My research reveals that the only funds that might have been considered reasonably available to aid the District under the majority's criteria at the time of the trial court's decision in this case were certain emergency funds under control of the Director of Finance. (Stats. 1990, ch. 467, § 2.00.) But there is nothing in the record to show that these funds had not been used for some other emergency purpose. Even assuming that none of these funds had been committed to some other use, however, the funds would have been grossly inadequate to meet the District's needs in any event. The total amount of funds available to the Director of Finance to meet all the emergency needs of the State under the then-current budget was $7 million. (*Ibid.*) As we have seen, the District faced a $23 million budget shortfall.

duty to act. As the United States Supreme Court has held, "a denial of constitutionally protected rights demands judicial protection; our oath and our office require no less of us." (*Reynolds* v. *Sims* (1964) 377 U.S. 533, 566 [12 L.Ed.2d 506, 530, 84 S.Ct. 1362].)

When the other branches of government have failed to act, the courts have not flinched from their duty to fashion appropriate remedies when necessary to guarantee constitutional rights to the people of this state. Thus, in *Wilson* v. *Eu* (1991) 54 Cal.3d 471, 473 [286 Cal.Rptr. 280, 816 P.2d 1306], we held that, although reapportionment is primarily a matter for the legislative branch, when that branch has failed to act and electoral rights will be irretrievably lost if no action is taken, "we must proceed forthwith to draft such [reapportionment] plans." And in *Crawford* v. *Board of Education* (1976) 17 Cal.3d 280, 307 [130 Cal.Rptr. 724, 551 P.2d 28], we held that when a recalcitrant school board failed to act to cure the harmful consequences of school segregation, the trial court could exercise "broad equitable powers" to frame a remedy that would assure the students' basic rights. (Accord, e.g., *Swann* v. *Board of Education* (1971) 402 U.S. 1, 15 [28 L.Ed.2d 554, 566, 91 S.Ct. 1267]; see *Assembly* v. *Deukmejian* (1982) 30 Cal.3d 638, 659 [180 Cal.Rptr. 297, 639 P.2d 939]; *Midway Orchards* v. *County of Butte* (1990) 220 Cal.App.3d 765, 779 [269 Cal.Rptr. 796].)

No sound reason exists to hold that although some fundamental rights demand judicial protection when they are endangered because the other branches of government have failed to act, other rights, equally fundamental, do not. Yet that is the consequence of the majority's holding in this case that the trial court erred in ordering that an emergency loan be made to the District.

The practical consequences of the majority's holding should not be overlooked. In an era of fiscal constraint and uncertainty for local governments, including school districts, we cannot assume that the District's problems will prove to be unique. If another school district experiences financial difficulties and the other branches of government fail to act, parents may indeed bring a lawsuit to protect their children's right to education. Under today's decision, the trial court will declare that the children have a constitutional right to basic educational equality, and that the State bears responsibility for assuring this right is not denied. The court may then announce that no means

exist by which it can enforce that right. And the doors to the schoolhouse will close.

I would affirm the orders of the trial court in their entirety.

EXECUTIVE SUMMARY

As California enters the 21st Century, its public schools face many challenges. One significant challenge is the serious disrepair of an aging school facility infrastructure. Another challenge is the anticipated growth of nearly 2 million K-12 students during the next decade that will require many districts to build new schools to meet burgeoning student demand. Recognizing the substantial need for infrastructure, in November 1998, California voters passed Proposition 1A, a bond measure that provides $6.7 billion for public K-12 school construction and repair.

This measure establishes two new programs for the disbursement of bond funds and simplifies the application process by which schools apply for school construction resources. This change in programs, and in the methods by which funds are allocated, is important to the people of the State, as school districts, many of which have facilities in serious disrepair or require new construction, vie for their portion of the $6.7 billion pie.

Historically, the process by which schools applied for and received construction funds was cumbersome and complex. Furthermore, the research suggests that school districts that were sophisticated and knowledgeable about the complicated school facilities construction process were the most successful in securing funding – often at the expense of less sophisticated and uninformed school districts. Proposition 1A corrects much of this dynamic by simplifying the application and administrative processes, thereby creating a more level playing field for all school districts.

In order to understand the significance and relevance of this new process and its concomitant programs, however, it is useful to review the history of school construction financing in California and to understand the various pitfalls that existed under previous programs so as to avoid similar pitfalls in the future. This paper discusses that history and highlights the problems with preexisting programs.

It begins with an examination of the State Allocation Board and its staff (the Office of Public School Construction). Specifically, it reviews the role of the Board which is responsible for establishing policies for the distribution of school facility financing funds. It discusses how the Board, which was established in 1947, has evolved during the past five decades from one that set policy for various *loan* programs to one that today sets policy for *grant* programs.

The paper also discusses how various externalities—legislative or voter imposed initiatives, such as Proposition 13—have affected the Board's policies and procedures. The paper notes that the Board changed its policies often, and its policy shifts created an untenable dynamic for school districts as they attempted to secure funding. In particular, the paper highlights how districts were forced to weave their way through a complex, bureaucratic maze of applications, forms, and plans; and how this dynamic forced school districts to employ sophisticated personnel, or to contract with savvy consultants, in order to secure state financing for their construction projects.

This paper also presents a history of bond initiatives during the past five decades. It is clear that throughout this history there was never enough State money available to school districts for facility construction or repair. In fact, in spite of the $6.7 billion approved by Proposition 1A, experts estimate that an additional $10 billion will be required during the next decade. This paper discusses how the constant shortage of funds caused districts to use "whatever" means available to them to secure funding.

Voters have consistently been generous in approving the vast majority of statewide bond initiatives. Only three bond proposals out of 24 have failed in the past 50 years, and those that failed did so during times of recession. However, it is not clear how much additional debt voters will be willing to incur. This has especially been true since the passage of Proposition 13 in 1978, when the State began taking on a larger role in supporting school construction then it had before. To that end, this paper discusses how Proposition 1A creates a mechanism for school districts to tap state resources, and how school districts may need to tap other sources of facility funding.

Proposition 1A forges a partnership between the State and school districts for financing the construction and repair of their schools. Under its new programs, the State will provide 50 percent of the cost associated with building new schools, and provide 80 percent of the cost associated with modernizing existing facilities. It requires school districts to match state resources. However, school districts that are unable to offer this match can receive hardship funds based on prescriptive criteria. This paper provides details regarding these new programs and compares them to programs previously administered by the State Allocation Board. It also discusses how the Board is required to respond to district requests.

Proposition 1A is not the only impetus behind simplifying the school facility financing process. Concurrently, the Office of Public School Construction has rewritten the application process for funds to make it more user-friendly to school districts and has even offered applications and program information via the Internet. This paper discusses these changes.

The paper concludes with options that the Governor and the Legislature may wish to consider, including: offering protection to small and rural school districts when bond funds are exhausted; requiring annual financial reporting by the State Allocation Board; providing an on-line technical support for program applicants; and redeveloping the State funding source for school facility construction and rehabilitation.

REQUEST FOR RESEARCH

Programs and administrative procedures in Proposition 1A may produce significant changes to the previous programs and the manner by which the State Allocation Board distributes resources for school facility construction. In light of these changes, Senator Quentin Kopp requested that the California Research Bureau provide research on the following topics:

- A history of the State Allocation Board. How was the board's funding program intended to work and how has it evolved?

- An explanation of the State Allocation Board process. How does the State Allocation Board work? What are the procedures and criteria for receiving allocations? How are priorities set?

INTRODUCTION—THE PASSAGE OF PROPOSITION 1A

On November 3, 1998, California voters passed Proposition 1A - a $9.2 billion school bond initiative, and the largest of its kind passed in our nation's history. Over the next four years, revenues from Proposition 1A's general obligation bonds will provide $6.7 billion to public K-12 schools and $2.5 billion to public colleges and universities for the purposes of constructing new facilities and repairing existing ones.

The State Allocation Board will have the responsibility for determining a fair means of distributing the $6.7 billion available to K–12 schools. Many experts feel that developing such a system will be a daunting task, in spite of the fact that Proposition 1A/Senate Bill 50 is very prescriptive regarding the allocation of its bond funds.

This paper begins with a history and a discussion of the role of the State Allocation Board. Next, it examines the 24 state bond initiatives since 1947 and discusses how the Board has evolved its policies for distributing resources generated by these bond efforts. It then presents an overview of Proposition 1A and how this initiative creates a new allocation program that differs from previous ones. The paper also discusses the various problems that existed within the State Allocation Board's previous resource allocation systems and how Proposition 1A addresses these problems. It concludes with a section that offers options that the Legislature may wish to consider regarding the policies that the State Allocation Board should use for the equitable distribution of bond funds.

HISTORY OF THE STATE ALLOCATION BOARD AND ITS ROLE IN SCHOOL FACILITY FINANCING

There is a long and complex history regarding public school construction in California. This paper begins a review of the history in 1947[1] when the state legislature created the State Allocation Board.[2] Chapter 243, Statutes of 1947, established the State Allocation Board[3] as a successor to the Post War Public Works Review Board. That statute specifically authorized the board to allocate funds for building and repairing schools. In addition, it designated the State Allocation Board to make allocations for public works projects when no other state officer or agency had authority to appropriate state or federal funds.[4] Although it had many other fund allocation requirements during its five-decade history, the State Allocation Board today allocates funds only for school construction and renovation.

Composition of the Board

The State Allocation Board is comprised of seven members: two Senate members appointed by the Senate Rules Committee; two Assembly members appointed by the Speaker of the Assembly; the Director of the Department of General Services or his/her designee; the Director of the Department of Finance or his/her designee; and the Superintendent of Public Instruction or his/her designee. This appointment structure has existed since the Board's inception in 1947.[5]

Although its basic appointment structure is set in statute, its actual membership changes over time. One member, Senator Leroy Greene, served on the Board for over 20 years. Some Board members have served for only one meeting, while others have served an entire legislative session.

The four legislatively appointed State Allocation Board members provide a strong policy influence to the State Allocation Board. Through them, other members of the Legislature have input into the Board's policy and decision-making processes.

Policy Requirements

Members of the State Allocation Board are charged to formulate fair systems for determining priorities among project proposals. Prior to the passage of Proposition 1A/SB 50 in 1998, the Board was responsible for developing a fair and equitable appeals process that addressed the "special needs" of school districts. Such "special needs" included disaster relief, inability to secure matching funds, or inability to locate affordable property.

Board members also had extraordinary power to set school facility financing policy. Although the Board falls under the auspices of the State Administrative Procedures Act, it has often ignored the Act's provisions. It was common that board policies were changed from meeting to meeting, and that these new policies were not readily made public.[6] Therefore, school districts that were uninformed of existing policy operated at a distinct disadvantage. They may not have known the appropriate procedures for receiving

financing approval. Conversely, school districts that utilized hired consultants or had staff that regularly monitored the Board's actions knew exactly what mechanisms and procedures would be necessary for them to secure funding.

State Allocation Board Staff

The Office of Public School Construction (formerly the Office of Local Assistance), within the Department of General Services, was and continues to be responsible for providing staff work that is necessary to carry out the policies and implement the various programs of the State Allocation Board. The State Allocation Board is responsible for policies regarding the allocation of funds for building new schools and for repairing, upgrading, and rehabilitating old ones.

The Office of Public School Construction staff is also responsible for disseminating to school districts information regarding board policy and programs. Under its previous programs, the staff was responsible for making recommendations to the State Allocation Board regarding various appeals made by school districts that may have been denied funding, or that may have required special funding consideration. To that end, the Office of Public School Construction staff influenced where school districts fell on the long queue of project proposals considered and passed by the State Allocation Board. Staff also could have influenced Board decisions by advocating for specific school district projects.

Outside Influence

The State Allocation Board and the Office of Public School Construction staff have also been influenced by a variety of external interest groups. These include, but are not limited to, private school facility financing consultants, school board members, school administrators, teachers, parents, developers, California Building Industry Association, financial institutions, and other members of the Legislature. In addition, various state agencies with influence included the Division of State Architect, Department of Finance, and the Department of Education. These interests groups played and are likely to play a significant role in determining funding for projects that may have been denied or required special consideration. Consultants in particular, whether employed by or on contract with school districts, played an active role in the process. Many of these consultants, whose offices are in the same building as that of the Office of Public School Construction, influenced decisions of both the Office of Public School Construction staff and the State Allocation Board. Consultants were current on Board policies and procedures, and were highly sophisticated about the complicated processes that school districts must follow in order to obtain funding. They have been instrumental in shepherding proposals through the complex maze of funding phases - application to construction. School districts that did not contract with such advocates were often at a competitive disadvantage.

Evolution of State Allocation Board Programs—From Loans to Grants

The State Allocation Board has evolved markedly during the past five decades. Initially, its school programs provided resources to school districts via *loan programs* in which

districts were required to repay their assistance with property tax revenues. In addition, school districts used local school bonds to finance their various construction projects. In both cases, a two-thirds popular vote was required.

Proposition 13

With the passage of Proposition 13 in 1978, the State Allocation Board's loan orientation was significantly altered. Under Proposition 13, the amount of tax that property owners paid was limited to no more than one percent of the assessed value of their property. Local property tax revenues diminished, and the burden to fund many local government programs was shifted to the State, including public school construction. Further, local governments lost much of their property taxing authority, and the Legislature and Governor were forced to rethink how school districts could repay their existing loans to the State Allocation Board.

Recognizing that many school districts faced bankruptcy by being unable to service their loans, the Legislature in 1979 directed the State Allocation Board to allow school districts four options: (1) withhold payments on their loans; (2) temporarily delay their payments; (3) pay only a portion of their loan obligations; (4) or not pay back their loans at all. Further, with the implementation of these options, the Legislature required that the State Allocation Board shift its policy focus from a *loan-based* program to a *grant-based* program. This shift to grant-based programs remains today.

HISTORY OF SCHOOL BOND INITIATIVES—A CYCLE OF UNDER-FUNDING

The electorate of the state has been ultimately responsible for determining the availability of resources for school construction. The electorate must have confidence in the state's economy, and perceive a need for new and upgraded schools. Without such assurances, the electorate can and has rejected various bond efforts. Since 1949, voters have been asked to approve 24 bond measures related to school construction and renovation, and have passed 21 of these proposals. However, an interesting history follows regarding the content of these initiatives.

State as a Bank—The Loan Program 1949-1978

Legislation enacted in 1949[7] and 1952[8] established a loan-grant program "to aid school districts of the State in providing necessary and adequate school sites and buildings for the pupils of the public school system."[9] During this time period, the first baby boomers entered school, and for the next two decades, California public school enrollment increased by roughly 300 percent.[10] The Legislature recognized that many school districts faced substantial enrollment growth, while lacking the bond debt capacity that was necessary to finance large building programs. In fact, many school districts had reached their financial capacity to service the bonds that they previously incurred.

As a result, the Legislature developed a program to provide loans to school districts that were approaching or were likely to exceed their legal level of bonded indebtedness.[11] This new program was financed through State general obligation bonds. This program also required building construction standards and placed fiscal controls on the districts, including maximum cost standards and square feet per pupil limitations.[12] School districts, however, retained control over the design and construction of their facilities. Districts that wanted to participate in the state loan program were required to receive approval from two-thirds of their district's electorate in order to incur the debt. A surcharge on the local property tax provided revenues to service the loan debt.

The State formula provided that the total amount due on some loans would be less than the total amount of the actual loan. Some experts believe that the state's willingness to forgive part of school district loans through this formula was a precursor to the state grant program discussed below.

The First Loan Program Bond Initiatives

In 1949, the state issued its first bond proposal for education facilities financing[13] in the amount of $250 million.[14] This first initiative also began a cycle of inadequate funding. In that year, the Legislature thought that $400 million was necessary (over what school districts could afford above their debt limits) to meet the need of school districts that were facing enrollment growth from the new generation of baby boomers. However, after substantial debate, the bond proposal was reduced to $250 million, because the sponsors thought, "the people would not vote for such a large sum at one time."[15] In arguments

against the bond, opponents argued that $250 million was insufficient. Therefore, absent full funding, voters should reject the initiative. The measure passed.

In 1952, another school construction bond of $185 million was put before the voters. Proponents of this initiative stated that the amount was "extremely" conservative. A comprehensive study by the State Department of Education at that time revealed that $198 million was needed, while the Department of Finance estimated the need at $250 million. Again, the amount of needed resources surpassed the amount proposed, and the cycle of chronically under-funded facility financing for schools continued.

To further exacerbate the shortfall, the 1952 proposition, along with subsequent propositions offered in 1956, 1958, and 1960, included "poison pill" language that limited the Legislature's ability to appropriate any additional funds for school construction beyond that in the various propositions.[16] If the Legislature approved any additional resources for school construction, the amount of bonds that were sold would be reduced by an amount equal to the additional appropriation. After 1960, however, bond proposals excluded the language that precluded the Legislature from raising additional capital outlay funds.

During a two-decade period, the State Allocation Board administered this program as a bank. Resources from the state were limited, and many school districts were uncomfortable with the concept of borrowing money from the state, rather than from their local constituents. Further, since school districts were obligated to reach full bond indebtedness before applying for state loans, many did not participate. For these reasons, many school districts chose not to build facilities until their bonding capacity grew. Hence, many school districts found themselves chasing dollars after their schools were overcrowded—a situation not unlike today.

The Early 1970s

As a result of a major earthquake in the San Fernando Valley (Sylmar) in 1971, the state authorized $30 million[17] for a new program to finance the rehabilitation and construction of earthquake safe schools,[18] and for the renovation of buildings that the earthquake damaged.[19] This program was known as the School Buildings Safety Fund. Like its predecessor programs, the 1971 Act created a state loan program for eligible school districts. The Act also included provisions to forgive loans for school districts that had reached their bonding capacity. The 1971 program was augmented by a 1972 state bond initiative of $350 million of which $250 million was set aside for structural repairs due to earthquakes.[20] This latter bond initiative also provided a method for financing buildings in districts that did not meet the criteria of the program that was initiated in 1971,[21] and it required the State Allocation Board to first approve those applications from school districts for earthquake repairs. The State Allocation Board gave second consideration to funding projects for other types of repairs or upgrades. Hence, the Board began a new system for not only new construction but also repairs, as well as a system that set priorities.

A Changing Paradigm

From 1970 to 1980, public school enrollment statewide decreased by roughly one percent per year.[22] Reductions in both immigration and domestic in-migration to the state, as well as a decrease in the state's birth rate caused this decline. During this decade, there were sufficient resources available from local property tax revenues and from the state's loan program to meet the various rehabilitation needs especially of those school districts that were experiencing enrollment declines. The State Allocation Board thus shifted its loan program emphasis from new construction to rehabilitation, and to upgrading unsafe facilities that were damaged due to the 1971 earthquake.[23]

Nevertheless, some school districts continued to experience enrollment growth in response to suburban housing development.[24] In spite of such growth patterns, the State Allocation Board set its priorities to favor rehabilitation projects over new construction. The Board's orientation accentuated the differences between growing school districts and those that required rehabilitation, and caused an unequal state spending system that favored property rich urban districts over fiscally poor and growing suburban districts.[25]

To counter the State Allocation Board's orientation toward urban rehabilitation, growing suburban school districts recognized that in order to fund new school construction, they would have to depend almost entirely on their local property tax base. As more people demanded affordable housing in suburban neighborhoods, developers accommodated them by building numerous suburban housing units. The sheer increase in the number of suburban homes added significant resources to the property tax base, thereby benefiting the school districts that served those communities. Furthermore, the ongoing demand for suburban housing caused the prices of homes in these areas to increase precipitously, adding even more resources to the property tax base. Although school districts could have requested to reduce those tax rates that supported them to a minimum amount, they did not. Most districts kept their rates steady, and some even increased them. Homeowners, unhappy about menacing property taxes, sought relief. In 1972, the Legislature enacted a multi-year package, funded by the state's general fund, of $1.2 billion for school operation to be allocated over a three-year period and to serve as property tax relief.[26] In spite of this legislation, property taxes remained relatively high to cover local bond debt, and continued to be the primary source for school construction for growing school districts. Concurrently, the state continued to loan money to enrollment-static school districts for the purpose of rehabilitation.

Leroy Greene State School Building Lease Purchase Law

In 1976, the Leroy Greene State School Building Lease Purchase Law was signed into legislation.[27] This law established a state fund to provide loans to school districts for reconstruction, modernization, and replacement of school facilities that were more than 30 years old. The Act significantly altered the state's role in how school facilities construction was financed. Specifically, the state would no longer loan money; but it would finance school construction based on a leasing model.[28] Although the legislation was passed, the voters of the State remained unconvinced that more money was needed to

improve schools. Consequently, they did not pass the bond initiative that was necessary to fund the Lease Purchase Program.

The 1976 Act had specific language that created "priority points" for school districts that would apply for state funding. This was the first time that the State Allocation Board used a point system for creating a queue of approved projects. Priority points were given based on the number of unhoused students in the district, the rate of student enrollment growth, and how much rehabilitation a facility needed. Further, the Board instituted a first-come, first-served policy in which each accepted school district's application was stamped with a time and date.

Under the previous program, the state loaned money to school districts to build their facilities, and the school districts owned their property. Under the Greene legislation, however, the State maintained a lien on the property for the duration of the loan via a lease purchase agreement.[29] The State wanted to preclude school districts from purchasing land on a speculative basis using State money, only to sell the State funded property at a profit at a later date. This meant that the state would control the disposition of any school facility that it financed until the school district repaid its obligation on the lease.

The Proposition 13 Epoch 1978-1986

Proposition 13—Local Governments and School Districts Fiscally Stymied

With its passage, Proposition 13 eliminated the ability of local school districts to levy additional special property taxes to pay off their facility indebtedness. Proposition 13 capped the ad valorem tax rate on real property at one percent of its value, thereby reducing the income from property taxes to such an extent that it virtually eliminated this source as a means for lease payments. Proposition 13 also prohibited the electorate of a school district from authorizing a tax over-ride to pay debt service on bonds for the purpose of constructing needed school facilities.

To exacerbate this problem, the voters soundly defeated school construction bonds in both 1976 and 1978. They were two of only three[30] state general obligation bonds rejected by voters since 1947. The non-passage of these two successive bond initiatives, coupled with suburban enrollment growth, caused a statewide shortfall of $550 million[31] that was needed for school construction projects throughout the state in 1978.

Post Proposition 13

The limitations set by Proposition 13 caused school districts, counties and cities to turn to the state, which had a $3.8 billion surplus, to fill the gap.[32] In 1979, lawmakers approved a $2.7 billion (in 1978 dollars) "bailout" plan to assist schools and local governments.[33] Within a year, the state surplus was reduced to roughly $1 billion. Furthermore, the state had taken on a larger role as a funding source for school operations and capital improvement. To that end, it expected school districts to conform to its programs and projects.[34]

Effects of Proposition 13 on the Lease Purchase Program

In 1979, legislation implementing Proposition 13 included provisions for restructuring the State's Lease Purchase Program.[35] School districts that received funds from the state were required to pay rent to the State as low as $1 per year, creating an "unofficial" grant program.[36] In addition, school districts were to contribute up to 10% of the project's cost from local funds.[37] However, many school districts could not raise these matching funds through local bonds. They requested that the State fund their entire projects. The State Allocation Board created a waiting list of projects.

A Recession Further Complicates School Facility Financing

Beginning in 1982, California was in a recession that lasted until 1984. During this time period, the State's budget surplus was expended. School districts' recession experiences were complicated by the fact that student enrollments again began to increase again.[38] Approximately 60 percent of California's 1,034 districts at the time projected annual growth rates of over two percent between 1980-81 and 1983-84, with some districts projecting a doubling in their enrollment.[39] At the same time, estimates indicated that over one-third of the State's school buildings were over 30 years old and many needed substantial rehabilitation.[40] The Coalition for Adequate School Housing (CASH) estimated that the one-time cost of rehabilitating these older facilities would be $1.9 billion.[41] Further, CASH estimated that school districts would need an additional $400 million annually for the next five years for building and repairing school buildings. Since the State was in recession, such funds were not available. Thus the State had to rethink how it would prioritize its school facilities projects.

A New System for Funding School Construction

In light of the backlog of applications for state funds, the Office of Local Assistance (now known as the Office of Public School Construction) designed a numerical ranking system that used "priority points" to determine a school district's eligibility for funds. This system gave priority to school districts who had students who were "unhoused," and special consideration was given to how districts used certain facilities.[42] The more points a project application received, the higher on the list it was placed. Recognizing that school districts were facing enrollment growth and required further rehabilitation, the Legislature in 1982 authorized a general fund appropriation of $200 million for school construction projects. This amount was later reduced to $100 million.[43]

Further, in order to ease the burden that many school districts felt because of the recession, the State loosened the repayment schedule for its lease-purchase program. School districts were allowed, for 10 years, to pay one percent of the cost of state funded lease-purchase projects, rather than the 10 percent they initially were required to pay.[44] Again, the State Legislature and the State Allocation Board moved away from a loan program and more toward a grant program.

Multi-Track Year-Round Education

Recognizing that the State had very limited bond resources, the Legislature wanted a more cost-effective facilities financing incentive system for school districts. That system would force districts to use their space more efficiently. In response to the shift in policy, the Legislature passed Chapter 498, Statute of 1983. This statute encouraged school districts that were experiencing growth pressure to adopt multi-track year-round education (MTYRE) programs. MTYRE programs enroll students in several tracks throughout the entire calendar year. At any given time, one track is on vacation, but vacation periods are short in duration.[45] The MTYRE program allows a more intensive use of existing facilities, thereby reducing the need for new facilities in growing districts.

School districts received an immediate financial return if they participated in the MTYRE program. A school district that redirected its students into a MTYRE program received a grant of up to 10 percent[46] of the cost that would be necessary to build a new facility not to exceed $125 per student.[47] School districts that participated in MTYRE were eligible for air conditioning and insulation in their buildings.

In 1988, as pressure for state financing continued, the Legislature required that top priority for financing new construction projects be given to districts that used multi-track year-round education programs. School districts that offered MTYRE and were willing to match 50 percent of their construction costs received a funding priority from the State Allocation Board.[48] This put other school districts that could not meet these MTYRE and funding criteria at a distinct disadvantage. These latter school districts sought relief from the voters in 1986. Small school districts were one exception to the MTYRE requirement.

1986 Lease Purchase Program

In 1986, the voters approved Proposition 46. Proposition 46 amended Proposition 13[49] by restoring to local governments, including school districts, the ability to issue general obligation bonds and to levy a property tax increase to pay the debt service subject to a two-thirds vote of the local electorate.[50] This amendment allowed school districts to augment the one-percent cap on property taxes and to secure additional bond indebtedness to build and improve their schools.[51]

Passage of Proposition 46 helped, but did not solve school districts' financing problems. Many school districts were unable to secure the necessary two-thirds vote to authorize local funding, and still relied on state funding to assist them. Further, the federal government in 1986 passed legislation that required each state to remove friable asbestos from their educational facilities – another charge that the school districts could ill afford.

California adopted similar asbestos standards to those established by the federal government in 1986; however, few school districts reported their estimated costs for removing the substance. In light of the need to remove the asbestos, and in order to address the growing backlog of proposed school construction projects, voters passed Proposition 79 in 1988 - an $800 million bond initiative. It specifically set aside $100 million to cover asbestos removal.[52]

A Growing Shortfall and Greater Scrutiny

There is no doubt that from 1982 to 1988 state support for public school construction was limited and difficult to secure. The demand for new school facilities, for modernization, and for asbestos removal was great.[53] As of June 1, 1986, applications that were submitted by school districts to the State Allocation Board for state funding of *new school construction* projects alone totaled roughly $1.3 billion. In addition, applications for state funding for *reconstruction or rehabilitation* of school facilities totaled over $991 million.[54] Total demand for school facility improvement in 1986 was nearly $2.3 billion - an amount that significantly outweighed the $800 million voters approved in that year's bond initiative.[55] Even with a boost of funding of $150 million per year from Tidelands revenues in fiscal years 1984 and 1985, the Lease Purchase Program fell short.[56] By 1988, the shortfall had grown to $4 billion, in spite of the fact that voters had approved $2.5 billion in bond money from 1982-1988.

The State Allocation Board was forced to scrutinize every request for school construction funding, recognizing that absent a major infusion of State bond money, most districts would not receive funding for their projects. This scrutiny created an extremely competitive environment for the limited resources that were available to the schools. Many participants believe that school districts that contracted with knowledgeable consultants, or had district staff who were familiar with the State Allocation Board's policies and criteria, were the most successful in securing a high ranking place in the queue for resources, once those funds become available.

There is no definitive research or data that support this belief. Consultants are not required to report their involvement in the application process. However, there is substantial anecdotal evidence to support the assertion.

School Financing as a Collective Effort—The Three Legged Stool

In 1986, the Legislature recognized that resources were scarce and that no one governmental or private entity could finance school construction. It attempted to equalize the burden of school facilities financing between state government, local government and the private sector.[57] This concept was known as the "three legged stool." The idea was that the state would provide funds through bonds. Local government would provide its share through special taxes, general obligation, Mello-Roos and other bond proceeds. The private sector would provide funds through developer fees. Appendix A describes funding alternatives for these latter two legs of the stool.

The "three legged stool," however, never quite worked. For example, to assure that developers would not fund a disproportionate share of the cost to build schools, the Legislature, in 1986, capped the amount new homebuyers would pay for developer fees at $1.50 per square foot, and empowered the State Allocation Board to raise the cap by a certain amount each year. However, school districts found a loophole around the cap by requesting that cities impose a fee on their behalf, and cities imposed rates on some

developers that exceeded those allowed.[58] California courts upheld these fees in the Mira, Hart, Murrieta court cases.

Until the recent passage of Proposition 1A, many local governments have imposed developer fees that exceed those allowed by the Board. For example, in 1987, fees in San Diego and Orange counties reached a high of $8700 per house.[59] By 1990, total development fees for some homes reached $30,000.[60] Statewide, developer fees have increased from $31 million in 1978 to $200 million in 1997.

In 1998, the State Allocation Board increased the fee to $1.93 per square foot.[61] With the passage of Proposition 1A in November 1998, however, local governments have apparently lost their ability to increase their fees beyond those determined by the State Allocation Board. Further conflict is likely.

The 1990s—Complicated Funding Programs

In the fall of 1990, the Legislature passed legislation that created two programs that provided additional financial incentives for schools to offer year-round education.[62] The first of these programs provided a one-time grant to school districts to ease the expense of changing from traditional nine-month programs to year-round tracks. The second program provided an "operating grant" of between 50 percent and 90 percent of the amount districts saved the state by not having to build new schools. At the recommendation of the Office of the Legislative Analyst, the Legislature repealed the 1982 and 1986 incentive programs discussed above.[63]

In response to the 1990 legislation, the State Allocation Board developed a new priority system for allocating lease purchase money. Under this new system, the Board apportioned funds based on a combination of when an application was received and how many priority points it garnered. Through a complex formula, priority points were given to schools that had a significant number of "unhoused students," or had substantial rehabilitation needs. This procedure might have worked well if the state could have financed all applications in a timely manner. However, the demand for state money increased to the point where districts without special priorities could expect to wait years for the state to finance their projects.

The program was in effect for only one year when the Legislature repealed the program and created yet another system for allocating state money.[64] In 1991, the Legislature defined six priorities for funding. First priority was given to districts that had a "substantial"[65] enrollment in multi-track schedules, and that were paying at least 50 percent of the construction costs for their new schools. Second priority went to districts with a "substantial" year-round enrollment and that wanted the state to pay the entire cost of any new construction for their year-round schools. The remaining four priority levels took into consideration factors for those schools who did not meet the "substantial enrollment" criteria outlined above, or were unable to match state resources.

