689,632.70, for the acquisition and construction of certain school facilities set forth therein. The electors of the respondent District, at an election, had authorized the Board of Trustees of the District to accept and expend an apportionment from the State in an amount not to exceed \$3,250,000, pursuant to the law.

On or about January 9, 1951, the State Allocation Board, by Resolution numbered 1389-106, approved an allocation of \$2,452,472, for the purposes set forth in the application. By this Resolution the respondent District was required to contribute to the costs of the contemplated school project 'the net proceeds or credits allowed from the disposition of any sites, improvements, or facilities sold, transferred, or exchanged as a result of the acquisition or construction of any sites, improvements, or facilities pursuant to Chapter 1.6. * * *' The Resolution further provided: 'That the District shall proceed to dispose of any school building area in excess *332 of the

maximum prescribed by Paragraph 2 of this resolution, and any site or sites scheduled to be abandoned as a result of the acquisition or construction of any sites, improvements or facilities pursuant to Chapter 1.6 above, not later than the date the new construction authorized by this resolution is available for occupancy, provided that the terms, conditions and manner of disposition thereof shall be subject to the approval of the Director of Finance, and provided further that if such excess area or sites have not been disposed of by said date, the District shall dispose of the same in accordance with the instructions of the Director of Finance.'

****112** On or about January 20, 1953, the respondent District requested permission to sell the real property owned by the District, known as the Jonathan Bailey School and site, and to retain the proceeds therefrom 'to be used for the construction of additional classroom facilities in accordance with the needs of the District.'

On or about December 16, 1953, the State Allocation Board adopted Resolution No. 1389-106V, which amended Resolution No. 1389-106, in that it deleted from the original Resolution the requirement that the respondent School District contribute to the cost of the specific project as approved the net proceeds obtained from the disposition by the District of any sites, improvements, or facilities sold, transferred, or exchanged. Said Resolution further purported to authorize respondent District to sell the Jonathan Bailey School and site for not less than \$253,600, and to apply the net proceeds obtained from said sale toward providing or constructing additional but unspecified school facilities.

On or about April 26, 1954, the Attorney General advised the appellant that the State Allocation Board had no authority to amend the original Resolution and that such purported amendment was invalid. About September 8, 1954, the respondent District entered into an agreement with the city of Whittier for the sale of the school site for the sum of \$250,600.

The Attorney General, in his brief, sets forth that on October 27, 1954, the State Allocation Board adopted Resolution numbered 1389-106X, which said Resolution apparently took notice of the fact that the Attorney General had been requested by the Chief of the Local Allocation Division to reconsider his opinion of April 26, 1954. Further, it is said that by this Resolution the approval of the State Allocation Board, in allowing the respondent District to retain

the proceeds *333 from the sale of the Jonathan Bailey School and site was specifically made subject to the approval of the Attorney General. The respondent District points out that this particular Resolution (1389-106X) was never received in evidence.

On or about November 12, 1954, the Attorney General reaffirmed his previous opinion. On January 12, 1955, by Resolution numbered 1389-106Y, the State Allocation Board, after taking notice of the opinions of the Attorney General, reaffirmed its previous position. In this latter Resolution there is contained the following:

'2. That Paragraph 2 to-wit: 'That the approval of the Board, allowing the District to retain the proceeds from the disposition of the Jonathan Bailey School and site, is subject to approval of the Attorney General of the State of California', of Resolution No. 1389/106X, adopted October 27, 1954, is hereby rescinded.'

Thereafter, the appellant demanded that the entire sum received, or to be received, by the respondent District from the sale of the Jonathan Bailey School and site be paid to the State of California, and in his demand stated that if said sums were not paid, that the State Controller would deduct the same from the yearly allotments of state funds to the respondent School District.

Some of the pertinent, relevant provisions of the law involved are as follows: Section 5048 of the Education Code as it read in 1950, and as it now reads, authorizes school districts to file applications for state apportionments with the State Allocation Board, and requires that Board to approve or reject the application.

Section 5050 of the Education Code requires that before an allocation becomes final 95% of the bonded capacity of a school district be outstanding, or if not, that the outstanding bonds be within \$25,000 of the total bond limit. The section then provides as follows:

'At the time the board makes a conditional apportionment pursuant to Section 5048, it shall determine what portion of the total amount of bonds which a district is permitted to issue and sell by law shall be issued and sold by such district, the ****113** proceeds of which shall be applied toward the cost of the project for which the apportionment is sought. The portion so determined by the board shall be not less than the minimum amount required for such

apportionment to become final under this section.'

The section also requires the electors of the school district, *334 by a two-thirds vote, to authorize the government board of the district 'to accept, expend, and repay, as provided in this chapter, an apportionment under the provisions of this chapter.' As heretofore indicated, such an election was held in the respondent District and authorized the governing board to accept, expend and repay an amount not to exceed \$3,250,000.

A complete scheme of repayment to the State of apportionments made, with interest, over a period of years is provided by sections 5053 to 5063 of the Education Code, section 5059 providing that interest shall cease after twenty-five years and at the end of thirty years any unpaid balance of an apportionment shall be cancelled. Section 5058 provides for the disposition of the repayments as follows:

'5058. The State Controller shall, during the next fiscal year following that in which he determines the annual repayment as herein provided, deduct the total amount of the annual repayment of each district in equal amounts from each installment of the apportionments made to such district from the State School Fund under Chapter 15 of this division; and, on order of the State Controller, the amount so deducted shall be transferred to the Public School Building Loan Fund. All money transferred to the Public School Building Loan Fund under the provisions of this section shall be available only for transfer to the General Fund under the provisions of Section 5103.'

Other than as provided in the above referred to sections, there is no provision, so far as we are able to locate, requiring school districts to apply any other funds, either available at the time of the application or to become available from the sale of assets, towards the construction project or as a reduction or repayment of the apportionment, nor is there any provision in any of the sections requiring the State Allocation Board to include such provisions in the granting of the apportionment, this matter resting wholly within its discretion.

Pursuant to its rule-making power, the State Allocation Board adopted, among others, two rules as follows: Rule 1778 provides that at the time of making an apportionment the State Allocation Board shall prescribe the amount of funds to be contributed by the district toward the construction project, and in determining the amount of available funds may specify that proceeds from the sale of any facilities to

be replaced through an apportionment shall be applied toward the cost of the construction project as such proceeds become available. Thus, by its own rule, the Board has discretion to *335 require the proceeds from the sale of facilities to be used toward the project.

Rule 1781 provides, so far as material, as follows: 'Notwithstanding anything to the contrary in these rules and regulations, the Board shall have power:

* * *

'(c) To modify any apportionment or resolution of apportionment, either conditional or final, where the Board determines that good cause exists therefor.

'This section shall apply to any apportionment or resolution of apportionment heretofore or hereafter made or adopted by the Board.'

The respondent has pointed out that under section 5058 of the Education Code it is required that the State Controller deduct the amount of annual repayments of each district from the apportionments made to such district from the State School Fund and to transfer the amount so deducted to the Public School Building Loan Fund and from there to the General Fund under the provisions of section 5103. The latter section provides for the accumulation of money to retire the State school bonds. Thus, **114 should the appellant deduct the amount here involved from the regular yearly State apportionment to respondent District, it would eventually come to rest in the General Fund and would not be available for an allotment to any other school district.

The only provisions we have been able to locate providing for reimbursing the Public School Building Loan Fund after an allocation has been made to a school district are when the money allocated has been expended for unauthorized purposes, or is in excess of the final cost of the project, under section 5071 of the Education Code; when any unexpended portion of an allocation remains after three years has expired, section 5072 of the Education Code; and when a school site acquired with money allocated is sold within three years, section 5073 of the Education Code. The money in question in the instant case does not fall within any of the categories named.

The respondent also points out that the legislature, in the 1955 session amended section 5048 by adding thereto, among other things, the following:

'The board may for such good cause as it shall

determine, reduce the amount of, or modify any provisions relating to, any contribution required of a school district under the terms of an apportionment, other than any contribution required *336 of such district under Section 5050 from the sale of bonds; provided, that the board may not, without the consent of the district, increase the amount of any district contribution under the terms of an apportionment, in the absence of mistake arising from any source, or misrepresentation, concealment, or omission, on the part of the district, intentional or otherwise. *The provisions of this paragraph shall be applicable to apportionments heretofore or hereafter made.* (Emphasis added.) (Stats.1955, ch. 1734, § 3.)

It would appear therefore, that the legislature validated the actions of the State Allocation Board.

The trial judge in this matter prepared an opinion in writing wherein he set forth his reasoning and the law of the case. We believe the cause was correctly and properly disposed of in the trial court and we adopt as part of this opinion the memorandum opinion of the trial court which is as follows:

'The sole question for determination in this case is the authority of the State Allocation Board to amend an order apportioning funds from the Public School Building Loan Fund, so as to permit the plaintiff School District to use the proceeds from the sale of a replaced school site for the construction of additional school buildings, instead of applying such proceeds toward the repayment of the allocation as originally provided in the resolution approving such allocation.

'It is clear that the school building aid program embraced in Article 1, Chapter 1.6, Division 3 of the Education Code is to provide necessary and adequate school sites and buildings for financially distressed school districts.

'While the Act (Section 5048) requires the Director of Finances to determine the district's financial ability to meet all or a portion of the cost out of available funds, there is no provision in the Act which requires the Board to compel the district to contribute any of its available funds or funds which thereafter become available, except in the case of a sale within three years of a site or improvements purchased or improved in whole or in part from an apportionment (Section 5073).

'Rule 1778 adopted by the Board, pursuant to authority of Section 5045, provides that the Board *shall* prescribe the amount of funds to be contributed by the District and *may* specify that the proceeds

from the sale of any facilities to be replaced through an apportionment shall be applied toward the cost of the approved project.

[1]*337 'In the first instance then, it is within the Board's discretion to determine **115 if proceeds from the subsequent sale of replaced facilities shall be applied toward the cost of the project.

'Rule 1781 provides that the Board may modify any apportionment, conditional or final, where the Board determines that good cause exists therefor. With no statutory provision relating to the use of funds subsequently becoming available from the sale of replaced facilities, and with authority to modify an apportionment for good cause, it would appear that the Board has authority to modify the provision of an apportionment requiring the District to contribute the net proceeds from the disposition of any replaced facilities by excepting therefrom the net proceeds acquired by the District from the sale of a particular school and site.

'The Attorney General contends that both the statute and the Board rules require the District to make use of all its available funds before obtaining State aid. This contention is not supported by any provision of the statute or by the Board rules.

'The Attorney General further contends that by modifying the apportionment provision relating to the contribution of proceeds from the sale or replaced facilities, by exempting the proceeds from the sale of one site and improvements, the Board has in effect approved the use of such proceeds for a project without first requiring the District to apply for an apportionment of such sum in the manner prescribed by law. The fallacy of this contention is that the Board is not required by law, nor by its own rules to require such contribution in originally approved apportionment. An expenditure of the District's funds subsequently becoming available is not an allocation from the Public School Building Loan Fund.

'It is a further contention of the Attorney General that to permit the plaintiff to retain and use the proceeds received from the sale of replaced facilities subverts the entire statutory scheme envisaged in the State Building Aid program in that it would render completely ineffectual the priority system contained in the Act. Sec. 5044.5 provides that the Board shall by rule give priority in allocating funds to districts where the children will benefit most from additional facilities. After setting forth the several bases for priority, the section provides that the Board may make exceptions when it determines that it will be for

the benefit of the children affected. Thus it appears that even a waiver of *338 priority is within the discretion of the Board and not in conflict with the enabling statute.

[2] 'We conclude that the Board was authorized to amend the original resolution by the adoption of the resolution of December 16, 1953, authorizing the District to sell the Jonathan Bailey School and site and to apply the proceeds to the construction of the facilities specified in the amendatory resolution.'

Judgment affirmed.

Supreme Court of California, In Bank.

Guy HALL, Plaintiff and Respondent,
v.

The CITY OF TAFT, a Municipal Corporation, Glen Black, Jack Kirsher, Ted Pheal, William O. Erickson, Dale Huey, as members of the City Council thereof, and Walter McKee, as Chief of Police thereof, Defendants and Appellants.

L. A. 24244.

Oct. 19, 1956.

Building contractor's action to enjoin city and others from enforcing its building ordinance against him in connection with construction of public school building. The Superior Court, Kern County, William L. Bradshaw, J., entered judgment for contractor and defendants appealed. The Supreme Court, Carter, J., held that the state had pre-empted the field of regulating public school building construction so that construction of such building by school districts is not subject to building regulations of municipal corporation within which building is erected.

Affirmed.

Opinion 297 P.2d 686, vacated.

***179** CARTER, Justice.

Defendants, Taft, a non-chartered city of the sixth class, its council and chief of police appeal from a judgment enjoining it from enforcing against plaintiff, a building contractor, its building ordinance.

****576** There is no dispute as to the facts. On April 22, 1955, plaintiff as contractor entered into a contract with Taft Union High School and Junior College District, hereafter called district, a school district duly organized under the state laws, to construct in Taft for the district, a school building for \$614,113. The plans and specifications for the building were approved by the State Department of Education and State Division of Architecture. Plaintiff commenced construction which was to be completed in 320 days, but work was 'stopped' by Taft, the city, demanding that plaintiff obtain a building permit from it involving a \$300 fee and submission to the building ordinance[FN1] of Taft. The district has employed an inspector to assure that the building is constructed according to the plans and specifications. Defendants assert that plaintiff has refused to obtain a permit from the city for the construction of the building and they intend to enforce the penal and civil provisions of the building ordinance of the city.

FN1. Taft by ordinance had adopted the 'Uniform Building Code 1952 edition adopted and published by the Pacific Coast Officials Conference in 1950.'

The issue is whether a municipal corporation's building regulations are applicable to the construction of a public school building by a school district in the municipality. Taft argues that it had power to adopt police regulations building construction regulations under the Constitution.[FN2]

FN2. 'Any county, city, town, or township may make and enforce within its limits all such local, police, sanitary and other regulations as are not in conflict with general laws.' Cal.Const. art. XI, s 11.

[1] The public schools of this state are a matter of statewide rather than local or municipal concern; their establishment, regulation and operation are covered by the Constitution and the state Legislature is given comprehensive powers in relation thereto. The Legislature shall not pass local or special laws 'Providing for the management of common schools.' Cal.Const. art. IV, s 25, subd. 27. 'A general diffusion of knowledge and intelligence being essential to the preservation of the rights and liberties of the people, the Legislature shall encourage by all suitable means the promotion of intellectual, scientific, moral and agricultural improvement.' Emphasis added; id., art. IX, s 1. There ***180** is a State Board of Education, an elected superintendent of public instruction and there are county superintendents whose salary and qualifications are prescribed by the Legislature, id., art. IX, ss 3, 3.1, 7. The proceeds of all public lands that have been or may be granted by the United States to the state and other property is 'inviolably' appropriated to the support of the common schools, id., art. IX, s 4, and 'Out of the revenue from state taxes for which provision is made in this article, together with all other state revenues, there shall first be set apart the moneys to be applied by the State to the support of the Public School System and the State University.' Id., art. XIII, s 15. 'The Legislature shall provide for a system of common schools by which a free school shall be kept up and supported in each district at least six months in every year, after the first year in which a school has been established.' Emphasis added; id., art. IX, s 5. 'The Public School System shall include all kindergarten schools, elementary schools, secondary schools, technical schools, and State colleges, established in accordance with law and, in addition, the school districts and the other agencies authorized to maintain them. No school or college or any other part of the Public School System shall be, directly or indirectly,

transferred from the Public School System or placed under the jurisdiction of any authority other than one included within the Public School System. * * *

[2][3][4] 'The Legislature shall provide for the levying annually by the governing body of each county, and city and county, **577 of such school district taxes, at rates not in excess of the maximum rates of school district tax fixed or authorized by the Legislature, as will produce in each fiscal year such revenue for each school district as the governing board thereof shall determine is required in such fiscal year for the support of all schools and functions of said district authorized or required by law.' Emphasis added; id., art. IX, s 6. A school district may lie in more than one county and may issue bonds. Id., art IX, s 6 1/2. No money shall ever be appropriated for 'any school not under the exclusive control of the officers of the public schools * * *'. Id., art. IX, s 8. 'The Legislature shall have power, by general law, to provide for the incorporation and organization of school districts, high school districts, and junior college districts, of every kind and class, and may classify such districts.' Emphasis added; id., art. IX, s 14. In harmony with those provisions it has been held that the power of the state Legislature over *181 the public schools is plenary, subject only to any constitutional restrictions. Eureka Dist., supra, 173 Cal. 154, 159 P. 437; Board of Education of City of San Rafael v. Davidson, 190 Cal. 162, 210 P. 961; Phelps v. Prussia, 60 Cal.App.2d 732, 141 P.2d 440; Lansing v. Board of Education, 7 Cal.App.2d 211, 45 P.2d 1021; People ex rel. Davidson v. Mertz, 2 Cal.2d 136, 39 P.2d 422; Gerth v. Dominguez, 1 Cal.2d 239, 34 P.2d 135. It is said in Piper v. Big Pine School Dist., supra, 193 Cal. 664, 669, 226 P. 926, 928: 'It (the education of the children of the state) is in a sense exclusively the function of the state which cannot be delegated to any other agency. The education of the children of the state is an obligation which the state took over to itself by the adoption of the Constitution. To accomplish the purposes therein expressed the people must keep under their exclusive

control, through their representatives, the education of those whom it permits to take part in directing the affairs of state.' School districts are agencies of the state for the local operation of the state school system. Cloverdale Union High School Dist. of Sonoma County v. Peters, supra, 88 Cal.App. 731, 264 P. 273; Board of Education of City of San Rafael v. Davidson, supra, 190 Cal. 162, 210 P. 961; Butler v. Compton Junior College Dist., 77 Cal.App.2d 719, 176 P.2d 417; Lansing v. Board of Education, supra, 7 Cal.App.2d 211, 45 P.2d 1021; Merrill Elementary School Dist. of Tehama County v. Rapose, supra, 125 Cal.App.2d 819, 271 P.2d 522. The beneficial ownership of property of the public schools is in the state. It is said in Pass School Dist. of Los Angeles County v. Hollywood Dist., supra, 156 Cal. 416, 419, 105 P. 122, 26 L.R.A.,N.S., 485: 'To the contention that a transfer of ownership thus accomplished works the taking of property without due process of law, it should be sufficient *182 to point out that in all such cases the beneficial owner of the fee (of public school property) is the state itself, and that its agencies and mandatories the various public and municipal corporations in whom the title rests are essentially nothing but trustees of the state, holding the property and devoting it to the uses which the state itself directs. The transfer of title without due process **578 of law, of which appellant so bitterly complains, is nothing more, in effect, than the naming by the state of other trustees to manage property which it owns and to manage the property for the same identical uses and purposes to which it was formerly devoted. In point of law, then, the beneficial title to the estate is not affected at all. All that is done is to transfer the legal title under the same trust from one trustee to another. In this sense the trustees of the Hollywood City School District became, by operation of law, successors to the trustees of the Pass School District, as is directly held in (School Township of) Allen v. School Town of Macey, 109 Ind. 559, 10 N.E. 578, where it is said: 'It is now a well-recognized legal inference deducible as well from general principles as from the decided cases that under the Constitution and laws of this state, public school property is held in trust for school purposes by the persons or corporations authorized for the time being to control such property, and that it is in the power of the Legislature to provide for a change in the trusteeship of such property in certain contingencies presumably requiring such a change, or, indeed, to change the trustees of that class of property whenever it may choose to do so.'

[5] Even if such well-established principles could be set aside under the plea that they work injustice in the individual case, this plea here presented is without merit. The state is profoundly interested in the education of its young, but has no deep concern over the personality of the trustees who shall administer this trust, so long as the administration is in the orderly form of law.' See,

Fawcett v. Ball, 80 Cal.App. 131, 136, 251 P. 679; Butler v. Compton Junior College Dist., 77 Cal.App.2d 719, 176 P.2d 417; Kennedy v. Miller, 97 Cal. 429, 32 P. 558; Gridley School District v. Stout, 134 Cal. 592, 66 P. 785. While a large degree of autonomy is granted to school districts by the Legislature, we are referred to no statute or constitutional provision which, as far as the question here involved is concerned, expressly makes school buildings or their construction any more amenable to regulation by a municipal corporation than structures which are *183 built and maintained by the state generally for its use. When it engages in such sovereign activities as the construction and maintenance of its buildings, as differentiated from enacting laws for the conduct of the public at large, it is not subject to local regulations unless the Constitution says it is or the Legislature has consented to such regulation. Section 11 of article XI of the state Constitution, supra, should not be considered as conferring such powers on local government agencies. Nor should the Government Code sections which confer on a city the power to regulate the construction of buildings within its limits, see Government Code, ss 38601, 38660, be so considered. It is said in In re Means, 14 Cal.2d 254, 258, 93 P.2d 105, 107, 123 A.L.R. 1378, holding that a state employee working on a state structure in a city need not meet the requirements of a city charter provision: 'If one who has been employed by the state may not work on state property within a municipality without the consent of the municipality obtained after examination, the city has, in effect, added to the requirements for employment by the state, and restricted the rights of sovereignty. * * *

'Turning to the contentions of the respondent that the regulation of plumbing is a municipal affair, the rule to be applied is not entirely a geographical one. Under certain circumstances, an act relating to property within a city may be of such general concern that local regulation concerning municipal affairs is inapplicable. * * * For example, where one of the city's streets has been declared by an act of the legislature to be a secondary highway, the improvement of that street is not a municipal affair within the meaning of the Constitution. * * * Also, regulations prescribed by charter or ordinance of a city requiring that the work of altering and improving buildings be subject to **579 local supervision have been held inapplicable to state buildings. City of Milwaukee v. McGregor, 140 Wis. 35, 121 N.W. 642, 17 Ann.Cas. 1002.

'In the case of Kentucky Institution for Education of Blind v. City of Louisville, 123 Ky. 767, 97 S.W. 402, 404, 8 L.R.A., N.S., 553, the city attempted to enforce an ordinance relating to fire escapes with respect to a state institution for the blind. The court held the ordinance inapplicable, stating: "The principle is that the state, when creating municipal governments, does not cede to them any control of the state's property situated within them,

nor over any property which the state has authorized another body or power to control. *184 The municipal government is but an agent of the state not an independent body. It governs in the limited manner and territory that is expressly or by necessary implication granted to it by the state. It is competent for the state to retain to itself some part of the government even within the municipality, which it will exercise directly, or through the medium of other selected and more suitable instrumentalities. How can the city have ever a superior authority to the state over the latter's own property or in its control and management? From the nature of things it cannot have." See, also, Board of Education of City of St. Louis v. City of St. Louis, 267 Mo. 356, 184 S.W. 975; Salt Lake City v. Board of Education, 52 Utah 540, 175 P. 654; 31 A.L.R. 450.

Pasadena School Dist. v. City of Pasadena, 166 Cal. 7, 134 P. 985, 47 L.R.A., N.S., 892, fails to consider the factors above mentioned and insofar as it is inconsistent with this opinion it is overruled. The question here considered was not involved in Roman Catholic Welfare Corporation of San Francisco v. City of Piedmont, 45 Cal.2d 325, 332-333, 289 P.2d 438.

[6][7] Moreover, in connection with the foregoing and as an additional ground why the construction of school buildings by school districts are not subject to the building regulations of a municipal corporation in which the building is constructed, is that the state has completely occupied the field by general laws, and such local regulations conflict with such general laws, when we consider the activity involved. A city may not enact ordinances which conflict with general laws on statewide matters. Simpson v. City of Los Angeles, 40 Cal.2d 271, 253 P.2d 464; Pulcifer v. County of Alameda, 29 Cal.2d 258, 175 P.2d 1; Ex parte Daniels, 183 Cal. 636, 192 P. 442, 21 A.L.R. 1172; Atlas Mixed Mortar Co. v. City of Burbank, 202 Cal. 660, 262 P. 334; Ganley v. Claeys, 2 Cal.2d 266, 40 P.2d 817; In re Murphy, 190 Cal. 286, 212 P. 30; In re Mingo, 190 Cal. 769, 214 P. 850; Natural Milk Producers Ass'n of California v. City & County of San Francisco, 20 Cal.2d 101, 124 P.2d 25; Pipoly v. Benson, 20 Cal.2d 366, 125 P.2d 482, 147 A.L.R. 515; Tolman v. Underhill, 39 Cal.2d 708, 249 P.2d 280. The particular situation presented and discussed in those cases is not helpful. In re Means, supra, 14 Cal.2d 254, 93 P.2d 105, 123 A.L.R. 1378, herein discussed is most pertinent as it involves the attempted regulation of a state activity by a city, as distinguished from regulations of the members of the public.

The Education Code sets out a complete system for the construction of school buildings. The Legislature there declares *185 that it is in the interest of the state to aid school districts in the construction of school buildings for the maintenance of the public school system

inasmuch as the system is of general concern and the education of the children is an obligation and function of the state. Ed.Code, ss 5021, 5041. The governing board of any school district shall manage and control the school property within its district, id., s 18001. It (the board) shall furnish and repair the school property. Id., s 18002. It shall provide as a part of school buildings patent flush water closets for the use of the pupils, id., s 18009. It may repair old buildings by day's labor or by force account, id., ss 18055, 18057. The State Department of Education shall: 'Establish standards for school buildings', review and approve all plans and specifications for buildings and disapprove those not meeting the standards, furnish plans, specifications and 'building codes,' and make rules and regulations to carry out those activities, id., ****580**ss 18102, 18101. 'The governing board of any school district may, and when directed by a vote of the district shall, build and maintain a schoolhouse', id., s 18151. Except in cities having a board of education the county superintendent shall pass upon all plans for school buildings and plans shall be submitted to him. 'The Division of Architecture of the Department of Public Works under the police power of the State shall supervise the construction of any school building or, if the estimated cost exceed four thousand dollars (\$4,000), the reconstruction or alteration of or addition to any school building, for the protection of life and property.' Id., s 18191. 'Construction or alteration' as used in this article includes any construction, reconstruction, or alteration of, or addition to, any school building.' Id., s 18193. 'The Division of Architecture shall pass upon and approve or reject all plans for the construction or alteration of any school building. To enable it to do so, the governing board of each school district and any other school authority before adopting any plans for a school building shall submit the plans to the Division of Architecture for approval, and shall pay the fees prescribed in this article.' Id., s 18194. 'Before letting any contract for any construction or alteration of any school building, the written approval of the plans, as to safety of design and construction, by the Division of Architecture, shall be first had and obtained.' Id., s 18195. 'In each case the application for approval of the plans shall be ***186** accompanied by the plans and full, complete, and accurate specifications, and structural design computations, and estimates of cost, which shall comply in every respect with any and all requirements prescribed by the Division of Architecture.' Id., s 18196. All plans and specifications shall be prepared by a duly state licensed architect or engineer and the supervision of the work shall be by a duly licensed person. Id., s 18199. No contract for construction is valid and no public money shall be paid for any work or materials furnished thereunder 'unless the plans, specifications, and estimates comply in every particular with the provisions of this article and the requirements prescribed by the Division of Architecture and unless the approval thereof in writing has first been had and obtained from the division.' Id., s

18200. Progress reports must be made to the division, id., s 18201. 'The State Division of Architecture shall make such inspection of the school buildings and of the work of construction or alteration as in its judgment is necessary or proper for the enforcement of this article and the protection of the safety of the pupils, the teachers, and the public. The school district, city, city and county, or the political subdivision within the jurisdiction of which any school building is constructed or altered shall provide for and require competent, adequate, and continuous inspection during construction or alteration by an inspector satisfactory to the architect or structural engineer and the Division of Architecture. The inspector shall act under the direction of and be responsible to the architect or structural engineer.' Emphasis added; id., s 18203. The division may adopt rules and regulations to carry out its duties and a violation of the provisions is a felony, id., ss 18202, 18204. If the supervisor of health of any school district notes any defect in 'plumbing, lighting, or heating,' he shall report to the district and if it does not act, to the county superintendent. Id., s 18221. Each building, if two or more stories, shall have fire escapes, id., s 18222.

[8] It is urged, however, that the foregoing provisions must be read in the background in which they were adopted, that is, that some of them were placed in the ****581** Education Code from the Field Act adopted in 1933, Stats.1933, ch. 59, and must be construed with the Riley Act of 1933, Stats.1933, ch. 601, now in the Health & Safety Code, sections 19100-19170. The Riley Act provides that all buildings (with certain exceptions Health & Safety Code, s 19100) must meet certain standards which are set forth, id., ss 19150, 19151. ***187** Building permits must be obtained from the proper city or county officers charged with the enforcement of laws regulating construction, id., s 19130. Any city or county may establish construction standards higher than those established by sections 19150 and 19151 of the Health & Safety Code. Plans and specifications for buildings shall be filed with the application for a building permit, id., s 19132. Both the Field and Riley Acts were enacted as urgency measures, the urgency being stated to be the series of earthquakes occurring shortly prior thereto, Stats.1933, ch. 59, s 9; 1933, ch. 601, s 8. We do not believe, however, that the Health & Safety Code provisions (Riley Act) limit or modify the provisions of the Education Code (Field Act) above discussed. The former deal with structural design aimed at procuring buildings less dangerous from the standpoint of earthquakes, Health & Safety Code, ss 19150, 19151, while the latter, as above pointed out, are broad and comprehensive including the whole field of construction regulations. The urgency that impelled the Legislature to enact both as urgency measures may have been the same but the scope is clearly different. Hence the provisions in the former providing for more stringent local regulations are not applicable to the latter.

[9] Reference is made to rules and regulations, past and present, adopted for the construction of school buildings under the Education and Health & Safety Codes. Calif. Administrative Code, Title 21, Public Works, Division of Architecture, Chap. 1, subchap. 1. The purpose of the rules (we refer to the rules now in existence) is to protect lives and property of the people by regulating the design and construction of public school buildings so that, in addition to the normal loads to which such buildings are subjected, they shall resist future earthquakes. Title 21, subchap. 1, Group 1, Art. I, s 1. The rules are intended to establish 'reasonable standards and minimum requirements' for the construction of such buildings in order to attain the requisite stability to withstand loads and forces 'and to insure safety of construction' id., s 2. The detailed regulations set forth in sections 101 to 1206 have been adopted as a basis for the approval of plans and specifications. 'It is not the intention to limit the ingenuity of the designer nor to interfere with existing building rules and regulations where such rules and regulations are more stringent. Where the designer desires to depart from the methods of analysis set up by these rules and regulations, it will be necessary that he submit his method in detail *188 together with complete information including computations and test data covering the design in question. Permission to deviate from these rules and regulations is optional with the Division of Architecture and is dependent upon the division being satisfied that the structural members or portions of the building involved would provide at least such safety as would have been obtained had these rules and regulations been adhered to strictly.' Id., s 70. 'Regulations and design values established in these rules and regulations are minimum requirements. Nothing herein contained shall be interpreted to interfere with or to waive the requirements of applicable local or state building laws or ordinances where the requirements of those laws are more stringent than the requirements of these rules and regulations.' Id., s 115. However, it is also provided that: 'No rule or regulation shall be construed to deprive the Division of Architecture of its right to exercise the powers conferred upon it by law, or to limit the division in such enforcement of the act as is necessary to secure safety of construction and the proper administration of the law.' Id., s 5.

**582 [10] It is very doubtful that those rules indicate an intention to interpret the Education Code sections to mean that a city's building regulations must be met in the construction of a school building. They tend more to indicate that the school districts could follow such regulations as well as those of the state but are not bound to do so. In any event, since the final construction of a statute is the function of the courts (2 Cal.Jur.2d, Administrative Law, s 17), we hold the statutes here involved should not be construed as requiring a school district to comply with the building regulations of a city.

There is no necessity for comparing in detail Taft's building code and the numerous comprehensive building regulations contained in the Education Code and the rules and regulations of the Division of Architecture, for as we have seen the state has occupied the field. As said in In re Means, supra, 14 Cal.2d 254, 258, 260, 93 P.2d 105, 107, 123 A.L.R. 1378, in speaking of the effect of a city ordinance, establishing standards for plumbers, on a state employee in a city, the state civil service system provides a comprehensive plan for the selection of state employees and although the city ordinance does not purport to prescribe the conditions for state employment, 'If one who has been employed by the state may not work on state property within a *189 municipality without the consent of the municipality obtained after examination, the city has, in effect, added to the requirements for employment by the state, and restricted the rights of sovereignty. * * *

'Although the legislature has enacted no statute regulating plumbing, if the city's ordinance is a valid exercise of power, then one whom the state has examined and found eligible for employment as a plumber and who has later entered the state civil service, may be unable to work on state property because he cannot pass the examination of a city health officer or licensing board. The result is a direct conflict of authority. Either the local regulation is ineffective or the state must bow to the requirement of its governmental subsidiary. Upon fundamental principles, that conflict must be resolved in favor of the state.' (Emphasis added.) The same comments apply to the references in the instant construction contract and specifications that the building is to be constructed in compliance with local regulations.

The judgment is affirmed.

GIBSON, C. J., and SHENK, TRAYNOR, SCHAUER, SPENCE and McCOMB, JJ., concur.

EXECUTIVE SUMMARY

As California enters the 21st Century, its public schools face many challenges. One significant challenge is the serious disrepair of an aging school facility infrastructure. Another challenge is the anticipated growth of nearly 2 million K-12 students during the next decade that will require many districts to build new schools to meet burgeoning student demand. Recognizing the substantial need for infrastructure, in November 1998, California voters passed Proposition 1A, a bond measure that provides \$6.7 billion for public K-12 school construction and repair.

This measure establishes two new programs for the disbursement of bond funds and simplifies the application process by which schools apply for school construction resources. This change in programs, and in the methods by which funds are allocated, is important to the people of the State, as school districts, many of which have facilities in serious disrepair or require new construction, vie for their portion of the \$6.7 billion pie.

Historically, the process by which schools applied for and received construction funds was cumbersome and complex. Furthermore, the research suggests that school districts that were sophisticated and knowledgeable about the complicated school facilities construction process were the most successful in securing funding – often at the expense of less sophisticated and uninformed school districts. Proposition 1A corrects much of this dynamic by simplifying the application and administrative processes, thereby creating a more level playing field for all school districts.

In order to understand the significance and relevance of this new process and its concomitant programs, however, it is useful to review the history of school construction financing in California and to understand the various pitfalls that existed under previous programs so as to avoid similar pitfalls in the future. This paper discusses that history and highlights the problems with preexisting programs.

It begins with an examination of the State Allocation Board and its staff (the Office of Public School Construction). Specifically, it reviews the role of the Board which is responsible for establishing policies for the distribution of school facility financing funds. It discusses how the Board, which was established in 1947, has evolved during the past five decades from one that set policy for various *loan* programs to one that today sets policy for *grant* programs.

The paper also discusses how various externalities—legislative or voter imposed initiatives, such as Proposition 13—have affected the Board's policies and procedures. The paper notes that the Board changed its policies often, and its policy shifts created an untenable dynamic for school districts as they attempted to secure funding. In particular, the paper highlights how districts were forced to weave their way through a complex, bureaucratic maze of applications, forms, and plans; and how this dynamic forced school districts to employ sophisticated personnel, or to contract with savvy consultants, in order to secure state financing for their construction projects.

This paper also presents a history of bond initiatives during the past five decades. It is clear that throughout this history there was never enough State money available to school districts for facility construction or repair. In fact, in spite of the \$6.7 billion approved by Proposition 1A, experts estimate that an additional \$10 billion will be required during the next decade. This paper discusses how the constant shortage of funds caused districts to use "whatever" means available to them to secure funding.

Voters have consistently been generous in approving the vast majority of statewide bond initiatives. Only three bond proposals out of 24 have failed in the past 50 years, and those that failed did so during times of recession. However, it is not clear how much additional debt voters will be willing to incur. This has especially been true since the passage of Proposition 13 in 1978, when the State began taking on a larger role in supporting school construction than it had before. To that end, this paper discusses how Proposition 1A creates a mechanism for school districts to tap state resources, and how school districts may need to tap other sources of facility funding.

Proposition 1A forges a partnership between the State and school districts for financing the construction and repair of their schools. Under its new programs, the State will provide 50 percent of the cost associated with building new schools, and provide 80 percent of the cost associated with modernizing existing facilities. It requires school districts to match state resources. However, school districts that are unable to offer this match can receive hardship funds based on prescriptive criteria. This paper provides details regarding these new programs and compares them to programs previously administered by the State Allocation Board. It also discusses how the Board is required to respond to district requests.

Proposition 1A is not the only impetus behind simplifying the school facility financing process. Concurrently, the Office of Public School Construction has rewritten the application process for funds to make it more user-friendly to school districts and has even offered applications and program information via the Internet. This paper discusses these changes.

The paper concludes with options that the Governor and the Legislature may wish to consider, including: offering protection to small and rural school districts when bond funds are exhausted; requiring annual financial reporting by the State Allocation Board; providing an on-line technical support for program applicants; and redeveloping the State funding source for school facility construction and rehabilitation.

REQUEST FOR RESEARCH

Programs and administrative procedures in Proposition 1A may produce significant changes to the previous programs and the manner by which the State Allocation Board distributes resources for school facility construction. In light of these changes, Senator Quentin Kopp requested that the California Research Bureau provide research on the following topics:

- A history of the State Allocation Board. How was the board's funding program intended to work and how has it evolved?
- An explanation of the State Allocation Board process. How does the State Allocation Board work? What are the procedures and criteria for receiving allocations? How are priorities set?

INTRODUCTION—THE PASSAGE OF PROPOSITION 1A

On November 3, 1998, California voters passed Proposition 1A - a \$9.2 billion school bond initiative, and the largest of its kind passed in our nation's history. Over the next four years, revenues from Proposition 1A's general obligation bonds will provide \$6.7 billion to public K-12 schools and \$2.5 billion to public colleges and universities for the purposes of constructing new facilities and repairing existing ones.

The State Allocation Board will have the responsibility for determining a fair means of distributing the \$6.7 billion available to K-12 schools. Many experts feel that developing such a system will be a daunting task, in spite of the fact that Proposition 1A/Senate Bill 50 is very prescriptive regarding the allocation of its bond funds.

This paper begins with a history and a discussion of the role of the State Allocation Board. Next, it examines the 24 state bond initiatives since 1947 and discusses how the Board has evolved its policies for distributing resources generated by these bond efforts. It then presents an overview of Proposition 1A and how this initiative creates a new allocation program that differs from previous ones. The paper also discusses the various problems that existed within the State Allocation Board's previous resource allocation systems and how Proposition 1A addresses these problems. It concludes with a section that offers options that the Legislature may wish to consider regarding the policies that the State Allocation Board should use for the equitable distribution of bond funds.

HISTORY OF THE STATE ALLOCATION BOARD AND ITS ROLE IN SCHOOL FACILITY FINANCING

There is a long and complex history regarding public school construction in California. This paper begins a review of the history in 1947¹ when the state legislature created the State Allocation Board.² Chapter 243, Statutes of 1947, established the State Allocation Board³ as a successor to the Post War Public Works Review Board. That statute specifically authorized the board to allocate funds for building and repairing schools. In addition, it designated the State Allocation Board to make allocations for public works projects when no other state officer or agency had authority to appropriate state or federal funds.⁴ Although it had many other fund allocation requirements during its five-decade history, the State Allocation Board today allocates funds only for school construction and renovation.

Composition of the Board

The State Allocation Board is comprised of seven members: two Senate members appointed by the Senate Rules Committee; two Assembly members appointed by the Speaker of the Assembly; the Director of the Department of General Services or his/her designee; the Director of the Department of Finance or his/her designee; and the Superintendent of Public Instruction or his/her designee. This appointment structure has existed since the Board's inception in 1947.⁵

Although its basic appointment structure is set in statute, its actual membership changes over time. One member, Senator Leroy Greene, served on the Board for over 20 years. Some Board members have served for only one meeting, while others have served an entire legislative session.

The four legislatively appointed State Allocation Board members provide a strong policy influence to the State Allocation Board. Through them, other members of the Legislature have input into the Board's policy and decision-making processes.

Policy Requirements

Members of the State Allocation Board are charged to formulate fair systems for determining priorities among project proposals. Prior to the passage of Proposition 1A/SB 50 in 1998, the Board was responsible for developing a fair and equitable appeals process that addressed the "special needs" of school districts. Such "special needs" included disaster relief, inability to secure matching funds, or inability to locate affordable property.

Board members also had extraordinary power to set school facility financing policy. Although the Board falls under the auspices of the State Administrative Procedures Act, it has often ignored the Act's provisions. It was common that board policies were changed from meeting to meeting, and that these new policies were not readily made public.⁶ Therefore, school districts that were uninformed of existing policy operated at a distinct disadvantage. They may not have known the appropriate procedures for receiving

financing approval. Conversely, school districts that utilized hired consultants or had staff that regularly monitored the Board's actions knew exactly what mechanisms and procedures would be necessary for them to secure funding.

State Allocation Board Staff

The Office of Public School Construction (formerly the Office of Local Assistance), within the Department of General Services, was and continues to be responsible for providing staff work that is necessary to carry out the policies and implement the various programs of the State Allocation Board. The State Allocation Board is responsible for policies regarding the allocation of funds for building new schools and for repairing, upgrading, and rehabilitating old ones.

The Office of Public School Construction staff is also responsible for disseminating to school districts information regarding board policy and programs. Under its previous programs, the staff was responsible for making recommendations to the State Allocation Board regarding various appeals made by school districts that may have been denied funding, or that may have required special funding consideration. To that end, the Office of Public School Construction staff influenced where school districts fell on the long queue of project proposals considered and passed by the State Allocation Board. Staff also could have influenced Board decisions by advocating for specific school district projects.

Outside Influence

The State Allocation Board and the Office of Public School Construction staff have also been influenced by a variety of external interest groups. These include, but are not limited to, private school facility financing consultants, school board members, school administrators, teachers, parents, developers, California Building Industry Association, financial institutions, and other members of the Legislature. In addition, various state agencies with influence included the Division of State Architect, Department of Finance, and the Department of Education. These interests groups played and are likely to play a significant role in determining funding for projects that may have been denied or required special consideration. Consultants in particular, whether employed by or on contract with school districts, played an active role in the process. Many of these consultants, whose offices are in the same building as that of the Office of Public School Construction, influenced decisions of both the Office of Public School Construction staff and the State Allocation Board. Consultants were current on Board policies and procedures, and were highly sophisticated about the complicated processes that school districts must follow in order to obtain funding. They have been instrumental in shepherding proposals through the complex maze of funding phases - application to construction. School districts that did not contract with such advocates were often at a competitive disadvantage.

Evolution of State Allocation Board Programs—From Loans to Grants

The State Allocation Board has evolved markedly during the past five decades. Initially, its school programs provided resources to school districts via *loan programs* in which

districts were required to repay their assistance with property tax revenues. In addition, school districts used local school bonds to finance their various construction projects. In both cases, a two-thirds popular vote was required.

Proposition 13

With the passage of Proposition 13 in 1978, the State Allocation Board's loan orientation was significantly altered. Under Proposition 13, the amount of tax that property owners paid was limited to no more than one percent of the assessed value of their property. Local property tax revenues diminished, and the burden to fund many local government programs was shifted to the State, including public school construction. Further, local governments lost much of their property taxing authority, and the Legislature and Governor were forced to rethink how school districts could repay their existing loans to the State Allocation Board.

Recognizing that many school districts faced bankruptcy by being unable to service their loans, the Legislature in 1979 directed the State Allocation Board to allow school districts four options: (1) withhold payments on their loans; (2) temporarily delay their payments; (3) pay only a portion of their loan obligations; (4) or not pay back their loans at all. Further, with the implementation of these options, the Legislature required that the State Allocation Board shift its policy focus from a *loan-based* program to a *grant-based* program. This shift to grant-based programs remains today.

HISTORY OF SCHOOL BOND INITIATIVES—A CYCLE OF UNDER-FUNDING

The electorate of the state has been ultimately responsible for determining the availability of resources for school construction. The electorate must have confidence in the state's economy, and perceive a need for new and upgraded schools. Without such assurances, the electorate can and has rejected various bond efforts. Since 1949, voters have been asked to approve 24 bond measures related to school construction and renovation, and have passed 21 of these proposals. However, an interesting history follows regarding the content of these initiatives.

State as a Bank—The Loan Program 1949-1978

Legislation enacted in 1949⁷ and 1952⁸ established a loan-grant program "to aid school districts of the State in providing necessary and adequate school sites and buildings for the pupils of the public school system."⁹ During this time period, the first baby boomers entered school, and for the next two decades, California public school enrollment increased by roughly 300 percent.¹⁰ The Legislature recognized that many school districts faced substantial enrollment growth, while lacking the bond debt capacity that was necessary to finance large building programs. In fact, many school districts had reached their financial capacity to service the bonds that they previously incurred.

As a result, the Legislature developed a program to provide loans to school districts that were approaching or were likely to exceed their legal level of bonded indebtedness.¹¹ This new program was financed through State general obligation bonds. This program also required building construction standards and placed fiscal controls on the districts, including maximum cost standards and square feet per pupil limitations.¹² School districts, however, retained control over the design and construction of their facilities. Districts that wanted to participate in the state loan program were required to receive approval from two-thirds of their district's electorate in order to incur the debt. A surcharge on the local property tax provided revenues to service the loan debt.

The State formula provided that the total amount due on some loans would be less than the total amount of the actual loan. Some experts believe that the state's willingness to forgive part of school district loans through this formula was a precursor to the state grant program discussed below.

The First Loan Program Bond Initiatives

In 1949, the state issued its first bond proposal for education facilities financing¹³ in the amount of \$250 million.¹⁴ This first initiative also began a cycle of inadequate funding. In that year, the Legislature thought that \$400 million was necessary (over what school districts could afford above their debt limits) to meet the need of school districts that were facing enrollment growth from the new generation of baby boomers. However, after substantial debate, the bond proposal was reduced to \$250 million, because the sponsors thought, "the people would not vote for such a large sum at one time."¹⁵ In arguments

against the bond, opponents argued that \$250 million was insufficient. Therefore, absent full funding, voters should reject the initiative. The measure passed.

In 1952, another school construction bond of \$185 million was put before the voters. Proponents of this initiative stated that the amount was “extremely” conservative. A comprehensive study by the State Department of Education at that time revealed that \$198 million was needed, while the Department of Finance estimated the need at \$250 million. Again, the amount of needed resources surpassed the amount proposed, and the cycle of chronically under-funded facility financing for schools continued.

To further exacerbate the shortfall, the 1952 proposition, along with subsequent propositions offered in 1956, 1958, and 1960, included “poison pill” language that limited the Legislature’s ability to appropriate any additional funds for school construction beyond that in the various propositions.¹⁶ If the Legislature approved any additional resources for school construction, the amount of bonds that were sold would be reduced by an amount equal to the additional appropriation. After 1960, however, bond proposals excluded the language that precluded the Legislature from raising additional capital outlay funds.

During a two-decade period, the State Allocation Board administered this program as a bank. Resources from the state were limited, and many school districts were uncomfortable with the concept of borrowing money from the state, rather than from their local constituents. Further, since school districts were obligated to reach full bond indebtedness before applying for state loans, many did not participate. For these reasons, many school districts chose not to build facilities until their bonding capacity grew. Hence, many school districts found themselves chasing dollars after their schools were overcrowded—a situation not unlike today.

The Early 1970s

As a result of a major earthquake in the San Fernando Valley (Sylmar) in 1971, the state authorized \$30 million¹⁷ for a new program to finance the rehabilitation and construction of earthquake safe schools,¹⁸ and for the renovation of buildings that the earthquake damaged.¹⁹ This program was known as the School Buildings Safety Fund. Like its predecessor programs, the 1971 Act created a state loan program for eligible school districts. The Act also included provisions to forgive loans for school districts that had reached their bonding capacity. The 1971 program was augmented by a 1972 state bond initiative of \$350 million of which \$250 million was set aside for structural repairs due to earthquakes.²⁰ This latter bond initiative also provided a method for financing buildings in districts that did not meet the criteria of the program that was initiated in 1971,²¹ and it required the State Allocation Board to first approve those applications from school districts for earthquake repairs. The State Allocation Board gave second consideration to funding projects for other types of repairs or upgrades. Hence, the Board began a new system for not only new construction but also repairs, as well as a system that set priorities.

A Changing Paradigm

From 1970 to 1980, public school enrollment statewide decreased by roughly one percent per year.²² Reductions in both immigration and domestic in-migration to the state, as well as a decrease in the state's birth rate caused this decline. During this decade, there were sufficient resources available from local property tax revenues and from the state's loan program to meet the various rehabilitation needs especially of those school districts that were experiencing enrollment declines. The State Allocation Board thus shifted its loan program emphasis from new construction to rehabilitation, and to upgrading unsafe facilities that were damaged due to the 1971 earthquake.²³

Nevertheless, some school districts continued to experience enrollment growth in response to suburban housing development.²⁴ In spite of such growth patterns, the State Allocation Board set its priorities to favor rehabilitation projects over new construction. The Board's orientation accentuated the differences between growing school districts and those that required rehabilitation, and caused an unequal state spending system that favored property rich urban districts over fiscally poor and growing suburban districts.²⁵

To counter the State Allocation Board's orientation toward urban rehabilitation, growing suburban school districts recognized that in order to fund new school construction, they would have to depend almost entirely on their local property tax base. As more people demanded affordable housing in suburban neighborhoods, developers accommodated them by building numerous suburban housing units. The sheer increase in the number of suburban homes added significant resources to the property tax base, thereby benefiting the school districts that served those communities. Furthermore, the ongoing demand for suburban housing caused the prices of homes in these areas to increase precipitously, adding even more resources to the property tax base. Although school districts could have requested to reduce those tax rates that supported them to a minimum amount, they did not. Most districts kept their rates steady, and some even increased them. Homeowners, unhappy about menacing property taxes, sought relief. In 1972, the Legislature enacted a multi-year package, funded by the state's general fund, of \$1.2 billion for school operation to be allocated over a three-year period and to serve as property tax relief.²⁶ In spite of this legislation, property taxes remained relatively high to cover local bond debt, and continued to be the primary source for school construction for growing school districts. Concurrently, the state continued to loan money to enrollment-static school districts for the purpose of rehabilitation.

Leroy Greene State School Building Lease Purchase Law

In 1976, the Leroy Greene State School Building Lease Purchase Law was signed into legislation.²⁷ This law established a state fund to provide loans to school districts for reconstruction, modernization, and replacement of school facilities that were more than 30 years old. The Act significantly altered the state's role in how school facilities construction was financed. Specifically, the state would no longer loan money; but it would finance school construction based on a leasing model.²⁸ Although the legislation was passed, the voters of the State remained unconvinced that more money was needed to

improve schools. Consequently, they did not pass the bond initiative that was necessary to fund the Lease Purchase Program.

The 1976 Act had specific language that created “priority points” for school districts that would apply for state funding. This was the first time that the State Allocation Board used a point system for creating a queue of approved projects. Priority points were given based on the number of unhoused students in the district, the rate of student enrollment growth, and how much rehabilitation a facility needed. Further, the Board instituted a first-come, first-served policy in which each accepted school district’s application was stamped with a time and date.

Under the previous program, the state loaned money to school districts to build their facilities, and the school districts owned their property. Under the Greene legislation, however, the State maintained a lien on the property for the duration of the loan via a lease purchase agreement.²⁹ The State wanted to preclude school districts from purchasing land on a speculative basis using State money, only to sell the State funded property at a profit at a later date. This meant that the state would control the disposition of any school facility that it financed until the school district repaid its obligation on the lease.

The Proposition 13 Epoch 1978-1986

Proposition 13—Local Governments and School Districts Fiscally Stymied

With its passage, Proposition 13 eliminated the ability of local school districts to levy additional special property taxes to pay off their facility indebtedness. Proposition 13 capped the ad valorem tax rate on real property at one percent of its value, thereby reducing the income from property taxes to such an extent that it virtually eliminated this source as a means for lease payments. Proposition 13 also prohibited the electorate of a school district from authorizing a tax over-ride to pay debt service on bonds for the purpose of constructing needed school facilities.

To exacerbate this problem, the voters soundly defeated school construction bonds in both 1976 and 1978. They were two of only three³⁰ state general obligation bonds rejected by voters since 1947. The non-passage of these two successive bond initiatives, coupled with suburban enrollment growth, caused a statewide shortfall of \$550 million³¹ that was needed for school construction projects throughout the state in 1978.

Post Proposition 13

The limitations set by Proposition 13 caused school districts, counties and cities to turn to the state, which had a \$3.8 billion surplus, to fill the gap.³² In 1979, lawmakers approved a \$2.7 billion (in 1978 dollars) “bailout” plan to assist schools and local governments.³³ Within a year, the state surplus was reduced to roughly \$1 billion. Furthermore, the state had taken on a larger role as a funding source for school operations and capital improvement. To that end, it expected school districts to conform to its programs and projects.³⁴

Effects of Proposition 13 on the Lease Purchase Program

In 1979, legislation implementing Proposition 13 included provisions for restructuring the State's Lease Purchase Program.³⁵ School districts that received funds from the state were required to pay rent to the State as low as \$1 per year, creating an "unofficial" grant program.³⁶ In addition, school districts were to contribute up to 10% of the project's cost from local funds.³⁷ However, many school districts could not raise these matching funds through local bonds. They requested that the State fund their entire projects. The State Allocation Board created a waiting list of projects.

A Recession Further Complicates School Facility Financing

Beginning in 1982, California was in a recession that lasted until 1984. During this time period, the State's budget surplus was expended. School districts' recession experiences were complicated by the fact that student enrollments again began to increase again.³⁸ Approximately 60 percent of California's 1,034 districts at the time projected annual growth rates of over two percent between 1980-81 and 1983-84, with some districts projecting a doubling in their enrollment.³⁹ At the same time, estimates indicated that over one-third of the State's school buildings were over 30 years old and many needed substantial rehabilitation.⁴⁰ The Coalition for Adequate School Housing (CASH) estimated that the one-time cost of rehabilitating these older facilities would be \$1.9 billion.⁴¹ Further, CASH estimated that school districts would need an additional \$400 million annually for the next five years for building and repairing school buildings. Since the State was in recession, such funds were not available. Thus the State had to rethink how it would prioritize its school facilities projects.

A New System for Funding School Construction

In light of the backlog of applications for state funds, the Office of Local Assistance (now known as the Office of Public School Construction) designed a numerical ranking system that used "priority points" to determine a school district's eligibility for funds. This system gave priority to school districts who had students who were "unhoused," and special consideration was given to how districts used certain facilities.⁴² The more points a project application received, the higher on the list it was placed. Recognizing that school districts were facing enrollment growth and required further rehabilitation, the Legislature in 1982 authorized a general fund appropriation of \$200 million for school construction projects. This amount was later reduced to \$100 million.⁴³

Further, in order to ease the burden that many school districts felt because of the recession, the State loosened the repayment schedule for its lease-purchase program. School districts were allowed, for 10 years, to pay one percent of the cost of state funded lease-purchase projects, rather than the 10 percent they initially were required to pay.⁴⁴ Again, the State Legislature and the State Allocation Board moved away from a loan program and more toward a grant program.

Multi-Track Year-Round Education

Recognizing that the State had very limited bond resources, the Legislature wanted a more cost-effective facilities financing incentive system for school districts. That system would force districts to use their space more efficiently. In response to the shift in policy, the Legislature passed Chapter 498, Statute of 1983. This statute encouraged school districts that were experiencing growth pressure to adopt multi-track year-round education (MTYRE) programs. MTYRE programs enroll students in several tracks throughout the entire calendar year. At any given time, one track is on vacation, but vacation periods are short in duration.⁴⁵ The MTYRE program allows a more intensive use of existing facilities, thereby reducing the need for new facilities in growing districts.

School districts received an immediate financial return if they participated in the MTYRE program. A school district that redirected its students into a MTYRE program received a grant of up to 10 percent⁴⁶ of the cost that would be necessary to build a new facility not to exceed \$125 per student.⁴⁷ School districts that participated in MTYRE were eligible for air conditioning and insulation in their buildings.

In 1988, as pressure for state financing continued, the Legislature required that top priority for financing new construction projects be given to districts that used multi-track year-round education programs. School districts that offered MTYRE and were willing to match 50 percent of their construction costs received a funding priority from the State Allocation Board.⁴⁸ This put other school districts that could not meet these MTYRE and funding criteria at a distinct disadvantage. These latter school districts sought relief from the voters in 1986. Small school districts were one exception to the MTYRE requirement.

1986 Lease Purchase Program

In 1986, the voters approved Proposition 46. Proposition 46 amended Proposition 13⁴⁹ by restoring to local governments, including school districts, the ability to issue general obligation bonds and to levy a property tax increase to pay the debt service subject to a two-thirds vote of the local electorate.⁵⁰ This amendment allowed school districts to augment the one-percent cap on property taxes and to secure additional bond indebtedness to build and improve their schools.⁵¹

Passage of Proposition 46 helped, but did not solve school districts' financing problems. Many school districts were unable to secure the necessary two-thirds vote to authorize local funding, and still relied on state funding to assist them. Further, the federal government in 1986 passed legislation that required each state to remove friable asbestos from their educational facilities – another charge that the school districts could ill afford.

California adopted similar asbestos standards to those established by the federal government in 1986; however, few school districts reported their estimated costs for removing the substance. In light of the need to remove the asbestos, and in order to address the growing backlog of proposed school construction projects, voters passed Proposition 79 in 1988 - an \$800 million bond initiative. It specifically set aside \$100 million to cover asbestos removal.⁵²

A Growing Shortfall and Greater Scrutiny

There is no doubt that from 1982 to 1988 state support for public school construction was limited and difficult to secure. The demand for new school facilities, for modernization, and for asbestos removal was great.⁵³ As of June 1, 1986, applications that were submitted by school districts to the State Allocation Board for state funding of *new school construction* projects alone totaled roughly \$1.3 billion. In addition, applications for state funding for *reconstruction or rehabilitation* of school facilities totaled over \$991 million.⁵⁴ Total demand for school facility improvement in 1986 was nearly \$2.3 billion - an amount that significantly outweighed the \$800 million voters approved in that year's bond initiative.⁵⁵ Even with a boost of funding of \$150 million per year from Tidelands revenues in fiscal years 1984 and 1985, the Lease Purchase Program fell short.⁵⁶ By 1988, the shortfall had grown to \$4 billion, in spite of the fact that voters had approved \$2.5 billion in bond money from 1982-1988.

The State Allocation Board was forced to scrutinize every request for school construction funding, recognizing that absent a major infusion of State bond money, most districts would not receive funding for their projects. This scrutiny created an extremely competitive environment for the limited resources that were available to the schools. Many participants believe that school districts that contracted with knowledgeable consultants, or had district staff who were familiar with the State Allocation Board's policies and criteria, were the most successful in securing a high ranking place in the queue for resources, once those funds become available.

There is no definitive research or data that support this belief. Consultants are not required to report their involvement in the application process. However, there is substantial anecdotal evidence to support the assertion.

School Financing as a Collective Effort—The Three Legged Stool

In 1986, the Legislature recognized that resources were scarce and that no one governmental or private entity could finance school construction. It attempted to equalize the burden of school facilities financing between state government, local government and the private sector.⁵⁷ This concept was known as the "three legged stool." The idea was that the state would provide funds through bonds. Local government would provide its share through special taxes, general obligation, Mello-Roos and other bond proceeds. The private sector would provide funds through developer fees. Appendix A describes funding alternatives for these latter two legs of the stool.

The "three legged stool," however, never quite worked. For example, to assure that developers would not fund a disproportionate share of the cost to build schools, the Legislature, in 1986, capped the amount new homebuyers would pay for developer fees at \$1.50 per square foot, and empowered the State Allocation Board to raise the cap by a certain amount each year. However, school districts found a loophole around the cap by requesting that cities impose a fee on their behalf, and cities imposed rates on some

developers that exceeded those allowed.⁵⁸ California courts upheld these fees in the Mira, Hart, Murrieta court cases.

Until the recent passage of Proposition 1A, many local governments have imposed developer fees that exceed those allowed by the Board. For example, in 1987, fees in San Diego and Orange counties reached a high of \$8700 per house.⁵⁹ By 1990, total development fees for some homes reached \$30,000.⁶⁰ Statewide, developer fees have increased from \$31 million in 1978 to \$200 million in 1997.

In 1998, the State Allocation Board increased the fee to \$1.93 per square foot.⁶¹ With the passage of Proposition 1A in November 1998, however, local governments have apparently lost their ability to increase their fees beyond those determined by the State Allocation Board. Further conflict is likely.

The 1990s—Complicated Funding Programs

In the fall of 1990, the Legislature passed legislation that created two programs that provided additional financial incentives for schools to offer year-round education.⁶² The first of these programs provided a one-time grant to school districts to ease the expense of changing from traditional nine-month programs to year-round tracks. The second program provided an “operating grant” of between 50 percent and 90 percent of the amount districts saved the state by not having to build new schools. At the recommendation of the Office of the Legislative Analyst, the Legislature repealed the 1982 and 1986 incentive programs discussed above.⁶³

In response to the 1990 legislation, the State Allocation Board developed a new priority system for allocating lease purchase money. Under this new system, the Board apportioned funds based on a combination of when an application was received and how many priority points it garnered. Through a complex formula, priority points were given to schools that had a significant number of “unhoused students,” or had substantial rehabilitation needs. This procedure might have worked well if the state could have financed all applications in a timely manner. However, the demand for state money increased to the point where districts without special priorities could expect to wait years for the state to finance their projects.

The program was in effect for only one year when the Legislature repealed the program and created yet another system for allocating state money.⁶⁴ In 1991, the Legislature defined six priorities for funding. First priority was given to districts that had a “substantial”⁶⁵ enrollment in multi-track schedules, and that were paying at least 50 percent of the construction costs for their new schools. Second priority went to districts with a “substantial” year-round enrollment and that wanted the state to pay the entire cost of any new construction for their year-round schools. The remaining four priority levels took into consideration factors for those schools who did not meet the “substantial enrollment” criteria outlined above, or were unable to match state resources.

The complex set of formulas made it difficult for school districts to completely understand what criteria would best serve them. Further, throughout this period, the Board was

required to implement new programs and redefine its priorities. For example, in 1990 the Legislature created a program that was adopted by State Allocation Board for school districts that could not find adequate land on which to build a school. Known as the Space Saver Program, it was designed to assist urban school districts that could not obtain adequate acreage for a school campus. The first space saver school, developed in 1993, is scheduled to be completed in Spring 2000 in the Santa Ana Unified School District, in a former shopping mall.⁶⁶

Another example of shifting priorities took place in 1996 when the Legislature mandated the Board to redirect its third highest priority to class size reduction from a previous focus on child-care facilities.⁶⁷ A third took place at the end of 1997 when the priority points system was replaced by a first-come, first served system. While there were exceptions to this rule, money was offered first to school districts willing to cover some of the costs associated with constructing or repairing facilities. Schools that could not afford to cover the remaining 50 percent were placed on a separate list.

Such shifts in policy, coupled with the significant complexity of formulas that drove the priority point system, along with the sporadic creation of new programs, caused many school districts to depend on outside consultants. These consultants understood the many policy changes that the Board enacted – sometimes on a monthly basis. They were also knowledgeable of new programs, and clearly understood the workings of the staff who carried forth the Board's policies. Without the assistance of consultants, school districts were unable to keep track of policy changes and special considerations enacted by the Board. Further, while the Board and its staff advised school districts regarding changes in their policies in a regularly published document, it did not provide a centralized source of materials, such as an up-to-date handbook. Consequently, school district personnel were often uninformed about the various nuances of the programs administered by the Board.

State Bond Efforts of the Nineties

As the State Allocation Board shifted its focus and policies throughout the early 1990s, Californians approved state school bond initiatives in 1990 for \$1.6 billion and in 1992 for \$2.8 billion. In one of its 1992 reports, the Department of Finance reported that statewide K-12 enrollment was estimated to grow by 200,000 new students per year for at least five years,⁶⁸ and that an estimated \$3 billion would be needed annually for new school construction.⁶⁹ However, in spite of growing enrollments and a significant demand for facility rehabilitation, in 1994, the electorate rejected a \$1 billion bond initiative. The State was in a recession.

A lack of State bond funds was not the only problem associated with the allocation of school construction funds. The Auditor General reported in 1991 that the Office of Local Assistance mismanaged state funds. It detailed that construction funds loaned to school districts were not recovered; that districts overpaid on some projects and failed to collect the overage; that it dispersed funds without proper documentation; and that it failed to conduct required close-out audits on construction projects.⁷⁰

As a result of this audit, the Office of Public School Construction in concert with the State Allocation Board developed stringent internal and external audits and fiscal controls. These control mechanisms included increasing the detail of financial review of projects, prohibiting school districts from participating in the program unless a balance was not due, and no longer receiving rent checks for portable classrooms.⁷¹

Attempts to Ease Passage for Local Bonds

Recognizing that the State would be unable to fund the entire backlog of school construction proposals, Governor Pete Wilson in 1992 proposed a constitutional amendment to reduce the requirement for the passage of local bonds from two-thirds to a simple majority.⁷² The idea was that local governments should have to meet the same 50 percent requirement as the State for passing bonds. Further, there was strong sentiment in the Wilson administration that local governments should pay an increased share of school construction costs. However, the Legislature rejected his plan.⁷³ Other attempts in recent years to reduce the vote for passage of local bonds from two-thirds to something less have also failed.⁷⁴

1996 School Bond Issuance - Finally More Money

Proposition 203, passed by the voters in March 1996, provided \$2.065 billion for school facility construction. However, the Legislature at the time estimated that school districts would need \$7 billion in construction funds to meet enrollment growth that was anticipated during the next five years.⁷⁵ This \$7 billion did not include the needs of Los Angeles Unified School District (LAUSD), which had 20 percent of the state's student population. At the time, LAUSD alone needed \$3 billion to upgrade and modernize its schools.⁷⁶ Clearly, anticipated demand for State funds substantially exceeded available resources.

To respond to the many school district proposals, the State Allocation Board followed its general priority points policy. However, many school districts, recognizing that they would not receive funding for years because of their position in the funding queue, and because of the limited amount of resources that were available, resorted to creative means to try to secure funding for their projects. For example, some schools districts sought special consideration for funds by requesting emergency allocations. Such a tactic would allow a school district to receive funds immediately.⁷⁷ Other school districts used the appeals process to argue that their projects were needed more than those of other school districts that were higher in the queue.⁷⁸

This cannibalistic dynamic caused a fair amount of resentment among those school districts that were bumped from a relatively high position in the queue by those districts that sought emergency relief or special consideration. Further, it was clear that the most sophisticated school districts found a variety of tactics that would secure the funding of their projects. These tactics are described in greater detail later in this paper under the section that describes how the Board processed its applications.

Class Size Reduction Causes Greater Housing Needs

The distribution of funds from Proposition 203 was further complicated by the Governor's Class Size Reduction Initiative. In particular, the State Allocation Board earmarked \$95 million for the purpose of purchasing 2,500 portable classrooms for schools that were facing severe classroom shortages. This was in addition to \$200 million that the Department of Education had available for assisting schools in purchasing such facilities. The Office of Public School Construction determined that a total of 17,500 classrooms were needed to accommodate class size reduction, and that there was only enough money to fund less than half of the estimated need.⁷⁹ The State Allocation Board reinterpreted Proposition 203 by creating a new Portables Purchase Program at the expense of their other programs. This caused some school districts to again get bumped in the queue for funding.

Never Enough Money—Still a Shortfall

Since 1947, the electorate has approved all but three State bond initiatives. In spite of the voters' tendency to support various bond initiatives, by 1998, the backlog of school construction projects that were approved by the State Allocation Board, but unfunded, totaled more than \$1.3 billion. Although the voters have been generous by approving bond initiatives roughly every two years,⁸⁰ there were times during the past five decades when bond money was not available for periods of four or six years.⁸¹

The Department of Finance has estimated that \$16 billion is needed over the next decade for public school construction and rehabilitation.⁸² Various bond proposals in 1997 and 1998 were circulated that considered multiple-year bond issuances. The California Teachers Association and the California Building Industry Association presented a plan to issue \$2 billion a year for 10 years.⁸³ Governor Wilson proposed \$2 billion a year for four consecutive years. In the end, Proposition 1A was passed. It provides \$6.7 billion over a four-year period. However, while the amount appears generous, it will not be enough to meet the entire anticipated need of the state. Based on the Department of Finance projections, the six years following this bond issue will require roughly an additional \$10 billion in State money.

Table 1 on page 18 shows the history of state school bond initiatives from 1949 to 1998. In the next sections of this report, we discuss the various programs, the complicated application process used by the State Allocation Board that school districts had to endure to secure funding, and how Proposition 1A attempts to simplify this process.

Table 1 - STATE SCHOOL CONSTRUCTION BONDS

Title of Bond Initiative	Date & Year of Election	Funds Authorized
School Building Aid Law of 1949	November 8, 1949	\$250,000,000
School Building Aid Law of 1952	November 4, 1952	\$185,000,000
School Building Aid Law of 1952	November 2, 1954	\$100,000,000
School Building Aid Law of 1952	November 4, 1958	\$220,000,000
School Building Aid Law of 1952	June 7, 1960	\$300,000,000
School Building Aid Law of 1952	June 5, 1962	\$200,000,000
School Building Aid Law of 1952	November 3, 1964	\$260,000,000
School Building Aid Law of 1952	June 7, 1966	A)\$275,000,000
School Building Aid Law of 1952	June 6, 1972	B)\$350,000,000
School Building Aid Law of 1952 And Earthquake	November 5, 1974	\$150,000,000
School Building Lease-Purchase Bond Law of 1976 (Failed)	June 8, 1976	\$200,000,000
School Building Aid Law of 1978 (Failed)	June 6, 1978	\$350,000,000
School Building Lease-Purchase Bond Law of 1982	November 2, 1982	\$500,000,000
School Building Lease-Purchase Bond Law of 1984	November 6, 1984	\$450,000,000
Green-Hughes School Building Lease-Purchase	November 4, 1986	\$800,000,000
School Facilities Bond Act of 1988	June 7, 1988	\$800,000,000
1988 School Facilities Bond Act	November 8, 1988	\$800,000,000
1990 School Facilities Bond Act	June 5, 1990	\$800,000,000
School Facilities Bond Act of 1990	November 6, 1990	\$800,000,000
School Facilities Bond Act of 1992	June 2, 1992	\$1,900,000,000
1992 School Facilities Bond Act	November 3, 1992	\$900,000,000
Safe Schools Act of 1994 (Failed)	June 7, 1994	\$1,000,000,000
Public Education Facilities Bond Act of 1996, Proposition 203	March 1996	C)\$3,000,000,000
Class-size Reduction Kindergarten-University Public Education Facilities Bond Act of 1998, Proposition 1A	November 3, 1998	D)\$9,200,000,000

Bonds in [bold] failed to receive a majority of votes.

- A) New amount of 1966 bond authorization available for regular program is \$185.5 million after deducting \$35 million reserved for compensatory education facilities, \$9.5 million for regional occupational centers, and \$35 million for rehabilitation and replacement of earthquake damaged and unsafe schools.
- B) Up to 250 million dollars earmarked for rehabilitation and replacement of unsafe schools.
- C) One billion dollars earmarked for higher education facilities
- D) Two and one-half billion dollars is allocated for higher education.

THE PROGRAMS

Prior to the approval of Proposition 1A, the State Allocation Board oversaw six active programs associated with school facility construction, repair, and remodeling. These six programs made up the Lease-Purchase Program that was discussed earlier in this paper. This section briefly describes these programs, discusses how the State Allocation Board set priorities for school district projects, explains how the Office of Public School Construction staff reviewed and acted upon district proposals, and how the State Allocation Board considered district appeals. The purpose is to advise the reader of not only the process and administration of allocation, but also some of the pitfalls that existed under the old system. Perhaps these pitfalls of the old system can be avoided when allocating Proposition 1A resources.

The Growth and Modernization Programs

The Growth and Modernization Programs allocated funds to school districts for building new schools (Growth Program) and for repairing existing facilities (Modernization Program). School districts qualified for the Growth Program based on an “allowable building standards” formula.

For its Growth Program, the State Allocation Board developed standards for the amount of space that was necessary to house students based on a district’s number of ADA (Average Daily Attendance).⁸⁴ The Modernization Program provided funds to school districts for nonstructural improvements to permanent school facilities that were more than 30 years old, and for portable buildings that were more than 20 years old. Such nonstructural improvements included interior partitions, air conditioning, plumbing, lighting and electrical systems.

The Modernization Program provided funding for up to 25 percent of the replacement value of the building. Under some circumstances, districts could use additional funds beyond the 25 percent for handicap access compliance, including elevators when appropriate, and for alternate energy systems.

School districts could apply to this program by offering to match state funds and be listed as “Priority One,” or they could ask the State to fund their entire project and be listed as “Priority Two.”

Process for Receiving Growth and Modernization Funds

School districts that applied for growth and/or modernization funds were required to follow nine steps in three critical areas - planning, site selection and construction. Each of these three critical areas provided a separate and gradual funding stream for the school’s project.

Planning Phase

During the planning phase, a district was required to complete four forms that demonstrated that it was eligible for either the growth or modernization program.

Eligibility to participate in the programs was based on enrollment patterns or the age and condition of those schools that required modernization. If a district met these standards, it moved on to the "site development phase."

Site Development Phase

Selecting a school site was critical. If a school district was participating in the modernization program, it would move to the next phase. The site would have to be safe and able to support the school's curriculum. An adequate site would have to meet certain standards with respect to size and location. Site review could take a school district months (if not years) to investigate. Under the growth program, a school district arranged a search committee to locate available properties and narrowed its search to three sites. In addition, the school district held public hearings regarding the impact of the lands to be used for educational purposes, and notified neighbors about possible site use. A representative from the Department of Education visited three selected sites to review and determine which was the most suitable site based on criteria including, but not limited to: street traffic safety; traffic congestion; geological hazards; and other environmental issues. All school districts followed a similar process for site selection whether they financed the project themselves, or requested State funding.⁸⁵

Some school districts were unable to build new schools because they could not secure appropriate properties. This was especially true in urban and industrial areas where vacant land was not readily available or was extremely expensive.⁸⁶

Once a district found an appropriate property, it was required to prepare a site development plan that included architectural and engineering drawings, along with building contract agreements. Districts were required to follow strict site development, plan development, and construction cost guidelines in order to be eligible for state funds.⁸⁷ Once these guidelines were met, the district proceeded to the construction phase.

Construction Phase

Every construction project received an allowance for site development and to erect a building. The eligible costs associated with construction for these programs were classified into several broad categories: building construction; site development; energy conservation; and supplemental funding for multi-story construction. In addition, facility funding included adjustment costs associated with geographic and regional differences, or the demolition of an existing structure.

A project architect for each contract developed final plans and documents as part of the project's final stage. These documents were used to establish a construction budget. The Division of the State Architect approved and monitored the district's final plans. After review, a construction apportionment was recommended to the State Allocation Board, which in turn authorized the distribution of funds. Upon completion of all regulatory oversight, the district was allowed to break ground.

The Deferred Maintenance Program

The Deferred Maintenance Program provided a 50 percent State match to assist school districts with expenditures for major repair or replacement of school buildings. Such repairs or replacements were for plumbing, heating, air conditioning, electrical systems, roofing, interior and exterior painting, and floor systems. School districts were required to place one and one-half percent of their general funds into an escrow account in order to receive a State match. For school districts that could not fit the parameters of the modernization program, the deferred maintenance program was the only alternative to receive State assistance.

The State also provided critical hardship funds to repair buildings that might seriously affect the health and/or safety of pupils. When available funding was insufficient to fully fund all hardship requests in any given year, the State Allocation Board created a priority list. However, the State Allocation Board often made exceptions to its list.

The Deferred Maintenance Program differed from the modernization program in that school districts were required to submit a five-year plan as to how their projects would be implemented. The plan displayed a rank for each project, and identified those projects that the school district would likely fund.

Deferred Maintenance Application Process

Based on the most recent available material, the deferred maintenance program had 13 steps, and a school district needed to complete several forms and documents. The 13 steps were divided into categories including a letter of interest, application process, critical hardship project documentation, and fund release.

A school district notified the Office of Public School Construction each year if it wanted to participate. Upon receipt of the initial letter, the Office of Public School Construction would send the district a request for its five-year plan of maintenance needs and an "Annual Application for Funds."

The school district would then provide the OPSC with a list of items scheduled for major repair or replacement,⁸⁸ along with its five-year implementation plan. When the district received state funds, it could only expend those resources for those items on the list. It could not redirect any resources toward administrative overhead, repair and maintenance of furniture, ongoing preventative maintenance, energy conservation, landscaping and irrigation, athletic stadium equipment, drapery or blackout curtains, testing underground storage tanks for leaks, or chalkboards.

Once the Office of Public School Construction approved a school district's list of projects it allocated funds accordingly. In cases of hardship, OPSC would visit the school prior to allocating funds. The district's governing board controlled and was responsible for all deferred maintenance funds. These funds were placed in a special escrow account.

The Year-Round Air Conditioning/Insulation Program

The Year-Round Air Conditioning/Insulation Program (ACI) began in 1986, as an incentive program for schools to operate during the summer.⁸⁹ In order to participate in the program, a school district was required to have a plan for Multi-Track Year-Round Education, or have 10 percent of its students enrolled in a Multi-Track Year-Round Education program. The ACI program assisted school districts by providing resources for air conditioning and insulation.

Year-Round Schools Air Conditioning/Insulation Application Process

The application process for the ACI program differed slightly for those school districts that had a year-round program from those that were planning a year-round program. However, regardless of their status, school districts were required to complete eleven stages in two phases to receive funding. If a school district had an air conditioning system that needed repair, it could not apply to this program, but could apply for funds under the deferred maintenance program.

A school district completed forms that included information on the buildings and spaces that would be affected, along with a report regarding the project's anticipated start-date. In addition, another application was required that provided information on whether the school site was experiencing enrollment growth, and whether some level of modernization was already in progress. Further, a school district that was not on a year-round schedule was required to show how its year-round calendar would be used. If the district was approved for funding, various allowances were provided to the district.⁹⁰ In addition to these allowances, the state would provide funds for gas and electric service, general site development, and air conditioning/insulation construction.

Items that were not covered by this program included costs for heating, window solar film, classroom doors and hardware, re-roofing, lighting, security, interior housing, fire alarm systems, unrelated repairs, installations, and painting.

The State Relocatable Classroom Program

The Relocatable Classroom program was designed to meet the needs of school districts that were impacted by excessive growth or unforeseen classroom emergencies. The State Allocation Board allocated funds for the acquisition, installation, and relocation of safe portable classroom facilities. The State maintained a fleet of 5,000 furnished classrooms that could be leased to school districts for \$4,000 per year. Hardship cases could lease portables for \$2,000 per year. These portable units were available on a first-come, first-served basis. However, there was no maximum amount of time a school district could keep the portables, and districts were not required to return them. Thus, some school districts have kept the portables indefinitely.

Relocatable Classroom Application Process

In order to participate in either relocatable classroom program, a school district was responsible for site preparation costs including electrical hookup, plumbing connection, a State Architect approved plan, insurance and maintenance. After approval by the Board, the district would be reimbursed for the cost of architect fees, electrical hookup, furniture and equipment, and plumbing installation. However, reimbursements were capped at \$9,450 per classroom.

The Unused Site Program

The Unused Site Program was established in 1974 as part of the General Lease–Purchase umbrella. It required school districts and county superintendents of schools to pay a fee for district properties that were not used for “official” school purposes. “Official” school purpose was defined as being used for K-12 education, continuing or adult education, special education, childcare, or administration of any educational units.

This program did not provide funds directly to schools. However, resources generated from the fees that districts paid for unused facilities were used to cover deferred maintenance costs and to service the debt on the state’s various school construction bonds. Since the Board simply administered the return of funds to the state, the funds could not be redirected to other programs administered by the Board. Proposition 1A eliminates their fee requirements.

The Office of Public School Construction Staff Review and The State Allocation Board’s Appeals Process

The State Allocation Board meets roughly 11 times a year. At each meeting the Board reviews and approves about 200 applications for funding. Prior to the State Allocation Board’s review, the Office of Public School Construction staff processes all applications. Before Proposition 1A, the approval processes for the programs, except for the growth and modernization programs, were straightforward. Either a school district’s application fit a program’s description for reimbursement, or it did not. Due to the complicated nature of the Growth and Modernization programs, “special considerations,” or project applications that did not fit in the parameters of the program were placed in a different category. The State Allocation Board approved roughly 90 percent of all growth and modernization projects without special consideration. Issues requiring special consideration could include peculiarities of the proposed site, or the costs associated with a project. The applications were divided into special consents or “specials,” and appeals. Both types permitted the Office of Public School Construction staff great latitude in the decision-making process, as they investigated and evaluated school district applications on a case-by-case basis.

A “special” occurred when OPSC staff reviewed a school district’s application that did not meet the standards of the program, and determined that an exception should be made. This agreement may have required several meetings between the school district’s administration and the OPSC staff. With OPSC staff recommendation, which may have

been inconsistent with State Allocation Board policy, this application would be brought before the State Allocation Board for review. This category was normally granted approval in one action.

An appeal occurred when OPSC staff reviewed a school district's application that did not meet the standards of the program, and determined an exception should not be made. If after several meetings an agreement could not be reached, the school district would bring its case before the State Allocation Board. An appeal was granted only on a case-by-case basis. At times, legislators have spoken on behalf of school districts at Board meetings.⁹¹ The difference in the two types of special considerations was that a school district or its representative would have to defend its actions in an appeal. However, as already noted, only those people who kept up with the process and policy changes were adept enough to tackle an appeal. Therefore, a school district seeking an appeal before the State Allocation Board might seek help from legislators that represented them, or hire consultants. For instance, in the May 1998 State Allocation Board meeting, a well-versed school finance consultant appeared on behalf of the Apple Valley Unified School District. Apple Valley hired both a construction manager and a general contractor to erect its new school, in the face of board policies allowing a school district to hire only one such position. On behalf of the school district, the consultant addressed the State Allocation Board, and pointed out that in five other cases the State Allocation Board had voted in favor of a school district that hired both a general contractor and a construction manager.⁹²

Less seasoned district representatives would not have known that the State Allocation Board had already set a precedent for funding projects that include both a construction manager and a general contractor.⁹³ The OPSC staff was not knowledgeable on this issue and therefore could not be a source of information.

PROPOSITION 1A—A POSSIBLE FIX TO SAB PROCESS PROBLEMS

Proposition 1A not only authorizes an additional \$6.7 billion to K-12 schools, but it also offers a fix to several of the process problems discussed above. It replaces the provisions of the previous Lease-Purchase Program. This section discusses (1) the resource allocation provisions of the legislation; (2) the programmatic components of the legislation; and (3) how the legislation improves the resource allocation process over that which existed under previous bond programs.

Total Resource Allocation Provisions of Proposition 1A

The resource allocation system in Proposition 1A is specific and detailed. Bond proceeds are to be allocated in 2 two-year cycles: \$3.35 billion available immediately; and \$3.35 billion available after July 2, 2000. Of the \$3.35 billion that is immediately available, \$1.35 billion is earmarked for new construction, \$800 million for modernization, \$500 million for hardship cases, and \$700 million for class-size reduction.

For the second \$3.35 billion distribution, \$1.55 billion will be available for new construction, \$1.3 billion for modernization, and \$500 million for hardship cases. There are no resources in the second allocation for class-size reduction.

School districts receive funding for their projects based on a per pupil formula. The formula is based on a statewide average cost for construction, adjusted each January for inflation. The figures are based on unhoused⁹⁴ average daily attendance (ADA). The per pupil ADA formula is as follows:

	Growth	Modernization
Elementary	\$5,200	\$2,496
Middle School	\$5,500	\$2,640
High School	\$7,200	\$3,456

It is anticipated that the initial \$1.35 billion available for new construction during the first round of allocations will be insufficient to meet the needs of those school districts that are facing substantial enrollment growth. Proposition 1A establishes a priority point system for new construction projects when State bond resources are exhausted.⁹⁵ The Office of Public School Construction will process applications on a first-come, first-served basis from subsequent bond offerings.

In addition to the provisions outlined above, school districts that receive bond proceeds are required to set aside three percent of their general funds each year for 20 years for the purpose of deferred maintenance.

Components of Proposition 1A

Proposition 1A establishes three categories for funding. The first is the Growth Program, in which the State finances half the cost of new construction and the school district the other half. The second is the Modernization Program, in which 80 percent of the cost of rehabilitation is provided by the state and 20 percent by the school district. The third category is “hardship,” in which the State funds up to 100 percent of the cost for emergency needs, or an increased proportion of its share for new construction or modernization.⁹⁶

Proposition 1A holds harmless those school districts that received State Allocation Board approval for the construction phase of their projects (under the previous Priority 1 - able to provide a 50 percent match). They will receive growth and modernization funds, but under the rubric of the previous “Lease Purchase Program.” This grant is supplemented by land costs, site development, and other adjustments.

Another new provision of the Proposition is that school districts can seek modernization resources after a facility is 25 years old, rather than 30 years under the previous program.

Schools districts that had received prior Board approval for Priority 2 projects (100 percent state funding) will have to either indicate their ability to finance 50 percent of their proposed projects or reapply under one of the new programs. If the school district cannot meet the provisions of the new programs, it can apply as a “hardship” case.

The California Supreme Court ruled in 1991 that cities and counties could limit housing development on the basis of the supply of classrooms.⁹⁷ Proposition 1A suspends, until 2006, the Court’s ruling.⁹⁸ With the passage of Proposition 1A, school districts will not be able to limit new housing construction based on a rationale that school facilities do not exist. However, in 2006, if adequate bond funds for new construction are not available, cities and counties can once again deny development. Further, as discussed earlier, the Proposition permits the school board to increase developer fees to up to \$1.93 per square foot.⁹⁹ Proposition 1A sets up a system where fees can be levied of up to 50 percent and 100 percent of the costs associated with building a school by developers under certain circumstances.

Proposition 1A Improves the Resource Allocation System of the State Allocation Board

Proposition 1A makes several changes to the programs administered by the State Allocation Board. It attempts to simplify the process of applying for funds, consolidates the Board’s previous six programs into two, and attempts to create a more equitable funding system. It also makes the State Allocation Board and the Office of Public School Construction staff more accountable for their actions. Table 2 presents the differences between the Board’s previous Lease Purchase Program, and the new programs that are initiated by Proposition 1A.

Table 2 - Comparison of Lease Purchase Program to Proposition 1A Programs

	LEASE PURCHASE PROGRAM	SCHOOL FACILITIES PROGRAM PROP 1A
FUNDING FACILITIES	<p>Priority 1 projects-growth and modernization-received 50 percent funding based on actual costs from the state.</p> <p>Priority 2 projects-growth and modernization-received 100 percent funding form the state.</p>	<p>Growth projects receive 50 percent funding based on a per pupil formula from the state.</p> <p>Modernization projects receive 80% funding from the state. Hardship projects can receive up to 100 percent of funding from the state based on three broad categories financial, physical and excessive costs.</p>
CONSTRUCTION EXCESSIVE COSTS & COST SAVINGS	<p>Some excessive costs (i.e., change orders) were reimbursed by the state. Cost savings were returned to the state.</p>	<p>Excessive costs are not reimbursed by the state and school districts keep costs savings.</p>
MODERNIZATION PROJECTS	<p>Buildings must be at least 30 years old.</p>	<p>Buildings must be at least 25 years old.</p>
PROJECT APPROVAL	<p>Projects were approved three times in conjunction with the planning, site acquisition and construction phases.</p>	<p>Projects receive one approval (except hardships that receive two approvals).</p>
FUND ALLOCATION	<p>Funds were allotted after each phase.</p>	<p>Funds are allotted only after DSA approves plans, unless there is a hardship.</p>
MAINTENANCE OF FACILITIES	<p>Required school districts to set aside two percent of their general fund for ongoing maintenance.</p>	<p>Requires school districts to set aside three percent of their general funds for 20 years for ongoing maintenance.</p>
PROPERTY LIENS	<p>State maintains a lien to properties it funds.</p>	<p>State does not hold liens, and existing liens are released.</p>
ARCHITECTURAL APPROVAL	<p>Division of State Architect approved all plans.</p>	<p>The Division of State Architect or a state approved private engineering firm may approve plans.</p>

	LEASE PURCHASE PROGRAM	SCHOOL FACILITIES PROGRAM PROP 1A
DEVELOPER FEES	The cap on fees was \$1.93 per square foot; however, cities or counties could levy a higher fee and pass it to schools districts.	The cap on fees is \$1.93 per square foot, adjusted biannually. Fees may be assessed up to 50 percent of the costs of a project if a school district has accessed other forms of financing including Mello-Roos, G. O. bonds, and parcel taxes. In order to increase fees, school districts must meet two of four criteria, including MTYRE, local school bond positive votes of 50 + 1 percent, 20 percent of students are housed in portables, 15 percent of bond debt used.
WHEN STATE FUNDS RUN DRY	Projects were placed on a pending state-funding list or charged a city-based developer fee.	Modernization projects may be placed on a pending state-funding list. Growth projects may be placed on a priority points list, or the school district may collect 100 percent of financing from a developer.
CONTAINING DEVELOPMENT (MIRA, HART MURRIETA COURT CASES)	Cities and counties on behalf of school districts were able to contain residential development by suspending the building of new facilities.	School districts can not request cities or counties to prohibit residential development based on a lack of funds or school facilities until 2006.
ARCHITECT & CONSTRUCTION MANAGEMENT FEES	Percentage caps on fees based on size of projects	No caps.
MODERNIZATION PROGRAM	Provides funding to building over 30 years old, and portables over 25 years old. Calculations done on a district basis.	Provides funding for buildings over 25 years old and portables over 20 years old. Provides funding on a site-specific basis.
AIRCONDITIONING-ASBESTOS PROGRAM	Allotted funds specifically to install AC and remove asbestos.	These are now incorporated in the modernization program.

Simplification

To further simplify the process, the Proposition reduced the number of school facility financing phases from three to one.¹⁰⁰ This is now possible because school districts receive a flat grant from the State based on the number of students they enroll, rather than on the estimated cost of a project. Under the previous program, each phase of a project was evaluated independently; thus the cost to the State for any given project could change. Under the new program, a school district receives a single grant for a single project, and cannot request that the state fund additional need beyond the original request.¹⁰¹

The Proposition also explicitly requires that the State Allocation Board initiate a public hearing process that notices any policy changes considered by the Board. It requires that the Board make available to school districts written up-to-date documentation that clearly explains its policies, and specifically describes how its new programs work.

Consolidation

Until Proposition 1A, the State Allocation Board administered as many as 13 programs. The most current six are discussed above. With the enactment of Proposition 1A, the number of programs has been reduced to two, along with a special category for hardship cases. This consolidation of programs makes it easier for school districts to choose a program that best suits their needs. It precludes the type of creative tactics that school districts were forced to pursue to match their projects to the right program in order for them to receive funding.

A More Open Process

The Proposition causes a major shift in policy direction for the State Allocation Board. Under its previous programs, the Board funded both new construction and modernization on a 50/50 matching basis. Under Proposition 1A, the Board is required to fund modernization projects more generously than new construction projects, in that the State will fund 80 percent of the cost for modernization compared to 50 percent for new construction.

Another major outcome of Proposition 1A is that the State Allocation Board no longer has the authority to offer grants to school districts that may seek funds for special projects without any real statutory framework. Now school districts must demonstrate that they meet specific hardship criteria set out in the new law. The practical effect of this change will depend on how the Board interprets this provision.

Previous legislation implicitly required that the State Allocation Board follow guidelines set forth in the Administrative Procedures Act (APA); however, the Board did not do so. Proposition 1A explicitly requires the Board to follow APA guidelines. This means that any change in policy or regulation considered by the Board must be properly noticed to the public before the Board can act. This requirement, if the Board follows the full spirit, will allow school districts to be fully informed of Board policies and procedures, as well as its rules and regulations.

PITFALLS IN THE PROCESS PRIOR TO PROPOSITION 1A

This section discusses the State Allocation Board's attempts to improve its system and the pitfalls that existed under the previous programs.

Until recently, rules governing the application process were labor-intensive, both for school districts and the state agency personnel (including the Office of Public School Construction and the Division of the State Architect). In 1989, the Legislature received a report outlining the complex application.¹⁰² The report identified 54 steps school districts had to perform in order to receive application approval and eventual financing. In addition, the process required 24 separate forms.

Process Streamlined Recently

Since 1992, the OPSC has tried to be more efficient. Changes implemented by OPSC included: simplified and streamlined applications; improved response time for application review; improved policy information dissemination; and school districts were empowered to complete their own applications.

The most concrete indication that the Office of Public School Construction was becoming more efficient was in the application process. The application process for the Growth Program was reduced from 54 steps to nine. In addition, the number of forms that were needed to apply for funding was reduced from 24 to four.

School districts complained and begged for applications to be checked and approved for a State Allocation Board meeting agenda in an expeditious fashion. As part of the efficiency movement, the Office of Public School Construction set a goal to reduce the time from when a school district filed a completed application until it was placed on a State Allocation Board meeting agenda from over 400 days to 60 days.¹⁰³ Prior to Proposition 1A, applications on average still took longer than the 60 days to be reviewed. However, the office's efficiency achievement by reducing application review days is noteworthy.

In addition, the Office of Public School Construction worked more closely with school districts in the decision making process and provided greater leeway. In particular, school district personnel could self-certify certain information pertaining to a project rather than rely on state agency personnel. The self-certification process removed the time a school district would wait for a response from the Office of Public School Construction. It thereby shortened the application process.

Under its previous programs, it was difficult for school districts to get information pertaining to the funding process from the Office of Local Assistance (OLA) staff or from written materials. The Office of Public School Construction is now more service-oriented.¹⁰⁴ One can obtain information in person or from the office's Internet site.¹⁰⁵ In fact, the staff of the Office of Public School Construction is continually placing more information on the Internet. This information includes an automated project tracking system, Senate Bill 50 regulations, office contacts, and old board policy changes.

School Districts in Line Stand on Shifting Sands

Under the previous allocation system, school districts that completed their applications and were placed in queue were never guaranteed funding in the order their applications were received. The State Allocation Board dictated that school district applications were placed in an unfunded application list on a first-come/first-served basis. However, there were four general ways that school district applications could be “bumped” up or down in the queue.

Broad Classification Decisions

The first way a school district could get bumped was if the State Allocation Board decided to redirect its emphasis and fund a broad category of projects. For instance, the SAB could decide to fund all application projects from small school districts (no matter where they were in queue). If a school district was large, hundreds of proposed school projects could jump ahead in the funding queue.

The second way a school district could get bumped was if the State Allocation Board shifted the specific funding program allocations. Thus, for example, the State Allocation Board could decide to shift funds earmarked for the Growth Program to the State Portable Classroom Program.

Specific School District Decisions

The third way a school district could get bumped was if another school district application in queue with a later application filing date appealed to the State Allocation Board to change its application filing date to be ahead of other school districts. That school district application would be funded first.

The fourth way a school district could get bumped was if an emergency situation occurred and a school district requested critical hardship money from the State Allocation Board. The Board could provide these funds when available.

The application process requires equity and balance in order to ensure fair competition by school districts for State funds. The process needs to be flexible enough to handle emergency situations, yet firm enough to prohibit jockeying among school districts for better placement in the queue.

Proposition 1A halts the movement of funds from one program to another. However, the other examples are still feasible. Jockeying of school districts by consultants for better placement in line may continue to occur. This is especially true as Proposition 1A cannot handle the pent up demand for State funds. The next section discusses options that the Legislature may consider in order to improve this system.

OPTIONS FOR IMPROVING THE SCHOOL FACILITY FINANCING SYSTEM

A Separate List for Small and Rural School Districts

When the Proposition 1A funds are exhausted, new construction project applications will receive priority points for future funding. Small and rural school districts may require separate lists to ensure that they are placed near the front of a funding queue. This is necessary because there is no guarantee that the entire queue would receive future funding. Small and rural school districts, based on the current priority points system, may not receive enough priority points to approach the front of the queue. Larger school district applications, with greater per pupil need, may be able to position themselves high enough in the queue for funding by receiving favorable OPSC evaluations. Proposition 1A allows schools to skip to higher positions in the funding queue if they score higher priority points based on their number of unhoused students or if they can demonstrate a special hardship. *The Legislature may wish to create a separate list for small and rural school districts to create a more equitable system.*

Annual Report and Independent Accounting

In the early 1990s, many state agencies, boards, and commissions, because of budget cuts, postponed writing annual reports to the Legislature. These reports provided financial and policy information to the public. The State Allocation Board was one government entity that has not prepared regular audited reports of its programs' operations and expenditures for public review. The State Allocation Board will receive \$6.7 billion over the next four years to fund school construction projects. *The Legislature may wish to require the Board to prepare for the Governor and Legislature an annual report that details how and to whom bond funds were distributed. The Legislature may wish to require that an independent accounting firm or the State Auditor General prepare the Board's report.*

On-Line Technical Assistance

Although the application and funding process administered by the Office of Public School Construction has been streamlined and simplified in recent years, certain components of the process are still cumbersome. The process should be simple enough that school districts do not need to hire consultants or lobbyists to advise them or to shepherd their proposals. *The Legislature may wish to pass legislation that would require the OPSC to develop a technical assistance program to provide school districts with the necessary information and advice they need in order to qualify for and receive bond funds. Such a system could include an automated Internet help-line.*

A Special General Fund Appropriation for School Construction

The State's bond capacity may not be able to fund every State infrastructure need, including schools, transportation, prisons, and water during the next decade. School facility needs are estimated conservatively at roughly \$10 billion, while some estimates have put the figure at \$40 billion for the next decade alone. According to the Department of Finance, the State can afford to service approximately \$25 billion in additional debt. Thus, school facility financing alone could incur the entire debt capacity of the State. *The Legislature may wish to create a special appropriation fund for public school capital outlay as part of the State General Fund to augment the State's bond programs. In addition, the State may wish to design a school construction reserve fund, which is funded from budget surplus revenues.*

ENDNOTES

¹ Chapter 243, Statutes of 1947.

² If a school district wants state funding for construction or repair of a school, it must apply to the State Allocation Board for the money. There are school districts that repair and construct school buildings without the assistance of the State Allocation Board (i.e., San Diego Unified School District, San Luis Unified School District). However, this report will focus on a school district that requires state support.

³ Chapter 243, Statutes of 1947. Initially, the State Allocation Board administered a number of Public Works programs for the State ranging from housing and employment assistance to school facilities construction. Various programs include: the Postwar Planning and Acquisition, Construction and Employment Act, Veterans Temporary Housing, State School Building Construction Programs, Emergency Relief Programs, and Community Assistance Programs (State Allocation Annual Report 1983-1984, p. 1).

⁴ California Government Code 15502.

⁵ Government Code 15490.

⁶ While the State Allocation Board submitted policy changes to school districts, an up-to-date handbook was not made available. In addition, turnover of board members and school administrators may lead to ignorance of programs and the program changes.

⁷ Amendments to the Constitution, Proposition 1, November 8, 1949.

⁸ Amendments to the Constitution, Proposition 4, November 4, 1952.

⁹ Op.cit.

¹⁰ California School K-12 enrollment grew from 1.689 million students in 1950, to 4.633 million students in 1970 (State of California. Department of Education. Education Demographics Unit. CBEDS Data Collection. "Enrollment in California Public Schools 1950 through 1997").

¹¹ This is defined by California Education Code, Section 15102, as the legal limit of debt that a school district can incur based on the assessed value of property in that school district.

¹² Known as the State School Building Aid Program. The Legislature determined qualifications in order for school districts to participate in this program. They include the following provisions:

1. To qualify for a loan from the State a school district must have voted local bonds to 95 percent of its bonding ability.
2. Borrowing districts financially able to do so must repay the money to the State. Terms of 30 or 40 years of repayments are provided.
3. No money can be borrowed by a school district unless the proposed loan is approved by two-thirds vote of the electors of the district.
4. School construction, financed in any part by State loans will be subject to cost controls to be established by State Allocation Board (includes restrictions on the number of square feet of construction allowed per pupil).

²³ Op.cit., p. 2.

²⁴ Ibid.

²⁵ Property rich communities often have more poor people than property poor communities. The presence of commercial and industrial development can make an otherwise poor district "rich" in its tax base. Conversely, affluent communities often discourage industrial development that would make them property rich, but environmentally poorer. The lack of correlation between poor people and property poor districts is often overlooked in discussions of school finance issues. Even though the distinction has been known for a long time. Campbell, Colin D.; Fischel, William A. National Tax Journal. "Preferences for School Finance Systems; Voters Versus Judges." Footnotes from Helen Ladd. "Statewide Taxation of Commercial and Industrial Property for Education." National Tax Journal (June 1976): 143-153.

The New York Times, June 30, 1983, p. A-14. However, some school districts that were academically and fiscally well managed prior to Proposition 13 faced problems. In 1983, the San Jose Unified School District filed for bankruptcy. The National School Boards Association stated that it was the first insolvency of a large school district since the depression. The San Jose Unified School District, at the time, held a reputation for excellence in education. It ranked 14th in the state in the ratio of students to teachers, and its teachers' salaries ranked second highest in Santa Clara County. However, since Proposition 13, the school district set aside maintenance and construction projects, laid off teachers and non-teaching administration, until it could not make further reductions and still continue to pay its staff.

⁴² This evaluation was amended annually. The State developed a formula that was based on standards that considered how a facility was used and how many pupils were unhoused. In some years, the State gave preference to unhoused pupils, while in other years, the state gave first consideration to how a facility was used. Facility use included childcare, before and after school programs, adult education, and traditional K-12 programming.

⁴⁵ California Department of Education. California Year-Round Education Directory 1997-98.

⁴⁶ For example, a school district that needed to build a new elementary school that cost \$4 million could receive \$400,000 from the state if it chose to redirect students to existing facilities that incorporated the MTYRE program.

-
- ⁴⁷ Chapter 886, Statutes of 1986, added provisions that capped the grant at \$125 per student.
- ⁴⁸ School districts that could not offer to cover any expenses (now referred to as a Priority 2) could conceivably wait years. MTYRE continues today, and has been a successful program. In 1997, more than 1.19 million or about 22 percent of California students attended schools with year-round calendars. The State Department of Education estimates that the MTYRE program has saved that State more than \$1.8 billion in construction costs since its inception. In 1997-98, \$66 million was allocated from the "mega item" of the state budget. About \$40 million was sent to Los Angeles Unified School District to cover the reported 40,872 excess students. However, once students are "excess," they can not be counted as students for the Office of Public School Construction in the erection of new facilities. Approximately 102,000 students are "excess." While the program has provided relief for school construction, it remains a controversy whether educationally the program is successful.

⁸⁰ State bonds were proposed biannually in 1988, 1990, and 1992.

⁸¹ In 1976 and 1978 bond measures were defeated by the electorate.

⁸² "Lawmakers Scrap Over Billions in School Bonds." California Public Finance, May 5, 1997, p. 1.

⁸³ "Huge School Bond Mullied" California Public Finance, September 8, 1997, p. 1.

⁸⁴ This included the type of facility and the number of teaching stations (classrooms).

⁸⁵ The Department of Education, School Facilities Planning Division is responsible for site review and site plan review and is required to recommend all school locations for new schools and additions to schools site regardless of the funding source.

⁸⁶ For example, in 1988, the Los Angeles Unified School District wanted to rehabilitate a hotel into a school. The State Allocation Board paid \$48 million to an escrow account in an attempt to hold the price to acquire the Ambassador Hotel. When the school district and State Allocation Board realized that the site was not acceptable and decided to back out of the contract, they found that the developer had removed the money placed in the escrow account. In addition, when the district attempted to backpedal out of the contract, the owner sued for a breach of contract. Currently, there are negotiations between the school district and the owner of the property, Donald Trump.

⁸⁷ A school district was responsible for developing detailed cost estimates for the proposed school or addition. Site support costs provided funds for the preparation of environmental impact documents, development of relocation reports, determination of relocation claims, and negotiation of site purchases. The state reimburses up to 85 percent of the amount expended for eligible sites.

⁸⁸ This list was limited to those school facility components that have approached or exceeded their normal life expectancy.

⁸⁹ Applications for projects and appeals with correspondence from Carol A. Fisher, Apple Valley Unified School District, Author.

⁹⁰ Reimbursable fees and costs related to plans include architect fees, Division of State Architect/ORS Plan Check fee, CDE Plan Check Fee, Preliminary Tests (like soil, foundation, and exploratory borings) and other fees, for instance, advertising construction bids, and printing of plans.

⁹¹ Pascual, Psyche. "Funding to Build High School Finally Approved By State." Los Angeles Times, June 17, 1993.

⁹² Understanding the board's other five opinions would be difficult to track if not impossible to uncover.

⁹³ To evaluate the State Allocation Board's policies and procedures, it was necessary to obtain the State Allocation Board Handbook. The Handbook contains procedures and policies for reviewing and criteria for approving applications from school districts for bond funds to build new schools. When this report was initiated, the Handbook that the State Allocation Board provided was dated 1995, but contained policies adopted in 1993. Further, the State Allocation Board changes its policies and procedures often, and has no administrative process by which it updates its Handbook. An up-to-date, comprehensive list of policies and procedures was not available in any other format. A new handbook for the Lease Purchase Program was available on line - however, it also suffered from a lack of regular updating. The State Allocation Board meets every month and, hypothetically, policy changes can occur each month. Prior to Proposition 1A, despite being subject to the Administrative Procedures Act, the State Allocation Board had no public notice or participation requirements for the procedures by which it changes its policies. Only long-term policies are published in the California Regulatory Notice Register. Such policies included contracting and affirmative action requirements. Furthermore, staff reported that policies change so frequently, that it would be impossible to include relevant policies in the reporter or any other document.

⁹⁴ The number of students above the maximum number set by CDE to be in a classroom.

⁹⁵ The priority points ranking mechanism is based on, among other things, the percentage of currently and projected unhoused students relative to the total population of the applicant district or attendance area.

⁹⁶ In hardship cases, the State will fund more than 50 percent of new construction if a school district is unable to come up with its 50 percent match and had gone through a reasonable effort. Similarly, districts that are unable to offer a 20 percent match for modernization can seek relief from the State. Financial hardship is defined for those school districts that cannot afford to build, repair, or replace facilities because of fiscal restrictions (for example, an inability to match state funding because of an inability to pass local bonds or a lack of bonding capacity). Facility hardship can also apply to school districts that lack adequate housing for their pupils due to a lack of health and public safety conditions; or because of a natural disaster, traffic safety, or the remote geographic location of pupils (i.e., rural). Excessive costs may be attributed to geographic location, size of project, the cost associated with a new project in urban locations that may require high security or toxic cleanup, and sites that may require seismic retrofitting.

⁹⁷ The State Supreme Court ruled that school districts that were unable to accommodate enrollment growth could ask their city and county councils to limit real estate developers from building additional housing. Some developers found it necessary to offer additional resources (land or money) to get support from school districts and city councils for their projects.

⁹⁸ In three legal challenges, the courts have ruled that cities were not precluded from making zoning or other land-use decisions, because of the availability of classroom space, see *Mira Development Corporation v. City of San Diego*, *William S. Hart Union High School District v. Regional Planning Commission of the County of Los Angeles*, *Murietta Valley Unified School District v. County of Riverside*. The practical effect of the rulings was that cities could limit development on the basis of the supply of classrooms. Some developers found it necessary to offer additional resources, land or money, to get support from school districts and city councils for their projects.

⁹⁹ If the State expends all of its Proposition 1A resources prior to 2006, school districts can ask developers to pay 100 percent of site acquisition and school construction costs. In order to receive developer support under these conditions, school districts must participate in the Multi-Track Year-Round Education program. The Proposition includes language that the State may reimburse developers for up to 50 percent of their costs if subsequent bond funds become available.

¹⁰⁰ Under the old program, school districts had three application phases for each of their projects – planning, site, and construction. Under the new program, there is only one application phase for the entire project proposal, except under hardship provisions.

¹⁰¹ However, once the funds are distributed to the school district, the school district keeps the interest accrued on the funds.

APPENDIX A

School District Financing Mechanisms

In addition to state bond funds, school districts have a variety of other alternatives for funding school construction. These include developer fees, certificate of participation, general obligation bonds, and Mello-Roos taxes. Also, a developer may simply build a school rather than consider other financing alternatives.

Local General Obligation Bonds

In 1986, after an eight-year hiatus, school districts could once again use general obligation bonds to finance school facilities. Bonds are a favorable method of financing, even though they require a two-thirds vote and proceeds cannot be used for items such as buses and furnishings. In 1986, 14 school districts offered bond initiatives. In 1987 and 1988, this number grew to 51 and 54 school districts, respectively. In November 1998, 36 school districts held bond elections.¹⁰⁶

Developer Fees

In 1978, the Wilsona School District was the first to use developer fees. These fees added about \$2,000 to the cost of a typical home in the Lancaster area. While school districts were exacting developer fees, there was no statute that explicitly permitted this activity. The Legislature standardized the authority by giving school districts direct authority to charge developer fees. School districts welcomed developer fees especially because they did not require an election, and the funds associated with the fees could be used for a wide variety of facilities that were associated with enrollment growth. In response to a growing number of complaints from developers, the Legislature capped the amount that could be collected in 1986. Proposition 1A prohibited local agencies from using the inadequacy of school facilities as a reason for not approving housing development projects. The authority to raise developer fees was placed with the State Allocation Board. However, developer fees generally are not enough to cover the full costs of constructing a school.

Certificates of Participation

Certificates of Participation (COPs) are another, though complicated, tool for districts to raise money without voter consent. The most common arrangement is that the district leases a new school owned by another government agency or a nonprofit agency, which in turn raises the capital to build the school by selling shares (certificates of participation). In the long run, lien revenues COPs are remarkably like bonds. One disadvantage of the COP arrangement is that it does not provide a new revenue source for the lease payments. Funds usually come from the school district's general fund.

Mello-Roos

The Mello-Roos Community Facilities Act, established in 1982, authorized school districts and local governments to form "community facilities districts." Subject to the approval of two-thirds of the voters, these special districts could sell bonds to raise revenues for the purpose of financing new buildings, or to rehabilitate existing school facilities. A majority of Mello-Roos districts are created in inhabitable areas that are proposed for development where voting is by the landowners. The district sets a specific tax per house.

H

KATHLEEN CONNELL, as Controller, etc., et al.,
Petitioners,

v.

THE SUPERIOR COURT OF SACRAMENTO
COUNTY, Respondent; SANTA MARGARITA
WATER

DISTRICT et al., Real Parties in Interest.

No. C024295.

Court of Appeal, Third District, California.

Nov. 20, 1997.

SUMMARY

Several Water districts brought mandamus proceedings against the State Controller to enforce a State Board of Control decision that a statewide regulatory amendment, which increases the level of purity required when reclaimed wastewater is used for certain types of irrigation, constitutes a state-mandated program for which water districts are entitled to reimbursement from the state. The trial court entered a judgment that the state mandate was a program for which reimbursement was due, and it directed the Controller to determine the amounts of reimbursement. (Superior Court of Sacramento County, Nos. CV347181, CV357155, CV357156 and CV357950, James Timothy Ford, Judge.)

The Court of Appeal ordered issuance of a writ of mandate directing the trial court to vacate its judgment and enter a new judgment denying the petitions for a writ of mandate. The court held that because the judgment plainly left matters undecided, the judgment was interlocutory and therefore was not appealable; however, the court treated the appeal as a writ petition. On the merits, the court held that the public interest exception to the doctrine of administrative collateral estoppel precluded application of the doctrine to the legal issues raised by defendant. The issues presented were not limited to the validity of any finally adjudicated individual claim, but encompassed the question of subvention obligations in general under the regulatory amendment of wastewater purification standards. The court further held that even if the amendment constitutes a new program for state-mandated costs purposes, the costs are not reimbursable, since the water districts have the authority to levy fees to pay for the program (Wat. Code. § 35470). Rev. & Tax.

Code, former § 2253.2 (now Gov. Code, § 17556), provides that the board shall not find a reimbursable cost if the local agency has the "authority," i.e., the right or power, to levy service charges, fees, or assessments sufficient to pay for the mandated program. The plain language of the statute precludes a construction of "authority" to mean a practical ability in light of surrounding economic circumstances. The court also held that the public *383 interest exception to the doctrine of administrative collateral estoppel permitted the Controller to raise that issue in the trial court. (Opinion by Sims, J., with Puglia, P. J., and Nicholson, J., concurring.)

HEADNOTES

Classified to California Digest of Official Reports

(1a, 1b) Appellate Review § 17--Decisions Appealable--Final Judgment--Necessity For Further Orders.

A judgment entered in litigation to determine whether a statewide regulatory amendment, which increases the level of purity required when reclaimed wastewater is used for certain types of irrigation, constitutes a state-mandated program for which water districts are entitled to reimbursement from the state, was not a final judgment and thus was not appealable. The challenging parties' petition sought an order directing the State Controller to issue a warrant and the State Treasurer to pay a warrant, but the judgment merely ordered the Controller to determine amounts without disposing of those matters. The record reflected the trial court's recognition that it could not order issuance or payment of warrants unless it determined appropriated funds for such expenditures were reasonably available in the state budget, but the necessary evidentiary hearing on that issue was not held. Because the judgment plainly left matters undecided, the judgment was interlocutory and therefore not appealable.

(2) Appellate Review § 10--Jurisdiction--Appealable Judgment.

An appealable judgment or order is a jurisdictional prerequisite to an appeal.

[See 9 Witkin, Cal. Procedure (4th ed. 1997) Appeal, § § 13-14.]

(3) Appellate Review § 17--Decisions Appealable--

Interlocutory Judgment.

An interlocutory judgment is not appealable; generally, a judgment is interlocutory if anything further in the nature of judicial action on the part of the trial court is essential to a final determination of the rights of the parties.

(4) Mandamus and Prohibition § 44--Mandamus--To Courts--Appeal--Scope of Review.

In reviewing a trial court's ruling on a petition for a writ of mandate, the appellate court is ordinarily confined to an inquiry as to whether the findings and judgment of the trial court are supported by substantial evidence. However, where the facts are undisputed and the issues present questions of law, the appellate court *384 is not bound by the trial court's decision but may make its own determination.

(5) Judgments § 81--Res Judicata--Administrative Collateral Estoppel-- Public Interest Exception--Board of Control Decision.

In litigation by several water districts against the State Controller to enforce a State Board of Control decision that a statewide regulatory amendment, which increases the level of purity required when reclaimed wastewater is used for certain types of irrigation, constitutes a state- mandated program for which water districts are entitled to reimbursement from the state, the public interest exception to the doctrine of administrative collateral estoppel precluded application of the doctrine to the legal issues raised by defendant. The issues presented were not limited to the validity of any finally adjudicated individual claim, but encompassed the question of subvention obligations in general under the regulatory amendment of wastewater purification standards. If the board's decision was wrong but unimpeachable, taxpayers statewide would suffer unjustly the consequences of a continuing obligation to fund the costs of local water districts.

[See 7 Witkin, Cal. Procedure (4th ed. 1997) Judgment, § 339.]

(6a, 6b) State of California § 11--Fiscal Matters--Reimbursement for State-mandated Costs--Standards for Reclaimed Wastewater--Authority of Water Districts to Levy Fees.

Even if a statewide regulatory amendment, which increases the level of purity required when reclaimed wastewater is used for certain types of irrigation, constitutes a new program for state-mandated costs purposes, the costs are not reimbursable, since the water districts have the authority to levy fees to pay for the program (Wat. Code, § 35470). Rev. & Tax.

Code, former § 2253.2 (now Gov. Code, § 17556), provides that the Board of Control shall not find a reimbursable cost if the local agency has the "authority," i.e., the right or power, to levy service charges, fees, or assessments sufficient to pay for the mandated program. The plain language of the statute precludes a construction of "authority" to mean a practical ability in light of surrounding economic circumstances.

(7) Statutes § 29--Construction--Language--Legislative Intent.

In construing statutes, a court's primary task is to determine the lawmakers' intent. To determine intent, the court looks first to the words themselves. If the language is clear and unambiguous there is no need for construction, nor is it necessary to resort to indicia of the intent of the Legislature. *385

(8) Judgments § 81--Res Judicata--Administrative Collateral Estoppel-- Public Interest Exception--Legal Issue.

In litigation by several water districts against the State Controller to enforce a State Board of Control decision that a statewide regulatory amendment, which increases the level of purity required when reclaimed wastewater is used for certain types of irrigation, constitutes a state- mandated program for which water districts are entitled to reimbursement from the state, the public interest exception to the doctrine of administrative collateral estoppel permitted defendant to raise the purely legal issue that Rev. & Tax. Code, former § 2253.2 (now Gov. Code, § 17556), precluded reimbursement. The statute provides that the Board of Control shall not find a reimbursable cost if the local agency has the "authority," i.e., the right or power, to levy service charges, fees, or assessments sufficient to pay for the mandated program, and plaintiffs have such authority. The board's finding to the contrary was thus not binding.

COUNSEL

Daniel E. Lungren, Attorney General, Floyd D. Shimomura, Assistant Attorney General, Linda A. Cabatic and Susan R. Oie, Deputy Attorneys General, for Petitioners.

No appearance for Respondent.

James A. Curtis for Real Parties in Interest.

SIMS, J.

This case involves a dispute as to whether a statewide regulatory amendment, increasing the level of purity required when reclaimed wastewater is used for certain types of irrigation, constitutes a state-mandated program for which water districts are entitled to reimbursement from the state. (Cal. Const., art. XIII B, § 6 (hereafter, section 6); [FN1] Gov. Code, § 17500 et seq.; former Rev. & Tax. Code, § 2201 et seq.) The State Controller and State Treasurer appeal from a trial court judgment granting *386 petitions for writ of mandate brought by Santa Margarita Water District (SMWD), Marin Municipal Water District, Irvine Ranch Water District and Santa Clara Valley Water District (the Districts), seeking to enforce a State Board of Control (the Board) decision which found the regulatory amendment constituted a reimbursable state mandate. [FN2] Appellants contend the trial court erred because (1) the amendment did not constitute a new program or higher level of service in an existing program; (2) the Districts' claim was abolished when the statutory basis for their claim-former Revenue and Taxation Code section 2207- was repealed before their rights were reduced to final judgment, and (3) the Districts' authority to levy fees to pay for the increased costs defeats their claim of a reimbursable mandate. Appellants also challenge the trial court's determination that they were collaterally estopped from challenging the Board's decision (finding a reimbursable state mandate) by their failure timely to seek judicial review of the administrative decision. We shall conclude the Districts' authority to levy fees defeats their claim of a reimbursable mandate, and appellants are not collaterally estopped from raising this matter. We therefore need not address the other contentions. Treating this appeal from a nonappealable judgment as an extraordinary writ petition, we shall direct the trial court to vacate its judgment and enter a new judgment denying the Districts' petitions.

FN1 Section 6 provides: "Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the state shall provide a subvention of funds to reimburse such local government for the costs of such program or increased level of service, except that the Legislature may, but need not, provide such subvention of funds for the following mandates: [¶] (a) Legislative mandates requested by the local agency

affected; [¶] (b) Legislation defining a new crime or changing an existing definition of a crime; or [¶] (c) Legislative mandates enacted prior to January 1, 1975, or executive orders or regulations initially implementing legislation enacted prior to January 1, 1975."

FN2 The trial court first held proceedings in the matter of the petition filed by the SMWD. The other three water districts had filed petitions, which were consolidated and awaiting hearing. The parties to the consolidated case filed a stipulation indicating they did not wish to relitigate the entitlement issues already decided by Judge Ford in the SMWD case, and they stipulated to assignment of their cases to Judge Ford pursuant to California Rules of Court, rule 213 (assignment to one judge for all or limited purposes), for determination of amounts as to each district. The judgment expressly covers the petitions of all four districts.

Factual and Procedural Background

In 1975, the State Department of Health Services (DHS) adopted regulations (Cal. Code Regs., tit. 22, § § 60301-60357) implementing Water Code section 13521, which provides: "The State Department of Health Services shall establish uniform statewide recycling criteria for each varying type of use of recycled water where the use involves the protection of public health." Section 60313 [FN3] of title 22 of the California Code of Regulations prescribed the level of purity required for reclaimed water to be used for landscape irrigation. *387

FN3 California Code of Regulations, title 22, section 60313, initially provided: "Landscape Irrigation. Reclaimed water used for the irrigation of golf courses, cemeteries, lawns, parks, playgrounds, freeway landscapes, and landscapes in other areas where the public has access shall be at all times an adequately disinfected, oxidized wastewater. The wastewater shall be considered adequately disinfected if at some location in the treatment process the median number of coliform organisms does not exceed 23 per 100 milliliters, as determined

from the bacteriological results of the last 7 days for which analyses have been completed." (Former § 60313, Cal. Code Regs., tit. 22, Register 75. No. 14 (Apr. 5, 1975).)

In May 1976, SMWD adopted a plan to develop a wastewater reclamation system. In August 1976, SMWD filed an application with the responsible regional water quality control board (Water Control Board) for a permit to discharge wastewater from the proposed reclamation system. SMWD also planned to provide reclaimed water for irrigation, potentially to 2,173 acres of land.

In February 1977, the Water Control Board issued SMWD a permit for operation of a reclamation system—the Oso Creek facility. The permit required SMWD to comply with all applicable wastewater reclamation regulations then in effect.

In late 1977, SMWD learned DHS might be considering modifications to the California Code of Regulations, title 22 regulations.

In August 1978, SMWD completed construction of the Oso Creek facility, at a cost of \$17 million.

In September 1978, DHS amended the regulations. The amendment to California Code of Regulations, title 22, section 60313 [FN4] increased the level of purity required before reclaimed wastewater could be used for the irrigation of parks, playgrounds and school yards. It is this amendment which allegedly constituted a state-mandated cost. SMWD modified its facility to comply with the amended regulations, completing the modifications in 1983. *388

FN4 Section 60313 of California Code of Regulations, title 22, as amended, provides: "(a) Reclaimed water used for the irrigation of golf courses, cemeteries, freeway landscapes, and landscapes in other areas where the public has similar access or exposure shall be at all times an adequately disinfected, oxidized wastewater. The wastewater shall be considered adequately disinfected if the median number of coliform organisms in the effluent does not exceed 23 per 100 milliliters, as determined from the bacteriological results of the last 7 days for which analyses have been completed, and the number of coliform organisms does not

exceed 240 per 100 milliliters in any two consecutive samples.

"(b) Reclaimed water used for the irrigation of parks, playgrounds, schoolyards, and other areas where the public has similar access or exposure shall be at all times an adequately disinfected, oxidized, coagulated, clarified, filtered wastewater or a wastewater treated by a sequence of unit processes that will assure an equivalent degree of treatment and reliability. The wastewater shall be considered adequately disinfected if the median number of coliform organisms in the effluent does not exceed 2.2 per 100 milliliters, as determined from the bacteriological results of the last 7 days for which analyses have been completed, and the number of coliform organisms does not exceed 23 per 100 milliliters in any sample."

On October 1, 1982, SMWD filed a "test claim" [FN5] with the Board, alleging the regulatory amendment relating to the use of reclaimed wastewater constituted a new program or higher level of service. The test claim was made pursuant to former Revenue and Taxation Code section 2231, [FN6] which required reimbursement to local agencies for costs mandated by the state (see now Gov. Code, § 17561 [FN7]), and former Revenue and Taxation Code section 2207, subdivisions (a) and (b) [FN8] defining "costs mandated by the state." (See now Gov. Code, § 17514. [FN9]) The test claim also cited section 6 (fn. 1, *ante*). *389

FN5 At the time in question, "test claim" meant "the first claim filed with the State Board of Control alleging that a particular statute or executive order imposes a mandated cost on such local agency or school district." (Former Rev. & Tax. Code, § 2218; Stats. 1980, ch. 1256, § 7, p. 4249.) "Estimated claims" and "reimbursement claims" were used to make specific demand against an appropriation made for the purpose of paying such claims. (*Ibid.*)

A similar structure, distinguishing between "test claims" and various "reimbursement claims" or "entitlement claims" continues presently in Government Code sections 17521-17522.

At the time in question, the statutory procedure provided that if the Board found a mandate, it did not determine the amount to

be reimbursed to the test claimant; rather, the Board then adopted a statewide cost estimate which was reported to the Legislature. (Stats. 1980, ch. 1256, p. 4246 et seq.; Stats. 1982, ch. 734, p. 2911 et seq.) It was the State Controller who determined specific amounts to be reimbursed, after the Legislature appropriated funds for that purpose. (*Ibid.*)

FN6 Former Revenue and Taxation Code section 2231 provided in part: "(a) The state shall reimburse each local agency for all 'costs mandated by the state,' as defined in Section 2207...." (Stats. 1982, ch. 1586, § 3, n. 6264.)

FN7 Government Code section 17561 provides in part: "(a) The state shall reimburse each local agency and school district for all 'costs mandated by the state,' as defined in Section 17514...."

FN8 Former Revenue and Taxation Code section 2207 provided in part: "'Costs mandated by the state' means any increased costs which a local agency is required to incur as a result of the following: [¶] (a) Any law enacted after January 1, 1973, which mandates a new program or an increased level of service of an existing program; [¶] (b) Any executive order issued after January 1, 1973, which mandates a new program" (Stats. 1980, ch. 1256, § 4, pp. 4247-4248.)

The test claim did *not* invoke other subdivisions of former Revenue and Taxation Code section 2207, concerning "(c) Any executive order issued after January 1, 1973, which (i) implements or interprets a state statute and (ii), by such implementation or interpretation, increases program levels above the levels required prior to January 1, 1973. [¶] ... [¶] ... (h) Any statute enacted after January 1, 1973, or executive order issued after January 1, 1973, which adds new requirements to an existing optional program or service and thereby increases the cost of such program or service if the local agencies have no reasonable alternatives other than to continue the optional program." (Stats. 1980, ch. 1256, § 4, pp.

4247- 4248.) Since these subdivisions were not invoked, we have no need to consider them.

FN9 Government Code section 17514 provides: "'Costs mandated by the state' means any increased costs which a local agency or school district is required to incur after July 1, 1980, as a result of any statute enacted on or after January 1, 1975, or any executive order implementing any statute enacted on or after January 1, 1975, which mandates a new program or higher level of service of an existing program within the meaning of Section 6"

On July 28, 1983, the Board determined the amended regulations imposed state mandated costs. In so doing, the Board rejected the position of state agencies seeking denial of the claim on the ground that local agencies are not mandated to use reclaimed water and because, if local agencies do choose to use it, they can recover the cost in charges made to purchasers of the water.

On January 19, 1984, the Board adopted "Parameters and Guidelines" establishing criteria for payment of claims to water districts pursuant to this mandate. (Former Rev. & Tax. Code, § 2253.2; Stats. 1982, ch. 734, § 10, pp. 2916-2917; Gov. Code, § 17557.)

On May 31, 1984, the Board amended its Parameters and Guidelines to provide for reimbursement of SMWD's cost of preparing and presenting the test claim.

In June 1984, the Board, pursuant to former Revenue and Taxation Code section 2255, [FN10] submitted to the Legislature a statewide cost estimate of \$14 million for this mandate. The Legislature did not appropriate any funds for the mandate in 1984.

FN10 Former Revenue and Taxation Code section 2255 provided: "At least twice each calendar year the Board of Control shall report to the Legislature on the number of mandates it has found and the estimated statewide costs of such mandates. Such report shall identify the statewide costs estimated for each such mandate and the reasons for recommending reimbursement.... Immediately on receipt of such report a local

governmental claims bill shall be introduced in the Legislature. The local government claims bill, at the time of its introduction, shall provide for an appropriation sufficient to pay the estimated costs of such mandates, pursuant to the provisions of this article." (Stats. 1980, ch. 1256, § 20, p. 4255.)

The current provision is contained in Government Code section 17600, which provides: "At least twice each calendar year the commission shall report to the Legislature on the number of mandates it has found pursuant to Article 1 (commencing with Section 17550) and the estimated statewide costs of these mandates. This report shall identify the statewide costs estimated for each mandate and the reasons for recommending reimbursement."

In 1985, the Legislature included an appropriation of almost \$14 million for this state-mandated cost in the budget, but the Governor vetoed the appropriation.

In 1986, a bill including \$945,000 for the subject mandate was introduced, but the bill was not enacted.

On January 27, 1987, SMWD filed in the trial court a petition for writ of mandate pursuant to Code of Civil Procedure section 1085. The petition sought an order directing (1) the State Controller to issue a warrant "to pay the State's obligation to SMWD for its 'costs mandated by the state' " and (2) the State Treasurer to pay the Controller's warrant. *390

At a hearing, the trial court upheld the Board's decision that the amended regulations required a higher level of service and held the doctrines of waiver and collateral estoppel applied to that decision, such that the state, by failing to challenge the Board's decision within the three-year statute of limitations, was barred from challenging it now. However, the trial court did allow the state to argue that the amended regulations did not come within the definition of "program," as that word had recently been defined in County of Los Angeles v. State of California (1987) 43 Cal.3d 46, 56 [233 Cal.Rptr. 38, 729 P.2d 202].

The trial court recognized that, since there was no appropriation for this mandate in the state budget, the court could not grant the relief sought by SMWD (an order directing the Controller to issue a warrant and the Treasurer to pay it) unless the court found the existence of funds reasonably available in the state

budget which could be tapped for this purpose. The trial court stated it was not prepared to find the existence of funds reasonably available without a full evidentiary hearing. Rather than use the Board's statewide estimate, the court believed it needed to know the amount to which each water district would be entitled before it could determine whether there were funds reasonably available in the budget. The trial court ruled the exact amount of money to be reimbursed to the Districts had never been determined and referred the matter to a referee to make that determination.

In February 1989, a court-appointed referee began evidentiary hearings to determine the amount of reimbursement for each water district.

In 1989, the Legislature repealed former Revenue and Taxation Code section 2207 (fn. 8, *ante*), defining "costs mandated by the state." (Stats. 1989, ch. 589, § 7, p. 1978.)

On July 29, 1994, appellants filed in the trial court a motion for judgment on the pleadings/motion to dismiss, arguing repeal of former Revenue and Taxation Code section 2207 destroyed any right to reimbursement and divested the court of jurisdiction to proceed. The motion also revisited the issue presented to and rejected by the Board, that the water districts' authority to levy fees defeated a finding that the costs were reimbursable.

In February 1995, the trial court issued its ruling denying appellants' motion for judgment on the pleadings and for dismissal. The court in its minute order determined repeal of former Revenue and Taxation Code section 2207 in 1989 had not destroyed the Districts' right to reimbursement pursuant to the Board's decision, because the Board's decision was reduced to "final judgment" before the statutory repeal. The court said the Board's *391 decision on July 28, 1983, became final in July 1986, when the applicable three-year statute of limitations for seeking judicial review lapsed. The Board's decision therefore conclusively established the Districts' right to reimbursement, and appellants were collaterally estopped from challenging the Board's decision. The court further said no discernible injustice or public interest precluded this application of collateral estoppel; rather, justice would be furthered by allowing the Districts to enforce their right to reimbursement as established by the Board.

The trial court further said the statutory authority of the Districts to levy service charges and assessments

(Former Rev. & Tax. Code, § 2253.2, subd. (b)(4); [FN11] Stats. 1982, ch. 734, § 10, p. 2916; Gov. Code, § 17556 [FN12]) did not bar reimbursement for state-mandated costs. "When the Board determined that the 1978 amendment of the regulations establishing reclamation criteria imposed reimbursable state-mandated costs, it rejected the argument of the State Departments of Health Services and Finance that the costs were not reimbursable pursuant to former Revenue and Taxation Code section 2253(b)(4) and implicitly determined, in accordance with the presentation of [Santa Margarita Water District] that [the Districts] did not have sufficient authority to levy service charges and assessments to pay for the increased level of service mandated by the 1978 regulatory amendment. This implicit determination, resolving a mixture of legal and factual issues, became final and binding on respondents under the doctrine of collateral estoppel when they failed to seek judicial review of the Board's decision within the three-year limitations period."

FN11 At the time SMWD filed its test claim, former Revenue and Taxation Code section 2253.2 provided in part: "(b) The Board of Control shall not find a reimbursable mandate ... in any claim submitted by a local agency ... if, after a hearing, the board finds that: [¶] ... [¶] (4) The local agency ... has the authority to levy service charges, fees or assessments sufficient to pay for the mandated program or level of service." (Stats. 1982, ch. 734, § 10, p. 2916.)

FN12 Government Code section 17556 provides in part: "The [Commission on State Mandates (formerly the Board of Control)] shall not find costs mandated by the state, as defined in Section 17514, in any claim submitted by a local agency or school district, if, after a hearing, the commission finds that: [¶] ... [¶] (d) The local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service."

At a further hearing concerning the amount owed to each water district, the trial court stated it had erred in referring the matter to a referee and should have

rendered a judgment directing the Controller to determine the amounts owed.

On June 3, 1996, the trial court entered a judgment stating (1) the Board's decision was final at the time the petitions were filed in the trial court; (2) *392 the state mandate is a program for which reimbursement is due under County of Los Angeles v. State of California, supra, 43 Cal.3d 46; (3) the court having concluded it was inappropriate for the court to determine amounts of reimbursement, the Controller was directed to make that determination. The court directed issuance of a writ commanding the Controller to determine the amounts due to the Districts.

Appellants appeal from the judgment.

The Districts filed a cross-appeal, but we dismissed the cross-appeal pursuant to stipulation of the parties.

Discussion I. Appealability

(1a) Because the petition sought an order directing the Controller to issue a warrant and the Treasurer to pay a warrant but the judgment merely ordered the Controller to determine amounts without disposing of those matters, and because the record reflected the trial court's recognition that it could not order issuance or payment of warrants unless it determined appropriated funds for such expenditures were reasonably available in the state budget [FN13] (Carmel Valley Fire Protection Dist. v. State of California (1987) 190 Cal.App.3d 521, 538-541 [234 Cal.Rptr. 795])-a determination requiring an evidentiary hearing which was not held-we requested supplemental briefing on the question whether the judgment was a final appealable judgment, as opposed to an interlocutory judgment.

FN13 The petition for writ of mandate alleged there was a continuously appropriated State Mandates Claims Fund upon which the Legislature had placed restrictions which on their face made the fund inapplicable to the mandate at issue in this case. The petition further alleged these restrictions were unconstitutional, such that upon a judicial declaration of their unconstitutionality, there would exist funds reasonably available to pay SMWD. The trial court made no ruling on these matters. In this appeal, we need not and do not

decide the propriety of the remedy sought by the Districts.

(2) An appealable judgment or order is a jurisdictional prerequisite to an appeal. (Code Civ. Proc., § 904.1; 9 Witkin, Cal. Procedure (4th ed. 1997) Appeal, § § 13-14, pp. 72-73.)

(3) An interlocutory judgment is not appealable; generally, a judgment is interlocutory if anything further in the nature of judicial action on the part of the trial court is essential to a final determination of the rights of the parties. (Lyon v. Goss (1942) 19 Cal.2d 659, 669-670 [123 P.2d 11].)

(1b) In their supplemental briefs, both sides maintain the judgment is a final appealable judgment but for different reasons. Both sides are wrong. *393

Appellants assert the judgment is final because nothing further remains to be done by the trial court. According to appellants, the Controller, after determining what amounts are due, is supposed to submit that amount to the Legislature to appropriate the funds (though the judgment contains no such direction). Appellants assert that, if the Legislature does not appropriate the funds, the Districts' remedy would be to file a new action in the superior court to enforce the court's prior order, and to compel payment out of funds already appropriated and reasonably available for the expenditures. Appellants assert it is thus premature to consider whether appropriated funds are reasonably available to pay any reimbursement due.

The Districts' supplemental brief, while agreeing the judgment is a final appealable judgment, disputes appellants' view of what happens after the Controller determines the amounts. The Districts maintain the trial court intended for appellants to pay the amounts determined by the Controller, despite the judgment's failure so to state. The Districts claim the unresolved factual question of the existence of available appropriated funds in the budget is merely "an administrative detail" which need not be addressed by the court except in a proceeding to enforce the judgment in the event appellants refuse to pay.

Both sides are wrong. Nothing in the judgment requires the Controller to submit an appropriations bill to the Legislature, and appellants cite no authority that would require such a procedure-which would duplicate steps previously undertaken in this case without success. Nor does anything in the

judgment call for issuance or payment of warrants. Carmel Valley Fire Protection Dist. v. State of California, *supra*, 190 Cal.App.3d 521-a case discussed in the trial court and on appeal-recognized that a court violates the separation of powers doctrine if it purports to compel the Legislature to appropriate funds, but no such violation occurs if the court orders payment from an existing appropriation. (*Id.* at pp. 538-539.) Thus, the Districts' view of this matter as an administrative detail for a later postjudgment enforcement proceeding is unsupported.

We recognize this litigation arises from a "test claim," which merely determines whether a state-mandated cost exists. (See fn. 5, *ante.*) Perhaps no issue of payment should arise at all at the test claim stage, though neither side so argues.

In any event, the judgment plainly leaves matters undecided.

We conclude the judgment is interlocutory and therefore not appealable.

Nevertheless, on our own motion, we shall exercise our discretion to treat the appeal as a writ petition and shall grant review on that basis. (Morehart *394 v. County of Santa Barbara (1994) 7 Cal.4th 725, 743-744 [29 Cal.Rptr.2d 804, 872 P.2d 143] [treating appeal as writ petition is authorized means for obtaining review of interlocutory judgments].) We shall exercise our discretion to treat the appeal as a writ petition in the interest of justice and judicial economy, because the merits of the dispositive issues have been fully briefed, both sides urge review, and the judgment compels the Controller to engage in complex factfinding determinations which may be moot if the trial court erred on the merits of the mandate issues. Given the difficulties in discerning how the former statutory process of test claims was supposed to work in practice, we believe the interests of justice and judicial economy are best served by reviewing the judgment rather than dismissing the appeal.

We stress, however, that our review is limited to contentions raised in the briefs-which do not raise issues of the propriety of the remedy sought by the Districts. We express no view on whether the remedy sought by the Districts was an available or appropriate remedy.

II. Standard of Review

(4) In reviewing the trial court's ruling on a writ of

mandate, the appellate court is ordinarily confined to an inquiry as to whether the findings and judgment of the trial court are supported by substantial evidence. (*Evans v. Unemployment Ins. Appeals Bd.* (1985) 39 Cal.3d 398, 407 [216 Cal.Rptr. 782, 703 P.2d 122].) However, where the facts are undisputed and the issues present questions of law, the appellate court is not bound by the trial court's decision but may make its own determination. (*Ibid.*)

III. Collateral Estoppel

We first address the trial court's determination that appellants were collaterally estopped from challenging the Board's determination of state-mandated cost (except for the ability to address the effect of a new Supreme Court case defining "program"). The trial court stated the Board's decision became final for collateral estoppel purposes in July 1986, when the statute of limitations for judicial review expired.

Appellants contend the trial court erred in applying collateral estoppel, because there was no "final judgment" for collateral estoppel purposes, since the amount of reimbursement had yet to be determined.

(5) We conclude it is not necessary to decide the parties' dispute as to whether the requirements of administrative collateral estoppel are met, because even assuming the elements are met, the doctrine of collateral estoppel should be disregarded pursuant to the public interest exception. *395

Thus, our Supreme Court declined to apply collateral estoppel in a state-mandated costs case in *City of Sacramento v. State of California* (1990) 50 Cal.3d 51, 64-65 [266 Cal.Rptr. 139, 785 P.2d 522] (*Sacramento II*). There, a city and a county filed claims with the Board seeking subvention of costs imposed by a statute (Stats. 1978, ch. 2, p. 6 et seq., referred to in *Sacramento II* as "chapter 2/78") which extended mandatory coverage under the state unemployment insurance law to include state and local governments. The Board found there was no state-mandated program and denied the claims. On mandamus, the trial court overruled the Board and found the costs reimbursable. We affirmed the trial court in a published opinion. (*City of Sacramento v. State of California* (1984) 156 Cal.App.3d 182 [203 Cal.Rptr. 258] (*Sacramento I*)). On remand, the Board determined the amounts due on the claims, but the Legislature refused to appropriate the necessary funds. The city filed a class action seeking among other things payment of the state-mandated costs.

The trial court granted summary judgment for the state on the grounds the statute did not impose state-mandated costs. The Supreme Court upheld the trial court's decision.

The Supreme Court in *Sacramento II* rejected the local agencies' argument that the state was collaterally estopped from relitigating the issue whether a state-mandated cost existed, because *Sacramento I* "finally" decided the matter. (*Sacramento II, supra*, 50 Cal.3d at p. 64.) The Supreme Court said: "Generally, collateral estoppel bars the party to a prior action, or one in privity with him, from relitigating issues finally decided against him in the earlier action. [Citation.] '... But when the issue is a question of law rather than of fact, the prior determination is not conclusive either if injustice would result or if the public interest requires that relitigation not be foreclosed....' [Citation.]

"Even if the formal prerequisites for collateral estoppel are present here, the public-interest exception governs. Whether chapter 2/78 costs are reimbursable under article XIII B and parallel statutes constitutes a pure question of law. The *state* was the losing party in *Sacramento I*, and also the only entity legally affected by that decision. Thus, strict application of collateral estoppel would foreclose any reexamination of the holding of that case. The state would remain bound, and no other person would have occasion to challenge the precedent.

"Yet the consequences of any error transcend those which would apply to mere private parties. If the result of *Sacramento I* is wrong but unimpeachable, taxpayers statewide will suffer unjustly the consequences of the state's continuing obligation to fund the chapter 2/78 costs of local agencies...." (*Sacramento II, supra*, 50 Cal.3d at p. 64, original italics.) *396

The Supreme Court also rejected the argument that *res judicata* applied. "Of course, *res judicata* and the rule of final judgments bar us from disturbing individual claims or causes of action, on behalf of specific agencies, which have been finally adjudicated and are no longer subject to review. [Citations.] However, the issues presented in the current action are not limited to the validity of any such finally adjudicated individual claims. Rather, they encompass the question of defendants' subvention obligations *in general* under chapter 2/78." (*Sacramento II, supra*, 50 Cal.3d at p. 65, original italics.)

If this court's opinion finding a reimbursable mandate in *Sacramento I* did not constitute a final adjudication precluding further consideration of the matter, a fortiori the Board's decision in the instant case does not constitute a final adjudication precluding further consideration. Thus, here, as in *Sacramento II*, the issues presented are not limited to the validity of any finally adjudicated individual claim, but encompass the question of subvention obligations in general under the regulatory amendment of wastewater purification standards. If the Board's decision is wrong but unimpeachable, taxpayers statewide would suffer unjustly the consequences of a continuing obligation to fund the costs of local water districts. We reject the Districts' argument that no public interest exists in this case because only a few local entities are involved.

The Districts suggest application of the public interest exception to collateral estoppel would nullify the legislative intent to avoid multiple proceedings by creating a comprehensive and exclusive procedure for handling state mandated costs issues in the administrative forum. (E.g., Gov. Code, § 17500. [FN14]) However, we are bound by Supreme Court authority applying the public interest exception in a state-mandated costs case. (*Auto Equity Sales, Inc. v. Superior Court* (1962) 57 Cal.2d 450 [*39720 Cal.Rptr. 321, 369 P.2d 937].) Moreover, contrary to the Districts' implication, the administrative decision is not the final word; the statutory scheme authorizes judicial review of the administrative decision. (Gov. Code, § 17559; former Rev. & Tax. Code, § 2253.5; Stats. 1977, ch. 1135, § 12, p. 3650.) Additionally, the instant judicial proceeding was initiated by the Districts, not by appellants. Thus, in this case application of the public interest exception to collateral estoppel is not creating multiple proceedings.

FN14 Government Code section 17500 provides in part: "The Legislature finds and declares that the existing system for reimbursing local agencies ... for the costs of state-mandated local programs has not provided for the effective determination of the state's responsibilities under Section 6 The Legislature finds and declares that the failure of the existing process to adequately and consistently resolve the complex legal questions involved in the determination of state-mandated costs has led to an increasing reliance by local agencies and school districts on the judiciary and, therefore, in

order to relieve unnecessary congestion of the judicial system, it is necessary to create a mechanism which is capable of rendering sound quasi-judicial decisions and providing an effective means of resolving disputes over the existence of state-mandated local programs. [¶] It is the intent of the Legislature in enacting this part to provide for the implementation of Section 6 ... and to consolidate the procedures for reimbursement of statutes specified in the Revenue and Taxation Code with those identified in the Constitution. Further, the Legislature intends that the Commission on State Mandates, as a quasi-judicial body, will act in a deliberative manner in accordance with the requirements of Section 6"

In light of the Supreme Court's decision in *Sacramento II*, we disregard earlier authority of an intermediate appellate court which applied administrative collateral estoppel to a question of law in a state-mandated costs case without express discussion of the public interest exception. (*Carnel Valley Fire Protection Dist. v. State of California*, *supra*, 190 Cal.App.3d at p. 536.)

We conclude that, insofar as appellants' contentions present questions of law, the public interest exception to administrative collateral estoppel governs, and we shall therefore address the legal arguments raised in appellants' brief.

IV. Authority to Levy Fees

(6a) Appellants contend that, even if the regulatory amendment is a new program for state mandated costs purposes, the Districts' authority to levy fees defeats a determination that the costs are reimbursable. We agree.

At the time SMWD filed its test claim, former Revenue and Taxation Code section 2253.2 provided in part:

"(b) The Board of Control shall not find a reimbursable mandate, pursuant to either Section 2250 of this code or to Section 905.2 of the Government Code, in any claim submitted by a local agency or school district, pursuant to subdivision (a) of Section 2218, if, after a hearing, the board finds that:

.....

"(4) The local agency or school district has the authority to levy service charges, fees or assessments sufficient to pay for the mandated program or level of service." [FN15] (Stats. 1982, ch. 734, § 10, p. 2917; Stats. 1980, ch. 1256, § 15, pp. 4253-4254.) *398

FN15 This case presents no issue concerning any distinction between "service charges, fees or assessment," as used in the statute. The parties on appeal frame the issue in terms of the authority to levy "fees." We adopt their usage for the sake of simplicity.

The same provision is currently contained in Government Code section 17556. [FN16]

FN16 Government Code section 17556 provides in part: "The commission [formerly the Board] shall not find costs mandated by the state, as defined in Section 17514, in any claim submitted by a local agency or school district, if, after a hearing, the commission finds that: [¶] ... [¶] (d) The local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service...."

The facial constitutionality of this provision was upheld in County of Fresno v. State of California (1991) 53 Cal.3d 482 [280 Cal.Rptr. 92, 808 P.2d 235]. The *Fresno* court rejected an argument that the statute was facially unconstitutional as conflicting with section 6 (fn. 1, *ante*), which contains no exclusion of reimbursement where the local agency has authority to levy fees. Section 6 requires subvention only when the costs in question can be recovered solely from tax revenues. (53 Cal.3d at p. 487.) Government Code section 17556, subdivision (d), "effectively construes the term 'costs' in the constitutional provision as excluding expenses that are recoverable from sources other than taxes. Such a construction is altogether sound." (County of Fresno v. State of California, *supra*, 53 Cal.3d at p. 487.)

Here, appellants contend that, at all pertinent times, the water districts have had *authority* to levy fees to cover the costs at issue in this case. They cite provisions such as Water Code section 35470, which

provides: "Any district formed on or after July 30, 1917, may, in lieu in whole or in part of raising money for district purposes by assessment, make water available to the holders of title to land or the occupants thereon, and may fix and collect charges therefor. The charges may include standby charges to holders of title to land to which water may be made available, whether the water is actually used or not. The charges may vary in different months and in different localities of the district to correspond to the cost and value of the service, and the district may use so much of the proceeds of the charges as may be necessary to defray the ordinary operation or maintenance expenses of the district and for any other lawful district purpose."

We agree this statute on its face authorizes the Districts to levy fees sufficient to pay the costs involved with the regulatory amendment. We thus shall conclude the Board erred in finding a right to reimbursement despite this authority to levy fees, and we shall conclude appellants are not collaterally estopped from pressing this point.

The Districts do not dispute they have authority to levy fees for the costs involved in this case. Instead they argue the real issue is whether they had *399 "sufficient" authority. They claim this issue was a mixed question of law and fact, and appellants should be collaterally estopped from raising it. [FN17]

FN17 The Districts assert appellants are relying on evidence that was not before the Board. However, they do not explain what they mean or give us any reference to appellants' brief. We therefore disregard the assertion.

We agree with appellants that the public interest exception to collateral estoppel should be applied here, because the issue presents a pure question of law. The Districts tried to make it a factual issue, but we shall explain why the facts presented by the District were immaterial.

Thus, in proceedings before the Board (where Water Code section 35470 was cited to the Board by state agencies), SMWD did not argue it lacked "authority" to levy fees for this purpose. Instead, SMWD argued and presented evidence that it would not be economically desirable to do so. SMWD submitted declarations stating that rates necessary to cover the increased costs would render the reclaimed water

unmarketable and would encourage users to switch to potable water. SMWD maintained that imposition of higher fees on users would contravene the legislative policy expressed in Water Code section 13512, which directs the state to undertake all possible steps to encourage development of wastewater reclamation facilities.

The Board made no express finding concerning this issue. The record contains only the Board minutes, which reflect a motion was made "To find a mandate and continue the issue regarding the claimant's ability to levy a service charge, to the parameters and guidelines process." There was no second to the motion. A motion was then made to find the regulatory amendment contained a reimbursable mandate. The motion carried. The minutes then state: "Discussion: Chairperson Yost disagreed with the motion as she felt the claimant could recover their costs by levying a service charge" The Board's Parameters and Guidelines stated in part: "If service charges or assessments were levied to defray the cost of the new criteria, the claim must be reduced by the amount received from such charges or assessment."

In proceedings before the trial court, SMWD admitted the district had the authority to levy fees but argued existence of authority was not enough, and the real question was whether it was economically feasible to levy fees sufficient to pay the mandated costs. Thus, SMWD's counsel stated at the hearing in the trial court: "The state keeps focusing on the question of whether the authority to issue, to assess fees and charges exists, and we have never contested that it didn't.

"But the statute which says that the Board cannot find the existence of a mandate if there's authority to assess fees and charges, and then the critical *400 phrase, 'sufficient to pay for the mandated costs,' that's the condition with [*sic*] which they cannot satisfy.

"We proved that, the Board of Control hearing, through economic evidence. We proved it through testimony that the market was absolutely inelastic in terms of reclaimed water and potable water, that if you raise the price of reclaimed water over the potable water, that people would then buy the potable water, and that's all in the record.

"And so we showed that even though we have the authority, it was not sufficient to pay"

We note the record also reflects comments by

SMWD's counsel to the trial court, that its customers were paying the increased costs as an "advance" against the state's obligation. The court pointed out users' payment of increased costs disproved the economic evidence SMWD had presented to the Board, that it could not raise its prices without losing its customers. The record also contains indications that the Districts funded the increased costs by diverting money from other sources. As will appear, we need not address this evidence, because it is not relevant to the question of authority to levy fees sufficient to fund the increased costs imposed by the regulatory amendment, which is a question of law in this case.

The trial court's minute order stated the districts' authority to levy fees did not bar reimbursement for state-mandated costs, because the Board "implicitly determined" the districts did not have "sufficient" authority to levy fees to pay for the increased service mandated by the 1978 regulatory amendment, and this "implicit determination, resolving a mixture of legal and factual issues, became final and binding on [appellants] under the doctrine of collateral estoppel when they failed to seek judicial review of the Board's decision within the three-year limitations period."

On appeal, appellants argue the sole inquiry is whether the local agency has "authority" to levy fees sufficient to pay the costs, and it does not matter whether the local agency, for economic reasons, finds it undesirable to exercise that authority. Appellants argue this presents a question of law, such that the public interest exception to collateral estoppel would apply (assuming the requirements of collateral estoppel are otherwise met).

We agree with appellants. (7) In construing statutes, our primary task is to determine the lawmakers' intent. (*Brown v. Kelly Broadcasting Co.* (1989) 48 Cal.3d 711, 724 [257 Cal.Rptr. 708, 771 P.2d 406].) To determine intent, we look first to the words themselves. (*Ibid.*) "If the language is clear *401 and unambiguous there is no need for construction, nor is it necessary to resort to indicia of the intent of the Legislature" (*Lungren v. Deukmejian* (1988) 45 Cal.3d 727, 735 [248 Cal.Rptr. 115, 755 P.2d 299].)

(6b) Here, the statute is clear and unambiguous. On its face the statute precludes reimbursement where the local agency has "authority" to levy fees sufficient to pay for the mandated program or level of service. The legal meaning of "authority" includes the "Right to exercise powers; ..." (Black's Law Dict.

(6th ed. 1990) p. 133, col. 1.) The lay meaning of "authority" includes "the power or right to give commands [or] take action" (Webster's New World Dict. (3d college ed. 1988) p. 92.) Thus, when we commonly ask whether a police officer has the "authority" to arrest a suspect, we want to know whether the officer has the legal sanction to effect the arrest, not whether the arrest can be effected as a practical matter.

Thus, the plain language of the statute precludes reimbursement where the local agency has the authority, i.e., the right or the power, to levy fees sufficient to cover the costs of the state-mandated program.

The Districts in effect ask us to construe "authority," as used in the statute, as a practical ability in light of surrounding economic circumstances. However, this construction cannot be reconciled with the plain language of the statute and would create a vague standard not capable of reasonable adjudication. Had the Legislature wanted to adopt the position advanced by the Districts, it would have used "reasonable ability" in the statute rather than "authority."

The question is whether the Districts have authority, i.e., the right or power, to levy fees sufficient to cover the costs. The Districts clearly have authority to levy fees sufficient to cover the costs at issue in this case. Water Code section 35470 authorizes the levy of fees to "correspond to the cost and value of the service," and the fees may be used "to defray the ordinary operation or maintenance expenses of the district and for any other lawful district purpose." The Districts do not demonstrate that anything in Water Code section 35470 limits the authority of the Districts to levy fees "sufficient" to cover their costs.

Thus, the economic evidence presented by SMWD to the Board was irrelevant and injected improper factual questions into the inquiry.

On appeal, the Districts briefly argue economic undesirability of levying fees constitutes a lack of authority to levy fees sufficient to cover costs. They claim the evidence before the Board showed SMWD "could not" *402 increase its fees because it was already charging as much for reclaimed as it was for potable water. However, the cited portion of the record does not show SMWD "could not" increase its fees but only that an increase would render reclaimed water unmarketable and encourage users to switch to potable water. The Districts cite no authority supporting their construction of former Revenue and

Taxation Code section 2253.2 (now Gov. Code, § 17556) that *authority* to levy fees sufficient to cover costs turns on economic feasibility. We have seen the plain language of the statute defeats the Districts' position.

(8) Since the issue in this case presented a question of law, we conclude the public interest exception to collateral estoppel applies. (Sacramento II, supra, 50 Cal.3d at p. 64.)

The Districts argue application of the public interest exception in this case raises policy concerns about the finality of administrative decisions on state-mandated costs, because if collateral estoppel does not apply in this case, it will never apply. However, we merely hold, in accordance with Supreme Court pronouncement, that the public interest exception to collateral estoppel applies under the circumstances of this case to this state-mandated cost issue which presents solely a question of law.

The Districts argue any fees levied by the districts "cannot exceed the cost to the local agency to provide such service," because such excessive fees would constitute a special tax. However, the districts fail to explain how this is an issue. No one is suggesting the districts levy fees that exceed their costs.

The Districts cite evidence presented to the referee in the aborted hearing to determine amounts owed to each District, that SMWD's director of finance testified SMWD has other sources of revenue from other services it provides (such as sewer service), maintains separate accounts, and borrowed funds internally from other accounts to cover costs incurred as a result of the subject mandate. The Districts assert this testimony reflects that SMWD "recognized the legal limitations on its authority to impose fees for the services that it provides." However, nothing in this evidence demonstrates any legal limitations on the authority to levy the necessary fees.

The Districts say appellants appear to believe the Districts should require users of other services to subsidize the Districts' cost of reclaiming and selling wastewater, through excessive user fees. However, we do not read appellants' brief as presenting any such argument and in any event do not base our decision on that ground. *403

In a footnote, the Districts make the passing comment: "In light of the adoption of Proposition 218, which added Articles XIII C and XIII D to the California Constitution this past November [1996],

the authority of local agencies to recover costs for many services will be impacted by the requirement to secure the approval by majority vote of the property owners voting, to levy or to increase property related fees. See Section 6, Article XIII D." The Districts do not contend that the services at issue in this appeal are among the "many services" impacted by Proposition 218. We therefore have no need to consider what effect, if any, Proposition 218 might have on the issues in this case.

We conclude the Districts were not entitled to reimbursement of state-mandated costs, because they had authority to levy fees sufficient to pay for the level of service mandated by the 1978 regulatory amendment. Appellants were not collaterally estopped from raising this issue in the trial court. We thus conclude the Districts' mandamus petitions should have been denied. We therefore need not address appellants' contentions that (1) the regulatory amendment did not constitute a new program or higher level of service, or (2) any right to reimbursement was abolished upon repeal of former Revenue and Taxation Code section 2207.

Disposition

Let a peremptory writ of mandate issue, directing the trial court to vacate its judgment and enter a new judgment denying the Districts' petitions for writ of mandate. Appellants shall recover their costs on appeal.

Puglia, P. J., and Nicholson, J., concurred.

The petition of real parties in interest for review by the Supreme Court was denied February 25, 1998.

COMMISSION ON
STATE MANDATES

Re: Test Claim 02-TC-43
Clovis Unified School District
Hazardous Material Assessments

Dear Ms. Higashi:

I have received the opposition and comments of the Department of Toxic Substances Control ("DTSC") dated October 27, 2003, to which I now respond on behalf of the test claimant.

A. The Opposition and Comments of the DTSC are Incompetent and Should be Excluded

Test claimant objects to the Opposition and Comments of the DTSC, in total, as being legally incompetent and move that they be excluded from the record. Title 2, California Code of Regulations, Section 1183.02(d) requires that any:

"...written response, opposition, or recommendations and supporting documentation shall be signed at the end of the document, under penalty of perjury by an authorized representative of the state agency, with the declaration that it is true and complete to the best of the representative's personal knowledge or information and belief."

The DTSC opposition and comments do not comply with this essential requirement.

B. The Legal Analysis of the DTSC is Incorrect

DTSC organizes its opposition and comments into four parts:

1. District participation in the underlying program is elective or optional, and neither a compulsory nor a de facto mandate under *Department of Finance v. Commission on State Mandates* (2003) 30 Cal.4th 727 (herein, "Kern").¹
2. School districts have authority to levy fees to fund their share of costs under Education Code section 17620, among others, thus disqualifying them for reimbursement under Government Code section 17556, subdivision (d), and *Connell v. Superior Court* (1997) 59 Cal.App.4th 382 (herein "Connell").
3. Jointly funded programs such as school funding are outside the coverage of Section 6, article XIII B of the California Constitution, section 6, under *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal.App.4th 1264 (herein "County of Sonoma").
4. Compliance with the funding conditions fails to provide a new program or increased level of service to the public to qualify as a reimbursable state mandate under *County of Sonoma*.

1. District Participation is not Truly Optional and is a De Facto Mandate

DTSC first refers to Education Code Sections 17210.1 and 17213.1, particularly the language that makes these two sections applicable to districts which elect to receive state funds. From the language of these two sections, DTSC argues that all hazard assessment requirements are not compulsory.

Test Claimant notes that this language is only applicable to those two sections², it is not applicable to sections 17072.13, 17210, 17211, 17212, 17212.5, 17213, 17213.2, 17251 or 17315. Therefore, even if the DTSC is correct in this argument, the objection does not apply to these other sections of the test claim legislation.

DTSC, however, is not correct as to these two cited sections, because participation is not truly optional and the test claim legislation creates a de facto mandate.

DTSC argues that the state-funded School Facilities Program conditions in the test

¹ DTSC uses the term "DOF-2003" when it refers to *Department of Finance v. Commission on State Mandates*. Test claimant will use the term "Kern" in this response since that is the term used in other matters before the Commission.

² In fact, the conditional language only applies to subdivision (a) of section 17210.1.

claim are analogous to the state-funded educational programs at issue in "Kern".

(a) School Districts, By Necessity, are Required to use State Funding
And There is no "Practical Alternative" to State Funding

The controlling case law on the subject of non-legal compulsion is still *City of Sacramento v. State of California* (1990) 50 Cal.3rd 51 (hereinafter referred to as *Sacramento II*).

(1) Sacramento II Facts:

The adoption of the Social Security Act of 1935 provided for a Federal Unemployment Tax ("FUTA"). FUTA assesses an annual tax on the gross wages paid by covered private employers nationwide. However, employers in a state with a federally "certified" unemployment insurance program receive a "credit" against the federal tax in an amount determined as 90 percent of contributions made to the state system. A "certified" state program also qualifies for federal administrative funds.

California enacted its unemployment insurance system in 1935 and has sought to maintain federal compliance ever since.

In 1976, Congress enacted Public Law number 94-566 which amended FUTA to require, for the first time, that a "certified" state plan include coverage of public employees. States that did not alter their unemployment compensation laws accordingly faced a loss of both the federal tax credit and the administrative subsidy.

In response, the California Legislature adopted Chapter 2, Statutes of 1978 (hereinafter chapter 2/78), to conform to Public Law 94-566, and required the state and all local governments to participate in the state unemployment insurance system on behalf of their employees.

(2) Sacramento I Litigation

The City of Sacramento and the County of Los Angeles filed claims with the State Board of Control seeking state subvention of the costs imposed on them by chapter 2/78. The State Board denied the claim. On mandamus, the Sacramento Superior Court overruled the Board and found the costs to be reimbursable. In *City of Sacramento v. State of California* (1984) 156 Cal.App.3d 182 (hereinafter *Sacramento I*) the Court of Appeal affirmed concluding, inter alia, that chapter 2/78 imposed state-mandated costs reimbursable under section 6 of article XIII B. It also held, however, that the potential loss of federal funds and tax credits did not render Public Law 94-566

so coercive as to constitute a “mandate of the federal government” under Section 9(b).³

In other words, *Sacramento I* concluded, inter alia, that the loss of federal funds and tax credits did not amount to “compulsion”.

(3) *Sacramento II* Litigation

After remand, the case proceeded through the courts again. In *Sacramento II*, the Supreme Court held that the obligations imposed by chapter 2/78 failed to meet the “program” and “service” standards for mandatory subvention because it imposed no “unique” obligation on local governments, nor did it require them to provide new or increased governmental services to the public. The Court of Appeal decision, finding the expenses reimbursable, was overruled.

However, the court also overruled that portion of *Sacramento I* which held that the loss of federal funds and tax credits did not amount to “compulsion”.

(4) *Sacramento II* “Compulsion” Reasoning

Plaintiffs argued that the test claim legislation required a clear legal compulsion not present in Public Law 94-566. Defendants responded that the consequences of California’s failure to comply with the federal “carrot and stick” scheme were so substantial that the state had no realistic “discretion” to refuse.

In disapproving *Sacramento I*, the court explained:

“If California failed to conform its plan to new federal requirements as they arose, its businesses faced a new and serious penalty - full, double unemployment taxation by both state and federal governments.” (Opinion, at page 74)

Plaintiffs argued that California was not compelled to comply because it could have chosen to terminate its own unemployment insurance system, leaving the state’s employers faced only with the federal tax. The court replied to this suggestion:

³ Section 1 of article XIII B limits annual “appropriations”. Section 9(b) provides that “appropriations subject to limitation” do not include “Appropriations required to comply with mandates of the courts or the federal government which, without discretion, require an expenditure for additional services or which unavoidably make the provision of existing services more costly.”

“However, we cannot imagine the drafters and adopters of article XIII B intended to force the state to such draconian ends. (¶) ...The alternatives were so far beyond the realm of practical reality that they left the state ‘without discretion’ to depart from federal standards.” (Opinion, at page 74, emphasis supplied)

In other words, terminating its own system was not an acceptable option because it was so far beyond the realm of practical reality so as to be a draconian response, leaving the state without discretion. The only reasonable alternative was to comply with the new legislation, since the state was practically “without discretion”.

The Supreme Court in *Sacramento II* concluded by stating that there is no final test for a determination of “mandatory” versus “optional”:

“Given the variety of cooperative federal-state-local programs, we here attempt no final test for ‘mandatory’ versus ‘optional’ compliance with federal law. A determination in each case must depend on such factors as the nature and purpose of the federal program; whether its design suggests an intent to coerce; when state and/or local participation began; the penalties, if any, assessed for withdrawal or refusal to participate or comply; and any other legal and practical consequences of nonparticipation, noncompliance, or withdrawal.” (Opinion, at page 76)

(b) Statutory Compulsion is not Required

In *Department of Finance v. Commission on State Mandates* (supra, at page 736) the supreme court first made it clear that the decision did not hold that legal compulsion was necessary in order to find a reimbursable mandate:

“For the reasons explained below, although we shall analyze the legal compulsion issue, we find it unnecessary in this case to decide whether a finding of legal compulsion is necessary in order to establish a right to reimbursement under article XIII B, section 6, because we conclude that even if there are some circumstances in which a state mandate may be found in the absence of legal compulsion, the circumstances presented in this case do not constitute such a mandate.” (Emphasis in the original, underlining added)

After concluding that the facts in *Kern* did not rise to the standard of non-legal compulsion, the court affirmed that either double taxation or other draconian consequences could result in non-legal compulsion:

“In sum, the circumstances presented *in the case before us* do not constitute the type of non-legal compulsion that reasonably could constitute, in claimants’ phrasing, a ‘de facto’ reimbursable state mandate. Contrary to the situation that we described in (Sacramento II), a claimant that elects to discontinue participation in one of the programs *here at issue* does not face ‘certain and severe...penalties’ such as ‘double...taxation’ or other ‘draconian’ consequences (citation), but simply must adjust to the withdrawal of grant money along with the lifting of program obligations.” (Opinion, at page 754, emphasis supplied to illustrate holding is limited to facts presented)

Therefore, “carrot and stick” situations must still be determined on a case by case basis.

(c) Districts’ Ability to Borrow is Strictly Limited

The authority to issue local school bonds is found in Chapter 1 of Part 10 in Division 1 of Title 1 of the Education Code, commencing at Section 15100. This authority is strictly limited.

Education Code Section 15100 allows a district, when in its judgment it is advisable, and requires it, upon a petition of the majority of its qualified electors, to order an election and submit to the electors of the district the question whether the bonds of the district shall be issued and sold for the purpose of raising money for the purchase of school lots, the building or purchasing of school buildings and the making of alterations or additions to school buildings. Section 15102 provides that such bonded indebtedness shall not exceed 1.25 percent of the taxable property of the district. Section 15106 provides that unified school districts or community college districts may not exceed 2.5 percent of the taxable property of the district.

Chapter 1.5 of Part 10 sets forth the Strict Accountability in Local School Construction Bonds Act of 2000, commencing with Section 15264. (“Proposition 39 bonds”) Here again, bonded indebtedness is strictly limited.

Section 15266 provides that the Act is an alternative to authorizing and issuing bonds pursuant to Chapter 1 or Chapter 2 (commencing with Section 15300) when the governing board of a school district or community college district decides, pursuant to a two-thirds vote, to pursue the authorization and issuance of bonds for school facilities. Section 15268 provides that such bonded indebtedness shall not exceed 1.25 percent of the taxable property of the district and may only be issued if the tax rate levied would not exceed thirty dollars (\$30) per year per one hundred thousand dollars (\$100,000) of taxable property when assessed valuation is projected by the district to increase in

accordance with Article XIII A of the California Constitution. Section 15270 provides that a unified school district may not authorize or issue bonds that exceed 2.5 percent of the taxable property of the district and may only be issued if the tax rate levied to meet the requirements of Section 18 of Article XVI of the California Constitution in the case of indebtedness incurred pursuant to this chapter at a single election, by a unified school district, would not exceed sixty dollars (\$60) per year per one hundred thousand dollars (\$100,000) of taxable property when assessed valuation is projected by the district to increase in accordance with Article XIII A of the California Constitution.

Chapter 2 of Part 10 sets forth the Bonds of School Facilities Improvement Districts Act, commencing with Education Code Section 15300. Here again, bonded indebtedness is strictly limited.

Section 15300 provides that the chapter provides a method for the formation of school facilities improvement districts consisting of a portion of the territory within a school district or community college district and for the issuance of general obligation bonds by the school facilities improvement district. Section 15330 provides that the total amount of bonds issued shall not exceed 1.25 percent of the taxable property of the school facilities improvement district. Section 15334.5 further provides that no bonded indebtedness may be incurred pursuant to this chapter in an amount that would cause the bonded indebtedness of the territory of the school district or community college district of which the school facilities improvement district is a part, to exceed the limitation of indebtedness specified in Sections 15102 and 15106.

DTSC has attached an article by the California Research Bureau to its opposition and comments as Exhibit C. (Cohen, Joel, "School Facility Financing - A History of the Role of the State Allocation Board and Options for the Distribution of Proposition 1A Funds", February 1999) The plight of school districts is described therein as follows:

"With the passage of Proposition 13 in 1978, the State Allocation Board's loan orientation was significantly altered. Under Proposition 13, the amount of tax that property owners paid was limited to no more than one percent of the assessed value of their property. Local property tax revenues diminished, and the burden to fund many local government programs was shifted to the State, including public school construction. Further, local governments lost much of their property taxing authority..."
(Ibid, at page 7)

To the extent school districts and community college districts already have bonded indebtedness at or near these limits, the argument of DTSC that these districts need not apply for this new state funding is specious reasoning.

(d) The Legislative History of School Finance Legislation Shows an Intent of the Legislature that the State Should Provide the Financing For Schools

A review of the legislative history of school finance shows that the Legislature knows that the State must bear the major burden of financing the construction of new school facilities.

Chapter 4 of Part 10 of Division 1 of Title 1 of the Education Code sets forth the State School Building Aid Law of 1949, commencing with Education Code Section 15700. Section 15700 provides:

“The Legislature hereby declares that it is in the interest of the state and of the people thereof for the state to aid school districts of the state in providing necessary and adequate school sites and buildings for the pupils of the public school system, the system being a matter of general concern inasmuch as the education of the children of the state is an obligation and function of the state.”

In adopting this act, the Legislature considers that the great need in school construction is for adequate classrooms for the education of the pupils of the public school system...To the end that school classrooms may be made available at once and to all school districts in need of such classrooms...” (emphasis supplied)

Section 15704 requires the State Allocation Board to adopt rules which give:

“...priority in allocating funds to districts to those districts where the children will benefit most from additional schoolhouse facilities...based on acuteness of overcrowding, on sudden growth in attendance, on amount of local tax funds expended for housing of a character within the purposes of this chapter, and on the time the district's application has been ready for allotment...”

Chapter 6 contains the State School Building Aid Law of 1952, commencing with Education Code Section 16000. Section 16001 provides:

“The Legislature hereby declares that it is in the interest of the state and of the people thereof for the state to aid school districts of the state in providing necessary schoolsites and buildings for the pupils of the public school system, this system being a matter of general concern inasmuch as the education of the children of the state is an obligation and function of the state.”

In adopting this chapter, the Legislature considers that the great need in school construction is for classrooms for the education of the pupils of the public school system...To the end that school classrooms

may be made available at once and to all school districts in need of such classrooms..." (emphasis supplied)

Section 16007 requires the State Allocation Board to adopt rules which would:

"...give priority in allocating funds to districts to those districts where the children will benefit most from additional schoolhouse facilities...based on acuteness of overcrowding, on rapidity of growth in attendance, and on the time the district's application has been ready for allotment..."

Article 3 of Chapter 6, contains provisions for School Housing Aid for Exceptional Children, commencing with Education Code Section 16190. Section 16190 provides:

"The board may make apportionments...from any state bonds heretofore or hereafter authorized by the electorate for state school building aid...for assistance to school districts in providing necessary housing and equipment for the education of exceptional children."⁴

Section 16196 provides that:

"...Except as otherwise provided in this section, not more than 50 percent of the amount of any apportionment made pursuant to this section shall be repaid..."

Article 4 of Chapter 6, commencing with Section 16210, is entitled School Housing Aid For Compensatory Education Purposes. Section 16210 sets aside \$35 million dollars of the proceeds of the sale of bonds authorized by the State School Building Aid Bond Law of 1966 to assist school districts. Section 16210 provides:

"...The Director of Compensatory Education may establish priorities for purposes of allocations and grants under this article based upon comparative needs of school districts and the urgency thereof. No interest shall be charged to a school district for an allocation or grant made under this article to the school district."

⁴ Education Code Section 16191 defines "exceptional children" to mean "physically handicapped pupils, mentally retarded pupils, educationally handicapped pupils, multihandicapped pupils, or pupils enrolled in development centers for the handicapped required or allowed to be educated pursuant to Part 30 (commencing with Section 56000)."

Section 16211 provides that grants may be made to:

"...districts...maintaining schools for kindergarten, or any of grades 1 to 6, inclusive...which have reduced the number of pupils to full-time equivalent classroom teachers in kindergarten and any of grades 1 to 6, inclusive, in those schools to a ratio of 25 to 1, or better. The grants shall be made for...¶)...any of the following:

- (a) Acquisition, by purchase or lease, and the installation and equipping of portable classrooms for classroom instructional purposes.
- (b) Acquisition of land for schoolsites.
- (c) Construction and equipping of permanent school buildings and facilities.
- (d) Reconstruction, renovation or remodeling of existing school buildings and facilities.
- (e) Any combination of the above."

Section 16212 allows:

"In lieu of grants to districts pursuant to subdivision (a) of Section 16211...the board may expend moneys available for grants under this article for the acquisition of portable buildings and facilities and equipment by the state, and thereafter convey the same to the eligible districts...(in) the form of sale, lease, outright grant, or other suitable form of conveyance, as determined by the board."

Section 16214 provides:

"For each school district which receives a grant or allocation pursuant to this article...the Controller shall compute an amount equal to one cent (\$0.01) on each one hundred dollars (\$100) of the assessed valuation of property within the district...(¶)...The Controller shall make the computations and deductions required by this section for 30 fiscal years or until the time as the total of the amounts so deducted equal 50 percent of the amount of the grant or allocation which was made to the school district, whichever first occurs...(¶)...the maximum rate of school district tax for the school district for which the computation is made shall be increased by one cent (\$0.01) per each one hundred dollars (\$100) of the assessed value of property within the district..."

Article 5 of Chapter 6, commencing with Education Code Section 16230, sets forth the provisions for School Housing Aid For Districts Impacted by Seasonal Agricultural Employment. Section 16230 sets aside \$1,500,000 of the proceeds of bonds issued

under the State School Building Aid Bond Law of 1966:

“...for the acquisition of...¶... portable school and classroom buildings (and) may be made available by the board, upon the recommendation of the Director of Compensatory Education, to any school district which, because of the influx for temporary periods in the school year of large numbers of persons employed in seasonal agricultural work, experiences emergency increases in school enrollments of such magnitude as to make it impossible or impractical to accommodate the additional pupils in existing school buildings and facilities available to the district.”

Section 16231 provides:

“...The use of the portable school and classroom buildings may be made available to a school district by letting the same to the district free of charge, or by lease, or by conveying the same to the district under lease-purchase agreement, sale, or outright grant, as determined by the State Allocation Board upon consultation with, and the advice of, the Director of Compensatory Education...”

Article 7 of Chapter 6, commencing with Education Code Section 16260, provides for the Children’s Center Construction Law of 1968.

Section 16261 states:

“The Legislature hereby declares that it is in the interest of the state and of the people thereof for the state to provide assistance to school districts and to county superintendents of schools for the construction of children’s center facilities. Children’s centers are of general concern and interest to all the people of the state, and the education and care of children of working parents are a joint obligation of both the state and local agencies operating children’s centers...” (emphasis supplied)

Section 16263 requires:

“...The board shall adopt any rules and regulations... (which) shall establish a system of priorities... (and) give special consideration to school districts...containing substantial numbers of families who are recipients of aid to families with dependent children or who are former or potential recipients of the aid...”

Section 16272 provides for matching funds:

“For each one dollar (\$1) of money allocated to a local agency which is expended for a project, the local agency shall expend local funds for the project in an amount which bears the same percentage to the one dollar (\$1) as the modified assessed valuation per unit of the average daily attendance of the local agency bears to the statewide modified assessed valuation per average daily attendance of all local agencies...”

Article 9 of Chapter 6, commencing with Education Code Section 16310, is entitled School Housing Aid For Rehabilitation and Replacement of Structurally Inadequate School Facilities. Section 16312 states:

“The Legislature hereby declares that it is in the interest of the state and the people thereof to provide assistance to school districts in rehabilitating or replacing structurally unsafe school facilities inasmuch as the education of children is an obligation of the state, and the obligation carries with it a corresponding responsibility for the physical safety of children while attending school.” (emphasis supplied)

Section 16313 states:

“It is the intent of the Legislature in enacting this article to provide a means through repayable state loans for school districts...to house their pupils in facilities that are structurally safe.”

Section 16317 requires the State Allocation Board to adopt rules which:

“...shall give priority in allocating funds to districts which will benefit most from the reconstruction or replacement of schoolhouse facilities...based on the age and structural safety of existing buildings at the school or schools where the construction or reconstruction will occur, acuteness of overcrowding and density of population in the attendance areas affected, or any other factors that will insure that the greatest need will be served in allocating funds under this article.”

Chapter 8 of Part 10 contains the Urban School Construction Aid Law of 1968, commencing with Education Code Section 16700. Section 16701 provides:

“The Legislature hereby declares that it is in the interest of the state and of the people thereof for the state to aid urban school districts of the state in reconstructing, modernizing, or replacing schoolsites and buildings for pupils of the public school system who are now housed in substandard schools...”

Section 16705 requires the State Allocation Board to adopt rules which:

“...shall give priority in allocating funds to urban districts to those districts where the children will benefit most from schoolhouse facilities...based upon the age of existing buildings and the acuteness of overcrowding at the school or schools where the construction or reconstruction will occur, the density of population in the attendance areas affected, or any other factors that will insure that the greatest need will be served.”

Section 16720 provides for repayment:

“Each district to which an apportionment or apportionments has been made under this chapter shall repay a portion or all of the principal amount of such apportionment or apportionments and the accrued interest thereon in 30 equal annual payments, as shall be determined by the Controller pursuant to this section... (§) ...In any year, beginning with the 1981-82 fiscal year, in which the annual repayment exceeds the amount which may be raised by a levy of 0.0075 percent of the full value in the district,...the Controller shall grant a deferment of the annual repayment which is in excess of the amount that would be produced by a tax of 0.0075 percent of the full value of the district...”

Chapter 12 of Part 10 establishes the "Leroy F. Greene State School Building Lease-Purchase Law of 1976", commencing with Section 17000. Section 17001 states:

“(a) The Legislature hereby declares that it is in the interest of the state and the people thereof for the state to reconstruct, remodel, or replace existing school buildings that are educationally inadequate or that do not meet present-day structural safety requirements, and to acquire new schoolsites and buildings for the purpose of making them available to local school districts for the pupils of the public school system, that system being a matter of general concern inasmuch as the education of the children of the state is an obligation and function of the state.” (Emphasis supplied)

Article 11 of the Leroy F. Greene School Facilities Act of 1998, commencing with Education Code Section 17078.10, provides for:

“ (c) ..."preliminary apportionment"... for eligible applicants with critically overcrowded schools in advance of full compliance with all of the application requirements otherwise required for an apportionment pursuant to this chapter...”

Chapter 14 of Part 10, commencing with Education Code Section 17085 is entitled the "Emergency School Classroom Law of 1979" and is cited as the State Relocatable Classroom Law of 1979. Section 17086 states:

"...the Legislature recognizes that the ad valorem tax is no longer available as a source of revenue for the construction of necessary school facilities. The Legislature considers that the greatest need in school construction is for classrooms for the education of public school pupils. It is the intent of the Legislature to satisfy this primary need to the greatest extent possible before providing any additional educational facilities, regardless of how desirable such additional facilities may be." (Emphasis supplied)

Chapter 15 of Part 10, commencing with Section 17100, established the School District Revenue Bond Act. This Act is based on the finding of the legislature that:

"The Legislature hereby finds and declares that the State School Building Lease-Purchase Fund, pursuant to Section 17008, and the proceeds from the sale or lease of surplus school property are the two sources available to school districts to finance the construction of school facilities to relieve overcrowding. However, these sources are still insufficient to meet the construction needs statewide of school districts." (emphasis supplied)

In the article attached to its opposition and comments as Exhibit C, (Cohen, Joel, "School Facility Financing - A History of the Role of the State Allocation Board and Options for the Distribution of Proposition 1A Funds", February 1999) the author writes:

"As California enters the 21st Century, its public schools face many challenges. One significant challenge is the serious disrepair of an aging school facility infrastructure. Another challenge is the anticipated growth of nearly 2 million K-12 students during the next decade that will require many districts to build new schools to meet burgeoning student demand." (Ibid, at page 1)

The article goes on to say:

"Proposition 1A⁵ forges a partnership between the State and school

⁵ Proposition 1A was a \$9.2 billion school bond initiative passed by the California voters on November 3, 1998 and, at the time, was the largest of its kind passed in our nation's history. (Ibid, at page 3) It prompted Senator Quentin Kopp to request the

districts for financing the construction and repair of their schools.” (Ibid, at page 2)

The test claim alleges costs required in order to join this partnership. This comprehensive history of the financing of school facilities in California further proves Test Claimant’s position: i.e., school districts are unable to finance needed school construction and modernization projects by themselves.

In summary, the last 60 years of legislative history shows repeated and consistent recognition that school districts are unable to meet the school construction needs of their pupils. The history repeatedly reveals an admission that the education of school children is the primary responsibility of the state. The history of the inability of school districts and the obligation of the state to educate children results in the above recited litany of state money for school construction at low or no interest rates, repayment requirements of less than the amounts apportioned, and repayment terms unavailable anywhere else. Education of children is an obligation and function of the state. Classrooms are required to provide that education. Therefore, building classrooms is primarily a state obligation.

Given the fact that most schools are unable to create their own financing, and the fact that the legislature recognizes this inability, for DTSC to suggest that schools do not need to participate in state financing programs is so far beyond the realm of practical reality that the draconian results of “electing” no new or modernized schools at all is not an acceptable alternative.

2. **Districts do not have Authority to Levy Fees, Assessments and Taxes to Fully Fund the Costs of New Construction or Modernization**

(a) **Government Code Section 17556(d) Does Not Apply to Construction Funding**

DTSC offers Government Code Section 17556, subdivision (d)⁶ for the proposition that

California Research Bureau to provide research on the included topics.

⁶ In its main caption, DTSC refers to Government Code Section 17516(d), which does not exist. Its argument refers to Government Code Section 17556(d). Based on the context of the argument, Test Claimant believes DTSC intended the caption to refer to section 17556(d). Government Code Section 17556, subdivision (d), precludes a finding of mandated costs if the school district has the authority to levy service charges, fees or assessments sufficient to pay for the mandated program or increased level of service.

districts are precluded from recovery since districts have the authority to levy fees, assessments and taxes under Education Code section 17620. Developer fees are not service charges, fees or assessments to the consumer of public services. Government Code section 17556(d) refers to "service charges, fees or assessments". Education Code section 17620 refers to a "fee, charge, dedication or other requirement". They are not the same.

In addition, Section 17556 presupposes the existence of a mandate which is contrary to DTSC's position. Also, subdivision (d) refers to the levy of service charges, fees and assessments against students. The levy of service charges, fees and assessments against students for any aspect of public education would be constitutionally prohibited by Article 9, Section 5, of the California constitution which requires the state to provide free schools.

In addition, the California Department of Education has issued Fiscal Management Advisory 97-02⁷ which makes it quite clear that tuition, fees, deposits and other charges may only be made when specifically authorized by law. The examples set forth in the advisory clearly demonstrate that the tuition, fees, deposits and other charges referred to in Government Code Section 17556, subdivision (d), clearly do not encompass sources for the construction of school facilities.

Test Claimant directs the attention of the Commission to the fact that there is another test claim pending on developer fees. (CM 02-TC-42) That test claim notes the various restrictions and limitations on the use of developer fees to finance public school construction. For example (and not by way of limitation), Education Code Section 17620(a)(1) limits any fee, charge, dedication, or other requirement to only certain development projects. Likewise, Government Code Section 65995 limits the amount that can be levied (e.g. \$1.93 per square foot for residential construction and \$0.31 per square foot for commercial or industrial construction). In fact, there is no guaranty that any development projects will be undertaken which may be subject to developer fees.

It is the regulations, limitations and fee restrictions of developer fees that distinguishes this case from that which faced the court in *Connell v. Superior Court* (1997) 59 Cal.App.4th 382, relied upon by DTSC. In *Connell*, the amount or availability of the fees⁸ were not restricted, the water district could charge fees in any amount it chose to

⁷ A copy of Fiscal Management Advisory 97-02 and its cover letter dated October 30, 1997 is attached hereto as Exhibit "A" and is incorporated herein by reference.

⁸ Note: In *Connell*, the court limited its opinion to the authority to levy "fees" and did not discuss "service charges, fees or assessments", the language of the statute.

levy. Here, school districts are limited as to what properties are subject to fees, they are limited as to the amount of the fees they can charge, and they may not charge any fees whatsoever if no developer projects are undertaken. The reason Government Code Section 17556(d) does not bar a finding of costs here is that DTSC has made no legal or factual showing that the authorized service charges, fees, or assessments are "sufficient to pay for" the mandated program or increased cost of service."

DTSC adds to this section its argument that districts have the legislative authority to form community facilities districts (Government Code Sections 53311 et seq.) and to generate funds through local bond issues. These arguments have been addressed in Part 1, *supra*.

(b) Economic Hardship Provisions do not Prevent a Finding of a State Mandate

DTSC next argues that the state School Facilities Program routinely funds half of the hazard assessment requirements, and may fund them wholly in cases of economic hardship. (Education Code Sections 17072.12, 17072.13 and 17072.18) Test Claimant's response is simple, those districts who receive total funding for assessment and administrative costs will not file a claim; those who do not receive total funding, will.

3. County of Sonoma v. Commission on State Mandates Does Not Apply

DTSC cites *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal.App.4th 1264 for its sweeping conclusion that "Jointly funded programs such as school funding are outside the coverage of Section 6, article XIII B of the California Constitution." This sweeping conclusion demonstrates DTSC's incorrect analysis of this case.

In *County of Sonoma*, the challenged legislation reduced the amount of property tax revenue to be allocated to local government pursuant to a specified formula and allocated an equal amount of revenue to the Educational Revenue Augmentation Fund (ERAF) for distribution to county school districts. The legislation had the effect of decreasing the amount of the state's contribution to the constitutionally mandated minimum funding level for education in the same amount as the increased allocation to the county ERAFs. Plaintiff Counties argued that the challenged reallocation of property tax revenues was a state-mandated new program, entitling the affected local governments to reimbursement for costs incurred.

At page 1281, the court noted that "the Legislature, not this court, decides which of the

(*Id.*, at page 398, fn. 15)

innumerable public mouths tax revenues will feed. Barring a statutory or constitutional violation, it is not for this court to stop the Legislature if it transfers revenue from Peter to compensate Paul....(citation) Under these principles, there is no basis for applying section 6 as an equitable remedy to cure the perceived unfairness resulting from political decisions on funding priorities. (citation).”

Taking note that the required education of children had always been a jointly funded effort of the state and local government, the court held that shifting the percentage of funding as between the state and local government did not create a mandated program on the local government. The court, adroitly noted:

“In this case, the County’s tax revenues were not expended. No invoices were sent, no costs were collected, and no charges were made against the counties in this case. Contrary to the conclusion of the trial court, it is the expenditure of tax revenues of local governments that is the appropriate focus of section 6 (citation) [stating that §6 was ‘designed to protect the tax revenues of local governments from state mandates that would require expenditure of such revenues’].”

“An examination of the intent of the voters and the language of Proposition 4 itself supports our conclusion that Proposition 4 was aimed at controlling and capping government spending, not curbing changes in revenue allocations. Section 6 is an obvious compliment to the goal of Proposition 4 in that it prevents the state from forcing extra programs on local governments in a manner that negates their careful budgeting of expenditures. A forced program that would negate such planning is one that results in increased actual expenditures of limited tax proceeds that are counted against the local government’s spending limit. Section 6, located within a measure aimed at limiting expenditures, is expressly concerned with ‘costs’ incurred by local government as a result of state-mandated programs, particularly when the costs of compliance with a new program restrict local spending in other areas. (§6.) ‘No state duty of subvention is triggered where the local agency is not required to expend its proceeds of taxes’. (Citation).” (Opinion, at page 1283-1284)

The *County of Sonoma* court also noted that “Government Code section 17514 defines ‘costs mandated by the state’ for purposes of section 6 as ‘any increased costs which a local agency or school district is *required to incur*...as a result of any statute...which mandates a new program or higher level of service of an existing program...Government Code section 17522 defines ‘annual reimbursement claim’ to mean ‘a claim for *actual costs incurred*...’ (Italics added) Similarly, Government Code section 17558.5 refers to a claim for ‘*actual costs* filed by a local agency...’ (Italics

added.) The obvious view of the Legislature is that reimbursement is intended to replace actual costs incurred, not as compensation for revenue that was never received..." (Opinion at page 1284-1285) Therefore, the court concluded:

"...we cannot extend the provisions of section 6 to include concepts such as lost revenue, that are not fairly implicated by the history, voter materials, language and legislative interpretation of section 6. We can only conclude that when the Constitution uses 'costs' in the context of subvention of funds to reimburse for 'the costs of such program,' that some actual cost must be demonstrated, and not merely decreases in revenue." (Opinion, at page 1285)

In *County of Sonoma*, the court did discuss the shared role of state and local governments in its historical history of the funding of schools in California. But it did not hold that jointly funded programs such as school funding are always outside the coverage of Section 6 as claimed by DTSC. The holding in *County of Sonoma* merely addressed a "robbing Peter to pay Paul" situation. Funds for education were taken away in the form of a reduction in property tax revenue and given back immediately in the form of ERAFs. The counties did not prevail because they did not, and could not, allege any "costs".

Test Claimant already alleges that state funding is available for the hazard assessments and corrections. Test Claimant seeks to recover the "costs" of the administrative duties thrust upon them in order to obtain that funding. *County of Sonoma* clearly does not stand for the proposition offered by DTSC. *County of Sonoma* dealt with a revenue allocation issue, not a cost issue, so it cannot be relevant to this test claim.

4. The Test Claim Legislation Mandates a New Program or an Increased level of Service

As it's final argument, DTSC suggests that compliance with the funding conditions fails to provide a new program or increased level of service to the public to qualify as a reimbursable state mandate.

The answer to the question of whether test claim legislation mandates a "program" subject to article XIII B, section 6 of the California Constitution is found in County of Los Angeles v. State of California (1987) 43 Cal.3d 46:

"Looking at the language of section 6 then, it seems clear that by itself the term "higher level of service" is meaningless. It must be read in conjunction with the predecessor phrase "new program" to give it

meaning...What programs then did the electorate have in mind when section 6 was adopted? We conclude that the drafters and the electorate had in mind the commonly understood meanings of the term—programs that carry out the governmental function of providing services to the public, or laws which, to implement a state policy, impose unique requirements on local governments and do not apply generally to all residents and entities in the state.” (Opinion, at page 56, emphasis supplied)

Therefore, the answer to the question of whether duties imposed by test claim legislation are subject to reimbursement by article XIII B, section 6, is found in the determination of whether the test claim legislation mandates either the governmental function of providing a service to the public, or imposes unique requirements on local governments that do not apply generally to all residents and entities in the state. Only one of these findings is necessary to conclude that the test claim legislation is a “program” as used in article XIII B, section. 6. *Carmel Valley Fire Protection District* (1987) 190 Cal.App.3d 521, 537 And, public schools are an Article XIII B, Section 6 “program”. *Long Beach Unified School District v. State of California* (1990) 225 Cal.App.3d 155, 172.

Here, the test claim legislation requires school districts to make hazardous material assessments and correct any hazards found before acquiring or utilizing that site for school construction. There is nothing in the law which requires all residents and entities in the state to build schools or make these assessments and corrections before acquiring real property.

Arguing that the test claim legislation does not require any new activities, DTSC states that former Education Code Section 15002.1⁹:

“...required the governing board of a school district to have a building site investigated by competent personnel, prior to acquisition, to ensure that the final site selection was determined by an evaluation of all factors affecting the public interest and not limited to selection on the basis of raw land cost only.” (DTSC Opposition and Comments, at page 7)

The test claim legislation requires districts to check for possible hazardous conditions; inquire into possible geological, soil, and environmental hazards; conduct Phase I assessments; pay oversight review fees; conduct preliminary endangerment assessments; perform appropriate responses to render a site usable; and the inclusion

⁹ See: Test Claim, at pages 2-3

of public comment and participation. It is quite clear that there are new mandated activities now required not previously required by former Education Code Section 15002.1.

DTSC admits, at page 7 of its opposition and comments that "[T]he state did not fund these site acquisition and investigation costs, including the hazard assessments, before 1975" and [T]he District correctly asserts that the environmental hazard assessment requirements for school site evaluation at issue here were enacted after January 1, 1975." It attempts to overcome this glaring admission however by arguing that the test claim does not reference the general school safety duties from statutory or case law. Legislation that transforms "General" safety duties" into specific duties requires new duties or higher levels of service. Even if school districts were performing hazardous materials assessments in the past, the new mandate that now requires these assessments causes them to be reimbursable. "If a local agency or school district, at its option, has been incurring costs which are subsequently mandated by the state, the state shall reimburse the local agency or school district for those costs incurred after the operative date of the mandate." Government Code Section 17565

FISCAL MANAGEMENT ADVISORY 97-02

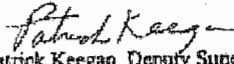

DELAINE EASTIN
State Superintendent of Public Instruction

FISCAL MANAGEMENT ADVISORY 97-02

October 30, 1997

TO: County and District Superintendents

FROM: 
Patrick Keegan, Deputy Superintendent
Finance, Technology, and Information Services

SUBJECT: Fees, Deposits, and Other Charges

School district administrators frequently ask the Department to provide additional guidance on the matter of fees. This Advisory which supersedes Fiscal Management Advisory 87-03 is provided for that purpose, and reflects the most recent legislation and California Supreme Court interpretations. The following narrative contains a number of conclusions based on legal references. Most of these references are to a particular case or opinion. Those conclusions without attribution represent the opinions of the Department's Legal Office.