The complex set of formulas made it difficult for school districts to completely understand what criteria would best serve them. Further, throughout this period, the Board was

required to implement new programs and redefine its priorities. For example, in 1990 the Legislature created a program that was adopted by State Allocation Board for school districts that could not find adequate land on which to build a school. Known as the Space Saver Program, it was designed to assist urban school districts that could not obtain adequate acreage for a school campus. The first space saver school, developed in 1993, is scheduled to be completed in Spring 2000 in the Santa Ana Unified School District, in a former shopping mall.[66]

Another example of shifting priorities took place in 1996 when the Legislature mandated the Board to redirect its third highest priority to class size reduction from a previous focus on child-care facilities.[67] A third took place at the end of 1997 when the priority points system was replaced by a first-come, first served system. While there were exceptions to this rule, money was offered first to school districts willing to cover some of the costs associated with constructing or repairing facilities. Schools that could not afford to cover the remaining 50 percent were placed on a separate list.

Such shifts in policy, coupled with the significant complexity of formulas that drove the priority point system, along with the sporadic creation of new programs, caused many school districts to depend on outside consultants. These consultants understood the many policy changes that the Board enacted – sometimes on a monthly basis. They were also knowledgeable of new programs, and clearly understood the workings of the staff who carried forth the Board's policies. Without the assistance of consultants, school districts were unable to keep track of policy changes and special considerations enacted by the Board. Further, while the Board and its staff advised school districts regarding changes in their policies in a regularly published document, it did not provide a centralized source of materials, such as an up-to-date handbook. Consequently, school district personnel were often uninformed about the various nuances of the programs administered by the Board.

State Bond Efforts of the Nineties

As the State Allocation Board shifted its focus and policies throughout the early 1990s, Californians approved state school bond initiatives in 1990 for $1.6 billion and in 1992 for $2.8 billion. In one of its 1992 reports, the Department of Finance reported that statewide K-12 enrollment was estimated to grow by 200,000 new students per year for at least five years,[68] and that an estimated $3 billion would be needed annually for new school construction.[69] However, in spite of growing enrollments and a significant demand for facility rehabilitation, in 1994, the electorate rejected a $1 billion bond initiative. The State was in a recession.

A lack of State bond funds was not the only problem associated with the allocation of school construction funds. The Auditor General reported in 1991 that the Office of Local Assistance mismanaged state funds. It detailed that construction funds loaned to school districts were not recovered; that districts overpaid on some projects and failed to collect the overage; that it dispersed funds without proper documentation; and that it failed to conduct required close-out audits on construction projects.[70]

As a result of this audit, the Office of Public School Construction in concert with the State Allocation Board developed stringent internal and external audits and fiscal controls. These control mechanisms included increasing the detail of financial review of projects, prohibiting school districts from participating in the program unless a balance was not due, and no longer receiving rent checks for portable classrooms.[71]

Attempts to Ease Passage for Local Bonds

Recognizing that the State would be unable to fund the entire backlog of school construction proposals, Governor Pete Wilson in 1992 proposed a constitutional amendment to reduce the requirement for the passage of local bonds from two-thirds to a simple majority.[72] The idea was that local governments should have to meet the same 50 percent requirement as the State for passing bonds. Further, there was strong sentiment in the Wilson administration that local governments should pay an increased share of school construction costs. However, the Legislature rejected his plan.[73] Other attempts in recent years to reduce the vote for passage of local bonds from two-thirds to something less have also failed.[74]

1996 School Bond Issuance - Finally More Money

Proposition 203, passed by the voters in March 1996, provided $2.065 billion for school facility construction. However, the Legislature at the time estimated that school districts would need $7 billion in construction funds to meet enrollment growth that was anticipated during the next five years.[75] This $7 billion did not include the needs of Los Angeles Unified School District (LAUSD), which had 20 percent of the state's student population. At the time, LAUSD alone needed $3 billion to upgrade and modernize its schools.[76] Clearly, anticipated demand for State funds substantially exceeded available resources.

To respond to the many school district proposals, the State Allocation Board followed its general priority points policy. However, many school districts, recognizing that they would not receive funding for years because of their position in the funding queue, and because of the limited amount of resources that were available, resorted to creative means to try to secure funding for their projects. For example, some schools districts sought special consideration for funds by requesting emergency allocations. Such a tactic would allow a school district to receive funds immediately.[77] Other school districts used the appeals process to argue that their projects were needed more than those of other school districts that were higher in the queue.[78]

This cannibalistic dynamic caused a fair amount of resentment among those school districts that were bumped from a relatively high position in the queue by those districts that sought emergency relief or special consideration. Further, it was clear that the most sophisticated school districts found a variety of tactics that would secure the funding of their projects. These tactics are described in greater detail later in this paper under the section that describes how the Board processed its applications.

Class Size Reduction Causes Greater Housing Needs

The distribution of funds from Proposition 203 was further complicated by the Governor's Class Size Reduction Initiative. In particular, the State Allocation Board earmarked $95 million for the purpose of purchasing 2,500 portable classrooms for schools that were facing severe classroom shortages. This was in addition to $200 million that the Department of Education had available for assisting schools in purchasing such facilities. The Office of Public School Construction determined that a total of 17,500 classrooms were needed to accommodate class size reduction, and that there was only enough money to fund less than half of the estimated need.[79] The State Allocation Board reinterpreted Proposition 203 by creating a new Portables Purchase Program at the expense of their other programs. This caused some school districts to again get bumped in the queue for funding.

Never Enough Money—Still a Shortfall

Since1947, the electorate has approved all but three State bond initiatives. In spite of the voters' tendency to support various bond initiatives, by 1998, the backlog of school construction projects that were approved by the State Allocation Board, but unfunded, totaled more than $1.3 billion. Although the voters have been generous by approving bond initiatives roughly every two years,[80] there were times during the past five decades when bond money was not available for periods of four or six years.[81]

The Department of Finance has estimated that $16 billion is needed over the next decade for public school construction and rehabilitation.[82] Various bond proposals in 1997 and 1998 were circulated that considered multiple-year bond issuances. The California Teachers Association and the California Building Industry Association presented a plan to issue $2 billion a year for 10 years.[83] Governor Wilson proposed $2 billion a year for four consecutive years. In the end, Proposition 1A was passed. It provides $6.7 billion over a four-year period. However, while the amount appears generous, it will not be enough to meet the entire anticipated need of the state. Based on the Department of Finance projections, the six years following this bond issue will require roughly an additional $10 billion in State money.

Table 1 on page 18 shows the history of state school bond initiatives from 1949 to 1998. In the next sections of this report, we discuss the various programs, the complicated application process used by the State Allocation Board that school districts had to endure to secure funding, and how Proposition 1A attempts to simplify this process.

Table 1 - STATE SCHOOL CONSTRUCTION BONDS		
Title of Bond Initiative	Date & Year of Election	Funds Authorized
School Building Aid Law of 1949	November 8, 1949	$250,000,000
School Building Aid Law of 1952	November 4, 1952	$185,000,000
School Building Aid Law of 1952	November 2, 1954	$100,000,000
School Building Aid Law of 1952	November 4, 1958	$220,000,000
School Building Aid Law of 1952	June 7, 1960	$300,000,000
School Building Aid Law of 1952	June 5, 1962	$200,000,000
School Building Aid Law of 1952	November 3, 1964	$260,000,000
School Building Aid Law of 1952	June 7, 1966	A)$275,000,000
School Building Aid Law of 1952	June 6, 1972	B)$350,000,000
School Building Aid Law of 1952 And Earthquake	November 5, 1974	$150,000,000
School Building Lease-Purchase Bond Law of 1976 (Failed)	June 8, 1976	$200,000,000
School Building Aid Law of 1978 (Failed)	June 6, 1978	$350,000,000
School Building Lease-Purchase Bond Law of 1982	November 2, 1982	$500,000,000
School Building Lease-Purchase Bond Law of 1984	November 6, 1984	$450,000,000
Green-Hughes School Building Lease-Purchase	November 4, 1986	$800,000,000
School Facilities Bond Act of 1988	June 7, 1988	$800,000,000
1988 School Facilities Bond Act	November 8, 1988	$800,000,000
1990 School Facilities Bond Act	June 5, 1990	$800,000,000
School Facilities Bond Act of 1990	November 6, 1990	$800,000,000
School Facilities Bond Act of 1992	June 2, 1992	$1,900,000,000
1992 School Facilities Bond Act	November 3, 1992	$900,000,000
Safe Schools Act of 1994 (Failed)	June 7, 1994	$1,000,000,000
Public Education Facilities Bond Act of 1996, Proposition 203	March 1996	C)$3,000,000,000
Class-size Reduction Kindergarten-University Public Education Facilities Bond Act of 1998, Proposition 1A	November 3, 1998	D)$9,200,000,000

Bonds in [bold] failed to receive a majority of votes.

A) New amount of 1966 bond authorization available for regular program is $185.5 million after deducting $35 million reserved for compensatory education facilities, $9.5 million for regional occupational centers, and $35 million for rehabilitation and replacement of earthquake damaged and unsafe schools.

B) Up to 250 million dollars earmarked for rehabilitation and replacement of unsafe schools.

C) One billion dollars earmarked for higher education facilities

D) Two and one-half billion dollars is allocated for higher education.

THE PROGRAMS

Prior to the approval of Proposition 1A, the State Allocation Board oversaw six active programs associated with school facility construction, repair, and remodeling. These six programs made up the Lease-Purchase Program that was discussed earlier in this paper. This section briefly describes these programs, discusses how the State Allocation Board set priorities for school district projects, explains how the Office of Public School Construction staff reviewed and acted upon district proposals, and how the State Allocation Board considered district appeals. The purpose is to advise the reader of not only the process and administration of allocation, but also some of the pitfalls that existed under the old system. Perhaps these pitfalls of the old system can be avoided when allocating Proposition 1A resources.

The Growth and Modernization Programs

The Growth and Modernization Programs allocated funds to school districts for building new schools (Growth Program) and for repairing existing facilities (Modernization Program). School districts qualified for the Growth Program based on an "allowable building standards" formula.

For its Growth Program, the State Allocation Board developed standards for the amount of space that was necessary to house students based on a district's number of ADA (Average Daily Attendance).[84] The Modernization Program provided funds to school districts for nonstructural improvements to permanent school facilities that were more than 30 years old, and for portable buildings that were more than 20 years old. Such nonstructural improvements included interior partitions, air conditioning, plumbing, lighting and electrical systems.

The Modernization Program provided funding for up to 25 percent of the replacement value of the building. Under some circumstances, districts could use additional funds beyond the 25 percent for handicap access compliance, including elevators when appropriate, and for alternate energy systems.

School districts could apply to this program by offering to match state funds and be listed as "Priority One," or they could ask the State to fund their entire project and be listed as "Priority Two."

Process for Receiving Growth and Modernization Funds

School districts that applied for growth and/or modernization funds were required to follow nine steps in three critical areas - planning, site selection and construction. Each of these three critical areas provided a separate and gradual funding stream for the school's project.

Planning Phase

During the planning phase, a district was required to complete four forms that demonstrated that it was eligible for either the growth or modernization program.

Eligibility to participate in the programs was based on enrollment patterns or the age and condition of those schools that required modernization. If a district met these standards, it moved on to the "site development phase."

Site Development Phase

Selecting a school site was critical. If a school district was participating in the modernization program, it would move to the next phase. The site would have to be safe and able to support the school's curriculum. An adequate site would have to meet certain standards with respect to size and location. Site review could take a school district months (if not years) to investigate. Under the growth program, a school district arranged a search committee to locate available properties and narrowed its search to three sites. In addition, the school district held public hearings regarding the impact of the lands to be used for educational purposes, and notified neighbors about possible site use. A representative from the Department of Education visited three selected sites to review and determine which was the most suitable site based on criteria including, but not limited to: street traffic safety; traffic congestion; geological hazards; and other environmental issues. All school districts followed a similar process for site selection whether they financed the project themselves, or requested State funding.[85]

Some school districts were unable to build new schools because they could not secure appropriate properties. This was especially true in urban and industrial areas where vacant land was not readily available or was extremely expensive.[86]

Once a district found an appropriate property, it was required to prepare a site development plan that included architectural and engineering drawings, along with building contract agreements. Districts were required to follow strict site development, plan development, and construction cost guidelines in order to be eligible for state funds.[87] Once these guidelines were met, the district proceeded to the construction phase.

Construction Phase

Every construction project received an allowance for site development and to erect a building. The eligible costs associated with construction for these programs were classified into several broad categories: building construction; site development; energy conservation; and supplemental funding for multi-story construction. In addition, facility funding included adjustment costs associated with geographic and regional differences, or the demolition of an existing structure.

A project architect for each contract developed final plans and documents as part of the project's final stage. These documents were used to establish a construction budget. The Division of the State Architect approved and monitored the district's final plans. After review, a construction apportionment was recommended to the State Allocation Board, which in turn authorized the distribution of funds. Upon completion of all regulatory oversight, the district was allowed to break ground.

The Deferred Maintenance Program

The Deferred Maintenance Program provided a 50 percent State match to assist school districts with expenditures for major repair or replacement of school buildings. Such repairs or replacements were for plumbing, heating, air conditioning, electrical systems, roofing, interior and exterior painting, and floor systems. School districts were required to place one and one-half percent of their general funds into an escrow account in order to receive a State match. For school districts that could not fit the parameters of the modernization program, the deferred maintenance program was the only alternative to receive State assistance.

The State also provided critical hardship funds to repair buildings that might seriously affect the health and/or safety of pupils. When available funding was insufficient to fully fund all hardship requests in any given year, the State Allocation Board created a priority list. However, the State Allocation Board often made exceptions to its list.

The Deferred Maintenance Program differed from the modernization program in that school districts were required to submit a five-year plan as to how their projects would be implemented. The plan displayed a rank for each project, and identified those projects that the school district would likely fund.

Deferred Maintenance Application Process

Based on the most recent available material, the deferred maintenance program had 13 steps, and a school district needed to complete several forms and documents. The 13 steps were divided into categories including a letter of interest, application process, critical hardship project documentation, and fund release.

A school district notified the Office of Public School Construction each year if it wanted to participate. Upon receipt of the initial letter, the Office of Public School Construction would send the district a request for its five-year plan of maintenance needs and an "Annual Application for Funds."

The school district would then provide the OPSC with a list of items scheduled for major repair or replacement,[88] along with its five-year implementation plan. When the district received state funds, it could only expend those resources for those items on the list. It could not redirect any resources toward administrative overhead, repair and maintenance of furniture, ongoing preventative maintenance, energy conservation, landscaping and irrigation, athletic stadium equipment, drapery or blackout curtains, testing underground storage tanks for leaks, or chalkboards.

Once the Office of Public School Construction approved a school district's list of projects it allocated funds accordingly. In cases of hardship, OPSC would visit the school prior to allocating funds. The district's governing board controlled and was responsible for all deferred maintenance funds. These funds were placed in a special escrow account.

The Year-Round Air Conditioning/Insulation Program

The Year-Round Air Conditioning/Insulation Program (ACI) began in 1986, as an incentive program for schools to operate during the summer.[89] In order to participate in the program, a school district was required to have a plan for Multi-Track Year-Round Education, or have 10 percent of its students enrolled in a Multi-Track Year-Round Education program. The ACI program assisted school districts by providing resources for air conditioning and insulation.

Year-Round Schools Air Conditioning/Insulation Application Process

The application process for the ACI program differed slightly for those school districts that had a year-round program from those that were planning a year-round program. However, regardless of their status, school districts were required to complete eleven stages in two phases to receive funding. If a school district had an air conditioning system that needed repair, it could not apply to this program, but could apply for funds under the deferred maintenance program.

A school district completed forms that included information on the buildings and spaces that would be affected, along with a report regarding the project's anticipated start-date. In addition, another application was required that provided information on whether the school site was experiencing enrollment growth, and whether some level of modernization was already in progress. Further, a school district that was not on a year-round schedule was required to show how its year-round calendar would be used. If the district was approved for funding, various allowances were provided to the district.[90] In addition to these allowances, the state would provide funds for gas and electric service, general site development, and air conditioning/insulation construction.

Items that were not covered by this program included costs for heating, window solar film, classroom doors and hardware, re-roofing, lighting, security, interior housing, fire alarm systems, unrelated repairs, installations, and painting.

The State Relocatable Classroom Program

The Relocatable Classroom program was designed to meet the needs of school districts that were impacted by excessive growth or unforeseen classroom emergencies. The State Allocation Board allocated funds for the acquisition, installation, and relocation of safe portable classroom facilities. The State maintained a fleet of 5,000 furnished classrooms that could be leased to school districts for $4,000 per year. Hardship cases could lease portables for $2,000 per year. These portable units were available on a first-come, first-served basis. However, there was no maximum amount of time a school district could keep the portables, and districts were not required to return them. Thus, some school districts have kept the portables indefinitely.

Relocatable Classroom Application Process

In order to participate in either relocatable classroom program, a school district was responsible for site preparation costs including electrical hookup, plumbing connection, a State Architect approved plan, insurance and maintenance. After approval by the Board, the district would be reimbursed for the cost of architect fees, electrical hookup, furniture and equipment, and plumbing installation. However, reimbursements were capped at $9,450 per classroom.

The Unused Site Program

The Unused Site Program was established in 1974 as part of the General Lease–Purchase umbrella. It required school districts and county superintendents of schools to pay a fee for district properties that were not used for "official" school purposes. "Official" school purpose was defined as being used for K-12 education, continuing or adult education, special education, childcare, or administration of any educational units.

This program did not provide funds directly to schools. However, resources generated from the fees that districts paid for unused facilities were used to cover deferred maintenance costs and to service the debt on the state's various school construction bonds. Since the Board simply administered the return of funds to the state, the funds could not be redirected to other programs administered by the Board. Proposition 1A eliminates their fee requirements.

The Office of Public School Construction Staff Review and The State Allocation Board's Appeals Process

The State Allocation Board meets roughly 11 times a year. At each meeting the Board reviews and approves about 200 applications for funding. Prior to the State Allocation Board's review, the Office of Public School Construction staff processes all applications. Before Proposition 1A, the approval processes for the programs, except for the growth and modernization programs, were straightforward. Either a school district's application fit a program's description for reimbursement, or it did not. Due to the complicated nature of the Growth and Modernization programs, "special considerations," or project applications that did not fit in the parameters of the program were placed in a different category. The State Allocation Board approved roughly 90 percent of all growth and modernization projects without special consideration. Issues requiring special consideration could include peculiarities of the proposed site, or the costs associated with a project. The applications were divided into special consents or "specials," and appeals. Both types permitted the Office of Public School Construction staff great latitude in the decision-making process, as they investigated and evaluated school district applications on a case-by-case basis.

A "special" occurred when OPSC staff reviewed a school district's application that did not meet the standards of the program, and determined that an exception should be made. This agreement may have required several meetings between the school district's administration and the OPSC staff. With OPSC staff recommendation, which may have

been inconsistent with State Allocation Board policy, this application would be brought before the State Allocation Board for review. This category was normally granted approval in one action.

An appeal occurred when OPSC staff reviewed a school district's application that did not meet the standards of the program, and determined an exception should not be made. If after several meetings an agreement could not be reached, the school district would bring its case before the State Allocation Board. An appeal was granted only on a case-by-case basis. At times, legislators have spoken on behalf of school districts at Board meetings.[91] The difference in the two types of special considerations was that a school district or its representative would have to defend its actions in an appeal. However, as already noted, only those people who kept up with the process and policy changes were adept enough to tackle an appeal. Therefore, a school district seeking an appeal before the State Allocation Board might seek help from legislators that represented them, or hire consultants. For instance, in the May 1998 State Allocation Board meeting, a well-versed school finance consultant appeared on behalf of the Apple Valley Unified School District. Apple Valley hired both a construction manager and a general contractor to erect its new school, in the face of board policies allowing a school district to hire only one such position. On behalf of the school district, the consultant addressed the State Allocation Board, and pointed out that in five other cases the State Allocation Board had voted in favor of a school district that hired both a general contractor and a construction manager.[92]

Less seasoned district representatives would not have known that the State Allocation Board had already set a precedent for funding projects that include both a construction manager and a general contractor.[93] The OPSC staff was not knowledgeable on this issue and therefore could not be a source of information.

PROPOSITION 1A—A POSSIBLE FIX TO SAB PROCESS PROBLEMS

Proposition 1A not only authorizes an additional $6.7 billion to K-12 schools, but it also offers a fix to several of the process problems discussed above. It replaces the provisions of the previous Lease-Purchase Program. This section discusses (1) the resource allocation provisions of the legislation; (2) the programmatic components of the legislation; and (3) how the legislation improves the resource allocation process over that which existed under previous bond programs.

Total Resource Allocation Provisions of Proposition 1A

The resource allocation system in Proposition 1A is specific and detailed. Bond proceeds are to be allocated in 2 two-year cycles: $3.35 billion available immediately; and $3.35 billion available after July 2, 2000. Of the $3.35 billion that is immediately available, $1.35 billion is earmarked for new construction, $800 million for modernization, $500 million for hardship cases, and $700 million for class-size reduction.

For the second $3.35 billion distribution, $1.55 billion will be available for new construction, $1.3 billion for modernization, and $500 million for hardship cases. There are no resources in the second allocation for class-size reduction.

School districts receive funding for their projects based on a per pupil formula. The formula is based on a statewide average cost for construction, adjusted each January for inflation. The figures are based on unhoused [94]average daily attendance (ADA). The per pupil ADA formula is as follows:

	Growth	Modernization
Elementary	$5,200	$2,496
Middle School	$5,500	$2,640
High School	$7,200	$3,456

It is anticipated that the initial $1.35 billion available for new construction during the first round of allocations will be insufficient to meet the needs of those school districts that are facing substantial enrollment growth. Proposition 1A establishes a priority point system for new construction projects when State bond resources are exhausted.[95] The Office of Public School Construction will process applications on a first-come, first-served basis from subsequent bond offerings.

In addition to the provisions outlined above, school districts that receive bond proceeds are required to set aside three percent of their general funds each year for 20 years for the purpose of deferred maintenance.

Components of Proposition 1A

Proposition 1A establishes three categories for funding. The first is the Growth Program, in which the State finances half the cost of new construction and the school district the other half. The second is the Modernization Program, in which 80 percent of the cost of rehabilitation is provided by the state and 20 percent by the school district. The third category is "hardship," in which the State funds up to 100 percent of the cost for emergency needs, or an increased proportion of its share for new construction or modernization.[96]

Proposition 1A holds harmless those school districts that received State Allocation Board approval for the construction phase of their projects (under the previous Priority 1 - able to provide a 50 percent match). They will receive growth and modernization funds, but under the rubric of the previous "Lease Purchase Program." This grant is supplemented by land costs, site development, and other adjustments.

Another new provision of the Proposition is that school districts can seek modernization resources after a facility is 25 years old, rather than 30 years under the previous program.

Schools districts that had received prior Board approval for Priority 2 projects (100 percent state funding) will have to either indicate their ability to finance 50 percent of their proposed projects or reapply under one of the new programs. If the school district cannot meet the provisions of the new programs, it can apply as a "hardship" case.

The California Supreme Court ruled in 1991 that cities and counties could limit housing development on the basis of the supply of classrooms.[97] Proposition 1A suspends, until 2006, the Court's ruling.[98] With the passage of Proposition 1A, school districts will not be able to limit new housing construction based on a rationale that school facilities do not exist. However, in 2006, if adequate bond funds for new construction are not available, cities and counties can once again deny development. Further, as discussed earlier, the Proposition permits the school board to increase developer fees to up to $1.93 per square foot.[99] Proposition 1A sets up a system where fees can be levied of up to 50 percent and 100 percent of the costs associated with building a school by developers under certain circumstances.

Proposition 1A Improves the Resource Allocation System of the State Allocation Board

Proposition 1A makes several changes to the programs administered by the State Allocation Board. It attempts to simplify the process of applying for funds, consolidates the Board's previous six programs into two, and attempts to create a more equitable funding system. It also makes the State Allocation Board and the Office of Public School Construction staff more accountable for their actions. Table 2 presents the differences between the Board's previous Lease Purchase Program, and the new programs that are initiated by Proposition 1A.

Table 2 - Comparison of Lease Purchase Program to Proposition 1A Programs

	LEASE PURCHASE PROGRAM	SCHOOL FACILITIES PROGRAM PROP 1A
FUNDING FACILITIES	Priority 1 projects-growth and modernization-received 50 percent funding based on actual costs from the state. Priority 2 projects-growth and modernization-received 100 percent funding form the state.	Growth projects receive 50 percent funding based on a per pupil formula from the state. Modernization projects receive 80% funding from the state. Hardship projects can receive up to 100 percent of funding from the state based on three broad categories financial, physical and excessive costs.
CONSTRUCTION EXCESSIVE COSTS & COST SAVINGS	Some excessive costs (i.e., change orders) were reimbursed by the state. Cost savings were returned to the state.	Excessive costs are not reimbursed by the state and school districts keep costs savings.
MODERNIZATION PROJECTS	Buildings must be at least 30 years old.	Buildings must be at least 25 years old.
PROJECT APPROVAL	Projects were approved three times in conjunction with the planning, site acquisition and construction phases.	Projects receive one approval (except hardships that receive two approvals).
FUND ALLOCATION	Funds were allotted after each phase.	Funds are allotted only after DSA approves plans, unless there is a hardship.
MAINTENANCE OF FACILITIES	Required school districts to set aside two percent of their general fund for ongoing maintenance.	Requires school districts to set aside three percent of their general funds for 20 years for ongoing maintenance.
PROPERTY LIENS	State maintains a lien to properties it funds.	State does not hold liens, and existing liens are released.
ARCHITECTURAL APPROVAL	Division of State Architect approved all plans.	The Division of State Architect or a state approved private engineering firm may approve plans.

	LEASE PURCHASE PROGRAM	SCHOOL FACILITIES PROGRAM PROP 1A
DEVELOPER FEES	The cap on fees was $1.93 per square foot; however, cities or counties could levy a higher fee and pass it to schools districts.	The cap on fees is $1.93 per square foot, adjusted biannually. Fees may be assessed up to 50 percent of the costs of a project if a school district has accessed other forms of financing including Mello-Roos, G. O. bonds, and parcel taxes. In order to increase fees, school districts must meet two of four criteria, including MTYRE, local school bond positive votes of 50 + 1 percent, 20 percent of students are housed in portables, 15 percent of bond debt used.
WHEN STATE FUNDS RUN DRY	Projects were placed on a pending state-funding list or charged a city-based developer fee.	Modernization projects may be placed on a pending state-funding list. Growth projects may be placed on a priority points list, or the school district may collect 100 percent of financing from a developer.
CONTAINING DEVELOPMENT (MIRA, HART MURRIETA COURT CASES)	Cities and counties on behalf of school districts were able to contain residential development by suspending the building of new facilities.	School districts can not request cities or counties to prohibit residential development based on a lack of funds or school facilities until 2006.
ARCHITECT & CONSTRUCTION MANAGEMENT FEES	Percentage caps on fees based on size of projects	No caps.
MODERNIZATION PROGRAM	Provides funding to building over 30 years old, and portables over 25 years old. Calculations done on a district basis.	Provides funding for buildings over 25 years old and portables over 20 years old. Provides funding on a site-specific basis.
AIRCONDITIONING-ASBESTOS PROGRAM	Allotted funds specifically to install AC and remove asbestos.	These are now incorporated in the modernization program.

Simplification

To further simplify the process, the Proposition reduced the number of school facility financing phases from three to one.[100] This is now possible because school districts receive a flat grant from the State based on the number of students they enroll, rather than on the estimated cost of a project. Under the previous program, each phase of a project was evaluated independently; thus the cost to the State for any given project could change. Under the new program, a school district receives a single grant for a single project, and cannot request that the state fund additional need beyond the original request.[101]

The Proposition also explicitly requires that the State Allocation Board initiate a public hearing process that notices any policy changes considered by the Board. It requires that the Board make available to school districts written up-to-date documentation that clearly explains its policies, and specifically describes how its new programs work.

Consolidation

Until Proposition 1A, the State Allocation Board administered as many as 13 programs. The most current six are discussed above. With the enactment of Proposition 1A, the number of programs has been reduced to two, along with a special category for hardship cases. This consolidation of programs makes it easier for school districts to choose a program that best suits their needs. It precludes the type of creative tactics that school districts were forced to pursue to match their projects to the right program in order for them to receive funding.

A More Open Process

The Proposition causes a major shift in policy direction for the State Allocation Board. Under its previous programs, the Board funded both new construction and modernization on a 50/50 matching basis. Under Proposition 1A, the Board is required to fund modernization projects more generously than new construction projects, in that the State will fund 80 percent of the cost for modernization compared to 50 percent for new construction.

Another major outcome of Proposition 1A is that the State Allocation Board no longer has the authority to offer grants to school districts that may seek funds for special projects without any real statutory framework. Now school districts must demonstrate that they meet specific hardship criteria set out in the new law. The practical effect of this change will depend on how the Board interprets this provision.

Previous legislation implicitly required that the State Allocation Board follow guidelines set forth in the Administrative Procedures Act (APA); however, the Board did not do so. Proposition 1A explicitly requires the Board to follow APA guidelines. This means that any change in policy or regulation considered by the Board must be properly noticed to the public before the Board can act. This requirement, if the Board follows the full spirit, will allow school districts to be fully informed of Board policies and procedures, as well as its rules and regulations.

PITFALLS IN THE PROCESS PRIOR TO PROPOSITION 1A

This section discusses the State Allocation Board's attempts to improve its system and the pitfalls that existed under the previous programs.

Until recently, rules governing the application process were labor-intensive, both for school districts and the state agency personnel (including the Office of Public School Construction and the Division of the State Architect). In 1989, the Legislature received a report outlining the complex application.[102] The report identified 54 steps school districts had to perform in order to receive application approval and eventual financing. In addition, the process required 24 separate forms.

Process Streamlined Recently

Since 1992, the OPSC has tried to be more efficient. Changes implemented by OPSC included: simplified and streamlined applications; improved response time for application review; improved policy information dissemination; and school districts were empowered to complete their own applications.

The most concrete indication that the Office of Public School Construction was becoming more efficient was in the application process. The application process for the Growth Program was reduced from 54 steps to nine. In addition, the number of forms that were needed to apply for funding was reduced from 24 to four.

School districts complained and begged for applications to be checked and approved for a State Allocation Board meeting agenda in an expeditious fashion. As part of the efficiency movement, the Office of Public School Construction set a goal to reduce the time from when a school district filed a completed application until it was placed on a State Allocation Board meeting agenda from over 400 days to 60 days.[103] Prior to Proposition 1A, applications on average still took longer than the 60 days to be reviewed. However, the office's efficiency achievement by reducing application review days is noteworthy.

In addition, the Office of Public School Construction worked more closely with school districts in the decision making process and provided greater leeway. In particular, school district personnel could self-certify certain information pertaining to a project rather than rely on state agency personnel. The self-certification process removed the time a school district would wait for a response from the Office of Public School Construction. It thereby shortened the application process.