TUITION, FEES, DEPOSITS, AND OTHER CHARGES IN CALIFORNIA
PUBLIC SCHOOLS, K-12 AND ADULT SCHOOLS

I. A Free Public School System

"A pupil enrolled in a school shall not be required to pay any fee, deposit, or other charge not specifically authorized by law."¹

With this language the State Board of Education made clear that fees are not to be imposed except where specifically authorized by law. This administrative regulation, or "law" of the State Board was promulgated based on the authority of Article IX, Section 5 of the California Constitution. Article IX, Section 5 provides for a free school system:

"The Legislature shall provide for a system of common schools by which a free school shall be kept up and supported in each district at least six months in every year, after the first year in which a school has been established."

The State Supreme Court in 1874 held that this provision entitled students to be educated at public expense.²

The Attorney General has, in several opinions,³ consistently ruled that school districts do not have authority to levy fees for any elective or compulsory class. Further, districts may not require security deposits for locks, lockers, books, class apparatus, musical instruments, uniforms, or other equipment.

The administrative regulation noted above prohibited fees except those "...specifically authorized by law." Certain fees have been authorized by law since the rule was promulgated.

The 1984 California Supreme Court decision, *Hartzell v. Connell*,⁴ raises serious questions about the imposition of a non-statutory fee for extracurricular activities. The lead opinion acknowledges that fees may be charged for "recreational" activities but not for "educational" activities. Extracurricular activities are described in the opinion as an integral component of public education; they are a part of the educational program according to this decision.

The court held that the "...imposition of fees for educational activities offered by public high school districts violates the free school guarantee. The constitutional defect in such fees can neither be corrected by providing waivers to indigent students nor justified by pleading financial hardship."

¹Title 5 California Code of Regulations, Section 350

²*Wade v. Flood*, 48 Cal. 36, 51 (1874)

³Ops. Cal. Atty. Gen. No. NS-4114, 1942

⁴35 Cal. 3d 899 (1984)

II. Fees Authorized by Law

The Education Code specifically authorizes certain fees. Except for home to school transportation fees discussed later, none of those Code sections have been challenged and the Hartzell v. Connell decision did not directly rule on their legality. Therefore, districts may continue to levy fees as authorized in the following Education Code sections:

- A. Fees that a district may collect for furnishing materials to a pupil for items the pupil has fabricated from such materials for his or her own use. Such fees may not exceed cost. (Education Code section 39526)
- B. Fees that a district may charge pupils for transportation to and from school under limited circumstances. (Education Code sections 38028, 39807.5 and 39837)
- C. Charges for food served to pupils. (Education Code sections 39870-39874, 39876)
- D. Charges to the parent or guardian of any pupil who loses a book, defaces books or other school property. Liability limits for lost items or damage are adjusted annually by the State Superintendent of Public Instruction pursuant to statute. (Education Code section 48904)
- E. Charges for field trips or excursions, principally for transportation. The authority to charge a fee for field trips or excursions is not directly stated in the Education Code. Rather, it provides that "No pupil shall be prevented from making the field trip or excursion because of lack of sufficient funds." (Education Code section 35330)
- F. Districts must make medical, hospital, or accident insurance available to pupils who may be injured while participating in field trips. The cost of the insurance may be paid by the pupil or his parents. (Education Code section 35331)
- G. Governing boards may expend from the general fund of the district any money which is budgeted for community services to establish and maintain community service classes. They may charge student fees not to exceed the cost of maintaining such classes. (Education Code section 51815)
- H. A governing board may charge a tuition fee to adults for any class except classes in English and citizenship for foreigners, classes in elementary subjects, and classes for which high school credit is granted when taken by a person not holding a high school diploma. (Education Code section 52612)

- I. Districts must provide, and each member of an athletic team must have, accidental death, injury and medical insurance coverage. The cost of such insurance may be paid by the pupil unless the pupil is unable to pay for such insurance. (Education Code sections 32220-32224)
- J. A school district may require a deposit from a borrower of school band instruments, music, uniforms, and other regalia for use on an excursion to a foreign country. (Education Code section 40015)
- K. Pupils whose parents are actual and legal residents of an adjacent foreign country or an adjacent state shall be charged a tuition fee. (Education Code sections 48050 and 48052)
- L. The regulations of the governing board may provide for the sale of materials purchased from the incidental expense account to pupils in classes for adults, for use in connection with such classes. The proceeds of all such sales shall be deposited in that account (Education Code section 52615). A high school district board may charge for textbooks used in classes for adults or impose a refundable deposit on loaned books. (Education Code section 60410)
- M. The governing board of a school district may sell class material to persons enrolled in classes for adults. This may include materials necessary for the making of articles by students enrolled in adult education. The materials shall be sold at not less than the cost to the district; any article made shall be the property of the person who made it. (Education Code section 39527)
- N. The governing board of any elementary, high, or unified school district may charge a fee for school camp programs, provided that payment of such fee is not mandatory. No pupil shall be denied the opportunity to participate in a school camp program because of non-payment of the fee. (Education Code section 35335)
- O. Families utilizing child care and development services shall be charged a fee by the school district, but no fees shall be assessed against families whose children are enrolled in the state preschool program, or for such services provided to severely handicapped children (Education Code sections 8263(e)(f) and 8250(d)). Standards for fees appear in Education Code section 8265. The school district may also impose a fee for a program of supervision of children before and after school. (Education Code section 8487 and 8488)
- P. School districts may offer a fingerprint program for children in kindergarten or newly enrolled children and shall assess a fee to the parent or guardian who chooses to participate. (Education Code section 32390)

III. District Obligation to Provide Without Charge.

The opinions of the Attorney General mentioned earlier indicate that charges may not be levied for the following:

- A. A deposit in the nature of a guarantee that the district would be reimbursed for loss to the district on account of breakage, damage to, or loss of school property.
- B. An admission charge to an exhibit, fair, theater or similar activity for instruction or extracurricular purposes when a visit to such places is part of the district's educational program.
- C. A tuition fee or charge as a condition to enrollment in any class or course of instruction, including a fee for attendance in a summer or vacation school, a registration fee, a fee for a catalog of courses, a fee for an examination in a subject, a late registration or program change fee, a fee for the issuance of a diploma or certificate, or a charge for lodging.
- D. Membership fees in a student body or any student organization as a condition for enrollment or participation in athletic or other curricular or extracurricular activities sponsored by the school.
- E. Education Code section 48053 prohibits charging an apprentice, or his or her parents or guardian, for admission or attendance in any class.
- F. Textbooks and workbooks must be furnished without charge by elementary and high school districts except for classes for adults. A charge may not be made for their use (Education Code sections 60070 and 60410).

Education Code section 40011 provides:

"Writing and drawing paper, pens, inks, blackboard erasers, crayons, lead pencils, and other necessary supplies for the use of the schools, shall be furnished under direction of the governing board of the school district."

The Attorney General has issued an opinion interpreting this language. He was asked specifically whether a student could be required to furnish any or all of the following:

- A. Art material for art classes and mechanical drawing sets
- B. Cloth to be used in dressmaking classes and wood for carpentry classes
- C. Gym suits and shoes for physical education classes

- D. Bluebooks in which to write a final examination
- E. Paper on which to write a theme or report when such theme or report is a required assignment.

The Attorney General concluded that all the above-mentioned materials were "necessary supplies" and as such had to be furnished by the school district. He reasoned that the articles listed in A, B, C, and D, "appear to be supplies that must be available to students in order to participate in regular classroom work in the particular subjects involved." As to E, the Attorney General stated that "paper to be used on which to write a theme or report must also be furnished when required as a part of the classroom activity."⁵

The Attorney General limited his discussion to the questions specifically asked and did not state what materials a district is not obligated to furnish. However:

"[s]upplies,...must be furnished free of cost to students when the supplies are what might be termed 'school supplies' and are necessary in order for the students to pursue a course of study."

The Attorney General's use of the term "school supplies" is meant to exclude from the district's obligation those items or materials which, although necessary for class participation, are essential regardless of whether or not a person is a student. For example, a school district would not be obligated to furnish corrective lenses, clothes, and so forth. Such items are needed whether or not one is a student.

Specifically with respect to gym clothes, Education Code section 49056(b) states that: "No grade of a pupil participating in a physical education class, however, may be adversely affected due to the fact that the pupil does not wear standardized physical education apparel where the failure to wear such apparel arises from circumstances beyond the control of the pupil," such as, for example, lack of funds.

It should be determined whether a fee for a particular item is specifically authorized by statute. If not, it should be determined whether a particular item is required by law to be furnished free or whether it comes under the category of "necessary supplies." If it does, then the district must furnish the item without charge.

It is the position of the Department that a school district may require its students to purchase their own gym clothes of a district specified design and color so long as the design and color are of a type sold for general wear outside of school. Once the required gym uniforms become specialized in terms of included logos, school name or other characteristics not found on clothing for general use outside of school, they are school supplies and the district must provide those uniforms free of charge.

It is the opinion of the Department's legal office that a school district may not charge a fee or require students to purchase necessary materials even if the

⁵Ops. Cal Atty. Gen. No. NS-4414, 1942

district maintains a special fund to assist students with financial need or waives such fee or charge for students with financial need. The fee or charge still remains a condition for all other students not so assisted. The court in Hartzell v. Connell, discussed below, held that a fee-waiver policy for needy students does not save the fee.

IV. Extracurricular Activities

On April 20, 1984, the California Supreme Court decided, in Hartzell v. Connell 35 Cal. 3d 899, that a public school district may not charge fees for educational programs simply because they are denominated "extracurricular." As expressed by the lead opinion, the court concluded that "the imposition of fees as a precondition for participation in non-statutory educational programs offered by public high schools on a noncredit basis violates the free schools guarantee of the California Constitution and the prohibition against school fees contained in Title 5, Section 350 of the California Administrative Code." (now California Code of Regulations).

Some significant observations by the various justices and ramifications of the decision are as follows:

- A. The lead opinion was written by Chief Justice Bird with Justices Broussard and Reynoso concurring specifically. The approach taken to the issue by the Chief Justice holds that the free school guarantee extends to all activities which constitute an integral, fundamental part of elementary and secondary education or which amount to necessary elements of any school's activity. The opinion concludes that extracurricular activities constitute an integral component of public education.
- B. The lead opinion holds that fee based extracurricular activities are also illegal under Title 5 California Code of Regulations 350 (5 CCR 350) which prohibits the imposition of "...any fee, deposit, or other charge not specifically authorized by law."
- C. Apart from the fee issue, this particular holding has wide reaching significance. Along with constitutional provisions and statutes, any regulation adopted by the State Board of Education or Superintendent of Public Instruction is a "law." Education Code section 35160, the so-called "permissive code" authority allows school districts to carry on any activity or act in any manner "...which is not in conflict with or inconsistent with, or preempted by, any law..."
- D. As noted above, several provisions of the Education Code permit school districts to impose charges or fees, e.g.: Section 35330 (field trips and excursions), Section 48909 (charge for lost textbook), Section 35335 (school camps), Sections 32220-32224 (requires members of athletic teams to purchase death, accident and hospital insurance), Section 40015 (deposit for use of a school musical instrument), Section 39804 (pupil transportation), and so forth. In

his separate opinion, in which he concurs in the judgment, Justice Kaus raised the question whether, under the decision, any of the statutory fees and charges (Paragraph II, supra) would be unconstitutional. Because none of the statutory fees were in issue, the court made no ruling in that respect. The Hartzell decision is binding precedent for invalidation of any non-statutory fees of the type examined by that court. Except for home to school transportation fees (Section 39807.5), the constitutionality of the statutory fees and charges is yet to be judicially decided.

- E. In a footnote the lead opinion states that the: "[e]ducational activities are to be distinguished from activities which are purely recreational in character. Examples of the latter might include attending weekend dances or athletic events." This statement may cause future litigation on the issue of whether the challenged fee based activity is educational or recreational. The issue is complicated by the fact that while citing an athletic event as possibly being recreational, the court invalidated a fee based athletic activity because it was held to be educational. This could be reconciled by interpreting the footnote as allowing a fee if the participation is solely as a spectator.
- F. The defendants argued that their fee-waiver policy for needy students satisfies the requirements of the free school requirement. They suggested that the right to be educated at public expense amounts merely to a right not to be financially prevented from enjoying educational opportunities. The court answered that such an argument plainly contradicts the plain free school language of the Constitution.

V. Home to School Transportation Fees

Education Code section 39807.5 allows school districts to charge parents a fee for home to school transportation provided to their children by the district. On a constitutional challenge the California Supreme Court in Arcadia School District v. State Department of Education,⁶ upheld the transportation fee statute. According to the court, permitting school districts to charge parents and guardians for the transportation of students to and from school does not violate the California Constitution free school guarantee. Unlike the extracurricular activities held to be free in Hartzell v. Connell (supra), transportation is neither an educational activity nor an essential part of school activity. Home to school transportation is not included within the free school guarantee.

⁶2 Cal4th 251 (1992)

VI. Tuition for Summer School.

No statute specifically authorizes tuition for summer school. Therefore, tuition or any fee or charge is prohibited under Section 350 of Title 5 California Code of Regulations (supra at page 1), which according to the court in Hartzell v. Connell (supra), is a law within the meaning of the so-called permissive provisions of Education Code section 35160.

VII. Community Service Classes

The governing board of a school district is authorized to maintain community service classes and to charge fees to cover the costs of maintaining such classes (Education Code sections 51810 and 51815). These classes may be convened at any time during the school year as may be determined by the governing board (Education Code section 51812).

Community service classes are not intended to teach required courses that students in grades K-12 must complete as part of their instructional programs. Community service classes usually include classes in music, drama, art, handicraft, science, literature, nature study, nature contacting, aquatic sports, athletics, and other such classes of general interest to the community (See Education Code, section 51810). These classes are primarily intended for adults and are open only to those minors whom the governing board believes will profit from such classes (Education Code, section 51811). It is the Department's position, therefore, that community service classes may not be used as summer schools for K-12 students, except for the incidental attendance of students with special interest in the subjects being taught.

VIII. Summer Schools Conducted Under Contract by Private Parties

The provisions of law relating to contracts whereby private parties conduct a portion of the educational program are not entirely clear. Neither the California Constitution nor the Education Code specifically prohibits contracts for educational services. Education Code section 35160 authorizes districts to engage in any activity not prohibited by law.

Section 6, Article IX, of the California Constitution prohibits a school district from transferring, directly or indirectly, any part of the public school system, or the placing of any part of the public school system under the jurisdiction of any authority other than a public school authority. This constitutional provision was explained in CTA v. Fullerton.⁷ That case involved a school district which let a contract for a private vendor to conduct its driver training program. The court held that the district had not transferred a part of the school system, but only a part of the curriculum. The court's reasoning is that the curriculum is only a function of the system and not a part of the system. This reasoning would seem also to validate contracting for a summer school program. However, in discussing this constitutional prohibition, the court stated that the Constitution would be violated if the control and management of the driver training program were to be transferred to a private authority. This would be true because the various

⁷82 Cal.App.3d 249, 1978

administrative units authorized to maintain and administer the curriculum with the public school system constitute, along with the curriculum, a part of the system. Thus, contracting for a summer school program would be valid under Article IX, Section 6 only if the school district maintains exclusive control and management of the educational program.

The requirement for the maintenance of control and management, however, places the contracting district in a legally impossible position when tuition fees are charged. If the contractor providing the program charges tuition the district might thereby be in violation of the prohibition against tuition charges.

IX. Leasing School Buildings for Educational Use.

The Education Code provides authority for school districts to lease, or allow the use of, unneeded school buildings and classroom space, or to enter into joint occupancy or joint use agreements with private entities including private schools. (Education Code sections 39360, 39379, 39380, 39381, 39440, 39444, 39470, and 40040, et seq.)

When authorizing school buildings to be used by another entity for a summer school program, however, the district should consider the following:

- A. When leasing to a sectarian organization, the district must avoid violating the religious establishment prohibition of the First Amendment to the United States Constitution. According to the California Attorney General, a school district cannot lease or loan vacant classrooms to a sectarian institution for religious purposes while public school is concurrently in session.⁸
- B. The use granted under the Civic Center Act must not result in a monopoly for the benefit of any person or organization. (Education Code section 40041 et seq.) (Effective 1/1/98 renumbered to 38130)

X. Charter Schools.

Education Code section 47605(d) prohibits a charter school from charging tuition, but does not mention fees or other charges. Should it be argued that a certain educationally based fee or other charge is not in the nature of a tuition, the charter school would, nevertheless, be prohibited from assessing them. Although a charter school is exempt from the laws governing school districts (Education Code section 47610), the California Constitution, which is the highest law of the state, cannot be rendered inapplicable by the Legislature. Therefore, any tuition, fee or other charge relating to the charter school's educational program is prohibited by the free school guarantee of the California Constitution Article IX, Section 5, as interpreted in Hartzell v. Connell, supra.

⁸60 Ops. Cal. Atty. Gen. 269

XI. Educational Clinics.

A certified clinic may not charge any fee for services to any pupil or to the parent, guardian, or custodian of any pupil for which the clinic receives reimbursement (Education Code section 58557)

The purpose of this Advisory is to inform school districts and county superintendents of the existing law involving fees in the schools and of the various cases and opinions on the subject. Except with respect to citations and references to statutes, regulations and court decisions, this Advisory is merely exemplary and compliance therewith is not mandatory, nor is there any intent to suggest a particular course of action. Each local educational agency should seek the advice of its own legal counsel in the development of local policy.

Questions about this advisory may be directed to the Department's Legal Office
916-657-2453.

DECLARATION OF SERVICE

RE: Hazardous Materials Assessments 02-TC-43
CLAIMANT: Clovis Unified School District

I declare:

I am employed in the office of SixTen and Associates, which is the appointed representative of the above named claimant(s). I am 18 years of age or older and not a party to the within entitled matter.

On the date indicated below, I served the attached: letter of November 26, 2003, addressed as follows:

Paula Higashi
Executive Director
Commission on State Mandates
980 Ninth Street, Suite 300
Sacramento, CA 95814

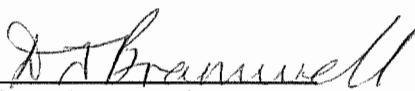

AND per mailing list attached

FAX: (916) 445-0278

Re: Test Claim 02-TC-43
Clovis Unified School District
Hazardous Material Assessments

Dear Ms. Higashi:

We have been advised by the Department of Toxic Substances Control that the copy of our response dated November 26, 2003 (to its opposition and comments dated October 27, 2003) was received without page 18.

In the event that this clerical error might exist in all copies, I am enclosing a new original page 18 with copies thereof to all persons and agencies listed on the attached mailing list.

Thank you.

Sincerely,

Leo Shaw
Associate

innumerable public mouths tax revenues will feed. Barring a statutory or constitutional violation, it is not for this court to stop the Legislature if it transfers revenue from Peter to compensate Paul....(citation) Under these principles, there is no basis for applying section 6 as an equitable remedy to cure the perceived unfairness resulting from political decisions on funding priorities. (citation).”

Taking note that the required education of children had always been a jointly funded effort of the state and local government, the court held that shifting the percentage of funding as between the state and local government did not create a mandated program on the local government. The court, adroitly noted:

“In this case, the County’s tax revenues were not expended. No invoices were sent, no costs were collected, and no charges were made against the counties in this case. Contrary to the conclusion of the trial court, it is the expenditure of tax revenues of local governments that is the appropriate focus of section 6 (citation) [stating that §6 was ‘designed to protect the tax revenues of local governments from state mandates that would require expenditure of such revenues’].”

“An examination of the intent of the voters and the language of Proposition 4 itself supports our conclusion that Proposition 4 was aimed at controlling and capping government spending, not curbing changes in revenue allocations. Section 6 is an obvious compliment to the goal of Proposition 4 in that it prevents the state from forcing extra programs on local governments in a manner that negates their careful budgeting of expenditures. A forced program that would negate such planning is one that results in increased actual expenditures of limited tax proceeds that are counted against the local government’s spending limit. Section 6, located within a measure aimed at limiting expenditures, is expressly concerned with ‘costs’ incurred by local government as a result of state-mandated programs, particularly when the costs of compliance with a new program restrict local spending in other areas. (§6.) ‘No state duty of subvention is triggered where the local agency is not required to expend its proceeds of taxes’. (Citation).” (Opinion, at page 1283-1284)

The *County of Sonoma* court also noted that “Government Code section 17514 defines ‘costs mandated by the state’ for purposes of section 6 as ‘any increased costs which a local agency or school district is *required to incur*...as a result of any statute...which mandates a new program or higher level of service of an existing program...Government Code section 17522 defines ‘annual reimbursement claim’ to mean ‘a claim for *actual costs incurred*...’ (Italics added) Similarly, Government Code section 17558.5 refers to a claim for ‘*actual costs* filed by a local agency...’ (Italics

COMMISSION ON
STATE MANDATES

Ms. Paula Higashi
Executive Director
Commission on State Mandates
980 Ninth Street, Suite 300
Sacramento, CA 95814

Dear Ms. Higashi:

The Department of Finance has received and reviewed Commission on State Mandates' Test Claim No. 02-TC-43, Hazardous Materials Assessments, submitted by the Clovis Unified School District (Claimant). Based on our review of the claim and the relevant State statutes, we believe that a school district's compliance with hazardous materials assessment requirements does not create a State-mandated reimbursable activity and cite the following reasons as the basis for our position:

Voluntary Activities—The Claimant cites Education Code Section 17072.13 as one State statute that has created a new State-mandated activity. While we acknowledge that the statute does require certain hazardous materials removal activity, we note that the cited code section is part of the Leroy F. Greene School Facilities Act of 1998—the School Facilities Program (SFP), Chapter 12.5 of Part 10 of the Education Code, commencing with Section 17070.10—and a school district's participation in the program is strictly voluntary and the result of elective action taken by the governing board of the district. In *Department of Finance v. Commission On State Mandates (2003) 30 Cal. 4th 727*, the California Supreme Court confirmed the merits of the argument that where a local government entity voluntarily participates in a statutory program, the State may require the entity to comply with reasonable conditions without providing additional funds to reimburse the entity for increased level of activity. Moreover, Education Code Section 17213.1(b) states, "The costs incurred by school districts when complying with this section are allowable costs for purposes of an applicant under Chapter 12.5...Part 10 and may be reimbursed in accordance with Section 17072.13." Among other provisions, the referenced section applies to hazardous material assessment. Further, although the SFP has a local matching requirement, the program also provides for a "financial hardship" provision whereby the State pays the full cost of a school district project when a district can demonstrate an inability to fund the local amount.

We also note that nothing in State law or regulation requires a school district to acquire any site for the purpose of constructing a school building. Instead, the law provides school districts with flexibility, discretion, and choice over the manner in which districts elect to house their student populations. For example, school districts have the discretion to operate year round multi-track schools or two kindergarten sessions per day, use portable classrooms, or transport students to under-used schools. In addition, although a school district that elects not to receive State funds pursuant to Chapter 12.5 may not approve a construction project unless the project complies with certain requirements, including hazardous materials assessment (see Education Code Section 17268), it is the district's voluntary decision to construct a school facility rather than using an aforementioned alternative that forced the district to carry out the required activities.

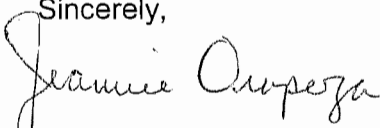

Fee Authority—Education Code Section 17620(a)(1) states: “The governing board of any school district is authorized to levy a fee, charge, dedication, or other requirement against any construction within the boundaries of the district, for the purpose of funding the construction or reconstruction of school facilities...” Government Code Section 17556(d) provides that the Commission shall not find a reimbursable mandate if the local agency has “authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service.” Further, in *Kathleen Connell v. Superior Court of Sacramento County (1997) 59 Cal.App.4th 382*, the court found that the fee authority can exist even if it is not economically feasible or practical to implement the fee.

Based on the aforementioned reasons, we conclude that the cited State law does not create a State-mandated reimbursable activity; therefore the test claim should be denied.

As required by the Commission's regulations, we are including a “Proof of Service” indicating that the parties included on the mailing list which accompanied your July 11, 2003, letter have been provided with copies of this letter via either United States Mail or, in the case of other State agencies, Interagency Mail Service.

If you have any questions regarding this letter, please contact Walt Schaff, Principal Program Budget Analyst at (916) 445-0328, or Keith Gmeinder, State mandates claims coordinator for the Department of Finance, at (916) 445-8913.

Sincerely,

Jeannie Oropeza
Program Budget Manager

MEMORANDUM

RECEIVED

FEB 06 2004

**COMMISSION ON
STATE MANDATES**

TO: Paula Higashi
Executive Director
Commission on State Mandates
980 Ninth Street, Suite 300
Sacramento A-16

FROM: Vivian S. Murai 
Staff Counsel
Office of Legal Counsel & Investigations

DATE: February 6, 2004

SUBJECT: OPPOSITION OF THE DEPARTMENT OF TOXIC SUBSTANCES
CONTROL TO CLOVIS UNIFIED SCHOOL DISTRICT'S TEST CLAIM
NO. 02-TC-43

The Department of Toxic Substances Control (DTSC) has received the response of the Clovis Unified School District (Claimant), dated November 26, 2003 (Clovis' Response), to our earlier comments. We submit this memo in reply to Clovis' Response and to reaffirm our previously submitted opposition to and comments on the Clovis Unified School District's Test Claim (Clovis' Claim) under Government Code section 17553, subdivision (a). DTSC hereby certifies, incorporates by this reference, and adopts its prior comments of October 27, 2003 (Exhibit 1 to this memo), as clarified below. We also reserve the right to submit additional comments on Clovis' Claim as may appear necessary and proper.

As a general matter, we assure the Commission on State Mandates (Commission) and the Claimant that we take seriously the financial constraints facing all of California's public entities. In fact, our opposition to the test claim is in no way a rejection of the School Facilities Program, the hazard assessment provisions' value or policy goals, or of a local entity's actual need for fiscal or physical resources. Besides this test claim process, we would also note that a local entity has or may seek alternative funding through legislated collection authorities, state and federal legislative change, constitutional change, or bond issues.

WASHINGTON, D. C.

Paula Higashi
DTSC Opposition to Test Claim 02-TC-43
February 6, 2004
Page 2

We limit our comments in this forum to whether the test claim legislation meets certain necessary elements that, in turn, require the State to reimburse the local entity under Section 6 in Article XIII of the state Constitution (Section 6). Based on our review of the subject laws, the Claimant is mistaken and no state-imposed mandate exists because the subject legislation fails to create a state-mandated program to acquire land or construct schools, let alone a mandate to participate in this state funding program. Clovis' Response points to no law requiring that a district acquire land to build new schools rather than use other options, such as multiple tracks of students, year-round schooling, and the like. In this, we agree with Department of Finance staff. We also believe that the Department of Education's comments regarding School Facilities Funding Requirements in Test Claim 02-TC-30 would apply here. For ease of reference we quote their language below:

“School Facilities Funding Requirements (02-TC-30)

“This is not a mandated program. It is one of various capital funding mechanisms available to school districts for the funding of facilities. School districts elect to participate in this program and any requirements regarding this program are applicable only after districts elect to participate in this program.” (Exhibit 2, page 1).

For these reasons, we limit our comments to the criteria for reimbursement as a state mandate. The Claimant's exhaustive description of various revenue mechanisms and limitations and the districts' resulting poverty are not critical to this stage of the test claim process.

The hazard assessment provisions in the Education Code also have offsetting benefits in that districts employing the process and standards receive DTSC oversight and approvals. The Belmont Learning Center and the Jefferson New Middle School in Los Angeles were the very real cases in point that precipitated the subject legislation. (Please see Exhibit 3.¹) First, this forward-thinking approach avoids spending millions of dollars, only to discover that the site is too dangerous for children to occupy. Second, DTSC's certification that the district successfully completed necessary assessment and remediation work typically limits and deters potential litigation and tort liability for harm to children, a most susceptible population. Third, the district obtains our expertise in dealing with these hazards and children's health. DTSC will also oversee the

¹ This White Paper, as attached at Exhibit 3, is available from the DTSC website <http://www.dtsc.ca.gov>.

hazardous substance assessment process for locally funded school construction projects under a voluntary agreement. When all necessary work is complete, DTSC will provide its certification that site conditions are protective of human health and the environment. In this manner, any district may gain the same advantages from employing the hazard assessment standards to its own project(s).

In addition, we see no contradiction in finding that the test claim legislation fails multiple criteria for subvention as a state mandate. (See Clovis' Response, page 16.) We need not assume that a mandate exists to note that the Claimant's bid for subvention fails on other grounds, such as Government Code section 17556 exclusions. The test-claim process is but one avenue that local entities may use to seek funds.

Clovis' Acknowledgments: Turning next to Clovis' Response, the Claimant acknowledges and admits numerous points adverse to its claim, the most pertinent of which follow:

1. That certain of the Education Code requirements are conditions of state funding (Clovis' Response, page 2). We maintain that the other sections listed in Clovis' Response still fail to require districts to acquire land and build new schools. They merely provide the parameters for those who choose to do so with state money.
2. That school districts repaid state loans for school facilities before Proposition 13 in 1978 (Clovis' Response, page 7, referring to DTSC's Exhibit C). We note that this obligation predated 1975, when the state's Constitutional obligation for unfunded state mandates began. School facility funding was, therefore, not fully state funded when Section 6 came into effect and no unconstitutional shifting of costs occurs under *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal.App.4th 1264 at 1287.
3. That no proper claim lies for costs funded through the School Facilities Program (Clovis' Response, page 17).
4. That the *County of Sonoma* decision, a previous state mandate case, found that "education has long been a jointly funded effort" (Clovis' Response, page 17). We add for the Commission's consideration the fact that, in *County of Sonoma*, the court denied the claim that reduced Proposition 98 budget allocations to school districts resulted in reimbursable state-mandated costs by noting as follows:

"The critical point in the analysis is that school funding in California was, at the time section 6 became effective, a jointly funded partnership between the state and local governments. These joint budget allocations are not subject to section 6. To hold otherwise would impermissibly cripple the ability of the Legislature to function in the critical area of budget planning." (*County of Sonoma*, 84 Cal.App.4th at 1289).

We also note that the Claimant's quoted statutory language regarding historical facility funding needs is precatory and permissive language, not mandatory language (Clovis' Response, pages 8-14). The mandatory language applies only to those school districts that participate in those programs, or cases where the state must forgive at least 50% of some loan amounts.

Kern applies because it considered the Sacramento Cases and Found No De Facto Mandate. We note that *Kern* also analyzed the *de facto* mandate issue and found none there. (*Department of Finance v. Commission on State Mandates* (2003) 30 Cal.4th 727, 749-752 (previously *DOF-2003*, hereafter *Kern*)). The court examined the program statutes and found no penalties or double taxation to the district or other private entities for non-participation and, therefore, found no draconian consequences and no *de facto* state mandate. (*Kern*, 30 Cal.4th at 749-752.) The *Kern* Court analyzed the Sacramento I and Sacramento II cases, and stated:

". . . [W]e conclude that, contrary to the situation we described in that case [referring to *City of Sacramento v State of California* (1990) 50 Cal. 3d 51 (Sacramento II)], claimants here have not faced "certain and severe . . . penalties" such as "double . . . taxation" and other "draconian" consequences (*City of Sacramento v State of California* (1990) 50 Cal. 3d at p. 74, 266 Cal.Rptr. 139, 785 P.2d 522), and hence have not been 'mandated' under article XIII, section 6 to incur increased costs." (*Kern*, 30 Cal.4th at 751.)

Similarly, the Claimant cites no penalty scheme and no double taxation in their Response. We again affirm our position that Clovis' Claim fails to establish a *de facto*, reimbursable mandate for the same reasons. Consequently, we believe the Commission need not reach the *de facto* mandate analysis, but if it chose to do so, *Kern* would still apply and would still refute the Claimant's argument based on the *Sacramento* cases. [*City of Sacramento v. State of California* (1990) 50 Cal.3d 51 (*Sacramento II*); *City of Sacramento v. State of California* (1984) 156 Cal.App.3d 182

(*Sacramento I*)]

Sacramento II found no mandate for failure on the program an service elements:

We would also remind the Commission that *Sacramento II* actually held that the “obligations imposed by chapter 2/78 fail to meet the ‘program’ and ‘service’ standards for mandatory subvention we recently set forth in *County of Los Angeles v. State of California* (1987) 43 Cal.3d 46” (*Sacramento II*, 50 Cal.3d at 57). The Court’s discussion of de facto mandates continued, arguably “a gratuitous advisory opinion,” according to the dissent, to examine the state’s discretion in implementing the federal mandate for the sole conclusion that any taxing and spending for these costs would fall outside the limits of Section 6. (*Sacramento II*, 50 Cal.3d at 70-71; dissent by Justice Kaufman, 50 Cal.3d at 77) We remind the Commission that this latter dictum was beyond the issues there on appeal, but was instructive for its statement that no reimbursable state mandate existed under those facts (*Sacramento II*, 50 Cal.3d at 70-71).

Funding Authority Exists: We note to the Commission that the Department of Education has produced guidance materials for the School Facilities Program.² Page 11 lists general obligation bond funds, Mello-Roos, developer fees, proceeds from the sale of surplus property, and federal grants as financing mechanisms available to districts to fund the Participant’s share of costs. (Attached as Exhibit 4.)

Education Code 17620 is Disqualifying Funding under Government Code 17556(s): We also disagree with the Claimant’s contention that Government Code 17556(d) does not apply to construction funding or somehow excludes funding mechanisms of Education code 17620, whose clear purpose is to provide revenue-collecting authority. We find no exclusions within Government Code 17556(d). We also find no authority for the Claimant’s assertion that Government Code section 17556(d) references to “a fee, charge, dedication, or other requirement” mean only fees charged “to the consumer” as the Claimant argues in its discussion of Government Code 17556(d) and Education Code 17620 (Clovis’ Response, page 18). We respectfully remind the Commission that Government Code 17556(d) and Education Code 17620 actually reads in pertinent part as follows:

² This Guidebook and DTSC’s Exhibit C within Exhibit 1 to this letter are available in full text form from the Office of Public School Construction website <http://www.opsc.dgs.ca.gov>. Although many chapters of this Guidebook contain helpful information regarding the school Facilities Program, we attach only the pages through Chapter 4 to conserve resources.

"Gov. Code section 17556. The commission shall not find costs mandated by the state, as defined in Section 17514, in any claim submitted by a local agency or school district, if, after a hearing, the commission finds that:

"(d) The local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service. (emphasis added)

"Educ. Code section 17620(a)(1). The governing board of any school district is authorized to levy a fee, charge, dedication, or other requirement against any construction within the boundaries of the district, for the purpose of funding the construction or reconstruction of school facilities, subject to any limitations set forth in Chapter 4.9 (commencing with Section 65995) of Division 1 of Title 7 of the Government Code." (emphasis added)

We believe the plain language of the cited statutes and the previously cited court opinions make clear that Clovis' Claim fails to establish a reimbursable state mandate on funding grounds, as well as those grounds noted earlier.

Finally, we thank SixTen and the Claimant for pointing out typographical errors so that we may correct them here. All references in our Exhibit 1 to this letter to Government Code section 17556 or 17516 should be references to Government Code section 17556. We would, however, note that we did not locate the Claimant's certification of the documents attached to its written declarations.

CONCLUSION

The Commission on State Mandates has numerous grounds to reject the District's Claim that hazard assessment conditions on state funding are reimbursable state mandates.

For all the reasons noted above and in the attached exhibits, as well as any other grounds the Commission may deem proper, DTSC respectfully submits these comments and urges denial of Clovis Unified School District's Test Claim No. 02-TC-43.

PROOF OF SERVICE

I am a resident of the State of California, over the age of eighteen years, and not a party to the within action. My business address is 1001 I Street, 23rd Floor, Sacramento, California 95814. On February 6, 2004, I served the within document(s):

1. Department of Toxic Substances Control's Opposition to Clovis Unified School District's Test Claim No. 02-TC-43

BY HAND: by personally delivering the document(s) listed above to the person(s) at the address(es) set forth below.

Paula Higashi
Executive Director
Commission on State Mandates
980 Ninth Street, Suite 300
Sacramento, California 95814

BY MAIL: by placing the document(s) listed above in a sealed envelope with postage thereon fully prepaid, in the United States mail at Sacramento, California addressed as set forth below.

See attached Service List

BY OVERNIGHT MAIL: by causing document(s) to be picked up by an overnight delivery service company for delivery to the addressee(s) on the next business day.

BY PERSONAL DELIVERY: by causing personal delivery by capitol Couriers of the document(s) listed above to the person(s) at the address(es) set forth below.

I am readily familiar with the firm's practice of collection and processing correspondence for mailing. Under that practice it would be deposited with the U.S. Postal Service on that same day with postage thereon fully prepaid in the ordinary course of business. I am aware that on motion of the party served, service is presumed invalid if postal cancellation date or postage meter date is more than one day after date of deposit for mailing in affidavit.

I declare under penalty of perjury under the laws of the State of California that the above is true and correct. Executed on February 6, 2004, at Sacramento, California.

Sandra Monger

RE: Department of Toxic Substances Control's Opposition to
Clovis Unified School District's Test Claim No. 02-TC-43

Dear Ms. Higashi:

The Department of Toxic Substances Control (DTSC) submits this letter as our opposition to and comments on the Clovis Unified School District's Test Claim (Clovis' Claim) under Government Code section 17553, subdivision (a). DTSC reserves the right to submit additional comments on Clovis' Claim as may appear necessary and proper.

DTSC opposes the claim that the geological, soil and environmental assessment and cleanup ("Hazardous Material Assessment") conditions constitute a reimbursable state mandate on school districts (districts) on four grounds. First, district participation in the underlying program is elective or optional, and neither a compulsory nor a de facto mandate under *Department of Finance v. Commission on State Mandates* (2003) 30 Cal.4th 727, 731-735 (hereafter *DOF-2003*). Second, school districts have authority to levy fees to fund their share of costs under Education Code section 17620, among others, thus disqualifying them for reimbursement under Government Code section 17556, subdivision (d), and *Connell v. Superior Court (Santa Margarita Water District)* (1997) 59 Cal.App.4th 382 (*Santa Margarita Water District*). Third, jointly funded programs such as school funding are outside the coverage of Section 6, article XIII B of the California Constitution (Section 6) under *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal. App.4th 1264 (*County of Sonoma*). Fourth, compliance with these funding conditions fails to provide a new program or increased level of service to the public to qualify as a reimbursable state mandate under *County of Sonoma*. Consequently, DTSC maintains that these geological, soil and environmental assessment and cleanup (hazard assessment requirements) are not reimbursable state mandated costs under Constitution, article XIII B, section 6.

INTRODUCTION

Clovis' Claim asserts that these hazard assessment procedures impose reimbursable, state-mandated costs on grant applicants for state school construction funds under Education Code sections 17072.13, 17212, 17213.1, and the various associated sections added and amended by various legislation between 1976 and 2002. These procedural safeguards effect safety standards in that they provide informed, interim decision points for districts to withdraw or proceed with school site acquisition and construction projects after checking for hazards associated with the site. These hazard assessment requirements apply only to applicants for state money, and are conditions on state funds under the School Facilities Program (Educ. Code § 17070.10 et seq.) to assure that resulting school sites are safe for their intended population -public school children - as noted in the sections quoted by Clovis' Claim, itself. Districts that do apply for state funding may fund their share of the project costs with local bonds, developer fees, Mello-Roos fees, improvement district levies, and certificates of dedication. (Educ. Code § 17620; Gov. Code § 53311 et seq.; Educ. Code § 15350 et seq.)

The Schools Facilities Program funds local construction in equal shares with the district under Education Code section 17072.13. When a school district applies for state funds from the School Facilities Program for school construction projects, including site acquisition, the district must check for possible hazardous conditions at the site using the process specified at Education Code sections 17072.13 and 17210 et seq. Education Code section 17212 continues the pre-1975 condition that districts must investigate prospective school sites using competent personnel. The district may choose at any time to stop pursuing a prospective school site. To assure that state construction money funds a reasonably safe environment, the Education Code sections 17072.13, 17212 and 17213.1 require inquiry into the possible geological, soil and environmental hazards of the site. The applying district must conduct a Phase I assessment for environmental hazards (including contamination from hazardous substances) using existing documents, materials and studies, and must submit the review with \$1,500 for DTSC oversight. DTSC refunds to the district any unused portion of this \$1,500.

If the Phase I indicates that contamination may be present and the applying district chooses to continue pursuing the site, Education Code section 17213.1 requires the district to conduct a Preliminary Endangerment Assessment (PEA) under an environmental oversight agreement with DTSC that includes reimbursement. This PEA may include limited or extensive sampling, depending on the results of the Phase I. If the district decides to acquire or construct on a contaminated site, it must also conduct an appropriate response to render the site usable by children under Education Code section 17213.2. As part of the response activities, the district must fund DTSC oversight as well as the necessary public comment and participation activities required by Health and Safety Code sections 25358.7 and 25358.7.1.

BASES FOR OPPOSITION

1. As conditions of an optional state funding program, hazard assessments are neither actual nor de facto reimbursable state mandates under *DOF-2003*.

A. Hazard assessment requirements are not compulsory

The Clovis Unified School District (District) properly quotes Education Code sections 17210.1 and 17213.1, at pages 33-34, including language noting that the section applies to state funded entities. (Test Claim, pages 18, 19, 23.) Education Code section 17210.1 expressly addresses only sites for which "school districts elect to receive state funds." Education Code section 17213.1 also states, "[a]s a condition of receiving state funding" and clearly applies these requirements to districts seeking state funding of their projects. However, the District overlooks this state funding condition precedent in its analysis and omits any reference to the *County of Sonoma* and *DOF-2003* case decisions rejecting claims that such elective activities' costs are state mandates. The District also fails to mention the existing state funding for part or all of the hazard assessment work under Education Code sections 17072.12 and 17072.13 that reduces the unfunded costs or invalidates their grounds for reimbursement as an unfunded mandate. The School Facilities Program provides optional, joint state and local funding for school facilities construction as demonstrated by the language limiting application of the sections to applicants for funds. (E.g., Educ. Code § 17072.13, 17072.18, et al.)

The state-funded School Facilities Program conditions in Clovis' test claim are analogous to the state-funded educational programs at issue in *DOF-2003*. In that case, the California Supreme Court examined and rejected various school districts' claims that the statutes compelled participation in the various programs, making the program's meeting and agenda posting requirements reimbursable unfunded state mandates. (*DOF-2003, supra*, 30 Cal.4th 727, 732.) In the *DOF-2003* case, the California Supreme Court found that participation in the underlying programs was neither mandated nor legally compelled by requirement or by a penalty for non-participation (de facto). In addition, to the extent that participation in the last of the nine programs was not optional, the district could claim reimbursement under that program, and thus the state had funded any new costs. (*Id. at p. 730-731.*) As a consequence, the meeting and agenda posting requirements in that case were not reimbursable mandates because the participation in the underlying program was optional, and the state would fund any additional costs. (*DOF-2003, supra*, 30 Cal.4th at p. 731.)

The hazard assessment requirements are not rendered mandates because the state funds only part of the total costs under Education Code sections 17072.1, 17213.13 and 17213.18. The *DOF-2003* court noted, "[w]e reject the suggestion, implicit in claimants' argument that the state cannot legally provide school districts with funds for voluntary programs, and then effectively reduce that funding grant by requiring school districts to incur expenses in order to meet conditions of program participation." (*DOF-2003, supra*, 30 Cal.4th at p. 754.)

Here the geological, soil and hazardous material assessment requirements are analogous to this aspect of the *DOF-2003* case. Since the districts elect to apply for state funds, participation in the Schools Facilities Program is not compulsory, and therefore does not qualify for reimbursement as a state mandate under Section 6.

B. Participation is not compelled de facto.

The Supreme Court in *DOF-2003* also rejected the districts' claim that participation in the educational programs at issue was de facto compulsory, in that the districts had no true choice but to continue participation, having already begun to participate. (*DOF-2003, supra*, 30 Cal.4th at p. 748, 751-754.) The court reasoned that, since there was no showing that withdrawal would result in severe penalties, double taxation, or other draconian consequences to the districts, no de facto compulsion existed. (*DOF-2003, supra*, 30 Cal.4th at p. 754.) Regarding Clovis' Claim, the School Facilities Program statute contains no penalties for failing to apply for funds, nor any tax or fee imposed for failure of a district to participate. Furthermore, the Phase I and PEA provide advance notice of possible contamination on the site, allowing the district to cease pursuing a school site at any time without penalty. The hazard assessment requirements inform district decision-making without dictating school siting choices.

The District might claim a de facto reimbursable state mandate because there is no feasible alternative to participation in the state funding program for school construction projects where hazard assessment costs are sizable. The *DOF-2003* court acknowledged that some programs could have compliance costs so great that funded program benefits would not cover the compliance costs or might violate a spending limitation in the applicable regulations or statutes. In that case, "a compulsory program participant likely would be able to establish the existence of a reimbursable state mandate under . . . section 6." (*DOF-2003, supra*, 30 Cal.4th at p. 751-754.) Again, however, DTSC would point out that districts may elect to stop pursuing such a high cost site at any time without compulsion or penalty.

As further discussed below, any costs borne by the district are also partially funded, if not fully funded, by the state, thus also disqualifying the hazard assessment requirements as reimbursable state mandates.

I. Districts' existing authority to fund these hazard assessments through fees, levies, taxes and assessments disqualifies them for reimbursement under Government Code section 17516, subdivision (d).

A. Districts have Authority to Levy Fees, Assessments and Taxes under Education Code 17620 to fund the local share of costs.

Government Code section 17556, subdivision (d), prohibits the commission from determining costs are mandated by the state if it finds that the district "has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service." *Connell v. Superior Court (Santa Margarita Water District)* (1997) 59 Cal.App.4th 382 (*Santa Margarita Water District*) addressed

the meaning of these phrases under Revenue and Taxation Code section 2253.3, subdivision (b)(4), with respect to water quality requirements for certain irrigation uses of recycled water. The court expressly notes that the same provision is now contained in Government Code section 17556, subdivision (d). (*Id.* at 398.) The Third District Court of Appeal in *Santa Margarita Water District* found that "sufficient" referred to the authority being sufficient to levy the fees and charges to fund the local costs at issue. (*Id.* at 400, 403.) The court ruled that the test was not whether actual revenues levied are sufficient to cover the costs of the program. (*Id.* at 400.)

For Clovis' Claim, we refer the Commission to Education Code section 17620 which states in pertinent part:

(a) (1) The governing board of any school district is authorized to levy a fee, charge, dedication, or other requirement against any construction within the boundaries of the district, for the purpose of funding the construction or reconstruction of school facilities, subject to any limitations set forth in Chapter 4.9 (commencing with Section 65995) of Division 1 of Title 7 of the Government Code.

In addition, the Mello-Roos Community Facilities Act of 1982 (Gov. Code § 53311, et seq.) allows a district to form a community facilities district to assess fees to generate school facility funding. Furthermore, the Legislature also authorizes districts to generate funds through bond issues for school facilities improvement districts under Education Code section 15350 et seq.

Based on these references alone, the districts have the means to generate revenues to cover the local share of costs required as conditions on state funding under the School Facilities Program. To the extent a district is unable to cover the local share, it may also apply for additional economic hardship grants from the state as noted below.

B. The state also funds local costs in economic hardship cases under Education Code section 17072.13.

The state School Facilities Program routinely funds half of the hazard assessment requirements, and funds them wholly in cases of economic hardship under Education Code sections 17072.12, 17072.13 and 17072.18. State funds also cover response costs to address actual contamination in the same proportion. (Educ. Code § 17072.18.) Districts unable to fund the local share of construction project costs, may also apply for economic hardship funding to defray part of or the entire remaining local share. (Educ. Code § 17072.13, subdivision (e).) Therefore, the state actually funds these hazard assessment costs under the existing School Facilities Program, sometimes funding 100 percent of project costs. Even if the hazard assessment requirements force a reallocation of funds between entities already jointly responsible for providing a service, the requirements do not create a reimbursable state mandate under *Los Angeles v. Commission of State Mandates*. (*Los Angeles 2003, supra*, 110 Cal.App.4th at pp. 1193-1194.) For these reasons, the hazard assessment

requirements remain voluntary, are fully or partially state-funded, and thus, are not reimbursable state mandates.

II. The *County of Sonoma* court opined that the California Constitution's Section 6 of article XIII B does not cover jointly-funded programs such as the School Facilities Program.

School construction was locally funded, with the state acting as a bank in the 1950s. (*Whittier Elementary School Dist. of Los Angeles County v. Kirkwood* (1956) 147 Cal.App.2d 330, 333-334 (*Whittier*)). School construction became a jointly-funded effort after 1975 with the Leroy F. Green School Lease-Purchase Law of 1976. (Educ. Code § 17000 et seq.) In 1979, the State Allocation Board restructured the Lease Purchase Program into a grant-based program under which school districts submitted cost proposals for which they would be given grants. However, the state funds had numerous spending limitations and controls. (California Research Bureau (CRB), *School Facility Financing: A History of the Role of the State Allocation Board and Options for the Distribution of Proposition 1A Funds*, page 13 citing formerly Educ. Code § 17730.2, 17732; presently Educ. Code § 17030, 17032). The districts continued to be responsible for up to 10 percent of the projects' costs. (*Ibid.*) School funding has long been a jointly-funded effort with the local share funded by local bonds, fees, assessments, and taxes. (*County of Sonoma, supra*, 84 Cal. App.4th 1264, 1286; Educ. Code § 17620.)

Therefore, since Section 6 became effective in 1980, districts have borne or shared school facility costs with the state whether through local bonds, fees or taxes, analogous to educational program funding examined in the *County of Sonoma* case. (*County of Sonoma v. Commission on State Mandates* (2000) 84 Cal.App.4th 1264, 1289.) "These joint budget allocations are not subject to Section 6." (*Ibid.*) The *County of Sonoma* case found that public school education was a jointly-funded venture between state and local government and was, therefore, outside the scope of Section 6. (*Ibid.*) Furthermore, as noted above, when the state reduces or reallocates funding, the loss suffered by the local entity is not a reimbursable mandate. (*Ibid.*) For these additional reasons, the Clovis test claim does not qualify as a reimbursable state mandate.

III. Hazard Assessments are part of the District's continuing duty to provide safe school sites, not a new program shifted from the state to the district.

Here, the program at issue concerns school facility safety, an area that the state has long regulated to assure safety of school children in facilities for compulsory education. (Former Educ. Code § 39002; *Hall v. City of Taft* (1956) 47 Cal.2d 177, 185-186.) A mandate is a new program if the local entity had not previously been required to implement it. (*County of Los Angeles v. Commission on State Mandates* (2003) 110 Cal. App.4th 1176 at p. 1189 (*Los Angeles 2003*)). However, to qualify for reimbursement, the program must be one that the state previously funded in whole and would newly be funded solely by local tax revenues and not by other levies. (*Los Angeles 2003, supra*, 110 Cal. App.4th at p. 1193, citing *County of Sonoma v.*

Commission on State Mandates (2000) 84 Cal. App.4th 1264 at p. 1289). The state did not fund these site acquisition and investigation costs, including the hazard assessments, before 1975 so the state did not shift state program costs to the districts.

If anything, these hazard assessment requirements merely clarify and specify how districts may assure proper use of public funds in providing reasonably safe venues for public education. Upon entering the field, the state has directed its money to provide reasonably safe facilities for their intended purpose: here, the compulsory education of children. (See former Educ. Code § 15002.1 protecting against earthquake danger.) The state has exclusive authority to set safety standards for compulsory education. (*Hall v. City of Taft* (1956) 47 Cal.2d 177, 185-186 [partially superseded by subsequent legislation requiring compliance with local ordinances.]) The various subsequent enactments and revisions to the Education Code create no new program or increased level of service to the public. If anything, the new requirements merely give criteria and procedures to clarify how districts ascertain a site's fitness for use as a school. Consequently, under *Connell v. Superior Court (Santa Margarita Water District)* (1997) 59 Cal.App.4th 382, the hazard assessment requirements merely clarify safety standards, and do not comprise a new program or increased level of service to the public to qualify as a reimbursable state mandate under Constitution, article XIII B, section 6.

DTSC would also note to the Commission that a mandate for safe school sites was in effect on January 1, 1975 (former Education Code section 15002.1) and remains in Education Code section 17212. (Clovis' Claim, page 2.) Education Code section 15002.1 was originally enacted in 1967, and was renumbered as 39002 and now is 17212. Education Code section 15002.1 required the governing board of a school district to have a building site investigated by competent personnel, prior to acquisition, to ensure that the final site selection was determined by an evaluation of all factors affecting the public interest and not limited to selection on the basis of raw land cost only. Now, more specific measures to achieve those ends accompany such acquisitions. The District correctly asserts that the environmental hazard assessment requirements for school site evaluation at issue here were enacted after January 1, 1975. The claim omits, however, to reference the general school safety duties from statutory or case law.

As section 39002, the section referred to section 39101, requiring the California Department of Education to develop standards for school district use in the selection of school sites considering safety, along with educational merit and conformity with local general plans. (Educ. Code § 39101(a), derived from former section 15302, and ultimately from former section 18102 in, the School Code.) The state has specified facility standards for occupancy of school sites since 1933 when the School Code was in force as noted also in *Hall v. City of Taft* (1956) 47 Cal.2d 177, 185-186. (Educ. Code § 17365, formerly Educ. Code § 39210.) In 1956, the California Supreme Court considered school safety issues in *Hall v. City of Taft* and found that the state fully occupied the field in specifying construction requirements for schools to be sure they were reasonably safe for their intended use as schools. (*Hall v. City of Taft* (1956) 47 Cal.2d 177, 185-186.) Subsequently, building standards for school facilities were

enacted under the Field Act (Educ. Code § 17281 et seq.) "to expedite the provision of safe educational facilities for California school children." (Educ. Code § 17366, formerly Educ. Code § 39211.) Districts had to consider and evaluate all costs of site acquisition under Education Code section 15002.1 (subsequently Education Code section 39002, presently section 17212) before 1975, and therefore have no claim to a new reimbursable state mandate on those grounds.

The hazard assessments do not provide a new service to public. Instead, they require research and periodic evaluation at key decisions points, such as the Phase I and PEA, to help inform public spending decisions to assure reasonable use of state school facility funds. This increased level of information also protects against commitment to sites with unknown contamination levels. In addition, these processes assure that the site is reasonably safe for its intended use: occupancy by children for compulsory education. The situation here is similar to *County of Los Angeles v. Department of Industrial Relations* where the court found costs of complying with new elevator fire and earthquake safety standards were not reimbursable as state mandates because they provided no new or increased level of service to the public. (*County of Los Angeles v. Department of Industrial Relations* (1989) 214 Cal.App.3d 1538, 1546.)

Similarly, Education Code sections 17072.13, 17212 and the School Facilities Program statutes (Educ. Code § 17070.10 et seq.) merely clarify and further specify the means to be employed in providing safe schools, as intended by the Legislature as far back as 1933. (See annotations to Educ. Code § 39101, *Hall v. City of Taft* (1956) 47 Cal.2d 177, 185-186.) Here the hazard assessment requirements specify procedures and oversight mechanisms to assure consideration of various hazards without providing a new service to the public. To the extent that the public comment process in hazard assessment requirements are a service to public, the state shares the incremental costs as project costs under the schools facilities program (Educ. Code § 17213.18), thus preventing these costs from becoming either an unfunded mandate or a de facto state mandate under *DOF-2003*.

CONCLUSION

The Commission on State Mandates has numerous grounds to reject the District's Claim that hazard assessment conditions on state funding are reimbursable state mandates.

First, because the districts have the option to apply for state school site funding from the School Facilities Program, their participation in the underlying program is voluntary, optional and not compulsory. Given that districts may choose to stop pursuing a contaminated site at any time, they can avoid the exorbitant hazard assessment costs and are not compelled to participate in the School Facilities Program, which would create a reimbursable mandate. Furthermore, to the extent that local funding sources prove insufficient, the state provides additional economic hardship funding for these hazard assessment requirements under Education Code section 17072.13, subdivisions (d) and (e). For these reasons, therefore the School Facilities Program hazard

assessment requirements are optional and do not qualify as reimbursable state mandates in fact or de facto under *DOF-2003*.

Second, Education Code section 17620, among others, authorizes districts to levy fees, charges, and dedications to fund the local share of school site costs. The multiple levying authorities appear sufficient to cover local costs and the district could withdraw from site acquisition if the costs became exorbitant. Whether the district chooses to levy fees in sufficient quantity is not the proper test. Therefore, the levying authority disqualifies the hazard assessment requirements from being reimbursable under Government Code section 17556, subdivision (d) and the *Santa Margarita Water District* case.

Third, *County of Sonoma* held that shared funding programs such as the school facilities program were not within the ambit of Section 6 of article XIII B of the California Constitution. Therefore the School Facilities Program, a shared state local funding program, is outside the realm of reimbursable mandates. Even if it were not, costs associated with participation in the program do not arise from shifting costs from state to local entities to provide the same services to the public.

Fourth, providing safe school sites was and remains the fiscal and legal duty of the district before 1975 under the various enactments. The hazard assessment conditions on state funding work to provide necessary information to prevent the resulting facility from being unhealthful to children obtaining their compulsory public education. As public safety and health standards, the hazard assessment conditions do not provide a new program or increased level of service to the public as contemplated under the California Constitution's Section 6 of article XIII B, Government Code section 17514, *County of Los Angeles v. Department of Industrial Relations* or *Santa Margarita Water District*.

For all the reasons noted above, as well as any other grounds the Commission may deem proper, the DTSC respectfully urges denial of Clovis Unified School District's Test Claim No. 02-TC-43.

Respectfully submitted,

Antonette Benita Cordero
Chief Counsel and Deputy Director

WHITTIER ELEMENTARY SCHOOL DISTRICT
OF LOS ANGELES COUNTY, Plaintiff and

Respondent,

v.

Robert C. KIRKWOOD, as Controller of the State of
California, Defendant and
Appellant.

Civ. 21915.

Dec. 31, 1956.

Declaratory judgment action by school district against State Controller to determine authority of State Allocation Board to amend order apportioning funds from Public School Building Loan Fund so as to permit district to retain proceeds from sale of replaced school site instead of applying such proceeds toward repayment of the state allocation as required by the resolution which initially approved the allocation. The Superior Court, Los Angeles County, Philip H. Richards, J., entered judgment adverse to Controller and Controller appealed. The District Court of Appeal, Fourn, J., held that Board was authorized to amend the original order so that school district would be entitled to retain the proceeds from sale of the replaced school site.

Judgment affirmed.

Where State Allocation Board had, in original order apportioning funds from Public School Building

Loan Fund for construction of school, required that proceeds from sale of replaced school site be applied toward the repayment of the state allocation, board was thereafter authorized to amend the original order so that school district would be entitled to retain the proceeds from sale of the replaced school site. West's Ann.Education Code, § § 5041 et seq., 5044.5, 5045, 5048, 5050, 5053-5063, 5058, 5059, 5071-5073.

**111 *331 Edmund G. Brown, Atty. Gen., Richard L. Mayers, Deputy Atty. Gen., for appellant.

Harold W. Kennedy, County Counsel, Wm. E. Lamoreaux, Asst. County Counsel, Los Angeles, for respondent.

FOUR, Justice.

This is an appeal by the defendant from a judgment in an action in declaratory relief brought to determine the authority of the State Allocation Board to amend an order apportioning funds from the Public School Building Loan Fund so as to permit the respondent School District to retain the proceeds from the sale of a replaced school site, instead of applying such proceeds toward the repayment of the state allocation, as set forth in the resolution initially approving such allocation.

On about June 5, 1950, respondent, pursuant to the provisions of chapter 1.6 of Division 3 of the Education Code, filed a written application with the State Allocation Board for an allocation of \$2,689,632.70, for the acquisition and construction of certain school facilities set forth therein. The electors of the respondent District, at an election, had authorized the Board of Trustees of the District to accept and expend an apportionment from the State in an amount not to exceed \$3,250,000, pursuant to the law.

On or about January 9, 1951, the State Allocation Board, by Resolution numbered 1389-106, approved an allocation of \$2,452,472, for the purposes set forth in the application. By this Resolution the respondent District was required to contribute to the costs of the contemplated school project 'the net proceeds or credits allowed from the disposition of any sites, improvements, or facilities sold, transferred, or exchanged as a result of the acquisition or construction of any sites, improvements, or facilities pursuant to Chapter 1.6. * * *' The Resolution further provided: 'That the District shall proceed to dispose of any school building area in excess *332 of the

maximum prescribed by Paragraph 2 of this resolution, and any site or sites scheduled to be abandoned as a result of the acquisition or construction of any sites, improvements or facilities pursuant to Chapter 1.6 above, not later than the date the new construction authorized by this resolution is available for occupancy, provided that the terms, conditions and manner of disposition thereof shall be subject to the approval of the Director of Finance, and provided further that if such excess area or sites have not been disposed of by said date, the District shall dispose of the same in accordance with the instructions of the Director of Finance.'

**112 On or about January 20, 1953, the respondent District requested permission to sell the real property owned by the District, known as the Jonathan Bailey School and site, and to retain the proceeds therefrom 'to be used for the construction of additional classroom facilities in accordance with the needs of the District.'

On or about December 16, 1953, the State Allocation Board adopted Resolution No. 1389-106V, which amended Resolution No. 1389-106, in that it deleted from the original Resolution the requirement that the respondent School District contribute to the cost of the specific project as approved the net proceeds obtained from the disposition by the District of any sites, improvements, or facilities sold, transferred, or exchanged. Said Resolution further purported to authorize respondent District to sell the Jonathan Bailey School and site for not less than \$253,600, and to apply the net proceeds obtained from said sale toward providing or constructing additional but unspecified school facilities.

On or about April 26, 1954, the Attorney General advised the appellant that the State Allocation Board had no authority to amend the original Resolution and that such purported amendment was invalid. About September 8, 1954, the respondent District entered into an agreement with the city of Whittier for the sale of the school site for the sum of \$250,600.

The Attorney General, in his brief, sets forth that on October 27, 1954, the State Allocation Board adopted Resolution numbered 1389-106X, which said Resolution apparently took notice of the fact that the Attorney General had been requested by the Chief of the Local Allocation Division to reconsider his opinion of April 26, 1954. Further, it is said that by this Resolution the approval of the State Allocation Board, in allowing the respondent District to retain

the proceeds *333 from the sale of the Jonathan Bailey School and site was specifically made subject to the approval of the Attorney General. The respondent District points out that this particular Resolution (1389-106X) was never received in evidence.

On or about November 12, 1954, the Attorney General reaffirmed his previous opinion. On January 12, 1955, by Resolution numbered 1389-106Y, the State Allocation Board, after taking notice of the opinions of the Attorney General, reaffirmed its previous position. In this latter Resolution there is contained the following:

'2. That Paragraph 2 to-wit: 'That the approval of the Board, allowing the District to retain the proceeds from the disposition of the Jonathan Bailey School and site, is subject to approval of the Attorney General of the State of California', of Resolution No. 1389/106X, adopted October 27, 1954, is hereby rescinded.'

Thereafter, the appellant demanded that the entire sum received, or to be received, by the respondent District from the sale of the Jonathan Bailey School and site be paid to the State of California, and in his demand stated that if said sums were not paid, that the State Controller would deduct the same from the yearly allotments of state funds to the respondent School District.

Some of the pertinent, relevant provisions of the law involved are as follows: Section 5048 of the Education Code as it read in 1950, and as it now reads, authorizes school districts to file applications for state apportionments with the State Allocation Board, and requires that Board to approve or reject the application.

Section 5050 of the Education Code requires that before an allocation becomes final 95% of the bonded capacity of a school district be outstanding, or if not, that the outstanding bonds be within \$25,000 of the total bond limit. The section then provides as follows:

'At the time the board makes a conditional apportionment pursuant to Section 5048, it shall determine what portion of the total amount of bonds which a district is permitted to issue and sell by law shall be issued and sold by such district, the **113 proceeds of which shall be applied toward the cost of the project for which the apportionment is sought. The portion so determined by the board shall be not less than the minimum amount required for such

apportionment to become final under this section.'

The section also requires the electors of the school district, *334 by a two-thirds vote, to authorize the government board of the district 'to accept, expend, and repay, as provided in this chapter, an apportionment under the provisions of this chapter.' As heretofore indicated, such an election was held in the respondent District and authorized the governing board to accept, expend and repay an amount not to exceed \$3,250,000.

A complete scheme of repayment to the State of apportionments made, with interest, over a period of years is provided by sections 5053 to 5063 of the Education Code, section 5059 providing that interest shall cease after twenty-five years and at the end of thirty years any unpaid balance of an apportionment shall be cancelled. Section 5058 provides for the disposition of the repayments as follows:

'5058. The State Controller shall, during the next fiscal year following that in which he determines the annual repayment as herein provided, deduct the total amount of the annual repayment of each district in equal amounts from each installment of the apportionments made to such district from the State School Fund under Chapter 15 of this division; and, on order of the State Controller, the amount so deducted shall be transferred to the Public School Building Loan Fund. All money transferred to the Public School Building Loan Fund under the provisions of this section shall be available only for transfer to the General Fund under the provisions of Section 5103.'

Other than as provided in the above referred to sections, there is no provision, so far as we are able to locate, requiring school districts to apply any other funds, either available at the time of the application or to become available from the sale of assets, towards the construction project or as a reduction or repayment of the apportionment, nor is there any provision in any of the sections requiring the State Allocation Board to include such provisions in the granting of the apportionment, this matter resting wholly within its discretion.

Pursuant to its rule-making power, the State Allocation Board adopted, among others, two rules as follows: Rule 1778 provides that at the time of making an apportionment the State Allocation Board shall prescribe the amount of funds to be contributed by the district toward the construction project, and in determining the amount of available funds may specify that proceeds from the sale of any facilities to

be replaced through an apportionment shall be applied toward the cost of the construction project as such proceeds become available. Thus, by its own rule, the Board has discretion to *335 require the proceeds from the sale of facilities to be used toward the project.

Rule 1781 provides, so far as material, as follows: 'Notwithstanding anything to the contrary in these rules and regulations, the Board shall have power:

* * *

'(c) To modify any apportionment or resolution of apportionment, either conditional or final, where the Board determines that good cause exists therefor.

'This section shall apply to any apportionment or resolution of apportionment heretofore or hereafter made or adopted by the Board.'

The respondent has pointed out that under section 5058 of the Education Code it is required that the State Controller deduct the amount of annual repayments of each district from the apportionments made to such district from the State School Fund and to transfer the amount so deducted to the Public School Building Loan Fund and from there to the General Fund under the provisions of section 5103. The latter section provides for the accumulation of money to retire the State school bonds. Thus, **114 should the appellant deduct the amount here involved from the regular yearly State apportionment to respondent District, it would eventually come to rest in the General Fund and would not be available for an allotment to any other school district.

The only provisions we have been able to locate providing for reimbursing the Public School Building Loan Fund after an allocation has been made to a school district are when the money allocated has been expended for unauthorized purposes, or is in excess of the final cost of the project, under section 5071 of the Education Code; when any unexpended portion of an allocation remains after three years has expired, section 5072 of the Education Code; and when a school site acquired with money allocated is sold within three years, section 5073 of the Education Code. The money in question in the instant case does not fall within any of the categories named.

The respondent also points out that the legislature, in the 1955 session amended section 5048 by adding thereto, among other things, the following:

'The board may for such good cause as it shall

determine, reduce the amount of, or modify any provisions relating to, any contribution required of a school district under the terms of an apportionment, other than any contribution required *336 of such district under Section 5050 from the sale of bonds; provided, that the board may not, without the consent of the district, increase the amount of any district contribution under the terms of an apportionment, in the absence of mistake arising from any source, or misrepresentation, concealment, or omission, on the part of the district, intentional or otherwise. *The provisions of this paragraph shall be applicable to apportionments heretofore or hereafter made.*' (Emphasis added.) (Stats.1955, ch. 1734, §. 3.)

It would appear therefore, that the legislature validated the actions of the State Allocation Board.

The trial judge in this matter prepared an opinion in writing wherein he set forth his reasoning and the law of the case. We believe the cause was correctly and properly disposed of in the trial court and we adopt as part of this opinion the memorandum opinion of the trial court which is as follows:

'The sole question for determination in this case is the authority of the State Allocation Board to amend an order apportioning funds from the Public School Building Loan Fund, so as to permit the plaintiff School District to use the proceeds from the sale of a replaced school site for the construction of additional school buildings, instead of applying such proceeds toward the repayment of the allocation as originally provided in the resolution approving such allocation.

'It is clear that the school building aid program embraced in Article 1, Chapter 1.6, Division 3 of the Education Code is to provide necessary and adequate school sites and buildings for financially distressed school districts.

'While the Act (Section 5048) requires the Director of Finances to determine the district's financial ability to meet all or a portion of the cost out of available funds, there is no provision in the Act which requires the Board to compel the district to contribute any of its available funds or funds which thereafter become available, except in the case of a sale within three years of a site or improvements purchased or improved in whole or in part from an apportionment (Section 5073).

'Rule 1778 adopted by the Board, pursuant to authority of Section 5045, provides that the Board *shall* prescribe the amount of funds to be contributed by the District and *may* specify that the proceeds

from the sale of any facilities to be replaced through an apportionment shall be applied toward the cost of the approved project.

[1]*337 'In the first instance then, it is within the Board's discretion to determine **115 if proceeds from the subsequent sale of replaced facilities shall be applied toward the cost of the project.

'Rule 1781 provides that the Board may modify any apportionment, conditional or final, where the Board determines that good cause exists therefor. With no statutory provision relating to the use of funds subsequently becoming available from the sale of replaced facilities, and with authority to modify an apportionment for good cause, it would appear that the Board has authority to modify the provision of an apportionment requiring the District to contribute the net proceeds from the disposition of any replaced facilities by excepting therefrom the net proceeds acquired by the District from the sale of a particular school and site.

'The Attorney General contends that both the statute and the Board rules require the District to make use of all its available funds before obtaining State aid. This contention is not supported by any provision of the statute or by the Board rules.

'The Attorney General further contends that by modifying the apportionment provision relating to the contribution of proceeds from the sale or replaced facilities, by exempting the proceeds from the sale of one site and improvements, the Board has in effect approved the use of such proceeds for a project without first requiring the District to apply for an apportionment of such sum in the manner prescribed by law. The fallacy of this contention is that the Board is not required by law, nor by its own rules to require such contribution in originally approved apportionment. An expenditure of the District's funds subsequently becoming available is not an allocation from the Public School Building Loan Fund.

'It is a further contention of the Attorney General that to permit the plaintiff to retain and use the proceeds received from the sale of replaced facilities subverts the entire statutory scheme envisaged in the State Building Aid program in that it would render completely ineffectual the priority system contained in the Act. Sec. 5044.5 provides that the Board shall by rule give priority in allocating funds to districts where the children will benefit most from additional facilities. After setting forth the several bases for priority, the section provides that the Board may make exceptions when it determines that it will be for

(Cite as: 147 Cal.App.2d 330, 305 P.2d 110)

the benefit of the children affected. Thus it appears that even a waiver of *338 priority is within the discretion of the Board and not in conflict with the enabling statute.

[2] 'We conclude that the Board was authorized to amend the original resolution by the adoption of the resolution of December 16, 1953, authorizing the District to sell the Jonathan Bailey School and site and to apply the proceeds to the construction of the facilities specified in the amendatory resolution.'

Judgment affirmed.

WHITE, P. J., and DORAN, J., concur.

EXHIBIT B

Supreme Court of California, In Bank.

Guy HALL, Plaintiff and Respondent,

v.

The CITY OF TAFT, a Municipal Corporation, Glen Black, Jack Kirsher, Ted Pheal, William O. Erickson, Dale Huey, as members of the City Council thereof, and Walter McKee, as Chief of Police thereof, Defendants and Appellants.

L. A. 24244.

Oct. 19, 1956.

Building contractor's action to enjoin city and others from enforcing its building ordinance against him in connection with construction of public school building. The Superior Court, Kern County, William L. Bradshaw, J., entered judgment for contractor and defendants appealed. The Supreme Court, Carter, J., held that the state had pre-empted the field of regulating public school building construction so that construction of such building by school districts is not subject to building regulations of municipal corporation within which building is erected.

Affirmed.

Opinion 297 P.2d 686, vacated.

*179 CARTER, Justice.

Defendants, Taft, a non-chartered city of the sixth class, its council and chief of police appeal from a judgment enjoining it from enforcing against plaintiff, a building contractor, its building ordinance.

**576 There is no dispute as to the facts. On April 22, 1955, plaintiff as contractor entered into a contract with Taft Union High School and Junior College District, hereafter called district, a school district duly organized under the state laws, to construct in Taft for the district, a school building for \$614,113. The plans and specifications for the building were approved by the State Department of Education and State Division of Architecture. Plaintiff commenced construction which was to be completed in 320 days, but work was 'stopped' by Taft, the city, demanding that plaintiff obtain a building permit from it involving a \$300 fee and submission to the building ordinance[FN1] of Taft. The district has employed an inspector to assure that the building is constructed according to the plans and specifications. Defendants assert that plaintiff has refused to obtain a permit from the city for the construction of the building and they intend to enforce the penal and civil provisions of the building ordinance of the city.

FN1. Taft by ordinance had adopted the 'Uniform Building Code 1952 edition adopted and published by the Pacific Coast Officials Conference in 1950.'

The issue is whether a municipal corporation's building regulations are applicable to the construction of a public school building by a school district in the municipality. Taft argues that it had power to adopt police regulations building construction regulations under the Constitution.[FN2]

FN2. 'Any county, city, town, or township may make and enforce within its limits all such local, police, sanitary and other regulations as are not in conflict with general laws.' Cal. Const. art. XI, s 11.

[1] The public schools of this state are a matter of statewide rather than local or municipal concern; their establishment, regulation and operation are covered by the Constitution and the state Legislature is given comprehensive powers in relation thereto. The Legislature shall not pass local or special laws 'Providing for the management of common schools.' Cal. Const. art. IV, s 25, subd. 27. 'A general diffusion of knowledge and intelligence being essential to the preservation of the rights and liberties of the people, the Legislature shall encourage by all suitable means the promotion of intellectual, scientific, moral and agricultural improvement.' Emphasis added; id., art. IX, s 1. There *180 is a State Board of Education, an elected superintendent of public instruction and there are county superintendents whose salary and qualifications are prescribed by the Legislature, id., art. IX, ss 3, 3.1, 7. The proceeds of all public lands that have been or may be granted by the United States to the state and other property is 'inviolably' appropriated to the support of the common schools, id., art. IX, s 4, and 'Out of the revenue from state taxes for which provision is made in this article, together with all other state revenues, there shall first be set apart the moneys to be applied by the State to the support of the Public School System and the State University.' Id., art. XIII, s 15. 'The Legislature shall provide for a system of common schools by which a free school shall be kept up and supported in each district at least six months in every year, after the first year in which a school has been established.' Emphasis added; id., art. IX, s 5. 'The Public School System shall include all kindergarten schools, elementary schools, secondary schools, technical schools, and State colleges, established in accordance with law and, in addition, the school districts and the other agencies authorized to maintain them. No school or college or any other part of the Public School System shall be directly or indirectly

transferred from the Public School System or placed under the jurisdiction of any authority other than one included within the Public School System. * * *

[2][3][4] 'The Legislature shall provide for the levying annually by the governing body of each county, and city and county, **577 of such school district taxes, at rates not in excess of the maximum rates of school district tax fixed or authorized by the Legislature, as will produce in each fiscal year such revenue for each school district as the governing board thereof shall determine is required in such fiscal year for the support of all schools and functions of said district authorized or required by law.' Emphasis added; *id.*, art. IX, s 6. A school district may lie in more than one county and may issue bonds. *Id.*, art IX, s 6 1/2. No money shall ever be appropriated for 'any school not under the exclusive control of the officers of the public schools * * *.' *Id.*, art. IX, s 8. 'The Legislature shall have power, by general law, to provide for the incorporation and organization of school districts, high school districts, and junior college districts, of every kind and class, and may classify such districts.' Emphasis added; *id.*, art. IX, s 14. In harmony with those provisions it has been held that the power of the state Legislature over *181 the public schools is plenary, subject only to any constitutional restrictions. Waring, 36 Cal.2d 149, 222 P.2d 669. The public school system is of statewide supervision and concern and legislative enactments thereon control over attempted regulation by local government units. Esberg v. Badaracco, 202 Cal. 110, 259 P. 730; Cloverdale Union High School Dist. of Sonoma County v. Peters, 88 Cal.App. 731, 264 P. 273; Piper v. Big Pine School Dist., 193 Cal. 664, 226 P. 926; Kelso v. Board of Education, 42 Cal.App.2d 415, 109 P.2d 29; Kennedy v. Miller, *supra*, 97 Cal. 429, 32 P. 558; Worthington School Dist. v. Eureka Dist., *supra*, 173 Cal. 154, 159 P. 437; Board of Education of City of San Rafael v. Davidson, 190 Cal. 162, 210 P. 961; Phelps v. Prussia, 60 Cal.App.2d 732, 141 P.2d 440; Lansing v. Board of Education, 7 Cal.App.2d 211, 45 P.2d 1021; People ex rel. Davidson v. Mertz, 2 Cal.2d 136, 39 P.2d 422; Gerth v. Dominguez, 1 Cal.2d 239, 34 P.2d 135. It is said in Piper v. Big Pine School Dist., *supra*, 193 Cal. 664, 669, 226 P. 926, 928: 'It (the education of the children of the state) is in a sense exclusively the function of the state which cannot be delegated to any other agency. The education of the children of the state is an obligation which the state took over to itself by the adoption of the Constitution. To accomplish the purposes therein expressed the people must keep under their exclusive

control, through their representatives, the education of those whom it permits to take part in directing the affairs of state.' School districts are agencies of the state for the local operation of the state school system. Cloverdale Union High School Dist. of Sonoma County v. Peters, *supra*, 88 Cal.App. 731, 738, 264 P. 273; Board of Education of City of San Rafael v. Davidson, *supra*, 190 Cal. 162, 168, 210 P. 961; Butler v. Compton Junior College Dist., 77 Cal.App.2d 719, 176 P.2d 417; Lansing v. Board of Education, *supra*, 7 Cal.App.2d 211, 45 P.2d 1021; Merrill Elementary School Dist. of Tehama County v. Rapose, *supra*, 125 Cal.App.2d 819, 271 P.2d 522. The beneficial ownership of property of the public schools is in the state. It is said in Pass School Dist. of Los Angeles County v. Hollywood Dist., *supra*, 156 Cal. 416, 419, 105 P. 122, 124, 26 L.R.A.,N.S., 485: 'To the contention that a transfer of ownership thus accomplished works the taking of property without due process of law, it should be sufficient *182 to point out that in all such cases the beneficial owner of the fee (of public school property) is the state itself, and that its agencies and mandatories the various public and municipal corporations in whom the title rests are essentially nothing but trustees of the state, holding the property and devoting it to the uses which the state itself directs. The transfer of title without due process **578 of law, of which appellant so bitterly complains, is nothing more, in effect, than the naming by the state of other trustees to manage property which it owns and to manage the property for the same identical uses and purposes to which it was formerly devoted. In point of law, then, the beneficial title to the estate is not affected at all. All that is done is to transfer the legal title under the same trust from one trustee to another. In this sense the trustees of the Hollywood City School District became, by operation of law, successors to the trustees of the Pass School District, as is directly held in (School Township of) Allen v. School Town of Macey, 109 Ind. 559, 10 N.E. 578, where it is said: 'It is now a well-recognized legal inference deducible as well from general principles as from the decided cases that under the Constitution and laws of this state, public school property is held in trust for school purposes by the persons or corporations authorized for the time being to control such property, and that it is in the power of the Legislature to provide for a change in the trusteeship of such property in certain contingencies presumably requiring such a change, or, indeed, to change the trustees of that class of property whenever it may choose to do so.'

[5] Even if such well-established principles could be set aside under the plea that they work injustice in the individual case, this plea here presented is without merit. The state is profoundly interested in the education of its young, but has no deep concern over the personality of the trustees who shall administer this trust, so long as the administration is in the orderly form of law.' See.

Fawcett v. Ball, 80 Cal.App. 131, 136, 251 P. 679; Butler v. Compton Junior College Dist., 77 Cal.App.2d 719, 176 P.2d 417; Kennedy v. Miller, 97 Cal. 429, 32 P. 558; Gridley School District v. Stout, 134 Cal. 592, 66 P. 785. While a large degree of autonomy is granted to school districts by the Legislature, we are referred to no statute or constitutional provision which, as far as the question here involved is concerned, expressly makes school buildings or their construction any more amenable to regulation by a municipal corporation than structures which are *183 built and maintained by the state generally for its use. When it engages in such sovereign activities as the construction and maintenance of its buildings, as differentiated from enacting laws for the conduct of the public at large, it is not subject to local regulations unless the Constitution says it is or the Legislature has consented to such regulation. Section 11 of article XI of the state Constitution, supra, should not be considered as conferring such powers on local government agencies. Nor should the Government Code sections which confer on a city the power to regulate the construction of buildings within its limits, see Government Code, ss 38601, 38660, be so considered. It is said in In re Means, 14 Cal.2d 254, 258, 93 P.2d 105, 107, 123 A.L.R. 1378, holding that a state employee working on a state structure in a city need not meet the requirements of a city charter provision: 'If one who has been employed by the state may not work on state property within a municipality without the consent of the municipality obtained after examination, the city has, in effect, added to the requirements for employment by the state, and restricted the rights of sovereignty. * * *

'Turning to the contentions of the respondent that the regulation of plumbing is a municipal affair, the rule to be applied is not entirely a geographical one. Under certain circumstances, an act relating to property within a city may be of such general concern that local regulation concerning municipal affairs is inapplicable. * * * For example, where one of the city's streets has been declared by an act of the legislature to be a secondary highway, the improvement of that street is not a municipal affair within the meaning of the Constitution. * * * Also, regulations prescribed by charter or ordinance of a city requiring that the work of altering and improving buildings be subject to **579 local supervision have been held inapplicable to state buildings. City of Milwaukee v. McGregor, 140 Wis. 35, 121 N.W. 642, 17 Ann.Cas. 1002.

'In the case of Kentucky Institution for Education of Blind v. City of Louisville, 123 Ky. 767, 97 S.W. 402, 404, 8 L.R.A., N.S., 553, the city attempted to enforce an ordinance relating to fire escapes with respect to a state institution for the blind. The court held the ordinance inapplicable, stating: 'The principle is that the state, when creating municipal governments, does not cede to them any control of the state's property situated within them,

nor over any property which the state has authorized another body or power to control. *184 The municipal government is but an agent of the state not an independent body. It governs in the limited manner and territory that is expressly or by necessary implication granted to it by the state. It is competent for the state to retain to itself some part of the government even within the municipality, which it will exercise directly, or through the medium of other selected and more suitable instrumentalities. How can the city have ever a superior authority to the state over the latter's own property or in its control and management? From the nature of things it cannot have." See, also, Board of Education of City of St. Louis v. City of St. Louis, 267 Mo. 356, 184 S.W. 975; Salt Lake City v. Board of Education, 52 Utah 540, 175 P. 654; 31 A.L.R. 450.

Pasadena School Dist. v. City of Pasadena, 166 Cal. 7, 134 P. 985, 47 L.R.A., N.S., 892, fails to consider the factors above mentioned and insofar as it is inconsistent with this opinion it is overruled. The question here considered was not involved in Roman Catholic Welfare Corporation of San Francisco v. City of Piedmont, 45 Cal.2d 325, 332-333, 289 P.2d 438.

[6][7] Moreover, in connection with the foregoing and as an additional ground why the construction of school buildings by school districts are not subject to the building regulations of a municipal corporation in which the building is constructed, is that the state has completely occupied the field by general laws, and such local regulations conflict with such general laws, when we consider the activity involved. A city may not enact ordinances which conflict with general laws on statewide matters. Simpson v. City of Los Angeles, 40 Cal.2d 271, 253 P.2d 464; Pulcifer v. County of Alameda, 29 Cal.2d 258, 175 P.2d 1; Ex parte Daniels, 183 Cal. 636, 192 P. 442, 21 A.L.R. 1172; Atlas Mixed Mortar Co. v. City of Burbank, 202 Cal. 660, 262 P. 334; Ganley v. Claeys, 2 Cal.2d 266, 40 P.2d 817; In re Murphy, 190 Cal. 286, 212 P. 30; In re Mingo, 190 Cal. 769, 214 P. 850; Natural Milk Producers Ass'n of California v. City & County of San Francisco, 20 Cal.2d 101, 124 P.2d 25; Pipoly v. Benson, 20 Cal.2d 366, 125 P.2d 482, 147 A.L.R. 515; Tolman v. Underhill, 39 Cal.2d 708, 249 P.2d 280. The particular situation presented and discussed in those cases is not helpful. In re Means, supra, 14 Cal.2d 254, 93 P.2d 105, 123 A.L.R. 1378, herein discussed is most pertinent as it involves the attempted regulation of a state activity by a city, as distinguished from regulations of the members of the public.

The Education Code sets out a complete system for the construction of school buildings. The Legislature there declares *185 that it is in the interest of the state to aid school districts in the construction of school buildings for the maintenance of the public school system.

inasmuch as the system is of general concern and the education of the children is an obligation and function of the state. Ed.Code, ss 5021, 5041. The governing board of any school district shall manage and control the school property within its district, id., s 18001. It (the board) shall furnish and repair the school property. Id., s 18002. It shall provide as a part of school buildings patent flush water closets for the use of the pupils, id., s 18009. It may repair old buildings by day's labor or by force account, id., ss 18055, 18057. The State Department of Education shall: 'Establish standards for school buildings', review and approve all plans and specifications for buildings and disapprove those not meeting the standards, furnish plans, specifications and 'building codes,' and make rules and regulations to carry out those activities, id., ****580**ss 18102, 18101. 'The governing board of any school district may, and when directed by a vote of the district shall, build and maintain a schoolhouse', id., s 18151. Except in cities having a board of education the county superintendent shall pass upon all plans for school buildings and plans shall be submitted to him. 'The Division of Architecture of the Department of Public Works under the police power of the State shall supervise the construction of any school building or, if the estimated cost exceed four thousand dollars (\$4,000), the reconstruction or alteration of or addition to any school building, for the protection of life and property.' Id., s 18191. "Construction or alteration' as used in this article includes any construction, reconstruction, or alteration of, or addition to, any school building.' Id., s 18193. 'The Division of Architecture shall pass upon and approve or reject all plans for the construction or alteration of any school building. To enable it to do so, the governing board of each school district and any other school authority before adopting any plans for a school building shall submit the plans to the Division of Architecture for approval, and shall pay the fees prescribed in this article.' Id., s 18194. 'Before letting any contract for any construction or alteration of any school building, the written approval of the plans, as to safety of design and construction, by the Division of Architecture, shall be first had and obtained.' Id., s 18195. 'In each case the application for approval of the plans shall be ***186** accompanied by the plans and full, complete, and accurate specifications, and structural design computations, and estimates of cost, which shall comply in every respect with any and all requirements prescribed by the Division of Architecture.' Id., s 18196. All plans and specifications shall be prepared by a duly state licensed architect or engineer and the supervision of the work shall be by a duly licensed person. Id., s 18199. No contract for construction is valid and no public money shall be paid for any work or materials furnished thereunder 'unless the plans, specifications, and estimates comply in every particular with the provisions of this article and the requirements prescribed by the Division of Architecture and unless the approval thereof in writing has first been had and obtained from the division.' Id., s

18200. Progress reports must be made to the division, id., s 18201. 'The State Division of Architecture shall make such inspection of the school buildings and of the work of construction or alteration as in its judgment is necessary or proper for the enforcement of this article and the protection of the safety of the pupils, the teachers, and the public. The school district, city, city and county, or the political subdivision within the jurisdiction of which any school building is constructed or altered shall provide for and require competent, adequate, and continuous inspection during construction or alteration by an inspector satisfactory to the architect or structural engineer and the Division of Architecture. The inspector shall act under the direction of and be responsible to the architect or structural engineer.' Emphasis added; id., s 18203. The division may adopt rules and regulations to carry out its duties and a violation of the provisions is a felony, id., ss 18202, 18204. If the supervisor of health of any school district notes any defect in 'plumbing, lighting, or heating,' he shall report to the district and if it does not act, to the county superintendent. Id., s 18221. Each building, if two or more stories, shall have fire escapes, id., s 18222.

[8] It is urged, however, that the foregoing provisions must be read in the background in which they were adopted, that is, that some of them were placed in the ****581** Education Code from the Field Act adopted in 1933, Stats.1933, ch. 59, and must be construed with the Riley Act of 1933, Stats.1933, ch. 601, now in the Health & Safety Code, sections 19100-19170. The Riley Act provides that all buildings (with certain exceptions Health & Safety Code, s 19100) must meet certain standards which are set forth, id., ss 19150, 19151. ***187** Building permits must be obtained from the proper city or county officers charged with the enforcement of laws regulating construction, id., s 19130. Any city or county may establish construction standards higher than those established by sections 19150 and 19151 of the Health & Safety Code. Plans and specifications for buildings shall be filed with the application for a building permit, id., s 19132. Both the Field and Riley Acts were enacted as urgency measures, the urgency being stated to be the series of earthquakes occurring shortly prior thereto, Stats.1933, ch. 59, s 9; 1933, ch. 601, s 8. We do not believe, however, that the Health & Safety Code provisions (Riley Act) limit or modify the provisions of the Education Code (Field Act) above discussed. The former deal with structural design aimed at procuring buildings less dangerous from the standpoint of earthquakes, Health & Safety Code, ss 19150, 19151, while the latter, as above pointed out, are broad and comprehensive including the whole field of construction regulations. The urgency that impelled the Legislature to enact both as urgency measures may have been the same but the scope is clearly different. Hence the provisions in the former providing for more stringent local regulations are not applicable to the latter.

[9] Reference is made to rules and regulations, past and present, adopted for the construction of school buildings under the Education and Health & Safety Codes. Calif. Administrative Code, Title 21, Public Works, Division of Architecture, Chap. 1, subchap. 1. The purpose of the rules (we refer to the rules now in existence) is to protect lives and property of the people by regulating the design and construction of public school buildings so that, in addition to the normal loads to which such buildings are subjected, they shall resist future earthquakes. Title 21, subchap. 1, Group 1, Art. I, s 1. The rules are intended to establish 'reasonable standards and minimum requirements' for the construction of such buildings in order to attain the requisite stability to withstand loads and forces 'and to insure safety of construction' id., s 2. The detailed regulations set forth in sections 101 to 1206 have been adopted as a basis for the approval of plans and specifications. 'It is not the intention to limit the ingenuity of the designer nor to interfere with existing building rules and regulations where such rules and regulations are more stringent. Where the designer desires to depart from the methods of analysis set up by these rules and regulations, it will be necessary that he submit his method in detail *188 together with complete information including computations and test data covering the design in question. Permission to deviate from these rules and regulations is optional with the Division of Architecture and is dependent upon the division being satisfied that the structural members or portions of the building involved would provide at least such safety as would have been obtained had these rules and regulations been adhered to strictly.' Id., s 70. 'Regulations and design values established in these rules and regulations are minimum requirements. Nothing herein contained shall be interpreted to interfere with or to waive the requirements of applicable local or state building laws or ordinances where the requirements of those laws are more stringent than the requirements of these rules and regulations.' Id., s 115. However, it is also provided that: 'No rule or regulation shall be construed to deprive the Division of Architecture of its right to exercise the powers conferred upon it by law, or to limit the division in such enforcement of the act as is necessary to secure safety of construction and the proper administration of the law.' Id., s 5.

**582 [10] It is very doubtful that those rules indicate an intention to interpret the Education Code sections to mean that a city's building regulations must be met in the construction of a school building. They tend more to indicate that the school districts could follow such regulations as well as those of the state but are not bound to do so. In any event, since the final construction of a statute is the function of the courts (2 Cal.Jur.2d, Administrative Law, s 17), we hold the statutes here involved should not be construed as requiring a school district to comply with the building regulations of a city.

There is no necessity for comparing in detail Taft's building code and the numerous comprehensive building regulations contained in the Education Code and the rules and regulations of the Division of Architecture, for as we have seen the state has occupied the field. As said in In re Means, supra, 14 Cal.2d 254, 258, 260, 93 P.2d 105, 107, 123 A.L.R. 1378, in speaking of the effect of a city ordinance, establishing standards for plumbers, on a state employee in a city, the state civil service system provides a comprehensive plan for the selection of state employees and although the city ordinance does not purport to prescribe the conditions for state employment, 'If one who has been employed by the state may not work on state property within a *189 municipality without the consent of the municipality obtained after examination, the city has, in effect, added to the requirements for employment by the state, and restricted the rights of sovereignty. * * *

'Although the legislature has enacted no statute regulating plumbing, if the city's ordinance is a valid exercise of power, then one whom the state has examined and found eligible for employment as a plumber and who has later entered the state civil service, may be unable to work on state property because he cannot pass the examination of a city health officer or licensing board. The result is a direct conflict of authority. Either the local regulation is ineffective or the state must bow to the requirement of its governmental subsidiary. Upon fundamental principles, that conflict must be resolved in favor of the state.' (Emphasis added.) The same comments apply to the references in the instant construction contract and specifications that the building is to be constructed in compliance with local regulations.

The judgment is affirmed.

GIBSON, C. J., and SHENK, TRAYNOR, SCHAUER, SPENCE and McCOMB, JJ., concur.

EXECUTIVE SUMMARY

As California enters the 21st Century, its public schools face many challenges. One significant challenge is the serious disrepair of an aging school facility infrastructure. Another challenge is the anticipated growth of nearly 2 million K-12 students during the next decade that will require many districts to build new schools to meet burgeoning student demand. Recognizing the substantial need for infrastructure, in November 1998, California voters passed Proposition 1A, a bond measure that provides \$6.7 billion for public K-12 school construction and repair.

This measure establishes two new programs for the disbursement of bond funds and simplifies the application process by which schools apply for school construction resources. This change in programs, and in the methods by which funds are allocated, is important to the people of the State, as school districts, many of which have facilities in serious disrepair or require new construction, vie for their portion of the \$6.7 billion pie.

Historically, the process by which schools applied for and received construction funds was cumbersome and complex. Furthermore, the research suggests that school districts that were sophisticated and knowledgeable about the complicated school facilities construction process were the most successful in securing funding – often at the expense of less sophisticated and uninformed school districts. Proposition 1A corrects much of this dynamic by simplifying the application and administrative processes, thereby creating a more level playing field for all school districts.

In order to understand the significance and relevance of this new process and its concomitant programs, however, it is useful to review the history of school construction financing in California and to understand the various pitfalls that existed under previous programs so as to avoid similar pitfalls in the future. This paper discusses that history and highlights the problems with preexisting programs.

It begins with an examination of the State Allocation Board and its staff (the Office of Public School Construction). Specifically, it reviews the role of the Board which is responsible for establishing policies for the distribution of school facility financing funds. It discusses how the Board, which was established in 1947, has evolved during the past five decades from one that set policy for various *loan* programs to one that today sets policy for *grant* programs.

The paper also discusses how various externalities—legislative or voter imposed initiatives, such as Proposition 13—have affected the Board's policies and procedures. The paper notes that the Board changed its policies often, and its policy shifts created an untenable dynamic for school districts as they attempted to secure funding. In particular, the paper highlights how districts were forced to weave their way through a complex, bureaucratic maze of applications, forms, and plans; and how this dynamic forced school districts to employ sophisticated personnel, or to contract with savvy consultants, in order to secure state financing for their construction projects.

This paper also presents a history of bond initiatives during the past five decades. It is clear that throughout this history there was never enough State money available to school districts for facility construction or repair. In fact, in spite of the \$6.7 billion approved by Proposition 1A, experts estimate that an additional \$10 billion will be required during the next decade. This paper discusses how the constant shortage of funds caused districts to use "whatever" means available to them to secure funding.

Voters have consistently been generous in approving the vast majority of statewide bond initiatives. Only three bond proposals out of 24 have failed in the past 50 years, and those that failed did so during times of recession. However, it is not clear how much additional debt voters will be willing to incur. This has especially been true since the passage of Proposition 13 in 1978, when the State began taking on a larger role in supporting school construction than it had before. To that end, this paper discusses how Proposition 1A creates a mechanism for school districts to tap state resources, and how school districts may need to tap other sources of facility funding.

Proposition 1A forges a partnership between the State and school districts for financing the construction and repair of their schools. Under its new programs, the State will provide 50 percent of the cost associated with building new schools, and provide 80 percent of the cost associated with modernizing existing facilities. It requires school districts to match state resources. However, school districts that are unable to offer this match can receive hardship funds based on prescriptive criteria. This paper provides details regarding these new programs and compares them to programs previously administered by the State Allocation Board. It also discusses how the Board is required to respond to district requests.

Proposition 1A is not the only impetus behind simplifying the school facility financing process. Concurrently, the Office of Public School Construction has rewritten the application process for funds to make it more user-friendly to school districts and has even offered applications and program information via the Internet. This paper discusses these changes.

The paper concludes with options that the Governor and the Legislature may wish to consider, including: offering protection to small and rural school districts when bond funds are exhausted; requiring annual financial reporting by the State Allocation Board; providing an on-line technical support for program applicants; and redeveloping the State funding source for school facility construction and rehabilitation.

REQUEST FOR RESEARCH

Programs and administrative procedures in Proposition 1A may produce significant changes to the previous programs and the manner by which the State Allocation Board distributes resources for school facility construction. In light of these changes, Senator Quentin Kopp requested that the California Research Bureau provide research on the following topics:

- A history of the State Allocation Board. How was the board's funding program intended to work and how has it evolved?
- An explanation of the State Allocation Board process. How does the State Allocation Board work? What are the procedures and criteria for receiving allocations? How are priorities set?

INTRODUCTION—THE PASSAGE OF PROPOSITION 1A

On November 3, 1998, California voters passed Proposition 1A - a \$9.2 billion school bond initiative, and the largest of its kind passed in our nation's history. Over the next four years, revenues from Proposition 1A's general obligation bonds will provide \$6.7 billion to public K-12 schools and \$2.5 billion to public colleges and universities for the purposes of constructing new facilities and repairing existing ones.

The State Allocation Board will have the responsibility for determining a fair means of distributing the \$6.7 billion available to K-12 schools. Many experts feel that developing such a system will be a daunting task, in spite of the fact that Proposition 1A/Senate Bill 50 is very prescriptive regarding the allocation of its bond funds.

This paper begins with a history and a discussion of the role of the State Allocation Board. Next, it examines the 24 state bond initiatives since 1947 and discusses how the Board has evolved its policies for distributing resources generated by these bond efforts. It then presents an overview of Proposition 1A and how this initiative creates a new allocation program that differs from previous ones. The paper also discusses the various problems that existed within the State Allocation Board's previous resource allocation systems and how Proposition 1A addresses these problems. It concludes with a section that offers options that the Legislature may wish to consider regarding the policies that the State Allocation Board should use for the equitable distribution of bond funds.

HISTORY OF THE STATE ALLOCATION BOARD AND ITS ROLE IN SCHOOL FACILITY FINANCING

There is a long and complex history regarding public school construction in California. This paper begins a review of the history in 1947¹ when the state legislature created the State Allocation Board.² Chapter 243, Statutes of 1947, established the State Allocation Board³ as a successor to the Post War Public Works Review Board. That statute specifically authorized the board to allocate funds for building and repairing schools. In addition, it designated the State Allocation Board to make allocations for public works projects when no other state officer or agency had authority to appropriate state or federal funds.⁴ Although it had many other fund allocation requirements during its five-decade history, the State Allocation Board today allocates funds only for school construction and renovation.

Composition of the Board

The State Allocation Board is comprised of seven members: two Senate members appointed by the Senate Rules Committee; two Assembly members appointed by the Speaker of the Assembly; the Director of the Department of General Services or his/her designee; the Director of the Department of Finance or his/her designee; and the Superintendent of Public Instruction or his/her designee. This appointment structure has existed since the Board's inception in 1947.⁵

Although its basic appointment structure is set in statute, its actual membership changes over time. One member, Senator Leroy Greene, served on the Board for over 20 years. Some Board members have served for only one meeting, while others have served an entire legislative session.

The four legislatively appointed State Allocation Board members provide a strong policy influence to the State Allocation Board. Through them, other members of the Legislature have input into the Board's policy and decision-making processes.

Policy Requirements

Members of the State Allocation Board are charged to formulate fair systems for determining priorities among project proposals. Prior to the passage of Proposition 1A/SB 50 in 1998, the Board was responsible for developing a fair and equitable appeals process that addressed the "special needs" of school districts. Such "special needs" included disaster relief, inability to secure matching funds, or inability to locate affordable property.

Board members also had extraordinary power to set school facility financing policy. Although the Board falls under the auspices of the State Administrative Procedures Act, it has often ignored the Act's provisions. It was common that board policies were changed from meeting to meeting, and that these new policies were not readily made public.⁶ Therefore, school districts that were uninformed of existing policy operated at a distinct disadvantage. They may not have known the appropriate procedures for receiving

financing approval. Conversely, school districts that utilized hired consultants or had staff that regularly monitored the Board's actions knew exactly what mechanisms and procedures would be necessary for them to secure funding.

State Allocation Board Staff

The Office of Public School Construction (formerly the Office of Local Assistance), within the Department of General Services, was and continues to be responsible for providing staff work that is necessary to carry out the policies and implement the various programs of the State Allocation Board. The State Allocation Board is responsible for policies regarding the allocation of funds for building new schools and for repairing, upgrading, and rehabilitating old ones.

The Office of Public School Construction staff is also responsible for disseminating to school districts information regarding board policy and programs. Under its previous programs, the staff was responsible for making recommendations to the State Allocation Board regarding various appeals made by school districts that may have been denied funding, or that may have required special funding consideration. To that end, the Office of Public School Construction staff influenced where school districts fell on the long queue of project proposals considered and passed by the State Allocation Board. Staff also could have influenced Board decisions by advocating for specific school district projects.

Outside Influence

The State Allocation Board and the Office of Public School Construction staff have also been influenced by a variety of external interest groups. These include, but are not limited to, private school facility financing consultants, school board members, school administrators, teachers, parents, developers, California Building Industry Association, financial institutions, and other members of the Legislature. In addition, various state agencies with influence included the Division of State Architect, Department of Finance, and the Department of Education. These interests groups played and are likely to play a significant role in determining funding for projects that may have been denied or required special consideration. Consultants in particular, whether employed by or on contract with school districts, played an active role in the process. Many of these consultants, whose offices are in the same building as that of the Office of Public School Construction, influenced decisions of both the Office of Public School Construction staff and the State Allocation Board. Consultants were current on Board policies and procedures, and were highly sophisticated about the complicated processes that school districts must follow in order to obtain funding. They have been instrumental in shepherding proposals through the complex maze of funding phases - application to construction. School districts that did not contract with such advocates were often at a competitive disadvantage.

Evolution of State Allocation Board Programs—From Loans to Grants

The State Allocation Board has evolved markedly during the past five decades. Initially, its school programs provided resources to school districts via *loan programs* in which

districts were required to repay their assistance with property tax revenues. In addition, school districts used local school bonds to finance their various construction projects. In both cases, a two-thirds popular vote was required.

Proposition 13

With the passage of Proposition 13 in 1978, the State Allocation Board's loan orientation was significantly altered. Under Proposition 13, the amount of tax that property owners paid was limited to no more than one percent of the assessed value of their property. Local property tax revenues diminished, and the burden to fund many local government programs was shifted to the State, including public school construction. Further, local governments lost much of their property taxing authority, and the Legislature and Governor were forced to rethink how school districts could repay their existing loans to the State Allocation Board.

Recognizing that many school districts faced bankruptcy by being unable to service their loans, the Legislature in 1979 directed the State Allocation Board to allow school districts four options: (1) withhold payments on their loans; (2) temporarily delay their payments; (3) pay only a portion of their loan obligations; (4) or not pay back their loans at all. Further, with the implementation of these options, the Legislature required that the State Allocation Board shift its policy focus from a *loan-based* program to a *grant-based* program. This shift to grant-based programs remains today.

HISTORY OF SCHOOL BOND INITIATIVES—A CYCLE OF UNDER-FUNDING

The electorate of the state has been ultimately responsible for determining the availability of resources for school construction. The electorate must have confidence in the state's economy, and perceive a need for new and upgraded schools. Without such assurances, the electorate can and has rejected various bond efforts. Since 1949, voters have been asked to approve 24 bond measures related to school construction and renovation, and have passed 21 of these proposals. However, an interesting history follows regarding the content of these initiatives.

State as a Bank—The Loan Program 1949-1978

Legislation enacted in 1949⁷ and 1952⁸ established a loan-grant program "to aid school districts of the State in providing necessary and adequate school sites and buildings for the pupils of the public school system."⁹ During this time period, the first baby boomers entered school, and for the next two decades, California public school enrollment increased by roughly 300 percent.¹⁰ The Legislature recognized that many school districts faced substantial enrollment growth, while lacking the bond debt capacity that was necessary to finance large building programs. In fact, many school districts had reached their financial capacity to service the bonds that they previously incurred.

As a result, the Legislature developed a program to provide loans to school districts that were approaching or were likely to exceed their legal level of bonded indebtedness.¹¹ This new program was financed through State general obligation bonds. This program also required building construction standards and placed fiscal controls on the districts, including maximum cost standards and square feet per pupil limitations.¹² School districts, however, retained control over the design and construction of their facilities. Districts that wanted to participate in the state loan program were required to receive approval from two-thirds of their district's electorate in order to incur the debt. A surcharge on the local property tax provided revenues to service the loan debt.

The State formula provided that the total amount due on some loans would be less than the total amount of the actual loan. Some experts believe that the state's willingness to forgive part of school district loans through this formula was a precursor to the state grant program discussed below.

The First Loan Program Bond Initiatives

In 1949, the state issued its first bond proposal for education facilities financing¹³ in the amount of \$250 million.¹⁴ This first initiative also began a cycle of inadequate funding. In that year, the Legislature thought that \$400 million was necessary (over what school districts could afford above their debt limits) to meet the need of school districts that were facing enrollment growth from the new generation of baby boomers. However, after substantial debate, the bond proposal was reduced to \$250 million, because the sponsors thought, "the people would not vote for such a large sum at one time."¹⁵ In arguments

against the bond, opponents argued that \$250 million was insufficient. Therefore, absent full funding, voters should reject the initiative. The measure passed.

In 1952, another school construction bond of \$185 million was put before the voters. Proponents of this initiative stated that the amount was "extremely" conservative. A comprehensive study by the State Department of Education at that time revealed that \$198 million was needed, while the Department of Finance estimated the need at \$250 million. Again, the amount of needed resources surpassed the amount proposed, and the cycle of chronically under-funded facility financing for schools continued.

To further exacerbate the shortfall, the 1952 proposition, along with subsequent propositions offered in 1956, 1958, and 1960, included "poison pill" language that limited the Legislature's ability to appropriate any additional funds for school construction beyond that in the various propositions.¹⁶ If the Legislature approved any additional resources for school construction, the amount of bonds that were sold would be reduced by an amount equal to the additional appropriation. After 1960, however, bond proposals excluded the language that precluded the Legislature from raising additional capital outlay funds.

During a two-decade period, the State Allocation Board administered this program as a bank. Resources from the state were limited, and many school districts were uncomfortable with the concept of borrowing money from the state, rather than from their local constituents. Further, since school districts were obligated to reach full bond indebtedness before applying for state loans, many did not participate. For these reasons, many school districts chose not to build facilities until their bonding capacity grew. Hence, many school districts found themselves chasing dollars after their schools were overcrowded—a situation not unlike today.

The Early 1970s

As a result of a major earthquake in the San Fernando Valley (Sylmar) in 1971, the state authorized \$30 million¹⁷ for a new program to finance the rehabilitation and construction of earthquake safe schools,¹⁸ and for the renovation of buildings that the earthquake damaged.¹⁹ This program was known as the School Buildings Safety Fund. Like its predecessor programs, the 1971 Act created a state loan program for eligible school districts. The Act also included provisions to forgive loans for school districts that had reached their bonding capacity. The 1971 program was augmented by a 1972 state bond initiative of \$350 million of which \$250 million was set aside for structural repairs due to earthquakes.²⁰ This latter bond initiative also provided a method for financing buildings in districts that did not meet the criteria of the program that was initiated in 1971,²¹ and it required the State Allocation Board to first approve those applications from school districts for earthquake repairs. The State Allocation Board gave second consideration to funding projects for other types of repairs or upgrades. Hence, the Board began a new system for not only new construction but also repairs, as well as a system that set priorities.

A Changing Paradigm

From 1970 to 1980, public school enrollment statewide decreased by roughly one percent per year.²² Reductions in both immigration and domestic in-migration to the state, as well as a decrease in the state's birth rate caused this decline. During this decade, there were sufficient resources available from local property tax revenues and from the state's loan program to meet the various rehabilitation needs especially of those school districts that were experiencing enrollment declines. The State Allocation Board thus shifted its loan program emphasis from new construction to rehabilitation, and to upgrading unsafe facilities that were damaged due to the 1971 earthquake.²³

Nevertheless, some school districts continued to experience enrollment growth in response to suburban housing development.²⁴ In spite of such growth patterns, the State Allocation Board set its priorities to favor rehabilitation projects over new construction. The Board's orientation accentuated the differences between growing school districts and those that required rehabilitation, and caused an unequal state spending system that favored property rich urban districts over fiscally poor and growing suburban districts.²⁵

To counter the State Allocation Board's orientation toward urban rehabilitation, growing suburban school districts recognized that in order to fund new school construction, they would have to depend almost entirely on their local property tax base. As more people demanded affordable housing in suburban neighborhoods, developers accommodated them by building numerous suburban housing units. The sheer increase in the number of suburban homes added significant resources to the property tax base, thereby benefiting the school districts that served those communities. Furthermore, the ongoing demand for suburban housing caused the prices of homes in these areas to increase precipitously, adding even more resources to the property tax base. Although school districts could have requested to reduce those tax rates that supported them to a minimum amount, they did not. Most districts kept their rates steady, and some even increased them. Homeowners, unhappy about menacing property taxes, sought relief. In 1972, the Legislature enacted a multi-year package, funded by the state's general fund, of \$1.2 billion for school operation to be allocated over a three-year period and to serve as property tax relief.²⁶ In spite of this legislation, property taxes remained relatively high to cover local bond debt, and continued to be the primary source for school construction for growing school districts. Concurrently, the state continued to loan money to enrollment-static school districts for the purpose of rehabilitation.

Leroy Greene State School Building Lease Purchase Law

In 1976, the Leroy Greene State School Building Lease Purchase Law was signed into legislation.²⁷ This law established a state fund to provide loans to school districts for reconstruction, modernization, and replacement of school facilities that were more than 30 years old. The Act significantly altered the state's role in how school facilities construction was financed. Specifically, the state would no longer loan money; but it would finance school construction based on a leasing model.²⁸ Although the legislation was passed, the voters of the State remained unconvinced that more money was needed to

improve schools. Consequently, they did not pass the bond initiative that was necessary to fund the Lease Purchase Program.

The 1976 Act had specific language that created "priority points" for school districts that would apply for state funding. This was the first time that the State Allocation Board used a point system for creating a queue of approved projects. Priority points were given based on the number of unhoused students in the district, the rate of student enrollment growth, and how much rehabilitation a facility needed. Further, the Board instituted a first-come, first-served policy in which each accepted school district's application was stamped with a time and date.

Under the previous program, the state loaned money to school districts to build their facilities, and the school districts owned their property. Under the Greene legislation, however, the State maintained a lien on the property for the duration of the loan via a lease purchase agreement.²⁹ The State wanted to preclude school districts from purchasing land on a speculative basis using State money, only to sell the State funded property at a profit at a later date. This meant that the state would control the disposition of any school facility that it financed until the school district repaid its obligation on the lease.

The Proposition 13 Epoch 1978-1986.

Proposition 13—Local Governments and School Districts Fiscally Stymied

With its passage, Proposition 13 eliminated the ability of local school districts to levy additional special property taxes to pay off their facility indebtedness. Proposition 13 capped the ad valorem tax rate on real property at one percent of its value, thereby reducing the income from property taxes to such an extent that it virtually eliminated this source as a means for lease payments. Proposition 13 also prohibited the electorate of a school district from authorizing a tax over-ride to pay debt service on bonds for the purpose of constructing needed school facilities.

To exacerbate this problem, the voters soundly defeated school construction bonds in both 1976 and 1978. They were two of only three³⁰ state general obligation bonds rejected by voters since 1947. The non-passage of these two successive bond initiatives, coupled with suburban enrollment growth, caused a statewide shortfall of \$550 million³¹ that was needed for school construction projects throughout the state in 1978.

Post Proposition 13

The limitations set by Proposition 13 caused school districts, counties and cities to turn to the state, which had a \$3.8 billion surplus, to fill the gap.³² In 1979, lawmakers approved a \$2.7 billion (in 1978 dollars) "bailout" plan to assist schools and local governments.³³ Within a year, the state surplus was reduced to roughly \$1 billion. Furthermore, the state had taken on a larger role as a funding source for school operations and capital improvement. To that end, it expected school districts to conform to its programs and projects.³⁴

Effects of Proposition 13 on the Lease Purchase Program

In 1979, legislation implementing Proposition 13 included provisions for restructuring the State's Lease Purchase Program.³⁵ School districts that received funds from the state were required to pay rent to the State as low as \$1 per year, creating an "unofficial" grant program.³⁶ In addition, school districts were to contribute up to 10% of the project's cost from local funds.³⁷ However, many school districts could not raise these matching funds through local bonds. They requested that the State fund their entire projects. The State Allocation Board created a waiting list of projects.

A Recession Further Complicates School Facility Financing

Beginning in 1982, California was in a recession that lasted until 1984. During this time period, the State's budget surplus was expended. School districts' recession experiences were complicated by the fact that student enrollments again began to increase again.³⁸ Approximately 60 percent of California's 1,034 districts at the time projected annual growth rates of over two percent between 1980-81 and 1983-84, with some districts projecting a doubling in their enrollment.³⁹ At the same time, estimates indicated that over one-third of the State's school buildings were over 30 years old and many needed substantial rehabilitation.⁴⁰ The Coalition for Adequate School Housing (CASH) estimated that the one-time cost of rehabilitating these older facilities would be \$1.9 billion.⁴¹ Further, CASH estimated that school districts would need an additional \$400 million annually for the next five years for building and repairing school buildings. Since the State was in recession, such funds were not available. Thus the State had to rethink how it would prioritize its school facilities projects.

A New System for Funding School Construction

In light of the backlog of applications for state funds, the Office of Local Assistance (now known as the Office of Public School Construction) designed a numerical ranking system that used "priority points" to determine a school district's eligibility for funds. This system gave priority to school districts who had students who were "unhoused," and special consideration was given to how districts used certain facilities.⁴² The more points a project application received, the higher on the list it was placed. Recognizing that school districts were facing enrollment growth and required further rehabilitation, the Legislature in 1982 authorized a general fund appropriation of \$200 million for school construction projects. This amount was later reduced to \$100 million.⁴³

Further, in order to ease the burden that many school districts felt because of the recession, the State loosened the repayment schedule for its lease-purchase program. School districts were allowed, for 10 years, to pay one percent of the cost of state funded lease-purchase projects, rather than the 10 percent they initially were required to pay.⁴⁴ Again, the State Legislature and the State Allocation Board moved away from a loan program and more toward a grant program.

Multi-Track Year-Round Education

Recognizing that the State had very limited bond resources, the Legislature wanted a more cost-effective facilities financing incentive system for school districts. That system would force districts to use their space more efficiently. In response to the shift in policy, the Legislature passed Chapter 498, Statute of 1983. This statute encouraged school districts that were experiencing growth pressure to adopt multi-track year-round education (MTYRE) programs. MTYRE programs enroll students in several tracks throughout the entire calendar year. At any given time, one track is on vacation, but vacation periods are short in duration.⁴⁵ The MTYRE program allows a more intensive use of existing facilities, thereby reducing the need for new facilities in growing districts.

School districts received an immediate financial return if they participated in the MTYRE program. A school district that redirected its students into a MTYRE program received a grant of up to 10 percent⁴⁶ of the cost that would be necessary to build a new facility not to exceed \$125 per student.⁴⁷ School districts that participated in MTYRE were eligible for air conditioning and insulation in their buildings.

In 1988, as pressure for state financing continued, the Legislature required that top priority for financing new construction projects be given to districts that used multi-track year-round education programs. School districts that offered MTYRE and were willing to match 50 percent of their construction costs received a funding priority from the State Allocation Board.⁴⁸ This put other school districts that could not meet these MTYRE and funding criteria at a distinct disadvantage. These latter school districts sought relief from the voters in 1986. Small school districts were one exception to the MTYRE requirement.

1986 Lease Purchase Program

In 1986, the voters approved Proposition 46. Proposition 46 amended Proposition 13⁴⁹ by restoring to local governments, including school districts, the ability to issue general obligation bonds and to levy a property tax increase to pay the debt service subject to a two-thirds vote of the local electorate.⁵⁰ This amendment allowed school districts to augment the one-percent cap on property taxes and to secure additional bond indebtedness to build and improve their schools.⁵¹

Passage of Proposition 46 helped, but did not solve school districts' financing problems. Many school districts were unable to secure the necessary two-thirds vote to authorize local funding, and still relied on state funding to assist them. Further, the federal government in 1986 passed legislation that required each state to remove friable asbestos from their educational facilities – another charge that the school districts could ill afford.

California adopted similar asbestos standards to those established by the federal government in 1986; however, few school districts reported their estimated costs for removing the substance. In light of the need to remove the asbestos, and in order to address the growing backlog of proposed school construction projects, voters passed Proposition 79 in 1988 - an \$800 million bond initiative. It specifically set aside \$100 million to cover asbestos removal.⁵²

A Growing Shortfall and Greater Scrutiny

There is no doubt that from 1982 to 1988 state support for public school construction was limited and difficult to secure. The demand for new school facilities, for modernization, and for asbestos removal was great.⁵³ As of June 1, 1986, applications that were submitted by school districts to the State Allocation Board for state funding of *new school construction* projects alone totaled roughly \$1.3 billion. In addition, applications for state funding for *reconstruction or rehabilitation* of school facilities totaled over \$991 million.⁵⁴ Total demand for school facility improvement in 1986 was nearly \$2.3 billion - an amount that significantly outweighed the \$800 million voters approved in that year's bond initiative.⁵⁵ Even with a boost of funding of \$150 million per year from Tidelands revenues in fiscal years 1984 and 1985, the Lease Purchase Program fell short.⁵⁶ By 1988, the shortfall had grown to \$4 billion, in spite of the fact that voters had approved \$2.5 billion in bond money from 1982-1988.

The State Allocation Board was forced to scrutinize every request for school construction funding, recognizing that absent a major infusion of State bond money, most districts would not receive funding for their projects. This scrutiny created an extremely competitive environment for the limited resources that were available to the schools. Many participants believe that school districts that contracted with knowledgeable consultants, or had district staff who were familiar with the State Allocation Board's policies and criteria, were the most successful in securing a high ranking place in the queue for resources, once those funds become available.

There is no definitive research or data that support this belief. Consultants are not required to report their involvement in the application process. However, there is substantial anecdotal evidence to support the assertion.

School Financing as a Collective Effort—The Three Legged Stool

In 1986, the Legislature recognized that resources were scarce and that no one governmental or private entity could finance school construction. It attempted to equalize the burden of school facilities financing between state government, local government and the private sector.⁵⁷ This concept was known as the "three legged stool." The idea was that the state would provide funds through bonds. Local government would provide its share through special taxes, general obligation, Mello-Roos and other bond proceeds. The private sector would provide funds through developer fees. Appendix A describes funding alternatives for these latter two legs of the stool.

The "three legged stool," however, never quite worked. For example, to assure that developers would not fund a disproportionate share of the cost to build schools, the Legislature, in 1986, capped the amount new homebuyers would pay for developer fees at \$1.50 per square foot, and empowered the State Allocation Board to raise the cap by a certain amount each year. However, school districts found a loophole around the cap by requesting that cities impose a fee on their behalf, and cities imposed rates on some

developers that exceeded those allowed.⁵⁸ California courts upheld these fees in the Mira, Hart, Murrieta court cases.

Until the recent passage of Proposition 1A, many local governments have imposed developer fees that exceed those allowed by the Board. For example, in 1987, fees in San Diego and Orange counties reached a high of \$8700 per house.⁵⁹ By 1990, total development fees for some homes reached \$30,000.⁶⁰ Statewide, developer fees have increased from \$31 million in 1978 to \$200 million in 1997.

In 1998, the State Allocation Board increased the fee to \$1.93 per square foot.⁶¹ With the passage of Proposition 1A in November 1998, however, local governments have apparently lost their ability to increase their fees beyond those determined by the State Allocation Board. Further conflict is likely.

The 1990s—Complicated Funding Programs

In the fall of 1990, the Legislature passed legislation that created two programs that provided additional financial incentives for schools to offer year-round education.⁶² The first of these programs provided a one-time grant to school districts to ease the expense of changing from traditional nine-month programs to year-round tracks. The second program provided an "operating grant" of between 50 percent and 90 percent of the amount districts saved the state by not having to build new schools. At the recommendation of the Office of the Legislative Analyst, the Legislature repealed the 1982 and 1986 incentive programs discussed above.⁶³

In response to the 1990 legislation, the State Allocation Board developed a new priority system for allocating lease purchase money. Under this new system, the Board apportioned funds based on a combination of when an application was received and how many priority points it garnered. Through a complex formula, priority points were given to schools that had a significant number of "unhoused students," or had substantial rehabilitation needs. This procedure might have worked well if the state could have financed all applications in a timely manner. However, the demand for state money increased to the point where districts without special priorities could expect to wait years for the state to finance their projects.

The program was in effect for only one year when the Legislature repealed the program and created yet another system for allocating state money.⁶⁴ In 1991, the Legislature defined six priorities for funding. First priority was given to districts that had a "substantial"⁶⁵ enrollment in multi-track schedules, and that were paying at least 50 percent of the construction costs for their new schools. Second priority went to districts with a "substantial" year-round enrollment and that wanted the state to pay the entire cost of any new construction for their year-round schools. The remaining four priority levels took into consideration factors for those schools who did not meet the "substantial enrollment" criteria outlined above, or were unable to match state resources.

The complex set of formulas made it difficult for school districts to completely understand what criteria would best serve them. Further, throughout this period, the Board was

required to implement new programs and redefine its priorities. For example, in 1990 the Legislature created a program that was adopted by State Allocation Board for school districts that could not find adequate land on which to build a school. Known as the Space Saver Program, it was designed to assist urban school districts that could not obtain adequate acreage for a school campus. The first space saver school, developed in 1993, is scheduled to be completed in Spring 2000 in the Santa Ana Unified School District, in a former shopping mall.⁶⁶

Another example of shifting priorities took place in 1996 when the Legislature mandated the Board to redirect its third highest priority to class size reduction from a previous focus on child-care facilities.⁶⁷ A third took place at the end of 1997 when the priority points system was replaced by a first-come, first served system. While there were exceptions to this rule, money was offered first to school districts willing to cover some of the costs associated with constructing or repairing facilities. Schools that could not afford to cover the remaining 50 percent were placed on a separate list.

Such shifts in policy, coupled with the significant complexity of formulas that drove the priority point system, along with the sporadic creation of new programs, caused many school districts to depend on outside consultants. These consultants understood the many policy changes that the Board enacted – sometimes on a monthly basis. They were also knowledgeable of new programs, and clearly understood the workings of the staff who carried forth the Board's policies. Without the assistance of consultants, school districts were unable to keep track of policy changes and special considerations enacted by the Board. Further, while the Board and its staff advised school districts regarding changes in their policies in a regularly published document, it did not provide a centralized source of materials, such as an up-to-date handbook. Consequently, school district personnel were often uninformed about the various nuances of the programs administered by the Board.

State Bond Efforts of the Nineties

As the State Allocation Board shifted its focus and policies throughout the early 1990s, Californians approved state school bond initiatives in 1990 for \$1.6 billion and in 1992 for \$2.8 billion. In one of its 1992 reports, the Department of Finance reported that statewide K-12 enrollment was estimated to grow by 200,000 new students per year for at least five years,⁶⁸ and that an estimated \$3 billion would be needed annually for new school construction.⁶⁹ However, in spite of growing enrollments and a significant demand for facility rehabilitation, in 1994, the electorate rejected a \$1 billion bond initiative. The State was in a recession.

A lack of State bond funds was not the only problem associated with the allocation of school construction funds. The Auditor General reported in 1991 that the Office of Local Assistance mismanaged state funds. It detailed that construction funds loaned to school districts were not recovered; that districts overpaid on some projects and failed to collect the overage; that it dispersed funds without proper documentation; and that it failed to conduct required close-out audits on construction projects.⁷⁰

As a result of this audit, the Office of Public School Construction in concert with the State Allocation Board developed stringent internal and external audits and fiscal controls. These control mechanisms included increasing the detail of financial review of projects, prohibiting school districts from participating in the program unless a balance was not due, and no longer receiving rent checks for portable classrooms.⁷¹

Attempts to Ease Passage for Local Bonds

Recognizing that the State would be unable to fund the entire backlog of school construction proposals, Governor Pete Wilson in 1992 proposed a constitutional amendment to reduce the requirement for the passage of local bonds from two-thirds to a simple majority.⁷² The idea was that local governments should have to meet the same 50 percent requirement as the State for passing bonds. Further, there was strong sentiment in the Wilson administration that local governments should pay an increased share of school construction costs. However, the Legislature rejected his plan.⁷³ Other attempts in recent years to reduce the vote for passage of local bonds from two-thirds to something less have also failed.⁷⁴

1996 School Bond Issuance - Finally More Money

Proposition 203, passed by the voters in March 1996, provided \$2.065 billion for school facility construction. However, the Legislature at the time estimated that school districts would need \$7 billion in construction funds to meet enrollment growth that was anticipated during the next five years.⁷⁵ This \$7 billion did not include the needs of Los Angeles Unified School District (LAUSD), which had 20 percent of the state's student population. At the time, LAUSD alone needed \$3 billion to upgrade and modernize its schools.⁷⁶ Clearly, anticipated demand for State funds substantially exceeded available resources.

To respond to the many school district proposals, the State Allocation Board followed its general priority points policy. However, many school districts, recognizing that they would not receive funding for years because of their position in the funding queue, and because of the limited amount of resources that were available, resorted to creative means to try to secure funding for their projects. For example, some schools districts sought special consideration for funds by requesting emergency allocations. Such a tactic would allow a school district to receive funds immediately.⁷⁷ Other school districts used the appeals process to argue that their projects were needed more than those of other school districts that were higher in the queue.⁷⁸

This cannibalistic dynamic caused a fair amount of resentment among those school districts that were bumped from a relatively high position in the queue by those districts that sought emergency relief or special consideration. Further, it was clear that the most sophisticated school districts found a variety of tactics that would secure the funding of their projects. These tactics are described in greater detail later in this paper under the section that describes how the Board processed its applications.

Class Size Reduction Causes Greater Housing Needs

The distribution of funds from Proposition 203 was further complicated by the Governor's Class Size Reduction Initiative. In particular, the State Allocation Board earmarked \$95 million for the purpose of purchasing 2,500 portable classrooms for schools that were facing severe classroom shortages. This was in addition to \$200 million that the Department of Education had available for assisting schools in purchasing such facilities. The Office of Public School Construction determined that a total of 17,500 classrooms were needed to accommodate class size reduction, and that there was only enough money to fund less than half of the estimated need.⁷⁹ The State Allocation Board reinterpreted Proposition 203 by creating a new Portables Purchase Program at the expense of their other programs. This caused some school districts to again get bumped in the queue for funding.

Never Enough Money—Still a Shortfall

Since 1947, the electorate has approved all but three State bond initiatives. In spite of the voters' tendency to support various bond initiatives, by 1998, the backlog of school construction projects that were approved by the State Allocation Board, but unfunded, totaled more than \$1.3 billion. Although the voters have been generous by approving bond initiatives roughly every two years,⁸⁰ there were times during the past five decades when bond money was not available for periods of four or six years.⁸¹

The Department of Finance has estimated that \$16 billion is needed over the next decade for public school construction and rehabilitation.⁸² Various bond proposals in 1997 and 1998 were circulated that considered multiple-year bond issuances. The California Teachers Association and the California Building Industry Association presented a plan to issue \$2 billion a year for 10 years.⁸³ Governor Wilson proposed \$2 billion a year for four consecutive years. In the end, Proposition 1A was passed. It provides \$6.7 billion over a four-year period. However, while the amount appears generous, it will not be enough to meet the entire anticipated need of the state. Based on the Department of Finance projections, the six years following this bond issue will require roughly an additional \$10 billion in State money.

Table 1 on page 18 shows the history of state school bond initiatives from 1949 to 1998. In the next sections of this report, we discuss the various programs, the complicated application process used by the State Allocation Board that school districts had to endure to secure funding, and how Proposition 1A attempts to simplify this process.

Table 1 - STATE SCHOOL CONSTRUCTION BONDS

Title of Bond Initiative	Date & Year of Election	Funds Authorized
School Building Aid Law of 1949	November 8, 1949	\$250,000,000
School Building Aid Law of 1952	November 4, 1952	\$185,000,000
School Building Aid Law of 1952	November 2, 1954	\$100,000,000
School Building Aid Law of 1952	November 4, 1958	\$220,000,000
School Building Aid Law of 1952	June 7, 1960	\$300,000,000
School Building Aid Law of 1952	June 5, 1962	\$200,000,000
School Building Aid Law of 1952	November 3, 1964	\$260,000,000
School Building Aid Law of 1952	June 7, 1966	A)\$275,000,000
School Building Aid Law of 1952	June 6, 1972	B)\$350,000,000
School Building Aid Law of 1952 And Earthquake	November 5, 1974	\$150,000,000
School Building Lease-Purchase Bond Law of 1976 (Failed)	June 8, 1976	\$200,000,000
School Building Aid Law of 1978 (Failed)	June 6, 1978	\$350,000,000
School Building Lease-Purchase Bond Law of 1982	November 2, 1982	\$500,000,000
School Building Lease-Purchase Bond Law of 1984	November 6, 1984	\$450,000,000
Green-Hughes School Building Lease-Purchase	November 4, 1986	\$800,000,000
School Facilities Bond Act of 1988	June 7, 1988	\$800,000,000
1988 School Facilities Bond Act	November 8, 1988	\$800,000,000
1990 School Facilities Bond Act	June 5, 1990	\$800,000,000
School Facilities Bond Act of 1990	November 6, 1990	\$800,000,000
School Facilities Bond Act of 1992	June 2, 1992	\$1,900,000,000
1992 School Facilities Bond Act	November 3, 1992	\$900,000,000
Safe Schools Act of 1994 (Failed)	June 7, 1994	\$1,000,000,000
Public Education Facilities Bond Act of 1996, Proposition 203	March 1996	C)\$3,000,000,000
Class-size Reduction Kindergarten-University Public Education Facilities Bond Act of 1998, Proposition 1A	November 3, 1998	D)\$9,200,000,000

Bonds in [bold] failed to receive a majority of votes.

- A) New amount of 1966 bond authorization available for regular program is \$185.5 million after deducting \$35 million reserved for compensatory education facilities, \$9.5 million for regional occupational centers, and \$35 million for rehabilitation and replacement of earthquake damaged and unsafe schools.
- B) Up to 250 million dollars earmarked for rehabilitation and replacement of unsafe schools.
- C) One billion dollars earmarked for higher education facilities
- D) Two and one-half billion dollars is allocated for higher education.

THE PROGRAMS

Prior to the approval of Proposition 1A, the State Allocation Board oversaw six active programs associated with school facility construction, repair, and remodeling. These six programs made up the Lease-Purchase Program that was discussed earlier in this paper. This section briefly describes these programs, discusses how the State Allocation Board set priorities for school district projects, explains how the Office of Public School Construction staff reviewed and acted upon district proposals, and how the State Allocation Board considered district appeals. The purpose is to advise the reader of not only the process and administration of allocation, but also some of the pitfalls that existed under the old system. Perhaps these pitfalls of the old system can be avoided when allocating Proposition 1A resources.

The Growth and Modernization Programs

The Growth and Modernization Programs allocated funds to school districts for building new schools (Growth Program) and for repairing existing facilities (Modernization Program). School districts qualified for the Growth Program based on an "allowable building standards" formula.

For its Growth Program, the State Allocation Board developed standards for the amount of space that was necessary to house students based on a district's number of ADA (Average Daily Attendance).⁸⁴ The Modernization Program provided funds to school districts for nonstructural improvements to permanent school facilities that were more than 30 years old, and for portable buildings that were more than 20 years old. Such nonstructural improvements included interior partitions, air conditioning, plumbing, lighting and electrical systems.

The Modernization Program provided funding for up to 25 percent of the replacement value of the building. Under some circumstances, districts could use additional funds beyond the 25 percent for handicap access compliance, including elevators when appropriate, and for alternate energy systems.

School districts could apply to this program by offering to match state funds and be listed as "Priority One," or they could ask the State to fund their entire project and be listed as "Priority Two."

Process for Receiving Growth and Modernization Funds

School districts that applied for growth and/or modernization funds were required to follow nine steps in three critical areas - planning, site selection and construction. Each of these three critical areas provided a separate and gradual funding stream for the school's project.

Planning Phase

During the planning phase, a district was required to complete four forms that demonstrated that it was eligible for either the growth or modernization program.

Eligibility to participate in the programs was based on enrollment patterns or the age and condition of those schools that required modernization. If a district met these standards, it moved on to the "site development phase."

Site Development Phase

Selecting a school site was critical. If a school district was participating in the modernization program, it would move to the next phase. The site would have to be safe and able to support the school's curriculum. An adequate site would have to meet certain standards with respect to size and location. Site review could take a school district months (if not years) to investigate. Under the growth program, a school district arranged a search committee to locate available properties and narrowed its search to three sites. In addition, the school district held public hearings regarding the impact of the lands to be used for educational purposes, and notified neighbors about possible site use. A representative from the Department of Education visited three selected sites to review and determine which was the most suitable site based on criteria including, but not limited to: street traffic safety; traffic congestion; geological hazards; and other environmental issues. All school districts followed a similar process for site selection whether they financed the project themselves, or requested State funding.⁸⁵

Some school districts were unable to build new schools because they could not secure appropriate properties. This was especially true in urban and industrial areas where vacant land was not readily available or was extremely expensive.⁸⁶

Once a district found an appropriate property, it was required to prepare a site development plan that included architectural and engineering drawings, along with building contract agreements. Districts were required to follow strict site development, plan development, and construction cost guidelines in order to be eligible for state funds.⁸⁷ Once these guidelines were met, the district proceeded to the construction phase.

Construction Phase

Every construction project received an allowance for site development and to erect a building. The eligible costs associated with construction for these programs were classified into several broad categories: building construction; site development; energy conservation; and supplemental funding for multi-story construction. In addition, facility funding included adjustment costs associated with geographic and regional differences, or the demolition of an existing structure.

A project architect for each contract developed final plans and documents as part of the project's final stage. These documents were used to establish a construction budget. The Division of the State Architect approved and monitored the district's final plans. After review, a construction apportionment was recommended to the State Allocation Board, which in turn authorized the distribution of funds. Upon completion of all regulatory oversight, the district was allowed to break ground.

The Deferred Maintenance Program

The Deferred Maintenance Program provided a 50 percent State match to assist school districts with expenditures for major repair or replacement of school buildings. Such repairs or replacements were for plumbing, heating, air conditioning, electrical systems, roofing, interior and exterior painting, and floor systems. School districts were required to place one and one-half percent of their general funds into an escrow account in order to receive a State match. For school districts that could not fit the parameters of the modernization program, the deferred maintenance program was the only alternative to receive State assistance.

The State also provided critical hardship funds to repair buildings that might seriously affect the health and/or safety of pupils. When available funding was insufficient to fully fund all hardship requests in any given year, the State Allocation Board created a priority list. However, the State Allocation Board often made exceptions to its list.

The Deferred Maintenance Program differed from the modernization program in that school districts were required to submit a five-year plan as to how their projects would be implemented. The plan displayed a rank for each project, and identified those projects that the school district would likely fund.

Deferred Maintenance Application Process

Based on the most recent available material, the deferred maintenance program had 13 steps, and a school district needed to complete several forms and documents. The 13 steps were divided into categories including a letter of interest, application process, critical hardship project documentation, and fund release.

A school district notified the Office of Public School Construction each year if it wanted to participate. Upon receipt of the initial letter, the Office of Public School Construction would send the district a request for its five-year plan of maintenance needs and an "Annual Application for Funds."

The school district would then provide the OPSC with a list of items scheduled for major repair or replacement,⁸⁸ along with its five-year implementation plan. When the district received state funds, it could only expend those resources for those items on the list. It could not redirect any resources toward administrative overhead, repair and maintenance of furniture, ongoing preventative maintenance, energy conservation, landscaping and irrigation, athletic stadium equipment, drapery or blackout curtains, testing underground storage tanks for leaks, or chalkboards.

Once the Office of Public School Construction approved a school district's list of projects it allocated funds accordingly. In cases of hardship, OPSC would visit the school prior to allocating funds. The district's governing board controlled and was responsible for all deferred maintenance funds. These funds were placed in a special escrow account.

The Year-Round Air Conditioning/Insulation Program

The Year-Round Air Conditioning/Insulation Program (ACI) began in 1986, as an incentive program for schools to operate during the summer.⁸⁹ In order to participate in the program, a school district was required to have a plan for Multi-Track Year-Round Education, or have 10 percent of its students enrolled in a Multi-Track Year-Round Education program. The ACI program assisted school districts by providing resources for air conditioning and insulation.

Year-Round Schools Air Conditioning/Insulation Application Process

The application process for the ACI program differed slightly for those school districts that had a year-round program from those that were planning a year-round program. However, regardless of their status, school districts were required to complete eleven stages in two phases to receive funding. If a school district had an air conditioning system that needed repair, it could not apply to this program, but could apply for funds under the deferred maintenance program.

A school district completed forms that included information on the buildings and spaces that would be affected, along with a report regarding the project's anticipated start-date. In addition, another application was required that provided information on whether the school site was experiencing enrollment growth, and whether some level of modernization was already in progress. Further, a school district that was not on a year-round schedule was required to show how its year-round calendar would be used. If the district was approved for funding, various allowances were provided to the district.⁹⁰ In addition to these allowances, the state would provide funds for gas and electric service, general site development, and air conditioning/insulation construction.

Items that were not covered by this program included costs for heating, window solar film, classroom doors and hardware, re-roofing, lighting, security, interior housing, fire alarm systems, unrelated repairs, installations, and painting.

The State Relocatable Classroom Program

The Relocatable Classroom program was designed to meet the needs of school districts that were impacted by excessive growth or unforeseen classroom emergencies. The State Allocation Board allocated funds for the acquisition, installation, and relocation of safe, portable classroom facilities. The State maintained a fleet of 5,000 furnished classrooms that could be leased to school districts for \$4,000 per year. Hardship cases could lease portables for \$2,000 per year. These portable units were available on a first-come, first-served basis. However, there was no maximum amount of time a school district could keep the portables, and districts were not required to return them. Thus, some school districts have kept the portables indefinitely.

Relocatable Classroom Application Process

In order to participate in either relocatable classroom program, a school district was responsible for site preparation costs including electrical hookup, plumbing connection, a State Architect approved plan, insurance and maintenance. After approval by the Board, the district would be reimbursed for the cost of architect fees, electrical hookup, furniture and equipment, and plumbing installation. However, reimbursements were capped at \$9,450 per classroom.

The Unused Site Program

The Unused Site Program was established in 1974 as part of the General Lease-Purchase umbrella. It required school districts and county superintendents of schools to pay a fee for district properties that were not used for "official" school purposes. "Official" school purpose was defined as being used for K-12 education, continuing or adult education, special education, childcare, or administration of any educational units.

This program did not provide funds directly to schools. However, resources generated from the fees that districts paid for unused facilities were used to cover deferred maintenance costs and to service the debt on the state's various school construction bonds. Since the Board simply administered the return of funds to the state, the funds could not be redirected to other programs administered by the Board. Proposition 1A¹⁰ eliminates their fee requirements.

The Office of Public School Construction Staff Review and The State Allocation Board's Appeals Process

The State Allocation Board meets roughly 11 times a year. At each meeting the Board reviews and approves about 200 applications for funding. Prior to the State Allocation Board's review, the Office of Public School Construction staff processes all applications. Before Proposition 1A, the approval processes for the programs, except for the growth and modernization programs, were straightforward. Either a school district's application fit a program's description for reimbursement, or it did not. Due to the complicated nature of the Growth and Modernization programs, "special considerations," or project applications that did not fit in the parameters of the program were placed in a different category. The State Allocation Board approved roughly 90 percent of all growth and modernization projects without special consideration. Issues requiring special consideration could include peculiarities of the proposed site, or the costs associated with a project. The applications were divided into special consents or "specials," and appeals. Both types permitted the Office of Public School Construction staff great latitude in the decision-making process, as they investigated and evaluated school district applications on a case-by-case basis.

A "special" occurred when OPSC staff reviewed a school district's application that did not meet the standards of the program, and determined that an exception should be made. This agreement may have required several meetings between the school district's administration and the OPSC staff. With OPSC staff recommendation, which may have

been inconsistent with State Allocation Board policy, this application would be brought before the State Allocation Board for review. This category was normally granted approval in one action.

An appeal occurred when OPSC staff reviewed a school district's application that did not meet the standards of the program, and determined an exception should not be made. If after several meetings an agreement could not be reached, the school district would bring its case before the State Allocation Board. An appeal was granted only on a case-by-case basis. At times, legislators have spoken on behalf of school districts at Board meetings.⁹¹ The difference in the two types of special considerations was that a school district or its representative would have to defend its actions in an appeal. However, as already noted, only those people who kept up with the process and policy changes were adept enough to tackle an appeal. Therefore, a school district seeking an appeal before the State Allocation Board might seek help from legislators that represented them, or hire consultants. For instance, in the May 1998 State Allocation Board meeting, a well-versed school finance consultant appeared on behalf of the Apple Valley Unified School District. Apple Valley hired both a construction manager and a general contractor to erect its new school, in the face of board policies allowing a school district to hire only one such position. On behalf of the school district, the consultant addressed the State Allocation Board, and pointed out that in five other cases the State Allocation Board had voted in favor of a school district that hired both a general contractor and a construction manager.⁹²

Less seasoned district representatives would not have known that the State Allocation Board had already set a precedent for funding projects that include both a construction manager and a general contractor.⁹³ The OPSC staff was not knowledgeable on this issue and therefore could not be a source of information.

PROPOSITION 1A—A POSSIBLE FIX TO SAB PROCESS PROBLEMS

Proposition 1A not only authorizes an additional \$6.7 billion to K-12 schools, but it also offers a fix to several of the process problems discussed above. It replaces the provisions of the previous Lease-Purchase Program. This section discusses (1) the resource allocation provisions of the legislation; (2) the programmatic components of the legislation; and (3) how the legislation improves the resource allocation process over that which existed under previous bond programs.

Total Resource Allocation Provisions of Proposition 1A

The resource allocation system in Proposition 1A is specific and detailed. Bond proceeds are to be allocated in 2 two-year cycles: \$3.35 billion available immediately; and \$3.35 billion available after July 2, 2000. Of the \$3.35 billion that is immediately available, \$1.35 billion is earmarked for new construction, \$800 million for modernization, \$500 million for hardship cases, and \$700 million for class-size reduction.

For the second \$3.35 billion distribution, \$1.55 billion will be available for new construction, \$1.3 billion for modernization, and \$500 million for hardship cases. There are no resources in the second allocation for class-size reduction.

School districts receive funding for their projects based on a per pupil formula. The formula is based on a statewide average cost for construction, adjusted each January for inflation. The figures are based on unhoused⁹⁴ average daily attendance (ADA). The per pupil ADA formula is as follows:

	Growth	Modernization
Elementary	\$5,200	\$2,496
Middle School	\$5,500	\$2,640
High School	\$7,200	\$3,456

It is anticipated that the initial \$1.35 billion available for new construction during the first round of allocations will be insufficient to meet the needs of those school districts that are facing substantial enrollment growth. Proposition 1A establishes a priority point system for new construction projects when State bond resources are exhausted.⁹⁵ The Office of Public School Construction will process applications on a first-come, first-served basis from subsequent bond offerings.

In addition to the provisions outlined above, school districts that receive bond proceeds are required to set aside three percent of their general funds each year for 20 years for the purpose of deferred maintenance.

Components of Proposition 1A

Proposition 1A establishes three categories for funding. The first is the Growth Program, in which the State finances half the cost of new construction and the school district the other half. The second is the Modernization Program, in which 80 percent of the cost of rehabilitation is provided by the state and 20 percent by the school district. The third category is "hardship," in which the State funds up to 100 percent of the cost for emergency needs, or an increased proportion of its share for new construction or modernization.⁹⁶

Proposition 1A holds harmless those school districts that received State Allocation Board approval for the construction phase of their projects (under the previous Priority 1 - able to provide a 50 percent match). They will receive growth and modernization funds, but under the rubric of the previous "Lease Purchase Program." This grant is supplemented by land costs, site development, and other adjustments.

Another new provision of the Proposition is that school districts can seek modernization resources after a facility is 25 years old, rather than 30 years under the previous program.

Schools districts that had received prior Board approval for Priority 2 projects (100 percent state funding) will have to either indicate their ability to finance 50 percent of their proposed projects or reapply under one of the new programs. If the school district cannot meet the provisions of the new programs, it can apply as a "hardship" case.

The California Supreme Court ruled in 1991 that cities and counties could limit housing development on the basis of the supply of classrooms.⁹⁷ Proposition 1A suspends, until 2006, the Court's ruling.⁹⁸ With the passage of Proposition 1A, school districts will not be able to limit new housing construction based on a rationale that school facilities do not exist. However, in 2006, if adequate bond funds for new construction are not available, cities and counties can once again deny development. Further, as discussed earlier, the Proposition permits the school board to increase developer fees to up to \$1.93 per square foot.⁹⁹ Proposition 1A sets up a system where fees can be levied of up to 50 percent and 100 percent of the costs associated with building a school by developers under certain circumstances.

Proposition 1A Improves the Resource Allocation System of the State Allocation Board

Proposition 1A makes several changes to the programs administered by the State Allocation Board. It attempts to simplify the process of applying for funds, consolidates the Board's previous six programs into two, and attempts to create a more equitable funding system. It also makes the State Allocation Board and the Office of Public School Construction staff more accountable for their actions. Table 2 presents the differences between the Board's previous Lease Purchase Program, and the new programs that are initiated by Proposition 1A.

Table 2 - Comparison of Lease Purchase Program to Proposition 1A Programs

	LEASE PURCHASE PROGRAM	SCHOOL FACILITIES PROGRAM PROP 1A
FUNDING FACILITIES	<p>Priority 1 projects-growth and modernization-received 50 percent funding based on actual costs from the state.</p> <p>Priority 2 projects-growth and modernization-received 100 percent funding form the state.</p>	<p>Growth projects receive 50 percent funding based on a per pupil formula from the state.</p> <p>Modernization projects receive 80% funding from the state.</p> <p>Hardship projects can receive up to 100 percent of funding from the state based on three broad categories financial, physical and excessive costs.</p>
CONSTRUCTION EXCESSIVE COSTS & COST SAVINGS	<p>Some excessive costs (i.e., change orders) were reimbursed by the state. Cost savings were returned to the state.</p>	<p>Excessive costs are not reimbursed by the state and school districts keep costs savings.</p>
MODERNIZATION PROJECTS	<p>Buildings must be at least 30 years old.</p>	<p>Buildings must be at least 25 years old.</p>
PROJECT APPROVAL	<p>Projects were approved three times in conjunction with the planning, site acquisition and construction phases.</p>	<p>Projects receive one approval (except hardships that receive two approvals).</p>
FUND ALLOCATION	<p>Funds were allotted after each phase.</p>	<p>Funds are allotted only after DSA approves plans, unless there is a hardship.</p>
MAINTENANCE OF FACILITIES	<p>Required school districts to set aside two percent of their general fund for ongoing maintenance.</p>	<p>Requires school districts to set aside three percent of their general funds for 20 years for ongoing maintenance.</p>
PROPERTY LIENS	<p>State maintains a lien to properties it funds.</p>	<p>State does not hold liens, and existing liens are released.</p>
ARCHITECTURAL APPROVAL	<p>Division of State Architect approved all plans.</p>	<p>The Division of State Architect or a state approved private engineering firm may approve plans.</p>

	LEASE PURCHASE PROGRAM	SCHOOL FACILITIES PROGRAM PROP 1A
DEVELOPER FEES	The cap on fees was \$1.93 per square foot; however, cities or counties could levy a higher fee and pass it to schools districts.	The cap on fees is \$1.93 per square foot, adjusted biannually. Fees may be assessed up to 50 percent of the costs of a project if a school district has accessed other forms of financing including Mello-Roos, G. O. bonds, and parcel taxes. In order to increase fees, school districts must meet two of four criteria, including MTYRE, local school bond positive votes of 50 + 1 percent, 20 percent of students are housed in portables, 15 percent of bond debt used.
WHEN STATE FUNDS RUN DRY	Projects were placed on a pending state-funding list or charged a city-based developer fee.	Modernization projects may be placed on a pending state-funding list. Growth projects may be placed on a priority points list, or the school district may collect 100 percent of financing from a developer.
CONTAINING DEVELOPMENT (MIRA, HART MURRIETA COURT CASES)	Cities and counties on behalf of school districts were able to contain residential development by suspending the building of new facilities.	School districts can not request cities or counties to prohibit residential development based on a lack of funds or school facilities until 2006.
ARCHITECT & CONSTRUCTION MANAGEMENT FEES	Percentage caps on fees based on size of projects	No caps.
MODERNIZATION PROGRAM	Provides funding to building over 30 years old, and portables over 25 years old. Calculations done on a district basis.	Provides funding for buildings over 25 years old and portables over 20 years old. Provides funding on a site-specific basis.
AIRCONDITIONING-ASBESTOS PROGRAM	Allotted funds specifically to install AC and remove asbestos.	These are now incorporated in the modernization program.

Simplification

To further simplify the process, the Proposition reduced the number of school facility financing phases from three to one.¹⁰⁰ This is now possible because school districts receive a flat grant from the State based on the number of students they enroll, rather than on the estimated cost of a project. Under the previous program, each phase of a project was evaluated independently; thus the cost to the State for any given project could change. Under the new program, a school district receives a single grant for a single project, and cannot request that the state fund additional need beyond the original request.¹⁰¹

The Proposition also explicitly requires that the State Allocation Board initiate a public hearing process that notices any policy changes considered by the Board. It requires that the Board make available to school districts written up-to-date documentation that clearly explains its policies, and specifically describes how its new programs work.

Consolidation

Until Proposition 1A, the State Allocation Board administered as many as 13 programs. The most current six are discussed above. With the enactment of Proposition 1A, the number of programs has been reduced to two, along with a special category for hardship cases. This consolidation of programs makes it easier for school districts to choose a program that best suits their needs. It precludes the type of creative tactics that school districts were forced to pursue to match their projects to the right program in order for them to receive funding.

A More Open Process

The Proposition causes a major shift in policy direction for the State Allocation Board. Under its previous programs, the Board funded both new construction and modernization on a 50/50 matching basis. Under Proposition 1A, the Board is required to fund modernization projects more generously than new construction projects, in that the State will fund 80 percent of the cost for modernization compared to 50 percent for new construction.

Another major outcome of Proposition 1A is that the State Allocation Board no longer has the authority to offer grants to school districts that may seek funds for special projects without any real statutory framework. Now school districts must demonstrate that they meet specific hardship criteria set out in the new law. The practical effect of this change will depend on how the Board interprets this provision.

Previous legislation implicitly required that the State Allocation Board follow guidelines set forth in the Administrative Procedures Act (APA); however, the Board did not do so. Proposition 1A explicitly requires the Board to follow APA guidelines. This means that any change in policy or regulation considered by the Board must be properly noticed to the public before the Board can act. This requirement, if the Board follows the full spirit, will allow school districts to be fully informed of Board policies and procedures, as well as its rules and regulations.

PITFALLS IN THE PROCESS PRIOR TO PROPOSITION 1A

This section discusses the State Allocation Board's attempts to improve its system and the pitfalls that existed under the previous programs.

Until recently, rules governing the application process were labor-intensive, both for school districts and the state agency personnel (including the Office of Public School Construction and the Division of the State Architect). In 1989, the Legislature received a report outlining the complex application.¹⁰² The report identified 54 steps school districts had to perform in order to receive application approval and eventual financing. In addition, the process required 24 separate forms.

Process Streamlined Recently

Since 1992, the OPSC has tried to be more efficient. Changes implemented by OPSC included: simplified and streamlined applications; improved response time for application review; improved policy information dissemination; and school districts were empowered to complete their own applications.

The most concrete indication that the Office of Public School Construction was becoming more efficient was in the application process. The application process for the Growth Program was reduced from 54 steps to nine. In addition, the number of forms that were needed to apply for funding was reduced from 24 to four.

School districts complained and begged for applications to be checked and approved for a State Allocation Board meeting agenda in an expeditious fashion. As part of the efficiency movement, the Office of Public School Construction set a goal to reduce the time from when a school district filed a completed application until it was placed on a State Allocation Board meeting agenda from over 400 days to 60 days.¹⁰³ Prior to Proposition 1A, applications on average still took longer than the 60 days to be reviewed. However, the office's efficiency achievement by reducing application review days is noteworthy.

In addition, the Office of Public School Construction worked more closely with school districts in the decision making process and provided greater leeway. In particular, school district personnel could self-certify certain information pertaining to a project rather than rely on state agency personnel. The self-certification process removed the time a school district would wait for a response from the Office of Public School Construction. It thereby shortened the application process.

Under its previous programs, it was difficult for school districts to get information pertaining to the funding process from the Office of Local Assistance (OLA) staff or from written materials. The Office of Public School Construction is now more service-oriented.¹⁰⁴ One can obtain information in person or from the office's Internet site.¹⁰⁵ In fact, the staff of the Office of Public School Construction is continually placing more information on the Internet. This information includes an automated project tracking system, Senate Bill 50 regulations, office contacts, and old board policy changes.

School Districts in Line Stand on Shifting Sands

Under the previous allocation system, school districts that completed their applications and were placed in queue were never guaranteed funding in the order their applications were received. The State Allocation Board dictated that school district applications were placed in an unfunded application list on a first-come/first-served basis. However, there were four general ways that school district applications could be "bumped" up or down in the queue.

Broad Classification Decisions

The first way a school district could get bumped was if the State Allocation Board decided to redirect its emphasis and fund a broad category of projects. For instance, the SAB could decide to fund all application projects from small school districts (no matter where they were in queue). If a school district was large, hundreds of proposed school projects could jump ahead in the funding queue.

The second way a school district could get bumped was if the State Allocation Board shifted the specific funding program allocations. Thus, for example, the State Allocation Board could decide to shift funds earmarked for the Growth Program to the State Portable Classroom Program.

Specific School District Decisions

The third way a school district could get bumped was if another school district application in queue with a later application filing date appealed to the State Allocation Board to change its application filing date to be ahead of other school districts. That school district application would be funded first.

The fourth way a school district could get bumped was if an emergency situation occurred and a school district requested critical hardship money from the State Allocation Board. The Board could provide these funds when available.

The application process requires equity and balance in order to ensure fair competition by school districts for State funds. The process needs to be flexible enough to handle emergency situations, yet firm enough to prohibit jockeying among school districts for better placement in the queue.

Proposition 1A halts the movement of funds from one program to another. However, the other examples are still feasible. Jockeying of school districts by consultants for better placement in line may continue to occur. This is especially true as Proposition 1A cannot handle the pent up demand for State funds. The next section discusses options that the Legislature may consider in order to improve this system.

OPTIONS FOR IMPROVING THE SCHOOL FACILITY FINANCING SYSTEM

A Separate List for Small and Rural School Districts

When the Proposition 1A funds are exhausted, new construction project applications will receive priority points for future funding. Small and rural school districts may require separate lists to ensure that they are placed near the front of a funding queue. This is necessary because there is no guarantee that the entire queue would receive future funding. Small and rural school districts, based on the current priority points system, may not receive enough priority points to approach the front of the queue. Larger school district applications, with greater per pupil need, may be able to position themselves high enough in the queue for funding by receiving favorable OPSC evaluations. Proposition 1A allows schools to skip to higher positions in the funding queue if they score higher priority points based on their number of unhoused students or if they can demonstrate a special hardship. *The Legislature may wish to create a separate list for small and rural school districts to create a more equitable system.*

Annual Report and Independent Accounting

In the early 1990s, many state agencies, boards, and commissions, because of budget cuts, postponed writing annual reports to the Legislature. These reports provided financial and policy information to the public. The State Allocation Board was one government entity that has not prepared regular audited reports of its programs' operations and expenditures for public review. The State Allocation Board will receive \$6.7 billion over the next four years to fund school construction projects. *The Legislature may wish to require the Board to prepare for the Governor and Legislature an annual report that details how and to whom bond funds were distributed. The Legislature may wish to require that an independent accounting firm or the State Auditor General prepare the Board's report.*

On-Line Technical Assistance

Although the application and funding process administered by the Office of Public School Construction has been streamlined and simplified in recent years, certain components of the process are still cumbersome. The process should be simple enough that school districts do not need to hire consultants or lobbyists to advise them or to shepherd their proposals. *The Legislature may wish to pass legislation that would require the OPSC to develop a technical assistance program to provide school districts with the necessary information and advice they need in order to qualify for and receive bond funds. Such a system could include an automated Internet help-line.*

A Special General Fund Appropriation for School Construction

The State's bond capacity may not be able to fund every State infrastructure need, including schools, transportation, prisons, and water during the next decade. School facility needs are estimated conservatively at roughly \$10 billion, while some estimates have put the figure at \$40 billion for the next decade alone. According to the Department of Finance, the State can afford to service approximately \$25 billion in additional debt. Thus, school facility financing alone could incur the entire debt capacity of the State. *The Legislature may wish to create a special appropriation fund for public school capital outlay as part of the State General Fund to augment the State's bond programs. In addition, the State may wish to design a school construction reserve fund, which is funded from budget surplus revenues.*

ENDNOTES

- ¹ Chapter 243, Statutes of 1947.
- ² If a school district wants state funding for construction or repair of a school, it must apply to the State Allocation Board for the money. There are school districts that repair and construct school buildings without the assistance of the State Allocation Board (i.e., San Diego Unified School District, San Luis Unified School District). However, this report will focus on a school district that requires state support.
- ³ Chapter 243, Statutes of 1947. Initially, the State Allocation Board administered a number of Public Works programs for the State ranging from housing and employment assistance to school facilities construction. Various programs include: the Postwar Planning and Acquisition, Construction and Employment Act, Veterans Temporary Housing, State School Building Construction Programs, Emergency Relief Programs, and Community Assistance Programs (State Allocation Annual Report 1983-1984, p. 1).
- ⁴ California Government Code 15502.
- ⁵ Government Code 15490.
- ⁶ While the State Allocation Board submitted policy changes to school districts, an up-to-date handbook was not made available. In addition, turnover of board members and school administrators may lead to ignorance of programs and the program changes.
- ⁷ Amendments to the Constitution, Proposition 1, November 8, 1949.
- ⁸ Amendments to the Constitution, Proposition 4, November 4, 1952.
- ⁹ Op.cit.
- ¹⁰ California School K-12 enrollment grew from 1.689 million students in 1950, to 4.633 million students in 1970 (State of California. Department of Education. Education Demographics Unit. CBEDS Data Collection. "Enrollment in California Public Schools 1950 through 1997").
- ¹¹ This is defined by California Education Code, Section 15102, as the legal limit of debt that a school district can incur based on the assessed value of property in that school district.
- ¹² Known as the State School Building Aid Program. The Legislature determined qualifications in order for school districts to participate in this program. They include the following provisions:
 1. To qualify for a loan from the State a school district must have voted local bonds to 95 percent of its bonding ability.
 2. Borrowing districts financially able to do so must repay the money to the State. Terms of 30 or 40 years of repayments are provided.
 3. No money can be borrowed by a school district unless the proposed loan is approved by two-thirds vote of the electors of the district.
 4. School construction, financed in any part by State loans will be subject to cost controls to be established by State Allocation Board (includes restrictions on the number of square feet of construction allowed per pupil).

²⁵ Property rich communities often have more poor people than property poor communities. The presence of commercial and industrial development can make an otherwise poor district "rich" in its tax base. Conversely, affluent communities often discourage industrial development that would make them property rich, but environmentally poorer. The lack of correlation between poor people and property poor districts is often overlooked in discussions of school finance issues. Even though the distinction has been known for a long time. Campbell, Colin D.; Fischel, William A. National Tax Journal "Preferences for School Finance Systems; Voters Versus Judges." Footnotes from Helen Ladd. "Statewide Taxation of Commercial and Industrial Property for Education." National Tax Journal (June 1976): 143-153.

The New York Times, June 30, 1983, p. A-14. However, some school districts that were academically and fiscally well managed prior to Proposition 13 faced problems. In 1983, the San Jose Unified School District filed for bankruptcy. The National School Boards Association stated that it was the first insolvency of a large school district since the depression. The San Jose Unified School District, at the time, held a reputation for excellence in education. It ranked 14th in the state in the ratio of students to teachers, and its teachers' salaries ranked second highest in Santa Clara County. However, since Proposition 13, the school district set aside maintenance and construction projects, laid off teachers and non-teaching administration, until it could not make further reductions and still continue to pay its staff.

⁴² This evaluation was amended annually. The State developed a formula that was based on standards that considered how a facility was used and how many pupils were unhoused. In some years, the State gave preference to unhoused pupils, while in other years, the state gave first consideration to how a facility was used. Facility use included childcare, before and after school programs, adult education, and traditional K-12 programming.

⁴⁵ California Department of Education. California Year-Round Education Directory 1997-98.

⁴⁶ For example, a school district that needed to build a new elementary school that cost \$4 million could receive \$400,000 from the state if it chose to redirect students to existing facilities that incorporated the MTYRE program.

- ⁴⁷ Chapter 886, Statutes of 1986, added provisions that capped the grant at \$125 per student.
- ⁴⁸ School districts that could not offer to cover any expenses (now referred to as a Priority 2) could conceivably wait years. MTYRE continues today, and has been a successful program. In 1997, more than 1.19 million or about 22 percent of California students attended schools with year-round calendars. The State Department of Education estimates that the MTYRE program has saved that State more than \$1.8 billion in construction costs since its inception. In 1997-98, \$66 million was allocated from the "mega item" of the state budget. About \$40 million was sent to Los Angeles Unified School District to cover the reported 40,872 excess students. However, once students are "excess," they can not be counted as students for the Office of Public School Construction in the erection of new facilities. Approximately 102,000 students are "excess." While the program has provided relief for school construction, it remains a controversy whether educationally the program is successful.

⁸⁰ State bonds were proposed biannually in 1988, 1990, and 1992.

⁸¹ In 1976 and 1978 bond measures were defeated by the electorate.

⁸² "Lawmakers Scrap Over Billions in School Bonds." California Public Finance, May 5, 1997, p. 1.

⁸³ "Huge School Bond Mullied" California Public Finance, September 8, 1997, p. 1.

⁸⁴ This included the type of facility and the number of teaching stations (classrooms).

⁸⁵ The Department of Education, School Facilities Planning Division is responsible for site review and site plan review and is required to recommend all school locations for new schools and additions to schools site regardless of the funding source.

⁸⁶ For example, in 1988, the Los Angeles Unified School District wanted to rehabilitate a hotel into a school. The State Allocation Board paid \$48 million to an escrow account in an attempt to hold the price to acquire the Ambassador Hotel. When the school district and State Allocation Board realized that the site was not acceptable and decided to back out of the contract, they found that the developer had removed the money placed in the escrow account. In addition, when the district attempted to backpedal out of the contract, the owner sued for a breach of contract. Currently, there are negotiations between the school district and the owner of the property, Donald Trump.

⁸⁷ A school district was responsible for developing detailed cost estimates for the proposed school or addition. Site support costs provided funds for the preparation of environmental impact documents, development of relocation reports, determination of relocation claims, and negotiation of site purchases. The state reimburses up to 85 percent of the amount expended for eligible sites.

⁸⁸ This list was limited to those school facility components that have approached or exceeded their normal life expectancy.

⁸⁹ Applications for projects and appeals with correspondence from Carol A. Fisher, Apple Valley Unified School District, Author.

⁹⁰ Reimbursable fees and costs related to plans include architect fees, Division of State Architect/ORS Plan Check fee, CDE Plan Check Fee, Preliminary Tests (like soil, foundation, and exploratory borings) and other fees, for instance, advertising construction bids, and printing of plans.

⁹¹ Pascual, Psyche. "Funding to Build High School Finally Approved By State." Los Angeles Times, June 17, 1993.

⁹² Understanding the board's other five opinions would be difficult to track if not impossible to uncover.

⁹³ To evaluate the State Allocation Board's policies and procedures, it was necessary to obtain the State Allocation Board Handbook. The Handbook contains procedures and policies for reviewing and criteria for approving applications from school districts for bond funds to build new schools. When this report was initiated, the Handbook that the State Allocation Board provided was dated 1995, but contained policies adopted in 1993. Further, the State Allocation Board changes its policies and procedures often, and has no administrative process by which it updates its Handbook. An up-to-date, comprehensive list of policies and procedures was not available in any other format. A new handbook for the Lease Purchase Program was available on line - however, it also suffered from a lack of regular updating. The State Allocation Board meets every month and, hypothetically, policy changes can occur each month. Prior to Proposition 1A, despite being subject to the Administrative Procedures Act, the State Allocation Board had no public notice or participation requirements for the procedures by which it changes its policies. Only long-term policies are published in the California Regulatory Notice Register. Such policies included contracting and affirmative action requirements. Furthermore, staff reported that policies change so frequently, that it would be impossible to include relevant policies in the reporter or any other document.

⁹⁴ The number of students above the maximum number set by CDE to be in a classroom.

⁹⁵ The priority points ranking mechanism is based on, among other things, the percentage of currently and projected unhoused students relative to the total population of the applicant district or attendance area.

⁹⁶ In hardship cases, the State will fund more than 50 percent of new construction if a school district is unable to come up with its 50 percent match and had gone through a reasonable effort. Similarly, districts that are unable to offer a 20 percent match for modernization can seek relief from the State. Financial hardship is defined for those school districts that cannot afford to build, repair, or replace facilities because of fiscal restrictions (for example, an inability to match state funding because of an inability to pass local bonds or a lack of bonding capacity). Facility hardship can also apply to school districts that lack adequate housing for their pupils due to a lack of health and public safety conditions; or because of a natural disaster, traffic safety, or the remote geographic location of pupils (i.e., rural). Excessive costs may be attributed to geographic location, size of project, the cost associated with a new project in urban locations that may require high security or toxic cleanup, and sites that may require seismic retrofitting.

⁹⁷ The State Supreme Court ruled that school districts that were unable to accommodate enrollment growth could ask their city and county councils to limit real estate developers from building additional housing. Some developers found it necessary to offer additional resources (land or money) to get support from school districts and city councils for their projects.

⁹⁸ In three legal challenges, the courts have ruled that cities were not precluded from making zoning or other land-use decisions, because of the availability of classroom space, see *Mira Development Corporation v. City of San Diego*, *William S. Hart Union High School District v. Regional Planning Commission of the County of Los Angeles*, *Murietta Valley Unified School District v. County of Riverside*. The practical effect of the rulings was that cities could limit development on the basis of the supply of classrooms. Some developers found it necessary to offer additional resources, land or money, to get support from school districts and city councils for their projects.

⁹⁹ If the State expends all of its Proposition 1A resources prior to 2006, school districts can ask developers to pay 100 percent of site acquisition and school construction costs. In order to receive developer support under these conditions, school districts must participate in the Multi-Track Year-Round Education program. The Proposition includes language that the State may reimburse developers for up to 50 percent of their costs if subsequent bond funds become available.

¹⁰⁰ Under the old program, school districts had three application phases for each of their projects – planning, site, and construction. Under the new program, there is only one application phase for the entire project proposal, except under hardship provisions.

¹⁰¹ However, once the funds are distributed to the school district, the school district keeps the interest accrued on the funds.

APPENDIX A

School District Financing Mechanisms

In addition to state bond funds, school districts have a variety of other alternatives for funding school construction. These include developer fees, certificate of participation, general obligation bonds, and Mello-Roos taxes. Also, a developer may simply build a school rather than consider other financing alternatives.

Local General Obligation Bonds

In 1986, after an eight-year hiatus, school districts could once again use general obligation bonds to finance school facilities. Bonds are a favorable method of financing, even though they require a two-thirds vote and proceeds cannot be used for items such as buses and furnishings. In 1986, 14 school districts offered bond initiatives. In 1987 and 1988, this number grew to 51 and 54 school districts, respectively. In November 1998, 36 school districts held bond elections.¹⁰⁶

Developer Fees

In 1978, the Wilsona School District was the first to use developer fees. These fees added about \$2,000 to the cost of a typical home in the Lancaster area. While school districts were exacting developer fees, there was no statute that explicitly permitted this activity. The Legislature standardized the authority by giving school districts direct authority to charge developer fees. School districts welcomed developer fees especially because they did not require an election, and the funds associated with the fees could be used for a wide variety of facilities that were associated with enrollment growth. In response to a growing number of complaints from developers, the Legislature capped the amount that could be collected in 1986. Proposition 1A prohibited local agencies from using the inadequacy of school facilities as a reason for not approving housing development projects. The authority to raise developer fees was placed with the State Allocation Board. However, developer fees generally are not enough to cover the full costs of constructing a school.

Certificates of Participation

Certificates of Participation (COPs) are another, though complicated, tool for districts to raise money without voter consent. The most common arrangement is that the district leases a new school owned by another government agency or a nonprofit agency, which in turn raises the capital to build the school by selling shares (certificates of participation). In the long run, lien revenues COPs are remarkably like bonds. One disadvantage of the COP arrangement is that it does not provide a new revenue source for the lease payments. Funds usually come from the school district's general fund.

Mello-Roos

The Mello-Roos Community Facilities Act, established in 1982, authorized school districts and local governments to form "community facilities districts." Subject to the approval of two-thirds of the voters, these special districts could sell bonds to raise revenues for the purpose of financing new buildings, or to rehabilitate existing school facilities. A majority of Mello-Roos districts are created in inhabitable areas that are proposed for development where voting is by the landowners. The district sets a specific tax per house.

H

KATHLEEN CONNELL, as Controller, etc., et al.,
Petitioners,

v.

THE SUPERIOR COURT OF SACRAMENTO
COUNTY, Respondent; SANTA MARGARITA
WATER

DISTRICT et al., Real Parties in Interest.

No. C024295.

Court of Appeal, Third District, California.

Nov. 20, 1997.

SUMMARY

Several Water districts brought mandamus proceedings against the State Controller to enforce a State Board of Control decision that a statewide regulatory amendment, which increases the level of purity required when reclaimed wastewater is used for certain types of irrigation, constitutes a state-mandated program for which water districts are entitled to reimbursement from the state. The trial court entered a judgment that the state mandate was a program for which reimbursement was due, and it directed the Controller to determine the amounts of reimbursement. (Superior Court of Sacramento County, Nos. CV347181, CV357155, CV357156 and CV357950, James Timothy Ford, Judge.)

The Court of Appeal ordered issuance of a writ of mandate directing the trial court to vacate its judgment and enter a new judgment denying the petitions for a writ of mandate. The court held that because the judgment plainly left matters undecided, the judgment was interlocutory and therefore was not appealable; however, the court treated the appeal as a writ petition. On the merits, the court held that the public interest exception to the doctrine of administrative collateral estoppel precluded application of the doctrine to the legal issues raised by defendant. The issues presented were not limited to the validity of any finally adjudicated individual claim, but encompassed the question of subvention obligations in general under the regulatory amendment of wastewater purification standards. The court further held that even if the amendment constitutes a new program for state-mandated costs purposes, the costs are not reimbursable, since the water districts have the authority to levy fees to pay for the program (Wat. Code, § 35470). Rev. & Tax.

Code, former § 2253.2 (now Gov. Code, § 17556), provides that the board shall not find a reimbursable cost if the local agency has the "authority," i.e., the right or power, to levy service charges, fees, or assessments sufficient to pay for the mandated program. The plain language of the statute precludes a construction of "authority" to mean a practical ability in light of surrounding economic circumstances. The court also held that the public *383 interest exception to the doctrine of administrative collateral estoppel permitted the Controller to raise that issue in the trial court. (Opinion by Sims, J., with Puglia, P. J., and Nicholson, J., concurring.)

HEADNOTES

Classified to California Digest of Official Reports

(1a, 1b) Appellate Review § 17--Decisions Appealable--Final Judgment-- Necessity For Further Orders.

A judgment entered in litigation to determine whether a statewide regulatory amendment, which increases the level of purity required when reclaimed wastewater is used for certain types of irrigation, constitutes a state-mandated program for which water districts are entitled to reimbursement from the state, was not a final judgment and thus was not appealable. The challenging parties' petition sought an order directing the State Controller to issue a warrant and the State Treasurer to pay a warrant, but the judgment merely ordered the Controller to determine amounts without disposing of those matters. The record reflected the trial court's recognition that it could not order issuance or payment of warrants unless it determined appropriated funds for such expenditures were reasonably available in the state budget, but the necessary evidentiary hearing on that issue was not held. Because the judgment plainly left matters undecided, the judgment was interlocutory and therefore not appealable.

(2) Appellate Review § 10--Jurisdiction--Appealable Judgment.

An appealable judgment or order is a jurisdictional prerequisite to an appeal.

[See 9 Witkin, Cal. Procedure (4th ed. 1997) Appeal, § § 13-14.]

(3) Appellate Review § 17--Decisions Appealable--

Interlocutory Judgment.

An interlocutory judgment is not appealable; generally, a judgment is interlocutory if anything further in the nature of judicial action on the part of the trial court is essential to a final determination of the rights of the parties.

(4) Mandamus and Prohibition § 44--Mandamus--To Courts--Appeal--Scope of Review.

In reviewing a trial court's ruling on a petition for a writ of mandate, the appellate court is ordinarily confined to an inquiry as to whether the findings and judgment of the trial court are supported by substantial evidence. However, where the facts are undisputed and the issues present questions of law, the appellate court *384 is not bound by the trial court's decision but may make its own determination.

(5) Judgments § 81--Res Judicata--Administrative Collateral Estoppel-- Public Interest Exception-- Board of Control Decision.

In litigation by several water districts against the State Controller to enforce a State Board of Control decision that a statewide regulatory amendment, which increases the level of purity required when reclaimed wastewater is used for certain types of irrigation, constitutes a state-mandated program for which water districts are entitled to reimbursement from the state, the public interest exception to the doctrine of administrative collateral estoppel precluded application of the doctrine to the legal issues raised by defendant. The issues presented were not limited to the validity of any finally adjudicated individual claim, but encompassed the question of subvention obligations in general under the regulatory amendment of wastewater purification standards. If the board's decision was wrong but unimpeachable, taxpayers statewide would suffer unjustly the consequences of a continuing obligation to fund the costs of local water districts.

[See 7 Witkin, Cal. Procedure (4th ed. 1997) Judgment, § 339.]

(6a, 6b) State of California § 11--Fiscal Matters--Reimbursement for State-mandated Costs--Standards for Reclaimed Wastewater--Authority of Water Districts to Levy Fees.

Even if a statewide regulatory amendment, which increases the level of purity required when reclaimed wastewater is used for certain types of irrigation, constitutes a new program for state-mandated costs purposes, the costs are not reimbursable, since the water districts have the authority to levy fees to pay for the program (Wat. Code, § 35470), Rev. & Tax.

Code, former § 2253.2 (now Gov. Code, § 17556), provides that the Board of Control shall not find a reimbursable cost if the local agency has the "authority," i.e., the right or power, to levy service charges, fees, or assessments sufficient to pay for the mandated program. The plain language of the statute precludes a construction of "authority" to mean a practical ability in light of surrounding economic circumstances.

(7) Statutes § 29--Construction--Language--Legislative Intent.

In construing statutes, a court's primary task is to determine the lawmakers' intent. To determine intent, the court looks first to the words themselves. If the language is clear and unambiguous there is no need for construction, nor is it necessary to resort to indicia of the intent of the Legislature. *385

(8) Judgments § 81--Res Judicata--Administrative Collateral Estoppel-- Public Interest Exception-- Legal Issue.

In litigation by several water districts against the State Controller to enforce a State Board of Control decision that a statewide regulatory amendment, which increases the level of purity required when reclaimed wastewater is used for certain types of irrigation, constitutes a state-mandated program for which water districts are entitled to reimbursement from the state, the public interest exception to the doctrine of administrative collateral estoppel permitted defendant to raise the purely legal issue that Rev. & Tax. Code, former § 2253.2 (now Gov. Code, § 17556), precluded reimbursement. The statute provides that the Board of Control shall not find a reimbursable cost if the local agency has the "authority," i.e., the right or power, to levy service charges, fees, or assessments sufficient to pay for the mandated program, and plaintiffs have such authority. The board's finding to the contrary was thus not binding.

COUNSEL

Daniel E. Lungren, Attorney General, Floyd D. Shimomura, Assistant Attorney General, Linda A. Cabatic and Susan R. Oie, Deputy Attorneys General, for Petitioners.

No appearance for Respondent.

James A. Curtis for Real Parties in Interest.

SIMS, J.

This case involves a dispute as to whether a statewide regulatory amendment, increasing the level of purity required when reclaimed wastewater is used for certain types of irrigation, constitutes a state-mandated program for which water districts are entitled to reimbursement from the state. (Cal. Const., art. XIII B, § 6 (hereafter, section 6); [FN1] Gov. Code, § 17500 et seq.; former Rev. & Tax. Code, § 2201 et seq.) The State Controller and State Treasurer appeal from a trial court judgment granting *386 petitions for writ of mandate brought by Santa Margarita Water District (SMWD), Marin Municipal Water District, Irvine Ranch Water District and Santa Clara Valley Water District (the Districts), seeking to enforce a State Board of Control (the Board) decision which found the regulatory amendment constituted a reimbursable state mandate. [FN2] Appellants contend the trial court erred because (1) the amendment did not constitute a new program or higher level of service in an existing program; (2) the Districts' claim was abolished when the statutory basis for their claim-former Revenue and Taxation Code section 2207- was repealed before their rights were reduced to final judgment, and (3) the Districts' authority to levy fees to pay for the increased costs defeats their claim of a reimbursable mandate. Appellants also challenge the trial court's determination that they were collaterally estopped from challenging the Board's decision (finding a reimbursable state mandate) by their failure timely to seek judicial review of the administrative decision. We shall conclude the Districts' authority to levy fees defeats their claim of a reimbursable mandate, and appellants are not collaterally estopped from raising this matter. We therefore need not address the other contentions. Treating this appeal from a nonappealable judgment as an extraordinary writ petition, we shall direct the trial court to vacate its judgment and enter a new judgment denying the Districts' petitions.

FN1 Section 6 provides: "Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the state shall provide a subvention of funds to reimburse such local government for the costs of such program or increased level of service, except that the Legislature may, but need not, provide such subvention of funds for the following mandates: [¶] (a) Legislative mandates requested by the local agency

affected; [¶] (b) Legislation defining a new crime or changing an existing definition of a crime; or [¶] (c) Legislative mandates enacted prior to January 1, 1975, or executive orders or regulations initially implementing legislation enacted prior to January 1, 1975."

FN2 The trial court first held proceedings in the matter of the petition filed by the SMWD. The other three water districts had filed petitions, which were consolidated and awaiting hearing. The parties to the consolidated case filed a stipulation indicating they did not wish to relitigate the entitlement issues already decided by Judge Ford in the SMWD case, and they stipulated to assignment of their cases to Judge Ford pursuant to California Rules of Court, rule 213 (assignment to one judge for all or limited purposes), for determination of amounts as to each district. The judgment expressly covers the petitions of all four districts.

Factual and Procedural Background

In 1975, the State Department of Health Services (DHS) adopted regulations (Cal. Code Regs., tit. 22, § § 60301-60357) implementing Water Code section 13521, which provides: "The State Department of Health Services shall establish uniform statewide recycling criteria for each varying type of use of recycled water where the use involves the protection of public health." Section 60313 [FN3] of title 22 of the California Code of Regulations prescribed the level of purity required for reclaimed water to be used for landscape irrigation. *387

FN3 California Code of Regulations, title 22, section 60313, initially provided: "Landscape Irrigation. Reclaimed water used for the irrigation of golf courses, cemeteries, lawns, parks, playgrounds, freeway landscapes, and landscapes in other areas where the public has access shall be at all times an adequately disinfected, oxidized wastewater. The wastewater shall be considered adequately disinfected if at some location in the treatment process the median number of coliform organisms does not exceed 23 per 100 milliliters, as determined

from the bacteriological results of the last 7 days for which analyses have been completed." (Former § 60313, Cal. Code Regs., tit. 22, Register 75. No. 14 (Apr. 5, 1975).)

In May 1976, SMWD adopted a plan to develop a wastewater reclamation system. In August 1976, SMWD filed an application with the responsible regional water quality control board (Water Control Board) for a permit to discharge wastewater from the proposed reclamation system. SMWD also planned to provide reclaimed water for irrigation, potentially to 2,173 acres of land.

In February 1977, the Water Control Board issued SMWD a permit for operation of a reclamation system—the Oso Creek facility. The permit required SMWD to comply with all applicable wastewater reclamation regulations then in effect.

In late 1977, SMWD learned DHS might be considering modifications to the California Code of Regulations, title 22 regulations.

In August 1978, SMWD completed construction of the Oso Creek facility, at a cost of \$17 million.

In September 1978, DHS amended the regulations. The amendment to California Code of Regulations, title 22, section 60313 [FN4] increased the level of purity required before reclaimed wastewater could be used for the irrigation of parks, playgrounds and school yards. It is this amendment which allegedly constituted a state-mandated cost. SMWD modified its facility to comply with the amended regulations, completing the modifications in 1983. *388

FN4 Section 60313 of California Code of Regulations, title 22, as amended, provides:

"(a) Reclaimed water used for the irrigation of golf courses, cemeteries, freeway landscapes, and landscapes in other areas where the public has similar access or exposure shall be at all times an adequately disinfected, oxidized wastewater. The wastewater shall be considered adequately disinfected if the median number of coliform organisms in the effluent does not exceed 23 per 100 milliliters, as determined from the bacteriological results of the last 7 days for which analyses have been completed, and the number of coliform organisms does not

exceed 240 per 100 milliliters in any two consecutive samples.

"(b) Reclaimed water used for the irrigation of parks, playgrounds, schoolyards, and other areas where the public has similar access or exposure shall be at all times an adequately disinfected, oxidized, coagulated, clarified, filtered wastewater or a wastewater treated by a sequence of unit processes that will assure an equivalent degree of treatment and reliability. The wastewater shall be considered adequately disinfected if the median number of coliform organisms in the effluent does not exceed 2.2 per 100 milliliters, as determined from the bacteriological results of the last 7 days for which analyses have been completed, and the number of coliform organisms does not exceed 23 per 100 milliliters in any sample."

On October 1, 1982, SMWD filed a "test claim" [FN5] with the Board, alleging the regulatory amendment relating to the use of reclaimed wastewater constituted a new program or higher level of service. The test claim was made pursuant to former Revenue and Taxation Code section 2231, [FN6] which required reimbursement to local agencies for costs mandated by the state (see now Gov. Code, § 17561 [FN7]), and former Revenue and Taxation Code section 2207, subdivisions (a) and (b) [FN8] defining "costs mandated by the state." (See now Gov. Code, § 17514. [FN9]) The test claim also cited section 6 (fn. 1, *ante*). *389

FN5 At the time in question, "test claim" meant "the first claim filed with the State Board of Control alleging that a particular statute or executive order imposes a mandated cost on such local agency or school district." (Former Rev. & Tax. Code, § 2218; Stats. 1980, ch. 1256, § 7, p. 4249.) "Estimated claims" and "reimbursement claims" were used to make specific demand against an appropriation made for the purpose of paying such claims. (*Ibid.*) A similar structure, distinguishing between "test claims" and various "reimbursement claims" or "entitlement claims" continues presently in Government Code sections 17521-17522.

At the time in question, the statutory procedure provided that if the Board found a mandate, it did not determine the amount to

be reimbursed to the test claimant; rather, the Board then adopted a statewide cost estimate which was reported to the Legislature. (Stats. 1980, ch. 1256, p. 4246 et seq.; Stats. 1982, ch. 734, p. 2911 et seq.) It was the State Controller who determined specific amounts to be reimbursed, after the Legislature appropriated funds for that purpose. (*Ibid.*)

FN6 Former Revenue and Taxation Code section 2231 provided in part: "(a) The state shall reimburse each local agency for all 'costs mandated by the state,' as defined in Section 2207...." (Stats. 1982, ch. 1586, § 3, p. 6264.)

FN7 Government Code section 17561 provides in part: "(a) The state shall reimburse each local agency and school district for all 'costs mandated by the state,' as defined in Section 17514...."

FN8 Former Revenue and Taxation Code section 2207 provided in part: "'Costs mandated by the state' means any increased costs which a local agency is required to incur as a result of the following: [¶] (a) Any law enacted after January 1, 1973, which mandates a new program or an increased level of service of an existing program; [¶] (b) Any executive order issued after January 1, 1973, which mandates a new program" (Stats. 1980, ch. 1256, § 4, pp. 4247-4248.)

The test claim did *not* invoke other subdivisions of former Revenue and Taxation Code section 2207, concerning "(c) Any executive order issued after January 1, 1973, which (i) implements or interprets a state statute and (ii), by such implementation or interpretation, increases program levels above the levels required prior to January 1, 1973. [¶] ... [¶] ... (h) Any statute enacted after January 1, 1973, or executive order issued after January 1, 1973, which adds new requirements to an existing optional program or service and thereby increases the cost of such program or service if the local agencies have no reasonable alternatives other than to continue the optional program." (Stats. 1980, ch. 1256, § 4, pp.

4247- 4248.) Since these subdivisions were not invoked, we have no need to consider them.

FN9 Government Code section 17514 provides: "'Costs mandated by the state' means any increased costs which a local agency or school district is required to incur after July 1, 1980, as a result of any statute enacted on or after January 1, 1975, or any executive order implementing any statute enacted on or after January 1, 1975, which mandates a new program or higher level of service of an existing program within the meaning of Section 6"

On July 28, 1983, the Board determined the amended regulations imposed state mandated costs. In so doing, the Board rejected the position of state agencies seeking denial of the claim on the ground that local agencies are not mandated to use reclaimed water and because, if local agencies do choose to use it, they can recover the cost in charges made to purchasers of the water.

On January 19, 1984, the Board adopted "Parameters and Guidelines" establishing criteria for payment of claims to water districts pursuant to this mandate. (Former Rev. & Tax. Code, § 2253.2; Stats. 1982, ch. 734, § 10, pp. 2916-2917; Gov. Code, § 17557.)

On May 31, 1984, the Board amended its Parameters and Guidelines to provide for reimbursement of SMWD's cost of preparing and presenting the test claim.

In June 1984, the Board, pursuant to former Revenue and Taxation Code section 2255, [FN10] submitted to the Legislature a statewide cost estimate of \$14 million for this mandate. The Legislature did not appropriate any funds for the mandate in 1984.

FN10 Former Revenue and Taxation Code section 2255 provided: "At least twice each calendar year the Board of Control shall report to the Legislature on the number of mandates it has found and the estimated statewide costs of such mandates. Such report shall identify the statewide costs estimated for each such mandate and the reasons for recommending reimbursement.... Immediately on receipt of such report a local

governmental claims bill shall be introduced in the Legislature. The local government claims bill, at the time of its introduction, shall provide for an appropriation sufficient to pay the estimated costs of such mandates, pursuant to the provisions of this article." (Stats. 1980, ch. 1256, § 20, p. 4255.)

The current provision is contained in Government Code section 17600, which provides: "At least twice each calendar year the commission shall report to the Legislature on the number of mandates it has found pursuant to Article 1 (commencing with Section 17550) and the estimated statewide costs of these mandates. This report shall identify the statewide costs estimated for each mandate and the reasons for recommending reimbursement."

In 1985, the Legislature included an appropriation of almost \$14 million for this state-mandated cost in the budget, but the Governor vetoed the appropriation.

In 1986, a bill including \$945,000 for the subject mandate was introduced, but the bill was not enacted.

On January 27, 1987, SMWD filed in the trial court a petition for writ of mandate pursuant to Code of Civil Procedure section 1085. The petition sought an order directing (1) the State Controller to issue a warrant "to pay the State's obligation to SMWD for its 'costs mandated by the state' " and (2) the State Treasurer to pay the Controller's warrant. *390

At a hearing, the trial court upheld the Board's decision that the amended regulations required a higher level of service and held the doctrines of waiver and collateral estoppel applied to that decision, such that the state, by failing to challenge the Board's decision within the three-year statute of limitations, was barred from challenging it now. However, the trial court did allow the state to argue that the amended regulations did not come within the definition of "program," as that word had recently been defined in County of Los Angeles v. State of California (1987) 43 Cal.3d 46, 56 [233 Cal.Rptr. 38, 729 P.2d 202].

The trial court recognized that, since there was no appropriation for this mandate in the state budget, the court could not grant the relief sought by SMWD (an order directing the Controller to issue a warrant and the Treasurer to pay it) unless the court found the existence of funds reasonably available in the state

budget which could be tapped for this purpose. The trial court stated it was not prepared to find the existence of funds reasonably available without a full evidentiary hearing. Rather than use the Board's statewide estimate, the court believed it needed to know the amount to which each water district would be entitled before it could determine whether there were funds reasonably available in the budget. The trial court ruled the exact amount of money to be reimbursed to the Districts had never been determined and referred the matter to a referee to make that determination.

In February 1989, a court-appointed referee began evidentiary hearings to determine the amount of reimbursement for each water district.

In 1989, the Legislature repealed former Revenue and Taxation Code section 2207 (fn. 8, *ante*), defining "costs mandated by the state." (Stats. 1989, ch. 589, § 7, p. 1978.)

On July 29, 1994, appellants filed in the trial court a motion for judgment on the pleadings/motion to dismiss, arguing repeal of former Revenue and Taxation Code section 2207 destroyed any right to reimbursement and divested the court of jurisdiction to proceed. The motion also revisited the issue presented to and rejected by the Board, that the water districts' authority to levy fees defeated a finding that the costs were reimbursable.

In February 1995, the trial court issued its ruling denying appellants' motion for judgment on the pleadings and for dismissal. The court in its minute order determined repeal of former Revenue and Taxation Code section 2207 in 1989 had not destroyed the Districts' right to reimbursement pursuant to the Board's decision, because the Board's decision was reduced to "final judgment" before the statutory repeal. The court said the Board's *391 decision on July 28, 1983, became final in July 1986, when the applicable three-year statute of limitations for seeking judicial review lapsed. The Board's decision therefore conclusively established the Districts' right to reimbursement, and appellants were collaterally estopped from challenging the Board's decision. The court further said no discernible injustice or public interest precluded this application of collateral estoppel; rather, justice would be furthered by allowing the Districts to enforce their right to reimbursement as established by the Board.

The trial court further said the statutory authority of the Districts to levy service charges and assessments

(Former Rev. & Tax. Code, § 2253.2, subd. (b)(4); [FN11] Stats. 1982, ch. 734, § 10, p. 2916; Gov. Code, § 17556 [FN12]) did not bar reimbursement for state-mandated costs. "When the Board determined that the 1978 amendment of the regulations establishing reclamation criteria imposed reimbursable state-mandated costs, it rejected the argument of the State Departments of Health Services and Finance that the costs were not reimbursable pursuant to former Revenue and Taxation Code section 2253(b)(4) and implicitly determined, in accordance with the presentation of [Santa Margarita Water District] that [the Districts] did not have sufficient authority to levy service charges and assessments to pay for the increased level of service mandated by the 1978 regulatory amendment. This implicit determination, resolving a mixture of legal and factual issues, became final and binding on respondents under the doctrine of collateral estoppel when they failed to seek judicial review of the Board's decision within the three-year limitations period."

FN11 At the time SMWD filed its test claim, former Revenue and Taxation Code section 2253.2 provided in part: "(b) The Board of Control shall not find a reimbursable mandate ... in any claim submitted by a local agency ... if, after a hearing, the board finds that: [¶] ... [¶] (4) The local agency ... has the authority to levy service charges, fees or assessments sufficient to pay for the mandated program or level of service." (Stats. 1982, ch. 734, § 10, p. 2916.)

FN12 Government Code section 17556 provides in part: "The [Commission on State Mandates (formerly the Board of Control)] shall not find costs mandated by the state, as defined in Section 17514, in any claim submitted by a local agency or school district, if, after a hearing, the commission finds that: [¶] ... [¶] (d) The local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service."

At a further hearing concerning the amount owed to each water district, the trial court stated it had erred in referring the matter to a referee and should have

rendered a judgment directing the Controller to determine the amounts owed.

On June 3, 1996, the trial court entered a judgment stating (1) the Board's decision was final at the time the petitions were filed in the trial court; (2) *392 the state mandate is a program for which reimbursement is due under County of Los Angeles v. State of California, supra, 43 Cal.3d 46; (3) the court having concluded it was inappropriate for the court to determine amounts of reimbursement, the Controller was directed to make that determination. The court directed issuance of a writ commanding the Controller to determine the amounts due to the Districts.

Appellants appeal from the judgment.

The Districts filed a cross-appeal, but we dismissed the cross-appeal pursuant to stipulation of the parties.

Discussion I. Appealability

(1a) Because the petition sought an order directing the Controller to issue a warrant and the Treasurer to pay a warrant but the judgment merely ordered the Controller to determine amounts without disposing of those matters, and because the record reflected the trial court's recognition that it could not order issuance or payment of warrants unless it determined appropriated funds for such expenditures were reasonably available in the state budget [FN13], (Carmel Valley Fire Protection Dist. v. State of California (1987) 190 Cal.App.3d 521, 538-541 [234 Cal.Rptr. 795])—a determination requiring an evidentiary hearing which was not held—we requested supplemental briefing on the question whether the judgment was a final appealable judgment, as opposed to an interlocutory judgment.

FN13 The petition for writ of mandate alleged there was a continuously appropriated State Mandates Claims Fund upon which the Legislature had placed restrictions which on their face made the fund inapplicable to the mandate at issue in this case. The petition further alleged these restrictions were unconstitutional, such that upon a judicial declaration of their unconstitutionality, there would exist funds reasonably available to pay SMWD. The trial court made no ruling on these matters. In this appeal, we need not and do not

decide the propriety of the remedy sought by the Districts.

(2) An appealable judgment or order is a jurisdictional prerequisite to an appeal. (Code Civ. Proc., § 904.1; 9 Witkin, Cal. Procedure (4th ed. 1997) Appeal, § § 13-14, pp. 72-73.)

(3) An interlocutory judgment is not appealable; generally, a judgment is interlocutory if anything further in the nature of judicial action on the part of the trial court is essential to a final determination of the rights of the parties. (Lyon v. Goss (1942) 19 Cal.2d 659, 669-670 [123 P.2d 11].)

(1b) In their supplemental briefs, both sides maintain the judgment is a final appealable judgment but for different reasons. Both sides are wrong. *393

Appellants assert the judgment is final because nothing further remains to be done by the trial court. According to appellants, the Controller, after determining what amounts are due, is supposed to submit that amount to the Legislature to appropriate the funds (though the judgment contains no such direction). Appellants assert that, if the Legislature does not appropriate the funds, the Districts' remedy would be to file a new action in the superior court to enforce the court's prior order, and to compel payment out of funds already appropriated and reasonably available for the expenditures. Appellants assert it is thus premature to consider whether appropriated funds are reasonably available to pay any reimbursement due.

The Districts' supplemental brief, while agreeing the judgment is a final appealable judgment, disputes appellants' view of what happens after the Controller determines the amounts. The Districts maintain the trial court intended for appellants to pay the amounts determined by the Controller, despite the judgment's failure so to state. The Districts claim the unresolved factual question of the existence of available appropriated funds in the budget is merely "an administrative detail" which need not be addressed by the court except in a proceeding to enforce the judgment in the event appellants refuse to pay.

Both sides are wrong. Nothing in the judgment requires the Controller to submit an appropriations bill to the Legislature, and appellants cite no authority that would require such a procedure—which would duplicate steps previously undertaken in this case without success. Nor does anything in the

judgment call for issuance or payment of warrants. Carmel Valley Fire Protection Dist. v. State of California, *supra*, 190 Cal.App.3d 521—a case discussed in the trial court and on appeal—recognized that a court violates the separation of powers doctrine if it purports to compel the Legislature to appropriate funds, but no such violation occurs if the court orders payment from an existing appropriation. (*Id.* at pp. 538-539.) Thus, the Districts' view of this matter as an administrative detail for a later postjudgment enforcement proceeding is unsupported.

We recognize this litigation arises from a "test claim," which merely determines whether a state-mandated cost exists. (See fn. 5, *ante.*) Perhaps no issue of payment should arise at all at the test claim stage, though neither side so argues.

In any event, the judgment plainly leaves matters undecided.

We conclude the judgment is interlocutory and therefore not appealable.

Nevertheless, on our own motion, we shall exercise our discretion to treat the appeal as a writ petition and shall grant review on that basis. (Morehart *394 v. County of Santa Barbara (1994) 7 Cal.4th 725, 743-744 [29 Cal.Rptr.2d 804, 872 P.2d 143] [treating appeal as writ petition is authorized means for obtaining review of interlocutory judgments].) We shall exercise our discretion to treat the appeal as a writ petition in the interest of justice and judicial economy, because the merits of the dispositive issues have been fully briefed, both sides urge review, and the judgment compels the Controller to engage in complex factfinding determinations which may be moot if the trial court erred on the merits of the mandate issues. Given the difficulties in discerning how the former statutory process of test claims was supposed to work in practice, we believe the interests of justice and judicial economy are best served by reviewing the judgment rather than dismissing the appeal.

We stress, however, that our review is limited to contentions raised in the briefs—which do not raise issues of the propriety of the remedy sought by the Districts. We express no view on whether the remedy sought by the Districts was an available or appropriate remedy.

II. Standard of Review

(4) In reviewing the trial court's ruling on a writ of

mandate, the appellate court is ordinarily confined to an inquiry as to whether the findings and judgment of the trial court are supported by substantial evidence. (*Evans v. Unemployment Ins. Appeals Bd.* (1985) 39 Cal.3d 398, 407 [216 Cal.Rptr. 782, 703 P.2d 122].) However, where the facts are undisputed and the issues present questions of law, the appellate court is not bound by the trial court's decision but may make its own determination. (*Ibid.*)

III. Collateral Estoppel

We first address the trial court's determination that appellants were collaterally estopped from challenging the Board's determination of state-mandated cost (except for the ability to address the effect of a new Supreme Court case defining "program"). The trial court stated the Board's decision became final for collateral estoppel purposes in July 1986, when the statute of limitations for judicial review expired.

Appellants contend the trial court erred in applying collateral estoppel, because there was no "final judgment" for collateral estoppel purposes, since the amount of reimbursement had yet to be determined.

(5) We conclude it is not necessary to decide the parties' dispute as to whether the requirements of administrative collateral estoppel are met, because even assuming the elements are met, the doctrine of collateral estoppel should be disregarded pursuant to the public interest exception. *395

Thus, our Supreme Court declined to apply collateral estoppel in a state-mandated costs case in *City of Sacramento v. State of California* (1990) 50 Cal.3d 51, 64-65 [266 Cal.Rptr. 139, 785 P.2d 522] (*Sacramento II*). There, a city and a county filed claims with the Board seeking subvention of costs imposed by a statute (Stats. 1978, ch. 2, p. 6 et seq., referred to in *Sacramento II* as "chapter 2/78") which extended mandatory coverage under the state unemployment insurance law to include state and local governments. The Board found there was no state-mandated program and denied the claims. On mandamus, the trial court overruled the Board and found the costs reimbursable. We affirmed the trial court in a published opinion. (*City of Sacramento v. State of California* (1984) 156 Cal.App.3d 182 [203 Cal.Rptr. 258] (*Sacramento I*)). On remand, the Board determined the amounts due on the claims, but the Legislature refused to appropriate the necessary funds. The city filed a class action seeking among other things payment of the state-mandated costs.

The trial court granted summary judgment for the state on the grounds the statute did not impose state-mandated costs. The Supreme Court upheld the trial court's decision.

The Supreme Court in *Sacramento II* rejected the local agencies' argument that the state was collaterally estopped from relitigating the issue whether a state-mandated cost existed, because *Sacramento I* "finally" decided the matter. (*Sacramento II, supra*, 50 Cal.3d at p. 64.) The Supreme Court said: "Generally, collateral estoppel bars the party to a prior action, or one in privity with him, from relitigating issues finally decided against him in the earlier action. [Citation.] '... But when the issue is a question of law rather than of fact, the prior determination is not conclusive either if injustice would result or if the public interest requires that relitigation not be foreclosed....' [Citation.]

"Even if the formal prerequisites for collateral estoppel are present here, the public-interest exception governs. Whether chapter 2/78 costs are reimbursable under article XIII B and parallel statutes constitutes a pure question of law. The *state* was the losing party in *Sacramento I*, and also the only entity legally affected by that decision. Thus, strict application of collateral estoppel would foreclose any reexamination of the holding of that case. The state would remain bound, and no other person would have occasion to challenge the precedent.

"Yet the consequences of any error transcend those which would apply to mere private parties. If the result of *Sacramento I* is wrong but unimpeachable, taxpayers statewide will suffer unjustly the consequences of the state's continuing obligation to fund the chapter 2/78 costs of local agencies...." (*Sacramento II, supra*, 50 Cal.3d at p. 64, original italics.) *396

The Supreme Court also rejected the argument that *res judicata* applied. "Of course, *res judicata* and the rule of final judgments bar us from disturbing individual claims or causes of action, on behalf of specific agencies, which have been finally adjudicated and are no longer subject to review. [Citations.] However, the issues presented in the current action are not limited to the validity of any such finally adjudicated individual claims. Rather, they encompass the question of defendants' subvention obligations *in general* under chapter 2/78." (*Sacramento II, supra*, 50 Cal.3d at p. 65, original italics.)

If this court's opinion finding a reimbursable mandate in *Sacramento I* did not constitute a final adjudication precluding further consideration of the matter, a fortiori the Board's decision in the instant case does not constitute a final adjudication precluding further consideration. Thus, here, as in *Sacramento II*, the issues presented are not limited to the validity of any finally adjudicated individual claim, but encompass the question of subvention obligations in general under the regulatory amendment of wastewater purification standards. If the Board's decision is wrong but unimpeachable, taxpayers statewide would suffer unjustly the consequences of a continuing obligation to fund the costs of local water districts. We reject the Districts' argument that no public interest exists in this case because only a few local entities are involved.

The Districts suggest application of the public interest exception to collateral estoppel would nullify the legislative intent to avoid multiple proceedings by creating a comprehensive and exclusive procedure for handling state mandated costs issues in the administrative forum. (E.g., Gov. Code, § 17500. [FN14]) However, we are bound by Supreme Court authority applying the public interest exception in a state-mandated costs case. (*Auto Equity Sales, Inc. v. Superior Court* (1962) 57 Cal.2d 450 [*39720 Cal.Rptr. 321, 369 P.2d 937].) Moreover, contrary to the Districts' implication, the administrative decision is not the final word; the statutory scheme authorizes judicial review of the administrative decision. (Gov. Code, § 17559; former Rev. & Tax. Code, § 2253.5; Stats. 1977, ch. 1135, § 12, p. 3650.) Additionally, the instant judicial proceeding was initiated by the Districts, not by appellants. Thus, in this case application of the public interest exception to collateral estoppel is not creating multiple proceedings.

FN14 Government Code section 17500 provides in part: "The Legislature finds and declares that the existing system for reimbursing local agencies ... for the costs of state-mandated local programs has not provided for the effective determination of the state's responsibilities under Section 6 The Legislature finds and declares that the failure of the existing process to adequately and consistently resolve the complex legal questions involved in the determination of state-mandated costs has led to an increasing reliance by local agencies and school districts on the judiciary and, therefore, in

order to relieve unnecessary congestion of the judicial system, it is necessary to create a mechanism which is capable of rendering sound quasi-judicial decisions and providing an effective means of resolving disputes over the existence of state-mandated local programs. [¶] It is the intent of the Legislature in enacting this part to provide for the implementation of Section 6 ... and to consolidate the procedures for reimbursement of statutes specified in the Revenue and Taxation Code with those identified in the Constitution. Further, the Legislature intends that the Commission on State Mandates, as a quasi-judicial body, will act in a deliberative manner in accordance with the requirements of Section 6"

In light of the Supreme Court's decision in *Sacramento II*, we disregard earlier authority of an intermediate appellate court which applied administrative collateral estoppel to a question of law in a state-mandated costs case without express discussion of the public interest exception. (*Carmel Valley Fire Protection Dist. v. State of California*, *supra*, 190 Cal.App.3d at p. 536.)

We conclude that, insofar as appellants' contentions present questions of law, the public interest exception to administrative collateral estoppel governs, and we shall therefore address the legal arguments raised in appellants' brief.

IV. Authority to Levy Fees

(6a) Appellants contend that, even if the regulatory amendment is a new program for state mandated costs purposes, the Districts' authority to levy fees defeats a determination that the costs are reimbursable. We agree.

At the time SMWD filed its test claim, former Revenue and Taxation Code section 2253.2 provided in part:

"(b) The Board of Control shall not find a reimbursable mandate, pursuant to either Section 2250 of this code or to Section 905.2 of the Government Code, in any claim submitted by a local agency or school district, pursuant to subdivision (a) of Section 2218, if, after a hearing, the board finds that:

.....

"(4) The local agency or school district has the authority to levy service charges, fees or assessments sufficient to pay for the mandated program or level of service." [FN15] (Stats. 1982, ch. 734, § 10, p. 2917; Stats. 1980, ch. 1256, § 15, pp. 4253-4254.) *398

FN15 This case presents no issue concerning any distinction between "service charges, fees or assessment," as used in the statute. The parties on appeal frame the issue in terms of the authority to levy "fees." We adopt their usage for the sake of simplicity.

The same provision is currently contained in Government Code section 17556. [FN16]

FN16 Government Code section 17556 provides in part: "The commission [formerly the Board] shall not find costs mandated by the state, as defined in Section 17514, in any claim submitted by a local agency or school district, if, after a hearing, the commission finds that: [¶] ... [¶] (d) The local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service...."

The facial constitutionality of this provision was upheld in County of Fresno v. State of California (1991) 53 Cal.3d 482 [280 Cal.Rptr. 92, 808 P.2d 235]. The *Fresno* court rejected an argument that the statute was facially unconstitutional as conflicting with section 6 (fn. 1, *ante*), which contains no exclusion of reimbursement where the local agency has authority to levy fees. Section 6 requires subvention only when the costs in question can be recovered solely from tax revenues. (53 Cal.3d at p. 487.) Government Code section 17556, subdivision (d), "effectively construes the term 'costs' in the constitutional provision as excluding expenses that are recoverable from sources other than taxes. Such a construction is altogether sound." (County of Fresno v. State of California, *supra*, 53 Cal.3d at p. 487.)

Here, appellants contend that, at all pertinent times, the water districts have had *authority* to levy fees to cover the costs at issue in this case. They cite provisions such as Water Code section 35470, which

provides: "Any district formed on or after July 30, 1917, may, in lieu in whole or in part of raising money for district purposes by assessment, make water available to the holders of title to land or the occupants thereon, and may fix and collect charges therefor. The charges may include standby charges to holders of title to land to which water may be made available, whether the water is actually used or not. The charges may vary in different months and in different localities of the district to correspond to the cost and value of the service, and the district may use so much of the proceeds of the charges as may be necessary to defray the ordinary operation or maintenance expenses of the district and for any other lawful district purpose."

We agree this statute on its face authorizes the Districts to levy fees sufficient to pay the costs involved with the regulatory amendment. We thus shall conclude the Board erred in finding a right to reimbursement despite this authority to levy fees, and we shall conclude appellants are not collaterally estopped from pressing this point.

The Districts do not dispute they have authority to levy fees for the costs involved in this case. Instead they argue the real issue is whether they had *399 "sufficient" authority. They claim this issue was a mixed question of law and fact, and appellants should be collaterally estopped from raising it. [FN17]

FN17 The Districts assert appellants are relying on evidence that was not before the Board. However, they do not explain what they mean or give us any reference to appellants' brief. We therefore disregard the assertion.

We agree with appellants that the public interest exception to collateral estoppel should be applied here, because the issue presents a pure question of law. The Districts tried to make it a factual issue, but we shall explain why the facts presented by the District were immaterial.

Thus, in proceedings before the Board (where Water Code section 35470 was cited to the Board by state agencies), SMWD did not argue it lacked "authority" to levy fees for this purpose. Instead, SMWD argued and presented evidence that it would not be economically desirable to do so. SMWD submitted declarations stating that rates necessary to cover the increased costs would render the reclaimed water

unmarketable and would encourage users to switch to potable water. SMWD maintained that imposition of higher fees on users would contravene the legislative policy expressed in Water Code section 13512, which directs the state to undertake all possible steps to encourage development of wastewater reclamation facilities.

The Board made no express finding concerning this issue. The record contains only the Board minutes, which reflect a motion was made "To find a mandate and continue the issue regarding the claimant's ability to levy a service charge, to the parameters and guidelines process." There was no second to the motion. A motion was then made to find the regulatory amendment contained a reimbursable mandate. The motion carried. The minutes then state: "Discussion: Chairperson Yost disagreed with the motion as she felt the claimant could recover their costs by levying a service charge" The Board's Parameters and Guidelines stated in part: "If service charges or assessments were levied to defray the cost of the new criteria, the claim must be reduced by the amount received from such charges or assessment."

In proceedings before the trial court, SMWD admitted the district had the authority to levy fees but argued existence of authority was not enough, and the real question was whether it was economically feasible to levy fees sufficient to pay the mandated costs. Thus, SMWD's counsel stated at the hearing in the trial court: "The state keeps focusing on the question of whether the authority to issue, to assess fees and charges exists, and we have never contested that it didn't.

"But the statute which says that the Board cannot find the existence of a mandate if there's authority to assess fees and charges, and then the critical *400 phrase, 'sufficient to pay for the mandated costs,' that's the condition with [sic] which they cannot satisfy.

"We proved that, the Board of Control hearing, through economic evidence. We proved it through testimony that the market was absolutely inelastic in terms of reclaimed water and potable water, that if you raise the price of reclaimed water over the potable water, that people would then buy the potable water, and that's all in the record.

"And so we showed that even though we have the authority, it was not sufficient to pay"

We note the record also reflects comments by

SMWD's counsel to the trial court, that its customers were paying the increased costs as an "advance" against the state's obligation. The court pointed out users' payment of increased costs disproved the economic evidence SMWD had presented to the Board, that it could not raise its prices without losing its customers. The record also contains indications that the Districts funded the increased costs by diverting money from other sources. As will appear, we need not address this evidence, because it is not relevant to the question of authority to levy fees sufficient to fund the increased costs imposed by the regulatory amendment, which is a question of law in this case.

The trial court's minute order stated the districts' authority to levy fees did not bar reimbursement for state-mandated costs, because the Board "implicitly determined" the districts did not have "sufficient" authority to levy fees to pay for the increased service mandated by the 1978 regulatory amendment, and this "implicit determination, resolving a mixture of legal and factual issues, became final and binding on [appellants] under the doctrine of collateral estoppel when they failed to seek judicial review of the Board's decision within the three-year limitations period."

On appeal, appellants argue the sole inquiry is whether the local agency has "authority" to levy fees sufficient to pay the costs, and it does not matter whether the local agency, for economic reasons, finds it undesirable to exercise that authority. Appellants argue this presents a question of law, such that the public interest exception to collateral estoppel would apply (assuming the requirements of collateral estoppel are otherwise met).

We agree with appellants. (7) In construing statutes, our primary task is to determine the lawmakers' intent. (Brown v. Kelly Broadcasting Co. (1989) 48 Cal.3d 711, 724 [257 Cal.Rptr. 708, 771 P.2d 406].) To determine intent, we look first to the words themselves. (*Ibid.*) "If the language is clear *401 and unambiguous there is no need for construction, nor is it necessary to resort to indicia of the intent of the Legislature" (Lungren v. Deukmejian (1988) 45 Cal.3d 727, 735 [248 Cal.Rptr. 115, 755 P.2d 299].)

(6b) Here, the statute is clear and unambiguous. On its face the statute precludes reimbursement where the local agency has "authority" to levy fees sufficient to pay for the mandated program or level of service. The legal meaning of "authority" includes the "Right to exercise powers; ..." (Black's Law Dict.

(6th ed. 1990) p. 133, col. 1.) The lay meaning of "authority" includes "the power or right to give commands [or] take action" (Webster's New World Dict. (3d college ed. 1988) p. 92.) Thus, when we commonly ask whether a police officer has the "authority" to arrest a suspect, we want to know whether the officer has the legal sanction to effect the arrest, not whether the arrest can be effected as a practical matter.

Thus, the plain language of the statute precludes reimbursement where the local agency has the authority, i.e., the right or the power, to levy fees sufficient to cover the costs of the state-mandated program.

The Districts in effect ask us to construe "authority," as used in the statute, as a practical ability in light of surrounding economic circumstances. However, this construction cannot be reconciled with the plain language of the statute and would create a vague standard not capable of reasonable adjudication. Had the Legislature wanted to adopt the position advanced by the Districts, it would have used "reasonable ability" in the statute rather than "authority."

The question is whether the Districts have authority, i.e., the right or power, to levy fees sufficient to cover the costs. The Districts clearly have authority to levy fees sufficient to cover the costs at issue in this case. Water Code section 35470 authorizes the levy of fees to "correspond to the cost and value of the service," and the fees may be used "to defray the ordinary operation or maintenance expenses of the district and for any other lawful district purpose." The Districts do not demonstrate that anything in Water Code section 35470 limits the authority of the Districts to levy fees "sufficient" to cover their costs.

Thus, the economic evidence presented by SMWD to the Board was irrelevant and injected improper factual questions into the inquiry.

On appeal, the Districts briefly argue economic undesirability of levying fees constitutes a lack of authority to levy fees sufficient to cover costs. They claim the evidence before the Board showed SMWD "could not" *402 increase its fees because it was already charging as much for reclaimed as it was for potable water. However, the cited portion of the record does not show SMWD "could not" increase its fees but only that an increase would render reclaimed water unmarketable and encourage users to switch to potable water. The Districts cite no authority supporting their construction of former Revenue and

Taxation Code section 2253.2 (now Gov. Code, § 17556) that *authority* to levy fees sufficient to cover costs turns on economic feasibility. We have seen the plain language of the statute defeats the Districts' position.

(8) Since the issue in this case presented a question of law, we conclude the public interest exception to collateral estoppel applies. (Sacramento II, supra, 50 Cal.3d at p. 64.)

The Districts argue application of the public interest exception in this case raises policy concerns about the finality of administrative decisions on state-mandated costs, because if collateral estoppel does not apply in this case, it will never apply. However, we merely hold, in accordance with Supreme Court pronouncement, that the public interest exception to collateral estoppel applies under the circumstances of this case to this state-mandated cost issue which presents solely a question of law.

The Districts argue any fees levied by the districts "cannot exceed the cost to the local agency to provide such service," because such excessive fees would constitute a special tax. However, the districts fail to explain how this is an issue. No one is suggesting the districts levy fees that exceed their costs.

The Districts cite evidence presented to the referee in the aborted hearing to determine amounts owed to each District, that SMWD's director of finance testified SMWD has other sources of revenue from other services it provides (such as sewer service), maintains separate accounts, and borrowed funds internally from other accounts to cover costs incurred as a result of the subject mandate. The Districts assert this testimony reflects that SMWD "recognized the legal limitations on its authority to impose fees for the services that it provides." However, nothing in this evidence demonstrates any legal limitations on the authority to levy the necessary fees.

The Districts say appellants appear to believe the Districts should require users of other services to subsidize the Districts' cost of reclaiming and selling wastewater, through excessive user fees. However, we do not read appellants' brief as presenting any such argument and in any event do not base our decision on that ground. *403

In a footnote, the Districts make the passing comment: "In light of the adoption of Proposition 218, which added Articles XIII C and XIII D to the California Constitution this past November [1996],

59 Cal.App.4th 382

69 Cal.Rptr.2d 231, 97 Cal. Daily Op. Serv. 8821, 97 Daily Journal D.A.R. 14,255

(Cite as: 59 Cal.App.4th 382)

the authority of local agencies to recover costs for many services will be impacted by the requirement to secure the approval by majority vote of the property owners voting, to levy or to increase property related fees. See Section 6, Article XIII D." The Districts do not contend that the services at issue in this appeal are among the "many services" impacted by Proposition 218. We therefore have no need to consider what effect, if any, Proposition 218 might have on the issues in this case.

We conclude the Districts were not entitled to reimbursement of state-mandated costs, because they had authority to levy fees sufficient to pay for the level of service mandated by the 1978 regulatory amendment. Appellants were not collaterally estopped from raising this issue in the trial court. We thus conclude the Districts' mandamus petitions should have been denied. We therefore need not address appellants' contentions that (1) the regulatory amendment did not constitute a new program or higher level of service, or (2) any right to reimbursement was abolished upon repeal of former Revenue and Taxation Code section 2207.

Disposition

Let a peremptory writ of mandate issue, directing the trial court to vacate its judgment and enter a new judgment denying the Districts' petitions for writ of mandate. Appellants shall recover their costs on appeal.

Puglia, P. J., and Nicholson, J., concurred.

The petition of real parties in interest for review by the Supreme Court was denied February 25, 1998.

To	Vivian Maria	
From	Susan Sanchez	
Co.		
Dept.	Phone # 322-3074	
Fax # 175-599-3382	Fax #	

Dear Ms. Higashi:

Correspondence from the Commission on State Mandates (CSM) requests comments from interested parties on a number of test claims submitted by the Clovis Unified School District. The test claims are: School Facilities Funding Requirements (02-TC-30), Design Build Contracts (02-TC-45), Developer Fees (02-TC-42), and Deferred Maintenance Programs (02-TC-44). Due to the fact that the comments for these test claims are generally due at the same time and the test claims generally deal with facilities or related issues, we have consolidated our comments into one piece of correspondence. Our comments for each test claim are as follows.

School Facilities Funding Requirements (02-TC-30)

This is not a mandated program. It is one of various capital funding mechanisms available to school districts for the funding of facilities. School districts elect to participate in this program and any requirements regarding this program are applicable only after districts elect to participate in this program.

Design Build Contracts (02-TC-45)

This is not a mandated program. It is one of several delivery options that school districts can choose to pursue, if school districts elect to enter into design build contracts. Other factual inaccuracies in this claim include:

Page 13, line 10 of the claim states: Education Code Section 17250.35, subdivision (a), requires the school district governing board to retain the services of an architect or structural engineer to monitor compliance with the established performance criteria and design standards.

This is incorrect. The Education Code states that the governing board *may*, and is *strongly encouraged* to, retain the services of an architect or structural engineer throughout the course of the project.

Page 14, line 6 of the claim states: Subdivision (d) assigns all liability for the facility to the design-build entity.

This is incorrect. The Education Code states that the design-build entity shall be liable for building the facility to specifications set forth in the design-build contract in the absence of contractual language to the contrary.

Page 15, line 5 of the claim states: To the extent that these guidelines are adopted, districts would be required to comply.

This is incorrect. The Education Code only states that the governing board shall review the guidelines. The Education Code does not require compliance with the guidelines. It should be noted that the claimant correctly interpreted this provision on page 5, line 4 of the test claim.

Developer Fees (02-TC-42)

This is not a mandated program. This is a funding option available to local school boards, whereby they can elect to establish developer fees to pay for the construction or re-construction of facilities. Any requirements that apply to the establishment and collection of developer fees are applicable only after districts elect to levy development fees, charges, and/or dedications.

Deferred Maintenance Programs (02-TC-44)

This is not a mandated program. School district elect to participate in this program in order to receive funding for deferred maintenance and for the removal and containment of asbestos or lead. Any requirements regarding this program are applicable only after districts elect to participate in the program.

As required by CSM regulations, we are including a "Proof of Service" indicating that the parties included on the mailing list that accompanied your letter have been provided copies of this letter via either the United States Mail or, in the case of State agencies, Interagency Mail Service.

Should you have questions, please contact Juan Sanchez at (916) 322-3074.

Sincerely,

Gerald C. Shelton, Director
Fiscal and Administrative Services Division

SCHOOLS WHITE PAPER – PREPARED BY THE CALIFORNIA DEPARTMENT OF TOXIC SUBSTANCES CONTROL (DTSC)

DTSC introduction to the contaminated schools issue

In July 1995, staff from the Department of Toxic Substances Control (DTSC) discovered that a new school (Jefferson New Middle School) was under construction across the street from a State Superfund site. The Jefferson School is located in south central Los Angeles, just east of the 110 Freeway at Slauson Boulevard. Subsequent investigations conducted by the Los Angeles Unified School District (LAUSD), under DTSC oversight, determined that the site had never been properly characterized for contamination prior to acquisition or construction, and that many questions remained unanswered regarding cleanup activities that had been performed at the site prior to construction of the school.

This DTSC discovery was the first in a series of events that prompted several legislative hearings and two reports from the Joint Legislative Audit Committee (JLAC), chaired by Assemblymember Wildman, on LAUSD school site acquisition activities. Senator Hayden, Chair of the Senate Natural Resources Committee (SNRC), also conducted several hearings on LAUSD's environmental due diligence and site acquisition practices, focusing primarily on the Belmont Learning Center school complex which is undergoing construction in downtown Los Angeles.

In March 1999, the chairs of the JLAC, SNRC, and the Assembly Committee on Environmental Safety and Toxic Materials (Chair, Hannah-Beth Jackson) convened an investigative hearing on Jefferson Middle School and the Belmont school complex. Senators Polanco and Alarcón and Assemblymember Washington also participated in this hearing. As a result of these inquiries, Senator Hayden, Assemblymember Wildman, and several other legislative members concluded that some school districts, particularly LAUSD, have not exercised an appropriate level of environmental review in selecting sites for new schools.

The hearings and reports documented inadequacies in Education Code requirements that prescribe procedures for acquiring and constructing new schools, especially if the construction is proposed for contaminated properties. The JLAC found that the Department of Education consistently signed off on the acceptability of properties for acquisition before a complete site

characterization had been conducted. JLAC also found that, under then-current law (which has been revised by recently signed legislation), a school district has the responsibility and authority to report on school site contamination and plans for its remediation and to certify to the Department of Education that remediation had been completed. At the various hearings, the Department of Education was criticized for failure to have trained professionals, knowledgeable in hazardous substances, review the environmental documentation submitted with applications for State funding.

The JLAC reports raised questions about several other school site acquisitions in LAUSD. At Assemblymember Wildman's request, DTSC completed review of previous environmental documentation for seven additional sites. Based on this review, DTSC identified deficiencies in each of their site characterizations. At least two of the sites are heavily contaminated, and there has been no coordinated investigation or remediation program in place at the sites (yet construction is already underway at the Belmont Learning Center). Overall, through these various hearings and reports, questions have been raised about school sites in the greater Los Angeles area, existing school sites, and about how prevalent these problems are statewide.

DTSC Accomplishments at Contaminated Schools

In response to the schools contamination issue, DTSC formed a dedicated Schools Unit to identify existing LAUSD schools that have known remediation systems on-site, or possible contamination on or off site (that can affect the school). The Schools Unit is actively working on a number of sites. Another priority is working with LAUSD to develop a boilerplate Preliminary Endangerment Assessment (PEA) work plan. A draft Voluntary Cleanup Agreement (VCA) that includes 47 proposed and existing LAUSD schools is also being finalized. Some highlights of significant accomplishments to date are provided below.

- **Suva Elementary and Intermediate Schools - Montebello, California**

In response to public concern over the possibility of adverse health effects being experienced at a school due to contamination from an adjacent chrome plating facility, DTSC coordinated an expedited multi-agency/multi-media environmental investigation. Within six months, DTSC held public meetings to listen to parent and community concerns, conducted a thorough investigation of the school, oversaw the removal of contaminated soil from the school grounds, and ordered the chrome plating facility to undertake measures to prevent the potential for contaminant exposure of children attending the Suva Schools. DTSC also identified problems with lead paint, and, as a result, the school district conducted a large-scale lead abatement program.

- **Belmont Learning Center – Los Angeles, California**

To address an inquiry by the Joint Legislative Audit Committee, DTSC took the lead role in overseeing environmental and public health issues with respect to this large high school construction project. DTSC has been instrumental in investigating the potential risks at the Belmont site due to the presence of methane gas and other contaminants of concern that are related to an oil field. The Belmont project is currently in the remedial

investigation/feasibility study stage. DTSC will continue to provide assistance and project oversight to LAUSD until a remedy (if one is possible), which is protective of public health, is developed and implemented.

- **Jefferson Middle School – Los Angeles, California**

As noted in the introduction, DTSC staff discovered that a new school (Jefferson Middle School) had been built across the street from a State Superfund site. DTSC's investigation revealed that the Jefferson Middle School was constructed on a former industrial property, and had a poorly designed and malfunctioning soil vapor extraction system. DTSC responded immediately by investigating and determining that there was not an immediate health threat at the school. However, further investigation of the subsurface was required. DTSC is working with LAUSD to complete a remedial investigation/feasibility study for the school property.

- **Pacifico High School – Oxnard, California**

Oxnard Union High School District officials approached DTSC with a time-critical need to evaluate a site on which they propose to build the new Pacifico High School. Plans to build the much-needed school were in jeopardy if the district were to fail to obtain Department of Education approval. This approval hinged on conducting a Preliminary Endangerment Assessment (PEA), with DTSC approval, to demonstrate that the proposed site was safe. DTSC responded by working closely with the District and their consultant to conduct an expedited (approximately 75 days), yet thorough PEA. The site was investigated, a human health risk screening analysis was conducted, and the District received a letter from DTSC confirming that the site is safe.

- **Francis Polytechnic High School (Los Angeles), Towne Avenue Elementary School (Carson), and Third Street Elementary School (Los Angeles) – California**

These three LAUSD schools were the subject of an investigation to determine if an imminent public health threat existed as a result of their proximity to landfills. DTSC worked hand in hand with LAUSD's consultant to develop and implement site-specific investigation workplans for each of these existing schools. While the data collected does not indicate that there is an imminent threat, a thorough investigation will be conducted to evaluate the school sites more closely.

- **Monroe Primary Center – Panorama City**

In April 1999 DTSC agreed to oversee a Phase I and Phase II investigation conducted on LAUSD property upon which a primary center (school for grades K-3) was scheduled to be constructed. The property was a vacant lot, which at one time contained residences. The investigation showed unacceptably high levels of lead and pesticides in the surface soil. The surface soil was excavated and taken to a permitted disposal facility. The top seven feet of soil was then graded to prepare the site for the construction of the school. During the grading operations, three septic tanks and two cesspool areas were discovered and removed. DTSC recommended further sampling be conducted in those areas. LAUSD conducted the sampling, which showed that the site did not pose a risk to human health or the environment. DTSC subsequently issued a "No Further Action" (NFA) letter on June 9, 1999 and school construction proceeded immediately.

- **Valerio Primary Center – Van Nuys**
LAUSD requested DTSC oversight of a Preliminary Endangerment Assessment being conducted on land formerly used as a horticultural area for a junior high school. LAUSD planned to construct another primary center on this property during the summer and to open the school for its first students in the fall. Site soil was tested for metals and pesticides. Soil contaminated with lead from old lead-based painted buildings was removed along with 2,500 cubic yards of soil containing high levels of arsenic. The investigation and soil removal was conducted concurrently with the construction of the primary center so as not to delay the opening of the school. DTSC issued an NFA on October 12, 1999. The NFA was contingent upon DTSC concurrence that any soil brought to the site to replace the 2,500 cubic yards must be certified as clean. The primary center is scheduled to open to students the week of October 25, 1999.

How the DTSC Site Mitigation Process Works for School Sites

(Please note that a Glossary of terms is included as **Attachment A** to this white paper.) The process utilized by DTSC in reviewing school sites is described below and is also portrayed in an attached flow chart (**Attachment B**).

Phase I Environmental Site Assessments/Preliminary Endangerment Assessments

Two recently signed bills (which are described in detail in a later section of this paper) now prescribe the process for DTSC review and approval of school site environmental safety. These bills take effect as law on January 1, 2000. Before their enactment, there was no requirement in state law that DTSC review and approve environmental due diligence documents prior to school property acquisition.

In June 1999, CDE requested that DTSC review all Phase I Environmental Site Assessments (Phase I Assessments) and also work with them in an expedited fashion to reduce their backlog of Phase I Assessments. The agencies agreed to work together on an interim basis to review the Phase I Assessments while an Interagency Agreement (IAG) was under development. Under the IAG and the interim agreement in principal, CDE forwards all Phase I Assessments to DTSC for review. Through January 1, 2000, all DTSC costs for review of the Phase I Assessments are borne by the Department of Education. After January 1, 2000, CDE will be the payor to DTSC, but the affected school districts will be charged an application processing fee by CDE which will include DTSC's costs for review of the Phase I Environmental Site Assessments. (DTSC uses the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments as guidance for the Phase I Assessments.)

Following review of the Phase I Assessment, DTSC advises CDE of any deficiencies and will determine that either: (a) no action is required at the property; or (b) a Preliminary Endangerment Assessment (PEA) is required. A "No Action" determination by DTSC means that the property is suitable for school site development, and ends DTSC involvement with the

site. DTSC will make the “PEA Required” determination if the Phase I Assessment indicates that there may be contamination on the property. Once a “PEA Required” determination is rendered, the School District enters into an Enforceable Agreement with DTSC to govern the next phases of the review process. Alternatively, the District may withdraw its interest in the property.

DTSC/School District Enforceable Agreements

Enforceable Agreements (under DTSC’s Voluntary Cleanup Program) require that the District prepare and submit for DTSC approval, a PEA consistent with DTSC’s PEA Guidance Manual. DTSC assists the District in scoping the PEA. The PEA process requires environmental sampling sufficient for the Department to determine whether or not health or environmental risks exist on the property. A risk analysis is performed as part of the PEA. If the PEA demonstrates that no health or environmental risks exist, DTSC will issue a letter to the District indicating that no further action is required.

If the PEA finds that risks from hazardous substances exist at the site, a much more thorough study of the site, and potentially cleanup actions, will be required if the District still wishes to pursue development of the property. A new agreement or an amendment to the existing agreement would be entered into between DTSC and the School District to address the additional work. For existing schools where contamination was suspected, or remediation systems require evaluation, the School District would enter into an enforceable agreement with DTSC to oversee the environmental work. In all cases, the enforceable agreement could include the legal requirements, the scope of work, a schedule of activities, an estimate of DTSC costs and provisions for payment of DTSC costs for work conducted pursuant to the agreement.

A Remedial Investigation which may involve extensive sampling of soil, ground and surface water, and air, must be conducted to determine the full nature and extent of contamination. Based on this information, a Human Health Risk Assessment must be prepared to establish residential cleanup objectives for the property. The residential cleanup level is used conservatively and considers children as the exposed population. Using information developed in the Remedial Investigation and Health Risk Assessment, a Feasibility Study is conducted to identify a range of remedies for the site that will meet cleanup objectives.

Following approval of the Remedial Investigation, Health Risk Assessment, and Feasibility Study by DTSC, a preferred remedy is identified. Before this remedy can be implemented, it must be formally adopted by DTSC through approval of either a Removal Action Workplan (RAW) or a Remedial Action Plan (RAP). The RAW or the RAP must also meet the requirements of the California Environment Quality Act (CEQA). The Removal Action Workplan is reserved for cleanup activities that cost less than \$1,000,000 and are relatively straightforward (such as a soil excavation with offsite disposal) and are unlikely to generate significant public concern. In some instances, especially for small soil removals, it may be possible to expedite the process by going directly from the PEA to the RAW. The process for approval of the RAW includes providing a public fact sheet and, if appropriate additional public participation activities. The RAW usually contains a detailed cleanup workplan, so that after it is approved, cleanup activities can be implemented expeditiously.

The Remedial Action Plan requires the evaluation of remedial alternatives by several prescribed criteria. A 30-day public comment period and at least one public meeting are also required. After approval of the Remedial Action Plan, an engineering Design is submitted to DTSC for approval before the cleanup is implemented.

Following Cleanup/O&M Agreements

After cleanup activities identified in the Removal Action Workplan or Remedial Action Plan are completed, DTSC provides a Certification that all remedial activities have been properly implemented at the site and the property is suitable for use as a school site.

Some cleanup actions may require long-term Operation & Maintenance (O&M). These include groundwater or soil vapor extraction and treatment systems. In these situations, DTSC will continue to oversee ongoing activities through an O&M agreement with the District. DTSC must carefully evaluate and determine if it is appropriate to allow school use while O&M activities are being conducted, to ensure that children's health is not impacted.

Brownfields issues

Brownfields are sometimes characterized or defined as properties that are abandoned or underutilized due to actual or perceived contamination, and that have redevelopment or reuse potential. In addition to being found throughout urban areas, in California, brownfields are found in rural areas (e.g., agricultural lands, abandoned mine lands, burn dumps, abandoned lumber mills). Schools should be located in close proximity to the school children served, and because the availability of land in more densely populated urban areas is limited, it may be necessary to reuse brownfields in urban areas (and in some rural areas) as school properties. There are pros and cons to using brownfields properties for school construction. Recycling brownfields can curb urban sprawl and its associated problems (increased traffic load and degradation of air quality, increase in infrastructure needs and taxes, loss of open space). It can also facilitate placement of schools in close proximity to the community served by the school, while limiting the need to "take" residential properties for new school construction. Placing a school in an urban area can initiate revitalization of the area overall. Brownfields can have low to high levels of contamination, depending upon the prior use of the property.

Should schools be located on properties with significant contamination? While most properties can ultimately be cleaned up if time or costs are not a factor, DTSC recommends that significantly contaminated sites be dropped from further consideration after the Preliminary Endangerment Assessment is completed. In these instances, DTSC recommends that other properties be evaluated for the school location. Additionally, DTSC recommends that school sites not be located in areas with brownfields surrounding the proposed location. The proposed school site location could be "clean", yet there may be significant unknown contamination in close proximity which may impact the school site and children's health.

While reuse of brownfields as school properties can be a viable option which may offer positive benefits to the community, these properties (and their surroundings) must be carefully

scrutinized (and some should be dropped from consideration completely) to ensure that their selection represents a truly safe environment for school children. DTSC cleanup standards for schools are very stringent to ensure cleanup is protective of children's health, and all properties must be cleaned to these standards, regardless of their status as a brownfield.

School Funding Issues (Prop IA)

Proposition 1A provided state funding for schools construction in California. Two provisions in the proposition pertain to contaminated schools cleanup. One provision addresses class size reduction needs. Districts operating at levels above the required 20 to 1 students/teacher ratio could apply for funds. (LAUSD has been operating at levels higher than this ratio under waivers granted for this purpose.) Only LAUSD and the Santa Ana School District applied for this funding. LAUSD received an apportionment of \$278 million (construction dollars) which they must "match" using local resources (either local bonds or other sources of funding). To obtain these Prop 1A funds, LAUSD had to develop a specific plan for 48 new schools (primary and elementary schools) to address classroom reduction needs.

It is DTSC's understanding that the recently signed legislation (SB 162 and AB 387) does not affect the schools funded by Prop 1A class size reduction monies in that the legislation does not mandate DTSC review/approval of environmental documents for these schools. However, the State Allocation Board (SAB) recently negotiated an agreement between the California Department of Education (CDE) and LAUSD, whereby these Prop 1A funded schools will follow the same process as other proposed state funded schools. Under the terms of the agreement signed in mid-September 1999 between CDE and LAUSD, all environmental documents and work is to be overseen by DTSC; DTSC certification that sites are safe for school occupancy will be required prior to the State Allocation Board allocating 1A funds for construction.

The second relevant provision in Prop 1A addresses schools construction needs based on growth estimates. In order to obtain the funding, the school project must be "ready to go" (property must have been acquired, and all other transactions must have been completed so construction can start immediately). LAUSD's "Growth Master Plan" includes 50 additional schools. The total numbers of schools to be constructed over the next decade may change due to estimates of growth in LAUSD student populations. The estimated cost for these 50 schools is \$1.8 billion, \$900 million to be provided by Prop 1A funds and the LAUSD "match" of \$900 million provided by Prop BB (local Bond funds).

SB 50, the legislation which established the "rules" for Prop 1A funding, required that school districts not purchase properties at a discounted rate (e.g. to purchase a contaminated property, the school district would have to force the owner to cleanup the property at their cost, once completed, the district would then pay full value for the property). This SB 50 provision could have significantly hampered LAUSD's ability to obtain state funds and begin school construction. However, among other things, AB 387 addressed this problem by providing that school districts can assess value to properties based on their condition (e.g., a contaminated property can be purchased at a discounted rate to address costs necessary to cleanup a property).

Using the new AB 387 provision, acquisition and cleanup can now be achieved more quickly, therefore the school district could seek 1A funds much sooner than under SB 50.

Prop 1A funds can be used to pay for cleanup costs and DTSC costs. Based on DTSC's current understanding of both categories of Prop 1A funds, allocation of funds to LAUSD would occur after DTSC has certified that the property has been remediated. (A more thorough explanation of school funding issues can be provided by LAUSD.)

DTSC Role in School Cleanup as Defined by Recent Legislation

SB 162 (Escutia, Chapter 1002, Statutes of 1999) and AB 387 (Wildman, Chapter 992, Statutes of 1999)

These two bills codify a number of the current voluntary processes by mandating the involvement of DTSC in the selection of properties where new school construction is planned, to ensure that new schools are not built on properties contaminated with hazardous materials, including naturally occurring hazardous materials. School districts are required to reimburse DTSC's costs associated with these new requirements. The new process (which mirrors many aspects of the process that was put in place on a voluntary basis under the interagency agreement) will work as follows:

- School districts which intend to use state school bond funds to build new schools must hire a qualified private consultant to conduct a Phase I Environmental Assessment of the proposed school site property. The Phase I Assessment reports, together with all other required submittals are sent to the California Department of Education (CDE) for coordination and approval. CDE is required to forward all Phase I Assessments to DTSC for review and approval. If DTSC finds that the Phase I investigation was conducted in an adequate and complete manner, and that there is no basis for believing that the proposed property is or may be contaminated, then the school district is authorized to purchase the property in question provided that they have met all the other requirements of existing laws, regulations and policies.
- If the Phase I report and/or DTSC determine that a property may be contaminated, then the school district must conduct a Preliminary Endangerment Assessment (PEA) under DTSC oversight. The school district would hire a private consultant to conduct the PEA and contract with DTSC to approve the PEA workplan, oversee the PEA work, and review and approve the final report. If the Preliminary Endangerment Assessment approved by DTSC determines that the property is suitable for school construction without any additional investigation or work, the school district may purchase the property provided that they have met all other procedural requirements.
- If the Preliminary Endangerment Assessment determines that the proposed property has a significant hazardous materials contamination problem, then the school district must make a decision to either find a more suitable property, or fund cleanup of the contaminated property to a level (which must meet residential cleanup standards) approved by DTSC.

- If the school district chooses to remediate a contaminated property, it must contract with DTSC to oversee the cleanup to a level that meets applicable state standards. If additional contamination is found at the site during cleanup, the school district may determine that it will not be cost effective to complete the cleanup and may decide to look for a more suitable property.
- Although unlikely, it is possible that during school construction, contamination may be found on a property that had earlier been determined by DTSC to be free of contamination. It is also possible, but unlikely, that additional contamination may be found at a site during school construction where a cleanup had been performed earlier under DTSC oversight. In these situations, school districts are required to bring the information to DTSC's attention and to stop construction until DTSC determines it is safe to proceed. Finally, these two new laws provide that no new school constructed on previously contaminated property shall be opened for use until DTSC has determined that it is safe to do so.

DTSC Plans for Schools Program Implementation

Staffing plans and issues

DTSC has prepared Budget Change Proposals (BCPs) for FY 2000-2001, which request a significant number of new positions within DTSC to expand its capabilities with regard to toxic school issues/activities. Given the public's and schools districts' concerns, these activities would have been ongoing (in DTSC's opinion) whether or not the recent legislation was enacted into law. New DTSC resources will be used to provide reviews of Phase I Assessments and Preliminary Endangerment Assessments as well as for oversight of any necessary cleanups needed at existing schools or at properties proposed for new school construction. These additional resources will also provide the necessary geotechnical, toxicology and public participation support to such projects.

DTSC's working model for the schools program

DTSC has established a group within its Site Mitigation Program to provide services to schools. This enables staff and management within the group to focus on schools issues and to become sensitized to the unique issues associated with contamination at existing schools and at school sites. For example, school projects often entail a higher level of public interest (particularly existing schools) than do other projects of comparable size and complexity. School projects also tend to operate on a shorter time line than do other Voluntary Cleanup Program projects, due to the need for existing schools to be deemed habitable and to allow local school districts to proceed with new school construction as quickly as possible.

DTSC recently established a Schools Unit in its Glendale office that will service schools in the LAUSD area. As more personnel are needed for the schools program, additional unit(s) will be added in Southern California and in other regions of the state, as needed, to meet the needs of school districts statewide. All staff for the schools programs will be managed in a consistent

manner within the Site Mitigation Program to ensure program consistency as the program grows. A multi-disciplinary team of DTSC experts works collaboratively with the schools unit to ensure that all issues are addressed (such as geologists, engineers, toxicologists, and public participation specialists).

A Top DTSC Management Priority

The schools program is among DTSC's highest priorities. As such, the Department is fully committed to the program's success. To make that happen, DTSC will be administratively establishing new positions and filling vacancies in the current fiscal year to deal with the already greatly increased demand generated by various school districts (particularly LAUSD). DTSC is also currently handling a significant volume of Phase I Environmental Assessments that began being routed to DTSC by the Department of Education for review and approval beginning in July of this year. Finally, DTSC plans to begin now to aggressively implement the provisions of the two bills which were recently signed into law (SB 162 and AB 387), instead of waiting until FY 2000-2001 Budget BCPs come on line next July.

What Does DTSC Need From LAUSD for Program Success?

In order to have a successful working relationship with LAUSD, DTSC needs:

- A single point of contact with LAUSD;
- Prioritization by LAUSD of all school projects; and,
- PEA project schedules for each site in Microsoft Project format

Single Point of Contact

It is important that LAUSD consolidate responsibility for all environmental projects that will be brought to DTSC for review. It has been difficult for DTSC to determine who directs policy, sets priorities, and is ultimately responsible for determining which projects LAUSD wants to work on first. A single point of contact with the above responsibilities would be of great assistance. DTSC anticipates that the new LAUSD Director for the Environmental Health and Safety Branch will fill this gap.

Prioritization of School Projects

In order to work on projects LAUSD considers to be top priority, DTSC needs LAUSD to provide a list of all its school sites, along with the proposed order in which they would like DTSC to work on them. With such a prioritization, DTSC can better meet LAUSD's needs. DTSC will also be better prepared to adjust its staffing levels to provide the necessary service that LAUSD requires at the time that it is most needed.

PEA Project Schedules for Each Site in Microsoft Project Format

Microsoft Project schedules are also necessary to help both LAUSD and DTSC plan for conducting PEAs at the multitude of schools planned for construction over the next several

years. These schedules can also be used as an effective tool to adjust staffing levels and to eliminate unrealistic expectations.

Impediments to Successful Program Implementation

Lack of any of the items noted in the preceding section will significantly slow DTSC program progress. In addition, it is critical that LAUSC use PEA and CERCLA knowledgeable consultants and contractors. This will reduce the amount of time necessary for DTSC to educate consultants and contractors, minimize DTSC comments, and reduce delays due to poor quality and incomplete documents.

Glossary

California Environmental Quality Act (CEQA)

The California Environmental Quality Act (CEQA) was enacted in 1970 (Public Resources Code 21000 et. seq., 14 California Code of Regulations, 1500 et. seq.) to ensure that public agency decision-makers document and consider the environmental implications of their actions. The CEQA process serves as a means by which the public interacts with the decision-makers in developing policies affecting the environment. CEQA requires public agencies to prepare an environmental impact report (EIR) whenever the approval of a proposed project may cause significant effects on the environment. An EIR is a detailed statement designed to identify the significant effects of a project, to identify alternatives to the project, and to indicate ways to mitigate the significant effects. CEQA requires that appropriate measures be taken to prevent avoidable damage to the environment.

The Department of Toxic Substances Control (DTSC) is often responsible for carrying out CEQA procedures for various projects. These projects include hazardous waste facility permits, permit renewals and expansions, site mitigation, facility closures, and other hazardous waste activities. In all of these activities, CEQA serves to identify the potential environmental impacts and mitigation measures, and to provide a vehicle for the public to review and comment on project impacts.

Certification

A formal determination by DTSC that the remedial actions and requirements of an approved Remedial Action Plan (RAP) or Removal Action Workplan (RAW) have been met and, therefore, the site is safe for school use.

Design

Document approved by DTSC which includes detailed engineering plans, schedules, and cost estimates for remedial actions selected in a Remedial Action Plan.

Enforceable Agreement

An agreement between the School District and DTSC that addresses the scope of work, schedule for conducting site investigation and cleanup activities, and an estimate of DTSC oversight costs.

Exposure Pathway

Existing or hypothetical route by which chemicals in soil, groundwater or other media can come into contact with humans, animals, or plants.

Extraction/Treatment System

The equipment, including the wells, pumps, piping, and treatment plant necessary to pump and

remove contaminants from groundwater, and transfer treated water to an appropriate disposal point, e.g. sewer or storm drain.

Health Risk Assessment

A health risk assessment is a document that describes the possible health risks that may result from exposure to contaminants at a site. This is part of the Remedial Investigation/Feasibility Study (RI/FS) process.

Implementation

This activity involves construction of remedial or removal actions specified in a RAP or RAW. Implementation also includes performance testing, start-up and shake down procedures necessary to insure the remedial measure is performing as designed. Completion of this phase requires final inspection and approval by DTSC.

Operation & Maintenance

Operation & Maintenance (O&M) includes all actions necessary to ensure the proper performance of facilities over the lifetime of remedial actions implemented pursuant to a RAW or a RAP. Scheduled O&M activities are identified in an O&M plan which is subject to DTSC approval.

Phase I Environmental Site Assessment

A preliminary assessment of a property to determine whether there has been or may have been a release of a hazardous material, or whether a naturally occurring hazardous material is present, based on reasonably available information about the property and the area in its vicinity. A Phase I environmental assessment may include, but is not limited to, a review of public and private records of current and historical land uses, prior releases of a hazardous material, database searches, review of relevant files of federal, state, and local agencies, visual and other surveys of the property, review of historical aerial photographs of the property and the area in its vicinity, interviews with current and previous owners and operators, and review of regulatory correspondence and environmental reports. Sampling or testing is not required as part of the Phase I environmental assessment.

Preliminary Endangerment Assessment (PEA)

An activity that is performed to determine whether current or past hazardous material management practices or waste management practices have resulted in a release or threatened release of hazardous materials, or whether naturally occurring hazardous materials are present, which pose a threat to children's health, children's learning abilities, public health, or the environment. A preliminary endangerment assessment requires sampling and analysis of a site, a preliminary determination of the type and extent of hazardous material contamination of the site, and a preliminary evaluation of the risks that the hazardous material contamination of a site may pose to children's health, public health, or the environment.

Remedial Action Plan (RAP)

A plan, approved by DTSC, that outlines a specific program of remedial actions to cleanup a contaminated site. Once the Draft Remedial Action Plan is prepared, a public meeting is held and comments from the public are solicited for a period of not less than 30 days. After the public

comment period has ended and public comments have been considered and responded to in writing, DTSC approves the final remedy for the site (the Final RAP).

Remedial Investigation/Feasibility Study (RI/FS)

A series of investigations and studies to identify the types and extent of chemicals of concern in the environment (Remedial Investigation) and provide an evaluation of the alternatives for remediating any identified soil or groundwater problems (Feasibility Study).

Removal or Remedial Action

Includes the cleanup or removal of released hazardous substances from the environment or taking of other actions as may be necessary to prevent, minimize, or mitigate damage which may otherwise result from the release or threatened release of hazardous substances.

Removal Action Workplan

A document subject to approval by DTSC that provides site history, summarizes remedial investigation activities, evaluates remedial alternatives, selects and provides the plan and design criteria for the selected removal action.

Soil Vapor Extraction

A process in which chemical vapors are extracted from the soil by applying a vacuum to wells.

Preface

In this preface. . .

- ▶ Introduction
- ▶ Things to Know
- ▶ Where to Begin

INTRODUCTION

This guidebook was developed by the Office of Public School Construction (OPSC) to assist school districts in applying for and obtaining “grant” funds for the new construction and modernization of schools under the provisions of the Leroy F. Greene School Facilities Act of 1998 (Senate Bill 50). It is intended to be an overview of the program for use by school districts, parents, architects, the Legislature, and other interested parties on how a district or county superintendent of schools becomes eligible and applies for State funding. This guidebook provides direction on accessing the processes leading to project approvals, insight to the various features of the School Facility Program (SFP), and includes suggestions on how to make the funding system as efficient as possible. However, it is not meant to be a step-by-step discussion of every conceivable application process or project type. For complete project specific information be sure to review the SFP Regulations located on the OPSC Web site at www.opsc.dgs.ca.gov and, most importantly, contact your OPSC project manager. The OPSC project managers are assigned by county, and a complete listing of project manager assignments, including telephone numbers and E-mail addresses, are also included on our Web site.

THINGS TO KNOW

Included in this edition are the changes to the SFP as a result of Assembly Bill (AB) 14 (Goldberg), AB 1506 (Wesson), AB 401 (Cardenas), the AB 16 (Hertzberg) change that was not included in the December 2002 edition (urban adjustment factor) and the clarification of types of parking structures that are eligible for additional grants for site development costs.

AB 14 included a pilot program to fund charter school facilities construction (Chapter 6), changed how students enrolled in charter schools are reported for eligibility in the SFP, increased the cap on site acquisition and response action costs, and allows the California Schools for the Deaf and Blind to apply for SFP modernization funding. AB 1506 requires that the State Allocation Board (SAB) receive a written finding from the local school board that a labor compliance program (LCP) has been initiated and enforced prior to the release of funds for SFP a project. AB 401 allows a district, under certain circumstances, to receive funding representing one half the appraised value of a district-owned site when that site will be used for school construction. The last change to the SFP as a result of AB 16 impacts a project's eligibility for increased costs that may be uniquely associated with “urban construction”.

Some program changes are in the regulation process and not yet effective. These changes include modifying the three year SFP new construction eligibility lock-in for small school districts to allow for the capture of increases to the district's enrollment while preserving their protection against a loss of eligibility due to enrollment decreases (AB 16); and, the substantial progress measures for separate site apportionments has been expanded to include other evidence satisfactory to the SAB.

As this edition of the School Facility Program Guidebook is being written, the OPSC and the SAB Implementation Committee are proposing amendments to the regulations regarding requests for pupil grants that exceed the capacity of the project and to use grant eligibility at a grade level other than the proposed project (Use of Grants). At the January 22, 2003, SAB meeting emergency regulations were approved that modify the existing regulations.

Existing regulations with the listed modifications will apply for applications with plans submitted to the Division of the State Architect on or before January 22, 2003. Applications are restricted to pupil grant requests that do not exceed 135 percent of the project capacity and do not include a multi-track year round enrollment (MTYRE) housing plan. For more information contact the district's OPSC project manager.

WHERE TO BEGIN

Chapter 1, School Facility Program Overview and Chapter 2, The State Allocation Board, the Office of Public School Construction, and Other Involved Agencies will provide general information. After reviewing these chapters, the reader may want to review Chapter 4, Application for Eligibility, because establishing eligibility is the first step in filing an application for either new construction or modernization funding. The remaining chapters can be reviewed as the topics arise.

Chapter 1

School Facility Program Overview

In this chapter...

- ▶ Introduction
- ▶ Funding for the School Facility Program
- ▶ Implementation of the School Facility Program

INTRODUCTION

The School Facility Program (SFP) began in late 1998 and is a significant change over previous State facilities programs. The State funding is provided in the form of per pupil grants, with supplemental grants for site development, site acquisition, and other project specific costs when warranted. This process makes the calculation of the State participation quicker and less complicated. In most cases, the application can be reviewed, the appropriate grants calculated, and SAB approval received in 60–90 days regardless of project size.

In addition to a less complicated application process, the SFP provides greater independence and flexibility to the school district to determine the scope of the new construction or modernization project. There is considerably less project oversight by State agencies than in previous State programs. In return, the program requires the school district to accept more responsibility for the outcome of the project, while allowing the district to receive the rewards of a well managed project. All State grants are considered to be the full and final apportionment by the SAB. Cost overruns, legal disputes, and other unanticipated costs are the responsibility of the district. On the other hand, all savings resulting from the district's efficient management of the project accrue to the district alone. Interest earned on the funds, both State and local, also belongs to the district. Savings and interest may be used by the district for any other capital outlay project in the district. See Chapter 13, Additional SFP Requirements and Features for more information on project savings.

The SFP provides a funding source in the form of grants for school districts to acquire school sites, construct new school facilities, or modernize existing school facilities. The two major funding types available are “new construction” and “modernization”.¹ The new construction grant provides funding on a 50/50 State and local match basis. The modernization grant provides funding on a 60/40 basis. Districts that are unable to provide some or all of the local match requirement and are able to meet the financial hardship provisions may be eligible for additional State funding (see Chapter 10, Financial Hardship).

IMPLEMENTATION AND EVOLUTION OF THE SCHOOL FACILITY PROGRAM

Senate Bill 50 (Greene) was chaptered into law on August 27, 1998, establishing the SFP. The legislation required that regulations be approved and in place for accepting and processing applications as soon as Proposition 1A was approved by the voters the following November. The School Facility Program continues to evolve through legislative changes. Assembly Bill (AB) 16 and AB 14 provided for significant changes requiring regulations be approved and in place for accepting and processing applications as soon as Proposition 47 was approved by the voters in November 2002. These changes included funding for Charter school facilities, Critically Overcrowded Schools, Joint Use Projects. Some of the changes that impacted new construction funding include the suspension of Priority Points, an additional grant for energy efficiency, and several changes that impact the determination of eligibility. Some of the changes that impacted modernization funding include the change of the funding ratio between the State and the school district from 80 percent State and 20 percent District to 60 percent State and 40 school district, and additional grants for energy efficiency and the modernization of buildings 50 years old or older.

¹ Education Code Sections 17072.10 and 17074.10 establishes the new construction grant and modernization grant respectively.

Information on each category of funding can be found in the following chapters:

SFP Component	Chapter	Page
New Construction	5	19
Modernization	9	49
Financial Hardship	10	57

Helpful Hint:

A listing of school districts who have received SFP funding is available on the OPSC Web site at www.opsc.dgs.ca.gov.

FUNDING FOR THE SCHOOL FACILITY PROGRAM

Funding for projects approved in the SFP comes exclusively from statewide general obligation bonds approved by the voters of California. The first funding for the program was from Proposition 1A, approved in November 1998. That bond for \$ 9.2 billion contained \$6.7 billion for K-12 public school facilities. The second funding for the program is from Proposition 47, approved in November 2002. It is a \$13.2 billion bond, the largest school bond in the history of the State. It contains \$11.4 billion for K-12 public school facilities.

A future bond is currently proposed for March 2004.

Chapter 2

The State Allocation Board, the Office of Public School Construction, and Other Involved Agencies

In this chapter...

- ▶ State Allocation Board
- ▶ Office of Public School Construction
- ▶ Other Agencies Involved

STATE ALLOCATION BOARD

Created in 1947 by the State Legislature, the State Allocation Board (SAB) is responsible for determining the allocation of State resources including proceeds from General Obligation Bond Issues and other designated State funds used for the new construction and modernization of public school facilities. The SAB is also charged with the responsibility for the administration of the State Relocatable Classroom Program, the Deferred Maintenance Program, and many other facilities related programs. Handbooks on these programs may be found on the OPSC Web site at www.opsc.dgs.ca.gov. Printed copies may be obtained by contacting the OPSC directly.

The SAB meets monthly typically at the State Capitol. At each meeting the SAB reviews and approves applications for eligibility and funding, acts on appeals, and adopts policies and regulations as they pertain to the programs that the SAB administers.

Members

The SAB is comprised of ten members:

- ▶ The Director of the Department of Finance or designee (Traditional SAB Chair)
- ▶ The Director of the Department of General Services or designee
- ▶ The Superintendent of Public Instruction or designee
- ▶ One person appointed by the Governor
- ▶ Three State Senators; appointed by the Senate Rules Committee (two from the majority party and one from the minority party)
- ▶ Three State Assembly Members; appointed by the Speaker of the Assembly (two from the majority party and one from the minority party)

The current SAB members are:

- ▶ Steve Peace, Director, Department of Finance
- ▶ Clothilde Hewlett, Interim Director, Department of General Services
- ▶ Jack O'Connell, Superintendent of Public Instruction
- ▶ David Sickler, Governor Appointee
- ▶ Dede Alpert, Senator
- ▶ Bob Margett, Senator
- ▶ Tom Torlakson, Senator
- ▶ John Dutra, Assembly Member
- ▶ Marco Firebaugh, Assembly Member
- ▶ Tony Strickland, Assembly Member

The current SAB officers are:

- ▶ Luisa M. Park, Executive Officer
- ▶ Bruce B. Hancock, Assistant Executive Officer
- ▶ Karen McGagin, Deputy Executive Officer

SAB Implementation Committee

The SAB Implementation Committee is an informal advisory body established by the SAB to assist the SAB and the OPSC with policy and legislation implementation. The committee membership is comprised of organizations representing the school facilities community which meets approximately once a month depending upon the workload. The SAB Assistant Executive Officer is the chair of the committee. Committee membership as well as the time and location of future meetings can be found on the OPSC Web site at www.opsc.dgs.ca.gov.

OPSC Mission:

"As Staff to the State Allocation Board, the Office of Public School Construction facilitates the processing of school applications and makes funding available to qualifying school districts. These actions enable school districts to build safe and adequate school facilities for their children in an expeditious and cost-effective manner."

Helpful Hint:

The Directory of Services provides information regarding project manager county assignments, including telephone numbers, and other contact information.

OFFICE OF PUBLIC SCHOOL CONSTRUCTION

The OPSC serves the 1,000 plus K–12 public school districts in California. As staff to the SAB, the OPSC is responsible for allocating State funding for eligible new construction and modernization projects to provide safe and adequate facilities for California public school children. The OPSC is also responsible for the management of these funds and the expenditures made with them. It is also incumbent on the OPSC to prepare regulations, policies, and procedures for approval by the SAB that carry out the mandates of the law.

OPSC Responsibilities

The OPSC is charged with the responsibility of verifying that all applicant school districts meet specific criteria based on the type of eligibility or funding which is being requested and to work with school districts to assist them throughout the application process. The OPSC ensures that funds are allocated properly and in accordance with the law and decisions made by the SAB. Since November of 1988, the OPSC has processed over \$26.2 billion dollars in State apportionments to the SAB. The programs, funding, and approvals over that period are shown in Appendix 5, Summary of Bond and Deferred Maintenance Allocations.

The OPSC prepares agendas for the SAB meetings. These agendas keep the SAB members, districts, staff, and other interested parties apprised of all actions taken by the SAB. The agenda serves as the underlying source document used by the State Controller's Office for the appropriate release of funds. The agenda further provides a historical record of all SAB decisions, and is used by school districts, facilities planners, architects, consultants, and others wishing to track the progress of specific projects, the availability of funds, and SAB regulations.

Management of the Office of Public School Construction

The OPSC is directed by an Executive Officer who is appointed by the Governor. The appointee also serves as the Executive Officer to the SAB. A Deputy Executive Officer is selected by the Executive Officer subject to the approval of the Director of General Services. The Deputy oversees the daily operation of the office. An Assistant Executive Officer is appointed by the SAB. Although not technically a member of the OPSC management, the Assistant Executive Officer works directly with the OPSC management team and acts as liaison between the SAB and the OPSC.

OTHER AGENCIES INVOLVED

School districts planning to construct or modernize existing schools require the assistance of several local, State, and federal agencies. It is essential that those dealing with the school construction process have an understanding of the role each agency plays. The three primary State agencies that will be referred to in this guidebook, in addition to the SAB and the OPSC, are the Division of the State Architect (DSA), the California Department of Education (CDE) School Facilities Planning Division (SFPD), and the Department of Toxic Substances Control (DTSC). District representatives may also come into contact with many other agencies. A listing of some of the agencies that might be involved in a school project and their role is provided in Appendix 2, Potential State Agency Involvement.

The agency information provided in this chapter is meant as a tool for school district representatives to become familiar with the primary State agencies involved in the school construction process. The OPSC encourages district representatives to contact each agency to obtain more information about their procedures and processes. To contact the agencies listed below, please see Appendix 1, State Agency Contact Information.

Department of General Services, Division of the State Architect

The primary role of the DSA in the school construction process is to review plans and specifications to ensure that they comply with California's building codes with an emphasis on structural and seismic safety. The review commences when the school district's architect submits working drawings to the DSA. The DSA reviews the working drawings to assure that the proposed structures meet codes and requirements for structure (seismic), fire and life safety, and universal design compliance.

California Department of Education, School Facilities Planning Division

The role of the SFPD is to review and approve school district sites and construction plans. The SFPD review begins when a school district plans to acquire a new school construction site. Prior to approving a site for school purposes, the SFPD reviews many factors, including, but not limited to, environmental hazards, proximity to airports, freeways, and power transmission lines. The review of construction plans by the SFPD focuses mainly on the educational adequacy of the proposed facility and whether the needs of students and faculty will be met. See Chapter 3, Project Development Activities.

Department of Toxic Substances Control

The role of the DTSC in the school construction process begins with the SFPD's site approval process. The DTSC will assist the district with an assessment of any possible contamination, and, if necessary, with the development and implementation of a mitigation plan.

Department of Industrial Relations

The Department of Industrial Relations (DIR) was established to improve working conditions for California's wage earners, and to advance opportunities for profitable employment in California. The role of DIR in the school construction process is to enforce labor laws relating to contractors and employers.

The Labor Code¹ now requires, prior to receiving a SFP fund release, a district to make a certification that a labor compliance program (LCP), that has been approved by the DIR, for the project apportioned under the SFP has been initiated and enforced if both of the following conditions exist:

- ▶ The district has a project which received an apportionment from the funding provided in Proposition 47² or from the potential 2004 State bonds³; and,
- ▶ The construction phase of the project commences on or after April 1, 2003, as signified by the date of the Notice to Proceed.

¹ Refer to the Labor Code Section 1771.7

² Kindergarten-University Public Education Facilities Bond Act of 2002

³ Kindergarten-University Public Education Facilities Bond Act of 2004

The DIR provides a guidebook to assist districts in developing a LCP and has model LCP's available for view on its Web site at www.dir.ca.gov. The DIR also provides public works contract information regarding:

- ▶ LCP's and the Labor Code
- ▶ Classification and Scope of Work
- ▶ Prevailing Wage Determination and Special Determination for a Specific Project
- ▶ Verification of the Status of an Individual Apprentice or an Apprenticeship Program

Questions regarding these matters and LCP approval may be directed to DIR at 415.703.4810.

Chapter 3

Project Development Activities

In this chapter...

- ▶ Introduction
- ▶ Establishing Eligibility
- ▶ Selecting Professional Services
- ▶ Project Responsibilities
- ▶ Cost Reduction
- ▶ Joint Use Projects
- ▶ Reusable Plans
- ▶ Project Financing
- ▶ Site Selection

INTRODUCTION

The School Facility Program (SFP) provides funding to projects that are essentially through the design phase and are ready to begin construction. With the exception of certain advanced planning and site applications for financial or environmental hardship situations, applications for funding require plans approved by the Division of the State Architect (DSA) and by the California Department of Education (CDE). Applications for new construction funding may also require CDE approval of the project site. In most cases, a great deal of time, money, and effort has already been expended before the project ever reaches the Office of Public School Construction (OPSC). Most of the tasks involved in this chapter are not a part of the SFP and are not under the jurisdiction of the State Allocation Board (SAB). However, it is important that the district representative is aware of the options and requirements that may affect the district's project.

ESTABLISHING ELIGIBILITY

One of the first steps a district should consider in the school construction process is establishing eligibility for SFP funding on either a district-wide or high school attendance area basis. This will provide the district with the information needed to determine the possibility and scope of State funding assistance, the types of facilities needed, and the appropriate project site size. See Chapter 4, Application for Eligibility for more information about establishing eligibility.

SELECTING PROFESSIONAL SERVICES

The SFP grants include funding for many professional services related to the development of the school project. Some of the most obvious and commonly used services are provided by architects, civil and structural engineers, and construction managers. Under law, these professional services are different than the services provided by general contractors, painters, site grading subcontractors, and similar construction related work. Unlike construction contracts, professional service contracts are obtained through a qualifications based selection process rather than a competitive bid process.

Because the design professional or other service provider will be engaged long before the application for project funding is submitted to the OPSC, it is critical district representatives are aware that professional services used on projects funded through the SFP must be obtained by a competitive selection process. Failure to do so can jeopardize the project funding.

The Competitive Selection Process

The SFP requires that applicant districts certify that contracts for the services of any architect, structural engineer, or other design professional that were entered into, on or after November 4, 1998 for work on the project were obtained through a competitive process. The term competitive does not mean that the selection has been bid, but rather that a formal qualifications based selection process has occurred that lead to the professional services contract¹.

¹ Chapter 11, commencing with Section 4525 of Division 5 of Title 1 of the Government Code.

Neither the SAB nor the OPSC is qualified to interpret the Government Code requirements pertaining to the selection of professional services. The district is advised to seek legal counsel assistance to ensure that the process used fully complies with this requirement as well as other legal requirements² such as Disabled Veterans Business Enterprise requirements, and the Public Contract Codes.

Eventually, the district will be required to certify that professional design services on the project were selected using a competitive process. This certification is made on the Application for Funding (Form SAB 50-04).

Compliance

The competitive selection requirement applies to a new construction or modernization project if:

- ▶ It is funded under the SFP, and
- ▶ professional services of an architect, structural engineer, or other design professional were used to complete the work in the project, and
- ▶ contracts for those services were signed on or after November 4, 1998.

Compliance with this requirement is very important. The law specifically mandates that the SAB shall not apportion funds to a district unless the competitive process for professional services has been used. If, during an audit at the project completion, it is determined that the competitive process was not used, the entire project grant could be found to have been made illegally.

Districts who are unfamiliar with the process of hiring an architect should be aware that the American Institute of Architects (AIA) California Council has sample contracts available to assist districts. For more information, please contact the AIA at 916.448.9082.

PROJECT RESPONSIBILITIES

During the planning, design, and construction of a school facilities project, many individuals and firms come together to contribute to the project in specific ways. Unless responsibility is assigned by law, the decision about who should perform a given task generally rests with the district as owner. Frequently, however, the district may not be aware of the difference between the types of responsibilities, or even of the need to assign responsibilities and tasks related to the project. This lack of clarity may lead to a situation where a task is assigned to more than one individual or firm, creating a duplication of effort which can be wasteful and counterproductive.

As a result of this situation, a small working group was formed by the Joint Committee on School Facilities to address the issue. The Services Matrix is the result of the group's discussions (see Appendix 4, Services Matrix). District representatives may wish to consult the matrix to determine the responsibilities assigned to a project and to avoid duplication of effort.

COST REDUCTION

The SAB has developed cost reduction guidelines to assist school districts in reducing project construction costs. In April 2000, the SAB made available the Cost Reduction Guidelines. The guidelines are a compilation of hundreds of ideas introduced and discussed at a series of statewide meetings. The input into these guidelines comes from various sources, such as school district representatives, State agencies, architects, building industry representatives, construction managers, and consultants. The guidelines provide districts with ideas and new methods to contain and reduce costs and to maximize the return on expenditures. Along with cost reduction guidelines, other incentives within the program, such as the retention of savings, exist to promote efficiency in design and construction of school facility projects. (See Chapter 13, Additional SFP Requirements and Features for more information on project savings.)

² CEQA and Planning per Public Resources Code Section 21151.2.

Helpful Hint:

The SAB publication on cost reduction is available on the OPSC Web site.

JOINT USE PROJECTS

The language in the law which creates the SFP requires that the applicant school district consider the joint use of core facilities. The SAB's Cost Reduction Guidelines contains a number of suggestions as to how a district might investigate such joint use possibilities. Grants received under the new construction program may be used to fund school facilities related joint use projects. Typical joint use projects include multipurpose rooms, libraries, gymnasium, or any other type of facility that can be used by both the district and the community.

Proposition 47 provides funding for Joint Use projects, specific criteria to access this funding was included in AB16 (Hertzberg) (see Chapter 8, Joint Use Projects for more information).

REUSABLE PLANS

The SFP requires the SAB to develop recommendations regarding the use of cost-effective, efficient, and reusable facility plans. Many districts have found that reusing some part or all of a school plan previously constructed in the district or in another district can lead to efficiencies in both the time required to prepare construction plans and the cost of constructing the facility. Such plan reuse is not always feasible, and, even when possible, may require considerable redesign work for the new site; however, in many circumstances the advantages can be significant.

To assist districts with exploring the feasibility of plan reuse for their new construction project, the SAB and the OPSC have developed an Internet-based "catalog" of plans that can be searched and browsed by anyone. The link on the OPSC Web site "Prototype School," contains floor plans, renderings, and vital statistics for a number of projects ranging from complete schools to single classrooms and support buildings. Districts are encouraged to download information on any of the projects on the OPSC Web site without charge. Districts may then contact the architects responsible for the original projects to pursue adaptation of the facilities to their individual needs. Arrangements for use of the plans are made by the district with the design professional. Of course, all plans on the OPSC Web site are copyrighted by the designers or firms that submitted them. The SAB and OPSC do not participate in anyway except as a clearinghouse for plans of school facilities.

PROJECT FINANCING

A district has several different options available to meet its 50 percent funding requirement for new construction and 40 percent funding requirement for modernization projects. Some financing mechanisms the district may consider are:

- ▶ General obligation bond funds
- ▶ Mello-Roos
- ▶ Developer fees
- ▶ Proceeds from the sale of surplus property
- ▶ Federal grants

Once a district has received a SFP apportionment and is ready for funds to be released on a project, they will need to certify on the Fund Release Authorization (Form SAB 50-05) that their contribution to the project has already been expended, is on deposit, or will be expended prior to the notice of completion for the project. (See Chapter 13, Additional SFP Requirements and Features for more information on the fund release process.)

SITE SELECTION

The SFP provides that in addition to the basic grant for a new construction project, the district may also receive up to 50 percent of the cost of site acquisition (see Chapter 5, New Construction Funding or Chapter 10, Financial Hardship). In most cases, the district must have completed the process of identifying the site and must have approval of the site by the CDE prior to applying for site acquisition funding. Some separate site applications for financial or environmental hardships do not need this approval at the time of application. See further discussion under those topics in Chapter 5, New Construction Funding. The identification and approval process falls under the jurisdiction and responsibility of agencies other than the SAB and the OPSC, and is therefore outside the scope of this guidebook. However, because the processes required can be a major factor in a timely application submittal for project funding, district representatives should be aware of some of the basic requirements for site selection as follows:

Identifying a Site

Selecting a site for a new construction project to be funded under the SFP is primarily a local process. The SAB has guidelines and regulations relating only to the funding limits related to site acquisition³. The CDE is given the authority in law to develop standards for school site acquisition related to the educational merit and the health and safety issues of the site. The CDE uses these standards to review a site and to determine if the site is an appropriate location for a school facility. The CDE approval is a requirement before the application for funding can be submitted to the OPSC and subsequently to the SAB for funding.

Site Approval

There are many components that make up the review and approval of a proposed school site. The CDE publication, *School Site Selection and Approval Guide*, addresses these components more completely than this guidebook can. Therefore, the district representative considering an application for a site under the SFP should consult the CDE or their publications. Contact information can be found in Appendix 1, State Agency Contact Information.

³ SFP Regulations Sections 1859.74 through 1859.76.

Chapter 4

Application for Eligibility

In this chapter...

- ▶ Introduction
- ▶ New Construction Eligibility
- ▶ Modernization Eligibility

Helpful Hint:
Applications for eligibility may be filed in advance of applications for funding.

INTRODUCTION

The School Facility Program (SFP) provides State funding assistance for two major types of facilities construction projects: new construction and modernization. The process for accessing the State assistance for this funding is divided into two steps: an application for eligibility and an application for funding. Applications for eligibility are approved by the State Allocation Board (SAB) and this approval establishes that a school district or county office of education meets the criteria under law to receive assistance for new construction or modernization. Eligibility applications do not result in State funding. In order to receive the funding for an eligible project, the district representative must file a funding application with the Office of Public School Construction (OPSC) for approval by the SAB. See Chapter 5, New Construction Funding and Chapter 9, Modernization Funding for information on submitting applications for funding.

Applications for eligibility may be filed in advance of an application for funding, or the eligibility and funding requests may be filed concurrently at the preference of the district. In either case, an application for eligibility is the first step toward funding assistance through the SFP. The process must be done only once. Thereafter, the district need only update the eligibility information if additional new construction and modernization funding applications are submitted.

After the application for eligibility is reviewed by the OPSC, it is presented to the SAB for approval. The SAB's action establishes that the district has met the criteria set forth in law and regulation to receive State funding assistance for the construction of new facilities or the modernization of existing facilities. Throughout this chapter, references to the district also include a county office of education unless otherwise noted.

The discussions in this chapter are intended to describe the basic processes a district will encounter and use for establishing eligibility. Every possible situation cannot be dealt with in this overview. When preparing an application, the district representative should always contact the OPSC project manager to be sure that the district's approach is correct and will result in the most eligibility possible for State assistance. To learn more about the SFP program, visit the OPSC Web site at www.opsc.dgs.ca.gov.

NEW CONSTRUCTION ELIGIBILITY

The underlying concept behind eligibility for new construction is straightforward. A district must demonstrate that existing seating capacity is insufficient to house the pupils existing and anticipated in the district using a five-year projection of enrollment. Once the new construction eligibility is determined, a "baseline" is created that remains in place as the basis of all future applications. The baseline is adjusted for changes in enrollment and for facilities added, and may be adjusted for other factors such as errors and omissions or amendments to the Regulations. For a complete list of adjustments, refer to SFP Regulation Section 1859.51. Except for these updates, the establishment of the eligibility baseline is a one-time process.

Establishing Eligibility on a District-Wide or High School Attendance Area

Districts generally establish eligibility for new construction funding on a district-wide basis. For most districts this is the most beneficial method, and the vast majority of applications are filed in this manner. However, under certain circumstances, the district may have more eligibility if the applications are made on a High School Attendance Area

(HSAA) basis using one or several attendance areas. This circumstance occurs when the building capacity in one HSAA prevents another from receiving maximum eligibility. For example, one attendance area may have surplus classroom capacity while another does not have the needed seats to meet the current and projected student enrollment. If the district were to file on a district-wide basis, there might be little or no overall eligibility, even though the students in one attendance area are “unhoused” by the definitions established in the SFP. In this case, by filing on a HSAA, the eligibility would increase to allow construction of adequate facilities for the unhoused students.

The district may file using one high school attendance area, or at the district’s option, it may combine two or more adjacent HSAAs, commonly called a “Super Attendance Area.” In either case, the attendance areas must serve an existing, operating high school, and the district must demonstrate that at least one HSAA has negative eligibility at any grade level. Continuation or proposed high schools may not be used for this purpose. Once a district receives funding using a high school attendance area as the basis of its eligibility, it must continue to file future new construction applications on that basis for five years.

Eligibility Process

The SAB has adopted three forms to assist districts in collecting the information needed to establish eligibility. The following outlines the three-step process a district uses to establish new construction eligibility:

► Process for Establishing New Construction Eligibility

Step	Documentation	Purpose
1	Enrollment Certification/Projection (Form SAB 50-01)	Used to collect information about the district’s current and historical enrollment and to project that data five years into the future.
2	Existing School Building Capacity (Form SAB 50-02)	Used to record all the teaching stations in the district that are adequate to house students.
3	Eligibility Determination (Form SAB 50-03)	Used to compare the information from the first two forms and to determine if the district is eligible for new construction or modernization grants.

The forms referred to in the table can be downloaded from the OPSC Web site at www.opsc.dgs.ca.gov in a format that allows them to be printed as blank forms or completed on the computer and printed for submission to the OPSC. A replica of the forms can be viewed in Appendix 3, SFP Required Forms. An Excel spreadsheet titled SAB 50-01, 02, 30 Excel Combined Worksheets is also available on the OPSC Web site that will perform all the required calculations.

Step One – Enrollment Projections

It may take several years to take a new construction project from the initial determination of need to final completion of construction and occupancy. Because of this, the SFP provides a projection of enrollment five years into the future to determine eligibility for funding. The Enrollment Certification/Projection (Form SAB 50-01) is used to make this projection. This form assists the district with determining future needs, planning, arranging State and local funding, and constructing the project before the children to be served arrive. The method of projecting enrollment into the future involves using current and historical California Basic Educational Data System (CBEDS) enrollment data for the district. The data collected is then projected into the future for five years using a method known as a Cohort Survival Projection. A district can obtain CBEDS data from the California Department of Education (CDE).

A district may file on a HSAA basis utilizing one or more HSAA. If the district chooses to file an application on this basis the current and three previous years enrollment data in the HSAA or HSAAs (see section on High School Attendance Areas in this chapter) will be needed to be included on the Form SAB 50-01.

Once the district enters the required current and historical enrollment figures, the projection is done automatically on the Excel version of this form. In addition to the five-year projection used in the SFP, the form will also produce a one-year projection for the State Relocatable Classroom Program.

Supplemental Enrollment Figures. A district may supplement the current and historical enrollment figures by the pupils that will occupy dwelling units included in approved subdivision maps or valid tentative subdivision maps for developments to be located in the district or HSAA. The enrollment projection form factors these additional students into the enrollment projection. If the district requests this supplement, the district representative will need the following:

- ▶ Approval dates of the maps by the city or county planning commission.
- ▶ The number of units to be built in the subdivision.
- ▶ A yield factor from the various types of housing in the subdivision. As an alternative, the district may accept a state-wide average yield factor for calculation purposes. This factor is specified in the instructions on the Form SAB 50-01.

A supplement to the enrollment projection for proposed housing units is not available for county superintendent applications.

Small districts with current enrollment of less than 300 should be aware that they have an option for reporting their enrollment differently if it has decreased by more than 50 percent from the previous year enrollment. (For more information on using this option please refer to the Form SAB 50-01, Part A.)

Step Two – Existing School Building Capacity

The second part in determining the district's eligibility for new construction assistance is to document the capacity of the school district at the time the first application for eligibility is filed under the SFP. This capacity calculation is done only once. Districts may file capacity information on a district-wide basis or using a HSAA.

The Calculation of Capacity. The Existing School Building Capacity (Form SAB 50-02) is used to capture the information needed for the calculations, and the accompanying instructions give a detailed guide of how to complete the form. The Form SAB 50-02 is essentially a record of all the district's facilities. The SFP Regulations provide instructions on what spaces are to be included or excluded in the calculation of the district capacity¹. It is important to understand that any project funded with local sources must be counted as existing capacity if the contract for construction of the project is signed before the original application for eligibility determination is made. There is an exception provided for projects if the contracts were signed between August 27, 1998 and November 18, 1998, and if the project did not have eligibility under the Lease-Purchase Program (LPP).

The process of calculating the districts' existing school building capacity is as follows:

1. The district completes a gross inventory of all spaces constructed or reconstructed to serve as an area to provide pupil instruction. The grade level of each classroom is also identified.
2. The gross inventory is adjusted by excluding certain spaces that are not considered available teaching stations under law or regulation. The classrooms remaining in the inventory are multiplied by a loading factor of 25 for elementary and 27 for middle and high school classrooms to determine the pupil capacity.
3. A final calculation is done to increase the capacity by a specified amount if the district does not have a substantial number of students enrolled in year round education. High school districts are not subject to this adjustment. The district may request a waiver from this adjustment from the CDE, School Facilities Planning Division.
4. A last adjustment occurs for those districts that receive Multi-Track Year Round Education Operational Grants from the CDE. This increases the district capacity and reduces the final eligibility for the district in a number equivalent to the operational grants the district has most recently received from the CDE.

¹ SFP Regulations, Section 1859.30, "Gross Classroom Inventory".

On-Site Reviews. The district must submit records of the teaching stations existing in the district or HSAA as part of the inventory process. These records generally consist of the following:

- ▶ Diagrams of the facilities at each site in the district. These diagrams need not be highly detailed, but must include all permanent and relocatable classrooms at the site. Many districts use simple “fire-drill” maps for this purpose. The diagrams must be submitted with the application.
- ▶ Documentation supporting any exclusion claimed from the gross inventory. For instance, if the district claims that a portable is excluded because it has been leased for less than five years, a copy of the lease must be in the district’s possession as supporting documentation.

The district may wish to use an OPSC Site Analysis Worksheet to assist with recording all the classrooms in the gross inventory as well as recording the reasons for exclusions, if any. This document is not mandatory but may make the inventory process easier. It also streamlines the OPSC review of the eligibility application.

Helpful Hint:
All of the OPSC worksheets are available on the OPSC Web site at www.opsc.dgs.ca.gov.

Step Three – Determining Eligibility

The last part in the new construction eligibility determination process is done on the Eligibility Determination (Form SAB 50-03). The existing school building capacity calculated in part two is subtracted from the enrollment projection in the first part. The number of pupils left, if any, are considered “unhoused” for the purposes of the SFP. They represent the district’s eligibility for new construction grant entitlement.

Eligibility Application Approval. Once the district has completed steps one through three, they are ready to submit the eligibility application package. The OPSC will conduct a preliminary review of the package to ensure that it is complete prior to adding the application to the workload list. A more detailed review will be completed prior to presentation to the SAB that may include an on-site visit to review the information included in the site diagrams. When the review is complete and the OPSC has validated the eligibility calculations, an item is presented to the SAB for consideration of approval.

In some cases, the OPSC may find that an application lacks required information. If this is the case, the district is asked to provide the needed information within a specified time. If the district is unable to comply, the application may be returned unprocessed. If this occurs, the district may resubmit the application at any time after the needed information is available.

Districts should review the SFP Application Submittal Requirements worksheet, located on the OPSC Web site, to ensure all required information is included with their application.

MODERNIZATION ELIGIBILITY

Establishing eligibility for modernization in the SFP is more simplified than new construction. Applications are submitted on a site by site basis, rather than district-wide or HSAA, as is the case for new construction. To be eligible, a permanent building must be at least 25 years old and a relocatable building must be at least 20 years old. In either case, the facility must not have been previously modernized with State funding. The district must also show that there are pupils assigned to the site who will use the facilities to be modernized. If the facility is currently unused, such as a closed school, it may also be eligible for modernization funding if the district intends to reopen it and assign students immediately.

Application Process

The SAB has adopted a single form to calculate modernization eligibility, the Form SAB 50-03. This is the same form used for new construction applications. It may be downloaded from the OPSC Web site in a format that allows it to be printed as a blank form or completed on a computer and printed for submission to the OPSC. A replica of the form can be viewed in Appendix 3, SFP Required Forms.

In order to complete the Form SAB 50-03, the district representative will need a completed site diagram for the applicable school which contains the following information:

- ▶ The number of permanent classrooms.
- ▶ The number of portable classrooms.
- ▶ The ages of all permanent and portable classrooms.

The instructions on the Form SAB 50-03 will guide the district through the process of calculating the eligibility at that site for modernization. If all the buildings are over 25/20 years old for permanent/relocatable buildings respectively and eligible for modernization, the grant eligibility is simply the number of children that are or can be housed at a site, whichever is less. However, for cases where there is a mixture of classrooms that are under and over the modernization age limits, two optional calculation methods are provided. One option is to count those facilities that are over the age requirement and the children that can be housed in them. The second option is to develop a ratio based on either the square footage or the number of classrooms by comparing the square footage of overage to underage buildings or the number of overage to underage classrooms on the site. The ratio is then applied to the number of children enrolled at the site. If the district selects the option using a ratio of square footage, it will be necessary to provide the square footage information on the site diagrams as well.

Eligibility Application Approval

Once the district has completed part three of the Form SAB 50-03, they are ready to submit the modernization eligibility application package. The OPSC will conduct a preliminary review of the package to ensure that it is complete before adding it to the workload list. A more detailed review will then be completed that may include an on-site visit to review the information included on the site diagrams. When the review is complete and the OPSC has validated the eligibility calculations, an item is presented to the SAB for consideration of approval.

In some cases, the OPSC may find that an application lacks required information. If this is the case, the district is asked to provide the needed information within a specified time. If the district is unable to comply, the application may be returned unprocessed. If this occurs, the district may resubmit the application at any time after the needed information is available. When the application is resubmitted it will be added to the workload list with the new receipt date.

Districts should review the SFP Application Submittal Requirements worksheet, located on the OPSC Web site, to ensure all required information is included with their application.

Helpful Hint:

Did you know that the OPSC provides the current workload list on its Web site?

COMMISSION ON
STATE MANDATES

Re: Test Claim 02-TC-43
Clovis Unified School District
Hazardous Material Assessments

Dear Ms. Higashi:

I have received the opposition and comments of the Department of Finance ("DOF") dated February 3, 2004, to which I now respond on behalf of the test claimant.

A. The Opposition and Comments of the DOF are Incompetent and Should be Excluded

Test claimant objects to the Opposition and Comments of the DOF, in total, as being legally incompetent and move that they be excluded from the record. Title 2, California Code of Regulations, Section 1183.02(d) requires that any:

"...written response, opposition, or recommendations and supporting documentation shall be signed at the end of the document, under penalty of perjury by an authorized representative of the state agency, with the declaration that it is true and complete to the best of the representative's personal knowledge or information and belief."

The DOF opposition and comments do not comply with this essential requirement. Since the Commission cannot use comments unsupported by declarations, but must make conclusions based upon an analysis of the statutes and facts supported in the record, test claimant requests that the comments of the DOF not be included in the Staff's Analysis.

B. The Conclusions of DOF are Incorrect

Since the Commission may weigh the evidence accordingly, test claimant replies to the comments of the DOF as follows:

1. DOF Admits Mandated Activities

DOF concurs "that the statute does require certain hazardous materials removal activity." (DOF Comments, page 1)

2. Participation in the Program is not Voluntary

Although DOF acknowledges that the test claim legislation requires new activities, it notes that Education Code Section 17072.13 is part of the Leroy F. Greene School Facilities Act of 1998 and argues that a school district's participation is strictly voluntary.¹

a. Funding is Contingent Upon Need

The Leroy F. Green School Facilities Act of 1998 (Education Code Sections 17070.10 et seq.) is a necessary source of school building funds. Each school district that participates in the Act is required to submit to the State Allocation Board a report of existing school building capacity. Education Code Section 17071.10(b) The report includes a comprehensive analysis of existing school capacity which calculates the number of pupils housed by grade level in the existing school building capacity of the applicant school district. Education Code Section 17071.25(a)(4) The calculation includes consideration of both owned and leased portable classrooms. Education Code Section 17071.30 Only after consideration of the submitted report does the Board make a determination of the district's ongoing eligibility for new construction funding.²

¹ DOF does not refer to or mention the 10 other Education Code Sections or the 2 Health & Safety Code Sections cited in the test claim. Test claimant must assume, therefore, that DOF has no objection to the mandated activities set forth in these sections.

² This answers DOF's argument that school districts have the discretion to house their student populations by electing year round multi-track schools, two kindergarten sessions per day, portable classrooms or by transporting students to under-used schools. These "options" are already factored in by the Board when determining a district's eligibility for state funding.

The Board then determines the district's maximum total new construction grant eligibility. Education Code 17072.10 In addition to the maximum grant eligibility for new construction, and subject to additional conditions, the Board may provide funding for assistance in site development and acquisition. Education Code Section 17071.12

Then, in addition to the amounts provided pursuant to Sections 17071.10 and 17072.12, the Board may provide site acquisition and hazardous materials evaluation and response action funding subject to the conditions set forth in the test claim legislation.

So, it can be seen, that school districts receive hazardous materials evaluations and response actions only **after** the Board has determined that the district has demonstrated a **need** for the new facility and that the **need** is mathematically greater than other districts. The test claim legislation is based upon **need** and is not "voluntary".

3. Public Education is an Obligation of the State

Since its admission to the Union, California has assumed specific responsibility for a statewide public education system open on equal terms to all. The Constitution in 1849 directed the Legislature to "provide for a system of common schools, by which a school shall be kept up and supported in each district." That constitutional command, with the additional proviso that the school maintained by each district be "free" has persisted to the present day. Butt v. State of California (1992) 4 Cal.4th 668, 680³ In Butt the court explained:

"Accordingly, California courts have adhered to the following principles: Public education is an obligation which the State assumed by the adoption of the Constitution. (Citations) The system of public schools, although administered through local districts created by the Legislature, is 'one system...applicable to all the common schools...' (Citation) In view of the importance of education to society and to the individual child, the opportunity to receive the schooling furnished by the state must be made available to all on an equal basis. (Citation) 'Management and control of the public schools [is] a matter of state[, not local,] care and supervision...' (citations) The Legislature's 'plenary' power over public education is subject only to constitutional restrictions. (Citations) Local districts are the

³ Pursuant to Title 2, California Code of Regulations, Section 1183.03(2), a copy of Butt v. California is attached hereto as Exhibit "A".

State's agents for local operation of the common school system (Citations), and the State's ultimate responsibility for public education cannot be delegated to any other entity. (citation)" (Opinion, at pages 680-681)

Then after the court reminded us that, in *Serrano II*⁴, the court had struck down the then existing State public school financing scheme, which caused the amount of basic revenues per pupil to vary substantially among the respective districts depending on their taxable property values (Opinion, at page 683), the Supreme Court concluded:

"It therefore appears well settled that the California Constitution makes public education uniquely a fundamental concern of the State and prohibits maintenance and operation of the common public school system in a way which denies basic educational equality to the students of particular districts. The State itself bears the ultimate authority and responsibility to ensure that its district-based system of common schools provides basic equality of educational opportunity. (¶)...Whatever the requirements of the free school guaranty, the equal protection clause precludes the State from maintaining its common school system in a manner that denies the students of one district an education basically equivalent to that provided elsewhere throughout the State." (Opinion, at page 685)

DOF's argument that school districts need not participate in the Leroy F. Greene School Facilities Act of 1998 is tantamount to saying that each school district is "on its own" when it comes to needed school construction. Since the quality of school facilities would then depend on the wealth of each individual district, DOF's argument violates the equal protection laws of the State constitution. (Article I, §7, subdivisions (a),(b); Article IV, §16, subdivision (a))

4. School Districts, By Necessity, are Required to use State Funding And There is no "Practical Alternative" to State Funding

The controlling case law on the subject of non-legal compulsion is still *City of Sacramento v. State of California* (1990) 50 Cal.3rd 51 (hereinafter referred to as *Sacramento II*).

a. Sacramento II Facts:

⁴ *Serrano v. Priest* (1971) 5 Cal.3d 584

The adoption of the Social Security Act of 1935 provided for a Federal Unemployment Tax ("FUTA"). FUTA assesses an annual tax on the gross wages paid by covered private employers nationwide. However, employers in a state with a federally "certified" unemployment insurance program receive a "credit" against the federal tax in an amount determined as 90 percent of contributions made to the state system. A "certified" state program also qualifies for federal administrative funds.

California enacted its unemployment insurance system in 1935 and has sought to maintain federal compliance ever since.

In 1976, Congress enacted Public Law number 94-566 which amended FUTA to require, for the first time, that a "certified" state plan include coverage of public employees. States that did not alter their unemployment compensation laws accordingly faced a loss of both the federal tax credit and the administrative subsidy.

In response, the California Legislature adopted Chapter 2, Statutes of 1978 (hereinafter chapter 2/78), to conform to Public Law 94-566, and required the state and all local governments to participate in the state unemployment insurance system on behalf of their employees.

b. Sacramento / Litigation

The City of Sacramento and the County of Los Angeles filed claims with the State Board of Control seeking state subvention of the costs imposed on them by chapter 2/78. The State Board denied the claim. On mandamus, the Sacramento Superior Court overruled the Board and found the costs to be reimbursable. In *City of Sacramento v. State of California* (1984) 156 Cal.App.3d 182 (hereinafter *Sacramento I*) the Court of Appeal affirmed concluding, inter alia, that chapter 2/78 imposed state-mandated costs reimbursable under section 6 of article XIII B. It also held, however, that the potential loss of federal funds and tax credits did not render Public Law 94-566 so coercive as to constitute a "mandate of the federal government" under Section 9(b).⁵

In other words, *Sacramento I* concluded, inter alia, that the loss of federal funds and tax credits did not amount to "compulsion".

⁵ Section 1 of article XIII B limits annual "appropriations". Section 9(b) provides that "appropriations subject to limitation" do not include "Appropriations required to comply with mandates of the courts or the federal government which, without discretion, require an expenditure for additional services or which unavoidably make the provision of existing services more costly."

c. Sacramento II Litigation

After remand, the case proceeded through the courts again. In *Sacramento II*, the Supreme Court held that the obligations imposed by chapter 2/78 failed to meet the “program” and “service” standards for mandatory subvention because it imposed no “unique” obligation on local governments, nor did it require them to provide new or increased governmental services to the public. The Court of Appeal decision, finding the expenses reimbursable, was overruled.

However, the court also overruled that portion of *Sacramento I* which held that the loss of federal funds and tax credits did not amount to “compulsion”.

d. Sacramento II “Compulsion” Reasoning

Plaintiffs argued that the test claim legislation required a clear legal compulsion not present in Public Law 94-566. Defendants responded that the consequences of California’s failure to comply with the federal “carrot and stick” scheme were so substantial that the state had no realistic “discretion” to refuse.

In disapproving *Sacramento I*, the court explained:

“If California failed to conform its plan to new federal requirements as they arose, its businesses faced a new and serious penalty - full, double unemployment taxation by both state and federal governments.” (Opinion, at page 74)

Plaintiffs argued that California was not compelled to comply because it could have chosen to terminate its own unemployment insurance system, leaving the state’s employers faced only with the federal tax. The court replied to this suggestion:

“However, we cannot imagine the drafters and adopters of article XIII B intended to force the state to such draconian ends. (¶) ...The alternatives were so far beyond the realm of practical reality that they left the state ‘without discretion’ to depart from federal standards.” (Opinion, at page 74, emphasis supplied)

In other words, terminating its own system was not an acceptable option because it was so far beyond the realm of practical reality so as to be a draconian response, leaving the state without discretion. The only reasonable alternative was to comply with the new legislation, since the state was practically “without discretion”.

The Supreme Court in *Sacramento II* concluded by stating that there is no final test for a determination of “mandatory” versus “optional”:

“Given the variety of cooperative federal-state-local programs, we here attempt no final test for ‘mandatory’ versus ‘optional’ compliance with federal law. A determination in each case must depend on such factors as the nature and purpose of the federal program; whether its design suggests an intent to coerce; when state and/or local participation began; the penalties, if any, assessed for withdrawal or refusal to participate or comply; and any other legal and practical consequences of nonparticipation, noncompliance, or withdrawal.” (Opinion, at page 76)

e. Statutory Compulsion is not Required

In *Department of Finance v. Commission on State Mandates* (2003) 30 Cal.4th 727, cited by DOF, the supreme court first made it clear that the decision did not hold that legal compulsion is always necessary in order to find a reimbursable mandate:

“For the reasons explained below, although we shall analyze the legal compulsion issue, we find it unnecessary in this case to decide whether a finding of legal compulsion is necessary in order to establish a right to reimbursement under article XIII B, section 6, because we conclude that even if there are some circumstances in which a state mandate may be found in the absence of legal compulsion, the circumstances presented in this case do not constitute such a mandate.” (Opinion, at page 736, emphasis in the original, underlining added)

After concluding that the facts in *Kern* did not rise to the standard of non-legal compulsion, the court affirmed that either double taxation or other draconian consequences could result in non-legal compulsion:

“In sum, the circumstances presented in the case before us do not constitute the type of non-legal compulsion that reasonably could constitute, in claimants’ phrasing, a ‘de facto’ reimbursable state mandate. Contrary to the situation that we described in (*Sacramento II*), a claimant that elects to discontinue participation in one of the programs here at issue does not face ‘certain and severe...penalties’ such as ‘double...taxation’ or other ‘draconian’ consequences (citation), but simply must adjust to the withdrawal of grant money along with the lifting of program obligations.” (Opinion, at page 754, emphasis supplied to illustrate holding is limited to facts presented)

Therefore, "carrot and stick" situations must still be determined on a case by case basis.

f. Districts' Ability to Borrow is Strictly Limited

The authority to issue local school bonds is found in Chapter 1 of Part 10 in Division 1 of Title 1 of the Education Code, commencing at Section 15100. This authority is strictly limited.

Education Code Section 15100 allows a district, when in its judgment it is advisable, and requires it, upon a petition of the majority of its qualified electors, to order an election and submit to the electors of the district the question whether the bonds of the district shall be issued and sold for the purpose of raising money for the purchase of school lots, the building or purchasing of school buildings and the making of alterations or additions to school buildings. Section 15102 provides that such bonded indebtedness shall not exceed 1.25 percent of the taxable property of the district. Section 15106 provides that unified school districts or community college districts may not exceed 2.5 percent of the taxable property of the district.

Chapter 1.5 of Part 10 sets forth the Strict Accountability in Local School Construction Bonds Act of 2000, commencing with Section 15264. ("Proposition 39 bonds") Here again, bonded indebtedness is strictly limited.

Section 15266 provides that the Act is an alternative to authorizing and issuing bonds pursuant to Chapter 1 or Chapter 2 (commencing with Section 15300) when the governing board of a school district or community college district decides, pursuant to a two-thirds vote, to pursue the authorization and issuance of bonds for school facilities. Section 15268 provides that such bonded indebtedness shall not exceed 1.25 percent of the taxable property of the district and may only be issued if the tax rate levied would not exceed thirty dollars (\$30) per year per one hundred thousand dollars (\$100,000) of taxable property when assessed valuation is projected by the district to increase in accordance with Article XIII A of the California Constitution. Section 15270 provides that a unified school district may not authorize or issue bonds that exceed 2.5 percent of the taxable property of the district and may only be issued if the tax rate levied to meet the requirements of Section 18 of Article XVI of the California Constitution in the case of indebtedness incurred pursuant to this chapter at a single election, by a unified school district, would not exceed sixty dollars (\$60) per year per one hundred thousand dollars (\$100,000) of taxable property when assessed valuation is projected by the district to increase in accordance with Article XIII A of the California Constitution.

Chapter 2 of Part 10 sets forth the Bonds of School Facilities Improvement Districts Act, commencing with Education Code Section 15300. Here again, bonded indebtedness is strictly limited.

Section 15300 provides that the chapter provides a method for the formation of school facilities improvement districts consisting of a portion of the territory within a school district or community college district and for the issuance of general obligation bonds by the school facilities improvement district. Section 15330 provides that the total amount of bonds issued shall not exceed 1.25 percent of the taxable property of the school facilities improvement district. Section 15334.5 further provides that no bonded indebtedness may be incurred pursuant to this chapter in an amount that would cause the bonded indebtedness of the territory of the school district or community college district of which the school facilities improvement district is a part, to exceed the limitation of indebtedness specified in Sections 15102 and 15106.

Attached hereto as Exhibit "B", is an article found in the California State Library, by the California Research Bureau. (Cohen, Joel, "School Facility Financing - A History of the Role of the State Allocation Board and Options for the Distribution of Proposition 1A Funds", February 1999) The plight of school districts is described therein as follows:

"With the passage of Proposition 13 in 1978, the State Allocation Board's loan orientation was significantly altered. Under Proposition 13, the amount of tax that property owners paid was limited to no more than one percent of the assessed value of their property. Local property tax revenues diminished, and the burden to fund many local government programs was shifted to the State, including public school construction. Further, local governments lost much of their property taxing authority..." (Ibid, at page 7, emphasis supplied)

To the extent school districts and community college districts already have bonded indebtedness at or near these limits, the argument of DOF that these districts need not apply for state funding is specious reasoning.

- g. The Legislative History of School Finance Legislation Shows an Intent of the Legislature that the State Should Provide the Financing For Schools

A review of the legislative history of school finance shows that the Legislature knows that the State must bear the major burden of financing the construction of new school facilities.

Chapter 4 of Part 10 of Division 1 of Title 1 of the Education Code sets forth the State

School Building Aid Law of 1949, commencing with Education Code Section 15700. Section 15700 provides:

“The Legislature hereby declares that it is in the interest of the state and of the people thereof for the state to aid school districts of the state in providing necessary and adequate school sites and buildings for the pupils of the public school system, the system being a matter of general concern inasmuch as the education of the children of the state is an obligation and function of the state.”

In adopting this act, the Legislature considers that the great need in school construction is for adequate classrooms for the education of the pupils of the public school system...To the end that school classrooms may be made available at once and to all school districts in need of such classrooms...” (emphasis supplied)

Section 15704 requires the State Allocation Board to adopt rules which give:

“...priority in allocating funds to districts to those districts where the children will benefit most from additional schoolhouse facilities...based on acuteness of overcrowding, on sudden growth in attendance, on amount of local tax funds expended for housing of a character within the purposes of this chapter, and on the time the district's application has been ready for allotment...”

Chapter 6 contains the State School Building Aid Law of 1952, commencing with Education Code Section 16000. Section 16001 provides:

“The Legislature hereby declares that it is in the interest of the state and of the people thereof for the state to aid school districts of the state in providing necessary schoolsites and buildings for the pupils of the public school system, this system being a matter of general concern inasmuch as the education of the children of the state is an obligation and function of the state.”

In adopting this chapter, the Legislature considers that the great need in school construction is for classrooms for the education of the pupils of the public school system...To the end that school classrooms may be made available at once and to all school districts in need of such classrooms...” (emphasis supplied)

Section 16007 requires the State Allocation Board to adopt rules which would:

“...give priority in allocating funds to districts to those districts where the children will benefit most from additional schoolhouse facilities...based on

acuteness of overcrowding, on rapidity of growth in attendance, and on the time the district's application has been ready for allotment..."

Article 3 of Chapter 6, contains provisions for School Housing Aid for Exceptional Children, commencing with Education Code Section 16190. Section 16190 provides:

"The board may make apportionments...from any state bonds heretofore or hereafter authorized by the electorate for state school building aid...for assistance to school districts in providing necessary housing and equipment for the education of exceptional children."⁶

Section 16196 provides that:

"...Except as otherwise provided in this section, not more than 50 percent of the amount of any apportionment made pursuant to this section shall be repaid..."

Article 4 of Chapter 6, commencing with Section 16210, is entitled School Housing Aid For Compensatory Education Purposes. Section 16210 sets aside \$35 million dollars of the proceeds of the sale of bonds authorized by the State School Building Aid Bond Law of 1966 to assist school districts. Section 16210 provides:

"...The Director of Compensatory Education may establish priorities for purposes of allocations and grants under this article based upon comparative needs of school districts and the urgency thereof. No interest shall be charged to a school district for an allocation or grant made under this article to the school district."

Section 16211 provides that grants may be made to:

"...districts maintaining schools for kindergarten, or any of grades 1 to 6, inclusive...which have reduced the number of pupils to full-time equivalent classroom teachers in kindergarten and any of grades 1 to 6, inclusive, in those schools to a ratio of 25 to 1, or better. The grants shall be made

⁶ Education Code Section 16191 defines "exceptional children" to mean "physically handicapped pupils, mentally retarded pupils, educationally handicapped pupils, multihandicapped pupils, or pupils enrolled in development centers for the handicapped required or allowed to be educated pursuant to Part 30 (commencing with Section 56000)."

for...¶...any of the following:

- (a) Acquisition, by purchase or lease, and the installation and equipping of portable classrooms for classroom instructional purposes.
- (b) Acquisition of land for schoolsites.
- (c) Construction and equipping of permanent school buildings and facilities.
- (d) Reconstruction, renovation or remodeling of existing school buildings and facilities.
- (e) Any combination of the above."

Section 16212 allows:

"In lieu of grants to districts pursuant to subdivision (a) of Section 16211...the board may expend moneys available for grants under this article for the acquisition of portable buildings and facilities and equipment by the state, and thereafter convey the same to the eligible districts...(in) the form of sale, lease, outright grant, or other suitable form of conveyance, as determined by the board."

Section 16214 provides:

"For each school district which receives a grant or allocation pursuant to this article...the Controller shall compute an amount equal to one cent (\$0.01) on each one hundred dollars (\$100) of the assessed valuation of property within the district...¶)...The Controller shall make the computations and deductions required by this section for 30 fiscal years or until the time as the total of the amounts so deducted equal 50 percent of the amount of the grant or allocation which was made to the school district, whichever first occurs...¶)...the maximum rate of school district tax for the school district for which the computation is made shall be increased by one cent (\$0.01) per each one hundred dollars (\$100) of the assessed value of property within the district..."

Article 5 of Chapter 6, commencing with Education Code Section 16230, sets forth the provisions for School Housing Aid For Districts Impacted by Seasonal Agricultural Employment. Section 16230 sets aside \$1,500,000 of the proceeds of bonds issued under the State School Building Aid Bond Law of 1966:

"...for the acquisition of...¶... portable school and classroom buildings (and) may be made available by the board, upon the recommendation of the Director of Compensatory Education, to any school district which,

because of the influx for temporary periods in the school year of large numbers of persons employed in seasonal agricultural work, experiences emergency increases in school enrollments of such magnitude as to make it impossible or impractical to accommodate the additional pupils in existing school buildings and facilities available to the district.”

Section 16231 provides:

“...The use of the portable school and classroom buildings may be made available to a school district by letting the same to the district free of charge, or by lease, or by conveying the same to the district under lease-purchase agreement, sale, or outright grant, as determined by the State Allocation Board upon consultation with, and the advice of, the Director of Compensatory Education...”

Article 7 of Chapter 6, commencing with Education Code Section 16260, provides for the Children’s Center Construction Law of 1968.

Section 16261 states:

“The Legislature hereby declares that it is in the interest of the state and of the people thereof for the state to provide assistance to school districts and to county superintendents of schools for the construction of children’s center facilities. Children’s centers are of general concern and interest to all the people of the state, and the education and care of children of working parents are a joint obligation of both the state and local agencies operating children’s centers...” (emphasis supplied)

Section 16263 requires:

“...The board shall adopt any rules and regulations... (which) shall establish a system of priorities... (and) give special consideration to school districts...containing substantial numbers of families who are recipients of aid to families with dependent children or who are former or potential recipients of the aid...”

Section 16272 provides for matching funds:

“For each one dollar (\$1) of money allocated to a local agency which is expended for a project, the local agency shall expend local funds for the project in an amount which bears the same percentage to the one dollar

(\$1) as the modified assessed valuation per unit of the average daily attendance of the local agency bears to the statewide modified assessed valuation per average daily attendance of all local agencies..."

Article 9 of Chapter 6, commencing with Education Code Section 16310, is entitled School Housing Aid For Rehabilitation and Replacement of Structurally Inadequate School Facilities. Section 16312 states:

"The Legislature hereby declares that it is in the interest of the state and the people thereof to provide assistance to school districts in rehabilitating or replacing structurally unsafe school facilities inasmuch as the education of children is an obligation of the state, and the obligation carries with it a corresponding responsibility for the physical safety of children while attending school." (emphasis supplied)

Section 16313 states:

"It is the intent of the Legislature in enacting this article to provide a means through repayable state loans for school districts...to house their pupils in facilities that are structurally safe."

Section 16317 requires the State Allocation Board to adopt rules which:

"...shall give priority in allocating funds to districts which will benefit most from the reconstruction or replacement of schoolhouse facilities...based on the age and structural safety of existing buildings at the school or schools where the construction or reconstruction will occur, acuteness of overcrowding and density of population in the attendance areas affected, or any other factors that will insure that the greatest need will be served in allocating funds under this article."

Chapter 8 of Part 10 contains the Urban School Construction Aid Law of 1968, commencing with Education Code Section 16700. Section 16701 provides:

"The Legislature hereby declares that it is in the interest of the state and of the people thereof for the state to aid urban school districts of the state in reconstructing, modernizing, or replacing schoolsites and buildings for pupils of the public school system who are now housed in substandard schools..."

Section 16705 requires the State Allocation Board to adopt rules which:

"...shall give priority in allocating funds to urban districts to those districts where the children will benefit most from schoolhouse facilities...based upon the age of existing buildings and the acuteness of overcrowding at the school or schools where the construction or reconstruction will occur, the density of population in the attendance areas affected, or any other factors that will insure that the greatest need will be served."

Section 16720 provides for repayment:

"Each district to which an apportionment or apportionments has been made under this chapter shall repay a portion or all of the principal amount of such apportionment or apportionments and the accrued interest thereon in 30 equal annual payments, as shall be determined by the Controller pursuant to this section...(¶)...In any year, beginning with the 1981-82 fiscal year, in which the annual repayment exceeds the amount which may be raised by a levy of 0.0075 percent of the full value in the district,...the Controller shall grant a deferment of the annual repayment which is in excess of the amount that would be produced by a tax of 0.0075 percent of the full value of the district..."

Chapter 12 of Part 10 establishes the "Leroy F. Greene State School Building Lease-Purchase Law of 1976", commencing with Section 17000. Section 17001 states:

"(a) The Legislature hereby declares that it is in the interest of the state and the people thereof for the state to reconstruct, remodel, or replace existing school buildings that are educationally inadequate or that do not meet present-day structural safety requirements, and to acquire new schoolsites and buildings for the purpose of making them available to local school districts for the pupils of the public school system, that system being a matter of general concern inasmuch as the education of the children of the state is an obligation and function of the state." (Emphasis supplied)

Article 11 of the Leroy F. Greene School Facilities Act of 1998, commencing with Education Code Section 17078.10, provides for:

" (c) ..."preliminary apportionment"... for eligible applicants with critically overcrowded schools in advance of full compliance with all of the application requirements otherwise required for an apportionment pursuant to this chapter..."

Chapter 14 of Part 10, commencing with Education Code Section 17085 is entitled the "Emergency School Classroom Law of 1979" and is cited as the State Relocatable Classroom Law of 1979. Section 17086 states:

"...the Legislature recognizes that the ad valorem tax is no longer available as a source of revenue for the construction of necessary school facilities. The Legislature considers that the greatest need in school construction is for classrooms for the education of public school pupils. It is the intent of the Legislature to satisfy this primary need to the greatest extent possible before providing any additional educational facilities, regardless of how desirable such additional facilities may be." (Emphasis supplied)

Chapter 15 of Part 10, commencing with Section 17100, established the School District Revenue Bond Act. This Act is based on the finding of the legislature that:

"The Legislature hereby finds and declares that the State School Building Lease-Purchase Fund, pursuant to Section 17008, and the proceeds from the sale or lease of surplus school property are the two sources available to school districts to finance the construction of school facilities to relieve overcrowding. However, these sources are still insufficient to meet the construction needs statewide of school districts." (emphasis supplied)

In the article attached hereto as Exhibit "B" (Cohen, Joel, "School Facility Financing - A History of the Role of the State Allocation Board and Options for the Distribution of Proposition 1A Funds", February 1999) the author writes:

"As California enters the 21st Century, its public schools face many challenges. One significant challenge is the serious disrepair of an aging school facility infrastructure. Another challenge is the anticipated growth of nearly 2 million K-12 students during the next decade that will require many districts to build new schools to meet burgeoning student demand." (Ibid, at page 1)

The article goes on to say:

"Proposition 1A⁷ forges a partnership between the State and school

⁷ Proposition 1A was a \$9.2 billion school bond initiative passed by the California voters on November 3, 1998 and, at the time, was the largest of its kind passed in our

districts for financing the construction and repair of their schools.” (Ibid, at page 2)

The test claim alleges costs required in order to join this partnership. This comprehensive history of the financing of school facilities in California further proves Test Claimant’s position: i.e., school districts are unable to finance needed school construction and modernization projects by themselves and are required to use state funds for these purposes.

In summary, the last 60 years of legislative history shows repeated and consistent recognition that school districts are unable to meet the school construction needs of their pupils. The history repeatedly reveals an admission that the education of school children is the primary responsibility of the state. The history of the inability of school districts and the obligation of the state to educate children results in the above recited litany of state money for school construction at low or no interest rates, repayment requirements of less than the amounts apportioned, and repayment terms unavailable anywhere else. Education of children is an obligation and function of the state. Classrooms are required to provide that education. Therefore, building classrooms is primarily a state obligation.

Given the fact that there is a tremendous need for new school construction, most schools are unable to create alternative financing, and the fact that the legislature recognizes this inability by providing construction and improvement funds, for DOF to suggest that schools do not need to participate in state financing programs is so far beyond the realm of practical reality that the draconian results of “electing” no new or modernized schools is not an acceptable alternative. City of Sacramento II (supra, at page 74)

5. Districts do not Have Authority to Levy Fees, Assessments and Taxes to Fully Fund the Costs of New Construction or Modernization

(a) Government Code Section 17556(d) Does Not Apply to Construction Funding

DOF offers Government Code Section 17556, subdivision (d), for the proposition that districts are precluded from recovery since districts have the authority to levy fees, assessments and taxes under Education Code section 17620. Developer fees are not

nations’s history. (Ibid, at page 3) It prompted Senator Quentin Kopp to request the California Research Bureau to provide research on the included topics.

service charges, fees or assessments to the consumer of public services. Government Code section 17556(d) refers to "service charges, fees or assessments". Education Code section 17620 refers to a "fee, charge, dedication or other requirement". They are not the same.

In addition, Section 17556 presupposes the existence of a mandate which is contrary to DOF's position. Also, subdivision (d) refers to the levy of service charges, fees and assessments against students. The levy of service charges, fees and assessments against students for any aspect of public education would be constitutionally prohibited by Article 9, Section 5, of the California constitution which requires the state to provide free schools.

The California Department of Education has issued Fiscal Management Advisory 97-02⁸ which makes it quite clear that tuition, fees, deposits and other charges may only be made when specifically authorized by law. The examples set forth in the advisory clearly demonstrate that the tuition, fees, deposits and other charges referred to in Government Code Section 17556, subdivision (d), clearly do not encompass sources for the construction of school facilities.

Test claimant directs the attention of the Commission to the fact that there is another test claim pending on developer fees. (CSM 02-TC-42) That test claim notes the various restrictions and limitations on the use of developer fees to finance public school construction. For example (and not by way of limitation), Education Code Section 17620(a)(1) limits any fee, charge, dedication, or other requirement to only certain development projects. Likewise, Government Code Section 65995 limits the amount that can be levied (e.g. \$1.93 per square foot for residential construction and \$0.31 per square foot for commercial or industrial construction). In fact, there is no guaranty that any development projects will be undertaken which may be subject to developer fees.

It is the regulations, limitations and fee restrictions of developer fees that distinguishes this case from that which faced the court in *Connell v. Superior Court* (1997) 59 Cal.App.4th 382, relied upon by DOF. In *Connell*, the amount or availability of the fees⁹ were not restricted, and the water district could charge fees in any amount it chose to

⁸ A copy of Fiscal Management Advisory 97-02 and its cover letter dated October 30, 1997 is attached hereto as Exhibit "C" and is incorporated herein by reference.

⁹ Note: In *Connell*, the court limited its opinion to the authority to levy "fees" and did not discuss "service charges, fees or assessments", the language of the statute. (*Id.*, at page 398, fn. 15)

levy. Here, school districts are limited as to what properties are subject to fees, they are limited as to the amount of the fees they can charge, and they may not charge any fees whatsoever if no developer projects are undertaken. The reason Government Code Section 17556(d) does not bar a finding of costs here is that DOF has made no legal or factual showing that the authorized service charges, fees, or assessments are either authorized or "sufficient to pay for" the mandated program or increased cost of service, nor were they adopted at the time, or in the same statute, as the test claim legislation.

6. Economic Hardship Provisions do not Prevent a Finding of a State Mandate

DOF next argues that the state School Facilities Program routinely funds half of the hazard assessment requirements, and may fund them wholly in cases of economic hardship. (Education Code Sections 17072.12, 17072.13 and 17072.18) Those districts who receive total funding for assessment and administrative costs will not need to file a claim; those who do not receive total funding, will.

CERTIFICATION

I certify by my signature below, under penalty of perjury under the laws of the State of California, that the statements made in this document are true and complete to the best of my own personal knowledge or information and belief.

Sincerely,

Keith B. Petersen

EXHIBIT A

Copy: Butt v. State of California

[No. S020835. Dec. 31, 1992.]

THOMAS K. BUTT et al., Plaintiffs and Respondents, v.
THE STATE OF CALIFORNIA et al., Defendants and Appellants.

SUMMARY

Parents of school children enrolled in a unified school district filed a class action for injunctive relief against the state and the district's board of education, seeking to prevent the district from closing its schools six weeks before the official end of the school year due to a projected revenue shortfall. After granting plaintiffs' motion to amend the complaint to include the state Superintendent of Public Instruction and the state Controller as defendants, the trial court granted plaintiffs' motion for a preliminary injunction, ordering the state and the superintendent to ensure that the schools remained open until the end of the school year or to provide the students with a substantially equivalent educational opportunity. The court subsequently issued another order, pursuant to the superintendent's plan, authorizing the Controller to disburse an emergency loan to the district from unspent portions of appropriations for the Greater Avenues for Independence (GAIN) program and another unified school district, and authorizing the superintendent to relieve the present board, and to develop recovery and repayment plans. The state's appeal from the trial court's orders was transferred from the Court of Appeal to the Supreme Court. (Superior Court of Contra Costa County, No. C91-01645, Ellen Sickles James, Judge.)

The Supreme Court reversed the trial court's second order insofar as it approved funding of an emergency loan from appropriations for the GAIN program and the other school district; in all other respects, the court affirmed the orders, and directed the Court of Appeal to remand the matter to the trial court for further proceedings. The court held that the trial court, in deciding the propriety of a preliminary injunction, did not abuse its discretion in finding that there was a reasonable probability that plaintiffs would succeed on the merits of their case, since the early closure of the district's schools would have deprived the students of their fundamental right to basic equality in public education, and the state was required to intervene to prevent a deprivation of that right. The court also held that the trial court properly found that denial of the preliminary injunction would have caused students and their parents substantial and irreparable harm greater than that which defendants would suffer if the injunction were granted. The court held that

the trial court acted within its equitable powers in ordering the superintendent to displace the board, operate the district, and impose a plan for the district's permanent financial recovery, but that it was improper for the trial court to order the state to extend the loan by using unspent funds from appropriations for the GAIN program and the other school district, since those funds were not "reasonably available" for that purpose. (Opinion by Baxter, J., with Panelli, Arabian and George, JJ., concurring. Separate concurring and dissenting opinions by Lucas, C. J., Mosk and Kennard, JJ.)

HEADNOTES

Classified to California Digest of Official Reports

- (1) **Appellate Review § 119—Dismissal—Grounds—Mootness—Exception for Matters of Public Interest—Issues Concerning Injunction Requiring Emergency State Loan to Fund School District.**—On the state's appeal from a preliminary injunction requiring it to extend an emergency loan to a school district so that it could keep its schools open until the end of the school year despite revenue shortfalls, and to implement a recovery plan for the district, some issues were moot due to the fact that a plan had already been implemented and the state did not seek rescission of the loan. Nevertheless, the Supreme Court had discretion to decide the issues, which included whether the state was responsible to ensure the students' fundamental right to basic educational equality and whether the trial court had authority to order a loan from funds the Legislature had appropriated for other purposes, since those issues involved potentially recurring questions of public importance. As to the appropriations issue, there was a substantial possibility that similar crises would produce similar emergency orders in the future, thus favoring review. Moreover, the state had fully litigated the issue, and any mootness stemmed from the Supreme Court's denial of the state's request for a stay pending appeal.
- (2) **Injunctions § 21—Preliminary Injunctions—Appeal—Scope of Review.**—Appellate review of a trial court's decision as to whether to issue a preliminary injunction is limited to whether the decision was an abuse of discretion. In deciding whether to issue a preliminary injunction, the trial court must weigh two "interrelated" factors: (1) the likelihood that the moving party will ultimately prevail on the merits, and (2) the relative interim harm to the parties resulting from the issuance or nonissuance of the injunction. The trial court's determination must be guided by a "mix" of the two factors, and the greater the

plaintiff's showing on one, the less must be shown on the other to support an injunction. The scope of available preliminary relief is necessarily limited by the scope of the relief likely to be obtained at a trial on the merits, and the trial court may not grant a preliminary injunction, regardless of the balance of interim harm, unless there is some possibility that the plaintiff would ultimately prevail on the merits of the claim. Thus, unless the potential merit of the claim is conceded, the appellate court must address that issue when reviewing an order granting a preliminary injunction.

- (3a-3c) Schools § 4—School Districts; Financing; Funds—Shortening School Year on Emergency Basis Due to Budget Shortfall—State's Obligation.**—In an action for injunctive relief by parents against the state, two state officials, and the board of education of a school district, seeking to prevent the district from ending the school year six weeks early due to a budget shortfall, the trial court, in granting plaintiffs a preliminary injunction, did not abuse its discretion in finding that there was a reasonable probability that plaintiffs would succeed on the merits of their case. Basic equality in public education for all students, regardless of the district in which they reside, is a fundamental right under the California Constitution, and denials of that right are subject to strict scrutiny. The state has the ultimate responsibility for assuring equal operation of the public school system, and is obliged to intervene when a local district's fiscal problems prevent its students from receiving basic educational equality. Moreover, there was no state policy of local autonomy and accountability at the district level that was compelling enough to justify the state's tolerance of the extreme and unprecedented educational deprivation that would have resulted from the early closure of the district's schools.

[See Cal.Jur.3d, Schools, §§ 291, 299.]

- (4) Schools § 1—Legislature's Nondelegable Responsibility Over Public School System.**—Public education is an obligation that the state assumed by adoption of the state Constitution. The public school system, although administered through local districts created by the Legislature, is one system applicable to all of the common schools. In view of the importance of education to society and to the individual child, the opportunity to receive the schooling furnished by the state must be made available to all on an equal basis. The Legislature's "plenary" power over public education is subject only to constitutional restrictions. Local districts are the state's agents for local operation of the common school system, and the state's ultimate responsibility for public education cannot be delegated to any other entity.

-
- (5) **Constitutional Law § 87.2—Equal Protection—Classification—Judicial Review—Strict Standard of Review for Suspect Classifications or Classifications Touching on Fundamental Interests—Right to Education.**—Under the equal protection clauses of the federal and state Constitutions, heightened judicial scrutiny applies to state-maintained discrimination whenever the disfavored class is suspect or the disparate treatment has a real and appreciable impact on a fundamental right or interest. Education is such a fundamental interest for purposes of equal protection analysis under the California Constitution.
- (6) **Schools § 4—School Districts; Financing; Funds—Shortening School Year on Emergency Basis Due to Budget Shortfall—Preliminary Injunction Against State—Balancing Harm to Parents and Students Against Harm to District.**—In an action for injunctive relief by parents against the state, two state officials, and the board of education of a school district to prevent closure of the district's schools six weeks early due to a budget shortfall, the trial court properly found that denial of the parents' motion for a preliminary injunction would have caused district students and their parents substantial and irreparable harm that was greater than that which defendants would suffer if the injunction were granted. Plaintiffs' declarations suggested that the district's inability to complete the school year arose from its ever-worsening fiscal condition and the deterioration of negotiations for emergency aid, and that the teachers' lesson plans did not provide for the contingency of early closure. They also detailed the difficulties of maintaining the educational progress of over 31,000 suddenly displaced students. While plaintiffs may not have demonstrated that "irreparable" harm to students was unavoidable by other means, the trial court's findings both that plaintiffs had a reasonable probability of success on the merits and that they would suffer more harm if an injunction were denied than the state would suffer if it were granted fully justified its decision to grant the preliminary injunction.
- (7a, 7b) **Schools § 4—School Districts; Financing; Funds—District in Financial Distress Due to Mismanagement—Trial Court's Equitable Power to Grant Relief—Ordering Superintendent of Public Instruction to Assume Management.**—In an action for injunctive relief by parents against the state, the state Superintendent of Public Instruction, the state Controller, and the board of education of a school district, seeking to prevent the school district from ending the school year six weeks early due to a budget shortfall, the trial court did not exceed its powers in issuing an order, based on a plan submitted by the superintendent and the Controller, authorizing the superintendent to

displace the board, operate the district, and impose a plan for the district's permanent financial recovery. Although no statute gave the superintendent such authority, the takeover order was within the trial court's inherent equitable power to enforce the state's constitutional obligations in light of the unique situation. The state was justified in satisfying its duty by extending a loan with conditions to ensure appropriate use of the funds and minimize the risk of default, especially since the district's ability to administer the loan under its existing systems and managers was uniquely suspect.

- (8) **Constitutional Law § 40—Distribution of Governmental Powers—Between Branches of Government—Judicial Power—To Order Discretionary Acts By Executive or Legislature.**—In general, courts have equitable authority to enforce their constitutional judgments. Principles of comity and separation of powers, however, place significant restraints on the authority of courts to order or ratify acts that are normally committed to the discretion of other branches or officials. In particular, the separation of powers doctrine (Cal. Const., art. III, § 3) obliges the judiciary to respect the separate constitutional roles of the Executive and the Legislature. Moreover, a judicial remedy must be tailored to the harm at issue. A court should always strive for the least disruptive remedy that is adequate to its legitimate task.
- (9) **Constitutional Law § 40—Distribution of Governmental Powers—Between Branches of Government—Judicial Power—To Order Spending of Legislative Appropriations—Ordering Emergency Loan to School District From Funds Appropriated for Other Educational Purposes.**—In an action for injunctive relief by parents against the state, two state officials, and the board of education of a school district, seeking to prevent the school district from ending the school year six weeks early due to a budget shortfall, the trial court improperly ordered the state to extend the district an emergency loan of \$19 million out of unspent funds appropriated for the Greater Avenues for Independence (GAIN) program and for an emergency loan to another school district. The appropriations did not make funds "reasonably available" for the purpose of financing the remainder of the district's school term. GAIN's purpose is to provide employment, adult education, and job training to recipients of public aid. The GAIN appropriation was expressly designated for that program alone, and was not intended to fund the needs of non-GAIN students. Similarly, the emergency loan to the other district was specifically appropriated for that district, with conditions addressed to the circumstances of that case. The funding of the remainder of the district's term was clearly

outside the particular purposes for which the appropriations were reserved.

COUNSEL

Daniel E. Lungren, Attorney General, Robert L. Mukai, Chief Assistant Attorney General, Charlton G. Holland, Assistant Attorney General, D. Robert Shuman, Richard J. Chivaro, Joseph R. Symkowick, Roger D. Wolfertz, Michael E. Hersher, Allan H. Keown and Stuart Biegel for Defendants and Appellants.

Frank R. Calton, Howard P. Abelson, Ronald A. Zumbun and Anthony T. Caso as Amici Curiae on behalf of Defendants and Appellants.

Eva Paterson, Michael Harris, Morrison & Foerster, Darryl Rains, Arturo J. Gonzalez and Katherine E. Schuelke for Plaintiffs and Respondents.

Beverly Tucker, A. Eugene Huguenin, Jr., Robert Einar Lindquist, Constance de la Vega, Ann Fagan Ginger, Linda Fullerton, Alan L. Schlosser, Edward M. Chen, Matthew A. Coles, Margaret C. Crosby, Richard Briffault, John A. Powell, Helen Hershkoff, Adam S. Cohen, Winslow & Fassler, Martin Fassler, Bunch & Grimes and Michael C. Grimes as Amici Curiae on behalf of Plaintiffs and Respondents.

Robert J. Bezemek as Amicus Curiae.

OPINION

BAXTER. J.—In late April 1991, after a period of mounting deficits, the Richmond Unified School District (District) announced it lacked funds to complete the final six weeks of its 1990-1991 school term. The District proposed to close its doors on May 1, 1991. The Superior Court of Contra Costa County issued a preliminary injunction directing the State of California (State), its Controller, and its Superintendent of Public Instruction (SPI) to ensure that the District's students would receive a full school term or its equivalent. The court approved the SPI's plan for an emergency State loan, and for appointment by the SPI of an administrator to take temporary charge of the District's operation.

We declined to stay implementation of the plan pending the State's appeal. However, we transferred the appeal here in order to decide an important issue of first impression: Whether the State has a constitutional duty, aside from the equal allocation of educational funds, to prevent the budgetary problems of a particular school district from depriving its students of "basic" educational equality.

We affirm the trial court's determination that such a duty exists under the California Constitution. Further, the court did not err in concluding, on the basis of the plaintiffs' preliminary showing, that the particular circumstances of this case demanded immediate State intervention. However, the court exceeded its judicial powers by approving the diversion of emergency loan funds from appropriations clearly intended by the Legislature for other purposes.

FACTS AND PROCEDURAL HISTORY¹

On April 17, 1991, Thomas K. Butt and other named District parents filed a class action for temporary and permanent injunctive relief against the State and the District's board of education (Board).² The complaint alleged as follows: The State is responsible for educating all California children, and the Board is the State's agent for carrying out this responsibility in the District. The scheduled final day of the District's 1990-1991 school term was June 14, 1991, but the District had announced that its 44 elementary, secondary, and adult schools would close on May 1, 1991. The resulting loss of six weeks of instruction would cause serious, irreparable harm to the District's 31,500 students and would deny them their "fundamental right to an effective public education" under the California Constitution. Moreover, as an unjustified discrimination against District students compared to those elsewhere in California, the closure would violate equal protection guarantees of the California and United States Constitutions. Therefore, defendants should be enjoined from closing the District's schools before the scheduled end of the scholastic term.

On April 22, 1991, plaintiffs noticed a motion for preliminary injunction. In an attached declaration, Frank R. Calton, a member of the Board, stated

¹The State, as appellant, has elected to proceed by way of an appendix in lieu of the clerk's transcript, as permitted by rule 5.1 of the California Rules of Court. Some of the documents contained in the appendix, though they include handwritten filing dates, bear no official file stamps and have no proofs of service attached. However, rule 5.1 expressly allows the use of unofficial conformed copies (subd. (c)(1)) and provides that the filing of an appendix "constitutes a representation by counsel that the appendix consists of true and correct copies of the papers in the superior court file" (subd. (i)(1)). No party having urged otherwise, we adopt that assumption for purposes of this opinion.

²The named plaintiffs sued on behalf of themselves, their children, and other parents and students of the District.

that the District projected a revenue shortfall of \$23 million for the 1990-1991 academic year and only had sufficient funds to pay its employees through April 1991. Calton declared the District would have to close at the end of April unless new funds were obtained or employees agreed to work for registered warrants in lieu of paychecks. He indicated that the District's efforts to obtain an emergency loan from the State had not yet succeeded, and the District was preparing to file for bankruptcy.

Plaintiffs' motion papers also included declarations by District teachers, academicians in the field of education, and members of the Contra Costa County board of education. These statements detailed the serious disruptive effect the proposed closure would have upon the educational process in the District and upon the quality of education afforded its students.

The motion was heard on April 29, 1991. The Attorney General represented the State in opposition. Counsel for the District represented that the Board's appearance was precluded by an automatic bankruptcy stay. The trial court granted plaintiffs' unopposed motion for amendment of the complaint to include the SPI and the Controller as defendants. Pending applications for intervention and *amicus curiae* status were not formally granted,³ but as stipulated by the parties, the court heard argument from the applicants and agreed to consider their briefs.

At the conclusion of the hearing, the trial court ruled orally that under the California Constitution, the State itself is responsible for the "fundamental" educational rights of California students and must remedy a local district's inability to provide its students an education "basically equivalent" to that provided elsewhere in the State. Concluding that the threatened closure would deny the District's students a "constitutionally [equal] education," the court ordered the State and the SPI to act as "they deem appropriate" to ensure that District schools remained open until June 14, 1991, or to provide District students a "substantially equivalent educational opportunity" within the statutory school year ending June 30, 1991.

This oral decision was followed by two written orders filed May 2. One of these, drafted by plaintiffs' counsel, purported to formalize the April 29 ruling. It made findings that closure of District schools by May 1 would cause District students irreparable harm, that the balance of harm favored a preliminary injunction, that education is a "fundamental right" in California,

³Applications to appear as *amici curiae* were submitted by the Richmond Federation of Teachers (RFT) and jointly by the Meiklejohn Civil Liberties Institute, the National Lawyers Guild, and Multi-Cultural Education, Training, and Advocacy, Inc. (collectively Meiklejohn). Complaints in intervention and/or applications for leave to intervene were submitted by the Oakland Unified School District (OUSD), RFT, and United Teachers of Richmond (UTR).

that no "compelling interest" justified denying District students six weeks of instruction available to "every other child in the State," and that plaintiffs' ultimate success on the merits was reasonably probable. The State and its agents again were directed to act "as . . . appropriate" to ensure District students, within the school year ending June 30, 1991, an education "equivalent basically" to that provided elsewhere in California for a full school term. The Controller was added as a State official expressly bound by the court's commands.

On the same day, May 2, the SPI and the Controller submitted their plan for compliance with the preliminary injunction. With counsel for all interested parties present, the court took evidence indicating that uncommitted funds exceeding the estimated \$19 million necessary to complete the District's school year were available from existing State appropriations to the Greater Avenues for Independence (GAIN) program and for emergency assistance to the OUSD. Counsel for the OUSD stipulated that his client had "no objection" to use of the \$10 million OUSD appropriation for purposes of an emergency loan to the District.

Accordingly, the court executed an order, drafted by counsel for the SPI, approving in principle the submitted plan.⁴ The order authorized the Controller to disburse an emergency loan to the District from unspent portions of the GAIN and OUSD appropriations. (See Stats. 1989, ch. 93, § 22.00; Stats. 1989, ch. 1438, § 1 et seq.) Meanwhile, the SPI, by virtue of the State's "ultimate responsibility" for equal education and his own statutory obligation to "superintend the schools of this state" (Ed. Code, § 33112, subd. (a)),⁵ would have authority to "relieve the . . . [B]oard of its legal duties and powers, appoint a trustee, develop a recovery plan and, subject to the approval of the Controller, [develop] a repayment plan on the [D]istrict's behalf as necessary" to ensure completion of the school term, the District's financial recovery, and the protection of the loaned funds.⁶

The Attorney General timely noticed appeals from the April 29 and May 2 orders on behalf of the State. Defendants SPI and Controller did not

⁴Though the court's order recites that the SPI and the Controller "presented . . . , after notice to all parties, an agreement" to provide an emergency loan, neither the agreement itself, nor a description of its precise terms, has been made part of the record on appeal.

⁵All further statutory references are to the Education Code unless otherwise indicated.

⁶The preliminary injunction motion was litigated with understandable haste, and evidence of the causes of the District's apparent insolvency was not presented below. On appeal, the SPI invites us to take judicial notice of grand jury findings on this subject which were released after the preliminary injunction was granted. (See *The Financial Affairs of the Richmond Unified School District, Rep. of 1990-1991 Contra Costa County Grand Jury* (May 29, 1991) [hereafter Report].) Without objection, we may note the Report's contents. (Evid. Code, §§ 452, subds. (c), (d), 455, 459; see *People v. Gonzalez* (1990) 51 Cal.3d 1179, 1259, fn. 54 [275 Cal.Rptr. 729, 800 P.2d 1159].) Of course, we cannot accept its findings as evidence or its criticisms of the District and the Board as conclusively founded. We are

appeal. The State immediately requested transfer of the appeal from the Court of Appeal, First Appellate District, to this court (see Cal. Rules of Court, rule 20) and also asked that we stay enforcement of the trial court's orders pending appeal. (1)^(See fn. 7.) The SPI and the Controller opposed a stay but supported transfer of the appeal to this court. We granted the transfer request but denied a stay.⁷

DISCUSSION

1. *Standard of review.*

(2) In deciding whether to issue a preliminary injunction, a court must weigh two "interrelated" factors: (1) the likelihood that the moving party

particularly loath to do so when the District and the Board were disabled below from defending against claims of mismanagement and, except for a special appearance at oral argument, have not participated in the appeal.

Nonetheless, we cannot ignore the grand jury's assessment that despite repeated warnings, an earnest but financially inexperienced Board permitted massive, accelerating deficit spending over a period of several years to expand staff, boost salaries and benefits, and support innovative programs installed by the District's former superintendent. (Report, pp. 3-5.) According to the Report, the resulting deficit for the years 1986-1990 was \$29.5 million, with an \$18.1 million deficit for 1990 alone. (*Id.*, at p. 4.) In 1990, the District had received a State emergency loan exceeding \$9 million, in consequence of which a limited-powers trustee appointed by the SPI was overseeing District financial affairs during the 1990-1991 school term. (*Id.*, at p. 5.)

⁷Our denial of a stay allowed implementation of the plan approved by the trial court, and the District's school year was completed. Though the State vigorously contends the court lacked power to invade the GAIN and OUSD appropriations, it does not demand actual rescission of the court-approved loan. Moreover, we judicially notice without objection that in June 1992, the SPI approved a repayment and recovery plan adopted by the District, restored the Board's powers, and terminated the court-authorized appointment of the State administrator. (See Evid. Code, §§ 452, subds. (c), (h), 455, 459.) Although portions of the appeal may therefore be technically moot, we have discretion to decide the issues presented as potentially recurring questions of public importance. (E.g., *O'Hare v. Superior Court* (1987) 43 Cal.3d 86, 91, fn. 1 [233 Cal.Rptr. 332, 729 P.2d 766]; *DiGiorgio Fruit Corp. v. Dept. of Employment* (1961) 56 Cal.2d 54, 58 [13 Cal.Rptr. 663, 362 P.2d 487]; *People v. West Coast Shows, Inc.* (1970) 10 Cal.App.3d 462, 468 [89 Cal.Rptr. 290].)

The Chief Justice objects in particular that we neither must nor should address whether the sources of funding approved by the trial court were proper. However, he fails to indicate why this important and sensitive issue is any more moot, or any less worthy of consideration, than other portions of the trial court's order which have also been irretrievably implemented. Indeed, in these uncertain times, the substantial possibility arises that similar future crises will produce similar emergency orders for immediate diversion of State funds from expedient sources. Hence, contrary to the Chief Justice's suggestion, the issue is one capable of repetition but difficult to review, and this concern favors its prompt consideration under the "public interest" exception to the mootness doctrine. (*DiGiorgio Fruit Corp.*, *supra*, 56 Cal.2d at p. 58.) Moreover, the State has fully litigated the merits of the appropriations issue throughout, and any mootness in this or other aspects of the injunction stems from our denial of the State's request for a stay pending appeal. Under these circumstances, the State should not be penalized on appeal for conceding that State funds already expended by the District cannot practicably be recovered.

will ultimately prevail on the merits and (2) the relative interim harm to the parties from issuance or nonissuance of the injunction. (*Common Cause v. Board of Supervisors* (1989) 49 Cal.3d 432, 441-442 [261 Cal.Rptr. 574, 777 P.2d 610].) Appellate review is limited to whether the trial court's decision was an abuse of discretion. (*Cohen v. Board of Supervisors* (1985) 40 Cal.3d 277, 286 [219 Cal.Rptr. 467, 707 P.2d 840].)

The trial court's determination must be guided by a "mix" of the potential-merit and interim-harm factors; the greater the plaintiff's showing on one, the less must be shown on the other to support an injunction. (*King v. Meese* (1987) 43 Cal.3d 1217, 1227-1228 [240 Cal.Rptr. 829, 743 P.2d 889].) Of course, "[t]he scope of available preliminary relief is necessarily limited by the scope of the relief likely to be obtained at trial on the merits." (*Common Cause, supra*, 49 Cal.3d at p. 442.) A trial court may not grant a preliminary injunction, regardless of the balance of interim harm, unless there is some possibility that the plaintiff would ultimately prevail on the merits of the claim. (*Id.*, at pp. 442-443.) Unless potential merit is conceded, an appellate court must therefore address that issue when reviewing an order granting a preliminary injunction.

Here, the trial court found that plaintiffs' constitutional demand for State intervention had potential merit, and that the balance of interim harm justified the issuance of a preliminary injunction against the State. For the reasons that follow, we conclude that each of these determinations was within the court's discretion.⁸

2. Merits of plaintiffs' claims.

(3a) The trial court expressly found "[t]here is a reasonable probability that plaintiffs will succeed on the merits of their case." The court agreed with plaintiffs' claim that the equal protection guaranties of the California Constitution (art. I, § 7, subs. (a), (b); art. IV, § 16, subd. (a)) require State intervention to ensure that fiscal problems do not deprive a local district's

⁸The State insists that under the circumstances of this case, appellate review should not be limited to whether the trial court "abused its discretion" when weighing "interim" harm and "probable" merit. The State stresses that the unstayed injunction, though preliminary in form, was both final and unprecedented in fact. Accordingly, the State suggests, we must decide, as on appeal from a final judgment, whether plaintiffs were entitled to the relief they received.

We disagree. The abuse-of-discretion standard acknowledges that the propriety of preliminary relief turns upon difficult estimates and predictions from a record which is necessarily truncated and incomplete. Here, the urgency of the situation forced plaintiffs to produce, and the State to rebut, a hasty tentative showing of constitutional necessity. The evidence on which the trial court was forced to act may thus be significantly different from that which would be available after a trial on the merits. Neither the trial court nor this court could undertake a final adjudication of plaintiffs' lawsuit under such circumstances.

students of basic educational equality.⁹ The court also accepted plaintiffs' preliminary showing that the effect of the District's crisis on its students' educational rights was serious enough to trigger the State's constitutional duty. The State, supported by amicus curiae Pacific Legal Foundation (Pacific),¹⁰ assails these conclusions on multiple grounds.

At the outset, the State does not claim it lacks any and all constitutional role in local educational affairs. Instead, its reasoning proceeds as follows: The State fulfills its financial responsibility for educational equality by subjecting all local districts, rich and poor, to an equalized statewide revenue base.¹¹ Unless a district fails to provide the minimum six-month school term set forth in the "free school" clause (Cal. Const., art. IX, § 5),¹² the State has no duty to ensure prudent use of the equalized funds by local administrators. Even if local mismanagement causes one district's services to fall seriously below prevailing statewide standards, the resulting educational inequality is

⁹Article I, section 7, subdivision (a) provides in pertinent part that "[a] person may not be . . . denied equal protection of the laws. . . ." Article I, section 7, subdivision (b) provides in pertinent part that "[a] citizen or class of citizens may not be granted privileges or immunities not granted on the same terms to all citizens. . . ." Article IV, section 16, subdivision (a) provides that "[a]ll laws of a general nature have uniform operation."

¹⁰The positions adopted by the various parties and numerous amici curiae in this appeal are diverse. The Attorney General, representing the State as defendant and appellant, opposes all aspects of the trial court orders. Though they were joined as defendants below, the SPI and the Controller, deeming themselves "respondents" on appeal, support plaintiffs' view that the orders were proper in all respects. Amicus curiae Pacific supports the State's position. Amici curiae RFT and UTR approve State financial aid but object to displacement of the local governing board by a State administrator. Amici curiae Frank R. Calton and Howard P. Abelson urge that the Board acted correctly by deciding to close District schools and should not have been displaced. Calton and Abelson also suggest the injunction was improper because the Board had no opportunity to appear and defend against claims of mismanagement. Amici curiae Mario Diaz and Rebecca Hazlewood Bezemek (Diaz and Bezemek) take no position on State financial assistance but argue that the SPI's takeover of District government was improper. Amicus curiae briefs in support of plaintiffs have been filed by the American Civil Liberties Union Foundation, Human Rights Advocates, and Meiklejohn.

¹¹The funding scheme for public education is complex, but no party disputes the summary description provided in the State's brief: "The Legislature has attempted to equalize school district funding . . . by the use of a 'base revenue limit' for each district. Each district is classified by size and type. ([Ed.] Code, [§] 42238.) Based upon this classification scheme, each district has a 'base revenue limit' per unit of average daily attendance. The base revenue limit for any district includes the amount of property tax revenues a district can raise, with other specific local revenues, coupled with an equalization payment by the State, thus bringing each district into a rough equivalency of revenues. (Compare [Cal. Code Regs., tit. 5, [§] 15371, *et seq.*; Ed.] Code [§] 42238 *et seq.*) [¶] Because the student population is so diverse, the Legislature had to supplement the base revenue limit with specific augmentations targeted for categories of children with needs that require special attention. These supplements are designated as 'categorical' aid. . . ."

¹²Article IX, section 5 provides: "The Legislature shall provide for a system of common schools by which a free school shall be kept up and supported in each district at least six months in every year, after the first year in which a school has been established."

not grounded in district wealth, nor does it involve a "suspect classification" such as race. Thus, "strict scrutiny" of the disparity is not required, and the State's refusal to intervene must be upheld as rationally related to its policy of local control and accountability. Even if strict scrutiny is appropriate, the local-control policy is "compelling" enough to justify the State's inaction.

Under the unprecedented circumstances of this case, we cannot accept the State's contentions. We set forth our reasons in detail.

Since its admission to the Union, California has assumed specific responsibility for a statewide public education system open on equal terms to all. The Constitution of 1849 directed the Legislature to "provide for a system of common schools, by which a school shall be kept up and supported in each district" (Cal. Const. of 1849, art. IX, § 3.) That constitutional command, with the additional proviso that the school maintained by each district be "free," has persisted to the present day. (Cal. Const., art. IX, § 5.)

In furtherance of the State system of free public education, the Constitution also creates State and county educational offices, including a Superintendent of Public Instruction and a State Board of Education. (Cal. Const., art. IX, §§ 2-3.3, 7.) It authorizes the formation of local school districts (*id.*, §§ 6½, 14), requires that all public elementary and secondary schools be administered within the Public School System (*id.*, § 6), establishes a State School Fund (Fund) (*id.*, § 4), reserves a minimum portion of State revenues for allocation to the Fund (*id.*, art. XVI, §§ 8, 8.5), guarantees minimum allocations from the Fund for each public school (*id.*, art. IX, § 6), specifies minimum salaries for public school teachers (*ibid.*), authorizes the State Board of Education to approve public school textbooks (*id.*, § 7.5), and permits the Legislature to grant local districts such authority over their affairs as does not "conflict with the laws and purposes for which school districts are established" (*id.*, § 14).

(4) Accordingly, California courts have adhered to the following principles: Public education is an obligation which the State assumed by the adoption of the Constitution. (*San Francisco Unified School Dist. v. Johnson* (1971) 3 Cal.3d 937, 951-952 [92 Cal.Rptr. 309, 479 P.2d 669]; *Piper v. Big Pine School Dist.* (1924) 193 Cal. 664, 669 [226 P. 926].) The system of public schools, although administered through local districts created by the Legislature, is "one system . . . applicable to all the common schools" (*Kennedy v. Miller* (1893) 97 Cal. 429, 432 [32 P. 558], italics in original.) ". . . In view of the importance of education to society and to the individual child, the opportunity to receive the schooling furnished by the state must be made available to all on an equal basis. . . ." (*Jackson v.*

Pasadena City School Dist. (1963) 59 Cal.2d 876, 880 [31 Cal.Rptr. 606, 382 P.2d 878].) “[M]anagement and control of the public schools [is] a matter of state[, not local,] care and supervision. . . .” (*Kennedy v. Miller, supra*, 97 Cal. at p. 431; see also *Hall v. City of Taft* (1956) 47 Cal.2d 177, 181 [302 P.2d 574]; *California Teachers Assn. v. Huff* (1992) 5 Cal.App.4th 1513, 1523-1524 [7 Cal.Rptr.2d 699].) The Legislature’s “plenary” power over public education is subject only to constitutional restrictions. (*Hall v. City of Taft, supra*, at pp. 180-181 [302 P.2d 574]; *Tinsley v. Palo Alto Unified School Dist.* (1979) 91 Cal.App.3d 871, 903-904 [154 Cal.Rptr. 591].) Local districts are the State’s agents for local operation of the common school system (*Hall v. City of Taft, supra*, at p. 181; *San Francisco Unified School Dist. v. Johnson, supra*, 3 Cal.3d at p. 952; *California Teachers Assn., supra*), and the State’s ultimate responsibility for public education cannot be delegated to any other entity (*Hall v. City of Taft, supra*; *Piper v. Big Pine School Dist., supra*, 193 Cal. at p. 669).

(3b) It is true that the Legislature has assigned much of the governance of the public schools to the local districts (e.g., §§ 14000, 35160 et seq., 35160.1), which operate under officials who are locally elected and appointed (§§ 35020, 35100 et seq.). The districts are separate political entities for some purposes. (E.g., *Johnson v. San Diego Unified School Dist.* (1990) 217 Cal.App.3d 692, 698-700 [266 Cal.Rptr. 187] [general theory of respondeat superior does not make State liable for torts of local district or its employees]; *Gonzales v. State of California* (1972) 29 Cal.App.3d 585, 590-592 [105 Cal.Rptr. 804] [same]; *First Interstate Bank v. State of California* (1987) 197 Cal.App.3d 627, 633-634 [243 Cal.Rptr. 8] [State not vicariously liable for district’s breach of contract]; *Board of Education v. Calderon* (1973) 35 Cal.App.3d 490, 496 [110 Cal.Rptr. 916] [local district is not the “state” or the “People,” so as to be civilly bound in dismissal proceedings by teacher’s acquittal of criminal sex offense under principles of res judicata].)

Yet the existence of this local-district system has not prevented recognition that the State itself has broad responsibility to ensure basic educational equality under the California Constitution. Because access to a public education is a uniquely fundamental personal interest in California, our courts have consistently found that the State charter accords broader rights against State-maintained educational discrimination than does federal law. Despite contrary federal authority, California constitutional principles require State assistance to correct basic “interdistrict” disparities in the system of common schools, even when the discriminatory effect was not produced by the purposeful conduct of the State or its agents.

In *Serrano v. Priest* (1971) 5 Cal.3d 584 [96 Cal.Rptr. 601, 487 P.2d 1241, 41 A.L.R.3d 1187] (*Serrano I*), this court struck down the existing State

public school financing scheme, which caused the amount of basic revenues per pupil to vary substantially among the respective districts depending on their taxable property values. *Serrano I* concluded at length that such a scheme violated both state and federal equal protection guaranties because it discriminated against a fundamental interest—education—on the basis of a suspect classification—district wealth—and could not be justified by a compelling state interest under the strict scrutiny test thus applicable. (Pp. 596-619.) As the court concluded, “where fundamental rights *or* suspect classifications are at stake, a state’s general freedom to discriminate on a geographical basis will be significantly curtailed by the equal protection clause. [Citation.]” (P. 612, italics added.)

Among other things, *Serrano I* rejected a claim that the wealth-based financing scheme was immune from challenge because the interdistrict revenue disparities it produced were not de jure, but merely de facto. Our opinion detailed the purposeful state legislative action which had produced the geographically based wealth classifications. It also made clear, however, that under California principles developed in cases involving school racial segregation, the absence of purposeful conduct by the State would not prevent a finding that the State system for funding public education had produced unconstitutional results. (*Serrano I, supra*, 5 Cal.3d at pp. 603-604, citing *Jackson v. Pasadena City School Dist., supra*, 59 Cal.2d 876, 881.)

Serrano I also discussed two groups of federal cases suggesting that place of residence was an impermissible basis for State discrimination in the quality of education. *Serrano I* cited with approval *Hall v. St. Helena Parish School Board* (E.D.La. 1961) 197 F.Supp. 649. This federal decision struck down a Louisiana statute permitting local parishes to close their schools rather than integrate them. As *Serrano I* noted, *Hall v. St. Helena Parish* found an equal protection violation not only because of the statute’s racial consequences, but also “‘because its application in one parish, while the state provides public schools elsewhere, would unfairly discriminate against the residents of that parish, irrespective of race. . . . [A]bsent a reasonable basis for so classifying, a state cannot close the public schools in one area while, at the same time, it maintains schools elsewhere with public funds.’” (*Serrano I, supra*, 5 Cal.3d at p. 612, quoting *Hall v. St. Helena Parish, supra*, 197 F. Supp. at pp. 651, 656.)

Serrano I further noted a “second group of cases, dealing with apportionment [of votes], [in which] the high court has held that accidents of geography and arbitrary boundary lines of local government can afford no ground for discrimination among a state’s citizens. [Citation.] . . . If a voter’s address may not determine the weight to which his ballot is entitled,

surely it should not determine the quality of his child's education. [Fn.]” (*Serrano I, supra*, 5 Cal.3d at p. 613.)

Finally, *Serrano I* rejected the State's claim that plaintiffs' wealth-discrimination theory would apply equally, and with disastrous effect, to all public services dependent in part on local property taxes. “[W]e are satisfied,” the majority concluded, that whatever the status of other public services, “its uniqueness among public activities clearly demonstrates that *education* must respond to the command of the equal protection clause.” (*Serrano I, supra*, 5 Cal.3d at p. 614, italics in original.)

In *San Antonio School District v. Rodriguez* (1973) 411 U.S. 1 [36 L.Ed.2d 16, 93 S.Ct. 1278], decided after *Serrano I*, the United States Supreme Court declined to subject Texas's similar local-property-tax based school financing scheme to heightened scrutiny under the Fourteenth Amendment. The *Rodriguez* majority concluded that a school finance scheme dependent on district tax values does not discriminate against the poor as a distinct class; in any event, the majority observed, wealth alone had never been deemed a suspect classification for federal purposes. Moreover, the majority reasoned, education is not a fundamental interest protected by the federal Constitution. Therefore finding the strict scrutiny standard of review inapplicable, the majority upheld Texas's system as rationally related to that state's policy of local control of schools. (411 U.S. at pp. 18-55.)

Nonetheless, in *Serrano v. Priest* (1976) 18 Cal.3d 728 [135 Cal.Rptr. 345, 557 P.2d 929] (*Serrano II*), this court reaffirmed the reasoning and result of *Serrano I* as required by the separate equal protection guaranties of the California Constitution. (*Serrano II, supra*, 18 Cal.3d at pp. 760-768.) Among other things, *Serrano II* reiterated that for California purposes, education remains a fundamental interest “which [lies] at the core of our free and representative form of government [fn.]” (*Id.*, at pp. 767-768.)

Hence, *Serrano II* declared, “[i]n applying our state constitutional provisions guaranteeing equal protection of the laws we shall continue to apply strict and searching judicial scrutiny” to claims of discriminatory educational classifications. (*Serrano II, supra*, at p. 767.) More recent cases confirm that education is a fundamental interest under the California equal protection guaranties (e.g., *Steffes v. California Interscholastic Federation* (1986) 176 Cal.App.3d 739, 746 [222 Cal.Rptr. 355]) and that the unique importance of public education in California's constitutional scheme requires careful scrutiny of state interference with basic educational rights (see, e.g., *Hartzell v. Connell* (1984) 35 Cal.3d 899, 906-909 [201 Cal.Rptr. 601, 679 P.2d 35] [scope of free school guarantee]).

In *Tinsley v. Palo Alto Unified School Dist.*, *supra*, 91 Cal.App.3d 871, parents sought mandate requiring several neighboring San Mateo and Santa Clara County school districts, the State, and certain State school officials, to submit a plan for the redress of interdistrict racial segregation in the affected locality. The petitioners declined to allege any specific acts committed by State or local parties as the cause of the interdistrict imbalance.

The State respondents answered the petition, but the districts successfully demurred, and the petition was dismissed as to them. The Court of Appeal reversed, holding that the California Constitution, unlike its federal counterpart as construed in *Milliken v. Bradley* (1974) 418 U.S. 717 [41 L.Ed.2d 1069, 94 S.Ct. 3112], contemplates interdistrict relief to remedy mere de facto racial imbalance which extends across district lines. (*Tinsley*, *supra*, 91 Cal.App.3d at pp. 899-907.) Several aspects of the *Tinsley* decision emphasize the State's ultimate responsibility for maintaining a nondiscriminatory common school system.

At the outset, the districts asserted that an appeal was premature under the "one final judgment" rule, because as mere agencies of the State, which had not demurred, they had no separate legal interests which an appeal from their dismissal could finally resolve. The Court of Appeal observed that if the districts' claim of mere agency was correct, any relief ordered against the State would necessarily affect them, and the judgment dismissing them from the action should therefore be reversed. In any event, the court concluded, the premise of identical interests did not bear scrutiny, because while "[t]he local districts, as agents, may have limited powers in interdistrict affairs, . . . the state . . . has plenary powers in all school district affairs. . . ." (*Tinsley*, *supra*, 91 Cal.App.3d at pp. 880-881.)

Turning to the merits, *Tinsley* dismissed the majority reasoning in *Milliken* insofar as based on the federal rule, long rejected in California (see *Crawford v. Board of Education* (1976) 17 Cal.3d 280 [130 Cal.Rptr. 724, 551 P.2d 28]; *Jackson v. Pasadena City School Dist.*, *supra*, 59 Cal.2d 876), that only de jure racial segregation is a constitutional violation. (*Tinsley*, *supra*, 91 Cal.App.3d at p. 903.) *Tinsley* also distinguished the *Milliken* majority's concern that it "would disrupt and alter" Michigan's entrenched system of local control of schools to impose an interdistrict remedy for Detroit city school segregation without proof that the state or affected suburban districts had engaged in intentional segregative conduct. The *Tinsley* court noted, among other things, that in California, the State shares responsibility with "the local entities it has created" to provide "equal educational opportunity

to the youth of the state" and "has a duty to intervene to prevent unconstitutional discrimination" in its schools. (*Id.*, at pp. 903-904.)¹³

It therefore appears well settled that the California Constitution makes public education uniquely a fundamental concern of the State and prohibits maintenance and operation of the common public school system in a way which denies basic educational equality to the students of particular districts. The State itself bears the ultimate authority and responsibility to ensure that its district-based system of common schools provides basic equality of educational opportunity.

The State claims it need only ensure the six-month minimum term guaranteed by the free school clause (Cal. Const., art. IX, § 5). This contention, however, misconstrues the basis of the trial court's decision. Whatever the requirements of the free school guaranty, the equal protection clause precludes the State from maintaining its common school system in a manner that denies the students of one district an education basically equivalent to that provided elsewhere throughout the State.

The State argues that even if the District's fiscal problems threatened its students' basic educational equality, any State duty to redress the discrimination must be judged under the most lenient standard of equal protection review. The State reasons as follows: Plaintiffs do not claim discrimination on the suspect basis of race. Nor is wealth-based discrimination at issue; as all parties concede, the District received the full benefit of the equalized funding system mandated by our *Serrano* decisions. At most, plaintiffs assert that a misuse of equalized funds by the District's officials caused a geographical disparity in service. Because residence and geography are not suspect classifications, the State's failure to prevent educational discrimination on those grounds is not subject to strict scrutiny. Rather, State inaction must be accepted as rationally related to the legitimate State policy of local control of schools.

(5) However, both federal and California decisions make clear that heightened scrutiny applies to State-maintained discrimination whenever the

¹³In November 1979, the voters adopted a Senate amendment to the California Constitution's equal protection clause, article I, section 7, subdivision (a). The amendment declares that nothing in the California Constitution imposes upon the State, or any local district or official, any obligations beyond those imposed by the Fourteenth Amendment of the United States Constitution "with respect to the use of pupil school assignment or pupil transportation." The amendment further forbids California courts from imposing any school-assignment or pupil-transportation obligation except when a violation of the Fourteenth Amendment has occurred, and unless a federal court could impose such a remedy for the violation. Whatever effect this amendment may have on *Tinsley's* result, it does not affect consistent interpretations of the California equal protection guaranty where, as here, assignment or transportation of students is not at issue.

disfavored class is suspect or the disparate treatment has a real and appreciable impact on a fundamental right or interest. (*Plyler v. Doe* (1982) 457 U.S. 202, 216-217 [72 L.Ed.2d 786, 102 S.Ct. 2382]; *Shapiro v. Thompson* (1969) 394 U.S. 618, 634 [22 L.Ed.2d 600, 614-615, 89 S.Ct. 1322]; *Darces v. Woods* (1984) 35 Cal.3d 871, 885, 888 [201 Cal.Rptr. 807, 679 P.2d 458]; *Fair Political Practices Com. v. Superior Court* (1979) 25 Cal.3d 33, 47 [157 Cal.Rptr. 855, 599 P.2d 46]; *Serrano II, supra*, 18 Cal.3d 728, 761, 767-768; *Weber v. City Council* (1973) 9 Cal.3d 950, 959 [109 Cal.Rptr. 553, 513 P.2d 601]; *Serrano I, supra*, 5 Cal.3d 584, 597; *Westbrook v. Mihaly* (1970) 2 Cal.3d 765, 784-785 [87 Cal.Rptr. 839, 471 P.2d 487].) As we have seen, education is such a fundamental interest for purposes of equal protection analysis under the California Constitution.

(3c) The State suggests there was no showing that the impact of the threatened closure on District students' fundamental right to basic educational equality was real and appreciable. Of course, the Constitution does not prohibit all disparities in educational quality or service. Despite extensive State regulation and standardization (see discussion, *post*), the experience offered by our vast and diverse public school system undoubtedly differs to a considerable degree among districts, schools, and individual students. These distinctions arise from inevitable variances in local programs, philosophies, and conditions. "[A] requirement that [the State] provide [strictly] 'equal' educational opportunities would thus seem to present an entirely unworkable standard requiring impossible measurements and comparisons. . . ." (*Hendrick Hudson Dist. Bd. of Ed. v. Rowley* (1982) 458 U.S. 176, 198 [73 L.Ed.2d 690, 707, 102 S.Ct. 3034].) Moreover, principles of equal protection have never required the State to remedy all ills or eliminate all variances in service.

Accordingly, the California Constitution does not guarantee uniformity of term length for its own sake. While the current statutory system for allocating State educational funds strongly encourages a term of at least 175 days (see fn. 14, *post*, at p. 687), that system is not constitutionally based and is subject to change. In an uncertain future, local districts, faced with mounting fiscal pressures, may be forced to seek creative ways to gain maximum educational benefit from limited resources. In such circumstances, a planned reduction of overall term length might be compensated by other means, such as extended daily hours, more intensive lesson plans, summer sessions, volunteer programs, and the like. An individual district's efforts in this regard are entitled to considerable deference.

Even unplanned truncation of the intended school term will not necessarily constitute a denial of "basic" educational equality. A finding of constitutional disparity depends on the individual facts. Unless the actual quality

of the district's program, viewed as a whole, falls fundamentally below prevailing statewide standards, no constitutional violation occurs.

Here, however, plaintiffs' preliminary showing suggested that closure of the District's schools on May 1, 1991, would cause an extreme and unprecedented disparity in educational service and progress. District students faced the sudden loss of the final six weeks, or almost one-fifth, of the standard school term originally intended by the District and provided everywhere else in California.¹⁴ The record indicates that the decision to close early was a desperate, unplanned response to the District's impending insolvency and the impasse in negotiations for further emergency State aid.¹⁵ Several District teachers declared that they were operating on standard-term lesson schedules made at the beginning of the school year. These declarants outlined in detail how the proposed early closure would prevent them from completing instruction and grading essential for academic promotion, high school graduation, and college entrance.¹⁶ Faced with evidence of such extensive educational disruption, the trial court did not abuse its discretion

¹⁴The trial court record contains no evidence of the prevailing term length in California, but the parties assumed below that a minimum term of 175 days prevails, and no dispute has arisen on the issue here. The statutes provide that an established local district may not receive any part of its annual apportionment from the State School Fund if it failed to remain in session at least 175 days during the most recent fiscal year, unless specified circumstances excusing the failure are established to the satisfaction of the SPI. (§§ 41420, subd. (a), 41422.) In an appendix to his brief, the SPI provides copies of local district certifications, submitted to the SPI as a condition of funding under section 41420, which indicate that virtually every established school district in California operated for at least 175 days during the 1990-1991 school year. The SPI asks us to take judicial notice of this information. Having received no objection, we do so. (Evid. Code, §§ 452, subds. (c), (h), 455, 459.)

¹⁵The declaration of Board member Calton, dated April 12, 1991, detailed the District's growing financial woes and stated the following: ". . . The District has only enough money to pay its employees through April 1991 [even under the most favorable accounting assumptions]. . . . Unless (a) additional funds are received, or (b) employees are willing to work for registered warrants, not redeemable checks, the District will have no alternative but to close all of its public schools at the end of April 1991. [¶] . . . The District has applied to the State of California for a loan, but that request has not been approved. It is my understanding that [collective bargaining concessions demanded by the State] have not been made, although negotiations are continuing. The District has retained bankruptcy counsel, . . . and is preparing to file for bankruptcy prior to April 30, 1991, if necessary."

¹⁶For example, John Enos, a high school government/economics teacher, stated that early termination of his required senior government class would eliminate intended lessons covering the State's executive and judicial branches, and county and local government. Geoffrey Cantrell, a high school mathematics teacher, stated that if the District closed early, Algebra I students would miss essential instruction in quadratic equations; Algebra II students would miss essential instruction in trigonometry; and geometry students would miss lessons in coordinate systems, logical proof, and trigonometric ratios. Craig Brammer, another high school mathematics teacher who also teaches a preparatory course for the Scholastic Aptitude Test (SAT), opined that loss of six weeks' instruction would severely impair his students' chances on the mathematics portion of the SAT. Betty Jean Crenshaw, a teacher of first-year languages, declared that early closure would prevent students from learning vocabulary and

by concluding that the proposed closure would have a real and appreciable impact on the affected students' fundamental California right to basic educational equality.

The State asserts that its financial obligation to equal education is limited to the equalized system of interdistrict funding required by our *Serrano* decisions. Once revenues are fairly apportioned at the beginning of each school year, the State insists, it cannot be constitutionally liable for how local officials manage the funds.

Nothing in the *Serrano* cases themselves, or in other California decisions, supports the State's argument. On the contrary, the cases suggest that the State's responsibility for basic equality in its system of common schools extends beyond the detached role of fair funder or fair legislator. In extreme circumstances at least, the State "has a duty to intervene to prevent unconstitutional discrimination" at the local level. (*Tinsley, supra*, 91 Cal.App.3d at p. 904.)

The State's most vigorous contention is that its nonintervention should have been upheld even under the strict scrutiny standard of equal protection analysis. Allowing the District's students to absorb the consequences of District mismanagement, the State urges, was necessary to preserve the State's compelling educational policy of local autonomy and accountability. However, the State fails to demonstrate a policy of local control so compelling as to justify State tolerance of the extreme local educational deprivation at issue here.

In the first place, the local-district system of school administration, though recognized by the Constitution and deeply rooted in tradition, is not a constitutional mandate, but a legislative choice. (See Cal. Const., art. IX, §§ 6½, 14.) The Constitution has always vested "plenary" power over education not in the districts, but in the State, through its Legislature, which may create, dissolve, combine, modify, and regulate local districts at pleasure. (See *Tinsley, supra*, 91 Cal.App.3d at p. 904.) The legislative decision

grammar necessary for advancement to second-year courses. Amy Shinsako, a first grade teacher, stated that early closure would prevent instruction in phonics, reading comprehension, creative writing, handwriting skills, two-digit addition and subtraction, and addition with three addends, all necessary for advancement to the second grade. Several declarants noted that failure to complete the term would prevent the scheduling of final examinations and other term-end projects crucial to the assignment of final grades. Other declarants detailed the difficulties District students would face if forced to transfer to other districts to complete the year's studies. They also noted that unless graduating seniors completed required courses and received final grades, the District might not be able to award high school diplomas, any diplomas awarded would be "stigmatized," and the ability of departing seniors to qualify for college admission might be seriously compromised.

to emphasize local administration does not end the State's constitutional responsibility for basic equality in the operation of its common school system. Nor does disagreement with the fiscal practices of a local district outweigh the rights of its blameless students to basic educational equality.

Moreover, though the Constitution and statutes encourage maximum local program and spending authority consistent with State law (Cal. Const., art. IX, § 14; Ed. Code, §§ 14000, 35160, 35160.1), the degree of supervision voluntarily retained by the State over the common school system is high indeed. The volume and scope of State regulation indicate the pervasive role the State itself has chosen to assume in order to ensure a fair, high quality public education for all California students.

School finance aside, the statutes address at length such matters as county and district organization, elections, and governance (§§ 4000-5450, 35000-35780); educational programs, instructional materials, and proficiency testing (§§ 51000-62008); sex discrimination and affirmative action (§§ 40-41, 200-263, 44100-44105); admission standards (§§ 48000-48053); compulsory attendance (§§ 48200-48416); school facilities (§§ 39000-40048); rights and responsibilities of students and parents (§§ 48900-49079); holidays (§§ 37220-37223); school health, safety, and nutrition (§§ 32000-32254, 49300-49570); teacher credentialing and certification (§§ 44200-44481); rights and duties of public school employees (§§ 44000-44104, 44800-45460; see also Gov. Code §§ 3540-3549.3 [organizational and bargaining rights]); and the pension system for public school teachers (§§ 22000-24924). The statutory scheme has spawned further voluminous regulations administered by the State's Department of Education and the SPI. (Cal. Code Regs., tit. 5, §§ 1-23005.) This long-established level of State involvement in the public education system undermines any claim that local control is a paramount and compelling State policy for all purposes.

Nor is there any indication that the State has had a compelling policy of absolute budgetary freedom and responsibility for local districts. On the contrary, during the years in which the District's deficit developed, districts were required to adopt budgets meeting State standards, and to submit them for oversight and approval by county and State authorities. (§§ 33127, former §§ 42120-42129.) Failure to adopt a conforming budget precluded State or county funding of the district (former § 42128), and a district was required to operate under its most recent approved budget (former § 42127.4).

The State argues that by saddling the District with long-term debt to cover short-term operations, the trial court's orders undermine the District's future

financial health and compromise its ability to provide basic educational equivalency in years to come. The State also urges that other districts will feel free to overspend if encouraged to believe in the availability of State relief.

These are indeed troubling concerns, but we cannot accept the implication that the State deems them compelling. In fact, the State itself has endorsed a policy of emergency conditional loan assistance to districts in financial difficulty.

Under statutes in effect since 1977, distressed districts may, through the SPI, seek specific legislative apportionments for emergency loans. (§§ 41310, 41310.5, 41320 et seq.) As a condition of such aid, a district must prepare a financial recovery plan and obtain approval of the plan from the county superintendent and the SPI. (§ 41320.) The district must also accept a temporary SPI-appointed trustee with veto power over financially significant actions of the local governing board. (§ 41320.1.)

The District itself had received a \$9,525,000 conditional State loan under this program in spring 1990 (Stats. 1990, ch. 171, § 3), and its operations were already being monitored by a State trustee at the time closure of District schools was threatened in April 1991. The 1989 Legislature had also appropriated \$10 million for a similar emergency loan-with-trustee to the OUSD. (Stats. 1989, ch. 1438, §§ 1-11.) Under these circumstances, the State cannot claim it follows a compelling policy of local control by declining to intervene when financial adversity threatens a district's operations.

Shortly before this lawsuit began, the District faced the prospect of further legislative intervention in its crisis. Assembly Bill No. 128, 1991-1992 Regular Session (A.B. 128), as introduced in December 1990 and thereafter amended, would have appropriated an additional \$29 million for emergency loans to the District. Acceptance of the proposed loan would have subjected the District to unprecedented restrictions on self-government. These included a temporary takeover of all District affairs by an SPI-appointed administrator pending approval and implementation of a plan for financial recovery and loan repayment. The administrator would have had broad power, among others, to unilaterally determine wages and benefits for all District employees who, as of April 29, 1991, were not covered by ratified collective bargaining agreements meeting the requirements of an approved recovery plan. (A.B. 128, Sen. Amend. of Jan. 18, 1991, §§ 2, 5.)

A.B. 128 failed passage, but that fact does not suggest a compelling policy against emergency State financial assistance to a local district. On the

contrary, the State has forged into the realm of emergency assistance and control, using the "specific appropriation" requirement (§ 41320) to decide on a case-by-case basis whether, and on what terms, it will intervene.

The State claims that emergency assistance to mismanaged districts contravenes the compelling principle of equalized funding established in our *Serrano* decisions. As we have seen, however, nothing in the *Serrano* cases, which addressed wealth-based disparities in district revenues, prohibits emergency State assistance to a particular district which is experiencing financial difficulties despite its receipt of equalized funding.¹⁷

Finally, nothing in our analysis is intended to immunize local school officials from accountability for mismanagement, or to suggest that they may indulge in fiscal irresponsibility without penalty. The State is constitutionally free to legislate against any recurrence of the Richmond crisis. It may further tighten budgetary oversight, impose prudent, nondiscriminatory conditions on emergency State aid, and authorize intervention by State education officials to stabilize the management of local districts whose imprudent policies have threatened their fiscal integrity. To the extent such conditions compromise local autonomy and mortgage a district's future, they are not calculated to persuade local officials or their constituents that mismanagement and profligacy will be rewarded.

Indeed, in response to this case, the Legislature and the Governor have already agreed to tighter county and State control of local district budgets and spending.¹⁸ Under certain circumstances, this new legislation *requires* the SPI's complete takeover of an insolvent district as a precondition of an

¹⁷The *Serrano* decisions themselves, as well as the subsequent adoption of Proposition 13, have exacerbated the need for occasional emergency State intervention by restricting one aspect of local control—the power of local districts to tax themselves out of financial crises. Our *Serrano* opinions condemned the former dependence of school finance on local ad valorem property taxes, because, as a practical matter, however willing a local district might be to increase taxes for education, "districts with small [real property] tax bases simply cannot levy taxes at a rate sufficient to produce the revenue that more affluent districts reap with minimal tax efforts. . . ." (*Serrano I, supra*, 5 Cal.3d 584, 598.) In obedience to *Serrano* principles, the current system of public school finance largely eliminates the ability of local districts, rich or poor, to increase local ad valorem property taxes to fund current operations at a level exceeding their State-equalized revenue per average daily attendance. (§ 42238 et seq.) Moreover, Proposition 13 places a general ceiling on the ad valorem property taxes which may be levied on behalf of local governments and school districts. (Cal. Const., art. XIII A, § 1.)

¹⁸Legislation adopted in 1991 provides, among other things, that if a local district's proposed budget fails to win final county and State approval, the county superintendent of schools shall adopt a governing budget for the district which permits the district to meet current and "multiyear" commitments. The county superintendent may rescind any district action or payment which is inconsistent with the county superintendent's budget, except those

emergency State appropriation.¹⁹ Thus, the State has already made vast inroads on the principle that local control is paramount to State intervention in an insolvent district's affairs. The State's plenary power over education includes ample means to discourage future mismanagement in the day-to-day operations of local districts.

In sum, the California Constitution guarantees "basic" equality in public education, regardless of district residence. Because education is a fundamental interest in California, denials of basic educational equality on the basis of district residence are subject to strict scrutiny. The State is the entity with ultimate responsibility for equal operation of the common school system. Accordingly, the State is obliged to intervene when a local district's fiscal problems would otherwise deny its students basic educational equality, unless the State can demonstrate a compelling reason for failing to do so.

The preliminary facts before the trial court support the inference that the District's impending failure to complete the final six weeks of its scheduled school term would cause educational disruption sufficient to deprive District students of basic educational equality. The State has identified no compelling interest which negated its duty to intervene. We therefore find no abuse of discretion in the trial court's conclusion that plaintiffs' constitutional claims had potential merit.²⁰

3. *Interim harm.*

The trial court also expressly concluded that plaintiffs, District students and their parents, would suffer "substantial and irreparable harm" if a preliminary injunction were denied. This harm, the court further found,

in performance of a previously effective collective bargaining agreement. (§ 42127.3, subd. (b)(1), as amended by Stats. 1991, ch. 1213, § 18.) The county superintendent must also monitor all local budgets continuously to ensure that each district can meet its financial obligations for the current and ensuing fiscal years. A county superintendent's determination that a district will be unable to meet its obligations triggers a process which may culminate in forced revisions to the district's budget and rescission of actions, other than collective bargaining obligations, which are inconsistent with the revisions. (§ 42127.6, added by Stats. 1991, ch. 1213, § 20.)

¹⁹New sections 41325 through 41327 provide that when a local district accepts an emergency appropriation more than twice the size of its State-recommended reserve, the SPI must take control of the district for at least two fiscal years, assume all duties and powers of the local governing board, fire district officials who took no action to avert insolvency, impose a recovery plan including a ten-year repayment schedule, and remain in control until satisfied that local compliance with recovery requirements is probable.

²⁰Our conclusion that the trial court's finding of probable merit is supported by the equal protection clauses of the California Constitution makes it unnecessary to address claims that a State duty of intervention may also have arisen under the "free school" clause or the Fourteenth Amendment.

would be "greater . . . than defendants will suffer if the injunction is granted."

These determinations were based upon the uncontradicted declarations of District teachers, local and regional public school officials, and academic specialists in the field of public education. Besides detailing the severe and immediate academic disruption which would arise from the pending closure (see discussion, *ante*, fn. 16, at p. 687), these declarations set forth at length the "ripple" effect on District parents and students. For example, the declarations recounted, working parents, including the high percentage of needy families in the District, would be faced with expensive child care for the lost school hours; difficult efforts would be required to obtain other placement of the students for the remainder of the year; and special-need students would lose carefully nurtured progress.

The State submitted no evidence that it would suffer comparable or greater harm by offering emergency loan assistance necessary to ensure completion of the District's academic program for 1990-1991. Instead, the State simply argued that court-ordered State aid would damage the State's public school policies of local control and accountability.

(6) The State nonetheless claims plaintiffs' "interim harm" showing was inadequate as a matter of law. In the State's view, plaintiffs' declarations failed to establish that the early closure was unforeseeable, or to explain persuasively why any adverse effects on student progress could not be ameliorated.

We find the trial court's interim-harm findings amply supported. As previously noted, plaintiffs' preliminary showing suggested that the District's inability to complete its school year arose from its ever-worsening fiscal condition and from the deterioration of its negotiations for emergency aid. The declarations of District teachers uniformly indicated that their lesson plans did not provide for the contingency of early closure. Other declarations detailed the difficulties of alternate arrangements to maintain the educational progress of over 31,000 suddenly displaced District students, who included high school seniors poised for graduation. The court could reasonably infer that orderly planning to minimize the resulting educational disruption had not taken place and was not realistically possible.

In any event, the court was not obliged to deny a preliminary injunction simply because plaintiffs failed to demonstrate that "irreparable" harm to students was unavoidable by other means. The preliminary record properly convinced the court *both* that plaintiffs had a reasonable probability of

success on the merits, *and* that they would suffer more harm in the meantime if an injunction were denied than the State would suffer if it were granted. This “mix” of the “interrelated” relevant factors fully justified the court’s decision to grant the injunction. (See *Common Cause v. Board of Supervisors*, *supra*, 49 Cal.3d at pp. 441-442; *King v. Meese*, *supra*, 43 Cal.3d at p. 1227.) No error appears.

4. *Scope of remedial order.*

In orders dated April 29, 1991, and May 2, 1991, the trial court directed the State, the SPI, and the Controller to ensure “by whatever means they deem appropriate” that District students would receive their educational rights; both orders made clear that “[h]ow these defendants accomplish this is up to the discretion of defendants. . . .” When no other State official proposed a solution, the SPI and the Controller, on May 2, 1991, offered a conditional loan plan for approval by the court.

After a hearing on that day, the court found that \$19 million in aid funds proposed by the SPI and the Controller were presently available, and the court authorized the Controller to apportion such funds as an emergency loan to the District. The court further determined that, given the State’s obligation to provide an equal education, the SPI’s statutory authority to “[s]uperintend the schools of this state” (§ 33112, subd. (a)), and the “unique” emergency circumstances, “the [SPI] . . . has authority to relieve the [Board] of its legal duties and powers, appoint a trustee, develop a recovery plan and, subject to the approval of the Controller, [develop] a repayment plan on the [D]istrict’s behalf as necessary to ensure the operation of the schools through June 14, 1991, the financial recovery of the [D]istrict, and the protection of State funds loaned to the [D]istrict.”

(7a) The State and several amici curiae contend that even if the trial court could require State intervention to prevent violation of the District students’ constitutional rights, there was no legal or equitable basis for the court’s order authorizing the SPI to displace the Board, operate the District through his own administrator, and impose a plan for the District’s permanent financial recovery. Under the circumstances presented by this case, however, we conclude that this portion of the court’s order did not exceed its powers.

We agree that the statutes themselves provided no direct authority for the approach taken by the trial court. In general, though they act as regulated State agents, local governing boards are vested by statute with immediate jurisdiction over day-to-day district affairs. (§§ 14000, 35000 et seq.) The

SPI has important statutory responsibilities for allocating school funds (§§ 33118, 14000 et seq.), monitoring local budgets (§§ 42120 et seq., 41450), and administering the conditions of emergency loans *appropriated by the Legislature* (§§ 41310, 41320 et seq.; see also § 41325 et seq.), but no statute grants him emergency powers to operate a local district under other circumstances.²¹

The court relied in part on section 33112, subdivision (a), which provides that the SPI shall “[s]uperintend the schools of this state.” But no case has interpreted this statute to vest the SPI with nonexpress powers, and an older decision construed similar language narrowly against a county superintendent. (*McKenzie v. Board of Education* (1905) 1 Cal.App. 406, 409 [82 P. 392].) Indeed, counsel for the SPI conceded in the trial court that the SPI had no statutory authority to take over the District’s government.

The trial court also believed its takeover order was within its inherent equitable power to enforce the State’s constitutional obligations in light of the “unique emergency financial conditions” presented by the case. In the court’s view, ratification of all loan conditions proposed by the SPI was necessary to ensure the District’s continued operation through June 14, 1991, promote its permanent financial recovery, and protect the loan itself. We agree.

(8) In general, courts have equitable authority to enforce their constitutional judgments. (E.g., *Crawford v. Board of Education*, *supra*, 17 Cal.3d 280, 308.) Of course, principles of comity and separation of powers place significant restraints on courts’ authority to order or ratify acts normally committed to the discretion of other branches or officials. (*Common Cause v. Board of Supervisors*, *supra*, 49 Cal.3d 432, 445-446; *Mandel v. Myers* (1981) 29 Cal.3d 531, 540 [174 Cal.Rptr. 841, 629 P.2d 935]; *Serrano II*, *supra*, 18 Cal.3d 728, 751; *Crawford v. Board of Education*, *supra*, 17 Cal.3d at pp. 305-306; cf. *Missouri v. Jenkins* (1990) 495 U.S. 33, 50-58 [109 L.Ed.2d 31, 53-59, 110 S.Ct. 1651].) In particular, the separation of powers doctrine (Cal. Const., art. III, § 3) obliges the judiciary to respect the separate constitutional roles of the Executive and the Legislature.

Moreover, a judicial remedy must be tailored to the harm at issue. (E.g., *Sheet Metal Workers v. EEOC* (1986) 478 U.S. 421, 476 [92 L.Ed.2d 344, 388, 106 S.Ct. 3019]; *Dayton Board of Education v. Brinkman* (1977) 433

²¹A.B. 128 would have granted the SPI powers of this magnitude over the District, but the bill failed passage. (See discussion, *ante*, at p. 690.) 1991 statutory amendments call for the SPI’s takeover of districts that accept large emergency insolvency *appropriations* (§ 41325 et seq.; see discussion, *ante*, fn. 18 at p. 691), but even after 1991, the SPI has no such statutory authority *independent* of a specific insolvency appropriation by the Legislature.

U.S. 406, 420 [53 L.Ed.2d 851, 863-864, 97 S.Ct. 2766].) A court should always strive for the least disruptive remedy adequate to its legitimate task.

(7b) The trial court's remedial order in this case fell within proper boundaries. Having correctly held the State constitutionally responsible for the students' rights, the court could not deny the State and its officials effective means of fulfilling its obligation. Under the circumstances, the court was warranted in authorizing temporary transfer to the SPI of the Board's statutory powers over District affairs.

The emergency the court confronted on May 2, 1991, demanded a prompt State-assisted solution to prevent immediate closure of the District's schools. The State was justified in satisfying its constitutional duty of aid by extending a loan that would impose the ultimate consequences of the District's self-created predicament upon the District, rather than upon the State, its taxpayers, and the students of other districts. The State was also entitled to conditions on the loan that would ensure its appropriate use for the intended constitutional purpose, and would minimize the risk of the District's default in repayment.

The District's ability to administer the new loan under its existing systems and managers was uniquely suspect. As a matter of public record, the District's worsening financial situation had recently led the Legislature to provide a loan in excess of \$9 million. A limited-powers State trustee appointed to monitor the District's fiscal affairs in connection with that loan had not been able to stem a growing District deficit estimated by one declarant, a member of the Board, to exceed \$23 million for the 1990-1991 school year alone. In response to these difficulties, the Board had caused the District to seek bankruptcy protection against its existing creditors.

As counsel for the SPI explained on April 29, 1991, the District's unprecedented financial collapse indicated systemic management problems. Hence, counsel reported, the SPI considered it foolhardy to extend further substantial State credit to the District unless its management was placed in competent hands, its administrative practices were reformed and restructured from the outside, and a long-term plan for its financial recovery was imposed.²² On behalf of the State, the Attorney General contested the legality of vesting such extraordinary powers in the SPI, but no party disputed the logic of the SPI's position.

²²The following colloquy occurred between the court and counsel for the SPI: "[¶] MR. HERSHER [SPI's counsel]: . . . [The SPI] does not want to make . . . 20 to 30 million dollars in state funds available to a district that has already demonstrated substantial financial irresponsibility. It's pouring state money into a hole and it's never going to come back out. [¶] THE COURT: Would he want to do that if the State was given the responsibility for running the district as you suggested? [¶] MR. HERSHER: I believe so. I think what Bill Honig sees is that

Nor can we. Given the emergency circumstances, and under the extreme and aggravated conditions disclosed by the evidence, the court below could properly conclude that orderly completion of the District's 1990-1991 school term, and the sound financing essential to achieve that end, required temporary displacement of the sitting Board and the operation of the District by the SPI's designee for the purpose of stabilizing its financial affairs.²³ We conclude that the order approving temporary takeover of the District by the SPI was within the court's inherent equitable power to remedy the constitutional crisis.²⁴

5. *Source of loan funds.*

In order to obtain the necessary \$19 million in emergency loan funds, the trial court authorized the Controller to disburse (1) \$9 million of unspent funds from a special contingency appropriation to the Department of Education for the GAIN program, and (2) the unused \$10 million appropriated as an emergency loan to the OUSD. (9) The State and amicus curiae Pacific argue that because the Legislature had not earmarked either of these sums

the District has to be reorganized. The financial management of the District needs to be completely restructured, and there needs to be a long-term recovery plan [I]t has always been [the SPI's] position that somebody needs to . . . take over the District, come up with a long-term plan in which all the creditors of the District suffer equally or equitably."