Under its previous programs, it was difficult for school districts to get information pertaining to the funding process from the Office of Local Assistance (OLA) staff or from written materials. The Office of Public School Construction is now more service-oriented.[104] One can obtain information in person or from the office's Internet site.[105] In fact, the staff of the Office of Public School Construction is continually placing more information on the Internet. This information includes an automated project tracking system, Senate Bill 50 regulations, office contacts, and old board policy changes.

School Districts in Line Stand on Shifting Sands

Under the previous allocation system, school districts that completed their applications and were placed in queue were never guaranteed funding in the order their applications were received. The State Allocation Board dictated that school district applications were placed in an unfunded application list on a first-come/first-served basis. However, there were four general ways that school district applications could be "bumped" up or down in the queue.

Broad Classification Decisions

The first way a school district could get bumped was if the State Allocation Board decided to redirect its emphasis and fund a broad category of projects. For instance, the SAB could decide to fund all application projects from small school districts (no matter where they were in queue). If a school district was large, hundreds of proposed school projects could jump ahead in the funding queue.

The second way a school district could get bumped was if the State Allocation Board shifted the specific funding program allocations. Thus, for example, the State Allocation Board could decide to shift funds earmarked for the Growth Program to the State Portable Classroom Program.

Specific School District Decisions

The third way a school district could get bumped was if another school district application in queue with a later application filing date appealed to the State Allocation Board to change its application filing date to be ahead of other school districts. That school district application would be funded first.

The fourth way a school district could get bumped was if an emergency situation occurred and a school district requested critical hardship money from the State Allocation Board. The Board could provide these funds when available.

The application process requires equity and balance in order to ensure fair competition by school districts for State funds. The process needs to be flexible enough to handle emergency situations, yet firm enough to prohibit jockeying among school districts for better placement in the queue.

Proposition 1A halts the movement of funds from one program to another. However, the other examples are still feasible. Jockeying of school districts by consultants for better placement in line may continue to occur. This is especially true as Proposition 1A cannot handle the pent up demand for State funds. The next section discusses options that the Legislature may consider in order to improve this system.

OPTIONS FOR IMPROVING THE SCHOOL FACILITY FINANCING SYSTEM

A Separate List for Small and Rural School Districts

When the Proposition 1A funds are exhausted, new construction project applications will receive priority points for future funding. Small and rural school districts may require separate lists to ensure that they are placed near the front of a funding queue. This is necessary because there is no guarantee that the entire queue would receive future funding. Small and rural school districts, based on the current priority points system, may not receive enough priority points to approach the front of the queue. Larger school district applications, with greater per pupil need, may be able to position themselves high enough in the queue for funding by receiving favorable OPSC evaluations. Proposition 1A allows schools to skip to higher positions in the funding queue if they score higher priority points based on their number of unhoused students or if they can demonstrate a special hardship. *The Legislature may wish to create a separate list for small and rural school districts to create a more equitable system.*

Annual Report and Independent Accounting

In the early 1990s, many state agencies, boards, and commissions, because of budget cuts, postponed writing annual reports to the Legislature. These reports provided financial and policy information to the public. The State Allocation Board was one government entity that has not prepared regular audited reports of its programs' operations and expenditures for public review. The State Allocation Board will receive $6.7 billion over the next four years to fund school construction projects. *The Legislature may wish to require the Board to prepare for the Governor and Legislature an annual report that details how and to whom bond funds were distributed. The Legislature may wish to require that an independent accounting firm or the State Auditor General prepare the Board's report.*

On-Line Technical Assistance

Although the application and funding process administered by the Office of Public School Construction has been streamlined and simplified in recent years, certain components of the process are still cumbersome. The process should be simple enough that school districts do not need to hire consultants or lobbyists to advise them or to shepherd their proposals. *The Legislature may wish to pass legislation that would require the OPSC to develop a technical assistance program to provide school districts with the necessary information and advice they need in order to qualify for and receive bond funds. Such a system could include an automated Internet help-line.*

A Special General Fund Appropriation for School Construction

The State's bond capacity may not be able to fund every State infrastructure need, including schools, transportation, prisons, and water during the next decade. School facility needs are estimated conservatively at roughly $10 billion, while some estimates have put the figure at $40 billion for the next decade alone. According to the Department of Finance, the State can afford to service approximately $25 billion in additional debt. Thus, school facility financing alone could incur the entire debt capacity of the State. *The Legislature may wish to create a special appropriation fund for public school capital outlay as part of the State General Fund to augment the State's bond programs. In addition, the State may wish to design a school construction reserve fund, which is funded from budget surplus revenues.*

APPENDIX A

School District Financing Mechanisms

In addition to state bond funds, school districts have a variety of other alternatives for funding school construction. These include developer fees, certificate of participation, general obligation bonds, and Mello-Roos taxes. Also, a developer may simply build a school rather than consider other financing alternatives.

Local General Obligation Bonds

In 1986, after an eight-year hiatus, school districts could once again use general obligation bonds to finance school facilities. Bonds are a favorable method of financing, even though they require a two-thirds vote and proceeds cannot be used for items such as buses and furnishings. In 1986, 14 school districts offered bond initiatives. In 1987 and 1988, this number grew to 51 and 54 school districts, respectively. In November 1998, 36 school districts held bond elections.[106]

Developer Fees

In 1978, the Wilsona School District was the first to use developer fees. These fees added about $2,000 to the cost of a typical home in the Lancaster area. While school districts were exacting developer fees, there was no statute that explicitly permitted this activity. The Legislature standardized the authority by giving school districts direct authority to charge developer fees. School districts welcomed developer fees especially because they did not require an election, and the funds associated with the fees could be used for a wide variety of facilities that were associated with enrollment growth. In response to a growing number of complaints from developers, the Legislature capped the amount that could be collected in 1986. Proposition 1A prohibited local agencies from using the inadequacy of school facilities as a reason for not approving housing development projects. The authority to raise developer fees was placed with the State Allocation Board. However, developer fees generally are not enough to cover the full costs of constructing a school.

Certificates of Participation

Certificates of Participation (COPs) are another, though complicated, tool for districts to raise money without voter consent. The most common arrangement is that the district leases a new school owned by another government agency or a nonprofit agency, which in turn raises the capital to build the school by selling shares (certificates of participation). In the long run, lien revenues COPs are remarkably like bonds. One disadvantage of the COP arrangement is that it does not provide a new revenue source for the lease payments. Funds usually come from the school district's general fund.

Mello-Roos

The Mello-Roos Community Facilities Act, established in 1982, authorized school districts and local governments to form "community facilities districts." Subject to the approval of two-thirds of the voters, these special districts could sell bonds to raise revenues for the purpose of financing new buildings, or to rehabilitate existing school facilities. A majority of Mello-Roos districts are created in inhabitable areas that are proposed for development where voting is by the landowners. The district sets a specific tax per house.

ENDNOTES

[1] Chapter 243, Statutes of 1947.

[2] If a school district wants state funding for construction or repair of a school, it must apply to the State Allocation Board for the money. There are school districts that repair and construct school buildings without the assistance of the State Allocation Board (i.e., San Diego Unified School District, San Luis Unified School District). However, this report will focus on a school district that requires state support.

[3] Chapter 243, Statutes of 1947. Initially, the State Allocation Board administered a number of Public Works programs for the State ranging from housing and employment assistance to school facilities construction. Various programs include: the Postwar Planning and Acquisition, Construction and Employment Act, Veterans Temporary Housing, State School Building Construction Programs, Emergency Relief Programs, and Community Assistance Programs (State Allocation Annual Report 1983-1984, p. 1).

[4] California Government Code 15502.

[5] Government Code 15490.

[6] While the State Allocation Board submitted policy changes to school districts, an up-to-date handbook was not made available. In addition, turnover of board members and school administrators may lead to ignorance of programs and the program changes.

[10] California School K-12 enrollment grew from 1.689 million students in 1950, to 4.633 million students in 1970 (State of California. Department of Education. Education Demographics Unit. CBEDS Data Collection. "Enrollment in California Public Schools 1950 through 1997").

[11] This is defined by California Education Code, Section 15102, as the legal limit of debt that a school district can incur based on the assessed value of property in that school district.

[12] Known as the State School Building Aid Program. The Legislature determined qualifications in order for school districts to participate in this program. They include the following provisions:

1. To qualify for a loan from the State a school district must have voted local bonds to 95 percent of its bonding ability.
2. Borrowing districts financially able to do so must repay the money to the State. Terms of 30 or 40 years of repayments are provided.
3. No money can be borrowed by a school district unless the proposed loan is approved by two-thirds vote of the electors of the district.
4. School construction, financed in any part by State loans will be subject to cost controls to be established by State Allocation Board (includes restrictions on the number of square feet of construction allowed per pupil).

[25] Property rich communities often have more poor people than property poor communities. The presence of commercial and industrial development can make an otherwise poor district "rich" in its tax base. Conversely, affluent communities often discourage industrial development that would make them property rich, but environmentally poorer. The lack of correlation between poor people and property poor districts is often overlooked in discussions of school finance issues. Even though the distinction has been known for a long time. Campbell, Colin D.; Fischel, William A. National Tax Journal "Preferences for School Finance Systems; Voters Versus Judges." Footnotes from Helen Ladd. The New York Times, June 30, 1983, p. A–14. However, some school districts that were academically and fiscally well managed prior to Proposition 13 faced problems. In 1983, the San Jose Unified School District filed for bankruptcy. The National School Boards Association stated that it was the first insolvency of a large school district since the depression. The San Jose Unified School District, at the time, held a reputation for excellence in education. It ranked 14th in the state in the ratio of students to teachers, and its teachers' salaries ranked second highest in Santa Clara County. However, since Proposition 13, the school district set aside maintenance and construction projects, laid off teachers and non-teaching administration, until it could not make further reductions and still continue to pay its staff.

[42] This evaluation was amended annually. The State developed a formula that was based on standards that considered how a facility was used and how many pupils were unhoused. In some years, the State gave preference to unhoused pupils, while in other years, the state gave first consideration to how a facility was used. Facility use included childcare, before and after school programs, adult education, and traditional K-12 programming.

[45] California Department of Education. California Year-Round Education Directory 1997-98.
[46] For example, a school district that needed to build a new elementary school that cost $4 million could receive $400,000 from the state if it chose to redirect students to existing facilities that incorporated the MTYRE program.

[47] Chapter 886, Statutes of 1986, added provisions that capped the grant at $125 per student.

[48] School districts that could not offer to cover any expenses (now referred to as a Priority 2) could conceivably wait years. MTYRE continues today, and has been a successful program. In 1997, more than 1.19 million or about 22 percent of California students attended schools with year-round calendars. The State Department of Education estimates that the MTYRE program has saved that State more than $1.8 billion in construction costs since its inception. In 1997-98, $66 million was allocated from the "mega item" of the state budget. About $40 million was sent to Los Angeles Unified School District to cover the reported 40,872 excess students. However, once students are "excess," they can not be counted as students for the Office of Public School Construction in the erection of new facilities. Approximately 102,000 students are "excess." While the program has provided relief for school construction, it remains a controversy whether educationally the program is successful.

[65] Substantial enrollments are defined as at least 30 percent of the district's enrollment in kindergarten or any of the grades one to six, inclusive, or 40 percent of the students in the high school attendance area, see Education Code, Section 17717.7g.

[66] Conversation with Mike Vail, on January 21, 1999. Mr. Vail is the Assistant Superintendent of Facilities and Governmental Relations at the Santa Ana Unified School District.

[67] The class size reduction program reduced the ratio of students to teachers in kindergarten to third grades. It exacerbated the obstacles for school districts that were growing in size, but lacked facilities to house the new students. School districts that were not growing had to provide additional classroom space to account for smaller ratios of teachers to students in kindergarten to third grades. The State Allocation Board provided portable classrooms to cover the smaller-sized classes. The State Allocation Board estimates that thousands more classrooms are needed.

[83] "Huge School Bond Mulled" California Public Finance, September 8, 1997, p. 1.

[84] This included the type of facility and the number of teaching stations (classrooms).

[85] The Department of Education, School Facilities Planning Division is responsible for site review and site plan review and is required to recommend all school locations for new schools and additions to schools site regardless of the funding source.

[86] For example, in 1988, the Los Angeles Unified School District wanted to rehabilitate a hotel into a school. The State Allocation Board paid $48 million to an escrow account in an attempt to hold the price to acquire the Ambassador Hotel. When the school district and State Allocation Board realized that the site was not acceptable and decided to back out of the contract, they found that the developer had removed the money placed in the escrow account. In addition, when the district attempted to backpedal out of the contract, the owner sued for a breach of contract. Currently, there are negotiations between the school district and the owner of the property, Donald Trump.

[87] A school district was responsible for developing detailed cost estimates for the proposed school or addition. Site support costs provided funds for the preparation of environmental impact documents, development of relocation reports, determination of relocation claims, and negotiation of site purchases. The state reimburses up to 85 percent of the amount expended for eligible sites.

[88] This list was limited to those school facility components that have approached or exceeded their normal life expectancy.

[89] Applications for projects and appeals with correspondence from Carol A. Fisher, Apple Valley Unified School District, Author.

[90] Reimbursable fees and costs related to plans include architect fees, Division of State Architect/ORS Plan Check fee, CDE Plan Check Fee, Preliminary Tests (like soil, foundation, and exploratory borings) and other fees, for instance, advertising construction bids, and printing of plans.

[91] Pascual, Psyche. "Funding to Build High School Finally Approved By State." Los Angeles Times, June 17, 1993.

[92] Understanding the board's other five opinions would be difficult to track if not impossible to uncover.

[93] To evaluate the State Allocation Board's policies and procedures, it was necessary to obtain the State Allocation Board Handbook. The Handbook contains procedures and policies for reviewing and criteria for approving applications from school districts for bond funds to build new schools. When this report was initiated, the Handbook that the State Allocation Board provided was dated 1995, but contained policies adopted in 1993. Further, the State Allocation Board changes its policies and procedures often, and has no administrative process by which it updates its Handbook. An up-to-date, comprehensive list of policies and procedures was not available in any other format. A new handbook for the Lease Purchase Program was available on line - however, it also suffered from a lack of regular updating. The State Allocation Board meets every month and, hypothetically, policy changes can occur each month. Prior to Proposition 1A, despite being subject to the Administrative Procedures Act, the State Allocation Board had no public notice or participation requirements for the procedures by which it changes its policies. Only long-term policies are published in the California Regulatory Notice Register. Such policies included contracting and affirmative action requirements. Furthermore, staff reported that policies change so frequently, that it would be impossible to include relevant policies in the reporter or any other document.

[94] The number of students above the maximum number set by CDE to be in a classroom.

[95] The priority points ranking mechanism is based on, among other things, the percentage of currently and projected unhoused students relative to the total population of the applicant district or attendance area.

[96] In hardship cases, the State will fund more than 50 percent of new construction if a school district is unable to come up with its 50 percent match and had gone through a reasonable effort. Similarly, districts that are unable to offer a 20 percent match for modernization can seek relief from the State. Financial hardship is defined for those school districts that cannot afford to build, repair, or replace facilities because of fiscal restrictions (for example, an inability to match state funding because of an inability to pass local bonds or a lack of bonding capacity). Facility hardship can also apply to school districts that lack adequate housing for their pupils due to a lack of health and public safety conditions; or because of a natural disaster, traffic safety, or the remote geographic location of pupils (i.e., rural). Excessive costs may be attributed to geographic location, size of project, the cost associated with a new project in urban locations that may require high security or toxic cleanup, and sites that may require seismic retrofitting.

[97] The State Supreme Court ruled that school districts that were unable to accommodate enrollment growth could ask their city and county councils to limit real estate developers from building additional housing. Some developers found it necessary to offer additional resources (land or money) to get support from school districts and city councils for their projects.

[98] In three legal challenges, the courts have ruled that cities were not precluded from making zoning or other land-use decisions, because of the availability of classroom space, see Mira Development Corporation v. City of San Diego, William S. Hart Union High School District v. Regional Planning Commission of the County of Los Angeles, Murietta Valley Unified School District v. County of Riverside. The practical effect of the rulings was that cities could limit development on the basis of the supply of classrooms. Some developers found it necessary to offer additional resources, land or money, to get support from school districts and city councils for their projects.

[99] If the State expends all of its Proposition 1A resources prior to 2006, school districts can ask developers to pay 100 percent of site acquisition and school construction costs. In order to receive developer support under these conditions, school districts must participate in the Multi-Track Year-Round Education program. The Proposition includes language that the State may reimburse developers for up to 50 percent of their costs if subsequent bond funds become available.

[100] Under the old program, school districts had three application phases for each of their projects – planning, site, and construction. Under the new program, there is only one application phase for the entire project proposal, except under hardship provisions.

[101] However, once the funds are distributed to the school district, the school district keeps the interest accrued on the funds.

Bond Overview

OFFICIAL TITLE AND SUMMARY
Prepared by the Attorney General

Proposition 55

KINDERGARTEN-UNIVERSITY PUBLIC EDUCATION FACILITIES BOND ACT OF 2004.

- This act provides for a bond issue of twelve billion three hundred million dollars ($12,300,000,000) to fund necessary education facilities to relieve overcrowding and to repair older schools.
- Funds will be targeted to areas of greatest need and must be spent according to strict accountability measures.
- Funds will also be used to upgrade and build new classrooms in the California Community Colleges, the California State University, and the University of California, to provide adequate higher education facilities to accommodate growing student enrollment.
- Appropriates money from General Fund to pay off bonds.

Summary of Legislative Analyst's Estimate of Net State and Local Government Fiscal Impact:

- State costs of about $24.7 billion to pay off both the principal ($12.3 billion) and interest ($12.4 billion) costs on the bonds. Payments of about $823 million per year.

Proposition 56

Proposition 57

Proposition 58

Bond Overview

ANALYSIS BY THE LEGISLATIVE ANALYST

Proposition 55

BACKGROUND

Public education in California consists of two distinct systems. One system includes local school districts that provide elementary and secondary (kindergarten through 12th grade, or "K-12") education to about 6.2 million pupils. The other system (commonly referred to as "higher education") includes the California Community Colleges (CCCs), the California State University (CSU), and the University of California (UC). The three segments of higher education provide education programs beyond the 12th grade to the equivalent of about 1.6 million full-time students.

K-12 Schools

School Facilities Funding. The K-12 schools receive funding for construction and modernization (that is, renovation) of facilities from two main sources—state general obligation bonds and local general obligation bonds. General obligation bonds are backed by the state and school districts, meaning that they are obligated to pay the principal and interest costs on these bonds.

- ***State General Obligation Bonds.*** The state, through the School Facility Program (SFP), provides money for school districts to buy land and to construct and renovate K-12 school buildings. Districts receive funding for construction and renovation based on the number of pupils who meet the eligibility criteria of the program. The cost of school construction projects is shared between the state and local school districts. The state pays 50 percent of the cost of new construction projects and 60 percent of the cost for approved modernization projects. (Local matches are not necessary in "hardship" cases.) The state has funded the SFP by issuing general obligation bonds. General Fund revenues would be used to pay these costs. These revenues come primarily from state income and sales taxes. Over the past decade, voters have approved a total of $20.1 billion in state bonds for K-12 school construction. About $1.9 billion of these funds remain available for expenditure.
- ***Local General Obligation Bonds.*** School districts are authorized to sell general obligation bonds to finance school construction projects with the approval of 55 percent of the voters in the district. These bonds are paid off by taxes on real property located within the district. Over the last ten years, school districts have received voter approval to issue more than $37 billion of general obligation bonds.

Although school facilities have been funded primarily from state and local

general obligation bonds, school districts also receive significant funds from:

- ***Developer Fees.*** State law authorizes school districts to impose developer fees on new construction. These fees are levied on new residential, commercial, and industrial developments. Statewide, school districts report having received an average of over $400 million a year in developer fees over the last decade.
- ***Special Local Bonds (Known as "Mello-Roos" Bonds).*** School districts may form special districts in order to sell bonds for school construction projects. (These special districts generally do not encompass the entire school district.) The bonds, which require two-thirds voter approval, are paid off by charges assessed to property owners in the special district. Statewide, school districts have received on average about $270 million a year in special local bond proceeds over the past ten years.

K-12 School Building Needs. Under the SFP, K-12 school districts must demonstrate the need for new or modernized facilities. Through September 2004, the districts have identified a need to construct new schools to house nearly 1 million pupils and modernize schools for an additional 1.1 million pupils. The state cost to address these needs is estimated to be roughly $16 billion.

Higher Education

California's system of public higher education includes 141 campuses in the three segments listed below, serving about 1.6 million students:

- The CCCs provide instruction to 1.1 million students at 108 campuses operated by 72 locally governed districts throughout the state. The community colleges grant associate degrees and also offer a variety of vocational skill courses.
- The CSU has 23 campuses, with an enrollment of about 331,000 students. The system grants bachelor and master degrees, and a small number of joint doctoral degrees with UC.
- The UC has nine general campuses, one health sciences campus, and various affiliated institutions, with a total enrollment of about 201,000 students. This system offers bachelor, master, and doctoral degrees, and is the primary state-supported agency for conducting research.

Over the past decade, the voters have approved $5.1 billion in general obligation bonds for capital improvements at public higher education campuses. Virtually all of these funds have been committed to specific projects. The state also has provided almost $1.6 billion in lease revenue bonds (authorized by the Legislature) for this same purpose.

In addition to these state bonds, the higher education segments have other sources of funding for capital projects.

FIGURE 1	
PROPOSITION 55 USES OF BOND FUNDS	
	Amount (in Millions)
K-12	
New construction projects	$5,260[a]

Modernization projects	2,250
Critically overcrowded schools	2,440
Joint use	50
Subtotal, K-12	($10,000)[b]
Higher Education	
Community Colleges	$920
California State University	690
University of California	690
Subtotal, Higher Education	($2,300)
TOTAL	$12,300
[a]Up to $300 million available for charter schools. [b]Up to $20 million available for energy conservation projects.	

- ***Local General Obligation Bonds.*** Community college districts are authorized to sell general obligation bonds to finance school construction projects with the approval of 55 percent of the voters in the district. These bonds are paid off by taxes on real property located within the district. Over the last decade, community college districts have received local voter approval to issue over $7 billion of bonds for construction and renovation of facilities.
- ***Gifts and Grants.*** The CSU and UC in recent years together have received on average over $100 million annually in gifts and grants for construction of facilities.
- ***UC Research Revenue.*** The UC finances the construction of new research facilities by selling bonds and pledging future research revenue for their repayment. Currently, UC uses about $130 million a year of research revenue to pay off these bonds.

Higher Education Building Plans. Each year the institutions of higher education prepare capital outlay plans in which they identify project priorities over the next few years. Higher education capital outlay projects in the most recent plans total $5.3 billion for the period 2003-04 through 2007-08.

PROPOSAL

This measure allows the state to issue $12.3 billion of general obligation bonds for construction and renovation of K-12 school facilities ($10 billion) and higher education facilities ($2.3 billion). Figure 1 shows how these bond funds would be allocated to K-12 and higher education.

Future Education Bond Act. If the voters do not approve this measure, state law requires the same bond issue to be placed on the November 2004 ballot.

K-12 School Facilities

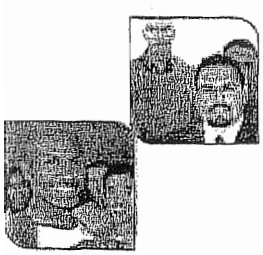

Figure 1 describes generally how the $10 billion for K-12 school projects would be allocated. However, the measure would permit changes in this allocation with the approval of the Legislature and Governor.

New Construction. A total of $5.26 billion would be available to buy land and construct *new* school buildings. A district would be required to pay for 50 percent of costs with local resources unless it qualifies for state hardship

funding. The measure also provides that up to $300 million of these new construction funds is available for charter school facilities. (Charter schools are public schools that operate independently of many of the requirements of regular public schools.)

Modernization. The proposition makes $2.25 billion available for the reconstruction or modernization of existing school facilities. Districts would be required to pay 40 percent of project costs from local resources.

Critically Overcrowded Schools. This proposition directs a total of $2.44 billion to districts with schools which are considered critically overcrowded. These funds would go to schools that have a large number of pupils relative to the size of the school site.

Joint-Use Projects. The measure makes a total of $50 million available to fund joint-use projects. (An example of a joint-use project is a facility constructed for use by both a K-12 school district and a local library district.)

Higher Education Facilities

The measure includes $2.3 billion to construct new buildings and related infrastructure, alter existing buildings, and purchase equipment for use in these buildings for California's public higher education systems. As Figure 1 shows, the measure allocates $690 million each to UC and CSU and $920 million to CCCs. The Governor and the Legislature would select the specific projects to be funded by the bond monies.

FISCAL EFFECT

The cost of these bonds would depend on their interest rates and the time period over which they are repaid. If the $12.3 billion in bonds authorized by this proposition is sold at an interest rate of 5.25 percent (the current rate for this type of bond) and repaid over 30 years, the cost over the period would be about $24.7 billion to pay off both the principal ($12.3 billion) and interest ($12.4 billion). The average payment for principal and interest would be about $823 million per year.

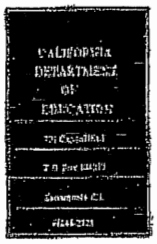
EXHIBIT D

STATE SUPERINTENDENT OF PUBLIC INSTRUCTION
FISCAL MANAGEMENT ADVISORY 97-02

DELAINE EASTIN
State Superintendent of Public Instruction



FISCAL MANAGEMENT ADVISORY 97-02

October 30, 1997

TO: County and District Superintendents

FROM: Patrick Keegan, Deputy Superintendent
Finance, Technology, and Information Services

SUBJECT: Fees, Deposits, and Other Charges

School district administrators frequently ask the Department to provide additional guidance on the matter of fees. This Advisory which supersedes Fiscal Management Advisory 87-03 is provided for that purpose, and reflects the most recent legislation and California Supreme Court interpretations. The following narrative contains a number of conclusions based on legal references. Most of these references are to a particular case or opinion. Those conclusions without attribution represent the opinions of the Department's Legal Office.

TUITION, FEES, DEPOSITS, AND OTHER CHARGES IN CALIFORNIA PUBLIC SCHOOLS, K-12 AND ADULT SCHOOLS

I. A Free Public School System

> "A pupil enrolled in a school shall not be required to pay any fee, deposit, or other charge not specifically authorized by law."[1]

With this language the State Board of Education made clear that fees are not to be imposed except where specifically authorized by law. This administrative regulation, or "law" of the State Board was promulgated based on the authority of Article IX, Section 5 of the California Constitution. Article IX, Section 5 provides for a free school system:

> "The Legislature shall provide for a system of common schools by which a free school shall be kept up and supported in each district at least six months in every year, after the first year in which a school has been established."

The State Supreme Court in 1874 held that this provision entitled students to be educated at public expense.[2]

The Attorney General has, in several opinions, [3]consistently ruled that school districts do not have authority to levy fees for any elective or compulsory class. Further, districts may not require security deposits for locks, lockers, books, class apparatus, musical instruments, uniforms, or other equipment.

The administrative regulation noted above prohibited fees except those "...specifically authorized by law." Certain fees have been authorized by law since the rule was promulgated.

The 1984 California Supreme Court decision, Hartzell v. Connell,[4] raises serious questions about the imposition of a non-statutory fee for extracurricular activities. The lead opinion acknowledges that fees may be charged for "recreational" activities but not for "educational" activities. Extracurricular activities are described in the opinion as an integral component of public education; they are a part of the educational program according to this decision.

The court held that the "...imposition of fees for educational activities offered by public high school districts violates the free school guarantee. The constitutional defect in such fees can neither be corrected by providing waivers to indigent students nor justified by pleading financial hardship."

---

[1]Title 5 California Code of Regulations, Section 350
[2]Wade v. Flood, 48 Cal. 36, 51 (1874)
[3]Ops. Cal. Atty. Gen. No. NS-4114, 1942
[4]35 Cal. 3d 899 (1984)

II. Fees Authorized by Law

The Education Code specifically authorizes certain fees. Except for home to school transportation fees discussed later, none of those Code sections have been challenged and the Hartzell v. Connell decision did not directly rule on their legality. Therefore, districts may continue to levy fees as authorized in the following Education Code sections:

A. Fees that a district may collect for furnishing materials to a pupil for items the pupil has fabricated from such materials for his or her own use. Such fees may not exceed cost. (Education Code section 39526)

B. Fees that a district may charge pupils for transportation to and from school under limited circumstances. (Education Code sections 38028, 39807.5 and 39837)

C. Charges for food served to pupils. (Education Code sections 39870-39874, 39876)

D. Charges to the parent or guardian of any pupil who loses a book, defaces books or other school property. Liability limits for lost items or damage are adjusted annually by the State Superintendent of Public Instruction pursuant to statute. (Education Code section 48904)

E. Charges for field trips or excursions, principally for transportation. The authority to charge a fee for field trips or excursions is not directly stated in the Education Code. Rather, it provides that "No pupil shall be prevented from making the field trip or excursion because of lack of sufficient funds." (Education Code section 35330)

F. Districts must make medical, hospital, or accident insurance available to pupils who may be injured while participating in field trips. The cost of the insurance may be paid by the pupil or his parents. (Education Code section 35331)

G. Governing boards may expend from the general fund of the district any money which is budgeted for community services to establish and maintain community service classes. They may charge student fees not to exceed the cost of maintaining such classes. (Education Code section 51815)

H. A governing board may charge a tuition fee to adults for any class except classes in English and citizenship for foreigners, classes in elementary subjects, and classes for which high school credit is granted when taken by a person not holding a high school diploma. (Education Code section 52612)

I. Districts must provide, and each member of an athletic team must have, accidental death, injury and medical insurance coverage. The cost of such insurance may be paid by the pupil unless the pupil is unable to pay for such insurance. (Education Code sections 32220-32224)

J. A school district may require a deposit from a borrower of school band instruments, music, uniforms, and other regalia for use on an excursion to a foreign country. (Education Code section 40015)

K. Pupils whose parents are actual and legal residents of an adjacent foreign country or an adjacent state shall be charged a tuition fee. (Education Code sections 48050 and 48052)

L. The regulations of the governing board may provide for the sale of materials purchased from the incidental expense account to pupils in classes for adults, for use in connection with such classes. The proceeds of all such sales shall be deposited in that account (Education Code section 52615). A high school district board may charge for textbooks used in classes for adults or impose a refundable deposit on loaned books. (Education Code section 60410)

M. The governing board of a school district may sell class material to persons enrolled in classes for adults. This may include materials necessary for the making of articles by students enrolled in adult education. The materials shall be sold at not less than the cost to the district; any article made shall be the property of the person who made it. (Education Code section 39527)

N. The governing board of any elementary, high, or unified school district may charge a fee for school camp programs, provided that payment of such fee is not mandatory. No pupil shall be denied the opportunity to participate in a school camp program because of non-payment of the fee. (Education Code section 35335)

O. Families utilizing child care and development services shall be charged a fee by the school district, but no fees shall be assessed against families whose children are enrolled in the state preschool program, or for such services provided to severly handicapped children (Education Code sections 8263(e)(f) and 8230(d).). Standards for fees appear in Education Code section 8265. The school district may also impose a fee for a program of supervision of children before and after school. (Education Code section 8487 and 8488)

P. School districts may offer a fingerprint program for children in kindergarten or newly enrolled children and shall assess a fee to the parent or guardian who chooses to participate. (Education Code section 32390)

III. District Obligation to Provide Without Charge

The opinions of the Attorney General mentioned earlier indicate that charges may not be levied for the following:

A. A deposit in the nature of a guarantee that the district would be reimbursed for loss to the district on account of breakage, damage to, or loss of school property.