²³Amici curiae Diaz and Bezemek ask us to receive additional evidence and make findings about the SPI's record as administrator of the District after May 2, 1991. Among other things, Diaz and Bezemek allege that the SPI's administrator has withdrawn the District's bankruptcy petition, dismantled essential programs, failed to reappoint a citizens' advisory committee, restructured the District's administration, dismissed faculty and counselors, obstructed reorganization of the District's existing debt, imposed an unconscionable interest rate on the court-approved loan, and diverted educational funds to debt repayment. Diaz and Bezemek claim this evidence supports their contention that the SPI's governance of the District presents an inherent conflict between his role as protector of State-loaned funds and his duty to restore the District to financial and educational health.

Appellate courts have limited powers to take evidence and find facts in nonjury civil cases. (Cal. Const., art. VI, § 11; Code Civ. Proc., § 909; Cal. Rules of Court, rule 23(b).) However, the matters Diaz and Bezemek seek to present are beyond the scope of this lawsuit and unnecessary to our analysis. Moreover, Diaz and Bezemek concede the proffered evidence is disputed; appellate courts will not resolve such factual conflicts. (E.g., *In re Marriage of Davis* (1983) 141 Cal.App.3d 71, 75-76 [190 Cal.Rptr. 104]; see *McCracken v. Teets* (1953) 41 Cal.2d 648, 653 [262 P.2d 561].) We therefore deny the motion.

²⁴The State argues that even if extraordinary judicial interference in the District's affairs was necessary to guarantee the constitutional rights of District students, the court erred by granting the SPI extralegal "discretion" to act rather than assuming control over the District itself, with the SPI as the court's appointed agent. The State cites no authority for its proposition that the court's remedial options were so narrowly confined. The remedial order of May 2, 1991, makes clear that the authority therein accorded the SPI flows from a direct and critical exercise of the court's equitable power and jurisdiction over the constitutional dispute. The order laudably minimizes direct judicial involvement in matters best left to officials with specific responsibilities and expertise in education, but its effect is no different than if it had expressly made the SPI a court functionary. We find no error.

for purposes "reasonably related" to resolving the District's financial crisis, the court improperly invaded the nonjudicial power of appropriation.

We agree. In a valid exercise of its constitutional powers, the Legislature had directed each of these sums to specific agencies and narrow purposes which did not include the District and its financial emergency. Hence, the Legislature had not made these funds reasonably available for disbursement to the District. By diverting the funds from their earmarked destinations and purposes, the court invaded the Legislature's constitutional authority.

Article III, section 3 of the California Constitution provides that "[t]he powers of state government are legislative, executive, and judicial. Persons charged with the exercise of one power may not exercise either of the others except as permitted by this Constitution." Article XVI, section 7 provides that "[m]oney may be drawn from the Treasury only through an appropriation made by law and upon a Controller's duly drawn warrant." Article IV, sections 10 and 12 set forth the respective powers of the Legislature and Governor over the enactment of appropriations. It has long been clear that these separation-of-powers principles limit judicial authority over appropriations. (*Myers v. English* (1858) 9 Cal. 341, 349; see *Westinghouse Electric Co. v. Chambers* (1915) 169 Cal. 131, 135 [145 P. 1025]; *California State Employees' Assn. v. Flournoy* (1973) 32 Cal.App.3d 219, 234 [108 Cal.Rptr. 251]; see also *Payne v. Superior Court* (1976) 17 Cal.3d 908, 920, fn. 6 [132 Cal.Rptr. 405, 553 P.2d 565].)

In certain narrow circumstances, California courts have concluded that judicial orders for the disbursement of appropriated funds do not invade valid legislative functions. *Mandel v. Myers, supra*, 29 Cal.3d 531, is the only decision by this court which found judicial power to "commandeer" appropriated funds. The facts and analysis of that case demonstrate the strict limits on the judicial authority it recognized.

The plaintiff in *Mandel*, a Department of Health Services (DHS) worker, had prevailed in litigation challenging DHS's practice of allowing paid employee leave on Good Friday. The judgment against the State included an award of attorney fees. However, the Legislature removed appropriations for payment from successive claims and budget bills, including the 1978-1979 Budget Act (Act). The Act included the usual appropriation to DHS for "general operating expenses and equipment," which expressly included expenses for "services" and "all other proper purposes." Such "catchall" budget categories for State agencies had traditionally been used to pay agency legal expenses. However, the Act expressly precluded use of any appropriation therein "to achieve any purpose which has been denied by any formal action of the Legislature."

We upheld the trial court's order that the Controller pay the fee award from the general operating budget of DHS. We noted first that the "catchall" appropriation was "reasonably" or "generally" available for payment of legal expenses incurred by DHS, because the broad terms of the appropriation, as well as its historical uses, indicated such a legislative intent. In effect, we concluded that the Legislature had voluntarily made an appropriation for payments of this general kind. (*Mandel v. Myers*, *supra*, 29 Cal.3d at pp. 539-545.)

We further explained that, once having made an appropriation generally available, the Legislature may not impose specific restrictions which are unconstitutionally discriminatory, or which constitute an impermissible legislative attempt to readjudicate the merits of a final court judgment. Hence, we reasoned, the Legislature's attempt to avoid payment of the *Mandel* award in particular must be struck down. The DHS "catchall" appropriation thus remained "available" under its general terms for payment of the judgment. (*Mandel v. Myers*, *supra*, 29 Cal.3d at pp. 545-551.)

Subsequent Court of Appeal decisions adhered to these principles of *Mandel*. In *Serrano v. Priest* (1982) 131 Cal.App.3d 188 [182 Cal.Rptr. 387], attorneys who had won the school-finance class action sought judicial help after the State rebuffed their informal efforts to collect a court-ordered fee award. After *Mandel* was decided, the State conceded that the trial court had properly ordered payment from a "catchall" appropriation to the Department of Education, the SPI, and the State Board of Education for "operating expenses and equipment." (Pp. 197-198.) In *Committee to Defend Reproductive Rights v. Cory* (1982) 132 Cal.App.3d 852 [183 Cal.Rptr. 475], the court concluded, after disregarding an unconstitutional budget act provision against use of Medi-Cal funds for abortions (see *Committee to Defend Reproductive Rights v. Myers* (1981) 29 Cal.3d 252 [172 Cal.Rptr. 866, 625 P.2d 779, 20 A.L.R.4th 1118]), that abortion funding could be ordered from monies appropriated for other Medi-Cal pregnancy services. (132 Cal.App.3d at pp. 857-858.)

Plaintiffs and the SPI suggest that two more recent Court of Appeal decisions, *Long Beach Unified Sch. Dist. v. State of California* (1990) 225 Cal.App.3d 155 [275 Cal.Rptr. 449] and *Carmel Valley Fire Protection Dist. v. State of California* (1987) 190 Cal.App.3d 521 [234 Cal.Rptr. 795], have expanded *Mandel's* concept of "reasonable [or] general availability." The trial court in the instant case apparently relied on these decisions to conclude that it could divert the GAIN and OUSD appropriations to the District because they were "generally related" to education.

Long Beach and *Carmel Valley* do make occasional use of the term "generally related" to describe *Mandel's* principle of reasonable or general

"availability." (See *Long Beach*, *supra*, 225 Cal.App.3d at p. 181; *Carmel Valley*, *supra*, 190 Cal.App.3d at p. 541.) But nothing in those cases supports the trial court's apparent view that funds appropriated for one specific educational purpose may be judicially diverted to another. So far as the face of the opinions discloses, the stated intent of the target appropriation in each case, or its historical uses, indicated that the court's application of the funds was plausibly within purposes the Legislature might have contemplated.²⁵ No court has suggested that *Mandel* principles permit court-ordered diversion of an appropriation away from a clear, narrow, and valid purpose specified by the Legislature. We affirm that the words "generally related," as used in *Long Beach* and *Carmel Valley*, do not countenance such judicial incursions into the legislative power over appropriations.²⁶

The instant trial court misapplied *Mandel* when it authorized the diversion of appropriated funds from the specific purposes and programs for which the Legislature had validly earmarked them. Nine million dollars was taken from an appropriation in the 1989-1990 Budget Act for the GAIN program. (Stats. 1989, ch. 93, § 22.00.) GAIN's purpose is to provide employment, adult

²⁵In *Carmel Valley*, the Court of Appeal struck down budgetary language which had been inserted to foreclose the constitutionally required reimbursement of local agencies for expenses incurred in upgrading firefighter protective clothing as mandated by the State. (See Cal. Const., art. XIII B, § 6.) After disregarding these unconstitutional restrictions, the Court of Appeal quite logically determined that funds appropriated to the Department of Industrial Relations for Program 40, the Prevention of Industrial Injuries and Deaths of California Workers, were available for this expense. (*Carmel Valley*, *supra*, 190 Cal.App.3d at p. 541.) In *Long Beach*, a local school district sought reimbursement for the State-mandated expenses of developing desegregation programs. After the Legislature deleted an appropriation for this purpose from the 1985-1986 budget bill, the district obtained a trial court order for reimbursement from specified line-item accounts related to education, and from the general operating budget of the Department of Education, which had mandated the programs. The Court of Appeal affirmed on grounds that the record substantially supported the trial court's order. As the Court of Appeal explained, these and similar accounts had historically been used to support programs such as the one for which reimbursement was sought, and were logical sources of funding for this specific purpose. (*Long Beach*, *supra*, 225 Cal.App.3d at pp. 181-182; see also p. 185.)

²⁶We are aware that in *Missouri v. Jenkins*, *supra*, 495 U.S. 33, the United States Supreme Court upheld the power of federal courts to order local tax levies to enforce judicial remedies for unconstitutional school segregation. However, even if the federal Constitution permits federal courts to impose far-reaching remedies for State government violations of federal constitutional rights, it does not follow that California courts are exempt from the constraints imposed by the California Constitution upon their power to invade the functions of a coequal branch of State government.

Indeed, the California Constitution's separation of powers clause precludes any branch from usurping or improperly interfering with the essential operations of either of the other two branches. (See Cal. Const., art. IV, § 1 [legislative power]; Cal. Const., art. V, § 1 [executive power]; Cal. Const., art. VI, § 1 [judicial power].) Nothing in this opinion should be interpreted as sanctioning or immunizing such unconstitutional interference, or as addressing the question of the appropriate remedies that may be invoked in the event one branch improperly impinges on the essential operations of a coequal branch.

education, and job training to recipients of public assistance. (Welf. & Inst. Code, § 11320 et seq.) Local school districts can receive GAIN funds for adult education and training classes (*id.*, §§ 11320.8, 11322, 11323), and the Legislature intended that the 1989-1990 GAIN appropriation might include such funding subject to strict conditions (see Stats. 1989, ch. 93, § 22.00, subd. (b)). However, this appropriation was expressly designated for that program alone and was not intended to fund the needs of non-GAIN students. Nothing in the trial court's order restricted use of the GAIN-derived funds to uses contemplated by the appropriation.

Similar considerations govern the remaining \$10 million of the emergency loan, which was derived from the 1989 Legislature's special appropriation for the OUSD. This appropriation, by its express terms, was "for the purpose of an emergency loan *to [that] [d]istrict* in compliance with Article 2 (commencing with Section 41320) of Chapter 3 of Part 24 of the Education Code." (Stats. 1989, ch. 1438, § 1, italics added.)

Section 41310 expresses the intent that emergency loans to distressed districts under section 41320 et seq. not occur "unless funds have been *specifically* appropriated *therefor* by the Legislature." (Italics added.) The statutory scheme imposes detailed conditions on emergency loans granted under its auspices (§§ 41320.1-41323), and the Legislature further refined the conditions on the OUSD appropriation to address the particular circumstances of that case (Stats. 1989, ch. 1438, §§ 2-9).

When it makes an appropriation to a specific district, under specific conditions addressed to the problems of that district, the Legislature clearly intends and contemplates that the appropriation will only be used for that purpose, and under those conditions. Hence, the appropriation is not reasonably available for court-ordered diversion to another district under different conditions.

The trial court, understandably anxious to resolve the crisis, concluded that it could fund its order from any monies previously appropriated "for a purpose that is reasonably related to educational purposes." The court found that the GAIN and OUSD appropriations were "reasonably related to the State's obligation to keep the Richmond schools open through June 14, 1991"

As we have seen, however, the test of reasonable availability under *Mandel* does not extend to uses clearly outside the particular purpose for which an appropriation was reserved. The GAIN and OUSD appropriations were earmarked for purposes entirely distinct from the subject matter of this

lawsuit.²⁷ They were not reasonably available for court diversion to finance the remainder of the District's school term.

In her concurring and dissenting opinion, Justice Kennard claims that by flatly disclaiming judicial power to divert appropriations from the purposes specified by the Legislature, we adopt a "formalistic" and outmoded view of the separation of powers. Citing language from two United States Supreme Court decisions (*Mistretta v. United States* (1989) 488 U.S. 361 [102 L.Ed.2d 714, 109 S.Ct. 647]; *Nixon v. Administrator of General Services* (1977) 433 U.S. 425 [53 L.Ed.2d 867, 97 S.Ct. 2777]), she proposes that interbranch conflicts of this kind be resolved under a "pragmatic" and "flexible" case-by-case balancing test, in which the derogation of one branch's powers by another may be warranted to promote overriding objectives within the "constitutional authority" of the latter. Because both the OUSD and GAIN appropriations were "generally related" to elementary and secondary education, she reasons, diversion of these funds to the District was not a "great" or "extreme" intrusion upon the appropriations power, and the court's action was justified by its constitutional responsibility to District students.

We cannot accept these contentions. Our adherence to *Mandel* can hardly be deemed rigid or formalistic; our decision in that case strained to find a practical, sensitive, and principled balance between legislative and judicial power over appropriations. In effect, Justice Kennard urges abandonment of *Mandel*'s careful analysis in favor of a rule giving the judiciary unchecked power to override the valid budgetary acts of coequal branches.

However, nothing in the California or federal cases on which Justice Kennard relies even hints that a court may *nullify* a *specific and valid exercise* by the Legislature and the Executive of fundamental budgetary powers explicitly entrusted to those branches, simply for the purpose of

²⁷No party or amicus curiae suggests that the purposes specified by the Legislature for these two appropriations were "improper or invalid . . . restriction[s]" on their use which may be disregarded by the courts. (*Mandel v. Myers, supra*, 29 Cal.3d at p. 542.) This is not a case where the Legislature, in defiance of the Constitution or the judicial branch, had prohibited use of appropriations for particular purposes to which they would otherwise logically extend.

We recognize that, at the May 2 hearing, counsel for the OUSD indicated his client had "no objection" to diversion of its loan appropriation for the court's purposes. The OUSD's position may not have been entirely altruistic; on April 29, counsel had committed the OUSD to accepting an influx of displaced District students but expressed concern about the disruption such a solution would cause. Even if the OUSD believed that diversion of its appropriation was in its own best interests, however, the OUSD could not unilaterally alter the terms and conditions the Legislature had imposed on the appropriation. Moreover, the OUSD's waiver was conditional; counsel made clear that the OUSD reserved its right to demand refunding of the OUSD appropriation "if and when [the OUSD] chooses to exercise its rights to request a loan from the state of [\$]10 million at any time up until June 30, 1993."

satisfying a judgment or order that is *unrelated* to the appropriation. (Compare, e.g., *Mistretta v. United States*, *supra*, 488 U.S. 361, 380-384 [102 L.Ed.2d 714, 735-738] [Congress's creation of United States Sentencing Commission, a judicial-branch agency charged with establishing mandatory federal sentencing guidelines, did not usurp authority of individual judicial officers or grant forbidden legislative power to judicial branch]; *Nixon v. Administrator of General Services*, *supra*, 433 U.S. 425, 441-446 [53 L.Ed.2d 867, 889-893] [legislation vesting Administrator of General Services with limited control over presidential papers of resigned chief executive did not undermine authority of executive branch]; *Wilson v. Eu* (1991) 54 Cal.3d 471, 473 [286 Cal.Rptr. 280, 816 P.2d 1306] [Legislature's failure to reapportion justifies judicial adoption of reapportionment plan]; *Davis v. Municipal Court* (1988) 46 Cal.3d 64, 72-87 [249 Cal.Rptr. 300, 757 P.2d 11] [District attorney's statutory power to disapprove local misdemeanor-diversion program was not improper delegation of legislative authority; prosecutor's absolute discretion to prevent diversion by charging "wobbler" as felony did not constitute forbidden judicial power]; *Younger v. Superior Court* (1978) 21 Cal.3d 102, 115-118 [145 Cal.Rptr. 674, 577 P.2d 1014] [statute requiring Department of Justice to destroy individual's marijuana arrest and conviction records upon application after sentence is complete did not create impermissible conflict with executive clemency powers].)

The balance proposed by Justice Kennard in this case would elevate the judiciary above its coequal brethren, upset the delicate system of checks and balances, and stand the separation of powers clause on its head. Applying *Mandel's* well-settled principles, we remain satisfied that the trial court acted in excess of its authority when it funded the District's loan with appropriations specifically earmarked by the Legislature for other purposes.²⁸

CONCLUSION AND DISPOSITION

The District's financial inability to complete the final six weeks of its 1990-1991 school term threatened to deprive District students of their

²⁸Although the instant record is silent on the point, Justice Kennard worries that there *may* have been no unearmarked educational appropriations available to enforce this trial court's order. She suggests further that such funds *may* also not be available under current laws and budgetary constraints to permit judicial enforcement of students' constitutional rights in similar future cases. These concerns have no practical effect in the instant lawsuit, because the State does not seek rescission of the District's loan, and the educational rights of the District's students are secure. In any event, we cannot overlook the fact that the urgency of the District's crisis denied the Legislature any opportunity to respond to the trial court's injunctive order. Once alerted by the trial court's constitutional ruling, however, the Legislature and the Governor have taken significant steps to prevent or remedy recurrences of the District's crisis. We may not assume they will fail or refuse to respond as necessary to our final determination of the State's constitutional responsibilities.

California constitutional right to basic educational equality with other public school students in this State. As the court further concluded, discrimination of this nature against education, a fundamental interest, could only be justified as necessary to serve a compelling interest. The State itself, as the entity with plenary constitutional responsibility for operation of the common school system, had a duty to protect District students against loss of their right to basic educational equality. Local control of public schools was not a compelling interest which would justify the State's failure to intervene.

The trial court thus properly ordered the State and its officials to protect the students' rights. The court also acted within its remedial powers by authorizing the SPI to assume control of the District's affairs, relieve the Board of its duties, and supervise the District's financial recovery. However, the court invaded the exclusive legislative power of appropriation by approving the diversion of appropriations for GAIN and the OUSD to an emergency loan for the District.

Accordingly, we reverse the trial court's remedial order of May 2, 1991, insofar as it approves funding of an emergency loan to the District from appropriations for the Oakland Unified School District and the Greater Avenues for Independence program. In all other respects, the court's orders of April 29 and May 2, 1991, are affirmed. The Court of Appeal is directed to remand the cause to the trial court for such further proceedings as may be appropriate under the views expressed in this opinion.

Panelli, J., Arabian, J., and George, J., concurred.

LUCAS, C. J., Concurring and Dissenting.—I concur with the majority's conclusions regarding the constitutional obligations of the State of California (State) to assure educational equality. I would not, however, address the propriety of the sources approved by the trial court to provide an emergency loan.

In my view, we need not consider questions regarding the use of the Oakland Unified School District (OUSD) emergency appropriation or the unused appropriation for the Greater Avenues for Independence (GAIN) program because the issues are moot and their resolution will have no impact on the status quo in this case. As the majority notes, at the May 2, 1991, proceeding, the State continued to object to the trial court's order arising out of the April 29, 1991, hearing. That order required the State, Superintendent of Public Instruction (SPI) and Controller, at their discretion and "by whatever means they deem appropriate," to ensure Richmond students were not deprived of six weeks of education provided to other students within California. In addition to renewing its basic position on the merits of the

constitutional arguments, the State also objected to use of the specific funds proposed by the SPI and Controller. It offered no alternative sources of funding and appealed from both orders.

Before us, however, the State does not demand rescission of the court-approved loan or any change in the status of that funding. The funding was granted as a loan and a loan repayment agreement has been worked out by the parties. The State, acknowledging those facts, expressly asserts "We do not argue that the Controller must be compelled immediately to recover the money." In other words, it seeks no relief from the trial court's order granting payment from the challenged sources and compelling repayment of the funds under a prescribed repayment schedule.

Accordingly, as the SPI observes, the matter is moot. The State's response, found in its reply brief, is only that "the trial court in the next case will still be guided by, unless this court disapproves the test, the 'generally related' test set forth in *Carmel Valley [Fire Protection Dist. v. State of California]* (1987) 190 Cal.App.3d 521, 540-541 (234 Cal.Rptr. 795)] and *Long Beach [Unified Sch. Dist. v. State of California]* (1990) 225 Cal.App.3d 155, 181-182 (275 Cal.Rptr. 449)]." It does not assert that this issue is capable of evading review because of timing or that a present controversy over the use of these particular funds still exists. Instead, it seeks guidance only for the future. I would decline to render what would essentially be an advisory opinion here. (See *People ex rel. Lynch v. Superior Court* (1970) 1 Cal.3d 910, 912 [83 Cal.Rptr. 670, 464 P.2d 126] ["The rendering of advisory opinions falls within neither the functions nor the jurisdiction of this court"].)

MOSK, J., Concurring and Dissenting.—I am in general agreement with the views expressed in Justice Kennard's concurring and dissenting opinion.

However, I cannot embrace the ill-advised concession that the trial court's order "did pose a potential for disruption of a function of the legislative branch" although the degree of potential disruption "is not great" and the purported infringement on the legislative function is "not substantial." (Kennard, J., *post*, conc. and dis. opn. at pp. 710, 711.)

The theory of potential interference with legislative functions to any extent is inconsistent with the ultimate conclusion that the funds used for the emergency loan were "reasonably related" to the educational purposes of the legislation, and, indeed, "the trial court's order furthered, rather than defeated, that valid legislative purpose." As persuasively observed in footnote 2, the "funds were appropriated for purposes reasonably and closely related

to the purpose for which the trial court ordered them to be used.” (Kennard, J., *post*, conc. and dis. opn. at p. 711.)

Under the foregoing circumstances—with which I agree—there cannot be some conceptual interference, even though “not great,” with the functions of the legislative branch.

With that caveat, I join the concurring and dissenting opinion.

KENNARD, J., Concurring and Dissenting.—I agree with the majority that the threatened closure of the schools of the Richmond Unified School District (District) was such an extreme departure from prevailing educational standards as to infringe on the students’ state constitutional rights to basic educational equality, requiring the State of California (State) to intervene to protect those rights.

I do not agree, however, that the trial court violated the separation of powers doctrine by ordering that emergency loan funds be made available from an unused special appropriation to the Department of Education and an unused emergency appropriation to the Oakland Unified School District (OUSD). The majority has, in effect, declared that although the students’ right to education is fundamental, no means may exist by which our judicial system can enforce that right. In my view, the trial court’s order was an appropriate and pragmatic resolution of a difficult case under extreme pressure. Because the Legislature had already appropriated the funds in question for educational purposes reasonably related to the District’s needs, I discern no constitutional violation, and would affirm the trial court’s orders in their entirety.

I

On April 17, 1991, the District, facing a \$23 million budgetary shortfall, announced its schools would close on May 1, 1991, rather than as scheduled on June 14, 1991. Parents of students in the District’s schools then filed a class action against the State and the District’s board of education, alleging the closure would deprive children of their fundamental right to education and would violate equal protection guarantees. The trial court granted plaintiffs’ motion for a preliminary injunction, finding that “education is a fundamental right in California [and] unless injunctive relief is granted children in the District will be denied six weeks of instruction that will be provided to every other child in the State.” The trial court ordered the State, the Superintendent of Public Instruction (Superintendent), and the State Controller “to ensure that the students in the District are not deprived of six

weeks of public education while others within the state are not so deprived." The trial court added that "how these defendants accomplish this is up to the discretion of the defendants."

Thereafter, the Superintendent and the Controller proposed a plan to keep the schools open. They proposed that \$19 million in unspent funds from two educational programs—from the Greater Avenues for Independence (GAIN) program and from an appropriation to the OUSD—be loaned to the District. After an evidentiary hearing, the trial court ordered the State Controller to disburse an emergency loan to the District from these funds. This court denied the State's motion to stay the order pending appeal, but transferred the case here.

II

The majority holds that the trial court's remedial order violated the doctrine of separation of powers. Essentially, the majority reasons that by ordering that the unused funds be loaned to the District, the trial court impermissibly engaged in the appropriation of funds, an area of exclusive legislative concern.

The majority's conclusion originates from a fundamental misunderstanding of the separation of powers doctrine. Implicit in the majority's discussion is the assumption that under our tripartite scheme of government, particular powers can be definitively categorized as belonging to one of the three branches, and that these powers can never be exercised by a branch other than the designated branch. Thus, under the majority's approach, appropriation is exclusively a legislative function, and unless the Legislature has either appropriated funds for a specific purpose, or made a "catchall" appropriation under which a specific use of funds may fall, funds are simply not available for any purpose, no matter what rights are at stake.

This formalistic interpretation of the separation of powers concept is, however, contrary to modern understanding. The opinions of the United States Supreme Court, although not binding on this court in interpreting the separation of powers principles of the California Constitution, supply a persuasive body of case authority. Just as our state Constitution provides for the separation of the powers of government into three branches (Cal. Const., art. III, § 3), so does the federal Constitution segregate the branches of government (U.S. Const., art. I, § 1, art. II, § 1, & art. III, § 1).

The United States Supreme Court has "squarely rejected the argument that the Constitution contemplates a complete division of authority between the

three branches.” (*Nixon v. Administrator of General Services* (1977) 433 U.S. 425, 443 [53 L.Ed.2d 867, 891, 97 S.Ct. 2777].) Rather than reading the federal Constitution as “‘requiring three airtight departments of government,’” the high court has adopted a “pragmatic, flexible approach.” (*Id.* at pp. 443, 442 [53 L.Ed.2d at pp. 891, 890-891].) This approach, the court has explained, is supported by historical understanding. James Madison, one of the principal architects of the United States Constitution, wrote that the concept of separation of powers “‘d[oes] not mean that these departments ought to have no *partial agency* in, or no *control* over the acts of each other,’” but instead that “‘where the *whole* power of one department is exercised by the same hands which possess the *whole* power of another department, the fundamental principles of a free constitution are subverted.’” (J. Madison, *The Federalist* No. 47, pp. 325-326 (J. Cooke ed. 1961) (original italics), quoted in *Mistretta v. United States* (1989) 488 U.S. 361, 380-381 [102 L.Ed.2d 714, 735-736, 109 S.Ct. 647].) Thus, the basic purpose of the separation of powers is to guard against the concentration of power in the hands of one branch, but it is important to distinguish “partial agency” from those aggrandizements of power that pose genuine threats to the constitutional scheme.

The pragmatic and flexible approach favored by the nation’s highest court is also appropriate because, in a society growing ever more complex, the practical requirements of efficient government action by each of the three branches must be considered. “‘While the Constitution diffuses power the better to secure liberty, it also contemplates that practice will integrate the dispersed powers into a workable government.’” (*Mistretta v. United States, supra*, 488 U.S. at p. 381 [102 L.Ed.2d at p. 736], quoting *Youngstown Sheet & Tube Co. v. Sawyer* (1952) 343 U.S. 579, 635 [96 L.Ed. 1153, 1199, 72 S.Ct. 863, 26 A.L.R.2d 1378] (conc. opn. of Jackson, J.).) In contemporary society, concerns about the workability of government are especially weighty.

Thus, the high court has not evolved a rigid classification of governmental powers as belonging exclusively to one branch or another. Instead, the court has stated that “the proper inquiry focuses on the extent to which [the act complained of] prevents [one of the three branches] from accomplishing its constitutionally assigned functions.” (*Nixon v. Administrator of General Services, supra*, 433 U.S. at p. 443 [53 L.Ed.2d at p. 891]; *Mistretta v. United States, supra*, 488 U.S. at p. 383 [102 L.Ed.2d at pp. 737-738].) If the “potential for disruption is present,” the court must then “determine whether that impact is justified by an overriding need to promote objectives within the constitutional authority” of the branch whose action is challenged. (*Nixon v. Administrator of General Services, supra*, 433 U.S. at p. 443 [53

L.Ed.2d at p. 891]; *Mistretta v. United States*, *supra*, 488 U.S. at p. 383, fn. 13 [102 L.Ed.2d at p. 737].)

This court has expressed a similar understanding. We have recognized that the purpose of the doctrine of separation of powers "is to prevent one branch of government from exercising the *complete* power constitutionally vested in another [citation]; it is not intended to prohibit one branch from taking action properly within its sphere that has the *incidental* effect of duplicating a function or procedure delegated to another branch. [Citation.]" (*Younger v. Superior Court* (1978) 21 Cal.3d 102, 117 [145 Cal.Rptr. 674, 577 P.2d 1014] [original italics].)

More recently, this court reiterated that the separation of powers doctrine "has not been interpreted as requiring the rigid classification of all the incidental activities of government, with the result that once a technique or method of procedure is associated with a particular branch of the government, it can never be used thereafter by another." . . . 'From the beginning, each branch has exercised all three kinds of powers.'" (*Davis v. Municipal Court* (1988) 46 Cal.3d 64, 76 [249 Cal.Rptr. 300, 757 P.2d 11] [citations and italics omitted].)

III

A line of cases from California courts has established the principle that a court does not violate the separation of powers doctrine when it orders appropriate expenditures from already existing funds, if such funds are reasonably available for the expenditures in question. (*Mandel v. Myers* (1981) 29 Cal.3d 531, 540 [174 Cal.Rptr. 841, 629 P.2d 935]; *Long Beach Unified Sch. Dist. v. State of California* (1990) 225 Cal.App.3d 155, 180-181 [275 Cal.Rptr. 449]; *Carmel Valley Fire Protection Dist. v. State of California* (1987) 190 Cal.App.3d 521, 538-539 [234 Cal.Rptr. 795]; *Committee to Defend Reproductive Rights v. Cory* (1982) 132 Cal.App.3d 852, 856 [183 Cal.Rptr. 475].) The precise question in this case is whether funds can be considered "reasonably available" when they are not made part of a "catch-all" appropriation under which the specific use of the funds may fall. The majority concludes that unless the funds are part of a "catchall" appropriation, they are not reasonably available.¹

I would announce no such categorical rule. In my view, the proper inquiry is that set forth by the United States Supreme Court in *Nixon v. Administrator of General Services*, *supra*, 433 U.S. 425 and *Mistretta v. United States*,

¹The majority purports to reaffirm the rule of these cases, but in fact undermines it. The "catchall" appropriation exception to the majority's rule could easily be eliminated if the Legislature took the time to label more specifically the purpose of each appropriation in a particular area. If the Legislature did so, there would be no possible remedy for the failure to fund any program, no matter how essential.

supra, 488 U.S. 361: To what extent does the challenged act of one branch interfere with another branch's performance of its constitutionally assigned functions? If there is some potential disruption, the court must then determine whether the challenged act is "justified by an overriding need to promote objectives within the constitutional authority" of the branch whose action is challenged. (*Nixon v. Administrator of General Services*, *supra*, at p. 443 [53 L.Ed.2d at p. 891]; *Mistretta v. United States*, *supra*, at p. 383, fn. 13 [102 L.Ed.2d at p. 737].)

Applying the principles followed by the high court in *Nixon v. Administrator of General Services*, *supra*, 433 U.S. 425 and *Mistretta v. United States*, *supra*, 488 U.S. 361, and by this court in cases such as *Younger v. Superior Court*, *supra*, 21 Cal.3d 102 and *Davis v. Municipal Court*, *supra*, 46 Cal.3d 64, I conclude that the trial court's order authorizing the Controller to disburse funds from the GAIN and OUSD accounts as an emergency loan to the District to assure the District's schools remained open did pose a potential for disruption of a function of the legislative branch.

The degree of potential disruption, however, is not great. As the trial court concluded, the funds that were the source of the emergency loan were appropriated for purposes reasonably related to the educational purposes served by the District.

The OUSD loan funds were appropriated by the Legislature for the precise purpose for which they were employed here—to alleviate a fiscal crisis in a local school district and prevent disruption of an ongoing educational program. (See Stats. 1989, ch. 1438, § 1.) Moreover, the trial court had before it an application for leave to intervene from the OUSD itself, in which the OUSD stated that the threatened closure of the nearby District "would place substantial and difficult burdens on OUSD as displaced Richmond students seek admission to Oakland Schools," that would be "extremely costly and disruptive" to the operation of the Oakland schools. The emergency loan fund for the OUSD was intended by the Legislature to avoid disruption of the educational program at the Oakland schools, and the trial court's order furthered, rather than defeated, that valid legislative purpose.

The GAIN program was enacted to address the problem of teenage parenting, basic educational deficiencies, and long-term welfare dependency. Specifically, GAIN was intended to "[p]rovide the education and training services needed by teenage parents to help them earn a high school diploma or its equivalent," and to "[l]ink teenagers to other needed health and social services." (Welf. & Inst. Code, § 11330, subd. (c).) The purpose of the particular appropriation to the Department of Education at issue in this case

was solely to meet educational needs, and not to provide health and social services. (Stats. 1989, ch. 93, § 22.00.) This goal is served by keeping the District's schools open. The trial court had before it uncontradicted evidence that a large number of the students in the District came from low-income families, many of whom were welfare-dependent. The court could rationally conclude that the otherwise unused GAIN funds were reasonably available to meet the basic educational needs of the District's students, a significant portion of whom were in the welfare-dependent population the GAIN program was targeted to assist. Under the circumstances, the funds were ordered to be used for a purpose reasonably congruent with the statutory purpose.²

Thus, because the trial court authorized the OUSD and GAIN funds to be used for a purpose that was reasonably related to the purposes for which the funds were appropriated, any infringement on the legislative function is not substantial. By contrast, we are not faced with a situation in which a trial court has ordered that funds appropriated for one purpose be used for some entirely unrelated purpose; nor are we confronted with a trial court order that funds actually in use for one program be diverted to another. It is vital that

²The majority asserts that this opinion "urges abandonment" of the rule of *Mandel v. Myers*, *supra*, 29 Cal.3d 531 (*Mandel*). This is incorrect.

In *Mandel*, *supra*, 29 Cal.3d 531, this court held that the separation of powers doctrine does not prevent the courts from ordering appropriate expenditures from already existing funds when such funds are "reasonably available for the expenditures in question" (*Id.* at p. 542.) There, the court found that certain "catchall" funds were reasonably available for the expenditures in question, the payment of attorney fees in a case enforcing constitutional rights. But nothing in *Mandel* indicated that the only funds that might ever be reasonably available in any case were "catchall" funds. And, as later cases made clear, *Mandel*'s test of "reasonable availability" encompasses unused funds that have been appropriated for purposes closely related to the purposes for which they are sought to be expended. (*Long Beach Unified Sch. Dist. v. State of California*, *supra*, 225 Cal.App.3d at p. 181; *Carmel Valley Fire Protection Dist. v. State of California*, *supra*, 190 Cal.App.3d at p. 541.)

In this case, as my analysis has demonstrated, the OUSD and GAIN funds were appropriated for purposes reasonably and closely related to the purpose for which the trial court ordered them to be used. Thus, *Mandel* and its progeny were not violated. The analysis in this opinion is entirely consistent with both the *Mandel* line of cases, and the cases from the United States Supreme Court and this court that more fully and generally articulate the doctrine of separation of powers. *Mandel* and its progeny represent an area of specific application of general separation of powers principles; properly understood, there is no disjunction between the *Mandel* line of cases and cases such as *Nixon v. Administrator of General Services*, *supra*, 433 U.S. 425, and *Mistretta v. United States*, *supra*, 488 U.S. 361, that set forth a principled and coherent view of the separation of powers doctrine.

Thus, the majority's accusation that the approach to separation of powers questions set forth in this opinion, which is the same approach employed by our nation's highest court, would "stand the separation of powers clause on its head," is meritless.

trial courts take care to minimize any impingement on legislative prerogatives. But the trial court in this case did use the least intrusive means available to it to ensure the students' rights.³

As discussed earlier, if there is some cognizable interference with the functions of another branch, the reviewing court must then determine whether the act is "justified by an overriding need to promote objectives within the constitutional authority" of the branch whose action is challenged. (*Nixon v. Administrator of General Services*, *supra*, 433 U.S. at p. 443 [53 L.Ed.2d at p. 891]; *Mistretta v. United States*, *supra*, 488 U.S. at p. 383, fn. 13 [102 L.Ed.2d at p. 737].) In my view, here the trial court's order was so justified.

The objective that the trial court sought to achieve by its orders in this case—to assure the protection of the fundamental rights of the District's students—was unquestionably within its constitutional authority. As this court has made clear on previous occasions, and as the majority reaffirms today, education is a fundamental right under the California Constitution. (*Serrano v. Priest* (1971) 5 Cal.3d 584, 608-609 [96 Cal.Rptr. 601, 487 P.2d 1241, 41 A.L.R.3d 1187]; *Serrano v. Priest* (1976) 18 Cal.3d 728, 766 [135 Cal.Rptr. 345, 557 P.2d 929].)

Moreover, the court, in acting to protect the students' rights to education, had no practical alternative to the remedial order it issued. It was the court's

³At the hearing on the preliminary injunction, an official of the Department of Education testified without contradiction that there were two sources from which department funds were available that could be employed to assist the District—the OUSD fund and the GAIN fund. No other funds were identified as available.

The funds appropriated to the Department of Education for the general support of elementary and secondary schools are not placed in a "catchall" fund subject to the discretion of Department of Education officials. Instead, under the Education Code, virtually all sums transferred from the state's general fund to the Department of Education for the general support of elementary and secondary education are transferred subject to a strict formula under which each local district is entitled to an amount computed on the basis of average daily student attendance. (Ed. Code, § 14000 et seq., § 46000 et seq.) No state official appears to have any discretion to vary the legislatively mandated allocation of funds.

My research reveals that the only funds that might have been considered reasonably available to aid the District under the majority's criteria at the time of the trial court's decision in this case were certain emergency funds under control of the Director of Finance. (Stats. 1990, ch. 467, § 2.00.) But there is nothing in the record to show that these funds had not been used for some other emergency purpose. Even assuming that none of these funds had been committed to some other use, however, the funds would have been grossly inadequate to meet the District's needs in any event. The total amount of funds available to the Director of Finance to meet all the emergency needs of the State under the then-current budget was \$7 million. (*Ibid.*) As we have seen, the District faced a \$23 million budget shortfall.

duty to act. As the United States Supreme Court has held, "a denial of constitutionally protected rights demands judicial protection; our oath and our office require no less of us." (*Reynolds v. Sims* (1964) 377 U.S. 533, 566 [12 L.Ed.2d 506, 530, 84 S.Ct. 1362].)

When the other branches of government have failed to act, the courts have not flinched from their duty to fashion appropriate remedies when necessary to guarantee constitutional rights to the people of this state. Thus, in *Wilson v. Eu* (1991) 54 Cal.3d 471, 473 [286 Cal.Rptr. 280, 816 P.2d 1306], we held that, although reapportionment is primarily a matter for the legislative branch, when that branch has failed to act and electoral rights will be irretrievably lost if no action is taken, "we must proceed forthwith to draft such [reapportionment] plans." And in *Crawford v. Board of Education* (1976) 17 Cal.3d 280, 307 [130 Cal.Rptr. 724, 551 P.2d 28], we held that when a recalcitrant school board failed to act to cure the harmful consequences of school segregation, the trial court could exercise "broad equitable powers" to frame a remedy that would assure the students' basic rights. (Accord, e.g., *Swann v. Board of Education* (1971) 402 U.S. 1, 15 [28 L.Ed.2d 554, 566, 91 S.Ct. 1267]; see *Assembly v. Deukmejian* (1982) 30 Cal.3d 638, 659 [180 Cal.Rptr. 297, 639 P.2d 939]; *Midway Orchards v. County of Butte* (1990) 220 Cal.App.3d 765, 779 [269 Cal.Rptr. 796].)

No sound reason exists to hold that although some fundamental rights demand judicial protection when they are endangered because the other branches of government have failed to act, other rights, equally fundamental, do not. Yet that is the consequence of the majority's holding in this case that the trial court erred in ordering that an emergency loan be made to the District.

The practical consequences of the majority's holding should not be overlooked. In an era of fiscal constraint and uncertainty for local governments, including school districts, we cannot assume that the District's problems will prove to be unique. If another school district experiences financial difficulties and the other branches of government fail to act, parents may indeed bring a lawsuit to protect their children's right to education. Under today's decision, the trial court will declare that the children have a constitutional right to basic educational equality, and that the State bears responsibility for assuring this right is not denied. The court may then announce that no means

exist by which it can enforce that right. And the doors to the schoolhouse will close.

I would affirm the orders of the trial court in their entirety.

EXECUTIVE SUMMARY

As California enters the 21st Century, its public schools face many challenges. One significant challenge is the serious disrepair of an aging school facility infrastructure. Another challenge is the anticipated growth of nearly 2 million K-12 students during the next decade that will require many districts to build new schools to meet burgeoning student demand. Recognizing the substantial need for infrastructure, in November 1998, California voters passed Proposition 1A, a bond measure that provides \$6.7 billion for public K-12 school construction and repair.

This measure establishes two new programs for the disbursement of bond funds and simplifies the application process by which schools apply for school construction resources. This change in programs, and in the methods by which funds are allocated, is important to the people of the State, as school districts, many of which have facilities in serious disrepair or require new construction, vie for their portion of the \$6.7 billion pie.

Historically, the process by which schools applied for and received construction funds was cumbersome and complex. Furthermore, the research suggests that school districts that were sophisticated and knowledgeable about the complicated school facilities construction process were the most successful in securing funding – often at the expense of less sophisticated and uninformed school districts. Proposition 1A corrects much of this dynamic by simplifying the application and administrative processes, thereby creating a more level playing field for all school districts.

In order to understand the significance and relevance of this new process and its concomitant programs, however, it is useful to review the history of school construction financing in California and to understand the various pitfalls that existed under previous programs so as to avoid similar pitfalls in the future. This paper discusses that history and highlights the problems with preexisting programs.

It begins with an examination of the State Allocation Board and its staff (the Office of Public School Construction). Specifically, it reviews the role of the Board which is responsible for establishing policies for the distribution of school facility financing funds. It discusses how the Board, which was established in 1947, has evolved during the past five decades from one that set policy for various *loan* programs to one that today sets policy for *grant* programs.

The paper also discusses how various externalities—legislative or voter imposed initiatives, such as Proposition 13—have affected the Board's policies and procedures. The paper notes that the Board changed its policies often, and its policy shifts created an untenable dynamic for school districts as they attempted to secure funding. In particular, the paper highlights how districts were forced to weave their way through a complex, bureaucratic maze of applications, forms, and plans; and how this dynamic forced school districts to employ sophisticated personnel, or to contract with savvy consultants, in order to secure state financing for their construction projects.

This paper also presents a history of bond initiatives during the past five decades. It is clear that throughout this history there was never enough State money available to school districts for facility construction or repair. In fact, in spite of the \$6.7 billion approved by Proposition 1A, experts estimate that an additional \$10 billion will be required during the next decade. This paper discusses how the constant shortage of funds caused districts to use “whatever” means available to them to secure funding.

Voters have consistently been generous in approving the vast majority of statewide bond initiatives. Only three bond proposals out of 24 have failed in the past 50 years, and those that failed did so during times of recession. However, it is not clear how much additional debt voters will be willing to incur. This has especially been true since the passage of Proposition 13 in 1978, when the State began taking on a larger role in supporting school construction than it had before. To that end, this paper discusses how Proposition 1A creates a mechanism for school districts to tap state resources, and how school districts may need to tap other sources of facility funding.

Proposition 1A forges a partnership between the State and school districts for financing the construction and repair of their schools. Under its new programs, the State will provide 50 percent of the cost associated with building new schools, and provide 80 percent of the cost associated with modernizing existing facilities. It requires school districts to match state resources. However, school districts that are unable to offer this match can receive hardship funds based on prescriptive criteria. This paper provides details regarding these new programs and compares them to programs previously administered by the State Allocation Board. It also discusses how the Board is required to respond to district requests.

Proposition 1A is not the only impetus behind simplifying the school facility financing process. Concurrently, the Office of Public School Construction has rewritten the application process for funds to make it more user-friendly to school districts and has even offered applications and program information via the Internet. This paper discusses these changes.

The paper concludes with options that the Governor and the Legislature may wish to consider, including: offering protection to small and rural school districts when bond funds are exhausted; requiring annual financial reporting by the State Allocation Board; providing an on-line technical support for program applicants; and redeveloping the State funding source for school facility construction and rehabilitation.

REQUEST FOR RESEARCH

Programs and administrative procedures in Proposition 1A may produce significant changes to the previous programs and the manner by which the State Allocation Board distributes resources for school facility construction. In light of these changes, Senator Quentin Kopp requested that the California Research Bureau provide research on the following topics:

- A history of the State Allocation Board. How was the board's funding program intended to work and how has it evolved?
- An explanation of the State Allocation Board process. How does the State Allocation Board work? What are the procedures and criteria for receiving allocations? How are priorities set?

INTRODUCTION—THE PASSAGE OF PROPOSITION 1A

On November 3, 1998, California voters passed Proposition 1A - a \$9.2 billion school bond initiative, and the largest of its kind passed in our nation's history. Over the next four years, revenues from Proposition 1A's general obligation bonds will provide \$6.7 billion to public K-12 schools and \$2.5 billion to public colleges and universities for the purposes of constructing new facilities and repairing existing ones.

The State Allocation Board will have the responsibility for determining a fair means of distributing the \$6.7 billion available to K-12 schools. Many experts feel that developing such a system will be a daunting task, in spite of the fact that Proposition 1A/Senate Bill 50 is very prescriptive regarding the allocation of its bond funds.

This paper begins with a history and a discussion of the role of the State Allocation Board. Next, it examines the 24 state bond initiatives since 1947 and discusses how the Board has evolved its policies for distributing resources generated by these bond efforts. It then presents an overview of Proposition 1A and how this initiative creates a new allocation program that differs from previous ones. The paper also discusses the various problems that existed within the State Allocation Board's previous resource allocation systems and how Proposition 1A addresses these problems. It concludes with a section that offers options that the Legislature may wish to consider regarding the policies that the State Allocation Board should use for the equitable distribution of bond funds.

HISTORY OF THE STATE ALLOCATION BOARD AND ITS ROLE IN SCHOOL FACILITY FINANCING

There is a long and complex history regarding public school construction in California. This paper begins a review of the history in 1947¹ when the state legislature created the State Allocation Board.² Chapter 243, Statutes of 1947, established the State Allocation Board³ as a successor to the Post War Public Works Review Board. That statute specifically authorized the board to allocate funds for building and repairing schools. In addition, it designated the State Allocation Board to make allocations for public works projects when no other state officer or agency had authority to appropriate state or federal funds.⁴ Although it had many other fund allocation requirements during its five-decade history, the State Allocation Board today allocates funds only for school construction and renovation.

Composition of the Board

The State Allocation Board is comprised of seven members: two Senate members appointed by the Senate Rules Committee; two Assembly members appointed by the Speaker of the Assembly; the Director of the Department of General Services or his/her designee; the Director of the Department of Finance or his/her designee; and the Superintendent of Public Instruction or his/her designee. This appointment structure has existed since the Board's inception in 1947.⁵

Although its basic appointment structure is set in statute, its actual membership changes over time. One member, Senator Leroy Greene, served on the Board for over 20 years. Some Board members have served for only one meeting, while others have served an entire legislative session.

The four legislatively appointed State Allocation Board members provide a strong policy influence to the State Allocation Board. Through them, other members of the Legislature have input into the Board's policy and decision-making processes.

Policy Requirements

Members of the State Allocation Board are charged to formulate fair systems for determining priorities among project proposals. Prior to the passage of Proposition 1A/SB 50 in 1998, the Board was responsible for developing a fair and equitable appeals process that addressed the "special needs" of school districts. Such "special needs" included disaster relief, inability to secure matching funds, or inability to locate affordable property.

Board members also had extraordinary power to set school facility financing policy. Although the Board falls under the auspices of the State Administrative Procedures Act, it has often ignored the Act's provisions. It was common that board policies were changed from meeting to meeting, and that these new policies were not readily made public.⁶ Therefore, school districts that were uninformed of existing policy operated at a distinct disadvantage. They may not have known the appropriate procedures for receiving

financing approval. Conversely, school districts that utilized hired consultants or had staff that regularly monitored the Board's actions knew exactly what mechanisms and procedures would be necessary for them to secure funding.

State Allocation Board Staff

The Office of Public School Construction (formerly the Office of Local Assistance), within the Department of General Services, was and continues to be responsible for providing staff work that is necessary to carry out the policies and implement the various programs of the State Allocation Board. The State Allocation Board is responsible for policies regarding the allocation of funds for building new schools and for repairing, upgrading, and rehabilitating old ones.

The Office of Public School Construction staff is also responsible for disseminating to school districts information regarding board policy and programs. Under its previous programs, the staff was responsible for making recommendations to the State Allocation Board regarding various appeals made by school districts that may have been denied funding, or that may have required special funding consideration. To that end, the Office of Public School Construction staff influenced where school districts fell on the long queue of project proposals considered and passed by the State Allocation Board. Staff also could have influenced Board decisions by advocating for specific school district projects.

Outside Influence

The State Allocation Board and the Office of Public School Construction staff have also been influenced by a variety of external interest groups. These include, but are not limited to, private school facility financing consultants, school board members, school administrators, teachers, parents, developers, California Building Industry Association, financial institutions, and other members of the Legislature. In addition, various state agencies with influence included the Division of State Architect, Department of Finance, and the Department of Education. These interests groups played and are likely to play a significant role in determining funding for projects that may have been denied or required special consideration. Consultants in particular, whether employed by or on contract with school districts, played an active role in the process. Many of these consultants, whose offices are in the same building as that of the Office of Public School Construction, influenced decisions of both the Office of Public School Construction staff and the State Allocation Board. Consultants were current on Board policies and procedures, and were highly sophisticated about the complicated processes that school districts must follow in order to obtain funding. They have been instrumental in shepherding proposals through the complex maze of funding phases - application to construction. School districts that did not contract with such advocates were often at a competitive disadvantage.

Evolution of State Allocation Board Programs—From Loans to Grants

The State Allocation Board has evolved markedly during the past five decades. Initially, its school programs provided resources to school districts via *loan programs* in which

districts were required to repay their assistance with property tax revenues. In addition, school districts used local school bonds to finance their various construction projects. In both cases, a two-thirds popular vote was required.

Proposition 13

With the passage of Proposition 13 in 1978, the State Allocation Board's loan orientation was significantly altered. Under Proposition 13, the amount of tax that property owners paid was limited to no more than one percent of the assessed value of their property. Local property tax revenues diminished, and the burden to fund many local government programs was shifted to the State, including public school construction. Further, local governments lost much of their property taxing authority, and the Legislature and Governor were forced to rethink how school districts could repay their existing loans to the State Allocation Board.

Recognizing that many school districts faced bankruptcy by being unable to service their loans, the Legislature in 1979 directed the State Allocation Board to allow school districts four options: (1) withhold payments on their loans; (2) temporarily delay their payments; (3) pay only a portion of their loan obligations; (4) or not pay back their loans at all. Further, with the implementation of these options, the Legislature required that the State Allocation Board shift its policy focus from a *loan-based* program to a *grant-based* program. This shift to grant-based programs remains today.

HISTORY OF SCHOOL BOND INITIATIVES—A CYCLE OF UNDER-FUNDING

The electorate of the state has been ultimately responsible for determining the availability of resources for school construction. The electorate must have confidence in the state's economy, and perceive a need for new and upgraded schools. Without such assurances, the electorate can and has rejected various bond efforts. Since 1949, voters have been asked to approve 24 bond measures related to school construction and renovation, and have passed 21 of these proposals. However, an interesting history follows regarding the content of these initiatives.

State as a Bank—The Loan Program 1949-1978

Legislation enacted in 1949⁷ and 1952⁸ established a loan-grant program "to aid school districts of the State in providing necessary and adequate school sites and buildings for the pupils of the public school system."⁹ During this time period, the first baby boomers entered school, and for the next two decades, California public school enrollment increased by roughly 300 percent.¹⁰ The Legislature recognized that many school districts faced substantial enrollment growth, while lacking the bond debt capacity that was necessary to finance large building programs. In fact, many school districts had reached their financial capacity to service the bonds that they previously incurred.

As a result, the Legislature developed a program to provide loans to school districts that were approaching or were likely to exceed their legal level of bonded indebtedness.¹¹ This new program was financed through State general obligation bonds. This program also required building construction standards and placed fiscal controls on the districts, including maximum cost standards and square feet per pupil limitations.¹² School districts, however, retained control over the design and construction of their facilities. Districts that wanted to participate in the state loan program were required to receive approval from two-thirds of their district's electorate in order to incur the debt. A surcharge on the local property tax provided revenues to service the loan debt.

The State formula provided that the total amount due on some loans would be less than the total amount of the actual loan. Some experts believe that the state's willingness to forgive part of school district loans through this formula was a precursor to the state grant program discussed below.

The First Loan Program Bond Initiatives

In 1949, the state issued its first bond proposal for education facilities financing¹³ in the amount of \$250 million.¹⁴ This first initiative also began a cycle of inadequate funding. In that year, the Legislature thought that \$400 million was necessary (over what school districts could afford above their debt limits) to meet the need of school districts that were facing enrollment growth from the new generation of baby boomers. However, after substantial debate, the bond proposal was reduced to \$250 million, because the sponsors thought, "the people would not vote for such a large sum at one time."¹⁵ In arguments

against the bond, opponents argued that \$250 million was insufficient. Therefore, absent full funding, voters should reject the initiative. The measure passed.

In 1952, another school construction bond of \$185 million was put before the voters. Proponents of this initiative stated that the amount was “extremely” conservative. A comprehensive study by the State Department of Education at that time revealed that \$198 million was needed, while the Department of Finance estimated the need at \$250 million. Again, the amount of needed resources surpassed the amount proposed, and the cycle of chronically under-funded facility financing for schools continued.

To further exacerbate the shortfall, the 1952 proposition, along with subsequent propositions offered in 1956, 1958, and 1960, included “poison pill” language that limited the Legislature’s ability to appropriate any additional funds for school construction beyond that in the various propositions.¹⁶ If the Legislature approved any additional resources for school construction, the amount of bonds that were sold would be reduced by an amount equal to the additional appropriation. After 1960, however, bond proposals excluded the language that precluded the Legislature from raising additional capital outlay funds.

During a two-decade period, the State Allocation Board administered this program as a bank. Resources from the state were limited, and many school districts were uncomfortable with the concept of borrowing money from the state, rather than from their local constituents. Further, since school districts were obligated to reach full bond indebtedness before applying for state loans, many did not participate. For these reasons, many school districts chose not to build facilities until their bonding capacity grew. Hence, many school districts found themselves chasing dollars after their schools were overcrowded—a situation not unlike today.

The Early 1970s

As a result of a major earthquake in the San Fernando Valley (Sylmar) in 1971, the state authorized \$30 million¹⁷ for a new program to finance the rehabilitation and construction of earthquake safe schools,¹⁸ and for the renovation of buildings that the earthquake damaged.¹⁹ This program was known as the School Buildings Safety Fund. Like its predecessor programs, the 1971 Act created a state loan program for eligible school districts. The Act also included provisions to forgive loans for school districts that had reached their bonding capacity. The 1971 program was augmented by a 1972 state bond initiative of \$350 million of which \$250 million was set aside for structural repairs due to earthquakes.²⁰ This latter bond initiative also provided a method for financing buildings in districts that did not meet the criteria of the program that was initiated in 1971,²¹ and it required the State Allocation Board to first approve those applications from school districts for earthquake repairs. The State Allocation Board gave second consideration to funding projects for other types of repairs or upgrades. Hence, the Board began a new system for not only new construction but also repairs, as well as a system that set priorities.

A Changing Paradigm

From 1970 to 1980, public school enrollment statewide decreased by roughly one percent per year.²² Reductions in both immigration and domestic in-migration to the state, as well as a decrease in the state's birth rate caused this decline. During this decade, there were sufficient resources available from local property tax revenues and from the state's loan program to meet the various rehabilitation needs especially of those school districts that were experiencing enrollment declines. The State Allocation Board thus shifted its loan program emphasis from new construction to rehabilitation, and to upgrading unsafe facilities that were damaged due to the 1971 earthquake.²³

Nevertheless, some school districts continued to experience enrollment growth in response to suburban housing development.²⁴ In spite of such growth patterns, the State Allocation Board set its priorities to favor rehabilitation projects over new construction. The Board's orientation accentuated the differences between growing school districts and those that required rehabilitation, and caused an unequal state spending system that favored property rich urban districts over fiscally poor and growing suburban districts.²⁵

To counter the State Allocation Board's orientation toward urban rehabilitation, growing suburban school districts recognized that in order to fund new school construction, they would have to depend almost entirely on their local property tax base. As more people demanded affordable housing in suburban neighborhoods, developers accommodated them by building numerous suburban housing units. The sheer increase in the number of suburban homes added significant resources to the property tax base, thereby benefiting the school districts that served those communities. Furthermore, the ongoing demand for suburban housing caused the prices of homes in these areas to increase precipitously, adding even more resources to the property tax base. Although school districts could have requested to reduce those tax rates that supported them to a minimum amount, they did not. Most districts kept their rates steady, and some even increased them. Homeowners, unhappy about menacing property taxes, sought relief. In 1972, the Legislature enacted a multi-year package, funded by the state's general fund, of \$1.2 billion for school operation to be allocated over a three-year period and to serve as property tax relief.²⁶ In spite of this legislation, property taxes remained relatively high to cover local bond debt, and continued to be the primary source for school construction for growing school districts. Concurrently, the state continued to loan money to enrollment-static school districts for the purpose of rehabilitation.

Leroy Greene State School Building Lease Purchase Law

In 1976, the Leroy Greene State School Building Lease Purchase Law was signed into legislation.²⁷ This law established a state fund to provide loans to school districts for reconstruction, modernization, and replacement of school facilities that were more than 30 years old. The Act significantly altered the state's role in how school facilities construction was financed. Specifically, the state would no longer loan money; but it would finance school construction based on a leasing model.²⁸ Although the legislation was passed, the voters of the State remained unconvinced that more money was needed to

improve schools. Consequently, they did not pass the bond initiative that was necessary to fund the Lease Purchase Program.

The 1976 Act had specific language that created “priority points” for school districts that would apply for state funding. This was the first time that the State Allocation Board used a point system for creating a queue of approved projects. Priority points were given based on the number of unhoused students in the district, the rate of student enrollment growth, and how much rehabilitation a facility needed. Further, the Board instituted a first-come, first-served policy in which each accepted school district’s application was stamped with a time and date.

Under the previous program, the state loaned money to school districts to build their facilities, and the school districts owned their property. Under the Greene legislation, however, the State maintained a lien on the property for the duration of the loan via a lease purchase agreement.²⁹ The State wanted to preclude school districts from purchasing land on a speculative basis using State money, only to sell the State funded property at a profit at a later date. This meant that the state would control the disposition of any school facility that it financed until the school district repaid its obligation on the lease.

The Proposition 13 Epoch 1978-1986

Proposition 13—Local Governments and School Districts Fiscally Stymied

With its passage, Proposition 13 eliminated the ability of local school districts to levy additional special property taxes to pay off their facility indebtedness. Proposition 13 capped the ad valorem tax rate on real property at one percent of its value, thereby reducing the income from property taxes to such an extent that it virtually eliminated this source as a means for lease payments. Proposition 13 also prohibited the electorate of a school district from authorizing a tax over-ride to pay debt service on bonds for the purpose of constructing needed school facilities.

To exacerbate this problem, the voters soundly defeated school construction bonds in both 1976 and 1978. They were two of only three³⁰ state general obligation bonds rejected by voters since 1947. The non-passage of these two successive bond initiatives, coupled with suburban enrollment growth, caused a statewide shortfall of \$550 million³¹ that was needed for school construction projects throughout the state in 1978.

Post Proposition 13

The limitations set by Proposition 13 caused school districts, counties and cities to turn to the state, which had a \$3.8 billion surplus, to fill the gap.³² In 1979, lawmakers approved a \$2.7 billion (in 1978 dollars) “bailout” plan to assist schools and local governments.³³ Within a year, the state surplus was reduced to roughly \$1 billion. Furthermore, the state had taken on a larger role as a funding source for school operations and capital improvement. To that end, it expected school districts to conform to its programs and projects.³⁴

Effects of Proposition 13 on the Lease Purchase Program

In 1979, legislation implementing Proposition 13 included provisions for restructuring the State's Lease Purchase Program.³⁵ School districts that received funds from the state were required to pay rent to the State as low as \$1 per year, creating an "unofficial" grant program.³⁶ In addition, school districts were to contribute up to 10% of the project's cost from local funds.³⁷ However, many school districts could not raise these matching funds through local bonds. They requested that the State fund their entire projects. The State Allocation Board created a waiting list of projects.

A Recession Further Complicates School Facility Financing

Beginning in 1982, California was in a recession that lasted until 1984. During this time period, the State's budget surplus was expended. School districts' recession experiences were complicated by the fact that student enrollments again began to increase again.³⁸ Approximately 60 percent of California's 1,034 districts at the time projected annual growth rates of over two percent between 1980-81 and 1983-84, with some districts projecting a doubling in their enrollment.³⁹ At the same time, estimates indicated that over one-third of the State's school buildings were over 30 years old and many needed substantial rehabilitation.⁴⁰ The Coalition for Adequate School Housing (CASH) estimated that the one-time cost of rehabilitating these older facilities would be \$1.9 billion.⁴¹ Further, CASH estimated that school districts would need an additional \$400 million annually for the next five years for building and repairing school buildings. Since the State was in recession, such funds were not available. Thus the State had to rethink how it would prioritize its school facilities projects.

A New System for Funding School Construction

In light of the backlog of applications for state funds, the Office of Local Assistance (now known as the Office of Public School Construction) designed a numerical ranking system that used "priority points" to determine a school district's eligibility for funds. This system gave priority to school districts who had students who were "unhoused," and special consideration was given to how districts used certain facilities.⁴² The more points a project application received, the higher on the list it was placed. Recognizing that school districts were facing enrollment growth and required further rehabilitation, the Legislature in 1982 authorized a general fund appropriation of \$200 million for school construction projects. This amount was later reduced to \$100 million.⁴³

Further, in order to ease the burden that many school districts felt because of the recession, the State loosened the repayment schedule for its lease-purchase program. School districts were allowed, for 10 years, to pay one percent of the cost of state funded lease-purchase projects, rather than the 10 percent they initially were required to pay.⁴⁴ Again, the State Legislature and the State Allocation Board moved away from a loan program and more toward a grant program.

Multi-Track Year-Round Education

Recognizing that the State had very limited bond resources, the Legislature wanted a more cost-effective facilities financing incentive system for school districts. That system would force districts to use their space more efficiently. In response to the shift in policy, the Legislature passed Chapter 498, Statute of 1983. This statute encouraged school districts that were experiencing growth pressure to adopt multi-track year-round education (MTYRE) programs. MTYRE programs enroll students in several tracks throughout the entire calendar year. At any given time, one track is on vacation, but vacation periods are short in duration.⁴⁵ The MTYRE program allows a more intensive use of existing facilities, thereby reducing the need for new facilities in growing districts.

School districts received an immediate financial return if they participated in the MTYRE program. A school district that redirected its students into a MTYRE program received a grant of up to 10 percent⁴⁶ of the cost that would be necessary to build a new facility not to exceed \$125 per student.⁴⁷ School districts that participated in MTYRE were eligible for air conditioning and insulation in their buildings.

In 1988, as pressure for state financing continued, the Legislature required that top priority for financing new construction projects be given to districts that used multi-track year-round education programs. School districts that offered MTYRE and were willing to match 50 percent of their construction costs received a funding priority from the State Allocation Board.⁴⁸ This put other school districts that could not meet these MTYRE and funding criteria at a distinct disadvantage. These latter school districts sought relief from the voters in 1986. Small school districts were one exception to the MTYRE requirement.

1986 Lease Purchase Program

In 1986, the voters approved Proposition 46. Proposition 46 amended Proposition 13⁴⁹ by restoring to local governments, including school districts, the ability to issue general obligation bonds and to levy a property tax increase to pay the debt service subject to a two-thirds vote of the local electorate.⁵⁰ This amendment allowed school districts to augment the one-percent cap on property taxes and to secure additional bond indebtedness to build and improve their schools.⁵¹

Passage of Proposition 46 helped, but did not solve school districts' financing problems. Many school districts were unable to secure the necessary two-thirds vote to authorize local funding, and still relied on state funding to assist them. Further, the federal government in 1986 passed legislation that required each state to remove friable asbestos from their educational facilities – another charge that the school districts could ill afford.

California adopted similar asbestos standards to those established by the federal government in 1986; however, few school districts reported their estimated costs for removing the substance. In light of the need to remove the asbestos, and in order to address the growing backlog of proposed school construction projects, voters passed Proposition 79 in 1988 - an \$800 million bond initiative. It specifically set aside \$100 million to cover asbestos removal.⁵²

A Growing Shortfall and Greater Scrutiny

There is no doubt that from 1982 to 1988 state support for public school construction was limited and difficult to secure. The demand for new school facilities, for modernization, and for asbestos removal was great.⁵³ As of June 1, 1986, applications that were submitted by school districts to the State Allocation Board for state funding of *new school construction* projects alone totaled roughly \$1.3 billion. In addition, applications for state funding for *reconstruction or rehabilitation* of school facilities totaled over \$991 million.⁵⁴ Total demand for school facility improvement in 1986 was nearly \$2.3 billion - an amount that significantly outweighed the \$800 million voters approved in that year's bond initiative.⁵⁵ Even with a boost of funding of \$150 million per year from Tidelands revenues in fiscal years 1984 and 1985, the Lease Purchase Program fell short.⁵⁶ By 1988, the shortfall had grown to \$4 billion, in spite of the fact that voters had approved \$2.5 billion in bond money from 1982-1988.

The State Allocation Board was forced to scrutinize every request for school construction funding, recognizing that absent a major infusion of State bond money, most districts would not receive funding for their projects. This scrutiny created an extremely competitive environment for the limited resources that were available to the schools. Many participants believe that school districts that contracted with knowledgeable consultants, or had district staff who were familiar with the State Allocation Board's policies and criteria, were the most successful in securing a high ranking place in the queue for resources, once those funds become available.

There is no definitive research or data that support this belief. Consultants are not required to report their involvement in the application process. However, there is substantial anecdotal evidence to support the assertion.

School Financing as a Collective Effort—The Three Legged Stool

In 1986, the Legislature recognized that resources were scarce and that no one governmental or private entity could finance school construction. It attempted to equalize the burden of school facilities financing between state government, local government and the private sector.⁵⁷ This concept was known as the "three legged stool." The idea was that the state would provide funds through bonds. Local government would provide its share through special taxes, general obligation, Mello-Roos and other bond proceeds. The private sector would provide funds through developer fees. Appendix A describes funding alternatives for these latter two legs of the stool.

The "three legged stool," however, never quite worked. For example, to assure that developers would not fund a disproportionate share of the cost to build schools, the Legislature, in 1986, capped the amount new homebuyers would pay for developer fees at \$1.50 per square foot, and empowered the State Allocation Board to raise the cap by a certain amount each year. However, school districts found a loophole around the cap by requesting that cities impose a fee on their behalf, and cities imposed rates on some

developers that exceeded those allowed.⁵⁸ California courts upheld these fees in the Mira, Hart, Murrieta court cases.

Until the recent passage of Proposition 1A, many local governments have imposed developer fees that exceed those allowed by the Board. For example, in 1987, fees in San Diego and Orange counties reached a high of \$8700 per house.⁵⁹ By 1990, total development fees for some homes reached \$30,000.⁶⁰ Statewide, developer fees have increased from \$31 million in 1978 to \$200 million in 1997.

In 1998, the State Allocation Board increased the fee to \$1.93 per square foot.⁶¹ With the passage of Proposition 1A in November 1998, however, local governments have apparently lost their ability to increase their fees beyond those determined by the State Allocation Board. Further conflict is likely.

The 1990s—Complicated Funding Programs

In the fall of 1990, the Legislature passed legislation that created two programs that provided additional financial incentives for schools to offer year-round education.⁶² The first of these programs provided a one-time grant to school districts to ease the expense of changing from traditional nine-month programs to year-round tracks. The second program provided an “operating grant” of between 50 percent and 90 percent of the amount districts saved the state by not having to build new schools. At the recommendation of the Office of the Legislative Analyst, the Legislature repealed the 1982 and 1986 incentive programs discussed above.⁶³

In response to the 1990 legislation, the State Allocation Board developed a new priority system for allocating lease purchase money. Under this new system, the Board apportioned funds based on a combination of when an application was received and how many priority points it garnered. Through a complex formula, priority points were given to schools that had a significant number of “unhoused students,” or had substantial rehabilitation needs. This procedure might have worked well if the state could have financed all applications in a timely manner. However, the demand for state money increased to the point where districts without special priorities could expect to wait years for the state to finance their projects.

The program was in effect for only one year when the Legislature repealed the program and created yet another system for allocating state money.⁶⁴ In 1991, the Legislature defined six priorities for funding. First priority was given to districts that had a “substantial”⁶⁵ enrollment in multi-track schedules, and that were paying at least 50 percent of the construction costs for their new schools. Second priority went to districts with a “substantial” year-round enrollment and that wanted the state to pay the entire cost of any new construction for their year-round schools. The remaining four priority levels took into consideration factors for those schools who did not meet the “substantial enrollment” criteria outlined above, or were unable to match state resources.

The complex set of formulas made it difficult for school districts to completely understand what criteria would best serve them. Further, throughout this period, the Board was

required to implement new programs and redefine its priorities. For example, in 1990 the Legislature created a program that was adopted by State Allocation Board for school districts that could not find adequate land on which to build a school. Known as the Space Saver Program, it was designed to assist urban school districts that could not obtain adequate acreage for a school campus. The first space saver school, developed in 1993, is scheduled to be completed in Spring 2000 in the Santa Ana Unified School District, in a former shopping mall.⁶⁶

Another example of shifting priorities took place in 1996 when the Legislature mandated the Board to redirect its third highest priority to class size reduction from a previous focus on child-care facilities.⁶⁷ A third took place at the end of 1997 when the priority points system was replaced by a first-come, first served system. While there were exceptions to this rule, money was offered first to school districts willing to cover some of the costs associated with constructing or repairing facilities. Schools that could not afford to cover the remaining 50 percent were placed on a separate list.

Such shifts in policy, coupled with the significant complexity of formulas that drove the priority point system, along with the sporadic creation of new programs, caused many school districts to depend on outside consultants. These consultants understood the many policy changes that the Board enacted – sometimes on a monthly basis. They were also knowledgeable of new programs, and clearly understood the workings of the staff who carried forth the Board's policies. Without the assistance of consultants, school districts were unable to keep track of policy changes and special considerations enacted by the Board. Further, while the Board and its staff advised school districts regarding changes in their policies in a regularly published document, it did not provide a centralized source of materials, such as an up-to-date handbook. Consequently, school district personnel were often uninformed about the various nuances of the programs administered by the Board.

State Bond Efforts of the Nineties

As the State Allocation Board shifted its focus and policies throughout the early 1990s, Californians approved state school bond initiatives in 1990 for \$1.6 billion and in 1992 for \$2.8 billion. In one of its 1992 reports, the Department of Finance reported that statewide K-12 enrollment was estimated to grow by 200,000 new students per year for at least five years,⁶⁸ and that an estimated \$3 billion would be needed annually for new school construction.⁶⁹ However, in spite of growing enrollments and a significant demand for facility rehabilitation, in 1994, the electorate rejected a \$1 billion bond initiative. The State was in a recession.

A lack of State bond funds was not the only problem associated with the allocation of school construction funds. The Auditor General reported in 1991 that the Office of Local Assistance mismanaged state funds. It detailed that construction funds loaned to school districts were not recovered; that districts overpaid on some projects and failed to collect the overage; that it dispersed funds without proper documentation; and that it failed to conduct required close-out audits on construction projects.⁷⁰

As a result of this audit, the Office of Public School Construction in concert with the State Allocation Board developed stringent internal and external audits and fiscal controls. These control mechanisms included increasing the detail of financial review of projects, prohibiting school districts from participating in the program unless a balance was not due, and no longer receiving rent checks for portable classrooms.⁷¹

Attempts to Ease Passage for Local Bonds

Recognizing that the State would be unable to fund the entire backlog of school construction proposals, Governor Pete Wilson in 1992 proposed a constitutional amendment to reduce the requirement for the passage of local bonds from two-thirds to a simple majority.⁷² The idea was that local governments should have to meet the same 50 percent requirement as the State for passing bonds. Further, there was strong sentiment in the Wilson administration that local governments should pay an increased share of school construction costs. However, the Legislature rejected his plan.⁷³ Other attempts in recent years to reduce the vote for passage of local bonds from two-thirds to something less have also failed.⁷⁴

1996 School Bond Issuance - Finally More Money

Proposition 203, passed by the voters in March 1996, provided \$2.065 billion for school facility construction. However, the Legislature at the time estimated that school districts would need \$7 billion in construction funds to meet enrollment growth that was anticipated during the next five years.⁷⁵ This \$7 billion did not include the needs of Los Angeles Unified School District (LAUSD), which had 20 percent of the state's student population. At the time, LAUSD alone needed \$3 billion to upgrade and modernize its schools.⁷⁶ Clearly, anticipated demand for State funds substantially exceeded available resources.

To respond to the many school district proposals, the State Allocation Board followed its general priority points policy. However, many school districts, recognizing that they would not receive funding for years because of their position in the funding queue, and because of the limited amount of resources that were available, resorted to creative means to try to secure funding for their projects. For example, some schools districts sought special consideration for funds by requesting emergency allocations. Such a tactic would allow a school district to receive funds immediately.⁷⁷ Other school districts used the appeals process to argue that their projects were needed more than those of other school districts that were higher in the queue.⁷⁸

This cannibalistic dynamic caused a fair amount of resentment among those school districts that were bumped from a relatively high position in the queue by those districts that sought emergency relief or special consideration. Further, it was clear that the most sophisticated school districts found a variety of tactics that would secure the funding of their projects. These tactics are described in greater detail later in this paper under the section that describes how the Board processed its applications.

Class Size Reduction Causes Greater Housing Needs

The distribution of funds from Proposition 203 was further complicated by the Governor's Class Size Reduction Initiative. In particular, the State Allocation Board earmarked \$95 million for the purpose of purchasing 2,500 portable classrooms for schools that were facing severe classroom shortages. This was in addition to \$200 million that the Department of Education had available for assisting schools in purchasing such facilities. The Office of Public School Construction determined that a total of 17,500 classrooms were needed to accommodate class size reduction, and that there was only enough money to fund less than half of the estimated need.⁷⁹ The State Allocation Board reinterpreted Proposition 203 by creating a new Portables Purchase Program at the expense of their other programs. This caused some school districts to again get bumped in the queue for funding.

Never Enough Money—Still a Shortfall

Since 1947, the electorate has approved all but three State bond initiatives. In spite of the voters' tendency to support various bond initiatives, by 1998, the backlog of school construction projects that were approved by the State Allocation Board, but unfunded, totaled more than \$1.3 billion. Although the voters have been generous by approving bond initiatives roughly every two years,⁸⁰ there were times during the past five decades when bond money was not available for periods of four or six years.⁸¹

The Department of Finance has estimated that \$16 billion is needed over the next decade for public school construction and rehabilitation.⁸² Various bond proposals in 1997 and 1998 were circulated that considered multiple-year bond issuances. The California Teachers Association and the California Building Industry Association presented a plan to issue \$2 billion a year for 10 years.⁸³ Governor Wilson proposed \$2 billion a year for four consecutive years. In the end, Proposition 1A was passed. It provides \$6.7 billion over a four-year period. However, while the amount appears generous, it will not be enough to meet the entire anticipated need of the state. Based on the Department of Finance projections, the six years following this bond issue will require roughly an additional \$10 billion in State money.

Table 1 on page 18 shows the history of state school bond initiatives from 1949 to 1998. In the next sections of this report, we discuss the various programs, the complicated application process used by the State Allocation Board that school districts had to endure to secure funding, and how Proposition 1A attempts to simplify this process.

Table 1 - STATE SCHOOL CONSTRUCTION BONDS

Title of Bond Initiative	Date & Year of Election	Funds Authorized
School Building Aid Law of 1949	November 8, 1949	\$250,000,000
School Building Aid Law of 1952	November 4, 1952	\$185,000,000
School Building Aid Law of 1952	November 2, 1954	\$100,000,000
School Building Aid Law of 1952	November 4, 1958	\$220,000,000
School Building Aid Law of 1952	June 7, 1960	\$300,000,000
School Building Aid Law of 1952	June 5, 1962	\$200,000,000
School Building Aid Law of 1952	November 3, 1964	\$260,000,000
School Building Aid Law of 1952	June 7, 1966	A)\$275,000,000
School Building Aid Law of 1952	June 6, 1972	B)\$350,000,000
School Building Aid Law of 1952 And Earthquake	November 5, 1974	\$150,000,000
School Building Lease-Purchase Bond Law of 1976 (Failed)	June 8, 1976	\$200,000,000
School Building Aid Law of 1978 (Failed)	June 6, 1978	\$350,000,000
School Building Lease-Purchase Bond Law of 1982	November 2, 1982	\$500,000,000
School Building Lease-Purchase Bond Law of 1984	November 6, 1984	\$450,000,000
Green-Hughes School Building Lease-Purchase	November 4, 1986	\$800,000,000
School Facilities Bond Act of 1988	June 7, 1988	\$800,000,000
1988 School Facilities Bond Act	November 8, 1988	\$800,000,000
1990 School Facilities Bond Act	June 5, 1990	\$800,000,000
School Facilities Bond Act of 1990	November 6, 1990	\$800,000,000
School Facilities Bond Act of 1992	June 2, 1992	\$1,900,000,000
1992 School Facilities Bond Act	November 3, 1992	\$900,000,000
Safe Schools Act of 1994 (Failed)	June 7, 1994	\$1,000,000,000
Public Education Facilities Bond Act of 1996, Proposition 203	March 1996	C)\$3,000,000,000
Class-size Reduction Kindergarten-University Public Education Facilities Bond Act of 1998, Proposition 1A	November 3, 1998	D)\$9,200,000,000

Bonds in [bold] failed to receive a majority of votes.

- A) New amount of 1966 bond authorization available for regular program is \$185.5 million after deducting \$35 million reserved for compensatory education facilities, \$9.5 million for regional occupational centers, and \$35 million for rehabilitation and replacement of earthquake damaged and unsafe schools.
- B) Up to 250 million dollars earmarked for rehabilitation and replacement of unsafe schools.
- C) One billion dollars earmarked for higher education facilities
- D) Two and one-half billion dollars is allocated for higher education.

THE PROGRAMS

Prior to the approval of Proposition 1A, the State Allocation Board oversaw six active programs associated with school facility construction, repair, and remodeling. These six programs made up the Lease-Purchase Program that was discussed earlier in this paper. This section briefly describes these programs, discusses how the State Allocation Board set priorities for school district projects, explains how the Office of Public School Construction staff reviewed and acted upon district proposals, and how the State Allocation Board considered district appeals. The purpose is to advise the reader of not only the process and administration of allocation, but also some of the pitfalls that existed under the old system. Perhaps these pitfalls of the old system can be avoided when allocating Proposition 1A resources.

The Growth and Modernization Programs

The Growth and Modernization Programs allocated funds to school districts for building new schools (Growth Program) and for repairing existing facilities (Modernization Program). School districts qualified for the Growth Program based on an "allowable building standards" formula.

For its Growth Program, the State Allocation Board developed standards for the amount of space that was necessary to house students based on a district's number of ADA (Average Daily Attendance).⁸⁴ The Modernization Program provided funds to school districts for nonstructural improvements to permanent school facilities that were more than 30 years old, and for portable buildings that were more than 20 years old. Such nonstructural improvements included interior partitions, air conditioning, plumbing, lighting and electrical systems.

The Modernization Program provided funding for up to 25 percent of the replacement value of the building. Under some circumstances, districts could use additional funds beyond the 25 percent for handicap access compliance, including elevators when appropriate, and for alternate energy systems.

School districts could apply to this program by offering to match state funds and be listed as "Priority One," or they could ask the State to fund their entire project and be listed as "Priority Two."

Process for Receiving Growth and Modernization Funds

School districts that applied for growth and/or modernization funds were required to follow nine steps in three critical areas - planning, site selection and construction. Each of these three critical areas provided a separate and gradual funding stream for the school's project.

Planning Phase

During the planning phase, a district was required to complete four forms that demonstrated that it was eligible for either the growth or modernization program.

Eligibility to participate in the programs was based on enrollment patterns or the age and condition of those schools that required modernization. If a district met these standards, it moved on to the "site development phase."

Site Development Phase

Selecting a school site was critical. If a school district was participating in the modernization program, it would move to the next phase. The site would have to be safe and able to support the school's curriculum. An adequate site would have to meet certain standards with respect to size and location. Site review could take a school district months (if not years) to investigate. Under the growth program, a school district arranged a search committee to locate available properties and narrowed its search to three sites. In addition, the school district held public hearings regarding the impact of the lands to be used for educational purposes, and notified neighbors about possible site use. A representative from the Department of Education visited three selected sites to review and determine which was the most suitable site based on criteria including, but not limited to: street traffic safety; traffic congestion; geological hazards; and other environmental issues. All school districts followed a similar process for site selection whether they financed the project themselves, or requested State funding.⁸⁵

Some school districts were unable to build new schools because they could not secure appropriate properties. This was especially true in urban and industrial areas where vacant land was not readily available or was extremely expensive.⁸⁶

Once a district found an appropriate property, it was required to prepare a site development plan that included architectural and engineering drawings, along with building contract agreements. Districts were required to follow strict site development, plan development, and construction cost guidelines in order to be eligible for state funds.⁸⁷ Once these guidelines were met, the district proceeded to the construction phase.

Construction Phase

Every construction project received an allowance for site development and to erect a building. The eligible costs associated with construction for these programs were classified into several broad categories: building construction; site development; energy conservation; and supplemental funding for multi-story construction. In addition, facility funding included adjustment costs associated with geographic and regional differences, or the demolition of an existing structure.

A project architect for each contract developed final plans and documents as part of the project's final stage. These documents were used to establish a construction budget. The Division of the State Architect approved and monitored the district's final plans. After review, a construction apportionment was recommended to the State Allocation Board, which in turn authorized the distribution of funds. Upon completion of all regulatory oversight, the district was allowed to break ground.

The Deferred Maintenance Program

The Deferred Maintenance Program provided a 50 percent State match to assist school districts with expenditures for major repair or replacement of school buildings. Such repairs or replacements were for plumbing, heating, air conditioning, electrical systems, roofing, interior and exterior painting, and floor systems. School districts were required to place one and one-half percent of their general funds into an escrow account in order to receive a State match. For school districts that could not fit the parameters of the modernization program, the deferred maintenance program was the only alternative to receive State assistance.

The State also provided critical hardship funds to repair buildings that might seriously affect the health and/or safety of pupils. When available funding was insufficient to fully fund all hardship requests in any given year, the State Allocation Board created a priority list. However, the State Allocation Board often made exceptions to its list.

The Deferred Maintenance Program differed from the modernization program in that school districts were required to submit a five-year plan as to how their projects would be implemented. The plan displayed a rank for each project, and identified those projects that the school district would likely fund.

Deferred Maintenance Application Process

Based on the most recent available material, the deferred maintenance program had 13 steps, and a school district needed to complete several forms and documents. The 13 steps were divided into categories including a letter of interest, application process, critical hardship project documentation, and fund release.

A school district notified the Office of Public School Construction each year if it wanted to participate. Upon receipt of the initial letter, the Office of Public School Construction would send the district a request for its five-year plan of maintenance needs and an "Annual Application for Funds."

The school district would then provide the OPSC with a list of items scheduled for major repair or replacement,⁸⁸ along with its five-year implementation plan. When the district received state funds, it could only expend those resources for those items on the list. It could not redirect any resources toward administrative overhead, repair and maintenance of furniture, ongoing preventative maintenance, energy conservation, landscaping and irrigation, athletic stadium equipment, drapery or blackout curtains, testing underground storage tanks for leaks, or chalkboards.

Once the Office of Public School Construction approved a school district's list of projects it allocated funds accordingly. In cases of hardship, OPSC would visit the school prior to allocating funds. The district's governing board controlled and was responsible for all deferred maintenance funds. These funds were placed in a special escrow account.

The Year-Round Air Conditioning/Insulation Program

The Year-Round Air Conditioning/Insulation Program (ACI) began in 1986, as an incentive program for schools to operate during the summer.⁸⁹ In order to participate in the program, a school district was required to have a plan for Multi-Track Year-Round Education, or have 10 percent of its students enrolled in a Multi-Track Year-Round Education program. The ACI program assisted school districts by providing resources for air conditioning and insulation.

Year-Round Schools Air Conditioning/Insulation Application Process

The application process for the ACI program differed slightly for those school districts that had a year-round program from those that were planning a year-round program. However, regardless of their status, school districts were required to complete eleven stages in two phases to receive funding. If a school district had an air conditioning system that needed repair, it could not apply to this program, but could apply for funds under the deferred maintenance program.

A school district completed forms that included information on the buildings and spaces that would be affected, along with a report regarding the project's anticipated start-date. In addition, another application was required that provided information on whether the school site was experiencing enrollment growth, and whether some level of modernization was already in progress. Further, a school district that was not on a year-round schedule was required to show how its year-round calendar would be used. If the district was approved for funding, various allowances were provided to the district.⁹⁰ In addition to these allowances, the state would provide funds for gas and electric service, general site development, and air conditioning/insulation construction.

Items that were not covered by this program included costs for heating, window solar film, classroom doors and hardware, re-roofing, lighting, security, interior housing, fire alarm systems, unrelated repairs, installations, and painting.

The State Relocatable Classroom Program

The Relocatable Classroom program was designed to meet the needs of school districts that were impacted by excessive growth or unforeseen classroom emergencies. The State Allocation Board allocated funds for the acquisition, installation, and relocation of safe portable classroom facilities. The State maintained a fleet of 5,000 furnished classrooms that could be leased to school districts for \$4,000 per year. Hardship cases could lease portables for \$2,000 per year. These portable units were available on a first-come, first-served basis. However, there was no maximum amount of time a school district could keep the portables, and districts were not required to return them. Thus, some school districts have kept the portables indefinitely.

Relocatable Classroom Application Process

In order to participate in either relocatable classroom program, a school district was responsible for site preparation costs including electrical hookup, plumbing connection, a State Architect approved plan, insurance and maintenance. After approval by the Board, the district would be reimbursed for the cost of architect fees, electrical hookup, furniture and equipment, and plumbing installation. However, reimbursements were capped at \$9,450 per classroom.

The Unused Site Program

The Unused Site Program was established in 1974 as part of the General Lease–Purchase umbrella. It required school districts and county superintendents of schools to pay a fee for district properties that were not used for “official” school purposes. “Official” school purpose was defined as being used for K-12 education, continuing or adult education, special education, childcare, or administration of any educational units.

This program did not provide funds directly to schools. However, resources generated from the fees that districts paid for unused facilities were used to cover deferred maintenance costs and to service the debt on the state’s various school construction bonds. Since the Board simply administered the return of funds to the state, the funds could not be redirected to other programs administered by the Board. Proposition 1A eliminates their fee requirements.

The Office of Public School Construction Staff Review and The State Allocation Board’s Appeals Process

The State Allocation Board meets roughly 11 times a year. At each meeting the Board reviews and approves about 200 applications for funding. Prior to the State Allocation Board’s review, the Office of Public School Construction staff processes all applications. Before Proposition 1A, the approval processes for the programs, except for the growth and modernization programs, were straightforward. Either a school district’s application fit a program’s description for reimbursement, or it did not. Due to the complicated nature of the Growth and Modernization programs, “special considerations,” or project applications that did not fit in the parameters of the program were placed in a different category. The State Allocation Board approved roughly 90 percent of all growth and modernization projects without special consideration. Issues requiring special consideration could include peculiarities of the proposed site, or the costs associated with a project. The applications were divided into special consents or “specials,” and appeals. Both types permitted the Office of Public School Construction staff great latitude in the decision-making process, as they investigated and evaluated school district applications on a case-by-case basis.

A “special” occurred when OPSC staff reviewed a school district’s application that did not meet the standards of the program, and determined that an exception should be made. This agreement may have required several meetings between the school district’s administration and the OPSC staff. With OPSC staff recommendation, which may have

been inconsistent with State Allocation Board policy, this application would be brought before the State Allocation Board for review. This category was normally granted approval in one action.

An appeal occurred when OPSC staff reviewed a school district's application that did not meet the standards of the program, and determined an exception should not be made. If after several meetings an agreement could not be reached, the school district would bring its case before the State Allocation Board. An appeal was granted only on a case-by-case basis. At times, legislators have spoken on behalf of school districts at Board meetings.⁹¹ The difference in the two types of special considerations was that a school district or its representative would have to defend its actions in an appeal. However, as already noted, only those people who kept up with the process and policy changes were adept enough to tackle an appeal. Therefore, a school district seeking an appeal before the State Allocation Board might seek help from legislators that represented them, or hire consultants. For instance, in the May 1998 State Allocation Board meeting, a well-versed school finance consultant appeared on behalf of the Apple Valley Unified School District. Apple Valley hired both a construction manager and a general contractor to erect its new school, in the face of board policies allowing a school district to hire only one such position. On behalf of the school district, the consultant addressed the State Allocation Board, and pointed out that in five other cases the State Allocation Board had voted in favor of a school district that hired both a general contractor and a construction manager.⁹²

Less seasoned district representatives would not have known that the State Allocation Board had already set a precedent for funding projects that include both a construction manager and a general contractor.⁹³ The OPSC staff was not knowledgeable on this issue and therefore could not be a source of information.

PROPOSITION 1A—A POSSIBLE FIX TO SAB PROCESS PROBLEMS

Proposition 1A not only authorizes an additional \$6.7 billion to K-12 schools, but it also offers a fix to several of the process problems discussed above. It replaces the provisions of the previous Lease-Purchase Program. This section discusses (1) the resource allocation provisions of the legislation; (2) the programmatic components of the legislation; and (3) how the legislation improves the resource allocation process over that which existed under previous bond programs.

Total Resource Allocation Provisions of Proposition 1A

The resource allocation system in Proposition 1A is specific and detailed. Bond proceeds are to be allocated in 2 two-year cycles: \$3.35 billion available immediately; and \$3.35 billion available after July 2, 2000. Of the \$3.35 billion that is immediately available, \$1.35 billion is earmarked for new construction, \$800 million for modernization, \$500 million for hardship cases, and \$700 million for class-size reduction.

For the second \$3.35 billion distribution, \$1.55 billion will be available for new construction, \$1.3 billion for modernization, and \$500 million for hardship cases. There are no resources in the second allocation for class-size reduction.

School districts receive funding for their projects based on a per pupil formula. The formula is based on a statewide average cost for construction, adjusted each January for inflation. The figures are based on unhoused⁹⁴ average daily attendance (ADA). The per pupil ADA formula is as follows:

	Growth	Modernization
Elementary	\$5,200	\$2,496
Middle School	\$5,500	\$2,640
High School	\$7,200	\$3,456

It is anticipated that the initial \$1.35 billion available for new construction during the first round of allocations will be insufficient to meet the needs of those school districts that are facing substantial enrollment growth. Proposition 1A establishes a priority point system for new construction projects when State bond resources are exhausted.⁹⁵ The Office of Public School Construction will process applications on a first-come, first-served basis from subsequent bond offerings.

In addition to the provisions outlined above, school districts that receive bond proceeds are required to set aside three percent of their general funds each year for 20 years for the purpose of deferred maintenance.

Components of Proposition 1A

Proposition 1A establishes three categories for funding. The first is the Growth Program, in which the State finances half the cost of new construction and the school district the other half. The second is the Modernization Program, in which 80 percent of the cost of rehabilitation is provided by the state and 20 percent by the school district. The third category is “hardship,” in which the State funds up to 100 percent of the cost for emergency needs, or an increased proportion of its share for new construction or modernization.⁹⁶

Proposition 1A holds harmless those school districts that received State Allocation Board approval for the construction phase of their projects (under the previous Priority 1 - able to provide a 50 percent match). They will receive growth and modernization funds, but under the rubric of the previous “Lease Purchase Program.” This grant is supplemented by land costs, site development, and other adjustments.

Another new provision of the Proposition is that school districts can seek modernization resources after a facility is 25 years old, rather than 30 years under the previous program.

Schools districts that had received prior Board approval for Priority 2 projects (100 percent state funding) will have to either indicate their ability to finance 50 percent of their proposed projects or reapply under one of the new programs. If the school district cannot meet the provisions of the new programs, it can apply as a “hardship” case.

The California Supreme Court ruled in 1991 that cities and counties could limit housing development on the basis of the supply of classrooms.⁹⁷ Proposition 1A suspends, until 2006, the Court’s ruling.⁹⁸ With the passage of Proposition 1A, school districts will not be able to limit new housing construction based on a rationale that school facilities do not exist. However, in 2006, if adequate bond funds for new construction are not available, cities and counties can once again deny development. Further, as discussed earlier, the Proposition permits the school board to increase developer fees to up to \$1.93 per square foot.⁹⁹ Proposition 1A sets up a system where fees can be levied of up to 50 percent and 100 percent of the costs associated with building a school by developers under certain circumstances.

Proposition 1A Improves the Resource Allocation System of the State Allocation Board

Proposition 1A makes several changes to the programs administered by the State Allocation Board. It attempts to simplify the process of applying for funds, consolidates the Board’s previous six programs into two, and attempts to create a more equitable funding system. It also makes the State Allocation Board and the Office of Public School Construction staff more accountable for their actions. Table 2 presents the differences between the Board’s previous Lease Purchase Program, and the new programs that are initiated by Proposition 1A.

Table 2 - Comparison of Lease Purchase Program to Proposition 1A Programs

	LEASE PURCHASE PROGRAM	SCHOOL FACILITIES PROGRAM PROP 1A
FUNDING FACILITIES	<p>Priority 1 projects-growth and modernization-received 50 percent funding based on actual costs from the state.</p> <p>Priority 2 projects-growth and modernization-received 100 percent funding form the state.</p>	<p>Growth projects receive 50 percent funding based on a per pupil formula from the state.</p> <p>Modernization projects receive 80% funding from the state.</p> <p>Hardship projects can receive up to 100 percent of funding from the state based on three broad categories financial, physical and excessive costs.</p>
CONSTRUCTION EXCESSIVE COSTS & COST SAVINGS	<p>Some excessive costs (i.e., change orders) were reimbursed by the state. Cost savings were returned to the state.</p>	<p>Excessive costs are not reimbursed by the state and school districts keep costs savings.</p>
MODERNIZATION PROJECTS	<p>Buildings must be at least 30 years old.</p>	<p>Buildings must be at least 25 years old.</p>
PROJECT APPROVAL	<p>Projects were approved three times in conjunction with the planning, site acquisition and construction phases.</p>	<p>Projects receive one approval (except hardships that receive two approvals).</p>
FUND ALLOCATION	<p>Funds were allotted after each phase.</p>	<p>Funds are allotted only after DSA approves plans, unless there is a hardship.</p>
MAINTENANCE OF FACILITIES	<p>Required school districts to set aside two percent of their general fund for ongoing maintenance.</p>	<p>Requires school districts to set aside three percent of their general funds for 20 years for ongoing maintenance.</p>
PROPERTY LIENS	<p>State maintains a lien to properties it funds.</p>	<p>State does not hold liens, and existing liens are released.</p>
ARCHITECTURAL APPROVAL	<p>Division of State Architect approved all plans.</p>	<p>The Division of State Architect or a state approved private engineering firm may approve plans.</p>

	LEASE PURCHASE PROGRAM	SCHOOL FACILITIES PROGRAM PROP 1A
DEVELOPER FEES	The cap on fees was \$1.93 per square foot; however, cities or counties could levy a higher fee and pass it to schools districts.	The cap on fees is \$1.93 per square foot, adjusted biannually. Fees may be assessed up to 50 percent of the costs of a project if a school district has accessed other forms of financing including Mello-Roos, G. O. bonds, and parcel taxes. In order to increase fees, school districts must meet two of four criteria, including MTYRE, local school bond positive votes of 50 + 1 percent, 20 percent of students are housed in portables, 15 percent of bond debt used.
WHEN STATE FUNDS RUN DRY	Projects were placed on a pending state-funding list or charged a city-based developer fee.	Modernization projects may be placed on a pending state-funding list. Growth projects may be placed on a priority points list, or the school district may collect 100 percent of financing from a developer.
CONTAINING DEVELOPMENT (MIRA, HART MURRIETA COURT CASES)	Cities and counties on behalf of school districts were able to contain residential development by suspending the building of new facilities.	School districts can not request cities or counties to prohibit residential development based on a lack of funds or school facilities until 2006.
ARCHITECT & CONSTRUCTION MANAGEMENT FEES	Percentage caps on fees based on size of projects	No caps.
MODERNIZATION PROGRAM	Provides funding to building over 30 years old, and portables over 25 years old. Calculations done on a district basis.	Provides funding for buildings over 25 years old and portables over 20 years old. Provides funding on a site-specific basis.
AIRCONDITIONING-ASBESTOS PROGRAM	Allotted funds specifically to install AC and remove asbestos.	These are now incorporated in the modernization program.

Simplification

To further simplify the process, the Proposition reduced the number of school facility financing phases from three to one.¹⁰⁰ This is now possible because school districts receive a flat grant from the State based on the number of students they enroll, rather than on the estimated cost of a project. Under the previous program, each phase of a project was evaluated independently; thus the cost to the State for any given project could change. Under the new program, a school district receives a single grant for a single project, and cannot request that the state fund additional need beyond the original request.¹⁰¹

The Proposition also explicitly requires that the State Allocation Board initiate a public hearing process that notices any policy changes considered by the Board. It requires that the Board make available to school districts written up-to-date documentation that clearly explains its policies, and specifically describes how its new programs work.

Consolidation

Until Proposition 1A, the State Allocation Board administered as many as 13 programs. The most current six are discussed above. With the enactment of Proposition 1A, the number of programs has been reduced to two, along with a special category for hardship cases. This consolidation of programs makes it easier for school districts to choose a program that best suits their needs. It precludes the type of creative tactics that school districts were forced to pursue to match their projects to the right program in order for them to receive funding.

A More Open Process

The Proposition causes a major shift in policy direction for the State Allocation Board. Under its previous programs, the Board funded both new construction and modernization on a 50/50 matching basis. Under Proposition 1A, the Board is required to fund modernization projects more generously than new construction projects, in that the State will fund 80 percent of the cost for modernization compared to 50 percent for new construction.

Another major outcome of Proposition 1A is that the State Allocation Board no longer has the authority to offer grants to school districts that may seek funds for special projects without any real statutory framework. Now school districts must demonstrate that they meet specific hardship criteria set out in the new law. The practical effect of this change will depend on how the Board interprets this provision.

Previous legislation implicitly required that the State Allocation Board follow guidelines set forth in the Administrative Procedures Act (APA); however, the Board did not do so. Proposition 1A explicitly requires the Board to follow APA guidelines. This means that any change in policy or regulation considered by the Board must be properly noticed to the public before the Board can act. This requirement, if the Board follows the full spirit, will allow school districts to be fully informed of Board policies and procedures, as well as its rules and regulations.

PITFALLS IN THE PROCESS PRIOR TO PROPOSITION 1A

This section discusses the State Allocation Board's attempts to improve its system and the pitfalls that existed under the previous programs.

Until recently, rules governing the application process were labor-intensive, both for school districts and the state agency personnel (including the Office of Public School Construction and the Division of the State Architect). In 1989, the Legislature received a report outlining the complex application.¹⁰² The report identified 54 steps school districts had to perform in order to receive application approval and eventual financing. In addition, the process required 24 separate forms.

Process Streamlined Recently

Since 1992, the OPSC has tried to be more efficient. Changes implemented by OPSC included: simplified and streamlined applications; improved response time for application review; improved policy information dissemination; and school districts were empowered to complete their own applications.

The most concrete indication that the Office of Public School Construction was becoming more efficient was in the application process. The application process for the Growth Program was reduced from 54 steps to nine. In addition, the number of forms that were needed to apply for funding was reduced from 24 to four.

School districts complained and begged for applications to be checked and approved for a State Allocation Board meeting agenda in an expeditious fashion. As part of the efficiency movement, the Office of Public School Construction set a goal to reduce the time from when a school district filed a completed application until it was placed on a State Allocation Board meeting agenda from over 400 days to 60 days.¹⁰³ Prior to Proposition 1A, applications on average still took longer than the 60 days to be reviewed. However, the office's efficiency achievement by reducing application review days is noteworthy.

In addition, the Office of Public School Construction worked more closely with school districts in the decision making process and provided greater leeway. In particular, school district personnel could self-certify certain information pertaining to a project rather than rely on state agency personnel. The self-certification process removed the time a school district would wait for a response from the Office of Public School Construction. It thereby shortened the application process.

Under its previous programs, it was difficult for school districts to get information pertaining to the funding process from the Office of Local Assistance (OLA) staff or from written materials. The Office of Public School Construction is now more service-oriented.¹⁰⁴ One can obtain information in person or from the office's Internet site.¹⁰⁵ In fact, the staff of the Office of Public School Construction is continually placing more information on the Internet. This information includes an automated project tracking system. Senate Bill 50 regulations, office contacts, and old board policy changes.

School Districts in Line Stand on Shifting Sands

Under the previous allocation system, school districts that completed their applications and were placed in queue were never guaranteed funding in the order their applications were received. The State Allocation Board dictated that school district applications were placed in an unfunded application list on a first-come/first-served basis. However, there were four general ways that school district applications could be “bumped” up or down in the queue.

Broad Classification Decisions

The first way a school district could get bumped was if the State Allocation Board decided to redirect its emphasis and fund a broad category of projects. For instance, the SAB could decide to fund all application projects from small school districts (no matter where they were in queue). If a school district was large, hundreds of proposed school projects could jump ahead in the funding queue.

The second way a school district could get bumped was if the State Allocation Board shifted the specific funding program allocations. Thus, for example, the State Allocation Board could decide to shift funds earmarked for the Growth Program to the State Portable Classroom Program.

Specific School District Decisions

The third way a school district could get bumped was if another school district application in queue with a later application filing date appealed to the State Allocation Board to change its application filing date to be ahead of other school districts. That school district application would be funded first.

The fourth way a school district could get bumped was if an emergency situation occurred and a school district requested critical hardship money from the State Allocation Board. The Board could provide these funds when available.

The application process requires equity and balance in order to ensure fair competition by school districts for State funds. The process needs to be flexible enough to handle emergency situations, yet firm enough to prohibit jockeying among school districts for better placement in the queue.

Proposition 1A halts the movement of funds from one program to another. However, the other examples are still feasible. Jockeying of school districts by consultants for better placement in line may continue to occur. This is especially true as Proposition 1A cannot handle the pent up demand for State funds. The next section discusses options that the Legislature may consider in order to improve this system.

OPTIONS FOR IMPROVING THE SCHOOL FACILITY FINANCING SYSTEM

A Separate List for Small and Rural School Districts

When the Proposition 1A funds are exhausted, new construction project applications will receive priority points for future funding. Small and rural school districts may require separate lists to ensure that they are placed near the front of a funding queue. This is necessary because there is no guarantee that the entire queue would receive future funding. Small and rural school districts, based on the current priority points system, may not receive enough priority points to approach the front of the queue. Larger school district applications, with greater per pupil need, may be able to position themselves high enough in the queue for funding by receiving favorable OPSC evaluations. Proposition 1A allows schools to skip to higher positions in the funding queue if they score higher priority points based on their number of unhoused students or if they can demonstrate a special hardship. *The Legislature may wish to create a separate list for small and rural school districts to create a more equitable system.*

Annual Report and Independent Accounting

In the early 1990s, many state agencies, boards, and commissions, because of budget cuts, postponed writing annual reports to the Legislature. These reports provided financial and policy information to the public. The State Allocation Board was one government entity that has not prepared regular audited reports of its programs' operations and expenditures for public review. The State Allocation Board will receive \$6.7 billion over the next four years to fund school construction projects. *The Legislature may wish to require the Board to prepare for the Governor and Legislature an annual report that details how and to whom bond funds were distributed. The Legislature may wish to require that an independent accounting firm or the State Auditor General prepare the Board's report.*

On-Line Technical Assistance

Although the application and funding process administered by the Office of Public School Construction has been streamlined and simplified in recent years, certain components of the process are still cumbersome. The process should be simple enough that school districts do not need to hire consultants or lobbyists to advise them or to shepherd their proposals. *The Legislature may wish to pass legislation that would require the OPSC to develop a technical assistance program to provide school districts with the necessary information and advice they need in order to qualify for and receive bond funds. Such a system could include an automated Internet help-line.*

A Special General Fund Appropriation for School Construction

The State's bond capacity may not be able to fund every State infrastructure need, including schools, transportation, prisons, and water during the next decade. School facility needs are estimated conservatively at roughly \$10 billion, while some estimates have put the figure at \$40 billion for the next decade alone. According to the Department of Finance, the State can afford to service approximately \$25 billion in additional debt. Thus, school facility financing alone could incur the entire debt capacity of the State. *The Legislature may wish to create a special appropriation fund for public school capital outlay as part of the State General Fund to augment the State's bond programs. In addition, the State may wish to design a school construction reserve fund, which is funded from budget surplus revenues.*

ENDNOTES

¹ Chapter 243, Statutes of 1947.

² If a school district wants state funding for construction or repair of a school, it must apply to the State Allocation Board for the money. There are school districts that repair and construct school buildings without the assistance of the State Allocation Board (i.e., San Diego Unified School District, San Luis Unified School District). However, this report will focus on a school district that requires state support.

³ Chapter 243, Statutes of 1947. Initially, the State Allocation Board administered a number of Public Works programs for the State ranging from housing and employment assistance to school facilities construction. Various programs include: the Postwar Planning and Acquisition, Construction and Employment Act, Veterans Temporary Housing, State School Building Construction Programs, Emergency Relief Programs, and Community Assistance Programs (State Allocation Annual Report 1983-1984, p. 1).

⁴ California Government Code 15502.

⁵ Government Code 15490.

⁶ While the State Allocation Board submitted policy changes to school districts, an up-to-date handbook was not made available. In addition, turnover of board members and school administrators may lead to ignorance of programs and the program changes.

⁷ Amendments to the Constitution, Proposition 1, November 8, 1949.

⁸ Amendments to the Constitution, Proposition 4, November 4, 1952.

⁹ Op.cit.

¹⁰ California School K-12 enrollment grew from 1.689 million students in 1950, to 4.633 million students in 1970 (State of California. Department of Education. Education Demographics Unit. CBEDS Data Collection. "Enrollment in California Public Schools 1950 through 1997").

¹¹ This is defined by California Education Code, Section 15102, as the legal limit of debt that a school district can incur based on the assessed value of property in that school district.

¹² Known as the State School Building Aid Program. The Legislature determined qualifications in order for school districts to participate in this program. They include the following provisions:

1. To qualify for a loan from the State a school district must have voted local bonds to 95 percent of its bonding ability.
2. Borrowing districts financially able to do so must repay the money to the State. Terms of 30 or 40 years of repayments are provided.
3. No money can be borrowed by a school district unless the proposed loan is approved by two-thirds vote of the electors of the district.
4. School construction, financed in any part by State loans will be subject to cost controls to be established by State Allocation Board (includes restrictions on the number of square feet of construction allowed per pupil).

²³ Op.cit., p. 2.

²⁴ Ibid.

²⁵ Property rich communities often have more poor people than property poor communities. The presence of commercial and industrial development can make an otherwise poor district "rich" in its tax base. Conversely, affluent communities often discourage industrial development that would make them property rich, but environmentally poorer. The lack of correlation between poor people and property poor districts is often overlooked in discussions of school finance issues. Even though the distinction has been known for a long time. Campbell, Colin D.; Fischel, William A. National Tax Journal "Preferences for School Finance Systems; Voters Versus Judges." Footnotes from Helen Ladd. "Statewide Taxation of Commercial and Industrial Property for Education." National Tax Journal (June 1976): 143-153.

The New York Times, June 30, 1983, p. A-14. However, some school districts that were academically and fiscally well managed prior to Proposition 13 faced problems. In 1983, the San Jose Unified School District filed for bankruptcy. The National School Boards Association stated that it was the first insolvency of a large school district since the depression. The San Jose Unified School District, at the time, held a reputation for excellence in education. It ranked 14th in the state in the ratio of students to teachers, and its teachers' salaries ranked second highest in Santa Clara County. However, since Proposition 13, the school district set aside maintenance and construction projects, laid off teachers and non-teaching administration, until it could not make further reductions and still continue to pay its staff.

⁴² This evaluation was amended annually. The State developed a formula that was based on standards that considered how a facility was used and how many pupils were unhoused. In some years, the State gave preference to unhoused pupils, while in other years, the state gave first consideration to how a facility was used. Facility use included childcare, before and after school programs, adult education, and traditional K-12 programming.

⁴⁵ California Department of Education. California Year-Round Education Directory 1997-98.

⁴⁶ For example, a school district that needed to build a new elementary school that cost \$4 million could receive \$400,000 from the state if it chose to redirect students to existing facilities that incorporated the MTYRE program.

-
- ⁴⁷ Chapter 886, Statutes of 1986, added provisions that capped the grant at \$125 per student.
- ⁴⁸ School districts that could not offer to cover any expenses (now referred to as a Priority 2) could conceivably wait years. MTYRE continues today, and has been a successful program. In 1997, more than 1.19 million or about 22 percent of California students attended schools with year-round calendars. The State Department of Education estimates that the MTYRE program has saved that State more than \$1.8 billion in construction costs since its inception. In 1997-98, \$66 million was allocated from the "mega item" of the state budget. About \$40 million was sent to Los Angeles Unified School District to cover the reported 40,872 excess students. However, once students are "excess," they can not be counted as students for the Office of Public School Construction in the erection of new facilities. Approximately 102,000 students are "excess." While the program has provided relief for school construction, it remains a controversy whether educationally the program is successful.

⁷⁹ Bazar, Emily and Jane Ferris. "Money for Portable Classrooms." Sacramento Bee, September 26, 1996.

⁸⁰ State bonds were proposed biannually in 1988, 1990, and 1992.

⁸¹ In 1976 and 1978 bond measures were defeated by the electorate.

⁸² "Lawmakers Scrap Over Billions in School Bonds." California Public Finance, May 5, 1997, p. 1.

⁸³ "Huge School Bond Mulled" California Public Finance, September 8, 1997, p. 1.

⁸⁴ This included the type of facility and the number of teaching stations (classrooms).

⁸⁵ The Department of Education, School Facilities Planning Division is responsible for site review and site plan review and is required to recommend all school locations for new schools and additions to schools site regardless of the funding source.

⁸⁶ For example, in 1988, the Los Angeles Unified School District wanted to rehabilitate a hotel into a school. The State Allocation Board paid \$48 million to an escrow account in an attempt to hold the price to acquire the Ambassador Hotel. When the school district and State Allocation Board realized that the site was not acceptable and decided to back out of the contract, they found that the developer had removed the money placed in the escrow account. In addition, when the district attempted to backpedal out of the contract, the owner sued for a breach of contract. Currently, there are negotiations between the school district and the owner of the property, Donald Trump.

⁸⁷ A school district was responsible for developing detailed cost estimates for the proposed school or addition. Site support costs provided funds for the preparation of environmental impact documents, development of relocation reports, determination of relocation claims, and negotiation of site purchases. The state reimburses up to 85 percent of the amount expended for eligible sites.

⁸⁸ This list was limited to those school facility components that have approached or exceeded their normal life expectancy.

⁸⁹ Applications for projects and appeals with correspondence from Carol A. Fisher, Apple Valley Unified School District, Author.

⁹⁰ Reimbursable fees and costs related to plans include architect fees, Division of State Architect/ORS Plan Check fee, CDE Plan Check Fee, Preliminary Tests (like soil, foundation, and exploratory borings) and other fees, for instance, advertising construction bids, and printing of plans.

⁹¹ Pascual, Psyche. "Funding to Build High School Finally Approved By State." Los Angeles Times, June 17, 1993.

⁹² Understanding the board's other five opinions would be difficult to track if not impossible to uncover.

⁹³ To evaluate the State Allocation Board's policies and procedures, it was necessary to obtain the State Allocation Board Handbook. The Handbook contains procedures and policies for reviewing and criteria for approving applications from school districts for bond funds to build new schools. When this report was initiated, the Handbook that the State Allocation Board provided was dated 1995, but contained policies adopted in 1993. Further, the State Allocation Board changes its policies and procedures often, and has no administrative process by which it updates its Handbook. An up-to-date, comprehensive list of policies and procedures was not available in any other format. A new handbook for the Lease Purchase Program was available on line - however, it also suffered from a lack of regular updating. The State Allocation Board meets every month and, hypothetically, policy changes can occur each month. Prior to Proposition 1A, despite being subject to the Administrative Procedures Act, the State Allocation Board had no public notice or participation requirements for the procedures by which it changes its policies. Only long-term policies are published in the California Regulatory Notice Register. Such policies included contracting and affirmative action requirements. Furthermore, staff reported that policies change so frequently, that it would be impossible to include relevant policies in the reporter or any other document.

⁹⁴ The number of students above the maximum number set by CDE to be in a classroom.

⁹⁵ The priority points ranking mechanism is based on, among other things, the percentage of currently and projected unhoused students relative to the total population of the applicant district or attendance area.

⁹⁶ In hardship cases, the State will fund more than 50 percent of new construction if a school district is unable to come up with its 50 percent match and had gone through a reasonable effort. Similarly, districts that are unable to offer a 20 percent match for modernization can seek relief from the State. Financial hardship is defined for those school districts that cannot afford to build, repair, or replace facilities because of fiscal restrictions (for example, an inability to match state funding because of an inability to pass local bonds or a lack of bonding capacity). Facility hardship can also apply to school districts that lack adequate housing for their pupils due to a lack of health and public safety conditions; or because of a natural disaster, traffic safety, or the remote geographic location of pupils (i.e., rural). Excessive costs may be attributed to geographic location, size of project, the cost associated with a new project in urban locations that may require high security or toxic cleanup, and sites that may require seismic retrofitting.

⁹⁷ The State Supreme Court ruled that school districts that were unable to accommodate enrollment growth could ask their city and county councils to limit real estate developers from building additional housing. Some developers found it necessary to offer additional resources (land or money) to get support from school districts and city councils for their projects.

⁹⁸ In three legal challenges, the courts have ruled that cities were not precluded from making zoning or other land-use decisions, because of the availability of classroom space, see *Mira Development Corporation v. City of San Diego*, *William S. Hart Union High School District v. Regional Planning Commission of the County of Los Angeles*, *Murietta Valley Unified School District v. County of Riverside*. The practical effect of the rulings was that cities could limit development on the basis of the supply of classrooms. Some developers found it necessary to offer additional resources, land or money, to get support from school districts and city councils for their projects.

⁹⁹ If the State expends all of its Proposition 1A resources prior to 2006, school districts can ask developers to pay 100 percent of site acquisition and school construction costs. In order to receive developer support under these conditions, school districts must participate in the Multi-Track Year-Round Education program. The Proposition includes language that the State may reimburse developers for up to 50 percent of their costs if subsequent bond funds become available.

¹⁰⁰ Under the old program, school districts had three application phases for each of their projects – planning, site, and construction. Under the new program, there is only one application phase for the entire project proposal, except under hardship provisions.

¹⁰¹ However, once the funds are distributed to the school district, the school district keeps the interest accrued on the funds.

APPENDIX A

School District Financing Mechanisms

In addition to state bond funds, school districts have a variety of other alternatives for funding school construction. These include developer fees, certificate of participation, general obligation bonds, and Mello-Roos taxes. Also, a developer may simply build a school rather than consider other financing alternatives.

Local General Obligation Bonds

In 1986, after an eight-year hiatus, school districts could once again use general obligation bonds to finance school facilities. Bonds are a favorable method of financing, even though they require a two-thirds vote and proceeds cannot be used for items such as buses and furnishings. In 1986, 14 school districts offered bond initiatives. In 1987 and 1988, this number grew to 51 and 54 school districts, respectively. In November 1998, 36 school districts held bond elections.¹⁰⁶

Developer Fees

In 1978, the Wilsona School District was the first to use developer fees. These fees added about \$2,000 to the cost of a typical home in the Lancaster area. While school districts were exacting developer fees, there was no statute that explicitly permitted this activity. The Legislature standardized the authority by giving school districts direct authority to charge developer fees. School districts welcomed developer fees especially because they did not require an election, and the funds associated with the fees could be used for a wide variety of facilities that were associated with enrollment growth. In response to a growing number of complaints from developers, the Legislature capped the amount that could be collected in 1986. Proposition 1A prohibited local agencies from using the inadequacy of school facilities as a reason for not approving housing development projects. The authority to raise developer fees was placed with the State Allocation Board. However, developer fees generally are not enough to cover the full costs of constructing a school.

Certificates of Participation

Certificates of Participation (COPs) are another, though complicated, tool for districts to raise money without voter consent. The most common arrangement is that the district leases a new school owned by another government agency or a nonprofit agency, which in turn raises the capital to build the school by selling shares (certificates of participation). In the long run, lien revenues COPs are remarkably like bonds. One disadvantage of the COP arrangement is that it does not provide a new revenue source for the lease payments. Funds usually come from the school district's general fund.

Mello-Roos

The Mello-Roos Community Facilities Act, established in 1982, authorized school districts and local governments to form "community facilities districts." Subject to the approval of two-thirds of the voters, these special districts could sell bonds to raise revenues for the purpose of financing new buildings, or to rehabilitate existing school facilities. A majority of Mello-Roos districts are created in inhabitable areas that are proposed for development where voting is by the landowners. The district sets a specific tax per house.

EXHIBIT C

Fiscal Management Advisory 07-02

DELAINE EASTIN
State Superintendent of Public Instruction

FISCAL MANAGEMENT ADVISORY 97-02

October 30, 1997

TO: County and District Superintendents

FROM: 
Patrick Keegan, Deputy Superintendent
Finance, Technology, and Information Services

SUBJECT: Fees, Deposits, and Other Charges

School district administrators frequently ask the Department to provide additional guidance on the matter of fees. This Advisory which supersedes Fiscal Management Advisory 87-03 is provided for that purpose, and reflects the most recent legislation and California Supreme Court interpretations. The following narrative contains a number of conclusions based on legal references. Most of these references are to a particular case or opinion. Those conclusions without attribution represent the opinions of the Department's Legal Office.

TUITION, FEES, DEPOSITS, AND OTHER CHARGES IN CALIFORNIA PUBLIC SCHOOLS, K-12 AND ADULT SCHOOLS

I. A Free Public School System

"A pupil enrolled in a school shall not be required to pay any fee, deposit, or other charge not specifically authorized by law."¹

With this language the State Board of Education made clear that fees are not to be imposed except where specifically authorized by law. This administrative regulation, or "law" of the State Board was promulgated based on the authority of Article IX, Section 5 of the California Constitution. Article IX, Section 5 provides for a free school system:

"The Legislature shall provide for a system of common schools by which a free school shall be kept up and supported in each district at least six months in every year, after the first year in which a school has been established."

The State Supreme Court in 1874 held that this provision entitled students to be educated at public expense.²

The Attorney General has, in several opinions,³ consistently ruled that school districts do not have authority to levy fees for any elective or compulsory class. Further, districts may not require security deposits for locks, lockers, books, class apparatus, musical instruments, uniforms, or other equipment.

The administrative regulation noted above prohibited fees except those "...specifically authorized by law." Certain fees have been authorized by law since the rule was promulgated.

The 1984 California Supreme Court decision, Hartzell v. Connell,⁴ raises serious questions about the imposition of a non-statutory fee for extracurricular activities. The lead opinion acknowledges that fees may be charged for "recreational" activities but not for "educational" activities. Extracurricular activities are described in the opinion as an integral component of public education; they are a part of the educational program according to this decision.

The court held that the "...imposition of fees for educational activities offered by public high school districts violates the free school guarantee. The constitutional defect in such fees can neither be corrected by providing waivers to indigent students nor justified by pleading financial hardship."

⁴35 Cal. 3d 899 (1984)

II. Fees Authorized by Law

The Education Code specifically authorizes certain fees. Except for home to school transportation fees discussed later, none of those Code sections have been challenged and the Hartzell v. Connell decision did not directly rule on their legality. Therefore, districts may continue to levy fees as authorized in the following Education Code sections:

- A. Fees that a district may collect for furnishing materials to a pupil for items the pupil has fabricated from such materials for his or her own use. Such fees may not exceed cost. (Education Code section 39526)
- B. Fees that a district may charge pupils for transportation to and from school under limited circumstances. (Education Code sections 38028, 39807.5 and 39837)
- C. Charges for food served to pupils. (Education Code sections 39870-39874, 39876)
- D. Charges to the parent or guardian of any pupil who loses a book, defaces books or other school property. Liability limits for lost items or damage are adjusted annually by the State Superintendent of Public Instruction pursuant to statute. (Education Code section 48904)
- E. Charges for field trips or excursions, principally for transportation. The authority to charge a fee for field trips or excursions is not directly stated in the Education Code. Rather, it provides that "No pupil shall be prevented from making the field trip or excursion because of lack of sufficient funds." (Education Code section 35330)
- F. Districts must make medical, hospital, or accident insurance available to pupils who may be injured while participating in field trips. The cost of the insurance may be paid by the pupil or his parents. (Education Code section 35331)
- G. Governing boards may expend from the general fund of the district any money which is budgeted for community services to establish and maintain community service classes. They may charge student fees not to exceed the cost of maintaining such classes. (Education Code section 51815)
- H. A governing board may charge a tuition fee to adults for any class except classes in English and citizenship for foreigners, classes in elementary subjects, and classes for which high school credit is granted when taken by a person not holding a high school diploma. (Education Code section 52612)

- I. Districts must provide, and each member of an athletic team must have, accidental death, injury and medical insurance coverage. The cost of such insurance may be paid by the pupil unless the pupil is unable to pay for such insurance. (Education Code sections 32220-32224)
- J. A school district may require a deposit from a borrower of school band instruments, music, uniforms, and other regalia for use on an excursion to a foreign country. (Education Code section 40015)
- K. Pupils whose parents are actual and legal residents of an adjacent foreign country or an adjacent state shall be charged a tuition fee. (Education Code sections 48050 and 48052)
- L. The regulations of the governing board may provide for the sale of materials purchased from the incidental expense account to pupils in classes for adults, for use in connection with such classes. The proceeds of all such sales shall be deposited in that account (Education Code section 52615). A high school district board may charge for textbooks used in classes for adults or impose a refundable deposit on loaned books. (Education Code section 60410)
- M. The governing board of a school district may sell class material to persons enrolled in classes for adults. This may include materials necessary for the making of articles by students enrolled in adult education. The materials shall be sold at not less than the cost to the district; any article made shall be the property of the person who made it. (Education Code section 39527)
- N. The governing board of any elementary, high, or unified school district may charge a fee for school camp programs, provided that payment of such fee is not mandatory. No pupil shall be denied the opportunity to participate in a school camp program because of non-payment of the fee. (Education Code section 35335)
- O. Families utilizing child care and development services shall be charged a fee by the school district, but no fees shall be assessed against families whose children are enrolled in the state preschool program, or for such services provided to severely handicapped children (Education Code sections 8263(c)(f) and 8250(d)). Standards for fees appear in Education Code section 8265. The school district may also impose a fee for a program of supervision of children before and after school. (Education Code section 8487 and 8488)
- P. School districts may offer a fingerprint program for children in kindergarten or newly enrolled children and shall assess a fee to the parent or guardian who chooses to participate. (Education Code section 32390)

III. District Obligation to Provide Without Charge.

The opinions of the Attorney General mentioned earlier indicate that charges may not be levied for the following:

- A. A deposit in the nature of a guarantee that the district would be reimbursed for loss to the district on account of breakage, damage to, or loss of school property.
- B. An admission charge to an exhibit, fair, theater or similar activity for instruction or extracurricular purposes when a visit to such places is part of the district's educational program.
- C. A tuition fee or charge as a condition to enrollment in any class or course of instruction, including a fee for attendance in a summer or vacation school, a registration fee, a fee for a catalog of courses, a fee for an examination in a subject, a late registration or program change fee, a fee for the issuance of a diploma or certificate, or a charge for lodging.
- D. Membership fees in a student body or any student organization as a condition for enrollment or participation in athletic or other curricular or extracurricular activities sponsored by the school.
- E. Education Code section 48053 prohibits charging an apprentice, or his or her parents or guardian, for admission or attendance in any class.
- F. Textbooks and workbooks must be furnished without charge by elementary and high school districts except for classes for adults. A charge may not be made for their use (Education Code sections 60070 and 60410).

Education Code section 40011 provides:

"Writing and drawing paper, pens, inks, blackboard erasers, crayons, lead pencils, and other necessary supplies for the use of the schools, shall be furnished under direction of the governing board of the school district."

The Attorney General has issued an opinion interpreting this language. He was asked specifically whether a student could be required to furnish any or all of the following:

- A. Art material for art classes and mechanical drawing sets
- B. Cloth to be used in dressmaking classes and wood for carpentry classes
- C. Gym suits and shoes for physical education classes

- D. Bluebooks in which to write a final examination
- E. Paper on which to write a theme or report when such theme or report is a required assignment.

The Attorney General concluded that all the above-mentioned materials were "necessary supplies" and as such had to be furnished by the school district. He reasoned that the articles listed in A, B, C, and D, "appear to be supplies that must be available to students in order to participate in regular classroom work in the particular subjects involved." As to E, the Attorney General stated that "paper to be used on which to write a theme or report must also be furnished when required as a part of the classroom activity."⁵

The Attorney General limited his discussion to the questions specifically asked and did not state what materials a district is not obligated to furnish. However:

"[s]upplies,...must be furnished free of cost to students when the supplies are what might be termed 'school supplies' and are necessary in order for the students to pursue a course of study."

The Attorney General's use of the term "school supplies" is meant to exclude from the district's obligation those items or materials which, although necessary for class participation, are essential regardless of whether or not a person is a student. For example, a school district would not be obligated to furnish corrective lenses, clothes, and so forth. Such items are needed whether or not one is a student.

Specifically with respect to gym clothes, Education Code section 49066(b) states that: "No grade of a pupil participating in a physical education class, however, may be adversely affected due to the fact that the pupil does not wear standardized physical education apparel where the failure to wear such apparel arises from circumstances beyond the control of the pupil," such as, for example, lack of funds.

It should be determined whether a fee for a particular item is specifically authorized by statute. If not, it should be determined whether a particular item is required by law to be furnished free or whether it comes under the category of "necessary supplies." If it does, then the district must furnish the item without charge.

It is the position of the Department that a school district may require its students to purchase their own gym clothes of a district specified design and color so long as the design and color are of a type sold for general wear outside of school. Once the required gym uniforms become specialized in terms of included logos, school name or other characteristics not found on clothing for general use outside of school, they are school supplies and the district must provide those uniforms free of charge.

It is the opinion of the Department's legal office that a school district may not charge a fee or require students to purchase necessary materials even if the

⁵Ops. Cal Atty. Gen. No. NS-4414, 1942

district maintains a special fund to assist students with financial need or waives such fee or charge for students with financial need. The fee or charge still remains a condition for all other students not so assisted. The court in Hartzell v. Connell, discussed below, held that a fee-waiver policy for needy students does not save the fee.

IV. Extracurricular Activities

On April 20, 1984, the California Supreme Court decided, in Hartzell v. Connell 35 Cal. 3d 899, that a public school district may not charge fees for educational programs simply because they are denominated "extracurricular." As expressed by the lead opinion, the court concluded that "the imposition of fees as a precondition for participation in non-statutory educational programs offered by public high schools on a noncredit basis violates the free schools guarantee of the California Constitution and the prohibition against school fees contained in Title 5, Section 350 of the California Administrative Code." (now California Code of Regulations).

Some significant observations by the various justices and ramifications of the decision are as follows:

- A. The lead opinion was written by Chief Justice Bird with Justices Broussard and Reynoso concurring specifically. The approach taken to the issue by the Chief Justice holds that the free school guarantee extends to all activities which constitute an integral, fundamental part of elementary and secondary education or which amount to necessary elements of any school's activity. The opinion concludes that extracurricular activities constitute an integral component of public education.
- B. The lead opinion holds that fee based extracurricular activities are also illegal under Title 5 California Code of Regulations 350 (5 CCR 350) which prohibits the imposition of "...any fee, deposit, or other charge not specifically authorized by law."
- C. Apart from the fee issue, this particular holding has wide reaching significance. Along with constitutional provisions and statutes, any regulation adopted by the State Board of Education or Superintendent of Public Instruction is a "law." Education Code section 35160, the so-called "permissive code" authority allows school districts to carry on any activity or act in any manner "...which is not in conflict with or inconsistent with, or preempted by, any law..."
- D. As noted above, several provisions of the Education Code permit school districts to impose charges or fees, e.g.: Section 35330 (field trips and excursions), Section 48909 (charge for lost textbook), Section 35335 (school camps), Sections 32220-32224 (requires members of athletic teams to purchase death, accident and hospital insurance), Section 40015 (deposit for use of a school musical instrument), Section 39804 (pupil transportation), and so forth. In

his separate opinion, in which he concurs in the judgment, Justice Kaus raised the question whether, under the decision, any of the statutory fees and charges (Paragraph II, supra) would be unconstitutional. Because none of the statutory fees were in issue, the court made no ruling in that respect. The Hartzell decision is binding precedent for invalidation of any non-statutory fees of the type examined by that court. Except for home to school transportation fees (Section 39807.5), the constitutionality of the statutory fees and charges is yet to be judicially decided.

- E. In a footnote the lead opinion states that the: "[e]ducational activities are to be distinguished from activities which are purely recreational in character. Examples of the latter might include attending weekend dances or athletic events." This statement may cause future litigation on the issue of whether the challenged fee based activity is educational or recreational. The issue is complicated by the fact that while citing an athletic event as possibly being recreational, the court invalidated a fee based athletic activity because it was held to be educational. This could be reconciled by interpreting the footnote as allowing a fee if the participation is solely as a spectator.
- F. The defendants argued that their fee-waiver policy for needy students satisfies the requirements of the free school requirement. They suggested that the right to be educated at public expense amounts merely to a right not to be financially prevented from enjoying educational opportunities. The court answered that such an argument plainly contradicts the plain free school language of the Constitution.

V. Home to School Transportation Fees

Education Code section 39807.5 allows school districts to charge parents a fee for home to school transportation provided to their children by the district. On a constitutional challenge the California Supreme Court in Arcadia School District v. State Department of Education,⁶ upheld the transportation fee statute. According to the court, permitting school districts to charge parents and guardians for the transportation of students to and from school does not violate the California Constitution free school guarantee. Unlike the extracurricular activities held to be free in Hartzell v. Connell (supra), transportation is neither an educational activity nor an essential part of school activity. Home to school transportation is not included within the free school guarantee.

⁶2 Cal.4th 251 (1992)

VI. Tuition for Summer School.

No statute specifically authorizes tuition for summer school. Therefore, tuition or any fee or charge is prohibited under Section 350 of Title 5 California Code of Regulations (supra at page 1), which according to the court in Hartzell v. Connell (supra), is a law within the meaning of the so-called permissive provisions of Education Code section 35160.

VII. Community Service Classes

The governing board of a school district is authorized to maintain community service classes and to charge fees to cover the costs of maintaining such classes (Education Code sections 51810 and 51815). These classes may be convened at any time during the school year as may be determined by the governing board (Education Code section 51812).

Community service classes are not intended to teach required courses that students in grades K-12 must complete as part of their instructional programs. Community service classes usually include classes in music, drama, art, handicraft, science, literature, nature study, nature contacting, aquatic sports, athletics, and other such classes of general interest to the community (See Education Code, section 51810). These classes are primarily intended for adults and are open only to those minors whom the governing board believes will profit from such classes (Education Code, section 51811). It is the Department's position, therefore, that community service classes may not be used as summer schools for K-12 students, except for the incidental attendance of students with special interest in the subjects being taught.

VIII. Summer Schools Conducted Under Contract by Private Parties

The provisions of law relating to contracts whereby private parties conduct a portion of the educational program are not entirely clear. Neither the California Constitution nor the Education Code specifically prohibits contracts for educational services. Education Code section 35160 authorizes districts to engage in any activity not prohibited by law.

Section 6, Article IX, of the California Constitution prohibits a school district from transferring, directly or indirectly, any part of the public school system, or the placing of any part of the public school system under the jurisdiction of any authority other than a public school authority. This constitutional provision was explained in CTA v. Fullerton.⁷ That case involved a school district which let a contract for a private vendor to conduct its driver training program. The court held that the district had not transferred a part of the school system, but only a part of the curriculum. The court's reasoning is that the curriculum is only a function of the system and not a part of the system. This reasoning would seem also to validate contracting for a summer school program. However, in discussing this constitutional prohibition, the court stated that the Constitution would be violated if the control and management of the driver training program were to be transferred to a private authority. This would be true because the various

⁷82 Cal.App.3d 249, 1978

administrative units authorized to maintain and administer the curriculum with the public school system constitute, along with the curriculum, a part of the system. Thus, contracting for a summer school program would be valid under Article IX, Section 6 only if the school district maintains exclusive control and management of the educational program.

The requirement for the maintenance of control and management, however, places the contracting district in a legally impossible position when tuition fees are charged. If the contractor providing the program charges tuition the district might thereby be in violation of the prohibition against tuition charges.

IX. Leasing School Buildings for Educational Use.

The Education Code provides authority for school districts to lease, or allow the use of, unneeded school buildings and classroom space, or to enter into joint occupancy or joint use agreements with private entities including private schools. (Education Code sections 39360, 39379, 39380, 39381, 39440, 39444, 39470, and 40040, et seq.)

When authorizing school buildings to be used by another entity for a summer school program, however, the district should consider the following:

- A. When leasing to a sectarian organization, the district must avoid violating the religious establishment prohibition of the First Amendment to the United States Constitution. According to the California Attorney General, a school district cannot lease or loan vacant classrooms to a sectarian institution for religious purposes while public school is concurrently in session.⁸
- B. The use granted under the Civic Center Act must not result in a monopoly for the benefit of any person or organization. (Education Code section 40041 et seq.) (Effective 1/1/98 renumbered to 38130)

X. Charter Schools.

Education Code section 47605(d) prohibits a charter school from charging tuition, but does not mention fees or other charges. Should it be argued that a certain educationally based fee or other charge is not in the nature of a tuition, the charter school would, nevertheless, be prohibited from assessing them. Although a charter school is exempt from the laws governing school districts (Education Code section 47610), the California Constitution, which is the highest law of the state, cannot be rendered inapplicable by the Legislature. Therefore, any tuition, fee or other charge relating to the charter school's educational program is prohibited by the free school guarantee of the California Constitution Article IX, Section 5, as interpreted in Hartzell v. Connell, supra.

⁸60 Ops. Cal. Atty. Gen. 269

XI. Educational Clinics.

A certified clinic may not charge any fee for services to any pupil or to the parent, guardian, or custodian of any pupil for which the clinic receives reimbursement (Education Code section 58557)

The purpose of this Advisory is to inform school districts and county superintendents of the existing law involving fees in the schools and of the various cases and opinions on the subject. It is not intended to create any new law or to create any new obligations and should not be used as a basis for any legal action. It is not intended to create any new obligations and should not be used as a basis for any legal action. It is not intended to create any new obligations and should not be used as a basis for any legal action.

Questions about this advisory may be directed to the Department's Legal Office 916-657-2452.

 U.S. Bank Plaza Building
 980 Ninth Street, Suite 300
 Sacramento, California 95814

Re: Test Claim 02-TC-43
 Clovis Unified School District
Hazardous Material Assessments

Dear Ms. Higashi:

I have received the additional Memorandum of the Department of Toxic Substances Control ("DTSC") dated February 6, 2004, to which I now respond on behalf of the test claimant.

The DTSC, which is in the pleasant position of being able to charge school districts and other government agencies for the cost of its services, suggests at page 5, that school districts fund their hazardous material costs (and all other school facilities construction) through "general obligation bonds, Mello-Roos, developer fees, proceeds from the sale of surplus property and federal grants." This presumes that these other "sources" are available to fund mandated activities, rather than the purpose the legislature intended.

In Butt v. State of California (1992) 4 Cal.4th 668¹, the Supreme Court acknowledged that public education is a constitutional obligation of the state and that the opportunity to receive schooling must be made to all on an equal basis. (Opinion, at 680-681) The court then reminded us that, in Serrano II², the court had struck down the then existing State public school financing scheme, which caused the amount of basic revenues per pupil to vary substantially among the respective districts depending on their taxable property values. (Opinion, at 683)

¹ A copy of Butt v. California is attached to test claimants response dated February 20, 2004, as Exhibit "A".

² Serrano v. Priest (1971) 5 Cal.3d-584

The DTSC's suggestion that school districts fund their hazardous material costs (and all other school facilities construction) through "general obligation bonds, Mello-Roos, developer fees, and proceeds from the sale of surplus property brings us back pre-Serrano. A school district which can no longer issue general obligation bonds would be unable to provide adequate housing for its children. A school district in a blighted or fully-developed area would not have the opportunity to assess developer fees and would be unable to provide needed facilities for its pupils. Likewise, a school district that does not have surplus property to sell would have to deny its students the new sites and buildings that the district may so desperately need. Since the quality of school facilities would then depend on the wealth of each individual district, DTSC's argument violates the equal protection laws of the State constitution. Article 1, §7, subdivisions (a)(b); Article IV, §16, subdivision (a).

CERTIFICATION

I certify by my signature below, under penalty of perjury under the laws of the State of California, that the statements made in this document are true and complete to the best of my own personal knowledge or information and belief.

Sincerely,

Keith B. Petersen

DECLARATION OF SERVICE

RE: Hazardous Materials Preparation 02-TC-43
CLAIMANT: Clovis Unified School District

I declare:

I am employed in the office of SixTen and Associates, which is the appointed representative of the above named claimant(s). I am 18 years of age or older and not a party to the within entitled matter.

On the date indicated below, I served the attached: letter of February 23, 2004, addressed as follows:

Paula Higashi
Executive Director
Commission on State Mandates
980 Ninth Street, Suite 300
Sacramento, CA 95814

AND per mailing list attached

FAX: (916) 445-0278

U.S. MAIL: I am familiar with the business practice at SixTen and Associates for the collection and processing of correspondence for mailing with the United States Postal Service. In accordance with that practice, correspondence placed in the internal mail collection system at SixTen and Associates is deposited with the United States Postal Service that same day in the ordinary course of business.

FACSIMILE TRANSMISSION: On the date below from facsimile machine number (858) 514-8645, I personally transmitted to the above-named person(s) to the facsimile number(s) shown above, pursuant to California Rules of Court 2003-2008. A true copy of the above-described document(s) was(were) transmitted by facsimile transmission and the transmission was reported as complete and without error.

OTHER SERVICE: I caused such envelope(s) to be delivered to the office of the addressee(s) listed above by:

____ (Describe)

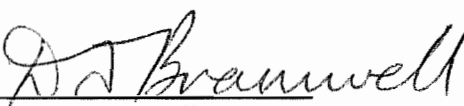

A copy of the transmission report issued by the transmitting machine is attached to this proof of service.

PERSONAL SERVICE: By causing a true copy of the above-described document(s) to be hand delivered to the office(s) of the addressee(s).

I declare under penalty of perjury that the foregoing is true and correct and that this declaration was executed on 2/23/04, at San Diego, California.

Re: Notice of Consolidation of Test Claims and Hearing Date
Hazardous Materials Assessments (02-TC-43) and
School Facilities Funding Requirements (02-TC-30)
Clovis Unified School District, Claimant

Dear Mr. Johnston:

After reviewing the *Hazardous Materials Assessments* Test Claim (02-TC-43) and the *School Facilities Funding Requirements Test Claim* (02-TC-30), Commission staff finds that they share common issues, allegations and involve some of the same statutes. Specifically, the test claims include statutes and executive orders that address how school districts receive state aid for school site acquisition and school construction. To ensure complete and fair consideration of these claims, they shall be consolidated pursuant to my authority under California Code of Regulations, title 2, section 1183.06, and effective 10 days from the service of this notice.

For future correspondence, the test claims will be designated *School Facilities Funding Requirements*, 02-TC-30 and 02-TC-43. A consolidated mailing list is enclosed. This test claim is tentatively set for hearing on July 30, 2010.

As provided in the Commission's regulations, this action and decision of the executive director may be appealed to the Commission for review. Please refer to California Code of Regulations, title 2, section 1181, subdivision (c).

Please contact me at (916) 323-8210 if you have any questions or concerns regarding this matter.

Sincerely,

PAULA HIGASHI
Executive Director

Re: Request for Clarification on Test Claim Filing
School Facilities Funding Requirements, 02-TC-30 and 02-TC-43
Clovis Unified School District, Claimant

Dear Mr. Johnston:

Commission staff is reviewing the *School Facilities Funding Requirements (02-TC-30 and 02-TC-43)* test claim filings and needs further clarification from the district regarding the code sections and statutes that were pled in 02-TC-43.

Health and Safety Code sections 25358.7 and 25358.7.1 are pled, but the statutes that added or amended these sections are not pled. Additionally, Statutes 1991, chapter 1183 is pled, but this statute does not amend any of the code sections pled.

To ensure complete and fair consideration of your claim, please respond within thirty (30) days or no later than May 27, 2010, indicating which statutes that add or amend Health and Safety Code sections 25358.7 and 25358.7.1 are alleged to contain a mandate, and which specific sections of Statutes 1991, chapter 1183 are alleged to contain a mandate.

Please be advised that this test claim is tentatively set for hearing on December 2 or 3, 2010.

Please contact Heather Halsey at (916) 323-3562 if you have any questions regarding this matter.

Sincerely,

PAULA HIGASHI
Executive Director

**RE: School Facilities Funding Requirement, 02-TC-40; 02-TC-43
Response to Staff Comments dated April 27, 2010
Clovis Unified School District, Claimant**

Dear Ms. Higashi:

In response to the Commission's letter dated April 27, 2010 requesting clarification of the test claim filing of School Facilities Funding Requirements, claimant submits the following information in support of their request to amend the above mentioned test claim as follows:

Written Narrative; Declaration; Documentation; Claim Certification pertaining to the following Statutes and Code Sections.

A. The statutes that add or amend Health & Safety Code sections 25358.7 and 25358.7.1 are Statutes 1999 Chapter 23 (SB 47).

B. In Statutes 1991, Chapter 1183 (AB 928) the following sections contain a mandate:

1. Education Code section 39003; Section 1
(Repealed by Stats.1996, c. 277 (S.B.1562), § 6, operative Jan. 1, 1998)

2. Education Code section 39120; Section 1, 2.
(Repealed by Stats.1996, c. 277 (S.B.1562), § 6, operative Jan. 1, 1998)

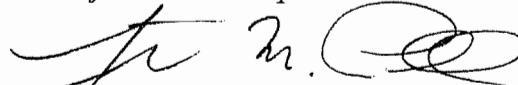

3. Public Resources Code section 21151.4, Section 17.
(Amended Stats.2004, c. 689 (S.B.945), § 5; Stats.2008, c. 148 (A.B.2720), § 1.)

4. Public Resources Code section 21151.8, Section 18.
(Amended Stats.2003, c. 668 (S.B.352), § 3; Stats.2007, c. 130 (A.B.299), § 206; Stats.2008,

c. 148 (A.B.2720), § 2.)

Very truly yours,

Please identify all code sections, statutes, bill numbers, regulations, and/or executive orders that impose the alleged mandate (e.g., Penal Code Section 2045, Statutes 2004, Chapter 54 [AB 290]). When alleging regulations or executive orders, please include the effective date of each one.

Test Claim/Amendment

A. Statutes 1999 Chapter 23 (SB 47):
 1. Health & Safety Code section 25358.1
 2. Health & Safety Code section 25358.7.1

B. Statutes 1991 Chapter 1183 (AB 928):
 1. Education Code section 39003; Section 1 (Repealed by Stats.1996, c. 277 (S.B.1562), § 6, operative Jan. 1, 1998)
 2. Education Code section 39120; Section 1,2. (Repealed by Stats. 1996, c. 277 (S.B.1562), § 6, operative Jan. 1, 1998)
 3. Public Resources Code section 21151.4, Section 17. (Amended Stats.2004, c. 689 (S.B.945), § 5; Stats.2008, c. 148 (A.B.2720), § 1.)
 4. Public Resources Code section 21151.8, Section 18. (Amended Stats.2003, c. 668 (S.B.352), § 3; Stats.2007, c. 130 (A.B.299), § 206; Stats.2008, c. 148 (A.B.2720), § 2.)

Copies of all statutes and executive orders cited are attached.

Sections 5, 6, and 7 are attached as follows:
5. Written Narrative: pages 1 to 28
6. Declarations: pages 29 to 50
7. Documentation: pages 51 to 51

Test Claim Name: **School Facilities Funding Requirements (02-TC-30 and 02-TC-43)**
Claimant: **Clovis Unified School District**

Section Number: 5
Heading: WRITTEN NARRATIVE

Amendment To Test Claim:

A. Statutes 1999 Chapter 23 (SB 47):

1. Health & Safety Code section 25358.1
2. Health & Safety Code section 25358.7.1

B. Statutes 1991 Chapter 1183 (AB 928):

1. Education Code section 39003; Section 1
(Repealed by Stats.1996, c. 277 (S.B.1562), § 6, operative Jan. 1, 1998)

2. Education Code section 39120; Section 1, 2.
(Repealed by Stats.1996, c. 277 (S.B.1562), § 6, operative Jan. 1, 1998)

3. Public Resources Code section 21151.4, Section 17.
(Amended Stats.2004, c. 689 (S.B.945), § 5; Stats.2008, c. 148 (A.B.2720), § 1.)

4. Public Resources Code section 21151.8, Section 18.
(Amended Stats.2003, c. 668 (S.B.352), § 3; Stats.2007, c. 130 (A.B.299), § 206; Stats.2008, c. 148 (A.B.2720), § 2.)

Section (A)

That the actual and/or estimated costs resulting from the alleged mandate exceeds one thousand dollars (\$1,000), and include all of the following elements for each statute or executive order alleged:

The new activities that arise from the mandate:

1999 Statutes Chapter 23 (SB 47)

Health & Safety Code section 25358.1 and Health & Safety Code section 25358.7.1 have been previously pled in the test claim. Claimant hereby amends the test claim to include 1999 Statutes Chapter 23 (SB 47).

Among other activities alleged in the original filing, this bill would require the department and the regional board to provide specified information to the affected community and to develop a public participation work plan, and would provide for the establishment of community advisory groups under specified conditions. The bill would authorize a community advisory group to request a technical assistance grant for a site. The department and the State Water Resources Control Board would be required to create 2 community service offices, by July 1, 2000, to perform specified duties.

<< CA HEALTH & S § 25358.1 >>

25358.1. (a) The department, a representative of the department, or any person designated by the director may take the actions specified in this section only if there is a reasonable basis to believe that there may be a release or threatened release of a hazardous substance, and only for the purpose of determining under this chapter the need for a response action, the choosing or taking of a response action, or otherwise for the purpose of enforcing this chapter.

(b) Any officer or employee of the department, a representative of the director, or a person designated by the director may require any potentially responsible party, or any person who has, or may have, acquired information relevant to any of the following matters in the course of a commercial, ownership, or contractual relationship with any potentially responsible party, to furnish, upon reasonable notice, information or documents relating to the following matters:

(1) The identification, nature, and quantity of materials which have been, or are, generated, treated, stored, or disposed of at a hazardous substance release site or which have been, or are, transported to a hazardous substance release site.

(2) The nature or extent of a release or a threatened release of a hazardous substance at, or from, a hazardous substance release site.

(c) A person who is required to provide information pursuant to subdivision (b) shall, in accordance with subdivision (h), allow the officer, employee, representative, or designee, upon reasonable notice and at reasonable times, to have access to, and copy, all records relating to the hazardous substances for purposes of assisting the department in determining the need for an action in response to a release or threatened release pursuant to this chapter.

(d) Any officer or employee of the department, representative of the director, or person designated by the director may, in accordance with subdivision (h), enter, at reasonable times, any of the following properties:

(1) Any nonresidential establishment or other place or property where any hazardous substances

may be, or have been, produced, stored, treated, disposed of, or transported from.

(2) Any nonresidential establishment or other place or property from which, or to which, a hazardous substance has been, or may have been, released.

(3) Any nonresidential establishment or other place or property where a hazardous substance release is, or may be, threatened.

(4) Any nonresidential establishment or other place or property where entry is needed to determine the need for a response action, or the appropriate remedial action, to effectuate a response action under this chapter.

(5) Any residential place or property which, if it were a nonresidential establishment or other place or property, would otherwise meet the criteria described in paragraphs (1) to (4), inclusive, if the department, representative, or person designated by the director is able to establish, based upon reasonably available evidence, that hazardous substances have been released onto or under the residential place or real property and if entry is made only at reasonable times and after reasonable notification to the owners and occupants.

(e) Any officer or employee of the department, representative of the director, or person designated by the director may, in accordance with subdivision (h), carry out any of the following activities:

(1) Inspect and obtain samples from any establishment or other place or property specified in subdivision (d) or from any location of any suspected hazardous substance.

(2) Inspect and obtain samples of any substances from any establishment or place or property specified in subdivision (d).

(3) Inspect and obtain samples of any containers or labeling for the suspected hazardous substances, and samples of the soil, vegetation, air, water, and biota on the premises.

(4) Set up and maintain monitoring equipment for the purpose of assessing or measuring the actual or potential migration of hazardous substances.

(5) Survey and determine the topographic, geologic, and hydrogeologic features of the land.

(6) Photograph any equipment, sample, activity, or environmental condition described in paragraphs (2) to (5) inclusive.

(f)(1) If photographs are to be taken pursuant to paragraph (6) of subdivision (e), the department shall do all of the following:

(A) Comply with all procedures established pursuant to subdivision (b) of Section 25358.2.

(B) Notify the person whose facility is photographed prior to public disclosure of the photographs.

(C) Upon the request of the person owning the facility, submit a copy of any photograph to the person for the purpose of determining whether trade secret information, as defined in Section 25358.2, or facility security, would be revealed by the photograph.

(2) "Disclosure," as used in Section 25358.2, for purposes of this paragraph, does not include the review of the photograph by a court of competent jurisdiction or by an administrative law judge. A court or judge may review the photograph in camera.

(g) An officer, employee, representative, or designee who enters a place, establishment, or property pursuant to this section shall make a reasonable effort to inform the owner or the owners' authorized representative of the inspection and shall provide split samples to the owner or the representative upon request.

(h) If the owner or the owner's authorized representative does not voluntarily grant access to a place, establishment, or property pursuant to this section, the officer, employee, representative, or designee shall first obtain a warrant pursuant to Title 13 (commencing with Section 1822.50) of Part 3 of the Code of Civil Procedure. However, if there is an emergency posing an immediate threat to public health and safety, the officer, employee, representative, or designee may enter the place, establishment, or property without the consent of the owner or owner's authorized representative and without the issuance of a warrant.

(i) The department, and any person authorized by the department to enter upon any lands for the purpose of taking removal or remedial action pursuant to this chapter, shall not be held liable, in either a civil or criminal proceeding, for trespass or for any other acts which are necessary to carry out the corrective action.

<< CA HLTH & S § 25358.7.1 >>

25358.7.1. (a) At each site, a community advisory group may be established by the affected community to review any response action and comment on the response action to be conducted in that community. The department or regional board shall regularly communicate, and confer as appropriate, with the community advisory committee. The department or regional board shall

also advise local environmental regulatory agencies and other appropriate local agencies of planned response actions and provide opportunities for review and comment. If the department or regional board, whichever is overseeing a response action, receives a petition signed by at least 50 members of a community affected by the response action at a site or a resolution adopted by the legislative body of the jurisdiction within which the response action has been or will be initiated, the department or regional board shall assist the petitioners or the legislative body to establish a community advisory group to review the response action at the site.

(b) To the extent possible, the composition of each community advisory group shall reflect the composition of the affected community and the diversity of interests of the community by including all of the following types of individuals on the community advisory group:

(1) Persons owning or residing on property located near the hazardous substance release site or in an adjacent community, or other persons who may be directly affected by the response action.

(2) Individuals from the local business community.

(3) Local political or government agency representatives.

(4) Local citizen, civic, environmental, or public interest group members residing in the community.

(c) The following entities may participate in community advisory group meetings in order to provide information and technical expertise:

(1) The department or regional boards.

(2) Representatives of local environmental regulatory agencies.

(3) The potentially responsible parties or other persons who are conducting the response action.

(d) The existence of a community advisory group shall not diminish any other obligation of the department or regional board with respect to public participation requirements specified in Section 25358.7. Nothing in this section shall affect the status of any citizen advisory group formed before the enactment of this section, a federal Department of Defense Restoration Advisory Board, or a federal Department of Energy Advisory Board.

The new activities that arise from the mandate:
1991 Statutes Chapter 1183 (AB 928)

This bill would additionally provide that before the governing board approves a school construction project or the acquisition of a schoolsite, or before an environmental impact report or negative declaration is approved for a school construction project or the purchase of a schoolsite, the lead agency is also required to identify facilities which might be reasonably anticipated to handle acutely hazardous materials, substances, or waste, thereby imposing a state-mandated local program. The bill would include an additional finding which the governing board would be authorized to make, if these facilities exist, concerning the corrective measures which these facilities are required to take. The bill would require specified local agencies which receive a request to provide information concerning these facilities to respond in 30 days, thereby imposing a state-mandated local program by imposing new duties upon local agencies.

This bill would require that notice to be given prior to approving an application for a source which emits hazardous air emissions which is located within 1,000 feet of a school, as defined, and would require the notice to be distributed to additional persons, thereby imposing a state-mandated local program. The bill would authorize the preparation of the notice under prescribed circumstances. The bill would make the notice requirements inapplicable if the air pollution control officer makes specified determinations.

The bill would define school for purposes of the RMPP procedures and would authorize the administering agency to grant a one-time extension of the deadline to submit a corrected RMPP. The bill would require the administering agency to review any claim for a trade secret protection and to segregate properly substantiated trade secret information from the information to be made public. The bill would impose new duties upon administering agencies, thereby imposing a state-mandated local program.

The bill would require the school district to make the information necessary to mail notices required by these provisions available to the air pollution control officer and would allow the notices to be distributed to the children to be given to their parents.

The bill would require applicants for a permit to certify whether the project is located within 1,000 feet of a school, and would authorize denial of the permit upon misrepresentation of that fact.

SECTION 1. Section 39003 of the Education Code is amended to read:

<< CA EDUC § 39003 >>

39003. The governing board of a school district shall not approve a project involving the

(2) "Hazardous substance" <<-* * *->> <<+means any substance+>> defined in Section 25316 of the Health and Safety Code.

(3) "Acutely hazardous material" <<-* * *->> <<+means any material+>> defined <<-* * *->> <<+pursuant to+>> subdivision (a) of Section 25532 of the Health and Safety Code.

(4) "Hazardous waste" <<-* * *->> <<+means any waste+>> defined in Section 25117 of the Health and Safety Code.

(5) "Hazardous waste disposal site" <<-* * *->> <<+means any site+>> defined in Section 25114 of the Health and Safety Code.

<<+(6) "Administering agency" means any agency designated pursuant to Section 25502 of the Health and Safety Code.+>>

<<+(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.+>>

SEC. 2. Section 39120 of the Education Code is amended to read:

<< CA EDUC § 39120 >>

SEC. 1. Section 39120 of the Education Code is amended to read:

(b) The lead agency<<+, as defined in Section 21067 of the Public Resources Code,+>> preparing the environmental impact report or negative declaration has consulted with the <<-* * *->> <<+administering agency+>> in which the proposed schoolsite is located <<-* * *->> and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed schoolsite which might reasonably be anticipated to emit hazardous air emissions<<+, or to handle hazardous or acutely hazardous materials, substances, or waste. The lead agency shall include a list of the locations for which information is sought+>>.

(c) The governing board of the school district makes <<+one+>> of the following written findings:

(1) Consultation identified none of the facilities specified in subdivision (b).

(2) The facilities specified in subdivision (b) exist, but <<-* * *->> <<+one of the following conditions applies:+>>

<<+(A) T+>>he health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the school.

<<+(B) The governing board finds that corrective measures required under an existing order by another jurisdiction which has jurisdiction over the facilities will, before the school is occupied,

result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes this finding, the governing board shall also make a subsequent finding, prior to the occupancy of the school, that the emissions have been mitigated to these levels.+>>

SEC. 2. Section 39120 of the Education Code is amended to read:

39120. <<+(a)+>> The governing board of a school district shall not approve a project for the construction of a new school building, as defined in Section 39141, unless the project and its lead agency <<+comply+>> with the same requirements specified in <<+subdivision (a) of+>> Section 39003 for schoolsite acquisition.

<<+(b) For purposes of this section, the acceptance of construction bids shall constitute approval of the project.+>>

SEC. 17. Section 21151.4 of the Public Resources Code is amended to read:

21151.4. No environmental impact report or negative declaration shall be approved for any project involving the construction or alteration of a facility within <<+ 1/4+>> of a mile of a school which might reasonably be anticipated to emit hazardous or acutely hazardous air <<-* * *->> <<+ emission, or which would handle acutely hazardous material or a mixture containing acutely hazardous material in a quantity equal to or greater than the quantity specified in subdivision (a) of+>> Section <<-* * *->> <<+ 25536 of the Health and Safety Code, which may pose a health or safety hazard to persons who would attend or would be employed at the school,+>> unless both of the following occur:

(a) The lead agency preparing the environmental impact report or negative declaration has consulted with the school district having jurisdiction regarding the potential impact of the project on the school.

(b) The school district has been given written notification of the project not less than 30 days prior to the proposed approval of the environmental impact report or negative declaration.

SEC. 18. Section 21151.8 of the Public Resources Code is amended to read:

21151.8. (a) No environmental impact report or negative declaration shall be approved for any project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless <<-* * *->> <<+all of the following occur:+>> <<+(1) T+>>he environmental impact report or negative declaration includes information which is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

<<+(A)+>> The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

<<+(B)+>> A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

<<+(C)+>> A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

<<+(2)+>> The lead agency preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed schoolsite is located, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed schoolsite which might reasonably be anticipated to emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste. The notification by the lead agency shall include a list of the locations for which information is sought.+>>

<<+(3)+>> The governing board of the school district makes one of the following written findings:+>>

<<+(A)+>> Consultation identified no such facilities specified in paragraph (2).+>>

<<+(B)+>> The facilities specified in paragraph (2) exist, but one of the following conditions applies:+>>

<<+(i)+>> The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.+>>

<<+(ii)+>> Corrective measures required under an existing order by another agency having jurisdiction over the facilities will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes such a finding, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.+>>

<<+(4)+>> Each administering agency, air pollution control district, or air quality management district receiving written notification from a lead agency to identify facilities pursuant to paragraph (2) shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. The environmental impact report or negative declaration shall be conclusively presumed to comply with this section as to the area of responsibility of any agency which does not respond within 30 days.+>>

<<+(b)+>> If a lead agency has carried out the consultation required by paragraph (2) of subdivision (a), the environmental impact report or the negative declaration shall be conclusively presumed to comply with this section, notwithstanding any failure of the consultation to identify an existing facility specified in paragraph (2) of subdivision (a).+>>

<<+(c)+>> As used in this section <<+and Section 21151.4, the following definitions shall apply+>>:

- (1) "Hazardous substance" <<-* * *->> <<+means any substance+>> defined in Section 25316 of the Health and Safety Code.
- (2) "Acutely hazardous material" <<-* * *->> <<+means any material+>> defined <<-* * *->> <<+pursuant to+>> subdivision (a) of Section 25532 of the Health and Safety Code.
- (3) "Hazardous waste" <<-* * *->> <<+means any waste+>> defined in Section 25117 of the Health and Safety Code.
- (4) "Hazardous waste disposal site" <<-* * *->> <<+means any site+>> defined in Section 25114 of the Health and Safety Code.
- <<+(5) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.+>>
- <<+(6) "Administering agency" means an agency designated pursuant to Section 25502 of the Health and Safety Code.+>>
- <<+(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.+>>

AMENDED 2003 Cal. Legis. Serv. Ch. 668 (S.B. 352)

AN ACT to amend Section 21151.8 of the Public Resources Code, and Education Code Section 17213 relating to public schools.

This bill would, in addition, prohibit the approval by the governing board of a school district of a schoolsite that is within 500 feet from the edge of the closest traffic lane of a freeway or other busy traffic corridor, unless prescribed conditions are met and would make conforming and other technical, nonsubstantive changes.

This bill would define "facility" for this purpose and would require the lead agency to consult to identify freeways and other busy traffic corridors, as defined, large agricultural operations, and railyards, within 1/4 of a mile of the schoolsite, and would make conforming and other technical, nonsubstantive changes.

<< CA EDUC § 17213 >>

17213. The governing board of a school district may not approve a project involving the acquisition of a schoolsite by a school district, unless all of the following occur:

(a) The school district, as the lead agency, as defined in Section 21067 of the Public Resources Code, determines that the property purchased or to be built upon is not any of the following:

(1) The site of a current or former hazardous waste disposal site or solid waste disposal site* * *, unless if the site was a former solid waste disposal site, the governing board of the school district

concludes that the wastes have been removed.

(2) A hazardous substance release site identified by the * * *Department of * * *Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(3) A site that contains one or more pipelines, situated underground or aboveground, that carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line that is used only to supply natural gas to that school or neighborhood.

(b) The school district, as the lead agency, as defined in Section 21067 of the Public Resources Code, in preparing the environmental impact report or negative declaration has consulted with the administering agency in which the proposed schoolsite is located, pursuant to Section 2735.3 of Title 19 of the California Code of Regulations, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify both permitted and nonpermitted facilities within that district's authority, including, but not limited to, freeways and other busy traffic corridors, large agricultural operations, and railyards, within one-fourth of a mile of the proposed schoolsite* * *, that might reasonably be anticipated to emit hazardous air emissions, or to handle hazardous or acutely hazardous materials, substances, or waste. The school district, as the lead agency, shall include a list of the locations for which information is sought.

(c) The governing board of the school district makes one of the following written findings:

(1) Consultation identified none of the facilities or significant pollution sources specified in subdivision (b).

(2) The facilities or other pollution sources specified in subdivision (b) exist, but one of the following conditions applies:

(A) The health risks from the facilities or other pollution sources do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the school.

(B) The governing board finds that corrective measures required under an existing order by another governmental entity that has jurisdiction over the facilities or other pollution sources will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes this finding, the governing board shall also make a subsequent finding, prior to the occupancy of the school, that the emissions have been mitigated to these levels.

(C) For a schoolsite with a boundary that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor, the governing board of the school district determines, through analysis pursuant to paragraph (2) of subdivision (b) of Section 44360 of the Health and Safety Code, based on appropriate air dispersion modeling, and after considering any potential mitigation measures, that the air quality at the proposed site is such that neither short-term nor long-term exposure poses significant health risks to pupils.

(D) The governing board finds that neither of the conditions set forth in subparagraph (B) or (C)

can be met, and the school district is unable to locate an alternative site that is suitable due to a severe shortage of sites that meet the requirements in subdivision (a) of Section 17213. If the governing board makes this finding, the governing board shall adopt a statement of Overriding Considerations pursuant to Section 15093 of Title 14 of the California Code of Regulations.

(d) As used in this section:

(1) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substance identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(2) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(3) "Acutely hazardous material" means any material defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(4) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(5) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(6) "Administering agency" means any agency designated pursuant to Section 25502 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(8) "Facilities" means any source with a potential to use, generate, emit or discharge hazardous air pollutants, including, but not limited to, pollutants that meet the definition of a hazardous substance, and whose process or operation is identified as an emission source pursuant to the most recent list of source categories published by the California Air Resources Board.

(9) "Freeway or other busy traffic corridors" means those roadways that, on an average day, have traffic in excess of 50,000 vehicles in a rural area as defined in Section 50101 of the Health and Safety Code, and 100,000 vehicles in an urban area, as defined in Section 50104.7 of the Health and Safety Code.

SEC. 3. Section 21151.8 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.8 >>

21151.8. (a) An environmental impact report or negative declaration * * *may not be approved for any project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless all of the following occur:

(1) The environmental impact report or negative declaration includes information that is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

(A) The site of a current or former hazardous waste disposal site or solid waste disposal site and,

if so, whether the wastes have been removed.

(B) A hazardous substance release site identified by the * * *Department of * * *Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) A site that contains one or more pipelines, situated underground or aboveground, that carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line that is used only to supply natural gas to that school or neighborhood, or other nearby schools.

(D) A site that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor.

(2) The school district, as the lead agency, in preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed schoolsite is located, pursuant to Section 2735.3 of Title 19 of the California Code of Regulations, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify both permitted and nonpermitted facilities within that district's authority, including, but not limited to, freeways and busy traffic corridors, large agricultural operations, and railyards, within one-fourth of a mile of the proposed schoolsite* * *, that might reasonably be anticipated to emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste. The notification by the school district, as the lead agency, shall include a list of the locations for which information is sought.

(3) The governing board of the school district makes one of the following written findings:

(A) Consultation identified no facilities of this type or other significant pollution sources specified in paragraph (2).

(B) The facilities or other pollution sources specified in paragraph (2) exist, but one of the following conditions applies:

(i) The health risks from the facilities or other pollution sources do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities or other pollution sources will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes * * *a finding pursuant to this clause, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

(iii) For a schoolsite with a boundary that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor, the governing board of the school district determines, through analysis pursuant to paragraph (2) of subdivision (b) of Section 44360 of the Health and Safety Code, based on appropriate air dispersion modeling, and after considering any potential mitigation measures, that the air quality at the proposed site is such that neither short-term nor

traffic in excess of 50,000 vehicles in a rural area, as defined in Section 50101 of the Health and Safety Code, and 100,000 vehicles in an urban area, as defined in Section 50104.7 of the Health and Safety Code.

Amended Stats. 2004, c. 689 (S.B.945), § 5

This bill would, instead, specify that an environmental impact report shall not be certified and a negative declaration shall not be approved for any project involving the construction or alteration of a facility within 1/4 of a mile of a school that might reasonably be anticipated to emit hazardous air emissions, or that would handle extremely hazardous substances in a quantity equal to or greater than a specified state threshold quantity prescribed by statute that may pose a health or safety hazard to persons who would attend or would be employed at the school, unless specified conditions occur, including that the school district has been given written notification of the project not less than 30 days prior to the proposed certification of the environmental impact report or approval of the negative declaration.

SEC. 5. [FN1] Section 21151.4 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.4 >>

21151.4. An environmental impact report * * * shall not be certified and a negative declaration shall not be approved for any project involving the construction or alteration of a facility within 1/4 of a mile of a school that might reasonably be anticipated to emit hazardous * * * air emissions, or that would handle * * * an extremely hazardous substance or a mixture containing extremely hazardous substances in a quantity equal to or greater than the state threshold quantity specified * * * pursuant to subdivision (j) of Section 25532 of the Health and Safety Code, that may pose a health or safety hazard to persons who would attend or would be employed at the school, unless both of the following occur:

- (a) The lead agency preparing the environmental impact report or negative declaration has consulted with the school district having jurisdiction regarding the potential impact of the project on the school.
- (b) The school district has been given written notification of the project not less than 30 days prior to the proposed certification of the environmental impact report or approval of the negative declaration.

SEC. 6. If AB 3090 is enacted on or before January 1, 2005, and amends Section 21087 of the Public Resources Code, then Section 4 of this bill, which would repeal Section 21087 of the Public Resources Code, shall not become operative; and, notwithstanding Section 9605 of the Government Code, this bill shall not chapter out the amendments to Section 21087 of the Public Resources Code made by AB 3090.

AMENDED 2007 Cal. Legis. Serv. Chapter 130 (AB 299) Section 206.

SEC. 206. Section 21151.8 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.8 >>

21151.8. (a) An environmental impact report or negative declaration may not be approved for any project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless all of the following occur:

(1) The environmental impact report or negative declaration includes information that is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

(A) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

(B) A hazardous substance release site identified by the Department of Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) A site that contains one or more pipelines, situated underground or aboveground, that carries hazardous substances, extremely hazardous substances, or hazardous wastes, unless the pipeline is a natural gas line that is used only to supply natural gas to that school or neighborhood, or other nearby schools.

(D) A site that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor.

(2) The school district, as the lead agency, in preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed schoolsite is located, pursuant to Section 2735.3 of Title 19 of the California Code of Regulations, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify both permitted and nonpermitted facilities within that district's authority, including, but not limited to, freeways and busy traffic corridors, large agricultural operations, and railyards, within one-fourth of a mile of the proposed schoolsite, that might reasonably be anticipated to emit hazardous emissions or handle hazardous or extremely hazardous * * *substances * * *or waste. The notification by the school district, as the lead agency, shall include a list of the locations for which information is sought.

(3) The governing board of the school district makes one of the following written findings:

(A) Consultation identified no facilities of this type or other significant pollution sources specified in paragraph (2).

(B) The facilities or other pollution sources specified in paragraph (2) exist, but one of the following conditions applies:

(i) The health risks from the facilities or other pollution sources do not and will not constitute an

actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities or other pollution sources will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes a finding pursuant to this clause, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

(iii) For a schoolsite with a boundary that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor, the governing board of the school district determines, through analysis pursuant to paragraph (2) of subdivision (b) of Section 44360 of the Health and Safety Code, based on appropriate air dispersion modeling, and after considering any potential mitigation measures, that the air quality at the proposed site is such that neither short-term nor long-term exposure poses significant health risks to pupils.

(C) The facilities or other pollution sources specified in paragraph (2) exist, but conditions in clause (i), (ii) or (iii) of subparagraph (B) cannot be met, and the school district is unable to locate an alternative site that is suitable due to a severe shortage of sites that meet the requirements in subdivision (a) of Section 17213 of the Education Code. If the governing board makes this finding, the governing board shall adopt a statement of Overriding Considerations pursuant to Section 15093 of Title 14 of the California Code of Regulations.

(4) Each administering agency, air pollution control district, or air quality management district receiving written notification from a lead agency to identify facilities pursuant to paragraph (2) shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. The environmental impact report or negative declaration shall be conclusively presumed to comply with this section as to the area of responsibility of any agency that does not respond within 30 days.

(b) If a school district, as a lead agency, has carried out the consultation required by paragraph (2) of subdivision (a), the environmental impact report or the negative declaration shall be conclusively presumed to comply with this section, notwithstanding any failure of the consultation to identify an existing facility or other pollution source specified in paragraph (2) of subdivision (a).

(c) As used in this section and Section 21151.4, the following definitions shall apply:

(1) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(2) "Extremely hazardous substances" means any material defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(5) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have

been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(6) "Administering agency" means an agency designated pursuant to Section 25502 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(8) "Facilities" means any source with a potential to use, generate, emit, or discharge hazardous air pollutants, including, but not limited to, pollutants that meet the definition of a hazardous substance, and whose process or operation is identified as an emission source pursuant to the most recent list of source categories published by the California Air Resources Board.

(9) "Freeway or other busy traffic corridors" means those roadways that, on an average day, have traffic in excess of 50,000 vehicles in a rural area, as defined in Section 50101 of the Health and Safety Code, and 100,000 vehicles in an urban area, as defined in Section 50104.7 of the Health and Safety Code.

AMENDED 2008 Cal. Legis. Serv. Ch. 148 (A.B. 2720)

This bill would make technical, nonsubstantive changes in these provisions and would revise a cross-reference.

This bill would define "hazardous air emissions" and "extremely hazardous substances" for the purposes of that provision.

SECTION 1. Section 21151.4 of the Public Resources Code is amended to read:
<< CA PUB RES § 21151.4 >>

21151.4. (a) An environmental impact report shall not be certified or a negative declaration shall not be approved for any project involving the construction or alteration of a facility within one-fourth of a mile of a school that might reasonably be anticipated to emit hazardous air emissions, or that would handle an extremely hazardous substance or a mixture containing extremely hazardous substances in a quantity equal to or greater than the state threshold quantity specified pursuant to subdivision (j) of Section 25532 of the Health and Safety Code, that may pose a health or safety hazard to persons who would attend or would be employed at the school, unless both of the following occur:

(1) The lead agency preparing the environmental impact report or negative declaration has consulted with the school district having jurisdiction regarding the potential impact of the project on the school.

(2) The school district has been given written notification of the project not less than 30 days

prior to the proposed certification of the environmental impact report or approval of the negative declaration.

(b) As used in this section, the following definitions apply:

(1) "Extremely hazardous substance" means an extremely hazardous substance as defined pursuant to paragraph (2) of subdivision (g) of Section 25532 of the Health and Safety Code.

(2) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air of a substance identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

SEC. 2. Section 21151.8 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.8 >>

21151.8. (a) An environmental impact report shall not be certified or a negative declaration shall not be approved for a project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless all of the following occur:

(1) The environmental impact report or negative declaration includes information that is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

(A) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

(B) A hazardous substance release site identified by the Department of Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) A site that contains one or more pipelines, situated underground or aboveground, that carries hazardous substances, extremely hazardous substances, or hazardous wastes, unless the pipeline is a natural gas line that is used only to supply natural gas to that school or neighborhood, or other nearby schools.

(D) A site that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor.

(2)(A) The school district, as the lead agency, in preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed schoolsite is located, pursuant to Section 2735.3 of Title 19 of the California Code of Regulations, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify both permitted and nonpermitted facilities within that district's authority, including, but not limited to, freeways and busy traffic corridors, large agricultural operations, and railyards, within one-fourth of a mile of the proposed schoolsite, that might reasonably be anticipated to emit hazardous emissions or handle hazardous or extremely

(b) As used in this section* * *, the following definitions shall apply:

(1) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(2) "Extremely hazardous substances" means * * *an extremely hazardous substance as defined pursuant to paragraph (2) of subdivision (g) of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(5) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(6) "Administering agency" means an agency authorized pursuant to Section 25502 of the Health and Safety Code to implement and enforce Chapter 6.95 (commencing with Section 25500) of Division 20 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(8) "Facilities" means any source with a potential to use, generate, emit, or discharge hazardous air pollutants, including, but not limited to, pollutants that meet the definition of a hazardous substance, and whose process or operation is identified as an emission source pursuant to the most recent list of source categories published by the California Air Resources Board.

(9) "Freeway or other busy traffic corridors" means those roadways that, on an average day, have traffic in excess of 50,000 vehicles in a rural area, as defined in Section 50101 of the Health and Safety Code, and 100,000 vehicles in an urban area, as defined in Section 50104.7 of the Health and Safety Code.

CA LEGIS 148 (2008)

(B) Existing Activites

A. Statutes 1999 Chapter 23 (SB 47):

West's Ann. Cal. Health & Safety Code § 25358.1 is a new code section, prior code section was repealed by former § 25358.1 by Stats.1997, c. 870 (S.B.660).

West's Ann.Cal.Health & Safety Code § 25358.7.1 was added by Stats.1999, c. 23 (S.B.47), § 2, eff. May 26, 1999.)

B. Statutes 1991 Chapter 1183 (AB 928):

1. Education Code section 39003; Section 1
2. Education Code section 39120; Section 1, 2
3. Public Resources Code section 21151.4, Section 17
4. Public Resources Code section 21151.8, Section 18.

Existing law generally requires all state agencies and local agencies to prepare, or to be prepared by contract, and certify the completion of, an environmental impact report on any project they intend to carry out or approve which may have a significant effect on the environment. In other cases, a negative declaration is required. Existing law prohibits the governing board of a school district from approving the acquisition of a schoolsite or the construction of a new school building, unless the lead agency, as defined, consults with specified local agencies to identify facilities which might emit hazardous air emissions, and unless the governing board of the school district makes specified written findings concerning these facilities.

Existing law also prohibits the approval of an environmental impact report or negative declaration for a school construction project or purchase of a schoolsite unless facilities within a specified distance of the proposed schoolsite are identified which might reasonably be anticipated to emit hazardous or acutely hazardous air emissions, the governing board of the school district makes specified written findings and the environmental impact report or negative declaration includes information to determine if property proposed to be purchased, or to be constructed upon, is the site of a hazardous waste disposal site or solid waste disposal site, a hazardous substance release site, or a site which contains pipelines which carry hazardous substances, acutely hazardous materials, or hazardous waste. Existing law prohibits the approval of an environmental impact report or negative declaration for any project involving the construction or alteration of a facility which might emit hazardous air emissions within 1/4 mile of a school unless the lead agency consults with the school district, as specified.

Existing law requires a business which handles acutely hazardous materials to submit a registration form to the local administering agency, as defined, and, if the administering agency determines that there is a significant likelihood that the handler's use of an acutely hazardous

material may pose an acutely hazardous materials accident risk, the agency is required to require the preparation and submission of a risk management and prevention program (RMPP), in accordance with a specified timetable. Existing law requires cities and counties to include in the application for building permits a place to indicate whether the applicant is required to comply with specified requirements concerning business plans, the submission of RMPPs, and permits for construction or modification pursuant to the regulation of air pollution. A city or county is prohibited from issuing a final certificate of occupancy unless the applicant meets these requirements and from permitting a facility to be constructed within 1,000 feet of a school unless specified requirements are met.

Existing law requires the State Fire Marshal to prepare, adopt, and submit for approval to the State Building Standards Commission, building standards establishing minimum standards for fire prevention, as specified, and minimum requirements for the storage and handling in commercial buildings of acutely hazardous materials, as defined.

Existing law requires handlers or other specified persons to report hazardous material releases to an administering agency, which is defined as a department, office, or agency of a city or county.

Existing law prescribes civil penalties for violations of specified provisions requiring any business, as defined, to establish and implement a business plan for emergency response to a release or threatened release of a hazardous material, in accordance with prescribed requirements.

Existing law requires an RMPP to give consideration to the proximity of the facility to schools and requires a handler to submit a corrected RMPP within 60 days after receiving a specified notice from the administering agency. Existing law requires the administering agency to follow specified procedures with regard to the protection of trade secrets.

Existing law requires an air pollution control officer, prior to approving a permit for a source that may emit air contaminants which is located within 1,000 feet of a school, to prepare and distribute a public notice, as specified.

- (4) "Hazardous waste" has the same meaning as defined in Section 25117 of the Health and Safety Code.
- (5) "Hazardous waste disposal site" has the same meaning as defined in Section 25114 of the Health and Safety Code.
- (2) "Hazardous substance" has the same meaning as defined in Section 25316 of the Health and Safety Code.
- (3) "Acutely hazardous material" has the same meaning as defined in subdivision (a) of Section 25532 of the Health and Safety Code.
- (4) "Hazardous waste" has the same meaning as defined in Section 25117 of the Health and Safety Code.
- (5) "Hazardous waste disposal site" has the same meaning as defined in Section 25114 of the Health and Safety Code.

<< CA HEALTH & S § 25358.1 >>

25358.1. (a) The department, a representative of the department, or any person designated by the director may take the actions specified in this section only if there is a reasonable basis to believe that there may be a release or threatened release of a hazardous substance, and only for the purpose of determining under this chapter the need for a response action, the choosing or taking of a response action, or otherwise for the purpose of enforcing this chapter.

(b) Any officer or employee of the department, a representative of the director, or a person designated by the director may require any potentially responsible party, or any person who has, or may have, acquired information relevant to any of the following matters in the course of a commercial, ownership, or contractual relationship with any potentially responsible party, to furnish, upon reasonable notice, information or documents relating to the following matters:

(1) The identification, nature, and quantity of materials which have been, or are, generated, treated, stored, or disposed of at a hazardous substance release site or which have been, or are, transported to a hazardous substance release site.

(2) The nature or extent of a release or a threatened release of a hazardous substance at, or from, a hazardous substance release site.

(c) A person who is required to provide information pursuant to subdivision (b) shall, in accordance with subdivision (h), allow the officer, employee, representative, or designee, upon reasonable notice and at reasonable times, to have access to, and copy, all records relating to the hazardous substances for purposes of assisting the department in determining the need for an action in response to a release or threatened release pursuant to this chapter.

(d) Any officer or employee of the department, representative of the director, or person designated by the director may, in accordance with subdivision (h), enter, at reasonable times, any of the following properties:

(1) Any nonresidential establishment or other place or property where any hazardous substances may be, or have been, produced, stored, treated, disposed of, or transported from.

(2) Any nonresidential establishment or other place or property from which, or to which, a hazardous substance has been, or may have been, released.

(3) Any nonresidential establishment or other place or property where a hazardous substance release is, or may be, threatened.

(4) Any nonresidential establishment or other place or property where entry is needed to determine the need for a response action, or the appropriate remedial action, to effectuate a response action under this chapter.

(5) Any residential place or property which, if it were a nonresidential establishment or other place or property, would otherwise meet the criteria described in paragraphs (1) to (4), inclusive, if the department, representative, or person designated by the director is able to establish, based upon reasonably available evidence, that hazardous substances have been released onto or under the residential place or real property and if entry is made only at reasonable times and after reasonable notification to the owners and occupants.

(e) Any officer or employee of the department, representative of the director, or person designated by the director may, in accordance with subdivision (h), carry out any of the following activities:

(1) Inspect and obtain samples from any establishment or other place or property specified in subdivision (d) or from any location of any suspected hazardous substance.

(2) Inspect and obtain samples of any substances from any establishment or place or property specified in subdivision (d).

(3) Inspect and obtain samples of any containers or labeling for the suspected hazardous substances, and samples of the soil, vegetation, air, water, and biota on the premises.

(4) Set up and maintain monitoring equipment for the purpose of assessing or measuring the actual or potential migration of hazardous substances.

(5) Survey and determine the topographic, geologic, and hydrogeologic features of the land.

(6) Photograph any equipment, sample, activity, or environmental condition described in paragraphs (2) to (5) inclusive.

(f)(1) If photographs are to be taken pursuant to paragraph (6) of subdivision (e), the department shall do all of the following:

(A) Comply with all procedures established pursuant to subdivision (b) of Section 25358.2.

(B) Notify the person whose facility is photographed prior to public disclosure of the photographs.

(C) Upon the request of the person owning the facility, submit a copy of any photograph to the person for the purpose of determining whether trade secret information, as defined in Section 25358.2, or facility security, would be revealed by the photograph.

(2) "Disclosure," as used in Section 25358.2, for purposes of this paragraph, does not include the review of the photograph by a court of competent jurisdiction or by an administrative law judge. A court or judge may review the photograph in camera.

(g) An officer, employee, representative, or designee who enters a place, establishment, or property pursuant to this section shall make a reasonable effort to inform the owner or the owners' authorized representative of the inspection and shall provide split samples to the owner or the representative upon request.

(h) If the owner or the owner's authorized representative does not voluntarily grant access to a place, establishment, or property pursuant to this section, the officer, employee, representative, or designee shall first obtain a warrant pursuant to Title 13 (commencing with Section 1822.50) of

Part 3 of the Code of Civil Procedure. However, if there is an emergency posing an immediate threat to public health and safety, the officer, employee, representative, or designee may enter the place, establishment, or property without the consent of the owner or owner's authorized representative and without the issuance of a warrant.

(i) The department, and any person authorized by the department to enter upon any lands for the purpose of taking removal or remedial action pursuant to this chapter, shall not be held liable, in either a civil or criminal proceeding, for trespass or for any other acts which are necessary to carry out the corrective action.

<< CA HLTH & S § 25358.7.1 >>

25358.7.1. (a) At each site, a community advisory group may be established by the affected community to review any response action and comment on the response action to be conducted in that community. The department or regional board shall regularly communicate, and confer as appropriate, with the community advisory committee. The department or regional board shall also advise local environmental regulatory agencies and other appropriate local agencies of planned response actions and provide opportunities for review and comment. If the department or regional board, whichever is overseeing a response action, receives a petition signed by at least 50 members of a community affected by the response action at a site or a resolution adopted by the legislative body of the jurisdiction within which the response action has been or will be initiated, the department or regional board shall assist the petitioners or the legislative body to establish a community advisory group to review the response action at the site.

(b) To the extent possible, the composition of each community advisory group shall reflect the composition of the affected community and the diversity of interests of the community by including all of the following types of individuals on the community advisory group:

(1) Persons owning or residing on property located near the hazardous substance release site or in an adjacent community, or other persons who may be directly affected by the response action.

(2) Individuals from the local business community.

(3) Local political or government agency representatives.

(4) Local citizen, civic, environmental, or public interest group members residing in the community.

(c) The following entities may participate in community advisory group meetings in order to provide information and technical expertise:

- (1) The department or regional boards.
- (2) Representatives of local environmental regulatory agencies.
- (3) The potentially responsible parties or other persons who are conducting the response action.
- (d) The existence of a community advisory group shall not diminish any other obligation of the department or regional board with respect to public participation requirements specified in Section 25358.7. Nothing in this section shall affect the status of any citizen advisory group formed before the enactment of this section, a federal Department of Defense Restoration Advisory Board, or a federal Department of Energy Advisory Board.

The new activities that arise from the mandate:
1991 Statutes Chapter 1183 (AB 928)

This bill would additionally provide that before the governing board approves a school construction project or the acquisition of a schoolsite, or before an environmental impact report or negative declaration is approved for a school construction project or the purchase of a schoolsite, the lead agency is also required to identify facilities which might be reasonably anticipated to handle acutely hazardous materials, substances, or waste, thereby imposing a state-mandated local program. The bill would include an additional finding which the governing board would be authorized to make, if these facilities exist, concerning the corrective measures which these facilities are required to take. The bill would require specified local agencies which receive a request to provide information concerning these facilities to respond in 30 days, thereby imposing a state-mandated local program by imposing new duties upon local agencies.

This bill would require that notice to be given prior to approving an application for a source which emits hazardous air emissions which is located within 1,000 feet of a school, as defined, and would require the notice to be distributed to additional persons, thereby imposing a state-mandated local program. The bill would authorize the preparation of the notice under prescribed circumstances. The bill would make the notice requirements inapplicable if the air pollution control officer makes specified determinations.

The bill would define school for purposes of the RMPP procedures and would authorize the administering agency to grant a one-time extension of the deadline to submit a corrected RMPP. The bill would require the administering agency to review any claim for a trade secret protection and to segregate properly substantiated trade secret information from the information to be made public. The bill would impose new duties upon administering agencies, thereby imposing a state-mandated local program.

The bill would require the school district to make the information necessary to mail notices required by these provisions available to the air pollution control officer and would allow the notices to be distributed to the children to be given to their parents.

The bill would require applicants for a permit to certify whether the project is located within 1,000 feet of a school, and would authorize denial of the permit upon misrepresentation of that fact.

SECTION 1. Section 39003 of the Education Code is amended to read:

<< CA EDUC § 39003 >>

39003. The governing board of a school district shall not approve a project involving the acquisition of a schoolsite by a school district unless all of the following occur:

(a) The lead agency, as defined in Section 21067 of the Public Resources Code, determines that the property purchased or to be built upon is not any of the following:

(1) The site of a current or former hazardous waste disposal site or solid waste disposal site unless, if the site was a former solid waste disposal site, the governing board of the school district concludes that the wastes have been removed.

(2) A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(3) A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

(b) The lead agency<<+, as defined in Section 21067 of the Public Resources Code,+>> preparing the environmental impact report or negative declaration has consulted with the <<-* * *->> <<+administering agency+>> in which the proposed schoolsite is located <<-* * *->> and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed schoolsite which might reasonably be anticipated to emit hazardous air emissions<<+, or to handle hazardous or acutely hazardous materials, substances, or waste. The lead agency shall include a list of the locations for which information is sought+>>.

(c) The governing board of the school district makes <<+one+>> of the following written findings:

(1) Consultation identified none of the facilities specified in subdivision (b).

(2) The facilities specified in subdivision (b) exist, but <<-* * *->> <<+one of the following conditions applies:+>>

<<+(A) T+>>he health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the school.

<<+(B) The governing board finds that corrective measures required under an existing order by another jurisdiction which has jurisdiction over the facilities will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes this finding, the governing board shall also make a subsequent finding, prior to the occupancy of the school, that the emissions have been mitigated to these levels.+>>

(d) As used in this section:

(1) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution <<+control+>> officer, hazardous air emissions <<-* * *->> also <<+means+>> emissions into the ambient air from any substance identified in <<+subdivisions (a) to (f), inclusive, of+>> Section 44321 of the Health and Safety Code.

(2) "Hazardous substance" <<-* * *->> <<+means any substance+>> defined in Section 25316 of the Health and Safety Code.

(3) "Acutely hazardous material" <<-* * *->> <<+means any material+>> defined <<-* * *->> <<+pursuant to+>> subdivision (a) of Section 25532 of the Health and Safety Code.

(4) "Hazardous waste" <<-* * *->> <<+means any waste+>> defined in Section 25117 of the Health and Safety Code.

(5) "Hazardous waste disposal site" <<-* * *->> <<+means any site+>> defined in Section 25114 of the Health and Safety Code.

<<+(6) "Administering agency" means any agency designated pursuant to Section 25502 of the Health and Safety Code.+>>

<<+(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.+>>

SEC. 2. Section 39120 of the Education Code is amended to read:

<< CA EDUC § 39120 >>

SEC. 1. Section 39120 of the Education Code is amended to read:

(b) The lead agency<<+, as defined in Section 21067 of the Public Resources Code,+>> preparing the environmental impact report or negative declaration has consulted with the <<-* * *->> <<+administering agency+>> in which the proposed schoolsite is located <<-* * *->> and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed schoolsite which might reasonably be anticipated to emit hazardous air emissions<<+, or to handle hazardous or acutely hazardous materials, substances, or waste. The lead agency shall include a list of the locations for which information is sought+>>.

(c) The governing board of the school district makes <<+one+>> of the following written findings:

- (1) Consultation identified none of the facilities specified in subdivision (b).
- (2) The facilities specified in subdivision (b) exist, but <<-* * *->> <<+one of the following conditions applies:+>>

<<+(A) T+>>he health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the school.

<<+(B) The governing board finds that corrective measures required under an existing order by another jurisdiction which has jurisdiction over the facilities will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes this finding, the governing board shall also make a subsequent finding, prior to the occupancy of the school, that the emissions have been mitigated to these levels.+>>

SEC. 2. Section 39120 of the Education Code is amended to read:

39120. <<+(a)+>> The governing board of a school district shall not approve a project for the construction of a new school building, as defined in Section 39141, unless the project and its lead agency <<+comply+>> with the same requirements specified in <<+subdivision (a) of+>> Section 39003 for schoolsite acquisition.

<<+(b) For purposes of this section, the acceptance of construction bids shall constitute approval of the project.+>>

SEC. 17. Section 21151.4 of the Public Resources Code is amended to read:

21151.4. No environmental impact report or negative declaration shall be approved for any project involving the construction or alteration of a facility within <<+ 1/4+>> of a mile of a school which might reasonably be anticipated to emit hazardous or acutely hazardous air <<-* * *->> <<+ emission, or which would handle acutely hazardous material or a mixture containing acutely hazardous material in a quantity equal to or greater than the quantity specified in subdivision (a) of+>> Section <<-* * *->> <<+ 25536 of the Health and Safety Code, which may pose a health or safety hazard to persons who would attend or would be employed at the school,+>> unless both of the following occur:

- (a) The lead agency preparing the environmental impact report or negative declaration has consulted with the school district having jurisdiction regarding the potential impact of the project on the school.

(b) The school district has been given written notification of the project not less than 30 days prior to the proposed approval of the environmental impact report or negative declaration.

SEC. 18. Section 21151.8 of the Public Resources Code is amended to read:

21151.8. (a) No environmental impact report or negative declaration shall be approved for any project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless <<-* * *->> <<+all of the following occur:+>> <<+(1) T+>>he environmental impact report or negative declaration includes information which is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

<<+(A)+>> The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

<<+(B)+>> A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

<<+(C)+>> A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

<<+(2) The lead agency preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed schoolsite is located, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed schoolsite which might reasonably be anticipated to emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste. The notification by the lead agency shall include a list of the locations for which information is sought.+>>

<<+(3) The governing board of the school district makes one of the following written findings:+>>

<<+(A) Consultation identified no such facilities specified in paragraph (2).+>>

<<+(B) The facilities specified in paragraph (2) exist, but one of the following conditions applies:+>>

<<+(i) The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.+>>

<<+(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the

proposed school. If the governing board makes such a finding, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.+>>

<<+(4) Each administering agency, air pollution control district, or air quality management district receiving written notification from a lead agency to identify facilities pursuant to paragraph (2) shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. The environmental impact report or negative declaration shall be conclusively presumed to comply with this section as to the area of responsibility of any agency which does not respond within 30 days.+>>

<<+(b) If a lead agency has carried out the consultation required by paragraph (2) of subdivision (a), the environmental impact report or the negative declaration shall be conclusively presumed to comply with this section, notwithstanding any failure of the consultation to identify an existing facility specified in paragraph (2) of subdivision (a).+>>

<<+(c)+>> As used in this section <<+and Section 21151.4, the following definitions shall apply+>>:

(1) "Hazardous substance" <<-* * *->> <<+means any substance+>> defined in Section 25316 of the Health and Safety Code.

(2) "Acutely hazardous material" <<-* * *->> <<+means any material+>> defined <<-* * *->> <<+pursuant to+>> subdivision (a) of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" <<-* * *->> <<+means any waste+>> defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" <<-* * *->> <<+means any site+>> defined in Section 25114 of the Health and Safety Code.