B. An admission charge to an exhibit, fair, theater or similar activity for instruction or extracurricular purposes when a visit to such places is part of the district's educational program.

C. A tuition fee or charge as a condition to enrollment in any class or course of instruction, including a fee for attendance in a summer or vacation school, a registration fee, a fee for a catalog of courses, a fee for an examination in a subject, a late registration or program change fee, a fee for the issuance of a diploma or certificate, or a charge for lodging.

D. Membership fees in a student body or any student organization as a condition for enrollment or participation in athletic or other curricular or extracurricular activities sponsored by the school.

E. Education Code section 48053 prohibits charging an apprentice, or his or her parents or guardian, for admission or attendance in any class.

F. Textbooks and workbooks must be furnished without charge by elementary and high school districts except for classes for adults. A charge may not be made for their use (Education Code sections 60070 and 60410).

Education Code section 40011 provides:

> "Writing and drawing paper, pens, inks, blackboard erasers, crayons, lead pencils, and other necessary supplies for the use of the schools, shall be furnished under direction of the governing board of the school district."

The Attorney General has issued an opinion interpreting this language. He was asked specifically whether a student could be required to furnish any or all of the following:

A. Art material for art classes and mechanical drawing sets

B. Cloth to be used in dressmaking classes and wood for carpentry classes

C. Gym suits and shoes for physical education classes

D. Bluebooks in which to write a final examination

E. Paper on which to write a theme or report when such theme or report is a required assignment.

The Attorney General concluded that all the above-mentioned materials were "necessary supplies" and as such had to be furnished by the school district. He reasoned that the articles listed in A, B, C, and D, "appear to be supplies that must be available to students in order to participate in regular classroom work in the particular subjects involved." As to E, the Attorney General stated that "paper to be used on which to write a theme or report must also be furnished when required as a part of the classroom activity."[5]

The Attorney General limited his discussion to the questions specifically asked and did not state what materials a district is not obligated to furnish. However:

> "[s]upplies,...must be furnished free of cost to students when the supplies are what might be termed 'school supplies' and are necessary in order for the students to pursue a course of study."

The Attorney General's use of the term "school supplies" is meant to exclude from the district's obligation those items or materials which, although necessary for class participation, are essential regardless of whether or not a person is a student. For example, a school district would not be obligated to furnish corrective lenses, clothes, and so forth. Such items are needed whether or not one is a student.

Specifically with respect to gym clothes, Education Code section 49066(b) states that: "No grade of a pupil participating in a physical education class, however, may be adversely affected due to the fact that the pupil does not wear standardized physical education apparel where the failure to wear such apparel arises from circumstances beyond the control of the pupil," such as, for example, lack of funds.

It should be determined whether a fee for a particular item is specifically authorized by statute. If not, it should be determined whether a particular item is required by law to be furnished free or whether it comes under the category of "necessary supplies." If it does, then the district must furnish the item without charge.

It is the position of the Department that a school district may require its students to purchase their own gym clothes of a district specified design and color so long as the design and color are of a type sold for general wear outside of school. Once the required gym uniforms become specialized in terms of included logos, school name or other characteristics not found on clothing for general use outside of school, they are school supplies and the district must provide those uniforms free of charge.

It is the opinion of the Department's legal office that a school district may not charge a fee or require students to purchase necessary materials even if the

[5]Ops. Cal Atty. Gen. No. NS-4414, 1942

district maintains a special fund to assist students with financial need or waives such fee or charge for students with financial need. The fee or charge still remains a condition for all other students not so assisted. The court in Hartzell v. Connell, discussed below, held that a fee-waiver policy for needy students does not save the fee.

IV. Extracurricular Activities

On April 20, 1984, the California Supreme Court decided, in Hartzell v. Connell 35 Cal. 3d 899, that a public school district may not charge fees for educational programs simply because they are denominated "extracurricular." As expressed by the lead opinion, the court concluded that "the imposition of fees as a precondition for participation in non-statutory educational programs offered by public high schools on a noncredit basis violates the free schools guarantee of the California Constitution and the prohibition against school fees contained in Title 5, Section 350 of the California Administrative Code." (now California Code of Regulations).

Some significant observations by the various justices and ramifications of the decision are as follows:

A. The lead opinion was written by Chief Justice Bird with Justices Broussard and Reynoso concurring specifically. The approach taken to the issue by the Chief Justice holds that the free school guarantee extends to all activities which constitute an integral, fundamental part of elementary and secondary education or which amount to necessary elements of any school's activity. The opinion concludes that extracurricular activities constitute an integral component of public education.

B. The lead opinion holds that fee based extracurricular activities are also illegal under Title 5 California Code of Regulations 350 (5 CCR 350) which prohibits the imposition of "...any fee, deposit, or other charge not specifically authorized by law."

C. Apart from the fee issue, this particular holding has wide reaching significance. Along with constitutional provisions and statutes, any regulation adopted by the State Board of Education or Superintendent of Public Instruction is a "law." Education Code section 35160, the so-called "permissive code" authority allows school districts to carry on any activity or act in any manner "...which is not in conflict with or inconsistent with, or preempted by, any law..."

D. As noted above, several provisions of the Education Code permit school districts to impose charges or fees, e.g.: Section 35330 (field trips and excursions), Section 48909 (charge for lost textbook), Section 35335 (school camps), Sections 32220-32224 (requires members of athletic teams to purchase death, accident and hospital insurance), Section 40015 (deposit for use of a school musical instrument), Section 39804 (pupil transportation), and so forth. In

his separate opinion, in which he concurs in the judgment, Justice Kaus raised the question whether, under the decision, any of the statutory fees and charges (Paragraph II, supra) would be unconstitutional. Because none of the statutory fees were in issue, the court made no ruling in that respect. The Hartzell decision is binding precedent for invalidation of any non-statutory fees of the type examined by that court. Except for home to school transportation fees (Section 39807.5), the constitutionality of the statutory fees and charges is yet to be judicially decided.

E. In a footnote the lead opinion states that the: "[e]ducational activities are to be distinguished from activities which are purely recreational in character. Examples of the latter might include attending weekend dances or athletic events." This statement may cause future litigation on the issue of whether the challenged fee based activity is educational or recreational. The issue is complicated by the fact that while citing an athletic event as possibly being recreational, the court invalidated a fee based athletic activity because it was held to be educational. This could be reconciled by interpreting the footnote as allowing a fee if the participation is solely as a spectator.

F. The defendants argued that their fee-waiver policy for needy students satisfies the requirements of the free school requirement. They suggested that the right to be educated at public expense amounts merely to a right not to be financially prevented from enjoying educational opportunities. The court answered that such an argument plainly contradicts the plain free school language of the Constitution.

V. Home to School Transportation Fees

Education Code section 39807.5 allows school districts to charge parents a fee for home to school transportation provided to their children by the district. On a constitutional challenge the California Supreme Court in Arcadia School District v. State Department of Education,[6] upheld the transportation fee statute. According to the court, permitting school districts to charge parents and guardians for the transportation of students to and from school does not violate the California Constitution free school guarantee. Unlike the extracurricular activities held to be free in Hartzell v. Connell (supra), transportation is neither an educational activity nor an essential part of school activity. Home to school transportation is not included within the free school guarantee.

[6] 2 Cal.4th 251 (1992)

VI. Tuition for Summer School.

No statute specifically authorizes tuition for summer school. Therefore, tuition or any fee or charge is prohibited under Section 350 of Title 5 California Code of Regulations (supra at page 1), which according to the court in Hartzell v. Connell (supra), is a law within the meaning of the so-called permissive provisions of Education Code section 35160.

VII. Community Service Classes

The governing board of a school district is authorized to maintain community service classes and to charge fees to cover the costs of maintaining such classes (Education Code sections 51810 and 51815). These classes may be convened at any time during the school year as may be determined by the governing board (Education Code section 51812).

Community service classes are not intended to teach required courses that students in grades K-12 must complete as part of their instructional programs. Community service classes usually include classes in music, drama, art, handicraft, science, literature, nature study, nature contacting, aquatic sports, athletics, and other such classes of general interest to the community (See Education Code, section 51810). These classes are primarily intended for adults and are open only to those minors whom the governing board believes will profit from such classes (Education Code, section 51811). It is the Department's position, therefore, that community service classes may not be used as summer schools for K-12 students, except for the incidental attendance of students with special interest in the subjects being taught.

VIII. Summer Schools Conducted Under Contract by Private Parties

The provisions of law relating to contracts whereby private parties conduct a portion of the educational program are not entirely clear. Neither the California Constitution nor the Education Code specifically prohibits contracts for educational services. Education Code section 35160 authorizes districts to engage in any activity not prohibited by law.

Section 6, Article IX, of the California Constitution prohibits a school district from transferring, directly or indirectly, any part of the public school system, or the placing of any part of the public school system under the jurisdiction of any authority other than a public school authority. This constitutional provision was explained in CTA v. Fullerton.[7] That case involved a school district which let a contract for a private vendor to conduct its driver training program. The court held that the district had not transferred a part of the school system, but only a part of the curriculum. The court's reasoning is that the curriculum is only a function of the system and not a part of the system. This reasoning would seem also to validate contracting for a summer school program. However, in dicussing this constitutional prohibition, the court stated that the Constitution would be violated if the control and management of the driver training program were to be transferred to a private authority. This would be true because the various

[7] 82 Cal.App.3d 249, 1978

administrative units authorized to maintain and administer the curriculum with the public school system constitute, along with the curriculum, a part of the system. Thus, contracting for a summer school program would be valid under Article IX, Section 6 only if the school district maintains exclusive control and management of the educational program.

The requirement for the maintenance of control and management, however, places the contracting district in a legally impossible position when tuition fees are charged. If the contractor providing the program charges tuition the district might thereby be in violation of the prohibition against tuition charges.

IX. Leasing School Buildings for Educational Use.

The Education Code provides authority for school districts to lease, or allow the use of, unneeded school buildings and classroom space, or to enter into joint occupancy or joint use agreements with private entities including private schools. (Education Code sections 39360, 39379, 39380, 39381, 39440, 39444, 39470, and 40040, et seq.)

When authorizing school buildings to be used by another entity for a summer school program, however, the district should consider the following:

A. When leasing to a sectarian organization, the district must avoid violating the religious establishment prohibition of the First Amendment to the United States Constitution. According to the California Attorney General, a school district cannot lease or loan vacant classrooms to a sectarian institution for religious purposes while public school is concurrently in session.[8]

B. The use granted under the Civic Center Act must not result in a monopoly for the benefit of any person or organization. (Education Code section 40041 et seq.) (Effective 1/1/98 renumbered to 38130)

X. Charter Schools.

Education Code section 47605(d) prohibits a charter school from charging tuition, but does not mention fees or other charges. Should it be argued that a certain educationally based fee or other charge is not in the nature of a tuition, the charter school would, nevertheless, be prohibited from assessing them. Although a charter school is exempt from the laws governing school districts (Education Code section 47610), the California Constitution, which is the highest law of the state, cannot be rendered inapplicable by the Legislature. Therefore, any tuition, fee or other charge relating to the charter school's educational program is prhibited by the free school guarantee of the California Constitution Article IX, Section 5, as interpreted in Hartzell v. Connell, supra.

[8]60 Ops. Cal. Atty. Gen. 269

XI. Educational Clinics.

A certified clinic may not charge any fee for services to any pupil or to the parent, guardian, or custodian of any pupil for which the clinic receives reimbursement (Education Code section 58557)

The purpose of this advisory is to inform school districts and county superintendents of the existing law involving fees in the schools and to cite various cases and opinions on the subject. Except with respect to statutes and decisions of courts, regulations and court decisions this Advisory is merely exemplary and compliance therewith is not mandatory, nor is there any intent to suggest a particular course of action. Each local educational agency should seek the advice of its own legal counsel in the development of local policy.

Questions about this advisory may be directed to the Department's Legal Office, 916-657-2452.

	Section 14011 Section 57121

SUPPLEMENTAL INFORMATION

This supplement to the test claim provides an index and copy of each change to the Title 5, CCR, sections included in the test claim. The Registers cited are attached as Exhibit A. Amended language is underlined (new language) or stricken out (deleted language).

HISTORY OF TITLE 5, CCR, SECTIONS INCLUDED IN THE TEST CLAIM

Register 70-03 § 14010 (§ 14011): New Chapter 1 (§§ 14000, 14001, 14010, 14020, 14021, 14030 through 14033, 14040 through 14045). Approved nunc pro tunc by State Building Standards Commission as to

any building standards involved. Information only. Register unavailable.

Register 74-17 § 57121: New Chapter 2 (§§ 57100 through 57140, not consecutive).

Register 77-39 § 14010 (§ 14011): Amendment of section and note.

Register 77-45 § 57121: Amendment of section.

Register 83-18 § 57121: Amendment of section.

Register 91-23 § 57121: Amendment of section filed by Board of Governors of California Community Colleges with the Secretary of State. Submitted to OAL for printing, only pursuant to Education Code § 70901.5(b).

Register 93-46 § 14011: Renumbering and amendment of former § 14010 to § 14011 and adoption of note.

Register 95-23 § 57121: Editorial correction of History 3.

Register 2000-44 § 14011: Amendment of section heading, section and note.

Subsequent Registers: There may be changes to the regulations after the date the test claim was filed, which are not included.

CERTIFICATION

By my signature below, I hereby declare, under penalty of perjury under the laws of the State of California, that the information in this document is true and complete to the best of my own knowledge or information or belief, and that the attached regulations are true and correct copies of documents from archives of a recognized law library.

Article 1. General Standards

14000. Policy Declaration. The State Board believes that it is the right of each school child in California to have access to adequate facilities for a modern program of education. In pursuit of this policy, the State Department of Education has assigned the Bureau of School Facilities Planning to fulfill the Depart [illegible] with respect to: directing the planning of educatio adequacy of educational facilities; and tricts in matters pertaining to plannin ties.

77-39

NOTE: Authority cited for Article 1: Sections Code.

2. Amendment of section and N thereafter (Register 77, No. 39)

14001. Minimum Standards. Up reau of School Facilities Planning, th tional facilities hereafter planned by

(a) Evolved from a well-documen gram requirements.

(b) Master-planned to provide for a saturation enrollment.

(c) Properly located on an adequate site.

(d) Designed for the environmental comfort and work efficiency of the occupants.

(e) Designed to require a practical minimum of maintenance.

(f) Designed to meet legal requirements for structure, fire, and panic safety.

(g) Engineered to permit remodeling for future reassignment of space.

History: 1. Amendment filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39).

Article 2. School Sites

14010. Procedure for Site Acquisition. A school district, before acquiring title to real property for school use, shall:

(a) Prepare a statement of policies covering the range and organization of grades to be served, the transportation of pupils, and the ultimate maximum pupil enrollment to be housed on the site.

(b) Prepare maps showing present and proposed school sites, significant roads or highways, unsanitary or hazardous installations, such as airports or industries and the indicated boundary of the pupil attendance area to be served.

(c) Meet with appropriate local government, recreation, and park authorities for the purposes set forth in Education Code Section 35275.

(d) Obtain, from the local planning agency having jurisdiction, a written report of its investigations and recommendations for each proposed site as required by Education Code Section 39004.

(e) Request a preliminary conference with a field representative from the Bureau of School Facilities Planning and in consultation review and evaluate sites under final consideration.

(f) Comply with Education Code Section 39002, with particular emphasis upon an engineering investigation made of the site to preclude locating the school on terrain that may be potentially hazardous.

(g) Secure a written site review ("School Site Report" latest edition) prepared by a bureau field representative for those sites that the district intends to acquire. (Section 39101(a), Education Code.)

NOTE: Authority cited for Article 2: Sections 39000, 39100 and 39101, Education Code.

History: 1. Amendment of section and NOTE filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39).

Article 3. Attendance Areas and Practices

History: 1. Repealer of Article 3 (Sections 14020–14021) filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39). For prior history, see Register 70, No. 11; Register 70, No. 26 and Register 71, No. 1.

Article 4. Planning and Approval of School Facilities

14030. Preliminary Procedure. Each school district, except districts governed by a city board of education, before authorizing the preparation of plans for the erection of, addition to, or remodeling of any school building with a construction cost totaling $5,000 or more, shall:

(a) Request a conference with a field representative of the Bureau of School Planning. The purpose of this conference is to establish and justify the need for new construction; to review the history and problems of existing school facilities; to discuss how educational facility needs will be determined; and review appropriate architectural selection procedures.

(b) Secure basic planning procedure forms from the Bureau of School Facilities Planning and instructions needed to complete these forms.

(c) Prepare educational specifications. This means that district personnel should prepare for consideration by the governing board a written statement of the goals, objectives, and policies which determine the educational program of the district and against which the success of the program is evaluated. Such statement, as it may be modified by the governing board following its consideration, when adopted by resolution of the governing board constitutes the educational specifications. Among other matters which the district personnel and governing board shall include in their consideration are the following:

(1) The size of the school best adapted to the various grade levels it is intended to serve.

(2) Probable changes in curriculum content or teaching methodology that will influence the design of the schools, (for example, the need for resource material centers, the use of teaching machines, organization for large and small groupings of students, and the like).

(3) The recommendations of the Bureau of School Facilities Planning on heating and ventilating or air conditioning, use of nonstructural interior walls, brightness control and distribution patterns of both daylight and electric light sources, a balanced acoustical environment, and other environmental criteria.

(4) Community functions that the school should serve that will influence its design.

(d) Prepare essential program information for the district architect so he can begin preliminary design studies.

NOTE: Authority cited for Article 4: Sections 39100, 39101 and 39118, Education Code.

History: 1. Amendment of section and NOTE filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39).

14031. Submissions to Bureau of School Facilities Planning. Following compliance with the requirements of Section 14030 and approval of those preliminary procedures by the Bureau of School Facilities Planning, the district shall:

(a) Submit to the Bureau of School Facilities Planning a site utilization plan, preliminary plans, and an outline of specifications for evaluation approval. The completed basic planning procedure forms shall also be submitted at this time. The preliminary plans shall reflect compliance with Chapter 7, Government Code, Sections 4450–4453 (access to public buildings for physically handicapped persons) where applicable. (See also required compliance with Division T24, Part 6, Title 24, California Administrative Code, where applicable.)

(b) Prepare and submit final working drawings and specifications to the Bureau of School Facilities Planning for approval.

(c) Submit addenda to the final plans for approval by the Bureau of School Facilities Planning prior to bidding. When bids have been rejected by the governing body, submit revised plans for review and approval.

History: 1. Amendment filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39).

14032. Plan Approval. New school construction cannot be advertised for bids until written approval of final plans and specifications is given by the Bureau of School Facilities Planning. Approvals for either preliminary or final drawings are in effect for a maximum of one year from the date of signed approval.

History: 1. Amendment filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39).

14033. Planning Guides. The latest edition of *The Guide for Planning Educational Facilities*, published by the Council of Educational Facility Planners, 29 West Woodruff Avenue, Columbus, Ohio, 43210, may be used as a guide in developing school building plans.

Article 5. State School Building Aid

14040. Scope of Article. This article prescribes the procedure for securing Department of Education approval of facilities under the State School Building Aid Law of 1952 contained in Chapter 8 of Part 10 of the Education Code. Attention is directed to the rules and regulations of the State Allocation Board contained in Title 2 of the California Administrative Code, which must also be followed for final approval of a construction project.

NOTE: Authority cited for Article 5: Sections 16044, 16047, 16104 and 16190–16207, Education Code.

History: 1. Amendment of section and NOTE filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39).

14041. Plans. Plans for a construction project requiring state school building aid shall be prepared in accordance with the procedure outlined in Article 4 of this chapter, and shall be limited specifically to building areas and facilities approved by the Department of Education.

14042. Justification Procedure. In order to secure approval by the Department of Education of facilities for state school building aid (including school sites), a district shall prepare a justification document on the forms furnished, and in the manner therein prescribed, by the Bureau of School Facilities Planning, Department of Education. Exceptions may be made to any of the provisions set forth in the justification document when the State Department of Education finds that under the specific circumstances described by a district the application of the provisions would be inequitable or would result in an undue hardship to the pupils of the district affected.

History: 1. Amendment filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39).

14043. Approval. When an applicant district's justification document for a construction project is approved by the Department of Education, the department shall send a letter of approval to the district and to the district architect. After the district has applied to the State Allocation Board, the Department of Education shall approve the construction project to the Department of General Services.

14044. Change Orders. Change orders for a construction project requiring state school building aid shall be approved by the Department of Education.

14045. Abandonment of Inadequate Facilities. Abandonment of inadequate facilities may be recommended by the Department of Education to the State Allocation Board for approval when it appears from the estimated cost of structural rehabilitation plus the estimated cost of desirable modernization that the facility would meet the criteria for replacement established by the State Allocation Board.

14046. Building Area Required to Provide Adequate Facilities for Exceptional Children. Pursuant to Section 1801 of Title 2 of the California Administrative Code and Sections 16014, 16044, 16190–16207 and 39101 of the Education Code, the Department of Education finds that, in the absence of extraordinary circumstances, the building area computed in the following manner is proper and adequate for the education of physically handicapped minors defined in Section 56701 (a), (b), (c), (d), and (e); educationally handicapped minors as defined in Section 56600; and mentally retarded minors as defined in Sections 56501 and 56515 of the Education Code. (When extraordinary circumstances exist, the building area required to provide adequate facilities for any category of such minors shall be determined by the Department of Education in accordance with the specific requirements of the applicant district.)

(a) **Special Class Instructional Area.** Except as provided in (b) and (c), the building area shall be computed as follows:

(1) Divide the number of eligible pupils by the maximum class size established by law for special day classes for the type of pupils to be enrolled and increasing the quotient to the next highest integer where a fractional amount is produced.

(2) Multiply the number computed in (1) by the maximum building area allowance shown below when the facility is planned for the following types of exceptional children:

Types of Pupils	*Building Area Allowance*
Deaf or Severely Hard of Hearing	1,300 sq. ft.
Blind or Partially Seeing	1,300 sq. ft.
Orthopedic or Other Health Impaired	2,000 sq. ft.
Educationally Handicapped	1,300 sq. ft.
Educable Mentally Retarded	1,400 sq. ft.
Trainable Mentally Retarded	1,860 sq. ft.
Aphasic	1,300 sq. ft.

(3) When facilities are to be constructed for orthopedic or other health impaired minors, additional building area allowances shall be made for elementary schools to provide adequate space for occupational therapy, physical therapy, and related auxiliary services of up to 5,200 square feet if the facility is designed for one to three classes and up to 7,000 square feet of four to eight classes. Facilities constructed for junior and senior high schools shall be allowed additional building area of up to 600 square feet for auxiliary services.

(4) When facilities are to be constructed for blind or partially seeing minors served in an integrated instructional program which is housed in two or more schools, the building area allowance may be allocated among the schools when approved by the Department of Education. No area of instruction shall be allowed which is less than 200 square feet.

(5) When facilities are to be constructed for deaf, hard of hearing, blind, partially seeing and educable mentally retarded minors, additional building areas shall be allowed in the junior and senior high schools. Facilities in junior high schools shall be allowed additional building area of up to 300 square feet. Facilities in senior high schools shall be allowed additional building area of up to 400 square feet.

(b) **Area for Pupils Six Years of Age or Less.** The area required to provide adequate facilities for physically handicapped and severely mentally retarded pupils six years of age or less, shall be determined by the Department of Education upon the specific requirements in each applicant district.

(c) **Separate Facilities.** The area required to provide adequate facilities for physically handicapped or severely mentally retarded pupils constructed separate from the regular school building shall be determined by the Department of Education upon the specific requirements in each applicant district.

(d) **Remedial Speech and Other Special Services Area.** Building area shall be computed as follows:

(1) Divide the number of speech handicapped pupils by 75 and increase the quotient to the next highest integer where a fractional amount is produced.

(2) Multiply the number computed in (1) by 200 square feet. No facility so planned and constructed shall exceed 200 square feet.

History: 1. New section filed 9-10-71; effective thirtieth day thereafter. Approved by State Building Standards Commission (Register 71, No. 37).

2. Amendment of section and repealer of NOTE filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39).

CHAPTER 1. COMMUNITY COLLEGE CONSTRUCTION ACT

SUBCHAPTER 1. GENERAL PROVISIONS

57000. General Provisions. For the purposes of the administration of the Community College Construction Act, the provisions of this chapter apply.

NOTE: Authority cited for Chapter 1: Sections 193, 197 and 20054, Education Code. Reference: Ch. 19 (commencing with Sec. 20050), Div. 14, Education Code.

History: 1. Repealer of Chapters 1 and 2 (§§ 57000 through 57121, not consecutive) and new Chapter 1 (§§ 57000 through 57032, not consecutive) filed 11-2-73; effective thirtieth day thereafter (Register 73, No. 44).

57001. **Definitions.** For the purposes of this chapter:

(a) "Student contract hours" means the actual or estimated total number of programmed class periods per week for a student.

(b) "A small Community College" means a college with 35,000 or fewer weekly student contact hours (WSCH) in graded and ungraded day and evening programs.

(c) "Handbook of Definitions" refers to the publication of that name issued by the Chancellor.

(d) "Leased or rented" means a building for which lease or rental costs are paid, and the use of which will be discontinued upon the completion of the project for which application has been submitted.

(e) "Permanent building" means a building for which there is no plan for removal or demolition and, so far as is known, will remain as a facility on the campus.

(f) "Temporary building" means an on-campus building of limited worth which, according to the capital construction master plan, is anticipated to be demolished or replaced within a decade. All other buildings should be considered permanent.

(g) "Federal funds" means money provided by the federal government to the district operating a Community College for the project or any part of the project which will be available to the district under the following acts: Higher Education Facilities Act of 1963, Higher Education Act of 1965, National Defense Education Administration, Public Law 815, and the Vocational Education Act of 1968 (Public Law 90-576), including subsequent amendments to it.

(h) "Assessed valuation of the district" means the total assessed valuation of all the property within the district, modified by provisions of Education Code Section 17262 (Collier Factor).

(i) Types of rooms and their codes, standard abbreviations, and definitions are the same as those used in the Instructions for Forms P-1 and P-2 (California Public Higher Education Cost and Statistical Analysis), issued by the Coordinating Council for Higher Education.

(j) Standard classifications of subject matter and their codes, standards abbreviations, and definitions are the same as those used in the Standard Classification of Subject Fields and Services (California Public Higher Education Cost and Statistical Analysis) issued by the Coordinating Council for Higher Education.

57002. **Federal Fund Proration.** When the physical detail and intent of a project subject to a federal grant differs materially from the physical detail and intent for which state funds are appropriated, the federal funds shall be prorated on the scope of the project subject to the federal grant and that prorata share be made applicable to the project subject to state matching funds.

57003. **Projecting Graded and Ungraded Enrollments.** The projected growth in graded and ungraded enrollment determined for each district by the State Department of Finance shall be developed by using the procedure specified in the Handbook of Definitions. Exceptions to the procedure may be made by the State Department of Finance for newly formed Community College districts or for the other districts where unusual circumstances justify them. Each exception shall be noted and reported to the Chancellor.

CHAPTER 2. ENVIRONMENTAL QUALITY

Article 1. General

57100. Authority. The regulations adopted under this Chapter are pursuant to the California Environmental Quality Act of 1970 (Division 13 commencing with Section 21000 of the Public Resources Code) and Guidelines adopted by Secretary for Resources in Division 6, Title 14, California Administrative Code.

NOTE: Authority cited: Section 193, Education Code and Section 21082, Public Resources Code. Reference: Division 13 (commencing with Section 21000), Public Resources Code.

History: 1. New Chapter 2 (Sections 57100 through 57140, not consecutive) filed 4-26-74; effective thirtieth day thereafter (Register 74, No. 17).

57101. Purpose. The purpose of these regulations is to provide basic principles, objectives, criteria and definitions for use by the Chancellor of the California Community Colleges in reviews required by the Education Code of Community College construction projects.

Article 2. Guidelines

57120. Basic Guidelines. It is the intent of the Board of Governors to adopt in substance the Guidelines adopted by the Secretary for Resources in Division 6, Title 14, California Administrative Code, Section 15000 et. seq.

57121. Application. (a) **New Sites for College Facilities.** When reviewing proposals from Community College districts for acquisition of land to be used as a site for college facilities, the Chancellor shall also review the Community College district's Initial Study (Section 15080, Title 14, California Administrative Code) of the development intended on the land and include the result of this review in a site review report.

(b) **New Campuses.** The Chancellor shall require that proposals for initial construction of facilities for a new campus be accompanied by a long-range plan for physical development approved by the district governing board which shows the intended use of all portions of the land and approximate location of buildings and facilities.

(c) **Submission of Proposed Projects.** (Section 20075 of the Education Code.) The Chancellor shall require that an Initial Study, pursuant to Section 15080, Title 14, California Administrative Code, be submitted to his office concurrent with other required information.

(d) **Preliminary Plans for Proposed Project.** (Section 20079 of the Education Code.) The Chancellor shall require that a copy of the (1) finding of Categorical Exemption (Section 15023, Title 14, C.A.C.); Negative Declaration (Section 15083, Title 14, C.A.C.); or Notice of Completion (Section 15085(c), Title 14, C.A.C.), whichever is appropriate, be submitted to his office concurrently with preliminary plans.

(e) **Approval of Plans.** The Chancellor shall require a copy of the findings of Categorical Exemption or Notice of Determination (Section 15085(g), Title 14, C.A.C.), whichever is appropriate, be submitted to his office concurrently with plans submitted for approval in accordance with Section 15409 of the Education Code.

(f) The Chancellor shall withhold authorization of the use of state funds for construction until requirements of the California Environmental Quality Act of 1970 have been met.

Article 3. Procedures

57140. Procedures. Authority is delegated to the Chancellor of the California Community Colleges or his designee to adopt procedures to carry out provisions of this Chapter.

CHAPTER 2. ENVIRONMENTAL QUALITY

Article 1. General

57100. Authority. The regulations adopted under this Chapter are pursuant to the California Environmental Quality Act of 1970 (Division 13 commencing with Section 21000 of the Public Resources Code) and Guidelines adopted by Secretary for Resources in Division 6, Title 14, California Administrative Code.

NOTE: Authority cited for Chapter 2: Section 71020, Education Code and Section 21082, Public Resources Code. Reference: Division 13 (commencing with Section 21000), Public Resources Code.

History: 1. New Chapter 2 (Sections 57100 through 57140, not consecutive) filed 4-26-74; effective thirtieth day thereafter (Register 74, No. 17).
2. Amendment of NOTE filed 11-4-77; effective thirtieth day thereafter (Register 77, No. 45).

57101. Purpose. The purpose of these regulations is to provide basic principles, objectives, criteria and definitions for use by the Chancellor of the California Community Colleges in reviews required by the Education Code of Community College construction projects.

Article 2. Guidelines

57120. Basic Guidelines. It is the intent of the Board of Governors to adopt in substance the Guidelines adopted by the Secretary for Resources in Division 6, Title 14, California Administrative Code, Section 15000 et. seq.

57121. Application. (a) **New Sites for College Facilities.** When reviewing proposals from Community College districts for acquisition of land to be used as a site for college facilities, the Chancellor shall also review the Community College district's Initial Study (Section 15080, Title 14, California Administrative Code) of the development intended on the land and include the result of this review in a site review report.