<<+(5) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.+>>

<<+(6) "Administering agency" means an agency designated pursuant to Section 25502 of the Health and Safety Code.+>>

<<+(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.+>>

AMENDED 2003 Cal. Legis. Serv. Ch. 668 (S.B. 352)

AN ACT to amend Section 21151.8 of the Public Resources Code, relating to public schools.

This bill would, in addition, prohibit the approval by the governing board of a school district of a schoolsite that is within 500 feet from the edge of the closest traffic lane of a freeway or other busy traffic corridor, unless prescribed conditions are met and would make conforming and other technical, nonsubstantive changes.

This bill would define "facility" for this purpose and would require the lead agency to consult to identify freeways and other busy traffic corridors, as defined, large agricultural operations, and railyards, within 1/4 of a mile of the schoolsite, and would make conforming and other technical, nonsubstantive changes.

<< CA EDUC § 17213 >>

17213. The governing board of a school district may not approve a project involving the acquisition of a schoolsite by a school district, unless all of the following occur:

(a) The school district, as the lead agency, as defined in Section 21067 of the Public Resources Code, determines that the property purchased or to be built upon is not any of the following:

(1) The site of a current or former hazardous waste disposal site or solid waste disposal site* * *, unless if the site was a former solid waste disposal site, the governing board of the school district concludes that the wastes have been removed.

(2) A hazardous substance release site identified by the * * *Department of * * *Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(3) A site that contains one or more pipelines, situated underground or aboveground, that carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line that is used only to supply natural gas to that school or neighborhood.

(b) The school district, as the lead agency, as defined in Section 21067 of the Public Resources Code, in preparing the environmental impact report or negative declaration has consulted with the administering agency in which the proposed schoolsite is located, pursuant to Section 2735.3 of Title 19 of the California Code of Regulations, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify both permitted and nonpermitted facilities within that district's authority, including, but not limited to, freeways and other busy traffic corridors, large agricultural operations, and railyards, within one-fourth of a mile of the proposed schoolsite* * *, that might reasonably be anticipated to emit hazardous air emissions, or to handle hazardous or acutely hazardous materials, substances, or waste. The school district, as the lead agency, shall include a list of the locations for which information is sought.

(c) The governing board of the school district makes one of the following written findings:

(1) Consultation identified none of the facilities or significant pollution sources specified in subdivision (b).

(2) The facilities or other pollution sources specified in subdivision (b) exist, but one of the following conditions applies:

(A) The health risks from the facilities or other pollution sources do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the school.

(B) The governing board finds that corrective measures required under an existing order by another governmental entity that has jurisdiction over the facilities or other pollution sources will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes this finding, the governing board shall also make a subsequent finding, prior to the occupancy of the school, that the emissions have been mitigated to these levels.

(C) For a schoolsite with a boundary that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor, the governing board of the school district determines, through analysis pursuant to paragraph (2) of subdivision (b) of Section 44360 of the Health and Safety Code, based on appropriate air dispersion modeling, and after considering any potential mitigation measures, that the air quality at the proposed site is such that neither short-term nor long-term exposure poses significant health risks to pupils.

(D) The governing board finds that neither of the conditions set forth in subparagraph (B) or (C) can be met, and the school district is unable to locate an alternative site that is suitable due to a severe shortage of sites that meet the requirements in subdivision (a) of Section 17213. If the governing board makes this finding, the governing board shall adopt a statement of Overriding Considerations pursuant to Section 15093 of Title 14 of the California Code of Regulations.

(d) As used in this section:

(1) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substance identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(2) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(3) "Acutely hazardous material" means any material defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(4) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(5) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(6) "Administering agency" means any agency designated pursuant to Section 25502 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(8) "Facilities" means any source with a potential to use, generate, emit or discharge hazardous air pollutants, including, but not limited to, pollutants that meet the definition of a hazardous substance, and whose process or operation is identified as an emission source pursuant to the most recent list of source categories published by the California Air Resources Board.

(9) "Freeway or other busy traffic corridors" means those roadways that, on an average day, have traffic in excess of 50,000 vehicles in a rural area as defined in Section 50101 of the Health and Safety Code, and 100,000 vehicles in an urban area, as defined in Section 50104.7 of the Health and Safety Code.

SEC. 3. Section 21151.8 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.8 >>

21151.8. (a) An environmental impact report or negative declaration * * * may not be approved for any project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless all of the following occur:

(1) The environmental impact report or negative declaration includes information that is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

(A) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

(B) A hazardous substance release site identified by the * * * Department of * * * Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) A site that contains one or more pipelines, situated underground or aboveground, that carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line that is used only to supply natural gas to that school or neighborhood, or other nearby schools.

(D) A site that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor.

(2) The school district, as the lead agency, in preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed schoolsite is located, pursuant to Section 2735.3 of Title 19 of the California Code of Regulations, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify both permitted and nonpermitted facilities within that district's authority, including, but not limited to, freeways and busy traffic corridors, large agricultural operations, and railyards, within one-fourth of a mile of the proposed schoolsite* * *, that might reasonably be anticipated to emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste. The notification by the school district, as the lead agency, shall include a list of the locations for which information is sought.

(3) The governing board of the school district makes one of the following written findings:

(A) Consultation identified no facilities of this type or other significant pollution sources specified in paragraph (2).

(B) The facilities or other pollution sources specified in paragraph (2) exist, but one of the following conditions applies:

(i) The health risks from the facilities or other pollution sources do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities or other pollution sources will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes * * * a finding pursuant to this clause, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

(iii) For a schoolsite with a boundary that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor, the governing board of the school district determines, through analysis pursuant to paragraph (2) of subdivision (b) of Section 44360 of the Health and Safety Code, based on appropriate air dispersion modeling, and after considering any potential mitigation measures, that the air quality at the proposed site is such that neither short-term nor long-term exposure poses significant health risks to pupils.

(C) The facilities or other pollution sources specified in paragraph (2) exist, but conditions in clause (i), (ii) or (iii) of subparagraph (B) cannot be met, and the school district is unable to locate an alternative site that is suitable due to a severe shortage of sites that meet the requirements in subdivision (a) of Section 17213 of the Education Code. If the governing board makes this finding, the governing board shall adopt a statement of Overriding Considerations pursuant to Section 15093 of Title 14 of the California Code of Regulations.

(4) Each administering agency, air pollution control district, or air quality management district receiving written notification from a lead agency to identify facilities pursuant to paragraph (2) shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. The environmental impact report or negative declaration shall be conclusively presumed to comply with this section as to the area of responsibility of any agency that does not respond within 30 days.

(b) If a school district, as a lead agency, has carried out the consultation required by paragraph (2) of subdivision (a), the environmental impact report or the negative declaration shall be conclusively presumed to comply with this section, notwithstanding any failure of the consultation to identify an existing facility or other pollution source specified in paragraph (2) of subdivision (a).

(c) As used in this section and Section 21151.4, the following definitions shall apply:

(1) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(2) "Acutely hazardous material" means any material defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(5) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(6) "Administering agency" means an agency designated pursuant to Section 25502 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(8) "Facilities" means any source with a potential to use, generate, emit or discharge hazardous air pollutants, including, but not limited to, pollutants that meet the definition of a hazardous substance, and whose process or operation is identified as an emission source pursuant to the most recent list of source categories published by the California Air Resources Board.

(9) "Freeway or other busy traffic corridors" means those roadways that, on an average day, have traffic in excess of 50,000 vehicles in a rural area, as defined in Section 50101 of the Health and Safety Code, and 100,000 vehicles in an urban area, as defined in Section 50104.7 of the Health and Safety Code.

Amended Stats. 2004, c. 689 (S.B.945), § 5

This bill would, instead, specify that an environmental impact report shall not be certified and a negative declaration shall not be approved for any project involving the construction or alteration of a facility within 1/4 of a mile of a school that might reasonably be anticipated to emit hazardous air emissions, or that would handle extremely hazardous substances in a quantity equal to or greater than a specified state threshold quantity prescribed by statute that may pose a health or safety hazard to persons who would attend or would be employed at the school, unless specified conditions occur, including that the school district has been given written notification of the project not less than 30 days prior to the proposed certification of the environmental impact report or approval of the negative declaration.

SEC. 5. [FN1] Section 21151.4 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.4 >>

21151.4. An environmental impact report * * * shall not be certified and a negative declaration shall not be approved for any project involving the construction or alteration of a facility within 1/4 of a mile of a school that might reasonably be anticipated to emit hazardous * * * air emissions, or that would handle * * * an extremely hazardous substance or a mixture containing

extremely hazardous substances in a quantity equal to or greater than the state threshold quantity specified * * * pursuant to subdivision (j) of Section 25532 of the Health and Safety Code, that may pose a health or safety hazard to persons who would attend or would be employed at the school, unless both of the following occur:

(a) The lead agency preparing the environmental impact report or negative declaration has consulted with the school district having jurisdiction regarding the potential impact of the project on the school.

(b) The school district has been given written notification of the project not less than 30 days prior to the proposed certification of the environmental impact report or approval of the negative declaration.

SEC. 6. If AB 3090 is enacted on or before January 1, 2005, and amends Section 21087 of the Public Resources Code, then Section 4 of this bill, which would repeal Section 21087 of the Public Resources Code, shall not become operative; and, notwithstanding Section 9605 of the Government Code, this bill shall not chapter out the amendments to Section 21087 of the Public Resources Code made by AB 3090.

AMENDED 2007 Cal. Legis. Serv. Chapter 130 (AB 290) Section 206.

SEC. 206. Section 21151.8 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.8 >>

21151.8. (a) An environmental impact report or negative declaration may not be approved for any project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless all of the following occur:

(1) The environmental impact report or negative declaration includes information that is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

(A) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

(B) A hazardous substance release site identified by the Department of Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) A site that contains one or more pipelines, situated underground or aboveground, that carries hazardous substances, extremely hazardous substances, or hazardous wastes, unless the pipeline is a natural gas line that is used only to supply natural gas to that school or neighborhood, or other nearby schools.

(D) A site that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor.

(2) The school district, as the lead agency, in preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed schoolsite is located, pursuant to Section 2735.3 of Title 19 of the California Code of Regulations, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify both permitted and nonpermitted facilities within that district's authority, including, but not limited to, freeways and busy traffic corridors, large agricultural operations, and railyards, within one-fourth of a mile of the proposed schoolsite, that might reasonably be anticipated to emit hazardous emissions or handle hazardous or extremely hazardous * * * substances * * * or waste. The notification by the school district, as the lead agency, shall include a list of the locations for which information is sought.

(3) The governing board of the school district makes one of the following written findings:

(A) Consultation identified no facilities of this type or other significant pollution sources specified in paragraph (2).

(B) The facilities or other pollution sources specified in paragraph (2) exist, but one of the following conditions applies:

(i) The health risks from the facilities or other pollution sources do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities or other pollution sources will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes a finding pursuant to this clause, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

(iii) For a schoolsite with a boundary that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor, the governing board of the school district determines, through analysis pursuant to paragraph (2) of subdivision (b) of Section 44360 of the Health and Safety Code, based on appropriate air dispersion modeling, and after considering any potential mitigation measures, that the air quality at the proposed site is such that neither short-term nor long-term exposure poses significant health risks to pupils.

(C) The facilities or other pollution sources specified in paragraph (2) exist, but conditions in clause (i), (ii) or (iii) of subparagraph (B) cannot be met, and the school district is unable to locate an alternative site that is suitable due to a severe shortage of sites that meet the requirements in subdivision (a) of Section 17213 of the Education Code. If the governing board makes this finding, the governing board shall adopt a statement of Overriding Considerations pursuant to Section 15093 of Title 14 of the California Code of Regulations.

(4) Each administering agency, air pollution control district, or air quality management district receiving written notification from a lead agency to identify facilities pursuant to paragraph (2) shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. The environmental impact report or negative declaration

shall be conclusively presumed to comply with this section as to the area of responsibility of any agency that does not respond within 30 days.

(b) If a school district, as a lead agency, has carried out the consultation required by paragraph (2) of subdivision (a), the environmental impact report or the negative declaration shall be conclusively presumed to comply with this section, notwithstanding any failure of the consultation to identify an existing facility or other pollution source specified in paragraph (2) of subdivision (a).

(c) As used in this section and Section 21151.4, the following definitions shall apply:

(1) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(2) "Extremely hazardous substances" means any material defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(5) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(6) "Administering agency" means an agency designated pursuant to Section 25502 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(8) "Facilities" means any source with a potential to use, generate, emit, or discharge hazardous air pollutants, including, but not limited to, pollutants that meet the definition of a hazardous substance, and whose process or operation is identified as an emission source pursuant to the most recent list of source categories published by the California Air Resources Board.

(9) "Freeway or other busy traffic corridors" means those roadways that, on an average day, have traffic in excess of 50,000 vehicles in a rural area, as defined in Section 50101 of the Health and Safety Code, and 100,000 vehicles in an urban area, as defined in Section 50104.7 of the Health and Safety Code.

AMENDED 2008 Cal. Legis. Serv. Ch. 148 (A.B. 2720)

This bill would make technical, nonsubstantive changes in these provisions and would revise a cross-reference.

This bill would define "hazardous air emissions" and "extremely hazardous substances" for the purposes of that provision.

SECTION 1. Section 21151.4 of the Public Resources Code is amended to read:
<< CA PUB RES § 21151.4 >>

21151.4. (a) An environmental impact report shall not be certified or a negative declaration shall not be approved for any project involving the construction or alteration of a facility within one-fourth of a mile of a school that might reasonably be anticipated to emit hazardous air emissions, or that would handle an extremely hazardous substance or a mixture containing extremely hazardous substances in a quantity equal to or greater than the state threshold quantity specified pursuant to subdivision (j) of Section 25532 of the Health and Safety Code, that may pose a health or safety hazard to persons who would attend or would be employed at the school, unless both of the following occur:

(1) The lead agency preparing the environmental impact report or negative declaration has consulted with the school district having jurisdiction regarding the potential impact of the project on the school.

(2) The school district has been given written notification of the project not less than 30 days prior to the proposed certification of the environmental impact report or approval of the negative declaration.

(b) As used in this section, the following definitions apply:

(1) "Extremely hazardous substance" means an extremely hazardous substance as defined pursuant to paragraph (2) of subdivision (g) of Section 25532 of the Health and Safety Code.

(2) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air of a substance identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

SEC. 2. Section 21151.8 of the Public Resources Code is amended to read:
<< CA PUB RES § 21151.8 >>

21151.8. (a) An environmental impact report shall not be certified or a negative declaration shall not be approved for a project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless all of the following occur:

(1) The environmental impact report or negative declaration includes information that is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

(A) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

(B) A hazardous substance release site identified by the Department of Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) A site that contains one or more pipelines, situated underground or aboveground, that carries hazardous substances, extremely hazardous substances, or hazardous wastes, unless the pipeline is a natural gas line that is used only to supply natural gas to that school or neighborhood, or other nearby schools.

(D) A site that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor.

(2)(A) The school district, as the lead agency, in preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed schoolsite is located, pursuant to Section 2735.3 of Title 19 of the California Code of Regulations, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify both permitted and nonpermitted facilities within that district's authority, including, but not limited to, freeways and busy traffic corridors, large agricultural operations, and railyards, within one-fourth of a mile of the proposed schoolsite, that might reasonably be anticipated to emit hazardous emissions or handle hazardous or extremely hazardous substances or waste. The notification by the school district, as the lead agency, shall include a list of the locations for which information is sought.

(B) Each administering agency, air pollution control district, or air quality management district receiving written notification from a lead agency to identify facilities pursuant to subparagraph (A) shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. The environmental impact report or negative declaration shall be conclusively presumed to comply with subparagraph (A) as to the area of responsibility of an agency that does not respond within 30 days.

(C) If the school district, as a lead agency, has carried out the consultation required by subparagraph (A), the environmental impact report or the negative declaration shall be conclusively presumed to comply with subparagraph (A), notwithstanding any failure of the consultation to identify an existing facility or other pollution source specified in subparagraph (A).

(3) The governing board of the school district makes one of the following written findings:

(A) Consultation identified no facilities of this type or other significant pollution sources specified in paragraph (2).

(B) The facilities or other pollution sources specified in paragraph (2) exist, but one of the following conditions applies:

(i) The health risks from the facilities or other pollution sources do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities or other pollution sources will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes a finding pursuant to this clause, it shall also

make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

(iii) For a schoolsite with a boundary that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor, the governing board of the school district determines, through analysis pursuant to paragraph (2) of subdivision (b) of Section 44360 of the Health and Safety Code, based on appropriate air dispersion modeling, and after considering any potential mitigation measures, that the air quality at the proposed site is such that neither short-term nor long-term exposure poses significant health risks to pupils.

(C) The facilities or other pollution sources specified in paragraph (2) exist, but conditions in clause (i), (ii), or (iii) of subparagraph (B) cannot be met, and the school district is unable to locate an alternative site that is suitable due to a severe shortage of sites that meet the requirements in subdivision (a) of Section 17213 of the Education Code. If the governing board makes this finding, the governing board shall adopt a statement of overriding considerations pursuant to Section 15093 of Title 14 of the California Code of Regulations.

* * *

(b) As used in this section* * *, the following definitions shall apply:

(1) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(2) "Extremely hazardous substances" means * * *an extremely hazardous substance as defined pursuant to paragraph (2) of subdivision (g) of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(5) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(6) "Administering agency" means an agency authorized pursuant to Section 25502 of the Health and Safety Code to implement and enforce Chapter 6.95 (commencing with Section 25500) of Division 20 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(8) "Facilities" means any source with a potential to use, generate, emit, or discharge hazardous air pollutants, including, but not limited to, pollutants that meet the definition of a hazardous

CHAPTER 23
 S.B. No. 47
 HAZARDOUS SUBSTANCES--CARPENTER-PRESLEY-TENNER HAZARDOUS SUBSTANCE ACCOUNT
 ACT--GENERAL AMENDMENTS

AN ACT to repeal and add Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code, relating to hazardous substances, making an appropriation therefor, and declaring the urgency thereof, to take effect immediately.

[Filed with Secretary of State May 26, 1999.]
 LEGISLATIVE COUNSEL'S DIGEST

SB 47, Sher. Hazardous substance account: extension.

(1) Under prior law, the Carpenter-Presley-Tanner Hazardous Substance Account Act, which was repealed on January 1, 1999, with certain exceptions, imposed liability for hazardous substance removal or remedial actions and required the Department of Toxic Substances Control to adopt, by regulation, criteria for the selection and for the priority ranking of hazardous substance release sites for removal or remedial action under the act. The act required the department or, if appropriate, a California regional water quality control board, to prepare or approve remedial action plans for each listed site and provided for an arbitration process for the apportionment of liability for removal or remedial actions. The act authorized the department to expend the funds in the Toxic Substances Control Account in the General Fund, upon appropriation by the Legislature, to pay for, among other things, removal and remedial actions related to the release of hazardous substances. However, certain provisions of the act, including the Johnston-Filante Hazardous Substance Cleanup Bond Act of 1984 and related provisions, will not be repealed until the date when the bonds issued and sold pursuant to the bond act have been paid and the General Fund reimbursed.

Among other things, the act annually appropriated \$5,000,000 from the Hazardous Substance Clearing Account to pay the principal of, and interest on, bonds issued and sold pursuant to the bond act and continuously appropriated \$1,000,000 from the Toxic Substances Control Account to the department as a reserve account for emergencies. The act also continuously appropriated certain funds deposited in a subaccount for removal and remedial actions at a specific site and funds in a subaccount established by the Controller for site operation and maintenance. The act authorized a person to apply to the State Board of Control for compensation of a loss caused by the release of a

hazardous substance, and provided that any person who knowingly gives, or causes to be given, any false information as a part of a claim for compensation is guilty of a misdemeanor.

This bill would repeal, reenact, and revise the act, thereby extending the effect of the act indefinitely. This bill would revise the term "operation and maintenance" and would define the terms "response," "respond," "response action," and "site."

The bill would direct the department or California regional water quality board to require a responsible party who is required to comply with operation and maintenance requirements to demonstrate and maintain financial assurance, in a specified manner, except as specified. The bill would require the remedial action plan to evaluate each alternative remedial action considered and rejected by the department or a regional board and to include specified information regarding those alternatives. The bill would require the department to issue orders for removal or remedial actions to the largest manageable number of potentially responsible parties, after considering specified factors, and would exempt certain determinations made by the department, when issuing those orders, from judicial review. The bill would require that any response action taken or approved pursuant to the act be based upon, and be no less stringent than, specified federal regulations and state statutes, regulations, and policies, and would require a health or ecological risk assessment prepared in conjunction with such a response action to meet specified criteria and include specified assumptions.

The bill would require the department and the regional board to provide specified information to the affected community and to develop a public participation work plan, and would provide for the establishment of community advisory groups under specified conditions. The bill would authorize a community advisory group to request a technical assistance grant for a site. The department and the State Water Resources Control Board would be required to create 2 community service offices, by July 1, 2000, to perform specified duties.

The bill would require the Attorney General, at the request of the department, to recover, pursuant to state or federal law, any costs incurred by the department or regional board in carrying out the act. The bill would exempt certain owners of property from liability for groundwater releases, except as specified.

The bill would require the department to propose a final administrative or judicial expedited settlement with potentially responsible parties who have contributed a minimal amount of hazardous substances to a site.

The bill would establish the Orphan Share Reimbursement Trust Fund in the State Treasury and would authorize the administrator of the fund to expend the money in that fund, upon appropriation by the Legislature, for specified purposes, including the reimbursement of the orphan share of a site, as defined. The bill would provide that the provisions establishing the fund and the related provisions would not become operative until the operative date of a statute that becomes operative on or after January 1, 2000, creates a position in state government known as the Administrator of the Orphan Share Reimbursement Trust Fund to be appointed by the Governor and subject to confirmation by the Senate, and either appropriates funds to implement those provisions or establishes a revenue source for the fund, or both. The bill would provide for the suspension of the operation of those provisions under specified conditions.

The bill would make an appropriation by reenacting the continuous appropriations specified above. The bill, by reenacting the act, would also extend that misdemeanor provision, thereby imposing a state-mandated local program by creating a new crime.

The bill would provide that any action taken pursuant to the former act by the department, a California regional water quality control board, or any other state or local agency, would remain in effect on and after January 1, 1999, and be subject to the act, as reenacted by this bill. The bill would provide that it does not terminate, affect, or modify any proceeding, order, or agreement issued or entered into by the department, the regional board, by any other state or local agency pursuant to the former act or any rights or obligations arising out of a bond issue and that the reenacted act would apply retroactively, on and after January 1, 1999, to those proceedings, orders, agreements, or bonds.

The bill would require that funds expended by the department to pay the costs of carrying out actions to remove hazardous substances from sites of illegal drug laboratories during the period from January 1, 1999, until the effective date of the bill, to be paid from a specified appropriation made in the Budget Act of 1998, and would provide for the transfer of a specified amount of funds expended by the department from that appropriation.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Appropriation: yes.

The people of the State of California do enact as follows:

<< Repealed: CA HLTH & S §§ 25300, 25301, 25310, 25311, 25312, 25313, 25313.5, 25314, 25315, 25316, 25317, 25317.5, 25318, 25318.5, 25319, 25319.5, 25320, 25321, 25322, 25322.1, 25322.2, 25323, 25323.1, 25323.5, 25323.6, 25324, 25325, 25326, 25326.5, 25326.6, 25327, 25330, 25330.2, 25330.4, 25330.5, 25331, 25334, 25334.5, 25334.6, 25334.7, 25335, 25336, 25337, 25342, 25342.2, 25343, 25350, 25351.1, 25351.2, 25351.5, 25351.6, 25351.7, 25351.8, 25352, 25353, 25354, 25354.5, 25355, 25355.5, 25355.6, 25355.7, 25355.8, 25356, 25356.1, 25356.2, 25356.3, 25356.4, 25356.5, 25356.6, 25356.7, 25356.8, 25356.9, 25356.10, 25357, 25357.5, 25358, 25358.1, 25358.2, 25358.3, 25358.4, 25358.5, 25358.6, 25358.7, 25358.9, 25359, 25359.1, 25359.2, 25359.3, 25359.4, 25359.4.5, 25359.5, 25359.6, 25359.7, 25360, 25360.1, 25360.2, 25360.3, 25360.4, 25361, 25362, 25363, 25364, 25364.1, 25364.7, 25365, 25365.6, 25366, 25366.5, 25367, 25368, 25368.1, 25368.2, 25368.3, 25368.4, 25368.5, 25368.6, 25368.7, 25368.8, 25369, 25369.1, 25370, 25372, 25373, 25374, 25375, 25375.5, 25376, 25377, 25378, 25379, 25380, 25381, 25382, 25385, 25385.1, 25385.2, 25385.3, 25385.4, 25385.5, 25385.6, 25385.7, 25385.8, 25385.9, 25386, 25386.1, 25386.2, 25386.25, 25386.3,

25386.4, 25386.5, 25386.6, 25395, 25395.1, 25395.2, 25395.3, 25395.4, 25395.5,
25395.6, 25395.7, 25395.8, 25395.9, 25395.10, 25395.11, 25395.12, 25395.13,
25395.14, 25395.15 >>

SECTION 1. Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code is repealed.

SEC. 2. Chapter 6.8 (commencing with Section 25300) is added to Division 20 of the Health and Safety Code, to read:

<< CA HLTH & S pr. 25300 (c. hd.) >>

CHAPTER 6.8. HAZARDOUS SUBSTANCE ACCOUNT
Article 1. Short Title and Legislative Intent

<< CA HLTH & S § 25300 >>

25300. This chapter shall be known and may be cited as the Carpenter-Presley-Tanner Hazardous Substance Account Act.

<< CA HLTH & S § 25301 >>

25301. It is the intent of the Legislature to do all of the following:

(a) Establish a program to provide for response authority for releases of hazardous substances, including spills and hazardous waste disposal sites that pose a threat to the public health or the environment.

(b) Compensate persons, under certain circumstances, for out-of-pocket medical expenses and lost wages or business income resulting from injuries proximately caused by exposure to releases of hazardous substances.

(c) Make available adequate funds in order to permit the State of California to assure payment of its 10-percent share of the costs mandated pursuant to Section 104(c)(3) of the federal act (42 U.S.C. Sec. 9604(c)(3)).

Article 2. Definitions

<< CA HLTH & S § 25310 >>

25310. The definitions set forth in this article shall govern the interpretation of this chapter. Unless the context requires otherwise and except as provided in this article, the definitions contained in Section 101 of the federal act (42 U.S.C. Sec. 9601) shall apply to the terms used in this chapter.

<< CA HLTH & S § 25311 >>

25311. "Contract competitor" means any person competing for a state contract pursuant to subdivision (c) of Section 25358.3.

<< CA HLTH & S § 25312 >>

25312. "Department" means the Department of Toxic Substances Control.

<< CA HLTH & S § 25313 >>

25313. "Director" means the Director of Toxic Substances Control.

<< CA HLTH & S § 25314 >>

25314. "Feasibility study" means the identification and evaluation of technically feasible and effective remedial action alternatives to protect public health and the environment, at a hazardous substance release site, or other activities deemed necessary by the department for the development of a remedial action plan.

<< CA HLTH & S § 25315 >>

25315. "Federal act" means the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (42 U.S.C. Sec. 9601 et seq.).

<< CA HLTH & S § 25316 >>

25316. "Hazardous substance" means:

(a) Any substance designated pursuant to Section 1321 (b) (2) (A) of Title 33 of the United States Code.

(b) Any element, compound, mixture, solution, or substance designated pursuant to Section 102 of the federal act (42 U.S.C. Sec. 9602).

(c) Any hazardous waste having the characteristics identified under or listed pursuant to Section 6921 of Title 42 of the United States Code, but not including any waste the regulation of which under the Solid Waste Disposal Act (42 U.S.C. Sec. 6901 et seq.) has been suspended by act of Congress.

(d) Any toxic pollutant listed under Section 1317 (a) of Title 33 of the United States Code.

(e) Any hazardous air pollutant listed under Section 7412 of Title 42 of the United States Code.

(f) Any imminently hazardous chemical substance or mixture with respect to which the Administrator of the United States Environmental Protection Agency has taken action pursuant to Section 2606 of Title 15 of the United States Code.

(g) Any hazardous waste or extremely hazardous waste as defined by Sections 25117 and 25115, respectively, unless expressly excluded.

<< CA HLTH & S § 25317 >>

25317. "Hazardous substance" does not include:

(a) Petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance in subdivisions (a) to (f), inclusive, of Section 25316, and natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas), or the ash produced by a resource recovery facility utilizing a municipal solid waste stream.

(b) Nontoxic, nonflammable, noncorrosive stormwater runoff drained from underground vaults, chambers, or manholes into gutters or storm sewers.

<< CA HLTH & S § 25318.5 >>

25318.5. "Operation and maintenance" means those activities initiated or continued at a hazardous substance release site following completion of a removal or remedial action that are deemed necessary by the department or regional board in order to protect public health or safety or the environment, to maintain the effectiveness of the removal or remedial action at the site, or to achieve or maintain the removal or remedial action standards and objectives established by the final remedial action plan or final removal action work plan applicable to the site.

<< CA HLTH & S § 25319 >>

25319. "Person" means an individual, trust, firm, joint stock company, business concern, corporation, including, but not limited to, a government corporation, partnership, limited liability company, and association. "Person" also includes any city, county, city and county, district, commission, the state or any department, agency, or political subdivision thereof, any interstate body, and the United States and its agencies and instrumentalities, to the extent permitted by law.

<< CA HLTH & S § 25319.5 >>

25319.5. "Preliminary endangerment assessment" means an activity that is performed to determine whether current or past waste management practices have resulted in the release or threatened release of hazardous substances that pose a threat to public health or the environment.

<< CA HLTH & S § 25319.6 >>

25319.6. "Regional board" means a California regional water quality control board.

<< CA HLTH & S § 25320 >>

25320. "Release" means any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment.

<< CA HLTH & S § 25321 >>

25321. "Release" does not include any of the following:

(a) Any release that results in exposure to persons solely within a workplace, with respect to a claim those exposed persons may assert against their employer.

(b) Emissions from the engine exhaust of a motor vehicle, rolling stock, aircraft, vessel, or pipeline pumping station engine.

(c) Release of source, byproduct, or special nuclear material from a nuclear incident, as those terms are defined in the Atomic Energy Act of 1954 (42 U.S.C. Sec. 2011, et seq.), if such release is subject to requirements with respect to financial protection established by the Nuclear Regulatory Commission under Section 2210 of Title 42 of the United States Code or, for the purposes of Section 104 of the federal act (42 U.S.C. Sec. 9604) or any other response action, any release of source byproduct, or special nuclear material from any processing site designated under Section 7912(a)(1) or 7942(a) of Title 42 of the United States Code, which sections are a part of the Uranium Mill Tailings Radiation Control Act of 1978.

(d) The normal application of fertilizer, plant growth regulants, and pesticides.

<< CA HLTH & S § 25322 >>

25322. "Remedy" or "remedial action" includes all of the following:

(a) Those actions that are consistent with a permanent remedy, that are taken instead of, or in addition to, removal actions in the event of a release or threatened release of a hazardous substance into the environment, as further defined by Section 101(24) of the federal act (42 U.S.C. Sec. 9601(24)), except that any reference in Section 101(24) of the federal act (42 U.S.C. Sec. 9601(24)) to the President, relating to determinations regarding the relocation of residents, businesses, and community facilities shall, for the purposes of this chapter, be deemed to be a reference to the Governor and any other reference in that section to the President shall, for the purposes of this chapter, be deemed a reference to the Governor, or the director, if designated by the Governor.

(b) Those actions that are necessary to monitor, assess, and evaluate a release or a threatened release of a hazardous substance.

(c) Site operation and maintenance.

<< CA HLTH & S § 25322.1 >>

25322.1. "Remedial design" means the detailed engineering plan to implement the remedial action alternative or initial remedial measure approved by the department.

<< CA HLTH & S § 25322.2 >>

25322.2. "Remedial investigation" means those actions deemed necessary by the department to determine the full extent of a hazardous substance release at a site, identify the public health and environment threat posed by the release, collect data on possible

remedies, and otherwise evaluate the site for purposes of developing a remedial action plan.

<< CA HLTH & S § 25323 >>

25323. "Remove" or "removal" includes the cleanup or removal of released hazardous substances from the environment or the taking of other actions as may be necessary to prevent, minimize, or mitigate damage which may otherwise result from a release or threatened release, as further defined by Section 101(23) of the federal act (42 U.S.C. Sec. 9601(23)).

<< CA HLTH & S § 25323.1 >>

25323.1. "Removal action work plan" means a work plan prepared or approved by the department or a California regional water quality control board that is developed to carry out a removal action, in an effective manner, that is protective of the public health and safety and the environment. The removal action work plan shall include a detailed engineering plan for conducting the removal action, a description of the onsite contamination, the goals to be achieved by the removal action, and any alternative removal options that were considered and rejected and the basis for that rejection.

<< CA HLTH & S § 25323.3 >>

25323.3. "Response," "respond," or "response action" have the same meanings as defined in Section 9701(25) of the federal act (42 U.S.C. Sec. 9701(25)). The enforcement and oversight activities of the department and regional board are included within the meaning of "response," "respond," or "response action."

<< CA HLTH & S § 25323.5 >>

25323.5. (a)(1) "Responsible party" or "liable person," for the purposes of this chapter, means those persons described in Section 107(a) of the federal act (42 U.S.C. Sec. 9607(a)).

(2)(A) Notwithstanding paragraph (1), but except as provided in subparagraph (B), a person is not a responsible party or liable person, for purposes of this chapter, for the reason that the person has developed or implemented innovative investigative or innovative remedial technology with regard to a release site, if the use of the technology has been approved by the department for the release site and the person would not otherwise be a responsible party or liable person. Upon approval of the use of the technology, the director shall acknowledge, in writing, that, upon proper completion of the innovative investigative or innovative remedial action at the release site, the immunity provided by this subparagraph shall apply to the person.

(B) Subparagraph (A) does not apply in any of the following cases:

(i) Conditions at the release site have deteriorated as a result of the negligence of the person who developed or implemented the innovative investigative or innovative remedial technology.

(ii) The person who developed or implemented the innovative investigative or innovative remedial technology withheld or misrepresented information that was relevant to the potential risks or harms of the technology.

(iii) The person who implemented the innovative investigative or innovative remedial technology did not follow the implementation process approved by the department.

(b) For the purposes of this chapter, the defenses available to a responsible party or liable person shall be those defenses specified in Sections 101(35) and 107(b) of the federal act (42 U.S.C. Secs. 9601(35) and 9607(b)).

(c) Any person who unknowingly transports hazardous waste to a solid waste facility pursuant to the exemption provided in subdivision (e) of Section 25163 shall not be considered a responsible party for purposes of this chapter solely because of the act of transporting the waste. Nothing in this subdivision shall affect the liability of this person for his or her negligent acts.

<< CA HLTH & S § 25323.9 >>

25323.9. "Site" has the same meaning as the term "facility" is defined by Section 101(9) of the federal act (42 U.S.C. Sec. 9601(9)).

<< CA HLTH & S § 25324 >>

25324. "State account" means the Toxic Substances Control Account established pursuant to Section 25173.6, except that in Section 25334 and Article 7.5 (commencing with Section 25385), "state account" means the Hazardous Substance Account established pursuant to Section 25330. Notwithstanding any other provision of this section, any costs incurred and payable from the Hazardous Substance Account, the Hazardous Waste Control Account, or the Site Remediation Account prior to July 1, 1998, to implement this chapter, as it read prior to January 1, 1999, or Chapter 6.85 (commencing with Section 25396), shall be recoverable from the liable person or persons pursuant to Section 25360 as if the costs were incurred and payable from the state account.

<< CA HLTH & S § 25325 >>

25325. "Federally permitted release" has the same meaning as defined in Section 101(10) of the federal act (42 U.S.C. Sec. 9601(10)).

<< CA HLTH & S § 25326 >>

25326. "A release authorized or permitted pursuant to state law" means any release into the environment which is authorized by statute, ordinance, regulation, or rule of any state, regional, or local agency or government or by any specific permit, license, or similar authorization from such an agency, including one of the foregoing, that recognizes a standard industry practice, including variances obtained from the agency which allow operations for facilities during a period of time when releases from the facilities do not conform with relevant statutes, ordinances, regulations, or rules. The term includes a federally permitted release, as defined by Section 25325, and releases that are in accordance with any court order or consent decree.

<< CA HLTH & S § 25326.5 >>

25326.5. "Site cleanup evaluation" means an evaluation by the department of the effectiveness of a removal or remedial action conducted by a responsible party, to reduce or eliminate actual or potential public health and environmental threats posed by a hazardous substance release site if the action itself is not the subject of oversight by the department.

<< CA HLTH & S § 25327 >>

25327. "Tier" means a grouping of hazardous substance release sites that require removal and remedial actions, that are listed alphabetically, and that are of a roughly equivalent priority for removal and remedial action.

Article 3. Hazardous Substance Account

<< CA HLTH & S § 25330 >>

25330. There is in the General Fund the Hazardous Substance Account which shall be administered by the director. In addition to any other money appropriated by the Legislature to the account, the following amounts shall be deposited in the account:

- (a) Any interest earned on money deposited in the account.
- (b) Any money transferred from the state account pursuant to Section 25173.6 or 25336.

<< CA HLTH & S § 25330.2 >>

25330.2. Funds in the state account appropriated for removal or remedial action pursuant to this chapter are available for encumbrance for three fiscal years subsequent to the fiscal year in which the funds are appropriated and are available for disbursement in liquidation of encumbrances pursuant to Section 16304.1 of the Government Code.

<< CA HLTH & S § 25330.4 >>

25330.4. (a) Notwithstanding any other provision of law, the Controller shall establish a separate subaccount in the state account, for any funds received from a settlement agreement or the General Fund for a removal or remedial action to be performed at a specific site.

(b) Notwithstanding Section 13340 of the Government Code, funds deposited in the subaccount for those removal or remedial actions are hereby continuously appropriated to the department, without regard to fiscal years, for removal or remedial action at the specific site, and for administrative costs associated with the removal or remedial action at the specific site.

(c) Notwithstanding any other provision of law, money in the subaccount for those removal or remedial actions shall not revert to the General Fund or be transferred to any other

fund or account in the State Treasury, except for purposes of investment as provided in Article 4 (commencing with Section 16470) of Chapter 3 of Part 2 of Division 4 of Title 2 of the Government Code.

(d) Notwithstanding Section 16305.7 of the Government Code, all interest or other increment resulting from investment of the funds specified in subdivision (a) pursuant to Article 4 (commencing with Section 16470) of Chapter 3 of Part 2 of Division 4 of Title 2 of the Government Code shall be deposited in the subaccount for removal or remedial action at the specific sites.

(e) At the conclusion of all removal or remedial actions at the specific site, any unexpended funds in any subaccounts established pursuant to this section shall be transferred to the subaccount for site operation and maintenance established pursuant to Section 25330.5, if necessary, for those activities at the site, or, if not needed for site operation and maintenance at the site, to the Toxic Substances Control Account.

<< CA HLTH & S § 25330.5 >>

25330.5. (a) The Controller shall establish a separate subaccount for site operation and maintenance in the state account. All of the following amounts shall be deposited in the subaccount:

- (1) Funds received from responsible parties for site operation and maintenance.
- (2) Funds received from the federal government pursuant to the federal act for site operation and maintenance.
- (3) Funds received from cities, counties, or any other state or local agency for site operation and maintenance.
- (4) Funds appropriated from the state account by the Legislature for site operation and maintenance.

(b) Notwithstanding Section 13340 of the Government Code, funds deposited in the subaccount for site operation and maintenance are hereby continuously appropriated to the department, without regard to fiscal years, for site operation and maintenance, and for administrative costs associated with site operation and maintenance.

(c) Notwithstanding any other provision of law, money in the subaccount for site operation and maintenance shall not revert to the General Fund or be transferred to any other fund or account in the State Treasury, except for purposes of investment as provided in Article 4 (commencing with Section 16470) of Chapter 3 of Part 2 of Division 4 of Title 2 of the Government Code.

(d) Notwithstanding Section 16305.7 of the Government Code, all interest or other increment resulting from investment of the funds specified in subdivision (a) pursuant to Article 4 (commencing with Section 16470) of Chapter 3 of Part 2 of Division 4 of Title 2 of the Government Code shall be deposited in the subaccount for site operation and maintenance.

<< CA HLTH & S § 25331 >>

25331. The state account may sue and be sued in its own name.

<< CA HLTH & S § 25334 >>

25334. There is within the state account, the Hazardous Substance Clearing Account, which shall be used to pay the principal of, and interest on, bonds sold pursuant to Article 7.5 (commencing with Section 25385). Notwithstanding Section 25351, all of the following moneys shall be deposited in the account for the payment of the principal of, and interest on, bonds:

- (a) Transfers from the Superfund Bond Trust Fund made pursuant to Section 25385.8.
- (b) Amounts received pursuant to Sections 25356.4 and 25360, as specified in those sections, if the expenditures for removal or remedial actions were paid from the proceeds of the bonds sold pursuant to Article 7.5 (commencing with Section 25385).
- (c) Federal moneys received pursuant to the federal act which are designated to be used for removal or remedial actions paid for by proceeds from the bonds issued pursuant to Article 7.5 (commencing with Section 25385).
- (d) Any moneys appropriated by the Legislature for the payment of the principal of, and interest on, these bonds.
- (e) Any moneys derived from the premiums and accrued interest on these bonds.

<< CA HLTH & S § 25334.7 >>

25334.7. (a) The department shall report to the Governor and the Legislature on the progress of the cleanup of the San Gabriel Valley groundwater sites in Los Angeles County, and on the progress of enforcement actions relating to those sites, in the biennial report specified in Section 25178. The report shall include, but not be limited to, all of the following:

- (1) State expenditures and planned expenditures.
 - (2) Actions accomplished at the sites.
 - (3) Actions planned, including a time schedule for the accomplishment of planned actions.
- (b) The report may be prepared in cooperation with other state and federal agencies involved with the sites, and shall include a summary of the activities of those additional agencies.

<< CA HLTH & S § 25336 >>

25336. There shall be deposited in the Hazardous Substance Account any money

transferred, upon appropriation by the Legislature, from the state account. Those moneys may be expended for repayment of principal of, and interest on, bonds sold pursuant to Article 7.5 (commencing with Section 25385), and for all other purposes for which the Hazardous Substance Account or the state account may be used pursuant to Article 7.5 (commencing with Section 25385).

<< CA HLTH & S § 25337 >>

25337. (a) There is in the General Fund the Site Remediation Account, which shall be administered by the director. The account shall be funded by money transferred from the state account, upon appropriation by the Legislature. Consistent with the requirements of Section 114(c) of the federal act (42 U.S.C. Sec. 9614(c)), the moneys in the account may be expended by the department, upon appropriation by the Legislature, for direct site remediation costs.

(b)(1) For purposes of this section, "direct site remediation costs" means payments to contractors for investigations, characterizations, removal, remediation, or long-term operation and maintenance at sites contaminated or suspected of contamination by hazardous materials, where those actions are authorized pursuant to this chapter.

(2) "Direct site remediation costs" also means the state-mandated share pursuant to Section 104(c)(3) of the federal act (42 U.S.C. Sec. 9604(c)(3)).

(3) "Direct site remediation costs" does not include the department's administrative expenses or the department's expenses for staff to perform oversight of investigations, characterizations, removals, remediations, or long-term operation and maintenance.

Article 4. Fees

<< CA HLTH & S § 25342 >>

25342. The Director of Finance shall schedule in the annual Budget Act the projects proposed in any fiscal year, that will incur direct costs for removal and remedial actions at hazardous substance release sites.

<< CA HLTH & S § 25343 >>

25343. (a) Except as provided in subdivisions (b) and (c), any potentially responsible party at a site, or any person who has notified the department of that person's intent to undertake removal or remediation at a site, shall reimburse the department, pursuant to Chapter 6.66 (commencing with Section 25269), for the costs incurred by the department for its oversight of any preliminary endangerment assessment at that site.

(b) This section does not apply to any notice of intent submitted to the department prior to July 1, 1998. Any person who submitted such a notice shall pay the fee, if not already paid, as required by this section as it read on December 31, 1997, unless the department and that person mutually agree to enter into a reimbursement agreement in lieu of any unpaid portion of the required fee.

(c) The changes made in this section by Chapter 870 of the Statutes of 1997 do not require

amendment of, or otherwise affect, any agreement entered into prior to July 1, 1998, pursuant to which any person has agreed to reimburse the department for the costs incurred by the department for its oversight of a preliminary endangerment assessment.

Article 5. Uses of the State Account

<< CA HLTH & S § 25350 >>

25350. For response actions taken pursuant to the federal act, only those costs for actions that are consistent with the priorities, guidelines, criteria, and regulations contained in the national contingency plan, as revised and republished pursuant to Section 105 of the federal act (42 U.S.C. Sec. 9605), shall qualify for appropriation by the Legislature and expenditure by the director pursuant to Sections 25351, 25352, and 25354. For response actions not taken pursuant to the federal act or for response actions taken that are not specifically addressed by the priorities, guidelines, criteria, and regulations contained in the national contingency plan, as revised and republished, the costs thereof shall also qualify for appropriation by the Legislature and expenditure by the department pursuant to Sections 25351, 25352, and 25354 provided they are, to the maximum extent possible, consistent with the priorities, guidelines, criteria, and regulations contained in the national contingency plan for similar releases, situations, or events. No response actions taken pursuant to this chapter by the department or regional or local agencies shall duplicate federal response actions.

<< CA HLTH & S § 25351.1 >>

25351.1. Notwithstanding Section 13340 of the Government Code, there is hereby transferred annually from the Hazardous Substance Account to the Hazardous Substance Clearing Account, and appropriated therefrom, an amount of not more than five million dollars (\$5,000,000) which is required to pay the principal of, and interest on, bonds sold pursuant to Article 7.5 (commencing with Section 25385) to the extent that the funds in the Hazardous Substance Clearing Account and the Superfund Bond Trust Fund are insufficient to pay the principal of, and interest on, these bonds.

<< CA HLTH & S § 25351.2 >>

25351.2. (a) A city or county may initiate a removal or remedial action for a site listed pursuant to Section 25356 in accordance with this section. Except as provided in subdivision (d), the city or county shall, before commencing the removal or remedial action, take all of the following actions:

(1) The city or county shall notify the department of the planned removal or remedial action. Upon receiving this notification, the department shall make a reasonable effort to notify any person identified by the department as a potentially responsible party for the site. If a potentially responsible party is taking the removal or remedial action properly and in a timely fashion, or if a potentially responsible party will commence such an action within 60 days of this notification, the city or county may not initiate a removal or remedial action pursuant to this section.

(2) If a potentially responsible party for the site has not taken the action specified in paragraph (1), the city or county shall submit the estimated cost of the removal or remedial action to the department, which shall, within 30 days after receiving the

estimate, approve or disapprove the reasonableness of the cost estimate. If the department disagrees with the cost estimate, the city or county and the department shall, within 30 days, attempt to enter into an agreement concerning the cost estimate.

(3) The city or county shall demonstrate to the department that it has sufficient funds to carry out the approved removal or remedial action without taking into account any costs of the action that may be, or have been, paid by a potentially responsible party.

(b) If the director approves the request of the city or county to initiate a removal or remedial action and a final remedial action plan has been issued pursuant to Section 25356.1 for the hazardous substance release site, the city or county shall be deemed to be acting in place of the department for purposes of implementing the remedial action plan pursuant to this chapter.

(c) Upon reimbursing a city or county for the costs of a removal or remedial action, the department shall recover these costs pursuant to Section 25360.

(d) In order for a city or county to be reimbursed for the costs of a removal or remedial action incurred by the city or county from the Hazardous Substance Cleanup Fund, the city or county shall obtain the approval of the director before commencing the removal or remedial action. The director shall grant an approval only when all actions required by law prior to implementation of a remedial action plan have been taken.

<< CA HLTH & S § 25351.5 >>

25351.5. The department shall adopt any regulations necessary to carry out its responsibilities pursuant to this chapter, including, but not limited to, regulations governing the expenditure of, and accounting procedures for, moneys allocated to state, regional, and local agencies pursuant to this chapter.

<< CA HLTH & S § 25351.6 >>

25351.6. Notwithstanding Section 16304 of the Government Code, the funds deposited in the Hazardous Substance Cleanup Fund are available, upon appropriation by the Legislature, for encumbrance without regard to fiscal years.

<< CA HLTH & S § 25351.7 >>

25351.7. Any treatment, storage, transfer, or disposal facility built on the Stringfellow Quarry Class I Hazardous Waste Disposal Site, that was built for the purpose of a remedial or removal action at that site, shall only be used to treat, store, transfer, or dispose of hazardous substances removed from that site.

<< CA HLTH & S § 25351.8 >>

25351.8: Notwithstanding any other provision of law, including, but not limited to, Sections 25334.5 and 25356, the department shall place the highest priority on taking removal and remedial actions at the Stringfellow Quarry Class I Hazardous Waste Disposal Site and shall devote sufficient resources to accomplish the tasks required by this section.

<< CA HLTH & S § 25352 >>

25352. Money deposited in the state account may also be appropriated by the Legislature to the department on a specific site basis for the following purposes:

(a) For all costs incurred in restoring, rehabilitating, replacing, or acquiring the equivalent of, any natural resource injured, degraded, destroyed, or lost as a result of any release of a hazardous substance, to the extent the costs are not reimbursed pursuant to the federal act and taking into account processes of natural rehabilitation, restoration, and replacement.

(b) For all costs incurred in assessing short-term and long-term injury to, degradation or destruction of, or any loss of any natural resource resulting from a release of a hazardous substance, to the extent that the costs are not reimbursed pursuant to the federal act. No costs may be incurred for any release of a hazardous substance from any facility or project pursuant to subdivision (a) or this subdivision for injury, degradation, destruction, or loss of any natural resource where the injury, degradation, destruction, or loss was specifically identified as an irreversible and irretrievable commitment of natural resources in an environmental impact statement prepared under the authority of the National Environmental Policy Act (42 U.S.C. Sec. 4321 et seq.), or was identified as a significant environmental effect to the natural resources which cannot be avoided in an environmental impact report prepared pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code), and a decision to grant a permit, license, or similar authorization for any facility or project is based upon a consideration of the significant environmental effects to the natural resources, and the facility or project was otherwise operating within the terms of its permit, license, or similar authorization at the time of release.

(c) Notwithstanding Section 25355, the Governor, or the authorized representative of the state, shall act on behalf of the public as trustee of the natural resources to recover costs expended pursuant to subdivision (a) or (b).

<< CA HLTH & S § 25353 >>

25353. (a) Except as provided in (b), the department may not expend funds from the state account or the Hazardous Substance Cleanup Fund for a removal or remedial action with respect to a hazardous substance release site owned or operated by the federal government or a state or local agency at the time of disposal to the extent that the federal government or the state or local agency would otherwise be liable for the costs of that action, except that the department may expend those funds, upon appropriation by the Legislature, to oversee the carrying out of a removal or remedial action at the site by another party.

(b) Except as provided in subdivision (f), the department may expend funds from the state account or the Hazardous Substance Cleanup Fund, upon appropriation by the Legislature, to take a removal or remedial action at a hazardous substance release site which was owned or operated by a local agency at the time of release, if all of the following requirements are met:

(1) The department has substantial evidence that a local agency is not the only responsible party for the site.

(2) The department has issued a cleanup order to, or entered into an enforceable agreement with, the local agency pursuant to Section 25355.5 and has made a final determination that the local agency is not in compliance with the order or enforceable agreement.

(c) The department shall recover any funds expended pursuant to subdivision (a) or (b) to the maximum possible extent pursuant to Section 25360.

(d) If a local agency is identified as a potentially responsible party in a remedial action plan prepared pursuant to Section 25356.1, and the department expends funds pursuant to this chapter to pay for the local agency's share of the removal and remedial action, the expenditure of these funds shall be deemed to be a loan from the state to the local agency. If the department determines that the local agency is not making adequate progress toward repaying the loan made pursuant to this section, the State Board of Equalization shall, upon notice by the department, withhold the unpaid amount of the loan, in increments from the sales and use tax transmittals made pursuant to Section 7204 of the Revenue and Taxation Code, to the city or county in which the local agency is located. The State Board of Equalization shall structure the amounts to be withheld so that complete repayment of the loan, together with interest and administrative charges, occurs within five years after a local agency has been notified by the department of the amount which it owes. The State Board of Equalization shall deposit any funds withheld pursuant to this section in the Hazardous Substance Clearing Account for the purposes specified in Section 25334, if the department expended the funds from the Hazardous Substance Cleanup Fund, or into the state account, if the department expended the funds from the state account.

(e) The department may not expend funds from the state account or the Hazardous Substance Cleanup Fund for the purposes specified in Section 25352 where the injury, degradation, destruction, or loss to natural resources, or the release of a hazardous substance from which the damages to natural resources resulted, has occurred prior to September 25, 1981.

(f) The department may not expend funds from the state account or the Hazardous Substance Cleanup Fund for a removal or remedial action at any waste management unit owned or operated by a local agency if it meets both of the following conditions:

(1) It is classified as a class III waste management unit pursuant to Subchapter 15 (commencing with Section 2510) of Chapter 3 of Title 23 of the California Administrative Code.

(2) It was in operation on or after January 1, 1988.

<< CA HLTH & S § 25354 >>

25354. (a) There is hereby continuously appropriated from the state account to the department the sum of one million dollars (\$1,000,000) for each fiscal year as a reserve account for emergencies, notwithstanding Section 13340 of the Government Code. The department shall expend moneys available in the reserve account only for the purpose of taking immediate corrective action necessary to remedy or prevent an emergency resulting from a fire or an explosion of, or human exposure to, hazardous substances

caused by the release or threatened release of a hazardous substance.

(b) (1) Notwithstanding any other provision of law, the department may enter into written contracts for corrective action taken or to be taken pursuant to subdivision (a).

(2) Notwithstanding any other provision of law, the department may enter into oral contracts, not to exceed ten thousand dollars (\$10,000) in obligation, when, in the judgment of the department, immediate corrective action is necessary to remedy or prevent an emergency specified in subdivision (a).

(3) The contracts made pursuant to this subdivision, whether written or oral, may include provisions for the rental of tools or equipment, either with or without operators furnished, and for the furnishing of labor and materials necessary to accomplish the work.

(4) If the department finds that the corrective action includes the relocation of individuals, the department may contract with those individuals for out-of-pocket expenses incurred in moving for an amount of not more than one thousand dollars (\$1,000).

(c) The department shall include in the biennial report specified in Section 25178 an accounting of the moneys expended pursuant to this section. Once the appropriation made pursuant to subdivision (a) is fully expended, the director may file a report with the Legislature if it is in session or, if it is not in session, with the Committee on Rules of the Assembly and the Senate as to the moneys expended pursuant to this section. The Legislature may appropriate moneys from the state account, in addition to those moneys appropriated pursuant to subdivision (a), to the department for the purpose of taking corrective action pursuant to subdivision (a).

(d) Except as provided in subdivision (c), the amount deposited in the reserve account and appropriated pursuant to this section shall not exceed one million dollars (\$1,000,000) in any fiscal year. On June 30 of each year, the unencumbered balance of the reserve account shall revert to and be deposited in the state account.

<< CA HLTH & S § 25354.5 >>

25354.5. (a) Any state or local law enforcement officer or investigator or other law enforcement agency employee who, in the course of an official investigation or enforcement action regarding the manufacture of any illegal controlled substance, comes in contact with, or is aware of, the presence of a substance that the person suspects is a hazardous substance at a site where an illegal controlled substance is or was manufactured, shall notify the department for the purpose of taking removal action, as necessary, to prevent, minimize, or mitigate damage that might otherwise result from the release or threatened release of the hazardous substance, except for samples required to be kept for evidentiary purposes.

(b) (1) Notwithstanding any other provision of law, upon receipt of a notification pursuant to subdivision (a), the department shall take removal action, as necessary, with respect to any hazardous substance that is an illegal controlled substance, a precursor of a controlled substance, a material intended to be used in the unlawful manufacture of a controlled substance, or a waste material from the unlawful manufacture of a controlled substance. The department may expend funds appropriated from the Illegal

Drug Lab Cleanup Account created pursuant to subdivision (e) to pay the costs of removal actions required by this section. The department may enter into oral contracts, not to exceed ten thousand dollars (\$10,000) in obligation, when, in the judgment of the department, immediate corrective action to a hazardous substance subject to this section is necessary to remedy or prevent an emergency.

(2) The department shall, as soon as the information is available, report the location of any removal action that will be carried out pursuant to paragraph (1), and the time that the removal action will be carried out, to the local environmental health officer within whose jurisdiction the removal action will take place, if the local environmental officer does both of the following:

(A) Requests, in writing, that the department report this information to the local environmental health officer.

(B) Provides the department with a single 24-hour telephone number to which the information can be reported.

(c)(1) For purposes of Chapter 6.5 (commencing with Section 25100) or this chapter, any person who is found to have operated a site for the purpose of manufacturing an illegal controlled substance or a precursor of an illegal controlled substance is the generator of any hazardous substance at, or released from, the site that is subject to removal action pursuant to this section.

(2) During the removal action, for purposes of complying with the manifest requirements in Section 25160, the department, the county health department, the local environmental health officer, or their designee may sign the hazardous waste manifest as the generator of the hazardous waste. In carrying out that action, the department, the county health department, the local environmental health officer, or their designee shall be considered to have acted in furtherance of their statutory responsibilities to protect the public health and safety and the environment from the release, or threatened release, of hazardous substances, and the department, the county health department, the local environmental health officer, or their designee are not responsible parties for the release or threatened release of the hazardous substances.

(3) The officer, investigator, or agency employee specified in subdivision (a) is not a responsible party for the release or threatened release of any hazardous substances at, or released from, the site.

(d) The department may adopt regulations to implement this section in consultation with appropriate law enforcement and local environmental agencies.

(e) The Illegal Drug Lab Cleanup Account is hereby created in the General Fund and the department may expend any money in the account, upon appropriation by the Legislature, to carry out the removal actions required by this section. The account shall be funded by moneys appropriated directly from the General Fund.

(f) The responsibilities assigned to the department by this section apply only to the extent that sufficient funding is made available for that purpose.

<< CA HLTH & S § 25355 >>

25355. (a) The Governor is responsible for the coordination of all state response actions for sites identified in Section 25356 in order to assure the maximum use of available federal funds.

(b) The director may initiate removal or remedial action pursuant to this chapter unless these actions have been taken, or are being taken properly and in a timely fashion, by any responsible party.

(c) (1) At least 30 days before initiating removal or remedial actions, the department shall make a reasonable effort to notify the persons identified by the department as potentially responsible parties and shall also publish a notification of this action in a newspaper of general circulation pursuant to the method specified in Section 6061 of the Government Code. This subdivision does not apply to actions taken pursuant to subdivision (b) of Section 25358.3 or immediate corrective actions taken pursuant to Section 25354. A responsible party may be held liable pursuant to this chapter whether or not the person was given the notice specified in this subdivision.

(2) (A) Notwithstanding subdivision (a) of Section 25317, any person may voluntarily enter into an enforceable agreement with the department pursuant to this subdivision that allows removal or remedial actions to be conducted under the oversight of the department at sites with petroleum releases from sources other than underground storage tanks, as defined in Section 25299.24.

(B) If the department determines that there may be an adverse impact to water quality as a result of a petroleum release, the department shall notify the appropriate regional board prior to entering into the enforceable agreement pursuant to subparagraph (A). The department may enter into an enforceable agreement pursuant to subparagraph (A) unless, within 60 days of the notification provided by the department, the regional board provides the department with a written notice that the regional board will assume oversight responsibility for the removal or remedial action.

(C) Agreements entered into pursuant to this paragraph shall provide that the party will reimburse the department for all costs incurred including, but not limited to, oversight costs pursuant to the enforceable agreement associated with the performance of the removal or remedial actions and Chapter 6.66 (commencing with Section 25269).

(d) The department shall notify the owner of the real property of the site of a hazardous substance release within 30 days after listing a site pursuant to Section 25356, and at least 30 days before initiating a removal or remedial action pursuant to this chapter, by sending the notification by certified mail to the person to whom the real property is assessed, as shown upon the last equalized assessment roll of the county, at the address shown on the assessment roll. The requirements of this subdivision do not apply to actions taken pursuant to subdivision (b) of Section 25358.3 or to immediate corrective actions taken pursuant to Section 25354.

<< CA HLTH & S § 25355.2 >>

25355.2. (a) Except as provided in subdivision (c), the department or the regional board shall require any responsible party who is required to comply with operation and

maintenance requirements as part of a response action, to demonstrate and to maintain financial assurance in accordance with this section. The responsible party shall demonstrate financial assurance prior to the time that operation and maintenance activities are initiated and shall maintain it throughout the period of time necessary to complete all required operation and maintenance activities.

(b)(1) For purposes of subdivision (a), the responsible party shall demonstrate and maintain one or more of the financial assurance mechanisms set forth in subdivisions (a) to (e), inclusive, of Section 66265.143 of Title 22 of the California Code of Regulations.

(2) As an alternative to the requirement of paragraph (1), a responsible party may demonstrate and maintain financial assurance by means of a financial assurance mechanism other than those listed in paragraph (1), if the alternative financial assurance mechanism has been submitted to, and approved by, the department or the regional board as being at least equivalent to the financial assurance mechanisms specified in paragraph (1). The department or the regional board shall evaluate the equivalency of the proposed alternative financial assurance mechanism principally in terms of the certainty of the availability of funds for required operation and maintenance activities and the amount of funds that will be made available. The department or the regional board shall require the responsible party to submit any information necessary to make a determination as to the equivalency of the proposed alternative financial assurance mechanism.

(c) The department or the regional board shall waive the financial assurance required by subdivision (a) if the department or the regional board makes one of the following determinations:

(1) The responsible party is a small business and has demonstrated all of the following:

(A) The responsible party cannot qualify for any of the financial assurance mechanisms set forth in subdivisions (b), (c), and (d) of Section 66265.143 of Title 22 of the California Code of Regulations.

(B) The responsible party financially cannot meet the requirements of subdivision (a) of Section 66265.143 of Title 22 of the California Code of Regulations.

(C) The responsible party is not capable of meeting the eligibility requirements set forth in subdivision (e) of Section 66265.143 of Title 22 of the California Code of Regulations.

(2) The responsible party is a small business and has demonstrated that the responsible party financially is not capable of establishing one of the financial assurance mechanisms set forth in subdivisions (a) to (e), inclusive, of Section 66265.143 of Title 22 of the California Code of Regulations while at the same time financing the operation and maintenance requirements applicable to the site.

(3) The responsible party is not separately required to demonstrate and maintain a financial assurance mechanism for operation and maintenance activities at a site because of all of the following conditions:

- (A) The site is a multiple responsible party site.
- (B) Financial assurance that operation and maintenance activities at the site will be carried out is demonstrated and maintained by a financial assurance mechanism established jointly by all, or some, of the responsible parties.
- (C) The financial assurance mechanism specified in subparagraph (B) meets the requirements of subdivisions (a) and (b).
- (d) The department or the regional board shall withdraw a waiver granted pursuant to paragraph (1) or (2) of subdivision (c) if the department or the regional board determines that the responsible party that obtained the waiver no longer meets the eligibility requirements for the waiver.
- (e) Notwithstanding Section 7550.5 of the Government Code, on or before January 15, 2001, the department shall report to the Legislature all of the following:
- (1) The number of requests the department and the regional boards have received for waivers from the financial assurance requirements of this section during the period between the effective date of the act that enacts this section and January 1, 2001.
- (2) The disposition of the requests that were received and the reasons for granting the waivers that were allowed and rejecting the waivers that were disallowed.
- (3) The total number of businesses or other entities that were required by this section to demonstrate and maintain financial assurance, the number of businesses or other entities that were able to comply with the requirement, the number that were unable to comply and the reasons why they could not or did not comply, and the history of compliance with this chapter and Chapter 6.5 (commencing with Section 25100) by responsible parties that requested waivers.
- (4) Financial assurance mechanisms other than the financial assurance mechanisms referenced in paragraph (1) of subdivision (b) that may be available to responsible parties.
- (f) For purposes of this section, "small business" is a business that meets the requirements set forth in subdivision (d) of Section 14837 of the Government Code.

<< CA HLTH & S § 25355.5 >>

25355.5. (a) Except as provided in subdivisions (b), (c), and (d), no money shall be expended from the Hazardous Substance Account or the Hazardous Substance Cleanup Fund for removal or remedial actions on any site selected for inclusion on the list established pursuant to Section 25356, unless the department first takes both of the following actions:

(1) The department issues one of the following orders or enters into the following agreement:

(A) The department issues an order specifying a schedule for compliance or correction

pursuant to Section 25187.

(B) The department issues an order establishing a schedule for removing or remedying the release of a hazardous substance at the site, or for correcting the conditions that threaten the release of a hazardous substance. The order shall include, but is not limited to, requiring specific dates by which necessary corrective actions shall be taken to remove the threat of a release, or dates by which the nature and extent of a release shall be determined and the site adequately characterized, a remedial action plan shall be prepared, the remedial action plan shall be submitted to the department for approval, and a removal or remedial action shall be completed.

(C) The department enters into an enforceable agreement with a potentially responsible party for the site that requires the party to take necessary corrective action to remove the threat of the release, or to determine the nature and extent of the release and adequately characterize the site, prepare a remedial action plan, and complete the necessary removal or remedial actions, as required in the approved remedial action plan.

Any enforceable agreement entered into pursuant to this section may provide for the execution and recording of a written instrument that imposes an easement, covenant, restriction, or servitude, or combination thereof, as appropriate, upon the present and future uses of the site. The instrument shall provide that the easement, covenant, restriction, or servitude, or combination thereof, as appropriate, is subject to the variance or removal procedures specified in Sections 25233 and 25234. Notwithstanding any other provision of law, an easement, covenant, restriction, or servitude, or any combination thereof, as appropriate, executed pursuant to this section and recorded so as to provide constructive notice runs with the land from the date of recordation, is binding upon all of the owners of the land, their heirs, successors, and assignees, and the agents, employees, or lessees of the owners, heirs, successors, and assignees, and is enforceable by the department pursuant to Article 8 (commencing with Section 25180) of Chapter 6.5.

(2) The department determines, in writing, that the potentially responsible party or parties for the hazardous substance release site have not complied with all of the terms of an order issued pursuant to subparagraph (A) or (B) of paragraph (1) or an agreement entered into pursuant to subparagraph (C) of paragraph (1). Before the department determines that a potentially responsible party is not in compliance with the order or agreement, the department shall give the potentially responsible party written notice of the proposed determination and an opportunity to correct the noncompliance or show why the order should be modified. After the department has made the final determination that a potentially responsible party is not in compliance with the order or agreement, the department may expend money from the Hazardous Substance Account or the Hazardous Substance Cleanup Fund for a removal or remedial action.

(b) Subdivision (a) does not apply, and money from the Hazardous Substance Account or the Hazardous Substance Cleanup Fund shall be available, upon appropriation by the Legislature, for removal or remedial actions, if any of the following conditions apply:

(1) The department, after a reasonable effort, is unable to identify a potential responsible party for the hazardous substance release site.

(2) The department determines that immediate corrective action is necessary, as provided

in Section 25354.

(3) The director determines that removal or remedial action at a site is necessary because there may be an imminent and substantial endangerment to the public health or welfare or to the environment.

(c) Notwithstanding subdivision (a), the department may expend funds, upon appropriation by the Legislature, from the Hazardous Substance Cleanup Fund or the Hazardous Substance Account to conduct activities necessary to verify that an uncontrolled release of hazardous substances has occurred at a suspected hazardous substance release site, to issue an order or enter into an enforceable agreement pursuant to paragraph (1) of subdivision (a), and to review, comment upon, and approve or disapprove remedial action plans submitted by potentially responsible parties subject to the orders or the enforceable agreement.

(d) Notwithstanding subdivision (a), the department may expend funds, upon appropriation by the Legislature, from the Hazardous Substance Cleanup Fund or the Hazardous Substance Account, to provide for oversight of removal and remedial actions, or, if the site is also listed on the federal act (42 U.S.C. Sec. 9604(c)(3)), to provide the state's share of a removal or remedial action.

(e) A responsible party who fails, as determined by the department in writing, to comply with an order issued pursuant to subparagraph (A) or (B) of paragraph (1) of subdivision (a), or to comply with all of the terms of an enforceable agreement entered into pursuant to subparagraph (C) of paragraph (1) of subdivision (a), shall be deemed, for purposes of subdivision (b) of Section 25355, to have failed to take action properly and in a timely fashion with respect to a hazardous substance release or a threatened release.

<< CA HLTH & S § 25355.6 >>

25355.6. (a) The State Water Resources Control Board or a California regional water quality control board that has jurisdiction over a hazardous substance release site pursuant to Division 7 (commencing with Section 13000) of the Water Code may refer the site to the department as a candidate for listing pursuant to Section 25356. After determining that the site meets the criteria adopted pursuant to subdivision (a) of Section 25356, the department may place the site on the list of sites subject to this chapter and establish its priority ranking pursuant to Section 25356.

(b) If a hazardous substance release site is referred to the department and is listed pursuant to subdivision (a), the department may expend money from the state account or the Hazardous Substance Cleanup Fund for removal or remedial action at the site, upon appropriation by the Legislature, without first issuing an order or entering into an agreement pursuant to paragraph (1) of subdivision (a) of Section 25355.5, if all of the following apply:

(1) The State Water Resources Control Board or a California regional water quality control board has issued either a cease and desist order pursuant to Section 13301 of the Water Code or a cleanup and abatement order pursuant to Section 13304 of the Water Code to the potentially responsible party for the site.

(2) The State Water Resources Control Board or the California regional water quality

control board has made a final finding that the potentially responsible party has not complied with the order issued pursuant to paragraph (1).

(3) The State Water Resources Control Board or the California regional water quality control board has notified the potentially responsible party of the determination made pursuant to paragraph (2) and that the hazardous substance release site has been referred to the department pursuant to subdivision (a).

(c) If a hazardous substance release site is referred to the department pursuant to subdivision (a), and the department makes either of the following determinations, the department shall notify the appropriate California regional water quality control board and the State Water Resources Control Board:

(1) The department determines that the site does not meet the criteria established pursuant to subdivision (a) and the site cannot be placed, pursuant to Section 25356, on the list of sites subject to this chapter.

(2) The department determines that a removal or remedial action at the site will not commence for a period of one year from the date of listing due to a lack of funds or the low priority of the site.

(d) If a California regional water resources control board or the State Water Resources Control Board receives a notice pursuant to subdivision (c), the regional board or state board may take any further action concerning the hazardous substance release site which the regional board or state board determines to be necessary or feasible, and which is authorized by this chapter or Division 7 (commencing with Section 13000) of the Water Code.

<< CA HLTH & S § 25355.7 >>

25355.7. The department and the State Water Resources Control Board concurrently shall establish policies and procedures consistent with this chapter that the department's representatives shall follow in overseeing and supervising the activities of responsible parties who are carrying out the investigation of, and taking removal or remedial actions at, hazardous substance release sites. The policies and procedures shall be consistent with the policies and procedures established pursuant to Section 13307 of the Water Code, and shall include, but are not limited to, all of the following:

(a) The procedures the department will follow in making decisions as to when a potentially responsible party may be required to undertake an investigation to determine if a hazardous substance release has occurred.

(b) Policies for carrying out a phased, step-by-step investigation to determine the nature and extent of possible soil and groundwater contamination at a site.

(c) Procedures for identifying and utilizing the most cost-effective methods for detecting contamination and carrying out removal or remedial actions.

(d) Policies for determining reasonable schedules for investigation and removal or remedial action at a site. The policies shall recognize the dangers to public health

and the environment posed by a release and the need to mitigate those dangers, while taking into account, to the extent possible, the financial and technical resources available to a responsible party.

<< CA HLTH & S § 25355.8 >>

25355.8. (a) The department shall not agree to oversee the preparation of, or to review, a preliminary endangerment assessment for property if action is, or may be, necessary to address a release or threatened release of a hazardous substance, and the department shall not issue a letter stating that no further action is necessary with regard to property, unless the person requesting the department action does either of the following:

(1) Provides the department with all of the following:

(A) Proof of the identity of all current record owners of fee title to the property and their mailing addresses.

(B) Written evidence that the owners of record have been sent a notice that describes the actions completed or proposed by the requesting person.

(C) An acknowledgment of the receipt of the notice required in subparagraph (B), from the property owners or proof that the requesting person has made reasonable efforts to deliver the notice to the property owner and was unable to do so.

(2) Proof of the identity of all current record owners of fee title to the property and proof that the requesting person has made reasonable efforts to locate the property owners and was unable to do so.

(b) The department shall take all reasonable steps necessary to accommodate property owner participation in the site remediation process and shall consider all input and recommendations received from the owner of property which is the subject of the proposed action.

(c) This section only applies to instances where a person requests the department to oversee the preparation of, or to review, a preliminary endangerment assessment, or requests the department to issue a letter stating that no further action is necessary with regard to property. Nothing in this section imposes a condition upon, limits, or impacts in any way, the department's authority to compel any potentially responsible party to take any action in response to a release or threatened release of a hazardous substance or to recover costs incurred from any potentially responsible party.

<< CA HLTH & S § 25356 >>

25356. (a) The department shall adopt, by regulation, the criteria for the selection and for the priority ranking of sites pursuant to subdivision (b), for response action under this chapter, and shall adopt criteria for the assignment of sites to one of the three tiers pursuant to subdivision (b). The criteria shall take into account the pertinent factors relating to the public health and the environment, which shall include, but are not limited to, potential hazards to public health and environment, the risk

of fire or explosion, toxic hazards, the extent to which the deferral of a response action will result, or is likely to result, in a rapid increase in cost, or in hazard to human health and the environment, and the criteria established pursuant to Section 105(8) of the federal act (42 U.S.C. Sec. 9605(8)). The criteria may include a minimum hazard threshold, below which sites shall not be listed pursuant to this section, if the sites are subject to the authority of the department to order response action, or similar action, pursuant to Chapter 6.5 (commencing with Section 25100).

(b) (1) The department shall publish and revise, at least annually, a listing of the sites subject to this chapter. The sites shall be categorized and placed on one of the following lists:

(A) A list of the hazardous substance release sites for which the department has identified a responsible party, and the responsible party is in compliance, as determined by the department, with an order issued, or an enforceable agreement entered into, pursuant to subdivision (a) of Section 25355.5. The department shall publish the list of sites under this subparagraph in an appendix to the site-specific plan of expenditures prepared pursuant to Section 25334.5.

(B) A list of the hazardous substance release sites for which all of the following apply:

(i) The department has not been able to identify a responsible party or the responsible party is not in compliance, as determined by the department, with an order issued, or an enforceable agreement entered into, pursuant to subdivision (a) of Section 25355.5.

(ii) The nature and extent of the hazardous substance release at the site has not been adequately characterized by the responsible party or the department.

The department shall characterize a site on the list before ranking the site on the list described in subparagraph (C).

(C) A list of the hazardous substance release sites that were previously listed pursuant to subparagraph (A), if the sites have been adequately characterized but the responsible parties are not in compliance with an order or enforceable agreement issued or entered into pursuant to subdivision (a) of Section 25355.5, or sites that were previously listed pursuant to subparagraph (B) but which have since been adequately characterized by the department. Sites on the list specified in this subparagraph shall be ranked numerically in accordance with the criteria adopted for the priority ranking of sites.

(2) The department shall assign each site listed pursuant to subparagraphs (B) and (C) of paragraph (1), sites listed on the National Priorities List pursuant to the federal act, and sites that are federal military facilities to one of three tiers for the purpose of informing the public of the relative hazard of the sites. The listing of sites by tiers shall be widely disseminated to the public. The "priority one" tier shall include any site that poses a known or probable immediate threat to public health through direct human contact, explosions, fires, or acutely serious air emissions, has a high potential to contaminate or to continue to contaminate groundwater resources that are present or possible future sources of drinking water, or any site for which the costs for response action pose the risk of increasing rapidly if response action is deferred. The "priority two" tier shall include any site that poses a substantial but less immediate threat to public health and safety or the environment. The "priority three" tier shall include

any site that will require response action, but presents only a limited and defined threat to human health or the environment. Priority two and three tiers may contain sites formerly listed in tiers one or two for which direct human health threats have been removed and at which physical deterioration in environmental quality has been stabilized. For the purpose of this paragraph, in informing the public of the relative environmental and public health threats posed by a site, the department shall list sites alphabetically within each of the three tiers. The department shall periodically update the list of sites by tiers to reflect new information regarding existing sites or the addition of new sites requiring response action. No site listed pursuant to subparagraph (A) of paragraph (1) shall be listed pursuant to this subdivision.

(c) Hazardous substance release sites listed by the department pursuant to subdivision (b) are subject to this chapter and all actions carried out in response to hazardous substance releases or threatened releases at listed sites shall comply with the procedures, standards, and other requirements set forth in this chapter or established pursuant to the requirements of this chapter.

(d) The department's development and publication of the listings of sites, pursuant to subdivision (b) and the adoption of a minimum hazard threshold and the classification of a site as within that threshold pursuant to subdivision (a), are not subject to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

(e) Funds appropriated to the department for remedial action shall be expended in conformance with the priority ranking of sites, as established on the list of sites specified in subparagraph (C) of paragraph (1) of subdivision (b), except that funds appropriated for remedial action may be expended without conforming to the priority ranking if either of the following apply:

(1) The funds are necessary to monitor removal or remedial actions conducted by private parties listed pursuant to subparagraph (A) of paragraph (1) of subdivision (b) or the state funds are necessary for the state share of a removal or remedial action pursuant to Section 104(c)(3) of the federal act (42 U.S.C. Sec. 9604(c)(3)).

(2) The funds are used for either of the following purposes:

(A) To assess, evaluate, and characterize the nature and extent of a hazardous substance release on sites listed pursuant to subparagraph (B) of paragraph (1) of subdivision (b).

(B) To carry out activities pursuant to subparagraph (B) or (C) of paragraph (1) of subdivision (b), or subdivision (c) or (d) of, Section 25355.5.

(f) Funds may be expended on more than one site on the list specified in subparagraphs (B) and (C) of paragraph (1) of subdivision (b) at any one time. In addition, funds may be expended for oversight of any activities conducted by a responsible party on more than one site on the list specified in subparagraph (A) of paragraph (1) of subdivision (b) at any one time.

(g) This section does not require the department to characterize every site listed pursuant to subparagraph (C) of paragraph (1) of subdivision (b) before the department

may begin removal or remedial actions at sites listed pursuant to subparagraph (C) of paragraph (1) of subdivision (b).

(h) The department, or, if appropriate, the California regional water quality control board, is the state agency with sole responsibility for ensuring that required action in response to a hazardous substance release or threatened release at a listed site is carried out in compliance with the procedures, standards, and other requirements set forth in this chapter, and shall, as appropriate, coordinate the involvement of interested or affected agencies in the response action.

<< CA HLTH & S § 25356.1 >>

25356.1. (a) For purposes of this section, "regional board" means a California regional water quality control board and "state board" means the State Water Resources Control Board.

(b) Except as provided in subdivision (h), the department, or, if appropriate, the regional board shall prepare or approve remedial action plans for all sites listed pursuant to Section 25356.

(c) A potentially responsible party may request the department or the regional board, when appropriate, to prepare or approve a remedial action plan for any site not listed pursuant to Section 25356, if the department or the regional board determines that a removal or remedial action is required to respond to a release of a hazardous substance. The department or the regional board shall respond to a request to prepare or approve a remedial action plan within 90 days of receipt. This subdivision does not affect the authority of any regional board to issue and enforce a cleanup and abatement order pursuant to Section 13304 of the Water Code or a cease and desist order pursuant to Section 13301 of the Water Code.

(d) All remedial action plans prepared or approved pursuant to this section shall be based upon Section 25350, Subpart E of the National Oil and Hazardous Substances Pollution Contingency Plan (40 C.F.R. 300.400 et seq.), and any amendments thereto, and upon all of the following factors, to the extent that these factors are consistent with these federal regulations and do not require a less stringent level of cleanup than these federal regulations:

(1) Health and safety risks posed by the conditions at the site. When considering these risks, the department or the regional board shall consider scientific data and reports which may have a relationship to the site.

(2) The effect of contamination or pollution levels upon present, future, and probable beneficial uses of contaminated, polluted, or threatened resources.

(3) The effect of alternative remedial action measures on the reasonable availability of groundwater resources for present, future, and probable beneficial uses. The department or the regional board shall consider the extent to which remedial action measures are available that use, as a principal element, treatment that significantly reduces the volume, toxicity, or mobility of the hazardous substances, as opposed to remedial actions that do not use this treatment. The department or the regional board shall not select remedial action measures which use offsite transport and disposal of

untreated hazardous substances or contaminated materials if practical and cost-effective treatment technologies are available.

(4) Site-specific characteristics, including the potential for offsite migration of hazardous substances, the surface or subsurface soil, and the hydrogeologic conditions, as well as preexisting background contamination levels.

(5) Cost-effectiveness of alternative remedial action measures. In evaluating the cost-effectiveness of proposed alternative remedial action measures, the department or the regional board shall consider, to the extent possible, the total short-term and long-term costs of these actions and shall use, as a major factor, whether the deferral of a remedial action will result, or is likely to result, in a rapid increase in cost or in the hazard to public health or the environment posed by the site. Land disposal shall not be deemed the most cost-effective measure merely on the basis of lower short-term cost.

(6) The potential environmental impacts of alternative remedial action measures, including, but not limited to, land disposal of the untreated hazardous substances as opposed to treatment of the hazardous substances to remove or reduce its volume, toxicity, or mobility prior to disposal.

(e) A remedial action plan prepared pursuant to this section shall include the basis for the remedial action selected and shall include an evaluation of each alternative considered and rejected by the department or the regional board for a particular site. The plan shall include an explanation for rejection of alternative remedial actions considered but rejected. The plan shall also include an evaluation of the consistency of the selected remedial action with the requirements of the federal regulations and the factors specified in subdivision (d), if those factors are not otherwise adequately addressed through compliance with the federal regulations. The remedial action plan shall also include a nonbinding preliminary allocation of responsibility among all identifiable potentially responsible parties at a particular site, including those parties which may have been released, or may otherwise be immune, from liability pursuant to this chapter or any other provision of law. Before adopting a final remedial action plan, the department or the regional board shall prepare or approve a draft remedial action plan and shall do all of the following:

(1) Circulate the draft plan for at least 30 days for public comment.

(2) Notify affected local and state agencies of the removal and remedial actions proposed in the remedial action plan and publish a notice in a newspaper of general circulation in the area affected by the draft remedial action plan. The department or the regional board shall also post notices in the location where the proposed removal or remedial action would be located and shall notify, by direct mailing, the owners of property contiguous to the site addressed by the plan, as shown in the latest equalized assessment roll.

(3) Hold one or more meetings with the lead and responsible agencies for the removal and remedial actions, the potentially responsible parties for the removal and remedial actions, and the interested public, to provide the public with the information which is necessary to address the issues which concern the public. The information to be provided shall include an assessment of the degree of contamination, the characteristics

of the hazardous substances, an estimate of the time required to carry out the removal and remedial actions, and a description of the proposed removal and remedial actions.

(4) Comply with Section 25358.7.

(f) After complying with subdivision (e), the department or the regional board shall review and consider any public comments, and shall revise the draft plan, if appropriate. The department or the regional board shall then issue the final remedial action plan.

(g)(1) A potentially responsible party named in the final remedial action plan issued by the department or the regional board may seek judicial review of the final remedial action plan by filing a petition for writ of mandate pursuant to Section 1085 of the Code of Civil Procedure within 30 days after the final remedial action plan is issued by the department or the regional board. Any other person who has the right to seek judicial review of the final remedial action plan by filing a petition for writ of mandate pursuant to Section 1085 of the Code of Civil Procedure shall do so within one year after the final remedial action plan is issued. No action may be brought by a potentially responsible party to review the final remedial action plan if the petition for writ of mandate is not filed within 30 days of the date that the final remedial action plan was issued. No action may be brought by any other person to review the final remedial action plan if the petition for writ of mandate is not filed within one year of the date that the final remedial action plan was issued. The filing of a petition for writ of mandate to review the final remedial action plan shall not stay any removal or remedial action specified in the final plan.

(2) For purposes of judicial review, the court shall uphold the final remedial action plan if the plan is based upon substantial evidence available to the department or the regional board, as the case may be.

(3) This subdivision does not prohibit the court from granting any appropriate relief within its jurisdiction, including, but not limited to, enjoining the expenditure of funds pursuant to paragraph (2) of subdivision (b) of Section 25385.6.

(h)(1) This section does not require the department or a regional board to prepare a remedial action plan if conditions present at a site present an imminent or substantial endangerment to the public health and safety or to the environment or, if the department, a regional board, or a responsible party takes a removal action at a site and the estimated cost of the removal action is less than one million dollars (\$1,000,000). The department or a regional board shall prepare or approve a removal action workplan for all sites where a nonemergency removal action is proposed and where a remedial action plan is not required. For sites where removal actions are planned and are projected to cost less than one million dollars (\$1,000,000), the department or a regional board shall make the local community aware of the hazardous substance release site and shall prepare, or direct the parties responsible for the removal action to prepare, a community profile report to determine the level of public interest in the removal action. Based on the level of expressed interest, the department or regional board shall take appropriate action to keep the community informed of project activity and to provide opportunities for public comment which may include conducting a public meeting on proposed removal actions.

(2) A remedial action plan is not required pursuant to subdivision (b) if the site is

listed on the National Priority List by the Environmental Protection Agency pursuant to the federal act, if the department or the regional board concurs with the remedy selected by the Environmental Protection Agency's record of decision. The department or the regional board may sign the record of decision issued by the Environmental Protection Agency if the department or the regional board concurs with the remedy selected.

(3) The department may waive the requirement that a remedial action plan meet the requirements specified in subdivision (d) if all of the following apply:

(A) The responsible party adequately characterizes the hazardous substance conditions at a site listed pursuant to Section 25356.

(B) The responsible party submits to the department, in a form acceptable to the department, all of the following:

(i) A description of the techniques and methods to be employed in excavating, storing, handling, transporting, treating, and disposing of materials from the site.

(ii) A listing of the alternative remedial measures which were considered by the responsible party in selecting the proposed removal action.

(iii) A description of methods that will be employed during the removal action to ensure the health and safety of workers and the public during the removal action.

(iv) A description of prior removal actions with similar hazardous substances and with similar public safety and environmental considerations.

(C) The department determines that the remedial action plan provides protection of human health and safety and for the environment at least equivalent to that which would be provided by a remedial action plan prepared in accordance with subdivision (c).

(D) The total cost of the removal action is less than two million dollars (\$2,000,000).

(4) For purposes of this section, the cost of a removal action includes the cleanup of removal of released hazardous substances from the environment or the taking of other actions which are necessary to prevent, minimize, or mitigate damage which may otherwise result from a release or threatened release, as further defined by Section 9601 (23) of Title 42 of the United States Code.

(5) Paragraph (2) of this subdivision does not apply to a removal action paid from the Hazardous Substance Cleanup Fund.

(i) Article 2 (commencing with Section 13320), Article 3 (commencing with Section 13330), Article 5 (commencing with Section 13350), and Article 6 (commencing with Section 13360) of Chapter 5 of Division 7 of the Water Code apply to any action or failure to act by a regional board pursuant to this section.

<< CA HLTH & S § 25356.1.3 >>

25356.1.3. (a) In exercising its authority at a hazardous substance release site pursuant to subdivision (a) of Section 25355.5 or 25358.3, the department shall issue orders to the largest manageable number of potentially responsible parties after considering all of the following:

- (1) The adequacy of the evidence of each potentially responsible party's liability.
- (2) The financial viability of each potentially responsible party.
- (3) The relationship or contribution of each potentially responsible party to the release, or threat of release, of hazardous substances at the site.
- (4) The resources available to the department.

(b) The department shall schedule a meeting pursuant to Section 25269.5 and notify all identified potentially responsible parties of the date, time, and location of the meeting.

(c) A person issued an order pursuant to Section 25355.5 or 25358.3 may identify additional potentially responsible parties for the site to which the order is applicable and may request the department to issue an order to those parties. The request shall include, with appropriate documentation, the factual and legal basis for identifying those parties as potentially responsible parties for the site. The department shall review the request and accompanying information and, within a reasonable period of time, determine if there is a factual and legal basis for identifying other persons as potentially responsible parties, and notify the person that made the request of the action the department will take in response to the request.

(d) Any determination made by the department regarding the largest manageable number of potentially responsible parties or the identification of other persons as potentially responsible parties pursuant to this section is not subject to judicial review. This subdivision does not affect the rights of any potentially responsible party or the department under any other provision of this chapter.

<< CA HLTH & S § 25356.1.5 >>

25356.1.5. (a) Any response action taken or approved pursuant to this chapter shall be based upon, and be no less stringent than, all of the following requirements:

(1) The requirements established under federal regulation pursuant to Subpart E of the National Oil and Hazardous Substances Pollution Contingency Plan (40 C.F.R. 300.400 et seq.), as amended.

(2) The regulations established pursuant to Division 7 (commencing with Section 13000) of the Water Code, all applicable water quality control plans adopted pursuant to Section 13170 of the Water Code and Article 3 (commencing with Section 13240) of Chapter 4 of Division 7 of the Water Code, and all applicable state policies for water quality control adopted pursuant to Article 3 (commencing with Section 13140) of Chapter 3 of Division 7 of the Water Code, to the extent that the department or the regional board determines that those regulations, plans, and policies do not require a less stringent level of

remediation than the federal regulations specified in paragraph (1) and to the degree that those regulations, plans, and policies do not authorize decisionmaking procedures that may result in less stringent response action requirements than those required by the federal regulations specified in paragraph (1).

(3) Any applicable provisions of this chapter, to the extent those provisions are consistent with the federal regulations specified in paragraph (1) and do not require a less stringent level of remediation than, or decisionmaking procedures that are at variance with, the federal regulations set forth in paragraph (1).

(b) Any health or ecological risk assessment prepared in conjunction with a response action taken or approved pursuant to this chapter shall be based upon Subpart E of the National Oil and Hazardous Substances Pollution Contingency Plan (40 C.F.R. 300.400 et seq.), the policies, guidelines, and practices of the United States Environmental Protection Agency developed pursuant to the federal act, and the most current sound scientific methods, knowledge, and practices of public health and environmental professionals who are experienced practitioners in the fields of epidemiology, risk assessment, environmental contamination, ecological risk, fate and transport analysis, and toxicology. Risk assessment practices shall include the most current sound scientific methods for data evaluation, exposure assessment, toxicity assessment, and risk characterization, documentation of all assumptions, methods, models, and calculations used in the assessment, and any health risk assessment shall include all of the following:

(1) Evaluation of risks posed by acutely toxic hazardous substances based on levels at which no known or anticipated adverse effects on health will occur, with an adequate margin of safety.

(2) Evaluation of risks posed by carcinogens or other hazardous substances that may cause chronic disease based on a level that does not pose any significant risk to health.

(3) Consideration of possible synergistic effects resulting from exposure to, or interaction with, two or more hazardous substances.

(4) Consideration of the effect of hazardous substances upon subgroups that comprise a meaningful portion of the general population, including, but not limited to, infants, children, pregnant women, the elderly, individuals with a history of serious illness, or other subpopulations, that are identifiable as being at greater risk of adverse health effects due to exposure to hazardous substances than the general population.

(5) Consideration of exposure and body burden level that alter physiological function or structure in a manner that may significantly increase the risk of illness and of exposure to hazardous substances in all media, including, but not limited to, exposures in drinking water, food, ambient and indoor air, and soil.

(c) If currently available scientific data are insufficient to determine the level of a hazardous substance at which no known or anticipated adverse effects on health will occur, with an adequate margin of safety, or the level that poses no significant risk to public health, the risk assessment prepared in conjunction with a response action taken or approved pursuant to this chapter shall be based on the level that is protective of public health, with an adequate margin of safety. This level shall be based exclusively on public health considerations, shall, to the extent scientific data are available,

take into account the factors set forth in paragraphs (1) to (5), inclusive, of subdivision (b), and shall be based on the most current principles, practices, and methods used by public health professionals who are experienced practitioners in the fields of epidemiology, risk assessment, fate and transport analysis, and toxicology.

(d) The exposure assessment of any risk assessment prepared in conjunction with a response action taken or approved pursuant to this chapter shall include the development of reasonable maximum estimates of exposure for both current land use conditions and reasonably foreseeable future land use conditions at the site.

<< CA HLTH & S § 25356.2 >>

25356.2. (a) There is hereby created in the Office of Environmental Health Hazard Assessment a Hazardous Substance Cleanup Arbitration Panel.

(b) The panel shall apportion liability for the costs of removal and remedial actions in accordance with Sections 25356.3 and 25356.4. All meetings and records of the panel are exempt from Chapter 3.5 (commencing with Section 6250) of Division 7 of Title 1 of, and Article 9 (commencing with Section 11120) of Chapter 1 of Part 1 of Division 3 of Title 2 of, the Government Code.

(c) The panel shall be comprised of independent private arbitrators who have applied to the Office of Environmental Health Hazard Assessment for membership on the panel. Panel members shall have (1) relevant arbitration background and (2) expertise in engineering, expertise in the physical, biological, or health sciences, or other relevant experience and qualifications. Three arbitrators shall be selected from the panel to apportion liability for a single hazardous wastesite. A majority of the arbitrators selected for a single site may apportion liability for the panel under this chapter.

(d) The arbitrators shall be selected for an individual hazardous wastesite as follows:

(1) One arbitrator shall be selected by the department or by the regional water quality control board.

(2) One arbitrator shall be selected by the potentially responsible party, or a majority of the potentially responsible parties, who have submitted to binding arbitration by the panel.

(3) The two arbitrators selected pursuant to paragraphs (1) and (2) shall jointly select a third arbitrator.

<< CA HLTH & S § 25356.3 >>

25356.3. (a) The department or the California regional water quality control board shall serve a copy by mail of the draft remedial action plan upon all potentially responsible parties identified in the plan. Within 15 days after the issuance of a final remedial action plan, any potentially responsible parties with aggregate alleged liability in excess of 50 percent of the costs of removal and remedial action, as set forth in the statement of reasons issued pursuant to subdivision (d) of Section 25356.1, but excluding any costs that are the subject of an agreement under which any party agrees to assume

liability for those costs, may convene an arbitration proceeding by agreeing to submit to binding arbitration by the panel. The filing of a demand to convene an arbitration panel shall not stay any removal or remedial actions specified in the plan. If an arbitration panel is convened pursuant to this section, any other potentially responsible party may elect to submit to binding arbitration by the panel. Any person submitting to arbitration under this section shall agree not to contest the fact of liability in the arbitration. The panel shall, and the parties are entitled to, address the proper apportionment of liability pursuant to subdivision (b). Submission to arbitration under this section is not an admission of liability for any other purpose or in any other proceeding, including a subsequent arbitration proceeding concerning the same site. The department or the regional water quality control board, whichever issued the final remedial action plan, shall participate in the arbitration proceedings to the same extent as the potentially responsible parties which have submitted to the arbitration.

(b) The panel shall apportion liability for the costs of all removal and remedial actions specified in the final remedial action plan.

(c) In panel proceedings, liability for the costs of removal and remedial actions shall be apportioned among all identifiable potentially responsible parties regardless of whether those parties are before the panel or have otherwise been released, or are immune, from liability pursuant to this chapter or any other provision of law. The panel shall apportion liability based on all of the following criteria:

- (1) The amount of hazardous substance for which each party may be responsible.
 - (2) The degree of toxicity of the hazardous substance.
 - (3) The degree of involvement of the potentially responsible parties in the generation, transportation, treatment, or disposal of the hazardous substance.
 - (4) The degree of care exercised by the potentially responsible parties with respect to the hazardous substances, taking into account the characteristics of the substance.
 - (5) The degree of cooperation by the potentially responsible parties with federal, state, and local officials to prevent harm to human health and the environment.
- (d) The panel may issue subpoenas and subpoenas duces tecum to require attendance of a person or the production of documents, at the request of any person identified as potentially responsible in the remedial action plan, on its own motion, or at the request of the department or the appropriate regional water quality control board. A person requesting a subpoena duces tecum shall comply with Section 1985 of the Code of Civil Procedure. The jurisdiction of subpoenas and subpoenas duces tecum issued by the panel extends to all parts of the state. The subpoenas and subpoenas duces tecum shall be served pursuant to Sections 1987 and 1988 of the Code of Civil Procedure.

If the panel determines that a person is refusing to respond to a subpoena or subpoena duces tecum, or is guilty of a misconduct during the arbitration and negotiation process, the panel shall certify the facts to the superior court of the county in which the site is located. The court shall thereupon issue an order directing the person to appear before the court and show cause why the person should not be punished for contempt pursuant to Section 1209 of the Code of Civil Procedure. The order and a copy of the certified

statement shall be served on the person, and thereafter the court shall have jurisdiction of the matter. The same proceedings shall be followed, the same penalties may be imposed, and the person charged may be purged of contempt in the same way as if the person has committed a contempt in the trial of a civil action before a superior court.

After receipt of documents pursuant to a subpoena duces tecum, any party may request the panel for a continuance for a reasonable period of time to review the documents prior to proceeding with the arbitration. The panel may grant a continuance for that purpose upon a showing of good cause.

(e) This chapter does not require a regional water quality control board or the State Water Resources Control Board to engage in arbitration pursuant to this section or Section 25356.2 for any enforcement action taken pursuant to Division 7 (commencing with Section 13000) of the Water Code.

(f) The costs of conducting the arbitration shall be borne by the potentially responsible parties submitting to the arbitration pursuant to subdivision (a), except that any filing fees, witness fees, costs of discovery, or any other costs necessarily incurred by one party shall not be shared by any other party.

<< CA HLTH & S § 25356.4 >>

25356.4. (a) After making an apportionment of liability among the potentially responsible parties pursuant to Section 25356.3, the panel shall prepare a draft arbitration decision which contains a statement of reasons supporting the apportionment and shall circulate the draft arbitration decision for at least 30 days for public comment. After review and consideration of any public comment, the panel shall issue the final arbitration decision within 30 days after the comment period.

(b) Each potentially responsible party whose liability has been apportioned by the panel is liable to the department or the regional water quality control board for its apportioned share of the costs of all removal and remedial actions at the site which is the subject of the final remedial action plan issued pursuant to Section 25356.1. The department or the regional water quality control board and one or more potentially responsible parties may enter into a cleanup agreement which is consistent with the remedial action plan and which provides for the satisfaction of the liability of a potentially responsible party by the party's performance of specified removal or remedial actions at the site.

(c) The moneys in the state account or the Hazardous Substance Cleanup Fund may be expended, upon appropriation by the Legislature, to pay any share of those potentially responsible parties who did not submit to binding arbitration pursuant to Section 25356.3 or did not otherwise agree to pay the costs of the removal and remedial actions specified in the remedial action plan.

(d) The department or the regional water quality control board shall identify, and the Attorney General shall pursue recovery from, those potentially responsible parties who have not submitted to binding arbitration pursuant to Section 25356.3 or who have not discharged their obligations required by the final arbitration decision or the cleanup agreement.

(e) Advances from the state account, upon appropriation by the Legislature, shall be made available, where appropriate, to those responsible parties who are required by a cleanup agreement to perform specified removal or remedial actions pursuant to the remedial action plan. Moneys from the Hazardous Substance Cleanup Fund may be expended by the department, upon appropriation by the Legislature, to make advances, where appropriate, to responsible parties who are required by a cleanup agreement to perform specified removal or remedial actions pursuant to the remedial action plan, for the purposes specified in Section 25385.6.

<< CA HLTH & S § 25356.5 >>

25356.5. The department shall include in the biennial report specified in Section 25178 an accounting of all of the following:

(a) The actual funds expended for each site listed during the preceding two years pursuant to Section 25356.

(b) Removal and remedial actions at hazardous substance release sites pursuant to Section 25356.

(c) The state's efforts to obtain available federal funds for the purposes of this chapter.

(d) Federal funds which have been obtained by, or committed to, the state for purposes of this chapter.

(e) The state's efforts to obtain contributions to removal or remedial actions from potentially responsible parties.

<< CA HLTH & S § 25356.6 >>

25356.6. (a) Notwithstanding any other provision of state law or any local ordinance or regulation, except as provided in subdivision (b), to encourage the prompt and effective cleanup of hazardous substance release sites, a potentially responsible party has no additional civil liability to any governmental entity under state or local law, for any prior acts or omissions associated with the conditions addressed in the remedial action plan which is the subject of the arbitration decision, if the potentially responsible party has submitted to binding arbitration and has discharged its obligations under the arbitration decision, either by paying that party's apportioned share of the costs of all removal and remedial actions to the department or the regional water quality control board, or by performing the specified removal and remedial actions pursuant to a cleanup agreement. The release from liability specified in this section is conditioned on complete implementation of the remedial action plan, including, where appropriate, adequate sampling, testing, and maintenance of the site to which the remedial action plan is applicable to ensure that the level of cleanup required is achieved and maintained. However, this section does not affect the liability of any person for costs recoverable under Section 25352, unless these costs are specifically addressed in the arbitration decision or cleanup agreement. Where these costs are not addressed in the arbitration decision or cleanup agreement, the liability for these costs shall be determined pursuant to the applicable sections of this chapter and may be apportioned among the potentially responsible parties pursuant to Sections 25356.3 and 25356.4.

(b) The department, the California regional water quality control board, any party to the arbitration decision, or any party substantially affected by the arbitration decision may petition the panel to modify the apportionment of liability in an arbitration decision. Upon a showing of a material change in the facts known to the parties to the arbitration decision at the time it was issued, the panel shall modify the apportionment of liability specified in the arbitration decision, as appropriate, to reflect these changed facts. Upon a showing of a material change in the facts known to the department at the time it issued the final remedial action plan, or the discovery of new facts, the department or regional board shall modify the remedial action plan, as appropriate, to reflect new or additional facts. The arbitration panel shall then modify its arbitration decision to reflect any modification of the remedial action plan made by the department.

(c) This section does not affect the existing rights of any individual to recover civil damages or to obtain equitable relief against any person, including a potentially responsible party, for physical injury or property damage caused by the release of hazardous substances at the site covered by the arbitration decision or at any other location.

(d) A party who has submitted to arbitration pursuant to this article and whose liability has been apportioned by the arbitration panel in an arbitration proceeding may seek indemnity from any other person liable for the party's apportioned share of the removal and remedial actions taken at a site which is the subject of the arbitration decision, including any department, agency contractor, or any other governmental agency. A potentially responsible party who does not submit to binding arbitration pursuant to this article, but whose liability has been apportioned in the arbitration decision and is subsequently found liable under this chapter has no right to indemnification for any removal or remedial action which is the subject of the arbitration decision from any party to that arbitration decision who has discharged its obligation under the arbitration decision or the cleanup agreement.

<< CA HLTH & S § 25356.7 >>

25356.7. In order to encourage rapid resolution of differences among responsible parties and to speed the cleanup of sites, and notwithstanding any other provision of law, the following evidence is admissible in a court of law only to show the good faith of the parties who have discharged their obligations under an arbitration decision issued, or cleanup agreement entered into, pursuant to Section 25356.4 or that the following removal and remedial actions specified in the remedial action plan were to be performed:

(a) A preliminary allocation of responsibility pursuant to Section 25356.1.

(b) The fact that any person has either participated or has not participated in a panel arbitration proceeding.

(c) The fact that any person has voluntarily implemented a remedial action plan, regardless of whether the plan is final for purposes of Section 25356.1.

(d) Any finding of fact or conclusion of law by the panel, including the apportionment of liability pursuant to Section 25356.3.

(e) Admissions made during the arbitration proceeding.

(f) Documents prepared by a party which has submitted to binding arbitration if the documents are prepared after the remedial action plan has been issued, and if the documents are prepared solely for the arbitration.

<< CA HLTH & S § 25356.8 >>

25356.8. (a) Judicial review of the arbitration decision on the apportionment of liability is limited to a showing of fraud by a party to the arbitration proceeding or an abuse of discretion by the panel, or both.

(b) Judicial review of a decision by the department or the regional water quality control board modifying the remedial action plan pursuant to subdivision (b) of Section 25356.6 shall be conducted pursuant to Section 1085 of the Code of Civil Procedure and the standard of review shall be the same as that specified in subdivision (f) of Section 25356.1.

<< CA HLTH & S § 25356.9 >>

25356.9. (a) The provisions of this chapter relating to the preparation, approval, and issuance of remedial action plans and to procedures for the apportionment of liability by the Hazardous Substance Cleanup Arbitration Panel do not do either of the following:

(1) Apply to any actions taken pursuant to Chapter 6.5 (commencing with Section 25100).

(2) Prohibit the department or the Attorney General, upon the request of the department, from pursuing the remedies specified in subdivision (a) of Section 25358.3 when the director determines that there may be an imminent or substantial endangerment to the public health or welfare or to the environment, because of a release or a threatened release of a hazardous substance.

(b) The department and the Attorney General may pursue any existing legal, equitable, or administrative remedies, pursuant to federal or state law, against any potentially responsible party named in a remedial action plan if the party does not submit to arbitration pursuant to Section 25356.3 or if the party has not discharged that party's obligations under an arbitration decision or cleanup agreement.

<< CA HLTH & S § 25356.10 >>

25356.10. The Office of Environmental Health Hazard Assessment shall adopt, and may, from time to time, modify, revise, or repeal, regulations, consistent with this article, to implement the provisions of this article concerning arbitration proceedings. The regulations may include, but are not required to be limited to, all of the following:

(a) The method of initiating arbitration.

(b) The place of hearing, based upon the convenience of the parties.

- (c) Procedures for the selection of neutral arbitrators.
- (d) Procedure for conducting hearings.
- (e) The providing of experts to assist the arbitrators if assistance is needed.
- (f) Procedures for reimbursing the expenses which the panel incurs in conducting arbitrations.

<< CA HLTH & S § 25357 >>

25357. Expenditures from the state account shall not be made in excess of the total amount of money in the state account at any one time. Expenditures in excess of such amount may be made only when additional money is collected or otherwise added to the state account.

<< CA HLTH & S § 25357.5 >>

25357.5. (a) In any judicial action under this chapter, judicial review of any issues concerning the adequacy of any response action taken or ordered by the department shall be limited to the administrative record. Otherwise applicable principles of administrative law shall govern whether any supplemental materials may be considered by the court.

(b) If the court finds that the selection of the response action was not in accordance with law, the court shall award only the response costs or damages that are not inconsistent with the National Contingency Plan, as specified in Part 300 (commencing with Section 300.1) of Subchapter J of Chapter I of Title 40 of the Code of Federal Regulations, and any other relief that is consistent with the National Contingency Plan.

(c) In reviewing an action brought by the department under this chapter, in which alleged procedural errors by the department are raised as a defense, the court may impose costs or damages only if the errors were serious and related to matters of central relevance to the action, so that the action would have been significantly changed had the errors not been made.

<< CA HLTH & S § 25358 >>

25358. The state shall actively seek to obtain all federal funds to which it is entitled under the federal act and shall take all actions necessary to enter into contractual or cooperative agreements under Sections 104 (c)(3) and 104 (d)(1) of the federal act (42 U.S.C. Sec. 9604 (c)(3) and 42 U.S.C. Sec. 9604 (d)(1)).

<< CA HLTH & S § 25358.1 >>

25358.1. (a) The department, a representative of the department, or any person designated by the director may take the actions specified in this section only if there is a reasonable basis to believe that there may be a release or threatened release of a hazardous substance, and only for the purpose of determining under this chapter the need for a response action, the choosing or taking of a response action, or otherwise

for the purpose of enforcing this chapter.

(b) Any officer or employee of the department, a representative of the director, or a person designated by the director may require any potentially responsible party, or any person who has, or may have, acquired information relevant to any of the following matters in the course of a commercial, ownership, or contractual relationship with any potentially responsible party, to furnish, upon reasonable notice, information or documents relating to the following matters:

(1) The identification, nature, and quantity of materials which have been, or are, generated, treated, stored, or disposed of at a hazardous substance release site or which have been, or are, transported to a hazardous substance release site.

(2) The nature or extent of a release or a threatened release of a hazardous substance at, or from, a hazardous substance release site.

(c) A person who is required to provide information pursuant to subdivision (b) shall, in accordance with subdivision (h), allow the officer, employee, representative, or designee, upon reasonable notice and at reasonable times, to have access to, and copy, all records relating to the hazardous substances for purposes of assisting the department in determining the need for an action in response to a release or threatened release pursuant to this chapter.

(d) Any officer or employee of the department, representative of the director, or person designated by the director may, in accordance with subdivision (h), enter, at reasonable times, any of the following properties:

(1) Any nonresidential establishment or other place or property where any hazardous substances may be, or have been, produced, stored, treated, disposed of, or transported from.

(2) Any nonresidential establishment or other place or property from which, or to which, a hazardous substance has been, or may have been, released.

(3) Any nonresidential establishment or other place or property where a hazardous substance release is, or may be, threatened.

(4) Any nonresidential establishment or other place or property where entry is needed to determine the need for a response action, or the appropriate remedial action, to effectuate a response action under this chapter.

(5) Any residential place or property which, if it were a nonresidential establishment or other place or property, would otherwise meet the criteria described in paragraphs (1) to (4), inclusive, if the department, representative, or person designated by the director is able to establish, based upon reasonably available evidence, that hazardous substances have been released onto or under the residential place or real property and if entry is made only at reasonable times and after reasonable notification to the owners and occupants.

(e) Any officer or employee of the department, representative of the director, or person

designated by the director may, in accordance with subdivision (h), carry out any of the following activities:

- (1) Inspect and obtain samples from any establishment or other place or property specified in subdivision (d) or from any location of any suspected hazardous substance.
- (2) Inspect and obtain samples of any substances from any establishment or place or property specified in subdivision (d).
- (3) Inspect and obtain samples of any containers or labeling for the suspected hazardous substances, and samples of the soil, vegetation, air, water, and biota on the premises.
- (4) Set up and maintain monitoring equipment for the purpose of assessing or measuring the actual or potential migration of hazardous substances.
- (5) Survey and determine the topographic, geologic, and hydrogeologic features of the land.
- (6) Photograph any equipment, sample, activity, or environmental condition described in paragraphs (2) to (5) inclusive.
 - (f)(1) If photographs are to be taken pursuant to paragraph (6) of subdivision (e), the department shall do all of the following:
 - (A) Comply with all procedures established pursuant to subdivision (b) of Section 25358.2.
 - (B) Notify the person whose facility is photographed prior to public disclosure of the photographs.
 - (C) Upon the request of the person owning the facility, submit a copy of any photograph to the person for the purpose of determining whether trade secret information, as defined in Section 25358.2, or facility security, would be revealed by the photograph.
 - (2) "Disclosure," as used in Section 25358.2, for purposes of this paragraph, does not include the review of the photograph by a court of competent jurisdiction or by an administrative law judge. A court or judge may review the photograph in camera.
- (g) An officer, employee, representative, or designee who enters a place, establishment, or property pursuant to this section shall make a reasonable effort to inform the owner or the owners' authorized representative of the inspection and shall provide split samples to the owner or the representative upon request.
- (h) If the owner or the owner's authorized representative does not voluntarily grant access to a place, establishment, or property pursuant to this section, the officer, employee, representative, or designee shall first obtain a warrant pursuant to Title 13 (commencing with Section 1822.50) of Part 3 of the Code of Civil Procedure. However, if there is an emergency posing an immediate threat to public health and safety, the officer, employee, representative, or designee may enter the place, establishment, or property without the consent of the owner or owner's authorized representative and

without the issuance of a warrant.

(i) The department, and any person authorized by the department to enter upon any lands for the purpose of taking removal or remedial action pursuant to this chapter, shall not be held liable, in either a civil or criminal proceeding, for trespass or for any other acts which are necessary to carry out the corrective action.

<< CA HLTH & S § 25358.2 >>

25358.2. (a) "Trade secrets," as used in this section, may include, but are not limited to, any formula, plan, pattern, process, tool, mechanism, compound, procedure, production data, or compilation of information which is not patented, which is known only to certain individuals within a commercial concern who are using it to fabricate, produce, develop, or compound an article of trade or a service having commercial value, and which gives its user an opportunity to obtain a business advantage over competitors who do not know or use it.

(b) The department may disclose trade secrets received by the department pursuant to this chapter to authorized representatives, contractors, or other governmental agencies only in connection with the department's responsibilities pursuant to this chapter. The department shall establish procedures to ensure that these trade secrets are utilized only in connection with these responsibilities and are not otherwise disseminated without the consent of the person who provided the information to the department.

(c) The department may also make available to the Environmental Protection Agency any and all information required by law to be furnished to that agency. The sharing of information between the department and that agency pursuant to this section does not constitute a waiver by the department or any affected person of any privilege or confidentiality provided by law which pertains to the information.

(d) Any person providing information pursuant to subdivision (a) of Section 25358.1 shall, at the time of its submission, identify all information which the person believes is a trade secret. Any information or record not identified as a trade secret is available to the public, unless exempted from disclosure by other provisions of law.

(e) Any person who knowingly and willfully disseminates information protected by this section or procedures established by the department pursuant to subdivision (b) shall, upon conviction, be punished by a fine of not more than five thousand dollars (\$5,000), imprisonment in the county jail not to exceed one year, or by both that fine and imprisonment.

<< CA HLTH & S § 25358.3 >>

25358.3. (a) Whenever the director determines that there may be an imminent or substantial endangerment to the public health or welfare or to the environment, because of a release or a threatened release of a hazardous substance, the director may do any or all of the following:

(1) Order any responsible party or parties to take or pay for appropriate removal or remedial action necessary to protect the public health and safety and the environment.

No order under this section shall be made to an owner of real property solely on the basis of that ownership as specified in Sections 101(35) and 107(b) of the federal act (42 U.S.C. Secs. 9601(35) and 9607(b)). The director shall give the responsible party an opportunity to assert all defenses to the order.

(2) Take or contract for any necessary removal or remedial action.

(3) Request the Attorney General to secure such relief as may be necessary from the responsible party or parties to abate the danger or threat. The superior court of the county in which the threat or danger occurs shall have jurisdiction to grant the relief which the public interest and equities of the case may require to protect public health and welfare and the environment. Upon a showing by the department that a release or threatened release of a hazardous substance has occurred or is occurring, and that there may be an imminent or substantial endangerment to the public health and safety or to the environment, the court may grant a temporary restraining order or a preliminary or permanent injunction pursuant to subdivision (e).

(b) When the director determines that a release of a hazardous substance has occurred or is about to occur, the director may do any or all of the following:

(1) Undertake those investigations, monitoring, surveys, testing, and other information gathering necessary to identify the existence, source, nature, and extent of the hazardous substances involved and the extent of danger to the public health or environment.

(2) Undertake those planning, legal, fiscal, economic, engineering, architectural, and other studies or investigations which are necessary or appropriate to plan and direct response actions, to recover the cost of those actions, and to enforce this chapter.

(c) Whenever there is a release or threatened release of a hazardous substance into the environment, the director may take or contract for any necessary removal or remedial action and may take or contract for any actions authorized by subdivision (b), in compliance with the provisions of this chapter, including, but not limited to, subdivision (b) of Section 25355.

(d) Any person bidding for a contract specified in subdivision (c) shall submit a disclosure statement, as specified by Section 25112.5, except for a federal, state, or local agency. The director may prohibit a person from bidding on such a contract if the director makes any of the following determinations:

(1) The director determines, in writing, that the bidder, or, if the bidder is a business entity, any trustee, officer, director, partner, or any person holding more than 5 percent of the equity in or debt liability of that business entity, has engaged in activities resulting in any federal or state conviction which are significantly related to the fitness of the bidder to perform the bidder's duties or activities under the contract. For purposes of this paragraph, "conviction" means a plea or verdict of guilty or a conviction following a plea of nolo contendere. Any action that the department may take pursuant to this subdivision relating to the department's refusal to permit a person to bid on the contract may be based upon a conviction for which any of the following has occurred:

(A) The time for appeal has elapsed.

(B) The judgment of conviction has been affirmed on appeal.

(C) Any order granting probation is made suspending the imposition of sentence, notwithstanding a subsequent order pursuant to Section 1203.4 of the Penal Code permitting that person to withdraw the plea of guilty and to enter a plea of not guilty, or setting aside the verdict of guilty, or dismissing the accusation, information, or indictment.

(2) The director determines, in writing, that the bidder, or, if the bidder is a business entity, any trustee, officer, director, partner, or any person holding more than 5 percent of the equity in or debt liability of that business entity, has violated or failed to comply with this chapter or Chapter 6.5 (commencing with Section 25100) or Chapter 6.7 (commencing with Section 25280) of this division, the Porter-Cologne Water Quality Control Act (Division 7 (commencing with Section 13000) of the Water Code), the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. Sec. 6901 et seq.), the Hazardous Materials Transportation Authorization Act of 1994, as amended (49 U.S.C. Sec. 5101 et seq.), the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (42 U.S.C. Sec. 9601 et seq.), the Toxic Substances Control Act (15 U.S.C. Sec. 2601 et seq.), or any other equivalent federal or state statute or any requirement or regulation adopted pursuant thereto relating to the generation, transportation, treatment, storage, recycling, disposal, or handling of a hazardous waste, as defined in Section 25117, a hazardous substance, as defined in Section 25316, or a hazardous material, as defined in Section 353 of the Vehicle Code, if the violation or failure to comply shows a repeating or recurring pattern or may pose a threat to public health or safety or the environment.

(3) The director determines, in writing, that the bidder has had a license, permit, or registration for the generation, transportation, treatment, storage, recycling, disposal, or handling of hazardous waste or hazardous substances revoked or suspended.

(e) Whenever there is a release or threatened release of a hazardous substance, the director may request the Attorney General to secure such relief as may be necessary from the responsible party or parties to abate the release or threatened release. The superior court of the county in which the release or threatened release occurs has jurisdiction to grant that relief which the public interest and equities of the case may require to protect the public health and safety and the environment. Upon a showing by the department that a release or threatened release of a hazardous substance has occurred or is occurring, and that there may be an imminent or substantial endangerment to the public health and safety or to the environment, the court may grant a temporary restraining order or a preliminary or permanent injunction.

(f) Upon the failure of any person to comply with any order issued by the department pursuant to this section or Section 25355.5, the director may request the Attorney General to petition the superior court for the issuance of an injunction requiring that person to comply with the order. The superior court shall have jurisdiction to grant a temporary restraining order or a preliminary or permanent injunction.

(g) In any civil action brought pursuant to this chapter in which a temporary restraining order or a preliminary or permanent injunction is sought, the department shall prove

that the defendant is a responsible party and that there is a release or threatened release of a hazardous substance. It shall not be necessary to allege or prove at any stage of the proceeding that irreparable damage will occur should the temporary restraining order or the preliminary or permanent injunction not be issued, or that the remedy at law is inadequate; and the temporary restraining order or the preliminary or permanent injunction shall issue without those allegations and without that proof.

<< CA HLTH & S § 25358.4 >>

25358.4. The analysis of any material that is required to demonstrate compliance with this chapter shall be performed by a laboratory accredited by the department pursuant to Article 3 (commencing with Section 100825) of Chapter 4 of Part 1 of Division 101.

<< CA HLTH & S § 25358.5 >>

25358.5. Any removal or remedial action taken or contracted by the department pursuant to Section 25354 or subdivision (a) of Section 25358.3 shall be exempt from all of the following provisions:

(a) State Contract Act (Chapter 1 (commencing with Section 10100) of Part 2 of Division 2 of the Public Contract Code).

(b) Chapter 10 (commencing with Section 4525) of Division 5 of Title 1 of the Government Code.

(c) Article 5 (commencing with Section 10355) of Chapter 2 of Part 2 of Division 2 of the Public Contract Code.

<< CA HLTH & S § 25358.6 >>

25358.6. (a) The department may prequalify bidders for remedial or removal actions taken pursuant to Section 25354 or subdivision (a) of Section 25358.3. The department may reject the bid of any prospective bidder that has not been prequalified.

(b) To prequalify bidders, the department shall adopt and apply a uniform system of rating bidders. In order to obtain information for such rating, the department may require from prospective bidders answers to questions, including, but not limited to, questions about the bidder's financial ability, the bidder's experience in removal and remedial action involving hazardous substances, the bidder's past safety record, and the bidder's past performance on federal, state, or local government projects. The department may also require prospective bidders to submit financial statements.

(c) The department shall utilize the business financial data and information submitted by a bidder pursuant to subdivision (b) only for the purposes of prequalifying bidders pursuant to this section and shall not otherwise disseminate this data or information.

(d) The system of rating bidders may be adopted by the department as emergency regulations in accordance with Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, and for purposes of that chapter, when these regulations are adopted as emergency regulations pursuant to Section 11349.6 of

the Government Code, the regulations shall be deemed to be necessary for the immediate preservation of the public peace, health and safety, and general welfare. It is the intent of the Legislature that emergency regulations adopted pursuant to this subdivision shall remain in effect until the regulations are adopted as final regulations, pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

<< CA HLTH & S § 25358.7 >>

25358.7. (a) The department or the regional board, as appropriate, shall take the actions specified in this section to provide an opportunity for meaningful public participation in response actions undertaken for sites listed pursuant to Section 25356.

(b) The department, or the regional board, as appropriate, shall conduct a baseline community survey as soon as possible after taking an action to investigate or remediate a hazardous substance release site listed pursuant to Section 25356. The purpose of this survey shall be to inform the public, and in particular, persons living in close proximity to the site, of the existence of the site and the department's or regional board's intentions to conduct an investigation and a remedial action, to determine the level of public interest and desire for involvement in this process, and to solicit and evaluate concerns and information regarding the site from the affected community. Based on the results of the baseline survey, the department or regional board shall develop a public participation work plan that shall establish appropriate communication and outreach measures commensurate with the level of interest expressed by survey respondents. The public participation work plan shall be updated as necessary to reflect any significant changes in the degree of public interest as the site investigation and cleanup process moves toward completion.

(c) The department or regional board shall provide any person affected by a response action undertaken for sites listed pursuant to Section 25356 with the opportunity to participate in the department's or regional board's decisionmaking process regarding that action by taking all of the following actions:

(1) Provide that person with access to information which the department or regional board is required to release pursuant to the California Public Records Act (Chapter 3.5 (commencing with Section 6250) of Division 7 of Title 1 of the Government Code), relating to the action, except for the following:

(A) Trade secrets, as defined in subdivision (a) of Section 25358.2.

(B) Business financial data and information, as specified in subdivision (c) of Section 25358.6.

(C) Information which the department or regional board is prohibited from releasing pursuant to any state or federal law.

(2) The department or regional board shall provide factsheets, based on the expressed level of public interest, regarding plans to conduct the major elements of the site investigation and response actions. The factsheets shall present the relevant information in nontechnical language and shall be detailed enough to provide interested persons with a good understanding of the planned activities. The factsheets shall be

made available in languages other than English if appropriate.

(3) Provide the person notification, upon request, of any public meetings held by the department or regional board concerning the action.

(4) Provide the person the opportunity to attend and to participate at those public meetings.

(5) Based on the results of the baseline community survey, the department or regional board shall provide opportunities for public involvement at key stages of the response action process, including the health risk assessment, the preliminary assessment, the site inspection, the remedial investigation, and the feasibility study stages of the process. If the department or regional board determines that public meetings or other opportunities for public comment are not appropriate at any of the stages listed in this section, the department or regional board shall provide notice of that decision to the affected community.

(d) The department or regional board shall develop and make available to the public a schedule of activities for each site for which remedial action is expected to be taken by the department or regional board pursuant to this chapter and shall make available to the public any plan provided to the department or regional board by any responsible party, unless the department is prohibited from releasing the information pursuant to any state or federal law.

(e) In making decisions regarding the methods to be used for removal or remedial actions taken pursuant to this chapter, the department or regional board shall incorporate or respond in writing to the advice of persons affected by the actions.

(f) This section does not apply to emergency actions taken pursuant to Section 25354.

<< CA HLTH & S § 25358.7.1 >>

25358.7.1. (a) At each site, a community advisory group may be established by the affected community to review any response action and comment on the response action to be conducted in that community. The department or regional board shall regularly communicate, and confer as appropriate, with the community advisory committee. The department or regional board shall also advise local environmental regulatory agencies and other appropriate local agencies of planned response actions and provide opportunities for review and comment. If the department or regional board, whichever is overseeing a response action, receives a petition signed by at least 50 members of a community affected by the response action at a site or a resolution adopted by the legislative body of the jurisdiction within which the response action has been or will be initiated, the department or regional board shall assist the petitioners or the legislative body to establish a community advisory group to review the response action at the site.

(b) To the extent possible, the composition of each community advisory group shall reflect the composition of the affected community and the diversity of interests of the community by including all of the following types of individuals on the community advisory group:

(1) Persons owning or residing on property located near the hazardous substance release site or in an adjacent community, or other persons who may be directly affected by the response action.

(2) Individuals from the local business community.

(3) Local political or government agency representatives.

(4) Local citizen, civic, environmental, or public interest group members residing in the community.

(c) The following entities may participate in community advisory group meetings in order to provide information and technical expertise:

(1) The department or regional boards.

(2) Representatives of local environmental regulatory agencies.

(3) The potentially responsible parties or other persons who are conducting the response action.

(d) The existence of a community advisory group shall not diminish any other obligation of the department or regional board with respect to public participation requirements specified in Section 25358.7. Nothing in this section shall affect the status of any citizen advisory group formed before the enactment of this section, a federal Department of Defense Restoration Advisory Board, or a federal Department of Energy Advisory Board.

<< CA HLTH & S § 25358.7.2 >>

25358.7.2. (a) On or before July 1, 2000, the department and the State Water Resources Control Board shall establish two community service offices, one to serve northern California and the other to serve southern California. With regard to sites listed pursuant to Section 25356 where the department or regional board is taking action to investigate or remediate the site, the community assistance offices shall facilitate communication between the department or regional board, the responsible parties, and the affected community, including any community advisory group that may have been formed in the community where the hazardous substance release site is located.

(b) Notwithstanding subdivision (c) of Section 25390.3, the department and, if appropriate, the State Water Resources Control Board shall expend a total of four hundred thousand dollars (\$400,000) per year from the Orphan Share Reimbursement Trust Fund established pursuant to Article 7.8 (commencing with Section 25390) on the operation of the community service offices established pursuant to this section. The offices shall use these funds to provide direct technical and logistical support to any community advisory group established pursuant to Section 25358.7.1. Funds allocated pursuant to this subdivision shall supplement, and not supplant, any funds expended for the purposes of developing and implementing other public participation activities required to be undertaken pursuant to this chapter, including, but not limited to, activities undertaken pursuant to the National Contingency Plan or the public participation workplan required

to be adopted by the department pursuant to Section 25358.7.

(c) The State Water Resources Control Board may contract with the department to provide this service on behalf of a regional board if the State Water Resources Control Board finds that it would be more practical and economical to do so.

(d) In implementing this section, the department and the regional boards are not obligated to expend funds beyond the amounts appropriated in any fiscal year for purposes of developing and implementing public participation activities required by other provisions of this chapter unless the Orphan Share Reimbursement Trust Fund contains funding at the level specified in subdivision (b).

<< CA HLTH & S § 25358.8 >>

25358.8. A community advisory group established pursuant to Section 25358.7.1 may request, in writing, and a potentially responsible party or parties may fund, a technical assistance grant for a site for the purpose of providing technical assistance to the community advisory group.

<< CA HLTH & S § 25358.9 >>

25358.9. (a) To the extent consistent with the Resource Conservation and Recovery Act of 1976, as amended, (42 U.S.C. Sec. 6901 et seq.), the department may exclude any portion of a response action conducted entirely onsite from the hazardous waste facility permit requirements of Section 25201 if both of the following apply:

(1) The removal or remedial action is carried out pursuant to a removal action work plan or a remedial action plan prepared pursuant to Section 25356.1.

(2) The removal action work plan or the remedial action plan requires that the response action complies with all laws, rules, regulations, standards, and requirements, criteria, or limitations applicable to the construction, operation, and closure of the type of facility at the hazardous substance release site and with any other condition imposed by the department as necessary to protect public health and safety and the environment.

(b) The department may enforce in the court for the county in which a response action exempted pursuant to subdivision (a) is located any federal or state law, rule, regulation, standard, requirements, criteria, or limitation with which the remedial or removal action is required to comply. Any consent decree entered into pursuant to an enforcement action authorized by this subdivision shall require the parties to attempt expeditiously to informally resolve any disagreements concerning the implementation of the response action with the appropriate federal and state agencies and shall provide for administrative enforcement. The consent decree shall stipulate that the penalty for violation of the consent decree shall be an amount not more than twenty-five thousand dollars (\$25,000) per day, which may be enforced by the state. These penalties do not impair or affect the authority of the court to order compliance with the specific terms of the consent decree.

<< CA HLTH & S § 25359 >>

25359. (a) Any person who is liable for a release, or threat of a release, of hazardous substances and who fails, without sufficient cause, as determined by the court, to properly provide a removal or remedial action upon order of the director or the court, pursuant to Section 25358.3, is liable to the department for damages equal to three times the amount of any costs incurred by the state account pursuant to this chapter as a result of the failure to take proper action.

(b) No treble damages shall be imposed under this section against an owner of real property who did not generate, treat, transport, store, or dispose of any hazardous substance on, in, or at the facility located on that real property, as specified in Sections 101(35) and 107(b) of the federal act (42 U.S.C. Secs. 9601(35) and 9607(b)).

<< CA HLTH & S § 25359.1 >>

25359.1. There shall be no recovery of punitive damages under Section 25359 for an injury to or loss of natural resources that occurred wholly before September 25, 1981. This section shall not be construed as precluding the recovery of punitive damages for injury to or loss of natural resources in an action brought pursuant to any other provision of law.

<< CA HLTH & S § 25359.2 >>

25359.2. Any person subject to a removal or remedial action order or other order issued pursuant to Section 25355.5 or 25358.3 who does not comply with that order without sufficient cause shall be subject to a civil penalty of not more than twenty-five thousand dollars (\$25,000) for each day of noncompliance. Liability under this section may be imposed in a civil action or liability may be imposed administratively pursuant to Section 25359.3.

<< CA HLTH & S § 25359.3 >>

25359.3. (a) The department may issue a complaint to any person subject to a penalty pursuant to Sections 25359.2 and 25359.4. The complaint shall allege the acts or failures to act that constitute a basis for liability and the amount of the proposed penalty. The complaint shall be served by personal service or certified mail and shall inform the party so served of the right to a hearing. Any person served with a complaint pursuant to this subdivision may, within 45 days after service of the complaint, request a hearing by filing a notice of defense with the department. A notice of defense is deemed to be filed within a 45-day period if it is postmarked within the 45-day period. If no notice of defense is filed within 45 days after service of the complaint, the department shall issue an order setting liability in the amount proposed in the complaint, unless the department and the party have entered into a settlement agreement, in which case the department shall issue an order setting liability in the amount specified in the settlement agreement. Where the party has not filed a notice of defense or where the department and the party have entered into a settlement agreement, the order shall not be subject to review by any court or agency.

(b) Any hearing required under this section shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, and the department shall have all powers granted by those provisions. In making

a determination, the administrative law judge shall consider the nature, circumstances, extent, and gravity of the violation, the violator's past and present efforts to prevent, abate, or clean up conditions posing a threat to the public health and safety or the environment, the violator's ability to pay the proposed penalty, and the prophylactic effect that imposition of the proposed penalty will have on both the violator and on the regulated community as a whole.

(c) All penalties collected under this section and Section 25359.2 shall be deposited in the Hazardous Substance Account and shall be available for expenditure by the department upon appropriation by the Legislature.

<< CA HLTH & S § 25359.4 >>

25359.4. (a) A person shall not release, or allow or cause a release of, a reportable quantity of a hazardous substance into the environment that is not authorized or permitted pursuant to state law.

(b) Any release of a reportable quantity of hazardous substance shall be reported to the department in writing within 30 days of discovery, unless any of the following apply:

- (1) The release is permitted or in the permit process.
- (2) The release is authorized by state law.
- (3) The release requires immediate reporting to the Office of Emergency Services pursuant to Section 11002 or 11004 of Title 42 of the United States Code, or pursuant to Section 25507.
- (4) The release has previously been reported to the department or the Office of Emergency Services.
- (5) The release occurred prior to January 1, 1994.

(c) For the purposes of this section, "reportable quantity" means either of the following:

- (1) The quantity of a hazardous substance established in Part 302 (commencing with Section 302.1) of Title 40 of the Code of Federal Regulations, the release of which requires notification pursuant to that part.
- (2) Any quantity of a hazardous substance that is not reportable pursuant to paragraph (1), but that may pose a significant threat to public health and safety or to the environment. The department may establish guidelines for determining which releases are reportable under this paragraph.

(d) The owner of property on which a reportable release has occurred and any person who releases, or causes a reportable release and who fails to make the written report required by subdivision (b), shall be liable for a penalty not to exceed twenty-five thousand dollars (\$25,000) for each separate violation and for each day that a violation continues. Each day on which the released hazardous substance remains is a separate

violation unless the person has either filed the report or is in compliance with an order issued by a local, state, or federal agency with regard to the release.

(e) Liability under this section may be imposed in a civil action or may be administratively imposed by the department pursuant to Section 25359.3.

(f) If the violation of subdivision (b) results in, or significantly contributes to, an emergency, including, but not limited to, a fire, to which a county, city, or district is required to respond, the responsible party may be assessed the full cost of the emergency response by the city, county, or district.

<< CA HLTH & S § 25359.4.5 >>

25359.4.5. (a) A responsible party who has entered into an agreement with the department and is in compliance with the terms of that agreement, or who is in compliance with an order issued by the department, may seek, in addition to contribution, treble damages from any contribution defendant who has failed or refused to comply with any order or agreement, was named in the order or agreement, and is subject to contribution. A contribution defendant from whom treble damages are sought in a contribution action shall not be assessed treble damages by any court where the contribution defendant, for sufficient cause, as determined by the court, failed to comply with an agreement or with an order issued by the department, or where the contribution defendant is an owner of real property who did not generate, treat, transport, store, or dispose of the hazardous substance on, in, or at the facility located on that real property, as specified in Sections 101 (35) and 107 (b) of the federal act (42 U.S.C. Secs. 9601 (35) and 9607 (b)), or where the principles of fundamental fairness would be violated, as determined by the court. A party seeking treble damages pursuant to this section shall show that the party, the department, or another entity provided notice, by means of personal service or certified mail, of the order or agreement to the contribution defendant from whom the party seeks treble damages.

(b) One-half of any treble damages awarded pursuant to this section shall be paid to the department, for deposit in the Hazardous Substance Account. Nothing in this subdivision affects the rights of any party to seek contribution pursuant to any other statute or under common law.

(c) A contribution defendant from whom treble damages are sought pursuant to this section shall be deemed to have acted willfully with respect to the conduct that gave rise to this liability for purposes of Section 533 of the Insurance Code.

<< CA HLTH & S § 25359.5 >>

25359.5. (a) After making a determination, based upon a preliminary site assessment that there has been a release of a hazardous substance on, under, or into the land on a site, the department or a county health officer shall order the property owner to secure the site if all of the following conditions apply to that site:

(1) The release does not comply with the terms of a current permit or interim status document or regulation of the department.

(2) The site poses a public health risk if human contact is made with the hazardous waste or the surrounding contaminated area.

(3) There is a likelihood of human or domestic animal contact.

(b) The order to secure the site shall require, within five days after receiving notification of the order, the posting of the site with signs. The order shall also require, within five days after receiving notification of the order, that the site be enclosed with a fence, unless it is physically and economically infeasible or unless the fencing is unnecessary because it will not alleviate the danger to the public health.

(c) If fencing is ordered, the fences shall be maintained at the site to prevent unauthorized persons from gaining access to the site. The signs shall be maintained and shall meet all of the following requirements:

(1) The signs shall be bilingual, appropriate to the local area, and may include international symbols, as required by the department.

(2) The signs shall have lettering which is legible from a distance of at least 25 feet.

(3) The signs shall read: "Caution: Hazardous Substance Area, Unauthorized Persons Keep Out" and shall have the name and phone number of the department or the county health officer that ordered the posting.

(4) The signs shall be visible from the surrounding contaminated area and posted at each route of entry into the site, including those routes which are likely to be used by unauthorized persons, at access roads leading to the site, and facing navigable waterways where appropriate.

(5) The signs shall be of a material able to withstand the elements.

(d) A property owner who fails to comply with an order of the department or the county health officer is subject to a civil penalty of up to twenty-five thousand dollars (\$25,000). In determining the amount of a civil penalty to be imposed, the court shall consider all relevant circumstances, including, but not limited to, the economic assets of the property owner and whether the property owner has acted in good faith.

If the property owner fails to secure and post the site, the department or the county health officer shall secure and post the site pursuant to subdivision (b) within 30 days of the expiration of the five-day period and shall seek recovery of the costs of that securing and posting from the property owner. If the site is an abandoned site, as defined in Section 25359.6, if the site cannot be traced to a specific owner, or if the owner has been declared bankrupt, the department or the county health officer shall secure and post the site, using any source of funds, pursuant to subdivision (b).

(e) The department or the county health officer shall advise other agencies on the public health risks and the need for fencing and posting of sites when those agencies confirm the release of a hazardous substance pursuant to subdivision (a).

(f) The remedies and penalties specified in this section and Section 25359.6 are in

addition to, and do not affect, any other remedies, enforcement actions, requirements, or penalties otherwise authorized by law.

<< CA HLTH & S § 25359.6 >>

25359.6. (a) The director shall notify, within 20 working days, each of the appropriate county health officers as to all the potential abandoned sites of which the department has knowledge or which the department is investigating for releases of hazardous substances that may have occurred or might be occurring at abandoned sites. The county health officers may request quarterly updates on the status of the investigations of these sites.

As used in this section, "abandoned site" means an inactive disposal, treatment, or storage facility which cannot, with reasonable effort, be traced to a specific owner, a site whose owner has been determined bankrupt, or a location where a hazardous substance has been illegally disposed.

(b) Within 10 working days of the identification of an abandoned site, the department or a county health officer shall notify the other agency of the status of the site. The department and the county health officer shall inform the other agency of orders to fence and post these sites and the status of compliance with those orders. The department or the county health officers may request quarterly updates of the testing, enforcement action, and remedial or removal actions that are proposed or ongoing.

<< CA HLTH & S § 25359.7 >>

25359.7. (a) Any owner of nonresidential real property who knows, or has reasonable cause to believe, that any release of hazardous substance has come to be located on or beneath that real property shall, prior to the sale, lease, or rental of the real property by that owner, give written notice of that condition to the buyer, lessee, or renter of the real property. Failure of the owner to provide written notice when required by this subdivision to the buyer, lessee, or renter shall subject the owner to actual damages and any other remedies provided by law. In addition, where the owner has actual knowledge of the presence of any release of a material amount of a hazardous substance and knowingly and willfully fails to provide written notice to the buyer, lessee, or renter, as required by this subdivision, the owner is liable for a civil penalty not to exceed five thousand dollars (\$5,000) for each separate violation.

(b) Any lessee or renter of real property who knows or has reasonable cause to believe that any release of a hazardous substance has come or will come to be located on or beneath that real property shall, within a reasonable period of time, either prior to the release or following the discovery by the lessee or renter of the presence or believed presence of the hazardous substance release, give written notice of that condition to the owner of the real property or to the lessor under the lessee's or renter's lease or rental agreement.

(1) A lessee or renter who fails to provide written notice when required by this subdivision to the owner or lessor is subject to actual damages and any other remedy provided by law.

(2) If the lessee or renter has knowledge of the presence of a release of a material

amount of a hazardous substance, or of a hazardous substance release that is required to be reported to a state or local agency pursuant to law, on or under the real property leased or rented by the lessee or renter and knowingly and willfully fails to provide written notice when required by this subdivision to the owner or lessor, both of the following shall apply:

(A) The failure is deemed to constitute a default, upon the owner's or lessor's written notice to the lessee or renter, under the lessee's or renter's lease or rental agreement, except that this subparagraph does not apply to lessees and renters of property used exclusively for residential purposes.

(B) The lessee or renter is liable for a civil penalty not to exceed five thousand dollars (\$5,000) for each separate violation.

(3) A lessee or renter may cure a default under the lessee's or renter's lease or rental agreement which resulted from a violation of this subdivision, by promptly commencing and completing the removal of, or taking other appropriate remedial action with respect to, the hazardous substance release. The removal or remedial action shall be conducted in accordance with all applicable laws and regulations and in a manner which is reasonably acceptable to, and which is approved in writing by, the owner or lessor. This paragraph does not relieve the lessee or renter of any liability for actual damages or for any civil penalty for a violation of this subdivision.

Article 6. Recovery Actions

<< CA HLTH & S § 25360 >>

25360. (a) Any costs incurred by the department or regional board in carrying out this chapter shall be recoverable pursuant to state or federal law by the Attorney General, upon the request of the department or regional board, from the liable person or persons. The amount of any response action costs that may be recovered pursuant to this section shall include interest on any amount paid. The interest on amounts paid from the Hazardous Substance Cleanup Fund shall be calculated at a rate equal to the interest rate of the bonds sold pursuant to Article 7.5 (commencing with Section 25385) and interest on any amount paid from the state account or the Site Remediation Account shall be calculated at the rate of return earned on investment in the Surplus Money Investment Fund pursuant to Section 16475 of the Government Code.

(b) A person who is liable for costs incurred at a site shall have the liability reduced by any reimbursements that were actually paid by that person pursuant to this chapter in connection with that site, including any reimbursements paid pursuant to Section 25343.

(c) The amount of cost determined pursuant to this section shall be recoverable at the discretion of the department, either in a separate action or by way of intervention as of right in an action for contribution or indemnity. Nothing in this section deprives a party of any defense that the party may have.

(d) Money recovered by the Attorney General pursuant to this section shall be deposited in the state account, except that, if the costs incurred were paid from the Hazardous Substance Cleanup Fund, the Attorney General shall deposit the amounts recovered into

the Hazardous Substance Clearing Account. Money deposited in the Hazardous Substance Clearing Account pursuant to this section are available to pay the principal of, and interest on, bonds sold pursuant to Article 7.5 (commencing with Section 25385).

<< CA HLTH & S § 25360.1 >>

25360.1. Any monetary obligation to the department pursuant to Chapter 6.5 (commencing with Section 25100) or this chapter shall be subject to interest from the date of the demand at the same rate of return earned on investment in the Surplus Money Investment Fund pursuant to Section 16475 of the Government Code, except the department may waive the interest if the obligation is satisfied within 60 days from the date of invoice.

<< CA HLTH & S § 25360.2 >>

25360.2. (a) For purposes of this section, the following definitions apply:

(1) "Owner" means either (A) the owner of property who occupies a single-family residence constructed on the property, or (B) the owner of common areas within a residential common interest development who owns those common areas for the benefit of the residential homeowners. This paragraph does not include the developer of the common interest development.

(2) "Property" means either (A) real property of five acres or less which is zoned for, and on which has been constructed, a single-family residence, or (B) common areas within a residential common interest development.

(b) (1) Notwithstanding any other provision of this chapter, an owner of property that is the site of a hazardous substance release is presumed to have no liability pursuant to this chapter for either of the following:

(A) A hazardous substance release that has occurred on the property.

(B) A release of a hazardous substance to groundwater underlying the property if the release occurred at a site other than the property.

(2) The presumption may be rebutted as provided in subdivision (d).

(c) An action for recovery of costs or expenditures incurred from the state account or the Hazardous Substance Cleanup Fund pursuant to this chapter in response to a hazardous substance release shall not be brought against an owner of property unless the department first certifies that, in the opinion of the department, one of the following applies:

(1) The hazardous substance release that occurred on the property occurred after the owner acquired the property.

(2) The hazardous substance release that occurred on the property occurred before the owner acquired the property and at the time of acquisition the owner knew or had reason to know of the hazardous substance release.

(3) The owner of property where there has been a release of a hazardous substance to groundwater underlying the property took, or is taking, one or more of the following actions:

(A) Caused or contributed to a release of a hazardous substance to the groundwater.

(B) Fails to provide the department, or its authorized representative, with access to the property.

(C) Interferes with response action activities.

(d) In an action brought against an owner of property to recover costs or expenditures incurred from the state account or the Hazardous Substance Cleanup Fund pursuant to this chapter in response to a hazardous substance release, the presumption established in subdivision (b) may be rebutted if it is established by a preponderance of the evidence that the facts upon which the department made the certification pursuant to paragraph (1), (2), or (3) of subdivision (c) are true.

(e) Notwithstanding any other provision of this chapter, this section governs liability pursuant to this chapter for an owner of property, as defined in subdivision (a).

<< CA HLTH & S § 25360.3 >>

25360.3. (a) For the purposes of this section, the following terms have the following meaning:

(1) "Easement" means a conservation easement, as defined in Section 815.1 of the Civil Code.

(2) "Environmental assessment" means an investigation of real property, conducted by an independent qualified environmental consultant, to discover the presence or likely presence of a release or a threat of a release of a hazardous substance at, on, to, or from the real property. An environmental assessment shall include, but is not limited to, an investigation of the historical use of the real property, any prior releases, records, consultant reports and regulatory agency correspondence, a visual survey of the real property, and, if warranted, sampling and analytical testing.

(3) "Owner" means either of the following:

(A) An independent special district, as defined in Section 56044 of the Government Code.

(B) An entity or organization that holds an easement.

(4) "Property" means either of the following:

(A) Real property acquired by a special district by means of a gift or donation for which an environmental assessment was completed prior to the transfer or conveyance of the real property to the special district.

(B) An easement for which an environmental assessment was completed prior to the transfer or conveyance of the easement to an entity or organization authorized to accept the easement pursuant to Section 815.3 of the Civil Code.

(b) (1) Notwithstanding any other provision of this chapter, if an environmental assessment of property discovers no evidence of the presence or likely presence of a release or a threat of a release of a hazardous substance, and a hazardous substance release is subsequently discovered on, to, or from that property, the owner of that property is entitled to a rebuttable presumption, affecting the burden of producing evidence, that the owner is not a liable person or responsible party for purposes of this chapter. An owner is entitled to this presumption whether the action is brought by the state or by a private party seeking contribution or indemnification.

(2) In an action brought against an owner of property to recover costs or expenditures incurred from the state account or the Hazardous Substance Cleanup Fund pursuant to this chapter in response to a hazardous substance release, the presumption may be rebutted if it is established by a preponderance of the evidence that the facts upon which the department made the certification pursuant to paragraph (1), (2), (3), or (4) of subdivision (c) are true.

(c) An action for recovery of costs or expenditures incurred from the state account or the Hazardous Substance Cleanup Fund pursuant to this chapter in response to a hazardous substance release shall not be brought against an owner of property unless the department first certifies that, as found by the department, one of the following situations applies:

(1) The hazardous substance release occurred on or after the date that the owner acquired the property.

(2) The hazardous substance release occurred before the date that the owner acquired the property and, at the time of the acquisition, the owner knew, or had reason to know, of the hazardous substance release.

(3) The environmental assessment applicable to the property was not properly carried out, was fraudulently completed, or involves the negligent or intentional nondisclosure of information.

(4) The hazardous substance release was discovered on or after the date of acquisition and the owner failed to exercise due care with respect to the release, taking into consideration the characteristics of the hazardous substance in light of all relevant facts and circumstances.

(d) Notwithstanding any other provision of this chapter, this section governs liability pursuant to this chapter for an owner of property, as defined in subdivision (a).

(e) This section is applicable only to property that is acquired by the owner on or after January 1, 1995.

25360.4. (a) An action under Section 25360 for the recovery of the costs of removal or remedial action incurred by the department from the state account, the Hazardous Substance Cleanup Fund, or any other source authorized by law, or for the recovery of administrative costs incurred by the department in connection with any removal or remedial action performed by the department or by any responsible party, shall be commenced within three years after completion of the removal or remedial action has been certified by the department.

(b) An action under subdivision (c) of Section 25352 for costs incurred by the department for the purposes specified in subdivision (a) or (b) of Section 25352 shall be commenced within three years after certification by the department of the completion of the activities authorized under subdivisions (a) and (b) of Section 25352.

(c) In any action described in subdivision (a) or (b) for recovery of the costs of a removal action, a remedial action, administrative costs, or damages, where the court has entered a judgment for these past costs or damages, the court shall also enter an order reserving jurisdiction over the case and the court shall have continuing jurisdiction to determine any future liability and the amount. The department may immediately enforce the judgment for past costs and damages. The department may apply for a court judgment as to future costs and damages that have been incurred at any time during the removal and remedial actions or during the performance of the activities authorized by Section 25352, but the application shall be made not later than three years after the certification of completion of the actions or activities.

(d) An action may be commenced under Section 25360 or subdivision (c) of Section 25352 at any time prior to expiration of the three-year limitation period provided for by this section.

<< CA HLTH & S § 25360.6 >>

25360.6. (a) The department shall, when it determines that it is practicable and in the public interest, propose a final administrative or judicial expedited settlement with potentially responsible parties if such a settlement involves only a minor portion of the response costs at a facility and, if in the judgment of the department, either of the following conditions are met:

(1) The amount of hazardous substances and the toxic or other hazardous effects of the hazardous substances contributed by the potentially responsible party to the facility are minimal in comparison to the amount and effects of other hazardous substances at the facility.

(2) The potentially responsible party is the owner of the real property on or in which the facility is located, did not conduct or permit the generation, transportation, storage, treatment, or disposal of any hazardous substance at the facility, and did not contribute to the release or threat of release of a hazardous substance at the facility through any act or omission. This paragraph does not apply if the potentially responsible party, at the time of the purchase of the real property, knew or should have known that the property was used for the generation, transportation, storage, treatment, or disposal of any hazardous substance.

(b) A party who has resolved its liability to the state under this section shall not

be liable for claims for contribution regarding matters addressed in the settlement. A settlement under this section does not discharge any of the other potentially responsible parties unless its terms so provide, but it reduces the potential liability of the others by the amount of the settlement.

(c) Any person who enters into a settlement under this section shall provide any information relevant to the administration of this chapter that is requested by the department. In order to obtain the contribution protection provided by subdivision (b), a potentially responsible party participating in a de minimus settlement shall certify that it has responded fully and accurately to all of the department's requests for information, and that it has provided all of the relevant documents pertaining to the facility to the department.

(d) Nothing in this section shall be construed to affect the authority of the department or regional board to reach settlements with other potentially responsible parties under this chapter.

<< CA HLTH & S § 25361 >>

25361. (a) The state account or the Hazardous Substance Cleanup Fund shall be a party in any action for recovery of costs or expenditures under this chapter incurred from the state account or the Hazardous Substance Cleanup Fund.

(b) In the event a district attorney or a city attorney has brought an action for civil or criminal penalties pursuant to Chapter 6.5 (commencing with Section 25100) against any person for the violation of any provision of that chapter, or any rule, regulation, permit, covenant, standard, requirement, or order issued, adopted, or executed thereunder, and the department has expended moneys from the state account pursuant to Section 25354 for immediate corrective action in response to a release, or threatened release, of a hazardous substance which has resulted, in whole or in part, from the person's acts or omissions, the state account may be made a party to that action for the purpose of recovering the costs against that person. If the state account is made a party to the action, the Attorney General shall represent the state account for the purpose of recovering the moneys expended from the account. Notwithstanding any other provision of law, and under terms that the Attorney General and the department deem appropriate, the Attorney General may delegate the authority to recover the costs to the district attorney or city attorney who has brought the action pursuant to Chapter 6.5 (commencing with Section 25100). The failure to seek the recovery of moneys expended from the state account as part of the action brought pursuant to Chapter 6.5 (commencing with Section 25100) does not foreclose the Attorney General from recovering the moneys in a separate action.

<< CA HLTH & S § 25362 >>

25362. Upon motion and sufficient showing by any party, the court shall join to the action any person who may be liable for costs or expenditures of the type recoverable under this chapter.

<< CA HLTH & S § 25363 >>

25363. (a) Except as provided in subdivision (f), any party found liable for any costs

or expenditures recoverable under this chapter who establishes by a preponderance of the evidence that only a portion of those costs or expenditures are attributable to that party's actions, shall be required to pay only for that portion.

(b) Except as provided in subdivision (f), if the trier of fact finds the evidence insufficient to establish each party's portion of costs or expenditures under subdivision (a), the court shall apportion those costs or expenditures, to the extent practicable, according to equitable principles, among the defendants.

(c) The state account shall pay any portion of the judgment in excess of the aggregate amount of costs or expenditures apportioned under subdivisions (a) and (b).

(d) The standard of liability for any costs or expenses recoverable pursuant to this chapter is strict liability.

(e) Any person who has incurred removal or remedial action costs in accordance with this chapter or the federal act may seek contribution or indemnity from any person who is liable pursuant to this chapter, except that no claim may be asserted against a person whose liability has been determined and which has been or is being, fully discharged pursuant to Section 25356.6, or against a person who is actively participating in a pending apportionment proceeding pursuant to Section 25356.6. An action to enforce a claim may be brought as a cross-complaint by any defendant in an action brought pursuant to Section 25360 or this section, or in a separate action after the person seeking contribution or indemnity has paid removal or remedial action costs in accordance with this chapter or the federal act. Any plaintiff or cross complainant seeking contribution or indemnity shall give written notice to the director upon filing an action or cross complaint under this section. In resolving claims for contribution or indemnity, the court may allocate costs among liable parties using those equitable factors which are appropriate.

(f) Notwithstanding this chapter, any response action contractor who is found liable for any costs or expenditures recoverable under this chapter and who establishes by a preponderance of the evidence that only a portion of those costs or expenditures are attributable to the response action contractor's actions, shall be required to pay only that portion of the costs or expenditures attributable to the response action contractor's actions.

<< CA HLTH & S § 25364 >>

25364. Except as provided in Section 25364.1, no indemnification, hold harmless, conveyance, or similar agreement shall be effective to transfer any liability for cost or expenditures recoverable under this chapter. This section shall not bar any agreement to insure, hold harmless, or indemnify a party to the agreement for any costs or expenditures under this chapter.

<< CA HLTH & S § 25364.1 >>

25364.1. (a) For purposes of this section, the following definitions shall apply:

(1) "Affiliate" means any entity that directly, or indirectly through one or more

intermediaries, controls, is controlled by, or is under common control with, the responsible party owner. For purposes of this paragraph, "control" means the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of an entity, or ownership of shares or interests in the entity possessing more than 50 percent of the voting power.

(2) "Qualified independent consultant" means either a geologist who is registered pursuant to Section 7850 of the Business and Professions Code or a professional engineer who is registered pursuant to Section 6762 of the Business and Professions Code.

(3) "Responsible party owner" means the owner of all or part of the site on January 1, 1993, or if all or a part of the site is transferred to a joint venture formed for purposes of development of the site, the owner of the site immediately prior to that transfer.

(4) "Site" means the site of the former Kaiser Steel Corporation steel mill located near the City of Fontana.

(b) Notwithstanding any other provision of law, except as provided in subdivisions (c) and (e), the director may release from liability under this chapter or Chapter 6.5 (commencing with Section 25100), and from liability for any claims of the state for recovery of response costs under the federal act, any of the following persons, with regard to a removal or remedial action at the site:

(1) Any person who provides financing for all, or a substantial part of, the costs of performing a removal or remedial action at the site pursuant to a remedial action plan prepared by a qualified independent consultant and issued by the department pursuant to subdivision (e) of Section 25356.1, except that the release from liability shall not release the person providing this financing from liability for any hazardous substance release or threatened release resulting from that person's exercise of decisionmaking control over the performance of the removal or remedial action while the responsible party owner remains in possession of the site.

(2) Any person who enters into an agreement with the responsible party owner to provide development services for the development of all, or a part of, the site, including a developer, who becomes a partner in a joint venture partnership with the responsible party owner, if the joint venture is formed for purposes of the development of the site and legal title to the site is transferred by the responsible party owner to the joint venture. If a release from liability is granted to a developer pursuant to this paragraph and the legal title to the site is transferred by the responsible party owner to a joint venture between the developer and the responsible party owner of the site, the responsible party owner shall not be relieved of liability under this chapter.

(3) Any person who acquires an ownership or leasehold interest in all or a part of the site after performance of the removal or remedial action specified in the remedial action plan for the site, or part of the site, has been completed to the satisfaction of the department.

(c) A release from liability shall not be granted pursuant to subdivision (b) unless all of the following conditions are met:

(1) A responsible party owner has entered into a stipulated settlement of an order issued by the department pursuant to Section 25187, 25355.5, or 25358.3 to perform the removal or remedial action at the site in accordance with the remedial action plan and has arranged financing, contingent only upon obtaining releases from potential liability pursuant to subdivision (b), for the costs of performing the removal or remedial action.

(2) A responsible party owner agrees to pay all applicable oversight fees required by Section 25343 and to pay any additional costs that are recoverable pursuant to Section 25360.

(3) No person to be released from liability pursuant to subdivision (b) is a responsible party or an affiliate of a responsible party, with respect to any hazardous substance release existing at the site at the time the release from liability is granted.

(4) The stipulated settlement requires the responsible party owner to provide irrevocable financial assurances for full performance of the remedial action plan. The financial assurances may consist of one or more of the financial assurance instruments described in Section 66264.143 of Title 22 of the California Code of Regulations. Upon the approval of the department, the forms of these instruments may be revised as appropriate to apply to the costs of performing the removal or remedial action specified in the remedial action plan.

(5) The director finds that the release from liability to be granted will promote the purposes and goals of this chapter and encourage private investment in property that is in need of remediation.

(d) The site may be subdivided to create subdivided parcels of land, pursuant to the Subdivision Map Act (Division 2 (commencing with Section 66410) of Title 7 of the Government Code), in order to facilitate removal or remedial action at the site, secure financing for removal or remedial action, or secure financing for development which would generate funds for removal or remedial action at the site.

(e) Notwithstanding any other provision of this section, a release from liability granted pursuant to subdivision (b) shall not extend to any of the following:

(1) Any person who was a responsible party for a hazardous substance release existing at the site before the release from liability was granted, and any entity which is an affiliate of such a responsible party.

(2) Any contractor who prepares the remedial action plan or performs the removal or remedial action provided for in the remedial action plan.

(3) Any person who obtains a release pursuant to subdivision (b) by fraud or negligent or intentional nondisclosure or misrepresentation.

(4) Any liability for a release or threatened release of a hazardous substance first deposited at the site by a person released from liability pursuant to subdivision (b) after the release from liability is granted.

(f) Any release from liability granted by the director pursuant to this section shall

contain the following provision: "If, for any reason, the responsible party does not complete the removal or remedial action, this release does not extend to any subsequent actions or activities performed by the released party that exacerbate the conditions at the site."

<< CA HLTH & S § 25364.7 >>

25364.7. The repeal of Section 25364.6 shall not affect any indemnity provided pursuant to that section for any cause of action brought because of any act or omission which occurs before the repeal of that section.

<< CA HLTH & S § 25365 >>

25365. The entry of judgment against any party to the action shall not be deemed to bar any future action by the state account against any person who is later discovered to be potentially liable for costs and expenditures paid by the state account.

<< CA HLTH & S § 25365.6 >>

25365.6. (a) Any costs or damages incurred by the department or regional board pursuant to this chapter constitutes a claim and lien upon the real property owned by the responsible party that is subject to, or affected by, the removal and remedial action. This lien shall attach regardless of whether the responsible party is insolvent. A lien established by this section shall be subject to the notice and hearing procedures required by due process of the law and shall arise at the time costs are first incurred by the department or regional board with respect to a response action at the site.

(b) The department shall not be considered a responsible party for a hazardous substance release site because a claim and lien is imposed pursuant to this section.

(c) The lien provided by this section shall continue until the liability for these costs or damages, or a judgment against the responsible party, is satisfied. However, if it is determined by the court that the judgment against the responsible party will not be satisfied, the department may exercise its rights under the lien.

(d) The lien imposed by this section shall have the force and effect of, and the priority of, a judgment lien upon its recordation in the county in which the property subject to the lien is located. The lien shall contain the legal description of the real property, the assessor's parcel number, and the name of the owner of record, as shown on the latest equalized assessment roll. The lien shall also contain a legal description of the property which is the site of the hazardous substance release, the assessor's parcel number for that property, and the name of the owner of record, as shown on the latest equalized assessment roll, of that property.

(e) All funds recovered pursuant to this section shall be deposited in the state account, except that, if the costs incurred were paid from the Hazardous Substance Cleanup Fund, the recovered funds shall be deposited in the Hazardous Substance Clearing Account.

<< CA HLTH & S § 25366 >>

25366. (a) This chapter shall not be construed as imposing any new liability associated with acts that occurred on or before January 1, 1982, if the acts were not in violation of existing state or federal laws at the time they occurred.

(b) Nothing in this chapter shall be construed as authorizing recovery for response costs or damages resulting from any release authorized or permitted pursuant to state law or a federally permitted release.

(c) Except as provided in Sections 25360, 25361, 25362, and 25363, nothing in this chapter shall affect or modify in any way the obligations or liability of any person under any other provision of state or federal law, including common law, for damages, injury, or loss resulting from a release of any hazardous substance or for removal or remedial action or the costs of removal or remedial action of the hazardous substance.

<< CA HLTH & S § 25366.5 >>

25366.5. (a) Any public agency operating a household hazardous waste collection program or any person operating such a program under a written agreement with a public agency, or, for material received from the public as used oil, any person operating a certified used oil collection center as provided in Section 48660 of the Public Resources Code, shall not be held liable in any cost recovery action brought pursuant to Section 25360, including, but not limited to, any action to recover the fees imposed by Section 25343, for any waste which has been properly handled and transported to an authorized hazardous waste treatment or disposal facility at a location other than that of the collection program.

(b) For purposes of this section, "household hazardous waste collection program" means a program in which hazardous wastes from households and small quantity commercial sources, as defined in subdivision (d) of Section 25158.1, are collected and ultimately transferred to an authorized hazardous waste treatment, storage, or disposal facility.

(c) Except as provided in subdivision (a), this section does not affect or modify the obligations or liabilities of any person imposed pursuant to any state or federal law.

<< CA HLTH & S § 25367 >>

25367. Any person who commits any of the following acts shall be liable for a civil penalty not to exceed twenty-five thousand dollars (\$25,000) for each separate violation, or for continuing violations, for each day during which that violation continues:

(a) Intentionally makes any false statement or representation in any report or information furnished pursuant to Section 25358.1.

(b) Intentionally fails to provide any information requested pursuant to Section 25358.1.

(c) Refuses or prevents, without sufficient cause, any activity authorized pursuant to Section 25358.1 or 25358.3.

Article 6.3. Technology Demonstration Program

<< CA HLTH & S § 25368 >>

25368. Notwithstanding Section 25355.5, the department shall carry out a program of full-scale demonstrations to evaluate treatment technologies that can be safely utilized for removal and remedial actions to hazardous substance releases.

<< CA HLTH & S § 25368.1 >>

25368.1. For the purposes of this article, the following definitions apply:

(a) "Treatment technologies" means methods, techniques, or processes, including proprietary or patented methods, that permanently alter the composition of hazardous substances at hazardous substance release sites through chemical, biological, or physical means so as to make the substances nonhazardous or to significantly reduce the toxicity, mobility, or volume, or any combination thereof, of the hazardous substances or contaminated materials being treated.

(b) "Full-scale demonstration" means a demonstration of a technology that is of a size or capacity which permits valid comparison of the technology to the technical performance and cost of conventional technologies, that is likely to be cost-effective, and that will result in a substantial or complete remedial or removal action to a hazardous substance release site.

<< CA HLTH & S § 25368.2 >>

25368.2. The department shall select technology demonstration projects to be evaluated pursuant to this article using criteria that include, at a minimum, all of the following requirements:

(a) The project proposal includes complete and adequate documentation of technical feasibility.

(b) The project proposal includes evidence that a technology has been sufficiently developed for full-scale demonstration and can likely operate on a cost-effective basis.

(c) The department has determined that a site is available and suitable for demonstrating the technology or technologies, taking into account the physical, biological, chemical, and geological characteristics of the site, the extent and type of contamination found at the site, and the capability to conduct demonstration projects in a manner to ensure the protection of human health and the environment.

(d) The technology to be demonstrated preferably has widespread applicability in removal and remedial actions at other sites in the state.

(e) The project will be developed to the extent that a successful demonstration on a hazardous substance release site may lead to commercial utilization by responsible parties at other sites in the state.

(f) The department has determined that adequate funding is available from one or more

of the following sources:

- (1) Responsible parties.
- (2) The Environmental Protection Agency.
- (3) The Hazardous Substance Cleanup Fund.
- (4) The state account.

<< CA HLTH & S § 25368.3 >>

25368.3. The department shall identify hazardous substance release sites, listed pursuant to Section 25356, that are particularly well-suited for technology demonstration projects. In identifying hazardous substance release sites, the department shall consider, at a minimum, all of the following:

- (a) The state's priority ranking for removal and remedial actions to hazardous substance release sites adopted pursuant to Section 25356.
- (b) The volume and variability of the hazardous substance release at the site.
- (c) The availability of data characterizing the hazardous substance release.
- (d) The accessibility of the hazardous substance release.
- (e) Availability of required utilities.
- (f) Support of federal and local governments.
- (g) Potential for adverse effects to public health and the environment.

<< CA HLTH & S § 25368.4 >>

25368.4. (a) The department shall annually, on or before July 1, publish a solicitation for proposals to conduct treatment demonstration projects which utilize technologies which are at a stage of development suitable for full-scale demonstrations at hazardous substance release sites. The solicitation notice shall prescribe information to be included in the proposal, including technical and economic data derived from the applicant's own research and development efforts, and any other information which may be prescribed by the department to assess the technology's potential and safety and the types of removal or remedial action to which it may be applicable.

(b) Any person and private or public entity may submit an application to the department in response to the solicitation. The application shall contain a proposed treatment demonstration plan setting forth how the treatment demonstration project is to be carried out and any other information which the department may require.

<< CA HLTH & S § 25368.5 >>

(Publication page references are not available for this document.)

25368.5. (a) On or before January 1, after reviewing all proposals submitted pursuant to Section 25368.4, the department shall annually select at least two treatment demonstration projects, to be commenced during that calendar year, using, at a minimum, the criteria specified in Section 25368.2.

(b) If the department determines that the required number of demonstrations required by subdivision (a) cannot be initiated consistent with the criteria specified in Section 25368.2 in any fiscal year, the department shall inform the appropriate committees of the Legislature of the reasons for its inability to conduct these demonstration projects.

(c) Each treatment demonstration project selected pursuant to this section shall be performed by the applicant, or by a person approved by the applicant and the department.

<< CA HLTH & S § 25368.6 >>

25368.6. Notwithstanding Section 25360, if the department determines that using an alternative treatment technology to conduct a removal or remedial action at a hazardous substance release site listed pursuant to paragraph (2) or (3) of subdivision (b) of Section 25356 would be more costly than another available and feasible removal or remedial action method that would also achieve satisfactory results, the department may determine not to attempt to recover from the liable person the incremental costs of the removal or remedial action attributable to the alternative treatment technology.

<< CA HLTH & S § 25368.7 >>

25368.7. The department shall conduct a technology transfer program that shall include the development, collection, evaluation, coordination, and dissemination of information relating to the utilization of alternative or innovative hazardous waste treatment technologies demonstrated pursuant to this article. The information shall include an evaluation of each treatment demonstration project's efficacy relating to performance and cost in achieving permanent and significant reduction in risks from hazardous substance releases. The information shall also include documentation of the testing procedures utilized in the project, the data collected, and the quality assurance and quality control which was conducted. The information shall also include the technology's applicability, pretreatment and posttreatment measurements, and the technology's advantages or disadvantages compared to other available technologies.

<< CA HLTH & S § 25368.8 >>

25368.8. Notwithstanding paragraph (5) of subdivision (c) of Section 25356.1, when preparing or approving a remedial action plan for a site listed pursuant to paragraph (2) or (3) of subdivision (b) of Section 25356, that has been selected for a treatment demonstration project pursuant to this article, the department shall consider the cost-effectiveness of the project but is not required to choose the most cost-effective measure.

Article 6.5. Abandoned Site Program

<< CA HLTH & S § 25369 >>

25369. The department shall establish an abandoned site program to survey counties where abandoned site surveys have not been completed. As part of the program, the department shall do all of the following:

(a) Develop protocols and procedures for conducting an abandoned site survey of rural unsurveyed counties. These protocols shall address all types of sites likely to be found in these counties, including, but not limited to, crop-duster airstrips, abandoned mining operations, pesticide formulators and manufacturers, abandoned wells, oil exploration and extraction, wood treatment plants, land disposal sites, and scrap metal operations.

(b) Notify the California regional water quality control boards, the Department of Fish and Game, local health officers, county directors of environmental health, county agricultural commissioners, and state and federal land management agencies of the abandoned site program. Notifications shall consist of the following:

(1) Explanation of the abandoned site program.

(2) Description of the California Superfund Program, including the availability of state funds for cleaning up abandoned hazardous waste sites, and that discovery of a site does not impose liability for cleanup.

(3) Provide a copy of the program's protocols and procedures outlining sites the state is attempting to identify.

(4) Request that, as part of each respective agency's duties, it report to the state abandoned site program any suspected abandoned waste site.

(5) Request that each participating agency, as a part of its regular activities, notify the department of sites identified in writing at least quarterly.

(c) Prepare an inventory of suspected abandoned hazardous substance release sites.

(d) Contact the owners and occupants of suspected abandoned sites.

(e) Maintain individual records for each suspected abandoned site.

(f) Develop a methodology for screening sites identified.

(g) Conduct a field assessment of those sites which the screening procedures specified in subdivision (f) indicate require this assessment.

(h) Rank the assessed sites, in order of priority, as presenting a potential hazard to public health or the environment consistent with Section 25356 or regulations adopted pursuant to that section.

(i) Report to the Legislature quarterly, on an update on the progress of the abandoned sites survey, identifying which agencies have identified and reported sites to the department, as well as which agencies have reported that they do not intend to participate

in the program.

Article 7. Compensation

<< CA HLTH & S § 25370 >>

25370. "Board," as used in this article, means the State Board of Control.

<< CA HLTH & S § 25372 >>

25372. Any person may apply to the board, pursuant to Section 25373, for compensation of a loss caused by the release, in California, of a hazardous substance if any of the following conditions are met:

(a) The source of the release of the hazardous substance, or the identity of the party liable for damages in connection therewith or responsible for the costs of removal of the hazardous substance, is unknown or cannot, with reasonable diligence, be determined.

(b) The loss was not compensable pursuant to law, including Chapter 6.5 (commencing with Section 25100), because there is no liable party or the judgment could not be satisfied, in whole or part, against the party determined to be liable for the release of the hazardous substance.

(c) The person has presented a written demand for compensation, which sets forth the basis for the claim, to the party which the person reasonably believes is liable for a loss specified in paragraph (1) of subdivision (a) of Section 25375 which was incurred by that person and is compensable pursuant to this article, the person has presented the board with a copy of the demand, and, within 60 days after presenting the demand, the party has either rejected, in whole or in part, the demand to be compensated for a loss specified in paragraph (1) of subdivision (a) of Section 25375, or has not responded to the demand. Only losses specified in paragraph (1) of subdivision (a) of Section 25375 are compensable under a claim filed pursuant to this subdivision.

<< CA HLTH & S § 25373 >>

25373. The board shall prescribe appropriate forms and procedures for claims filed pursuant to this article, which shall include, as a minimum, all of the following:

(a) A provision requiring the claimant to make a sworn verification of the claim to the best of his or her knowledge.

(b) A full description, supported by appropriate evidence from government agencies of the release of the hazardous substance claimed to be the cause of the physical injury or illness or loss of income.

(c) Certification by the claimant of dates and places of residence for the five years preceding the date of the claim.

(d) Certification of the medical history of the claimant for the five years preceding the date of the claim, along with certification of the alleged physical injury or illness

and expenses for the physical injury or illness. The certification shall be made by hospitals, physicians, or other qualified medical authorities.

(e) The claimant's income as reported on the claimant's federal income tax return for the preceding three years in order to compute lost wages or income.

(f) Any person who knowingly gives, or causes to be given, any false information as a part of any such claim shall be guilty of a misdemeanor and shall, upon conviction, be fined up to five thousand dollars (\$5,000), or imprisoned for not more than one year, or both.

<< CA HLTH & S § 25374 >>

25374. All decisions rendered by the board shall be in writing, with notification to all appropriate parties, and shall be rendered within 90 days of submission of a claim to the board unless all the parties to the claim agree in writing to an extension of time. The decision shall be considered a final agency action for the purposes of judicial review of the decision by any party to the proceedings resulting in the decision.

<< CA HLTH & S § 25375 >>

25375. (a) If the board makes the determination, specified in subdivision (b), that losses resulted from the claimant's damages, injury, or disease, only the following losses are compensable pursuant to this article:

(1) One hundred percent of uninsured, out-of-pocket medical expenses, for up to three years from the onset of treatment.

(2) Eighty percent of any uninsured, actual lost wages, or business income in lieu of wages, caused by injury to the claimant or the claimant's property, not to exceed fifteen thousand dollars (\$15,000) per year for three years.

(3) One hundred percent of uninsured, out-of-pocket expenses for remedial action on the claimant's property undertaken to address a release of a hazardous substance when all of the following apply:

(A) The claimant's property is an owner-occupied single-family residence.

(B) The remedial action was ordered by federal, state, or local authorities due to a release of a hazardous substance.

(C) The department makes one of the following determinations:

(i) The release of the hazardous substance originated outside the boundaries of the property.

(ii) The release of the hazardous substance occurred on the property, was the result of an action which violated state or federal law, and the responsible party cannot be identified or cannot be located, or a judgment against the responsible party cannot be satisfied.

The maximum compensation under this paragraph is limited to twenty-five thousand dollars (\$25,000) per residence and to one hundred thousand dollars (\$100,000) for five contiguous residential properties. Any compensation provided shall be reduced by the amount that the remedial action results in a capital improvement to the claimant's residence.

(4) One hundred percent of the fair market value of owner-occupied real property that is rendered permanently unfit for occupancy because of the release of a hazardous substance. For purposes of this paragraph, real property is rendered permanently unfit for occupancy only if a state or federal agency requires that it be evacuated for a period of six or more months because of the release of a hazardous substance. The fair market value of the real property shall be determined by an independent appraiser, and shall be considered by the independent appraiser as being equal to the value of the real property prior to the release of the hazardous substance that caused the evacuation of the property. Where compensation is made by the board pursuant to this paragraph, sole ownership of the real property shall be transferred to the state and any proceeds resulting from the final disposition of the real property shall be deposited into the state account, for expenditure by the department upon appropriation by the Legislature. To be eligible for compensation pursuant to this paragraph, claims for compensation shall be made within 12 months of the date on which the evacuation was ordered.

(5) One hundred percent of the expenses incurred due to the evacuation of a residence ordered by a state or federal agency. For purposes of this paragraph, "evacuation expenses" include the cost of shelter and any other emergency expenditures incurred due to an evacuation ordered by a state or federal agency. The board may provide compensation, pursuant to this paragraph, only if it finds that the evacuation expenses represent reasonable costs for the goods or services purchased, and would not have been incurred if an evacuation caused by a hazardous substance release had not occurred. The board may provide compensation for these evacuation expenses only if they were incurred within 12 months from the date on which evacuation was ordered.

(b) A loss specified in subdivision (a) is compensable if the board makes all of the following findings, based upon a preponderance of the evidence:

(1) A release of a hazardous substance occurred.

(2) The claimant or the claimant's property was exposed to the release of the hazardous substance.

(3) The exposure of the claimant to the release of the hazardous substance was of such a duration, and to such a quantity of the hazardous substance, that the exposure caused the damages, injury, or disease which resulted in the claimant's loss.

(4) For purposes of paragraphs (4) and (5) of subdivision (a), the hazardous substance release, or the order which resulted in the claim for compensation occurred on or after January 1, 1986.

(5) The conditions and requirements of this article including, but not limited to, the conditions of Sections 25372 and 25373, have been met.

(c) No money shall be used for the payment of any claim authorized by this chapter, where the claim is the result of long-term exposure to ambient concentrations of air pollutants.

<< CA HLTH & S § 25375.5 >>

25375.5. (a) Except as specified in subdivision (b), the procedures specified in Article 8 (commencing with Section 11435.05) of Chapter 4.5 of Part 1 of Division 3 of Title 2 of, and in Section 11513 of, the Government Code apply to the proceedings conducted by the board pursuant to this article.

(b) Notwithstanding subdivision (a), Sections 801, 802, 803, 804, and 805 of the Evidence Code apply to the proceedings conducted by the board pursuant to this article.

(c) The board may consider evidence presented by any person against whom a demand was made pursuant to subdivision (c) of Section 25372. The evidence presented by that person shall become a part of the record upon which the board's decision shall be based.

<< CA HLTH & S § 25376 >>

25376. No claim may be presented to the board pursuant to this article later than three years from the date of discovery of the loss or from January 1, 1982, whichever is later.

<< CA HLTH & S § 25377 >>

25377. Nothing in this article shall require, or be deemed to require, pursuit of any claim against the board as a condition precedent to any other remedy.

<< CA HLTH & S § 25378 >>

25378. (a) Compensation of any loss pursuant to this article shall preclude indemnification or reimbursement from any other source for the identical loss, and indemnification or reimbursement from any other source shall preclude compensation pursuant to this article.

(b) If a claimant recovers any compensation from a party in a civil or administrative action for a loss for which the claimant has received compensation pursuant to this article, the claimant shall reimburse the state account in an amount equal to the compensation which the claimant has received from the state account pursuant to this article. The Attorney General may bring an action against the claimant to recover the amount which the claimant is required to reimburse the state account, and until the account is reimbursed, the state shall have a lien of first priority on the judgment or award recovered by the claimant. If the state account is reimbursed pursuant to this subdivision, the state shall not acquire, by subrogation, the claimant's rights pursuant to Section 25380.

(c) The Legislature hereby finds and declares that it is the purpose of this section to prevent double recovery for a loss compensable pursuant to this article.

<< CA HLTH & S § 25379 >>

25379. (a) The following evidence is not admissible as evidence in any civil or criminal proceeding, including a subrogation action by the state pursuant to Section 25380, to establish the liability of any person for any damages alleged to have been caused by a release of a hazardous substance:

- (1) A final decision made by the board pursuant to this article.
- (2) A decision made by the board to admit or not admit any evidence.
- (3) Any finding of fact or conclusion of law entered by the board in a proceeding for a claim pursuant to this article.
- (4) The fact that any person has done any of the following in a proceeding for a claim pursuant to Section 25372:
 - (A) Chosen to participate or appear.
 - (B) Chosen not to participate or appear.
 - (C) Failed to appear.
 - (D) Settled or offered to settle the claim.

(b) Subdivision (a) does not apply to any civil action or writ by a claimant against the board for any act, decision, or failure to act on a claim submitted by the claimant.

<< CA HLTH & S § 25380 >>

25380. Compensation of any loss pursuant to this article shall be subject to the state's acquiring, by subrogation, all rights of the claimant to recover the loss from the party determined to be liable therefor. Upon the request of the board, the Attorney General shall commence an action in the name of the people of the State of California to recover any amount paid in compensation for any loss pursuant to this article against any party who is liable to the claimant for any loss compensable pursuant to this article in accordance with the procedures set forth in Sections 25360 to 25364, inclusive. Moneys recovered pursuant to this section shall be deposited in the state account.

<< CA HLTH & S § 25381 >>

25381. (a) The board shall, in consultation with the department, adopt, and revise when appropriate, all rules and regulations necessary to implement this article, including methods that provide for establishing that a claimant has exercised reasonable diligence in satisfying the conditions specified in Sections 25372, 25373, 25375, and 25375.5, and regulations that specify the proof necessary to establish a loss compensable pursuant to this article.

(b) Claims approved by the board pursuant to this article shall be paid from the state

account.

(c) The Legislature may appropriate up to two million dollars (\$2,000,000) annually from the state account to be used by the board for the payment of awards pursuant to this article.

(d) Claims against or presented to the board shall not be paid in excess of the amount of money appropriated for this purpose from the state account. These claims shall be paid only when additional money is collected, appropriated, or otherwise added to that account.

<< CA HLTH & S § 25382 >>

25382. The board may expend from the state account those sums of money as are reasonably necessary to administer and carry out this article.

Article 7.5. Hazardous Substance Cleanup Bond Act of 1984

<< CA HLTH & S § 25385 >>

25385. This article shall be known and may be cited as the Johnston-Filante Hazardous Substance Cleanup Bond Act of 1984.

<< CA HLTH & S § 25385.1 >>

25385.1. For purposes of this article, and for purposes of Section 16722 of the Government Code as applied to this article, the following definitions apply:

- (a) "Board" means the Department of Toxic Substances Control.
- (b) "Committee" means the Hazardous Substance Cleanup Committee created pursuant to Section 25385.4.
- (c) "Director" means the Director of Toxic Substances Control.
- (d) "Fund" means the Hazardous Substance Cleanup Fund created pursuant to Section 25385.3.
- (e) "Orphan site" means a site with a release or threatened release of a hazardous substance with no reasonably identifiable responsible parties.
- (f) "Orphan share" means those costs of removal or remedial action at sites with a release or threatened release of hazardous substances, which costs are in excess of amounts included in a cleanup agreement.
- (g) "Responsible party" means a person who is, or may be, responsible or liable for carrying out, or paying for the costs of, a removal or remedial action.
- (h) "Trust fund" means the Superfund Bond Trust Fund.

<< CA HLTH & S § 25385.2 >>

25385.2. The State General Obligation Bond Law (Chapter 4 (commencing with Section 16720) of Part 3 of Division 4 of Title 2 of the Government Code) is adopted for the purpose of the issuance, sale, and repayment of, and otherwise providing with respect to, the bonds authorized to be issued pursuant to this article, and the provisions of that law are included in this article as though set out in full in this article, except that, notwithstanding anything in the State General Obligation Bond Law, the maximum maturity of bonds shall not exceed 30 years from the date of the bonds, or from the date of each respective series. The maturity of each respective series shall be calculated from the date of the series.

<< CA HLTH & S § 25385.3 >>

25385.3. (a) The Hazardous Substance Cleanup Fund is hereby created in the State Treasury. The proceeds of bonds issued and sold pursuant to this article shall be deposited in the fund, and the money in the fund may be expended only for the purposes specified in this article and, pursuant to appropriation by the Legislature, in the manner specified in this section.

(b) Except when the Legislature appropriates money from the fund for specified removal or remedial actions in a bill other than the Budget Act, it is the intention of the Legislature that all proposed appropriations for activities conducted pursuant to this article be included in a section of the Budget Act for each fiscal year for consideration by the Legislature and that this section be captioned "Hazardous Substance Cleanup Bond Act Program." Any appropriation of money from the fund is subject to all the limitations contained in the bill making the appropriation and to all fiscal procedures specified by statute concerning the expenditure of state funds.

(c) In issuing bonds pursuant to this article, the committee shall, to the extent possible, pay the principal of, and interest on, the bonds from the sources specified in subdivisions (a) to (f), inclusive, of Section 25385.9. The General Fund shall be reimbursed from these sources for any transfers made to the Hazardous Substance Clearing Account from the General Fund to make the principal and interest payments. In determining the amount the General Fund is to be reimbursed for any transfer, the committee shall also include interest on the transfer at a rate equal to the bond rate on the transfer from the date of transfer to the date of reimbursement.

<< CA HLTH & S § 25385.4 >>

25385.4. The Hazardous Substance Cleanup Committee, which is hereby created, shall consist of the Governor, the Director of Finance, the Treasurer, the Controller, and the Secretary for Environmental Protection.

<< CA HLTH & S § 25385.5 >>

25385.5. The committee may create a debt or debts, liability or liabilities, of the State of California, in the aggregate of one hundred million dollars (\$100,000,000), in the manner provided in this article. The debt or debts, liability or liabilities,

shall be created for the purpose of providing moneys, for deposit in the fund, for the purposes specified in Section 25385.6.

<< CA HLTH & S § 25385.6 >>

25385.6. (a) The moneys in the Hazardous Substance Cleanup Fund may be used, upon appropriation by the Legislature, for the purposes specified in this section.

(b) The board may expend moneys in the fund, upon the authorization of the committee, for all of the following purposes:

(1) To provide the state share of a removal or remedial action pursuant to Section 104(c)(3) of the federal act (42 U.S.C. Sec. 9604(c)(3)) if the site is the subject of a final remedial action plan issued pursuant to Section 25356.1.

(2) To pay all costs of a removal or remedial action incurred by the state, or by any local agency with the approval of the director, in response to a release or threatened release of a hazardous substance at a site which is listed in the priority ranking of sites pursuant to Section 25356 and is the subject of a final remedial action plan issued pursuant to Section 25356.1, to the extent that the costs are not paid by responsible parties or are reimbursed by the federal act.

(3) To pay for site characterization of a release of hazardous substances, even if a remedial action plan has not been prepared, approved, adopted, or made final for that site.

<< CA HLTH & S § 25385.7 >>

25385.7. (a) All bonds authorized by this article, which are sold and delivered as provided in this article, constitute valid and legally binding general obligations of the State of California, and the full faith and credit of the State of California are hereby pledged for the punctual payment of both principal and interest thereon.

(b) There shall be collected annually, in the same manner and at the same time as other state revenue is collected, that sum, in addition to the ordinary revenues of the state, which is required to pay the principal of, and interest on, the bonds as provided in this article, and all officers charged by law with any duty in regard to the collection of the revenue shall perform each and every act which is necessary to collect this additional sum.

<< CA HLTH & S § 25385.8 >>

25385.8. (a) The Superfund Bond Trust Fund is hereby created in the State Treasury. All interest earned on funds in the state account, and other funds transferred to the trust fund by the Legislature or the department, shall be deposited in the trust fund, which is a sinking fund to ensure the payment of principal of, and interest on, the debt incurred pursuant to Section 25385.5. All interest earned on money in the fund shall be deposited in the trust fund. The funds in the trust fund shall be invested by the Treasurer. The committee shall administer the trust fund so that there are sufficient funds in the trust fund to make the necessary principal and interest payments on bonds

issued and shall transfer funds from the trust fund for this purpose to the Hazardous Substance Clearing Account.

(b) There shall be transferred annually the sum of five million dollars (\$5,000,000) from the state account to the trust fund.

(c) The unobligated balance in the state account shall be transferred by the department to the trust fund on December 31 of each year. For purposes of this section, "unobligated balance" means that amount, which shall not be less than zero, determined by the department, in the year-end financial statement submitted to the Controller, to be the total of all unencumbered funds on June 30 of that calendar year, less the total of all of the following:

- (1) Any fund in the reserve account for emergencies established by Section 25354.
- (2) Any remaining principal of the loan authorized by Section 25332.
- (3) Any interest due on any remaining principal of the loan authorized by Section 25332.
- (4) Any funds paid as taxes for the following fiscal year.
- (5) Any funds received from the federal government pursuant to the federal act.
- (6) Any interest accruing from funds deposited in the subaccount for site operation and maintenance established by Section 25330.5.
- (7) Any funds received from responsible parties for remedial and removal action, except to the extent those funds are necessary to reimburse the state account for funds previously expended therefrom.
- (8) Any funds deposited into a sinking fund to ensure the repayment of principal on, and interest of, bonds pursuant to Section 25385.9.

(d) The amendment of this section by Chapter 531 of the Statutes of 1990 does not constitute a change in, but is declaratory of, the existing law.

<< CA HLTH & S § 25385.9 >>

25385.9. Notwithstanding any other provision of law, the board shall pay the principal of, and interest on, the bonds from the Hazardous Substance Clearing Account, using the following sources, in the following order of priority:

- (a) Money derived from the premium and the accrued interest on bonds which are sold.
- (b) Recoveries from responsible parties of costs incurred for removal or remedial actions at sites listed pursuant to Section 25356, insofar as the removal or remedial action expenditures were paid from proceeds from bonds issued pursuant to this article.
- (c) Funds received pursuant to the federal act which are designated to be used for removal

or remedial actions paid for by proceeds from bonds issued pursuant to this article.

- (d) Any money transferred from the state account.
- (e) Any money transferred from the trust fund.
- (f) Any money derived from any other source, as provided by law.
- (g) The General Fund.

<< CA HLTH & S § 25386 >>

25386. Notwithstanding Section 25386.5, the money deposited in the fund is available for transfer to the General Fund if money was deposited in the fund pursuant to any provision of law requiring repayments to the state for assistance financed by the proceeds of the bonds issued pursuant to this article. When transferred to the General Fund, that money shall be applied as a reimbursement to the General Fund for the principal and interest payments on the bonds which have been paid from the General Fund.

<< CA HLTH & S § 25386.1 >>

25386.1. There is hereby appropriated from the General Fund in the State Treasury, for the purpose of this article, an amount equal to the sum of all of the following:

(a) The sum, annually, which will be necessary to pay the principal of, and the interest on, the bonds issued and sold pursuant to this article, as the principal and interest become due and payable.

(b) The sum which is necessary to carry out Section 25386.2, which sum is appropriated without regard to fiscal years, notwithstanding Section 13340 of the Government Code.

<< CA HLTH & S § 25386.2 >>

25386.2. For the purpose of carrying out this article, the Director of Finance may, by executive order, authorize the withdrawal from the General Fund of amounts not to exceed the amount of the unsold bonds which the committee has, by resolution, authorized to be sold for the purpose of carrying out this article. Any amounts withdrawn shall be deposited in the fund and shall be disbursed by the board in accordance with this article. Any moneys made available pursuant to this section shall be returned to the General Fund from moneys received from the sale of bonds sold for the purpose of carrying out this article.

<< CA HLTH & S § 25386.25 >>

25386.25. Notwithstanding any other provision of this bond act, or of the State General Obligation Bond Law (Chapter 4 (commencing with Section 16720) of Part 3 of Division 4 of Title 2 of the Government Code), if the Treasurer sells bonds pursuant to this bond act that include a bond counsel opinion to the effect that the interest on the bonds is excluded from gross income for federal tax purposes under designated conditions, the Treasurer may maintain separate accounts for the bond proceeds invested and the in-

(b) Under federal liability, at sites where there are insolvent or defunct parties that cannot contribute to the cost of cleanup, viable responsible parties pay the share of liability for that cleanup that may be attributable to insolvent and defunct parties.

(c) The Orphan Share Reimbursement Trust Fund is created to mitigate the payment of an insolvent or defunct party's liability share by viable responsible parties, to the extent money in the fund is available, and to encourage responsible parties to quickly and efficiently remediate contamination.

<< CA HLTH & S § 25390.2 >>

25390.2. (a) This article does not prohibit, and is not intended to prohibit, the department, the regional board, or the Attorney General from pursuing any existing legal, equitable, or administrative remedies, pursuant to federal or state law, against any potentially responsible party.

(b) No liability or obligation is imposed upon the state pursuant to this article, and the state shall not incur a liability or obligation beyond the payment of claims pursuant to this article, to the extent that money is available and has been allocated by the administrator under subdivision (c) of Section 25390.4. No legal action may be brought against the Orphan Share Reimbursement Trust Fund in its own name.

<< CA HLTH & S § 25390.3 >>

25390.3. (a) The Orphan Share Reimbursement Trust Fund is hereby created in the State Treasury.

(b) The administrator of the fund may expend the money deposited in the fund as provided in this article, upon appropriation by the Legislature. The administrator of the fund shall act in a fiduciary capacity, shall prudently administer the fund, and shall protect the fund from any unreasonable or unjustified claims, including any unreasonable or unjustified determinations of the orphan share percentage.

(c) Except as provided in subdivision (d) and subdivision (b) of Section 25358.7.2, the administrator of the fund may expend the money in the fund for all of the following purposes:

(1) To pay claims for reimbursement of all, or any part of, the orphan share at a site paid by the responsible party filed pursuant to Section 25390.4.

(2) For the costs of implementing this article.

(3) To pay the reasonable costs of the department and the regional board for performance of its duties under this article, including, but not limited to, its participation in the orphan share determination process set forth in Section 25390.5, unless those costs are paid by a potentially responsible party under an agreement specified in paragraph (3) of subdivision (a) of Section 25390.4. The expenditures from the fund for purposes of this paragraph shall not exceed 5 percent of the total amount appropriated from the fund in the annual Budget Act for purposes of this subdivision for that fiscal year.

(4) To pay the portion of costs attributable to the orphan share incurred by the department and the regional boards to oversee actions of potentially responsible parties, unless those costs are paid by a potentially responsible party under an agreement specified in paragraph (3) of subdivision (a) of Section 25390.4.

(d) If an appropriation from the General Fund is made to the fund in any fiscal year and an amount greater than five million dollars (\$5,000,000) in unexpended funds, beyond any amount approved by the administrator of the fund to pay claims pursuant to this article from that General Fund appropriation, remain in the fund at the end of that fiscal year, and if the department determines that additional funding for orphan sites beyond that appropriated from the Toxic Substances Control Account is required for the next fiscal year, the administrator may expend the amount in excess of five million dollars (\$5,000,000) from the General Fund appropriation to pay for response costs incurred by the department or the regional boards under this chapter at sites listed pursuant to Section 25356 where no viable responsible parties exist.

<< CA HLTH & S § 25390.4 >>

25390.4. (a) A potentially responsible party may file a claim pursuant to paragraph (1) of subdivision (c) of Section 25390.3 only if all of the following apply:

(1) The site is listed pursuant to Section 25356.

(2) The department or the regional board has approved a final remedy for the site under Section 25356.1.

(3) The department and the potentially responsible party have entered into a written, enforceable cleanup agreement or order embodied in a consent order issued pursuant to Section 25355.5 or 25358.3, or the regional board and the potentially responsible party have entered into a written, enforceable cleanup agreement or order that provides for the completion of all response actions necessary at the site, conducted pursuant to this chapter and under the oversight and at the direction of the department or the regional board. The agreement shall provide for the payment by the potentially responsible party of the department's or the regional board's response costs.