(b) **New Campuses.** The Chancellor shall require that proposals for initial construction of facilities for a new campus be accompanied by a long-range plan for physical development approved by the district governing board which shows the intended use of all portions of the land and approximate location of buildings and facilities.

(c) **Submission of Proposed Projects.** (Section 81830 of the Education Code.) The Chancellor shall require that an Initial Study, pursuant to Section 15080, Title 14, California Administrative Code, be submitted to the Chancellor's office concurrent with other required information.

(d) **Preliminary Plans for Proposed Project.** (Section 81834 of the Education Code.) The Chancellor shall require that a copy of the (1) finding of Categorical Exemption (Section 15023, Title 14, C.A.C.); Negative Declaration (Section 15083, Title 14, C.A.C.); or Notice of Completion (Section 15085(c), Title 14, C.A.C.), whichever is appropriate, be submitted to his office concurrently with preliminary plans.

(e) **Approval of Plans.** The Chancellor shall require a copy of the findings of Categorical Exemption or Notice of Determination (Section 15085(g), Title 14, C.A.C.), whichever is appropriate, be submitted to the Chancellor's office concurrently with plans submitted for approval in accordance with Section 81837 of the Education Code.

(f) The Chancellor shall withhold authorization of the use of state funds for construction until requirements of the California Environmental Quality Act of 1970 have been met.

History: 1. Amendment filed 11-4-77; effective thirtieth day thereafter (Register 77, No. 45).

Article 3. Procedures

57140. Procedures. Authority is delegated to the Chancellor of the California Community Colleges or the Chancellor's designee to adopt procedures to carry out provisions of this Chapter.

History: 1. Amendment filed 11-4-77; effective thirtieth day thereafter (Register 77, No. 45).

CHAPTER 2. ENVIRONMENTAL QUALITY

57100. General.

(a) The regulations adopted under this Chapter are pursuant to the California Environmental Quality Act of 1970 (Division 13 commencing with Section 21000 of the Public Resources Code) and Guidelines adopted by Secretary for Resources in Division 6, Title 14, California Administrative Code.

(b) The purpose of these regulations is to provide basic principles, objectives, criteria and definitions for use by the Chancellor of the California Community Colleges in reviews required by the Education Code of community college construction projects.

(c) It is the intent of the Board of Governors to adopt in substance the Guidelines adopted by the Secretary for Resources in Division 6, Title 14, California Administrative Code, Section 15000 et seq.

NOTE: Authority cited: Sections 71020 and 71062, Education Code, and Section 21082, Public Resources Code. Reference: Division 13 (commencing with Section 21000), Public Resources Code.

HISTORY:

1. New Chapter 2 (Sections 57100 through 57140, not consecutive) filed 4-26-74; effective thirtieth day thereafter (Register 74, No. 17).
2. Amendment of NOTE filed 11-4-77; effective thirtieth day thereafter (Register 77, No. 45).
3. Repealer of Article 1 heading and amendment of section filed 4-27-83; effective thirtieth day thereafter (Register 83, No. 18).

57101. Purpose.

HISTORY:

1. Repealer filed 4-27-83; effective thirtieth day thereafter (Register 83, No. 18).

57120. Basic Guidelines

HISTORY:

1. Repealer of Article 2 heading and Section 57120 filed 4-27-83; effective thirtieth day thereafter (Register 83, No. 18).

57121. Application.

(a) When reviewing proposals from Community College districts for acquisition of land to be used as a site for college facilities, the Chancellor shall also review the Community College district's Initial Study (Section 15080, Title 14, California Administrative Code) of the development intended on the land and include the result of this review in a site review report.

(b) The Chancellor shall require that proposals for initial construction of facilities for a new campus be accompanied by a long-range plan for physical development approved by the district governing board which shows the intended use of all portions of the land and approximate location of buildings and facilities.

(c) The Chancellor shall require that an Initial Study, pursuant to Section 15080, Title 14, California Administrative Code, be submitted to the Chancellor's office concurrent with other required information.

(d) The Chancellor shall require that a copy of the (1) finding of Categorical Exemption (Section 15023, Title 14, California Administrative Code); Negative Declaration (Section 15083, Title 14, California Administrative Code); or Notice of Completion (Section 15085(c), Title 14, California Administrative Code), whichever is appropriate, be submitted to his office concurrently with preliminary plans.

(e) The Chancellor shall require a copy of the findings of Categorical Exemption or Notice of Determination (Section 15085(g), Title 14, California Administrative Code), whichever is appropriate, be submitted to the Chancellor's office concurrently with plans submitted for approval in accordance with Section 81837 of the Education Code.

(f) The Chancellor shall withhold authorization of the use of state funds for construction until requirements of the California Environmental Quality Act of 1970 have been met.

HISTORY:

1. Amendment filed 11-4-77; effective thirtieth day thereafter (Register 77, No. 45).
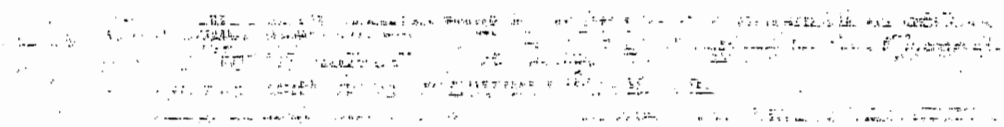
2. Repealer of Article 3 heading and new NOTE filed 4-27-83; effective thirtieth day thereafter (Register 83, No. 18).

(Next page is 676.5)



(b) Upon securing approval of a proposed energy conservation project by all appropriate review agencies, the governing board of a community college may submit to the Chancellor for approval, or disapproval, preliminary plans for the project.

(c) Preliminary plans for energy related projects shall include:

(1) The results of a technical audit (TA) performed by an authorized Technical Auditor which describes in detail the energy conservation measures the project is to institute.

(2) The status of the project as related to the various federal and state aided programs for energy conservation.

(3) An architectural and/or engineering analysis setting forth the detailed costs of the various elements of the project.

NOTE: Authority cited: Sections 66700, 70901, and 81805, Education Code. Reference: Sections 70901, and 81800–81839, Education Code.

HISTORY

1. Amendment of section submitted to OAL for printing only pursuant to Government Code section 11343.8 (Register 91, No. 23).

§ 57060. Legislative Findings, Declarations and Intent; Energy Conservation.

The Board of Governors finds and declares that it is in the interest of the state and of the people thereof for the state to aid community college districts in finding cost–effective methods of conserving energy in buildings maintained by the districts. The Board of Governors also finds that while many districts may desire to participate in energy conservation programs designed to reduce the steadily rising costs of meeting the energy needs of district buildings, that the costs involved in improving existing facilities to become more energy efficient are often prohibitive.

It is the intent of the Board of Governors in adopting this regulation to encourage community college districts to retrofit buildings so as to conserve energy and reduce the costs of supplying energy.

NOTE: Authority cited: Sections 66700 and 70901, Education Code. Reference: Section 70901, Education Code.

HISTORY

1. Adoption of section submitted to OAL for printing only pursuant to Government Code section 11343.8 (Register 91, No. 23).

§ 57061. Community College Districts, Borrowing; Retrofitting Buildings for Energy Conservation; Savings and Loan Investment.

(a) Community college districts may borrow funds from federal or state regulated financial institutions for the purposes of design and construction costs associated with retrofitting buildings to become more energy efficient. Community college districts shall only be authorized to borrow an amount which does not exceed that which can be repaid from energy cost avoidance savings accumulated from the improvement of school facilities.

(b) Any savings and loan association may make loans or advances of credit pursuant to the provisions of subdivision (a) in an amount not in excess of 5 percent of its total assets. This investment may be in addition to any other investment savings and loan associations are permitted to undertake under the provisions of section 6705.7 of the Financial Code.

NOTE: Authority cited: Sections 66700 and 70901, Education Code. Reference: Section 70901, Education Code.

HISTORY

1. Adoption of section submitted to OAL for printing only pursuant to Government Code section 11343.8 (Register 91, No. 23).

§ 57062. Pre–Audits and Post–Audits for Buildings.

To the extent that these services are available, community college districts shall arrange for the pre–audit and post–audit of buildings by investor–owned or municipal utility companies or by independent energy audit companies or organizations which are recognized by federal or state regulated financial institutions. The pre–audit shall identify the type and amount of work necessary to retrofit the buildings and shall include an estimate of projected energy savings. The post–audit shall be conducted upon completion of the retrofitting of the buildings to insure that the project satisfies the recommendations of the pre–audit.

NOTE: Authority cited: Sections 66700 and 70901, Education Code. Reference: Section 70901, Education Code.

HISTORY

1. Adoption of section submitted to OAL for printing only pursuant to Government Code section 11343.8 (Register 91, No. 23).

§ 57063. Contracts.

Community college districts taking action under this article shall contract with qualified businesses capable of retrofitting school buildings. To the extent that lists of qualified businesses are made available to community college districts by investor–owned or municipal utility companies or federal or state regulated financial institutions, community college districts may utilize the services of these businesses.

NOTE: Authority cited: Sections 66700 and 70901, Education Code. Reference: Section 70901, Education Code.

HISTORY

1. Adoption of section submitted to OAL for printing only pursuant to Government Code section 11343.8 (Register 91, No. 23).

Subchapter 2. Environmental Quality

§ 57100. General.

(a) The regulations adopted under this Chapter are pursuant to the California Environmental Quality Act of 1970 (division 13 commencing with section 21000 of the Public Resources Code) and Guidelines adopted by Secretary for Resources in Division 6, Title 14, California Administrative Code.

(b) The purpose of these regulations is to provide basic principles, objectives, criteria and definitions for use by the Chancellor of the California Community Colleges in reviews required by the Education Code of community college construction projects.

(c) It is the intent of the Board of Governors to adopt in substance the Guidelines adopted by the Secretary for Resources in division 6, title 14, California Administrative Code, section 15000 et seq.

NOTE: Authority cited: Sections 66700 and 70901, Education Code, and Section 21082, Public Resources Code. Reference: Division 13 (commencing with Section 21000), Public Resources Code.

HISTORY

1. New chapter 2 (sections 57100 through 57140, not consecutive) filed 4–26–74; effective thirtieth day thereafter (Register 74, No. 17).
2. Amendment of NOTE filed 11–4–77; effective thirtieth day thereafter (Register 77, No. 45).
3. Repealer of article 1 heading and amendment of section filed 4–27–83; effective thirtieth day thereafter (Register 83, No. 18).
4. Amendment of section submitted to OAL for printing only pursuant to Government Code section 11343.8 (Register 91, No. 23).

§ 57101. Purpose.

HISTORY

1. Repealer filed 4–27–83; effective thirtieth day thereafter (Register 83, No. 18).

§ 57120. Basic Guidelines.

HISTORY

1. Repealer of Article 2 heading and Section 57120 filed 4–27–83; effective thirtieth day thereafter (Register 83, No. 18).

§ 57121. Application.

(a) When reviewing proposals from Community College districts for acquisition of land to be used as a site for college facilities, the Chancellor shall also review the Community College district's Initial Study (section 15080, title 14, California Administrative Code) of the development intended on the land and include the result of this review in a site review report.

(b) The Chancellor shall require that proposals for initial construction of facilities for a new campus be accompanied by a long–range plan for physical development approved by the district governing board which shows the intended use of all portions of the land and approximate location of buildings and facilities.

(c) The Chancellor shall require that an Initial Study, pursuant to section 15080, title 14, California Administrative Code, be submitted to the Chancellor's office concurrent with other required information.

(d) The Chancellor shall require that a copy of the (1) finding of Categorical Exemption (section 15023, title 14, California Administrative Code); Negative Declaration (section 15083, Title 14, California Administrative Code); or Notice of Completion (section 15085(c), title 14, California Administrative Code), whichever is appropriate, be submitted to his office concurrently with preliminary plans.

(e) The Chancellor shall require a copy of the findings of Categorical Exemption or Notice of Determination (section 15085(g), Title 14, California Administrative Code), whichever is appropriate, be submitted to the Chancellor's office concurrently with plans submitted for approval in accordance with section 81837 of the Education Code.

(f) The Chancellor shall withhold authorization of the use of state funds for construction until requirements of the California Environmental Quality Act of 1970 have been met.

NOTE: Authority cited: Sections 66700 and 70901, Education Code. Reference: Division 13 (commencing with Section 21000), Public Resources Code.

HISTORY

1. Amendment filed 11–4–77; effective thirtieth day thereafter (Register 77, No. 45).
2. Amendment filed 4–27–83; effective thirtieth day thereafter (Register 83, No. 18).
3. Amendment of section submitted to OAL for printing only pursuant to Government Code section 11343.8 (Register 91, No. 23).

§ 57140. Procedures.

NOTE: Authority cited: Sections 71020 and 71062, Education Code. Reference: Section 71091, Education Code; Division 13 (commencing with Section 21000), Public Resources Code.

HISTORY

1. Amendment filed 11–4–77; effective thirtieth day thereafter (Register 77, No. 45).
2. Repealer of article 3 heading and new NOTE filed 4–27–83; effective thirtieth day thereafter (Register 83, No. 18).
3. Repeal of section submitted to OAL for printing only pursuant to Government Code section 11343.8 (Register 91, No. 23).

Subchapter 3. District Funded Construction Projects

§ 57150. Purpose.

The purpose of these regulations is to provide basic definitions, principles, and standards for use by the Chancellor of the California Community Colleges in considering any district–funded construction project subject to the requirements of section 81837 of the Education Code.

NOTE: Authority cited: Sections 66700, 70901, and 81836, Education Code. Reference: Sections 81836 and 81837, Education Code.

HISTORY

1. New chapter 3 (sections 57150–57158, not consecutive) filed 10–30–80; effective thirtieth day thereafter (Register 80, No. 44).
2. Amendment of section submitted to OAL for printing only pursuant to Government Code section 11343.8 (Register 91, No. 23).

§ 57152. Definitions.

(a) "Capital Outlay Project" includes purchase of land and costs related thereto, including court costs, condemnation costs, legal fees, title fees, etc.; construction projects, including working drawings; and equipment related to a construction project regardless of cost or timing.

(b) "Construction Project" includes new construction, alteration, and extension or betterment of existing structures.

(c) "State–Funded Project" means a capital outlay project qualifying as a project pursuant to section 81805 of the Education Code, and for which a district requests or receives State funding assistance.

(d) "District–Funded Project" means a capital outlay project subject to the provisions of section 81837 of the Education Code for which any funds, other than state funds, are paid or to be paid for erecting, adding to, or altering any community college facility.

(e) "Five–Year Construction Plans" means a plan for capital construction for community college purposes of a community college district for the five–year period commencing with the next proposed year of funding.

NOTE: Authority cited: Sections 66700, 70901 and 81836, Education Code. Reference: Sections 81836 and 81837, Education Code.

HISTORY

1. Amendment of section submitted to OAL for printing only pursuant to Government Code section 11343.8 (Register 91, No. 23).

§ 57154. Application.

In each case, the application for approval of plans for a district–funded project shall be accompanied by the plans and full, complete and accurate take–off of assignable and gross square feet of space, which shall comply with any and all requirements prescribed by the Chancellor.

NOTE: Authority cited: Sections 66700, 70901, and 81836, Education Code. Reference: Sections 81836 and 81837, Education Code.

HISTORY

1. Amendment of section submitted to OAL for printing only pursuant to Government Code section 11343.8 (Register 91, No. 23).

§ 57156. Review.

The review and evaluation of plans for a district–funded project by the Chancellor, shall include the following elements:

(a) Review and evaluate each district–funded project with reference to the elements of the capital construction program specified in Education Code section 81821.

(b) The review and evaluation shall be directed particularly to ascertain whether the locally funded project is of appropriate size, is appropriately timed and is justified in terms of the elements of the capital construction plans and where applicable, the standards as adopted by the Board of Governors.

NOTE: Authority cited: Sections 66700, 70901, and 81836, Education Code. Reference: Sections 81836 and 81837, Education Code.

HISTORY

1. Amendment of section submitted to OAL for printing only pursuant to Government Code section 11343.8 (Register 91, No. 23).

§ 57158. Chancellor's Response to Request for Approval of Plans.

(a) When analysis by the Chancellor shows that approval of the plans for a proposed locally–funded construction of a community college facility would not result in facilities which would be substantially at variance with space and utilization standards adopted by the Board of Governors, the Chancellor shall approve the plans.

(b) When analysis by the Chancellor shows that approval of the plans would result in facilities which would be substantially at variance with space and utilization standards adopted by the Board of Governors, the Chancellor shall respond by:

(1) Imposing conditions for the approval of the plans; or

(2) Finding that despite the substantial variance with space standards, the plans, as submitted, are acceptable, and responding to the district with:

(A) Cautions, and/or

(B) Appraisal of the potential consequences of this variance.

NOTE: Authority cited: Sections 66700, 70901 and 81836, Education Code. Reference: Sections 81836 and 81837, Education Code.

HISTORY

1. Amendment of subsection (b) filed 1–16–81; effective thirtieth day thereafter (Register 81, No. 3).
2. Amendment of section submitted to OAL for printing only pursuant to Government Code section 11343.8 (Register 91, No. 23).

Subchapter 4. Deferred Maintenance

§ 57200. Purpose.

For the purposes of administration and implementation of the Community Colleges Facility Deferred Maintenance and Special Repair Program as required by Education Code section 84660, the provisions of this chapter shall apply.

ifornia Administrative Code, and the California Fair Employment Practices Act, as amended.

§ 13044. Waivers.

Applicant districts may apply to the State Board of Education for waivers from provisions of the California Education Code under the provisions of Education Code Sections 52000 with respect to early childhood education schools and 58603 with respect to ESEA Title I schools if the granting of such waivers (which are not inconsistent with federal statutes or regulations) will aid such applicant districts in the establishment and operation of early childhood education programs or compensatory education programs for low income children.

History

1. Amendment filed 9–23–77; effective thirtieth day thereafter (Register 77, No. 39).

Subchapter 11. School Housing Aid for Compensatory Education

(Education Code Sections 16210–16215)

Article 1. General Provisions

§ 13050. Application for Funds.

An applicant for school housing aid pursuant to Education Code Sections 16210–16215 shall be identified as a "most concentrated area of poverty and social tension" described in Section 12051 or a "designated area of disadvantage" described in Education Code Section 58600.

Note: Authority cited for Chapter 11: Section 16213, Education Code.

History

1. New Chapter 11 (§§ 13050 through 13053) filed 1–14–70; effective thirtieth day thereafter (Register 70, No. 3).
2. Amendment of section and NOTE filed 9–23–77; effective thirtieth day thereafter (Register 77, No. 39).

§ 13051. Priorities to Districts Reducing Teacher–Pupil Ratio.

Priorities in grants and allocations pursuant to Article 4 of Chapter 8 of Part 10 of the Education Code shall be granted to districts for use in areas designated as the most concentrated areas of poverty and social tension in the State when the district has reduced, or submitted an approvable plan for reducing, the number of pupils to full–time equivalent classroom teachers in grades kindergarten through six, inclusive, in those schools to a ratio of not more than 25–1.

History

1. Amendment filed 9–23–77; effective thirtieth day thereafter (Register 77, No. 39).

§ 13052. Basis of Priorities.

Priorities for purposes of grants and allocations pursuant to Article 4 of Chapter 8 of Part 10 of the Education Code shall be based upon needs and the urgency thereof, of school districts as determined by the following factors:

(a) Justification of the need for new school plants, new classrooms, acquisition of land, sites for new classrooms, or remodeling, renovation or reconstruction of existing school buildings or facilities.

(b) The number of available unused or partially used classrooms in the designated area.

(c) The number of available unused or partially used classrooms outside of the designated area which may be used reasonably to accommodate pupils from the designated area.

(d) The joint recommendation of the Bureau of School Facilities Planning and the Bureau of Intergroup Relations of the Department of Education of district plans for new school plants, acquisition of land, sites for new classrooms, for construction of new facilities, or for remodeling, renovation, or reconstruction of existing school buildings or facilities.

(e) Availability of the district's uncommitted capital outlay funds for school housing to meet the needs of the district's plan for compensatory education.

History

1. Amendment of subsection (d) filed 9–23–77; effective thirtieth day thereafter (Register 77, No. 39).

§ 13053. Computation of Entitlements.

Entitlements for school housing aid shall be computed on the basis of public school population ratios determined in accordance with Education Code Section 54483. The Director, with the approval of the State Board of Education, may modify entitlements when required by the comparative needs, and the urgency thereof, of school districts.

History

1. Amendment filed 9–23–77; effective thirtieth day thereafter (Register 77, No. 39).

Subchapter 12. School Housing Aid for Districts Impacted by Seasonal Agricultural Employment

History

1. New Chapter 12 (Section 13070) filed 1–14–70; effective thirtieth day thereafter (Register 70, No. 3).
2. Repealer of Chapter 12 (Section 13070) filed 9–23–77; effective thirtieth day thereafter (Register 77, No. 39).

Chapter 13. School Facilities and Equipment

Subchapter 1. School Housing

Article 1. General Standards

§ 14000. Policy Declaration.

Note: Authority cited for Article 1: Sections 39000, 39100, 39101 and 39118, Education Code.

History

1. New chapter 1 (§§ 14000, 14001, 14010, 14020, 14021, 14030 through 14033, 14040 through 14045) filed 1–14–70; effective thirtieth day thereafter. Approved nunc pro tunc by State Building Standards Commission as to any building standards involved (Register 70, No. 3).
2. Amendment of section and Note filed 9–23–77; effective thirtieth day thereafter (Register 77, No. 39).
3. Repealer filed 11–12–93; operative 12–13–93 (Register 93, No. 46).

§ 14001. Minimum Standards.

Educational facilities planned by school districts shall be:

(a) Evolved from a statement of educational program requirements which reflects the school district's educational goals and objectives.

(b) Master–planned to provide for maximum site enrollment.

(c) Located on a site which meets California Department of Education standards as specified in Section 14010.

(d) Designed for the environmental comfort and work efficiency of the occupants.

(e) Designed to require a practical minimum of maintenance.

(f) Designed to meet federal, state, and local statutory requirements for structure, fire, and public safety.

(g) Designed and engineered with flexibility to accommodate future needs.

Note: Authority cited: Section 39101(b), Education Code. Reference: Section 17717.5, Education Code.

History

1. Amendment filed 9–23–77; effective thirtieth day thereafter (Register 77, No. 39).
2. Amendment of text and adoption of Note filed 11–12–93; operative 12–13–93 (Register 93, No. 46).

Article 2. School Sites

§ 14010. Standards for School Site Selection.

All districts shall select a school site that provides safety and that supports learning. The following standards shall apply:

(a) The acreage and enrollment for a new school site shall be consistent with the numbers of acres and enrollment established on pages 14–20 of the 1966 Edition, "School Site Analysis and Development" published by the California State Department of Education as last amended in 1987 and incorporated into this section by reference, in toto, unless sufficient land is not available or circumstances exist due to any of the following:

(1) Urban or suburban development results in insufficient available land even after considering the option of eminent domain.

(2) Sufficient acreage is available but it would not be economically feasible to mitigate geological or environmental hazards or other site complications which pose a threat to the health and/or safety of students and staff.

(3) Sufficient acreage is available but not within the attendance area of the unhoused students or there is an extreme density of population within a given attendance area requiring a school to serve more students on a single site. Choosing an alternate site would result in extensive long–term bussing of students that would cause extreme financial hardship to the district to transport students to the proposed school site.

(4) Geographic barriers, traffic congestion, or other constraints would cause extreme financial hardship for the district to transport students to the proposed school site.

(b) If a school site is less than the recommended acreage required in subsection (a) of this section, the district shall demonstrate how the students will be provided an adequate educational program including physical education as described in the district's adopted course of study.

(c) The property line of the site even if it is a joint use agreement as described in subsection (o) of this section shall be at least the following distance from the edge of respective power line easements:

(1) 100 feet for 50–133 KV line.

(2) 150 feet for 220–230 KV line.

(3) 350 feet for 500–550 KV line.

(d) The site shall be a sufficient distance from a railroad track easement, as ascertained by an analysis of the cargo, speed, grade, curves, and/or type of track (mainline or spur) to determine that it poses no personal injury or property damage risk on the school site in the event of a derailment or other disaster.

(e) The site shall not be adjacent to a road or freeway that any site–related traffic and sound level studies have determined will have safety problems or sound levels which adversely affect the educational program.

(f) The site shall not contain an active earthquake fault or fault trace.

(g) The site is not within an area of flood or dam flood inundation unless the cost of mitigating the flood or inundation impact is reasonable.

(h) The site shall not be located near an above–ground water or fuel storage tank that can pose a safety hazard as determined by a risk analysis study.

(i) The site is not subject to moderate to high liquefaction or landslides.

(j) The shape of the site shall have a proportionate length to width ratio to accommodate the building layout, parking and playfields that can be safely supervised and does not exceed the allowed passing time to classes for the district.

(k) The site shall be easily accessible from arterial roads and shall allow minimum peripheral visibility from the planned driveways in accordance with the Sight Distance Standards established in the "Highway Design Manual," Table 201.1, published by the Department of Transportation, July 1, 1990 edition, and incorporated into this section by reference, in toto.

(l) The site shall not be on major arterial streets with a heavy traffic pattern as determined by site–related traffic studies including those that require student crossings unless mitigation of traffic hazards and a plan for the safe arrival and departure of students appropriate to the grade level has been provided by city, county or other public agency in accordance with the "School Area Pedestrian Safety" manual published by the California Department of Transportation, 1987 edition, incorporated into this section by reference, in toto.

(m) Existing or proposed zoning of the surrounding properties shall be compatible with schools in that it would not pose a potential health or safety risk to students or staff in accordance with Education Code Section 39003 and Government Code Section 65402 and available studies of traffic surrounding the site.

(n) The site shall be located within the proposed attendance area to encourage student walking and avoid extensive bussing unless bussing is used to promote ethnic diversity.

(o) The site shall be selected to promote joint use of parks, libraries, museums and other public services, the acreage of which may be included as part of the recommended acreage as stated in subsection (a) of this section.

(p) The site shall be conveniently located for public services including but not limited to fire protection, police protection, public transit and trash disposal whenever feasible.

(q) The district shall consider environmental factors of light, wind, noise, aesthetics, and air pollution in its site selection process.

(r) Easements on or adjacent to the site shall not restrict access or building placement.

(s) The cost and complications of the following shall be considered in the site selection process and should not result in undue delays or unreasonable costs consistent with State Allocation Board standards:

(1) Distance of utilities to the site, availability and affordability of bringing utilities to the site.

(2) Site preparation including grading, drainage, demolition, hazardous cleanup, including cleanup of indigenous material such as serpentine rock, and off–site development of streets, curbs, gutters and lights.

(3) Eminent domain, relocation costs, severance damage, title clearance and legal fees.

(4) Long–term high landscaping or maintenance costs.

(5) Existence of any wildlife habitat that is on a protected or endangered species list maintained by any state or federal agency, existence of any wetlands, natural waterways, or areas that may support migratory species, or evidence of any environmentally sensitive vegetation.

(t) At the request of the governing board of a school district, the State Superintendent of Public Instruction may grant exemptions to any of the standards in this section if the district can demonstrate that mitigation of specific circumstances overrides a standard without compromising a safe and supportive school environment.

NOTE: Authority cited: Section 39101(b), Education Code. Reference: Sections 39002, 39003, 39101(a), and 39101(f), Education Code; Section 65402, Government Code; Sections 21372, 22350, 22352, 22358.4, and 22358.5, Vehicle Code.

HISTORY

1. Renumbering of former section 14010 to section 14011 and new section filed 11–12–93; operative 12–13–93 (Register 93, No. 46). For prior history, see Register 77, No. 39.

§ 14011. Procedures for Site Acquisition – Non–Self–Certified Districts.

A non–self–certified district is defined as a district having a project that is more than 50 percent state funded under Chapter 22 (commencing with Section 17700) of Part 10 of the Education Code and has not received designation from the Office of Local Assistance as a self–certified district. A non–self–certified district, before acquiring title to real property for school use, shall obtain written approval from the California Department of Education using the following procedures:

(a) Request a preliminary conference with a consultant from the School Facilities Planning Division and in consultation review and evaluate sites under final consideration.

(b) Contact the School Facilities Planning Division of the California Department of Education to obtain a "School Facilities Planning Division

Field Site Review", form SFPD 4.0, published by the California State Department of Education, as last amended in January, 1990 and incorporated into this section by reference, in toto, which lists the site options in order of merit according to the site selection standards delineated in Section 14010.

(c) Prepare a statement of policies as delineated on the "School Facilities Planning Division School Site Report," form SFPD 4.02, as last amended in January 1990 and incorporated into this section by reference, in toto, covering the range and organization of grades to be served, the transportation of pupils, and the ultimate maximum pupil enrollment to be housed on the site.

(d) Prepare maps showing present and proposed school sites, significant roads or highways, unsanitary or hazardous installations, such as airports or industries and the indicated boundary of the pupil attendance area to be served as delineated on form SFPD 4.02.

(e) Meet with appropriate local government, recreation, and park authorities to consider possible joint use of the grounds and buildings and to coordinate the design to benefit the intended users as required by Education Code Section 35275.

(f) Give written notice to the local planning agency having jurisdiction to review the proposed school site or addition to an existing school site and request a written report from the local planning agency of the investigations and recommendations for each proposed site with respect to conformity with the adopted general plan as required by Public Resources Code Section 21151.2 and Government Code Section 65402.

(g) Comply with Education Code Sections 39002 and 39002.5, with particular emphasis upon an engineering investigation made of the site to preclude locating the school on terrain that may be potentially hazardous:

(1) The geological and soils engineering study shall address all of the following:

(A) Nature of the site including a discussion of liquefaction, subsidence or expansive soils, slope, stability, dam or flood inundation and street flooding.

(B) Whether the site is located within a special study zone as defined in Education Code Section 39002.

(C) Potential for earthquake or other geological hazard damage.

(D) Whether the site is situated on or near a pressure ridge, geological fault or fault trace that may rupture during the life of the school building and the student risk factor.

(E) Economic feasibility of the construction effort to make the school building safe for occupancy.

(2) Other studies shall include the following:

(A) Population trends

(B) Transportation

(C) Water supply

(D) Waste disposal facilities

(E) Utilities

(F) Traffic hazards

(G) Surface drainage conditions

(H) Other factors affecting initial and operating costs.

(h) Prepare an environmental impact report, or negative declaration in compliance with the Environmental Quality Act, Public Resources Code, Division 13, (commencing with Section 21000). As required by Education Code Section 39003, the written findings of the environmental impact report or negative declaration must include a statement verifying that the site to be acquired for school purposes is not currently or formerly a hazardous, acutely hazardous substance release, or solid waste disposal site or, if so, that the wastes have been removed. Also, the written findings must state that the site does not contain pipelines which carry hazardous wastes or substances other than a natural gas supply line to that school or neighborhood. If hazardous air emissions are identified, the written findings must state that the health risks do not and will not constitute an actual or potential danger of public health of students or staff. If corrective measures of chronic or accidental hazardous air emissions are required under an existing order by another jurisdiction, the governing board shall make a finding that the emissions have been mitigated prior to occupancy of the school.

(i) Consult with, or demonstrate that the lead agency, if other than the district preparing the environmental impact report or negative declaration, has consulted with the appropriate city/county agency and with any air pollution control district or air quality management district having jurisdiction, concerning any facilities having hazardous or acutely hazardous air emissions within one–fourth of a mile of the proposed school site as required by Education Code Section 39003.