(4) The potentially responsible party demonstrates, and the department or the regional board finds, that the potentially responsible party has and will have sufficient financial resources to complete all required response actions.

(5) The potentially responsible party is in compliance with the agreement provided in paragraph (3), and with any other applicable order or agreement pertaining to the potentially responsible party's obligations with respect to the site.

(6) The potentially responsible party has prepared and provided the information required under subdivision (b) of Section 25390.5.

(7) The claim for reimbursement is for the costs incurred for response actions that were subject to the oversight and approval of the department or the regional board.

(b) The administrator of the fund shall prescribe appropriate application forms and procedures for claims filed pursuant to paragraph (1) of subdivision (c) of Section 25390.3 that shall include all of the following:

(1) Requirements that the claimant provide, at a minimum, all of the following documentation:

(A) A sworn verification of the claim to the best of the information known to the claimant or within the claimant's possession or control.

(B) All records and information pertaining to the site and relevant to the ownership, operation, or control of the site, or to the ownership, possession, generation, treatment, transportation, storage or disposal of a hazardous substance, pollutant, or contaminant at or in connection with the site, within the possession or control of the claimant, including, but not limited to, the information specified in subdivision (b) of Section 25358.1.

(C) Certification of all response costs that have been, or will be, incurred at the site by the potentially responsible party, and an estimate of the total cost of completion of the approved final remedy at the site.

(2) Procedures specifying that claims shall be filed only at the two following specific time periods during the performance of a response action:

(A) After the final remedy is selected under Section 25356.1.

(B) After the department or the regional board determines that the response action is complete. The department or the regional board shall not include operation and maintenance activities in determining whether the response action is complete under this subparagraph.

(c) The administrator of the fund shall annually, on a fiscal year basis, pay claims for reimbursement from the fund filed by potentially responsible parties under paragraph (1) of subdivision (c) of Section 25390.3, in accordance with the following procedures:

(1) Claims for funds available during each fiscal year shall be filed with the administrator by July 30 of that fiscal year.

(2) For sites with multiple responsible parties, all potentially responsible parties that have entered into the cleanup agreement specified in paragraph (3) of subdivision (a) of Section 25390.4 shall file a single claim.

(3) (A) The administrator shall allocate the money available in the fund for the fiscal year among the claims filed by the July 30 deadline. The allocation shall be based on the determination of the orphan share percentage at the facility under the process set forth in Section 25390.5, the long-term financial stability and short-term resources available in the fund, and the administrator's fiduciary duty with respect to the fund. Except as provided in subparagraph (B), the administrator shall pay claims for funds in the order in which they are received.

(B) Notwithstanding subparagraph (A), if an appropriation from the General Fund is made to the fund in any fiscal year, the administrator may alter the order of payment of claims required by subparagraph (A) by using funds appropriated from the General Fund to pay claims based on the threat to public health or the environment posed by a site or the need to improve economic and environmental conditions in redeveloping communities.

(4) The total amount allocated to any one site shall not exceed 10 percent of the total amount available each fiscal year in the fund. If, due to this limit or to the unavailability of funds, a claimant receives only partial or no reimbursement of the orphan share paid to be paid by that claimant, the claim shall be paid in the following fiscal year and shall be given priority over all claims filed after the claim was initially received, subject to the discretion of the administrator set forth in paragraph (3).

(5) The administrator's proposed allocation shall be subject to public review and comment for 30 days.

(d) The state and the fund have no obligation to provide full reimbursement to a claimant. The fund shall be allocated at the discretion of the administrator, subject to the requirements of this article. In enacting this article, the Legislature intends that claimants be reimbursed only to the extent that money is available in the fund and is allocated to the claimant by the administrator.

<< CA HLTH & S § 25390.5 >>

25390.5. For the purposes of this article, the orphan share shall be determined in the following manner:

(a) The orphan share shall be expressed as a percentage in multiples of five, up to, and, including, but not greater than, 75 percent.

(b) The potentially responsible party filing a claim for reimbursement of the orphan share shall provide the administrator of the fund with a written potentially responsible party search report that shall include a list of all potentially responsible parties identified for the site, the factual and legal basis for identifying those parties, and a proposed orphan share percentage. The potentially responsible party shall also provide the administrator with the factual documentation necessary to support the proposed orphan share percentage.

(c) Upon receipt of the information required by subdivision (a), the administrator of the fund shall invite all identified potentially responsible parties and the department and the regional board to submit any additional information relating to the proposed orphan share percentage or to the list of identified potentially responsible parties.

(d) The administrator of the fund, in consultation with the department or the regional board, shall determine a final orphan share percentage based on the volume, toxicity, and difficulty of removal of the contaminants contributed to the site by the party or parties responsible for the orphan share. The administrator shall determine the orphan share timely and efficiently and is not required to precisely determine all relevant factors, as long as the determination is generally equitable. In addition, the administrator may consider the results of any apportionment or allocation conducted by voluntary arbitration or mediation or by a civil action filed by a potentially responsible

party, or any other apportionment or allocation decision that is helpful when determining the orphan share percentage.

(e) A potentially responsible party shall not assert, and the administrator of the fund shall not determine, that the orphan share percentage includes the share of liability attributable to a potentially responsible party's acts that occurred before January 1, 1982, unless that share of responsibility is attributable to a person who is defunct or insolvent.

(f) In determining the orphan share percentage under this section, the administrator of the fund may perform any of the activities authorized in subdivisions (b) and (c) of Section 25358.1.

(g) The administrator of the fund shall issue all orphan share percentage determinations in writing, with notification to all appropriate parties. The decision of the administrator with respect to either apportionment or payment of claims is a final agency action for the purposes of judicial review of the decision by any party to the proceedings resulting in the decision; however, judicial review of the administrator's decision is limited to a showing of fraud by a party submitting information under this subdivision. The administrator shall be represented by the Attorney General in any action brought under this article.

<< CA HLTH & S § 25390.6 >>

25390.6. (a) Any costs paid from the fund pursuant to paragraphs (1) and (4) of subdivision (c) of Section 25390.3 shall be recoverable by the Attorney General, at the request of the administrator of the fund, from any liable person or persons who have not entered into, or are not in compliance with, a written cleanup agreement entered into pursuant to paragraph (3) of subdivision (a) of Section 25390.4 that provides for the completion of all response actions necessary at the site under the oversight and at the direction of the department or the regional board.

(b) Any potentially responsible party who withholds information required to be submitted under this section, or who submits false information, is subject to a civil penalty of up to twenty-five thousand dollars (\$25,000) for each piece of information withheld or for each piece of false information submitted.

<< CA HLTH & S § 25390.7 >>

25390.7. A claim for reimbursement under paragraph (1) of subdivision (c) of Section 25390.3 shall not be filed for any of the following:

(a) Sites listed on the National Priorities List pursuant to the federal act (42 U.S.C. Sec. 9605(a)(8)(B)).

(b) Sites remediated pursuant to Chapter 6.85 (commencing with Section 25396).

(c) Sites, or portions of sites, for which the potentially responsible party has agreed to take all response action required by the department or the regional board at the site, and that agreement is embodied in a written, enforceable settlement agreement, including,

but not limited to, a judicial consent decree, entered into prior to January 1, 1999.

(d) Sites, or portions of sites, that have been fully remediated for which the department or the regional board has determined that the response action is complete prior to January 1, 1999. The department or the regional board shall not include operation and maintenance activities in determining whether the response action is complete under this section.

<< CA HLTH & S § 25390.8 >>

25390.8. (a) Any costs incurred and payable from the fund by the administrator pursuant to this article shall constitute a claim and lien upon the real property owned by a responsible party which is subject to, or affected by, a response action. A lien established by this subdivision shall have all of the following properties:

(1) The lien shall not exceed the increase in fair market value of the site attributable to the response action at the time of a subsequent sale or other disposition of the site.

(2) The lien shall attach regardless of whether the responsible party property owner is solvent.

(3) The lien shall arise at the time costs to the fund are first incurred by the administrator.

(4) The lien shall be subject to the notice and hearing procedures that due process of the law requires.

(b) Neither the administrator of the fund nor the fund shall be considered a responsible party for a hazardous substance release site because a claim and lien is imposed pursuant to this section.

(c) The lien imposed by this section shall have the force and effect of, and the priority of, a judgment lien upon its recordation in the county in which the property subject to the lien is located. The lien shall contain the legal description of the property, the assessor's parcel number, and the name of the owner of record, as shown on the latest equalized assessment roll. The lien shall also contain a legal description of the property that is the site of the hazardous substance release, the assessor's parcel number for that property, and the name of the owner of record, as shown on the latest equalized assessment roll, of that property.

(d) All funds recovered pursuant to this subdivision shall be deposited in the fund.

<< CA HLTH & S § 25390.9 >>

25390.9. (a) This article shall become operative on the operative date of a statute that becomes operative on or after January 1, 2000, and does both of the following:

(1) Creates a position in state government known as the Administrator of the Orphan Share Reimbursement Trust Fund, and that provides that the administrator shall be appointed by the Governor and be subject to confirmation by the Senate.

(2) Either appropriates funds to the fund to implement this article, or establishes a revenue source for the fund, or both.

(b) Notwithstanding subdivision (a), the operation of this article shall be suspended during any fiscal year in which both no funds are appropriated to the fund to implement this article and no revenue source for the fund is operative.

Article 8. Private Site Management

<< CA HLTH & S § 25395.1 >>

25395.1. As used in this article, the following terms have the following meaning:

(a) "Private site manager" means an individual who is registered as a class II environmental assessor pursuant to Section 25570.3.

(b) "Private site management team" means a group coordinated by a private site manager, which may consist of any or all of the following persons:

(1) A person holding a four-year bachelor of science degree from an accredited college or university who has done significant work in biological, chemical, physical, environmental or soil geology, hydrology, hydrogeology, environmental health, environmental engineering, toxicology, industrial hygiene, or a related field.

(2) An environmental engineer holding a four-year bachelor of science in engineering degree from an accredited college or university.

(3) An engineer registered in the State of California.

(4) A geologist registered in the State of California.

(5) A certified hydrogeologist registered in the State of California.

(6) A certified engineering geologist registered in the State of California.

(7) A geophysicist registered in the State of California.

(8) An industrial hygienist or safety engineer registered in the State of California.

(9) A process engineer holding a four-year bachelor of science degree in engineering from an accredited college or university.

(10) A petroleum engineer holding a four-year bachelor of science degree in engineering from an accredited college or university.

(11) The necessary technical support personnel and equipment operators, as determined by the private site manager.

(c) "Project proponent" means any person who applies to the department for approval

to conduct the response to a release or threatened release of hazardous substances pursuant to this article.

(d) "Independent," as used in subdivision (b) of Section 25395.3, means that the private site manager or the members of the private site management team meet all of the following requirements:

(1) The site manager or team member is not an employee of the project proponent, a known responsible party, or a prospective buyer of the site property.

(2) The site manager or team member is not a general partner, or a limited partner, with any project proponent, known responsible party, or prospective buyer of the site property.

(3) The site manager or team member is not a shareholder in the project proponent entity, known responsible party, or a prospective buyer of the site property.

(4) The site manager or team member does not receive any source of income from the project proponent, known responsible party, or a prospective buyer of the site property, other than the payment of fees for professional services.

(5) The site manager or team member does not accept, or agree to accept, any payment that is in any way contingent upon the completion of a response action of the site as a private site management project.

<< CA HLTH & S § 25395.2 >>

25395.2. A private site manager may conduct investigations of potential hazardous substance release sites using preliminary endangerment assessment procedures approved by the department. If, upon completion of an investigation, a private site manager determines that because a significant release of hazardous substances has not occurred, site conditions do not require any further investigation or remedial action, the private site manager may submit a report to the department certifying that no further action is required at the site. Unless the department issues a written notice of disagreement to the private site manager within 60 days from the date of receipt of the report, the department shall be deemed to be in agreement with the report and shall designate the site as a site which requires no further action. The department may subsequently change that site designation status upon receipt and confirmation of evidence that the physical environment of the site conditions differ from the findings of a report submitted by a private site manager. The department shall not designate a site under this section as a site that requires no further action if the release of hazardous substances has caused, or threatens to cause, discharges to waters of the state.

<< CA HLTH & S § 25395.3 >>

25395.3. If, upon completion of a site investigation, a private site manager or the department determines that a significant release of a hazardous substance has occurred, or is likely to have occurred, a project proponent may submit an application to the department requesting that a response action be conducted under private site management pursuant to this article. The application for a response action shall include both of

the following:

(a) Where a site investigation was conducted by a private site manager, the private site manager shall provide the department with a report of the site findings based on the investigation. In all cases, the application shall set forth reasons why the site is appropriate for a private response action and management based on the information available at the time that the application is submitted to the department. Sites shall be deemed appropriate for private site management if all the following conditions exist:

(1) There is a substantial likelihood that no further significant environmental damage or exposure to humans will occur as the response action is implemented.

(2) The site is not adjacent to residential property, as defined in Section 1675 of the Civil Code, or a school, day care center for children, or a hospital.

(3) The site is not, or is not being used as, residential property, as defined in Section 1675 of the Civil Code, or a school, day care center for children, or a hospital.

(4) Releases of hazardous substances at the site did not result in discharges to groundwater.

(5) An enforceable agreement that specifies how response action will be conducted is not applicable to the site.

(b) The name and a statement of qualifications of any private site manager proposed for the site. The proposed private site manager shall be independent of the project proponent, all known responsible parties, and prospective buyers of the site property.

<< CA HLTH & S § 25395.4 >>

25395.4. (a) If the department approves an application for private site management, a private site management team shall be designated to perform the activities authorized by this article. The professional staff of the private site management team shall be comprised, at a minimum, of persons with qualifications and levels of experience which shall be specified by the department based upon the conditions at the site which require response action.

(b) At least one member of the proposed team shall have demonstrable experience or training in public participation, risk communication, and community involvement, except that the member shall not be required to be a registered or certified professional. Each member of the proposed team shall be independent of the project proponent, known responsible parties, and prospective buyers of the site property.

(c) If, at any time, the documented physical conditions at the site change or physical conditions previously unknown to the department are identified, the department may rescind approval of the proposed project or may require the private site management team to include additional professional staff members with expertise appropriate to the physical conditions at the site. The addition of new professional level team members proposed by the private site manager shall be approved by the department, but the department shall not unreasonably withhold that approval.

<< CA HLTH & S § 25395.5 >>

25395.5. (a) If the private site management team determines that the response action will include a removal or remedial action, the approved private site management team shall prepare a draft removal action work plan or remedial action plan. The draft removal action work plan or remedial action plan may be prepared without oversight by the department, but shall be prepared in accordance with all of the requirements of this chapter, or Chapter 6.85 (commencing with Section 25396) in the case of sites selected pursuant to Section 25396.6, and other applicable regulations and guidance documents adopted or issued by the department.

(b) The private site management team shall submit the draft removal action work plan or remedial action plan to the department for approval, and the department shall approve or reject the work plan or remedial action plan within 60 days from the date of submittal by a private site manager. If a plan is rejected, the department shall identify the principal reasons for the rejection, and shall describe the actions needed to adequately address deficiencies in the plan.

<< CA HLTH & S § 25395.6 >>

25395.6. (a) The private site management team shall, in the case of sites selected pursuant to Section 25396.6, prepare a remedial design for the implementation of the response action that is selected in the final remedial action plan that is prepared and approved in accordance with the requirements of this chapter, or Chapter 6.85 (commencing with Section 25396), and applicable regulations and guidance documents adopted or issued by the department. The remedial design may be prepared by the private site management team without oversight by the department, and shall be submitted to the department for approval.

(b) The department shall approve or reject a final remedial design within 60 days from the date of submittal by a private site management team. If a design is rejected, the department shall identify the principal reasons for the rejection, and shall describe the actions needed to adequately address deficiencies in the design.

<< CA HLTH & S § 25395.7 >>

25395.7. The private site management team shall implement the response action set forth in the approved final removal action work plan or remedial action plan and remedial design. The implementation of the response action may be conducted without oversight by the department.

<< CA HLTH & S § 25395.8 >>

25395.8. (a) Upon completion of a response action, the private site manager shall file a request for a certificate of completion from the department. The request for a certificate of completion submitted by a private site manager shall include all of the information required by the department, and, at a minimum, shall include all of the following additional information:

(1) A summary of all response action taken.

(2) All sample results for a certified laboratory confirming that the site has been fully remediated as required by the final removal action work plan or remedial action plan and in accordance with the remedial design approved by the department.

(b) In addition, the department may require submittal of any or all of the following documentation:

(1) A north-south and east-west cross section of the site geology, that is signed by a geologist, geophysicist, engineering geologist, or hydrogeologist who is registered in the State of California, and that evaluates the hydrogeologic conditions of the site.

(2) Horizontal and vertical surveys of all wells, caps, and facilities that are required by the final removal action work plan or final remedial action plan approved by the department.

(3) As-built drawings of any physical construction that is required by the removal action work plan or remedial action plan approved by the department, and that is signed by an engineer registered in the State of California.

(4) Copies of land use controls that are required by the removal action work plan or remedial action plan approved by the department, and that have been recorded by the county recorder in the county in which the site is located.

(5) A plan for the implementation of any operation and maintenance measures that are required by the final removal action work plan or remedial action plan approved by the department.

(c) The department shall review the request for a certificate of completion, and shall approve or reject a request for certificate of completion within 30 days from the date of submittal by the private site manager. If a request is rejected, the department shall identify the principal reasons for the rejection and describe the actions needed to amend the application to adequately address the deficiencies that are identified by the department.

(d) If the department approves the request for a certificate of completion, it shall prepare a certification which shall include a certificate of completion, requirements for ongoing reporting and operation and maintenance, and a description of applicable land use controls of a site. The certification shall be provided to the project proponent, all known responsible parties, owners of properties located adjacent to the site, and shall be made available to the public.

<< CA HLTH & S § 25395.9 >>

25395.9. No designated officer or employee of the California Environmental Protection Agency or its constituent boards, departments, or offices shall serve as a private site manager or member of a private site management team for the first 12 months following the termination of the officer's or employee's appointment or employment with the agency, constituent board, department, or office.

<< CA HLTH & S § 25395.10 >>

25395.10. (a) The private site manager and each member of a private site management team shall sign and certify all work performed by, and or directed by, that person.

(b) The private site manager and each member of the professional staff of the private site management team shall have appropriate insurance as required by the department.

<< CA HLTH & S § 25395.11 >>

25395.11. Except as otherwise specified in this article, all the requirements of this chapter, or Chapter 6.85 (commencing with Section 25396) in the case of sites selected pursuant to Section 25396.6, and any other applicable regulation and guidance document or manual adopted or issued by the department, shall apply to sites approved for private site management. The requirements of Division 13 (commencing with Section 21000) of the Public Resources Code shall apply to response actions conducted pursuant to this article in the same manner, and to the same extent, that the requirements apply to response actions otherwise conducted pursuant to this chapter or Chapter 6.85 (commencing with Section 25396). If, at any time, the department finds that a private site manager or a private site management team is not in compliance with the requirements of this chapter or Chapter 6.85 (commencing with Section 25396), the department may, pursuant to this article, withdraw its approval for the conduct of a response action on the site.

<< CA HLTH & S § 25395.12 >>

25395.12. (a) The department shall conduct audits of a minimum of 25 percent of the sites where a private site manager or private site management team has conducted a site investigation or response action without oversight by the department, except with respect to cases where oversight is otherwise required under this article, and where the department has issued a certificate of completion.

(b) A private site manager and any member of a private site management team shall provide an authorized representative of the department with complete access, at any reasonable hour of the day, to all technical data, reports, records, environmental samples, photographs, maps, and files that are materially related to a response action conducted pursuant to this article.

(c) In any case where the department's audit finds that the performance of a private site manager or a member of a private site management team fails to meet the minimum standards of performance adopted pursuant to Section 25395.15, the department shall send the results of the audit to the Office of Environmental Health Hazard Assessment.

<< CA HLTH & S § 25395.13 >>

25395.13. (a) Any private site manager or member of a private site management team who commits any of the following acts shall be punished, upon conviction, by a fine of not less than two thousand dollars (\$2,000) or by imprisonment in the county jail for not more than one year, or both that fine and imprisonment, if the private site manager or any member of a private site management team does any of the following:

(1) Knowingly makes any materially false or inaccurate statement in any application, record, report, certification, plan, design, or statement that the private site manager or the private site management team submits to the department.

(2) Knowingly makes any materially false or inaccurate statement in any record, report, plan, file, log, or register that the private site management team keeps, or is required to keep, pursuant to any law.

(3) Knowingly and materially falsifies, tampers with, alters, destroys, or disturbs any mechanism, recovery, or control system, or any monitoring device or method that the private site manager or the private site management team maintains, or that is required to be maintained pursuant to any law, regulation, or order for the protection of the public health and safety or the environment.

(4) Knowingly allows or orders any of the private site manager's or the private site management team's employees, agents, or contractors to do any of the actions specified in paragraphs (1) to (3), inclusive.

(b) Any private site manager or member of a site private management team who knowingly, or with reckless disregard for the risk, treats, handles, transports, disposes of, or stores any hazardous substance in a manner that causes any unreasonable risk of fire, explosion, serious injury, or death, is guilty of a public offense and shall, upon conviction, be punished by a fine of not less than five thousand dollars (\$5,000) nor more than two hundred fifty thousand dollars (\$250,000) for each day of a violation, by imprisonment in the county jail for not more than one year, by imprisonment in the state prison for 16, 24, or 36 months, or by both that fine and imprisonment.

(c) Any private site manager or member of a private site management team who knowingly, at the time the manager or member takes any of the actions specified in subdivision (b), places another person in imminent danger of death or serious bodily injury, is guilty of a public offense and shall, upon conviction, be punished by a fine of not less than five thousand dollars (\$5,000) or more than two hundred fifty thousand dollars (\$250,000) for each day of the violation.

(d) Each day that a violation of subdivision (a) occurs, or continues to occur, shall be considered a separate offense. A fine imposed pursuant to subdivision (a) shall not exceed, in the aggregate, twenty-five thousand dollars (\$25,000), and the term of imprisonment shall not exceed, in the aggregate, one year.

(e) Notwithstanding any other provision of law, all penalties collected pursuant to this section shall be transferred to the department for deposit in the trust fund for expenditure by the department, upon appropriation by the Legislature, to administer and enforce this article.

<< CA HLTH & S § 25395.14 >>

25395.14. The project proponent for a site subject to response action pursuant to this article shall fully reimburse the department for all reasonable costs incurred by the department, including those costs associated with the department's involvement in the

the department shall not have expended any funds appropriated by Item 3960-001-0001 for the purposes specified in this subdivision.

SEC. 4. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because the only costs that may be incurred by a local agency or school district will be incurred because this act creates a new crime or infraction, eliminates a crime or infraction, or changes the penalty for a crime or infraction, within the meaning of Section 17556 of the Government Code, or changes the definition of a crime within the meaning of Section 6 of Article XIII B of the California Constitution.

SEC. 5. This act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting the necessity are:

In order to continue the state's Hazardous Substance Cleanup Program thereby protecting public health and safety and the environment, it is necessary that this act take effect immediately.

§ 25358.1. Furnishing information at request of department; access to records; administrative procedures; photographs; entry for removal or remedial action; notice and split samples; immunity from liability

(a) The department, a representative of the department, or any person designated by the director may take the actions specified in this section only if there is a reasonable basis to believe that there may be a release or threatened release of a hazardous substance, and only for the purpose of determining under this chapter the need for a response action, the choosing or taking of a response action, or otherwise for the purpose of enforcing this chapter.

(b) Any officer or employee of the department, a representative of the director, or a person designated by the director may require any potentially responsible party, or any person who has, or may have, acquired information relevant to any of the following matters in the course of a commercial, ownership, or contractual relationship with any potentially responsible party, to furnish, upon reasonable notice, information or documents relating to the following matters:

(1) The identification, nature, and quantity of materials which have been, or are, generated, treated, stored, or disposed of at a hazardous substance release site or which have been, or are, transported to a hazardous substance release site.

(2) The nature or extent of a release or a threatened release of a hazardous substance at, or from, a hazardous substance release site.

(c) A person who is required to provide information pursuant to subdivision (b) shall, in accordance with subdivision (h), allow the officer, employee, representative, or designee, upon reasonable notice and at reasonable times, to have access to, and copy, all records relating to the hazardous substances for purposes of assisting the department in determining the need for an action in response to a release or threatened release pursuant to this chapter.

(d) Any officer or employee of the department, representative of the director, or person designated by the director may, in accordance with subdivision (h), enter, at reasonable times, any of the following properties:

(1) Any nonresidential establishment or other place or property where any hazardous substances may be, or have been, produced, stored, treated, disposed of, or transported from.

(2) Any nonresidential establishment or other place or property from which, or to which, a hazardous substance has been, or may have been, released.

(3) Any nonresidential establishment or other place or property where a hazardous substance release is, or may be, threatened.

(4) Any nonresidential establishment or other place or property where entry is needed to determine the need for a response action, or the appropriate remedial action, to effectuate a response action under this chapter.

(5) Any residential place or property which, if it were a nonresidential establishment or other place or property, would otherwise meet the criteria described in paragraphs (1) to (4), inclusive, if the department, representative, or person designated by the director is able to establish, based upon reasonably available evidence, that hazardous substances have been released onto or under the residential place or real property and if entry is made only at reasonable times and after reasonable notification to the owners and occupants.

(e) Any officer or employee of the department, representative of the director, or person designated by the director may, in accordance with subdivision (h), carry out any of the following activities:

(1) Inspect and obtain samples from any establishment or other place or property specified in subdivision (d) or from any location of any suspected hazardous substance.

- (2) Inspect and obtain samples of any substances from any establishment or place or property specified in subdivision (d).
- (3) Inspect and obtain samples of any containers or labeling for the suspected hazardous substances, and samples of the soil, vegetation, air, water, and biota on the premises.
- (4) Set up and maintain monitoring equipment for the purpose of assessing or measuring the actual or potential migration of hazardous substances.
- (5) Survey and determine the topographic, geologic, and hydrogeologic features of the land.
- (6) Photograph any equipment, sample, activity, or environmental condition described in paragraphs (2) to (5) inclusive.
- (f)(1) If photographs are to be taken pursuant to paragraph (6) of subdivision (e), the department shall do all of the following:
 - (A) Comply with all procedures established pursuant to subdivision (b) of Section 25358.2.
 - (B) Notify the person whose facility is photographed prior to public disclosure of the photographs.
 - (C) Upon the request of the person owning the facility, submit a copy of any photograph to the person for the purpose of determining whether trade secret information, as defined in Section 25358.2, or facility security, would be revealed by the photograph.
- (2) "Disclosure," as used in Section 25358.2, for purposes of this paragraph, does not include the review of the photograph by a court of competent jurisdiction or by an administrative law judge. A court or judge may review the photograph in camera.
- (g) An officer, employee, representative, or designee who enters a place, establishment, or property pursuant to this section shall make a reasonable effort to inform the owner or the owners' authorized representative of the inspection and shall provide split samples to the owner or the representative upon request.
- (h) If the owner or the owner's authorized representative does not voluntarily grant access to a place, establishment, or property pursuant to this section, the officer, employee, representative, or designee shall first obtain a warrant pursuant to Title 13 (commencing with Section 1822.50) of Part 3 of the Code of Civil Procedure. However, if there is an emergency posing an immediate threat to public health and safety, the officer, employee, representative, or designee may enter the place, establishment, or property without the consent of the owner or owner's authorized representative and without the issuance of a warrant.
- (i) The department, and any person authorized by the department to enter upon any lands for the purpose of taking removal or remedial action pursuant to this chapter, shall not be held liable, in either a civil or criminal proceeding, for trespass or for any other acts which are necessary to carry out the corrective action.

§ 25358.7.1. Community advisory groups

(a) At each site, a community advisory group may be established by the affected community to review any response action and comment on the response action to be conducted in that community. The department or regional board shall regularly communicate, and confer as appropriate, with the community advisory committee. The department or regional board shall also advise local environmental regulatory agencies and other appropriate local agencies of planned response actions and provide opportunities for review and comment. If the department or regional board, whichever is overseeing a response action, receives a petition signed by at least 50 members of a community affected by the response action at a site or a resolution adopted by the legislative body of the jurisdiction within which the response action has been or will be initiated, the department or regional board shall assist the petitioners or the legislative body to establish a community advisory group to review the response action at the site.

(b) To the extent possible, the composition of each community advisory group shall reflect the composition of the affected community and the diversity of interests of the community by including all of the following types of individuals on the community advisory group:

(1) Persons owning or residing on property located near the hazardous substance release site or in an adjacent community, or other persons who may be directly affected by the response action.

(2) Individuals from the local business community.

(3) Local political or government agency representatives.

(4) Local citizen, civic, environmental, or public interest group members residing in the community.

(c) The following entities may participate in community advisory group meetings in order to provide information and technical expertise:

(1) The department or regional boards.

(2) Representatives of local environmental regulatory agencies.

(3) The potentially responsible parties or other persons who are conducting the response action.

(d) The existence of a community advisory group shall not diminish any other obligation of the department or regional board with respect to public participation requirements specified in Section 25358.7. Nothing in this section shall affect the status of any citizen advisory group formed before the enactment of this section, a federal Department of Defense Restoration Advisory Board, or a federal Department of Energy Advisory Board.

CHAPTER 1183
A.B. No. 928
ENVIRONMENT--PUBLIC FACILITIES--HAZARDOUS MATERIALS

AN ACT to amend Sections 39003 and 39120 of the Education Code, to amend Section 65759 of, and to repeal and add Section 65850.2 of, the Government Code, to amend Sections 13143.9, 25534.1, 25535, 25538, 25541, 42301.6, and 42301.9 of, and to add Sections 25501.3, 25507.10, 25514.3, and 25534.2 to, the Health and Safety Code, and to amend Sections 21151.4 and 21151.8 of, and to repeal Section 21151.3 of, the Public Resources Code, relating to hazardous materials.

[Approved by Governor October 14, 1991.]

[Filed with Secretary of State October 14, 1991.]

LEGISLATIVE COUNSEL'S DIGEST

AB-928, Archie-Hudson. Hazardous materials: schools: health care facilities.

(1) Existing law generally requires all state agencies and local agencies to prepare, or to be prepared by contract, and certify the completion of, an environmental impact report on any project they intend to carry out or approve which may have a significant effect on the environment. In other cases, a negative declaration is required. Existing law prohibits the governing board of a school district from approving the acquisition of a schoolsite or the construction of a new school building, unless the lead agency, as defined, consults with specified local agencies to identify facilities which might emit hazardous air emissions, and unless the governing board of the school district makes specified written findings concerning these facilities.

Existing law also prohibits the approval of an environmental impact report or negative declaration for a school construction project or purchase of a schoolsite unless facilities within a specified distance of the proposed schoolsite are identified which might reasonably be anticipated to emit hazardous or acutely hazardous air emissions, the governing board of the school district makes specified written findings and the environmental impact report or negative declaration includes information to determine if property proposed to be purchased, or to be constructed upon, is the site of a hazardous waste disposal site or solid waste disposal site, a hazardous substance release site, or a site which contains pipelines which carry hazardous substances, acutely hazardous materials, or hazardous waste. Existing law prohibits the approval of an environmental impact report or negative declaration for any project involving the construction or alteration of a facility which might emit hazardous air emissions within 1/4 mile of a school unless the lead agency consults with the school district, as specified.

This bill would additionally provide that before the governing board approves a school construction project or the acquisition of a schoolsite, or before an environmental impact report or negative declaration is approved for a school construction project or the purchase of a schoolsite, the lead agency is also required to identify facilities which might be reasonably anticipated to handle acutely hazardous materials, substances, or waste, thereby imposing a

state-mandated local program. The bill would include an additional finding which the governing board would be authorized to make, if these facilities exist, concerning the corrective measures which these facilities are required to take. The bill would require specified local agencies which receive a request to provide information concerning these facilities to respond in 30 days, thereby imposing a state-mandated local program by imposing new duties upon local agencies.

The bill would, instead, include within the prohibition on the approval of an environmental impact report or negative declaration, a facility which would emit hazardous air emissions or handle specified materials which may pose a specified health or safety hazard.

(2) Existing law requires a business which handles acutely hazardous materials to submit a registration form to the local administering agency, as defined, and, if the administering agency determines that there is a significant likelihood that the handler's use of an acutely hazardous material may pose an acutely hazardous materials accident risk, the agency is required to require the preparation and submission of a risk management and prevention program (RMPP), in accordance with a specified timetable. Existing law requires cities and counties to include in the application for building permits a place to indicate whether the applicant is required to comply with specified requirements concerning business plans, the submission of RMPPs, and permits for construction or modification pursuant to the regulation of air pollution. A city or county is prohibited from issuing a final certificate of occupancy unless the applicant meets these requirements and from permitting a facility to be constructed within 1,000 feet of a school unless specified requirements are met.

This bill would, instead, require a city or county to include in the information list for development projects or in the application form for a building permit specified requirements concerning compliance with statutes regulating hazardous materials and air pollution, the handling of acutely hazardous materials, and the emission of hazardous air emissions. The bill would prohibit a city or county from finding an application complete or from approving a development project or a building permit for a project which requires only a building permit if the project meets specified requirements concerning hazardous materials and emissions, unless the owner or authorized agent complies with certain provisions, thereby imposing a state-mandated local program. The bill would require the owner or operator of such a project to substantially meet the requirements for submitting an RMPP, pursuant to a specified procedure, if the administering agency makes a specified determination. Cities and counties would be authorized to adopt a schedule of fees to cover the cost of carrying out these provisions. The bill would impose specified duties upon administering agencies and air pollution control officers, thereby imposing a state-mandated local program.

(3) Existing law requires the State Fire Marshal to prepare, adopt, and submit for approval to the State Building Standards Commission, building standards establishing minimum standards for fire prevention, as specified, and minimum requirements for the storage and handling in commercial buildings of acutely hazardous materials, as defined.

This bill would revise the provisions relative to acutely hazardous materials to instead require the preparation, adoption, and submission of building standards and other fire and life safety regulations establishing minimum requirements for the storage, handling, and use of hazardous materials, as defined in the Uniform Fire Code, as specified.

(4) Existing law requires handlers or other specified persons to report hazardous material releases to an administering agency, which is defined as a department, office, or agency of a city or county.

This bill would require emergency rescue personnel to advise the superintendent of a school district of a specified release, or threatened release, within 1/2 mile of a school, thereby imposing a state-mandated local program. This bill would define the term "handle" for purposes of the provisions regulating hazardous materials to include connecting a marine vessel, tank

vehicle, tank car, or containers to a specified system or process.

(5) Existing law prescribes civil penalties for violations of specified provisions requiring any business, as defined, to establish and implement a business plan for emergency response to a release or threatened release of a hazardous material, in accordance with prescribed requirements.

This bill would make a knowing violation of those provisions, after reasonable notice, a misdemeanor. The bill would thereby impose a state-mandated local program by creating a new crime.

(6) Existing law requires an RMPP to give consideration to the proximity of the facility to schools and requires a handler to submit a corrected RMPP within 60 days after receiving a specified notice from the administering agency. Existing law requires the administering agency to follow specified procedures with regard to the protection of trade secrets.

The bill would define school for purposes of the RMPP procedures and would authorize the administering agency to grant a one-time extension of the deadline to submit a corrected RMPP. The bill would require the administering agency to review any claim for a trade secret protection and to segregate properly substantiated trade secret information from the information to be made public. The bill would impose new duties upon administering agencies, thereby imposing a state-mandated local program.

(7) Existing law requires an air pollution control officer, prior to approving a permit for a source that may emit air contaminants which is located within 1,000 feet of a school, to prepare and distribute a public notice, as specified.

This bill would, instead, require that notice to be given prior to approving an application for a source which emits hazardous air emissions which is located within 1,000 feet of a school, as defined, and would require the notice to be distributed to additional persons, thereby imposing a state-mandated local program. The bill would authorize the preparation of the notice under prescribed circumstances. The bill would make the notice requirements inapplicable if the air pollution control officer makes specified determinations.

The bill would require the school district to make the information necessary to mail notices required by these provisions available to the air pollution control officer and would allow the notices to be distributed to the children to be given to their parents.

The bill would require applicants for a permit to certify whether the project is located within 1,000 feet of a school, and would authorize denial of the permit upon misrepresentation of that fact.

(8) The bill would provide that the changes proposed by this bill concerning development projects and permits, RMPPs, permits issued by air pollution control districts and air quality management districts, and environmental impact reports for facilities near schools do not apply to projects for which an application is submitted before January 1, 1992.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that no reimbursement is required by this act for certain costs for specified reasons. However, this bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs

shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed \$1,000,000, shall be made from the State Mandates Claims Fund.

The people of the State of California do enact as follows:

SECTION 1. Section 39003 of the Education Code is amended to read:

<< CA EDUC § 39003 >>

39003. The governing board of a school district shall not approve a project involving the acquisition of a school site by a school district unless all of the following occur:

(a) The lead agency, as defined in Section 21067 of the Public Resources Code, determines that the property purchased or to be built upon is not any of the following:

(1) The site of a current or former hazardous waste disposal site or solid waste disposal site unless, if the site was a former solid waste disposal site, the governing board of the school district concludes that the wastes have been removed.

(2) A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(3) A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

(b) The lead agency <<+, as defined in Section 21067 of the Public Resources Code,+>> preparing the environmental impact report or negative declaration has consulted with the <<-* * *->> <<+administering agency+>> in which the proposed school site is located <<-* * *->> and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed school site which might reasonably be anticipated to emit hazardous air emissions <<+, or to handle hazardous or acutely hazardous materials, substances, or waste. The lead agency shall include a list of the locations for which information is sought+>>.

(c) The governing board of the school district makes <<+one+>> of the following written findings:

(1) Consultation identified none of the facilities specified in subdivision (b).

(2) The facilities specified in subdivision (b) exist, but <<-* * *->> <<+one of the following conditions applies:+>>

<<+(A) T+>> the health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the school.

<<+(B) The governing board finds that corrective measures required under an existing order by another jurisdiction which has jurisdiction over the facilities will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes this finding, the governing board shall also make a subsequent finding, prior to the occupancy of the school, that the emissions have been mitigated to these levels.+>>

(d) As used in this section:

(1) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution <<+control+>> officer, hazardous air emissions <<-* * *->> also <<+means+>> emissions into the ambient air from any substance identified in <<+subdivisions (a) to (f), inclusive, of+>> Section 44321 of the Health and Safety Code.

(2) "Hazardous substance" <<-* * *->> <<+means any substance+>> defined in Section 25316 of the Health and Safety Code.

(3) "Acutely hazardous material" <<-* * *->> <<+means any material+>> defined <<-* * *->>

>> <<+pursuant to+>> subdivision (a) of Section 25532 of the Health and Safety Code.
(4) "Hazardous waste" <<-* * *->> <<+means any waste+>> defined in Section 25117 of the Health and Safety Code.
(5) "Hazardous waste disposal site" <<-* * *->> <<+means any site+>> defined in Section 25114 of the Health and Safety Code.
<<+(6) "Administering agency" means any agency designated pursuant to Section 25502 of the Health and Safety Code.+>>
<<+(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.+>>
SEC. 2. Section 39120 of the Education Code is amended to read:

<< CA EDUC § 39120 >>

39120. <<+(a)+>> The governing board of a school district shall not approve a project for the construction of a new school building, as defined in Section 39141, unless the project and its lead agency <<+comply+>> with the same requirements specified in <<+subdivision (a) of+>> Section 39003 for schoolsite acquisition.
<<+(b) For purposes of this section, the acceptance of construction bids shall constitute approval of the project.+>>
SEC. 3. Section 65759 of the Government Code is amended to read:

<< CA GOVT § 65759 >>

65759. In any action brought under this section:
<<+(a)+>> The <<-* * *->> California Environmental Quality Act, Division 13 (commencing with Section 21000) of the Public Resources Code, <<+ does+>> not apply to any action necessary to bring its general plan or relevant mandatory elements <<-* * *->> <<+of the plan+>> into compliance with any court order or judgment under this <<+article+>>.
<<+(1)+>> The local agency shall, however, prepare an initial study, within the time limitations specified in Section 65754, to determine the environmental effects of the proposed action necessary to comply with the court order. The initial study shall contain substantially the same information as is required for an initial study pursuant to subdivision (c) of Section 15080 of Title 14 of the California <<-* * *->> Code <<+of Regulations+>>.
<<+(2)+>> If as a result of the initial study, the local agency determines that the action may have a significant effect on the environment, the local agency shall prepare, within the time limitations specified in Section 65754, an environmental assessment, the content of which substantially conforms to the required content for a draft environmental impact report set forth in Article 9 (commencing with Section 15140) of Title 14 of the California <<-* * *->> Code <<+of Regulations+>>. The local agency shall include notice of the preparation of the environmental assessment in all notices provided for the amendments to the general plan proposed to comply with the court order.
<<+(3)+>> The environmental assessment shall be deemed to be a part of the general plan and shall only be reviewable as provided in this article.
<<+(4)+>> The local agency may comply with the provisions of the California Environmental Quality Act, Division 13 (commencing with Section 21000) of the Public Resources Code, in any action necessary to bring its general plan or <<+the plan's+>> relevant mandatory elements <<-* * *->> into compliance with any court order or judgment under this section so long as it does so within the time limitations specified in Section 65754.
<<+(b)+>> The court for good cause shown may grant not more than two extensions of time, not to exceed a total of 240 days, in order to meet the requirements imposed by Section 65754.

<< Repealed: CA GOVT § 65850.2 >>

SEC. 4. Section 65850.2 of the Government Code is repealed:
SEC. 5. Section 65850.2 is added to the Government Code, to read:

65850.2. (a) Each city and each county shall include in its information list compiled pursuant to Section 65940 for development projects, or application form for projects which do not require a development permit other than a building permit, both of the following:

(1) The requirement that the owner or authorized agent shall indicate whether the owner or authorized agent will need to comply with the applicable requirements of Sections 25505, 25533, and 25534 of the Health and Safety Code and the requirements for a permit for construction or modification from the air pollution control district or air quality management district exercising jurisdiction in the area governed by the city or county.

(2) The requirement that the owner or authorized agent shall certify whether or not the proposed project will handle, as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code, an acutely hazardous material or a mixture containing an acutely hazardous material, in a quantity equal to or greater than the quantity specified in subdivision (a) of Section 25536 of the Health and Safety Code, or will contain a source or modified source with hazardous air emissions.

(b) No city or county shall find the application complete pursuant to Section 65943 nor approve a development project, or a building permit for a project which does not require a development permit other than a building permit, in which acutely hazardous material or mixtures containing acutely hazardous material will be handled in a quantity equal to or greater than that specified in Section 25536 of the Health and Safety Code, unless the owner or authorized agent for the project first obtains from the administering agency, a notice of requirement to comply with, or determination of exemption from, the requirement to prepare and submit a risk management and prevention program. Within five days of submitting the project application to the city or county, the applicant shall submit the information required pursuant to paragraph (2) of subdivision (a) to the administering agency. This notice of requirement to comply with, or determination of exemption from, the requirement for an RMPP shall be provided by the administering agency to the applicant, and the applicant shall provide the notice to the city or county, within 25 days of the administering agency receiving adequate information from the applicant to make a determination as to the requirement for an RMPP. The notice of requirement to comply shall indicate if any of the acutely hazardous material to be handled at the site would create an acutely hazardous materials accident risk to any of the populations specified pursuant to Section 25534.1 of the Health and Safety Code. If the notice indicates an acutely hazardous materials accident risk may be present for any of the specified populations, no permit shall be issued until the administering agency has verified to the city or county within 90 days of the determination as to the requirement for an RMPP that the requirement for a risk management and prevention program is being substantially met. If within 90 days the administering agency has not verified that the requirement for the RMPP is being substantially met, then this section shall be deemed satisfied. If the notice of requirement to comply does not indicate that an acutely hazardous materials accident risk exists for the populations considered but does not exempt the requirement for an RMPP, a permit may be issued when all other permit conditions have been met. The requirement to submit an RMPP to the administering agency, shall be met prior to the issuance of a certificate of occupancy or its substantial equivalent. The owner or authorized agent shall submit to the city or county certification from the air pollution control officer that the owner or authorized agent is in compliance with the disclosures required by Section 42303 of the Health and Safety Code.

(c) No city or county shall issue a final certificate of occupancy or its substantial equivalent unless there is verification from the administering agency, if required by law, that the owner or authorized agent has met, or is meeting, the applicable requirements of Sections 25505, 25533, and 25534 of the Health and Safety Code, and the requirements for a permit, if required by law, from the air pollution control district or air quality management district exercising jurisdiction in the area governed by the city or county or has provided proof from the appropriate district that the permit requirements do not apply to the owner or authorized agent.

(d) The city or county, after considering the recommendations of the administering agency or air pollution control district or air quality management district, shall decide whether, and under what conditions, to allow construction of the site.

(e) Nothing in this section limits any existing authority of a district to require compliance with its rules and regulations.

(f) Counties and cities may adopt a schedule of fees for applications for compliance with this section sufficient to recover their reasonable costs of carrying out this section. Those fees shall be used only for the implementation of this section.

(g) As used in this section:

(1) "Acutely hazardous material" means any material as defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(2) "Administering agency" means an agency designated pursuant to Section 25502 of the Health and Safety Code.

(3) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air of any substance identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(h) Any misrepresentation of information required by this section shall be grounds for denial, suspension, or revocation of project approval or permit issuance. The owner or authorized agent required to comply with this section shall notify all future occupants of their potential duty to comply with the requirements of Sections 25505, 25533, 25534 of the Health and Safety Code.

(i) This section shall not apply to applications solely for residential construction.

SEC. 6. Section 13143.9 of the Health and Safety Code is amended to read:

<< CA HLTH & S § 13143.9 >>

13143.9. The State Fire Marshal shall, in carrying out Section 13143, prepare, adopt, and submit building standards <<+and other fire and life safety regulations+>> for approval pursuant to Chapter 4 (commencing with Section 18935) of Part 2.5 of Division 13 establishing minimum requirements for the storage<<+,+>> handling <<-* * *->><<+, and use+>> of <<-* * *->> hazardous materials, as defined<<+,+>> in <<-* * *->> <<+Article 9 of the 1988 Uniform Fire Code, and any subsequent editions, published by the Western Fire Chiefs Association and the International Conference of Building Officials+>>. The State Fire Marshal shall seek the advice of the Office of Emergency Services in establishing these requirements. This section does not prohibit a city, county, or district from adopting an ordinance, resolution, or regulation imposing stricter or more stringent requirements than a standard adopted pursuant to this section.

SEC. 7. Section 25501.3 is added to the Health and Safety Code, to read:

<< CA HLTH & S § 25501.3 >>

25501.3. "Handle" also means the use or potential for use of a quantity of hazardous material by the connection of any marine vessel, tank vehicle, tank car, or container to a system or process for any purpose other than the immediate transfer to or from an approved atmospheric tank or approved portable tank.

SEC. 8. Section 25507.10 is added to the Health and Safety Code, to read:

<< CA HLTH & S § 25507.10 >>

25507.10. The emergency rescue personnel, responding to the reported release or threatened release of an acutely hazardous material or to any fire or explosion involving a material that involves a release that would be required to be reported pursuant to Section 25507, shall immediately advise the superintendent of the school district having jurisdiction, where the location of the release or threatened release is within one-half mile of a school.

SEC. 9. Section 25514.3 is added to the Health and Safety Code, to read:

<< CA HLTH & S § 25514.3 >>

25514.3. Any person that knowingly violates Section 25503.5, 25503.7, 25503.8, 25505, 25508, 25509, 25509.3, 25510, or 25533 after reasonable notice of the violation, is, upon conviction, guilty of a misdemeanor. This section does not preempt any other applicable criminal or civil penalties.

SEC. 10. Section 25534.1 of the Health and Safety Code is amended to read:

<< CA HLTH & S § 25534.1 >>

25534.1. Every RMPP prepared pursuant to Section 25534<<+, and every notice of requirement to comply prepared pursuant to subdivision (b) of Section 65850.2 of the Government Code,+>> shall give consideration to the proximity of the facility <<+or proposed facility+>> to <<+populations located in+>> schools, residential areas, general acute care hospitals, long-term health care facilities, and child day care facilities. For purposes of this section, "general acute care hospital" has the meaning provided by subdivision (a) of Section 1250, "long-term health care facility" has the meaning provided by subdivision (a) of Section 1418, and "child day care facility" has the meaning provided by Section 1596.750. <<+"School" means any school used for the purpose of the education of more than 12 children in kindergarten or any grades 1 to 12, inclusive.+>>

SEC. 10.5. Section 25534.2 is added to the Health and Safety Code, to read:

<< CA HLTH & S § 25534.2 >>

25534.2. An owner or operator of any new or modified facility which will be used for the handling of acutely hazardous materials in amounts equal to or greater than those specified in subdivision (a) of Section 25536, shall obtain from the administering agency, a notice of requirement to comply with, or determination of exemption from, the requirement for an RMPP prior to the approval of a development project or issuance of a building permit pursuant to Section 65850.2 of the Government Code.

SEC. 11. Section 25535 of the Health and Safety Code is amended to read:

<< CA HLTH & S § 25535 >>

25535. (a) An owner or operator of a facility submitting an RMPP pursuant to Section 25534 shall submit the RMPP to the administering agency after the RMPP is certified as complete by a qualified person and the facility operator. The administering agency may authorize the air pollution control district or air quality management district in which the facility is located to conduct a technical review of the RMPP. If, after review by the administering agency or the air pollution control district or air quality management district exercising jurisdiction in the area of the facility, the administering agency determines that the handler's RMPP is deficient in any way, the administering agency shall notify the handler of these defects. The handler shall submit a corrected RMPP within 60 days of the <<-* * *->> <<+notification of defects, unless granted a one-time extension of no more than 30 days, of the notice to correct the RMPP by the administering agency. Failure to fully comply with this notice or the requirements of this section shall be deemed a violation of this article for purposes of Section 25540+>>.

(b) Upon implementation of a risk management and prevention program pursuant to subdivision (k) of Section 25534, the handler shall notify the administering agency that the RMPP has been implemented and shall summarize the steps taken in preparation and implementation of the RMPP.

(c) The handler shall continue to carry out the program and activities specified in the risk management and prevention program at the business after the administering agency has been notified pursuant to subdivision (b).

(d) The owner or operator shall implement all programs and activities in the RMPP before operations commence, in the case of a new facility, or before any new activities involving acutely

hazardous materials are taken, in the case of a modified facility.
SEC. 12. Section 25538 of the Health and Safety Code is amended to read:

<< CA HLTH & S § 25538 >>

25538. (a) If a business believes that any information required to be reported by this article, involves the release of a trade secret, the business shall provide the information to the administering agency and shall notify the administering agency in writing of that belief.

<<+Upon receipt of a claim of trade secret related to a RMPP, the administering agency shall review the claim and shall segregate properly substantiated trade secret information from information which shall be made available to the public upon request in accordance with the California Public Records Act (Chapter 3.5 (commencing with Section 6250) of Division 7 of Title 1 of the Government Code).+>> As used in this section, "trade secret" has the same meaning as found in subdivision (d) of Section 6254.7 of the Government Code and Section 1060 of the Evidence Code.

(b) Except as otherwise specified in this section, the administering agency shall not disclose any <<+properly substantiated+>> trade secret which is so designated by the owner or operator of a business.

(c) The administering agency may disclose trade secrets received by the administering agency pursuant to this article to authorized officers or employees of other governmental agencies only in connection with the official duties of that officer or employee pursuant to any law for the protection of health and safety.

(d) Any officer or employee or former officer or employee of the administering agency or any other government agency who, because of that employment or official position, has possession of, or has access to, information designated as a trade secret pursuant to this section, shall not knowingly and willfully disclose the information in any manner to any person not authorized to receive the information pursuant to this section. Notwithstanding Section 25515, any person who violates this subdivision, and who knows that disclosure of this information to the general public is prohibited by the section, shall, upon conviction, be punished by imprisonment in the county jail for not more than six months or by a fine of not more than one thousand dollars (\$1,000), or by both fine and imprisonment.

(e) Any information prohibited from disclosure pursuant to any federal statute or regulation shall not be disclosed.

(f) This section does not authorize any business to refuse to disclose to the administering agency any information required pursuant to this chapter.

SEC. 13. Section 25541 of the Health and Safety Code is amended to read:

<< CA HLTH & S § 25541 >>

25541. Any person or business who knowingly makes any false statement or representation in any record, report, or other document filed, maintained, or used for the purpose of compliance with this article, or destroys, alters, or conceals any such record, report, or other document filed, maintained, or used for the purpose of compliance with this article, shall, upon conviction, be punished by a fine of not more than twenty-five thousand dollars (\$25,000) for each day of violation, or by imprisonment in the county jail for not more than one year, or by both the fine and the imprisonment.

If the conviction is for a violation committed after a first conviction under this section, the person shall be punished by a fine of not less than two thousand dollars (\$2,000) or more than fifty thousand dollars (\$50,000) per day of violation, or by imprisonment in the state prison for <<-* * *->> <<+ one, two, or three years+>> or in the county jail for not more than one year, or both the fine and imprisonment.

Furthermore, if the violation results in, or significantly contributes to, an emergency, including a fire, to which the county or city is required to respond, the person shall also be assessed the full cost of the county or city emergency response, as well as the cost of cleaning up and disposing of the acutely hazardous materials.

SEC. 14. Section 42301.6 of the Health and Safety Code is amended to read:

<< CA HLTH & S § 42301.6 >>

42301.6. (a) Prior to approving an application for a permit to construct or modify a source <<-* * *->> <<+which emits hazardous+>> air <<-* * *->> <<+emissions, which source is+>> located within 1,000 feet from the outer boundary of a <<+schoolsite+>>, the air pollution control officer shall prepare a public notice in which the proposed project or modification for which the application for a permit is made is fully described. <<+The notice may be prepared whether or not the material is or would be subject to subdivision (a) of Section 25536, if the air pollution control officer determines and the administering agency concurs that hazardous air emissions of the material may result from an air release, as defined by Section 44303. The notice may be combined with any other notice on the project or permit which is required by law.+>>

(b) The air pollution control officer shall, at the permit applicant's expense, distribute <<+or mail+>> the public notice to the parents <<+or guardians+>> of children <<+enrolled+>> in any school <<+that is located+>> within one-quarter mile of the source and to each address within a radius of <<+1,000+>> feet <<-* * *->> of the proposed new or modified source at least 30 days prior to the date final action on the application is to be taken by the officer. The officer shall review and consider all comments received during the 30 days after the notice is distributed, and shall include written responses to the comments in the permit application file prior to taking final action on the application.

<<+(1) Notwithstanding Section 49073 of the Education Code, or any other provision of law, the information necessary to mail notices required by this section shall be made available by the school district to the air pollution control officer.+>>

<<+(2) Nothing in this subdivision precludes, at the discretion of the air pollution control officer and with permission of the school, the distribution of the notices to the children to be given to their parents or guardians.+>>

(c) Notwithstanding subdivision (b), an air pollution control officer may require the applicant to distribute the notice if the district had such a rule in effect prior to January 1, 1989.

(d) The requirements for public notice pursuant to subdivision (b) or a district rule in effect prior to January 1, 1989, are fulfilled if the air pollution control officer or applicant responsible for giving the notice makes a good faith effort to follow the procedures prescribed by law for giving the notice, and, in <<+these+>> circumstances, failure of any person to receive the notice shall not affect the validity of any permit subsequently issued by the officer.

(e) Nothing in this section shall be deemed to limit any existing authority of any district.

<<+(f) An applicant for a permit shall certify whether the proposed source or modification is located within 1,000 feet of a schoolsite. Misrepresentation of this fact may result in the denial of a permit.+>>

<<+(g) The notice requirements of this section shall not apply if the air pollution control officer determines that the application to construct or modify a source will result in a reduction or equivalent amount of air contaminants, as defined in Section 39013, or which are hazardous air emissions.+>>

<<+(h) As used in this section:+>>

<<+(1) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the state board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.+>>

<<+(2) "Acutely hazardous material" means any material defined pursuant to subdivision (a) of Section 25532.+>>

SEC. 15. Section 42301.9 of the Health and Safety Code is amended to read:

<< CA HLTH & S § 42301.9 >>

42301.9. For the purposes of Sections <<+42301.4+>> to 42301.8, inclusive:

(a) "School" means any <<+public or private+>> school used for purposes of the education of

<<+more than 12+>> children in kindergarten or any of grades 1 to 12, inclusive<<+, but does not include any private school in which education is primarily conducted in private homes+>>.

(b) "Air contaminant" <<-* * *->> <<+means any contaminant defined pursuant to+>> Section 39013.

(c) "Administering agency" means an <<-* * *->> agency <<-* * *->> <<+designated pursuant to+>> Section <<+ 25502+>>.

<<+(d) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.+>>

<< Repealed: CA PUB RES § 21151.3 >>

SEC. 16. Section 21151.3 of the Public Resources Code is repealed.

SEC. 17. Section 21151.4 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.4 >>

21151.4. No environmental impact report or negative declaration shall be approved for any project involving the construction or alteration of a facility within <<+ 1/4+>> of a mile of a school which might reasonably be anticipated to emit hazardous or acutely hazardous air <<-* * *->> <<+ emission, or which would handle acutely hazardous material or a mixture containing acutely hazardous material in a quantity equal to or greater than the quantity specified in subdivision (a) of+>> Section <<-* * *->> <<+ 25536 of the Health and Safety Code, which may pose a health or safety hazard to persons who would attend or would be employed at the school,+>> unless both of the following occur:

(a) The lead agency preparing the environmental impact report or negative declaration has consulted with the school district having jurisdiction regarding the potential impact of the project on the school.

(b) The school district has been given written notification of the project not less than 30 days prior to the proposed approval of the environmental impact report or negative declaration.

SEC. 18. Section 21151.8 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.8 >>

21151.8. (a) No environmental impact report or negative declaration shall be approved for any project involving the purchase of a school site or the construction of a new elementary or secondary school by a school district unless <<-* * *->> <<+all of the following occur:+>> <<+(1) T+>>he environmental impact report or negative declaration includes information which is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

<<+(A)+>> The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

<<+(B)+>> A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

<<+(C)+>> A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

<<+(2) The lead agency preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed school site is located, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed school site which might reasonably be anticipated to emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste. The notification by the lead agency shall

include a list of the locations for which information is sought.+>>

<<+(3) The governing board of the school district makes one of the following written findings:+>>

<<+(A) Consultation identified no such facilities specified in paragraph (2).+>>

<<+(B) The facilities specified in paragraph (2) exist, but one of the following conditions applies:+>>

<<+(i) The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.+>>

<<+(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes such a finding, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.+>>

<<+(4) Each administering agency, air pollution control district, or air quality management district receiving written notification from a lead agency to identify facilities pursuant to paragraph (2) shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. The environmental impact report or negative declaration shall be conclusively presumed to comply with this section as to the area of responsibility of any agency which does not respond within 30 days.+>>

<<+(b) If a lead agency has carried out the consultation required by paragraph (2) of subdivision (a), the environmental impact report or the negative declaration shall be conclusively presumed to comply with this section, notwithstanding any failure of the consultation to identify an existing facility specified in paragraph (2) of subdivision (a).+>>

<<+(c)+>> As used in this section <<+and Section 21151.4, the following definitions shall apply+>>:

(1) "Hazardous substance" <<-* * *->> <<+means any substance+>> defined in Section 25316 of the Health and Safety Code.

(2) "Acutely hazardous material" <<-* * *->> <<+means any material+>> defined <<-* * *->> <<+pursuant to+>> subdivision (a) of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" <<-* * *->> <<+means any waste+>> defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" <<-* * *->> <<+means any site+>> defined in Section 25114 of the Health and Safety Code.

<<+(5) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.+>>

<<+(6) "Administering agency" means an agency designated pursuant to Section 25502 of the Health and Safety Code.+>>

<<+(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.+>>

<< Note: CA GOVT §§ 65759, 65850.2 >>

<< Note: CA HLTH & S §§ 25534.1, 25534.2, 25535, 42301.6, 42301.9 >>

<< Note: CA PUB RES § 21151.4 >>

SEC. 19. Sections 3, 5, 10, 10.5, 11, 14, 15, and 17 of this act shall not apply to projects for which an application is submitted pursuant to Section 65943 of the Government Code prior to January 1, 1992.

SEC. 20. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution for those costs which may be incurred by a local agency or school district because this act creates a new crime or infraction, changes the definition of a crime or infraction, changes the penalty for a crime or infraction, or eliminates a crime or infraction.

Moreover, no reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution for other costs because the local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for those other costs. However, notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars (\$1,000,000), reimbursement shall be made from the State Mandates Claims Fund. Notwithstanding Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

SEC. 21. If any provision of this act or its application to any person or circumstances is held invalid, that invalidity shall not affect other provisions or applications of the act which can be given effect without the invalid provision or application, and to this end the provisions of this act are severable.

END OF DOCUMENT

West's Ann.Cal.Educ.Code § 39003

WEST'S ANNOTATED CALIFORNIA CODES
COPR. (c) WEST 1991 No Claim to Orig. Govt. Works
EDUCATION CODE
TITLE 2. ELEMENTARY AND SECONDARY ADMINISTRATION
DIVISION 3. LOCAL ADMINISTRATION
PART 23. SCHOOL FACILITIES
CHAPTER 1. SCHOOL SITES
ARTICLE 1. GENERAL PROVISIONS

§ 39003. Approval of site acquisition; hazardous or solid waste disposal sites or hazardous substance release sites; hazardous air emissions; findings

The governing board of a school district shall not approve a project involving the acquisition of a schoolsite by a school district unless all of the following occur:

(a) The lead agency, as defined in Section 21067 of the Public Resources Code, determines that the property purchased or to be built upon is not any of the following:

(1) The site of a current or former hazardous waste disposal site or solid waste disposal site unless, if the site was a former solid waste disposal site, the governing board of the school district concludes that the wastes have been removed.

(2) A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(3) A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

(b) The lead agency preparing the environmental impact report or negative declaration has consulted with the city in which the proposed schoolsite is located, or with the county in which the proposed schoolsite is located if the proposed site is in an unincorporated area, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed schoolsite which might reasonably be anticipated to emit hazardous air emissions.

(c) The governing board of the school district makes either of the following written findings:

(1) Consultation identified none of the facilities specified in subdivision (b).

(2) The facilities specified in subdivision (b) exist, but the health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the school.

(d) As used in this section:

(1) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution officer, hazardous air emissions may also mean emissions into the ambient air from any substance identified in Section 44321 of the Health and Safety Code.

(2) "Hazardous substance" has the same meaning as defined in Section 25316 of the Health and Safety Code.

(3) "Acutely hazardous material" has the same meaning as defined in subdivision (a) of Section 25532 of the Health and Safety Code.

(4) "Hazardous waste" has the same meaning as defined in Section 25117 of the Health and Safety Code.

(5) "Hazardous waste disposal site" has the same meaning as defined in Section 25114 of the Health and Safety Code.

§ 39003. Financing of reconstruction of particular school

The reconstruction of any school on all or a portion of a site which has been used for public school purposes uninterruptedly since prior to 1890 may be financed through the State School Building Aid and Earthquake Reconstruction and Replacement Bond Law of 1972 (Chapter 19 (commencing with Section 17400) of Part 10 of Division 1 of Title 1), if the legal title to such site or a portion thereof is held either by: (a) a city school district, or (b) a charter city, and a city school district has obtained or is in the process of obtaining a lease of not less than 50 years on such site or portion thereof from the charter city.

HISTORICAL AND STATUTORY NOTES

2009 Main Volume

Sections 15 to 18 of Stats.1996, c. 277 (S.B.1562), provide:

"Sec. 15. To the extent that the provisions of this act are substantially the same as existing statutory provisions relating to the same subject matter, the provisions shall be construed as restatements and continuations of existing statutory provisions and not as a new enactment.

"Sec. 16. The Legislature finds and declares that the enactment of this act, in view of the nonsubstantive statutory changes made, will not result in new or additional costs to local agencies charged with any duties or responsibilities in connection therewith.

"Sec. 17. Any section of any act enacted by the Legislature during the 1996 calendar year prior to the enactment of this act, that amends, amends and renumbers, adds, repeals and adds, or repeals a section, article, chapter, or part, that is amended, amended and renumbered, added, repealed and added, or repealed by this act, shall prevail over this act until January 1, 1998, at which time Sections 1 to 16 of this act shall become operative [Section affected by two or more acts at the same session of the legislature, see government Code § 9605.].

"Sec. 18. The provisions of this act are severable. If any provisions of this act or its application is held invalid, that invalidity shall not affect other provisions or applications that can be given effect without the invalid provision or application."

Section 39001, added by Stats.1991, c. 846 (A.B.1603), § 12, related to public hearing for evaluation prior to acquisition in accordance with site selection standards. See Education Code § 17211.

Application of Stats.1991, c. 846 (A.B.1331) to validity or enforceability of action by state allocation board under Public Contract Code § 10115 et seq., see Historical and Statutory Notes under Education Code § 17706.

Former Notes

Former § 39001, enacted by Stats.1976, c. 1010, § 2, derived from Education Code 1959, § 15002 (Stats.1959, c. 2, § 15002); Education Code 1943, § 18401 (Stats.1943, c. 71, p. 670); School Code § 6.100, added by Stats.1939, c. 217, § 3, relating to purchase of improvement of school lands, was repealed by Stats.1987, c. 1452, § 268.

Section 39002, enacted by Stats.1976, c. 1010, § 2, operative April 30, 1977, amended by Stats.1977, c. 36, § 141, eff. April 29, 1977, operative April 30, 1977; Stats.1984, c. 1009, § 1 was amended by Stats.1994, c. 840 (A.B.3562), § 10, prior to repeal, investigation of prospective schoolsite. See Education Code § 17212.

Section 43 of Stats.1984, c. 1009, provides, in part:

“It is the intent of the Legislature in enacting this act to consolidate and simplify statutes relating to local planning. It is not the intent of the Legislature to mandate new programs or higher levels of service on cities and counties.

“The responsibilities imposed by Sections 1, 1.1, 1.2, 1.3, 1.6, 2, 3, 3.5, 4, 5, 5.4, 9, 13.5, 14, 15, 18, 20.5, 21, 22, 23, 24, 25, 26, 26.5, 28, 30, 33, 34, 35, 36, 37, 38, 39, 40, 41, and 42 of this act are no greater than the responsibilities currently imposed on cities and counties by the statutes which are repealed or amended by Sections 1, 1.1, 1.2, 1.3, 3, 4, 5, 5.2, 5.4, 5.7, 6, 7, 7.5, 8, 10, 11, 12, 13, 14, 15, 16, 17, 19, 20, 20.5, 21, 21.5, 22, 23, 24, 25, 26, 26.5, 27, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, and 42 of this act.”

Section 39002.5, added by Stats.1977, c. 36, § 442, eff. April 29, 1977, operative April 30, 1977, amended by Stats.1977, c. 242, § 12, eff. July 7, 1977; Stats.1978, c. 362, p. 1064, § 1, related to geological and soils engineering studies. See Education Code § 17212.5.

Section 39003, added by Stats.1990, c. 1602 (S.B.2262), § 1, amended by Stats.1991, c. 1183 (A.B.928), § 1, related approval of site acquisition. See Education Code § 17213

Section 21 of Stats.1991, c. 1183 (A.B.928) provides:

“If any provision of this act or its application to any person or circumstances is held invalid, that invalidity shall not affect other provisions or applications of the act which can be given effect without the invalid provision or application, and to this end the provisions of this act are severable.”

CHAPTER 689
 S.B. No. 945

ENVIRONMENTAL PROTECTION--HAZARDOUS SUBSTANCES AND WASTE--SCHOOLS AND SCHOOL
 DISTRICTS

AN ACT to amend Sections 21083, 21086, and 21151.4 of, and to repeal Section
 21087 of, the Public Resources Code, relating to environmental quality.

[Filed with Secretary of State September 22, 2004.]

LEGISLATIVE COUNSEL'S DIGEST

SB 945, Sher. Environmental quality: guidelines.

(1) The existing California Environmental Quality Act (CEQA) requires a lead agency to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project, as defined, that it proposes to carry out or approve that may have a significant effect on the environment, or to adopt a negative declaration if it finds that the project will not have that effect.

CEQA requires the Office of Planning and Research (OPR) to prepare and develop proposed guidelines for the implementation of CEQA by public agencies. CEQA requires that the guidelines contain various objectives, criteria, and procedures, as specified. CEQA requires OPR, at least once every 2 years, to review the guidelines and recommend changes or amendments to the Secretary of the Resources Agency. CEQA requires the Secretary of the Resources Agency to certify and adopt guidelines at least once every 2 years.

CEQA requires OPR to recommend proposed changes and the secretary to certify and adopt revisions to the guidelines to reflect changes enacted during the 1993-94 Regular Session of the Legislature within 6 months of the enactment of AB 314 of the 1993-94 Regular Session of the Legislature.

This bill would delete the requirements summarized in the preceding paragraph and would make conforming changes.

Copr. © West 2008 No Claim to Orig. Govt. Works

CEQA provides that no environmental impact report or negative declaration shall be approved for any project involving the construction or alteration of a facility within 1/4 of a mile of a school that might reasonably be anticipated to emit hazardous or acutely hazardous air emissions, or that would handle acutely hazardous material or a mixture containing acutely hazardous material in a quantity equal to or greater than a specified quantity prescribed by statute that may pose a health or safety hazard to persons who would attend or would be employed at the school, unless specified conditions occur, including that the school district has been given written notification of the project not less than 30 days prior to the proposed approval of the environmental impact report or negative declaration.

This bill would, instead, specify that an environmental impact report shall not be certified and a negative declaration shall not be approved for any project involving the construction or alteration of a facility within 1/4 of a mile of a school that might reasonably be anticipated to emit hazardous air emissions, or that would handle extremely hazardous substances in a quantity equal to or greater than a specified state threshold quantity prescribed by statute that may pose a health or safety hazard to persons who would attend or would be employed at the school, unless specified conditions occur, including that the school district has been given written notification of the project not less than 30 days prior to the proposed certification of the environmental impact report or approval of the negative declaration.

(2) This bill would provide that if AB 3090 is enacted on or before January 1, 2005, and amends Section 21087 of the Public Resources Code, then Section 4 of this bill, which would repeal Section 21087 of the Public Resources Code, would not become operative; and, this bill would not chapter out the amendments to Section 21087 of the Public Resources Code made by AB 3090.

The people of the State of California do enact as follows:

SECTION 1. Section 21083 of the Public Resources Code is amended to read:

<< CA PUB RES § 21083 >>

21083. (a) The Office of Planning and Research shall prepare and develop proposed guidelines for the implementation of this division by public agencies. The guidelines shall include objectives and criteria for the orderly evaluation of projects and the preparation of environmental impact reports and negative declarations in a manner consistent with this division.

(b) The guidelines shall specifically include criteria for public agencies to follow in determining whether or not a proposed project may have a "significant effect on the environment." The criteria shall require a finding that a project may have a "significant effect on the environment" if * * *one or more of the following conditions exist:

(1) A proposed project has the potential to degrade the quality of the environment, curtail the range of the environment, or to achieve short-term, to the disadvantage of long-term, environmental goals.

(2) The possible effects of a project are individually limited but cumulatively considerable. As used in this paragraph, "cumulatively considerable" means that the incremental effects of an individual project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.

(3) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

(c) The guidelines shall include procedures for determining the lead agency pursuant to Section 21165.

(d) The guidelines shall include criteria for public agencies to use in determining when a proposed project is of sufficient statewide, regional, or areawide environmental significance that a draft environmental impact report, a proposed negative declaration, or a proposed mitigated negative declaration shall be submitted to appropriate state agencies, through the State Clearinghouse, for review and comment prior to completion of the environmental impact report, negative declaration, or mitigated negative declaration.

(e) The Office of Planning and Research shall develop and prepare the proposed guidelines as soon as possible and shall transmit them immediately to the Secretary of the Resources Agency. The Secretary of the Resources Agency shall certify and adopt the guidelines pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, which shall become effective upon the filing thereof. However, the guidelines shall not be adopted without compliance with Sections 11346.4, 11346.5, and 11346.8 of the Government Code.

(f) The Office of Planning and Research shall, at least once every two years, review the guidelines adopted pursuant to this section and shall recommend proposed changes or amendments to the Secretary of the Resources Agency. The Secretary of the Resources Agency shall certify and adopt guidelines, and any amendments thereto, at least once every two years, pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, which shall become effective upon the filing thereof. However, guidelines may not be adopted or amended without compliance with Sections 11346.4, 11346.5, and 11346.8 of the Government Code.

SEC. 2. Section 21086 of the Public Resources Code is amended to read:

<< CA PUB RES § 21086 >>

21086. (a) A public agency may, at any time, request the addition or deletion of a class of projects, to the list designated pursuant to Section 21084. * * * That request shall be made in writing to the Office of Planning and Research and shall include information supporting the public agency's position that the class of projects does, or does not, have a significant effect on the environment.

(b) The Office of Planning and Research shall review each * * * request and, as soon as possible, shall submit its recommendation to the Secretary of the Resources Agency. Following the receipt of that recommendation, the Secretary of the Resources Agency may add or delete the class of projects to the list of classes of projects designated pursuant to Section 21084 that are exempt from the requirements of this division.

(c) The addition or deletion of a class of projects, as provided in this section, to the list specified in Section 21084 shall constitute an amendment to the guidelines adopted pursuant to Section 21083 and shall be adopted in the manner prescribed in Sections 21083 and 21084* * *.

<< Repealed: CA PUB RES § 21087 >>

SEC. 3. Section 21087 of the Public Resources Code is repealed.

SEC. 5. [FN1] Section 21151.4 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.4 >>

21151.4. An environmental impact report * * * shall not be certified and a negative declaration shall not be approved for any project involving the construction or alteration of a facility within 1/4 of a mile of a school that might reasonably be anticipated to emit hazardous * * * air emissions, or that would handle * * * an extremely hazardous substance or a mixture containing extremely hazardous substances in a quantity equal to or greater than the state threshold quantity specified * * * pursuant to subdivision (j) of Section 25532 of the Health and Safety Code, that may pose a health or safety hazard to persons who would attend or would be employed at the school, unless both of the following occur:

(a) The lead agency preparing the environmental impact report or negative declaration has consulted with the school district having jurisdiction regarding the potential impact of the project on the school.

(b) The school district has been given written notification of the project not less than 30 days prior to the proposed certification of the environmental impact report or approval of the negative declaration.

SEC. 6. If AB 3090 is enacted on or before January 1, 2005, and amends Section 21087 of the Public Resources Code, then Section 4 of this bill, which would repeal Section 21087 of the Public Resources Code, shall not become operative; and,

DIVISION 13. ENVIRONMENTAL QUALITY
CHAPTER 4. LOCAL AGENCIES

§ 21151.8. Schoolsite acquisition or construction; environmental impact report or negative declaration; hazardous waste or solid waste disposal sites; hazardous substance release sites

(a) No environmental impact report or negative declaration shall be approved for any project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless the environmental impact report or negative declaration includes information which is needed to determine if the the property proposed to be purchased, or to be constructed upon, is any of the following:

(1) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

(2) A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(3) A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

(b) As used in this section:

(1) "Hazardous substance" has the same meaning as defined in Section 25316 of the Health and Safety Code.

(2) "Acutely hazardous material" has the same meaning as defined in subdivision (a) of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" has the same meaning as defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" has the same meaning as defined in Section 25114 of the Health and Safety Code.

CHAPTER 668
 S.B. No. 352

~~SCHOOLS AND SCHOOL DISTRICTS--SCHOOLSITES--POLLUTION~~

~~Amend Section 17213 of the Education Code to amend Section 17213 of the Public Resources Code regarding computer schools.~~

[Filed with Secretary of State October 3, 2003.]

LEGISLATIVE COUNSEL'S DIGEST

SB 352, Escutia. Schoolsites: sources of pollution.

Existing law sets forth various requirements regarding the siting, structural integrity, safety, and fitness-for-occupancy of school buildings, including, but not limited to, a prohibition of the approval by the governing board of a school district of the acquisition of a schoolsite by a school district, unless prescribed conditions relating to possible exposure to hazardous substances are satisfied, and a prohibition on the approval of a related environmental impact report or negative declaration.

This bill would, in addition, prohibit the approval by the governing board of a school district of a schoolsite that is within 500 feet from the edge of the closest traffic lane of a freeway or other busy traffic corridor, unless prescribed conditions are met and would make conforming and other technical, nonsubstantive changes.

Existing law requires the lead agency to consult with prescribed agencies to identify facilities that might reasonably be anticipated to emit hazardous materials, within 1/4 of a mile of the schoolsite.

This bill would define "facility" for this purpose and would require the lead agency to consult to identify freeways and other busy traffic corridors, as defined, large agricultural operations, and railyards, within 1/4 of a mile of the schoolsite, and would make conforming and other technical, nonsubstantive changes.

Copr. © West 2008 No Claim to Orig. Govt. Works

3445

The people of the State of California do enact as follows:

SECTION 1. The Legislature finds and declares all of the following:

(a) Many studies have shown significantly increased levels of pollutants, particularly diesel particulates, in close proximity to freeways and other major diesel sources. A recent study of Los Angeles area freeways measured diesel particulate levels up to 25 times higher near freeways than those levels elsewhere. Much of the pollution from freeways is associated with acute health effects, exacerbating asthma and negatively impacting the ability of children to learn.

(b) Cars and trucks release at least forty different toxic air contaminants, including, but not limited to, diesel particulate, benzene, formaldehyde, 1,3-butadiene and acetaldehyde. Levels of these pollutants are generally concentrated within 500 feet of freeways and very busy roadways.

(c) Current state law governing the siting of schools does not specify whether busy freeways should be included in environmental impact reports of nearby "facilities." Over 150 schools are already estimated to be within 500 feet of extremely high traffic roadways.

(d) A disproportionate number of economically disadvantaged pupils may be attending schools that are close to busy roads, putting them at an increased risk of developing bronchitis from elevated levels of several pollutants associated with traffic. Many studies have confirmed that increased wheezing and bronchitis occurs among children living in high traffic areas.

(e) It is therefore the intent of the Legislature to protect school children from the health risks posed by pollution from heavy freeway traffic and other non-stationary sources in the same way that they are protected from industrial pollution.

SEC. 2. Section 17213 of the Education Code is amended to read:

<< CA EDUC § 17213 >>

17213. The governing board of a school district **may** not approve a project involving the acquisition of a schoolsite by a school district, unless all of the following occur:

(a) The school district, as the lead agency, as defined in Section 21067 of the Public Resources Code, determines that the property purchased or to be built upon is not any of the following:

(1) The site of a current or former hazardous waste disposal site or solid waste disposal site* * *, **unless** if the site was a former solid waste disposal site, the governing board of the school district concludes that the wastes have been re-

moved.

(2) A hazardous substance release site identified by the * * *Department of * * * Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(3) A site that contains one or more pipelines, situated underground or above-ground, that carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line that is used only to supply natural gas to that school or neighborhood.

(b) The school district, as the lead agency, as defined in Section 21067 of the Public Resources Code, in preparing the environmental impact report or negative declaration has consulted with the administering agency in which the proposed schoolsite is located, pursuant to Section 2735.3 of Title 19 of the California Code of Regulations, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify both permitted and nonpermitted facilities within that district's authority, including, but not limited to, freeways and other busy traffic corridors, large agricultural operations, and railyards, within one-fourth of a mile of the proposed schoolsite* * *, that might reasonably be anticipated to emit hazardous air emissions, or to handle hazardous or acutely hazardous materials, substances, or waste. The school district, as the lead agency, shall include a list of the locations for which information is sought.

(c) The governing board of the school district makes one of the following written findings:

(1) Consultation identified none of the facilities or significant pollution sources specified in subdivision (b).

(2) The facilities or other pollution sources specified in subdivision (b) exist, but one of the following conditions applies:

(A) The health risks from the facilities or other pollution sources do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the school.

(B) The governing board finds that corrective measures required under an existing order by another governmental entity that has jurisdiction over the facilities or other pollution sources will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes this finding, the governing board shall also make a subsequent finding, prior to the occupancy of the school, that the emissions have been mitigated to these

levels.

(C) For a schoolsite with a boundary that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor, the governing board of the school district determines, through analysis pursuant to paragraph (2) of subdivision (b) of Section 44360 of the Health and Safety Code, based on appropriate air dispersion modeling, and after considering any potential mitigation measures, that the air quality at the proposed site is such that neither short-term nor long-term exposure poses significant health risks to pupils.

(D) The governing board finds that neither of the conditions set forth in subparagraph (B) or (C) can be met, and the school district is unable to locate an alternative site that is suitable due to a severe shortage of sites that meet the requirements in subdivision (a) of Section 17213. If the governing board makes this finding, the governing board shall adopt a statement of Overriding Considerations pursuant to Section 15093 of Title 14 of the California Code of Regulations.

(d) As used in this section:

(1) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substance identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(2) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(3) "Acutely hazardous material" means any material defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(4) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(5) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(6) "Administering agency" means any agency designated pursuant to Section 25502 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(8) "Facilities" means any source with a potential to use, generate, emit or discharge hazardous air pollutants, including, but not limited to, pollutants that meet the definition of a hazardous substance, and whose process or operation is

CA LEGIS 668 (2003)

 (Publication page references are not available for this document.)

Page 5

identified as an emission source pursuant to the most recent list of source categories published by the California Air Resources Board.

(9) "Freeway or other busy traffic corridors" means those roadways that, on an average day, have traffic in excess of 50,000 vehicles in a rural area as defined in Section 50101 of the Health and Safety Code, and 100,000 vehicles in an urban area, as defined in Section 50104.7 of the Health and Safety Code.

SEC. 3. Section 21151.8 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.8 >>

21151.8. (a) An environmental impact report or negative declaration * * * may not be approved for any project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless all of the following occur:

(1) The environmental impact report or negative declaration includes information that is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

(A) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

(B) A hazardous substance release site identified by the * * * Department of * * * Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) A site that contains one or more pipelines, situated underground or above-ground, that carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line that is used only to supply natural gas to that school or neighborhood, or other nearby schools.

(D) A site that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor.

(2) The school district, as the lead agency, in preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed schoolsite is located, pursuant to Section 2735.3 of Title 19 of the California Code of Regulations, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify both permitted and nonpermitted facilities within that district's authority, including, but not limited to, freeways and busy traffic corridors, large agricultural operations, and railyards, within one-fourth of a mile of the proposed schoolsite* * *, that might reasonably be anticipated to emit hazardous emissions or handle hazardous or acutely hazardous materials, sub-

(Publication page references are not available for this document.)

Page 6

stances, or waste. The notification by the school district, as the lead agency, shall include a list of the locations for which information is sought.

(3) The governing board of the school district makes one of the following written findings:

(A) Consultation identified no facilities of this type or other significant pollution sources specified in paragraph (2).

(B) The facilities or other pollution sources specified in paragraph (2) exist, but one of the following conditions applies:

(i) The health risks from the facilities or other pollution sources do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities or other pollution sources will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes * * * a finding pursuant to this clause, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

(iii) For a schoolsite with a boundary that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor, the governing board of the school district determines, through analysis pursuant to paragraph (2) of subdivision (b) of Section 44360 of the Health and Safety Code, based on appropriate air dispersion modeling, and after considering any potential mitigation measures, that the air quality at the proposed site is such that neither short-term nor long-term exposure poses significant health risks to pupils.

(C) The facilities or other pollution sources specified in paragraph (2) exist, but conditions in clause (i), (ii) or (iii) of subparagraph (B) cannot be met, and the school district is unable to locate an alternative site that is suitable due to a severe shortage of sites that meet the requirements in subdivision (a) of Section 17213 of the Education Code. If the governing board makes this finding, the governing board shall adopt a statement of Overriding Considerations pursuant to Section 15093 of Title 14 of the California Code of Regulations.

(4) Each administering agency, air pollution control district, or air quality management district receiving written notification from a lead agency to identify facilities pursuant to paragraph (2) shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. The environmental impact report or negative declaration shall be conclusively presumed to comply with this section as to the area of responsibility of

CA LEGIS 668 (2003)
2003 Cal. Legis. Serv. Ch. 668 (S.B. 352) (WEST)
(Publication page references are not available for this document.)

Page 7

any agency that does not respond within 30 days.

(b) If a school district, as a lead agency, has carried out the consultation required by paragraph (2) of subdivision (a), the environmental impact report or the negative declaration shall be conclusively presumed to comply with this section, notwithstanding any failure of the consultation to identify an existing facility or other pollution source specified in paragraph (2) of subdivision (a).

(c) As used in this section and Section 21151.4, the following definitions shall apply:

(1) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(2) "Acutely hazardous material" means any material defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(5) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(6) "Administering agency" means an agency designated pursuant to Section 25502 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(8) "Facilities" means any source with a potential to use, generate, emit or discharge hazardous air pollutants, including, but not limited to, pollutants that meet the definition of a hazardous substance, and whose process or operation is identified as an emission source pursuant to the most recent list of source categories published by the California Air Resources Board.

(9) "Freeway or other busy traffic corridors" means those roadways that, on an average day, have traffic in excess of 50,000 vehicles in a rural area, as defined in Section 50101 of the Health and Safety Code, and 100,000 vehicles in an urban area, as defined in Section 50104.7 of the Health and Safety Code.

CHAPTER 148
A.B. No. 2720
LOCAL AGENCIES--ENVIRONMENTAL PROTECTION--SCHOOLS AND SCHOOL DISTRICTS

AN ACT to amend Sections 21151.4 and 21151.8 of the Public Resources Code, relating to the environment.

[Filed with Secretary of State July 18, 2008.]

LEGISLATIVE COUNSEL'S DIGEST

AB 2720, Levine. Environment: environmental impact report.

(1) The California Environmental Quality Act (CEQA) requires a lead agency to prepare, or cause to be prepared by contract, and certify the completion of, an environmental impact report on a project that it proposes to carry out or approve that may have a significant effect on the environment, or to adopt a negative declaration if it finds that the project will not have that effect.

CEQA prohibits an environmental impact report or negative declaration from being approved for any project involving the purchase of a school site or the construction of a new elementary or secondary school by a school district unless specified conditions are met. CEQA further provides that, if a school district, as the lead agency, has carried out a specified consultation, the environmental impact report or the negative declaration shall be conclusively presumed to comply with those conditions, notwithstanding any failure of the consultation to identify an existing facility or other pollution source, as specified.

This bill would make technical, nonsubstantive changes in these provisions and would revise a cross-reference.

(2) CEQA prohibits the certification of an environmental impact report or the approval of a negative declaration for a project involving the construction or alteration of a facility within 1/4 of a mile from a school that might reasonably be anticipated to emit hazardous air emissions or a mixture containing extremely hazardous substances that may pose a health or safety hazard to persons who would attend or would be employed at the school unless a specified event occurs.

This bill would define "hazardous air emissions" and "extremely hazardous substances" for the purposes of that provision.

The people of the State of California do enact as follows:

SECTION 1. Section 21151.4 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.4 >>

21151.4. (a) An environmental impact report shall not be certified or a negative declaration shall not be approved for any project involving the construction or alteration of a facility within one-fourth of a mile of a school that might reasonably be anticipated to emit hazardous air emissions, or that would handle an extremely hazardous substance or a mixture containing extremely hazardous substances in a quantity equal to or greater than the state threshold quantity specified pursuant to subdivision (j) of Section 25532 of the Health and Safety Code, that may pose a health or safety hazard to persons who would attend or would be employed at the school, unless both of the following occur:

(1) The lead agency preparing the environmental impact report or negative declaration has consulted with the school district having jurisdiction regarding the potential impact of the project on the school.

(2) The school district has been given written notification of the project not less than 30 days prior to the proposed certification of the environmental impact report or approval of the negative declaration.

(b) As used in this section, the following definitions apply:

(1) "Extremely hazardous substance" means an extremely hazardous substance as defined pursuant to paragraph (2) of subdivision (g) of Section 25532 of the Health and Safety Code.

(2) "Hazardous air emissions" means emissions into the ambient air of all contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air of a substance identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

SEC. 2. Section 21151.8 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.8 >>

21151.8. (a) An environmental impact report shall not be certified or a negative declaration shall not be approved for a project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless all of the following occur:

(1) The environmental impact report or negative declaration includes information that is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

(A) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

(B) A hazardous substance release site identified by the Department of Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) A site that contains one or more pipelines, situated underground or aboveground, that carries hazardous substances, extremely hazardous substances, or hazardous wastes, unless the pipeline is a natural gas line that is used only to supply natural gas to that school or neighborhood, or other nearby schools.

(D) A site that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor.

(2) (A) The school district, as the lead agency, in preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed schoolsite is located, pursuant to Section 2735.3 of Title 19 of the California Code of Regulations, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify both permitted and nonpermitted facilities within that district's authority, including, but not limited to, freeways and busy traffic corridors, large agricultural operations, and railyards, within one-fourth of a mile of the proposed schoolsite, that might reasonably be anticipated to emit hazardous emissions or handle hazardous or extremely hazardous substances or waste. The notification by the school district, as the lead agency, shall

include a list of the locations for which information is sought.

~~(B) Each administering agency, air pollution control district, or air quality management district receiving written notification from a lead agency to identify facilities pursuant to subparagraph (A) shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. The environmental impact report or negative declaration shall be conclusively presumed to comply with subparagraph (A) as to the area of responsibility of an agency that does not respond within 30 days.~~

~~(C) If the school district, as a lead agency, has carried out the consultation required by subparagraph (A), the environmental impact report or the negative declaration shall be conclusively presumed to comply with subparagraph (A), notwithstanding any failure of the consultation to identify an existing facility or other pollution source specified in subparagraph (A).~~

(3) The governing board of the school district makes one of the following written findings:

(A) Consultation identified no facilities of this type or other significant pollution sources specified in paragraph (2).

(B) The facilities or other pollution sources specified in paragraph (2) exist, but one of the following conditions applies:

(i) The health risks from the facilities or other pollution sources do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities or other pollution sources will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes a finding pursuant to this clause, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

(iii) For a school site with a boundary that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor, the governing board of the school district determines, through analysis pursuant to paragraph (2) of subdivision (b) of Section 44360 of the Health and Safety Code, based on appropriate air dispersion modeling, and after considering any potential mitigation measures, that the air quality at the proposed site is such that neither short-term nor long-term exposure poses significant health risks to pupils.

(C) The facilities or other pollution sources specified in paragraph (2) exist, but conditions in clause (i), (ii), or (iii) of subparagraph (B) cannot be met, and the school district is unable to locate an alternative site that is suitable due to a severe shortage of sites that meet the requirements in subdivision (a) of Section 17213 of the Education Code. If the governing board makes this finding, the governing board shall adopt a statement of overriding considerations pursuant to Section 15093 of Title 14 of the California Code of Regulations.

* * *

~~(b)~~ As used in this section * * *, the following definitions shall apply:

(1) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(2) "Extremely hazardous substances" means * * * ~~an extremely hazardous substance as defined pursuant to paragraph (2) of~~ subdivision (g) of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(5) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health

and Safety Code.

(6) "Administering agency" means an agency authorized pursuant to Section 25502 of the Health and Safety Code ~~to implement and enforce Chapter 6.95 (commencing with Section 25500) of Division 20 of the Health and Safety Code.~~

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(8) "Facilities" means any source with a potential to use, generate, emit, or discharge hazardous air pollutants, including, but not limited to, pollutants that meet the definition of a hazardous substance, and whose process or operation is identified as an emission source pursuant to the most recent list of source categories published by the California Air Resources Board.

(9) "Freeway or other busy traffic corridors" means those roadways that, on an average day, have traffic in excess of 50,000 vehicles in a rural area, as defined in Section 50101 of the Health and Safety Code, and 100,000 vehicles in an urban area, as defined in Section 50104.7 of the Health and Safety Code.

CHAPTER 130
A.B. No. 299
MAINTENANCE OF CODES

SEC. 206. Section ~~21151.8~~ of the Public Resources Code is amended to read:

<< CA PUB RES § ~~21151.8~~ >>

- ~~21151.8~~. (a) An environmental impact report or negative declaration may not be approved for any project involving the purchase of a school site or the construction of a new elementary or secondary school by a school district unless all of the following occur:
- (1) The environmental impact report or negative declaration includes information that is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:
 - (A) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.
 - (B) A hazardous substance release site identified by the Department of Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.
 - (C) A site that contains one or more pipelines, situated underground or aboveground, that carries hazardous substances, ~~extremely~~ hazardous ~~substances~~, or hazardous wastes, unless the pipeline is a natural gas line that is used only to supply natural gas to that school or neighborhood, or other nearby schools.
 - (D) A site that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor.
 - (2) The school district, as the lead agency, in preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed school site is located, pursuant to Section 2735.3 of Title 19 of the California Code of Regulations, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify both permitted and nonpermitted facilities within that district's authority, including, but not limited to, freeways and busy traffic corridors, large agricultural operations, and railyards, within one-fourth of a mile of the proposed school site, that might reasonably be anticipated to emit hazardous emissions or handle hazardous or ~~extremely~~ hazardous ~~***~~substances ~~***~~ or waste. The notification by the school district, as the lead agency, shall include a list of the locations for which information is sought.
 - (3) The governing board of the school district makes one of the following written findings:
 - (A) Consultation identified no facilities of this type or other significant pollution sources specified in paragraph (2).
 - (B) The facilities or other pollution sources specified in paragraph (2) exist, but one of the

• following conditions applies:

(I) The health risks from the facilities or other pollution sources do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities or other pollution sources will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes a finding pursuant to this clause, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

(III) For a schoolsite with a boundary that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor, the governing board of the school district determines, through analysis pursuant to paragraph (2) of subdivision (b) of Section 44360 of the Health and Safety Code, based on appropriate air dispersion modeling, and after considering any potential mitigation measures, that the air quality at the proposed site is such that neither short-term nor long-term exposure poses significant health risks to pupils.

(C) The facilities or other pollution sources specified in paragraph (2) exist, but conditions in clause (i), (ii) or (iii) of subparagraph (B) cannot be met, and the school district is unable to locate an alternative site that is suitable due to a severe shortage of sites that meet the requirements in subdivision (a) of Section 17213 of the Education Code. If the governing board makes this finding, the governing board shall adopt a statement of Overriding Considerations pursuant to Section 15093 of Title 14 of the California Code of Regulations.

(4) Each administering agency, air pollution control district, or air quality management district receiving written notification from a lead agency to identify facilities pursuant to paragraph (2) shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. The environmental impact report or negative declaration shall be conclusively presumed to comply with this section as to the area of responsibility of any agency that does not respond within 30 days.

(b) If a school district, as a lead agency, has carried out the consultation required by paragraph (2) of subdivision (a), the environmental impact report or the negative declaration shall be conclusively presumed to comply with this section, notwithstanding any failure of the consultation to identify an existing facility or other pollution source specified in paragraph (2) of subdivision (a).

(c) As used in this section and Section 21151.4, the following definitions shall apply:

(1) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(2) "**Extremely hazardous substances**" means any material defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(5) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health

and Safety Code.

(6) "Administering agency" means an agency designated pursuant to Section 25502 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(8) "Facilities" means any source with a potential to use, generate, emit or discharge hazardous air pollutants, including, but not limited to, pollutants that meet the definition of a hazardous substance, and whose process or operation is identified as an emission source pursuant to the most recent list of source categories published by the California Air Resources Board.

(9) "Freeway or other busy traffic corridors" means those roadways that, on an average day, have traffic in excess of 50,000 vehicles in a rural area, as defined in Section 50101 of the Health and Safety Code, and 100,000 vehicles in an urban area, as defined in Section 50104.7 of the Health and Safety Code.

West's Ann.Cal.Health & Safety Code § 25358.1

§ 25358.1. Furnishing information at request of department; access to records; administrative procedures; photographs; entry for removal or remedial action; notice and split samples; immunity from liability

- (a) The department, a representative of the department, or any person designated by the director may take the actions specified in this section only if there is a reasonable basis to believe that there may be a release or threatened release of a hazardous substance, and only for the purpose of determining under this chapter the need for a response action, the choosing or taking of a response action, or otherwise for the purpose of enforcing this chapter.
- (b) Any officer or employee of the department, a representative of the director, or a person designated by the director may require any potentially responsible party, or any person who has, or may have, acquired information relevant to any of the following matters in the course of a commercial, ownership, or contractual relationship with any potentially responsible party, to furnish, upon reasonable notice, information or documents relating to the following matters:
- (1) The identification, nature, and quantity of materials which have been, or are, generated, treated, stored, or disposed of at a hazardous substance release site or which have been, or are, transported to a hazardous substance release site.
 - (2) The nature or extent of a release or a threatened release of a hazardous substance at, or from, a hazardous substance release site.
- (c) A person who is required to provide information pursuant to subdivision (b) shall, in accordance with subdivision (h), allow the officer, employee, representative, or designee, upon reasonable notice and at reasonable times, to have access to, and copy, all records relating to the hazardous substances for purposes of assisting the department in determining the need for an action in response to a release or threatened release pursuant to this chapter.
- (d) Any officer or employee of the department, representative of the director, or person designated by the director may, in accordance with subdivision (h), enter, at reasonable times, any of the following properties:
- (1) Any nonresidential establishment or other place or property where any hazardous substances may be, or have been, produced, stored, treated, disposed of, or transported from.
 - (2) Any nonresidential establishment or other place or property from which, or to which, a hazardous substance has been, or may have been, released.
 - (3) Any nonresidential establishment or other place or property where a hazardous substance release is, or may be, threatened.
 - (4) Any nonresidential establishment or other place or property where entry is needed to determine the need for a response action, or the appropriate remedial action, to effectuate a response action under this chapter.
 - (5) Any residential place or property which, if it were a nonresidential establishment or other place or property, would otherwise meet the criteria described in paragraphs (1) to (4), inclusive, if the department, representative, or person designated by the director is able to establish, based upon reasonably available evidence, that hazardous substances have been released onto or under the residential place or real property and if entry is made only at reasonable times and after reasonable notification to the owners and occupants.
- (e) Any officer or employee of the department, representative of the director, or person designated by the director may, in accordance with subdivision (h), carry out any of the following activities:
- (1) Inspect and obtain samples from any establishment or other place or property specified in subdivision (d) or from any location of any suspected hazardous substance.

- (2) Inspect and obtain samples of any substances from any establishment or place or property specified in subdivision (d).
- (3) Inspect and obtain samples of any containers or labeling for the suspected hazardous substances, and samples of the soil, vegetation, air, water, and biota on the premises.
- (4) Set up and maintain monitoring equipment for the purpose of assessing or measuring the actual or potential migration of hazardous substances.
- (5) Survey and determine the topographic, geologic, and hydrogeologic features of the land.
- (6) Photograph any equipment, sample, activity, or environmental condition described in paragraphs (2) to (5) inclusive.
- (f)(1) If photographs are to be taken pursuant to paragraph (6) of subdivision (e), the department shall do all of the following:
 - (A) Comply with all procedures established pursuant to subdivision (b) of Section 25358.2.
 - (B) Notify the person whose facility is photographed prior to public disclosure of the photographs.
 - (C) Upon the request of the person owning the facility, submit a copy of any photograph to the person for the purpose of determining whether trade secret information, as defined in Section 25358.2, or facility security, would be revealed by the photograph.
- (2) "Disclosure," as used in Section 25358.2, for purposes of this paragraph, does not include the review of the photograph by a court of competent jurisdiction or by an administrative law judge. A court or judge may review the photograph in camera.
- (g) An officer, employee, representative, or designee who enters a place, establishment, or property pursuant to this section shall make a reasonable effort to inform the owner or the owners' authorized representative of the inspection and shall provide split samples to the owner or the representative upon request.
- (h) If the owner or the owner's authorized representative does not voluntarily grant access to a place, establishment, or property pursuant to this section, the officer, employee, representative, or designee shall first obtain a warrant pursuant to Title 13 (commencing with Section 1822.50) of Part 3 of the Code of Civil Procedure. However, if there is an emergency posing an immediate threat to public health and safety, the officer, employee, representative, or designee may enter the place, establishment, or property without the consent of the owner or owner's authorized representative and without the issuance of a warrant.
- (i) The department, and any person authorized by the department to enter upon any lands for the purpose of taking removal or remedial action pursuant to this chapter, shall not be held liable, in either a civil or criminal proceeding, for trespass or for any other acts which are necessary to carry out the corrective action.

§ 25358.7.1. Community advisory groups

(a) At each site, a community advisory group may be established by the affected community to review any response action and comment on the response action to be conducted in that community. The department or regional board shall regularly communicate, and confer as appropriate, with the community advisory committee. The department or regional board shall also advise local environmental regulatory agencies and other appropriate local agencies of planned response actions and provide opportunities for review and comment. If the department or regional board, whichever is overseeing a response action, receives a petition signed by at least 50 members of a community affected by the response action at a site or a resolution adopted by the legislative body of the jurisdiction within which the response action has been or will be initiated, the department or regional board shall assist the petitioners or the legislative body to establish a community advisory group to review the response action at the site.

(b) To the extent possible, the composition of each community advisory group shall reflect the composition of the affected community and the diversity of interests of the community by including all of the following types of individuals on the community advisory group:

(1) Persons owning or residing on property located near the hazardous substance release site or in an adjacent community, or other persons who may be directly affected by the response action.

(2) Individuals from the local business community.

(3) Local political or government agency representatives.

(4) Local citizen, civic, environmental, or public interest group members residing in the community.

(c) The following entities may participate in community advisory group meetings in order to provide information and technical expertise:

(1) The department or regional boards.

(2) Representatives of local environmental regulatory agencies.

(3) The potentially responsible parties or other persons who are conducting the response action.

(d) The existence of a community advisory group shall not diminish any other obligation of the department or regional board with respect to public participation requirements specified in Section 25358.7. Nothing in this section shall affect the status of any citizen advisory group formed before the enactment of this section, a federal Department of Defense Restoration Advisory Board, or a federal Department of Energy Advisory Board.

CHAPTER 1183
A.B. No. 928
ENVIRONMENT--PUBLIC FACILITIES--HAZARDOUS MATERIALS

AN ACT to amend Sections 39003 and 39120 of the Education Code, to amend Section 65759 of, and to repeal and add Section 65850.2 of, the Government Code, to amend Sections 13143.9, 25534.1, 25535, 25538, 25541, 42301.6, and 42301.9 of, and to add Sections 25501.3, 25507.10, 25514.3, and 25534.2 to, the Health and Safety Code, and to amend Sections 21151.4 and 21151.8 of, and to repeal Section 21151.3 of, the Public Resources Code, relating to hazardous materials.

[Approved by Governor October 14, 1991.]

[Filed with Secretary of State October 14, 1991.]

LEGISLATIVE COUNSEL'S DIGEST

AB 928, Archie-Hudson. Hazardous materials: schools: health care facilities.

(1) Existing law generally requires all state agencies and local agencies to prepare, or to be prepared by contract, and certify the completion of, an environmental impact report on any project they intend to carry out or approve which may have a significant effect on the environment. In other cases, a negative declaration is required. Existing law prohibits the governing board of a school district from approving the acquisition of a schoolsite or the construction of a new school building, unless the lead agency, as defined, consults with specified local agencies to identify facilities which might emit hazardous air emissions, and unless the governing board of the school district makes specified written findings concerning these facilities.

Existing law also prohibits the approval of an environmental impact report or negative declaration for a school construction project or purchase of a schoolsite unless facilities within a specified distance of the proposed schoolsite are identified which might reasonably be anticipated to emit hazardous or acutely hazardous air emissions, the governing board of the school district makes specified written findings and the environmental impact report or negative declaration includes information to determine if property proposed to be purchased, or to be constructed upon, is the site of a hazardous waste disposal site or solid waste disposal site, a hazardous substance release site, or a site which contains pipelines which carry hazardous substances, acutely hazardous materials, or hazardous waste. Existing law prohibits the approval of an environmental impact report or negative declaration for any project involving the construction or alteration of a facility which might emit hazardous air emissions within 1/4 mile of a school unless the lead agency consults with the school district, as specified.

This bill would additionally provide that before the governing board approves a school construction project or the acquisition of a schoolsite, or before an environmental impact report or negative declaration is approved for a school construction project or the purchase of a schoolsite, the lead agency is also required to identify facilities which might be reasonably anticipated to handle acutely hazardous materials, substances, or waste, thereby imposing a

state-mandated local program. The bill would include an additional finding which the governing board would be authorized to make, if these facilities exist, concerning the corrective measures which these facilities are required to take. The bill would require specified local agencies which receive a request to provide information concerning these facilities to respond in 30 days, thereby imposing a state-mandated local program by imposing new duties upon local agencies.

The bill would, instead, include within the prohibition on the approval of an environmental impact report or negative declaration, a facility which would emit hazardous air emissions or handle specified materials which may pose a specified health or safety hazard.

(2) Existing law requires a business which handles acutely hazardous materials to submit a registration form to the local administering agency, as defined, and, if the administering agency determines that there is a significant likelihood that the handler's use of an acutely hazardous material may pose an acutely hazardous materials accident risk, the agency is required to require the preparation and submission of a risk management and prevention program (RMPP), in accordance with a specified timetable. Existing law requires cities and counties to include in the application for building permits a place to indicate whether the applicant is required to comply with specified requirements concerning business plans, the submission of RMPPs, and permits for construction or modification pursuant to the regulation of air pollution. A city or county is prohibited from issuing a final certificate of occupancy unless the applicant meets these requirements and from permitting a facility to be constructed within 1,000 feet of a school unless specified requirements are met.

This bill would, instead, require a city or county to include in the information list for development projects or in the application form for a building permit specified requirements concerning compliance with statutes regulating hazardous materials and air pollution, the handling of acutely hazardous materials, and the emission of hazardous air emissions. The bill would prohibit a city or county from finding an application complete or from approving a development project or a building permit for a project which requires only a building permit if the project meets specified requirements concerning hazardous materials and emissions, unless the owner or authorized agent complies with certain provisions, thereby imposing a state-mandated local program. The bill would require the owner or operator of such a project to substantially meet the requirements for submitting an RMPP, pursuant to a specified procedure, if the administering agency makes a specified determination. Cities and counties would be authorized to adopt a schedule of fees to cover the cost of carrying out these provisions. The bill would impose specified duties upon administering agencies and air pollution control officers, thereby imposing a state-mandated local program.

(3) Existing law requires the State Fire Marshal to prepare, adopt, and submit for approval to the State Building Standards Commission, building standards establishing minimum standards for fire prevention, as specified, and minimum requirements for the storage and handling in commercial buildings of acutely hazardous materials, as defined.

This bill would revise the provisions relative to acutely hazardous materials to instead require the preparation, adoption, and submission of building standards and other fire and life safety regulations establishing minimum requirements for the storage, handling, and use of hazardous materials, as defined in the Uniform Fire Code, as specified.

(4) Existing law requires handlers or other specified persons to report hazardous material releases to an administering agency, which is defined as a department, office, or agency of a city or county.

This bill would require emergency rescue personnel to advise the superintendent of a school district of a specified release, or threatened release, within 1/2 mile of a school, thereby imposing a state-mandated local program. This bill would define the term "handle" for purposes of the provisions regulating hazardous materials to include connecting a marine vessel, tank

vehicle, tank car, or containers to a specified system or process.

(5) Existing law prescribes civil penalties for violations of specified provisions requiring any business, as defined, to establish and implement a business plan for emergency response to a release or threatened release of a hazardous material, in accordance with prescribed requirements.

This bill would make a knowing violation of those provisions, after reasonable notice, a misdemeanor. The bill would thereby impose a state-mandated local program by creating a new crime.

(6) Existing law requires an RMPP to give consideration to the proximity of the facility to schools and requires a handler to submit a corrected RMPP within 60 days after receiving a specified notice from the administering agency. Existing law requires the administering agency to follow specified procedures with regard to the protection of trade secrets.

The bill would define school for purposes of the RMPP procedures and would authorize the administering agency to grant a one-time extension of the deadline to submit a corrected RMPP. The bill would require the administering agency to review any claim for a trade secret protection and to segregate properly substantiated trade secret information from the information to be made public. The bill would impose new duties upon administering agencies, thereby imposing a state-mandated local program.

(7) Existing law requires an air pollution control officer, prior to approving a permit for a source that may emit air contaminants which is located within 1,000 feet of a school, to prepare and distribute a public notice, as specified.

This bill would, instead, require that notice to be given prior to approving an application for a source which emits hazardous air emissions which is located within 1,000 feet of a school, as defined, and would require the notice to be distributed to additional persons, thereby imposing a state-mandated local program. The bill would authorize the preparation of the notice under prescribed circumstances. The bill would make the notice requirements inapplicable if the air pollution control officer makes specified determinations.

The bill would require the school district to make the information necessary to mail notices required by these provisions available to the air pollution control officer and would allow the notices to be distributed to the children to be given to their parents.

The bill would require applicants for a permit to certify whether the project is located within 1,000 feet of a school, and would authorize denial of the permit upon misrepresentation of that fact.

(8) The bill would provide that the changes proposed by this bill concerning development projects and permits, RMPPs, permits issued by air pollution control districts and air quality management districts, and environmental impact reports for facilities near schools do not apply to projects for which an application is submitted before January 1, 1992.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that no reimbursement is required by this act for certain costs for specified reasons. However, this bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs

shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed \$1,000,000, shall be made from the State Mandates Claims Fund.

The people of the State of California do enact as follows:

SECTION 1. Section 39003 of the Education Code is amended to read:

<< CA EDUC § 39003 >>

39003. The governing board of a school district shall not approve a project involving the acquisition of a school site by a school district unless all of the following occur:

(a) The lead agency, as defined in Section 21067 of the Public Resources Code, determines that the property purchased or to be built upon is not any of the following:

(1) The site of a current or former hazardous waste disposal site or solid waste disposal site unless, if the site was a former solid waste disposal site, the governing board of the school district concludes that the wastes have been removed.

(2) A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(3) A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

(b) The lead agency <<+, as defined in Section 21067 of the Public Resources Code,+>>

preparing the environmental impact report or negative declaration has consulted with the <<-* * *->> <<+administering agency+>> in which the proposed school site is located <<-* * *->>

>> and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed school site which might reasonably be anticipated to emit hazardous air emissions <<+, or to handle hazardous or acutely hazardous materials, substances, or waste. The lead agency shall include a list of the locations for which information is sought+>>.

(c) The governing board of the school district makes <<+one+>> of the following written findings:

(1) Consultation identified none of the facilities specified in subdivision (b).

(2) The facilities specified in subdivision (b) exist, but <<-* * *->> <<+one of the following conditions applies:+>>

<<+(A) T+>> the health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the school.

<<+(B) The governing board finds that corrective measures required under an existing order by another jurisdiction which has jurisdiction over the facilities will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes this finding, the governing board shall also make a subsequent finding, prior to the occupancy of the school, that the emissions have been mitigated to these levels.+>>

(d) As used in this section:

(1) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution <<+control+>> officer, hazardous air emissions <<-* * *->> also

<<+means+>> emissions into the ambient air from any substance identified in <<+subdivisions (a) to (f), inclusive, of+>> Section 44321 of the Health and Safety Code.

(2) "Hazardous substance" <<-* * *->> <<+means any substance+>> defined in Section 25316 of the Health and Safety Code.

(3) "Acutely hazardous material" <<-* * *->> <<+means any material+>> defined <<-* * *->>

>> <<+pursuant to+>> subdivision (a) of Section 25532 of the Health and Safety Code.
(4) "Hazardous waste" <<-* * *->> <<+means any waste+>> defined in Section 25117 of the Health and Safety Code.
(5) "Hazardous waste disposal site" <<-* * *->> <<+means any site+>> defined in Section 25114 of the Health and Safety Code.
<<+(6) "Administering agency" means any agency designated pursuant to Section 25502 of the Health and Safety Code.+>>
<<+(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.+>>
SEC. 2. Section 39120 of the Education Code is amended to read:

<< CA EDUC § 39120 >>

39120. <<+(a)+>> The governing board of a school district shall not approve a project for the construction of a new school building, as defined in Section 39141, unless the project and its lead agency <<+comply+>> with the same requirements specified in <<+subdivision (a) of+>> Section 39003 for schoolsite acquisition.
<<+(b) For purposes of this section, the acceptance of construction bids shall constitute approval of the project.+>>
SEC. 3. Section 65759 of the Government Code is amended to read:

<< CA GOVT § 65759 >>

65759. In any action brought under this section:
<<+(a)+>> The <<-* * *->> California Environmental Quality Act, Division 13 (commencing with Section 21000) of the Public Resources Code, <<+ does+>> not apply to any action necessary to bring its general plan or relevant mandatory elements <<-* * *->> <<+of the plan+>> into compliance with any court order or judgment under this <<+article+>>.
<<+(1)+>> The local agency shall, however, prepare an initial study, within the time limitations specified in Section 65754, to determine the environmental effects of the proposed action necessary to comply with the court order. The initial study shall contain substantially the same information as is required for an initial study pursuant to subdivision (c) of Section 15080 of Title 14 of the California <<-* * *->> Code <<+of Regulations+>>.
<<+(2)+>> If as a result of the initial study, the local agency determines that the action may have a significant effect on the environment, the local agency shall prepare, within the time limitations specified in Section 65754, an environmental assessment, the content of which substantially conforms to the required content for a draft environmental impact report set forth in Article 9 (commencing with Section 15140) of Title 14 of the California <<-* * *->> Code <<+of Regulations+>>. The local agency shall include notice of the preparation of the environmental assessment in all notices provided for the amendments to the general plan proposed to comply with the court order.
<<+(3)+>> The environmental assessment shall be deemed to be a part of the general plan and shall only be reviewable as provided in this article.
<<+(4)+>> The local agency may comply with the provisions of the California Environmental Quality Act, Division 13 (commencing with Section 21000) of the Public Resources Code, in any action necessary to bring its general plan or <<+the plan's+>> relevant mandatory elements <<-* * *->> into compliance with any court order or judgment under this section so long as it does so within the time limitations specified in Section 65754.
<<+(b)+>> The court for good cause shown may grant not more than two extensions of time, not to exceed a total of 240 days, in order to meet the requirements imposed by Section 65754.

<< Repealed: CA GOVT § 65850.2 >>

SEC. 4. Section 65850.2 of the Government Code is repealed:
SEC. 5. Section 65850.2 is added to the Government Code, to read:

65850.2. (a) Each city and each county shall include in its information list compiled pursuant to Section 65940 for development projects, or application form for projects which do not require a development permit other than a building permit, both of the following:

(1) The requirement that the owner or authorized agent shall indicate whether the owner or authorized agent will need to comply with the applicable requirements of Sections 25505, 25533, and 25534 of the Health and Safety Code and the requirements for a permit for construction or modification from the air pollution control district or air quality management district exercising jurisdiction in the area governed by the city or county.

(2) The requirement that the owner or authorized agent shall certify whether or not the proposed project will handle, as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code, an acutely hazardous material or a mixture containing an acutely hazardous material, in a quantity equal to or greater than the quantity specified in subdivision (a) of Section 25536 of the Health and Safety Code, or will contain a source or modified source with hazardous air emissions.

(b) No city or county shall find the application complete pursuant to Section 65943 nor approve a development project, or a building permit for a project which does not require a development permit other than a building permit, in which acutely hazardous material or mixtures containing acutely hazardous material will be handled in a quantity equal to or greater than that specified in Section 25536 of the Health and Safety Code, unless the owner or authorized agent for the project first obtains from the administering agency, a notice of requirement to comply with, or determination of exemption from, the requirement to prepare and submit a risk management and prevention program. Within five days of submitting the project application to the city or county, the applicant shall submit the information required pursuant to paragraph (2) of subdivision (a) to the administering agency. This notice of requirement to comply with, or determination of exemption from, the requirement for an RMPP shall be provided by the administering agency to the applicant, and the applicant shall provide the notice to the city or county, within 25 days of the administering agency receiving adequate information from the applicant to make a determination as to the requirement for an RMPP. The notice of requirement to comply shall indicate if any of the acutely hazardous material to be handled at the site would create an acutely hazardous materials accident risk to any of the populations specified pursuant to Section 25534.1 of the Health and Safety Code. If the notice indicates an acutely hazardous materials accident risk may be present for any of the specified populations, no permit shall be issued until the administering agency has verified to the city or county within 90 days of the determination as to the requirement for an RMPP that the requirement for a risk management and prevention program is being substantially met. If within 90 days the administering agency has not verified that the requirement for the RMPP is being substantially met, then this section shall be deemed satisfied. If the notice of requirement to comply does not indicate that an acutely hazardous materials accident risk exists for the populations considered but does not exempt the requirement for an RMPP, a permit may be issued when all other permit conditions have been met. The requirement to submit an RMPP to the administering agency, shall be met prior to the issuance of a certificate of occupancy or its substantial equivalent. The owner or authorized agent shall submit to the city or county certification from the air pollution control officer that the owner or authorized agent is in compliance with the disclosures required by Section 42303 of the Health and Safety Code.

(c) No city or county shall issue a final certificate of occupancy or its substantial equivalent unless there is verification from the administering agency, if required by law, that the owner or authorized agent has met, or is meeting, the applicable requirements of Sections 25505, 25533, and 25534 of the Health and Safety Code, and the requirements for a permit, if required by law, from the air pollution control district or air quality management district exercising jurisdiction in the area governed by the city or county or has provided proof from the appropriate district that the permit requirements do not apply to the owner or authorized agent.

(d) The city or county, after considering the recommendations of the administering agency or air pollution control district or air quality management district, shall decide whether, and under what conditions, to allow construction of the site.

(e) Nothing in this section limits any existing authority of a district to require compliance with its rules and regulations.

(f) Counties and cities may adopt a schedule of fees for applications for compliance with this section sufficient to recover their reasonable costs of carrying out this section. Those fees shall be used only for the implementation of this section.

(g) As used in this section:

(1) "Acutely hazardous material" means any material as defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(2) "Administering agency" means an agency designated pursuant to Section 25502 of the Health and Safety Code.

(3) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air of any substance identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(h) Any misrepresentation of information required by this section shall be grounds for denial, suspension, or revocation of project approval or permit issuance. The owner or authorized agent required to comply with this section shall notify all future occupants of their potential duty to comply with the requirements of Sections 25505, 25533, 25534 of the Health and Safety Code.

(i) This section shall not apply to applications solely for residential construction.

SEC. 6. Section 13143.9 of the Health and Safety Code is amended to read:

<< CA HLTH & S § 13143.9 >>

13143.9. The State Fire Marshal shall, in carrying out Section 13143, prepare, adopt, and submit building standards <<+and other fire and life safety regulations+>> for approval pursuant to Chapter 4 (commencing with Section 18935) of Part 2.5 of Division 13 establishing minimum requirements for the storage<<+,+>> handling <<-* * *->><<+, and use+>> of <<-* * *->> hazardous materials, as defined<<+,+>> in <<-* * *->> <<+Article 9 of the 1988 Uniform Fire Code, and any subsequent editions, published by the Western Fire Chiefs Association and the International Conference of Building Officials+>>. The State Fire Marshal shall seek the advice of the Office of Emergency Services in establishing these requirements. This section does not prohibit a city, county, or district from adopting an ordinance, resolution, or regulation imposing stricter or more stringent requirements than a standard adopted pursuant to this section.

SEC. 7. Section 25501.3 is added to the Health and Safety Code, to read:

<< CA HLTH & S § 25501.3 >>

25501.3. "Handle" also means the use or potential for use of a quantity of hazardous material by the connection of any marine vessel, tank vehicle, tank car, or container to a system or process for any purpose other than the immediate transfer to or from an approved atmospheric tank or approved portable tank.

SEC. 8. Section 25507.10 is added to the Health and Safety Code, to read:

<< CA HLTH & S § 25507.10 >>

25507.10. The emergency rescue personnel, responding to the reported release or threatened release of an acutely hazardous material or to any fire or explosion involving a material that involves a release that would be required to be reported pursuant to Section 25507, shall immediately advise the superintendent of the school district having jurisdiction, where the location of the release or threatened release is within one-half mile of a school.

SEC. 9. Section 25514.3 is added to the Health and Safety Code, to read:

<< CA HLTH & S § 25514.3 >>

25514.3. Any person that knowingly violates Section 25503.5, 25503.7, 25503.8, 25505, 25508, 25509, 25509.3, 25510, or 25533 after reasonable notice of the violation, is, upon conviction, guilty of a misdemeanor. This section does not preempt any other applicable criminal or civil penalties.

SEC. 10. Section 25534.1 of the Health and Safety Code is amended to read:

<< CA HLTH & S § 25534.1 >>

25534.1. Every RMPP prepared pursuant to Section 25534<<+, and every notice of requirement to comply prepared pursuant to subdivision (b) of Section 65850.2 of the Government Code,+>> shall give consideration to the proximity of the facility <<+or proposed facility+>> to <<+populations located in+>> schools, residential areas, general acute care hospitals, long-term health care facilities, and child day care facilities. For purposes of this section, "general acute care hospital" has the meaning provided by subdivision (a) of Section 1250, "long-term health care facility" has the meaning provided by subdivision (a) of Section 1418, and "child day care facility" has the meaning provided by Section 1596.750. <<+"School" means any school used for the purpose of the education of more than 12 children in kindergarten or any grades 1 to 12, inclusive.+>>

SEC. 10.5. Section 25534.2 is added to the Health and Safety Code, to read:

<< CA HLTH & S § 25534.2 >>

25534.2. An owner or operator of any new or modified facility which will be used for the handling of acutely hazardous materials in amounts equal to or greater than those specified in subdivision (a) of Section 25536, shall obtain from the administering agency, a notice of requirement to comply with, or determination of exemption from, the requirement for an RMPP prior to the approval of a development project or issuance of a building permit pursuant to Section 65850.2 of the Government Code.

SEC. 11. Section 25535 of the Health and Safety Code is amended to read:

<< CA HLTH & S § 25535 >>

25535. (a) An owner or operator of a facility submitting an RMPP pursuant to Section 25534 shall submit the RMPP to the administering agency after the RMPP is certified as complete by a qualified person and the facility operator. The administering agency may authorize the air pollution control district or air quality management district in which the facility is located to conduct a technical review of the RMPP. If, after review by the administering agency or the air pollution control district or air quality management district exercising jurisdiction in the area of the facility, the administering agency determines that the handler's RMPP is deficient in any way, the administering agency shall notify the handler of these defects. The handler shall submit a corrected RMPP within 60 days of the <<-* * *->> <<+notification of defects, unless granted a one-time extension of no more than 30 days, of the notice to correct the RMPP by the administering agency. Failure to fully comply with this notice or the requirements of this section shall be deemed a violation of this article for purposes of Section 25540+>>.

(b) Upon implementation of a risk management and prevention program pursuant to subdivision (k) of Section 25534, the handler shall notify the administering agency that the RMPP has been implemented and shall summarize the steps taken in preparation and implementation of the RMPP.

(c) The handler shall continue to carry out the program and activities specified in the risk management and prevention program at the business after the administering agency has been notified pursuant to subdivision (b).

(d) The owner or operator shall implement all programs and activities in the RMPP before operations commence, in the case of a new facility, or before any new activities involving acutely

hazardous materials are taken, in the case of a modified facility.
SEC. 12. Section 25538 of the Health and Safety Code is amended to read:

<< CA HLTH & S § 25538 >>

25538. (a) If a business believes that any information required to be reported by this article, involves the release of a trade secret, the business shall provide the information to the administering agency and shall notify the administering agency in writing of that belief.

<<+Upon receipt of a claim of trade secret related to a RMPP, the administering agency shall review the claim and shall segregate properly substantiated trade secret information from information which shall be made available to the public upon request in accordance with the California Public Records Act (Chapter 3.5 (commencing with Section 6250) of Division 7 of Title 1 of the Government Code).+>> As used in this section, "trade secret" has the same meaning as found in subdivision (d) of Section 6254.7 of the Government Code and Section 1060 of the Evidence Code.

(b) Except as otherwise specified in this section, the administering agency shall not disclose any <<+properly substantiated+>> trade secret which is so designated by the owner or operator of a business.

(c) The administering agency may disclose trade secrets received by the administering agency pursuant to this article to authorized officers or employees of other governmental agencies only in connection with the official duties of that officer or employee pursuant to any law for the protection of health and safety.

(d) Any officer or employee or former officer or employee of the administering agency or any other government agency who, because of that employment or official position, has possession of, or has access to, information designated as a trade secret pursuant to this section, shall not knowingly and willfully disclose the information in any manner to any person not authorized to receive the information pursuant to this section. Notwithstanding Section 25515, any person who violates this subdivision, and who knows that disclosure of this information to the general public is prohibited by the section, shall, upon conviction, be punished by imprisonment in the county jail for not more than six months or by a fine of not more than one thousand dollars (\$1,000), or by both fine and imprisonment.

(e) Any information prohibited from disclosure pursuant to any federal statute or regulation shall not be disclosed.

(f) This section does not authorize any business to refuse to disclose to the administering agency any information required pursuant to this chapter.

SEC. 13. Section 25541 of the Health and Safety Code is amended to read:

<< CA HLTH & S § 25541 >>

25541. Any person or business who knowingly makes any false statement or representation in any record, report, or other document filed, maintained, or used for the purpose of compliance with this article, or destroys, alters, or conceals any such record, report, or other document filed, maintained, or used for the purpose of compliance with this article, shall, upon conviction, be punished by a fine of not more than twenty-five thousand dollars (\$25,000) for each day of violation, or by imprisonment in the county jail for not more than one year, or by both the fine and the imprisonment.

If the conviction is for a violation committed after a first conviction under this section, the person shall be punished by a fine of not less than two thousand dollars (\$2,000) or more than fifty thousand dollars (\$50,000) per day of violation, or by imprisonment in the state prison for <<-* * *->> <<+ one, two, or three years+>> or in the county jail for not more than one year, or both the fine and imprisonment.

Furthermore, if the violation results in, or significantly contributes to, an emergency, including a fire, to which the county or city is required to respond, the person shall also be assessed the full cost of the county or city emergency response, as well as the cost of cleaning up and disposing of the acutely hazardous materials.

SEC. 14. Section 42301.6 of the Health and Safety Code is amended to read:

<< CA HLTH & S § 42301.6 >>

42301.6. (a) Prior to approving an application for a permit to construct or modify a source <<-* * *->> <<+which emits hazardous+>> air <<-* * *->> <<+emissions, which source is+>> located within 1,000 feet from the outer boundary of a <<+schoolsite+>>, the air pollution control officer shall prepare a public notice in which the proposed project or modification for which the application for a permit is made is fully described. <<+The notice may be prepared whether or not the material is or would be subject to subdivision (a) of Section 25536, if the air pollution control officer determines and the administering agency concurs that hazardous air emissions of the material may result from an air release, as defined by Section 44303. The notice may be combined with any other notice on the project or permit which is required by law.+>>

(b) The air pollution control officer shall, at the permit applicant's expense, distribute <<+or mail+>> the public notice to the parents <<+or guardians+>> of children <<+enrolled+>> in any school <<+that is located+>> within one-quarter mile of the source and to each address within a radius of <<+1,000+>> feet <<-* * *->> of the proposed new or modified source at least 30 days prior to the date final action on the application is to be taken by the officer. The officer shall review and consider all comments received during the 30 days after the notice is distributed, and shall include written responses to the comments in the permit application file prior to taking final action on the application.

<<+(1) Notwithstanding Section 49073 of the Education Code, or any other provision of law, the information necessary to mail notices required by this section shall be made available by the school district to the air pollution control officer.+>>

<<+(2) Nothing in this subdivision precludes, at the discretion of the air pollution control officer and with permission of the school, the distribution of the notices to the children to be given to their parents or guardians.+>>

(c) Notwithstanding subdivision (b), an air pollution control officer may require the applicant to distribute the notice if the district had such a rule in effect prior to January 1, 1989.

(d) The requirements for public notice pursuant to subdivision (b) or a district rule in effect prior to January 1, 1989, are fulfilled if the air pollution control officer or applicant responsible for giving the notice makes a good faith effort to follow the procedures prescribed by law for giving the notice, and, in <<+these+>> circumstances, failure of any person to receive the notice shall not affect the validity of any permit subsequently issued by the officer.

(e) Nothing in this section shall be deemed to limit any existing authority of any district.

<<+(f) An applicant for a permit shall certify whether the proposed source or modification is located within 1,000 feet of a schoolsite. Misrepresentation of this fact may result in the denial of a permit.+>>

<<+(g) The notice requirements of this section shall not apply if the air pollution control officer determines that the application to construct or modify a source will result in a reduction or equivalent amount of air contaminants, as defined in Section 39013, or which are hazardous air emissions.+>>

<<+(h) As used in this section:+>>

<<+(1) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the state board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.+>>

<<+(2) "Acutely hazardous material" means any material defined pursuant to subdivision (a) of Section 25532.+>>

SEC. 15. Section 42301.9 of the Health and Safety Code is amended to read:

<< CA HLTH & S § 42301.9 >>

42301.9. For the purposes of Sections <<+42301.4+>> to 42301.8, inclusive:

(a) "School" means any <<+public or private+>> school used for purposes of the education of

<<+more than 12+>> children in kindergarten or any of grades 1 to 12, inclusive<<+, but does not include any private school in which education is primarily conducted in private homes+>>.

(b) "Air contaminant" <<-* * *->> <<+means any contaminant defined pursuant to+>> Section 39013.

(c) "Administering agency" means an <<-* * *->> agency <<-* * *->> <<+designated pursuant to+>> Section <<+ 25502+>>.

<<+(d) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.+>>

<< Repealed: CA PUB RES § 21151.3 >>

SEC. 16. Section 21151.3 of the Public Resources Code is repealed.

SEC. 17. Section 21151.4 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.4 >>

21151.4. No environmental impact report or negative declaration shall be approved for any project involving the construction or alteration of a facility within <<+ 1/4+>> of a mile of a school which might reasonably be anticipated to emit hazardous or acutely hazardous air <<-* * *->> <<+ emission, or which would handle acutely hazardous material or a mixture containing acutely hazardous material in a quantity equal to or greater than the quantity specified in subdivision (a) of+>> Section <<-* * *->> <<+ 25536 of the Health and Safety Code, which may pose a health or safety hazard to persons who would attend or would be employed at the school,+>> unless both of the following occur:

(a) The lead agency preparing the environmental impact report or negative declaration has consulted with the school district having jurisdiction regarding the potential impact of the project on the school.

(b) The school district has been given written notification of the project not less than 30 days prior to the proposed approval of the environmental impact report or negative declaration.

SEC. 18. Section 21151.8 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.8 >>

21151.8. (a) No environmental impact report or negative declaration shall be approved for any project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless <<-* * *->> <<+all of the following occur:+>> <<+(1) T+>>he environmental impact report or negative declaration includes information which is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

<<+(A)+>> The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

<<+(B)+>> A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

<<+(C)+>> A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

<<+(2) The lead agency preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed schoolsite is located, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed schoolsite which might reasonably be anticipated to emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste. The notification by the lead agency shall

Include a list of the locations for which information is sought.+>>

<<+(3) The governing board of the school district makes one of the following written findings:+>>

<<+(A) Consultation identified no such facilities specified in paragraph (2).+>>

<<+(B) The facilities specified in paragraph (2) exist, but one of the following conditions applies:+>>

<<+(i) The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.+>>

<<+(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes such a finding, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.+>>

<<+(4) Each administering agency, air pollution control district, or air quality management district receiving written notification from a lead agency to identify facilities pursuant to paragraph (2) shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. The environmental impact report or negative declaration shall be conclusively presumed to comply with this section as to the area of responsibility of any agency which does not respond within 30 days.+>>

<<+(b) If a lead agency has carried out the consultation required by paragraph (2) of subdivision (a), the environmental impact report or the negative declaration shall be conclusively presumed to comply with this section, notwithstanding any failure of the consultation to identify an existing facility specified in paragraph (2) of subdivision (a).+>>

<<+(c)+>> As used in this section <<+and Section 21151.4, the following definitions shall apply+>>:

(1) "Hazardous substance" <<-* * *->> <<+means any substance+>> defined in Section 25316 of the Health and Safety Code.

(2) "Acutely hazardous material" <<-* * *->> <<+means any material+>> defined <<-* * *->> <<+pursuant to+>> subdivision (a) of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" <<-* * *->> <<+means any waste+>> defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" <<-* * *->> <<+means any site+>> defined in Section 25114 of the Health and Safety Code.

<<+(5) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.+>>

<<+(6) "Administering agency" means an agency designated pursuant to Section 25502 of the Health and Safety Code.+>>

<<+(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.+>>

<< Note: CA GOVT §§ 65759, 65850.2 >>

<< Note: CA HLTH & S §§ 25534.1, 25534.2, 25535, 42301.6, 42301.9 >>

<< Note: CA PUB RES § 21151.4 >>

SEC. 19. Sections 3, 5, 10, 10.5, 11, 14, 15, and 17 of this act shall not apply to projects for which an application is submitted pursuant to Section 65943 of the Government Code prior to January 1, 1992.

SEC. 20. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution for those costs which may be incurred by a local agency or school district because this act creates a new crime or infraction, changes the definition of a crime or infraction, changes the penalty for a crime or infraction, or eliminates a crime or infraction.

Moreover, no reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution for other costs because the local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for those other costs. However, notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars (\$1,000,000), reimbursement shall be made from the State Mandates Claims Fund. Notwithstanding Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

SEC. 21. If any provision of this act or its application to any person or circumstances is held invalid, that invalidity shall not affect other provisions or applications of the act which can be given effect without the invalid provision or application, and to this end the provisions of this act are severable.

COPR. (c) WEST 1991 No Claim to Orig. Govt. Works
EDUCATION CODE
TITLE 2. ELEMENTARY AND SECONDARY ADMINISTRATION
DIVISION 3. LOCAL ADMINISTRATION
PART 23. SCHOOL FACILITIES
CHAPTER 1. SCHOOL SITES
ARTICLE 1. GENERAL PROVISIONS

§ 39003. Approval of site acquisition; hazardous or solid waste disposal sites or hazardous substance release sites; hazardous air emissions; findings

The governing board of a school district shall not approve a project involving the acquisition of a schoolsite by a school district unless all of the following occur:

(a) The lead agency, as defined in Section 21067 of the Public Resources Code, determines that the property purchased or to be built upon is not any of the following:

(1) The site of a current or former hazardous waste disposal site or solid waste disposal site unless, if the site was a former solid waste disposal site, the governing board of the school district concludes that the wastes have been removed.

(2) A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(3) A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

(b) The lead agency preparing the environmental impact report or negative declaration has consulted with the city in which the proposed schoolsite is located, or with the county in which the proposed schoolsite is located if the proposed site is in an unincorporated area, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed schoolsite which might reasonably be anticipated to emit hazardous air emissions.

(c) The governing board of the school district makes either of the following written findings:

(1) Consultation identified none of the facilities specified in subdivision (b).

(2) The facilities specified in subdivision (b) exist, but the health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the school.

(d) As used in this section:

(1) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution officer, hazardous air emissions may also mean emissions into the ambient air from any substance identified in Section 44321 of the Health and Safety Code.

(2) "Hazardous substance" has the same meaning as defined in Section 25316 of the Health and Safety Code.

(3) "Acutely hazardous material" has the same meaning as defined in subdivision (a) of Section 25532 of the Health and Safety Code.

(4) "Hazardous waste" has the same meaning as defined in Section 25117 of the Health and Safety Code.

(5) "Hazardous waste disposal site" has the same meaning as defined in Section 25114 of the Health and Safety Code.

Sections 15 to 18 of Stats.1996, c. 277 (S.B.1562), provide:

"Sec. 15. To the extent that the provisions of this act are substantially the same as existing statutory provisions relating to the same subject matter, the provisions shall be construed as restatements and continuations of existing statutory provisions and not as a new enactment.

"Sec. 16. The Legislature finds and declares that the enactment of this act, in view of the nonsubstantive statutory changes made, will not result in new or additional costs to local agencies charged with any duties or responsibilities in connection therewith.

"Sec. 17. Any section of any act enacted by the Legislature during the 1996 calendar year prior to the enactment of this act, that amends, amends and renumbers, adds, repeals and adds, or repeals a section, article, chapter, or part, that is amended, amended and renumbered, added, repealed and added, or repealed by this act, shall prevail over this act until January 1, 1998, at which time Sections 1 to 16 of this act shall become operative [Section affected by two or more acts at the same session of the legislature, see government Code § 9605.].

"Sec. 18. The provisions of this act are severable. If any provisions of this act or its application is held invalid, that invalidity shall not affect other provisions or applications that can be given effect without the invalid provision or application."

Section 39001, added by Stats.1991, c. 846 (A.B.1603), § 12, related to public hearing for evaluation prior to acquisition in accordance with site selection standards. See Education Code § 17211.

Application of Stats.1991, c. 846 (A.B.1331) to validity or enforceability of action by state allocation board under Public Contract Code § 10115 et seq., see Historical and Statutory Notes under Education Code § 17706.

Former Notes

Former § 39001, enacted by Stats.1976, c. 1010, § 2, derived from Education Code 1959, § 15002 (Stats.1959, c. 2, § 15002); Education Code 1943, § 18401 (Stats.1943, c. 71, p. 670); School Code § 6.100, added by Stats.1939, c. 217, § 3, relating to purchase of improvement of school lands, was repealed by Stats.1987, c. 1452, § 268.

Section 39002, enacted by Stats.1976, c. 1010, § 2, operative April 30, 1977, amended by Stats.1977, c. 36, § 141, eff. April 29, 1977, operative April 30, 1977; Stats.1984, c. 1009, § 1 was amended by Stats.1994, c. 840 (A.B.3562), § 10, prior to repeal, investigation of prospective schoolsite. See Education Code § 17212.

Section 43 of Stats.1984, c. 1009, provides, in part:

"It is the intent of the Legislature in enacting this act to consolidate and simplify statutes relating to local planning. It is not the intent of the Legislature to mandate new programs or higher levels of service on cities and counties.

"The responsibilities imposed by Sections 1, 1.1, 1.2, 1.3, 1.6, 2, 3, 3.5, 4, 5, 5.4, 9, 13.5, 14, 15, 18, 20.5, 21, 22, 23, 24, 25, 26, 26.5, 28, 30, 33, 34, 35, 36, 37, 38, 39, 40, 41, and 42 of this act are no greater than the responsibilities currently imposed on cities and counties by the statutes which are repealed or amended by Sections 1, 1.1, 1.2, 1.3, 3, 4, 5, 5.2, 5.4, 5.7, 6, 7, 7.5, 8, 10, 11, 12, 13, 14, 15, 16, 17, 19, 20, 20.5, 21, 21.5, 22, 23, 24, 25, 26, 26.5, 27, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, and 42 of this act."

Section 39002.5, added by Stats.1977, c. 36, § 442, eff. April 29, 1977, operative April 30, 1977, amended by Stats.1977, c. 242, § 12, eff. July 7, 1977; Stats.1978, c. 362, p. 1064, § 1, related to geological and soils engineering studies. See Education Code § 17212.5.

Section 39003, added by Stats.1990, c. 1602 (S.B.2262), § 1, amended by Stats.1991, c. 1183 (A.B.928), § 1, related approval of site acquisition. See Education Code § 17213

Section 21 of Stats.1991, c. 1183 (A.B.928) provides:

"If any provision of this act or its application to any person or circumstances is held invalid, that invalidity shall not affect other provisions or applications of the act which can be given effect without the invalid provision or application, and to this end the provisions of this act are severable."

CHAPTER 689
 S.B. No. 945

ENVIRONMENTAL PROTECTION--HAZARDOUS SUBSTANCES AND WASTE--SCHOOLS AND SCHOOL
 DISTRICTS

AN ACT to amend Sections 21083, 21086, and 21151.4 of, and to repeal Section
 21087 of, the Public Resources Code, relating to environmental quality.

[Filed with Secretary of State September 22, 2004.]

LEGISLATIVE COUNSEL'S DIGEST

SB 945, Sher. Environmental quality: guidelines.

(1) The existing California Environmental Quality Act (CEQA) requires a lead agency to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project, as defined, that it proposes to carry out or approve that may have a significant effect on the environment, or to adopt a negative declaration if it finds that the project will not have that effect.

CEQA requires the Office of Planning and Research (OPR) to prepare and develop proposed guidelines for the implementation of CEQA by public agencies. CEQA requires that the guidelines contain various objectives, criteria, and procedures, as specified. CEQA requires OPR, at least once every 2 years, to review the guidelines and recommend changes or amendments to the Secretary of the Resources Agency. CEQA requires the Secretary of the Resources Agency to certify and adopt guidelines at least once every 2 years.

CEQA requires OPR to recommend proposed changes and the secretary to certify and adopt revisions to the guidelines to reflect changes enacted during the 1993-94 Regular Session of the Legislature within 6 months of the enactment of AB 314 of the 1993-94 Regular Session of the Legislature.

This bill would delete the requirements summarized in the preceding paragraph and would make conforming changes.

Copr. © West 2008 No Claim to Orig. Govt. Works

CEQA provides that no environmental impact report or negative declaration shall be approved for any project involving the construction or alteration of a facility within 1/4 of a mile of a school that might reasonably be anticipated to emit hazardous or acutely hazardous air emissions, or that would handle acutely hazardous material or a mixture containing acutely hazardous material in a quantity equal to or greater than a specified quantity prescribed by statute that may pose a health or safety hazard to persons who would attend or would be employed at the school, unless specified conditions occur, including that the school district has been given written notification of the project not less than 30 days prior to the proposed approval of the environmental impact report or negative declaration.

This bill would, instead, specify that an environmental impact report shall not be certified and a negative declaration shall not be approved for any project involving the construction or alteration of a facility within 1/4 of a mile of a school that might reasonably be anticipated to emit hazardous air emissions, or that would handle extremely hazardous substances in a quantity equal to or greater than a specified state threshold quantity prescribed by statute that may pose a health or safety hazard to persons who would attend or would be employed at the school, unless specified conditions occur, including that the school district has been given written notification of the project not less than 30 days prior to the proposed certification of the environmental impact report or approval of the negative declaration.

(2) This bill would provide that if AB 3090 is enacted on or before January 1, 2005, and amends Section 21087 of the Public Resources Code, then Section 4 of this bill, which would repeal Section 21087 of the Public Resources Code, would not become operative; and, this bill would not chapter out the amendments to Section 21087 of the Public Resources Code made by AB 3090.

The people of the State of California do enact as follows:

SECTION 1. Section 21083 of the Public Resources Code is amended to read:

<< CA PUB RES § 21083 >>

21083. (a) The Office of Planning and Research shall prepare and develop proposed guidelines for the implementation of this division by public agencies. The guidelines shall include objectives and criteria for the orderly evaluation of projects and the preparation of environmental impact reports and negative declarations in a manner consistent with this division.

(b) The guidelines shall specifically include criteria for public agencies to follow in determining whether or not a proposed project may have a "significant effect on the environment." The criteria shall require a finding that a project may have a "significant effect on the environment" if ~~one or more~~ **one or more** of the following conditions exist:

CA LEGIS 689 (2004)
2004 Cal. Legis. Serv. Ch. 689 (S.B. 945) (WEST)
(Publication page references are not available for this document.)

Page 3

(1) A proposed project has the potential to degrade the quality of the environment, curtail the range of the environment, or to achieve short-term, to the disadvantage of long-term, environmental goals.

(2) The possible effects of a project are individually limited but cumulatively considerable. As used in this paragraph, "cumulatively considerable" means that the incremental effects of an individual project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.

(3) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

(c) The guidelines shall include procedures for determining the lead agency pursuant to Section 21165.

(d) The guidelines shall include criteria for public agencies to use in determining when a proposed project is of sufficient statewide, regional, or areawide environmental significance that a draft environmental impact report, a proposed negative declaration, or a proposed mitigated negative declaration shall be submitted to appropriate state agencies, through the State Clearinghouse, for review and comment prior to completion of the environmental impact report, negative declaration, or mitigated negative declaration.

(e) The Office of Planning and Research shall develop and prepare the proposed guidelines as soon as possible and shall transmit them immediately to the Secretary of the Resources Agency. The Secretary of the Resources Agency shall certify and adopt the guidelines pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, which shall become effective upon the filing thereof. However, the guidelines shall not be adopted without compliance with Sections 11346.4, 11346.5, and 11346.8 of the Government Code.

(f) The Office of Planning and Research shall, at least once every two years, review the guidelines adopted pursuant to this section and shall recommend proposed changes or amendments to the Secretary of the Resources Agency. The Secretary of the Resources Agency shall certify and adopt guidelines, and any amendments thereto, at least once every two years, pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, which shall become effective upon the filing thereof. However, guidelines may not be adopted or amended without compliance with Sections 11346.4, 11346.5, and 11346.8 of the Government Code.

SEC. 2. Section 21086 of the Public Resources Code is amended to read:

<< CA PUB RES § 21086 >>

Copr. © West 2008 No Claim to Orig. Govt. Works

21086. (a) A public agency may, at any time, request the addition or deletion of a class of projects, to the list designated pursuant to Section 21084. * * * That request shall be made in writing to the Office of Planning and Research and shall include information supporting the public agency's position that the class of projects does, or does not, have a significant effect on the environment.

(b) The Office of Planning and Research shall review each * * * request and, as soon as possible, shall submit its recommendation to the Secretary of the Resources Agency. Following the receipt of that recommendation, the Secretary of the Resources Agency may add or delete the class of projects to the list of classes of projects designated pursuant to Section 21084 that are exempt from the requirements of this division.

(c) The addition or deletion of a class of projects, as provided in this section, to the list specified in Section 21084 shall constitute an amendment to the guidelines adopted pursuant to Section 21083 and shall be adopted in the manner prescribed in Sections 21083 and 21084* * *.

<< Repealed: CA PUB RES § 21087 >>

SEC. 3. Section 21087 of the Public Resources Code is repealed.

SEC. 5. [FN1] Section 21151.4 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.4 >>

21151.4. An environmental impact report * * * shall not be certified and a negative declaration shall not be approved for any project involving the construction or alteration of a facility within 1/4 of a mile of a school that might reasonably be anticipated to emit hazardous * * * air emissions, or that would handle * * * an extremely hazardous substance or a mixture containing extremely hazardous substances in a quantity equal to or greater than the state threshold quantity specified * * * pursuant to subdivision (j) of Section 25532 of the Health and Safety Code, that may pose a health or safety hazard to persons who would attend or would be employed at the school, unless both of the following occur:

(a) The lead agency preparing the environmental impact report or negative declaration has consulted with the school district having jurisdiction regarding the potential impact of the project on the school.

(b) The school district has been given written notification of the project not less than 30 days prior to the proposed certification of the environmental impact report or approval of the negative declaration.

SEC. 6. If AB 3090 is enacted on or before January 1, 2005, and amends Section 21087 of the Public Resources Code, then Section 4 of this bill, which would repeal Section 21087 of the Public Resources Code, shall not become operative; and,

CA LEGIS 689 (2004)
2004 Cal. Legis. Serv. Ch. 689 (S.B. 945) (WEST)
(Publication page references are not available for this document.)

Page 5

notwithstanding Section 9605 of the Government Code, this bill shall not chapter out the amendments to Section 21087 of the Public Resources Code made by AB 3090.

[FN1] No section 4 in enrolled bill.

PUBLIC RESOURCES CODE
DIVISION 13. ENVIRONMENTAL QUALITY
CHAPTER 4. LOCAL AGENCIES

§ 21151.8. Schoolsite acquisition or construction; environmental impact report or negative declaration; hazardous waste or solid waste disposal sites; hazardous substance release sites

(a) No environmental impact report or negative declaration shall be approved for any project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless the environmental impact report or negative declaration includes information which is needed to determine if the the property proposed to be purchased, or to be constructed upon, is any of the following:

(1) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

(2) A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(3) A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

(b) As used in this section:

(1) "Hazardous substance" has the same meaning as defined in Section 25316 of the Health and Safety Code.

(2) "Acutely hazardous material" has the same meaning as defined in subdivision (a) of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" has the same meaning as defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" has the same meaning as defined in Section 25114 of the Health and Safety Code.

CHAPTER 668
 S.B. No. 352

~~SCHOOLS AND SCHOOL DISTRICTS--SCHOOLSITES--POLLUTION~~

~~AN ACT TO AMEND CHAPTER 668 OF THE CALIFORNIA EDUCATION CODE, TO CHANGE AN INDENTATION IN SECTION 20142 OF THE EDUCATION CODE, AND TO ADD A SECTION TO CHAPTER 668 OF THE EDUCATION CODE, RELATING TO POLLUTION AT SCHOOLS.~~

[Filed with Secretary of State October 3, 2003.]

LEGISLATIVE COUNSEL'S DIGEST

SB 352, Escutia. Schoolsites: sources of pollution.

Existing law sets forth various requirements regarding the siting, structural integrity, safety, and fitness-for-occupancy of school buildings, including, but not limited to, a prohibition of the approval by the governing board of a school district of the acquisition of a schoolsite by a school district, unless prescribed conditions relating to possible exposure to hazardous substances are satisfied, and a prohibition on the approval of a related environmental impact report or negative declaration.

This bill would, in addition, prohibit the approval by the governing board of a school district of a schoolsite that is within 500 feet from the edge of the closest traffic lane of a freeway or other busy traffic corridor, unless prescribed conditions are met and would make conforming and other technical, nonsubstantive changes.

Existing law requires the lead agency to consult with prescribed agencies to identify facilities that might reasonably be anticipated to emit hazardous materials, within 1/4 of a mile of the schoolsite.

This bill would define "facility" for this purpose and would require the lead agency to consult to identify freeways and other busy traffic corridors, as defined, large agricultural operations, and railyards, within 1/4 of a mile of the schoolsite, and would make conforming and other technical, nonsubstantive changes.

Copr. © West 2008 No Claim to Orig. Govt. Works

3493

The people of the State of California do enact as follows:

SECTION 1. The Legislature finds and declares all of the following:

(a) Many studies have shown significantly increased levels of pollutants, particularly diesel particulates, in close proximity to freeways and other major diesel sources. A recent study of Los Angeles area freeways measured diesel particulate levels up to 25 times higher near freeways than those levels elsewhere. Much of the pollution from freeways is associated with acute health effects, exacerbating asthma and negatively impacting the ability of children to learn.

(b) Cars and trucks release at least forty different toxic air contaminants, including, but not limited to, diesel particulate, benzene, formaldehyde, 1,3-butadiene and acetaldehyde. Levels of these pollutants are generally concentrated within 500 feet of freeways and very busy roadways.

(c) Current state law governing the siting of schools does not specify whether busy freeways should be included in environmental impact reports of nearby "facilities." Over 150 schools are already estimated to be within 500 feet of extremely high traffic roadways.

(d) A disproportionate number of economically disadvantaged pupils may be attending schools that are close to busy roads, putting them at an increased risk of developing bronchitis from elevated levels of several pollutants associated with traffic. Many studies have confirmed that increased wheezing and bronchitis occurs among children living in high traffic areas.

(e) It is therefore the intent of the Legislature to protect school children from the health risks posed by pollution from heavy freeway traffic and other non-stationary sources in the same way that they are protected from industrial pollution.

SEC. 2. Section 17213 of the Education Code is amended to read:

<< CA EDUC § 17213 >>

17213. The governing board of a school district **may** not approve a project involving the acquisition of a school site by a school district, unless all of the following occur:

(a) The **school district, as the** lead agency, as defined in Section 21067 of the Public Resources Code, determines that the property purchased or to be built upon is not any of the following:

(1) The site of a current or former hazardous waste disposal site or solid waste disposal site~~+~~ ~~+~~ ~~+~~, **unless** if the site was a former solid waste disposal site, the governing board of the school district concludes that the wastes have been re-

moved.

(2) A hazardous substance release site identified by the ***Department of *****Toxic Substances Control** in a current list adopted pursuant to Section 25356 of **the Health and Safety Code** for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(3) A site **that** contains one or more pipelines, situated underground or above-ground, **that** carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line **that** is used only to supply natural gas to that school or neighborhood.

(b) The **school district, as the** lead agency, as defined in Section 21067 of the Public Resources Code, in preparing the environmental impact report or negative declaration has consulted with the administering agency in which the proposed schoolsite is located, pursuant to Section 2735.3 of Title 19 of the California Code of Regulations, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify both permitted and nonpermitted facilities within that district's authority, including, but not limited to, freeways and other busy traffic corridors, large agricultural operations, and railyards, within one-fourth of a mile of the proposed schoolsite***, **that** might reasonably be anticipated to emit hazardous air emissions, or to handle hazardous or acutely hazardous materials, substances, or waste. The **school district, as the** lead agency, shall include a list of the locations for which information is sought.

(c) The governing board of the school district makes one of the following written findings:

(1) Consultation identified none of the facilities or significant pollution sources specified in subdivision (b).

(2) The facilities or other pollution sources specified in subdivision (b) exist, but one of the following conditions applies:

(A) The health risks from the facilities or other pollution sources do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the school.

(B) The governing board finds that corrective measures required under an existing order by another governmental entity that has jurisdiction over the facilities or other pollution sources will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes this finding, the governing board shall also make a subsequent finding, prior to the occupancy of the school, that the emissions have been mitigated to these

levels.

(C) For a schoolsite with a boundary that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor, the governing board of the school district determines, through analysis pursuant to paragraph (2) of subdivision (b) of Section 44360 of the Health and Safety Code, based on appropriate air dispersion modeling, and after considering any potential mitigation measures, that the air quality at the proposed site is such that neither short-term nor long-term exposure poses significant health risks to pupils.

(D) The governing board finds that neither of the conditions set forth in subparagraph (B) or (C) can be met, and the school district is unable to locate an alternative site that is suitable due to a severe shortage of sites that meet the requirements in subdivision (a) of Section 17213. If the governing board makes this finding, the governing board shall adopt a statement of Overriding Considerations pursuant to Section 15093 of Title 14 of the California Code of Regulations.

(d) As used in this section:

(1) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substance identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(2) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(3) "Acutely hazardous material" means any material defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(4) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(5) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(6) "Administering agency" means any agency designated pursuant to Section 25502 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(8) "Facilities" means any source with a potential to use, generate, emit or discharge hazardous air pollutants, including, but not limited to, pollutants that meet the definition of a hazardous substance, and whose process or operation is

identified as an emission source pursuant to the most recent list of source categories published by the California Air Resources Board.

(9) "Freeway or other busy traffic corridors" means those roadways that, on an average day, have traffic in excess of 50,000 vehicles in a rural area as defined in Section 50101 of the Health and Safety Code, and 100,000 vehicles in an urban area, as defined in Section 50104.7 of the Health and Safety Code.

SEC. 3. Section 21151.8 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.8 >>

21151.8. (a) An environmental impact report or negative declaration * * * may not be approved for any project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless all of the following occur:

(1) The environmental impact report or negative declaration includes information that is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

(A) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

(B) A hazardous substance release site identified by the * * * Department of * * * Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) A site that contains one or more pipelines, situated underground or above-ground, that carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line that is used only to supply natural gas to that school or neighborhood, or other nearby schools.

(D) A site that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor.

(2) The school district, as the lead agency, in preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed schoolsite is located, pursuant to Section 2735.3 of Title 19 of the California Code of Regulations, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify both permitted and nonpermitted facilities within that district's authority, including, but not limited to, freeways and busy traffic corridors, large agricultural operations, and railyards, within one-fourth of a mile of the proposed schoolsite* * *, that might reasonably be anticipated to emit hazardous emissions or handle hazardous or acutely hazardous materials, sub-

stances, or waste. The notification by the school district, as the lead agency, shall include a list of the locations for which information is sought.

(3) The governing board of the school district makes one of the following written findings:

(A) Consultation identified no facilities of this type or other significant pollution sources specified in paragraph (2).

(B) The facilities or other pollution sources specified in paragraph (2) exist, but one of the following conditions applies:

(i) The health risks from the facilities or other pollution sources do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities or other pollution sources will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes * * * a finding pursuant to this clause, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

(iii) For a schoolsite with a boundary that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor, the governing board of the school district determines, through analysis pursuant to paragraph (2) of subdivision (b) of Section 44360 of the Health and Safety Code, based on appropriate air dispersion modeling, and after considering any potential mitigation measures, that the air quality at the proposed site is such that neither short-term nor long-term exposure poses significant health risks to pupils.

(C) The facilities or other pollution sources specified in paragraph (2) exist, but conditions in clause (i), (ii) or (iii) of subparagraph (B) cannot be met, and the school district is unable to locate an alternative site that is suitable due to a severe shortage of sites that meet the requirements in subdivision (a) of Section 17213 of the Education Code. If the governing board makes this finding, the governing board shall adopt a statement of Overriding Considerations pursuant to Section 15093 of Title 14 of the California Code of Regulations.

(4) Each administering agency, air pollution control district, or air quality management district receiving written notification from a lead agency to identify facilities pursuant to paragraph (2) shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. The environmental impact report or negative declaration shall be conclusively presumed to comply with this section as to the area of responsibility of

 2003 Cal. Legis. Serv. Ch. 668 (S.B. 352) (WEST)
 (Publication page references are not available for this document.)

Page 7

any agency that does not respond within 30 days.

(b) If a school district, as a lead agency, has carried out the consultation required by paragraph (2) of subdivision (a), the environmental impact report or the negative declaration shall be conclusively presumed to comply with this section, notwithstanding any failure of the consultation to identify an existing facility or other pollution source specified in paragraph (2) of subdivision (a).

(c) As used in this section and Section 21151.4, the following definitions shall apply:

(1) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(2) "Acutely hazardous material" means any material defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(5) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(6) "Administering agency" means an agency designated pursuant to Section 25502 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(8) "Facilities" means any source with a potential to use, generate, emit or discharge hazardous air pollutants, including, but not limited to, pollutants that meet the definition of a hazardous substance, and whose process or operation is identified as an emission source pursuant to the most recent list of source categories published by the California Air Resources Board.

(9) "Freeway or other busy traffic corridors" means those roadways that, on an average day, have traffic in excess of 50,000 vehicles in a rural area, as defined in Section 50101 of the Health and Safety Code, and 100,000 vehicles in an urban area, as defined in Section 50104.7 of the Health and Safety Code.

CHAPTER 148
A.B. No. 2720
LOCAL AGENCIES--ENVIRONMENTAL PROTECTION--SCHOOLS AND SCHOOL DISTRICTS

AN ACT to amend Sections 21151.4 and 21151.8 of the Public Resources Code, relating to the environment.

[Filed with Secretary of State July 18, 2008.]

LEGISLATIVE COUNSEL'S DIGEST

AB 2720, Levine. Environment: environmental impact report.

(1) The California Environmental Quality Act (CEQA) requires a lead agency to prepare, or cause to be prepared by contract, and certify the completion of, an environmental impact report on a project that it proposes to carry out or approve that may have a significant effect on the environment, or to adopt a negative declaration if it finds that the project will not have that effect.

CEQA prohibits an environmental impact report or negative declaration from being approved for any project involving the purchase of a school site or the construction of a new elementary or secondary school by a school district unless specified conditions are met. CEQA further provides that, if a school district, as the lead agency, has carried out a specified consultation, the environmental impact report or the negative declaration shall be conclusively presumed to comply with those conditions, notwithstanding any failure of the consultation to identify an existing facility or other pollution source, as specified.

This bill would make technical, nonsubstantive changes in these provisions and would revise a cross-reference.

(2) CEQA prohibits the certification of an environmental impact report or the approval of a negative declaration for a project involving the construction or alteration of a facility within 1/4 of a mile from a school that might reasonably be anticipated to emit hazardous air emissions or a mixture containing extremely hazardous substances that may pose a health or safety hazard to persons who would attend or would be employed at the school unless a specified event occurs.

This bill would define "hazardous air emissions" and "extremely hazardous substances" for the purposes of that provision.

The people of the State of California do enact as follows:

SECTION 1. Section 21151.4 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.4 >>

21151.4. (a) An environmental impact report shall not be certified or a negative declaration shall not be approved for any project involving the construction or alteration of a facility within one-fourth of a mile of a school that might reasonably be anticipated to emit hazardous air emissions, or that would handle an extremely hazardous substance or a mixture containing extremely hazardous substances in a quantity equal to or greater than the state threshold quantity specified pursuant to subdivision (j) of Section 25532 of the Health and Safety Code, that may pose a health or safety hazard to persons who would attend or would be employed at the school, unless both of the following occur:

(1) The lead agency preparing the environmental impact report or negative declaration has consulted with the school district having jurisdiction regarding the potential impact of the project on the school.

(2) The school district has been given written notification of the project not less than 30 days prior to the proposed certification of the environmental impact report or approval of the negative declaration.

(b) As used in this section, the following definitions apply:

(1) "Extremely hazardous substance" means an extremely hazardous substance as defined pursuant to paragraph (2) of subdivision (g) of Section 25532 of the Health and Safety Code.

(2) "Hazardous air emissions" means emissions into the ambient air of all contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located, as determined by the air pollution control officer; hazardous air emissions also means emissions into the ambient air of a substance identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

SEC. 2. Section 21151.8 of the Public Resources Code is amended to read:

<< CA PUB RES § 21151.8 >>

21151.8. (a) An environmental impact report shall not be certified or a negative declaration shall not be approved for a project involving the purchase of a school site or the construction of a new elementary or secondary school by a school district unless all of the following occur:

(1) The environmental impact report or negative declaration includes information that is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

(A) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

(B) A hazardous substance release site identified by the Department of Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) A site that contains one or more pipelines, situated underground or aboveground, that carries hazardous substances, extremely hazardous substances, or hazardous wastes, unless the pipeline is a natural gas line that is used only to supply natural gas to that school or neighborhood, or other nearby schools.

(D) A site that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor.

(2) (A) The school district, as the lead agency, in preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed school site is located, pursuant to Section 2735.3 of Title 19 of the California Code of Regulations, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify both permitted and nonpermitted facilities within that district's authority, including, but not limited to, freeways and busy traffic corridors, large agricultural operations, and railyards, within one-fourth of a mile of the proposed school site, that might reasonably be anticipated to emit hazardous emissions or handle hazardous or extremely hazardous substances or waste. The notification by the school district, as the lead agency, shall

include a list of the locations for which information is sought.

~~(B) Each administering agency, air pollution control district, or air quality management district receiving written notification from a lead agency to identify facilities pursuant to subparagraph (A) shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. The environmental impact report or negative declaration shall be conclusively presumed to comply with subparagraph (A) as to the area of responsibility of an agency that does not respond within 30 days.~~

~~(C) If the school district, as a lead agency, has carried out the consultation required by subparagraph (A), the environmental impact report or the negative declaration shall be conclusively presumed to comply with subparagraph (A), notwithstanding any failure of the consultation to identify an existing facility or other pollution source specified in subparagraph (A).~~

(3) The governing board of the school district makes one of the following written findings:

(A) Consultation identified no facilities of this type or other significant pollution sources specified in paragraph (2).

(B) The facilities or other pollution sources specified in paragraph (2) exist, but one of the following conditions applies:

(i) The health risks from the facilities or other pollution sources do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities or other pollution sources will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes a finding pursuant to this clause, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

(iii) For a school site with a boundary that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor, the governing board of the school district determines, through analysis pursuant to paragraph (2) of subdivision (b) of Section 44360 of the Health and Safety Code, based on appropriate air dispersion modeling, and after considering any potential mitigation measures, that the air quality at the proposed site is such that neither short-term nor long-term exposure poses significant health risks to pupils.

(C) The facilities or other pollution sources specified in paragraph (2) exist, but conditions in clause (i), (ii), or (iii) of subparagraph (B) cannot be met, and the school district is unable to locate an alternative site that is suitable due to a severe shortage of sites that meet the requirements in subdivision (a) of Section 17213 of the Education Code. If the governing board makes this finding, the governing board shall adopt a statement of overriding considerations pursuant to Section 15093 of Title 14 of the California Code of Regulations.

~~(b)~~ As used in this section***, the following definitions shall apply:

(1) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(2) "Extremely hazardous substances" means ***~~an extremely hazardous substance as defined pursuant to paragraph (2) of~~ subdivision ~~(g)~~ of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(5) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health

and Safety Code.

(6) "Administering agency" means an agency ~~authorized~~ pursuant to Section 25502 of the Health and Safety Code ~~to implement and enforce Chapter 6.95 (commencing with Section 25500) of Division 20 of the Health and Safety Code.~~

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(8) "Facilities" means any source with a potential to use, generate, emit, or discharge hazardous air pollutants, including, but not limited to, pollutants that meet the definition of a hazardous substance, and whose process or operation is identified as an emission source pursuant to the most recent list of source categories published by the California Air Resources Board.

(9) "Freeway or other busy traffic corridors" means those roadways that, on an average day, have traffic in excess of 50,000 vehicles in a rural area, as defined in Section 50101 of the Health and Safety Code, and 100,000 vehicles in an urban area, as defined in Section 50104.7 of the Health and Safety Code.

CHAPTER 130
A.B. No. 299
MAINTENANCE OF CODES

SEC. 206. Section ~~21151.8~~ of the Public Resources Code is amended to read:

<< CA PUB RES § ~~21151.8~~ >>

- ~~21151.8~~. (a) An environmental impact report or negative declaration may not be approved for any project involving the purchase of a school site or the construction of a new elementary or secondary school by a school district unless all of the following occur:
- (1) The environmental impact report or negative declaration includes information that is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:
 - (A) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.
 - (B) A hazardous substance release site identified by the Department of Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.
 - (C) A site that contains one or more pipelines, situated underground or aboveground, that carries hazardous substances, **extremely** hazardous **substances**, or hazardous wastes, unless the pipeline is a natural gas line that is used only to supply natural gas to that school or neighborhood, or other nearby schools.
 - (D) A site that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor.
 - (2) The school district, as the lead agency, in preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed school site is located, pursuant to Section 2735.3 of Title 19 of the California Code of Regulations, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify both permitted and nonpermitted facilities within that district's authority, including, but not limited to, freeways and busy traffic corridors, large agricultural operations, and railyards, within one-fourth of a mile of the proposed school site, that might reasonably be anticipated to emit hazardous emissions or handle hazardous or **extremely** hazardous ~~***~~substances ~~***~~ or waste. The notification by the school district, as the lead agency, shall include a list of the locations for which information is sought.
 - (3) The governing board of the school district makes one of the following written findings:
 - (A) Consultation identified no facilities of this type or other significant pollution sources specified in paragraph (2).
 - (B) The facilities or other pollution sources specified in paragraph (2) exist, but one of the

following conditions applies:

(i) The health risks from the facilities or other pollution sources do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities or other pollution sources will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes a finding pursuant to this clause, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

(iii) For a school site with a boundary that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor, the governing board of the school district determines, through analysis pursuant to paragraph (2) of subdivision (b) of Section 44360 of the Health and Safety Code, based on appropriate air dispersion modeling, and after considering any potential mitigation measures, that the air quality at the proposed site is such that neither short-term nor long-term exposure poses significant health risks to pupils.

(C) The facilities or other pollution sources specified in paragraph (2) exist, but conditions in clause (i), (ii) or (iii) of subparagraph (B) cannot be met, and the school district is unable to locate an alternative site that is suitable due to a severe shortage of sites that meet the requirements in subdivision (a) of Section 17213 of the Education Code. If the governing board makes this finding, the governing board shall adopt a statement of Overriding Considerations pursuant to Section 15093 of Title 14 of the California Code of Regulations.

(4) Each administering agency, air pollution control district, or air quality management district receiving written notification from a lead agency to identify facilities pursuant to paragraph (2) shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. The environmental impact report or negative declaration shall be conclusively presumed to comply with this section as to the area of responsibility of any agency that does not respond within 30 days.

(b) If a school district, as a lead agency, has carried out the consultation required by paragraph (2) of subdivision (a), the environmental impact report or the negative declaration shall be conclusively presumed to comply with this section, notwithstanding any failure of the consultation to identify an existing facility or other pollution source specified in paragraph (2) of subdivision (a).

(c) As used in this section and Section 21151.4, the following definitions shall apply:

(1) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(2) "**Extremely** hazardous **substances**" means any material defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(5) "Hazardous air emissions" means emissions into the ambient air of air contaminants that have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health

and Safety Code.

(6) "Administering agency" means an agency designated pursuant to Section 25502 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(8) "Facilities" means any source with a potential to use, generate, emit, or discharge hazardous air pollutants, including, but not limited to, pollutants that meet the definition of a hazardous substance, and whose process or operation is identified as an emission source pursuant to the most recent list of source categories published by the California Air Resources Board.

(9) "Freeway or other busy traffic corridors" means those roadways that, on an average day, have traffic in excess of 50,000 vehicles in a rural area, as defined in Section 50101 of the Health and Safety Code, and 100,000 vehicles in an urban area, as defined in Section 50104.7 of the Health and Safety Code.

Re: Draft Staff Analysis, Schedule for Comments, and Hearing Date
School Facilities Funding Requirements, 02-TC-30, and 02-TC-43
Education Code Sections 15271, et al.
Clovis Unified School District, Claimant

Dear Mr. Johnston:

The draft staff analysis on the above-named matter is enclosed for your review and comment.

Written Comments

Any party or interested person may file written comments on the draft staff analysis by Friday, **February 18, 2011**. You are advised that comments filed with the Commission are required to be simultaneously served on the other interested parties on the mailing list, and to be accompanied by a proof of service. However, this requirement may also be satisfied by electronically filing your documents on the Commission's website. Please see the Commission's website at http://www.csm.ca.gov/dropbox_procedures.shtml for instructions on electronic filing. (Cal. Code Regs., tit. 2, § 1181.2.) If you would like to request an extension of time to file comments, please refer to section 1183.01, subdivision (c)(1), of the Commission's regulations.

Hearing

This matter is set for hearing on **Thursday, March 24, 2011**, at 9:30 a.m. in Room 447, State Capitol, Sacramento, CA. The final staff analysis will be issued on or about March 10, 2011. Please let us know in advance if you or a representative of your agency will testify at the hearing, and if other witnesses will appear. If you would like to request postponement of the hearing, please refer to section 1183.01, subdivision (c)(2), of the Commission's regulations.

Please contact Heather Halsey at (916) 445-9429 if you have any questions or concerns regarding this matter.

Sincerely,

Drew Bohan
Executive Director

School Facilities Funding Requirements

02-TC-30, 02-TC-43 and 09-TC-01

Clovis Unified School District, Claimant

EXECUTIVE SUMMARY

I. Overview

This test claim addresses the activities required of school districts to comply with school facilities funding requirements (SFFRs). There is a glossary of frequently used acronyms to guide the reader at the back of this analysis on page 68. If a school district makes a decision to build or modernize a school, it must determine how to fund that construction. Generally, a school can seek grant funding from the state through the State School Facility Program (SFP), which is funded through state bonds or it may issue local bonds pursuant to one of several local bond acts. Schools usually rely on a combination of SFP and local bond funding for facilities.

If a school district decides to issue local bonds, it must comply with the public disclosure and other accountability requirements contained within the act under which the district decides to issue bonds. If a school district decides to seek state bond funding through the SFP (i.e. grant funding), the district must comply with various planning, environmental, building safety, labor, public participation/disclosure, and bond funding accountability requirements as a condition of receipt of that funding which includes preparation of hazardous materials assessments (HMA) and performing many of the other activities pled in this consolidated test claim.

HMAs are conducted to provide basic information for determining if there has been a release, or there is a threatened release of a hazardous material, or if there may be a naturally occurring hazardous material present at the site which may pose a risk to human health or the environment. A Phase I Assessment must be prepared to identify the potential for hazardous material release or the presence of naturally occurring hazardous materials. If such a potential is found then a Preliminary Endangerment Assessment (PEA) is required to evaluate the threat posed to public health or the environment. The California Education Code requires The Department of Toxic Substances Control (DTSC) to review Phase I Assessments and PEAs, and to make a determination about the need for further action or remediation.¹ School districts may elect to proceed directly to a PEA without having first completed a Phase I Assessment which can reduce costs when there is a known hazardous material present.²

There are two other programs pled in this test claim that do not fit neatly into the SFP funding or local bond funding categories:

1. The State Relocatable Classroom Law of 1979 under which claimant alleges costs for activities related to the lease of portable classrooms from the state, and
2. The California School Finance Authority Act, under which a school district may borrow funds from the state which are generally repaid with future Proposition 98 funds.

¹ Education Code section 17213.2.

² Education Code section 17213.1.

II. Positions of the Parties and Interested Parties

A. Claimant's Position

Claimant generally alleges that all of the activities it must perform to receive state funding, issue local bonds, or participate in other joint state-local programs pled for school facility projects (i.e. new building, modernization and renovation or leasing portable classroom), including the requirement to pay a local share of costs, are new and reimbursable under Article XIII B, section 6 of the California Constitution. In essence, claimant is alleging that the state is legally required to provide 100 percent of funding for all school facility project-related costs, including all of the environmental compliance, accountability and public notice requirements for the issuance of local bonds and other related costs pled in this consolidated test claim. Claimant also disputes the arguments put forth by the Department of Finance (DOF), the Department of Education (DOE), and the Department of Toxic Substances Control (DTSC) that a school district's participation in the underlying programs at issue are elective or optional and neither legally nor practically compelled, citing to cases and reports that discuss the need for school facilities.

B. Department of Finance's Position

DOF states that the school district's participation in the Leroy F. Greene School Facilities Act (i.e. SFP funding) is strictly voluntary and the result of elective action taken by the governing board of the district. DOF argues that nothing in state law or regulation requires a school district to construct additional school facilities or to acquire any site for the purpose of constructing a school building. Instead, the law provides school districts with flexibility, discretion, and choice over the manner in which districts elect to house their student populations. For example, school districts have the discretion to operate year round multi-track schools or two kindergarten sessions per day, use portable classrooms or transport students to underused schools. It is the district's voluntary decision to construct a school facility rather than using the aforementioned alternative that forced the district to carry out the activities required as a condition of receiving state funding from the SFP. DOF states that the costs incurred to comply with SFP requirements are allowable costs for the use of new construction grants provided by the State Allocation Board. Finally, DOF argues that school districts have the authority to charge development fees to finance construction projects.

C. Department of Education's Position

DOE states that the test claim statutes in 02-TC-30 (*School Facilities Funding Requirements*) do not impose a state-mandated program because each of the programs pled is but "one of various funding mechanisms available to school districts for the funding of facilities. School districts elect to participate in [these programs] and any requirements regarding [these programs] are applicable only after districts elect to participate. . . ."³

D. Department of Toxic Substances Control's Position

DTSC argues that school districts are not legally or practically compelled to meet HMA requirements because "district participation in the underlying program is elective or optional."⁴ Specifically, DTSC argues that conditions imposed under the SFP as a condition of receipt of

³ DOE, comments on the test claim (02-TC-30), p. 1.

⁴ DTSC, comments on the test claim (02-TC-43), *supra*, p. 1.

state funding in this test claim are analogous to state-funded educational programs that were at issue in *Kern Department of Finance v. Commission in State Mandates (Kern)* (2003) 30 Cal. 4th 727, which were determined not to impose a mandate since there was local discretion to participate in the underlying program that triggered the downstream requirements. DTSC also argues that school districts are not practically compelled because, though there may be no feasible alternative to participation in the state funding program for school construction projects where HMA costs are sizable, “districts may elect to stop pursuing such a high cost site at any time without compulsion or penalty.”

DTSC also argues, “school districts have authority to levy fees to fund their share of costs under Education Code section 17556, subdivision (d), and *Connell v. Superior Court* (1997) 59 Cal.App.4th 382.”⁵ DTSC points out that Government Code section 17556, subdivision (d), prohibits the Commission from determining costs are mandated by the state if it finds that the district “has the authority to levy service charges, fees or assessments sufficient to pay for the mandated program or increased level of service.”⁶ DTSC refers the Commission to Education Code section 17620 (development fee), Government Code section 53311 (Mello-Roos fee), and Education Code section 15350 (school facilities improvement districts bond authority) for some examples of potential revenue sources for school districts.⁷

DTSC also argues that the state already routinely funds half of the HMA costs and funds up to 100 percent of the costs in cases of economic hardship under Education Code sections 17072.12, 17072.13, and 17072.18.⁸

Additionally, DTSC states, “jointly funded programs such as school funding are outside the coverage of Section 6, article XIII B of the California Constitution. . . under *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal. App.4th 1264 (*County of Sonoma*).”⁹

Finally, DTSC argues that the preparation of HMAs is a condition of funding and “compliance with these funding conditions fails to provide a new program or higher level of service to the public to qualify as a reimbursable state mandate under *County of Sonoma*.”¹⁰ DTSC argues that prior to 1975, the state did not fund site acquisition and investigation costs, so the state has not shifted state program costs to the districts.¹¹ Specifically, DTSC states:

Here, the program at issue concerns school facility safety, an area that the state has long regulated to assure safety of school children in facilities for compulsory education. (Former Educ. Code § 39002; *Hall v. City of Taft* (1956) 47 Cal. 2nd 177, 185-186.) A mandate is a new program if the local entity had not been previously required to implement it. (*County of Los Angeles v. Commission on*

¹¹ *Id.*, p. 7.

State Mandates (2003) 110 Cal.App.4th 1176 at p. 1189 (*Los Angeles* 2003.) However, to qualify for reimbursement, the program must be one that the state previously funded in whole and would newly be funded solely by local tax revenues and not by other levies. (*Los Angeles* 2003, *supra*, 110 Cal. App.4th at 1193, citing *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal. App. 4th 1264 at p. 1289.)

DTSC states that HMAs do not provide a new service to the public. Instead, they require research and periodic evaluation at key decision points, such as the Phase I Assessment and PEA, to help inform public spending decisions to assure reasonable use of state school facility funds.¹² This increased level of information also protects against commitment to sites with unknown contamination levels. In addition, these processes assure that the site is reasonably safe for its intended use: occupancy by children for compulsory education. The situation here is similar to *County of Los Angeles v. Department of Industrial Relations* where the court found costs of complying with new elevator and earthquake safety standards were not reimbursable as state mandates because they provided no new or increased level of service to the public.¹³

III. Procedural History

The *School Facilities Funding Requirements* (02-TC-30) test claim was filed with the Commission on June 04, 2003. The *Hazardous Materials Assessments* (02-TC-43) test claim was filed with the Commission on June 23, 2003. Between 2003 and 2010, various parties requested and received multiple extensions to file comments on both of these test claims. During this period the Commission received comments from the claimant, DOE, DTSC and DOF. On January 25, 2010, 02-TC-30 and 02-TC 43 were consolidated under the name *School Facilities Funding Requirements*, since the requirement to prepare a hazardous materials assessment is also a school facilities funding requirement and there was some overlap in statutes pled. On May 27, 2010, an amendment to the consolidated test claim (09-TC-01) was filed. The potential reimbursement period for any reimbursable state-mandated new programs or higher level of service found in this consolidated test claim begins on July 1, 2001.

IV. Commission's Responsibility

Under article XIII B, section 6 of the California Constitution, local governments and school districts are entitled to reimbursement for the costs of state-mandated new programs or higher levels of service. In order for local governments or school districts to be eligible for reimbursement, one or more similarly situated local governments or school districts must file a test claim with the Commission. "Test claim" means the first claim filed with the Commission alleging that a particular statute or executive order imposes costs mandated by the state. Test claims function similarly to class actions and all members of the class have the opportunity to participate in the test claim process and all are bound by the final decision of the Commission for purposes of that test claim.

The Commission is the quasi-judicial body vested with exclusive authority to adjudicate disputes over the existence of state-mandated programs within the meaning of article XIII B, section 6.

¹² DTSC, comments on the test claim (02-TC-43), *supra*, p. 10.

¹³ *Ibid.*

In making its decisions, the Commission cannot apply article XIII B as an equitable remedy to cure the perceived unfairness resulting from political decisions on funding priorities.¹⁴

V. Claims

The following chart provides a brief summary of the claims and issues raised by the claimant, and staff's recommendation.

Claim	Description	Issues	Staff Recommendation
Education Code section 17213.1, as added by Statutes of 1999, chapter 1002.	This section requires, as a condition of receipt of SFP funding, that prior to acquiring a schoolsite, the school district contract with an environmental assessor to supervise the preparation of, and sign, a Phase I Assessment of the proposed schoolsite unless the district decides to proceed directly to a PEA.	Claimant alleges the requirement to prepare HMAs as a condition of SFP funding imposes state-mandated costs.	<u>Denied:</u> The Commission does not have jurisdiction over Education Code section 17213.1, as added by Statutes of 1999, chapter 1002, because this statute was the subject of a final decision of the Commission, <i>Acquisition of Agricultural Land for a School Site</i> (98-TC-04 and 01-TC-03).
Education Code sections 39003 and 39120	These sections are similar to Public Resources Code sections 21151.4 and 21151.8 (related to HMAs) which are also pled in this test claim.	Claimant alleges the activities required by these statutes impose state-mandated costs.	<u>Denied:</u> Education Code sections 39003 and 39120 were repealed by Statutes 1996, chapter 277 (S.B.1562), section 6, operative January 1, 1998 and thus cannot be reimbursable.
Health and Safety Code section 25358.1	Imposes requirements on "any potentially responsible party, or any person who has or may have, acquired information relevant to [specified hazardous substance release related matters] in the course of commercial, ownership, or contractual relationship with any potentially responsible party." ¹⁵	Claimant alleges the activities required by this statute impose state-mandated costs.	<u>Denied:</u> The requirements imposed are not unique to government but apply generally to all residents and entities in the state.

¹⁴ *City of San Jose v. State of California* (1996) 45 Cal.App.4th 1802.

¹⁵ Health and Safety Code section 25358.1, subdivision (b).

Health and Safety Code Section 25358.7.1	Authorizes formation of a community advisory committee “to review any response action and comment on the response action to be conducted in that community” which DTSC is required to regularly communicate, and confer with as appropriate.	Claimant alleges the activities required by this statute impose state-mandated costs.	<u>Denied:</u> Based on the plain language of this statute, Health and Safety Code section 25358.7.1 requires DTSC to perform activities but does not mandate school districts to perform any activities.
The Substantial Progress and Expenditure Audit Guide of May ‘03, The SFP Guidebook of Jan ‘03, The State Relocatable Classroom Program Handbook of Jan ‘03, and The Lease-Purchase Applicant Handbook of Apr ‘98	These guidebooks generally provide an overview of their respective programs and guide school districts and others through the funding and approval processes citing to specific statutory and regulatory authority.	Claimant alleges the claimed guidebooks are executive orders that impose state-mandated costs.	<u>Denied:</u> The claimed guidebooks do not meet the definition of “executive order” under Government Code section 17516 since they do not require performance of activities not required by statute or duly adopted regulation.
Conditions of SFP funding (including HMAs), issuance of local bonds and participation in other voluntary programs (e.g. the lease of portable classrooms)	Conditions of SFP funding include planning, environmental, building safety, labor, public participation/disclosure and bond funding accountability requirements. The State Relocatable Classroom Law and California School Finance Authority Act also impose requirements.	Claimant alleges the requirement to perform activities impose state-mandated costs.	<u>Denied:</u> School districts are not legally compelled, and there is no evidence in the record that school districts are practically compelled, to participate in the programs pled.

VI. Analysis

Staff makes the following findings:

- A. The Commission does not have jurisdiction over Education Code section 17213.1, as added by Statutes of 1999, chapter 1002, because this statute was the subject of a final decision of the Commission, Acquisition of Agricultural Land for a School Site (98-TC-04 and 01-TC-03).**

The Commission has adopted a prior test claim related to school facility finance requirements that made specific findings on one of the statutes pled in this test claim. This prior decision is a final, binding decision which is relevant to the issue of jurisdiction.

In *Acquisition of Agricultural Land for a School Site* (98-TC-04 and 01-TC-03), the Commission found that Education Code section 17213.1, as added by Statutes of 1999, chapter 1002, did not impose a reimbursable state mandate on school districts because “the procedures a school district

must follow when it seeks state funding pursuant to the Leroy Greene School Facilities Act of 1998 (commencing with Educ. Code, § 17070.10) are not state-mandated because the school district is not required to request state funding under section 17213.1.”¹⁶

B. The Remaining Test Claim Statutes And Alleged Executive Orders Are Not Subject To Reimbursement Under Article XIII B, Section 6 of The California Constitution Because:

- 1. Education Code sections 39003 and 39120 have been repealed since January 1, 1998, prior to the beginning of the potential reimbursement period for this test claim and thus cannot be reimbursable.**

Education Code sections 39003 and 39120 were repealed by Statutes 1996, chapter 277 (S.B.1562), section 6, operative January 1, 1998. Because they have not been operative at any time during the reimbursement period, they cannot be reimbursable.

- 2. The Audit Guides and Handbooks Claimed are not Executive Orders Subject to Article XIII B, Section 6.**

Staff finds that the Substantial Progress and Expenditure Audit Guide of May 2003, the School Facility Program Guidebook of January 2003, the State Relocatable Classroom Program Handbook of January 2003, and the Lease-Purchase Applicant Handbook of April 1998 are not executive orders. An executive order is “any order, plan, requirement, rule or regulation” issued by the Governor or any official serving at the pleasure of the Governor.¹⁷ Although the above-mentioned audit guide, guidebook and handbooks are issued by state agency directors who serve at the pleasure of the Governor, they do not impose an “order, plan, requirement, rule or regulation.”

- 3. Health and Safety Code Section 25358.1 as Added By Statutes 1999, Chapter 23 Does Not Impose a State-Mandated Program On School Districts Subject to Article XIII B, Section 6 of the Constitution Because The Requirements It Imposes Are Not Unique to Government.**

Health and Safety Code Section 25358.1 imposes several requirements on “any potentially responsible party, or any person who has or may have, acquired information relevant to [specified hazardous substance release related matters] in the course of commercial, ownership, or contractual relationship with any potentially responsible party.” Health and Safety Code Section 25358.1 by its own terms applies to all potentially responsible parties, both private and public. As the *County of Los Angeles v. Department of Industrial Relations*¹⁸ court explained, “[w]ere section 6 construed to require state subvention for the incidental cost to local governments of general law, the result would be far-reaching indeed.”¹⁹ There, the court found

¹⁶ *Acquisition of Agricultural Land for a School Site* (98-TC-04 and 01-TC-03), p. 14. Note that section 17213.1 was amended by Statutes 2000, chapter 443 and Statutes 2002, chapter 935 which were also pled in this test claim and are not the subject of a final Commission decision. Therefore, those statutes are addressed below.

¹⁷ Government Code section 17516.

¹⁸ *County of Los Angeles v. Department of Industrial Relations* (1989) 214 Cal. App.3d 1538.

¹⁹ *County of Los Angeles v. State of California, supra*, p. 56.

that the regulations were not a program because the regulations did not impose a unique requirement on local government and “[p]roviding elevators equipped with fire and earthquake safety features simply is not ‘a governmental function of providing services to the public.’”²⁰ Likewise here, staff finds that the requirement that potentially responsible parties disclose information and provide access to DTSC or the applicable regional water quality control board is not unique to government but applies generally to all residents and entities in the state who find themselves in the position of being a potentially responsible party for purposes of CERCLA/Superfund.

As the requirements of Health and Safety Code Section 25358.1 as added by Statutes 1999, chapter 23 applies to both public and private entities, not just those which are publicly owned, it does not impose a “unique requirement” on local governments, and thus it does not meet the second definition of “program” established by *County of Los Angeles*.

Providing access to facilities and disclosure about the release of hazardous substances for which one may be liable is not “a governmental function of providing services to the public” and is not unique to government. Therefore, staff finds that Health and Safety Code Section 25358.1 as added by Statutes 1999, chapter 23 does not impose a new program or higher level of service subject to reimbursement under Article XIII B, section 6 of the California Constitution.

4. Health and Safety Code section 25358.7.1, as added by Statutes 1999, chapter 23, Does Not Impose Any Activities or State-Mandated Duties on School Districts Within the Meaning of Article XIII B, Section 6 of the California Constitution.

Health and Safety Code section 25358.7.1 authorizes the formation of a community advisory committee “to review any response action and comment on the response action to be conducted in that community” and requires DTSC to regularly communicate, and confer as appropriate, with the community advisory committee. Based on the plain language of this statute, Health and Safety Code section 25358.7.1 requires DTSC to perform activities but does not mandate school districts to perform any activities. Therefore, staff finds that Health and Safety Code section 25358.7.1, as added by Statutes 1999, chapter 23 does not impose state-mandated duties on school districts within the meaning of Article XIII B, Section 6 of the California Constitution.

5. The Remaining Test Claim Statutes and Regulations Do Not Impose State-Mandated Duties on School Districts Within the Meaning of Article XIII B, Section 6 of the California Constitution.

- a) **School districts are not legally required to acquire new school sites, build new schools, undertake modernization projects, add portable classrooms or to request and accept SFP funding, issue local bonds or opt to participate in other state programs to further such projects, which would trigger the requirement to comply with SFFRs contained in the test claim statutes and regulations.**

The decision to acquire a new school site, build a new school, undertake a school modernization project, add portable classrooms and accept SFP funding, issue local bonds or participate in one

²⁰ *Id.*, p 1545.

of the other voluntary programs pled in this test claim can arise in a myriad of ways, from a district-level decision to an initiative enacted by the voters. Likewise, there are a number of funding sources that a school district might utilize to fund discretionary school construction projects and a number of alternatives to building a new school that a district might consider.

When SFP funding is used to acquire a school site or for school construction, compliance with the applicable SFFRs including the preparation of HMAs and related activities is a condition of funding. Generally, requirements imposed as a condition of SFP funding include various planning, environmental, building safety, labor, public participation/disclosure and bond funding accountability requirements. Likewise, when local bonds are issued, compliance with the requirements of the statutory scheme under which they are issued is required.²¹ These requirements generally include disclosure, voting and fiscal accountability. Similarly the “other” programs referred to in this analysis, the State Relocatable Classroom Law and California School Finance Authority Act impose their own requirements. What all of these requirements have in common; however, is that they are all downstream requirements triggered by a school district’s decision to participate in the overlying program in order to acquire, expand, or modernize school facilities. Therefore, staff finds that school districts are not legally compelled to request or accept state funding, issue local bonds or participate in the other voluntary programs pled thus triggering the SFFRs requirements.

- b) The evidence in the record does not support a finding that school districts are practically compelled to acquire new school sites, build new schools, undertake modernization projects, add portable classrooms or to request and accept SFP funding, issue local bonds or opt to participate in other state programs to further such projects, which would trigger the requirement to comply with SFFRs contained in the test claim statutes and regulations. Rather, the requirement to comply with the SFFRs is triggered by a district’s voluntary decisions to request and accept state matching funds under the SFP, to issue local bonds or to participate in one of the other voluntary programs pled.**

There are no facts in the record to support a finding of practical compulsion. Practical compulsion must be demonstrated by specific facts in the record showing that unless the alleged activity is performed, here the activity of acquiring new school sites, building new school facilities or modernizing existing schools and accepting SFP funding, issuing local bonds or opting to participate in other state programs to further such projects, which would in turn trigger the requirement to comply with the SFFRs that are a condition of those funding programs, the district faces “certain and severe ... penalties’ such as ’double ... taxation’ or other ’draconian’ consequences.” Only a showing that relying on alternative arrangements to house students or

²¹ Note that, as discussed in the background above, when a school district acquires land or builds exclusively with its own funds, which may include funds from the issuance of bonds under some of the test claim statutes, they are exempt from some of the SFFRs (in particular some of the HMA requirements) imposed on districts that build with state funds.

alternative funding sources would result in such severe consequences will meet the practical compulsion standard.

VII. Conclusion

Staff concludes that the test claim statutes do not impose a reimbursable state-mandated program within the meaning of article XIII B, section 6 of the California Constitution for the reasons listed on pages 65-67 of this analysis.

VIII. Staff Recommendation

Staff recommends that the Commission adopt this staff analysis to deny the test claim.

STAFF ANALYSIS

Claimant

Clovis Unified School District

Chronology

- 6/04/2003 Claimant, Clovis Unified School District, filed School Facilities Finance Requirements test claim (02-TC-30) with the Commission on State Mandates (“Commission”)²²
- 6/23/2003 Claimant, Clovis Unified School District, filed Hazardous Materials Assessments test claim (02-TC-43) with the Commission on State Mandates (“Commission”)²³
- 07/11/2003 Commission staff issued completeness review letters for 02-TC-30 and 02-TC-43 and requested comments from state agencies
- 07/29/2003 Department of Finance (DOF) requested an extension of at least 30 days to file comments on test claim 02-TC-43
- 07/30/2003 DOF requested an extension of at least 30 days to file comments on test claim 02-TC-43
- 08/01/2003 The Commission granted DOF’s request allowing an extension to September 11, 2003 to file comments on test claim 02-TC-43
- 08/06/2003 The Commission granted DOF’s request allowing an extension to September 4, 2003 to file comments on test claim 02-TC-30
- 08/11/2003 Department of Education (DOE) submitted comments on test claim 02-TC-30
- 08/26/2003 Department of Toxic Substances Control (DTSC) requested an extension of 45 to file comments on test claim 02-TC-43
- 08/27/2003 The Commission granted DTSC’s request for an extension to October 27, 2004 to file comments on test claim 02-TC-43
- 09/03/2003 The Attorney General’s Office requested an extension to October 8, 2003 to file comments on test claim 02-TC-30
- 09/09/2003 The Commission granted Attorney General’s Office request allowing an extension to October 8, 2003 to file comments on test claim 02-TC-30
- 10/22/2003 The Attorney General’s Office requested an extension to December 18, 2003 to file comments on test claim 02-TC-30

²² Based on the filing date of June 4, 2003, the potential period of reimbursement for 02-TC-30 begins on July 1, 2002.

²³ Based on the filing date of June 27, 2003, the potential period of reimbursement for 02-TC-43 begins on July 1, 2002.