(j) Follow the recommendations of the Department of Transportation, Division of Aeronautics, if the proposed site is within two miles of the center line of an airport runway or proposed runway as required by Education Code Sections 39005 through 39007.

(k) Follow the standards for school site selection in Section 14010 of this article.

(l) Conduct a public hearing by the governing board of the school district as required in Education Code Section 39001 to evaluate the property using the standards described in Section 14010 of this article. The district's facility advisory committee may provide an evaluation of the proposed site to the governing board.

(m) Submit the request for exemption from a standard in Section 14010 of this article, with a description of the mitigation that overrides the standard, to the California Department of Education.

NOTE: Authority cited: Section 39101(b), Education Code. Reference: Sections 17706, 17724, 39001, 39002, 39002.5, 39003, 39005, 39006, 39007, 35275, and 39101(b), Education Code; Sections 2621 et. seq., 21000 et. seq., 21151.2, 21151.8, and 21152.3, Public Resources Code; Section 65402, Government Code.

HISTORY

1. Renumbering and amendment of section 14010 to section 14011 and adoption of NOTE filed 11–12–93; operative 12–13–93 (Register 93, No. 46).

§ 14012. Procedures for Site Acquisition – Self–Certified Districts.

(a) Districts with self–certified projects as defined in Education Code Section 17706(c) shall certify to the California Department of Education that the proposed site complies with the site selection standards in Section 14010. A self–certified district is one which has requested and received designation from the Office of Local Assistance as a self–certified district.

(b) Districts with self–certified projects need not submit items (c) through (l) in Section 14011 but shall maintain the records for the purposes of an audit in accordance with Education Code Section 17724(c).

(c) Self–certified districts shall be subject to random audits of the information contained in Section 14010 and Section 14011(c) through (l) of this article. The California Department of Education shall notify the State Allocation Board of any material inaccuracies or misrepresentation from the standards for site selection in Section 14010.

(d) In the event of receiving a complaint of noncompliance with the site selection standards in Section 14010, the California Department of Education shall notify the governing board of the school district in writing of the nature of the complaint. The self–certified district shall make available for review and investigation by the California Department of Education the documents used in their site selection process. After notification of the results of the complaint investigation by the California Department of Education, the district shall comply with the requirements of Education Code Section 39101(b).

(e) Self–certified districts may request advice from the California Department of Education as described in Education Code Section 39101(a).

(f) Self–certified districts shall prepare documentation of and retain for purposes of an audit in accordance with Education Code Section 17724(c) the exemption from any standard in Section 14010 of this article with a description of the mitigation that overrides the standard. Self–certified districts may request from the California Department of Education a review of the adequacy of the mitigation measure.

NOTE: Authority cited: Sections 17724(b) and 39101(b), Education Code. Reference: Sections 17706(c), 17724(c), 17724(d) and 39101(a), Education Code.

HISTORY

1. New section filed 11-12-93; operative 12-13-93 (Register 93, No. 46).

§ 14013. Procedures for Site Acquisition – Locally-Funded Districts.

A locally-funded district is defined as a district with a project not applying for funding from any state program administered by the State Allocation Board as defined in Chapter 22 (commencing with Section 17700) of Part 10 of the Education Code. A locally-funded district, before acquiring title to real property for school use, shall:

(a) Evaluate the property using the standards established in Section 14010 and items (e) through (*l*) in Section 14011;

(b) Comply with terms of the complaint investigation described in Section 14012(d); and

(c) May request advice from the California Department of Education as described in Education Code Section 39101(a).

(d) Prepare documentation of and retain for purposes of a complaint investigation the exemption from the standard in Section 14010 of this article with a description of the mitigation that overrides the standard. Locally-funded districts may request from the California Department of Education a review of the adequacy of the mitigation measure.

NOTE: Authority cited: Section 39001(b), Education Code. Reference: Sections 17700 et. seq., 39101(a), and 39101(b), Education Code.

HISTORY

1. New section filed 11-12-93; operative 12-13-93 (Register 93, No. 46).

Article 3. Attendance Areas and Practices

HISTORY

1. Repealer of Article 3 (Sections 14020-14021) filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39). For prior history, see Register 70, No. 11; Register 70, No. 26 and Register 71, No. 1.

Article 4. Standards, Planning and Approval of School Facilities

§ 14030. Standards for Development of Plans for the Design and Construction of School Facilities.

The following standards for new schools are for the use of all school districts for the purposes of educational appropriateness and promotion of school safety:

(a) Educational Specifications.

Educational specifications for school design shall be prepared based on the district's goals, objectives, policies and community input that determine the educational program and define the following:

(1) Enrollment of the school and the grade level configuration.

(2) Emphasis in curriculum content or teaching methodology that influences school design.

(3) Type, number, size, function, special characteristics of each space, and spatial relationships of the instructional area that are consistent with the educational program.

(4) Community functions that may affect the school design.

(b) Site Layout.

Parent drop off, bus loading areas, and staff parking shall be separated to allow students to enter and exit the school grounds safely unless these features are unavailable due to limited acreage in urban areas or restrictive locations, specifically:

(1) Buses do not pass through staff parking areas to enter or exit school site unless a barrier is provided that prevents vehicles from backing directly into the bus loading area.

(2) Parent drop off area is adjacent to school entrance and separate from bus area and staff parking.

(3) Vehicle traffic pattern does not interfere with foot traffic patterns. Foot traffic does not have to pass through entrance driveways to enter school. Crosswalks are clearly marked to define desired foot path to school entrance.

(4) Parking stalls are not located so vehicles must back into bus or loading areas used by parents. Island fencing or curbs are used to separate parking areas from loading/unloading areas.

(5) To provide equal access to insure the purposes of the least restrictive environment, bus drop off for handicapped students is in the same location as for regular education students.

(c) Playground and Field Areas.

Adequate physical education teaching stations shall be available to accommodate course requirements for the planned enrollment, specifically:

(1) A variety of physical education teaching stations are available to provide a comprehensive physical education program in accordance with the district's adopted course of study (including hardcourt, field area and indoor spaces).

(2) The physical education teaching stations are adequate for the planned student enrollment to complete the minimum instruction and course work defined in Education Code Sections 51210(g), 51220(d) and 51225.3(a)(1)(F).

(3) Supervision of playfields is not obstructed by buildings or objects that impair observation.

(4) Joint use for educational purposes with other public agencies is explored. Joint use layout with parks is not duplicative and fulfills both agencies' needs.

(d) Delivery and Utility Areas.

Delivery and service areas shall be located to provide vehicular access that does not jeopardize the safety of students and staff:

(1) Delivery/utility vehicles have direct access from the street to the delivery area without crossing over playground or field areas or interfering with bus or parent loading unless a fence or other barrier protects students from large vehicle traffic on playgrounds.

(2) Trash pickup is fenced or otherwise isolated and away from foot traffic areas.

(e) Future Expansion.

Site layouts shall have capability for expansion without substantial alterations to existing structures or playgrounds:

(1) Site layout designates area(s) for future permanent or temporary additions that are compatible with the existing site plans for playground layout and supervision.

(2) Utilities to the expansion area are included in the plans and have the capacity to accommodate anticipated growth.

(3) Exits, corridors, stairs, and elevators are located to accommodate capacity of additions, particularly in such buildings added as the multi-purpose/cafeteria, administration, gymnasium/or auditorium.

(f) Placement of Buildings.

Building placement shall consider compatibility of the various functions on campus and provide optimum patterns of foot traffic flow around and within buildings. Site layout of buildings, parking, driveways, and physical education areas shall be adequate to meet the instructional, security and service needs of the educational program:

(1) Building placement is compatible with other functions on campus; e.g., band room is not next to library.

(2) Physical relationship of classrooms, auxiliary, and support areas allows unobstructed movement of staff and students around the campus.

(3) Building placement has favorable orientation to wind, sun, rain, and natural light.

(4) Restrooms are conveniently located, require minimum supervision, and, to the extent possible, are easily accessible from playground and classrooms.

(5) Parking spaces are sufficient for staff, visitors, and students (where applicable).

(6) The campus is secured by fencing and electronic devices such as code entries, electronic monitoring or motion sensors when needed.

(g) Classrooms.

History
1. Amendment filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
2. Editorial correction of History 1 (Register 95, No. 23).

§ 57055. Developmental Progression of Energy Conservation Related Capital Outlay Projects.

(a) Energy conservation related projects shall be evaluated and ranked for approval by the Chancellor following the existing procedures for the statewide capital outlay program.

(b) Upon securing approval of a proposed energy conservation project by all appropriate review agencies, the governing board of a community college may submit to the Chancellor for approval, or disapproval, preliminary plans for the project.

(c) Preliminary plans for energy related projects shall include:

(1) The results of a technical audit (TA) performed by an authorized Technical Auditor which describes in detail the energy conservation measures the project is to institute.

(2) The status of the project as related to the various federal and state aided programs for energy conservation.

(3) An architectural and/or engineering analysis setting forth the detailed costs of the various elements of the project.

Note: Authority cited: Sections 66700, 70901, and 81805, Education Code. Reference: Sections 70901, and 81800–81839, Education Code.

History
1. Amendment filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
2. Editorial correction of History 1 (Register 95, No. 23).

§ 57060. Legislative Findings, Declarations and Intent; Energy Conservation.

The Board of Governors finds and declares that it is in the interest of the state and of the people thereof for the state to aid community college districts in finding cost–effective methods of conserving energy in buildings maintained by the districts. The Board of Governors also finds that while many districts may desire to participate in energy conservation programs designed to reduce the steadily rising costs of meeting the energy needs of district buildings, that the costs involved in improving existing facilities to become more energy efficient are often prohibitive.

It is the intent of the Board of Governors in adopting this regulation to encourage community college districts to retrofit buildings so as to conserve energy and reduce the costs of supplying energy.

Note: Authority cited: Sections 66700 and 70901, Education Code. Reference: Section 70901, Education Code.

History
1. New section filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
2. Editorial correction of History 1 (Register 95, No. 23).

§ 57061. Community College Districts, Borrowing; Retrofitting Buildings for Energy Conservation; Savings and Loan Investment.

(a) Community college districts may borrow funds from federal or state regulated financial institutions for the purposes of design and construction costs associated with retrofitting buildings to become more energy efficient. Community college districts shall only be authorized to borrow an amount which does not exceed that which can be repaid from energy cost avoidance savings accumulated from the improvement of school facilities.

(b) Any savings and loan association may make loans or advances of credit pursuant to the provisions of subdivision (a) in an amount not in excess of 5 percent of its total assets. This investment may be in addition to any other investment savings and loan associations are permitted to undertake under the provisions of section 6705.7 of the Financial Code.

Note: Authority cited: Sections 66700 and 70901, Education Code. Reference: Section 70901, Education Code.

History
1. New section filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
2. Editorial correction of History 1 (Register 95, No. 23).

§ 57062. Pre–Audits and Post–Audits for Buildings.

To the extent that these services are available, community college districts shall arrange for the pre–audit and post–audit of buildings by investor–owned or municipal utility companies or by independent energy audit companies or organizations which are recognized by federal or state regulated financial institutions. The pre–audit shall identify the type and amount of work necessary to retrofit the buildings and shall include an estimate of projected energy savings. The post–audit shall be conducted upon completion of the retrofitting of the buildings to insure that the project satisfies the recommendations of the pre–audit.

Note: Authority cited: Sections 66700 and 70901, Education Code. Reference: Section 70901, Education Code.

History
1. New section filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
2. Editorial correction of History 1 (Register 95, No. 23).

§ 57063. Contracts.

Community college districts taking action under this article shall contract with qualified businesses capable of retrofitting school buildings. To the extent that lists of qualified businesses are made available to community college districts by investor–owned or municipal utility companies or federal or state regulated financial institutions, community college districts may utilize the services of these businesses.

Note: Authority cited: Sections 66700 and 70901, Education Code. Reference: Section 70901, Education Code.

History
1. New section filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
2. Editorial correction of History 1 (Register 95, No. 23).

Subchapter 2. Environmental Quality

§ 57100. General.

(a) The regulations adopted under this Chapter are pursuant to the California Environmental Quality Act of 1970 (division 13 commencing with section 21000 of the Public Resources Code) and Guidelines adopted by Secretary for Resources in Division 6, Title 14, California Administrative Code.

(b) The purpose of these regulations is to provide basic principles, objectives, criteria and definitions for use by the Chancellor of the California Community Colleges in reviews required by the Education Code of community college construction projects.

(c) It is the intent of the Board of Governors to adopt in substance the Guidelines adopted by the Secretary for Resources in division 6, title 14, California Administrative Code, section 15000 et seq.

Note: Authority cited: Sections 66700 and 70901, Education Code, and Section 21082, Public Resources Code. Reference: Division 13 (commencing with Section 21000), Public Resources Code.

3. Repealer of article 1 heading and amendment of section filed 4–27–83; effective thirtieth day thereafter (Register 83, No. 18).
4. Amendment filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).

5. Editorial correction of HISTORY 4 (Register 95, No. 23).

§ 57101. Purpose.

HISTORY

1. Repealer filed 4–27–83; effective thirtieth day thereafter (Register 83, No. 18).

§ 57120. Basic Guidelines.

HISTORY

1. Repealer of Article 2 heading and Section 57120 filed 4–27–83; effective thirtieth day thereafter (Register 83, No. 18).

§ 57121. Application.

(a) When reviewing proposals from Community College districts for acquisition of land to be used as a site for college facilities, the Chancellor shall also review the Community College district's Initial Study (section 15080, title 14, California Administrative Code) of the development intended on the land and include the result of this review in a site review report.

(b) The Chancellor shall require that proposals for initial construction of facilities for a new campus be accompanied by a long–range plan for physical development approved by the district governing board which shows the intended use of all portions of the land and approximate location of buildings and facilities.

(c) The Chancellor shall require that an Initial Study, pursuant to section 15080, title 14, California Administrative Code, be submitted to the Chancellor's office concurrent with other required information.

(d) The Chancellor shall require that a copy of the (1) finding of Categorical Exemption (section 15023, title 14, California Administrative Code); Negative Declaration (section 15083, Title 14, California Administrative Code); or Notice of Completion (section 15085(c), title 14, California Administrative Code), whichever is appropriate, be submitted to his office concurrently with preliminary plans.

(e) The Chancellor shall require a copy of the findings of Categorical Exemption or Notice of Determination (section 15085(g), Title 14, California Administrative Code), whichever is appropriate, be submitted to the Chancellor's office concurrently with plans submitted for approval in accordance with section 81837 of the Education Code.

(f) The Chancellor shall withhold authorization of the use of state funds for construction until requirements of the California Environmental Quality Act of 1970 have been met.

HISTORY

1. Amendment filed 11–4–77; effective thirtieth day thereafter (Register 77, No. 45).
2. Repealer of article 3 heading and new NOTE filed 4–27–83; effective thirtieth day thereafter (Register 83, No. 18).
3. Repealer filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
4. Editorial correction of HISTORY 3 (Register 95, No. 23).

Subchapter 3. District Funded Construction Projects

§ 57150. Purpose.

The purpose of these regulations is to provide basic definitions, principles, and standards for use by the Chancellor of the California Community Colleges in considering any district–funded construction project subject to the requirements of section 81837 of the Education Code.

NOTE: Authority cited: Sections 66700, 70901, and 81836, Education Code. Reference: Sections 81836 and 81837, Education Code.

HISTORY

1. New chapter 3 (sections 57150–57158, not consecutive) filed 10–30–80; effective thirtieth day thereafter (Register 80, No. 44).
2. Amendment filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
3. Editorial correction of HISTORY 2 (Register 95, No. 23).

§ 57152. Definitions.

(a) "Capital Outlay Project" includes purchase of land and costs related thereto, including court costs, condemnation costs, legal fees, title fees, etc.; construction projects, including working drawings; and equipment related to a construction project regardless of cost or timing.

(b) "Construction Project" includes new construction, alteration, and extension or betterment of existing structures.

(c) "State–Funded Project" means a capital outlay project qualifying as a project pursuant to section 81805 of the Education Code, and for which a district requests or receives State funding assistance.

(d) "District–Funded Project" means a capital outlay project subject to the provisions of section 81837 of the Education Code for which any funds, other than state funds, are paid or to be paid for erecting, adding to, or altering any community college facility.

(e) "Five–Year Construction Plans" means a plan for capital construction for community college purposes of a community college district for the five–year period commencing with the next proposed year of funding.

NOTE: Authority cited: Sections 66700, 70901 and 81836, Education Code. Reference: Sections 81836 and 81837, Education Code.

HISTORY

1. Amendment filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
2. Editorial correction of HISTORY 1 (Register 95, No. 23).

§ 57154. Application.

In each case, the application for approval of plans for a district–funded project shall be accompanied by the plans and full, complete and accurate take–off of assignable and gross square feet of space, which shall comply with any and all requirements prescribed by the Chancellor.

NOTE: Authority cited: Sections 66700, 70901, and 81836, Education Code. Reference: Sections 81836 and 81837, Education Code.

HISTORY

1. Amendment filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
2. Editorial correction of HISTORY 1 (Register 95, No. 23).

§ 57156. Review.

The review and evaluation of plans for a district–funded project by the Chancellor, shall include the following elements:

(a) Review and evaluate each district–funded project with reference to the elements of the capital construction program specified in Education Code section 81821.

(b) The review and evaluation shall be directed particularly to ascertain whether the locally funded project is of appropriate size, is appropriately timed and is justified in terms of the elements of the capital construction plans and where applicable, the standards as adopted by the Board of Governors.

NOTE: Authority cited: Sections 66700, 70901, and 81836, Education Code. Reference: Sections 81836 and 81837, Education Code.

HISTORY

1. Amendment filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
2. Editorial correction of HISTORY 1 (Register 95, No. 23).

§ 57158. Chancellor's Response to Request for Approval of Plans.

(a) When analysis by the Chancellor shows that approval of the plans for a proposed locally–funded construction of a community college facility would not result in facilities which would be substantially at variance with space and utilization standards adopted by the Board of Governors, the Chancellor shall approve the plans.

(b) When analysis by the Chancellor shows that approval of the plans would result in facilities which would be substantially at variance with space and utilization standards adopted by the Board of Governors, the Chancellor shall respond by:

(1) Imposing conditions for the approval of the plans; or

(2) Finding that despite the substantial variance with space standards, the plans, as submitted, are acceptable, and responding to the district with:

(A) Cautions, and/or

(B) Appraisal of the potential consequences of this variance.

NOTE: Authority cited: Sections 66700, 70901 and 81836, Education Code. Reference: Sections 81836 and 81837, Education Code.

HISTORY

1. Amendment of subsection (b) filed 1–16–81; effective thirtieth day thereafter (Register 81, No. 3).
2. Amendment filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
3. Editorial correction of HISTORY 2 (Register 95, No. 23).

Subchapter 4. Deferred Maintenance

§ 57200. Purpose.

For the purposes of administration and implementation of the Community Colleges Facility Deferred Maintenance and Special Repair Program as required by Education Code section 84660, the provisions of this chapter shall apply.

NOTE: Authority cited: Sections 66700, 70901 and 84660, Education Code. Reference: Section 84660, Education Code.

HISTORY

1. New chapter 4 (sections 57200–57205) filed 7–8–82; effective thirtieth day thereafter (Register 82, No. 28).
2. Amendment filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
3. Editorial correction of HISTORY 2 (Register 95, No. 23).

§ 57201. General Requirements.

Each community college district applying to receive funds pursuant to this chapter shall:

(a) Prepare and submit to the Chancellor a current five–year maintenance plan. The plan shall be consistent with the district's five–year capital outlay plan, but shall not duplicate that plan. The plan shall provide for ongoing as well as deferred maintenance.

(b) Maintain a level of ongoing maintenance during the year for which funds are requested commensurate with the level of activity in prior years.

NOTE: Authority cited: Sections 66700, 70901 and 84660, Education Code. Reference: Section 84660, Education Code.

HISTORY

1. Amendment filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
2. Editorial correction of HISTORY 1 (Register 95, No. 23).

§ 57202. Application for Funds.

Districts shall apply to the Chancellor's Office for funding for deferred maintenance in the form and manner specified by the Chancellor.

NOTE: Authority cited: Sections 66700, 70901 and 84660, Education Code. Reference: Section 84660, Education Code.

HISTORY

1. Amendment filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
2. Editorial correction of HISTORY 1 (Register 95, No. 23).

§ 57203. Allocation of Funds.

The Chancellor shall allocate the funds appropriated by the Legislature as soon as such funds are available, and in accordance with the project priorities established, provided that ten percent (10%) of the funds may be held for contingencies that may occur during the year. Any such funds initially held for contingencies shall be allocated prior to the end of the fiscal year.

NOTE: Authority cited: Sections 66700, 70901 and 84660, Education Code. Reference: Section 84660, Education Code.

HISTORY

1. Amendment filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
2. Editorial correction of HISTORY 1 (Register 95, No. 23).

§ 57204. Selection of Projects.

The Chancellor shall evaluate district applications and rank projects for funding. Projects shall be ranked for funding using the following criteria, which shall be ranked equally:

(a) Health and Safety. Priority shall be given to projects necessary to meet safety requirements and to correct hazardous conditions which, if uncorrected, would result in facility closure or danger to staff and students utilizing the facility.

(b) Prevention of Further More Costly Repairs. Priority shall be given to deferred maintenance for instructional facilities necessary to prevent substantially increased maintenance or replacement costs in the future.

(c) Disruption of Programs. Priority shall be given to projects necessary to prevent disruption of instructional programs.

NOTE: Authority cited: Sections 66700, 70901 and 84660, Education Code. Reference: Section 84660, Education Code.

HISTORY

1. Amendment filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
2. Editorial correction of HISTORY 1 (Register 95, No. 23).

§ 57205. District Match.

The Chancellor will allocate funds for only fifty percent of the costs for a deferred maintenance project. In accepting funds under this chapter, a district agrees to spend district funds necessary to complete the project.

The Chancellor may waive this requirement in whole or in part for projects for which the district demonstrates that it cannot make available fifty percent of the costs for the project from other sources.

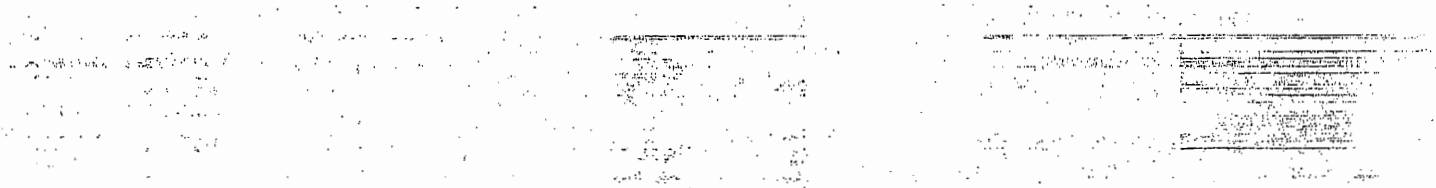
The Chancellor shall waive this requirement only for projects with high priority for funding. Highest priority shall be given to those projects which the Chancellor determines are necessary to prevent a facility from being closed.

Where projects would otherwise be of equal rank, first priority shall be given to those projects for which the district provides matching funds.

NOTE: Authority cited: Sections 66700, 70901 and 84660, Education Code. Reference: Section 84660, Education Code.

HISTORY

1. Amendment filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).



ifornia Administrative Code, and the California Fair Employment Prac- Act, as amended.

3044. Waivers.

Applicant districts may apply to the State Board of Education for waivers from provisions of the California Education Code under the provisions of Education Code Sections 52000 with respect to early childhood education schools and 58603 with respect to ESEA Title I schools if the granting of such waivers (which are not inconsistent with federal statutes or regulations) will aid such applicant districts in the establishment and operation of early childhood education programs or compensatory education programs for low income children.

HISTORY

1. Amendment filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39).

Subchapter 11. School Housing Aid for Compensatory Education

(Education Code Sections 16210-16215)

Article 1. General Provisions

§ 13050. Application for Funds.

An applicant for school housing aid pursuant to Education Code Sections 16210-16215 shall be identified as a "most concentrated area of poverty and social tension" described in Section 12051 or a "designated area of disadvantage" described in Education Code Section 58600.

NOTE: Authority cited for Chapter 11 Section 16213, Education Code.

HISTORY

Chapter 11 (§§ 13050 through 13053) filed 1-14-70; effective thirtieth day eafter (Register 70, No. 3).

nendment of section and NOTE filed 9-23-77; effective thirtieth day thereaf- r (Register 77, No. 39).

§ 13051. Priorities to Districts Reducing Teacher-Pupil Ratio.

Priorities in grants and allocations pursuant to Article 4 of Chapter 8 of Part 10 of the Education Code shall be granted to districts for use in areas designated as the most concentrated areas of poverty and social tension in the State when the district has reduced, or submitted an approvable plan for reducing, the number of pupils to full-time equivalent classroom teachers in grades kindergarten through six, inclusive, in those schools to a ratio of not more than 25-1.

HISTORY

1. Amendment filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39).

§ 13052. Basis of Priorities.

Priorities for purposes of grants and allocations pursuant to Article 4 of Chapter 8 of Part 10 of the Education Code shall be based upon needs and the urgency thereof, of school districts as determined by the following factors:

(a) Justification of the need for new school plants, new classrooms, acquisition of land, sites for new classrooms, or remodeling, renovation or reconstruction of existing school buildings or facilities.

(b) The number of available unused or partially used classrooms in the designated area.

(c) The number of available unused or partially used classrooms outside of the designated area which may be used reasonably to accommodate pupils from the designated area.

The joint recommendation of the Bureau of School Facilities Plan- and the Bureau of Intergroup Relations of the Department of Educa- of district plans for new school plants, acquisition of land, sites for ...w classrooms, for construction of new facilities, or for remodeling, renovation, or reconstruction of existing school buildings or facilities.

(e) Availability of the district's uncommitted capital outlay funds for school housing to meet the needs of the district's plan for compensatory education.

HISTORY

1. Amendment of subsection (d) filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39).

§ 13053. Computation of Entitlements.

Entitlements for school housing aid shall be computed on the basis of public school population ratios determined in accordance with Education Code Section 54483. The Director, with the approval of the State Board of Education, may modify entitlements when required by the comparative needs, and the urgency thereof, of school districts.

HISTORY

1. Amendment filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39).

Subchapter 12. School Housing Aid for Districts Impacted by Seasonal Agricultural Employment

HISTORY

1. New Chapter 12 (Section 13070) filed 1-14-70; effective thirtieth day thereafter (Register 70, No. 3).
2. Repealer of Chapter 12 (Section 13070) filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39).

Chapter 13. School Facilities and Equipment

Subchapter 1. School Housing

Article 1. General Standards

§ 14000. Policy Declaration.

NOTE: Authority cited for Article 1: Sections 39000, 39100, 39101 and 39118, Education Code.

HISTORY

1. New chapter 1 (§§ 14000, 14001, 14010, 14020, 14021, 14030 through 14033, 14040 through 14045) filed 1-14-70; effective thirtieth day thereafter. Approved nunc pro tunc by State Building Standards Commission as to any building standards involved (Register 70, No. 3).
2. Amendment of section and NOTE filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39).
3. Repealer filed 11-12-93; operative 12-13-93 (Register 93, No. 46).

§ 14001. Minimum Standards.

Educational facilities planned by school districts shall be:

(a) Evolved from a statement of educational program requirements which reflects the school district's educational goals and objectives.

(b) Master-planned to provide for maximum site enrollment.

(c) Located on a site which meets California Department of Education standards as specified in Section 14010.

(d) Designed for the environmental comfort and work efficiency of the occupants.

(e) Designed to require a practical minimum of maintenance.

(f) Designed to meet federal, state, and local statutory requirements for structure, fire, and public safety.

(g) Designed and engineered with flexibility to accommodate future needs.

NOTE: Authority cited: Sections 17251(b) and 33031, Education Code. Reference: Sections 17017.5 and 17251(b), Education Code.

HISTORY

1. Amendment filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39).
2. Amendment of text and adoption of NOTE filed 11-12-93; operative 12-13-93 (Register 93, No. 46).
3. Amendment of NOTE filed 10-30-2000; operative 10-30-2000 pursuant to Government Code section 11343.4(d) (Register 2000, No. 44).

Article 2. School Sites

§ 14010. Standards for School Site Selection.

All districts shall select a school site that provides safety and that supports learning. The following standards shall apply:

(a) The net usable acreage and enrollment for a new school site shall be consistent with the numbers of acres and enrollment established in the 2000 Edition, "School Site Analysis and Development" published by the California Department of Education and incorporated into this section by reference, in toto, unless sufficient land is not available or circumstances exist due to any of the following:

(1) Urban or suburban development results in insufficient available land even after considering the option of eminent domain.

(2) Sufficient acreage is available but it would not be economically feasible to mitigate geological or environmental hazards or other site complications which pose a threat to the health and/or safety of students and staff.

(3) Sufficient acreage is available but not within the attendance area of the unhoused students or there is an extreme density of population within a given attendance area requiring a school to serve more students on a single site. Choosing an alternate site would result in extensive long-term bussing of students that would cause extreme financial hardship to the district to transport students to the proposed school site.

(4) Geographic barriers, traffic congestion, or other constraints would cause extreme financial hardship for the district to transport students to the proposed school site.

(b) If a school site is less than the recommended acreage required in subsection (a) of this section, the district shall demonstrate how the students will be provided an adequate educational program including physical education as described in the district's adopted course of study.

(c) The property line of the site even if it is a joint use agreement as described in subsection (o) of this section shall be at least the following distance from the edge of respective power line easements:

(1) 100 feet for 50-133 kV line.

(2) 150 feet for 220-230 kV line.

(3) 350 feet for 500-550 kV line.

(d) If the proposed site is within 1,500 feet of a railroad track easement, a safety study shall be done by a competent professional trained in assessing cargo manifests, frequency, speed, and schedule of railroad traffic, grade, curves, type and condition of track need for sound or safety barriers, need for pedestrian and vehicle safeguards at railroad crossings, presence of high pressure gas lines near the tracks that could rupture in the event of a derailment, preparation of an evacuation plan. In addition to the analysis, possible and reasonable mitigation measures must be identified.

(e) The site shall not be adjacent to a road or freeway that any site-related traffic and sound level studies have determined will have safety problems or sound levels which adversely affect the educational program.

(f) Pursuant to Education Code sections 17212 and 17212.5, the site shall not contain an active earthquake fault or fault trace.

(g) Pursuant to Education Code sections 17212 and 17212.5, the site is not within an area of flood or dam flood inundation unless the cost of mitigating the flood or inundation impact is reasonable.

(h) The site shall not be located near an above-ground water or fuel storage tank or within 1500 feet of the easement of an above ground or underground pipeline that can pose a safety hazard as determined by a risk analysis study, conducted by a competent professional, which may include certification from a local public utility commission.

(i) The site is not subject to moderate to high liquefaction or landslides.

(j) The shape of the site shall have a proportionate length to width ratio to accommodate the building layout, parking and playfields that can be safely supervised and does not exceed the allowed passing time to classes for the district.

(k) The site shall be easily accessible from arterial roads and shall allow minimum peripheral visibility from the planned driveways in accordance with the Sight Distance Standards established in the "Highway Design Manual," Table 201.1, published by the Department of Transportation, July 1, 1990 edition, and incorporated into this section by reference, in toto.

(l) The site shall not be on major arterial streets with a heavy traffic pattern as determined by site-related traffic studies including those that require student crossings unless mitigation of traffic hazards and a plan for the safe arrival and departure of students appropriate to the grade level has been provided by city, county or other public agency in accordance with the "School Area Pedestrian Safety" manual published by the California Department of Transportation, 1987 edition, incorporated into this section by reference, in toto.

(m) Existing or proposed zoning of the surrounding properties shall be compatible with schools in that it would not pose a potential health or safety risk to students or staff in accordance with Education Code Section 17213 and Government Code Section 65402 and available studies of traffic surrounding the site.

(n) The site shall be located within the proposed attendance area to encourage student walking and avoid extensive bussing unless bussing is used to promote ethnic diversity.

(o) The site shall be selected to promote joint use of parks, libraries, museums and other public services, the acreage of which may be included as part of the recommended acreage as stated in subsection (a) of this section.

(p) The site shall be conveniently located for public services including but not limited to fire protection, police protection, public transit and trash disposal whenever feasible.

(q) The district shall consider environmental factors of light, wind, noise, aesthetics, and air pollution in its site selection process.

(r) Easements on or adjacent to the site shall not restrict access or building placement.

(s) The cost and complications of the following shall be considered in the site selection process and should not result in undue delays or unreasonable costs consistent with State Allocation Board standards:

(1) Distance of utilities to the site, availability and affordability of bringing utilities to the site.

(2) Site preparation including grading, drainage, demolition, hazardous cleanup, including cleanup of indigenous material such as serpentine rock, and off-site development of streets, curbs, gutters and lights.

(3) Eminent domain, relocation costs, severance damage, title clearance and legal fees.

(4) Long-term high landscaping or maintenance costs.

(5) Existence of any wildlife habitat that is on a protected or endangered species list maintained by any state or federal agency, existence of any wetlands, natural waterways, or areas that may support migratory species, or evidence of any environmentally sensitive vegetation.

(t) If the proposed site is on or within 2,000 feet of a significant disposal of hazardous waste, the school district shall contact the Department of Toxic Substances Control for a determination of whether the property should be considered a Hazardous Waste Property or Border Zone Property.

(u) At the request of the governing board of a school district, the State Superintendent of Public Instruction may grant exemptions to any of the standards in this section if the district can demonstrate that mitigation of specific circumstances overrides a standard without compromising a safe and supportive school environment.

NOTE: Authority cited: Sections 17251(b) and 33031, Education Code. Reference: Sections 17212, 17212.5, 17213, 17251(b) and 17251(f), Education Code.

HISTORY

1. Renumbering of former section 14010 to section 14011 and new section filed 11-12-93; operative 12-13-93 (Register 93, No. 46). For prior history, see Register 77, No. 39.

2. Amendment of section and NOTE filed 10-30-2000; operative 10-30-2000 pursuant to Government Code section 11343.4(d) (Register 2000, No. 44).

§ 14011. Procedures for Site Acquisition — State-Funded School Districts.

A state-funded school district is defined as a school district having a project funded under Chapter 12.5 (commencing with Section 17070.10) of the Education Code. A state-funded school district, before acquiring title to real property for school use, shall obtain written approval from the California Department of Education using the following procedures:

(a) Request a preliminary conference with a consultant from the School Facilities Planning Division and in consultation review and evaluate sites under final consideration.

(b) Contact the School Facilities Planning Division of the California Department of Education to obtain a "School Facilities Planning Division Field Site Review," form SFPD 4.0, published by the California Department of Education, as last amended in December 1999 and incorporated into this section by reference, in toto, which lists the site options in order of merit according to the site selection standards delineated in Section 14010.

(c) Prepare a statement of policies as delineated on the "School Facilities Planning Division School Site Report," form SFPD 4.02, as last amended in December 1999 and incorporated into this section by reference, in toto, covering the range and organization of grades to be served, the transportation of pupils, and the ultimate maximum pupil enrollment to be housed on the site. Prepare a statement showing how the site is appropriate in size as justified by the school district's Facilities Master Plan, including acreage increases above the California Department of Education recommendation made to compensate for off-site mitigation. A school district may choose, in place of a master plan, a developer fee justification document or a five-year plan if it addresses enrollment projections, needed schools, and site sizes.

(d) Prepare maps showing present and proposed school sites, significant roads or highways, unsanitary or hazardous installations, such as airports or industries and the indicated boundary of the pupil attendance to be served as delineated on form SFPD 4.02.

(e) Meet with appropriate local government, recreation, and park authorities to consider possible joint use of the grounds and buildings and to coordinate the design to benefit the intended users as required by Education Code Section 35275.

(f) Give written notice to the local planning agency having jurisdiction to review the proposed school site or addition to an existing school site and request a written report from the local planning agency of the investigations and recommendations for each proposed site with respect to conformity with the adopted general plan as required by Public Resources Code Section 21151.2 and Government Code Section 65402.

(g) Comply with Education Code Sections 17212 and 17212.5, with particular emphasis upon an engineering investigation made of the site to preclude locating the school on terrain that may be potentially hazardous:

(1) The geological and soils engineering study shall address all of the following:

(A) Nature of the site including a discussion of liquefaction, subsidence or expansive soils, slope, stability, dam or flood inundation and street flooding.

(B) Whether the site is located within a special study zone as defined in Education Code Section 17212.

(C) Potential for earthquake or other geological hazard damage.

(D) Whether the site is situated on or near a pressure ridge, geological fault or fault trace that may rupture during the life of the school building and the student risk factor.

(E) Economic feasibility of the construction effort to make the school building safe for occupancy.

(2) Other studies shall include the following:

(A) Population trends

(B) Transportation

(C) Water supply

(D) Waste disposal facilities

(E) Utilities

(F) Traffic hazards

(G) Surface drainage conditions

(H) Other factors affecting initial and operating costs.

(h) Prepare an environmental impact report, or negative declaration in compliance with the Environmental Quality Act, Public Resources Code, Division 13, (commencing with Section 21000 with particular attention to Section 21151.8). As required by Education Code Section 17213, the written findings of the environmental impact report or negative declaration must include a statement verifying that the site to be acquired for school purposes is not currently or formerly a hazardous, acutely hazardous substance release, or solid waste disposal site or, if so, that the wastes have been removed. Also, the written findings must state that the site does not contain pipelines which carry hazardous wastes or substances other than a natural gas supply line to that school or neighborhood. If hazardous air emissions are identified, the written findings must state that the health risks do not and will not constitute an actual or potential danger of public health of students or staff. If corrective measures of chronic or accidental hazardous air emissions are required under an existing order by another jurisdiction, the governing board shall make a finding that the emissions have been mitigated prior to occupancy of the school.

(i) Consult with, or demonstrate that the lead agency, if other than the district preparing the environmental impact report or negative declaration, has consulted with the appropriate city/county agency and with any air pollution control district or air quality management district having jurisdiction, concerning any facilities having hazardous or acutely hazardous air emissions within one-fourth of a mile of the proposed school site as required by Education Code Section 17213.

(j) For purposes of Environmental Site Assessment, school districts shall comply with Education Code sections 17210.1, 17213.1, and 17213.2.

(k) Follow the recommendations of the State Superintendent of Public Instruction report based upon the Department of Transportation, Division of Aeronautics, findings, if the proposed site is within two miles of the center line of an airport runway or proposed runway as required by Education Code Section 17215.

(l) Follow the standards for school site selection in Section 14010 of this article.

(m) Conduct a public hearing by the governing board of the school district as required in Education Code Section 17211 to evaluate the property using the standards described in Section 14010 of this article. The school district's facility advisory committee may provide an evaluation of the proposed site to the governing board.

(n) Submit the request for exemption from a standard in Section 14010 of this article, with a description of the mitigation that overrides the standard, to the California Department of Education.

(o) Certify there are no available alternative school district-owned sites for the project deemed usable for school purposes by the California Department of Education or certify that the school district intends to sell an available alternative school district-owned site and use the proceeds from the sale for the purchase of the new school site.

NOTE: Authority cited: Sections 17251(b) and 33031, Education Code. Reference: Sections 17070.50, 17072.12, 17210.1, 17211, 17212, 17213 and 17251(b), Education Code.

HISTORY

1. Renumbering and amendment of section 14010 to section 14011 and adoption of NOTE filed 11-12-93; operative 12-13-93 (Register 93, No. 46).
2. Amendment of section heading, section and NOTE filed 10-30-2000; operative 10-30-2000 pursuant to Government Code section 11343.4(d) (Register 2000, No. 44).

§ 14012. Procedures for Site Acquisition – Locally-Funded School Districts.

A locally-funded school district is defined as a school district with a project not applying for funding from any state program administered by the State Allocation Board as defined in Chapter 12.0 (commencing with Section 17000) or Chapter 12.5 (commencing with Section 17070.10) of the Education Code. A locally-funded school district, before acquiring title to real property for school use, shall:

(a) Evaluate the property using the standards established in Section 14010 and items (e) through (l) in Section 14011;

(b) Comply with terms of the complaint investigation described in Section 14012(d); and

(c) May request advice from the California Department of Ed. ation as described in Education Code Section 17211(a).

(d) Prepare documentation of and retain for purposes of a complaint investigation the exemption from the standard in Section 14010 of this article with a description of the mitigation that overrides the standard. Locally-funded school districts may request from the California Department of Education a review of the adequacy of the mitigation measure.

(e) Comply with Education Code section 17268 regarding potential safety or health risks to students and staff.

NOTE: Authority cited: Sections 17251(b) and 33031, Education Code. Reference: Sections 17251(a) and (b) and 17268, Education Code.

HISTORY

1. New section filed 11-12-93; operative 12-13-93 (Register 93, No. 46).
2. Repealer of former section 14012 and renumbering of former section 14013 to new section 14012, including amendment of section heading, section and NOTE, filed 10-30-2000; operative 10-30-2000 pursuant to Government Code section 11343.4(d) (Register 2000, No. 44).

§ 14013. Procedures for Site Acquisition—Locally-Funded Districts.

NOTE: Authority cited: Section 39001(b), Education Code. Reference: Sections 17700 et. seq., 39101(a), and 39101(b), Education Code.

HISTORY

1. New section filed 11-12-93; operative 12-13-93 (Register 93, No. 46).
2. Renumbering of former section 14013 to section 14012 filed 10-30-2000; operative 10-30-2000 pursuant to Government Code section 11343.4(d) (Register 2000, No. 44).

Article 3. Attendance Areas and Practices

HISTORY

1. Repealer of Article 3 (Sections 14020-14021) filed 9-23-77; effective thirtieth day thereafter (Register 77, No. 39). For prior history, see Register 70, No. 11; Register 70, No. 26 and Register 71, No. 1.

Article 4. Standards, Planning and Approval of School Facilities

§ 14030. Standards for Development of Plans for the Design and Construction of School Facilities.

The following standards for new schools are for the use of all school districts for the purposes of educational appropriateness and promotion of school safety:

(a) Educational Specifications.

Prior to submitting preliminary plans for the design and construction of school facilities, and as a condition of final plan approval by CDE, school board-approved educational specifications for school design shall be prepared and submitted to the California Department of Education based on the school district's goals, objectives, policies and community input that determine the educational program and define the following:

(1) Enrollment of the school and the grade level configuration.

(2) Emphasis in curriculum content or teaching methodology that influences school design.

(3) Type, number, size, function, special characteristics of each space, and spatial relationships of the instructional area that are consistent with the educational program.

(4) Community functions that may affect the school design.

(b) Site Layout.

Parent drop off, bus loading areas, and parking shall be separated to allow students to enter and exit the school grounds safely unless these features are unavailable due to limited acreage in urban areas or restrictive locations, specifically:

(1) Buses do not pass through parking areas to enter or exit school site unless a barrier is provided that prevents vehicles from backing directly into the bus loading area.

(2) Parent drop off area is adjacent to school entrance and separate from bus area and staff parking.

(3) Vehicle traffic pattern does not interfere with foot traffic patterns. Foot traffic does not have to pass through entrance driveways to enter school. Crosswalks are clearly marked to define desired foot path to school entrance.

(4) Parking stalls are not located so vehicles must back into bus or loading areas used by parents. Island fencing or curbs are used to separate parking areas from loading/unloading areas.

(5) To provide equal access to insure the purposes of the least restrictive environment, bus drop off for handicapped students is in the same location as for regular education students.

(c) Playground and Field Areas.

Adequate physical education teaching stations shall be available to accommodate course requirements for the planned enrollment, specifically:

(1) A variety of physical education teaching stations are available to provide a comprehensive physical education program in accordance with the district's adopted course of study (including hardcourt, field area and indoor spaces).

(2) The physical education teaching stations are adequate for the planned student enrollment to complete the minimum instruction and course work defined in Education Code Sections 51210(g), 51220(d) and 51225.3(a)(1)(F).

(3) Supervision of playfields is not obstructed by buildings or objects that impair observation.

(4) Joint use for educational purposes with other public agencies is explored. Joint use layout with parks is not duplicative and fulfills both agencies' needs.

(d) Delivery and Utility Areas.

Delivery and service areas shall be located to provide vehicular access that does not jeopardize the safety of students and staff:

(1) Delivery/utility vehicles have direct access from the street to the delivery area without crossing over playground or field areas or interfering with bus or parent loading unless a fence or other barrier protects students from large vehicle traffic on playgrounds.

(2) Trash pickup is fenced or otherwise isolated and away from foot traffic areas.

(e) Future Expansion.

Site layouts shall have capability for expansion without substantial alterations to existing structures or playgrounds:

(1) Site layout designates area(s) for future permanent or temporary additions that are compatible with the existing site plans for playground layout and supervision.

(2) Utilities to the expansion area are included in the plans and have the capacity to accommodate anticipated growth.

(3) Exits, corridors, stairs, and elevators are located to accommodate capacity of additions, particularly in such buildings added as the multi-purpose/cafeteria, administration, gymnasium/or auditorium.

(f) Placement of Buildings.

Building placement shall consider compatibility of the various functions on campus and provide optimum patterns of foot traffic flow around and within buildings. Site layout of buildings, parking, driveways, and physical education areas shall be adequate to meet the instructional, security and service needs of the educational program:

(1) Building placement is compatible with other functions on campus: e.g., band room is not next to library.

(2) Physical relationship of classrooms, auxiliary, and support areas allows unobstructed movement of staff and students around the campus.

(3) Building placement has favorable orientation to wind, sun, rain, and natural light.

Article 1. General

15000. Authority. The regulations contained herein are prescribed by the Secretary for Resources pursuant to authority granted in Public Resources Code Section 21083 to be followed by all state agencies, boards, and commisions, all counties, cities and counties, cities including charter cities, regional agencies, public districts, redevelopment agencies, and all other political subdivisions of the State in the implementation of the Environmental Quality Act of 1970 dealing with environmental quality, the evaluation of projects, and the preparation and evaluation of environmental impact reports. These Guidelines have been developed by the Office of Planning and Research for adoption by the Secretary for Resources in accordance with Section 21083. Additional information may be obtained by writing:

Secretary for Resources
Room 1311, 1416 Ninth Street
Sacramento, CA 95814

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New Chapter 3, Articles 1 through 10 (§§ 15000 through 15166, not consecutive) filed 2-7-73; designated effective upon filing as provided in Section 21083, Public Resources Code (Register 73, No. 6).

Article 2. Purpose

15005. Purpose. The purpose of these Guidelines is to provide public agencies with principles, objectives, criteria, and definitions of statewide application to be used in the implementation of the California Environmental Quality Act of 1970, Public Resources Code Sections 21000–21174 as amended by Chapter 1154 of the Statutes of 1972 (AB 889). Implementation of the act includes the orderly evaluation of projects and the preparation of environmental impact reports.

Article 3. Policy

15010. Legislative Declaration. The Legislature has declared that:

(a) Every citizen has a responsibility to contribute to the preservation and enhancement of the environment.

(b) It is the intent of the Legislature that all agencies of the state government which regulate activities of private individuals, corporations, and public agencies which are found to affect the quality of the environment, shall regulate such activities so that major consideration is given to preventing environmental damage.

15011. State Policy. The Legislature has declared that it is the policy of the state to:

(a) Develop and maintain a high-quality environment now and in the future, and take all action necessary to protect, rehabilitate, and enhance the environmental quality of the state.

(b) Take all action necessary to provide the people of this state with clean air and water, enjoyment of aesthetic, natural, scenic, and historic environmental qualities, and freedom from excessive noise.

(c) Prevent the elimination of fish or wildlife species due to man's activities, insure that fish and wildlife populations do not drop below self-perpetuating levels, and preserve for future generations representations of all plant and animal communities and examples of the major periods of California history.

(d) Ensure that the long-term protection of the environment shall be the guiding criterion in public decisions.

(e) Create and maintain conditions under which man and nature can exist in productive harmony to fulfill the social and economic requirements of present and future generations.

(f) Require governmental agencies at all levels to develop standards and procedures necessary to protect environmental quality.

(g) Require governmental agencies at all levels to consider qualitative factors as well as economic and technical factors and long-term benefits and costs, in addition to short-term benefits and costs and to consider alternatives to proposed actions affecting the environment.

15012. Informational Document. An Environmental Impact Report is an informational document which, when fully prepared in accordance with the CEQA and these Guidelines, will inform public decision-makers and the general public of the environmental effects of projects they propose to carry out or approve. The EIR process is intended to enable public agencies to evaluate a project to determine whether it may have a significant effect on the environment, examine and institute methods of reducing adverse impacts, and consider alternatives to the project as proposed. These things must be done prior to approval or disapproval of the project. An EIR may not be used as an instrument to rationalize approval of a project, nor do indications of adverse impact, as enunciated in an EIR, require that a project be disapproved—public agencies retain existing authority to balance environmental objectives with economic and social objectives.

15013. Early Preparation. An EIR is a useful planning tool to enable environmental constraints and opportunities to be considered before project plans are finalized. EIR's should be prepared as early in the planning process as possible to enable environmental considerations to influence project program or design.

15014. **Application.** These Guidelines have only general application to the diversity of projects undertaken or approved by public agencies. They provide basic principles, objectives, criteria and definitions which individual public agencies shall adapt for internal use, interpreting these Guidelines in terms of specific projects. Such internal procedures must be consistent with these Guidelines, and shall be adopted within sixty days after these Guidelines are adopted. Individual public agencies shall also coordinate the procedures outlined in these Guidelines with procedures they have been using up to April 5, 1973, in undertaking or approving projects—in doing so, however, agencies are not free to compromise the basic principles, objectives, criteria, and definitions included here.

Article 4. Definitions

15020. General. Whenever the following words are used in these Guidelines, unless otherwise defined, they shall have the meaning ascribed to them in this article. These definitions are intended to clarify but not to replace or negate the definitions used in CEQA.

15021. Approval. Approval means the decision by a public agency which commits the agency to a definite course of action in regard to a project intended to be carried out by any person. The exact date of approval of any project is a matter determined by each public agency according to its rules, regulations, and ordinances. Legislative action in regard to a project often constitutes approval.

In connection with private activities, approval occurs upon the earliest commitment to issue or the issuance by the public agency of a discretionary contract, grant, subsidy, loan, or other form of financial assistance, lease, permit, license, certificate, or other entitlement for use of the project.

15022. CEQA—California Environmental Quality Act. Environmental Quality Act (CEQA) means California Public Resources Code Sections 21000 through 21174.

15023. Categorical Exemption. Categorical Exemption means an exception from the requirement for the preparation of an environmental impact report for a class of projects based on a finding by the Secretary for Resources that the class of projects does not have a significant effect on the environment.

15024. Discretionary Project. Discretionary project means an activity defined as a project which requires the exercise of judgment, deliberation, or decision on the part of the public agency or body in the process of approving or disapproving a particular activity, as distinguished from situations where the public agency or body merely has to determine whether there has been conformity with applicable statutes, ordinances, or regulations.

15025. Emergency. Emergency means a sudden and catastrophic calamity caused by an occurrence or combination of occurrences of statewide or local impact, such as fire, flood, earthquake or other natural disaster, riot, war, accident, or sabotage.

15026. Environment. Environment means the physical conditions which exist in the area which will be affected by a proposed project including land, air, water, minerals, flora, fauna, ambient noise, objects of historic or aesthetic significance.

15027. EIR—Environmental Impact Report. Environmental Impact Report (EIR) means a detailed statement setting forth the environmental effects and considerations pertaining to a project as specified in Section 21100 of the California Environmental Quality Act.

(a) Draft EIR means an EIR containing the information specified in Sections 15141, 15142, and 15143 of these Guidelines.

(b) Final EIR means an EIR containing the information specified in Sections 15141, 15142, and 15143 of these Guidelines, a section for comments received in the consultation process, and the response of the Responsible Agency to the comments received. This term is discussed in detail in Section 15146.

15028. EIS—Environmental Impact Statement. Environmental Impact Statement (EIS) means an environmental impact report prepared pursuant to the National Environmental Policy Act (NEPA). The Federal Government uses the term EIS in the place of the term EIR which is used in CEQA.

15029. Feasible. Feasible means capable of being accomplished in a successful manner by reasonably available, economic, and workable means.

15030. Lead Agency. Lead Agency means the public agency which has the principal responsibility for carrying out or approving a project which may have a significant effect on the environment where more than one public agency is involved with the same underlying activity.

15031. Local Agency. Local agency means any public agency other than a state agency, board or commission. Local agency includes but is not limited to cities, counties, charter cities and counties, special districts, redevelopment agencies and any board, commission, or organizational subdivision of a local agency when so designated by order or resolution of the governing legislative body of the local agency.

15032. Ministerial Projects. Ministerial projects as a general rule, include those activities defined as projects which are undertaken or approved by a governmental decision which a public officer or public agency makes upon a given state of facts in a prescribed manner in obedience to the mandate of legal authority. With these projects, the officer or agency must act upon the given facts without regard to his own judgment or opinion concerning the propriety or wisdom of the act although the statute, ordinance, or regulation may require, in some degree, a construction of its language by the officer.

15033. Negative Declaration. Negative declaration means a statement by the public agency that will carry out or approve a project that a project, although not categorically exempt, would not have a significant effect on the environment and therefore does not require an EIR. The term "Exemption Declaration" is interchangeable with the term "Negative Declaration".

15034. Notice of Completion. Notice of Completion means a brief report filed with the Secretary for Resources as soon as a public agency has completed a draft EIR and is prepared to send out copies for review. The contents of this notice are explained in Section 15085(c).

15035. Notice of Determination. Notice of Determination means a brief notice to be filed by a public agency when it approves or determines to carry out a project which is subject to the requirements of CEQA. The contents of this report are explained in Section 15085(g).

15036. Person. Person includes any person, firm, association, organization, partnership, business, trust, corporation, company, district, county, city and county, city, town, the State, and any of the agencies' political subdivisions of such entities.

15037. Project. (a) Project means the whole of an action, resulting in physical impact on the environment, directly or ultimately, that is any of the following:

(1) An activity directly undertaken by any public agency including but not limited to public works construction and related activities, clearing or grading of land, improvements to existing public structures, enactment and amendment of zoning ordinances, and the adoption of local General Plans or elements thereof.

(2) An activity undertaken by a person which is supported in whole or in part through public agency contracts, grants, subsidies, loans, or other forms of assistance from one or more public agencies.

(3) An activity involving the issuance to a person of a lease, permit, license, certificate, or other entitlement for use by one or more public agencies.

(b) Project does not include:

(1) Anything specifically exempted by state law.

(2) Proposals for legislation to be enacted by the state Legislature.

(3) Continuing administrative or maintenance activities, such as purchases for supplies, personnel-related actions, emergency repairs to public service facilities, general policy and procedure making (except as they are applied to specific instances covered above), feasibility or planning studies.

(4) The submittal of proposals to a vote of the people of the State or of a particular community.

15038. Public Agency. Public agency includes any state agency, board or commission and any local or regional agency, as defined in these Guidelines. It does not include the courts of the State. This term does not include agencies of the federal government.

15039. Responsible Agency. Responsible agency means the public agency which proposes to undertake or approve a project, and is responsible for making a Negative Declaration or for the preparation of an EIR.

15040. Significant Effect. Significant effect means a substantial adverse impact on the environment.

Article 5. General Responsibilities.

15050. Public Agencies. All public agencies are responsible for complying with the CEQA, according to these Guidelines. They must develop their own procedures consistent with these Guidelines. Where a public agency prepares an EIR itself or contracts with private experts to do the preparation, the public agency is responsible entirely for the adequacy and objectivity of the EIR.

15051. Office of Planning and Research (OPR). OPR is responsible for the preparation and development of principles, objectives, criteria and definitions to implement the CEQA, prior to adoption by the Secretary for Resources. OPR also, as part of guideline development, shall consider proposals for Categorical Exemption and makes appropriate recommendations to the Secretary for Resources. OPR shall be responsible for resolving disputes over Lead Agency designation.

15052. The Secretary of the Resources Agency. The guidelines shall be officially adopted by the Secretary of the Resources Agency, including a finding that each class of projects given a Categorical Exemption will not have a significant effect on the environment. He also has the responsibility for consolidating all state comments on federally sponsored projects. The Secretary of the Resources Agency may issue supplements to these Guidelines, containing amendments and/or additions.

15053. Fees. (a) All public agencies preparing EIRs for projects to be carried out by some entity other than the public agency itself may charge and collect a reasonable fee from such person or entity, in order to recover the estimated costs incurred in preparing the EIR.

(b) Public agencies may charge and collect a fee from members of the public for the actual cost of reproducing a copy of an EIR requested by the member of the public.

15054. Timely Compliance. Public agencies should carry out their responsibilities for preparing and reviewing EIRs within a reasonable period of time. The requirement for the preparation of an EIR should not cause undue delays in the processing of applications for permits or other entitlements to use.

2—84384
2—84419

Article 6. Application of the Act to Projects

15060. General Rule. The requirements set forth in these Guidelines apply to projects which may have a significant effect on the environment and which involve discretionary governmental action. Where it can be seen with certainty that the activity in question will not have a significant effect on the environment, the activity is not covered by the requirements set forth in CEQA, and these Guidelines concerning the evaluation of projects and the preparation and review of environmental impact reports do not apply.

15061. State and Local Agency Projects (Public Projects). (a) When a public agency plans to carry out a project which may have a significant effect on the environment, the public agency shall prepare an EIR through its own efforts or through contract.

(b) Where a project which may have a significant effect on the environment is to be carried out by a nongovernmmental person subject to approval, financial support, or some other involvement by a public agency, the public agency will prepare an EIR by its own efforts or by contract. However, the agency may require the person to supply data and information, both to determine whether the project may have a significant impact on the environment, and to assist in the preparation of an EIR by the agency. This information may take the form of a draft EIR, if the agency desires.

(c) Where the project is to be undertaken by a local agency, as defined in these Guidelines, but requires state approval or financial assistance, the state agency shall require the local agency to prepare the EIR or Negative Declaration, to be submitted with the request for approval of the proposed project. This must also be done where federal funds are involved, but only if a state agency has discretionary authority over the use of those funds. If the local project has been mandated on the local agency by a state agency, the EIR prepared by the local agency may be limited to consideration of those factors and alternatives which do not conflict with the order.

(d) The EIR may be prepared as a separate document, or as part of a project report. If prepared as a part of the project report, it must still contain in one separate and distinguishable section the elements required of an EIR, including the seven elements specified in Section 15143 of these Guidelines.

(e) All public and private activities or undertakings pursuant to or in furtherance of a redevelopment plan constitute a single project, which shall be deemed approved at the time of adoption of the redevelopment plan by the legislative body. The EIR in connection with the redevelopment plan shall be submitted in accordance with Section 33352 of the Health and Safety Code.

(f) All of the above is subject to modification according to the regulations governing the lead agency principle, that not more than one EIR shall be prepared in connection with the same underlying activity.

15062. Private Projects. Projects undertaken by a person other than a public agency which are supported in whole or part through contracts, grants, subsidies, loans, or other forms of assistance from one or more public agencies or which involve the issuance to a person of a lease, permit, license, certificate, or other entitlement to use by one or more public agencies require the preparation of an environmental impact report if the project may have a significant effect on the environment and the project involves discretionary governmental action unless the project is otherwise exempted by these Guidelines. The public agency with discretionary control over the project shall be responsible for preparing the environmental impact report.

15063. Federal Projects. (a) In regard to any proposed federal project in this state which may have a significant effect on the environment and on which the state officially comments, the state officials responsible for such comments shall include in their comments an EIR setting forth the matters specified in Section 15143 of these Guidelines.

(b) In cases where these Guidelines require the preparation of an EIR by a responsible agency and an EIS has been or will be prepared for the same project pursuant to the requirements of the National Environmental Policy Act of 1969 and implementing regulations thereto, all or any part of such statement may be submitted in lieu of all or any part of an EIR required by these Guidelines, provided that the EIS or the part thereof so used, shall comply with the requirements of these Guidelines. In most cases where the federal EIS is used, discussion of mitigation measures and growth inducing impact will have to be added because these elements are required by CEQA but not by the National Environmental Policy Act.

15064. Lead Agency Principle. Where a project is to be carried out or approved by more than one public agency, only one EIR or Negative Declaration shall be made, and it will be prepared by the Lead Agency. For the purposes of these Guidelines, only one EIR or Negative Declaration shall be made by the Lead Agency for an ongoing activity even where the activity involves, at different stages, more than one definition of a project as defined in Section 15037(a).

15065. Designation of Lead Agency. Where two or more public agencies are involved with a project, which agency shall be the Lead Agency shall be determined by the following principles:

(a) The Lead Agency shall be the public agency which proposes to carry out the project.

(b) If the project is to be carried out by a nongovernmental person, the Lead Agency shall be the public agency with the greatest responsibility for supervising or approving the project as a whole. The Lead Agency will generally be the agency with general governmental powers rather than an agency with a single or limited purpose which is involved by reason of the need to provide a public service or public utility to the project; in such cases, the single or limited purpose agency will, upon request, provide data concerning all aspects of its activities

required to furnish service to the project to the agency drafting the EIR, and no separate EIR will be required in regard to such activities.

(c) Where more than one public agency equally meet the criteria set forth in paragraph (b) above, the agency which is to act first on the project in question shall be the Lead Agency (following the principle that the environmental impact should be assessed as early as possible in governmental planning).

(d) In the event that the designation of a Lead Agency is in dispute among public agencies, any public agency may submit the question to the Office of Planning and Research which shall designate the Lead Agency based on consideration of the above priorities, along with consideration of the capacity of such agency to adequately fulfill the requirements of the CEQA.

15066. Obligations of a Lead Agency. (a) In these Guidelines, wherever reference is made to the responsible agency for a project, this shall be the Lead Agency when more than one public agency is involved in undertaking or approving the project. The Lead Agency shall meet all obligations for which the responsible agency is responsible, including the determination of whether the project will or will not have a significant effect on the environment.

(b) The Lead Agency shall prepare or cause to be prepared the EIR or Negative Declaration after consultation with all other public agencies which must approve the project in question or a part of the project. To insure that the EIR or Negative Declaration reflects the concerns of all the public agencies involved, the Lead Agency should consult with public agencies which will issue approvals for the project. This consultation shall be done at an early stage of the development of the EIR.

(c) The Lead Agency shall include in its Notice of Completion a statement to the effect that it is a Lead Agency.

(d) The EIR prepared by the Lead Agency shall be considered by every public agency prior to its approval or disapproval of the project.