- 09/09/2003 The Commission granted Attorney General's Office request allowing an extension to December 18, 2003 to file comments on test claim 02-TC-30
- 10/27/2003 DTSC submitted comments on test claim 02-TC-43
- 10/28/2003 DOF requested an extension until February 2004 to file comments on test claims 02-TC-30 and 02-TC-43
- 11/07/2003 The Commission granted DOF's request allowing an extension to February 7, 2004 to file comments on test claim 02-TC-30 and 02-TC-43
- 11/26/2003 Claimant submitted a response to DTSC's comments on test claim 02-TC-43
- 01/28/2004 Claimant submitted a correction to its response to DTSC's comments on test claim 02-TC-43
- 02/03/2004 DOF submitted comments on test claim 02-TC-43
- 02/06/2004 DTSC submitted a memo responding to claimant's November 26, 2003 response regarding 02-TC-43
- 02/09/2004 DOF submitted comments on test claim 02-TC-30
- 02/20/2004 Claimant submitted a response to DOF's comments on test claim 02-TC-43
- 02/23/2004 Claimant submitted a response to DTSC's February 6, 2004 memo regarding 02-TC-43
- 01/25/2010 Commission staff issued a Notice of Consolidation of Test Claims and Hearing Date for test claims 02-TC-30 and 02-TC-43
- 04/27/2010 Commission staff issued a Request for Clarification on Test Claim Filing for 02-TC-43
- 05/26/2010 Claimant submitted a test claim amendment 09-TC-01

I. Background

This test claim addresses the activities required of school districts to comply with school facilities funding requirements (SFFRs). If a school district makes a decision to build or modernize a school, it must determine how to fund that construction. Generally, a school can seek grant funding from the state through the State School Facility Program (SFP), which is funded through state bonds and/or it may issue local bonds pursuant to one of several local bond acts. Usually, but not always, schools rely on a combination of state and local bond funding for facilities.

If a school district decides to issue local bonds, it must comply with the public disclosure and other accountability requirements contained within the act under which the district decides to issue bonds, some of which were required by the statewide bond initiatives specifying the voting requirements for the issuance of local bonds. If a school district decides to seek state bond funding through the SFP (i.e. grant funding), the district must comply with various planning, environmental, building safety, labor, public participation/disclosure and bond funding accountability requirements as a condition of receipt of that funding which includes preparation of hazardous materials assessments (HMA) and performing many of the other activities pled in this consolidated test claim.

HMA's are conducted to provide basic information for determining if there has been a release or there is a threatened release of a hazardous material or if there may be a naturally occurring hazardous material present at the site which may pose a risk to human health or the environment. A Phase I Assessment must be prepared to identify the potential for hazardous material release or the presence of naturally occurring hazardous materials. If such a potential is found then a Preliminary Endangerment Assessment (PEA) is required to evaluate the threat posed to public health or the environment. The California Education Code requires DTSC to review Phase I Assessments and PEAs, and to make a determination about the need for further action or remediation.²⁴ School districts may elect to proceed directly to a PEA without having first completed a Phase I Assessment which can reduce costs when there is a known hazardous material present.²⁵

There are two other programs pled in this test claim that do not fit neatly into the state funding or local bond funding categories:

- The State Relocatable Classroom Law of 1979 under which claimant alleges costs for activities related to the lease of portable classrooms from the State; and
- The California School Finance Authority Act, under which a school district may borrow funds from the state which are generally repaid with future Proposition 98 funds.

In order to determine whether the activities to which claimant's alleged costs are connected constitute state-mandated local programs or higher levels of service subject to reimbursement under Article XIII B section 6 of the California Constitution, it is helpful to have an understanding of the history of school facility financing in California and the various programs under which costs are being claimed.

A. A Brief History of the Role of the State in School Facility Finance²⁶

Prior to 1976, school facilities were funded entirely by local tax revenues with the assistance of state loans and land grants and private donations. From the early days of California statehood until 1933, state involvement in school facility finance was restricted to providing land grants to local communities for the purpose of establishing public schools. The California Constitution set aside large tracts of public land for the creation of public schools and required that every district in the state operate a public school for at least three months a year. The construction and renovation of these schools was financed entirely with local tax revenue. In fact, in the late 1960's over 90 percent of public school funding came from local property taxes, supplemented by the State School Fund.²⁷

²⁴ Education Code section 17213.2.

²⁵ Education Code section 17213.1.

²⁶ In addition to the citations to specific sources, this overview draws extensively from the history of California school facility finance provided by two reports: *School Facility Financing – A History of the Role of the State Allocation Board and Options for the Distribution of Proposition 1A Funds* (Cohen, Joel, February 1999) and *Financing School Facilities in California* (Brunner, Eric J., October 2006).

²⁷ *County of Sonoma v. Commission on State Mandates*, "County of Sonoma" (2000), 84 Cal. App. 4th 1264, 1271. (Citing *Serrano v. Priest* (1971) 5 Cal. 3d 584, 591 & fn. 2 (*Serrano I.*))

The Long Beach earthquake struck just hours after classes ended on March 10, 1933 “and caused numerous school buildings in Long Beach and surrounding communities to collapse which provoked ‘public outcry over the vulnerability of school building to earthquake-related damage.’ In response, the state Legislature passed the Field Act on April 10th 1933.”²⁸ The Act mandated the Division of the State Architect (DSA) to develop earthquake-resistant design and construction for all public schools in the state. It also required architects, engineers and inspectors to file reports verifying that schools were in compliance with the provisions of the Field Act.²⁹ Thus, state involvement in school construction and renovation began with state oversight of construction design and mandatory construction inspections. Although the Field Act has been amended over time, the basic requirements of the Act have been continuously in place.

The State Allocation Board was created in 1947, and was directed by the state Legislature to allocate state funds for school construction and renovation. Originally, the funds allocated were loans to the local districts. Beginning in the 1970’s, however, school facility finance began to evolve from a locally-financed system to a system best described as a partnership between local school districts and the state. First, in 1971, the disparity created by reliance on the value of a district’s real estate was found to impermissibly discriminate in *Serrano I*.³⁰ After *Serrano I*, the state increased the amount of state aid to schools and tied limitations to inflation adjustments such that schools with lower local revenues received higher upward inflation adjustments. At this point, “...financial responsibility was still primarily with local government, with the state supplying aid in an attempt to remedy the deficiencies identified by the court”³¹ in *Serrano I*.

In 1976, in *Serrano II*³² the court determined that the Legislature’s actions to remedy the inequities were insufficient and that the school finance system “impermissibly ‘renders the educational opportunity available to the students of this state a function of the taxable wealth [per pupil] of the districts in which they live.’”³³ The Legislature then passed further legislation, Assembly Bill 65, (Stats. 1977, ch. 894) which would have back-filled poorer districts’ revenues with state assistance, if actual revenues fell below a scheduled amount and would also transfer some revenues from high to low wealth districts. School finance though, even under this scheme, would have remained a jointly funded system, with the majority of funds coming from local property tax revenues. However, before Assembly Bill 65 could take effect, the voters enacted Proposition 13 in 1978, which fundamentally altered the ability of local governments to raise funds through local property tax revenues.

²⁸ Brunner, p. 4, citing Heumann, Leslie, *Preliminary Historic Resources Survey of the Los Angeles Unified School District: Historic Context Statement*, prepared for the Los Angeles Unified School District Facilities Services Division by Science Applications International Corporation, Los Angeles, CA, March 2002, p. 9.

³³ *County of Sonoma*, *supra*, 84 Cal. App. 4th 1264, 1271, (citing *Serrano II*).

Between 1970 and 1982, student enrollment in California's public schools was declining and hence there was little demand for state funds. However, Proposition 13 eliminated the ability of local school districts to levy additional special property taxes to pay off their facility indebtedness and capped the ad valorem tax rate on real property at one percent of its value, thereby reducing the income from property taxes to such an extent that it virtually eliminated this source as a means for lease payments. Proposition 13 also prohibited the electorate of a school district from authorizing a tax over-ride to pay debt service on bonds for the purpose of constructing needed school facilities.

The enactment of the Leroy Greene State School Building Lease-Purchase Law in 1976³⁴ marked the beginning of the transition from state loan to state grant funding of school facilities. However, in June of 1976 the voters rejected the bond initiative that was necessary to fund the Lease Purchase Program. Because of declining enrollment, the lack of funding did not pose a problem for most school districts for several years.³⁵ Eventually, however, the Legislature and the voters provided funding for the lease-purchase program through several bond initiatives and also provided school districts with authority to raise local funds through the Mello-Roos Community Facilities District Act and the imposition of developer fees, neither of which have been pled in this test claim. The Lease-Purchase Law significantly altered the state's role in how school facilities construction was financed. This law established a state fund to provide loans to school districts for reconstruction, modernization, and replacement of school facilities that were more than 30 years old. The state held title to the schools until the loans were paid off. Over the course of the 1980s and 1990s there were several amendments to the Act that reduced the obligation of school districts to pay for facilities funding and beginning the transition from a loan program to a grant program.

B. An Overview of the Programs Pled

1. Leroy F. Greene School State School Building Lease-Purchase Law School Facility Program/Leroy F. Greene School Facilities Act Overview³⁶

As discussed above the Leroy Greene State School Building Lease-Purchase Law was enacted in 1976.³⁷ The Leroy F. Greene School Facilities Act of 1998, Education Code sections 17070.10 – 17079.30, was chaptered into law on August 27, 1998, establishing the state school facility program (SFP).³⁸ The same bill that enacted The Leroy F. Greene School Facilities Act of 1998 substantially amended the Leroy Greene State School Building Lease-Purchase Law to create one SFP. Proposition 1A, the Class Size Reduction Kindergarten-University Public Education Facilities Bond Act of 1998, which provided funding for the SFP was approved by the voters on November 3, 1998.

The SFP provides funding grants for school districts to acquire school sites, construct new school facilities, or modernize existing school facilities. The two major funding types available are “new construction” and “modernization.” The new construction grant provides funding on a 50/50 state and local match basis. The modernization grant provides funding on a 60/40 basis. Districts that are able to meet the financial hardship provisions may be eligible for additional state funding of up to 100 percent of the local share of cost. There are a number of requirements that a district must meet in order to receive state funding under the SFP including the requirement to prepare a hazardous materials assessment (HMA) pursuant to Education Code, Title 1, Division 1, Part 10.5 and related statutes.

³⁶ Specifically Education Code sections 17006, 17008.3, 17009, 17009.5, 17014, 17015, 17016, 17017, 17017.2, 17017.5, 17017.6, 17017.7, 17017.9, 17018, 17018.5, 17018.7, 17019.3, 17019.5, 17020, 17021.3, 17022, 17022.7, 17024, 17025, 17029, 17029.5, 17030, 17030.5, 17031, 17032, 17032.3, 17032.5, 17036, 17038, 17040, 17040.1, 17040.2, 17040.3, 17047, 17047.5, 17049, 17056, 17059, 17059.1, 17061, 17062, 17063, 17064, 17065, 17066, 17070.33, 17070.50, 17070.51, 17070.60, 17070.63, 17070.70, 17070.71, 17070.75, 17070.77, 17070.80, 17070.90, 17070.95, 17070.97, 17070.98, 17071.10, 17071.25, 17071.30, 17071.33, 17071.35, 17071.40, 17071.46, 17071.75, 17072.10, 17072.12, 17072.13, 17072.20, 17072.33, 17072.35, 17073.10, 17074.10, 17074.15, 17074.16, 17074.20, 17074.25, 17074.26, 17074.30, 17074.50, 17074.52, 17074.54, 17074.56, 17075.10, 17075.15, 17076.10, 17076.11, 17077.10, 17077.30, 17077.35, 17077.40, 17077.42, 17077.45, 17078.18, 17078.20, 17078.22, 17078.24, 17078.25 and 100620 and California Code of Regulations, Title 2, Sections 1859.20, 1859.21, 1859.22, 1859.30, 1859.31, 1859.32, 1859.33, 1859.35, 1859.40, 1859.41, 1859.50, 1859.60, 1859.70, 1859.72, 1859.74.1, 1859.75, 1859.75.1, 1859.76, 1859.77.1, 1859.77.2, 1859.79, 1859.79.2, 1859.79.3, 1859.81, 1859.81.1, 1859.82, 1859.90, 1859.100, 1859.102, 1859.104, 1859.104.1, 1859.104.2, 1859.104.3, 1859.105, 1859.105.1, 1859.106, 1859.107, 1862.52, 1862.53, 1865.3, 1865.8, 1865.32.5, 1865.33, 1865.39, 1865.42, 1865.43, 1865.50 and 1865.70.

³⁷ Note that effective November 4, 1998, with the exception of the funding joint use facilities pursuant to Education Code section 17052, all school construction projects approved or funded by the SAB must be approved pursuant to Chapter 12.5 (i.e. Education Code sections 17070.10 *et seq.*)

³⁸ Statutes 1998, chapter 407, section 32 (Senate Bill 50).

In order to obtain funding under the SFP, school districts must obtain approval from a number of state agencies. These include the State Allocation Board (SAB), the Office of Public School Construction (OPSC), the Division of the State Architect of the Department of General Services, the School Facilities Planning Division of DOE, DTSC, and the Department of Industrial Relations.

SAB is responsible for approving all state apportionments for new school construction and modernization projects. The OPSC is the administrative arm of the SAB. Its primary responsibilities include: allocating state funds for projects approved by the SAB, reviewing eligibility and funding applications, and providing information and assistance to school districts. The Division of the State Architect has been involved in the process of school construction since the Field Act was first passed in 1933. The primary responsibility of the Division of the State Architect is to review and approve construction plans and to ensure those plans are in compliance with the Field Act. Division of the State Architect approval is required for all new school construction and modernization projects.

The primary role of the School Facilities Planning Division is to approve school district site and construction plans. The School Facilities Planning Division reviews the “educational adequacy” of proposed projects to ensure they meet the needs of students and teachers. The School Facilities Planning Division also works with DTSC to review any potential environmental hazards associated with a project. The final agency involved in the process is Department of Industrial Relations. The primary responsibility of this agency is to ensure that school districts are in compliance with labor laws relating to contractors and employers. Before any funding from the SFP is released to a school district, the district must obtain certification that its Labor Compliance Program has been approved by Department of Industrial Relations.

The process of obtaining state funding through SFP is divided into two steps: an application for eligibility and an application for funding. Applications for eligibility are reviewed by the OPSC and then presented to the SAB at one of their monthly meetings for approval. Upon receiving approval from the SAB, a district may request funding by submitting a funding application to the OPSC. The funding application must include supporting documentation that shows that the district’s plans for construction have been approved by the Division of the State Architect and the School Facilities Planning Division. The completed funding application is reviewed by the OPSC and then submitted to the SAB for a funding apportionment. Funds apportioned by the SAB are released once the district has provided evidence that it has secured funding for required local matching funds (generally 50 percent of new school construction projects costs and 40 percent of modernization project costs), and evidence that it has entered into a binding contract for at least 50 percent of the proposed construction project. According to the OPSC, most funding applications can now be reviewed and receive final approval from the SAB within 60 to 90 days.

a) Establishing Eligibility

To obtain state funding for new school construction projects, districts must first demonstrate that existing seating capacity is insufficient to house existing students or anticipated students using a five-year projection of enrollment. Districts may establish eligibility on a district-wide basis or, if only some areas within the district are facing capacity constraints, on a High School Attendance Area basis.

The eligibility application for modernization projects consists of a single form, SAB 50-03. To qualify for funding, a school building must be at least 25 years old or, in the case of a portable classroom, at least 20 years old. In addition, districts may submit applications for modernization projects on a site by site basis, rather than the district or School Attendance Area-wide basis used for new school construction eligibility.

b) Applying for Funding

New school construction projects are funded by the state on a per-pupil basis. Site acquisition and development grants are made on a 50/50 state and local matching basis. The amount of the grant is determined by multiplying the number of unhoused students (determined in the eligibility phase), by a per-pupil grant that is adjusted annually by the SAB to account for changes in construction costs. As of January 1, 2010, the per-pupil grant amounts for new school construction are as follows:

Elementary \$8,738

Middle \$9,241

High \$11,757

Special Day Class – Severe \$24,550

Special Day Class – Non-Severe \$16,418³⁹

Supplemental grants are also available to fund special project needs. The most common supplemental grants are site acquisition grants and site development grants, which respectively cover costs associated with purchasing a site and preparing a site for construction. There are also supplemental grants for meeting fire code, energy efficiency, and special education requirements as well as for multi-level construction, project assistance, replacement with multi-story construction, grants for certain geographic locations, small size projects, new school projects, and urban locations.

The funding application for new school construction consists of a single form, SAB 50-04. While the form itself is relatively simple, districts must also file with their application a number of supporting documents. These include: (1) an appraisal, escrow closing statement or court order and a CDE site approval letter if the project involves site acquisition; (2) DSA approval of construction plans; (3) CDE approval of final plans; and, (4) a set of district certifications that include (among other things) the establishment of a restricted maintenance account, certification that the district will fund its share of the project, and certification that the district's Labor Compliance Program has been approved by the Department of Industrial Relations.

School districts that receive state funding for new construction or modernization projects under the SFP are required to establish a restricted maintenance account to ensure that projects are kept in good repair. For a period of 20 years, districts that receive SFP funding are required to deposit no less than three percent of their general fund budget annually into the restricted maintenance account.⁴⁰ Small districts may deposit less than three percent into the account if they can demonstrate an ability to maintain their facilities using a smaller amount of money.⁴¹

⁴⁰ Education Code section 17070.75.

⁴¹ *Id.*

Modernization projects are also funded by the state on a per-pupil basis. The amount of the grant is determined by multiplying the number of students to be housed in a modernized building by a per-pupil grant that is adjusted annually by the SAB to account for changes in construction costs. As of January 27, 2010, the per-pupil grant amounts for modernization projects are as follows:

Elementary \$3,738

Middle \$3,520

High \$4,607

Special Day Class – Severe \$10,600

Special Day Class – Non-Severe \$7,092⁴²

The funding application process for modernization projects is very similar to the process for new school construction. The application process consists of a single form, SAB 50-04, and a set of supporting documents that ensure the district has obtained DSA and CDE approval for its construction plans and obtained the requisite certifications. These certifications include: the establishment of a restricted maintenance account, verification that the building to be modernized was not previously modernized under the old Lease-Purchase Program, evidence that the district has obtained funding to meet its required 40 percent match for project costs, and approval from the Department of Industrial Relations for the district's Labor Compliance Program.

c) Financial Hardship

School districts unable to contribute some or all of the local matching funds required for new school construction and modernization projects may apply to the OPSC for financial hardship status.⁴³ If financial hardship status is granted, districts can receive up to 100 percent state funding for eligible new school construction and modernization projects. Districts seeking financial assistance must have their financial hardship status approved prior to submitting an application with the OPSC for funding. To qualify for financial hardship funding, a district must demonstrate the following: (1) it is levying developer fees up to the maximum amount allowed by law; (2) it has made every reasonable effort to raise local revenue to fund a project; and, (3) evidence of financial inability to contribute the required local matching funds.⁴⁴

2. The Strict Accountability in Local School Construction Bonds Act of 2000⁴⁵

The Strict Accountability in Local School Construction Bonds Act of 2000 was enacted as an alternative to issuing bonds pursuant to Education Code section 15120 *et seq.* or 15300 *et seq.* and was made operative contingent upon the passage of Proposition 39, which was approved at the November 2000 election. The Act allows for a reduced vote requirement of 55 percent (instead of two-thirds) for approving a school district bond measure and imposes additional requirements on districts that issue bonds using the 55 percent vote. Specifically it:

⁴² State Allocation Board, Annual Adjustment to School Facility Program Grants, State Allocation Board Meeting, January 27, 2010.

⁴³ Education Code section 17075.10.

⁴⁴ *Ibid.*

⁴⁵ Specifically, Education Code sections 15271, 15272, 15274, 15276, 15278, 15280, 15282 and 15284.

- Provides that the governing board of a school district may, by a two-thirds vote of the board, place a school bonds measure on the ballot that only requires a vote of 55 percent of the electorate to authorize the bonds;⁴⁶
- Provides that the 55 percent bond elections can only be at regularly scheduled state and local elections and statewide special elections;⁴⁷
- Specifies that the governing board may not, regardless of the number of votes cast in favor of the bond, subsequently proceed exclusively under the code that governs bonds authorized by a 66 percent vote;⁴⁸
- Specifies that the total amount of bonds issued pursuant to 55 percent bonds shall not exceed 1.25 percent of the taxable property of the district and that the tax rate shall not exceed \$30 per \$100,000 of taxable property;⁴⁹
- Provides that notwithstanding the general restriction to 1.25 percent of the taxable property of the district, any unified school district may issue 55 percent bonds not to exceed 2.5 percent of the taxable property of the district, not to exceed a tax rate of sixty dollars (\$60) per one hundred thousand dollars (\$100,000) of taxable property;⁵⁰
- Specifies that a county board of education may not order an election to determine whether 55 percent bonds may be issued under this article to raise funds for a county office of education;⁵¹
- Provides that the 55 percent ballot shall also be printed with a statement that the board will appoint a "citizens' oversight committee" and conduct annual independent audits to assure that funds are spent only on school and classroom improvements and for no other purposes;⁵²
- Specifies that if the bonds are approved by the voters, the governing board of the school district shall establish and appoint members to the independent citizens' oversight committee within 60 days of the date that the governing board enters the election results on its minutes;⁵³
- Specifies that the purpose of the citizens' oversight committee shall be to inform the public concerning the expenditure of bond revenues and be active guardians of the public trust in ensuring the prudent expenditure of taxpayers' money for school construction. They shall ensure that no funds are used for any teacher or administrative salaries or

⁴⁶ Education Code section 15266.

⁴⁷ *Ibid.*

⁴⁸ *Ibid.*

⁴⁹ Education Code section 15268.

⁵¹ Education Code section 15276.

⁵² Education Code section 15272.

⁵³ Education Code section 15278.

other school operating expenses. In addition, the Act authorizes the committee to engage in any of the following activities:

- a) Receive and review copies of the annual, independent performance and financial audits required by the law authorizing 55 percent bonds;
 - b) Inspect school facilities and grounds to ensure that bond revenues are expended in compliance with law;
 - c) Receive and review copies of any deferred maintenance proposals or plans developed by a school district;
 - d) Review efforts by the school district to maximize bond revenues by implementing cost-saving measures.⁵⁴
- Specifies that the governing board of the district shall, without expending bond funds, provide the citizens' oversight committee with technical assistance and shall provide administrative assistance in furtherance of its purpose and sufficient resources to publicize the conclusions of the citizens' oversight committee;⁵⁵
 - Specifies that a) all committee proceedings shall be open to the public and notice to the public shall be provided in the same manner as the proceedings of the governing board, b) the committee shall issue regular reports on the results of its activities, c) a report shall be issued at least once a year, d) minutes of the proceedings of the committee and all documents received and reports issued shall be a matter of public record and be made available on the website maintained by the governing board;⁵⁶
 - Specifies that the citizens' oversight committee shall consist of at least seven members, as specified, to serve for a term of two years without compensation and for no more than two consecutive terms;⁵⁷
 - Specifies that no employee or official of the district or vendor, contractor, or consultant of the district shall be appointed to the citizens' oversight committee,⁵⁸ and
 - Provides for a cause of action for waste or misuse of bond funds. Provides for attorney fees. Establishes a law enforcement priority for investigation and prosecution for waste or misuse of bond funds.⁵⁹

3. The Issuance of Bonds by School Facility Improvement Districts

Education Code section 15300 *et seq.* provides authority for the formation of a school facilities improvement district, consisting of a portion of the territory of a school district, and for the issuance of general obligation bonds by the district. Both the county board of supervisors and

⁵⁴ *Ibid.*

⁵⁵ Education Code section 15280.

⁵⁶ *Ibid.*

⁵⁷ Education Code section 15282.

⁵⁸ *Ibid.*

⁵⁹ Education Code section 15284.

the school district must approve the formation of the district. If the county board of supervisors for the county in which the district is located adopts Part 10, Chapter 2 of the Education Code relating to the establishment of school facilities improvement districts⁶⁰ and the governing board of a school district chooses to exercise the authority to establish a school facilities improvement district, the district is required to comply with the requirements imposed by Part 10, Chapter 2 of the Education Code. The decision to establish a school facilities improvement district triggers: necessary findings and filing requirements, noticing and hearing requirements and the requirement to adopt a resolution to form the district.⁶¹ With the exception of any activities relating to the initial approval of the county board of supervisors to establish the school facilities improvement district, the resulting requirements are imposed on the school district.

The school facilities improvement district may only issue bonds for specified purposes, which generally include purchasing real property for school facilities, building new school facilities or making improvements to existing school facilities.⁶² There are also limitations imposed on the amount of bonds that may be issued based on the taxable property in the district and the amount of indebtedness and there is a process set out in statute for how to assess those limits.⁶³ If the school facilities improvement district places a bond measure on the ballot, it must abide by the requirements for holding a bond election including the specific information required to be included in the proposition statement and the certification of election results.⁶⁴

If the voters approve the bond measure, the board of supervisors of the county in which the school facilities improvement district is located shall offer the bonds for sale.⁶⁵ Education Code sections 15351-15422 generally provide the requirements for the issuance and sale of the bonds, the required form of the bonds, cancellation of unsold bonds, the purchase of bonds by issuing school districts, method of bond payment, and tax for payment of bonds.

Education Code section 15335 provides a process for commencement of an action to determine the validity of bonds and the ordering of the improvement or acquisition. A school facilities improvement district that chooses to issue bonds is required to report the amount of the bond issue, indebtedness, the percentage of qualified electors who voted, and the results of the election with the percentage of votes cast for and against the proposition.⁶⁶

4. The State Relocatable Classroom Law of 1979⁶⁷

⁶⁰ See Education Code section 15303.

⁶¹ See Education Code sections 15320, 15321, 15322, 15323, 15324, 15325, 15326 and 15327.

⁶² Education Code section 15302.

⁶³ See Education Code sections 15330, 15331, 15332, 15333, 15334 and 15334.5.

⁶⁴ See Education Code sections 15340 - 15349.2.

⁶⁵ Education Code section 15350. Note that pursuant to Education Code section 15303, a resolution by this same board of supervisors is required to make this chapter applicable in the county.

⁶⁶ Education Code section 15336.

⁶⁷ Specifically, Education Code sections 17088.3, 17088.5, 17088.7, 17089, 17089.2, 17090, 17092, and 17096.

The State Relocatable Classroom Law of 1979 requires the State Allocation Board (SAB) to lease portable classrooms to qualifying school districts and county superintendents of schools, as specified. It also authorizes any qualifying school district, or a joint power of one or more school districts or county superintendents of schools, to purchase portable classrooms, as specified. Specifically:

- Education Code section 17088.3 provides the requirements for a district to qualify for a lease.
- Education Code section 17088.5 authorizes the SAB to empower a lessee as an agent of the Board and to authorize a district or superintendent to purchase portable classrooms, subject to specified conditions, when funds are unavailable to the SAB.
- Education Code section 17088.7 outlines the eligibility, costs and procedures for purchasing and leasing portable classrooms.
- Education Code section 17089 provides a range of costs for leasing a portable classroom and requires that the lessee undertake (and bear the costs of) all necessary maintenance, repairs, renewal, and replacement to ensure that it is at all times kept in good repair, working order and condition.
- Education Code section 17089.2 authorizes a district or county superintendent to purchase a portable classroom that it is leasing from the SAB for the price that SAB paid for it, less the amount of rent already paid.
- Education Code section 17090 requires lessees to insure (in an amount that the SAB deems necessary to protect the interest of the state) any leased portable classroom at their own expense for the benefit of the state, payable to the SAB for the State School Building Aid Fund.
- Education Code section 17092 restricts eligibility for portable classrooms to those districts that demonstrate to the SAB that they have no bond funds available to purchase classroom facilities except that where a district or county superintendent has received approval for a project that includes a justified number of new teaching stations, it is eligible for at least the same number of portable classrooms as approved new teaching stations. Section 17092 exempts leases and subleases for licensed child care programs or any recreation or enrichment activities or programs for school age children.
- Education Code section 17096 requires that leases of portable classrooms must require a telephone installed in each portable classroom at the time of installation of the portable classroom.

5. Issuance of School District Revenue Bonds Pursuant to Part 10, Chapter 15 of the Education Code⁶⁸

Education Code sections 17110 and 17111 authorize school districts to issue revenue bonds to finance joint occupancy facilities (i.e. properties jointly occupied by a school district and a private entity) and to contract with any person, firm, partnership, joint venture, or other private

⁶⁸ Specifically, Education Code sections 17110 and 17111.

entity for the purposes of issuing the bonds or renting or leasing the facilities. Proceeds from the rental and lease of the facilities are required to be used by the district to repay the revenue bonds.

6. Public Disclosure of Non-Voter-Approved Debt⁶⁹

Education Code section 17150, subdivision (a) requires a district that approves the issuance of revenue bonds or enters into an agreement for financing school construction, pursuant to Chapter 18 (commencing with section 17170), to notify the county superintendent of schools and the county auditor. The superintendent of the schools district is required to provide the repayment schedule for the debt and evidence of the school's ability to repay the debt to the county auditor, the county superintendent and the public. Subdivision (b) provides nearly identical requirements for a county board of education (except that notice is given to the governing board rather than the county auditor). The county auditor and the county superintendent may publicly comment on the repayment capability issue within 15 days of receipt of the information.

7. California School Finance Authority Act, Part 10, Chapter 18 of the Education Code⁷⁰

The California School Finance Authority Act provides for the powers of the California School Finance Authority (CSFA).⁷¹ CSFA consists of the following three members: the State Treasurer who serves as chair, the Superintendent of Public Instruction, and the Director of DOF.

CSFA oversees the statewide system for the sale of revenue bonds to reconstruct, remodel or replace existing school buildings, and to acquire new school sites and buildings to be made available to public school districts, charter schools, and community colleges, and to provide access to financing for working capital and capital improvements. The bond funding provided to public school districts through this program is sort of a hybrid in that the state issues the bonds but the funding is loaned to school districts (rather than granted) and is generally repaid with school district's Proposition 98 funds. In recent times, very little public school construction has been funded through CSFA.⁷² Rather, CSFA has been primarily providing funding to charter schools and community colleges.⁷³

Only financially feasible projects are intended to be funded by the CSFA and a school district may take into account all of its funds, and may base future projections upon historical experience or reasonable expectations, or a combination thereof in demonstrating feasibility.⁷⁴ The Controller is authorized, upon receipt of a deficiency notice from any school district or county office of education, to make specified apportionments to trustees. However, public credit providers may impose certain requirements on schools districts as a condition of providing credit enhancement for bonds, notes, certificates of participation, or other evidence of indebtedness of the district.⁷⁵ Specifically, the public credit provider can require a credit enhancement agreement

⁶⁹ Specifically, Education Code section 17150.

⁷⁰ Specifically, Education Code sections 17180, 17183.5, 17193.5, 1794, 17199.1, and 17199.4.

⁷¹ Education Code section 17180.

⁷² See the 2009-2010 State Budget, item 0985.

⁷³ *Ibid.*

⁷⁴ Education Code section 17183.5.

⁷⁵ *Ibid.*

that requires the Controller to allocate the apportionments to a public credit provider rather than the trustee.⁷⁶ If a district votes to participate under Education Code section 17193.5, it is required to provide a notice to the Controller that includes a schedule for the repayment of principal and interest on the bonds, notes, certificates of participation, or other evidence of indebtedness, and to identify the public credit provider that provided credit enhancement not later than the date of issuance of the bonds.

CSFA may authorize a participating school district to act as its agent in the performance of acts specifically approved by the authority, and all acts required under Article 3 (commencing with Section 17280) of Chapter 3 of Part 10.5.⁷⁷ CSFA is also authorized to purchase the rights and possibilities⁷⁸ regarding funding for school facilities approved by the SAB pursuant to the Leroy F. Greene School Facilities Act of 1998, including amounts apportioned and funded and amounts approved but not yet funded.⁷⁹ However, the authorization of the CSFA is limited to making or purchasing those secured or unsecured loans or to purchasing those rights and possibilities to those loans and rights and possibilities regarding the state's share of funding, for school facilities provided under the Greene Act.⁸⁰ There is also a limit to amounts approved and funded or amounts approved but not yet funded from proceeds of state bonds already authorized by the electors but not yet issued.⁸¹

8. Hazardous Material Assessment (HMA) and Related Statutes Overview⁸²

HMAs are conducted to provide basic information for determining if there has been a release or there is a threatened release of a hazardous material or if there may be a naturally occurring hazardous material present at the site which may pose a risk to human health or the environment. All proposed school sites which will receive state funding for acquisition or construction are required to go through a comprehensive environmental review and cleanup process under DTSC oversight.⁸³

A Phase I Assessment must be prepared to identify the potential for hazardous material release or the presence of naturally occurring hazardous materials. If such a potential is found then a PEA is required to evaluate the threat posed to public health or the environment. The California Education Code requires DTSC to review Phase I Assessments and PEAs, and to make a determination about the need for further action or remediation.⁸⁴ School districts may elect to

⁷⁶ *Ibid.*

⁷⁷ Education Code section 17194.

⁷⁸ Note: a "possibility" is a contingent interest in real or personal estate.

⁷⁹ Education Code section 17199.1.

⁸⁰ *Ibid.*

⁸¹ *Ibid.*

⁸² Specifically, Education Code sections 17210, 17210.1, 17211, 17212, 17212.5, 17213, 17213.1, 17213.2; Health and Safety Code sections 25358.7, 25358.7.1 and Public Resources Code section 21151.4 and 21151.8.

⁸³ See Public Resources Code sections 21000 *et seq.* and Education Code sections 17210 *et seq.*

⁸⁴ Education Code section 17213.2.

proceed directly to a PEA without having first completed a Phase I Assessment which can reduce costs when there is a known hazardous material present.⁸⁵

School districts are eligible for reimbursement from the state for 50 percent of the cost of the Phase I Assessment and PEA and 50 percent of the response costs for removal of hazardous waste or other remedial action in connection with hazardous substances at that site.

Reimbursement is capped at 50 percent of 1½ times the appraised value of the uncontaminated site (higher in instances of extreme need). Districts that qualify for financial hardship status may obtain funding for up to 100 percent of the cost of the evaluation of hazardous materials and the response costs at a site, subject to the appraised-value cap.⁸⁶

a) Phase I Assessments

When a school district finds a site that it believes may be suitable for a new school or decides to make an addition to an existing school that would increase student capacity by 25 percent or more, it must prepare a Phase I Assessment. A Phase I Assessment is a historical search of records to evaluate past site uses and identify "recognized environmental conditions" at the prospective school site.⁸⁷ The environmental assessor reviews records to determine if the property may pose any risk of exposures to hazardous materials (such as pesticides, metals, minerals, gases, radioactive elements, PCBs, petroleum-related chemicals, or unexploded ordnances).⁸⁸ The Phase I Assessment includes a site map (showing site boundaries and figures), a description of land uses (past, current and future), and an evaluation of all sources for the potential release or presence of hazardous material (including naturally occurring hazardous material).⁸⁹ The school district submits this assessment for DTSC review, comment, and approval, along with a fee. DTSC provides comments and makes a determination within 30 days. If there is no potential contamination, DTSC will issue a "No Further Action" determination, and the HMA process is complete.⁹⁰ A completed Phase I Assessment is generally not made available for a period of public review and comment.

Section 21083 of the Public Resource Code exempts from the Phase I Assessment requirement any addition to a school that is minor under the CEQA Guidelines. California Code of Regulations, title 14, section 15314 defines "minor" as any project that does not increase original student capacity by more than 25 percent or ten classrooms, whichever is less. Portable classrooms, including when intended for permanent use, are included in this exemption.

b) Preliminary Endangerment Assessments

If the Phase I Assessment reveals potential contamination, DTSC will issue a determination of "Preliminary Endangerment Assessment (PEA) Required" (also known as a Phase II). Before starting a PEA, the school district will enter into an Environmental Oversight Agreement to

⁸⁵ Education Code section 17213.1.

⁸⁶ Education Code section 17213.1, subdivision (b).

⁸⁷ Education Code section 17210.

⁸⁸ See American Society for Testing and Materials (ASTM) Standard E1527-05, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

⁸⁹ *Ibid.*

⁹⁰ Education Code section 17213.1, subdivision, (a)(2).

follow DTSC's direction for site investigation, and to pay DTSC's projected oversight costs.⁹¹ The school district's environmental assessor will conduct an investigation, and prepare a PEA, including environmental sampling and analysis data, and a risk assessment. The PEA must be made available for public review and comment before it is finalized.⁹² This may be done as a part of the Environmental Impact Report (EIR) comment period required pursuant to CEQA or separately, at the discretion of the school district.⁹³ DTSC approves or disapproves the PEA within 30 days after the close of the public comment period for the PEA, or within 30 days of the school district's approval of the EIR for the school site.⁹⁴ If the PEA identifies no significant health or environmental risks, the district will receive a "No Further Action" determination from DTSC.⁹⁵

c) CEQA⁹⁶

CEQA provides a process for evaluating the environmental effects of a project, and includes statutory exemptions, as well as categorical exemptions that can be found in CEQA and the CEQA regulations. If a project is not exempt from CEQA, an initial study is prepared to determine whether a project may have a significant effect on the environment. If the initial study shows that there would not be a significant effect on the environment, the lead agency must prepare a negative declaration (ND). If the initial study shows that the project may have a significant effect on the environment, the lead agency must prepare an environmental impact report (EIR). If the EIR includes findings of significant environmental impacts, CEQA imposes a substantive requirement to adopt feasible alternatives or feasible mitigation measures available which would substantially lessen the significant environmental effects of the project.⁹⁷ The purposes of CEQA are to:

- inform decision makers and the public about project impacts;
- identify ways to avoid or significantly reduce environmental damage;
- prevent environmental damage by requiring feasible alternatives or mitigation measures;
- disclose to the public reasons why an agency approved a project if significant environmental effects are involved;

⁹¹ See generally Education Code sections 17210, subdivision (b) and 17213.1, subdivision (a)(4)(B).

⁹² Education Code section 17213.1, subdivision, (a)(6).

⁹³ *Ibid.*

⁹⁴ *Ibid.*

⁹⁵ Education Code section 17213.1, subdivision, (a)(9).

⁹⁶ On September 30, 2010, the Commission adopted a Statement of Decision (03-TC-17) denying reimbursement to school districts for the majority of the statutory and regulatory sections that make up CEQA because the requirement to comply with CEQA is triggered by the district's voluntary decision to undertake a project or accept state funding for a project. However, the two CEQA code sections pled in this test claim, Public Resources Code sections 21151.4 and 21151.8, were not pled in 03-TC-17.

⁹⁷ Public Resources Code section 21002.

- involve public agencies in the process; and,
- increase public participation in the environmental review and the planning processes.⁹⁸

The EIR requirement, which effectively accomplishes the above purposes, is “the heart of CEQA.”⁹⁹

Public Resources Code sections 21151.4 prohibits approval of a ND or EIR for a project within ¼ mile of a school, which might reasonably be anticipated to emit hazardous or acutely hazardous air emissions, or which would handle an acutely hazardous material or a mixture containing acutely hazardous material in a quantity equal to or greater than a specified quantity, which may pose a health or safety hazard to persons who would attend or would be employed at the school, unless:

- (a) The lead agency preparing the EIR or ND has consulted with the school district having jurisdiction regarding the potential impact of the project on the school, and
- (b) The school district has been given written notification of the project not less than 30 days prior to the proposed approval of the EIR or ND.

The Legislature enacted Public Resources Code section 21151.4 and related code sections because of:

.... incidents of health threats and nuisances at schoolsites throughout the state causing children to evacuate schools, report ill, and require medical attention. These incidents have been caused in large part by the inappropriate siting of schools and certain facilities with the potential for routine and accidental releases of hazardous and acutely hazardous air emissions.¹⁰⁰

Section 21151.8 prohibits certification of an EIR or approval of an ND for a project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless:

- (a) The EIR or ND includes an analysis of whether the proposed site is or was a hazardous waste or solid waste disposal site, is a hazardous substance release site, or contains pipelines carrying hazardous substances, acutely hazardous materials, or hazardous wastes and if so, provides an analysis of the hazardous substances on the site. The district must also make certain findings on the hazardous substances before approving the acquisition.
- (b) The district consults with the local air pollution district to ascertain whether any facilities within a quarter mile of a proposed site might emit hazardous materials,

⁹⁸ Public Resources Code section 21002, California Code of Regulations, title 14, section 15002.

⁹⁹ *County of Inyo v. Yorty* (1973) 32 Cal. App. 3d 795.

¹⁰⁰ Statutes 1988, chapter 1589 (S.B. 3205), section 1.

substances or waste. Facilities that must be considered include, but are not limited to: freeways, busy traffic corridors, railyards, and large agricultural facilities.¹⁰¹

d) Hazardous Substance Account Act

The Hazardous Substance Account Act (HSAA) which includes Health and Safety Code sections 25358.1 and 25358.7.1 as added by Statutes 1999, chapter 23, is California's equivalent to the federal Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLA, (commonly known as "Superfund"). HSAA is a 1980 law passed to address the cleanup of abandoned toxic waste sites. DTSC administers CERCLA, which is implemented in California through HSAA and related regulations. HSAA assigns liability for each site, funds the cleanup of that site from a fund created from taxes and fines levied on the site's polluters, and imposes requirements on affected property owners and potentially responsible parties and a number of related requirements on state agencies. Specifically, Health and Safety Code section 25358.1 imposes disclosure requirements on "any potentially responsible party, or any person who has, or may have, acquired information relevant to [specified hazardous substance release related questions] in the course of a commercial, ownership, or contractual relationship with any potentially responsible party."

Additionally, owners of nonresidential property must provide information to buyers, lessees or renters regarding hazardous substances that have or may have been released on the property. Failure to provide such information subjects owners to penalties. HSAA further provides that owners are responsible for the cleanup of such sites, and the removal of toxic substances, where possible. Health and Safety Code section 25358.7.1 allows the affected community to form a community advisory group "to review any response action and comment on the response action to be conducted in that community." It also requires DTSC (or the regional water quality control board in some instances) to regularly communicate, and confer as appropriate, with the community advisory committee.

e) State Site Standards and Certificates of Compliance¹⁰²

Education Code section 17251 requires the Department of Education (DOE) to:

- Advise any school district, upon request, on the acquisition of new schoolsites and give the governing board in writing a list of the recommended locations in the order of their merit considering educational, environmental, and planning and zoning issues. The district may purchase a site deemed unsuitable for school purposes by DOE after reviewing DOE's report on proposed sites at a public hearing. The DOE is required to charge the school district a reasonable fee for each schoolsite reviewed not to exceed the actual administrative costs incurred for that purpose.
- Develop standards for use by a school district in the selection of schoolsites and investigate complaints of noncompliance with site selection standards. DOE is required to notify the school district of the results of the investigation and if the notification is

¹⁰¹ Note that these requirements are identical to the requirements of former Education Code section 39003, which was repealed by Statutes 1996, chapter 277 (S.B. 1572), which was an omnibus bill that reorganized the Education Code.

¹⁰² Specifically Education Code sections 17251 and 17315.

received prior to the acquisition of the site, the governing board is required to discuss the findings of the investigation in a public hearing.

- Establish standards for use by school districts to ensure that the design and construction of school facilities are educationally appropriate and promote school safety.
- Upon the request of any school district, review plans and specifications for school buildings in the district. DOE is required to charge school districts, for the review of plans and specifications, a reasonable fee not to exceed the actual administrative costs incurred for that purpose.
- Upon the request of any school district, survey the building needs of the district, advise and suggest plans for financing a building program to meet the needs. DOE is required to charge the district, for the cost of the survey, a reasonable fee not to exceed the actual administrative costs incurred for that purpose.
- Provide information relating to the impact or potential impact upon any schoolsite of hazardous substances, solid waste, safety, or hazardous air emissions, and other information as DOE may deem appropriate.

Education Code section 17315 requires the Department of General Services (DGS) to issue a certificate of compliance only after a school building constructed in accordance with plans and specifications approved by DGS is completed, the CEQA notice of completion is filed, and all final verified reports and all testing and inspection documents, as required by Education Code sections 17280-17317 and related regulations, are submitted to and on file with DGS, and all required fees paid by the school district. It also makes provisions for the issuance of a certificate of compliance where a final verified report is missing due to the incapacitating illness, death, or the default of any persons required to file such reports. The costs incurred by DGS in connection with this section are required to be paid by the school district. The actual costs to perform the examinations, tests and inspections are designated by section 17315 as an appropriate cost of the project to be paid from the building funds of the district.

II. Party Positions

A. Claimant's Position

Claimant generally alleges that all of the activities it must perform to receive state funding or to issue local bonds for school facility projects (i.e. new building, modernization and renovation), including the requirement to pay a local share of costs, are new and reimbursable under Article XIII B, section 6 of the California Constitution. In essence, claimant is alleging that the state is legally required to provide 100 percent of funding for all school facility project related costs, including all of the environmental compliance, accountability and public notice requirements for the issuance of local bonds and other related costs pled in this consolidated test claim.

In *School Facilities Financing Requirements* (02-TC-30), claimant alleges reimbursable state-mandated costs to school districts “[f]or programs, policies and procedures that school districts must comply with in order to receive state funded bond money for new construction, renovation and modernization projects. In *Hazardous Materials Assessments* (02-TC-43) claimant alleges reimbursable state-mandated costs to school districts to perform hazardous materials assessments (HMAs) and related activities. In particular, claimant alleges state-mandated costs for the performance of activities related to:

1. Receipt of State Grants

- The receipt of state funds for new construction or modernization of school facilities pursuant to the Leroy F. Greene School Facilities Act of 1998, Part 10, chapter 12 of the Education Code, or, the Kindergarten-University Public Education Facilities Bond Act of 2002, Part 68.1, Chapter 2;¹⁰³
- The requirement to prepare HMAs pursuant to Education Code, Title 1, Division 1, Part 10.5 and related statutes under specified circumstances;¹⁰⁴
- Compliance with state site standards and obtaining a certificate of compliance with Department of General Services (DGS) approved plans and specifications;¹⁰⁵

2. Issuance of Local Bonds

- The issuance of local school construction bonds pursuant to the Strict Accountability in Local School Construction Bonds Act of 2000, Part 10, Chapter 1.5 of the Education Code;¹⁰⁶
- The issuance of local school construction bonds by school facilities improvement districts pursuant to Part 10, Chapter 2 of the Education Code;¹⁰⁷
- The issuance of district revenue bonds by school districts pursuant to Part 10, Chapter 15 of the Education Code;¹⁰⁸

¹⁰³ Specifically, Education Code sections 17006, 17008.3, 17009, 17009.5, 17014, 17015, 17016, 17017, 17017.2, 17017.5, 17017.6, 17017.7, 17017.9, 17018, 17018.5, 17018.7, 17019.3, 17019.5, 17020, 17021.3, 17022, 17022.7, 17024, 17025, 17029, 17029.5, 17030, 17030.5, 17031, 17032, 17032.3, 17032.5, 17036, 17038, 17040, 17040.1, 17040.2, 17040.3, 17047, 17047.5, 17049, 17056, 17059, 17059.1, 17061, 17062, 17063, 17064, 17065, 17066, 17070.33, 17070.50, 17070.51, 17070.60, 17070.63, 17070.70, 17070.71, 17070.75, 17070.77, 17070.80, 17070.90, 17070.95, 17070.97, 17070.98, 17071.10, 17071.25, 17071.30, 17071.33, 17071.35, 17071.40, 17071.46, 17071.75, 17072.10, 17072.12, 17072.13, 17072.20, 17072.33, 17072.35, 17073.10, 17074.10, 17074.15, 17074.16, 17074.20, 17074.25, 17074.26, 17074.30, 17074.50, 17074.52, 17074.54, 17074.56, 17075.10, 17075.15, 17076.10, 17076.11, 17077.10, 17077.30, 17077.35, 17077.40, 17077.42, 17077.45, 17078.18, 17078.20, 17078.22, 17078.24, 17078.25 and 100620.

¹⁰⁴ Specifically, Education Code sections 17210, 17210.1, 17211, 17212, 17212.5, 17213, 17213.1, and 17213.2; Health and Safety Code sections 25358.7 and 25358.7.1; and Public Resources Code sections 21151.4 and 21151.8.

¹⁰⁵ Specifically, compliance with Education Code sections 17251 and 17315.

¹⁰⁶ Specifically, Education Code sections 15271, 15272, 15274, 15276, 15278, 15280, 15282, and 15284.

¹⁰⁷ Specifically, Education Code sections 15301, 15302, 15303, 15320, 15321, 15322, 15323, 15324, 15325, 15326, 15327, 15336, 15340, 15341, 15342, 15343, 15346, 15347, 15349, 15349.1, 15350, 15351, 15352, 15354, 15355, 15359.2, 15359.3, 15380, 15381, 15384, 15390, and 15391.

- The public disclosure of non-voter-approved debt pursuant to Part 10, Chapter 16 of the Education Code;¹⁰⁹

3. Participation in Other State Programs

- The lease of portable classrooms from the SAB pursuant to the Emergency School (State Relocatable) Classroom Law of 1979, Part 10, Chapter 14 of the Education Code;¹¹⁰ and,
- California School Finance Authority Act, Part 10, Chapter 18 of the Education Code.¹¹¹

More specifically, in *Hazardous Materials Assessments* (02-TC-43) claimant alleges reimbursable state-mandated costs to school districts for the following HMA related activities:

- A. Developing and implementing policies and procedures, and periodically revising those policies and procedures, and compliance with all requirements relative to the discovery and removal of hazardous materials at proposed schoolsites pursuant to Article 1 of Chapter 1, commencing with Education Code section 17210 and related sections;¹¹²
- B. Funding 50 percent, or more, of the cost of the evaluation of hazardous materials at a site to be acquired by a school district and 50 percent, or more, of the other response action costs for the removal of hazardous waste or solid waste, the removal of hazardous substances, or other response action in connection with hazardous substances at proposed schoolsites pursuant to Education Code section 17072.13, subdivision (a);¹¹³
- C. For school districts eligible for financial hardship assistance pursuant to Article 8 (commencing with Section 17075.10), funding the balance of the cost of the evaluation of hazardous materials at a site to be acquired by a school district and for the other response action costs for the site not funded by the State Allocation Board pursuant to Education Code section 17072.13, subdivision (b);
- D. Focusing on the risks to children's health posed by a hazardous materials release or threatened release, or the presence of naturally occurring hazardous materials, when

¹⁰⁸ Specifically, Education Code sections 17110 and 17111.

¹⁰⁹ Specifically, Education Code section 17150.

¹¹⁰ Specifically, Education Code sections 17088.3, 17088.5, 17088.7, 17089, 17089.2, 17090, 17092, and 17096.

¹¹¹ Specifically, Education Code sections 17180, 17183.5, 17193.5, 17194, 17199.1, and 17199.4.

¹¹² Note that there is no reference to policies and procedures in this portion of the code, though a district may certainly find it helpful to have policies and procedures in place.

¹¹³ Note that based on a plain meaning reading of Education Code Section 17072.13, subdivision (a), it is the State Allocation Board (i.e. the state), not the school district that provides 50 percent or more (up to 100 percent for hardship) of the funding. The school district may be required to provide up to 50 percent of these costs, if it is not a hardship district.

- conducting risk assessments at prospective schoolsites pursuant to Education Code section 17210.1, subdivision (a)(3);
- E. When taking response actions pursuant to the article to be, at a minimum, protective of children's health, with an ample margin of safety, pursuant to Education Code section 17210.1, subdivision (a)(4);
 - F. Providing a notice to residents in the immediate area prior to the commencement of work on a PEA utilizing a format developed by the DTSC, pursuant to Education Code section 17210.1, subdivision (b);
 - G. Evaluating the real property for a new schoolsite, or an addition to an existing schoolsite, at a public hearing pursuant to Education Code Section 17211, using site selection standards established by DOE (DOE) pursuant to Section 17251, subdivision (b), prior to commencing the acquisition of that real property;
 - H. Prior to acquiring any site on which it proposes to construct any school building, investigating the site, or sites, under consideration by competent personnel to ensure that the final site selection is determined by an evaluation of all factors affecting the public interest and is not limited to selection on the basis of raw land cost only pursuant to Education Code section 17212 and including location of the site with respect to population, transportation, water supply, waste disposal facilities, utilities, traffic hazards, surface drainage conditions, and other factors affecting the operating costs, as well as the initial costs, of the total project;
 - I. If the prospective schoolsite is located within the boundaries of any special studies zone, or within an area designated as geologically hazardous in the safety element of the local general plan as provided in Government Code Section 65302, subdivision (g), including any geological and soil engineering studies by competent personnel needed to provide an assessment of the nature of the site and potential for earthquake or other geologic hazard damage in the investigation pursuant to Education Code section 17212;
 - J. Making geological and soil engineering studies, as described in Section 17212, for the reconstruction, or alteration of, or addition to, any school building for work which alters structural elements if the estimated cost exceeds \$25,000, or as increased according to a construction costs inflation index recognized by DGS pursuant to Education Code section 17212.5;
 - K. Making geological and soil engineering studies, as described in Section 17212, when required by DGS for the construction or alteration of any school building on a site located outside of the boundaries of any special studies zone pursuant to Education Code section 17212.5;
 - L. Submitting to DGS and DOE a copy of the report of each investigation conducted pursuant to Article 3 (commencing with Section 17280) as required by Education Code section 17212.5;
 - M. Verifying, prior to approval of a project, that the lead agency, as defined in section 21067 of the Public Resources Code, has determined that the property purchased or to be built upon is not any of the following:
 - 1. The site of a current or former hazardous waste disposal site or solid waste disposal site unless, if the site was a former solid waste disposal site, the

governing board of the school district concludes that the wastes have been removed;

2. A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code;
 3. A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood pursuant to Education Code section 17213, subdivision (a);
- N. Verifying, prior to approval of a project, that the lead agency, as defined in section 21067 of the Public Resources Code, has consulted with the administering agency in which the proposed schoolsite is located and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one fourth of a mile of the proposed schoolsite which might reasonably be anticipated to emit hazardous air emissions, or to handle hazardous or acutely hazardous materials, substances, or waste and has included a list of the locations for which information was sought pursuant to Education Code section 17213, subdivision (b);
- O. Prior to approval of a project, making one of the following written findings:
1. Consultation identified none of the facilities specified in subdivision (b).
 2. The facilities specified in subdivision (b) exist, but one of the following conditions applies:
 - a. The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the school.
 - b. The governing board finds that corrective measures required under an existing order by another jurisdiction which has jurisdiction over the facilities will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes this finding, the governing board shall also make a subsequent finding, prior to the occupancy of the school, that the emissions have been mitigated to these levels pursuant to Education Code section 17213, subdivision (b).
- P. Pursuant to Education Code section 17213.1, subdivision (a), prior to acquiring a schoolsite, contracting with an environmental assessor to supervise the preparation of, and sign, a Phase I Assessment of the proposed schoolsite unless the governing board decides to proceed directly to a PEA. The Phase I Assessment shall contain one of the following recommendations:
1. A further investigation of the site is not required; or,
 2. A PEA is needed, including sampling or testing;

- Q. Pursuant to Education Code section 17213.1, subdivision (a)(2), if the Phase I Assessment concludes that further investigation of the site is not required, submitting the signed assessment, proof that the environmental assessor meets the qualifications specified in subdivision (b) of section 17210, and the required fee to the DTSC;
- R. If DTSC determines that the Phase I Assessment is not complete, or disapproves the Phase I Assessment, taking actions necessary to secure the approval of the Phase I Assessment, elect to conduct a PEA, or electing not to pursue the acquisition or the construction project pursuant to Education Code section 17213.1, subdivision (a)(3);
- S. If DTSC concludes, after its review of a Phase I Assessment pursuant to this section that a PEA is needed (or when a district elects to forego a Phase I Assessment and proceed directly to a PEA), submitting to the DOE the Phase I Assessment and requested additional information, if any, that was reviewed by DTSC Pursuant to Education Code section 17213.1, subdivision (a)(4)(A);
- T. If the Phase I Assessment concludes that a PEA is needed, or if DTSC concludes after it reviews a Phase I Assessment pursuant to this section that a PEA is needed, contracting with an environmental assessor to supervise the preparation of, and sign, a PEA of the proposed schoolsite and entering into an agreement with DTSC to oversee the preparation of the PEA or electing not to pursue the acquisition or construction project pursuant to Education Code section 17213.1, subdivision (a)(4)(B). The PEA shall contain one of the following conclusions:
 - 1. A further investigation of the site is not required; or
 - 2. A release of hazardous materials has occurred, and if so, the extent of the release, that there is the threat of a release of hazardous materials, or that a naturally occurring hazardous material is present, or any combination thereof;
- U. Submitting the PEA to DTSC for its review and approval and to DOE for its files pursuant to Education Code section 17213.1, subdivision (a)(5);
- V. At the same time a school district submits a PEA to DTSC, publishing a notice that the assessment has been submitted to the department in a local newspaper of general circulation, and posting the notice in a prominent manner at the proposed schoolsite that is the subject of that notice pursuant to Education Code section 17213.1, subdivision (a)(6). The notice shall state the school district's determination to make the PEA available for public review and comment;
- W. Complying with the public participation requirements of sections 25358.7 and 25358.7.1 of the Health and Safety Code and other applicable provisions of the state act with respect to those response actions only if further response actions beyond a PEA are required and the district determines that it will proceed with the acquisition or construction project pursuant to Education Code section 17213.1, subdivision (a)(7);
- X. If DTSC disapproves the PEA, taking actions necessary to secure the approval of DTSC of the PEA or electing not to pursue the acquisition or construction project pursuant to Education Code section 17213.1, subdivision (a)(8);

- Y. If the PEA determines that a further investigation of the site is not required and DTSC approves this determination, then proceeding with the acquisition or construction project pursuant to Education Code section 17213.1, subdivision (a)(9);
- Z. If the PEA determines that a release of hazardous material has occurred, that there is the threat of a release of hazardous materials, that a naturally occurring hazardous material is present, or any combination thereof, that requires further investigation, and DTSC approves this determination, either electing not to pursue the acquisition or construction project, or, electing to pursue the acquisition or construction project pursuant to Education Code section 17213.1, subdivision (a)(10). If electing to pursue the acquisition, doing all of the following:
 - 1. Preparing a financial analysis that estimates the cost of response action that will be required at the proposed schoolsite;
 - 2. Assessing the benefits that accrue from using the proposed schoolsite when compared to the use of alternative schoolsites, if any;
 - 3. Obtaining the approval of DOE that the proposed schoolsite meets the schoolsite selection standards adopted by DOE pursuant to subdivision (b) of section 17251;
 - 4. Evaluating the suitability of the proposed schoolsite in light of the recommended alternative schoolsite locations in order of merit if the school district has requested the assistance of DOE, based upon the standards of DOE, pursuant to subdivision (a) of section 17251;
- AA. Reimbursing DTSC for all of the department's response costs pursuant to Education Code section 17213.1, subdivision (a)(11);
- BB. If a PEA prepared pursuant to section 17213.1 discloses the presence of a hazardous materials release, or threatened release, or the presence of naturally occurring hazardous materials, at a proposed schoolsite at concentrations that could pose a significant risk to children or adults, and the school district owns the proposed schoolsite, entering into an agreement with DTSC to oversee response action at the site and taking response action pursuant to the requirements of the state act as may be required by DTSC pursuant to Education Code section 17213.2, subdivision (a);
- CC. If at any time during the response action the school district determines that there has been a significant increase in the estimated cost of the response action, notifying DOE pursuant to Education Code section 17213.2, subdivision (c);
- DD. Before occupying a school building following construction, obtaining from DTSC a certification that all response actions, except for operation and maintenance activities, necessary to ensure that hazardous materials at the schoolsite no longer pose a significant risk to children and adults at the schoolsite have been completed, and that the response action standards and objectives established in the final removal action work plan or remedial action plan have been met and are being maintained, pursuant to Education Code section 17213.2, subdivision (d)(2);
- EE. If, at anytime during construction at a schoolsite, a previously unidentified release or threatened release of a hazardous material or the presence of a naturally occurring hazardous material is discovered:
 - 1. Ceasing all construction activities at the sites;

2. Notifying DTSC, and taking actions required by subdivision (a) that are necessary to address the release or threatened release or the presence of any naturally occurring hazardous materials; and
3. Resuming construction only if DTSC:
 - a. Determines that:
 - i. The construction will not interfere with any response action necessary to address the hazardous material release or threatened release or the presence of a naturally occurring hazardous material; and
 - ii. The site conditions will not pose a significant threat to the health and safety of workers involved in the construction of the schoolsite; and
 - b. Certifies that the nature and extent of the release, threatened release, or presence of a naturally occurring hazardous material have been fully characterized.¹¹⁴
- FF. Reimbursing DTSC for all response costs incurred by the department pursuant to Education Code section 17213.2, subdivision (h);
- GG. Reimbursing DOE for fees incurred and charged for advising the governing board on the acquisition of new schoolsites and, after a review of available plots, giving the governing board, in writing, a list of the recommended locations in the order of their merit, considering especially the matters of educational merit, safety, reduction of traffic hazards, and conformity to the land use element in the general plan of the city, county, or city and county having jurisdiction pursuant to Education Code section 17251, subdivision (a);
- HH. Complying with standards developed by DOE to be used in the selection of schoolsites, in accordance with the objectives set forth in Education Code section 17251 subdivision (a), pursuant to Education Code section 17251, subdivision (b). If notification is received prior to the acquisition of the site that the department has investigated complaints of noncompliance with site selection standards, discussing the findings of the investigation in a public hearing;
- II. Complying with standards established by DOE for use by school districts to ensure that the design and construction of school facilities are educationally appropriate and promote school safety pursuant to Education Code section 17251, subdivision (c);
- JJ. Reimbursing the DOE for the review of plans and specifications Pursuant to Education Code section 17251, subdivision (d);
- KK. Reimbursing DOE for making a survey of the building needs of the district, advising the governing board concerning building needs, and suggesting plans for financing a building program to meet the needs pursuant to Education Code section 17251, subdivision (e);
- LL. Filing the notice of completion, submitting all final verified reports and all testing and inspection documents, and paying all required fees when a school building is constructed

¹¹⁴ Education Code Section 17213.2, subdivision (e).

in accordance with plans and specifications approved by DGS pursuant to Education Code section 17315, subdivision (a);

- MM. When a school building constructed in accordance with approved plans and specifications is completed but final verified reports, as are required under section 39151, have not been submitted to DGS due to the incapacitating illness, death, or the default of any persons required to file such reports, requesting DGS to review all of the project records and make such examinations as it deems necessary to enable it to certify that the school building otherwise complies with the requirements of the article pursuant to Education Code section 17315, subdivision (b). When requested by the DGS making, reporting, and verifying any other tests and inspections which the department deems necessary to complete its examinations of the construction;
- NN. Reimbursing the costs incurred by the DGS to perform the examinations, tests, and inspections required by the section pursuant to Education Code section 17315, subdivision (c).

In its amendment to the consolidated test claim (09-TC-01) claimant alleges the following statutes contain reimbursable mandates: Health and Safety Code sections 25358.7 and 25358.7.1¹¹⁵ as amended by Statutes 1999, chapter 23 (S.B. 47), Education Code sections 39003 and 39120 as amended by Statutes, chapter (repealed by Statutes 1996, chapter 277),¹¹⁶ Public Resources Code section 21151.4, section 17 as amended by Statutes 2004, chapter 689, Statutes 2008, chapter 148, and Public Resources Code section 21151.8, section 18, as amended by Statutes 2003, chapter 668 and Statutes 2007, chapter 130, and Statutes 2008, chapter 148.¹¹⁷ Claimant doesn't specify what activities are reimbursable except that it cut and pastes all of the pled statutes into the "narrative" and "declaration" and then includes copies of the statutes as required by Commission's test claim form.¹¹⁸

In response to the argument put forth by DOF¹¹⁹, DOE¹²⁰ and DTSC¹²¹ that a school district's participation in the underlying programs at issue are elective or optional and neither a compulsory or de facto mandate (i.e. that they are neither legally nor practically compelled), claimant disagrees. Claimant cites to the following to demonstrate that it is required to participate in the underlying programs:

¹¹⁵ These sections generally require DTSC or the Regional Board, in response actions, to inform the public and establish community advisory groups.

¹¹⁶ These sections were repealed in 1996.

¹¹⁷ These sections link the CEQA process to the HMA process and require consultation with the school district for the siting of hazardous facilities within ¼ mile of a school.

¹¹⁸ For an in depth description of what these statutes require, please see background above.

¹¹⁹ DOF comments on 02-TC-43, p.1.

¹²⁰ DOE, comments on 02-TC-30, p. 1.

¹²¹ DTSC, comments on 02-TC-43, *supra*, p.p. 1, 2, 3, 4, 8 and 9 and rebuttal to claimant's response on 02-TC-43, *supra*, p.p. 2 and 3.

1. *Butt v. State of California*, which discusses the duty of the Legislature to “provide for a system of common schools, by which a school be kept up and supported in each district.”¹²²
2. A report of the California Research Bureau which states in part that one challenge public schools face “[i]s the anticipated growth of nearly 2 million K-12 students during the next decade that will require many districts to build new schools to meet burgeoning student demand.”¹²³ That report also discusses the shortfall of available funds to meet the need for public school construction and rehabilitation.
3. The March 2004 Proposition 55 ballot information pamphlet which discusses the “need to construct new schools to house nearly 1 million pupils and modernize schools for an additional 1.1 million pupils.”¹²⁴

Claimant states that “a finding of legal compulsion is not an absolute prerequisite to a finding of a reimbursable mandate”¹²⁵ and discusses the case law regarding practical compulsion. Claimant concludes that “[i]n light of the finding that there is a need to construct new schools to house 1.1 million pupils and the need to modernize schools for an additional 1.1 million pupils, it is beyond the realm of practical reason to opportunistically argue that there is no state law or regulation which requires a school district to construct additional school facilities or acquire any site for the purpose of constructing a school building.”¹²⁶

Finally, claimant disagrees with DOF’s position that Education Code Part 1, Chapter 6, Title 1, Division, 1 provides schools with authority to impose development fees and therefore Government Code section 17556, subdivision (d) prohibits reimbursement for any state-mandated activities. Claimant argues: “Government Code section 17556(d) refers to ‘service charges, fees or assessments.’ Education Code 17620 refers to a ‘fee, charge, dedication or other requirement.’ They are not the same.”¹²⁷ Claimant includes a discussion of the limitations on the purposes for which a “fee, charge or dedication” may be used (i.e. to fund the construction or

¹²² Claimant, response to DOF comments and response to DTSC memorandum for 02-TC-43 and, *supra*, p. 2, citing *Butt v. State of California* (1992) 4 Cal. 4th 668, p. 680. Note that Claimant makes the same arguments in its response to DOF comments on 02-TC-30, but for the ease of the reader, this analysis will cite to the response to DOF and DTSC comments for 02-TC-43.

¹²³ *Id.*, p. 3, citing *School Facility Financing – A History of the Role of the State Allocation Board and Options for the Distribution of Proposition 1A Funds* (Cohen, Joel, February 1999). Note however, that according to California Department of Education, Educational Demographics Unit, from school year 1999-2000 to 2008-2009, the most recent year for which there is data, actual enrollment went up only by 300, 419 students, less than 1/6 of the projected number.

¹²⁴ *Id.*, p. 3. Note that the claimant has taken this quote somewhat out of context in that it actually says “... *the districts have identified* the need to construct new schools to house nearly 1 million pupils and modernize schools for an additional 1.1 million pupils.” Emphasis added.

¹²⁵ *Id.*, p. 4.

¹²⁶ *Id.*, p. 7.

¹²⁷ Claimant, response to DOF comments on 02-TC-43, *supra*, p. 9.

reconstruction of school facilities but not for maintenance) pursuant to Education Code section 17620, subdivision (a)(1).

B. Department of Toxic Substances Control's Position

DTSC submitted comments on the test claim filing for 02-TC-43 (*Hazardous Materials Assessments*) on October 27, 2003 and a rebuttal to claimant's response to its October 27, 2003 comments on February 6, 2004.

1. School Districts are not Legally or Practically Compelled to Meet HMA Requirements

With regard to HMAs, DTSC states that "district participation in the underlying program is elective or optional."¹²⁸ Specifically, DTSC states that Education Code section 17210.1 "expressly addresses only sites for which 'school districts elect to receive state funds'" and "Education Code section 17213.1 also states, '[a]s a condition of receiving state funding' and clearly applies these requirements to districts seeking state funding of their projects."¹²⁹ DTSC states that "[t]he [claimant] also fails to mention that there is existing state funding for all or a part of the hazard assessment work under Education Code sections 17072.12 and 17072.13 that reduces the unfunded costs or invalidates their grounds for reimbursement as an unfunded mandate."¹³⁰ DTSC argues that the state-funded School Facilities Program conditions in this test claim are analogous to the state-funded educational programs at issue in *Kern*.¹³¹ Specifically:

The hazard assessments requirements are not rendered mandates because the state funds only a part of the total costs under Education Code sections 17072.1, 17213.13 and 17213.18. The [*Kern*] court noted, "[w]e reject the suggestion, implicit in claimants' argument that the state cannot legally provide school districts with funds for voluntary programs, and then effectively reduce that funding grant by requiring school districts to incur expenses in order to meet conditions of program participation."¹³²

DTSC also argues that school districts are not practically compelled (using the phrase "compelled de facto") because though there may be no feasible alternative to participation in the state funding program for school construction projects where HMA costs are sizable, "districts may elect to stop pursuing such a high cost site at any time without compulsion or penalty."¹³³

2. School Districts Have Sufficient Fee Authority to Fund Their Share of Costs and are Thus Disqualified for Reimbursement Under Government Code section 17556, subdivision (d).

DTSC argues, "school districts have authority to levy fees to fund their share of costs under Education Code section 17556, subdivision (d), and *Connell v. Superior Court* (1997) 59

¹²⁸ DTSC, comments on the test claim (2-TC-43), October 27, 2003, p.1 (citing *Kern*.)

¹²⁹ *Id.*, p. 3.

¹³⁰ *Ibid.*

¹³¹ *Ibid.*

¹³³ DTSC, comments on the test claim (2-TC-43), *supra*, p. 4.

Cal.App.4th 382.”¹³⁴ DTSC points out that Government Code section 17556, subdivision (d), prohibits the Commission from determining costs are mandated by the state if it finds that the district “has the authority to levy service charges, fees or assessments sufficient to pay for the mandated program or increased level of service.”¹³⁵ DTSC refers to Education Code section 17620 (development fee), Government Code section 53311 (Mello-Roos fee), and Education Code section 15350 (school facilities improvement districts bond authority) for some examples of potential revenue sources for school districts.¹³⁶

DTSC also argues that the state already routinely funds half of the HMA costs and funds up to 100 percent of the costs in cases of economic hardship under Education Code sections 17072.12, 17072.13 and 17072.18.¹³⁷

3. Jointly Funded Programs are Outside the Coverage of Section 6, Article XIII B of the California Constitution.

DTSC states, “jointly funded programs such as school funding are outside the coverage of Section 6, article XIII B of the California Constitution. . . under *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal. App.4th 1264 (*County of Sonoma*).”¹³⁸

4. HMAs are Part of the School District’s Continuing Duty to Provide Safe School Sites, Not a New Program or Higher Level of Service.

Finally, DTSC argues that the preparation of HMAs is a condition of funding and “compliance with these funding conditions fails to provide a new program or higher level of service to the public to qualify as a reimbursable state mandate under *County of Sonoma*.”¹³⁹ DTSC argues that prior to 1975, the state did not fund site acquisition and investigation costs, so the state has not shifted state program costs to the districts.¹⁴⁰ Specifically, DTSC states:

Here, the program at issue concerns school facility safety, an area that the state has long regulated to assure safety of school children in facilities for compulsory education. (Former Educ. Code § 39002; *Hall v. City of Taft* (1956) 47 Cal. 2nd 177, 185-186.) A mandate is a new program if the local entity had not been previously required to implement it. (*County of Los Angeles v. Commission on State Mandates* (2003) 110 Cal.App.4th 1176 at p. 1189 (*Los Angeles* 2003).) However, to qualify for reimbursement, the program must be one that the state previously funded in whole and would newly be funded solely by local tax revenues and not by other levies. (*Los Angeles* 2003, *supra*, 110 Cal. App.4th at 1193, citing *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal. App. 4th 1264 at p. 1289.)

¹³⁴ DTSC, comments on the test claim (02-TC-43), *supra*, p. 1.

¹³⁵ *Id.*, p. 4, citing *Connell v. Superior Court*, *supra*, 59 Cal.App.4th 382.

¹³⁶ *Id.*, p. 5.

¹³⁷ DTSC, comments on the test claim (02-TC-43), *supra*, p. 5.

¹³⁸ DTSC, comments on the test claim (02-TC-43), *supra*, p. 1.

¹³⁹ DTSC, comments on the test claim (02-TC-43), *supra*, p. 1.

¹⁴⁰ *Id.*, p. 7.

DTSC states that HMAs do not provide a new service to the public. Instead, they require research and periodic evaluation at key decision points, such as the Phase I Assessment and PEA, to help inform public spending decisions to assure reasonable use of state school facility funds.¹⁴¹ This increased level of information also protects against commitment to sites with unknown contamination levels. In addition, these processes assure that the site is reasonably safe for its intended use: occupancy by children for compulsory education. The situation here is similar to *County of Los Angeles v. Department of Industrial Relations* where the court found costs of complying with new elevator and earthquake safety standards were not reimbursable as state mandates because they provided no new or increased level of service to the public.¹⁴²

C. Department of Education's Position

DOE states that the test claim statutes in 02-TC-30 (*School Facilities Funding Requirements*) do not impose a state-mandated program because each of the programs pled is but "one of various funding mechanisms available to school districts for the funding of facilities. School districts elect to participate in [these programs] and any requirements regarding [these programs] are applicable only after districts elect to participate. . . ."¹⁴³

D. Department of Finance's Position

1. School Facilities Funding Requirements

DOF states:

Nothing in the statutes or regulations cited by the Claimant [] makes a school district's participation in the funding programs a compulsory activity. Instead, we conclude that a district's participation in any of the cited programs is voluntary and a result of the district's discretionary choice. We also note that 25 to 30 percent of California's nearly 1,100 K-12 school districts do not participate in the state-funded school facility programs, which demonstrates that the programs are not compulsory.¹⁴⁴

DOF also cites to the relevant sections of each of the chapters under which the claimant is alleging reimbursable activities to demonstrate that there is no legal requirement for school districts to comply with the requirements pled unless they make the discretionary decision to:

- Order an election of whether to issue bonds under the Strict Accountability in Local School Construction Bonds Act of 2000;
- Form a school facilities improvement district and issue bonds under Education Code part 10, Chapter 2 (Bonds of School Facilities Improvement Districts);
- Enter into an agreement with the state to receive funds for the construction, reconstruction or replacement of school facilities from the SAB pursuant to the State School Building Lease-Purchase Law of 1976;

¹⁴¹ DTSC, comments on the test claim (02-TC-43), *supra*, p. 10.

¹⁴² *Ibid.*

¹⁴³ DOE, comments on the test claim (02-TC-30), p. 1.

¹⁴⁴ DOF, comments on the test claim (02-TC-30), February 9, 2004, p. 1.

- Apply to receive an eligibility determination or funding for the construction, reconstruction or replacement of school facilities from the SAB pursuant to the Leroy F. Greene School Facilities Act of 1998;
- Adopt a resolution authorizing the district to file an application to lease portable classrooms from the SAB pursuant to the Emergency (State Relocatable) Classroom Law of 1979;
- Issue sale revenue bonds to finance construction of joint occupancy facilities necessary to relieve overcrowded schools pursuant to Education Code Part 10, Chapter 15 (School District Revenue Bonds);
- Approve the issuance of certificates of participation or revenue bonds or enter into any agreement for financing school construction (i.e. approve non-voter approved debt) which triggers public disclosure requirements pursuant to Education Code Part 10, Chapter 16; or
- Undertake, itself or through an agent, the financing or refinancing of a project or of working capital pursuant to Education Code Part 10, Chapter 18 (California School Finance Authority).¹⁴⁵

DOF notes that “when a school district elects to participate in a voluntary program, the “downstream” activities of the district do not constitute a state-mandated reimbursable program. In [*Kern*], the California Supreme Court confirmed the merits of the argument that where a local government entity voluntarily participates in a statutory program, the state may require the entity to comply with reasonable conditions without providing additional funds to reimburse the entity for the increased level of activity.”¹⁴⁶

DOF also notes that in the first 200 pages of the test claim it found “more than three-dozen misstatements” of the Education Code.¹⁴⁷ Specifically, DOF asserts that claimant inserted the word “shall” in its citations to statute where the statute actually says “may” thus “changing an otherwise permissive action of the board to an action that appears compulsory.”¹⁴⁸

Finally, DOF asserts that school districts have fee authority (i.e. development fees) for the purpose of funding the construction or reconstruction of school facilities.¹⁴⁹

2. Hazardous Materials Assessments

DOF states that the school district’s participation in the Leroy F. Greene School Facilities Act of 1998, School Facilities Program (SFP) (Educ. Code § 17070.10 *et seq.*) “is strictly voluntary and the result of elective action taken by the governing board of the district.”¹⁵⁰ DOF argues the SFP requirements apply to discretionary, school district proposed, projects and school facilities

¹⁴⁵ *Id.*, p.p. 1-4.

¹⁴⁶ DOF, comments on the test claim (02-TC-30), *supra*, p. 2.

¹⁴⁷ DOF, comments on the test claim (02-TC-30), *supra*, p. 4.

¹⁴⁸ *Ibid.*

¹⁴⁹ DOF, comments on the test claim (02-TC-30), *supra*, p. 4.

¹⁵⁰ DOF, comments on the test claim (02-TC-43), February 3, 2004, p. 1.

construction projects. DOF cites to *Kern* for the proposition that “where a local government entity voluntarily participates in a statutory program, the state may require the entity to comply with reasonable conditions without providing additional funds to reimburse the entity for the increased level of activity.”¹⁵¹

Moreover, with regard to HMAs, “Education Code section 17213.1 (b) states, ‘The costs incurred by school districts when complying with this section are allowable costs for an applicant under Chapter 12.5, Part 10 and may be reimbursed in accordance with section 17072.13.’”¹⁵²

Finally, DOF argues that “school districts have the authority to charge development fees to finance construction projects.”¹⁵³ Specifically, DOF asserts that Education Code sections 17620-17626 “authorize school districts to levy fees against any construction within its district boundaries for the purpose of funding school construction.”¹⁵⁴ DOF concludes with a discussion of the prohibition against finding a reimbursable mandate in a statute or executive order “if the affected local agencies have authority to levy service charges, fees, or assessments sufficient to pay for the mandated program in the statute or executive order.”¹⁵⁵

III. Discussion

The courts have found that article XIII B, section 6, of the California Constitution recognizes the state constitutional restrictions on the powers of local government to tax and spend. “Its purpose is to preclude the state from shifting financial responsibility for carrying out governmental functions to local agencies, which are ‘ill equipped’ to assume increased financial responsibilities because of the taxing and spending limitations that articles XIII A and XIII B impose.”¹⁵⁶ A test claim statute or executive order may impose a reimbursable state-mandated program if it orders or commands a local agency or school district to engage in an activity or task.¹⁵⁷ In addition, the required activity or task must constitute a “new program,” or it must create a “higher level of service” over the previously required level of service.¹⁵⁸

The courts have defined a “program” subject to article XIII B, section 6, of the California Constitution, as one that carries out the governmental function of providing public services, or a law that imposes unique requirements on local agencies or school districts to implement a state policy, but does not apply generally to all residents and entities in the state.¹⁵⁹ To determine if

¹⁵⁸ *San Diego Unified School Dist. v. Commission on State Mandates* (2004) 33 Cal.4th 859, 878, (*San Diego Unified School Dist.*); *Lucia Mar Unified School Dist. v. Honig* (1988) 44 Cal.3rd 830, 835 (*Lucia Mar*).

¹⁵⁹ *San Diego Unified School Dist.*, *supra*, 33 Cal.4th 859, 874-875 (reaffirming the test set out in *County of Los Angeles v. State of California* (1987) 43 Cal.3d 46, 56; see also *Lucia Mar*, *supra*,

the program is new or imposes a higher level of service, the test claim statutes and executive orders must be compared with the legal requirements in effect immediately before the enactment.¹⁶⁰ A “higher level of service” occurs when the new “requirements were intended to provide an enhanced service to the public.”¹⁶¹ Finally, the newly required activity or increased level of service must impose costs mandated by the state.¹⁶²

The Commission is vested with exclusive authority to adjudicate disputes over the existence of state-mandated programs within the meaning of article XIII B, section 6.¹⁶³ In making its decisions, the Commission must strictly construe article XIII B, section 6, and not apply it as an “equitable remedy to cure the perceived unfairness resulting from political decisions on funding priorities.”¹⁶⁴

This analysis addresses the following issues:

- A. Does the Commission have jurisdiction over a statute that was the subject of a prior final decision of the Commission?
- B. Are the remaining test claim statutes and alleged executive orders subject to Article XIII B, section 6 of the California Constitution?
 1. Are statutes that have been repealed prior to the beginning of the potential reimbursement period subject to reimbursement under Article XIII B, section 6 of the California Constitution?
 2. Are the Substantial Progress and Expenditure Audit Guide of May 2003, the School Facility Program Guidebook of January 2003, the State Relocatable Classroom Program Handbook of January 2003, and the Lease-Purchase Applicant Handbook of April 1998¹⁶⁵ executive orders subject to Article XIII B, section 6?
 3. Does Health and Safety Code section 25358.1 impose a program subject to Article XIII B, section 6 of the California Constitution?

¹⁶⁰ *San Diego Unified School Dist.*, *supra*, 33 Cal.4th 859, 878; *Lucia Mar*, *supra*, 44 Cal.3d 830, 835.

¹⁶⁴ *County of Sonoma*, *supra*, 84 Cal.App.4th 1265, 1280, citing *City of San Jose v. State of California* (1996) 45 Cal.App.4th 1802, 1817.

¹⁶⁵ Note that the “1988” version of this Handbook was actually included in the caption for claimant’s test claim filing. However, because claimant attached the 1998 version of this Handbook to the test claim filing and staff could not locate a 1988 version of this Handbook, staff presumes that claimant intended to plead the 1998 version.

4. Does Health and Safety Code section 25358.7.1 impose any state-mandated duties on school districts?
5. Are the activities required by the remaining test claim statutes and regulations state-mandated duties or are they downstream requirements of a discretionary decision of the school district?

A. The Commission does not have jurisdiction over Education Code section 17213.1, as added by Statutes of 1999, chapter 1002, because this statute was the subject of a final decision of the Commission, *Acquisition of Agricultural Land for a School Site* (98-TC-04 and 01-TC-03).

The Commission has adopted a prior test claim related to school facility finance requirements that made specific findings on one of the statutes pled in this test claim. This prior decision is a final, binding decision which is relevant to the issue of jurisdiction.

In *Acquisition of Agricultural Land for a School Site* (98-TC-04 and 01-TC-03), the Commission found that Education Code section 17213.1, as added by Statutes of 1999, chapter 1002, did not impose a reimbursable state mandate on school districts because “the procedures a school district must follow when it seeks state funding pursuant to the Leroy Greene School Facilities Act of 1998 (commencing with Educ. Code, § 17070.10) are not state-mandated because the school district is not required to request state funding under section 17213.1.”¹⁶⁶

Test claims function similarly to class actions and all members of the class have the opportunity to participate in the test claim process and all are bound by the final decision of the Commission for purposes of that test claim. “‘Test claim’ means the first claim filed with the Commission alleging that a particular statute or executive order imposes costs mandated by the state.”¹⁶⁷ Government Code Title 2, division 4, Part 7 “establishes a test-claim procedure to expeditiously resolve disputes affecting multiple agencies. . . .”

When 98-TC-04 was filed in 1999 and amended by 01-TC-03 in 2003, section 1182.2 of the Commission’s regulations was in place and provided that “any person may submit comments in writing on any agenda item.” Moreover, pursuant to the Bagley-Keene Open Meeting Act of 1967, claimant had the opportunity to attend and provide written or oral comments at the Commission hearing on *Acquisition of Agricultural Land for a School Site*. Government Code section 17500 explicitly states that the test claim procedure is designed to avoid a multiplicity of proceedings to address the same issue. Once a decision of the Commission becomes final and has not been set aside by a court pursuant to a petition for writ of administrative mandamus (Code Civ. Proc., § 1094.5), it is not subject to collateral attack. Thus, claimant is bound by the findings in *Acquisition of Agricultural Land for a School Site* (98-TC-04 and 01-TC-03). The Commission may not address issues that were conclusively addressed in that test claim.

¹⁶⁶ *Acquisition of Agricultural Land for a School Site* (98-TC-04 and 01-TC-03), p. 14. Note that section 17213.1 was amended by Statutes 2000, chapter 443 and Statutes 2002, chapter 935 which were also pled in this test claim and are not the subject of a final Commission decision. Therefore, those statutes are addressed below.

¹⁶⁷ *City of San Jose v. State of California, supra*, 45 Cal.App.4th 1802.

Therefore, staff finds the Commission does not have jurisdiction over Education Code section 17213.1, as added by Statutes of 1999, chapter 1002, because this statute was the subject of a final decision of the Commission, *Acquisition of Agricultural Land for a School Site* (98-TC-04 and 01-TC-03).

B. The Remaining Test Claim Statutes And Alleged Executive Orders Are Not Subject To Reimbursement Under Article XIII B, Section 6 of The California Constitution.

The courts have held that article XIII B, section 6 was not intended to entitle local agencies and school districts to reimbursement for all costs resulting from legislative enactments, but only those costs “mandated” by a new program or higher level of service imposed upon them by the state.¹⁶⁸ Thus, the issue is whether the test claim statutes impose a state-mandated activity on school districts.

For the test claim statutes or regulations to impose a state-mandated program, the language must order or command a school district to engage in an activity or task. If the language does not do so, then article XIII B, section 6 is not triggered. Moreover, where program requirements are only invoked after the district has made an underlying discretionary decision causing the requirements to apply, or where participation in the underlying program is voluntary, courts have held that resulting new requirements do not constitute a reimbursable state mandate.¹⁶⁹ Stated another way, a reimbursable state mandate is created when the test claim statutes or regulations establish conditions under which the state, rather than a local entity, has made the decision requiring the district to incur the costs of the new program.¹⁷⁰

- 1. Education Code sections 39003 and 39120 have been repealed since January 1, 1998, prior to the beginning of the potential reimbursement period for this test claim and thus cannot be reimbursable.**

Education Code sections 39003 and 39120 were repealed by Statutes 1996, chapter 277 (S.B.1562), section 6, operative January 1, 1998. Because they have not been operative at any time during the reimbursement period, they cannot be reimbursable.

- 2. The Audit Guides and Handbooks Claimed are not Executive Orders Subject to Article XIII B, Section 6.**

Staff finds that the Substantial Progress and Expenditure Audit Guide of May 2003, the School Facility Program Guidebook of January 2003, the State Relocatable Classroom Program Handbook of January 2003, and the Lease-Purchase Applicant Handbook of April 1998 are not executive orders. An executive order is “any order, plan, requirement, rule or regulation” issued by the Governor or any official serving at the pleasure of the Governor.¹⁷¹ Although the above-mentioned audit guide, guidebook and handbooks are issued by state agency directors who serve

¹⁶⁸ *Lucia Mar Unified School Dist.*, *supra*, 44 Cal.3d 830, 835; *City of San Jose v. State of California*, *supra*, 45 Cal.App.4th 1802, 1816.

¹⁶⁹ *City of Merced v. State of California* (1984) 153 Cal.App.3d 777, 783; *Department of Finance v. Commission on State Mandates* (2003) 30 Cal.4th 727, 727 hereinafter “*Kern*”.

¹⁷⁰ *San Diego Unified School Dist.*, *supra* (2004) 33 Cal.4th 859, 880.

¹⁷¹ Government Code section 17516.

at the pleasure of the Governor, they do not impose an “order, plan, requirement, rule or regulation.” Specifically:

- The Substantial Progress and Expenditure Audit Guide of May 2003 cites to specific legislative or regulatory authority for each requirement in the guide and thus does not impose an order, plan, requirement, rule or regulation.¹⁷²
- The School Facility Program Guidebook of January 2003 was developed by the Office of Public School Construction (OPSC) to “assist school districts in apply for and obtaining ‘grant’ funds for the new construction and modernization of school facilities under the Leroy F. Greene School Faculties Act of 1998.”¹⁷³ According to OPSC, “it is intended to provide an overview of the program for use by school district, parents, architects, the Legislature and other interested parties on how a school district becomes eligible for funding and applies for state funding.”¹⁷⁴
- The State Relocatable Classroom Program Handbook of January 2003 provides an overview of the program and then takes the reader step-by-step through the application process provided by statutes and regulations adopted pursuant to the Administrative Procedures Act.¹⁷⁵
- The Lease-Purchase Applicant Handbook of April 1998 provides an overview of the program and then takes the reader step-by-step through the application process provided by statutes and regulations adopted pursuant to the Administrative Procedures Act.¹⁷⁶

Because they do not require districts to do anything beyond what is required by statutes and regulations and are not plans, they are not executive orders. They merely explain the programs that are established in statute and regulation, summarizing requirements that have been established pursuant to statutory and regulatory provisions, including the test claim statutes and test claim regulations. They do not add any additional requirements above what is required by the relevant statutes and regulations, but rather, provide a tool to make compliance easier. Local agencies and school districts may refer solely to the test claim statutes and regulations and related statutes and regulations and consult with their attorneys to determine how to navigate the complex school facility funding process to maximize the amount of state-grant money they receive, if that is their preference.

3. Health and Safety Code Section 25358.1 as Added By Statutes 1999, Chapter 23 Does Not Impose a State-Mandated Program On School Districts Subject to Article XIII B, Section 6 of the Constitution Because The Requirements It Imposes Are Not Unique to Government.

¹⁷² See generally, Office of Public School Construction, The Substantial Progress and Expenditure Audit Guide, 2003.

¹⁷³ Office of Public School Construction, School Facility Program Guidebook, 2003, p. 1.

¹⁷⁴ *Ibid.*

¹⁷⁵ See generally, Office of Public School Construction, The State Relocatable Classroom Program Handbook, 2003.

¹⁷⁶ See generally, The Lease-Purchase Applicant Handbook, April 1998.

a. Health and Safety Code section 25358.1 as added by Statutes 1999, chapter 23 May Require School Districts to Perform Specified Activities.

Staff finds that Health and Safety Code section 25358.1 as added by Statutes 1999, chapter 23 imposes a requirement on school districts if they “[h]ave, or may have, acquired information relevant to [specified hazardous substance release related questions] in the course of commercial, ownership, or contractual relationship with any potentially responsible party.” Health and Safety Code section 25358.1 as added by Statutes 1999, chapter 23 imposes several requirements on “any potentially responsible party, or any person who has or may have, acquired information relevant to any of the following matters [i.e. specified hazardous substance release related matters] in the course of commercial, ownership, or contractual relationship with any potentially responsible party.”¹⁷⁷ Specifically, that potentially responsible party or person who has or may have such knowledge, at the request of DTSC, is required to:

- Furnish information about the release;
- Provide access to records and properties;
- Permit inspections and the collection of samples by DTSC;
- Allow the set up and monitoring of equipment by DTSC to assess or measure the actual or potential migration of hazardous substances;
- Permit DTSC to survey and determine topographic, geologic, and hydrogeologic features of the land;
- Permit DTSC to photograph any equipment, sample, activity, or environmental condition discovered through the inspections, samples, monitoring and surveys, described above. However, DTSC must protect trade secrets pursuant to Health and Safety section 25358.2.

Health and Safety Code section 25358.1 also provides a number of protections for the potentially responsible party or person and their property. Health and Safety Code section 25310 specifies that the definitions contained in CERCLA section 101 apply to the terms in the Carpenter-Presley-Tanner Hazardous Substance Account Act (Health and Safety Code sections 25300-25395.40). A “person” is defined in CERCLA section 101(21) as “an individual, firm, corporation, association, partnership, consortium, joint venture, commercial entity, United States government, state, municipality, commission, political subdivision of a state, or any interstate body. Since a school district is a political subdivision of the state, it is a person under this definition. A “potentially responsible party” is a person that may be liable for CERCLA response costs, and as defined by section 107(a) of CERCLA includes:

- Current owners and operators regardless of whether they contaminated the site;
- Past owners and operators who owned or operated the facility at the time that hazardous substances were disposed;
- Persons who arranged for either the treatment or disposal, or the transportation for treatment or disposal of hazardous substances at the facility; and

¹⁷⁷ Health and Safety Code section 25358.1, subdivision (b).

- Persons who accepted hazardous substances for transport to disposal or treatment facilities that they selected.

Since a school district may be a current or past owner of contaminated property and may arrange for the treatment, disposal or transportation for treatment or disposal of hazardous substances found on its property, it may become a potentially responsible party in some instances. Staff finds that because a school district is a person and may be a potentially responsible party, Health and Safety Code section 25358.1 imposes requirements on school districts where the district acquired information relevant to specified hazardous substance release related matters in the course of commercial, ownership, or contractual relationship with any potentially responsible party. Therefore, staff finds that Health and Safety Code section 25358.1, as added by Statutes 1999, chapter 23, imposes state-mandated duties on school districts within the meaning of Article XIII B, section 6 of the California Constitution.

a. The Activities Required By Health and Safety Code Section 25358.1 Do Not Carry Out the Governmental Function of Providing a Service to the Public.

For Health and Safety Code section 25358.1 to be subject to article XIII B, section 6 of the California Constitution, it must constitute a new “program” or “higher level of service.” The California Supreme Court, in the case of *County of Los Angeles v. State of California*,¹⁷⁸ defined the word “program” within the meaning of article XIII B, section 6 as a program that carries out the governmental function of providing a service to the public, or laws which, to implement a state policy, impose unique requirements on local governments and do not apply generally to all residents and entities in the state. Only one of these findings is necessary to trigger the applicability of article XIII B, section 6.¹⁷⁹

Health and Safety Code section 25358.1 does not require school districts to provide any service to the public. Rather, it imposes disclosure and access requirements on parties who may be liable for the cleanup of hazardous substances released on or from a facility/property because they are:

- Past owners and operators who owned or operated the facility at the time that hazardous substances were disposed;
- Persons who arranged for either the treatment and/or disposal, or the transportation for treatment or disposal of hazardous substances at the facility; or
- Persons who accepted hazardous substances for transport to disposal or treatment facilities that they selected.

County of Los Angeles v. Department of Industrial Relations,¹⁸⁰ addressed elevator safety requirements applicable to all elevators in the state. There, the court found that the regulations

¹⁷⁸ *County of Los Angeles v. State of California* (1987) 43 Cal.3d 46, 56.

¹⁷⁹ *Carmel Valley Fire Protection District v. State of California* (1987) 190 Cal.App.3d 521, 537, emphasis added.

¹⁸⁰ *County of Los Angeles v. Department of Industrial Relations* (1989) 214 Cal. App.3d 1538.

were not a program because “[p]roviding elevators equipped with fire and earthquake safety features simply is not ‘a governmental function of providing services to the public.’”¹⁸¹

a. Health and Safety Code section 25358.1 is Not Unique to Government.

Health and Safety Code section 25358.1 by its own terms applies to all potentially responsible parties, both private and public. As the *County of Los Angeles v. Department of Industrial Relations*¹⁸² court explained, “[w]ere section 6 construed to require state subvention for the incidental cost to local governments of general law, the result would be far-reaching indeed.”¹⁸³ There, the court found that the regulations were not a program because the regulations did not impose a unique requirement on local government and “[p]roviding elevators equipped with fire and earthquake safety features simply is not ‘a governmental function of providing services to the public.’”¹⁸⁴ Likewise here, staff finds that the requirement that potentially responsible parties disclose information and provide access to DTSC or the applicable regional water quality control board is not unique to government but applies generally to all residents and entities in the state who find themselves in the position of being a potentially responsible party for purposes of CERCLA/Superfund.

As the requirements of Health and Safety Code section 25358.1 as added by Statutes 1999, chapter 23 applies to both public and private entities, not just those which are publicly owned, it does not impose a “unique requirement” on local governments, and thus it does not meet the second definition of “program” established by *County of Los Angeles*.

Providing access to your facility and disclosure about the release of hazardous substances for which one may be liable is not “a governmental function of providing services to the public” and is not unique to government. Therefore, staff finds that Health and Safety Code section 25358.1 as added by Statutes 1999, chapter 23 does not impose a new program or higher level of service subject to reimbursement under Article XIII B, section 6 of the California Constitution.

4. Health and Safety Code Section 25358.7.1, as Added by Statutes 1999, Chapter 23, Does Not Impose Any Activities or State-Mandated Duties on School Districts Within the Meaning of Article XIII B, Section 6 of the California Constitution.

Health and Safety Code section 25358.7.1, as added by Statutes 1999, chapter 23 allows a community to form a community advisory group (CAG) to review and comment on a response action being conducted in that community. Health and Safety Code section 25358.7.1 requires DTSC or the regional board that is conducting the response action to communicate and confer as appropriate with the CAG and to advise local regulatory and other appropriate local agencies of planned response actions so that they may review and comment.

Based on the plain language of this statute, Health and Safety Code section 25358.7.1 requires DTSC to perform activities but does not mandate school districts to perform any activities.

¹⁸¹ *Id.*, p. 1545.

¹⁸² *County of Los Angeles v. Department of Industrial Relations* (1989) 214 Cal. App.3d 1538.

¹⁸³ *County of Los Angeles v. State of California, supra*, p. 56.

¹⁸⁴ *County of Los Angeles v. Department of Industrial Relations, supra*, 214 Cal. App.3d 1538, 1545.

Therefore staff finds that Health and Safety Code section 25358.7.1, as added by Statutes 1999, chapter 23 does not impose state-mandated duties on school districts within the meaning of Article XIII B, section 6 of the California Constitution.

5. The Remaining Test Claim Statutes and Regulations Do Not Impose State-Mandated Duties on School Districts Within the Meaning of Article XIII B, Section 6 of the California Constitution.

If a school district makes a decision to build or modernize a school, it must determine how to fund that construction. Generally, a school can seek grant funding from the state through the state school facility program (SFP), which is funded through state bonds and/or it may issue local bonds pursuant to one of several local bond acts. Usually, but not always, schools rely on a combination of state and local bond funding for facilities.

If a school district decides to issue local bonds, it must comply with the public disclosure and other accountability requirements contained within the act under which the district decides to issue bonds, some of which were required by the statewide bond initiatives specifying the voting requirements for the issuance of local bonds. If a school district decides to seek state bond funding through the SFP (i.e. grant funding), the district must comply with various planning, environmental, building safety, labor, public participation/disclosure and bond funding accountability requirements as a condition of receipt of that funding which includes preparation of hazardous materials assessments (HMA) and performing many of the other activities pled in this consolidated test claim.

HMAs are conducted to provide basic information for determining if there has been a release or there is a threatened release of a hazardous material or if there may be a naturally occurring hazardous material present at the site which may pose a risk to human health or the environment. A Phase I Assessment must be prepared to identify the potential for hazardous material release or the presence of naturally occurring hazardous materials. If such a potential is found then a Preliminary Endangerment Assessment (PEA) is required to evaluate the threat posed to public health or the environment. The California Education Code requires DTSC to review Phase I Assessments and PEAs, and to make a determination about the need for further action or remediation.¹⁸⁵ School districts may elect to proceed directly to a PEA without having first completed a Phase I Assessment which can reduce costs when there is a known hazardous material present.¹⁸⁶

There are two other programs pled in this test claim that do not fit neatly into the state funding or local bond funding categories:

- The State Relocatable Classroom Law of 1979 under which claimant alleges costs for activities related to the lease of portable classrooms from the state; and
- The California School Finance Authority Act, under which a school district may borrow funds from the state which are generally repaid with future Proposition 98 funds.

¹⁸⁵ Education Code section 17213.2.

¹⁸⁶ Education Code section 17213.1.

The remaining statutes and regulations,¹⁸⁷ which generally require compliance with SFFRs¹⁸⁸ if a school district seeks state grant funding, local bond funding or elects to participate in one of the other programs pled pursuant to the test claim statutes and regulations, do not mandate school districts to perform any activities because:

- a) School districts are not legally required to acquire new school sites, build new schools, undertake modernization projects, add portable classrooms or to request and accepts SFP funding, issue local bonds or opt to participate in other state programs to further such projects, which would trigger the requirement to comply with SFFRs contained in the test claim statutes and regulations.

¹⁸⁷ Education Code sections 15271, 15272, 15274, 15276, 15278, 15280, 15282, 15284, 15301, 15302, 15303, 15320, 15321, 15322, 15323, 15324, 15325, 15326, 15327, 15336, 15340, 15341, 15342, 15343, 15346, 15347, 15349, 15349.1, 15350, 15351, 15352, 15354, 15355, 15359.2, 15359.3, 15380, 15381, 15384, 15390, 15391, 17006, 17008.3, 17009, 17009.5, 17014, 17015, 17016, 17017, 17017.2, 17017.5, 17017.6, 17017.7, 17017.9, 17018, 17018.5, 17018.7, 17019.3, 17019.5, 17020, 17021.3, 17022, 17022.7, 17024, 17025, 17029, 17029.5, 17030, 17030.5, 17031, 17032, 17032.3, 17032.5, 17036, 17038, 17040, 17040.1, 17040.2, 17040.3, 17040.6, 17040.7, 17040.8, 17041.1, 17041.2, 17041.8, 17042.7, 17042.9, 17047, 17047.5, 17049, 17056, 17059, 17059.1, 17061, 17062, 17063, 17064, 17065, 17066, 17070.33, 17070.50, 17070.51, 17070.60, 17070.63, 17070.70, 17070.71, 17070.75, 17070.77, 17070.80, 17070.90, 17070.95, 17070.97, 17070.98, 17071.10, 17071.25, 17071.30, 17071.33, 17071.35, 17071.40, 17071.46, 17071.75, 17072.10, 17072.12, 17072.13, 17072.20, 17072.33, 17072.35, 17073.10, 17074.10, 17074.15, 17074.16, 17074.20, 17074.25, 17074.26, 17074.30, 17074.50, 17074.52, 17074.54, 17074.56, 17075.10, 17075.15, 17076.10, 17076.11, 17077.10, 17077.30, 17077.35, 17077.40, 17077.42, 17077.45, 17078.18, 17078.20, 17078.22, 17078.24, 17078.25, 17088.3, 17088.5, 17088.7, 17089, 17089.2, 17090, 17092, 17096, 17110, 17111, 17150, 17180, 17183.5, 17193.5, 17194, 17199.1, 17199.4, 17210, 17210.1, 17211, 17212, 17212.5, 17213, 17213.1, 17213.2, 17251, 17315, and 100620 as added or amended by Statutes 1976, Chapter 557; Statutes 1977, Chapter 242; Statutes 1978, Chapter 362; Statutes 1982, Chapter 735; Statutes 1990, Chapter 1602; Statutes 1991, Chapter 1183, Statutes 1996, Chapter 277; Statutes 1997, Chapters 513, 893, and 940; Statutes 1998, Chapters 407, 485, 691, 741, 848, 941, 957, and 1076; Statutes 1999, Chapters 133, 709, 858, 992; Statutes 2000, Chapters 44, 193, 443, 530, 590, and 753; Statutes 2001, Chapters 132, 159, 194, 422, 647, 725, 734 and 972; and Statutes, 2002, Chapters 33, 199, 935, 1075, and 1168

California Code of Regulations, Title 2, Sections 1859.20, 1859.21, 1859.22, 1859.30, 1859.31, 1859.32, 1859.33, 1859.35, 1859.40, 1859.41, 1859.50, 1859.60, 1859.70, 1859.72, 1859.74.1, 1859.75, 1859.75.1, 1859.76, 1859.77.1, 1859.77.2, 1859.79, 1859.79.2, 1859.79.3, 1859.81, 1859.81.1, 1859.82, 1859.90, 1859.100, 1859.102, 1859.104, 1859.104.1, 1859.104.2, 1859.104.3, 1859.105, 1859.105.1, 1859.106, 1859.107, 1862.52, 1862.53, 1865.3, 1865.8, 1865.32.5, 1865.33, 1865.39, 1865.42, 1865.43, 1865.50, 1865.70.

¹⁸⁸ i.e. the activities required as a condition of receipt of SFP funding, issuance of local bonds or participation in the other state programs pled which are discussed at length in the background at pages 12-29.

b) The evidence in the record does not support a finding that school districts are practically compelled to acquire new school sites, build new schools, undertake modernization projects, add portable classrooms or to request and accept SFP funding, issue local bonds or opt to participate in other state programs to further such projects, which would trigger the requirement to comply with SFFRs contained in the test claim statutes and regulations. Rather, the requirement to comply with the SFFRs is triggered by a district's voluntary decisions to request and accept state matching funds under the SFP, to issue local bonds or to participate in one of the other voluntary programs pled.

a) School districts are not legally required to acquire new school sites, build new schools, undertake modernization projects, add portable classrooms or to request and accept SFP funding, issue local bonds or opt to participate in other state programs to further such projects, which would trigger the requirement to comply with SFFRs contained in the test claim statutes and regulations.

The decision to acquire a new school site, build a new school, undertake a school modernization project, add portable classrooms and accept SFP funding, issue local bonds or participate in one of the other voluntary programs pled in this test claim therefore, can arise in a myriad of ways, from a district-level decision to an initiative enacted by the voters. Likewise, there are a number of funding sources that a school district might utilize to fund discretionary school construction projects and a number of alternatives to building a new school that a district might consider. When SFP funding is used to acquire a school site or for school construction, compliance with the applicable SFFRs including the preparation of HMAs and related activities is a condition of funding. Generally, the following requirements are imposed as a condition of SFP: various planning, environmental, building safety, labor, public participation/disclosure and bond funding accountability requirements. Likewise, when local bonds are issued, compliance with the requirements of the statutory scheme under which they are issued is required.¹⁸⁹ These requirements generally include disclosure, voting and fiscal accountability. Similarly the "other" programs referred to in this analysis, the State Relocatable Classroom Law and California School Finance Authority Act impose their own requirements. What all of these requirements have in common, however, is that they are all downstream requirements triggered by a school district's decision to participate in the overlying program in order to acquire, expand, or modernize school facilities.

As discussed in the background above, in California, school facilities historically have been funded exclusively by local tax and fee revenues. More recently, the funding scheme has evolved to include state grant funding and issuance of local bonds, both of which impose certain requirements on schools as a condition of funding. Nothing in Article XIII B, section 6 requires the state to reimburse local government for its costs incurred to meet conditions of state grant funding or its costs incurred to meet the conditions of voluntary programs such as the issuance of local bonds, lease of portable classrooms, or loan or state funds for discretionary projects. Thus

¹⁸⁹ Note that, as discussed in the background above, when a school district acquires land or builds exclusively with its own funds, which may include funds from the issuance of bonds under some of the test claim statutes, they are exempt from some of the SFFRs (in particular some of the HMA requirements) imposed on districts that build with state funds.

there has been no shift in program responsibility and costs from state to local government. Rather than shifting costs and responsibilities to local government, the state has in fact assumed a greater share of the costs of building schools over the past several decades.¹⁹⁰ The programs pled in this test claim, represent a portion of the myriad of programs that the Legislature has enacted to provide school districts with a variety of funding options for school facilities projects that the districts chose to undertake.

None of the laws or regulations cited by claimant requires districts to acquire new school sites, undertake new school or modernization projects, add portable classrooms, or request SFP funding, issue local bonds or participate in the other state programs pled for those purposes. In comments filed February 20, 2004, however, claimant argues that participation in the Leroy F. Green School Facilities Act is not voluntary.¹⁹¹ In support of this contention, claimant cites to *Butt v. State of California*¹⁹² for the propositions that the state has a responsibility to “provide for a system of common schools, by which a school shall be kept up and supported in each district” and that those schools are required to be “free.”

Staff disagrees with the claimant’s argument that “obtaining [state] school facilities funding is not optional.” With regard to new construction of school buildings, the Second District Court of Appeal has stated: “[w]here, when or how, if at all, a school district shall construct school buildings is within the sole competency of its governing board to determine.”¹⁹³ It is true, as claimant states, that courts have consistently held public education to be a matter of statewide rather than a local or municipal concern, and that the Legislature’s power over the public school system is plenary.¹⁹⁴ These conclusions are true for every Education Code statute that comes before the Commission on the question of reimbursement under article XIII B, section 6 of the California Constitution. It is also true that the state is the beneficial owner of all school properties and that local school districts hold title as trustee for the state.¹⁹⁵

Nevertheless, article IX, section 14 of the California Constitution allows the Legislature to authorize the governing boards of all school districts to initiate and carry on any program or activity, or to act in any manner that is not in conflict with state law. In this respect, it has been and continues to be the legislative policy of the state to strengthen and encourage local

¹⁹⁰ See generally, *Candid Enterprises, Inc. v. Grossmont Union High School Dist.* (1985) 39 Cal.3d 878, *School Facility Financing – A History of the Role of the State Allocation Board and Options for the Distribution of Proposition 1A Funds* (Cohen, Joel, February 1999) and *Financing School Facilities in California* (Brunner, Eric J., October 2006).

¹⁹⁴ See *Hayes v. Commission on State Mandates* (1992) 11 Cal.App.4th 1564, 1579, fn. 5; *California Teachers Assn. v. Hayes* (1992) 5 Cal.App.4th 1513, 1524 (formerly known as *California Teachers Assn. v. Huff*); *Hall v. City of Taft* (1956) 47 Cal.2d 177, 179.

¹⁹⁵ *Hayes v. Commission on State Mandates, supra*, 11 Cal.App.4th 1564, 1579, fn. 5.

responsibility for control of public education through local school districts.¹⁹⁶ The governing boards of K-12 school districts may hold and convey property for the use and benefit of the school district.¹⁹⁷ Governing boards of K-12 school districts have also been given broad authority by the Legislature to decide when to build and maintain a schoolhouse and, “when desirable, may establish additional schools in the district.”¹⁹⁸ Thus, under state law, the decision to construct a school facility lies with the governing boards of school districts, and is not legally compelled by the state.

Additionally, there are no statutes or regulations requiring the governing boards of school districts to construct new buildings or reconstruct unsafe buildings. The decision to reconstruct or even abandon an unsafe building is a decision left to the discretion of a school district. In *Santa Barbara School District v. Superior Court*, the California Supreme Court addressed a school district’s decision to abandon two of its schools that were determined unsafe, instead of reconstructing a new building, as part of its desegregation plan.¹⁹⁹ The court held that absent proof that there were no school facilities to absorb the students, the school district, “in the reasonable exercise of its discretion, could lawfully take this action.”²⁰⁰ The court describes the facts and the district’s decision as follows:

On August 12, 1971, the Board received a report that the Jefferson school was structurally unsafe within the requirements of section 15503 [a former statute with language similar to Education Code sections 17367 and 81162]. The report recommended that a structural engineer be retained to determine whether the school should be repaired or abandoned, since if it cannot be repaired, it must be abandoned pursuant to section 15516. On May 15, 1972, three days before the final meeting of the Board, the superintendent received a report concerning the rehabilitation or replacement costs of the Jefferson school. The report found that it would cost \$621,800 to make the existing structure safe and \$655,000 to build an entirely new building. Accordingly, in fashioning the Administration Plan, the superintendent made provision therein for closing the Jefferson school. The Board would certainly be properly exercising its discretion in a reasonable manner were it to approve abandoning this building in view of the extreme cost. The determination of the questions whether a new school was needed to replace this structure or whether existing facilities could handle the Jefferson school students due to an expected drop in elementary enrollment, was properly within the Board’s discretion.²⁰¹

²⁰¹ *Id.*, p. 337.

Thus, school districts are not legally compelled to acquire new school sites or construct new school facilities, modernize school facilities, add portable classrooms or request and accept SFP funds, issue local bonds, or participate in the other state programs pled for those purposes. Based on the above analysis, staff finds that the SFFRs are triggered by the district's voluntary decision to acquire a new school site, build a school, modernize a school, add portable classrooms, and to request and accept SFP funds, issue local bonds, or participate in the other state programs pled for such projects. Participation in any one of the voluntary programs pled (i.e. SFP funding, issuance of local bonds or other programs pled) is conditioned on performance the SFFRs required by that program and thus, school districts are not legally compelled to comply with the SFFRs required by the test claim statutes and regulations, but rather make a discretionary decision to participate and thus assume the duty to comply.

As discussed in the background above, all of the requirements alleged in this test claim are imposed "as a condition of receiving funding" or are required if the district chooses to issue local bonds. Thus, if a school district wishes to receive state grant funding or issue local bonds for funding of a school facilities project, compliance with the relevant SFFRs is a prerequisite. For example, consistent with the Public Resource Code 21102 and 21150 requirements, Education Code section 17025, subdivision (b) requires certification of CEQA compliance as a condition of bond funding for K-12 school districts.

The test claim statutes make clear that state agencies must require compliance with the SFFRs (i.e. the requirements of the test claim statutes and regulations) as a condition of providing state funding for a school facility project and must require compliance with the requirement for local bond funding imposed under the test claim statutes. However, there is no legal requirement that a school district seek funding from the state or issue local bonds.

In 2003, the California Supreme Court decided the *Kern High School Dist.* case and considered the meaning of the term "state mandate" as it appears in article XIII B, section 6 of the California Constitution. The school district claimants in *Kern* participated in various funded programs each of which required the use of school site councils and other advisory committees. The claimants sought reimbursement for the costs from subsequent statutes which required that such councils and committees provide public notice of meetings, and post agendas for those meetings.²⁰²

When analyzing the term "state mandate," the court reviewed the ballot materials for article XIII B, which provided that "a state mandate comprises something that a local government entity is required or forced to do."²⁰³ The ballot summary by the Legislative Analyst further defined "state mandates" as "requirements imposed on local governments by legislation or executive orders."²⁰⁴ The court also reviewed and affirmed the holding of *City of Merced*,²⁰⁵ determining that, when analyzing state-mandate claims, the underlying program must be reviewed to

²⁰² *Kern* (2003) 30 Cal.4th 727.

²⁰³ *Id.* at p. 737.

²⁰⁴ *Ibid.*

²⁰⁵ *City of Merced v. State of California* (1984) 153 Cal.App.3d 777.

determine if the claimant's participation in the underlying program is voluntary or legally compelled.²⁰⁶ The court stated the following:

In *City of Merced*, the city was under no legal compulsion to resort to eminent domain – but when it elected to employ that means of acquiring property, its obligation to compensate for lost business goodwill was not a reimbursable state mandate, because the city was not required to employ eminent domain in the first place. Here as well, if a school district elects to participate in or continue participation in any underlying *voluntary* education-related funded program, the district's obligation to comply with the notice and agenda requirements related to that program does not constitute a reimbursable state mandate.²⁰⁷ (Emphasis in original.)

Thus, the Supreme Court held as follows:

[W]e reject claimants' assertion that they have been legally compelled to incur notice and agenda costs, and hence are entitled to reimbursement from the state, based merely upon the circumstance that notice and agenda provisions are mandatory elements of education-related programs in which claimants have participated, *without regard to whether claimant's participation in the underlying program is voluntary or compelled.*²⁰⁸ (Emphasis added.)

Based on the plain language of the statutes creating the underlying education programs in *Kern*, the court determined that school districts were not legally compelled by the state to establish school site councils and advisory bodies, or to participate in eight of the nine underlying state and federal programs and, hence, not legally compelled to incur the notice and agenda costs required under the open meeting laws. Rather, the districts elected to participate in the school site council programs to receive funding associated with the programs.²⁰⁹ Similarly here, school districts are not legally compelled to request and accept state funds or issue local bonds for discretionary construction projects. However, if districts choose to receive SFP funds, issue local bonds or participate in the other voluntary programs pled then, based upon the plain language of the test claim statutes, certain activities are required as a condition of participation in those programs.

The financing of school facilities has traditionally been the responsibility of local government, with *assistance* provided by the state. In 1985, the California Supreme Court decided *Candid Enterprises, Inc. v. Grossmont Union High School District*, which provides a good historical summary of school facility funding up until that time.²¹⁰

In California the financing of public school facilities has traditionally been the responsibility of local government. "Before the *Serrano v. Priest* decision in 1971, school districts supported their activities mainly by levying ad valorem taxes on real

²¹⁰ *Candid Enterprises, Inc. v. Grossmont Union High School Dist.* (1985) 39 Cal.3d 878.

property within their districts.” [Citation omitted.] Specifically, although school districts had received some state assistance since 1947, and especially since 1952 with the enactment of the State School Building Aid Law of 1952 (Educ. Code, § 16000 *et seq.*), they financed the construction and maintenance of school facilities through the issuance of local bonds repaid from real property taxes.

After the *Serrano* decision [citation omitted] and to the present day, local government remained primarily responsible for school facility financing, but has often been thrust into circumstances in which it has been able to discharge its responsibility, if at all, only with the greatest difficulty. In these years, the burden on different localities has been different: extremely heavy on those that have experienced growth in enrollment, light on those that have experienced decline, and somewhere in between on those that have remained stable.

In the early 1970’s, because of resistance to increasing real property taxes, localities throughout the state began to experience greater difficulty in obtaining voter approval of bond issues to finance school facility construction and maintenance. As a result, a number of communities chose to impose on developers school-impact fees ... in order to make new development cover the costs of school facilities attributable to it. [Citation omitted.]

With the passage of Proposition 13 in 1978 the burden of school financing became even heavier. “Proposition 13 prohibits ad valorem property taxes in excess of 1% except to finance previously authorized indebtedness. Since most localities have reached this 1% limit, school districts cannot raise property taxes even if two-thirds of a district’s voters wanted to finance school construction.” [Citation omitted.] Moreover, although Proposition 13 authorizes the imposition of “special taxes” by a vote of two-thirds of the electorate, such special taxes have rarely been imposed, remain novel, and as consequence are evidently not perceived as a practical method of school facility financing – especially in view of the need for a two-thirds vote of the electorate to approve them. [Citation omitted.]

In the face of such difficulties besetting local governments, the state has not taken over any substantial part of the responsibility of financing school facilities, less still full responsibility. To be sure, in order to implement the *Serrano* decision the Legislature has significantly increased assistance to education. But it has channeled by far the greater part of such assistance into educational programs and the lesser part into school facilities; in fiscal year 1981-1982, for example, only 3.6 percent went for such facilities. [Citation omitted.]²¹¹

State assistance for construction of school facilities comes almost exclusively from statewide general obligation bonds, and is implemented through the State Allocation Board.²¹² Before Proposition 13, the state bond funds provided to school districts were provided through loan

²¹¹ *Id.*, pp. 881-882. See also “School Facility Financing, A History of the Role of the State Allocation Board and Option for the Distribution of Proposition 1A Funds,” *supra*.

²¹² See also “School Facility Financing, A History of the Role of the State Allocation Board and Option for the Distribution of Proposition 1A Funds,” *supra*.

programs in which districts were required to repay their assistance with property tax revenues or local bond funds. After Proposition 13, the State Allocation Board shifted its policy of providing bond fund assistance from a loan-based program to a grant-based program.²¹³ Today, the grant funds are provided through the School Facility Program (SFP), under the provisions of the Leroy F. Greene School Facilities Act of 1998.²¹⁴ Under the SFP, state bond funding is provided in the form of per pupil grants, with supplemental grants for site development, site acquisition, and other project specific costs when warranted.²¹⁵ New construction grants provide funding on a 50/50 state and local match basis. Modernization grants provide funding on a 60/40 basis. Districts that are unable to provide local matching funds and are able to meet the financial hardship provisions may be eligible for state funding of up to 100 percent.²¹⁶

Though there is substantial funding made available to school districts through state grants, not all school districts elect to receive assistance from state funds for construction of school buildings. The “School Facility Financing” handbook prepared in February 1999 states:

If a school district wants state funding for construction or repair of a school, it must apply to the State Allocation Board for the money. *There are school districts that repair and construct school buildings without the assistance from the State Allocation Board* (i.e., San Diego Unified School District, San Luis Unified School District).²¹⁷ (Emphasis added.)

Therefore, staff finds that school districts are not legally compelled to request or accept state funding or issue local bonds thus triggering the SFFRs requirements under these circumstances.

- b) There is no evidence in the record to support a finding that school districts are practically compelled to acquire new school sites, build new schools, undertake modernization projects, add portable classrooms or to request and accept SFP funding, issue local bonds or opt to participate in other state programs to further such projects, which would trigger the requirement to comply with SFFRs contained in the test claim statutes and regulations.**

In comments filed March 31, 2004, claimant notes that “a finding of legal compulsion is not an absolute prerequisite to a finding of a reimbursable mandate” and cites to *Sacramento II* as controlling case law.²¹⁸ Claimant relies on a study and Proposition 55 ballot language, both of which state a need to build more schools in California, to demonstrate that school districts are practically compelled to construct new school facilities when existing facilities become

inadequate.²¹⁹ However, the question before the Commission is not whether additional school facilities are needed, but whether school districts are legally compelled by a state statute or regulation or practically compelled to build them and use SFP funding, issue local bonds or participate in the otherwise voluntary programs pled in this test claim therefore. As discussed above, staff finds that school districts are not legally compelled to acquire new school sites, construct new facilities, use state funds or issue local bonds under the test claim statutes.

The proper standard for determining whether school districts and community college districts are practically compelled to undertake school construction projects is the *Kern*²²⁰ standard as followed, and expanded upon to provide specific evidentiary requirements, in the recent decision *Department of Finance v. Commission on State Mandates (POBRA)*.²²¹ Absent legal compulsion, the courts have ruled that at times, based on the particular circumstances, “practical” compulsion might be found. The Supreme Court in *Kern* addressed the issue of “practical” compulsion in the context of a school district that had participated in optional funded programs in which new requirements were imposed. In *Kern*, the court determined there was no “practical” compulsion to participate in the underlying programs, since a district that elects to discontinue participation in a program does not face “certain and severe ... penalties” such as “double ... taxation” or other “draconian” consequences.²²² Rather, local entities that have discretion will make the choices that are ultimately the most beneficial for the entity and its community:

As to each of the optional funded programs here at issue, school districts are, and have been, free to decide whether to (i) continue to participate and receive program funding, even though the school district also must incur program-related costs associated with the [new] requirements or (ii) decline to participate in the funded program. Presumably, a school district will continue to participate only if it determines that the best interests of the district and its students are served by participation – in other words, if, *on balance*, the funded program, even with strings attached, is deemed beneficial. And, presumably, a school district will

²¹⁹ Claimant’s Response to DOF Comments, *supra*, pp. 3-4, citing “School Facility Financing-A History of the Role of the State Allocation Board and Options for the Distribution of Proposition 1A Funds” (Cohen, Joel, February 1999.) and Proposition 55 Ballot Pamphlet from 2004, which identified a need to construct schools to house one million pupils and modernize schools for an additional 1.1 million students.

²²⁰ *Kern, supra*, 30 Cal.4th 727.

²²¹ *Department of Finance v. Commission on State Mandates* (2009) 170 Cal.App.4th 1355, pp. 1365-1366, hereinafter “*POBRA*”. Note that *POBRA* is the test claim statute that was formerly identified as “*POBOR*” by the Commission and Commission staff. However, as the *POBRA* Court pointed out at footnote 2, the statute’s commonly used name is “Peace Officers Bill of Rights Act” and the acronym “*POBRA*” was used by the Supreme Court in *Mays v. City of Los Angeles* (2008) 43 Cal. 4th 313, 317. Therefore, this analysis will use the acronym *POBRA*.

²²² *Kern, supra*, 30 Cal.4th 727, 754.

decline participation if and when it determines that the costs of program compliance outweigh the funding benefits. (Emphasis in original.)²²³

Likewise, the state School Facilities Program (SFP) provides new construction grant funding on a 50/50 state and local match basis. Districts that are unable to provide local matching funds and are able to meet the financial hardship provisions may be eligible for state funding of up to 100 percent.²²⁴ If a district decides not to acquire a new school site or build a new school with SFP funding, and hence not to comply with all the corresponding requirements including preparation of HMAs, there is no evidence of “draconian” consequences. Rather, the district will simply forgo the state matching funds for new construction and will need to figure out another way to house its students.

In *POBRA*, the court addressed the issue of the evidence needed to support a finding of practical compulsion. In that case, it was argued that districts “employ peace officers when necessary to carry out the essential obligations and functions established by law.”²²⁵ The Commission found that the *POBRA* statutes constituted a state-mandated program within the meaning of article XIII B, section 6 of the California Constitution for counties, cities, school districts, and special districts identified in Government Code section 3301 that employ peace officers.²²⁶ In 2006, the Commission reconsidered the claim, as required by Government Code section 3313, and found that *San Diego Unified* supported the Commission’s 1999 Statement of Decision. Specifically, with regard to schools, the Commission found that districts were practically compelled to employ peace officers based upon the district’s “obligation to protect pupils from other children, and also to protect teachers themselves from the violence by the few students whose conduct in recent years has prompted national concern.”²²⁷

The Commission’s Statement of Decision on reconsideration pointed out that, like the decision on mandatory expulsions in the *San Diego Unified* case, its decision was supported by the fact that the California Supreme Court found that the state “fulfills its obligations under the safe schools provision of the Constitution (Cal. Const., art. I, § 28, subd. (c)) by permitting local school districts to establish a police or security department to enforce rules governing student conduct and discipline.”²²⁸ The Commission relied on a general requirement in the law (i.e. to provide safe schools) to support a finding of practical compulsion to perform specific activities (i.e. to hire police officers and comply with the down-stream requirements of hiring those officers). This is precisely the line of reasoning that claimant urges the Commission to follow in this test claim.

However, the court in *POBRA* found that the superior court erred in concluding as a matter of law that, “[a]s a practical matter, the employment of peace officers by the local agencies is ‘not an optional program’ and ‘they do not have a genuine choice of alternative measures that meet

²²³ *Id.*, p. 753.

²²⁶ See CSM-4499.

²²⁷ CSM 05-RL-4499-01, p. 26, citing *In re Randy G.* (2001) 26 Cal.4th 556, 562-563.

²²⁸ *Id.*

their agency-specific needs for security and law enforcement." Moreover, the *POBRA* court did not find any evidence in the record to support a finding of legal or practical compulsion and the court provided some guidance regarding the kind of evidentiary showing required to make such a finding. Specifically, the court stated:

The 'necessity' that is required is facing 'certain and severe ... penalties' such as 'double ... taxation' or other 'draconian' consequences.' That cannot be established in this case without a concrete showing that reliance upon the general law enforcement resources of cities and counties will result in such severe adverse consequences.²²⁹

Thus, practical compulsion must be demonstrated by specific facts in the record showing that unless the alleged activity is performed, here the activity of acquiring new school sites, building new school facilities or modernizing existing schools and accepting SFP funding, issuing local bonds or opting to participate in other state programs to further such projects, which would in turn trigger the requirement to comply with the SFFRs that are a condition of those funding programs, the district faces "certain and severe ... penalties' such as 'double ... taxation' or other 'draconian' consequences.'" Only a showing that relying on alternative arrangements to house students would result in such severe consequences will meet the practical compulsion standard. Some alternatives that school districts can employ without requesting SFP funds, issuing local bonds or participating in the other voluntary programs pled in this test claim, thus triggering the requirement to comply with SFFRs, include but are not limited to:

- Transferring students to other schools;²³⁰
- Double session kindergarten classes;
- District boundary changes;
- Multi-track year round scheduling;
- Bussing; and,
- Reopening closed school sites in the district, where available.

Thus, staff finds that there has been no concrete showing, as required by the *POBRA* court, that reliance upon non-construction alternatives to house students would result in severe adverse consequences.

Thus, there is no evidence in the law or in the record that school districts that elect not to use SFP funds, issue local bonds, or participate in the other voluntary programs pled in this test claim, which would trigger the requirement to comply with the SFFRs, face certain and severe penalties such as double taxation or other draconian consequences.

Instead, the seeking of SFP funding, issuance of local bonds or participation in other voluntary programs pled in this test claim are discretionary decisions of the district, analogous to the situation in *City of Merced*. There, the issue before the court was whether reimbursement was

²²⁹ *POBRA, supra*, 170 Cal.App.4th 1355, 1368, (*POBRA*) citing *Kern, supra*, 30 Cal.4th at p. 754, quoting *City of Sacramento v. State of California* (1990) 50 Cal.3d 51, 74.) Exhibit S.

²³⁰ See California Code of Regulations, title 14, section 15301.

required for new statutory costs imposed on the local agency to pay a property owner for loss of goodwill, when a local agency exercised the power of eminent domain.²³¹ The court stated:

Whether a city or county decides to exercise eminent domain is, essentially, an option of the city or county, rather than a mandate of the state. The fundamental concept is that the city or county is not required to exercise eminent domain. If, however, the power of eminent domain is exercised, then the city will be required to pay for loss of goodwill. Thus, payment for loss of goodwill is not a state-mandated cost.²³²

The Supreme Court in *Kern* reaffirmed the *City of Merced* rule in applying it to voluntary education-related funded programs:

The truer analogy between [*Merced*] and the present case is this: In *City of Merced*, the city was under no legal compulsion to resort to eminent domain – but when it elected to employ that means of acquiring property, its obligation to compensate for lost business goodwill was not a reimbursable state mandate, because the city was not required to employ eminent domain in the first place. Here as well, if a school district elects to participate in or continue participation in any underlying *voluntary* education-related funded program, the district’s obligation to comply with the notice and agenda requirements related to that program does not constitute a reimbursable state mandate.^{233 234}

The holding in *City of Merced* applies in this instance. Any costs incurred under the SFRRs in the test claim statutes and regulations (excepting Health & Saf. Code § 25358.1) result from the

²³¹ *City of Merced, supra*, (1984) 153 Cal.App.3d 777, 777.

²³² *Id.* at 783.

²³³ *Kern, supra*, 30 Cal.4th 727, 743.

²³⁴ The Code of Civil Procedure provision that was cited in *City of Merced* states:

Nothing in this title requires that the power of eminent domain be exercised to acquire property necessary for public use. Whether property necessary for public use is to be acquired by purchase or other means or by eminent domain is a decision left to the discretion of the person authorized to acquire the property. (Code Civ. Proc. § 1230.030.)

The Law Revision Commission’s comment on this provision stated:

Section 1230.030 makes clear that whether property is to be acquired by purchase or other means, or by exercise of the power of eminent domain, is a discretionary decision. Nothing in this title requires that the power of eminent domain be exercised; but, if the decision is that the power of eminent domain is to be used to acquire property for public use, the provisions of this title apply except as otherwise specifically provided by statute. ... (California Law Revision Commission comment on Code of Civil Procedure section 1230.030, 2009 Thomson Reuters.)

school district's decision acquire new school sites, build new schools, undertake modernization projects, add portable classrooms or to request and accept SFP funding, issue local bonds or opt to participate in other state programs therefore. Under such circumstances, reimbursement is not required.²³⁵ Therefore, based on the above discussion, staff finds that school districts are not mandated by the state to undertake discretionary projects and participate in the voluntary funding programs pled in this test claim, which would subject them to SFFRs.

CONCLUSION

Staff concludes that the test claim statutes do not impose a reimbursable state-mandated program within the meaning of article XIII B, section 6 of the California Constitution because:

1. Education Code sections 39003 and 39120 were repealed in 1993, prior to the beginning of the potential reimbursement period for this test claim and thus cannot be reimbursable.
2. The Commission does not have jurisdiction over Education Code section 17213.1, as added by Statutes of 1999, chapter 1002, because this statute was the subject of a final decision of the Commission, *Acquisition of Agricultural Land for a School Site* (98-TC-04 and 01-TC-03).
3. Health and Safety Code section 25358.1, as Added by Statutes 1999, Chapter 23 does not impose a "program" and thus is not subject to reimbursement under article XIII B, section 6 of the California Constitution.
4. The Substantial Progress and Expenditure Audit Guide of May 2003, the School Facility Program Guidebook of January 2003, the State Relocatable Classroom Program Handbook of January 2003, and the Lease-Purchase Applicant Handbook of April 1988 are not executive orders subject to Article XIII B, section 6.
5. Health and Safety Code section 25358.7.1, as added by Statutes 1999, chapter 23, imposes requirements on DTSC, not school districts.
6. The statutes below, which generally require compliance school facility funding requirements, do not mandate school districts to perform any activities because:
 - a) School districts are not legally required to acquire new school sites, build new schools, undertake modernization projects, add portable classrooms or to request and accept SFP funding, issue local bonds or opt to participate in other state programs to further such projects, which would trigger the requirement to comply with SFFRs contained in the test claim statutes and regulations.
 - b) There is no evidence in the record to support a finding that school districts are practically compelled to acquire new school sites, build new schools, undertake modernization projects, add portable classrooms or to request and accept SFP funding, issue local bonds or opt to participate in other state programs to further such projects, which would trigger the requirement to comply with SFFRs contained in the test claim statutes and regulations. Rather, the requirement to comply with the SFFRs is triggered by a district's voluntary decisions to request

²³⁵ *San Diego Unified School Dist.*, supra, 33 Cal.4th 859, 880.

and accept state matching funds under the SFP, to issue local bonds or to participate in one of the other voluntary programs pled.

Education Code Sections 15271, 15272, 15274, 15276, 15278, 15280, 15282, 15284, 15301, 15302, 15303, 15320, 15321, 15322, 15323, 15324, 15325, 15326, 15327, 15336, 15340, 15341, 15342, 15343, 15346, 15347, 15349, 15349.1, 15350, 15351, 15352, 15354, 15355, 15359.2, 15359.3, 15380, 15381, 15384, 15390, 15391, 17006, 17008.3, 17009, 17009.5, 17014, 17015, 17016, 17017, 17017.2, 17017.5, 17017.6, 17017.7, 17017.9, 17018, 17018.5, 17018.7, 17019.3, 17019.5, 17020, 17021.3, 17022, 17022.7, 17024, 17025, 17029, 17029.5, 17030, 17030.5, 17031, 17032, 17032.3, 17032.5, 17036, 17038, 17040, 17040.1, 17040.2, 17040.3, 17040.6, 17040.7, 17040.8, 17041.1, 17041.2, 17041.8, 17042.7, 17042.9, 17047, 17047.5, 17049, 17056, 17059, 17059.1, 17061, 17062, 17063, 17064, 17065, 17066, 17070.33, 17070.50, 17070.51, 17070.60, 17070.63, 17070.70, 17070.71, 17070.75, 17070.77, 17070.80, 17070.90, 17070.95, 17070.97, 17070.98, 17071.10, 17071.25, 17071.30, 17071.33, 17071.35, 17071.40, 17071.46, 17071.75, 17072.10, 17072.12, 17072.13, 17072.20, 17072.33, 17072.35, 17073.10, 17074.10, 17074.15, 17074.16, 17074.20, 17074.25, 17074.26, 17074.30, 17074.50, 17074.52, 17074.54, 17074.56, 17075.10, 17075.15, 17076.10, 17076.11, 17077.10, 17077.30, 17077.35, 17077.40, 17077.42, 17077.45, 17078.18, 17078.20, 17078.22, 17078.24, 17078.25, 17088.3, 17088.5, 17088.7, 17089, 17089.2, 17090, 17092, 17096, 17110, 17111, 17150, 17180, 17183.5, 17193.5, 17194, 17199.1, 17199.4, 17210, 17210.1, 17211, 17212, 17212.5, 17213, 17213.1, 17213.2, 17251, 17315, and 100620 as added or amended by Statutes 1976, Chapter 557; Statutes 1977, Chapter 242; Statutes 1978, Chapter 362; Statutes 1982, Chapter 735; Statutes 1990, Chapter 1602; Statutes 1991, Chapter 1183, Statutes 1996, Chapter 277; Statutes 1997, Chapters 513, 893, and 940; Statutes 1998, Chapters 407, 485, 691, 741, 848, 941, 957, and 1076; Statutes 1999, Chapters 133, 709, 858, 992; Statutes 2000, Chapters 44, 193, 443, 530, 590, and 753; Statutes 2001, Chapters 132, 159, 194, 422, 647, 725, 734 and 972; and Statutes, 2002, Chapters 33, 199, 935, 1075, and 1168

Staff Recommendation

Staff recommends that the Commission adopt this staff analysis to deny the test claim.

Glossary of Frequently Used SFFRs Related Terms and Acronyms:

CEQA: California Environmental Quality Act	An Act with the purposes of informing decisionmakers and the public about project impacts, identifying ways to avoid or significantly reduce environmental damage, preventing environmental damage by requiring feasible alternatives or mitigation measures, disclosing to the public reasons why an agency approved a project if significant environmental effects are involved, involving public agencies in the process, and increasing public participation in the environmental review and the planning processes.
CERCLA: federal Comprehensive Environmental Response, Compensation, and Liability Act	HSAA is a 1980 law passed to address the cleanup of abandoned toxic waste sites. DTSC administers CERCLA, commonly known as “Superfund”). Which is implemented in California through HSAA and related regulations.
DOE: California Department of Education	
DOF: California Department of Finance	
DTSC: California Department of Toxic Substances Control	
EIR: Environmental Impact Report	A detailed statement prepared in accordance with CEQA whenever it is established that a project may have a potentially significant effect on the environment. The EIR describes a proposed project, analyzes potentially significant environmental effects of the proposed project, identifies a reasonable range of alternatives, and discusses possible ways to mitigate or avoid the significant environmental effects. EIR can refer to the draft EIR (DEIR) or the final EIR (FEIR) depending on context. (Pub. Resources Code §§ 21061, 21100 and 21151; Cal. Code Regs., tit. 14, § 15362.)
HMA: Hazardous Materials Assessments	Environmental studies conducted to provide basic information for determining if there has been a release or there is a threatened release of a hazardous material or if there may be a naturally occurring hazardous material present at the site which may pose a risk to human health or the environment.
HSAA: The Hazardous Substance Account Act	California’s equivalent to CERCLA. HSAA funds the cleanup of toxic sites from a fund created from taxes and fines levied on the site’s polluters, and imposes requirements on affected property owners and potentially

	responsible parties and a number of related requirements on state agencies.
ND: Negative Declaration	A written statement by the lead agency that briefly states why a project subject to CEQA will not have a significant effect on the environment. An ND precludes the need for an EIR. (Pub. Resources Code § 21064; Cal. Code Regs., tit. 14, § 15371.)
OPSC : Office of Public School Construction	The administrative arm of the SAB whose primary responsibilities include: allocating state funds for projects approved by the SAB, reviewing eligibility and funding applications, and providing information and assistance to school districts.
Phase I Assessment	HMA prepared to identify the potential for hazardous material release or the presence of naturally occurring hazardous materials.
PEA: Preliminary Endangerment	HMA prepared if the Phase I Assessment identified potential or actual hazardous materials to evaluate the threat posed to public health or the environment.
SAB: State Allocation Board	The board responsible for approving all state apportionments for new school construction and modernization projects.
SFP: State School Facility Program	A state grant program, funded with statewide bonds, to fund new school facilities and the modernization of existing school facilities.
SFFRs: School Facilities Funding Requirements	Activities required as a condition of funding or participation in state school facility programs.

v.

SANTA BARBARA SCHOOL DISTRICT et al., Defendants and Appellants

L.A. No. 30054., L.A. No. 30086.

Supreme Court of California
January 15, 1975.

SUMMARY

In a class action under a complaint alleging two causes of action concerning the validity of the composition and election of a city board of education and one cause challenging the validity of a desegregation plan adopted at a board meeting, the trial court filed a memorandum of intended decision declaring an intent to enjoin implementation of the plan and also expressing the court's intent with respect to the other causes. However, before findings and conclusions were filed, the Supreme Court issued an alternative writ of prohibition limited in effect to the part of the intended decision concerned with implementation of the plan. Judgment was rendered on the first two causes. (Superior Court of Santa Barbara County, No. 96260, John T. Rickard, Judge.)

The Supreme Court ordered defendants' appeal from the judgment transferred from the Court of Appeal to it for consideration simultaneously with the writ proceeding. The judgment was reversed and the cause remanded with directions to enter judgment for defendants on the two causes relating to validity of the election and composition of the board. And a peremptory writ of prohibition issued to restrain the trial court's intended action in all respects except in enjoining implementation of the desegregation plan which had purportedly been adopted. It was held that the board had been without jurisdiction to adopt the plan at the meeting as a result of the failure of the posted agenda

for that meeting to give adequate notice that the particular plan would be considered at the meeting. Additionally, the court held that as enacted in Proposition 21, Ed. Code, § 1009.6, barring the assignment of pupils on the basis of race, is unconstitutional as applied to school districts manifesting segregation, but that the parts of the proposition which repealed Ed. Code, §§ 5002, 5003, declaring state policy of eliminating racial imbalance in schools, were severable from the invalid part and independently valid. And under the view that there is no constitutional right to a separate and elected elementary board of education and no unconstitutional infirmity in designating a city's board of education, elected from the full territory within its jurisdiction, to govern the lesser and wholly included elementary school district, the Supreme Court held that the Santa Barbara Board of Education, which has been designated by the Legislature to govern the city's elementary school district, may lawfully be the common governing board of the city's high and elementary school districts, even though they are not coterminous.

In Bank. (Opinion by Sullivan, J., expressing the unanimous view of the court.)

HEADNOTES

Classified to California Digest of Official Reports

(1) Schools § 10--School Districts--Assignment of Pupils on Basis of Race.

Ed. Code, § 1009.6, which bars assignment of pupils on the basis of race, is unconstitutional as applied to school districts manifesting either de jure or de facto segregation.

(2) Schools § 10--School Districts--Validity of Repealing Provisions of Initiative.

Inasmuch as a policy in favor of neighborhood schools is a reasonably conceivable one and such an expression of policy can in no way limit or affect the constitutional obligations of school districts, the provisions found in §§ 2, 3, and 4 of Proposition 21, repealing Ed. Code, §§ 5002, 5003, which had declared the state policy of eliminating racial imbalance in schools and had delineated factors to be considered in implementing the policy, and also repealing certain administrative guidelines, cannot be struck down as

constitutionally impermissible.

(3) Schools § 10--School Districts--Severability of Initiative Provisions.

The fact that, as enacted in Proposition 21, Ed. Code, § 1009.6, barring the assignment of pupils on the basis of race, is unconstitutional as applied to school districts manifesting segregation, does not necessarily invalidate the repealing provisions of the proposition, inasmuch as the repealing provisions are severable from the unconstitutional part not only mechanically, but also as to purpose and method, and are of independent validity and not inconsistent with the elimination of the invalid part.

(4a, 4b) Schools § 51 (5)--Administrative Officers--Boards--Meetings-- Jurisdiction.

Under Ed. Code, § 966, requiring the posting of an agenda 48 hours prior to a proposed meeting of a school board, the board cannot change its posted agenda within the 48-hour period next immediately preceding a regular meeting. If the board wishes to change the agenda substantially within that period, it must postpone a meeting at least 48 hours. Thus, where concerned parents and citizens could reasonably infer from the posted agenda that only those desegregation plans which had been previously presented would be considered at the meeting, the board had no jurisdiction to consider or approve a plan which was not presented until that meeting and which differed substantially from all the previously presented plans.

(5) Schools § 51 (5)--Administrative Officers--Boards--Meetings--Posted Agenda.

The proper posting of a school board meeting agenda, as required by Ed. Code, § 966, cannot be replaced by newspaper publicity.

(6) Schools § 51 (6)--Administrative Officers--Boards--Rights, Powers and Duties--Desegregation.

In desegregating a school system, a school board is not limited in the exercise of its powers to those acts reasonably necessary to effectuating desegregation.

(7) Schools § 77--Actions and Liability--Judicial Control Over Official Acts--Prohibition.

Prohibition was available to prevent the trial court from exceeding its jurisdiction by carrying out its memorandum of intended decision, insofar as the decision would amount to a substitution of the trial court's views for those of a school board with respect to a matter within the board's

discretion concerned with the closing down of certain schools.

[See Cal.Jur.2d, Rev., Schools, § 217; Am.Jur.2d, Schools, § 52.]

(8) Schools § 51 (1)--Administrative Officers--One Board as Governing Districts Which Are Not Coterminous.

There is no constitutional right to a separate, elected elementary board of education and no constitutional infirmity in designating a city's board of education, elected from the full territory within its jurisdiction, to govern the lesser and wholly included elementary school district. Therefore, the Santa Barbara Board of Education, which has been designated by the Legislature to be the governing board of the city's elementary school district, and which is elected in compliance with the "one man, one vote" rule, may lawfully be the common governing board of the elementary and high school districts despite the fact that they are not coterminous. And election of the board is not subject to attack on the theory that the election is also an election of the governing board of the elementary school district and that such latter election violates the "one man, one vote" rule as causing the dilution of the votes of electors residing in the elementary school district by the votes of non-resident electors.

COUNSEL

George P. Kading, County Counsel, Robert D. Curiel, Chief Assistant County Counsel, Marvin Levine and Don H. Vickers, Deputy County Counsel, for Petitioners and for Defendants and Appellants.

Stewart Weinberg as Amici Curiae. *319

SULLIVAN, J.

In this class action brought against two school districts and their common governing board of education, we are called upon to determine the validity of a desegregation plan for elementary schools. Our task also requires us to examine and pass upon the constitutionality of a recent initiative measure enacting certain anti-busing legislation and repealing existing statutes dealing with the prevention and elimination of racial and ethnic imbalance in pupil enrollment. Additionally we must examine the validity of the pertinent statute permitting the board of education in question to be the common governing board of the high school district and the elementary school district here involved. In essence, plaintiffs make two independent but cognate attacks - one against the board's plan and the other against the board itself. We take them up in that order, separately stating the facts proper to each. We first turn our attention to the desegregation plan.

I

Defendant Santa Barbara Board of Education (hereafter Board and referred to as defendant in the singular) is the common governing board of defendants Santa Barbara School District and Santa Barbara High School District. Defendant Norman B. Scharer is the Superintendent of Schools of Santa Barbara (superintendent).

Culminating a period of five years' planning and study aimed at correcting the racial imbalance in elementary schools, the Board on February 3, 1972, resolved "to move immediately toward the total desegregation of all Santa Barbara elementary schools beginning in September 1972." The Board adopted the following four-step procedure to effectuate this resolution: (1) the issuance by February 22, 1972, of a statement of policy on desegregation; (2) the creation of a "Task Force Committee for Desegregation," consisting of 22 members, to develop criteria for the study of proposed desegregation plans and to present such criteria to the Board no later than March 2, 1972; (3) the establishment of an "Education and Integration Study Committee," consisting of more than 100 members, under the chairmanship of the superintendent, to review various plans submitted for carrying out the desegregation-integration policy and to present to the Board, no later than May 4, 1972, two or three alternate plans; and (4)

the determination that "[o]n May 18, 1972, this Board of Education will adopt one plan to be implemented as fully as possible in September 1972." *320

Both committees met numerous times and completed all work on schedule. On March 2, 1972, the Board adopted 12 criteria for guidance in reviewing the proposed desegregation plans. One of the criteria stated that any desegregation plan should "provide for optimum use of and be capable of being implemented within existing facilities."

Nine desegregation plans were received and studied initially by the "Task Force" and thereafter by the larger Education and Integration Study Committee. The latter committee by a vote of 74 to 4 recommended to the Board a specific desegregation plan known as the Hord-Mailes-Christian-Belden Plan, named after the four sponsoring elementary school principals. The committee also approved two alternate plans and prior to May 4, 1972, presented all three to the Board. These three plans, together with the West-Anderson plan not recommended by the committee, were formally presented to the Board at its meeting held on May 4, 1972.

Due to various objections raised by members of the Board in the ensuing discussion at that meeting, the superintendent decided to develop his own plan. On May 16, 1972, just two days prior to the Board meeting scheduled for final adoption of a desegregation plan, the superintendent announced, in an article appearing in the Santa Barbara News Press, that he proposed recommending a new desegregation plan at that meeting. The next day the same newspaper contained a longer article describing the general outlines of the so-called "Administration Plan." That night the plan was discussed at a meeting of the Education and Integration Study Committee. However, there was no time for study or review prior to the Board meeting the following night.

At its meeting on the next night - May 18, 1972 - the Board discussed the three plans recommended by the committee, the West-Anderson Plan and the Administration Plan. The last named plan was presented orally because it had not yet been reduced to writing. Despite two petitions signed by 3,000 people requesting a postponement for further study, the Administration Plan was adopted by the Board as orally presented. On June 8, 1972, the plan was summarized in writing and submitted to the State Department of Education for approval.

On June 9, 1972, C. Raymond Mullin and Howard G. Larson, on behalf of themselves and of all other voters, parents and taxpayers similarly situated, commenced the instant action seeking: (1) a writ of mandate to compel a special election of the Board and (2) declaratory *321 and injunctive relief to prevent the implementation of the allegedly unlawful and inadequate desegregation plan. The complaint contained three causes of action: The first two which we discuss separately (see Part II, *infra*) concerned the validity of the election and composition of the Board; the third cause of action alleged that the adoption of the Administration Plan by the Board was: (1) invalid for failure to give notice as required by the Education Code and (2) an abuse of discretion, in that the Board hurriedly adopted an inadequately studied plan which failed to desegregate all the elementary schools, despite the closing of two elementary schools altogether and the changing of the kindergarten to grade six pattern in two other schools.

Following an eight-day trial, the court filed a memorandum of intended decision. In respect to the third count^{FN1} which attacked the validity of the Administration Plan, the court declared its intention to enjoin implementation of the plan. It rested this contemplated action on two bases. First, the court concluded that the Board had no jurisdiction to close the schools since it had failed to include notice of the proposed closure of two schools in its published agenda as required by section 966 of the Education Code. The court determined that the closure of the schools was such an integral part of the Administration Plan that the whole plan must fall. Secondly, the court concluded that the Board abused its discretion by adopting the Administration Plan requiring the closure of two schools since such closure was not reasonably necessary to the effective desegregation of the elementary schools.

FN1 The memorandum of intended decision also included a proposed decision on the first two causes of action as well, which is discussed in Part II of this opinion.

Before findings of fact and conclusions of law, based on the court's memorandum of intended decision were filed, defendants presented to this court a petition invoking our original jurisdiction and seeking a writ of prohibition restraining the trial court from entering judgment in accord with the memorandum of intended decision. We issued an alternative writ of prohibition.^{FN2} On August 28, 1972,

plaintiffs petitioned this court to modify the alternative writ so as to omit any stay of the trial court's proposed order enjoining implementation of the plan. Since in issuing the alternative writ, we had determined that the petition had made a prima facie showing that the proposed action of the trial court *322 was in excess of its jurisdiction and therefore that its proposed enjoining of the Administration Plan must be prohibited pending our final determination of the issue, we denied the petition for modification.

FN2 As prayed for in the petition, the alternative writ of prohibition was limited in effect to the intended decision on the third cause of action. The trial court thereafter entered judgment on the first two causes of action and defendants appealed. We ordered such appeal transferred from the Court of Appeal to this court so that we could consider it simultaneously with the writ proceeding.

Subsequently an additional factor was injected into the resolution of the above proceeding with the adoption by the electorate at the general election held on November 7, 1972, of the initiative measure denominated Proposition 21. Section 1 of that proposition added to the Education Code section 1009.6 providing: "No public school student shall, because of his race, creed, or color, be assigned to or be required to attend a particular school." Sections 2 and 3 of Proposition 21 repealed sections 5002 and 5003^{FN3} respectively of the Education Code, which had declared the state policy of eliminating racial imbalance in California schools and had delineated the various factors to be considered in implementing this policy. Section 4 of Proposition 21, repealed the administrative guidelines toward achieving racial balance in the schools adopted by the State Board of Education. (§§ 14020 and 14021 of tit. 5 of the Cal. Admin. Code.) *323

FN3 Section 5002 provides: "It is the declared policy of the Legislature that persons or agencies responsible for the establishment of school attendance centers or the assignment of pupils thereto shall prevent and eliminate racial and ethnic imbalance in pupil enrollment. The prevention and elimination of such imbalance shall be given high priority in all decisions relating to school sites, school attendance areas, and school attendance practices."

Section 5003 provides: “(a) In carrying out the policy of Section 5002, consideration shall be given to the following factors:

“(1) A comparison of the numbers and percentages of pupils of each racial and ethnic group in the district with their numbers and percentages in each school and each grade.

“(2) A comparison of the numbers and percentages of pupils of each racial and ethnic group in certain schools with those in other schools in adjacent areas of the district.

“(3) Trends and rates of population change among racial and ethnic groups within the total district, in each school, and in each grade.

“(4) The effects on the racial and ethnic composition of each school and each grade of alternate plans for selecting or enlarging school sites, or for establishing or altering school attendance areas and school attendance practices.

“(b) The governing board of each school district shall periodically, at such time and in such form as the Department of Education shall prescribe, submit statistics sufficient to enable a determination to be made of the numbers and percentages of the various racial and ethnic groups in every public school under the jurisdiction of each such governing board.

“(c) For purposes of Section 5002 and this section, a racial or ethnic imbalance is indicated in a school if the percentage of pupils of one or more racial or ethnic groups differs significantly from the districtwide percentage.

“(d) A district shall study and consider plans which would result in alternative pupil distributions which would remedy such an imbalance upon a finding by the Department of Education that the percentage of pupils of one or more racial or ethnic groups in a school differs significantly from the district-wide percentage. A district undertaking such a study may consider among feasibility factors the following:

“(1) Traditional factors used in site selection, boundary determination, and school organization by grade level.

“(2) The factors mentioned in subdivision (a) of this section.

“(3) The high priority established in Section 5002.

“(4) The effect of such alternative plans on the educational programs in that district.

“In considering such alternative plans the district shall analyze the total educational impact of such plans on the pupils of the district. Reports of such a district study and resulting plans of action, with schedules for implementation, shall be submitted to the Department of Education, for its acceptance or rejection, at such time and in such form as the department shall prescribe. The department shall determine the adequacy of alternative district plans and implementation schedules and shall report its findings as to the adequacy of alternative district plans and implementation schedules to the State Board of Education. A summary report of the findings of the department pursuant to this section shall be submitted to the Legislature each year.

“(e) The State Board of Education shall adopt rules and regulations to carry out the intent of Section 5002 and this section.”

Since the Administration Plan was adopted by the Board pursuant to and in furtherance of the repealed code sections, and since the plan involved the assignment of various ethnic minority students to certain schools in order to create a racial balance among the elementary schools in the district, Proposition 21, if valid, would provide an independent basis to support the trial court's intended invalidation of the Administration Plan. This court has, therefore, allowed various amici curiae to file briefs directed to the question of the validity and constitutionality of Proposition 21.

In 1970 the Legislature had added to the Education Code,

^{FN4} section 1009.5 which provided: "No governing board of a school district shall require any student or pupil to be transported for any purpose or for any reason without the written permission of the parent or guardian." This court in *San Francisco Unified School Dist. v. Johnson* (1971) 3 Cal.3d 937 [92 Cal.Rptr. 309, 479 P.2d 669] observed that this section was reasonably susceptible of two interpretations: "The ambiguity of section 1009.5 inheres in the phrase '*require* any student or pupil to be transported.' [Fn. omitted.] (Italics added.) One may 'require' a student to be transported by punishing a refusal or by physically forcing him onto a school bus; in a second sense, one may 'require' a student to be transported by *assigning* him to a school beyond walking distance of his home." (

FN4 Hereafter, unless otherwise indicated, all section references are to the Education Code. *Id.* at p. 945.) We reasoned that if the section were construed to prohibit assignment of pupils to a school beyond a reasonable walking distance from the pupil's home it would be unconstitutional. Applying the doctrine that where possible a statute will be construed in a manner that would uphold its constitutionality, we accordingly held that "section 1009.5 does no more than prohibit a school district from compelling *324 students, without parental consent, to use means of transportation furnished by the district." (*Id.* at p. 942.)

Shortly after our decision in *Johnson*, the Legislature passed the Bagley Act adding sections 5002 and 5003 (see fn. 3, *ante*) which directed school districts to "eliminate racial and ethnic imbalance in pupil enrollment" and specified certain factors to be considered in developing plans to achieve racial balance. The proponents of Proposition 21 in their published argument in support of the proposition characterized the Bagley Act as a "forced integration measure ... which could only be accomplished through forced busing ... without regard to neighborhood schools or parental consent." They asserted opposition to "mandatory busing for the sole purpose of achieving forced integration" and to "reassign[ing] pupils from their neighborhood schools to achieve racial and ethnic balance." Proposition 21 purported to eliminate this evil by repealing the Bagley Act (§§ 5002 and 5003), as well as the complementary administrative regulations, and by adding section 1009.6 which would prohibit forced integration and mandatory busing by denying the school district's power to assign

pupils to schools on the basis of race.

Defendants and various amici curiae urge that Proposition 21 is unconstitutional in its entirety, both insofar as it added section 1009.6 and as it repealed sections 5002 and 5003 along with the administrative guidelines.

We declared in *Johnson* that section 1009.5, if construed to bar assignment of pupils to a school beyond reasonable walking distance "would be unconstitutional if applied to districts manifesting racial segregation, whether de jure or de facto in character." (*San Francisco Unified School Dist. v. Johnson, supra*, 3 Cal.3d at p. 954.) Section 1009.6 which bars the assignment of pupils on the basis of race is unconstitutional in the same manner and for the same reasons set forth by us in *Johnson*. We deem it unnecessary to repeat here at length our rationale in that case; our opinion speaks for itself. We merely outline here its essentials, and underscore our conclusions with reference to subsequent United States Supreme Court cases.

First: We emphasized in *Johnson* that "Often the most effective program, and at times the only program, which will eliminate segregated schools requires pupil reassignment and busing. ... Since the U.S. Supreme Court has held that under the Constitution school boards in *de jure* segregated districts are 'clearly charged with the affirmative duty to *325 take whatever steps might be necessary' to eliminate segregation 'root and branch,' a statute which would proscribe a principal, and in some cases essential and exclusive step to achieve that end, must obviously violate constitutional requirements." (*San Francisco Unified School Dist. v. Johnson, supra*, 3 Cal.3d 937, 955.) (Italics added.)

Approximately three months after we expressed these views in *Johnson* in dealing with section 1009.5, the United States Supreme Court in *Board of Education v. Swann* (1971) 402 U.S. 43 [28 L.Ed.2d 586, 91 S.Ct. 1284] struck down a statute virtually identical with section 1009.6 ^{FN5} (added to the code in 1972 by Proposition 21) with an unmistakably clear and forceful expression of the same constitutional mandate. "Just as the race of students must be considered in determining whether a constitutional violation has occurred, so also must race be considered in formulating a remedy. To forbid ... all assignments made on the basis of race would deprive school authorities of the one tool absolutely essential to fulfillment of their constitutional obligation to eliminate dual school systems. [¶]

Similarly, the flat prohibition against assignment of students for the purpose of creating a racial balance must inevitably conflict with the duty of school authorities to disestablish dual school systems. ... [¶] We likewise conclude that an absolute prohibition against transportation of students assigned on the basis of race, 'or for the purpose of creating a balance or ratio,' will similarly hamper the ability of local authorities to effectively remedy constitutional violations." (

FN5 North Carolina General Statutes section 115-176.1 (Supp. 1969) provides in relevant part: "No student shall be assigned or compelled to attend any school on account of race, creed, color or national origin, or for the purpose of creating a balance or ratio of race, religion or national origins. Involuntary bussing of students in contravention of this article is prohibited" *Id.* at p. 46 [28 L.Ed.2d at p. 589].)

Second: We further held in *Johnson* that section 1009.5 was unconstitutional as applied to school districts manifesting de facto as well as de jure racial segregation. Citing a number of decisions of lower federal courts (3 Cal.3d at p. 956, fns. 21-23), we observed that they had not drawn a clear distinction between de facto and de jure segregation and that some of them had defined de facto segregation as "that resulting from residential patterns in a nonracially motivated neighborhood school system." (*Id.* at p. 956, fn. omitted; citing inter alia, *Keves v. School District Number One, Denver, Colorado* (D.Colo. 1970) 313 F.Supp. 61, 73-75; *Swann v. Charlotte-Mecklenburg Bd. of Educ.* (4th Cir. 1970) 431 F.2d 138, 141; 3 Cal.3d at p. 956, fns. 21 and 22.) We noted the necessary *326 influence of school board decisions on the racial composition of residential areas.

Canvassing these federal precedents we concluded: "Thus under the current pattern of court decisions, neither school districts nor lower courts can determine with any confidence whether a pattern of school segregation should be classed as de facto or de jure. Consequently, if we held section 1009.5 unconstitutional only as applied to districts of de jure segregation, no school board in California ... could ascertain whether section 1009.5 could constitutionally apply within its district. Such a holding would, therefore, entail uncertain enforcement of section 1009.5, a confusion which would inhibit and delay school boards in their efforts to bring about full equality of educational

opportunity. The *Green* decision [*Green v. County School Board* (1968) 391 U.S. 430 (20 L.Ed.2d 716, 88 S.Ct. 1689)] calls for desegregation now; a statute which imports confusion and delay in the uprooting of de jure segregation violates both the rule prohibiting partial enforcement of legislation, when such enforcement entails the danger of vague future application, and the mandate of the Supreme Court of the United States." (*San Francisco Unified School Dist. v. Johnson, supra*, 3 Cal.3d at p. 957.)

(1) This reasoning has been substantially buttressed by the recent decision of the United States Supreme Court in *Keves v. School District, No. 1, Denver, Colo.* (1973) 413 U.S. 189 [37 L.Ed.2d 548, 93 S.Ct. 2686]. In *Keves* the high court defined de jure segregation as "current condition of segregation resulting from intentional state action." (*Id.* at p. 205 [37 L.Ed.2d at pp. 561-562].) As potentially probative of an intentional segregative action on the part of school boards, the court referred to "policies and practices with respect to schoolsite location, school size, school renovations and additions, student-attendance zones, student assignment and transfer options, mobile classroom units, transportation of students, assignment of faculty and staff etc." (*Id.* at pp. 213-214 [37 L.Ed.2d at p. 566].)

The high court further emphasized that segregatory intent on the part of the school board is not limited to actions in the immediate present. "We reject any suggestion that remoteness in time has any relevance to the issue of intent. If the actions of school authorities were to any degree motivated by segregative intent and the segregation resulting from those actions continues to exist, the fact of remoteness in time certainly does not make those actions any less 'intentional.'" (*Id.* at p. 210 [37 L.Ed.2d at p. 564].) We read this to mean that a school board therefore can ascertain *327 whether the segregation present in its district is de jure or de facto only by examining the full history of acts by the school authorities and determining if, at any time in that course of action, some acts were undertaken with segregatory intent. We think it is clear that no school board or lower court can ascertain with any degree of confidence whether section 1009.6 can constitutionally apply in its district and we further believe that therefore a determination by this court that section 1009.6 can apply to districts manifesting de facto segregation would involve uncertain enforcement and improperly delay elimination of de jure segregation.

The Supreme Court has continuously reiterated its com-

mitment to eliminating de jure racial segregation and its unwillingness to accept any limitation upon procedures necessary to the resolute and thorough accomplishment of that task. To allow school authorities to rest content in the assumption that the pattern of segregation in their district is de facto and therefore to claim that section 1009.6 prohibits them from eliminating that segregation by pupil assignment on the basis of race implemented through busing, would impermissibly impede the constitutionally mandated task of rooting out de jure segregation. “[I]f a state-imposed limitation on a school authority's discretion operates to inhibit or obstruct the operation of a unitary school system or impede the disestablishing of a dual school system, it must fall; state policy must give way when it operates to hinder vindication of federal constitutional guarantees.” (*Board of Education v. Swann, supra*, 402 U.S. at p. 45 [28 L.Ed.2d at p. 589].)

The high court has also recognized the discouraging fact of the “dilatatory tactics of many school authorities”; the “failure of local authorities to meet their constitutional obligations [has] aggravated the massive problem of converting from the state-enforced discrimination of racially separate school [s].” (*Swann v. Board of Education* (1971) 402 U.S. 1, 14 [28 L.Ed.2d 554, 565, 91 S.Ct. 1267].) In view of this history, it is all too clear to us that the elimination of de jure segregation would be seriously impeded if school authorities could claim a legal disability to assign or bus pupils merely by asserting that the segregation in their district was de facto in origin.

Consistently with our earlier holding in *Johnson* and indeed under the compulsion of the decisions of the United States Supreme Court in *Swann* and *Keyes* which confirm our views in *Johnson*, we hold, as *328 indeed we must, that section 1009.6 as applied to school districts manifesting either de jure or de facto segregation is unconstitutional.

We proceed to consider a related issue. It will be recalled that Proposition 21 not only added section 1009.6 but also repealed sections 5002 and 5003 as well as certain administrative guidelines. (See fn. 3, *ante*.) Various amici curiae urge that the repealing provisions of Proposition 21 (i.e., §§ 2, 3 and 4) are also unconstitutional, on two grounds: (1) the repeal of these sections significantly encourages and involves the state in racial discrimination and (2) even if constitutional in themselves, the repealing provisions are tainted by the unconstitutional portion of

Proposition 21 and cannot be severed from it.

On the first point amici argue that our holding in *Mulkey v. Reitman* (1966) 64 Cal.2d 529 [50 Cal.Rptr. 881, 413 P.2d 825] compels the conclusion that the repealing provisions are themselves unconstitutional. In *Mulkey* we held unconstitutional as violative of the equal protection clause of the Fourteenth Amendment of the United States Constitution, article I, section 26 of the California Constitution, an initiative measure appearing as Proposition 14 on the statewide ballot in the general election of 1964 and adopted by the electorate. That proposition nullified state statutes aimed at eliminating racial discrimination in housing and barred the state from legislating in the future so as to limit the right of private discrimination in the sale or leasing of property. We there focused on the distinction between racial discrimination resulting from state action and that resulting from the private acts of individuals, framing the issue before us thusly: “The only real question ... is whether the discrimination results solely from the claimed private action or instead results at least in part from state action which is sufficiently involved to bring the matter within the proscription of the Fourteenth Amendment.” (*Mulkey v. Reitman, supra*, 64 Cal.2d at p. 536.) Finding the requisite state action, we concluded: “Here the state has affirmatively acted to change its existing laws from a situation wherein the discrimination practiced was legally restricted to one wherein it is encouraged Certainly the act of which complaint is made is as much, if not more, the legislative action which authorized private discrimination as it is the final, private act of discrimination itself. ... When the electorate assumes to exercise the lawmaking function, then the electorate is as much a state agency as any of its elected officials.” (*Id.* at p. 542.) Amici contend that the repealing portions of Proposition 21 (i.e., §§ 2, 3 and 4) similarly were intended to, and will result in, preserving racial discrimination and *329 segregation, in this instance in the school systems, and thus that the very passage of Proposition 21 involves the state in racial discrimination.

However, *Mulkey* is actually of no assistance to the amici's argument. The mere fact that the initiative measures in both instances - Proposition 14 in *Mulkey* and Proposition 21 in the case at bench - represent state action proves nothing, since in the instant case, the state, *independent of the passage of Proposition 21*, is involved in education. Indeed in *Mulkey* we noted this critical difference: “[I]n *Jackson v. Pasadena City School Dist.*, ... the state, be-

cause it had undertaken through school districts to provide educational facilities to the youth of the state, was required to do so in a manner which avoided segregation and unreasonable racial imbalance in its schools." (*Mulkey v. Reitman, supra*, 64 Cal.2d at p. 537.) Proposition 21 by repealing the involvement of the state government in discharging the state's duty not to segregate, neither abrogated the school district's constitutional duty not to segregate nor removed the state from involvement through local school districts in the field of education. There is no problem of state involvement under the Fourteenth Amendment - it is simply a question whether the state involvement shall be solely by the local school districts or shall include involvement by the state government as well.

Amici curiae assert that, prior to the adoption of sections 14020 and 14021 of title 5 of the California Administrative Code and the passage of sections 5002 and 5003, local school districts had been very slow in seeking and achieving racial balance in the school system. As a result of the adoption of these sections and their enforcement in the courts, there was a significantly increased activity directed toward preventing, reducing and eliminating racial imbalance in the schools. It appears clear, amici argue, that the repeal pursuant to Proposition 21 (see fn. 3, *ante*, and accompanying text) of sections 5002 and 5003 will have the effect of retarding, if not reversing, this process of establishing racial balance in the schools of California. Finally, it is urged, the avowed purpose of Proposition 21 was opposition to these sections as a "forced integration measure ... which could only be accomplished through forced busing ... without regard to neighborhood schools or parental consent." (Ballot Pamphlet, argument in favor of Proposition 21, as presented to the voters of the State of California, General Election (Nov. 7, 1972).)

In one respect the gist of amici's argument is to ask this court to take judicial notice that local school districts fail to fulfill their constitutional obligation to desegregate, and thus to conclude that the passage of *330 Proposition 21 constituted state involvement in racial discrimination. Even if it were within our province to take such judicial notice, no facts have been presented to us supportive of amici's contention.

In another respect, the essence of the argument is to assert that the policy of the Legislature declared in sections 5002 and 5003 is inherently invulnerable to change through an initiative measure. On the contrary, since racial balance

determined according to a precise statutory formula is not a constitutional prerequisite but a matter of state policy, the people of California through the initiative process, have the power to declare state policy. The repealing provisions of Proposition 21 can conceivably be interpreted as an expression by the people of this state of their preference for a "neighborhood school policy." (See *Keyes v. School Dist. No. 1, Denver, Colo., supra*, 413 U.S. at p. 206 [37 L.Ed.2d at p. 562].) We deem it unnecessary to the resolution of the issues now before us to determine precisely what was the intention of the electorate in this respect and accordingly intimate no views on the subject. (2) We merely conclude that since a policy in favor of neighborhood schools is a reasonably conceivable one and since such an expression of policy can in no way limit or affect the constitutional obligations of school districts, the repealing provisions found in sections 2, 3 and 4 cannot be struck down as constitutionally impermissible. It may be that our assessment of the people's desires in this respect is erroneous; if so, constitutional processes are available to the people to reinstate what has been repealed.

We turn now to the second point of the argument, namely that the repealing sections of Proposition 21 (i.e., §§ 2, 3 and 4) cannot be severed from the unconstitutional portion thereof (i.e., § 1 adding § 1009.6 to the Ed. Code) and therefore the proposition in its entirety must fall as unconstitutional.

The rule on severability is set forth in *In re Blaney* (1947) 30 Cal.2d 643, 655 [184 P.2d 892]: "But if the statute is not severable, then the void part taints the remainder and the whole becomes a nullity. It is also true that in considering the issue of severability, it must be recognized that the general presumption of constitutionality, fortified by the express statement of a severability clause, normally calls for sustaining any valid portion of a statute unconstitutional in part. *This is possible and proper where the language of the statute is mechanically severable*, that is, where the valid and invalid parts can be separated by paragraph, sentence, clause, phrase, or even single words. [Citations.] On the other hand, where there is no possibility of mechanical severance, as where the *331 language is so broad as to cover subjects within and without the legislative power, and the defect cannot be cured by excising any word or group of words, the problem is quite different and more difficult of solution." (Italics added.) (In accord: *Villa v. Hall* (1971) 6 Cal.3d 227, 236 [98 Cal.Rptr. 460, 490 P.2d 1148]; *Mulkey v. Reitman, supra*, 64 Cal.2d 529,

543-544; In re Portnoy (1942) 21 Cal.2d 237, 242 [131 P.2d 1]; In re Bell (1942) 19 Cal.2d 488, 498 [122 P.2d 22]; Bacon Service Corporation v. Huss (1926) 199 Cal. 21, 32-33 [248 P. 235]; McCafferty v. Board of Supervisors (1969) 3 Cal.App.3d 190, 193 [83 Cal.Rptr. 229].

Proposition 21 contained a severability clause.^{FN6} The valid repealing portions can easily and accurately be mechanically severed from the invalid portion enacting section 1009.6. "Although not conclusive, a severability clause normally calls for sustaining the valid part of the enactment, especially when the invalid part is mechanically severable. [Citation.]" (*McCafferty v. Board of Supervisors, supra*, 3 Cal.App.3d at p. 193.) Such a clause plus the ability to mechanically sever the invalid part while normally allowing severability, does not conclusively dictate it. The final determination depends on whether "the remainder ... is complete in itself and would have been adopted by the legislative body had the latter foreseen the partial invalidation of the statute" (*In re Bell, supra*, 19 Cal.2d 488, 498) or "constitutes a completely operative expression of the legislative intent ... [and] are [not] so connected with the rest of the statute as to be inseparable." (*In re Portnoy, supra*, 21 Cal.2d at p. 242.)

FN6 "If any provision of this act or the application thereof to any person or circumstances is held invalid, such invalidity shall not affect other provisions or applications of the act which can be given effect without the invalid provision or application, and to this end the provisions of this act are severable."

Amici curiae merely assert that the various portions of the proposition are clearly inseparable. However, it seems that the valid and invalid portions of the proposition, while subsumed within an overall purpose to eliminate forced integration by busing without regard to the desirability of maintaining neighborhood schools, reflect separable methods of achieving this purpose. The repealing provisions (the valid part) would eliminate a commitment to achieving racial balance in the schools, leaving local school districts with sole responsibility and without direction other than constitutional mandate; the enactment of section 1009.6 (the invalid part) went further and forced upon the local school districts the neighborhood school concept without forced busing as the only acceptable policy. Even though this restriction of local school *332 district discretion is unconstitutional and therefore the full purpose of

Proposition 21 cannot be realized, it seems eminently reasonable to suppose that those who favor the proposition would be happy to achieve at least some substantial portion of their purpose, namely to eliminate a state commitment to racial balance in the schools regardless of other considerations, and thereby to allow local control subject only to constitutional restriction. (3) Thus, the repealing provisions are not only mechanically severable in that they are physically separate sections of the proposition, but they are also severable as to purpose and method, of independent validity and not inconsistent with the elimination of the invalid part. We hold the repealing portions of Proposition 21 to be severable. We cannot say that these portions must necessarily fall, because we hold section 1009.6 unconstitutional.^{FN7}

FN7 Amici curiae also urge that a different test should be applied to the severability of portions of an initiative measure than the above described test applied to statutes passed by the Legislature. However, in applying settled rules of severability, we can discern no meaningful distinctions between statutes "enacted" by the people and statutes enacted by the Legislature. The cases cited by amici curiae (e.g., *Bennett v. Drullard* (1915) 27 Cal.App. 180 [149 P. 368]; *Alexander v. Mitchell* (1953) 119 Cal.App.2d 816 [260 P.2d 261]) involved the question of severability prior to submission to a vote and also tested severability by the degree of integration between the valid and invalid parts. However, integration is determined by the test set forth by us *supra*.

We therefore conclude that Proposition 21 does not provide an independent basis for sustaining the trial court's intended injunction of the implementation of the Administration Plan since section 1009.6 added to the Education Code by the proposition bars assignment of public school students by race and is therefore unconstitutional and void under the decisional law of the United States Supreme Court and of this court, regardless of the proposition's effective repeal of other sections of the code.

We accordingly proceed to address ourselves to the question whether entry of judgment by the trial court on the third count in accord with its memorandum of intended decision would be an act in excess of its jurisdiction. As we have already stated, the court intended to enjoin implementation of the Administration Plan on two grounds: (1)

that the Board had no jurisdiction to close the Garfield and Jefferson Schools because it had failed to include notice of the proposed closure of these schools in its published agenda as required by section 966; (2) that the Board abused its discretion in adopting the Administration Plan which required the closure of the above two schools, when in fact their closure was not reasonably necessary to effective desegregation. *333

Section 966 requires a school board to act at meetings open to the public, with certain exceptions relating to personnel and pupil discipline matters, and to post an agenda 48 hours prior to the meeting containing "[a] list of items that will constitute the agenda for all regular meetings." ^{FN8} In *Carlson v. Paradise Unified Sch. Dist.* (1971) 18 Cal.App.3d 196 [95 Cal.Rptr. 650], the court held the provisions of section 966 are mandatory, so that noncompliance therewith by failing to list an item of business on the agenda invalidates the board's action in respect thereto. In *Carlson* the school board's agenda listed as one item "Continuation school site change." The action in fact taken was to move the "continuation school" to the Canyon View school building, to discontinue elementary education at that school, and to transfer the Canyon View elementary pupils to Ponderosa School. The court held that the agenda listing "was entirely inadequate notice to a citizenry which may have been concerned over a school closure ... was entirely misleading and inadequate to show the whole scope of the board's intended plans." (*Carlson v. Paradise Unified Sch. Dist.*, *supra*, 18 Cal.App.3d at p. 200.)

"Thursday, May 4, 1972
"Thursday, May 18, 1972
"September 1972

"It is expected that the Board will take action at the meeting."

The trial court in its memorandum of intended decision concluded: "There was no possible way [the Administration Plan was not written and was not on file] that the public could discern from the posted agenda that the Board was about to consider the closure of two elementary schools, namely, Jefferson and Garfield, as indispensable ingredients of *334 any desegregation plan. ... Any possible reference to such matters in a published newspaper article would in no event suffice to cure the deficiency. ...

FN8 Section 966 provides in pertinent part: "Except as provided in Section 54957 of the Government Code or in Section 967, all meetings of the governing board of any school district shall be open to the public, and all actions ... shall be taken at such meetings and *shall* be subject to the following requirements: ... (b) A list of items that will constitute the agenda for all regular meetings *shall* be posted at a place where parents and teachers may view the same at least 48 hours prior to the time of said regular meeting" (Italics added.)

In the case at bench, the posted agenda of the meeting of May 18, 1972, contained under the heading "Desegregation/Integration Plans" Item No. 3a which read as set forth in the margin. ^{FN9} At the meeting, the Board adopted the Administration Plan, which among other things, closed the Jefferson School and discontinued elementary school education at the Garfield School.

FN9 Item 3a headed "Desegregation/Integration Plans" read as follows:

"On February 3, 1972 the Board of Education set the following timetable in regard to a Desegregation/Integration Plan for the Elementary District:

- Presentation of plans to the Board
- Adoption of a plan by the Board
- Implementation of plan as fully as possible

The Board did not comply with the provisions of section 966. It therefore lacked jurisdiction to adopt the Administration Plan The closure of the Jefferson and Garfield elementary schools is essential to this plan, and invalidates the same."

The Board contends that by listing adoption of a desegregation/integration plan, the posted agenda gave full and adequate notice of a wide range of possible Board actions including possible closure of schools. It is common knowledge that a desegregation/integration plan by its very nature involves a complete reworking of the school system and is likely to involve substantial changes in school at-

tendance patterns, including pupil assignment away from neighborhood schools and busing. Thus, the agenda item gave fair warning to parents of students at any of the elementary schools that the adoption of a plan might result in their children's not attending their neighborhood school, that is Jefferson, Garfield or any other elementary school, as the case might be. The fact that their children might end up attending a different school due to closure of their current school rather than to pupil assignment or school pairing is of little moment. The critical point is that parents were on notice that the Board at its meeting on May 18, 1972, might act in such a way that their children would no longer be able to attend Jefferson or Garfield schools.

This case is therefore clearly distinguishable from *Carlson*. There the item "continuation school site change" would have in no way notified parents of children attending Canyon View Elementary School that their children would be affected by such action and certainly would not have warned them that the school might be closed. It gave fair notice to parents of continuation school students as to impending changes and to people generally concerned about financial expenditures and priorities. However, the item in no way warned Canyon View Elementary School parents that their interests might be vitally affected.

In the case at bench, by contrast, the item concerning the adoption of a "Desegregation/Integration Plan," in our view gives clear notice to parents of students attending Jefferson, Garfield or any other elementary school that their interests might be vitally affected. We do not believe that the agenda item must specify the particular means by which the students involved would be sent to different schools, as for example by pupil assignment, busing, pairing of schools or closure of schools. It *335 seems to us that all such actions are fairly contained within the comprehensive language of the notice.

Indeed, if the agenda had simply indicated the adoption of a "Desegregation/Integration Plan for the Elementary District," we would entertain no doubt that it would have given adequate notice. However, item 3a on the agenda referred to the sequence of procedures adopted by the Board for formation of an integration plan throughout the year - "Thursday, May 4, 1972 - Presentation of plans to the Board. Thursday, May 18, 1972 - Adoption of a plan by the Board." (See fn. 9, *ante*.) Concerned parents and citizens could reasonably infer from this notice that no new plans were to be presented on May 18 but rather that the

Board would adopt one of the plans presented on May 4. If they had no objection to any of these plans, they might reasonably assume there was no need for them to attend the May 18 meeting.

However, the Administration Plan, which had *not* been presented at the May 4 meeting, differed radically from all the previous plans in many respects, most notably in providing for the closure of the Jefferson and Garfield schools. Parents of Jefferson and Garfield elementary school students had no notice that a plan involving closure of those two schools would be considered on May 18. Consequently we think that the notice by referring to the May 4 presentation of plans was misleading, by indicating that only those plans presented on May 4 would be considered for adoption on May 18. This is substantially confirmed by the very elaborate procedures adopted by the Board and participated in by the community in order to prepare and screen plans for presentation to the Board on May 4.

(4a) Section 966 specifies 48 hours' notice with respect to regular meetings. It is a fair construction of the section that a board cannot change its posted agenda within the 48-hour period next immediately preceding a regular meeting; in other words, if a board wishes to change substantially its agenda within that period, it must postpone a meeting at least 48 hours. Since the Administration Plan had not been presented at the May 4 meeting and since it differed substantially from all the other plans, the Board's decision to consider and act upon it represented a substantial deviation from the posted agenda and therefore required an amendment to the agenda and a postponement of the meeting for such a period of time as to provide no less than 48 hours' notice.

It is true that the Board could have adopted a plan involving the *336 closure of schools, if it had posted an agenda merely giving general notice of intention to adopt a desegregation/integration plan. However, once the Board posted notice that it would adopt one of the plans theretofore presented at the May 4 meeting, it thereby limited its power to consider any other substantially different plan since otherwise the posted agenda would be fatally misleading. It then became necessary for the Board to amend the posted agenda and reschedule the meeting so as to afford notice for the period of time specified by the statute.

The Board contends that the misleading effect of the notice was cured by newspaper publicity indicating that a new

plan was to be presented at the meeting of May 18. Two newspaper articles appeared explaining some of the details of the new plan. Only one of the two articles was released 48 hours or more before the meeting. (5) Moreover, newspaper publicity cannot replace the proper posting of an agenda. Section 966 requires notice by means of an agenda posted at a specified place. The newspaper article had no official status, its contents had not been checked or authorized by the Board, and there was no guaranty that it would have been read by all persons entitled to notice. On the other hand, under the statute all persons were presumed to know when and where the agenda of a meeting was to be posted and were entitled to rely on the contents of such statutory notice without being required to scour all newspapers and other publications for possible changes.

(4b) Accordingly we conclude that the trial court properly determined, albeit for the wrong reason, that the Board had no jurisdiction to consider or approve the Administration Plan due to its noncompliance with section 966. The trial court would therefore not act in excess of its jurisdiction in enjoining the implementation of the Administration Plan, unless and until the plan was adopted by the Board at a meeting preceded by the posting of an accurate and complete agenda as required by section 966.

The trial court, however, went further in its memorandum of intended decision and purported to permanently enjoin implementation of the Administration Plan on the ground that its adoption was an abuse of discretion by the Board since the closure of the two schools was not reasonably necessary to accomplish desegregation.^{FN10} (6) The major premise in the trial court's reasoning - that in desegregating a school *337 system, a school board is limited in the exercise of its powers to those acts reasonably necessary to effectuating desegregation - is utterly without support. The trial court concedes, as indeed it must, that the Board has power to close schools and convert them to other uses. It is, of course true that the Board is not free to exercise this power arbitrarily, but must act reasonably and in accordance with established procedure. "[A] court may not substitute its judgment for that of the administrative board [citation] and if reasonable minds may disagree as to the wisdom of the board's action, its determination must be upheld." (*Manjares v. Newton* (1966) 64 Cal.2d 365, 371 [49 Cal.Rptr. 805, 411 P.2d 901].) We have not found, nor have we been referred to, any authority supportive of the proposition that once a school board undertakes a desegregation/integration plan, its otherwise independent

power to close schools becomes limited to closing only those schools which must reasonably be closed in order to accomplish desegregation. Acceptance of such a proposition would blind school boards to the full realities of the world about them, as for example, by directing in effect that they are powerless to close unsafe schools because desegregation might be effectuated without such closure.

FN10 Plaintiffs also contend that the Board abused its discretion in adopting the Administration Plan because the plan does not meet the requirements of section 5003. Since we have held the repeal of this section valid, this argument must fail.

Indeed the case at bench presents exactly this situation. On August 12, 1971, the Board received a report that the Jefferson school was structurally unsafe within the requirements of section 15503.^{FN11} The report recommended that a structural engineer be retained to determine whether the school should be repaired or abandoned, since if it cannot be repaired, it must be abandoned pursuant to section 15516.^{FN12} On May 15, 1972, three days before the final meeting of the Board, the superintendent received a report concerning the rehabilitation or replacement costs of the Jefferson school. The report found that it would cost \$621,800 to make the existing structure safe and \$655,000 to build an entirely new building. Accordingly, in fashioning the Administration Plan, the superintendent made provision therein for closing the Jefferson school. The Board would certainly be properly exercising its discretion in a reasonable manner were it to approve abandoning this building in view *338 of the extreme cost. The determination of the questions whether a new school was needed to replace this structure or whether existing facilities could handle the Jefferson school students due to an expected drop in elementary enrollment, was properly within the Board's discretion. We do not think that the Board in exercising this discretion was perforce limited to determining the reasonable necessity of replacing the building and thus automatically precluded from determining the necessity of assigning students in order to achieve desegregation.

FN11 Section 15503, added in 1959 as part of the Field Act, requires all school buildings, not constructed pursuant to the Field Act, to be examined by January 1, 1970, in order to determine whether the building is safe for school use according to the standards set forth in the Field Act (§ 15451 et

seq.). If a school building is found to be unsafe, the governing board of that school district must prepare an estimate of the cost necessary to make the building safe.

FN12 Section 15516 provides: "No school building examined and found to be unsafe for school use pursuant to Section 15503 and not repaired or reconstructed in accordance with the provisions of this article shall be used as a school building for elementary and secondary school or community college purposes after June 30, 1975."

In 1969 the Board adopted a master plan to guide the development of the school district. Item 6 of that plan provided: "As soon as funds become available in the Elementary District to provide housing at expanded schools elsewhere, that Garfield School be closed and converted to a Special Education Center to provide for certain parts ... of the Special Education program." The superintendent incorporated this provision into his Administration Plan. Absent proof that there were no school facilities to absorb these students or no need for a special education center, ^{FN13} the Board, in the reasonable exercise of its discretion, could lawfully take this action. The mere fact that this action was part of a desegregation plan did not automatically strip the Board of its otherwise subsisting authority to act in this area, so that the establishment of an education center was contingent upon it being reasonably necessary to accomplish desegregation.

FN13 School boards have the authority to provide special education programs and facilities. (§§ 6500-6742, 6750-6946.)

(7) Since the trial court proposed to so limit the discretion of the Board, it would be substituting its judgment for that of the school board and therefore acting in excess of its jurisdiction. A writ of prohibition is the appropriate remedy where a threatened judgment of the trial court will be in excess of its jurisdiction. (*City & County of S.F. v. Superior Court* (1959) 53 Cal.2d 236, 243 [1 Cal.Rptr. 158, 347 P.2d 294]; 5 Witkin, Cal. Procedure (2d ed. 1971) Extraordinary Writs, §§ 36, 39, pp. 3810-3811, 3813.)

As to the instant writ proceeding (L.A. 30054) which is confined to plaintiffs' third cause of action below, we arrive at these final conclusions: (1) That section 1009.6

being unconstitutional and void does not bar the Board's Administration Plan for desegregation; (2) that the Board's power to close schools exists independently of its constitutional obligation to desegregate and is not contingent upon such closure being *339 reasonably necessary to effectuate desegregation; (3) that the posted agenda was defective insofar as it related to the closure of the two elementary schools because of the Board's failure to comply with section 966 and that, since said proposed action for closure was an inseparable part of the Administration Plan, the adoption of the plan as a whole was invalid because of such noncompliance; and (4) that in respect to the third count the trial court will not act in excess of its jurisdiction by enjoining the implementation of the Administration Plan upon the basis heretofore set forth by us, namely, for the failure of the Board to comply with section 966 but that in all other respects the intended action of the trial court as set forth in its memorandum of intended decision is in excess of the court's jurisdiction. Nothing herein, of course, shall prevent, or be deemed to prevent, the Board from adopting the Administration Plan at a new meeting held upon proper notice and in compliance with all other legal requirements.

It follows that in L. A. 30054, petitioners (defendants below) are not entitled to a peremptory writ of prohibition restraining respondent court from enjoining the implementation of the Administration Plan for failure of the Board to comply with section 966 but are entitled to such writ restraining the court's intended action in all other respects. (See *Brown v. Superior Court* (1949) 34 Cal.2d 559, 566 [212 P.2d 878]; see 5 Witkin, Cal. Procedure (2d ed. 1971) p. 3933.) The writ shall issue accordingly.

II

We now turn our attention to the appeal before us. (See fn. 2, *ante*.) This is from a judgment entered on the first two causes of action which were not stayed by our alternative writ of prohibition. The central issue here confronting us is whether the Board may lawfully be the common governing Board of both the Santa Barbara (elementary) School District and the Santa Barbara High School District despite the fact that such districts are not coterminous.

We deem it necessary to set forth the facts in some detail. The original Santa Barbara School District, which was organized sometime in the 1870's, comprised all the public schools within the city limits and conducted classes from

kindergarten through high school, under the leadership of the school trustees. The initial charter for the City of Santa Barbara, adopted February 20, 1899, created a school department, consisting of all the public schools in the school district, governed by a *340 five-man board of education. The charter specified the duties and powers of the board of education in great detail and provided that the board succeeded to all the property and rights of the former school trustees.

In 1902 this single geographical school district was divided functionally into two separate districts: the elementary school district (known as the Santa Barbara School District) and the high school district (known as the Santa Barbara High School District), comprising both junior and senior high schools. The two districts were coterminous; their boundaries were the city limits. The single board of education remained responsible for the governing of all the public schools in the school districts, since the charter was not amended following this functional division into two school districts. Upon the adoption of new charters in 1918 and again in 1927, former provisions dealing with the board of education were revised and simplified by replacing the detailed enumeration of the board's duties and powers with an incorporation of provisions set forth in the general laws of the state. Despite these revisions, nevertheless, the new charters retained a *single* board of education invested with control over all schools in that city.^{FN14}

FN14 Section 83 of the Charter of the City of Santa Barbara adopted in 1927 provided: "The Board of Education shall consist of five members. ..."

Section 84 provided: "The Board of Education shall have the entire control and management of the public schools in the city of Santa Barbara in accordance with the constitution and general laws of the state and said board is hereby vested with all the powers and charged with all the duties of such control and management."

Sections 55 and 56 of the charter adopted in 1918 contained virtually identical provisions.

Indeed the 1927 charter specified a single board of education even though the two school districts were no longer coterminous themselves or with the city. From 1902 to 1930 while the elementary school districts remained vir-

tually constant in size, incorporating only minor portions of adjacent unincorporated territory, the high school district annexed large portions of adjacent territory and far outstripped the elementary school district in size. By 1930 the pattern of annexations was complete. The high school district was comprised of the original high school district (i.e., coterminous with the city limits and the elementary school district) plus the geographical area of four additional elementary school districts, Montecito Union School District, Cold Springs School District, Hope School District and Goleta Union School District. These four elementary school districts were annexed solely for the purpose of becoming part of the Santa Barbara High School District. They continued to function as *341 wholly independent elementary school districts governed by their own elementary school board.

Despite these changes in the composition and size of the elementary and high school districts no change was made in the charter. That instrument continued to direct, as it did upon its adoption in 1927 that there be a single board of education having the entire control and management of all the public schools. In 1939, section 83 of the charter (see fn. 14, *ante*) was amended to provide that the members of the board should serve staggered six-year terms.

No further changes were made in the charter provisions concerning the board of education until a new charter was adopted in 1967. The new charter retained the provision for a single elective board of education, directed that its adoption should not affect boundaries of existing school districts and generally provided that all other requirements should be "as now or hereafter prescribed by the Education Code."^{FN15} Despite the changes in language the new charter provisions continued essentially the same educational scheme. The changes appear to correspond with those introduced into the Education Code in 1963, since section 900 of the charter tracks the language of section 1223 of the code.^{FN16} Thus, in short the charter directs that there shall be an elective board of education and leaves other requirements to those found in the code.

FN15 Article IX of the charter headed, Board of Education, provides: "Section 900. State Law Governs. The manner in which, the times at which, and the terms for which the members of the Board of Education shall be elected or appointed, their qualifications, compensation and removal and the number which shall constitute

such board shall be as now or hereafter prescribed by the Education Code of the State of California.

“Section 901. Effect of Charter on District. The adoption of this Charter shall not have the effect of creating any new school district nor shall the adoption of this Charter have any effect upon the existence or boundaries of any present school district within the City or of which the City comprises a part.”

FN16 Section 1223 of the Education Code provides: “Except as provided in Section 1222, whenever the charter of any city fails to provide for the manner in which, the times at which, or the terms for which the members of the city board of education shall be elected or appointed, for their qualifications, removal, or for the number which shall constitute such board, the provisions of this division shall apply to the matter not provided for.”

Section 1224 provides that the members of the board of education shall be elected at large from the territory within the boundaries of the school district or districts under the jurisdiction of the board of education, that for election purposes such territory shall include outside territory annexed to the city for school purposes, and that all qualified electors residing within the full territory shall be eligible to vote for, and *342 to be a member of, the board of education. FN17 Therefore all qualified electors residing within the high school district, which is geographically coterminous with the five elementary school districts - the Santa Barbara elementary school district plus the four annexed districts (Montecito, Cold Springs, Hope and Goleta) - are entitled to vote for the city board of education. At the time of trial, there were 80,203 registered voters residing within the high school district, of whom 38,174 or 47.6 percent resided within the Santa Barbara elementary school district and 42,029 or 52.4 percent resided within the four annexed elementary school districts.

FN17 Section 1224 provides: “The members of any elective city board of education shall be elected at large from the territory within the boundaries of the school district or districts which are under the jurisdiction of the city board of education, whether sitting as a board of education, high school board, or community college board,

and any qualified elector of the territory shall be eligible to be a member of such city board of education.

“When outside territory has been annexed to a city for school purposes it shall be deemed a part of the city for the purpose of holding the general municipal election, and shall form one or more election precincts, as may be determined by the legislative authority of the city. The qualified electors of the annexed territory shall vote only for the board of education or the board of school trustees.”

The four annexed elementary school districts continued to be governed by four separate elementary school boards elected separately by qualified electors residing within each elementary school district. The Santa Barbara elementary school district, however, did not have its own separate elementary school board. Instead, by virtue of the charter provisions and section 1222 of the Education Code incorporated in the charter (see fn. 15, *ante*), the Santa Barbara elementary school district was governed by the city board of education. FN18 Thus, an elector residing within one of the four annexed districts, for example Montecito, would be entitled to cast two votes - one to elect members to the Montecito Elementary School Board from the residents within that district and one to elect members to the city board of education. An elector residing within the Santa Barbara elementary school district would be entitled to cast only one vote - that one being to elect the city board of education.

FN18 Section 1222 provides: “Whenever the charter of a city comprising in whole or in part an elementary school district, fails to provide for the manner in which, the times at which, and the terms for which the members of the board of education of such city are appointed, and for the number which shall constitute such board, *the governing board of the elementary school district within which the city is located or with which the city is coterminous is the board of education of the city.*” (Italics added.)

As mentioned earlier, plaintiffs in their first two causes of action challenge the validity of the law permitting the city board of education to govern both the high school and the elementary school districts, despite the fact that the two

districts are not coterminous. The first cause of *343 action alleged that this system unconstitutionally diluted the vote of each registered voter and taxpayer within the elementary school district by over 100 percent by virtue of the votes cast by that portion of the electorate who live outside the Santa Barbara elementary school district. The second cause of action alleged that this system violated the requirements of section 924 that the governing board of an elementary school district shall consist of members elected at large from the territory comprising the elementary school district.

Following trial by the court on these two causes of action, the court made findings of fact, substantially as recited above and concluded in essence that the above voting scheme was unconstitutional as being violative of the equal protection clause of the Fourteenth Amendment to the United States Constitution. We set forth in pertinent part in the margin the court's detailed conclusions.^{FN19} *344

FN19 "4. Insofar as the Board governs the affairs of the Elementary School District the scheme which permits the votes of 38,174 resident electors to be counted equally with the votes of the 42,029 non-resident electors, who are in no way concerned with the government of the Elementary District, constitutes a clear denial, dilution and debasement of the vote of the resident electors of the Elementary District and a deprivation of their constitutional right to the equal protection of the law.

"

.....

"7. The present dual function of the School Board governing a large high school district and much smaller elementary school district does not serve any governmental purpose, but is rather the result of unplanned, irregular annexations to the High School District.

"

.....

"9. The fact in this case that voters who reside

outside the boundaries of the Elementary School District, who exceed in number those who reside within the district, are given the right to vote for the School Board which formulates policy for the district, even though they are in no way subject to such policy and do not contribute any tax support thereto, is contrary to the principle that the government is to be chosen by the governed.

"10. The equal voting strength principle, which underlies the 'one person, one vote' doctrine, applies in this case to the electoral scheme currently employed in the election of members to the governing board of the Santa Barbara Elementary School District. That principle is violated because the votes of qualified resident electors in the plaintiffs' class are being wrongfully denied, debased and diluted by the votes of non-qualified, non-resident electors in the Elementary District election.

"11. There is no State interest sufficiently compelling to justify the voting scheme described herein. That scheme is unconstitutional. It violates the Equal Protection Clause of the Fourteenth Amendment to the Constitution of the United States.

"

.....

"14. To interpret Section 1224 of the Education Code to sanction the election of a common governing board for two districts whose boundaries are not coterminous, by electing the members of such board at large from the territory of the larger district, which encompasses all of the area of the smaller district plus added territory of the larger district, is to unconstitutionally apply the statute.

"15. Section 1224 of the Education Code must be interpreted to grant common governing powers to an elective city board of education over two or more districts under its jurisdiction only in cases where the boundaries of the governed districts are coterminous. In a case such as here presented, where the boundaries of the districts are not co-

terminous, Section 1224 may not be so interpreted to grant multiple jurisdiction to such a single elective board.”

By way of remedy the court concluded that the Santa Barbara elementary school district must be governed by an independent board of resident electors of the Santa Barbara elementary school district elected at large from the territory within the elementary school district; that the present city board of education should be allowed to continue as the governing board of the high school district; that a new board consisting of five members and governing only the elementary school district should be elected on April 17, 1973, by resident electors within the Santa Barbara elementary school district and take office on July 1, 1973; that the three members with the highest vote should serve until June 30, 1977, and the remaining two members should serve until June 30, 1975, each member of the board thereafter serving a four-year term. Judgment granting a peremptory writ of mandate was entered accordingly. This appeal by defendants followed.^{FN20}

FN20 See footnote 2, *ante*, where the procedural history of this appeal as related to the disposition of the third cause of action is explained.

We begin by epitomizing the respective positions of the parties on the appeal. Plaintiffs contend that the method of electing members of the Santa Barbara Board of Education is invalid under the state and federal Constitutions as violative of the “one man, one vote” principle because the votes of *qualified, resident* electors in the elementary school district are debased and diluted by the votes of *nonqualified, nonresident* electors in the elementary district election. Plaintiffs argue that there should be, and the trial court properly ordered, a separate board of education to govern the elementary school district. Defendants, on the other hand, contend that the present method of electing members of the Board complies with applicable state law, that it does not violate the “one man, one vote” rule, and that the trial court’s ruling on this issue is in error. (8) As we explain, *infra*, we conclude that there is no constitutional right to a separate, elected elementary board of education, that there is no constitutional infirmity in designating the city board of education, elected from the full territory within its jurisdiction, to govern the lesser, wholly included elementary school district and that the “one man, one vote” principle has no relevancy to this case.

The city board of education is elected. Each qualified elector residing within the high school district, the largest geographical area within the *345 jurisdiction of the board of education, is eligible to become a member of the board and is entitled to vote in the election. The members are elected at large. Each vote counts equally and is weighted equally. Each qualified elector is governed by the board, subject to the policy adopted by the board, and liable for tax to support the board. It is clear and undeniable that the city board of education is elected in full compliance with the “one man, one vote” principle.

Indeed, as they must, plaintiffs concede the election of the city board of education is valid. However, plaintiffs claim that the election of the city board of education is also an election of the governing board of the Santa Barbara elementary school district and that the *latter* election violates the “one man, one vote” principle because the votes of nonresident electors dilute the votes of the electors residing in the Santa Barbara elementary school district. There is no basis in law or fact to support this claim. There is a single city board of education which is elected in a single election by qualified resident electors. This single city board of education, by virtue of section 1222, (see fn. 18, *ante*) is the governing board of the Santa Barbara elementary school district.^{FN21} The city board of education, which is elected in accordance with section 1224 (see fn. 17 *ante*) is designated by the Legislature in section 1222 to govern the Santa Barbara elementary school district.

FN21 See text accompanying footnotes 15 and 16, *ante*.

Thus, it is abundantly clear that the election of the city board of education is a single election of a single board. The real claim advanced by plaintiffs is that they, the resident voters, taxpayers and parents within the Santa Barbara elementary school district are entitled to be governed by an independent school board, comprised of members who reside within the district and elected solely by voters who reside in the district. The United States Supreme Court has held to the contrary. In *Sailors v. Board of Education* (1966) 387 U.S. 105, 108, 110-111 [18 L.Ed.2d 650, 653, 655, 87 S.Ct. 1549], the high court held that there is no constitutional right to elect members of boards of education: “We find no constitutional reason why state or local officers of the nonlegislative character involved here may not be chosen by the governor, by the legislature, or by some other appointive means rather than by an election.

... [¶] Viable local governments may need many innovations, numerous combinations of old and new devices, great flexibility in municipal arrangements to meet changing urban conditions. We see nothing in the Constitution to prevent experimentation. At least as respects nonlegislative *346 officers, a State can appoint local officials or elect them or combine the elective and appointive system as was done here. ... For while there was an election here for the local school board, no constitutional complaint is raised respecting that election. Since the choice of members of the county school board did not involve an election and since none was required for these nonlegislative offices, the principle of 'one man, one vote' has no relevancy."

The principles announced in *Sailors* were recently applied in California in *O'Keefe v. Atascadero County Sanitation Dist.* (1971) 21 Cal.App.3d 719 [98 Cal.Rptr. 878] to a factual situation so closely analogous to the facts in this case that we regard that case as highly persuasive authority. In *O'Keefe* the residents of the Atascadero sanitation district, which was located in San Luis Obispo County, challenged the procedure by which the directors of the sanitation district were selected. The county is divided into five districts for the purpose of electing the board of supervisors. The sanitation district was located wholly within the boundaries of one of the five supervisorial districts. The population within the sanitation district was approximately 10 percent of the county population. By virtue of state law, the directors of the sanitation district were the board of supervisors. Since the residents of the sanitation district lived wholly within one supervisorial district, they were able to vote for only one director, while the other nonresident voters elected the other four directors of the sanitation district. The sanitation district residents claimed that their votes were diluted and debased by the votes of electors who resided outside the sanitation district but within the county.

The court concluded, however, that the directors of the sanitation district were not elected but designated by the Legislature and that the election of a board of supervisors was a single election of a single board. "The board of directors of a county sanitation district is not elected. Rather, the members of such board are designated in Health and Safety Code section 4730. The composition of the board is determined by the location of the district in relation to other political subdivisions within the county. ...^{FN4} [¶] Since the board of directors is not chosen by election,

the 'one man, one vote' principle is not applicable Appellant argues that the principle nevertheless is applicable under the facts alleged, *347 because the county board of supervisors is elected [fn. omitted] and the members of the board of directors of the Sanitation District are 'in effect elected once removed.' ... [¶] Under section 4730 the members of the board of directors of a sanitation district are chosen by the Legislature, a method expressly sanctioned in *Sailors*." (*O'Keefe v. Atascadero County Sanitation Dist.*, *supra*, 21 Cal.App.3d at pp. 724-726.)

FN4 "Health and Safety Code section 4730: "The governing body of a sanitation district is a board of directors of not less than three members. ... If the district includes no territory which is in cities or sanitary districts, then the county board of supervisors is the board of directors of the district."

As in *O'Keefe*, the members of the governing board of the Santa Barbara elementary school district are designated by the Legislature. The Legislature in section 1222 (see fn. 21, *ante*, and accompanying text) designates the city board of education to be the governing board of the Santa Barbara elementary school district. This is an entirely proper procedure under *Sailors*. The fact that the city board of education is elected does not somehow constitute an election "once removed" of the governing board of the Santa Barbara elementary school district just as the election of the county board of supervisors did not constitute an election "once removed" of the directors of the sanitation district in *O'Keefe*.

We discern no constitutional infirmity in a system whereby the Legislature designates an elected city board of education to govern a lesser included elementary school district. We hold therefore that the present method of electing members of the Santa Barbara Board of Education is not violative of either the United States Constitution or the California Constitution and is in all respects valid under applicable state law.^{FN22}

FN22 The second cause of action claiming that the system whereby the city board of education is designated to serve as the governing board of the Santa Barbara elementary school district violated the provisions of section 924 has apparently been abandoned, since the trial court made no mention of it and since it has not been urged on appeal. Moreover, section 1222 rather than section 924

controls where a charter city with a city board of education is involved.

In L.A. 30054 let a peremptory writ of prohibition issue in accordance with the views herein expressed.

In L.A. 30086 the judgment is reversed and the cause is remanded to the trial court with direction to enter judgment in favor of defendants on the first and second stated causes of action set forth in plaintiffs' complaint. *348

Petitioners shall recover costs in L.A. 30054 and defendants shall recover costs in L.A. 30086.

Wright, C. J., McComb, J., Tobriner, J., Mosk, J., Clark, J., and Burke, J., ^{FN*} concurred. *349

Cal.
Santa Barbara Sch. Dist. v. Superior Court
13 Cal.3d 315, 530 P.2d 605, 118 Cal.Rptr. 637

END OF DOCUMENT

▷ CANDID ENTERPRISES, INC., Plaintiff and
Respondent,
v.
GROSSMONT UNION HIGH SCHOOL DISTRICT
et al., Defendants and Appellants
L.A. No. 31877.

Supreme Court of California
Sep 26, 1985.

SUMMARY

The trial court granted a condominium developer's petition for a writ of mandate ordering a school district to refund fees for construction of additional school facilities, imposed as a condition of granting building permits, and prohibiting the district from collection of further fees. (Superior Court of San Diego County, No. 474776, Joseph A. Kilgarif, Judge.)

The Supreme Court reversed, holding that the School Facilities Act (Gov. Code, § 65970 et seq.), which encourages local school boards to identify and local governments to deal with the problem of overcrowding, and to that end permits the imposition of school-impact fees to finance certain temporary facilities, did not preempt local governments from imposing such fees to finance both temporary and permanent facilities. The court held the school-impact fees did not contradict or duplicate the provisions of the act, and that such fees have not entered an area fully occupied by state law. It further held that, because the act both permitted and recognized local measures, such as the school-impact fees, it did not have implied preemptive effect. The court further held the imposition of the fees did not violate equal protection. (Opinion by Mosk, J., expressing the unanimous view of the court.)

HEADNOTES

Classified to California Digest of Official Reports

(1) Mandamus and Prohibition § 6--Mandamus--Conditions Affecting Issuance-- Acts

and Duties Enforceable--Legislation.

The writ of mandate may be used to challenge the validity of a legislative measure.

(2a, 2b, 2c, 2d) Schools § 4--School Districts; Financing; Funds-- School-impact Fees Imposed on Developers--State Preemption.

The imposition by a local government of otherwise valid fees on real property development ("school-impact fees") to cover the cost of constructing and maintaining school facilities attributable to such development, was not preempted by the School Facilities Act (Gov. Code, § 65970 et seq.), where the school-impact fees did not contradict or duplicate the provisions of the act, and where the fees did not enter an area fully occupied by state law. The act does not even purport to deal with the construction of permanent facilities, and does not fully and completely cover the construction of temporary facilities. Moreover, the act recognizes alternative, local financing arrangements.

[See Cal.Jur.3d, Municipalities, § 200; Am.Jur.2d, Municipal Corporations, Counties, and Other Political Subdivisions, § 375.]

(3) Municipalities § 26--Powers--Police Power--Scope.

Under the police power granted by the Constitution, counties and cities have plenary authority to govern, subject only to the limitation that they exercise this power within their territorial limits and subordinate to state law. (Cal. Const., art. XI, § 7.) Apart from this limitation, the police power of a county or city is as broad as the police power exercised by the Legislature itself.

(4) Municipalities § 55--Ordinances, Bylaws and Resolutions--Validity-- Conflict With Statutes or Charter.

If otherwise valid local legislation conflicts with state law, it is preempted by such law and is void. A conflict exists if the local legislation duplicates, contradicts, or enters an area fully occupied by the general law, either expressly or by legislative implication.

(5) Municipalities § 56--Ordinances, Bylaws and Resolutions--Validity-- Conflict With Statutes or

Charter--Test for Preemption.

In determining whether the Legislature has preempted by implication to the exclusion of local regulation, courts must look to the whole purpose and scope of the legislative scheme. There are three tests: the subject matter has been so fully and completely covered by general law as to clearly indicate that it has become explicitly a matter of state concern; the subject matter has been partially covered by general law couched in such terms as to indicate clearly that a paramount state concern will not tolerate further or additional local action; or the subject matter has been partially covered by general law, and the subject is of such a nature that the adverse effect of a local ordinance on the transient citizens of the state outweighs the possible benefit to the municipality.

(6) Municipalities § 55--Ordinances, Bylaws and Resolutions--Validity-- Conflict With Statutes or Charter--Preemption by Implication.

Preemption of local laws by implication of legislative intent may not be found when the Legislature has expressed its intent to permit local regulations. Similarly, it should not be found when the statutory scheme recognizes local regulations.

(7) Schools § 4--School Districts; Financing; Funds--Fees Imposed on Developers--Validity.

The imposition by the local government of otherwise valid fees on real property development to cover the cost of constructing and maintaining school facilities attributable to such development did not violate equal protection. As an instance of economic regulation, the fees were presumptively constitutional and were validated by their rational relationship to a legitimate public purpose.

COUNSEL

Donald E. Smallwood, Daniel A. Nordberg and Fiore & Nordberg for Defendants and Appellants.

Best, Best & Krieger, Dallas Holmes, Gregory V. Moser, Breon, Galgani, Godino & O'Donnell, Louis T. Lozano, Emi R. Uyehara, John A. Drummond, Lloyd M. Harmon, Jr., County Counsel (San Diego), Howard P. Brody, Chief Deputy County Counsel, William W. Taylor and Sandra J. Brower, Deputy County Counsel, Robert A. Rundstrom, Kronick,

Moskovitz, Tiedemann & Girard, Robert J. Henry and Jacqueline M. Gong as Amici Curiae on behalf of Defendants and Appellants.

Ronald A. Zumbrun, Robert K. Best, Mark A. Wasser and Timothy A. Bittle as Amici Curiae on behalf of Plaintiff and Respondent.

MOSK, J.

The major question we must decide in this case concerns what are commonly referred to as "school-impact fees" - i.e., fees that local *881 governments impose on real property development to cover the costs of constructing and maintaining school facilities attributable to such development. The precise question is whether the School Facilities Act (sometimes hereafter the Act) (Gov. Code, § 65970 et seq.)^{FN1} - which encourages local school boards to identify and local governments to deal with the problem of overcrowding, and to that end permits the imposition of school-impact fees to finance certain temporary facilities - preempts local governments from imposing such fees to finance both temporary and permanent facilities. We answer this question in the negative, and therefore reverse the judgment.

FN1 Unless otherwise noted, all statutory references are to the Government Code.

I

In California the financing of public school facilities has traditionally been the responsibility of local government. "Before the *Serrano v. Priest* decision in 1971, school districts supported their activities mainly by levying ad valorem taxes on real property within their districts." (Cal. Building Industry Assn., *Financing School Facilities* (Apr. 1983) p. 3 (hereafter *Financing School Facilities*)). Specifically, although school districts had received some state assistance since 1947, and especially since 1952 with the enactment of the State School Building Aid Law of

1952 (Ed. Code, § 16000 et seq.), they financed the construction and maintenance of school facilities mainly through the issuance of local bonds repaid from real property taxes.

After the *Serrano* decision (5 Cal.3d 584 [96 Cal.Rptr. 601, 487 P.2d 1241, 41 A.L.R.3d 1187]) and to the present day, local government has remained primarily responsible for school facility financing, but has often been thrust into circumstances in which it has been able to discharge its responsibility, if at all, only with the greatest difficulty. In these years, the burden on different localities has been different: extremely heavy on those that have experienced growth in enrollment, light on those that have experienced decline, and somewhere in between on those that have remained stable.

In the early 1970's, because of resistance to increasing real property taxes, localities throughout the state began to experience greater difficulty in obtaining voter approval of bond issues to finance school facility construction and maintenance. As a result, a number of communities chose to impose on developers school-impact fees - such as those at issue here - in order to make new development cover the costs of school facilities attributable to *882 it. (See, e.g., *Builders Assn. of Santa Clara-Santa Cruz Counties v. Superior Court* (1974) 13 Cal.3d 225 [118 Cal.Rptr. 158, 529 P.2d 582].)

With the passage of Proposition 13 in 1978 the burden of school financing became even heavier. "Proposition 13 prohibits ad valorem property taxes in excess of 1%, except to finance previously authorized indebtedness. Since most localities have reached this 1% limit, school districts cannot raise property taxes even if two-thirds of a district's voters wanted to finance school construction." (Financing School Facilities, *supra*, at p. 4; see Ed. Code, § 17786 ["the Legislature recognizes that the ad valorem tax is no longer available as a source of revenue for the construction of necessary school facilities"].) Moreover, although Proposition 13 authorizes the imposition of "special taxes" by a vote of two-thirds of the electorate, such special taxes have rarely been imposed, remain novel, and as consequence are evidently not perceived as a practical method of school facility financing - especially in view of the need for a two-thirds vote of the

electorate to approve them. (Financing School Facilities, *supra*, at pp. 4, 14.)

In the face of such difficulties besetting local governments, the state has not taken over any substantial part of the responsibility of financing school facilities, less still full responsibility. To be sure, in order to implement the *Serrano* decision the Legislature has significantly increased assistance to education. But it has channeled by far the greater part of such assistance into educational programs and the lesser part into school facilities; in fiscal year 1981-1982, for example, only 3.6 percent went for such facilities. (Financing School Facilities, *supra*, at pp. 3, 4, 6.) The Legislature has developed "no long-term, comprehensive solution to the acute and chronic facilities financing needs of local school districts," but rather has enacted merely "a series of stop-gap, patchwork measures." (*Id.* at p. 6.) Moreover, because of, among other things, the state budget crisis in the early 1980's and other factors the Legislature has not adequately funded such measures as it has enacted - indeed, "[i]n the past several years, state-supported construction finance has waned ..." (*Id.* at pp. 6, 16.) Thus, although the burden of financing school facilities appears too heavy for some localities to bear, they continue to bear it in large part alone.

II

In 1974 the Board of Supervisors of San Diego County adopted in the form relevant here a land-use policy, designated Policy I-43 (sometimes hereafter the Policy), to help assure orderly growth in the face of widespread and rapid development and a consequent general increase in population. In the Policy, the board of supervisors described the basic problem: *883 "In many cases, ... the required public services have not ... been installed by the time the development shows a need. The result has been that residents in the newly developed areas have been inadequately served with schools." It then went on to frame a solution: "Before giving approval to development proposals involving a special use permit or a rezoning, ... the proponent of the development proposal ... [must] make certain provisions, in conjunction with appropriate governmental agencies, to insure: [¶] That the proponent of the development present evidence satisfactory to the Planning Commission, at the time of its consideration

of the matter, and to the Board of Supervisors at the time of its consideration of the matter that public school services will in fact be provided concurrent with the need." As evidence that such services and facilities would be provided, the county accepted so-called "school-availability" letters from the local school districts.

In 1977 respondents Grossmont Union High School District (the District) and its governing board (the Board) recognized that developments being proposed at that time might cause overcrowding, and sent letters to that effect to the county. On the basis of such letters, the planning commission concluded that the District could not in fact provide adequate school facilities concurrent with the need created by the proposed developments, and accordingly permitted few if any such developments to proceed.

In the fall of 1977 the predecessor of petitioner Candid Enterprises, Inc. expressed its willingness to enter into an agreement with the District to permit its development to proceed: it would agree to pay fees for school facilities and the District would issue a school-availability letter to the county indicating that such facilities would be provided.^{FN2} The District approved the agreement in principle and, in order to facilitate it and others like it, adopted Revised Policy FF, which allowed for assessment, under Policy I-43, of school-impact fees from developers, to be used for temporary or permanent facilities. In the spring of 1978 the District entered into an agreement with petitioner's predecessor secured by the real property under development. By its terms the developer agreed to pay the established fees at the time it sought building permits, and the District issued a school-availability letter advising the county of the agreement and of its ability to provide adequate school facilities through use of the fees.

FN2 The president of petitioner and its predecessor is one and the same person.

Meanwhile, the School Facilities Act had become effective on January 1, 1978. Under the Act, cities and counties were authorized to enact ordinances to require developers to pay fees for temporary school facilities. *884 (§ 65974.) In the spring of 1978 the board of supervisors enacted such an ordinance, des-

ignated Ordinance 5120. Shortly thereafter, in order to facilitate agreements with developers for the payment of fees for temporary facilities under the Act, the District adopted a resolution finding that conditions of overcrowding existed and that it lacked financial resources to provide additional needed school facilities.

In 1978 and 1979 the District assessed some developers for fees for temporary facilities pursuant to the School Facilities Act and Ordinance 5120; with others it entered into secured agreements for the payment of fees for temporary or permanent facilities, in lieu of School Facilities Act fees, pursuant to Policy I-43 and Revised Policy FF. Because of a districtwide decline in enrollment, in February 1980 the District discontinued collecting School Facilities Act fees. At the same time it also discontinued entering into Policy I-43 secured agreements, although it stated its intent to continue to monitor proposed developments, enter into such agreements when necessary, and collect fees under existing agreements in order to provide adequate facilities concurrent with the need that the subject developments were expected to create.

Petitioner, which had purchased a three-lot condominium project from its predecessor, sought building permits late in 1980. In early 1981 it paid under protest \$23,500 in Policy I-43 school-impact fees pursuant to the secured agreement between the District and its predecessor. Petitioner then unsuccessfully sought a refund by a letter to the District. Next it requested to speak to the Board on the matter, and was granted permission. At the meeting petitioner asked that in view of declining districtwide enrollment, the Board refund the fees paid under protest and cancel its secured agreement and all other similar agreements. The Board found that the District (1) discontinued collecting School Facilities Act fees and entering into Policy I-43 secured agreements "since it was projected that funds committed under existing agreements would be sufficient to mitigate future impact[,]" (2) "reserved the right to require the commitment of fees from future developments which promised to upset this condition of balance[,]" and (3) never had "any intention to disregard existing agreements, since the housing from projects covered by those agreements will adversely impact the District at their time of completion." The Board then denied petitioner's request.

Petitioner initiated this proceeding for a writ of mandate pursuant to Code of Civil Procedure sections 1094.5 (administrative mandate) and 1084 (ordinary mandate). Respondents filed a demurrer and an answer. After a hearing the trial court overruled the demurrer and ordered that mandate issue. *885 From the ensuing judgment respondents appeal, arguing the substantive point that the imposition of Policy I-43 school-impact fees was not invalid on either preemption or equal protection grounds. (1)(See fn. 3.) As we explain below, we find their position meritorious. FN3

FN3 Respondents also press the procedural point that their demurrer should have been sustained. This argument, however, is untenable. Although the writ of administrative mandate does not lie because the Board was not required by law to grant petitioner a hearing on its request (Code Civ. Proc., § 1094.5, subd. (a); Court House Plaza Co. v. City of Palo Alto (1981) 117 Cal.App.3d 871, 880 [173 Cal.Rptr. 161]), the writ of ordinary mandate is available. Mandate requires that there be no “plain, speedy, and adequate remedy, in the ordinary course of law.” (Code Civ. Proc., § 1086.) There was no such remedy here: an action on the contract for refund of fees paid and release from payment of the remainder was inadequate because there were no grounds on which to allege a breach or to seek rescission; no statutory action for a refund then existed, although one now does (§ 65913.5, subd. (e)); and an action for declaratory relief was inappropriate insofar as petitioner was attacking the local legislation as applied (Mobil Oil Corp. v. Superior Court (1976) 59 Cal.App.3d 293, 307 [130 Cal.Rptr. 814]). The writ of mandate may of course be used, as it is used here, to challenge the validity of a legislative measure. (E.g., Jolicoeur v. Mihaly (1971) 5 Cal.3d 565, 570, fn. 2 [96 Cal.Rptr. 697, 488 P.2d 1].)

III

(2a) Respondents first contend that the imposition of Policy I-43 school-impact fees is not preempted by the

School Facilities Act and is accordingly valid. Petitioner concedes as it must that the imposition of school-impact fees is generally valid. (See Builders Assn. of Santa Clara-Santa Cruz Counties v. Superior Court, *supra*, 13 Cal.3d 225, 232, fn. 6.) Respondents proceed to argue successfully that the local legislation is not preempted by the Act on the ground that there is no conflict.

(3) Under the police power granted by the Constitution, counties and cities have plenary authority to govern, subject only to the limitation that they exercise this power within their territorial limits and subordinate to state law. (Cal. Const., art. XI, § 7.) Apart from this limitation, the “police power [of a county or city] under this provision ... is as broad as the police power exercisable by the Legislature itself.” (Birkenfeld v. City of Berkeley (1976) 17 Cal.3d 129, 140 [130 Cal.Rptr. 465, 550 P.2d 100].)

(4) If otherwise valid local legislation conflicts with state law, it is preempted by such law and is void. (People ex rel. Deukmejian v. County of Mendocino (1984) 36 Cal.3d 476, 484 [204 Cal.Rptr. 897, 683 P.2d 1150]; Lancaster v. Municipal Court (1972) 6 Cal.3d 805, 807 [100 Cal.Rptr. 609, 494 P.2d 681].) A conflict exists if the local legislation “duplicates, contradicts, or enters an area fully occupied by general law, either expressly or by legislative implication.” (Citations omitted.) (People ex rel. Deukmejian v. County of Mendocino, *supra*, 36 Cal.3d at p. 484.) *886

(2b) Respondents argue and petitioner concedes that Policy I-43 school-impact fees do not contradict or duplicate the provisions of the School Facilities Act. Respondents further assert that such fees have not entered an area fully occupied by state law. They are persuasive.

First, the area of financing of school facilities needed by new development has not been expressly occupied by state law. The Legislature has not voiced such an intent in any of its enactments, and petitioner admits as much.

Second, the area has not been impliedly occupied by state law. (5) “In determining whether the Legislature has preempted by implication to the exclusion of local

regulation we must look to the whole purpose and scope of the legislative scheme. There are three tests: '(1) the subject matter has been so fully and completely covered by general law as to clearly indicate that it has become exclusively a matter of state concern; (2) the subject matter has been partially covered by general law couched in such terms as to indicate clearly that a paramount state concern will not tolerate further or additional local action; or (3) the subject matter has been partially covered by general law, and the subject is of such a nature that the adverse effect of a local ordinance on the transient citizens of the state outweighs the possible benefit to the municipality.'" (*People ex rel. Deukmejian v. County of Mendocino*, *supra*, 36 Cal.3d 476, 485, quoting from *In re Hubbard* (1964) 62 Cal.2d 119, 128 [41 Cal.Rptr. 393, 396 P.2d 809]; accord, *Fisher v. City of Berkeley* (1984) 37 Cal.3d 644, 708 [209 Cal.Rptr. 682, 693 P.2d 261] and cases cited.)

(2c) Petitioner concedes, as it must, that the imposition of Policy I-43 school-impact fees does not satisfy the third test, and respondents successfully urge that it satisfies neither of the other two.^{FN4}

FN4 How the relevant field occupied by the allegedly preemptive state legislation is defined is often crucial to the result: "If the definition is narrow, preemption is circumscribed; if it is broad, the sweep of preemption is expanded." (*California Water & Telephone Co. v. County of Los Angeles* (1967) 253 Cal.App.2d 16, 27-28 [61 Cal.Rptr. 618]; see *Gregory v. City of San Juan Capistrano* (1983) 142 Cal.App.3d 72, 84 [191 Cal.Rptr. 47].) The issue of definition, however, is not crucial here. Whether the School Facilities Act is held to occupy the narrow field of the financing of temporary facilities (as it evidently should be) or the broad field of the financing of all facilities (as it evidently should not be) is of no consequence in the case before us. As we shall explain, the Act recognizes and in fact permits local action, and thereby fails to occupy either field to the exclusion of local legislation.

First, the subject matter of the local measure - the

financing of the construction of both temporary and permanent school facilities to meet the demands imposed by new development - has not been so fully and completely *887 covered by general law as to clearly indicate that it has become exclusively a matter of state concern.

Taken by itself, the School Facilities Act does not even purport to deal with the construction of permanent facilities (see §§ 65970, subd. (e), 65974), and does not fully and completely cover the construction of temporary facilities. The Act recognizes alternative, local financing arrangements: "One year after receipt of any apportionment pursuant to the Leroy F. Greene State School Building Lease-Purchase Law of 1976 ... for the construction of a school, the city or county shall not be permitted thereafter, pursuant to this chapter or pursuant to any other school facilities financing arrangement such district may have with builders of residential development, to levy any fee or to require the dedication of any land within the attendance area of the district." (§ 65979, italics added.) The Act, moreover, clearly permits such arrangements. The school district is required to notify the local legislative body if it finds that "(a) conditions of overcrowding exist in one or more attendance areas within the district which will impair the normal functioning of educational programs including the reason for such conditions existing; and (b) that all reasonable methods of mitigating conditions of overcrowding have been evaluated and no feasible method for reducing such conditions exist [*sic*] ..." (§ 65971.) The Act goes on to define "reasonable methods for mitigating conditions of overcrowding": they "shall include, *but are not limited to*, agreements between a subdivider and the affected school district whereby temporary-use buildings will be leased to the school district or temporary-use buildings owned by the school district will be used." (§ 65973, subd. (b), italics added.)

Even if we consider the School Facilities Act together with other related state legislation, we come to the same conclusion: the subject matter of this local measure has not been fully and completely covered by state law. Although, as petitioner correctly argues, there are several state and local programs that provide funding for the construction of school facilities,^{FN5} the general situation may properly be described in the

words already quoted of one of petitioner's principal authorities: "Since the passage of Proposition 13, financing for school construction and facility maintenance has been a series of stop-gap, patchwork measures. There still exists no long-term, comprehensive solution to the acute and chronic facilities financing needs of local school districts." (Financing School Facilities, *supra*, at p. 6.) *888

FN5 These include, for example, the School Facilities Act, the Leroy F. Greene State School Building Lease-Purchase Law of 1976 (hereinafter the Greene Act) (Ed. Code, § 17700 et seq.), the Mello-Roos Community Facilities Act of 1982 (§ 53311 et seq.), and the New Schools Relief Act of 1979 (Ed. Code, § 39050 et seq.).

The evident absence of implied preemptive intent in the terms of the School Facilities Act - whether we consider it by itself or with other related legislation - is confirmed by the failure of the Legislature to fully cover the financing of school facilities. First, not all school districts in need of funds for permanent facilities can qualify to receive them under the Greene Act. (See Ed. Code, § 17740.) Second, for a variety of reasons the Legislature has failed to provide adequate funding for even such "stop-gap, patchwork" programs as currently exist. In such circumstances, to construe alternative, local arrangements such as that before us to be preempted would severely impede local governments and school districts in carrying out their responsibilities. It would also frustrate the intent of the Legislature in enacting the School Facilities Act: "Adequate school facilities should be available for children residing in new residential developments." (§ 65970, subd. (a).) Thus, under this test - i.e., whether the subject matter of the local measure has been so fully covered by state law as to clearly indicate that it has become exclusively a matter of state concern - the Act is shown not to be preemptive.
FN6

FN6 We do not mean to imply that the Legislature may not occupy a field unless it appropriates the funds necessary to carry out its intent. We also note that in some cases the "inadequacy" of state funding may prove to be too speculative or subjective a criterion on

which to base a conclusion that the Legislature has not intended to preempt local action.

Second, the subject matter of this local measure has not been partially covered by state law couched in such terms as to indicate clearly that a paramount state concern will not tolerate additional local action. The evidence on which we base our conclusion is compelling: the School Facilities Act, as we have explained, unmistakably recognizes and permits local action. Thus, under this test too the Act is shown not to be preemptive.

(6) To summarize: "Preemption by implication of legislative intent may not be found when the Legislature has expressed its intent to permit local regulations. Similarly, it should not be found when the statutory scheme recognizes local regulations." (*People ex rel. Deukmejian v. County of Mendocino, supra*, 36 Cal.3d 476, 485.) (2d) Accordingly, we conclude that the School Facilities Act, because it both permits and recognizes local measures such as this, does not have implied preemptive effect.

To avoid this conclusion, petitioner relies heavily on an opinion by the Attorney General. (62 Ops.Cal.Atty.Gen. 601 (1979).) Among the questions addressed in the opinion is whether the School Facilities Act preempts the imposition of school-impact fees by local government to provide permanent facilities. (*Id.* at p. 601.) To this the Attorney General answered *889 yes. (*Id.* at pp. 605-609.) The conclusion is erroneous, however, because the analysis is faulty.

First, the opinion reasons that the Act restricts the fees that may be imposed to no more than "the amount necessary to pay five annual lease payments for the interim facilities," and that such a restriction "would be meaningless if a city council or board of supervisors could exact additional developer fees for permanent school facilities." (*Id.* at p. 607, quoting § 65974, subd. (d).) This position might be sound if the Act were intended to limit the authority of local government to make such exactions, but it is not. The purpose of the Act is to encourage local school districts to identify, and local governments to deal with, the effects of residential development on school facilities and to provide local government with "new and improved methods" to cope with the effects of such

development “within a reasonable period of time” and on a short-term basis. (See §§ 65970-65971.) Accordingly, the restriction on the amount of fees that may be imposed is properly to be construed as an attempt on the part of the Legislature to ensure that local governments not indefinitely avoid the problem of the construction of permanent facilities by agreeing to the long-term use of temporary facilities.

Second, the opinion reasons that the 1979 addition of section 65980, which expressly limits the scope of the Act to temporary facilities, when as initially enacted it “was arguably broad enough to cover permanent facilities [as well,] ... indicated an intent to restrict the amount and purpose of the fees to be collected from developers.” (62 Ops.Cal.Atty.Gen., *supra*, at p. 607.) This position is undermined, however, by the conclusions we reach above: the Legislature evidently intended that local governments use fees authorized by the Act as a short-term solution - *not* that local governments be prohibited from developing and implementing long-term solutions. It is also undermined by the language of section 65979, which was added to the Act at the same time as section 65980: “One year after receipt of an apportionment pursuant to the [Greene Act] ... for the construction of a school, the city or county shall not be permitted thereafter, pursuant to this chapter or pursuant to any other school facilities financing arrangement such district may have with builders of residential development, to levy any fee or to require the dedication of any land within the attendance area of the district.” (Italics added.) Thus, section 65979 expressly recognizes “other school facilities financing arrangement[s]” between local government and developers, and prohibits exactions pursuant to such arrangements *only* when the locality has received an apportionment for permanent facilities pursuant to the Greene Act. Had the Legislature intended the School *890 Facilities Act to preempt such “school facilities financing arrangement[s],” the reference to them would have been meaningless.

Third, the opinion reasons by analogy to the Subdivision Map Act that “the express grant of authority to impose school impact fees and dedications upon developers under [the Act], with strict limitations as to amount, evidences an intent by the Legislature to preempt the field to the exclusion of local regulation.” (62 Ops.Cal.Atty.Gen., *supra*, at p. 608.) But even if

the opinion is correct in concluding that the intent of the Legislature in the Subdivision Map Act is to prohibit local government from making exactions that the Act does not expressly authorize, it errs in reading such an intent into the School Facilities Act. Here the Legislature recognizes (§ 65979) and in fact permits (§§ 65971, 65973, subd. (b)) local legislation, and has accordingly indicated its clear intent that the “new and improved methods of financing for interim school facilities” that the Act provides are merely supplementary to, and not preemptive of, local action (§ 65970, subd. (e)).

IV

(7) Respondents' other contention is that the imposition of Policy I-43 school-impact fees does not violate the equal protection clause and is accordingly valid. This claim too is successful.

The imposition of school-impact fees is an undisputed and indisputable instance of economic regulation. As such, we must review it under “the basic and conventional standard,” which “invests legislation ... with a presumption of constitutionality and requir[es] merely that distinctions drawn by a challenged [measure] bear some rational relationship to a conceivable legitimate state purpose.” (*D'Amico v. Board of Medical Examiners* (1974) 11 Cal.3d 1, 16 [112 Cal.Rptr. 786, 520 P.2d 10]; see *Builders Assn. of Santa Clara-Santa Cruz Counties v. Superior Court*, *supra*, 13 Cal.3d 225, 232-233.) As petitioner implicitly concedes, we may not review the challenged local measure under any stricter standard: developers do not constitute a “suspect class,” and development is not a “fundamental interest” (see *Trent Meredith, Inc. v. City of Oxnard* (1981) 114 Cal.App.3d 317, 328 [170 Cal.Rptr. 685]). Under the conventional standard, “the burden of demonstrating the invalidity of a classification ... rests squarely upon the party who assails it.” (*D'Amico v. Board of Medical Examiners*, *supra*, 11 Cal.3d at p. 17, italics in original.) Petitioner has failed to carry this burden.

If, as respondents argue and we are inclined to hold, the class of similarly situated persons comprises all developers who have entered into a secured *891 agreement to obtain a school-availability letter, then no discrimination at all appears: the Board has col-

lected fees as they have become due and has stated its intent to continue to collect them. But even if, as petitioner responds, the class comprises all developers who are currently building in the district, still no unlawful discrimination emerges. The Board entered into secured agreements covering certain developments proposed in 1978 and 1979 because it expected them to cause or aggravate overcrowding in neighboring schools. The Board has not entered into such agreements covering developments proposed subsequently because it has not expected them to have such an adverse effect. Thus if developers currently building in the district are treated differently, such difference is reasonable and therefore lawful: developers who are expected to cause or aggravate overcrowding are required to mitigate it, others are not.

The judgment is reversed.^{FN7}

FN7 Because of our disposition we do not reach the question whether petitioner waived its right to the fees it paid under protest by accepting the benefits of the agreement with the District.

END OF DOCUMENT

0985 California School Finance Authority

Created in 1985, the California School Finance Authority (CSFA) oversees the statewide system for the sale of revenue bonds to reconstruct, remodel or replace existing school buildings, and to acquire new school sites and buildings to be made available to public school districts, charter schools, and community colleges, and to provide access to financing for working capital and capital improvements. CSFA consists of the following three members: the State Treasurer who serves as chair, the Superintendent of Public Instruction, and the Director of the Department of Finance.

PROGRAM DESCRIPTIONS

10 - SMART BONDS PROGRAM

Chapter 1438, Statutes of 1985, as amended by Chapter 598, Statutes of 1987, established the California School Finance Authority (CSFA) and authorized the issuance of \$400 million in revenue bonds or other debt instruments. The proceeds from the sale of the bonds were available for loans to school and community college districts to assist with the acquisition of equipment and new school sites, construction of new facilities, reconstruction of existing facilities, capital improvements, acquisition of portable/relocatable buildings, and to provide working capital. Effective January 1, 1997, Chapter 1071, Statutes of 1996, authorized the issuance of an additional \$400 million in revenue bonds per fiscal year for school districts and county offices of education that agreed to guarantee payment of the bonds with Proposition 98 funds. The total outstanding amount may not exceed \$4 billion at any one time. Pursuant to Chapter 741, Statutes of 1998, effective January 1, 1999, the \$400 million annual issuance cap was eliminated. Based on program amendments effective January 1, 2007, Chapter 325, Statutes of 2006 (AB 2717), CSFA offers financing opportunities for charter schools for capital improvements and working capital needs.

20 - CHARTER SCHOOL FACILITIES PROGRAM

Chapter 935, Statutes of 2002, as amended by Chapter 587, Statutes of 2003, created the Charter Schools Facilities

* Dollars in thousands, except in Salary Range.

0985 California School Finance Authority - Continued

Program, which provides funding for the new construction or renovation of charter school facilities. CSFA and the Office of Public School Construction jointly administer the program. The Charter School Facilities Program through the Kindergarten-University Public Education Facilities Bond Acts of 2002, 2004, and 2006, was funded \$100 million in bond proceeds from Proposition 47, \$300 million from Proposition 55, and \$500 million from Proposition 1D. To date, 65 schools have been awarded funding through the program's funding rounds.

The program provides a 50% state subsidy for the charter school facilities project costs, with the balance of the project costs being repaid (to the state) by the charter school in the form of a long-term lease. Recipient charter schools must provide site-based instruction, be deemed financially sound by CSFA, and meet other program eligibility requirements.

30 - STATE CHARTER SCHOOL FACILITIES INCENTIVE GRANTS PROGRAM

In 2004, CSFA was awarded a grant under the United States Department of Education's State Charter School Facilities Incentive Grants Program to provide California charter schools with assistance for facilities costs. The \$50 million federal grant was allocated over a five-year period (through 2009) to eligible charter schools. Grant funds are used toward a charter school's cost of rent, lease, mortgage or debt service payments for existing or new facilities or toward the costs of acquiring land and constructing or renovating a facility. Grants are awarded to charter schools based on preference points allotted for the percentage of low-income students, percentage overcrowded, not-for-profit status, and demonstrated student performance. Eligible charter schools must, at a minimum, be in good standing with their chartering authority, provide site-based instruction, and have completed at least one school year of instructional operations. Additional requirements are listed in the program regulations.

In 2009, CSFA received an additional grant of \$48 million from the United States Department of Education's State Charter School Facilities Incentive Grants Program. The award will be allocated over a five-year period and the program eligibility and criteria are similar to those under the first award of \$50 million. Under this round, CSFA implemented a change in regulations to award charter schools preference points if the school is providing better educational opportunities than surrounding public schools. First time applicants are also given preference as compared to past recipients.

CREDIT ENHANCEMENT FOR CHARTER SCHOOL FACILITIES PROGRAM

In 2010, CSFA was awarded \$8.3 million by the Credit Enhancement for Charter School Facilities Program (CFDA 84.354A) authorized under Title V, Part B, Subpart 2 of the Elementary and Secondary Education Act, to enhance credit for charter schools and enable them to access non-Federal funds that will address the costs of renovating, acquiring, and constructing school facilities. The grant funds will act as a reserve against any shortfalls in debt service on bonds that are issued by CSFA.

QUALIFIED SCHOOL CONSTRUCTION BONDS (QSCB)

The American Recovery and Reinvestment Act of 2009 (ARRA) provided funding for the new construction or renovation of school facilities through the use of Qualified School Construction Bonds (QSCBs). Of California's \$773 million in "volume cap" allocation for the issuance of QSCBs, approximately \$73 million was reserved for use by charter schools through the issuance of conduit revenue bonds by CSFA which will be designated as QSCBs. To date, CSFA has allocated a total of approximately \$50 million of the \$73 million. Additionally, in 2010, CSFA was awarded an additional \$68 million for the issuance of QSCBs through Assembly Bill 2560 (Chapter 266, Statutes of 2010).

STATEMENT OF DECISION PURSUANT TO
GOVERNMENT CODE SECTION 17500 ET
SEQ.; CALIFORNIA CODE OF
REGULATIONS, TITLE 2, DIVISION 2,
CHAPTER 2.5, ARTICLE 7

(Adopted on September 30, 2004)

STATEMENT OF DECISION

The Commission on State Mandates (Commission) heard and decided this test claim during a regularly scheduled hearing on September 30, 2004. David Scribner, representing Schools Mandate Group, appeared on behalf of the claimant, Brentwood Union School District. Susan Geanacou, Blake Johnson, and Walt Schaff appeared on behalf of the Department of Finance (DOF).

The law applicable to the Commission's determination of a reimbursable state-mandated program is article XIII B, section 6 of the California Constitution, Government Code section 17500 et seq., and related case law.

The Commission adopted the staff analysis at the hearing by a vote of 5-0.

BACKGROUND

Test claim legislation: The amended test claim includes claims made under two separate sections of the Education Code.

Education Code section 17215.5¹ requires that prior to acquiring property for "a new schoolsite in an area designated ... for agricultural use and zoned for agricultural production, the governing board of a school district shall make all of the following findings:"

- That the district has "notified and consulted" with the local zoning agency (city and/or county) that has jurisdiction over the proposed school site; and,

¹ Former Education Code section 39006 enacted by Statutes 1996, chapter 509, was renumbered to section 17215.5 by Statutes 2000, chapter 135, between the time of the original and amended test claim filings.

- That the final selection has been evaluated “based on all factors affecting the public interest and not limited to selection on the basis of the cost of the land,” and,
- That the district will “attempt to minimize any public health and safety issue resulting from the neighboring agricultural uses....”

The California Farm Bureau sponsored the test claim legislation because restrictions imposed on pesticide use on agricultural land bordering schools resulted in a net loss of profitable land from the neighboring parcel. The sponsor argued that school districts locate schools in agricultural areas often, and that the intent of the legislation is not to stop siting schools in these areas, but rather to, “... require dialogue and exchange of information between the school district and the city or county when a school is proposed for an agricultural area.”²

Education Code section 17213.1³ requires that if a school district wishes to apply for state funds under the Leroy F. Greene School Facilities Act of 1998, it must perform a number of specified activities. The Leroy F. Greene School Facilities Act established a new state program in which the State Allocation Board would provide state per pupil funding for new school facilities construction and school facilities modernization. The act included Proposition 1A, passed by voters in November 1998, that authorized the sale of \$9.2 billion in general obligation bonds for K-12 schools (\$6.7 billion) and higher educational facilities (\$2.5 billion.) The proposition also limited, with some exceptions, the fees school districts could levy on developers and homeowners to finance school facilities.⁴ The activities required by section 17213.1 include the following:

- 1) Prior to acquiring the site, the school district must contract with an environmental assessor⁵ (assessor) to supervise the preparation of, and sign, a Phase I environmental assessment⁶ or the school district may choose to forgo a Phase I assessment and proceed directly to a preliminary endangerment assessment.⁷

² Senate Committee on Education, Analysis of Assembly Bill No. 1724 (1995-96 Reg. Sess.) as amended June 12, 1996, page 2.

³ Education Code section 17213.1 was amended by Statutes 2001, chapter 865 and Statutes 2002, chapter 935 subsequent to the amended test claim filing to make public review voluntary under subdivisions (a)(6)(A)-(a)(7).

⁴Office of the Legislative Analyst, analysis of Proposition 1A, Class Size Reduction Kindergarten-University Public Education Facilities Bond Act of 1998, pages 3-4. <http://www.lao.ca.gov/ballot/1998/1A_11_1998.htm> [as of July 19, 2004].

⁵ Defined by Education Code section 17210, subdivision (b).

⁶ Defined by Education Code section 17210, subdivision (g).

⁷ Defined by Education Code section 17210, subdivision (h), as an “activity that is performed to determine whether current or past hazardous material management practices or waste management practices have resulted in a release or threatened release of hazardous materials, or whether naturally occurring hazardous materials are present, which pose a threat to children’s health, children’s learning ability, public health or the environment.”

- 2) If the district chooses to complete a Phase I environmental assessment and the assessment concludes that further investigation of the site is not necessary the district must then submit the assessment to the Department of Toxic Substances Control (DTSC).
 - a) If the DTSC finds the assessment sufficient, it will notify the California Department of Education (CDE) that the assessment has been approved.
 - b) If the DTSC does not find the assessment sufficient, it will instruct the district on what steps need to be taken to complete the assessment.
 - c) The DTSC may also conclude that a preliminary endangerment assessment is required based on the findings of the Phase I environmental assessment.
- 3) If the Phase I environmental assessment concludes that further investigation of the site is necessary or if the district chooses to forgo a Phase I assessment and to move directly to a preliminary endangerment assessment, the district has two options:
 - a) it must either contract with an assessor to supervise the preparation of, and sign, a preliminary endangerment assessment, or,
 - b) it must enter into an agreement with the DTSC to prepare this assessment (including an agreement to compensate DTSC for assessment costs).
- 4) The preliminary endangerment assessment shall conclude EITHER:
 - a) further investigation is not required; or,
 - b) that a release of hazardous materials has occurred or there is a threat of a release of hazardous materials at the site.
- 5) The school district must publish notice that the preliminary endangerment assessment has been submitted and shall make the assessment available for public review according to guidelines provided by subdivision (a)(6).⁸
- 6) The DTSC shall then either find:
 - a) that no further study of the site is required; or,
 - b) that the preliminary endangerment assessment is not satisfactory and further action is necessary; or,
 - c) if a release of hazardous materials has been found to have occurred and the district wishes to go forward with the project the district must:
 - i) prepare a financial analysis of the costs of response action required at the school site; and,
 - ii) assess the benefits of the site; and,
 - iii) obtain approval from the CDE for the site.

⁸ Since the filing of the amended test claim, Statutes 2001, chapter 865 amended this to make public review voluntary under section 17213.1, subdivisions (a)(6)(A)-(a)(7).

Further, section 17213.1⁹, subdivision (11) states that “costs incurred by the district” may be reimbursed in accordance with section 17072.13. Section 17072.13, which is also part of the Leroy F. Greene School Facilities Act of 1998, allows for 50% of costs incurred by the district during the proposal and siting process to be reimbursed under the act. Section 17213.1 was enacted in response to Joint Legislative Audit Committee (JLAC) hearings, held in 1992, which concluded that the existing procedures for approval of school site acquisition must be “immediately reconfigure[d]... to ensure local compliance with the laws.” Specifically, the bill was in response to the actions of the Los Angeles Unified School District, which a legislative committee report alleged requested state approval for at least nine schools with knowledge that the sites may have contained toxic contamination.¹⁰

School District Facilities: Under current California law, school facilities can be constructed with or without state financial assistance. The School Facility Program (SFP) was created in 1998 under the Leroy F. Greene School Facilities Act¹¹ to administer state funds for school facility construction. The SFP was created to streamline the process for receiving state bond money for public school facilities construction. The program, which involves the State Allocation Board (SAB), Office of Public School Construction (OPSC), the School Facilities Planning Division (SFPD) of the CDE and the Division of the State Architect (SA), allocates funding to local school districts from statewide general obligation bonds passed by the voters of California.

The first funding for the SFP came from Proposition 1A, approved in 1998, which provided \$6.7 billion for K-12 facilities. The second funding came from Proposition 47, which included \$11.4 billion for K-12 facilities. An additional \$12.3 billion was added to this fund with the passage of Proposition 55 in March 2004.

A school district wishing to receive state funding submits a funding application package to the SFP. The OPSC then reviews and evaluates the package under its regulations and policies. Approval of the plans by both the SA and the SFPD are required before the SAB approves the apportionment.¹² The money is then released to the district, which is required to submit expenditure reports to the OPSC, which audits all allocations.¹³

In order to receive the required approval of the CDE, the school district must follow the appropriate guidelines under California Code of Regulations, title 5, division 1, chapter 13,

subchapter 1.¹⁴ These regulations include guidelines on site selection,¹⁵ design of education facilities¹⁶ and procedures for plan approval.¹⁷

Claimant's Position

Claimant contends that the test claim legislation constitutes a reimbursable state-mandated program pursuant to article XIII B, section 6 of the California Constitution and Government Code 17514. In the original claim, claimant alleges that the test claim legislation requires school districts to engage in the following reimbursable state-mandated activities:

1. Develop and adopt policies and procedures in accordance with Education Code section 39006 (now § 17215.5) for the acquisition of real property for a school site.
2. Train school district personnel regarding the requirements of acquiring real property designated as agricultural land.
3. Evaluate the property based on all factors affecting the public interest, not limited to selection based on the cost of the land.
4. Prior to the commencement of purchasing property for any school site:
 - a. research city and/or county general plans to determine if the desired parcel of land is designated in either document for agricultural use; and,
 - b. research city and/or county zoning requirements to determine if the desired parcel of land is zoned for agricultural production.
5. If the land sought to be purchased by the school district is designated in a city, county, or city and county general plan for agricultural use and zoned for agricultural production:
 - a. notify the city, county, or city and county within which the prospective school site is located; and,
 - b. consult with the city, county or city and county within which the prospective school site is located.
6. Prepare a report for the governing board that will allow the governing board to make the following findings:
 - a. the school district has notified and consulted with the city, county, or city and county within which the prospective school site is to be located; and,

¹⁴ See School Site Selection and Approval Guide. <<http://www.cde.ca.gov/ls/fa/sf/schoolsiteguide.asp>> [as of July 19, 2004].

¹⁵ California Code of Regulations, title 5, section 14010.

¹⁶ California Code of Regulations, title 5, section 14030.

¹⁷ California Code of Regulations, title 5, sections 14011 and 14012.

- b. the final site selection has been evaluated by the governing board of the school district based on all factors affecting the public interest and not limited to selection on the basis of the cost of the land; and,
 - c. the school district will attempt to minimize any public health and safety issues resulting from the neighboring agricultural uses that may affect the pupils and employees at the school site.
7. Conduct a meeting of the governing board to make the findings required by Education Code section 39006 (now § 17215.5).
8. Prepare and draft a board resolution with the following findings:
- a. the school district has notified and consulted with the city, county, or city and county within which the prospective school site is to be located; and,
 - b. the final site selection has been evaluated by the governing board of the school district based on all factors affecting the public interest and not limited to selection on the basis of the cost of the land; and,
 - c. the school district will attempt to minimize any public health and safety issues resulting from the neighboring agricultural uses that may affect the pupils and employees at the school site.¹⁸

In the amended test claim, claimant states that based on the Department of Finance (DOF) letter filed on January 26, 1999,¹⁹ the claimant now believes that the following activities “were part of prior law and therefore removes them from [the] amended test claim filing:” (3) evaluating the property based on all factors, (4) researching city and/or county zoning requirements and current use, and (5) notifying the city and/or county within which the site is located.²⁰ Further, claimant amended the test claim to add new alleged state-mandated activities, as follows:

- 1) contract with an environmental assessor to supervise the preparation of and sign a Phase I environmental assessment of the proposed school site unless the governing board decides to proceed directly to a preliminary endangerment assessment (§ 17213.1, subd. (a)); or,
- 2) if the governing board of the school district decides to proceed directly to a preliminary endangerment assessment, the school district shall contract with an environmental assessor to supervise the preparation of and sign a preliminary endangerment assessment of the proposed school site and enter into an agreement

¹⁸ Original test claim (98-TC-04), pages 13-14.

¹⁹ In a letter dated January 26, 1999, the DOF advised that activities [1] and [2] were reimbursable mandates, that activities [3], [4] and [5] were activities already required by state law and therefore not reimbursable mandates and that activities [6], [7] and [8] were not required by section 17215.5 and therefore also not reimbursable mandates.

²⁰ Amended test claim (01-TC-03), page 7.

with the DTSC to oversee the preparation of the preliminary endangerment assessment (§ 17213.1, subd. (a)(4)).²¹

Claimant commented on the draft staff analysis as follows. Under the Education Code, a school district must house and educate all students that establish residency in the district in a manner that does not risk the health or safety of its students. Claimant argues that the activities related to section 17515.5 are reimbursable if all discretion is removed from the district for siting and building a new school. Claimant states that school districts that are grossly overpopulated or facing an influx of students due to new development in the districts' boundaries have no choice but to build new school sites to house and educate pupils. Under circumstances of gross overcrowding in the district, claimant argues, the decision to build a new school site is practically compelled. Those districts that face overcrowding and have no choice but to seek out agricultural land for building a school site, according to claimant, are mandated to comply with section 17515.5 because there is no discretion afforded the district. Thus, claimant requests Commission staff to amend the analysis to include a limited exception to reimburse only those districts that can establish they are practically compelled to build a new school site due to overpopulation or expected additional development and growth within the district *and* that the only available option is to acquire agricultural land.

Claimant does not dispute the draft staff analysis conclusions regarding section 17213.1.

State Agency Position

In its January 1999 comments on the original test claim statute (§ 39006, now § 17215.5), DOF states that the alleged state-mandated activities of developing policies and procedures and training staff both appeared to be state-mandated activities of minimal cost. DOF states that the alleged state-mandated activities of evaluating the site on all factors and determining if the site is zoned for agriculture are already incorporated into state law under Education Code section 17212. And the requirement that the district notifies and consults with a city and/or county is also incorporated into state law under Education Code section 17213, subdivision (b). DOF states that since all three are previously required activities they are not new programs or higher levels of service. DOF also states that the alleged state-mandated activities of preparing a report, holding a meeting, and, passing a resolution, were not required by Education Code section 17215.5. DOF states that section 17215.5 only requires the governing board to make a finding; it does not require staff to prepare a report, conduct a specific meeting or prepare and pass a resolution.²²

In its December 2002 comments on the amended test claim statutes (§§ 17215.5 & 17213.1), DOF reiterates its prior statements on policy development and training, stating that both appear to be state-mandated activities that impose minimal cost. DOF argues that the newly alleged state-mandated activities, such as contracting for a Phase I environmental assessment, and contracting for a preliminary endangerment assessment are not state-mandated. DOF points out that the entire section 17213.1 begins with "As a condition of receiving funding pursuant to

²¹ Amended test claim (01-TC-03) page 16. A different numbering scheme is assigned to these activities on pages 9-10 of the amended test claim, but here the numbering scheme on pages 6-7 is used.

²² DOF comments on test claim 98-TC-04, dated January 26, 1999, pages 1-3.

Chapter 12.5...²³ Therefore, DOF argues that section 17213.1 sets out the requirements for an optional funding source and does not constitute state-mandated activities.

However, DOF reverses its position on the alleged state-mandated activities of preparing a report and a resolution, arguing that although they are not specifically required by the section 17215.5, these activities are “reasonable and consistent with the intent of the statute.”²⁴ DOF states that, in accordance with its previous comments, holding a meeting is not specifically required by section 17215.5 and the board could make the required finding at “a regularly scheduled board meeting.”²⁵

Finally, DOF points out that, “[t]he appropriate period in the State Mandates process for identifying reimbursable activities is the Test Claim phase ... [i]t is inappropriate to transform the Parameters and Guidelines phase ... into a venue for Claimants to seek reimbursement for activities they failed to identify in their test claims.”²⁶

COMMISSION FINDINGS

The courts have found that article XIII B, section 6 of the California Constitution²⁷ recognizes the state constitutional restriction on the powers of local government to tax and spend.²⁸ “Its purpose is to preclude the state from shifting financial responsibility for carrying out governmental functions to local agencies, which are ‘ill equipped’ to assume increased financial responsibilities because of the taxing and spending limitations that articles XIII A and XIII B impose.”²⁹ A test claim statute or executive order may impose a reimbursable state program if it orders or commands a local agency or school district to engage in an activity or task.³⁰ In

²³ Education Code section 17213.1.

²⁴ DOF comments on test claim 01-TC-03, dated December 5, 2001, page 3.

²⁵ DOF comments on test claim 01-TC-03, dated December 5, 2001, page 2.

²⁶ DOF comments on test claim 01-TC-03, dated December 5, 2001, page 3.

²⁷ Article XIII B, section 6 provides: “Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the state shall provide a subvention of funds to reimburse such local government for the costs of such program or increased level of service, except that the Legislature may, but need not, provide such subjection of funds for the following mandates: (a) Legislative mandates requested by the local agency affected; (b) Legislation defining a new crime or changing an existing definition of a crime; or (c) Legislative mandates enacted prior to January 1, 1975, or executive orders of regulations initially implementing legislation enacted prior to January 1, 1975.”

²⁸ *Department of Finance v. Commission on State Mandates (Kern High School District)* (2003) 30 Cal.4th 727, 735.

²⁹ *County of San Diego v. State of California* (1997) 15 Cal.4th 68, 81.

³⁰ *Long Beach Unified School Dist. v. State of California* (1990) 225 Cal.App.3d 155, 174.

addition, the required activity or task must be new, constituting a “new program,” or it must create a “higher level of service” over the previously required level of service.³¹

The courts have defined a “program” subject to article XIII B, section 6, of the California Constitution, as one that carries out the governmental function of providing public services, or a law that imposes unique requirements on local agencies or school districts to implement a state policy, but does not apply generally to all residents and entities in the state.³² To determine if the program is new or imposes a higher level of service, the test claim legislation must be compared with the legal requirement in effect immediately before the enactment of the test claim legislation.³³ A “higher level of service” occurs when the new “requirements were intended to provide an enhanced service to the public.”³⁴ Finally, the newly required activity or increased level of service must impose costs mandated by the state.³⁵

The Commission is vested with the exclusive authority to adjudicate disputes over the existence of state-mandated programs within the meaning of article XIII B, section 6.³⁶ In making its decisions, the Commission must strictly construe article XIII B, section 6 and not apply it as an “equitable remedy to cure the perceived unfairness resulting from political decisions on funding priorities.”³⁷

Issue: Do the test claim statutes impose a state-mandated activity on school districts within the meaning of article XIII B, section 6?

The courts have held that article XIII B, section 6 was not intended to entitle local agencies and school districts to reimbursement for all costs resulting from legislative enactments, but only those costs “mandated” by a new program or higher level of service imposed upon them by the

³¹ *San Diego Unified School Dist. v. Commission on State Mandates* (2004) 33 Cal.4th 859, 878, (*San Diego Unified School Dist.*); *Lucia Mar Unified School Dist. v. Honig*, (1988) 44 Cal.3d 830, 835 (*Lucia Mar*).

state.³⁸ Thus, the issue is whether the test claim statutes impose a state-mandated activity on school districts.

Education Code section 17215.5: This section requires the governing board of a school district to make three findings if the board wishes to acquire and build a new school on land zoned for agricultural use. The section states that before acquiring land zoned for agricultural use the governing board of a school district must find:

- 1) that the school district has notified and consulted with the city and/or county within which the site is located; and,
- 2) that the final site selection has been evaluated by the school governing board based on factors other than costs; and,
- 3) that the school district will attempt to minimize any public health issue resulting from neighboring agricultural uses.

The Commission finds that this section is not subject to article XIII B, section 6 because the decisions to construct a new school as well as where to site it are discretionary decisions made by the local governing board of a school district. Section 17215.5 does not require the acquisition of any land for a school, nor does it specify the type of land to be acquired (including land zoned for agricultural use.)

Although California law does express the intent of the Legislature that public education shall be a priority in the state and provided by the state,³⁹ there are no statutes or regulations requiring a school district or county board of education to construct school facilities. School districts are given the power by state law to lease⁴⁰ or purchase⁴¹ land for school facilities, to construct school facilities⁴² and to establish additional schools in the district.⁴³ However, in all of these statutes permissive language is used when describing the role of the governing board of the school district. In sections 17244 and 17245 the board "...is authorized..." and section 17342 states that the, "governing board of any school, whenever in its judgment it is desirable to do so, may establish additional schools in the district."

California courts have also found that the construction of school facilities within a school district is a discretionary decision of the school district. In *People v. Oken*, the court found that, "[w]here, when or how, if at all, a school district constructs school buildings is a matter within

³⁸ *Lucia Mar.*, *supra*, 44 Cal.3d 830, 835; *City of San Jose v. State of California*, *supra*, 45 Cal.App.4th 1802, 1816.

⁴² Education Code sections 17245 and 17340.

⁴³ Education Code section 17342.

the sole competency of its governing board to determine.”⁴⁴ This was reiterated in a state Attorney General opinion in 1988.⁴⁵

With the conventional construction of school facilities, the question of “where, when or how, if at all, a school district shall construct a school building is a matter within the sole competency of its governing board to determine.” (*People v. Oken* (1958) 159 Cal.App.2d 456, 460.) The same is essentially true with the construction of a school facility under the Leroy F. Greene State School Building Lease-Purchase Law.⁴⁶

This language indicates that all aspects of new school facilities, including when they are constructed and if they are constructed at all, is a decision left to local school boards.

In other cases the courts have also held that the power to site a school belongs to the local school district and not the state. In *Town of Atherton v. Superior Court of San Mateo*, the court found that “[u]nder the statutes ... the state has expressly granted the power of location to its agencies, the school districts.”⁴⁷ In *City of Santa Clara v. Santa Clara Unified School District*, the court found that “the selection of a school site by a school district involves an exercise of legislative and discretionary action and may not be challenged as to its wisdom, expediency or reasonableness....”⁴⁸

Additionally, there are no statutes that direct school districts where to place schools. Former Education Code sections 37000 through 37008 did relate to the specific location of schools, but were repealed by Statutes 1989, chapter 1256. Currently, the only section that pertains to state agency involvement in school site selection is section 17521. However, section 17521 only requires that the CDE create standards for use by school districts in the selection of school sites and allows school districts to request advice on the acquisition of a proposed site.

Therefore, based both on statutes and case law, the decision to acquire land on which to site a school and the decision as to which land to acquire are both decisions that are made at the discretion of the school district. If a district’s decision is discretionary, no state-mandated costs will be found.

In *City of Merced v. State of California*,⁴⁹ the court determined that the city’s decision to exercise eminent domain was discretionary. The court found that no state reimbursement was required for loss of goodwill to businesses over which eminent domain was exercised, the court reasoned as follows:

⁴⁴ *People v. Oken* (1958) 159 Cal. App.2d 456, 460.

⁴⁵ “Although Attorney General opinions are not binding, they are entitled to great weight.” *Freedom Newspapers, Inc. v. Orange County Employees Retirement* (1993) 6 Cal.4th 829, 832.

⁴⁶ 71 Opinions Attorney General of California 332, 339 (1988).

⁴⁷ *Town of Atherton v. Superior Court of San Mateo* (1958) 159 Cal.App.2d 417, 428.

⁴⁸ *City of Santa Clara v. Santa Clara Unified School District* (1971) 22 Cal.App.3d 152, 161, footnote 4.

⁴⁹ *City of Merced v. State of California* (1984) 153 Cal.App.3d 777, 783.

We agree that the Legislature intended for payment of goodwill to be discretionary. The above authorities reveal that whether a city or county decides to exercise eminent domain is, essentially, an option of the city or county rather than a mandate of the state. *The fundamental concept is that the city or county is not required to exercise eminent domain.*⁵⁰ [Emphasis added.]

In *Kern High School District*,⁵¹ the California Supreme Court found that costs associated with notices and agendas required by state law were not entitled to reimbursement if the requirements for notice and agendas were part of a program in which the school district had chosen to participate. In that case, the California Supreme Court affirmed the reasoning of the *City of Merced* case as follows:

[T]he core point articulated by the court in *City of Merced* is that activities undertaken at the option or discretion of a local government entity (that is, actions undertaken without any legal compulsion or threat of penalty for nonparticipation) do not trigger a state mandate and hence do not require reimbursement of funds – even if the local entity is obligated to incur costs as a result of its discretionary decision to participate in a particular program or practice.⁵²

The Supreme Court left undecided whether a reimbursable state mandate “might be found in circumstances short of legal compulsion—for example, if the state were to impose a substantial penalty (independent of the program funds at issue) upon any local entity that declined to participate in a given program.”⁵³ As explained below, there is no evidence in the record that school districts are “practically compelled” to acquire agricultural land to build schools. The test claim statute does not impose a penalty for noncompliance.

Although the Supreme Court declined to extend the *City of Merced* holding in a recent case,⁵⁴ its core point stands: there is no state mandate where a local government or school district freely undertakes activities at its option. The Commission is not free to disregard the clear statement of the California Supreme Court interpreting mandates law. Thus, pursuant to state law, school districts remain free to site new schools where they choose. The statutory duties imposed by section 17215.5 flow from the decision to site a school on land zoned for agricultural use. Based on the *Kern High School Dist.* case, since this decision is a local discretionary activity, any requirements imposed by the state on the local decision do not constitute a reimbursable state mandate.

Claimant argues that the Commission should find a limited exception to reimburse those districts that can establish they are practically compelled to build a new school site due to overpopulation

⁵⁰ *Ibid.*

⁵¹ *Kern High School District, supra*, 30 Cal.4th 727.

⁵² *Id.* at page 742.

⁵³ *Ibid.*

⁵⁴ *San Diego Unified School Dist., supra*, 33 Cal.4th 859, 878. The Court reached its decision on alternative grounds not involving the *City of Merced* rationale.

or expected additional development and growth within the district and that the only available option is to acquire agricultural land.

The Commission disagrees because claimant does not submit any evidence as to the existence of this situation. The Commission must base its findings on substantial evidence in the record.⁵⁵

...[S]ubstantial evidence has been defined in two ways: first, as evidence of ponderable legal significance ... reasonable in nature, credible, and of solid value [citation]; and second, as relevant evidence that a reasonable mind might accept as adequate to support a conclusion. [The finding must be supported by] ...all relevant evidence in the entire record, considering both the evidence that supports the administrative decision and the evidence against it, in order to determine whether or not the agency decision is supported by "substantial evidence."⁵⁶

Moreover, the Commission's regulations require that all factual evidence be supported by either a signed declaration and/or sworn testimony.⁵⁷

Since claimant has not submitted evidence describing a situation where a school district meets the hypothetical criteria claimant suggests, the record does not support a finding of a state-mandated program. Therefore, the Commission finds that section 17215.5 does not impose a state-mandated activity on school districts within the meaning of article XIII B, section 6.

Education Code section 17213.1: This section, enacted in 1999, lays out the additional requirements⁵⁸ that school districts must satisfy in order to receive funding from the Leroy F. Greene School Facilities Act of 1998.⁵⁹ It requires school districts to contract for a Phase I environmental assessment or if necessary a preliminary endangerment assessment if the school district wishes to request state funding for the facility. These requirements specifically address the study of new school sites for natural, previous or potential releases of hazardous or toxic substances.

When construing a statute, the Commission, like a court, must ascertain the intent of the Legislature so as to effectuate the purpose of the law.

⁵⁵ *Topanga Association for a Scenic Community v. County of Los Angeles* (1974) 11 Cal.3d 506, 515; Government Code section 17559, subdivision (b).

⁵⁶ *Desmond v. County of Contra Costa* (1993) 21 Cal.App.4th 330, 335.

⁵⁷ California Code of Regulations, title 2, sections 1183.03, subdivision (b)(1) and 1187.5, subdivision (b).

⁵⁸ Basic requirements for school siting can be found in California Code of Regulations, title 5, sections 14001-14012 and Education Code section 17251.

⁵⁹ Section 17072.13 provides that a school district may request up to 50% of the cost of implementing this section if it chooses to request funding from the State Funding Program (SFP). If a school district qualifies as eligible for financial hardship under section 17075.10 or if the site meets the environmental hardship criteria in section 17072.13, subdivision (c)(1), then up to 100% of this cost can be requested from the SFP.

In determining such intent, a court must look first to the words of the statute themselves, giving to the language its usual, ordinary import and according significance, if possible, to every word, phrase and sentence in pursuance of the legislative purpose [citation]. At the same time, we do not consider statutory language in isolation [citation]. Instead, we examine the entire substance of the statute in order to determine the scope and purpose of the provision, construing its words in context and harmonizing its various parts [citation]. Moreover, we read every statute with reference to the entire scheme of law of which it is part so that the whole may be harmonized and retain effectiveness [citations].⁶⁰

Section 17213.1's first sentence states, "As a condition of receiving state funding..." The plain meaning of this section is that the requirements in section 17213.1 only apply to school districts that decide to request funding through the Leroy F. Greene School Facilities Act of 1998. Thus, the district's decision to seek funds under this act is discretionary and not mandatory. DOF alleges that approximately 58% of districts do not apply for funding under the 1998 Leroy Greene Act.⁶¹

As stated above, if a district's decision is discretionary, no state-mandated costs will be found.⁶²

Therefore, the requirements imposed on the conditional funding from the Leroy F. Greene School Facilities Act of 1998 are not state-mandated activities, so section 17213.1 is not a reimbursable mandate on school districts within the meaning of article XIII B, section 6 of the California Constitution.

CONCLUSION

The Commission finds that the test claim statutes, Education Code sections 17215.5 and 17213.1, do not impose a reimbursable state-mandated program on school districts within the meaning of article XIII B, section 6 of the California Constitution and Government Code section 17514. This conclusion is based on the following findings:

- 1) For Education Code section 17215.5, the specified findings the school district must make if the proposed school site is on land zoned for agricultural use is not state-mandated because the decision to build a school, as well as where to locate it, including the acquisition of agricultural land for a school, is a discretionary decision left to local school districts by state law.
- 2) For Education Code section 17213.1, the procedures a school district must follow when it seeks state funding pursuant to the Leroy Greene School Facilities Act of 1998 (commencing with Ed. Code, § 17070.10) are not state-mandated because the school district is not required to request state funding under section 17213.1.

FINANCING SCHOOL FACILITIES IN CALIFORNIA

October 25, 2006

Executive Summary

California's system of school facility finance is best described as a partnership between the state and local school districts. The state provides districts with financial support for new school construction and modernization projects through the School Facility Program (SFP), which was established in 1998. The SFP represented a major change in the way the state financed school facilities and was designed to simplify the overall structure of the state's schools facilities program and create a more transparent and equitable funding mechanism. Under the program, new school construction projects are funded on a 50/50 state and local matching basis while modernization projects are funded on a 60/40 basis. Although the program has gone through numerous changes since 1998, the basic structure of the SFP is still in place today. Since 1998, voters in California have approved three statewide bond issues to fund the School Facility Program and are scheduled to vote on a fourth this November. The three bond issues that have passed provided K-12 public schools with \$28.1 billion in state funding for school facility needs. If approved by voters in November of this year, Proposition 1D, the Kindergarten-University Public Education Facilities Bond Act of 2006, will provide an additional \$7.3 billion in state funding. Local school districts finance their share of school construction and modernization project costs primarily with revenue raised through local general obligation bond elections. Since 1998, those local bond elections have provided school districts with an additional \$36 billion to finance school facility improvements.

This study provides a comprehensive review of California's system of school facility finance. In so doing, it attempts to answer five broad questions related to the way California finances its school facility needs: (1) How has the level of school facility funding changed over time and how does it compare to the level of funding in other states; (2) How is the level of school facility funding distributed across school districts; (3) What are the primary causes of inequities in school facility funding across districts; (4) Is facility funding reaching those districts with the greatest facility needs; and (5) How do charter schools obtain funding for school facilities and what are the special issues related to charter school facility finance? This report attempts to answer those questions by reviewing the history of school facility finance in California, documenting California's current system of school facility finance, and examining the level and distribution of school facility funding since 1998.

School Facility Funding has Increased Dramatically in Recent Years

Since the passage of Proposition 1A in 1998, California's system of school facility finance has become more streamlined and the level of support for K-12 school facilities, both state and local, has increased dramatically. As noted above, since 1998 voters have approved \$28.1 billion in statewide general obligation bonds and an additional \$36 billion in local general obligation bonds to support school construction and modernization projects throughout the state. Prior to 1998, spending per pupil on school

facilities in California lagged behind the rest of the nation and even further behind states with similar enrollment growth trends. Since 1998, the level of spending has surpassed the national average and is now comparable to the level found in other states with similar enrollment growth rates.

There are Wide Disparities in School Facility Funding across Districts

Revenue per pupil for school construction and modernization varies widely across districts. For example, in unified school districts the difference between the 75th and 25th percentiles of facility revenue per pupil (total revenue raised over the period 1998-2005 divided by student enrollment) is over \$10,000. Similar disparities in facility funding exist among elementary and high school districts. Part of the variation across districts in facility funding is due to differences in need, another part is due to differences in the ability to pay for school facility projects. In terms of need, districts with higher enrollment growth rates and those that have not invested heavily in school facilities in the recent past tend to have substantially higher revenue per pupil. In terms of ability to pay, districts with higher property wealth also tend to have substantially higher revenue per pupil. In particular, disparities in school facility funding across districts is systematically related to the assessed value of property within districts. Districts with higher assessed value per pupil are able to raise substantially more revenue through local general obligation bond issues and consequently, tend to have substantially higher total revenue per pupil. There also appears to be little relationship between facility revenue and the ethnic composition of districts. If anything, districts with higher concentrations of minority students tend to have higher facility revenue per pupil.

Critically Overcrowded Schools Serve a Disproportionate Number of Disadvantage and Minority Students -- They Also Have Higher Facility Funding

In 2002 the state legislature created the Critically Overcrowded Schools (COS) program to help direct state aid towards districts with the greatest facility needs. The program was funded with \$4.1 billion of Proposition 47 and 55 bond revenue. To qualify for COS program funding, a school must have a student density that is double the density recommended by the California Department of Education. Critically overcrowded schools contain a disproportionate number of disadvantaged and minority students. For example, among schools classified as critically overcrowded the average percentage of students qualifying for free or reduced price lunch is 77%. Among all other schools that percentage is only 45%. Districts that contain critically overcrowded schools also tend to have higher facility revenue per pupil. For example, among the 42 districts that contain critically overcrowded schools, local bond revenue between 1998 and the present averaged \$5,722 per pupil and total revenue per pupil averaged \$11,323. In other districts local bond revenue averaged \$3,825 and total revenue averaged \$9,061. Thus, on average, total revenue per pupil is approximately 25% higher in districts that contain critically

overcrowded schools. Los Angeles Unified, which contains nearly 50% of all critically overcrowded schools, has experienced a particularly large increase in facility funding. In that district, total facility funding per pupil is more than twice the statewide average.

The Facility Dilemma Facing Charter Schools Is Improving but Challenges Still Remain

Since charter schools were first introduced in California in 1993, they have faced significant facility challenges. During the 1990's there were few facility funding options available to charter schools and most charter schools, particularly non-conversion charter schools, faced significant barriers to obtaining adequate school facilities. The facility dilemma facing charter schools began to improve in 2000 when California voters passed Proposition 39. Prior to the passage of Proposition 39, districts were only required to make facilities available to charter schools if such facilities were not currently being used for instructional or administrative purposes or if such facilities had not been historically used for rental purposes. Under the charter school provisions contained in Proposition 39, it became the legal responsibility of school districts to make every reasonable effort to house charter school students in facilities that were essentially equivalent to those used to house other students within the district. Thus, Proposition 39 substantially increased the responsibility of school districts to provide charter schools with adequate school facilities. In recent years a number of grant and loan programs have also been established to help charter schools obtain adequate school facilities. For example, Propositions 47 and 55 contained \$400 million in funding for charter school facilities. Proposition 1D, if approved by voters in November of this year, would provide an additional \$500 million in facility funding for charter schools.

Although the facility dilemma facing charter schools has improved in recent years, challenges still remain. For example, according to a 2002 survey of charter schools conducted by the Rand Corporation, 62% of all charter schools surveyed stated they were struggling to finance their school facility needs. In addition, a 2005 survey of charter schools conducted by EdSource revealed that among the 135 charter schools that submitted Proposition 39 requests for facilities to their districts, 53 or 39% of schools reported they did not receive satisfactory facilities in response to their initial request or through continued negotiations.

1. Introduction

On November 7th of this year, Californians will vote on Proposition 1D, the Kindergarten-University Public Education Facilities Bond Act of 2006. If approved by voters, the Act would provide K-12 public schools with \$7.3 billion in funding for new school construction and modernization projects. It would also represent the fourth such bond issue approved by voters since 1998. Collectively, those four bond issues will have provided \$35.4 billion in state funding for K-12 school facility needs. Local school districts have also been active in securing funding for school facilities: since 1998, local voters have approved over \$36 billion in local general obligation bond issues to finance school facility improvements.

California's willingness to support school construction and modernization efforts comes in the wake of several reports which concluded that underinvestment in school facilities had resulted in a school facilities crisis. For example, according to a 1995 report conducted by the U.S. General Accounting Office, the condition of California's school facilities ranked among the worst in the nation.¹ Furthermore, as recently as 2001, the Legislative Analyst's Office (LAO) reported that about one-third of all schoolchildren in California attended an overcrowded school or one in need of modernization.² To correct those problems, the LAO estimated that state and local governments would need to invest \$30 billion in the near term and significantly more in the future to meet California's ongoing school facility needs.

The purpose of this report is to provide a comprehensive review of California's system of school facility finance. Section 2 reviews the history of school facility finance in California. That chapter borrows liberally from Cohen (1999) who provides an excellent account of how California's system of school facility finance has evolved over time. Unfortunately, that account ends in 1999, just as the state was adopting a new system of school facility finance. Thus, section 2 builds on the work of Cohen by providing a review of California's system of school facility finance from the origins of California statehood to the present. Following that review, section 3 examines how school facility funding in California has changed over time and how it compares to the level of funding in other states. That section shows that school facility spending in California has fluctuated dramatically over time. It also shows that until recently, spending per pupil on school facilities in California lagged behind the rest of the nation. For example, between 1988 and 1996, California spent about 20% less on school facilities than the rest of the nation. The gap in school facility spending was even larger if one compares California to other states with similar enrollment growth trends, such as Texas and Florida. However, since 1998, spending per pupil on school facilities in California has increased dramatically. Facility spending in California now

¹ U.S. General Accounting Office (2005).

² Legislative Analyst's Office (2001).

exceeds the national average and it is as high, if not higher, than the level of spending observed in states with similar enrollment growth.

After providing an historical overview of California's system of school facility finance, Section 4 turns to describing the current system. In particular, the section provides an overview of the School Facility Program which was established in 1998 with the enactment of AB 50 and the passage of Proposition 1A. The section documents the various steps school districts must follow to access state funds for new school construction and modernization projects. It also provides an overview of the Critically Overcrowded School Facilities (COS) program which was established in 2002 to address several concerns about the equitable distribution of Proposition 1A funds.

Sections 5, 6 and 7 turn to examining the level and distribution of school facility funding since the enactment of the School Facility Program in 1998. Section 5 shows that since 1998 state and local governments in California have raised over \$71 billion to fund new school construction and modernization projects throughout the state. State and local general obligation bond revenue accounts for 84% of that revenue with local general obligation bonds being the largest single source of revenue (approximately 53%). The section also shows that school facility funding varies widely across districts. The causes of these wide disparities in funding are the focus of section 6. That section shows that part of the variation in facility funding can be explained by differences in need. Districts with higher enrollment growth, and districts that have not invested heavily in school infrastructure in the recent past, tend to have significantly higher levels of facility funding. However, section 6 also finds that disparities arise from differences across districts in the ability to pay for new school construction and modernization projects. In particular, school facility funding varies systematically with district property wealth. High-wealth districts tend to have significantly higher local general obligation bond revenue per pupil and consequently, significantly higher total revenue per pupil.

Section 7 examines whether districts with the most critical facility needs receive higher levels of facility funding. To date, no comprehensive measure of school facility need is available in California. However, there are two objective measures of need that can be examined: schools that are classified by the California Department of Education as critically overcrowded and schools that operate on a multi-track year-round calendar. Section 7 begins by examining how the characteristics of critically overcrowded and multi-track schools differ from other schools. It then examines how facility funding in districts that contain critically overcrowded or multi-track schools compares to other districts. The section reveals that, compared to other schools, those that are classified as critically overcrowded or operate on a multi-track calendar, tend have significantly higher proportions of disadvantaged and minority students. It also shows that districts that contain critically overcrowded schools tend to receive significantly higher facility funding, particularly Los Angeles Unified.

Section 8 examines school facility funding for charter schools in California. It begins by discussing the unique facility challenges charter schools face and how those challenges have affected their ability to obtain adequate facilities. The section then documents how Proposition 39 impacted the ability of charter schools to obtain adequate school facilities. It also discusses the various sources of revenue that have recently become available to charter schools to finance their school facility needs. The report concludes by summarizing the main findings presented in Chapters 2 through 8 and linking those findings to research reports that have recommended various changes to the current system of school facility finance in California.

2. A History of School Facility Finance

California's system of school facility finance has evolved slowly over time. Up until the mid-1900's, school construction and modernization projects were funded almost entirely with local revenue. State involvement in the system emerged with the creation of the State Allocation Board in 1947, which was directed by the state legislature to allocate state funds for school construction and renovation. Since that time, school facility finance has evolved from a locally-financed system to a system best described as a partnership between local school districts and the state. This section describes the history of school facility finance in California and documents the various programs that have been used to finance K-12 facilities.

From the early days of California statehood until 1933, state involvement in school facility finance was restricted to providing land grants to local communities for the purpose of establishing public schools. The State Constitution of 1849 mandated the state legislature to "encourage by all suitable means the promotion of intellectual, scientific, moral and agricultural improvement."³ The Constitution set aside large tracts of public land for the creation of public schools and mandated that every district in the state operate a public school for at least three months a year. The construction and renovation of these schools was financed entirely with local tax revenue.⁴ In 1879, the California State Constitution was revised and school districts were granted the authority to issue bonds to finance school construction projects, subject to the approval of two-thirds of voters within the district. Local bonds were repaid with property tax revenue raised from a special tax assessment on all property located within a school district. School districts could issue additional bonds up to their debt capacity level which was set at 1.25 percent of assessed value for elementary and secondary districts and 2.5 percent for unified districts. From that

³ Constitution of the State of California, 1849. Text obtained from California State Archives: http://www.ss.ca.gov/archives/level3_const1849txt.html

⁴ During the early years of California statehood, state aid for education was limited to support for teacher salaries. Districts built schools when they could raise enough tax revenue or when civic-minded residents volunteered their time and resources to build a school. (Falk, 1968).

time forward, proceeds from local school bond elections became the primary source of local revenue for school construction projects.

The state first became involved in school construction and renovation activities in 1933, following the Long Beach earthquake. The earthquake, which struck just hours after classes ended on March 10th 1933, caused numerous school buildings in Long Beach and surrounding communities to collapse and provoked “public outcry over the vulnerability of school building to earthquake-related damage.”⁵ In response, the state legislature passed the Field Act on April 10th 1933.⁶ The Act mandated the Division of the State Architecture (DSA) to develop earthquake-resistant design and construction for all public schools in the State. It also required architects, engineers and inspectors to file reports verifying that schools were in compliance with the provisions of the Field Act.⁷ Thus, state involvement in school construction and renovation began with state oversight of construction design and mandatory construction inspections. Although the Field Act has been updated overtime, the basic structure of the Act is still in place today.⁸

The post-World War II baby boom caused a surge in student enrollment in California which in turn led to a public school “building boom” starting in the late 1940’s.⁹ From the late 1940’s to the early 1960’s, schools were built in record numbers.¹⁰ In the late 1940’s the State Legislature recognized that school districts would need financial assistance to house California’s growing number of students. In response, the state legislature established the State Allocation Board in 1947 and charged the board with allocating state funds for the construction and renovation of schools.¹¹ In addition to its allocation role, the Board is also responsible for establishing policies and regulations for the programs it oversees.

In 1949, the Legislature passed the State School Building Aid Law which was designed to provide assistance to school districts for the construction and acquisition of new school facilities. To secure funding for the new program, California’s first statewide school bond initiative, Proposition 1, was placed on the November 1949 statewide ballot and approved by voters. The proposition authorized the sale of \$250 million of state bonds for the purpose of providing school districts with funds for new school construction and improvement. The State School Building Aid Law of 1949 was set up as a loan program. To enter the program, a district had to be bonded to capacity and obtain voter approval to

⁵ Heumann (2002), p. 9.

⁶ The Field Act was named after California State assembly member Charles Field who spearheaded the legislation.

⁷ State of California Seismic Safety Commission (December 2004), p. 6.

⁸ For a complete description of the Field Act see the California education code section 17280-17317.

⁹ From 1950 to 1960, student enrollment in California doubled from a total enrollment of 1,689,425 in 1950 to a total enrollment of 3,368,101 in 1960. (California Department of Education, Enrollment Reports for 1950 – 1979).

¹⁰ According to EdSource, most of California’s schools were built during this period.

¹¹ The State Allocation Board consists of ten members: the Director of the Department of Finance, the Director of the Department of General Services, the Superintendent of Public School Construction, one person designated by the Governor, three State Senator, and three State Assembly Members.

accept a state loan. Districts were then required to maintain a property tax rate equivalent to the rate necessary to finance general obligation bonds at the district's debt capacity level. After 30 years, if the state loan was not fully repaid, any outstanding balance was forgiven.¹²

For the next two decades, California's system of school facility finance remained relatively unchanged: school districts provided most of the funds for new school construction and the state provided limited assistance via loans for the State School Building Aid program.¹³ Between 1952 and 1966, California voters approved 7 statewide school bond initiatives, which provided \$1.54 billion for the State School Building Aid program. Throughout this period, state aid was limited to loans that could only be used for the purpose of new school construction. School districts wishing to renovate or modernize existing school facilities had to finance those renovations with local revenue.

By the late 1960's, many of California's schools were over 20 years old and in need of renovation. Recognizing this need, the state legislature in 1966 declared that it was in the "interest of the state and the people thereof to provide assistance to school districts in rehabilitating or replacing structurally unsafe school facilities."¹⁴ In 1968, state assistance for the modernization of urban schools built prior to 1943 was added to the education code.¹⁵ Further changes to California's system of school facility finance began to emerge in the early 1970's. In response to damage caused by the 1971 San Fernando earthquake, the legislature designed a new program to provide funding for earthquake-damaged schools and schools that were not in compliance with the Field Act. The new program was funded with revenue from two statewide school bond initiatives: the School Building and Earthquake Reconstruction and Replacement Bond Law of 1972, which provided \$350 million for the construction and renovation of schools, and the State School Building Aid and Earthquake Reconstruction and Replacement Bond Act of 1974, which provided an additional \$150 million.¹⁶ While most state aid to school districts remained in the form of loans, the new legislation included provisions to forgive loans for school districts that had reached their bonding capacity and also provided grants to school districts that would otherwise not be eligible for funding. Thus, by the early 1970's, state involvement in school facility finance had expanded to include aid for school renovation and modernization and the role of the state had begun to change from one of a primary lender to one of a grantor.

¹² California Education Code, State School Building Aid Law, 1949, Section 15738.

¹³ The State School Building Aid Law of 1949 was updated when the State School Building Aid Law of 1952 was passed by the state legislature. While more detailed, the new program retained the same basic structure of its predecessor.

¹⁴ California Education Code, School Housing Aid for Rehabilitation and Replacement of Structurally Inadequate School Facilities, Section 16312.

¹⁵ California Education Code, Urban School Construction Aid Law of 1968, Sections 16700-16734.

¹⁶ In November 1972, California voters also passed Proposition 9, the Bond Vote for Structurally Unsafe School Buildings. The proposition allows districts to issue general obligation bonds, subject to the approval of a simple majority of voters (rather than a super-majority) for the purpose of repairing or replacing structurally-unsafe school buildings.

In 1976, the state legislature enacted the Leroy Greene State School Building Lease-Purchase Law. The law established a fund to provide loans to school districts for both new construction and modernization. Eligibility for new construction funding was based on housing capacity. To qualify, a district had to demonstrate that existing seating capacity was insufficient to house either current student enrollments or anticipated student enrollments based on a 5-year projection of enrollment growth. To qualify for modernization funding, a school building had to be at least 30 years old, or in the case of a portable classroom, at least 20 years old. The new program also established a system of “priority points” for the allocation of state funds. In the original 1976 legislation these priority points depended on factors such as the number of unhoused students, projected enrollment growth rates and the degree of renovations necessary.¹⁷ Although the Lease-Purchase Program was signed into law in 1976, funding for the new program was never approved by voters: in June of 1976 voters rejected a \$200 million state bond initiative that was designed to fund the new program. At first, the lack of funding appeared to be of little consequence. Between 1970 and 1982, student enrollment in California’s public schools was declining and hence there was little demand for state funds. Things began to change, however, following the passage of Proposition 13 in June of 1978.

The passage of Proposition 13 shifted the primary responsibility for financing new school construction and modernization from local school districts to the state. By prohibiting property tax overrides to fund local general obligation bonds, Proposition 13 eliminated the primary source of local revenue for new school construction and modernization. Consequently, in the aftermath of Proposition 13, school districts were forced to turn to the state to meet their school facility needs. The state legislature responded to Proposition 13 by turning the Lease-Purchase Program into what essentially amounted to a grant program. School districts that chose to participate entered into a 40-year lease-purchase agreement with the state, with payments of \$1 per project per year. Although school districts were expected to contribute up to 10% of a project’s cost, many school districts could no longer raise the required match and thus asked the State to fund their entire projects.¹⁸ The increased demand for state funding, coupled with the fact that in June of 1978, voters once again rejected a statewide bond initiative designed to fund the Lease-Purchase Program, led to a large shortfall in funding for new school construction and modernization.

The state legislature responded to the need for school facility funding in a number of ways. First, in 1982 and then again 1984, it placed school bond initiatives on the statewide ballot. Voters approved both initiatives, which collectively provided the Lease-Purchase Program with \$950 million. Second, in 1982, the state legislature passed legislation allowing school districts, for a ten year period, to pay just 1

¹⁷ Cohen (1999), p. 12.

¹⁸ Cohen (1999), p. 13.

percent of the costs of state-funded projects rather than the 10 percent required in the original 1976 Lease-Purchase Program legislation. Third, in 1982, the state also implemented the Mello-Roos Community Facilities District Act. The Act allows school districts to create Community Facility Districts (CFD's) within the boundaries of the district to fund new school construction. The owners of land within the boundaries of a CFD are assessed a special tax to finance new construction projects. The tax must be approved by two-thirds of the voters within the proposed CFD or, when the district has fewer than 12 property owners, by majority vote of the owners.¹⁹ Fourth, to reduce the costs associated with school construction projects, in 1983 the state legislature passed legislation (Chapter 498, Statutes of 1983) giving districts a financial incentive to place students into a multi-track year-round education (MTYRE) program. Districts that participated in the program were eligible for a grant of up to 10 percent of the cost that would have been necessary to build a new facility to house the students.²⁰

By the mid-1980's however, it became apparent that these measures were not sufficient to meet the growing facility needs of school districts. Student enrollment in California had begun to grow again in the 1980's, creating further pressure on the state for increased facility funding. In addition, both the federal and California state governments passed asbestos removal legislation in 1986, which led to an increase in the number of applications for modernization and rehabilitation funding. By June of 1986, the State Allocation Board had received applications for funding that totaled nearly \$2.3 billion.²¹ To meet the ever-growing demands on the Lease-Purchase Program, the state legislature placed seven statewide bond initiatives on the ballot between 1986 and 1992. All seven of the bond initiatives passed, providing the state with an additional \$6.8 billion for school facility projects. Voters and the state legislature also passed a number of new programs designed to reinstate the authority of local school districts to raise revenue for new school construction and modernization. In June of 1986, voters passed Proposition 46, which reestablished the authority of local school districts to issue general obligation bonds, subject to the approval of two-thirds of the voters within a district. Also in 1986, the state legislature approved AB 2926 which authorized school districts to directly impose developer fees to finance new school construction. Developer fees could only be imposed on new industrial, commercial, or residential development. Furthermore, the maximum fee a district could impose was set at \$1.50 per square foot for residential development and \$0.25 per square foot for commercial and industrial development.²²

¹⁹ Rivasplata (1997), p. 42.

²⁰ Cohen (1999), p. 14.

²¹ Cohen (1999), p. 15.

²² While fees were capped in theory, some school districts managed to find ways around the caps. In particular, several school districts argued that the caps only applied to the school district rate. As a result, they petitioned their city and/or county governments to impose additional fees, leading to a total fee that exceeded the cap of \$1.50 per square foot for residential property and \$0.25 per square foot for commercial property. The cases led to three

As the 1990's unfolded, demands on the Lease-Purchase Program continued to mount. Attempts to conserve limited resources led the state legislature and the State Allocation Board to implement numerous changes to the program. In 1990, a new priority system was implemented, based on when an application was received and a complex set of additional priorities. One year later, the priority system was changed to include six priorities of funding. A district was given priority 1 funding status if the district covered at least 50% of the project costs with local funds and had a substantial enrollment in year-round schooling programs. Priority 2 status was granted if the district requested 100% state funding of the project and had a substantial enrollment in year-round schooling programs. Districts received lower priority if they did not have substantial enrollment growth, were not requesting funds for a year-round schooling project, or were requesting 100% funding from the state. Due to the limited funding available from the state, the vast majority of projects that received funding were either priority 1 or priority 2 projects. In 1996 the priority system was changed yet again to take into consideration new class-size reduction legislation and finally, in 1997, the priority system was replaced altogether by a first-come first-served system.²³ Despite these numerous changes to the Lease-Purchase Program and the passage of another \$3 billion statewide bond initiative in March 1996, the backlog of projects faced by the State Allocation Board remained at approximately \$6 billion at the end of 1996.

In November 1998, the legislature passed SB 50, The Leroy Greene School Facilities Act of 1998. The legislation replaced the Lease-Purchase Program of 1976 with a new program called the School Facility Program (SFP). The new state program was funded with bond revenue from Proposition 1A, a \$9.2 billion state bond initiative approved by voters in November of 1998. The initiative provided \$6.8 billion for K-12 school construction projects over a four-year period. Specifically, the bond included \$2.9 billion for new school construction, \$2.1 billion for modernization, \$1 billion for districts facing financial hardship, and \$700 million for class-size reduction projects. The School Facilities Program represents a major change in the way the state finances school facilities. Under the new program, state funding for new school construction and modernization is provided in the form of per-pupil grants with supplemental grants available for site development, site acquisition and other site-specific costs.²⁴ New school construction projects are funded on a 50/50 state and local matching basis while modernization projects are funded on a 60/40 state and local matching basis.²⁵ The SFP also implemented numerous reforms to the old Lease-Purchase program that were designed to stream-line the application process, simplify the overall structure of the state school facilities program, and create a more transparent and

separate law suits in which the courts ultimately upheld the practice. The three decisions collectively became known as the Mira-Hart-Murietta decisions.

²³ Cohen (1999), p. 17.

²⁴ School Facility Program Handbook (February 2006), p. 1.

²⁵ Under the original 1998 legislation, modernization projects were funded on an 80/20 state and local matching basis. The matching rate was reduced to a 60/40 state and local basis following the passage of AB 16 in 2002.

equitable funding mechanism. In his excellent review of the history of school facility finance in California and the role of the State Allocation Board, Joel Cohen notes:

Historically, the process by which schools applied for and received construction funds was cumbersome and complex. Furthermore, the research suggests that school districts that were sophisticated and knowledgeable about the complicated school facilities construction process were the most successful in securing funding – often at the expense of less sophisticated and uninformed school districts. Proposition 1A corrects much of this dynamic by simplifying the application and administrative processes, thereby creating a more level playing field for all school districts.²⁶

The basic structure of the School Facilities Program remains in place to this day and is discussed in detail in section 4.

While the Leroy Greene School Facilities Act of 1998 (henceforth SB 50) was designed to streamline and simplify the process for allocating state funds, it wasn't long before the new program was called into question. In March of 2000, the *Godinez v. Davis* lawsuit was filed in the Los Angeles Superior Court on behalf of a group of parents and students from the Los Angeles Unified School District. The suit contended that the method by which Proposition 1A funds were allocated discriminated against large urban school districts. Among other things, the lawsuit called into question the priority point system the State Allocation Board (SAB) used to allocate Proposition 1A funding. The original SB 50 legislation required the SAB develop a priority point system, based upon the percentage of currently and projected unhoused pupils, to allocate state funds once those funds became insufficient to fund the applications submitted by school districts.²⁷ In 1999, AB 562 was enacted to make the timing of implementing priority points more specific. The new legislation required that the system of priority points must be implemented once either of the following two conditions were met: (1) funds necessary to fund approved applications exceed funds available, or 2) only \$300 million remains in new construction funding.²⁸ In the case of *Godinez v. Davis*, the plaintiffs argued (among other things) that in large urban districts, it took longer to file a formal application for reasons beyond the direct control of the district and since the SAB allocates funds only to those districts that have filed a formal application for funding, the funding process put large urban districts at a disadvantage. In essence the plaintiffs argued that, even though large urban districts were “high need” districts, and thus should receive a high priority for state funding, the state funding process placed such districts at a disadvantage since it took them longer to file applications. In August of 2000, Judge Yaffe, the presiding judge in the *Godinez* case, ruled that the State

²⁶ Cohen (1999), p. 1.

²⁷ Up until the point where state funds became insufficient, Proposition 1A funds were allocated on a first-come first-served basis.

²⁸ Coalition for Adequate School Housing, News Archives, July 11, 2001.

Allocation Board was not apportioning funding in accordance with AB 562 and ordered the SAB to develop rules that would provide greater funding opportunities for high need districts such as LA Unified.²⁹

In response to the court's ruling, the SAB adopted a revised priority system in December of 2000. The new system set aside \$450 million of remaining Proposition 1A funding for high-priority urban districts until August of 2002. It also required that the remaining \$1 billion in new construction funding be released on a quarterly rather than monthly basis at the rate of approximately \$125 million per quarter and that those funds be allocated to projects based upon their priority point order. As a result of these changes, the *Godinez* plaintiffs agreed not to pursue any further litigation.

Around the same time *Godinez v. Davis* was first making its way through the courts, plaintiffs in *Williams v. State of California* filed a class-action lawsuit in the San Francisco Superior Court. Among other things, the plaintiffs argued that the state failed to provide students with equal access to safe and decent school facilities, particularly low-income students and students of color. Specifically, the plaintiffs argued that disadvantaged and minority students were more likely to be housed in facilities with "extremely hot or cold classrooms, unkempt or inadequate bathroom facilities, and unrepaired and hazardous facilities such as broken windows, vermin infestations, leaky roofs, or mold."³⁰ In August of 2004, the state agreed to a settlement. As part of that settlement, the state agreed to dedicate \$800 million in funding for emergency repairs for low-performing schools.³¹

To address some of the problems encountered after the first round of funding for the new School Facility Program, the state legislature enacted AB 16 in April of 2002. AB 16 added to the SFP a new program called the Critically Overcrowded Schools program. The program allowed districts with schools that were classified by the California Department of Education as critically overcrowded to reserve state funding for new school construction for a period of up to four years. Thus, the Critically Overcrowded Schools program allowed districts such as LA Unified, who argued it took them longer to file applications for funding, to reserve state funds prior to submitting an application for funding.³² AB 16 also put before voters two new statewide school bond issues: Proposition 47 and Proposition 55. The two bond issues, which were respectively approved by voters in November of 2002 and March of 2004, provided an additional \$21.4 billion in state funding for school facility projects. The bonds include \$4.8 billion to

²⁹ Building Industry Association of Southern California, February, 2001.

³⁰ Pastor and Reed (2005), p. 22.

³¹ The settlement requires the state to allocate \$800 million to a new School Facilities Emergency Repair Account which will reimburse districts for emergency repairs. Only schools ranked in the bottom three deciles of the 2003 Academic Performance Index (API) are eligible for emergency repair funding.

³² Other significant elements of AB 16 were the creation of a Joint-Use Program and the elimination of priority points for new school construction and modernization projects. In essence, the need for a priority point system was eliminated by the creation of the Critically Overcrowded Schools program.

fund previously-approved projects that did not receive Proposition 1A funding, \$4.1 billion for the Critically Overcrowded Schools program, \$3.7 billion for school modernization projects and \$8.8 billion for new school construction.³³

In addition to passing two of California's largest school bond initiatives, in November of 2000 California voters also passed Proposition 39, the Smaller Classes, Safer Schools and Financial Accountability Act. The Act allowed a district to issue local general obligation bonds subject to the approval of 55 percent of voters (rather than two-thirds voters), conditional on several accountability requirements. Specifically, the Act required school districts to set up a citizen's oversight committee to ensure bond proceeds were allocated properly. It also required school districts provide a list of specific projects to be funded with any bond revenue and to conduct annual performance and financial audits. Districts seeking to avoid these requirements may still ask their electorate to approve a bond issue but any such bonds must be approved by a two-thirds majority rather than a 55 percent majority.

Proposition 39 also had ramifications for School Facility Improvement Districts (SFID's) which consist of a portion of the territory within a school district. Similar to school districts, SFID's can issue general obligation bonds for new school construction subject to the approval of voters within the SFID. The state legislature authorized the establishment of SFID's in 1998 to address a problem faced by districts that currently had a Mello-Roos Community Facility District (CFD) within their boundaries.³⁴ Since voters within a CFD were already being taxed to support school facilities within their CFD, the passage of a district-wide general obligation bond issue would lead to the double taxation of residents within the CFD.³⁵ Up until 2002, the issuance of general obligation bonds by a SFID required the approval of two-thirds of voters within the SFID. Senate Bill 1129, which became effective on January 1st of 2002, permits SFID's to hold a Proposition 39 school bond election and therefore issue bonds subject to the approval of 55 percent of voters.

Looking towards the future, the Office of Public School Construction estimates that even after all Proposition 47 and 55 funds are depleted by 2007, the state will need an additional \$6.8 billion to fund its portion of new school construction and modernization projects.³⁶ As a result, the state legislature enacted AB 127, the Kindergarten-University Public Education Facilities Bond Act of 2006, in May of 2006. The legislation provides for a new statewide bond issue of \$10.4 billion dollars to fund K-12 and higher education facility needs. If approved by voters in November of 2006, the legislation would provide K-12

³³ de Alth and Rueben (2005).

³⁴ SFID's were first established by the state legislature in 1994 but no SFID's were formed in response to the legislation. Subsequent legislation in 1996 and 1997 broadened the potential use of SFID's and the first SFID was established in 1998. As of June of 2006, 25 SFID elections had been held of which 13 were successful.

³⁵ SFID's can only be established in districts that currently have a CDF within in their boundaries and they may not include the territory of the CFD.

³⁶ Notes from the Assembly Education Committee, Education Infrastructure Hearing #1, January 25, 2006.

public schools with \$1.9 billion in funding for new school construction project, \$3.3 billion for modernization projects, \$500 million for charter school facilities, \$1 billion for severely overcrowded schools, \$500 million for career technical facilities, and \$129 million for other projects.

3. Changes in School Facility Funding over Time and Comparisons to other States

As the previous section makes clear, California's system of school facility finance has changed frequently over time. This section documents how the numerous changes to the system, and the cyclical nature of statewide school bond initiatives, have affected the level of school facility funding over time. It also documents how spending on school infrastructure in California compares to the rest of the nation and individual states with similar enrollment growth trends.

Figure 1 documents the historical trend in per-pupil school facility spending in California from 1960 to the present.³⁷ Spending levels are adjusted for inflation with 2005 as the base year. As the figure makes clear, facility spending has fluctuated quite dramatically over time. From 1960 to 1982, spending per pupil on school facilities declined rather continuously, with brief upswings that correspond to the passage of statewide school bond initiatives. Part of this decline is directly related to changing demographics and a natural pattern of infrastructure finance; i.e., periods of heavy investment in infrastructure reduce the need for further investment for a period of time. For example, the decline in school facility spending that occurred during the 1960's was a natural response to the large investment in school facilities that was made during the "building boom" of the late 1940's and 1950's. Similarly, the decline in spending that occurred during the 1970's was partly due to the decline in student enrollment that occurred over that time period.

Figure 1 also illustrates that California experienced a dramatic decline in facility spending between 1978 and 1984, the period during which Proposition 13 prohibited local school districts from issuing local general obligation bonds. Since 1984, facility spending has risen rather continuously, with brief declines occurring when little or no statewide bond revenue was made available. The rise in spending that occurred during the 1980's was primarily driven by three factors: the rise in student enrollments that began in the early 1980's, the passage of Proposition 46, which reestablished the authority of local school districts to issue general obligation bonds, and the passage of AB 2926 which authorized school districts to levy developer fees. The dramatic rise in facility spending that has occurred since 1996 is primarily due to the passage of large statewide bond initiatives in 1996, 1998, 2002 and

³⁷ Data on school facility spending over time was obtained from annual school finance records prepared by the California Department of Education. Specifically, data from 1960 to 1986 comes from annual reports on the "Financial Transactions Concerning School Districts in California," while the data from 1987 to 2005 comes from J200 and SACS accounting records prepared by the California Department of Education.

2004, and the passage of Proposition 39 in 2000 which lowered the vote requirement on local general obligation bonds to 55%.

The impact of recent increases in school facility spending is further illustrated in Tables 1 and 2, which document the history of K-12 state and local general obligation bond initiatives in California. Table 1 summarizes the history of statewide school bond initiatives. For each time period listed in column 1, columns 2 through 6 give the number of bond issues proposed, the number of bond issues that passed, the total amount proposed, and the total amount that was ultimately passed measured in both current and constant 2005 dollars.³⁸ As the table reveals, 26 statewide bond elections have been held in California since 1949 and of those, all but three have been approved by voters. Measured in constant 2005 dollars, these bond issues have collectively made available over \$56 billion for school construction and modernization. Of this \$56 billion, \$33.52 billion, or nearly 60%, was approved by voters since 1996 and \$23.3 billion, or approximately 41%, was approved by voters since 2001 and the passage of Propositions 47 and 55.

Table 2 provides the same information as Table 1 for local school bond initiatives. Since 1986, California school districts have held a total of 1,215 local general obligation bond initiatives. Of those, 760, or approximately 63%, have been approved by voters. Measured in constant 2005 dollars, these local initiatives have raised over \$51 billion for school construction and modernization projects. Table 2 also makes apparent the impact of Proposition 39 on the passage rate of local school bond initiatives and the amount raised through these initiatives. Between 1996 and 2000, the period just prior to the passage of Proposition 39, approximately 63% of local school bond initiatives were approved by voters. In contrast, between 2001 and 2005, voters approved 80% of the bond issues they were asked to support. The amount raised locally through bond initiatives has also increased dramatically since the passage of Proposition 39. In the five year period just prior to the passage of Proposition 39, voters approved \$16.4 billion in local general obligation bonds (measured in constant 2005 dollars) in 282 elections. In the five year period following the passage of the proposition, voters have approved over \$28 billion in local G.O. bonds in 285 elections. In fact, approximately 55% of all local bond revenue approved by voters since 1986 has been approved since the passage of Proposition 39.

Although school facility spending has risen dramatically since 1996, it remained below the national average until 2000. Figure 2 compares school facility spending per pupil in California with spending per pupil in the rest of the U.S between 1988 and 2004.³⁹ Spending levels are adjusted for

³⁸ Information on statewide school bond initiatives was obtained from the Los Angeles County Law Library's, "Guide to California Ballot Propositions." <http://lalaw.lib.ca.us/ballot.html>.

³⁹ Data on K-12 School facility spending in the U.S. comes from the U.S. Department of Commerce, Bureau of the Census, Annual Survey of Local Government Finances. Annual facility spending is measured as the sum of total

inflation, with 2005 as the base year. On average, between 1988 and 1996 California spent about 20% less on school facilities per pupil than the rest of the nation. With the passage of two large statewide bond initiatives in 1996 and 1998, spending per pupil in California began to rise relative to the rest of the nation. Since 2000, and the passage of Propositions 39, 47, and 55, school facility spending in California has risen above the national average.

Table 3 compares school facility spending in California with spending in other states between 1988 and 2004. For each time period listed in column 1, columns 2 through 8 respectively give the average level of facility spending in the U.S. except California, in California, and in five other states with enrollment growth similar to California. All spending levels listed in Table 3 are adjusted for inflation and measured in constant 2005 dollars. As the table reveals, prior to 2001, California consistently spent less per pupil on K-12 school facilities than other states with similar enrollment growth trends.⁴⁰ For example, between 1988 and 1992 California spent about \$100 less per pupil on school facilities than Texas. Similarly, between 1997 and 2000 it spent about \$260 less per pupil than Texas. Between 2001 and 2004, however, spending per pupil on school facilities in California had reached or exceeded the spending levels observed in other states with similar enrollment growth. Nevertheless, despite the recent up-tick in spending, spending per pupil on school facilities over the entire time period still lags behind the level observed in other states. For example, between 1988 and 2004, spending per pupil in California averaged \$818 while it averaged \$1,172 in Florida and \$963 in Texas.

In summary, between 1960 and 1982, spending per pupil on school facilities in California was consistently falling. Although spending per pupil has risen ever since, throughout the 1980's and 1990's it remained below the national average, and even farther below the level found in states with similar enrollment growth trends. Since 1998, spending per pupil in California has increased dramatically so that spending on school facilities in California is now higher than the national average and it is as high, if not slightly higher, than the spending levels observed in states with similar enrollment growth trends. With that in mind, the next section turns to a discussion of California's current system of school facility finance.

4. The Current System of School Facility Finance

California's current system of school facility finance is best described as a partnership between the state and local school districts. The state provides funding for school facility projects via the School Facility Program (SFP), which is subdivided into five major programs: the New Construction Program,

state and local capital expenditures. Prior to 1988, data on capital outlays by state and local governments for K-12 education were not reported in a consistent manner. As a result, the analysis begins in 1988.

⁴⁰ Carroll, et. al. (2005) show that between 1990 and 2000 California also spent less per pupil on school facilities than the four other most populous states, namely, Texas, New York, Florida, and Illinois.

the Modernization Program, the Critically Overcrowded Schools (COS) program, the Joint-Use Projects program, and the Charter School Facilities program. With the exception of the Modernization Program, all these state programs are funded on a 50/50 state and local matching basis. The Modernization Program is funded on a 60/40 state and local matching basis. Local school districts finance their share of school facility projects with funding obtained primarily from two sources: local general obligation bonds and developer fees. Thus, the current system is designed to be a collaboration between the state and local school districts, with each entity providing a portion of the costs associated with any given new construction or modernization project. This section describes the major programs the state uses to fund school facility projects and delineates the various steps school districts must complete to obtain state funding.⁴¹

Overview of the SFP Program

In order to obtain funding for new school construction and modernization projects, school districts must interact with, and obtain approval from, a number of state agencies. These include the State Allocation Board (SAB), the Office of Public School Construction (OPSC), the Division of the State Architect (DSA) of the Department of General Services, the School Facilities Planning Division (SFPD) of the California Department of Education, the Department of Toxic Substance Control (DTSA), and the Department of Industrial Relations (DIR).

As mentioned previously, the SAB is responsible for approving all state apportionments for new school construction and modernization projects. The board meets monthly to review applications for funding, act on appeals, and implement policies associated with the School Facility Program. The OPSC is the administrative arm of the SAB. Its primary responsibilities include: allocating state funds for projects approved by the SAB, reviewing eligibility and funding applications, and providing information and assistance to school districts. The DSA has been involved in the process of school construction since the Field Act was first passed in 1933. The primary responsibility of the agency is to review and approve construction plans and to ensure those plans are in compliance with the Field Act. DSA approval is required for all new school construction and modernization projects. The primary role of the School Facilities Planning Division (SFPD) is to approve school district site and construction plans. The agency reviews the “educational adequacy” of proposed projects to ensure they meet the needs of students and teachers. The agency also works with the Department of Toxic Substance Control to review any potential environmental hazards associated with a project. The final agency involved in the process is the Department of Industrial Relations (DIR). The primary responsibility of this agency is to ensure that

⁴¹ This section focuses on the New Construction Program, the Modernization Program, the Critically Overcrowded Schools program and the Joint-Use Projects program. Section 8 contains a detailed description of the Charter School Facilities program.

school districts are in compliance with labor laws relating to contractors and employers. Before any funding from the SFP is released to a school district, the district must obtain certification that its Labor Compliance Program has been approved by the DIR.

The School Facility Program provides funding for two major types of school construction projects: new school construction and modernization. The process of obtaining state funding is divided into two steps: an application for eligibility and an application for funding. Applications for eligibility are reviewed by the OPSC and then presented to the SAB at one of their monthly meetings for approval. Upon receiving approval from the SAB, a district may request funding by submitting a funding application to the OPSC. The funding application must include supporting documentation that shows that the district's plans for construction have been approved by the DSA and the SFPD. The completed funding application is reviewed by the OPSC and then submitted to the SAB for a funding apportionment. Funds apportioned by the SAB are released once the district has provided evidence that it has secured funding for required local matching funds (50% of new school construction projects costs and 40% of modernization project costs), and evidence that it has entered into a binding contract for at least 50% of the proposed construction project. Figure 3 illustrates the steps districts must follow to obtain funding for either new school construction or modernization projects.⁴²

As noted in the previous section, the SFP was designed to stream-line the application process and simplify the overall structure of the state's school facilities program. According to the Office of Public School Construction (OPSC), most funding applications can now be reviewed and receive final approval from the State Allocation Board within 60 to 90 days. Relative to the old Lease-Purchase Program, the SFP also involves less project oversight by the state and allows districts considerable independence in determining the scope of any new school construction or modernization project. However, this greater independence comes at a potential cost; all state grants are considered to be full and final apportionments by the SAB. Thus, districts are now responsible for any cost overruns or unanticipated costs associated with a project. Under the old Lease-Purchase Program, some of those costs were reimbursed by the state.

Establishing Eligibility

To obtain state funding for new school construction projects, districts must first demonstrate that existing seating capacity is insufficient to house existing students or anticipated students using a five-year projection of enrollment. Districts may establish eligibility on a district-wide basis or, if only some areas within the district are facing capacity constraints, on a High School Attendance Area (HSAA) basis. Establishing eligibility involves three steps. In the first step, form SAB 50-01 is used to compute a five-year enrollment projection based on current and historical enrollment figures. Districts that are

⁴² Figure 3 is adopted from a schematic created by Abel et. al. (Winter 2004/2005), p. 11.

experiencing rapid residential growth may supplement these enrollment projections using information on the number of unhoused students that are anticipated as a result of new residential development. To do so, the district must submit to the OPSC either approved or tentative valid tract maps that show the size and density of proposed new developments.⁴³ In the second step, form SAB 50-02 is used to compute a district's existing capacity based on an inventory of the number of existing classrooms (or space that could be used as a classroom). Pupil capacity is computed by multiplying the number of existing classroom spaces by a load factor of 25 for elementary classrooms, 27 for middle and high school classrooms, 13 for non-severely disabled classrooms, and 9 for severely disabled classrooms. In the third step, form SAB 50-03 is used to determine eligibility. Existing pupil capacity is subtracted from projected enrollment to determine the number (if any) of unhoused students. The number of students computed to be unhoused represents the district's eligibility for new school construction grants.

The eligibility requirements for modernization projects are less complex. The eligibility application for modernization projects consists of a single form, SAB 50-03. To qualify for funding, a school building must be at least 25 years old or, in the case of a portable classroom, at least 20 years old. In addition, districts may submit applications for modernization projects on a site by site basis, rather than the district or HSAA-wide basis used for new school construction eligibility.

Applying for Funding

New school construction projects are funded by the state on a per-pupil basis. The amount of the grant is determined by multiplying the number of unhoused students (determined in the eligibility phase), by a per-pupil grant that is adjusted annually by the SAB to account for changes in construction costs.⁴⁴ The current grant amounts per unhoused pupil are listed in Table 4. Supplemental grants are also available to fund special project needs. The most common supplemental grants are site acquisition grants and site development grants, which respectively cover costs associated with purchasing a site and preparing a site for construction.⁴⁵ Site acquisition and development grants are made on a 50/50 state and local matching basis.

The funding application for new school construction consists of a single form, SAB 50-04. While the form itself is relatively simple, districts must also file with their application a number of supporting

⁴³ In 2005, the legislature enacted AB 491 which provides districts with an alternative enrollment projection. Districts that do not meet the standard criteria for eligibility may still be eligible for funding if they meet the following two criteria: (1) the district has two or more school sites with a pupil population density greater than 115 pupils per acre for elementary schools and 90 pupils per acre for middle and high schools, and (2) the district can not meet its housing needs at the impacted site after considering all existing eligibility mechanisms.

⁴⁴ The SAB uses the Class B construction Cost Index to annually update the per-pupil grants.

⁴⁵ Other supplemental grants include: fire code requirements, energy efficiency, special education, multi-level construction, project assistance, replacement with multi-story construction, geographic location, small size projects, new school projects, urban locations. For a detailed description of these supplemental grants see the School Facility Handbook.

documents. These include: (1) an appraisal, escrow closing statement or court order and a CDE site approval letter if the project involves site acquisition, (2) DSA approval of construction plans, (3) CDE approval of final plans, and (4) a set of district certifications that include (among other things) the establishment of a restricted maintenance account,⁴⁶ certification that the district will fund its share of the project, and certification that the district's Labor Compliance Program has been approved by the Department of Industrial Relations.

Modernization projects are also funded by the state on a per-pupil basis. The amount of the grant is determined by multiplying the number of students to be housed in a modernized building by a per-pupil grant that is adjusted annually by the SAB to account for changes in construction costs. Table 5 lists the per-pupil grant amounts for modernization projects. The funding application process for modernization projects is very similar to the process for new school construction. The application process consists of a single form, SAB 50-04, and a set of supporting documents that ensure the district has obtained DSA and CDE approval for its construction plans and obtained the requisite certifications. These certifications include: the establishment of a restricted maintenance account, verification that the building to be modernized was not previously modernized under the old Lease-Purchase Program, evidence that the district has obtained funding to meet its required 40% match for project costs, and approval from the DIR for the district's Labor Compliance Program.

Financial Hardship

School districts unable to contribute some or all of the local matching funds required for new school construction and modernization projects may apply to the OPSC for financial hardship status. If financial hardship status is granted, districts can receive up to 100% state funding for eligible new school construction and modernization projects. Districts seeking financial assistance must have their financial hardship status approved prior to submitting an application with the OPSC for funding. To qualify for financial hardship funding, a district must demonstrate the following: (1) it is levying developer fees up to the maximum amount allowed by law; (2) it has made every reasonable effort to raise local revenue to fund a project;⁴⁷ and (3) evidence of financial inability to contribute the required local matching funds.⁴⁸

⁴⁶ The SFP requires school districts that receive state funding for new construction or modernization projects establish a restricted maintenance account to ensure that projects are kept in good repair. For a period of 20 years, districts are required to deposit no less than three percent of their general fund budget annually into the restricted maintenance account. Small districts may deposit less than three percent into the account if they can demonstrate an ability to maintain their facilities using a smaller amount of money.

⁴⁷ Specifically, a district must provide evidence of at least one of the following: existing debt is at least 60% of the district's bonding capacity, total bonding capacity is less than \$5 million, or evidence that the district held a successful school bond election in the past two years.

⁴⁸ The OPSC conducts an analysis of a district's financial status to determine whether it is eligible for financial hardship status. The process involves a number of worksheets used to determine a district's share (if any) of project costs.

The Critically Overcrowded School Facilities Program

The Critically Overcrowded School (COS) Facilities program was created in 2002 with the passage of AB 16. The program allows districts with critically overcrowded school sites to reserve funding for new school construction projects for a period of up to four years. At the end of the four year period, districts with an approved COS project must convert their COS project into a new school construction project and meet all funding criteria set forth by the SFP's New Construction Program. Unlike the New Construction Program, the COS program allows eligible districts to reserve funding for new school construction prior to having identified a site for the construction and prior to having bid-ready construction plans.⁴⁹ Thus, the COS programs gives qualifying districts substantially more time to prepare an application for funding.

To qualify as critically overcrowded, elementary schools must have a student density greater than 115 students per acre while middle and high schools must have a student density greater than 90 students per acre.⁵⁰ The California Department of Education is responsible for maintaining a list of critically overcrowded schools. Once a school within a district has been placed on the CDE's critically overcrowded schools list, the district can file an Application for Preliminary Apportionment (a reservation of funds application) with the OPSC. Any project funded under the COS program must meet the following conditions: (1) relieve overcrowding by increasing the capacity of the district, (2) identify a minimum of 75% of the proposed student occupancy for the project as coming from schools listed on the CDE critically overcrowded schools list, and (3) be located within a one-mile radius of an elementary school that qualifies as critically overcrowded or within a three-mile radius of a secondary school that qualifies as critically overcrowded. Figure 4 illustrates the steps qualified districts must follow to obtain funding under the COS program.⁵¹

Joint-Use Projects

The legislature enacted the Joint-Use Program with the passage of AB 16 in April of 2002. The program was further amended with the passage of SB 15 in 2003. The program allows districts to enter into a cost-sharing agreement for specified projects with a qualified joint-use partner.⁵² In so doing, the program allows districts to consider projects that they may not have been able to afford otherwise. One hundred million dollars of Proposition 47 and 55 funding has been made available for the program. The

⁴⁹ Abel et. al. (Winter 2004/2005), p. 10.

⁵⁰ These densities represent 200% of the CDE standard (recommended site density). Prior to implementing the program, the state legislature considered other density factors such as 150% or 125% of the CDE standard. Of course, the lower the density factor, the higher the number of schools that would qualify for the COS program. PolicyLink and MALDEF (2005) have suggested the density factor be reduced to allow more districts to participate in the COS program. This issue and other issues related the COS program are discussed in section 9.

⁵¹ Figure 2 is taken from a schematic created by Abel et. al. (Winter 2004/2005), p. 10.

⁵² Qualified joint-use partners include: governmental agencies, institutions of higher education, and nonprofit organizations.

Joint-Use Program funds two types of projects, commonly referred to as Type I and Type II. Type I joint-use projects must be part of a qualified new construction project that increases the size and/or cost of a project beyond what is necessary for school use of a multipurpose room, a gymnasium, a childcare facility, a library or a teacher education facility. Type II joint-use projects can be part of a modernization project or a stand-alone project that will add or expand a multipurpose room, gymnasium, childcare facility, library, or a teacher education facility.

Funding for joint-use projects is made on a 50/50 state and local matching basis. The joint-use partner is responsible for contributing a minimum of 25% of project costs and thus a local school district is responsible for a maximum of 25% of project costs.⁵³ Furthermore, if a school district passed a general obligation bond issue for the explicit purpose of building a joint-use project, the district may contribute the full 50% of the required local match. Similar to other programs administered under the SFP, all applications for joint-use projects must be accompanied by supporting documentation that demonstrates the district has received DSA and CDE approval for its construction plans. Apportionments for joint-use projects are made on a first-come first-served basis.

5. The Size and Distribution of School Facility Spending Since 1998

As previously noted, California's current system of school facility finance was established in 1998 with the passage of SB 50. Since that time, revenue from state and local general obligation bond issues, developer fees and several other revenue sources have provided approximately \$71 billion for new school construction and renovation projects throughout the state. This section describes the level and distribution of school facility funding in California since 1998.

The Level of School Facility Funding

Table 6 summarizes the total revenue made available to local school districts for new school construction and modernization projects from 1998 to the present. The first column of Table 6 lists five sources of revenue for school facility projects. The second column lists the aggregate revenue raised from each of those sources, while the third column lists the percentage of total revenue derived from each source.⁵⁴ As Table 6 reveals, most revenue for new school construction and modernization comes from three sources: local general obligation bonds, state aid and developer fees. Collectively, these three sources of revenue represent 93% of all funding available to school districts.⁵⁵ School districts also

⁵³ Unlike other SFP programs, financial hardship assistance is not available for joint-use projects. If a district is unable to fund some portion of its share of project costs, the state apportionment is reduced.

⁵⁴ All revenue figures reported in Table 6 are adjusted for inflation using the producer price index and measured in constant 2005 dollars.

⁵⁵ Information on the revenue raised through successful local general obligation bond elections was obtained from EdSource and represents all revenue raised from 1998 through June 2006. Information on state apportionments to

receive revenue from successful Mello-Roos and School Facility Improvement District elections (approximately 1% of total funding) and from various “other” revenue sources (approximately 6% of total funding). These “other” sources include: Certificates of Participation (COP’s) which represent short-term debt, revenue from the sale or lease of land and/or buildings, federal aid, and other smaller sources of revenue.⁵⁶ Between 1998 and June of 2006 school districts raised \$38.4 billion for new school construction and modernization projects through local general obligation bond issues. Over the same time period, the state apportioned \$21.9 billion to local school districts. That amount represents nearly all of the revenue from Proposition 1A and Proposition 47 and approximately 56% of the revenue from Proposition 55.

Two other studies examined the composition of revenue for new school construction and renovation projects in California during the period just prior to the passage of SB 50. A comparison of the results reported in those studies with the results reported in Table 6 suggests that since 1998, local school districts have relied more heavily on local general obligation bonds to finance school construction and modernization projects. Specifically, Brunner and Rueben (2001) examined the composition of revenue for new school construction and modernization between 1992 and 1998. Over that time period, local general obligation bonds constituted approximately 32% of total facility funding, state aid constituted approximately 30% and developer fees constituted approximately 11%. Similarly, the Legislative Analyst’s Office (2001) examined the composition of revenue between 1987 and 1998 and found that local general bonds constituted about 32% of total funding, while state aid and developer fees respectively constituted about 40% and 17%. Thus, in recent years, the share of revenue coming from local general obligation bonds has risen from approximately 32% to 53%. This increased reliance on G.O. bond revenue is most likely attributable to the passage of Proposition 39 in November of 2000.

Table 7 summarizes the three largest sources of revenue in terms of average revenue per pupil. The per-pupil revenue figures reported in the table represent the sum of all revenue raised between 1998 and the present (measured in constant 2005 dollars) divided by the average enrollment over the time period. Local general obligation bond revenue averaged \$4,051 in unified districts, \$3,293 in elementary districts, and \$6,951 in high school districts. Furthermore, these averages mask considerable variation in the number of districts that held a successful G.O. bond election and the amount of revenue raised by those school districts that held a successful election. For example, 57% of unified school districts (188

school districts was obtained from the Office of Public School Construction and represents all apportionments made from 1998 through June 2006 (the data of the last SAB meeting). Finally, information on developer fee revenue was obtained from yearly school district accounting records (J-200 and SACS) provided by the California Department of Education and represents all revenue raised from 1998-99 through 2004-05.

⁵⁶ Information on successful Mello-Roos and SFID elections was obtained from EdSource while information on “other” sources of revenue was obtained from yearly school district accounting records prepared by the California Department of Education.

out of 331) held at least one successful G.O. bond election over the time period and among those districts the average amount raised per pupil was \$7,134. Similarly, 30% (166 out of 548) of elementary districts and 58% (48 out of 83) of high school districts held a successful G.O. bond election over the time period and among those districts the average amount raised was \$10,872 for elementary districts and \$12,019 for high school districts. One district in particular stands out, namely Los Angeles Unified. Between 2002 and 2005, voters in LA Unified approved \$11.2 billion in local general obligation bonds or, on a per-pupil basis, \$15,114. Overall, local G.O. bond revenue constitutes 42% of total per-pupil funding for unified districts, 40% for elementary districts and 50% for high school districts. Similarly, state aid constitutes 36% of total funding for unified districts, 42% for elementary districts and 34% for high school districts.

The Distribution of School Facility Funding

The averages reported in Table 7 mask wide variations in the distribution of school facility funding across districts. Table 8 illustrates how per-pupil revenue for new school construction and modernization is distributed across school districts. The percentiles listed in the table are weighted by the number of students in each district. For example, 10% of students in unified school districts were enrolled in a district where total revenue per pupil was less than \$4,274. For each type of school district, the first row gives the distribution of local general obligation bond revenue per pupil. The second row shows how the distribution changes when state aid per pupil is added to local G.O. bond revenue. Finally, the third row shows the distribution of total revenue per pupil (local G.O. bond revenue plus state aid plus all other sources of revenue). For all three types of school districts, total revenue per pupil at the 75th percentile is more than double that of the 25th percentile. These large disparities are partly due to the distribution of local general obligation bond revenue across districts. For example, in unified school districts, local G.O. bond revenue at the 75th percentile is more than seven times that of the 25th percentile. These large disparities in local bond revenue per pupil are partially offset by state aid and other sources of revenue but large disparities persist across districts.

Of course, part of this variation in school facility funding across districts may simply reflect differences in need. For example, student enrollment might be increasing rapidly in some districts and declining or remaining stable in others. Similarly, some districts might have invested heavily in new school construction and modernization in the period just prior to 1998 and thus have little need for further investment in school facilities. On the other hand, the variation in school facility funding across districts might also reflect differences in the ability to fund new school facility projects. High-income districts and districts with high property wealth, for example, might be more willing and able to finance new school construction and modernization projects. The next section addresses these possibilities by examining how variation in school facility funding is related to measures of need and measures of ability to pay.

6. Explaining the Variation in School Facility Funding

The need for school facility funding arises primarily for two reasons: (1) capacity constraints due to enrollment growth and (2) modernization/renovation needs due to the aging of the existing capital stock. Consequently, this section begins by examining how variation in school facility funding across districts is related to enrollment growth and prior investment in school infrastructure.

Need and the Distribution of School Facility Funding

Table 9 illustrates how per-pupil facility funding is related to the growth rate of district enrollment between 1998-99 and 2004-05. For each type of school district, the table shows how revenue per pupil is distributed when school districts are separated into quintiles of enrollment growth.⁵⁷ The quintiles listed in the table are weighted by student enrollment so that each quintile contains 20% of the total student enrollment in the state. For example, 20% of students in unified school districts were enrolled in a district where enrollment growth was less than 0.8% (the first quintile). Similarly, 20% of students in unified districts were enrolled in a district where enrollment growth was greater than 18% (the fifth quintile).

As Table 9 reveals, school facility funding appears to be positively related to enrollment growth. In unified districts, total revenue per pupil averaged \$7,960 among districts in the first quintile of enrollment growth while it average \$14,725 among districts in the fifth quintile. Elementary and high school districts with the highest enrollment growth rates also tend to have higher total revenue per pupil. Table 9 also reveals that the distribution of total revenue per pupil is primarily driven by the distribution of state aid. For each type of school district, state G.O. bond apportionments increase steadily across the quintiles of enrollment growth. Of course the strong positive relationship between enrollment growth and state aid is to be expected, given that funding for new school construction is based primarily on current and projected enrollment growth. What is slightly more surprising is the relationship between local general obligation bond revenue and enrollment growth. One would expect local G.O. bond revenue to be positively related to enrollment growth as districts with high enrollment growth rates should have greater need for school facility funding. However, Table 9 reveals that local G.O. bond revenue is only weakly related to enrollment growth. In particular, among unified and elementary districts there appears to be no systematic relationship between local bond revenue per pupil and enrollment growth. Districts in the first quintile of enrollment growth raise about the same amount of revenue through local G.O. bond

⁵⁷ For the remainder of this study per-pupil revenue is measured as the sum of all revenue raised between 1998 and the present (measured in constant 2005 dollars) divided by the average enrollment over the time period.

elections as districts in the fifth quintile.⁵⁸ Among high school districts, there is a large difference in local bond revenue between the first and second quintiles of enrollment growth but little difference in revenue between the remaining quintiles.

Table 10 illustrates how revenue per pupil is related to an alternative measure of need, namely the amount districts spent in previous years on school construction and modernization projects. For each type of district, the table shows how revenue per pupil is distributed across school districts when districts are separated into quintiles of previous investment in school facilities. The quintiles are once again weighted by student enrollment. Previous school facility investment is measured as the sum of all school facility spending within a district from 1969 to 1997, adjusted for depreciation. Specifically, for each school district, the aggregate value of school facility investment over the 29 year period spanning 1969 to 1997 was calculated as:

$$K_{1998} = \sum_{j=0}^{28} I_j \cdot (1 - \delta)^{28-j},$$

where K_{1998} denotes the aggregate value of school facility investment as of 1998, I_j denotes school facility investment in year j (1969, 1970 ..., 1997), measured in constant 2005 dollars, and δ is the geometric rate of depreciation.⁵⁹ Data on aggregate investment for various years were obtained from the *Annual Report of Financial Transactions Concerning School Districts of California*, prepared by the California State Controller. The nominal investment data were converted into constant 2005 dollars using the producer price index.⁶⁰

As Table 10 illustrates, among unified districts there appears to be no systematic relationship between prior investment in school facilities and current facility revenue per pupil. Local G.O. bond revenue, state aid and total revenue per pupil are relatively evenly distributed across quintiles.⁶¹ In contrast, among elementary and high school districts there appears to be a negative relationship between

⁵⁸ The relatively large spike in the 3rd quintile of local G.O. bond revenue for unified districts is driven by Los Angeles Unified which makes up the bulk of that quintile. Excluding Los Angeles Unified from the analysis causes local G.O. bond revenue in the 3rd quintile too fall to levels similar to other quintiles.

⁵⁹ Holtz-Eakin (1993) reports an estimate of the depreciation rate of non-residential state and local capital of 4.1%. I use his depreciation rate to calculate the aggregate value of school facility investment in prior years.

⁶⁰ Between 1969 and 1998, a substantial number of California's elementary and high school districts were consolidated into unified districts. For those school districts, I used school district consolidation records, obtained from the California Department of Education, to identify the elementary schools and high schools that merged to form a new unified school district. For the years prior to the formation of a unified school district, I measured total capital outlay for that school district as the sum of all capital outlays made by the elementary and high school districts that eventually consolidated to form the unified district. Using that procedure I was able to obtain a complete time series of annual investment flows for all school districts currently operating in California.

⁶¹ Los Angeles Unified falls in the 2nd quintile. Omitting Los Angeles Unified from the analysis does not affect the pattern of results reported in Table 10.

prior investment and total revenue per pupil. For example, total revenue per pupil averaged \$9,941 among elementary districts located in the first quintile (the lowest quintile of prior investment) while it averaged only \$6,579 among districts located in the fifth quintile (the highest quintile of prior investment). Similarly, local bond revenue averaged \$4,656 among elementary districts located in the first quintile while it averaged only \$2,467 among districts in the fifth quintile. High school districts exhibit a similar pattern, with districts in the first quintile of previous investment having substantially higher local bond revenue and total revenue than districts in the fifth quintile.⁶²

Collectively, Tables 9 and 10 suggest that at least part of the variation in school facility funding across districts can be explained by differences in need: in general, districts with higher enrollment growth rates and districts with lower levels of prior investment in school facilities tend to have higher revenue per pupil. Nevertheless, given the large disparities in school facility funding reported in Table 8, it seems likely that other factors are also driving the distribution of funding across districts. The next part of this section therefore focuses on examining how the distribution of school facility funding is related to measures of ability to pay for new school construction and modernization projects.

Ability to Pay and the Distribution of School Facility Funding

Table 11 shows the distribution of revenue per pupil when districts are separated based on quintiles of median household income.⁶³ The quintiles are once again weighted by student enrollment. As Table 11 reveals, there appears to be a relatively strong positive relationship between median household income and revenue per pupil: districts with the highest median household income tend to have substantially higher revenue per pupil.⁶⁴ For all three types of school districts, total revenue per pupil among districts in the fifth quintile is double that of districts in the first quintile. For example, total revenue per pupil averaged \$10,196 among high school districts in the lowest quintile of income while it averaged \$24,186 among districts in the highest quintile of income. The distribution of total revenue per pupil in Table 11 is primarily driven by the distribution of local bond revenue. In particular, local G.O. bond revenue appears to increase rather continuously with district income. Furthermore, compared to districts in the first through fourth quintiles, districts in the fifth quintile (those districts with the highest median income) appear to raise substantially more revenue through local G.O. bond elections.

⁶² I also examined the sensitivity of these results to the time span chosen to measure prior investment expenditures. In particular, I also created a measure of prior investment that only included investment from 1986 (when local general obligation bonds were reinstated) to 1998. Using this alternative measure of prior investment I obtained results that were qualitatively similar to those reported in Table 10.

⁶³ Data on the median household income of districts comes from special school district tabulations of the 2000 census prepared by the U.S. Census Bureau and the National Center for Education Statistics.

⁶⁴ Los Angeles Unified falls in the 1st quintile. Omitting Los Angeles Unified from the analysis does not affect the pattern of results reported in Table 11.

Table 11 provides another explanation for the large disparities in school facility funding across districts, namely a willingness among high-income districts to spend more on school facilities than low-income districts. In particular, high-income districts tend to have higher total revenue per pupil primarily because they tend to raise more money through local general obligation bond elections than low-income districts. However, income is only one of the factors that affects the willingness and ability of districts to fund new school construction and modernization projects. The other primary factor is district property wealth.

As noted in section 2, the passage of Proposition 46 in 1986 reinstated the authority of school districts to issue general obligation bonds, subject to the approval of voters within a district. General obligation bonds are repaid with revenue raised from property tax overrides that remain in effect until the bonds are fully repaid. The reliance upon the local property tax to finance general obligation bonds leads naturally to the question of how differences across districts in assessed value per pupil affect the ability and willingness of districts to finance school facility spending locally. Specifically, property wealth affects the ability of school districts to raise revenue through local general obligation bond elections in two distinct ways. First, school districts can only issue bonds up to their debt capacity limit, which is set at 1.25 percent of assessed value for elementary and secondary districts and 2.5 percent for unified school districts. Thus, debt limits may place an institutional constraint on the amount of bond revenue low-assessed value districts can raise. While debt capacity limits may not be binding for unified and high school districts, which tend to have relatively high limits, an analysis by the Coalition for Adequate School Housing (CASH) suggests that these debt capacity limits may significantly constrain the ability of many elementary districts from raising funds through general obligation bond issues (CASH 1997). Second, differences across districts in assessed value per pupil directly affect the tax-price of school facility spending. The tax-price is the additional property tax burden a homeowner faces when spending per pupil is increased by one dollar. That tax-price equals the assessed value of a voter's home divided by the district's total assessed value per pupil. Note that the tax-price of school facility spending is inversely related to the assessed value of property within a district. Thus, all else equal, districts with higher assessed value per pupil face a lower tax-price which may manifest itself in a higher demand for school facility spending.⁶⁵

⁶⁵ Note that the tax-price of school spending may differ across school districts for other reasons as well. First, holding the assessed value of property within districts constant, districts with lower enrollments will have a higher assessed value per pupil and thus face a lower tax-price. Second, all else equal, residents in districts with a higher percentage of nonresidential property will face a lower tax-price since some of the additional tax burden necessary to finance an increase in facility spending is shifted to the owners of nonresidential property.

Table 12 documents the relationship between school facility funding and assessed value per pupil.⁶⁶ For each type of school district, the table shows how revenue per pupil varies when school districts are separated into quintiles of assessed value per pupil. Once again, these quintiles are weighted by student enrollment. As Table 12 reveals, there appears to be a strong positive relationship between local bond revenue per pupil and assessed value per pupil.⁶⁷ Compared to districts in the lowest quintile of assessed value per pupil, districts in the highest quintile have substantially higher local bond revenue. In unified and high school districts it is more than three times higher and in elementary school districts is more than ten times higher.

Table 12 also reveals a strong positive relationship between assessed value per pupil and total revenue per pupil. Total revenue per pupil averaged \$6,889 among unified districts in the first quintile while it averaged \$13,507 among districts in the fifth quintile. Similar disparities in total revenue per pupil across quintiles exist for elementary and high school districts. The wide variation in total revenue per pupil across districts is directly related to the variation in local bond revenue. For example, in unified districts, the \$4,482 difference in average local G.O. bond revenue between the first and fifth quintiles explains approximately 68% of the difference in total revenue. In elementary and high school districts, differences in local bond revenue across quintiles account for an even greater proportion of the difference in total revenue.

Finally, it is worthwhile to note that the averages reported in Table 12 mask considerable variation across quintiles in the amount of revenue raised by school districts that held successful general obligation bond elections. For example, of the 79 unified districts with assessed value per pupil of \$337,000 or less (those in the first quintile), 40 held a successful bond election and among those districts bond revenue per pupil averaged just \$4,002 per pupil. In contrast, among the 78 unified districts with assessed value per pupil of \$800,000 or more, 45 held a successful bond election and among those districts bond revenue per pupil averaged \$11,328. The relationship between assessed value per pupil and local bond revenue per pupil is illustrated more clearly in Figure 5. The vertical axis gives local G.O. bond revenue per pupil for those districts that held a successful local bond election between 1998 and June of 2006, while the horizontal axis gives the assessed value per pupil in those districts. Figure 5 illustrates a strong positive relationship between assessed value per pupil and local bond revenue per

⁶⁶ To my knowledge, no state agency collects information on the assessed value of property within school districts. Consequently, I contacted the Auditor Controller's office of each county in California and requested the data. Fifty out of 58 counties responded to my request and provided data on assessed value by school district for the 2005-06 tax year. With the exception of San Joaquin County, all of the counties that did not respond were small rural counties. As a result, while the data on assessed value covers only 50 out of California's 58 counties, it covers 95% of all school districts and 97.5% of all students.

⁶⁷ Los Angeles Unified falls in the 3rd quintile. The results reported in Table 12 are essentially unchanged if Los Angeles Unified is omitted from the analysis.

pupil. Furthermore, as Table 13 reveals, this strong positive relationship between assessed value and local bond revenue translates directly into a strong positive relationship between assessed value and total revenue per pupil.

Table 13 examines how school facility funding is related to one final measure of interest to policy makers, namely the percentage of students that are nonwhite. Specifically, Table 13 shows how revenue per pupil is distributed across school districts when districts are separated into quintiles based on the percentage of nonwhite students.⁶⁸ In contrast to the results reported in Tables 11 and 12, there appears to be no systematic relationship between revenue per pupil and the percentage of nonwhite students. For all three types of school districts, local bond revenue, state aid, and total revenue per pupil are all rather equally distributed across quintiles.⁶⁹

Taken together, Tables 9 through 12 and Figure 5 suggest that disparities in school facility funding across districts are related to both measures of need, such as enrollment growth and prior facility investment, and measures of willingness and ability pay, such as income and assessed value per pupil. To determine which factors are most important in explaining the level of school facility funding, the remainder of this section turns to multivariate regression analysis.

Regression Results

Column one of Table 14 reports coefficient estimates from a model designed to explain total revenue per pupil. The dependent variable is the log of total facility funding per pupil over the period 1998 to the present. The primary independent variables are: the log of assessed value per pupil, the log of median household income, the growth rate of enrollment between 1998 and 2005, the log of previous facility investment expenditures per pupil, and the fraction of students that are nonwhite in a district. The model also includes the log of district enrollment to account for economies of scale and size effects on the level of school facility funding and two indicator variables: one that takes the value of unity if a district is an elementary district and the other that takes the value of unity if a district is a high school district. These final two variables are included in the model to allow the level of school facility funding to differ across types of districts.

The coefficient estimates reported in column one of Table 14 are generally consistent with expectations. For example, the estimated coefficients on the log of assessed value per pupil and enrollment growth are both positive and statistically significant at the 5% level. Similarly, the coefficient on previous investment is negative and statistically significant, indicating that districts that invested

⁶⁸ Data on the ethnic composition of school districts in 2004-05 comes from reports prepared by the California Department of Education. The quintiles reported in Table 13 are weighted by district enrollment.

⁶⁹ Los Angeles Unified is located in the 4th quintile. Omitting Los Angeles Unified from the analysis causes local G.O. bond revenue in the 4th quintile to fall considerably from \$4,644 to \$2,862.

heavily in the past in school facilities tend to receive lower facility funding. Furthermore, consistent with the results reported in Table 11, the fraction of minority students in a district appears to have little effect on the level of school facility funding. Turning to the interpretation of the estimated coefficients, the results indicate that a 1% increase in assessed value per pupil results in approximately a 0.56% increase in total revenue per pupil while a 1% increase in enrollment growth results in approximately a 0.76% increase in total revenue per pupil. District size also appears to have a large effect on revenue per pupil. Specifically, the results indicate that a 1% increase in district enrollment leads to approximately a 0.53% increase in total revenue per pupil. Of course, the enrollment variable most likely captures the fact that elementary districts, which tend to be much smaller, also tend to receive lower funding per pupil.

The second column of Table 14 reports coefficient estimates from a model designed to explain local G.O. bond revenue per pupil. The dependent variable in the model is the log of local bond revenue per pupil. The independent variables are the same variables used to explain total revenue per pupil. Districts that failed to raise any revenue through local bond elections are excluded from the sample. As a result, the sample size falls from 904 observations to 386 (the number of districts that held a successful bond election between 1998 and June of 2006). In column 2, the estimated coefficients on the log of assessed value per pupil and the log of median household income are both positive and statistically significant. Thus, the results indicate that high-wealth and high-income districts tend to raise more revenue through local bond elections. The estimated coefficient on the log of assessed value per pupil is also quite large. Specifically, the results indicate that a 1% increase in assessed value per pupil leads to approximately a 0.77% increase in bond revenue per pupil. In fact, assessed value per pupil is responsible for explaining most of the variation in local bond revenue. Specifically, a simple regression of the log of local bond revenue per pupil on the log of assessed value per pupil yields an R-Squared of 0.52, indicating that 52% of the variation in local bond revenue is explained by this variable alone. Furthermore, as seen by the R-Squared reported in column 2, adding all the other explanatory variables to the model only increases the R-Squared from 0.52 to 0.57. Several of the other coefficients reported in column 2 are also of interest. For example, the coefficient on percent minority is positive and statistically significant indicating that districts with higher fractions of minority students tend to raise more money through local G.O. bond elections. Similarly, the coefficient on enrollment growth is positive and statistically significant at the 10% level. Note, however, that the magnitude of the estimate coefficient on enrollment growth is small. Thus, consistent with the results reported in Table 9, bond revenue per pupil appears to be only weakly related to enrollment growth.

The final column of Table 14 reports coefficient estimates from a model designed to explain the probability of having a successful local G.O. bond election. In this model, the dependent variable is an indicator variable that takes the value of unity if a district had a successful bond election between 1998

and June of 2006 and zero if it did not. Once again, the independent variables are the same as those used in columns 1 and 2. The model is estimated as a logistic regression. The coefficient on assessed value per pupil is positive and statistically significant indicating that districts with higher assessed value per pupil are more like to hold a successful G.O. bond election. The results also indicate that larger districts and those with a higher percentage of minority students are more likely to hold a successful bond election. In contrast, districts that invested heavily in the past in school infrastructure are less likely to hold a successful bond election. Finally, relative to unified and high school districts, elementary districts are significantly less likely to hold a successful bond election.

The results reported in Table 14 reveal several interesting patterns. First, total revenue per pupil is positively related to assessed value per pupil primarily because assessed value per pupil is the primary determinant of local G.O. bond revenue. Specifically, assessed value per pupil drives both the level of bond revenue raised (conditional on having a successful bond election), and the probability of having a successful bond election. Second, while there is only a weak positive relationship between enrollment growth and local bond revenue per pupil, there is a much stronger positive relationship between total revenue per pupil and enrollment growth. As Table 9 illustrated, this strong positive relationship between total revenue and enrollment growth is driven primarily by the distribution of state aid. Finally, conditional on other factors, there is only a weak positive relationship between total revenue per pupil and district income. High-income districts tend to have higher total revenue per pupil primarily because they raise more revenue through local G.O. bond elections.

To more clearly see how assessed value per pupil, enrollment growth and other factors affect the distribution of total revenue per pupil, Table 15 presents the predicted level of total facility funding per pupil calculated using the coefficient estimates reported in column 1 of Table 14. Specifically, Table 15 shows how moving from the 25th percentile of a given variable to the 75th percentile of that variable affects the level of total facility funding per pupil while holding all other variables at their means. For example, if enrollment growth increased from -8% (the 25th percentile of enrollment growth) to 15% (the 75th percentile) total revenue per pupil would increase from \$3,144 to \$3,741, or by \$597. Similarly, if a district's assessed value changed from \$392,052 to 1,130,002 total revenue per pupil would increase by \$2,064. As Table 15 reveals, both measures of need and measures of ability to pay appear to be important determinants of the distribution of facility funding across districts. Measures of need such as enrollment growth and previous investment in school facilities have relatively large effects on the distribution of facility funding. In terms of ability to pay, assessed value per pupil appears to play the dominant role in explaining the distribution of facility funding across districts.

To examine the robustness of the results reported in Table 14, I also estimated models based on several alternative specifications. To examine whether the results were sensitive to regional variation in

the demand for school facility spending, I first estimated models that included a set of 11 regional fixed effects. These regional fixed effects control for any unobserved regional variation in the demand for school facility spending. The regions consist of contiguous counties and are described in detail by Betts, Reuben and Danenberg (2000). The inclusion of these regional fixed effects caused the coefficient on assessed value to rise slightly in the total revenue equation and in the probability of holding a successful bond election equation. In general, however, results based on models that included regional fixed effects were qualitatively and quantitatively similar to those reported in Table 14. I also estimated separate regression models for each type of school district (unified, elementary and high school). Results based on those alternative specifications are reported in Tables 1A, 2A, and 3A of the Appendix. Specifically, Table 1A reports results when the total revenue equation is estimated separately for each type of district. Similarly, Tables 2A and 3A report results when the bond revenue equation and the probability of having a successful bond election equation are estimated separately for each type of school district. A brief inspection of the results reported in those tables reveals several interesting patterns. First, for unified and elementary districts, the coefficients on assessed value per pupil reported in Tables 1A, 2A, and 3A are quite similar to those reported in Table 14, suggesting that assessed value has a similar effect on both types of districts. In contrast, for high school districts, the coefficient on assessed value per pupil is statistically insignificant in both the total revenue equation and the probability of having a successful bond election equation, suggesting that assessed value plays a less important role in those districts. However, given the small sample size for high school districts, those results should be interpreted with caution. Table 1A also suggests that income tends to play a more important role in explaining variation in total revenue per pupil across elementary and high school districts, and that enrollment growth tends to play the most important role in explaining variation in total revenue per pupil across high school districts.

7. Critically Overcrowded and Multi-Track Year-Round Schools

The previous section demonstrated that districts with higher enrollment growth and/or lower levels of previous investment in school facilities tend to receive higher levels of facility funding. Thus, districts with greater facility needs appear to receive higher levels of facility funding. On the other hand, it also appears that ability to pay has a relatively large impact on facility funding. Districts with high assessed value per pupil tend to have significantly higher levels of school facility funding. These results raise an important question: do districts with the most critical facility needs receive higher levels of facility funding? While quantifying facility needs is difficult, there are two objective measures of need that can be examined: schools that the California Department of Education (CDE) classifies as critically overcrowded and schools that operate on a multi-track year-round calendar. This section examines how the characteristics of critically overcrowded and multi-track schools differ from other schools. It also

examines how school facility funding in districts that contain critically overcrowded and multi-track schools compares to other districts.

As noted previously, the CDE classifies a school as critically overcrowded if it has a student density that is 200% or more of the CDE's recommended density. For elementary schools, that translates into a density of more than 115 students per acre while for middle and high schools it translates into a density of more than 90 students per acre. The multi-track year-round calendar was introduced in California to help alleviate overcrowding. Multi-track year-round calendars allow schools to increase their seating capacity by 30% or more, by placing students into tracks and then rotating those tracks throughout the year. Thus, at any given point in time, one track is on vacation while the other tracks are attending classes.⁷⁰ Currently, approximately 804,000 students attend one of the 751 schools operating on a multi-track year round calendar.⁷¹ Districts that choose to implement a multi-track calendar are eligible for additional operational funding to compensate for the multi-tracking of students. Specifically, the Year Round Grant Program, administered by the State Department of Education, provides additional funding to districts that implement or maintain a year-round multi-track program. Funding is based on the percentage of pupils certified in excess of facility capacity. The amount of the grant increases with the percent of students housed in excess of facility capacity. For example, if 5 to 9 percent of students are housed in excess of facility capacity the maximum grant amount is \$824.50 per student in excess of capacity. If 20 to 24 percent of students are housed in excess of facility capacity the maximum grant amount is \$1,401.65 per student in excess of capacity.⁷² Districts that receive funding under the Year Round Grant program have their new construction eligibility in the SFP program reduced based on the number of pupils for whom they have received funding. Thus, school districts that participate in the program are voluntarily choosing to reduce their eligibility for new school construction funding.

Table 16 shows the percent of students in California that attend critically overcrowded or multi-track schools as of 2004-05.⁷³ Overall, approximately 16% of students are enrolled in a school that the CDE defines as critically overcrowded, while 22% of students are enrolled in a school that is either critically overcrowded or utilizes a multi-track year-round calendar.⁷⁴ As Table 16 reveals, a disproportionate number of nonwhite and low-income students attend critically overcrowded or multi-track schools. For example, while overall 16% of students attend critically overcrowded schools, only 5%

⁷⁰ See Oakes (2002) for an excellent discussion of multi-track year-round schooling.

⁷¹ Assembly Education Committee, Education Infrastructure Hearing #1, January 25, 2006.

⁷² These grant amounts are as of 2005-06. See the California Department of Education website for the latest grant amounts under the Year Round Grant Program.

⁷³ Table 16 is an update of a table created by Pastor and Reed (2005) who use data from 2002-03.

⁷⁴ These calculations were made using data from the California Department of Education on school-level enrollment in 2004-05 and the CDE's list of critically overcrowded schools and schools that operate on a multi-track year-round calendar.

of White students attend such schools while 22% of African American and 23% of Hispanic students attend these schools. Furthermore, as the last two columns of Table 16 reveal, in Los Angeles Unified nearly 80% of all students attend a critically overcrowded or multi-track school. However, unlike other school districts, critically overcrowded schools in Los Angeles Unified do not appear to enroll a disproportionate number of African American students. Specifically, while overall 78% of students in Los Angeles Unified are enrollment in a critically overcrowded school, only 70% of African American students attend such a school.

Table 17 provides the same information as Table 16 in a slightly different manner. It shows how the characteristics of critically overcrowded and multi-track schools differ from other schools. For example, in the average critically overcrowded or multi-track school, approximately 73.2% of students are eligible for free or reduced price lunch. In all other schools, that percentage is only 45.2. Overall, Table 17 reveals that critically overcrowded and multi-track schools contain much higher percentages of poor and minority students and much lower percentages of white students.

Table 18 compares the level of school facility funding among districts that contain critically overcrowded or multi-track schools to the level of funding in other districts. Facility funding is expressed in per-pupil terms and is measured as the sum of all revenue raised between 1998 and the present divided by average enrollment over the time period. Compared to districts that contain no critically overcrowded or multi-track schools, those that do, tend to have higher revenue per pupil. For example, total revenue per pupil averaged \$11,323 among the 46 districts that contained critically overcrowded schools and \$10,459 among the 107 districts that contained either critically overcrowded or multi-track schools. In comparison, total revenue per pupil averaged \$9,061 among the remaining 855 districts. Table 18 also illustrates that districts with critically overcrowded and multi-track schools tend to have higher local bond revenue per pupil and higher state aid per pupil.

While total revenue per pupil tends to be higher in districts with critically overcrowded schools, it is much higher in Los Angeles Unified, which contains nearly 50% of all schools on the CDE's critically overcrowded school list. For example, total revenue per pupil in Los Angeles Unified is nearly twice the level of other districts with critically overcrowded schools and more than twice the level of districts with no critically overcrowded or multi-track schools. Similarly, local bond revenue in Los Angeles Unified is nearly three times that of other districts with critically overcrowded or multi-track schools and more than four times that of all other districts.

While local bond revenue and total revenue tend to be higher in Los Angeles Unified, state aid tends to be lower. Between 1998 and June of 2006, Los Angeles Unified received \$2,860 per-pupil in state aid. In contrast, state aid averaged \$4,133 among all districts with critically overcrowded or multi-track schools and \$3,495 among all other districts. Recall, however, that state aid represents state funding

that has been *apportioned* to school districts for new school construction and modernization projects. When the state implemented the COS program in 2002, it allowed districts with critically overcrowded schools to reserve funding for up to five years (four years plus a possible one-year extension). As a result, a substantial proportion of the funding allocated to the COS program may not have been apportioned to school districts as of June of 2006.

The fourth row of Table 18 attempts to quantify how much additional state aid districts with critically overcrowded schools are likely to receive once they turn their preliminary (reserved) COS apportionments into actual apportionments. Specifically, the fourth row shows the per-pupil *preliminary* COS apportionments from Proposition 47 and 55. On average, districts with critically overcrowded schools stand to receive an additional \$531 per pupil in state aid once they convert their preliminary apportionments. Furthermore, funding for the COS program is not equally distributed across all districts: while Los Angeles Unified contains approximately 50% of all critically overcrowded schools, approximately 75% of all COS program funding has been reserved for Los Angeles Unified.⁷⁵ That amounts to approximately \$3,761 per pupil in additional state aid for Los Angeles Unified alone. Thus, once one considers both actual state apportionments and preliminary state apportionments for the COS program, state aid in Los Angeles Unified is substantially higher than in other districts.

8. Charter School Facility Funding

Sections 2 through 7 documented facility funding for traditional K-12 public schools in California. This section provides an overview of charter school facility funding. Charter schools face unique facility challenges for several reasons. First, unlike public school districts, charter schools can not, by themselves, issue local general obligation bonds to finance their school facility needs. Second, a majority of charter schools in California are start-ups that do not have direct access to public school facilities. Many of these start-up schools obtain facilities by leasing or renting space in office buildings and other commercial sites. For example, a survey conducted by the Rand Corporation in 2002 found that approximately 40% of start-up charter schools leased space from commercial sites, while 24% obtained facilities by either purchasing or renting a privately owned facility.⁷⁶ These schools incur leasing and rental expenses that traditional K-12 public schools do not. Third, because lending institutions view charter schools as high-risk investments, many charter schools have found it difficult to obtain the loans necessary to finance school facilities.⁷⁷ These unique facility issues have led some researchers to conclude that, “an inadequate supply of school facilities may be the single largest stumbling block to the

⁷⁵ District-level data on preliminary apportionments for the Critically Overcrowded School Program was obtained from the Office of Public School Construction.

⁷⁶ Krop and Zimmer (2005), p. 19.

⁷⁷ EdSource (2004), p. 23.

growth of charter schools.”⁷⁸ This section begins by providing an overview of the challenges faced by charter schools in obtaining school facilities. It then goes on to discuss how recent legislation and several court cases have affected the ability of charter schools to obtain adequate facilities. It ends by discussing charter school facility funding options that have recently become available.

The first charter schools were established in California in 1993 after the state legislature enacted SB 1448, the Charter Schools Act of 1992. Among other things, the Act capped the number of charter schools in the state at 100 (with no more than 10 charter schools in any single district) and prohibited private schools from being converted into charter schools. While the Act provided significant detail on the financing of current operating expenditures for charter schools it made no mention of charter school facility issues. The failure of the original legislation to address charter school facility needs stems partly from an underlying belief among its framers that charter schools would be “conversions” and utilize district facilities.⁷⁹ However, as early as 1995, nearly 50% of charter schools were start-ups with no access to existing school facilities.⁸⁰ As mentioned previously, these start-ups typically faced significant facility challenges due to rental and leasing costs and difficulties in obtaining loans to secure facilities. Furthermore, many school districts were experiencing facility shortages in the 1990’s making it difficult for them to find adequate housing for conversion charter schools. The facility problem facing charter schools became more severe when the state legislature expanded the cap on charter schools in 1998. Specifically, AB 544 increased the statewide cap on charter schools to 250 for the 1998-99 school year, and allowed the state to approve an additional 100 schools every year thereafter. Between 1993 and 2000, the number of charter schools expanded from 15 to 165 and by 2005 there were 502 charter schools operating in California. These 502 charter schools enrolled approximately 180,000 students or 3% of California’s total K-12 public school student population. As the number of charter schools increased, so did the facility problems facing those schools. According to the 2002 survey of charter schools conducted by the Rand Corporation, 62% of all charter schools surveyed stated they were struggling to finance their school facility needs.

The Ramifications of Proposition 39 for Charter Schools

The facility picture for charter schools changed considerably following the passage of Proposition 39 in November of 2000. In addition to reducing the vote requirement on local G.O. bonds from two-thirds to 55%, the proposition also required that, “each school district make available, to each charter school operating in the school district, facilities sufficient for the charter school to accommodate all of the

⁷⁸ Sugarman (2002), p. 6.

⁷⁹ EdSource (2004), p. 20.

⁸⁰ See Krop and Zimmer (2005) for a historical account of the number of start-up and conversion charter schools in California.

charter school's in-district students in conditions reasonably equivalent to those in which the students would be accommodated if they were attending other public schools of the district. Facilities provided shall be contiguous, furnished, and equipped, and shall remain the property of the school district.”⁸¹ Prior to the passage of Proposition 39, school districts were only required to allow charter schools to use a district facility if that facility was not currently being used by the district for instructional or administration purposes or if the facility had not been historically used for rental purposes. With the passage of Proposition 39, it became the legal responsibility of school districts to make all reasonable efforts to house charter school students in facilities that were essentially equivalent to those used to house in-district students. Thus, Proposition 39 substantially increased the responsibility of school districts to provide adequate facilities for charter schools.

The charter school provisions of Proposition 39 were phased in over a three-year period. For school districts that passed a bond measure before November 8, 2003, the provisions took effect in July of the year following the passage of a bond measure. For those school districts that did not pass a bond prior to November 8, 2003, the provisions took effect on that date. Furthermore, the charter school provisions of Proposition 39 only apply to charter schools with an enrollment or projected enrollment of 80 students or more. If the actual or projected enrollment of a charter school is less than 80 students, a district can deny the facility requests of the charter school. While the provisions of Proposition 39 require school districts to provide facilities for charter schools, districts are not required to use unrestricted general fund revenues to make those facilities available. In particular, section 47614 of the California Education Codes states that, “no school district shall be required to use unrestricted general fund revenues to rent, buy, or lease facilities for charter school students.” However, if a district does choose to use unrestricted general fund revenue, the district may charge the charter school a “pro rata share” of the facility costs. The pro rata share is based on the ratio of space allocated by the school district to the charter school divided by the total space of the district. If the district uses any other source of revenue (e.g. local bonds or state aid) to finance the cost of charter school facilities, the charter school could not be charged for those costs.

While the intent of Proposition 39 was to ensure that public school facilities were shared fairly among all students, including those enrolled in charter schools, the meaning of “fair” quickly became a matter of contentious debate. The debate may have culminated when the Fifth District Court of Appeals in California ruled that, “charter school students are district students and that school district may not discriminate against charter school students when it comes to providing facilities.”⁸² The court’s ruling stems from the case of *Ridgecrest Charter School v. Sierra Sands Unified District*. In September of 2002

⁸¹ California Education Code, Section 47614.

⁸² California Charter School Association, July 1, 2005.

Ridgecrest Charter School filed a Proposition 39 request for district facilities within Sierra Sands Unified District. The district responded by approving a total of nine and a half class rooms located at five different schools.⁸³ The charter school rejected the district's offer, arguing that that the offer violated the provisions of Proposition 39 because it did not provide facilities that were contiguous. Ridgecrest Charter then made a counter proposal, asking the district to make available one particular site that was currently being used primarily for nonacademic purposes. The district rejected the charter schools' proposal arguing it had made every reasonable attempt to locate and make available space at the fewest number of sites.

On July 29, 2003, Ridgecrest Charter took its case to the court and filed a complaint with the Kern County Superior Court. In its complaint Ridgecrest asked the court to uphold its right under the provisions of Proposition 39 to receive facilities that were contiguous and mandate Sierra Sands Unified to provide facilities at a single site. The presiding judge in the case ruled that Sierra Sands had not abused its discretion in allocating facilities and therefore Ridgecrest Charter was not entitled to a single site to house its students. Ridgecrest appealed and the case was remanded to the Court of Appeal, Fifth District. On June 29, 2005, the Court of Appeal overturned the lower court's ruling. In its decision, the court stated that, "a school district's exercise of its discretion in responding to a Proposition 39 facilities request must comport with the evident purpose of the Act to equalize the treatment of charter and district-run schools with respect to the allocation of space between them."⁸⁴ The decision goes on to say that the court interprets the meaning of "reasonably equivalent" and "fairly shared" to mean that, "to the maximum extent practicable, the needs of the charter school must be given the same consideration as those of the district-run schools, subject to the requirement that the facilities provided to the charter school must be contiguous."⁸⁵ While the court realized that Ridgecrest's facility requests would most likely cause "considerable disruption and dislocation among the District's students, staff, and programs," it nevertheless ruled that the provisions of Proposition 39 required that districts share their facilities fairly with charter school students.

Technically, the court's decision in *Ridgecrest Charter School v. Sierra Sands Unified District* applies only to those school districts located in the Fifth Appellate district of California. However, the decision is likely to affect school districts throughout the state as charter schools become more aggressive in pursuing their Proposition 39 facility requests. For example, a survey of charter schools conducted by EdSource in early 2005 revealed that among the 135 charter schools that submitted Proposition 39 requests for facilities to their districts, 53 (or 39%) of those schools reported that they did not receive

⁸³ *Ridgecrest Charter School v. Sierra Sands Unified School District*, 130 Cal.App.4th 986, 30 Cal.Rptr.3d 648; hereafter *RCS v. Sierra Sands Unified*.

⁸⁴ *RCS v. Sierra Sands Unified*, pp. 15.

⁸⁵ *RCS v. Sierra Sands Unified*, pp. 15.

satisfactory facilities in response to their request or through continued negotiations.⁸⁶ Some of those charter schools have now filed lawsuits to address their facility needs. For example, in December of 2005, two charter schools located in San Diego Unified filed a complaint with the San Diego Superior Court arguing that the district had failed to uphold the provisions of Proposition 39 to provide their students with adequate facilities. While it is still too early to fully evaluate the impact of Proposition 39 on the facility needs of charter schools, there is little question that the proposition has fundamentally altered the facility predicament faced by these schools.

Facility Funding for Charter Schools

In addition to passing Proposition 39, California has also implemented several programs designed to increase funding for charter school facilities. These include the Charter School Facilities Program (CSFP), which is financed with bond revenue from Propositions 47 and 55, the Charter School Revolving Loan Fund (CSRLF), the Charter School Facility Grant Program (CSFGP), and the Charter School Facilities Incentive Grants Program (CSFIGP) which is funded primarily by the federal government. This section concludes by discussing each of these programs in turn.

Assembly Bill 14 enacted in 2002 established the Charter School Facilities Program (CSFP) as a pilot program to assist charter schools in obtaining adequate school facilities. The program allows charter schools or charter school granting authorities to apply for preliminary apportionments (reserve funds) for new school construction projects. Prior to the establishment of the CSFP, charter schools wishing to access state bond revenue for facilities projects had to petition their school districts to include them on applications for state funding. According to EdSource and the Office of Public School Construction, only five new construction projects and four modernization projects received funding prior to the establishment of the CSFP. The CSFP was originally funded with \$100 million of Proposition 47 bond revenue. With the passage of Proposition 55 in 2004, the program received an additional \$300 million in funding.

The CSFP allows districts to obtain funding for new school construction projects directly or through the school district where the charter school is located.⁸⁷ The program currently does not provide funding to charter schools for modernization projects nor does it provide funding to schools offering non-classroom based instruction.⁸⁸ To be eligible for funding, a charter school must demonstrate that the district in which it is physically located is eligible for new school construction. Recall that under the

⁸⁶ EdSource surveyed the universe of charter schools operating in California as of the 2004-05 year. 92% of all charter schools responded to the survey.

⁸⁷ State Allocation Board and the California School Finance Authority, "Charter School Facility Funding: Joint Report to the Legislature," July 2005.

⁸⁸ If approved by voters this November, Proposition 1D would expand Charter School Facilities Program to include modernization funding.

School Facility Program this amounts to providing evidence that existing seating capacity is insufficient to house existing students or anticipated students using a five-year projection of enrollment.⁸⁹ Similar to other programs funded through the School Facility Program, state aid is provided on a 50/50 state and local matching basis. Thus, charter schools wishing to access funds in the CSFP must provide 50% of a project's cost. Charter schools have the option of meeting the 50% match either as a lump sum or by entering into lease agreement with the state for a period of up to 30 years. To qualify for funding, a charter school must demonstrate to the California School Finance Authority that it is financially sound and is capable of meeting the required 50% local matching contribution.

Similar to the Critically Overcrowded School Program, the CSFP allows charter schools to receive preliminary apportionments for new school construction projects. A preliminary apportionment is essentially a reservation of funds which provides a charter school with more time to find an appropriate location for a new school construction project and to obtain the necessary approvals from the California Department of Education and the Division of the State Architecture. Charter schools have up to four years to convert their preliminary apportionments into a final apportionment.

In the original round of funding, which consisted of \$100 million in Proposition 47 bond revenue, the Office of Public School Construction received 17 applications that were eligible for funding. Given the limited funding available, only six of those projects were able to be funded. As a result of this shortfall in funding, the state legislature enacted SB 15 in 2003. The new legislation revised the CSFP regulations to include caps on charter school project funding. Specifically, the new legislation limited the number of per pupil grants that could be requested, the maximum acreage allowed for site acquisition, and total project costs. Because of these caps, in the second round of funding the State Allocation Board was able to fund 28 out of 34 eligible projects.⁹⁰ Table 19 lists the CSFP per-pupil grant amounts and the caps on funding. When the number of eligible project applications exceeds the total amount of funding available in the CSFP, preliminary apportionments are rationed so that they are representative of: (1) various geographical areas in the state, (2) various grade levels served by charter schools, (3) urban, rural and suburban areas of the state, and (4) large, medium and small charter schools. Within each of those areas, preference is given to charter schools located in districts with large percentages of students eligible for free or reduced price lunch, those located in districts with overcrowded schools, and nonprofit charters.

⁸⁹ If the district where the charter school is, or will be, located has not established new construction eligibility, the charter school must submit the appropriate documentation establishing eligibility at the time it submits its application for a principle apportionment to the OPSC.

⁹⁰ State Allocation Board and the California School Finance Authority, "Charter School Facility Funding: Joint Report to the Legislature," July 2005.

In addition to the CSFP, the State also administers a number of loan and grant programs designed to assist charter schools in obtaining adequate facilities. The first such program was established in 1996 when the state legislature created the Charter School Revolving Loan Fund (CSRLF). The program provides low-interest loans of up to \$250,000 for non-conversion charter schools.⁹¹ Schools can receive more than one loan as long as the total amount received does not exceed \$250,000 over the lifetime of the charter school but any given loan must be repaid within five years. Charter schools that are incorporated may borrow directly from the CSRLF, all other charter schools must request a loan through their charter-granting authority. Charter schools can use the proceeds of a loan to help meet any of the objectives outlined in their charter, including the leasing of facilities and the costs of facility improvements.

In 2001, the state legislature created the Charter School Facility Grant Program (CSFGP) to provide charter schools with assistance for facilities rent and leasing costs. To be eligible for a grant, 70% of the students enrolled in a charter must be eligible for free or reduced price meals or the charter school must be located in district where at least 70% of all students are eligible for free or reduced price meals. In addition, conversion charter schools and those that have received reasonably equivalent facilities through a Proposition 39 request are not eligible for a grant. The program allows districts to receive a reimbursement of up to \$750 per pupil for rental and leasing expenditures but no more than 75% of the charter school's total annual rental and leasing cost. Since the program's inception in 2001, the state legislature has appropriated \$22.2 million for the program.

Finally, the Charter School Facilities Incentive Grants Program (CSFIGP) is also designed to provide charter schools with assistance for facility costs. The CSFIGP was implemented in 2005 shortly after the California School Finance Authority (CSFA) was awarded a grant of \$49.25 million from the U.S. Department of Education to assist charter schools in obtaining the adequate school facilities. The proceeds of the grant are to be allocated over a five year period. Grant awards can be used to cover a charter school's rent, lease, mortgage or debt service costs, or for the costs associated with the purchase, design and construction of facilities.⁹² Similar to the Charter School Facility Grant Program, the CSFIGP allows districts to receive a reimbursement of up to \$750 per pupil for rental and leasing expenditures but no more than 75% of the charter school's total annual rental and leasing cost. Furthermore, no grant may exceed \$250,000 per year, with a maximum grant period of three years. The CSFIGP also provides per-pupil grants for the construction and renovation of school facilities. Charter schools are awarded \$1,000 per pupil to cover up to 75% of the annual costs of eligible construction projects. Individual project

⁹¹ The discussion in the text describes the CSRLF program as amended in 2000. Under the original legislation the maximum grant available was \$50,000. Furthermore the proceeds of the loan had to be used within the first year of operation and repaid within two years.

⁹² California School Finance Authority, Text of Regulations, Charter School Facilities Program – Implementation of State Charter School Facilities Incentive Grant Program. Full text is available at: http://www.treasurer.ca.gov/csfa/charter/2005/pgm_regulations.pdf.

grants are limited to a maximum of \$500,000 per year, with a maximum grant period of three years. To qualify for a grant, a charter school must be in good standing with its chartering authority and have completed at least one year of instructional activity.⁹³ Funding priority for CSFIGP grants is based on a preference point system. Specifically, charter schools receive preference points based on: (1) the percentage of free or reduced price students attending a school (maximum of 40 points), (2) location in an overcrowded school district (maximum 40 points),⁹⁴ and (3) whether the school is a nonprofit entity (20 points).

9. Discussion

Sections 2 through 8 of this report documented various aspects of school facility funding in California and examined how revenue for new school construction and modernization projects is distributed across school districts. This final section provides a review of some of the major findings in each section and links those findings to research reports that have recommended various changes to the current system of school facility finance in California.

A Predictable and Consistent Method of Financing School Facilities

Sections 2 and 3 documented the history of school facility finance in California and examined how the level of school facility funding has changed over time. Those sections revealed that California's system of school facility finance has changed frequently and that facility spending has fluctuated quite dramatically over time. While several factors are responsible for the dramatic fluctuations in facility spending, one factor stands out; namely, the irregular nature of statewide school facility bond issues. Several recent reports have suggested the state develop a more consistent and predictable method of financing school facilities. For example, in her 2001 report entitled, "A New Blueprint for California School Facility Finance," Legislative Analyst, Elizabeth Hill, notes:

State bonds are usually fully depleted before additional funds are authorized by voters, leaving "hills and valleys" of revenue availability. This unpredictability in state funding impairs district capacity to plan, build schools, and raise supplementary local funds.⁹⁵

Similarly, in its 2002 report, the Joint Legislative Committee to Develop a Master Plan for Education notes:

... there is no doubt that the current model of funding for public school facilities in California is unresponsive to the planning and funding needs of school districts, and, therefore, results in the

⁹³ In addition, charter schools receiving funding through the Charter School Facility Program are ineligible for grants.

⁹⁴ The preference points are based on the percentage overcrowded, which is calculated by dividing the number of unhouseed students in a district by the district's current enrollment.

⁹⁵ Legislative Analyst's Office (2001), p. 4.

inefficient use of resources for facilities. In particular, reliance on state General Obligation bonds and the current method of allocating bond proceeds has created a system that has not been conducive to long-term planning for school facility needs at the local level, and that fails to ‘leverage’ or encourage the development of local sources of funding for school capital outlay needs.⁹⁶

Reports issued by Cohen (1999), PolciyLink and MALDEF (2005), the Little Hoover Commission (2000), and the California Performance Review Commission (2004) all reach a similar conclusion.

Each of the reports mentioned above provides a slightly different recommendation on how to address the issue but all suggest that the state develop a more predictable and consistent method of financing school facilities. For example, both the LAO report and the Master Plan for Education report call for replacing the current system with a new system that would provide school districts with annual per-pupil allocations from the state General Fund to finance school facility needs.

The irregular nature of statewide school facility bond issues and the “hills and valleys” of revenue availability may also be partly responsible for some of the recent increases in school construction costs. In particular, because statewide bond issues occur infrequently and tend to be quite large when they do occur, school construction costs may rise following a bond issue. In essence, funding school construction with infrequent and large G.O. bond issues causes the demand curve for school construction to shift right following a statewide bond issue. If the supply of school construction is fixed or relatively inelastic, this would lead to a relatively large increase in construction costs due to increased demand. While there are no research reports that document a significant link between construction costs and the passage of statewide bond issues, there is plenty of anecdotal evidence that suggests construction costs have risen significantly since the passage of Proposition 1A and Propositions 47 and 55. Thus, moving towards a more predictable and consistent method of funding school facilities may also have the (positive) unintended consequence of reducing construction costs.

Unifying State Oversight of School Facility Projects

Section 4 of this report provided an overview of the School Facility Program which was established in 1998 following the passage of AB 50. As noted in that section, the SFP was designed to stream-line the application process and simplify the overall structure of the state’s school facilities program. Several reports, including Cohen (1999) and the Little Hoover Commission (2000), suggest that the state has made significant progress in streamlining the regulatory process and improving the transparency and efficiency of the state’s school facility program. Nevertheless, these reports have called for streamlining the state’s school facility approval process even further. For example, in its 2004 report, the California Performance Commission notes:

⁹⁶Joint Legislative Committee to Develop a Master Plan for Education (2002), p. 172.

The state's multi-billion dollar investment in local school buildings involves a cumbersome, duplicative and time-consuming multi-agency approval process that fails to review important elements of the projects. The state needs a facility approval process that ensures the safety and financial security of school sites and construction, without delaying or adding cost to a project.⁹⁷

Reports issued by the Little Hoover Commission (2000) and the Pacific Research Institute (2004) come to similar conclusions.

The concerns raised in these reports revolve around the fact that school districts must interact with multiple state agencies when seeking approval for new school construction and modernization projects. For example, as noted in section 4, in order to obtain funding for facilities projects, school districts must obtain approval from a minimum of six state agencies. In addition, the Department of General Services' website notes that, "seven other State agencies operate approximately 40 programs that also may become involved under certain conditions. The number of entities involved can make the process of building or remodeling a school extremely complex and time-consuming." Based on these facts, the Little Hoover Commission (2000) and the California Performance Committee (2004) have called for unifying state oversight of school facility projects. Both reports call for creating a single state agency (or the functional equivalent thereof) that would serve as the point of contact for school districts.

Equalizing the Ability of School Districts to Raise General Obligation Bond Revenue

Sections 5 and 6 documented the size and distribution of school facility revenue between 1998 and the present. Those sections revealed that funding for school facility projects varies widely across districts. Some of the variation can be explained by differences across districts in need. For example, districts with higher enrollment growth and those that have not invested heavily in school infrastructure in the recent past, tend to have significantly higher levels of facility funding. However, section 6 also highlighted the fact that facility funding tends to vary systematically with district property wealth. In particular, districts with higher assessed value per pupil tend to have significantly higher local bond revenue per pupil and consequently higher total revenue per pupil.

The relationship between assessed value and the ability of school districts to raise general obligation bond revenue was the primary focus of a 1986 report on school facilities prepared by the Legislative Analyst's Office. The report, which was written just prior to the passage of Proposition 46, highlighted a potential problem with the state legislature's 1986 proposal to reinstate the authority of local school district to raise local bond revenue. Specifically, the report notes:

One potential drawback of this proposal, however, is that it could violate the principles on which the Supreme Court's decision in the *Serrano v. Priest* case was based. This is a legitimate

⁹⁷ California Performance Review (2004), Vol. 4, p. 899.

concern. School districts with considerable property tax wealth could raise large amounts for school facilities by imposing a very low tax rate, while school districts with less property tax wealth would not be able to raise sufficient funds even with a very high tax rate.

In *Serrano v. Priest*, the California Supreme Court ruled that differences across district in spending per pupil could not be significantly related to differences in property wealth. Although, the issue at hand in that case was the relationship between *current* spending and property wealth, it seems apparent that the LAO was concerned that a similar argument could be made for the relationship between *capital* (infrastructure) spending and property wealth. To illustrate the LAO's point, consider two unified districts, one with an assessed value per pupil of \$191,000 (approximately the 10th percentile of assessed value per pupil among unified districts in 2005), and the other with an assessed value per pupil of \$1,204,000 (approximately the 90th percentile of assessed value). If both districts impose a tax rate of 0.06% (the maximum allowed), the first district would raise \$115 per pupil in local bond revenue while the second district would raise \$722.⁹⁸ Thus, even though the two districts impose the same tax rates, the second district can raise nearly seven times more revenue.

In its 1986 report, the LAO suggested the state implement a guaranteed tax yield system to address such differences in the ability of local districts to raise revenue through local general obligation bond issues. As noted by de Alth and Rueben (2005), under such a system, the state would guarantee that any given tax rate provided all districts with the same amount of revenue. Specifically, the state would provide a schedule listing a guaranteed yield per pupil from any given tax rate. State aid would then be used to "top off" the revenue raised by low-wealth districts from a given tax rate. Thus, the system would be based on variable state matching rates with low-wealth districts receiving higher levels of state aid than high-wealth districts. A similar type of program was suggested by the LAO in its 2001 report on school facility finance.⁹⁹

Expanding the Definition of Critically Overcrowded Schools

Section 7 examined how the characteristics of critically overcrowded and multi-track schools differed from other schools. It also examined how school facility funding in districts that contain critically overcrowded and multi-track schools compares to other districts. The section illustrated that critically overcrowded and multi-track schools tend to enroll significantly higher proportions of

⁹⁸ Under the guidelines set forth by Proposition 39, unified districts are prohibited from proposing, on any single ballot, a tax increase of more than \$60 per \$100,000 of assessed valuation, implying a tax rate of 0.06%.

⁹⁹ In its 2001 report, the LAO suggested an "ability-to-pay" adjustment program. Under such a system, the state would target revenue to districts with the least ability to raise revenue through local general obligation bonds and developer fees. Specifically, the state would fund the difference between some set standard of revenue per pupil and the amount of revenue a district could raise by imposing the maximum allowable tax rate and collecting developer fees at the maximum rate allowed by law.

disadvantaged and minority students. It also showed that districts that contain critically overcrowded schools tend to receive substantially higher facility funding, particularly Los Angeles Unified. In its 2005 report on ending overcrowding in California's public schools, PolicyLink and MALDEF note that the Critically Overcrowded Schools (COS) Program, which was implemented in 2002, has made progress in addressing the problem of overcrowding. Nevertheless, the report also outlines some potential concerns with the COS program. Specifically, the report notes that the standard used by the CDE to define critically overcrowded schools is quite high: a school must have a student density that is at least 200% of the CDE's recommended density. Furthermore, the report goes on to note:

... while density is considered a good measure of overcrowding, using density alone is inadequate in describing the full extent of the problem. California schools that use temporary approaches to increase school capacity, such as multi-track year-round education calendars, busing, and portable classrooms—practices that are strong indicators of school overcrowding—are not fully captured under the state definition. Portable classrooms are usually counted as permanent classroom space, bused students are not counted in the schools they should attend but are unable to because there is no room for them, and the presence of multitrack year-round calendars is not seen as an indication of overcrowding. The COS program should strive to broaden its definition and capture the schools that use such strategies.¹⁰⁰

Recently, the state legislature has taken action to address some of the concerns raised by PolicyLink and MALDEF. In particular, AB 127, the Kindergarten-University Public Education Facilities Bond Act of 2006, contains \$1 billion in funding for Overcrowding Relief Grants. The grants would enable districts to reduce the number of portable classrooms on overcrowded school sites and replace them with permanent classrooms.¹⁰¹ To be eligible for a grant, a school district must contain schools with a student density that is 175% or more of the CDE's recommended density. The Act allows districts to exclude portable classrooms from the count of existing capacity for the purpose of establishing eligibility for new school construction.¹⁰² Thus, the Act addresses (at least to some degree) two of the concerns raised by PolicyLink and MALDEF: it reduces the density threshold for participating in the program from 200% of the CDE standard to 175% of that standard and it excludes portable classrooms from a district's calculation of existing capacity. According to the Legislative Analyst's Office, under the definition of overcrowding used by the Overcrowding Relief Grants program, approximately 1,800 schools (20 percent of all schools) would be eligible for funding.¹⁰³

While AB 127 addresses some of the concerns raised by PolicyLink and MALDEF, it does not address their concerns regarding schools that utilize multi-track year-round schooling or busing to relieve

¹⁰⁰ PolicyLink and MALDEF (2005), p. 6.

¹⁰² Portable class rooms used for the Class Size Reduction Program may not be excluded from the calculation of existing capacity.

¹⁰³ Legislative Analyst's Office (July 2006), p. 3.

severe overcrowding. An older version of AB 127, namely AB 58, did contain language that would have allowed school districts access to state funds to “provide permanent school facilities for pupils in multi-track year round programs or pupils on double-session.”¹⁰⁴ However, the provision was eliminated from the final version of AB 127.¹⁰⁵ Other recent legislation has taken action to eliminate the most extreme form of multi-track year-round schooling, commonly known as Concept 6. Relative to other multi-track year round programs, the Concept 6 program provides the maximum enrollment given a school’s capacity and has the potential to increase the seating capacity of a school by 50%.¹⁰⁶ However, this increased capacity comes at a cost. Students that attend schools operating on a Concept 6 calendar receive only 163 days of instruction. Students attending schools that operate on a traditional calendar or any other multi-track year round calendar receive 180 days of instruction. As of 2004-05, 152 schools were operating on a Concept 6 year-round calendar and of those 128, or 84%, were located in Los Angeles Unified.¹⁰⁷ AB 1550, enacted in 2004 prohibits a school district from operating a Concept 6 program unless the district operated such a program continuously since the 2003-04. The bill also prohibits the operation of a Concept 6 program after July 1, 2012.

Adapting to Changing Enrollment Trends

The annual growth rate of student enrollment in California has been steadily declining since the mid-1990’s and is projected to continue declining until about 2009 or 2010. Furthermore, according to projections made by the California Department of Finance, between 2005-06 and 2014-15 total student enrollment in California is predicted to increase by only 191,042 students or approximately 3%. In light of this trend of slowing enrollment growth, the Legislative Analyst’s Office has suggested the state allocate a larger fraction of any future statewide bond issues towards modernization of existing school facilities and a smaller fraction towards new school construction.¹⁰⁸ Proposed funding for the Kindergarten-University Public Education Facilities Bond Act of 2006 is consistent with the LAO’s recommendation. In particular, if approved by voters this November, the Act would provide \$3.3 billion for modernization projects versus \$1.9 billion for new school construction projects. In contrast, bond revenue from Propositions 47 and 55 provided 3.7 billion for modernization projects and \$8.8 billion for new school construction.

¹⁰⁴ Assembly Bill 58, Amended in Assembly January 4, 2006. Full text available at: http://info.sen.ca.gov/pub/bill/asm/ab_0051-0100/ab_58_bill_20060104_amended_asm.pdf

¹⁰⁵ In 2002, the state legislature also considered making funding for districts that utilized multi-track year-round schooling programs a priority for the Critically Overcrowded Schools program. See Coalition for Adequate School Housing New Archives, February 15, 2002.

Creation of a Statewide School Facility Inventory System

Finally, sections 5, 6, and 7 of this report alluded to an important problem facing California's system of school facility finance: the state lacks a coherent definition of what it means for a school to have adequate facilities and it lacks a statewide school facility inventory system. As Pastor and Reed (2005) note:

Perhaps the most fundamental barrier to an equitable distribution of school bond funds is the lack of a comprehensive school facilities assessment. The state simply does not have the information to compare schools and identify the greatest facility needs.

Reports issued by the Little Hoover Commission (2000), the Joint Legislative Committee to Develop a Master Plan for Education (2002), the Legislative Analyst's Office (2001), and PolicyLink and MALDEF (2005) echo a similar concern.

Although the state currently lacks a comprehensive school facilities assessment, it is making progress towards resolving this issue. As part of the Williams settlement, the state has begun work on implementing a school facilities needs assessment program. Specifically, beginning in 2005-06, SB 550 requires school districts that participate in the SFP and the Deferred Maintenance Program to establish a Facilities Inspection System (FIS) and to ensure that all schools within the district are in "good repair" (i.e. clean, safe and functional).¹⁰⁹ SB 550 also charged the Office of Public School Construction with developing an evaluation instrument that could be used by school districts to identify if a school facility is in good repair. This instrument is to be used by school districts on an interim basis until the state legislature adopts a permanent standard for good repair. Those statewide standards must be adopted by the legislature and governor no later than September 1, 2006. Although, the final form of these statewide standards has not been fully established, the Office of Public School Construction made the following suggestion in March of 2006:

... the State standard for good repair should be described in statute in narrative form, of moderate detail, and be composed of the assessment of more than a dozen school components. Statute should also require that an evaluation tool be developed and maintained by the OPSC or another State agency and it should be designed to accommodate a rating and scoring system.¹¹⁰

While it is too early to tell how the implementation of a state standard for good repair will affect school facility finance in California, it nevertheless represents a significant step forward.

¹⁰⁹ According to the Office of Public School Construction, nearly 89% of school districts participate in the SFP or Deferred Maintenance Program. Thus, the vast majority of California's school districts will be required to implement a Facilities Inspection System.