15067. Subsequent EIR. Where an EIR has been prepared, no additional EIR need be prepared unless:

(a) Substantial changes are proposed in the project which will require major revisions of the EIR, due to the involvement of new environmental impacts not considered in the original EIR;

(b) There are substantial changes with respect to the circumstances under which the project is to be undertaken, such as a change in the proposed location of the project, which will require major revisions in the EIR due to the involvement of new environmental impacts not covered in the original EIR.

15068. Use of a Single EIR. A responsible agency may employ a single EIR to describe more than one project, if such projects are essentially the same in terms of environmental impact. Further, a responsible agency may use an earlier EIR prepared in connection with an earlier project to apply to a later project, if the circumstances of the projects

are essentially the same. Agencies may elect to write EIRs in advance for entire programs or regulations, in order to be prepared for project applications to come. Whenever an agency chooses to utilize any of these alternatives, however, it must find that the environmental effects of the projects are similar enough to warrant the same treatment in an EIR and that the EIR will adequately cover the impacts of any single project. If these tests are not met, an agency should amend the EIR it prepares for a program to apply it to an individual project with unusual characteristics.

15069. Multiple and Phased Projects. Where individual projects are, or a phased project is, to be undertaken and where the total undertaking comprises a project with significant environmental effect, the responsible agency or Lead Agency must prepare a single EIR for the ultimate project. Where an individual project is a necessary precedent for action on a larger project, or commits the Responsible Agency to a larger project, with significant environmental effect, an EIR must address itself to the scope of the larger project, subject to the limitation of Section 15066 of these Guidelines. Where one project is one of several similar projects of a public agency, but is not deemed a part of a larger undertaking or a larger project, the agency may prepare one EIR for all projects, or one for each project, but should in either case comment upon the combined effect.

15070. Ongoing Project. (a) A project covered by Section 15037(a)(1) definition of project specified by these Guidelines, approved prior to November 23, 1970, shall not require an Environmental Impact Report or a Negative Declaration—unless it is a project which may have a significant effect on the environment, and

(1) A substantial portion of public funds allocated for the project have not been spent and it is still feasible to modify the project in such a way as to mitigate against potentially adverse environmental effects, or to choose feasible alternatives to the project, including the alternative of "no project" or halting the project; or

(2) The responsible agency proposes a modification to the project plan, such that the project might have a new significant effect on the environment.

(b) Notwithstanding the above, projects which come under the jurisdiction of the National Environmental Policy Act (NEPA) and which, through regulations promulgated under NEPA, were held to be too far advanced at the time of NEPA's effective date to require an EIS in compliance with those Guidelines, do not require an EIR under CEQA—unless they fall under (2) above.

(c) A project covered by paragraph 15037(a)(3) or contracts in paragraph 15037(a)(2) under the definition of project specified by these Guidelines, approved prior to December 5, 1972, does not require an EIR. However, any project legally challenged prior to this date for noncompliance with the CEQA shall be bound by special rules set forth in Section 21170 of the CEQA.

(d) These Guidelines and CEQA do not require the preparation of an EIR for a project described in paragraph 15037(a)(3) and for contracts described in paragraph 15037(a)(2) under the definition of project for approvals prior to April 5, 1973. However, CEQA expressly does not prohibit a public agency from considering environmental factors in connection with the approval or disapproval of a project and from imposing reasonable fees on the appropriate private person or entity for preparing an environmental report. Local agencies may require environmental reports for projects covered by this paragraph pursuant to local ordinances during this interim period.

(e) Where a project involving the issuance of a lease, permit, license, certificate, or other entitlement to use has been granted a discretionary governmental approval for part of the project before April 5, 1973, and requires another or additional discretionary governmental approvals after April 5, 1973, the project shall require the preparation of an EIR only if the approval or approvals after April 5, 1973, involve a greater degree of responsibility and control over the project as a whole.

15071. Emergency Projects. The following emergency projects are exempt from the requirement for an environmental impact report:

(a) Projects undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish or replace property or facilities damaged or destroyed as a result of a disaster in a disaster stricken area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing with Section 8550) of Division 1, Title 2 of the Government Code.

(b) Emergency repairs to public service facilities necessary to maintain service.

(c) Projects undertaken as immediate action necessary to prevent or mitigate an emergency.

15072. Feasibility and Planning Studies. A project involving only feasibility or planning studies for possible future actions which the agency, board, or commission has not approved, adopted, or funded does not require the preparation of an environmental impact report but does require consideration of environmental factors as required by Section 21102 of CEQA.

15073. Ministerial Projects. Ministerial projects do not require the preparation of environmental impact reports. The determination of what is "ministerial" can most appropriately be made by the particular public agency involved based upon its analysis of its own laws, and it is anticipated that each public agency will make such determination either as a part of its implementing regulations or on a case-by-case basis. It is further anticipated that the following actions will, in most cases, be ministerial in nature:

(a) Issuance of building permits.
(b) Issuance of business licenses.
(c) Approval of final subdivision maps.

(d) Approval of individual utility service connections and disconnections.

In the absence of any discretionary provision contained in local ordinance, it shall be presumed that these four actions are ministerial. Each public agency may, in its implementing regulations or ordinances, provide an identification or itemization of its projects and actions which are deemed ministerial under the applicable laws and ordinances.

Article 7. Evaluating Projects

15080. Initial Study. If the project is not part of a class of projects that qualifies for a Categorical Exemption and there is a possibility that the project may have a significant effect on the environment, the responsible agency should conduct an initial study to determine if the project may have a significant effect on the environment. If any of the effects of a project may have a substantial adverse impact on the environment, regardless of whether the overall effect of the project is adverse or beneficial, then an environmental impact report must be prepared where discretionary governmental action is involved.

If the project is to be carried out by a nongovernmental person, the responsible agency may require such person to submit data and information which will enable the responsible agency to make this determination.

15081. Determining Significant Effect. (a) The determination of whether a project may have a significant effect on the environment calls for careful judgment on the part of the public agency involved, based to the extent possible on scientific and factual data. An iron clad definition of significant effect is not possible because the significance of an activity may vary with the setting. For example, an activity which may not be significant in an urban area may be significant in a rural area. There may be a difference of opinion on whether a particular effect should be considered adverse or beneficial, but where there is, or anticipated to be, a substantial body of opinion that considers or will consider the effect to be adverse, the public agency should prepare an EIR to explore the environmental effects involved.

(b) In evaluating the significance of the environmental effect of a project, the public agency shall consider both primary and secondary consequences. Primary consequences are immediately related to the project (the construction of a new treatment plant may facilitate population growth in a particular area), while secondary consequences are related more to primary consequences than to the project itself (an impact upon the resource base, including land, air, water and energy use of the area in question may result from the population growth).

(c) Some examples of consequences which may have a significant effect on the environment in connection with most projects where they occur, include the following:

(1) Is in conflict with environmental plans and goals that have been adopted by the community where the project is to be located;

(2) Has a substantial and demonstrable negative aesthetic effect;

(3) Substantially affects a rare or endangered species of animal or plant, or habitat of such a species;

(4) Causes substantial interference with the movement of any resident or migratory fish or wildlife species;

(5) Breaches any published national, state, or local standards relating to solid waste or litter control;

(6) Results in a substantial detrimental effect on air or water quality, or on ambient noise levels for adjoining areas;
(7) Involves the possibility of contaminating a public water supply system or adversely affecting ground water;
(8) Could cause substantial flooding, erosion or siltation;
(9) Is subject to major geologic hazards.

15082. Mandatory Findings of Significance. In every case where any of the following conditions are found to exist as a result of a project, the project will be found to have a significant effect on the environment:
(a) Impacts which have the potential to degrade the quality of the environment, or curtail the range of the environment.
(b) Impacts which achieve short-term, to the disadvantage of long-term, environmental goals. A short-term impact on the environment is one which occurs in a relatively brief, definitive period of time while long-term impacts will endure well into the future.
(c) Impacts for a project which are individually limited, but cumulatively considerable. A project may impact on two or more separate resources where the impact on each resource is relatively small. If the effect of the total of those impacts on the environment is significant, an EIR must be prepared. This mandatory finding of significance does not apply to two or more separate projects where the impact of each is insignificant.
(d) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

15083. Negative Declaration. A Negative Declaration shall be prepared for a project which would ordinarily be expected to have a significant effect on the environment, but which the Public Agency finds will have no significant effect on the environment due to circumstances peculiar to the specific project.
(a) A Negative Declaration must include a description of the project as proposed, and a finding that the project will not have a significant effect on the environment.
(b) The Negative Declaration followed by notice of the action taken regarding the approval or disapproval of the project must be filed with the Secretary for Resources, if the responsible agency is a state agency, board or commission. If the responsible agency is a local agency, as defined in these Guidelines, these documents shall be filed with the county clerk of the county, or counties, in which the project will be located. The Negative Declaration shall be filed with sufficient time before the project is approved to provide an opportunity for members of the public to respond to the finding. The Negative Declaration should not exceed one page in length.

(c) After completing a Negative Declaration, the responsible agency shall file a copy of the Negative Declaration and a Notice of Determination. The Notice of Determination shall include the decision of the agency to approve or disapprove the project, the determination of the agency whether the project will have a significant effect on the environment, and whether an EIR has been prepared pursuant to the provisions of CEQA.

(1) If the responsible agency is a state agency, the Notice of Determination shall be filed with the Secretary of Resources.

(2) If the responsible agency is a local agency, the Notice of Determination shall be filed with the county clerk of the county or counties in which the project will be located.

15084. Decision to Prepare an EIR. If the responsible agency finds, after an initial study, that the project may have a significant effect on the environment, the responsible agency must prepare or cause to be prepared an Environmental Impact Report.

15085. EIR Process. The following steps shall be followed after the responsible agency decides to prepare an EIR.

(a) If the project is to be carried out by a nongovernmental person, the responsible agency may require such person to submit data and information necessary to enable the public agency to prepare the EIR. This information may be transmitted in the form of a draft EIR, but the responsible agency must examine this draft and the information contained within it to assure itself of its accuracy and objectivity and amend the draft if necessary. The EIR in its final form must reflect the independent judgment of the responsible agency.

(b) The content of an EIR is described in article 9 of these Guidelines. Each element of an EIR required by these Guidelines must be covered, and these elements should be separated into distinct sections. After completing a draft EIR consisting of the information specified in Sections 15141, 15142, and 15143 of these Guidelines, the responsible agency must consult with, and obtain the comments of, any public agency which has jurisdiction by law with respect to the project and may consult with any person who has special expertise with respect to any environmental impact involved. Opportunity for comments from the general public should be provided.

(c) As soon as the draft EIR is completed, but before copies are sent out for review, an official notice stating that the draft EIR has been completed must be filed with the Secretary of the Resources Agency. The notice shall include a brief description of the project, its proposed location, and an address where copies of the EIR are available. This notice shall be referred to as a Notice of Completion. A form for this notice is provided in the Appendices.

(d) The responsible agency shall evaluate comments received from persons who reviewed the draft EIR.

(e) The responsible agency shall prepare a final EIR. The contents of a final EIR are specified in Section 15146 of these Guidelines.

(f) The final EIR shall be presented to the decision-making body of the responsible agency. The decision-making body shall adopt the final EIR and consider the contents of the report when it makes a decision on the project.

(g) After making a decision on the project, the responsible agency shall file a notice of action taken on the project. This notice shall be referred to as a Notice of Determination. Such notice shall include (1) the decision of the agency to approve or disapprove the project, (2) the determination of the agency whether the project will or will not have a significant effect on the environment, and (3) whether an EIR has been prepared pursuant to the provisions of CEQA.

(1) If the responsible agency is a state agency, the Notice of Determination shall be filed with the Secretary for Resources.

(2) If the responsible agency is a local agency, the Notice of Determination shall be filed with the county clerk of the county or counties in which the project would be located.

(h) If the responsible agency is a state agency, a copy of the final EIR shall be filed with the appropriate planning agency of any city, county, or city and county which will be affected by the project.

15086. EIR Combined with Existing Planning and Review Process. To the extent possible, the EIR process should be combined with the existing planning, review, and project approval process being used by the responsible agency. The responsible agency shall include the EIR as a part of the regular project report where such a report is used in the existing review and budgetary process.

15087. Additional Notices. In their implementing procedures, public agencies may provide for the filing of notices in addition to the notices required by these Guidelines. Additional notices may include the determination that a project is categorically exempt, that a project is covered by the emergency exemption or the ministerial exemption, or that an activity is not covered by the act at all.

Article 8. Categorical Exemptions

15100. Categorical Exemptions. Section 21084 of the Public Resources Code requires these Guidelines to include a list of classes of projects which have been determined not to have a significant effect on the environment and which shall, therefore, be exempt from the provisions of the Environmental Quality Act of 1970.

In response to that mandate, the Secretary for Resources has found that the following classes of projects listed in this article do not have a significant effect on the environment and they are declared to be categorically exempt from the requirement for the preparation of an EIR.

15101. Class 1: Existing Facilities. Class 1 consists of the operation, repair, maintenance or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that previously existing, including but not limited to:

(a) Interior or exterior alterations involving such things as interior partitions, plumbing, and electrical conveyances;

(b) Existing facilities of both investor, and publicly owned utilities used to convey or distribute electric power, natural gas, sewage, etc.;

(c) Existing highways and streets (within already established rights-of-way) sidewalks, gutters, bicycle and pedestrian trails, and similar facilities;

(d) Restoration, or rehabilitation of deteriorated or damaged structures, facilities or mechanical equipment to meet current standards of public health and safety, unless it is determined that the damage was substantial and resulted from an environmental hazard such as earthquake, landslide or flood;

(e) Additions to existing structures provided that the addition will not result in an increase of more than 50 percent of the floor area of the structure before the addition or alteration, or 2500 square feet, whichever is less;

(f) Addition of safety or health protection devices for use during construction of or in conjunction with existing structures, facilities or mechanical equipment, or topographical features (including navigational devices) where these devices do not have or result in an adverse environmental impact;

(g) New copy on existing on and off-premise signs;

(h) Maintenance of existing landscaping, native growth and water supply reservoirs (excluding the use of economic poisons, as defined in Division 7, Chapter 2, California Agricultural Code);

(i) Maintenance of fish screens, fish ladders, wildlife habitat areas, artificial wildlife waterway devices, streamflows, springs and waterholes, and stream channels (clearing of debris) to protect fish and wildlife resources;

(j) Fish stocking by the California Department of Fish and Game;

(k) Division of existing multiple family rental units into condominiums;

(*l*) Demolition and removal of buildings and related structures except where they are of historical, archaeological or architectural consequence as officially designated by Federal, State or local governmental action.

15102. Class 2: Replacement or Reconstruction. Class 2 consists of replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced, including but not limited to:

(a) Replacement or reconstruction of existing schools and hospitals to provide earthquake resistant structures which do not increase capacity more than 50%;

(b) Replacement of a commercial structure with a new structure of substantially the same size and purpose.

15103. Class 3: New Construction of Small Structures. Class 3 consists of construction and location of single, new facilities or structures listed in this notice and installation or new equipment and facilities including but not limited to:

(a) Single family residences not in conjunction with the building of two or more such units;

(b) Motels, apartments, and duplexes designed for not more than four dwelling units if not in conjunction with the building of two or more such structures;

(c) Stores, offices, and restaurants if designed for an occupant load of 20 persons of less, if not in conjunction with the building of two or more such structures;

(d) Water main, sewage, electrical, gas and other utility extensions of reasonable length to serve such construction;

(e) Accessory (appurtenant) structures including garages, carports, patios, swimming pools and fences.

15104. Class 4: Minor Alterations to Land. Class 4 consists of minor public or private alterations in the condition of land, water and/or vegetation, including but not limited to:

(a) Grading on land with a slope of less than 10 percent, except where it is to be located in a waterway, in any wetland, in an officially designated (by Federal, State or local governmental action) scenic area, or in officially mapped areas of severe geologic hazard;

(b) New gardening or landscaping but not including tree removal;

(c) Filling of earth into previously excavated land with material compatible with the natural features of the site;

(d) Minor alterations in land, water and vegetation on existing officially designated wildlife management areas of fish production facilities which result in improvement of habitat for fish and wildlife resources or greater fish production;

(e) Minor temporary uses of land having negligible or no permanent effects on the environment, including carnivals, sales of Christmas trees, etc.

15105. Class 5: Alterations in Land Use Limitations. Class 5 consists of minor alterations in land use limitations, except zoning, including but not limited to:

(a) Minor lot line adjustments, side yard and set back variances not resulting in the creation of any new parcel nor in any change in land use or density;

(b) Issuance of minor encroachment permits.

15106. Class 6: Information Collection. Class 6 consists of basic data collection, research, experimental management and resource evaluation activities which do not result in a serious or major disturbance to an environmental resource. These may be for strictly information gathering purposes, or as part of a study leading to an action which a public agency has not yet approved, adopted or funded.

15107. Class 7: Regulatory Actions for Protection of Natural Resources. Class 7 consists of actions taken by regulatory agencies, as authorized by state law or local ordinance, to assure the maintenance, restoration, or enhancement of a natural resource, including but not limited to wildlife preservation.

15108. Class 8: Regulatory Actions for the Protection of the Environment. Class 8 consists of actions taken by regulatory agencies, as authorized by state law or local ordinance, to assure the maintenance, restoration, enhancement, or protection of the environment.

15109. Class 9: Inspections. Class 9 consists of activities limited entirely to inspection, to check for performance of an operation, or quality, health or safety of a project, including related activities such as inspection for possible mislabeling, misrepresentation or adulteration of products.

15110. Class 10: Loans. Class 10 consists of loans made by the Department of Veterans Affairs under the Veterans Farm and Home Purchase Act of 1943.

15111. Class 11: Accessory Structures. Class 11 consists of construction, or placement of minor structures accessory to (appurtenant to) existing commercial, industrial, or institutional facilities, including but not limited to:

(a) On-premise signs;

(b) Small parking lots.

15112. Class 12: Surplus Government Property Sales. Class 12 consists of sales of surplus government property except for parcels of land.

15113. Relation to Ministerial Projects. Section 21080 of the Public Resources Code as added by Chapter 1154, Statutes of 1972, exempts all ministerial projects and activities of public agencies from application of the CEQA. The matter of what is or is not a ministerial project is up to the determination of each public agency, based on an examination of the applicable laws and ordinances. Thus, while the Categorical Exemptions listed in this subsection contain classes or examples of projects which in many cases will be ministerial, the inclusion of them is in no way intended to imply any finding here that, in any particular jurisdiction, they are ministerial or discretionary. The exemptions, naturally, only apply where the project in question is found to be discretionary.

15114. Exception by Location. Class 3, 4, 5 and 11 are qualified by considerations of where the project is to be located—a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. Therefore, these classes are considered to apply in all instances, EXCEPT where the project may impact on an environmental resource, or hazard of critical concern as may be hereafter designated, precisely mapped, and officially adopted pursuant to law. Moreover, all exemptions for these classes are inappliable when the cumulative impact of successive projects of the same type in the same place, over time is significant—for example, annual additions to an existing building under Class 1.

15115. Revisions To List of Categorical Exemptions. (a) Any public agency may, at any time, request that a new class of Categorical Exemptions be added, or an existing one deleted. This request must be made in writing to the Office of Planning and Research. If a new class is to be added, it will be referred to, pending adoption, as a Proposed Class for Categorical Exemption, and shall include detailed information about the type of projects involved. The Proposed Class for Categorical Exemption must also give detailed information supporting the contention that the type of projects in question do not significantly affect the environment. Where the projects may potentially be carried out in substantially differing environments, specific mention should be made as to the type of environment in which the exemption may be applied, or not applied.

(b) If the request is to delete an existing class of Categorical Exemptions, detailed information must be included to support the contention that the type of projects does significantly affect the environment. The request may, instead of proposing full deletion, only propose limitation on the applicability of the class of Categorical Exemption to certain environments, or out of certain environments.

(c) The Office of Planning and Research will consider the request, and deliver the request as soon as possible, with a recommendation supporting or opposing the request, to the Secretary for Resources, who shall make the final determination on accepting or rejecting the proposal. Adoption of the revision will require an amendment to these guidelines. Amendments must be made in accord with the Administrative Procedure Act, including provisions for notice and public comment.

15116. Application by Public Agencies. The classes listed in this article are broadly drawn, as are the examples given with each. Each public agency shall, in the course of establishing its own prrocedures, list those specific activities which fall within each class, subject to the qualification that these lists must be consistent with both the letter and the intent expressed in the classes.

Article 9. Contents of Environmental Impact Reports

15140. General. Environmental impact reports shall contain the information outlined in this article.

15141. Description of Project. The description of the project shall contain the following information but should not supply extensive detail beyond that needed for evaluation and review of the environmental impact.

(a) The precise location and boundaries of the proposed project shall be shown on a detailed map, preferably topographic. The location of the project shall also appear on a regional map.

(b) A statement of the objectives sought by the proposed project.

(c) A general description of the project's technical, economic, and environmental characteristics, considering the principal engineering proposals.

15142. Description of Environmental Setting. An EIR must include a description of the environment in the vicinity of the project, as it exists before commencement of the project, from both a local and regional perspective. Knowledge of the regional setting is critical to the assessment of environmental impacts. Special emphasis should be placed on environmental resources that are rare or unique to that region. Specific reference to related projects, both public and private, both existent and planned, in the region should also be included, for purposes of examining the possible cumulative impact of such projects.

15143. Environmental Impact. All phases of a project must be considered when evaluating its impact on the environment: planning, acquisition, development and operation. The following subjects shall be discussed, preferably in separate sections or paragraphs.

(a) **The Environmental Impact of the Proposed Action:** Describe the direct and indirect impacts of the project on the environment, giving due consideration to both the short-term and long-term effects. It should include specifics of the area, the resources involved, physical changes, alterations to ecological systems and changes induced in population distribution, population concentration, the human use of the land (including commercial and residential development) and other aspects of the resource base such as water, scenic quality and public services.

(b) **Any Adverse Environmental Effects Which Cannot Be Avoided if the Proposal is Implemented:** Describe any adverse impacts, including those which can be reduced to an insignificant level but not eliminated. Where there are impacts that cannot be alleviated without imposing an alternative design, their implications and the reasons why the project is being proposed, notwithstanding their effect, should be described. Do not neglect impacts on any aesthetically valuable surroundings, or on human health.

(c) **Mitigation Measures Proposed to Minimize the Impact:** Describe any mitigation measures written into the project plan to reduce significant environmentally adverse impacts to insignificant levels, and the basis for considering these levels acceptable. Where a particular mitigation measure has been chosen from among several alternatives should be discussed and reasons should be given for the choice made.

(d) **Alternatives to the Proposed Action:** Describe any known alternatives to the project or to the location of the project, which could feasibly attain the basic objectives of the project, and why they were rejected in favor of the ultimate choice. The specific alternative of "no project" must also always be evaluated, along with the impact. Attention should be paid to alternatives capable of substantially reducing or eliminating any environmentally adverse impacts, even if these alternatives substantially impede the attainment of the project objectives, and are most costly.

(e) **The Relationship Between Local Short-Term Uses of Man's Environment and the Maintenance and Enhancement of Long-Term Productivity:** Describe the cumulative and long-term effects of the proposed project which adversely affect the state of the environment. Special attention should be given to impacts which narrow the range of beneficial uses of the environment or pose long-term risks to health or safety. In addition, the reasons why the proposed project is believed by the sponsor to be justified now, rather than reserving an option for further alternatives, should be explained.

(f) **Any Irreversible Environmental Changes Which Would Be Involved in the Proposed Action Should It Be Implemented:** Uses of nonrenewable resources during the initial and continued phases of the project may be irreversible since a large commitment of such resources makes removal or nonuse thereafter unlikely. Primary impacts and, particularly, secondary impacts (such as a highway improvement which provides access to a nonaccessible area) generally commit future generations to similar uses. Also irreversible damage can result from environmental accidents associated with the project. Irretrievable commitments of resources should be evaluated to assure that such current consumption is justified.

(g) **The Growth-Inducing Impact of the Proposed Action:** Discuss the ways in which the proposed project could foster economic or population growth, either directly or indirectly, in the surrounding environment. Included in this are projects which would remove obstacles to population growth (a major expansion of a waste water treatment plant might, for example, allow for more construction in service areas). Increases in the population may further tax existing community service facilities so consideration must be given to this impact. Also discuss the characteristic of some projects which may encourage and facilitate other activities that could significantly affect the environment, either individually or cumulatively. It must not be assumed that growth in any area is necessarily beneficial, detrimental, or of little significance to the environment

15144. Organizations and Persons Consulted. The identity of all federal, state or local agencies, other organizations and private individuals consulted in preparing the EIR, and the identity of the persons, firm or agency preparing the EIR, by contract or other authorization must be given.

15145. Water Quality Aspects. With respect to water quality aspects of the proposed project which have been previously certified by the appropriate state or interstate organization as being in substantial compliance with applicable water quality standards, reference to the certification should be made.

15146. Contents of Final Environmental Impact Report. (a) The Final EIR shall consist of the Draft EIR containing the elements described in Sections 15141, 15142, and 15143 of these Guidelines, a section containing the comments received through the consultation process described in Article 10, either verbatim or in summary, and the response of the Responsible Agency to the significant environmental points raised in the review and consultation process.

(b) The response of the Responsible Agency to comments received may take the form of a revision of the Draft EIR or may be an attachment to the Draft EIR. The response shall describe the disposition of significant environmental issues raised (e.g., revisions to the proposed project to mitigate anticipated impacts or objections). In particular the major issues raised when the Responsible Agency's position is at variance with recommendations and objections raised in the comments must be addressed in detail giving reasons why specific comments and suggestions were not accepted, and factors of overriding importance warranting an override of the suggestions.

Article 10. Evaluation of Environmental Impact Reports

15160. Adequate Time for Review and Comment. The Responsible Agency should provide adequate time for other public agencies and members of the public to review and comment on an EIR that it has prepared.

(a) These Guidelines do not provide a fixed period of time for this review and consultation process in order to allow variations according to local needs. Public agencies may establish time periods for review in their implementing procedures and shall notify reviewing agencies of the time periods.

(b) In setting time periods for review, public agencies shall give consideration to their obligation to obtain comments from public agencies having jurisdiction by law with respect to the project and to the policy favoring public participation.

(c) While state and local agencies are not bound by federal guidelines for implementing the National Environmental Policy Act, the time limits in the federal guidelines provide an example that may be followed in some situations. The federal guidelines require at least 90 days for the review of a draft EIR and another 30 days for the review of a final EIR. Review periods of this length may be desirable for some large, public projects, but shorter periods may be provided where the shorter period will still allow adequate review.

(d) A review period for an EIR does not require a halt in other planning activities related to a project. Planning should continue in conjunction with environmental evaluation.

15161. Review of Environmental Impact Reports. (a) Public agencies must develop procedures to ensure that project sponsors obtain and receive adequate comments on their EIRs from public agencies which have jurisdiction by law with respect to the project. Such procedures should include provisions for consultation with persons who have special expertise in environmental matters. It is suggested that public agencies utilize existing state, and regional or local clearinghouses to distribute EIRs and other environmental documents to appropriate agencies.

(b) Cities and counties should compile listings of other agencies, particularly local agencies, which have legal jurisdiction and/or special expertise with respect to various projects and project locations. Appendix B to these Guidelines identifies state agencies which have legal jurisdiction over, or special expertise in, various impacts. This could be the basis for a part of such listings.

(c) Reviewers should focus on the sufficiency of the EIR in discussing possible impacts upon the environment, ways in which adverse effects might be minimized, and alternatives to the project, in light of the intent of the act to provide decision-makers with useful information about such factors.

(d) Upon completion of reviewing an EIR, it is suggested that reviewing agencies supply the project sponsor with the name of a contact person who is available for later consultation should this prove necessary.

15162. Failure to Comment. If any public agency or person who is consulted with regard to an EIR fails to comment within a reasonable time as specified by the Responsible Agency, it shall be assumed, absent a request for a specific extension of time, that such agency or person has no comment to make.

15163. Requests for Environmental Documents. The Responsible Agency, after preparing an EIR or other environmental document described in these Guidelines, is responsible for making such documents available to the public for inspection. Members of the general public requesting copies of the EIR may be charged for the actual cost of reproducing that copy.

15164. Public Participation. While the Environmental Quality Act of 1970 does not require formal public hearings at any stage of the environmental review procedure, it is a widely accepted desirable goal of this process to encourage public participation. All public agencies adopting implementing procedures in response to these Guidelines should make provisions in their procedures for wide public involvement, formal and informal, consistent with their existing activities and procedures, in order to properly receive and evaluate public reactions, adverse and favorable, based on environmental issues.

15165. Public Hearings. (a) A public hearing on the environmental impact of a project should usually be held when the sponsor determines it would facilitate the purposes and goals of the CEQA and these Guidelines to do so. The hearing may be held in conjunction with and as a part of normal planning activities. To as great a degree as possible, these hearings should include comments from reviewing agencies made pursuant to these Guidelines.

(b) A Draft EIR should be used as the outline for discussion at a public hearing. For local agencies, the hearing may be held at the city hall, county administrative building or other place where public hearings are regularly conducted by the agency. As to other public agencies, the hearing may be held at a location expected to be convenient to the public.

(c) Notice shall be given of all public hearings in a timely manner. This notice may be given in the same form and time as notice for other regularly conducted public hearings of the public agency.

(d) A public agency may include, in its implementing procedures, procedures for the conducting of public hearings pursuant to this section, which procedures may be consistent with already existing hearing and notice requirements of the public agency for regularly conducted legislative, planning and other proceedings.

(e) There is no requirement for a public agency to conduct a public hearing in connection with its review of an EIR prepared by another public agency.

15166. Retention and Availability of Comments. Comments received through the consultation process shall be kept on file for a reasonable period and available for public inspection at an address given in the Final EIR. Comments which may be received independently of the review of the Draft EIR shall also be considered and kept on file.

APPENDIX B FOOTNOTES

No.

1. **Agriculture**—(1) Air quality and air pollution control
   Effects on plants and animals
2. **Agriculture**—(12) Human Ecology
   Protection of food and fibre
3. **Agriculture**—(24) Sanitation and waste systems
   Agriculture, dairy and feed lot systems
4. **Agriculture**—(28) Transportation and handling of hazardous materials
   As pertains to transportation, handling, storage and decontamination of pesticides.
5. **Agriculture**—(30) Fish and wildlife
   Pesticide effects, predatory animal control, bird control
6. **CHP**—(1) Air quality and air pollution control
   Enforcement of motor vehicle regulations
7. **Public Health**—(3) Coastal areas, wetlands, etc.
   Beach sanitation, water pollution, solid waste and mosquito control
8. **Public Health**—(4) Congestion in urban areas, housing and building displacement
   Pertains to health component
9. **Public Health**—(7) Environmental effects with special impact in low-income neighborhoods
   Most of these are strongly related to health
10. **Public Health**—(16) Navigable airways
    Pertains to noise
11. **Public Health**—(22) Regional comprehensive planning
    Pertains to personal and environmental health components
12. **Public Health**—(30) Wildlife
    As it may pertain to human health hazards
13. **Public Health**—(31) Activities with special impact on regional jurisdictions
    Pertains to comprehensive health planning
14. **Colorado River Board**—(2), (3), (5), (6), (8), (10), (13), (17), (19), (21), (22), (24), (26), (27), (29), (30), (31), (32) and (33).
    As pertains to the Colorado, New and Alamo Rivers
15. **Fish and Game**—(15) Natural gas energy development, generation and supply
    As field development and distribution systems may affect fish and wildlife
16. **Fish and Game**—(16) Navigable airways
    As may affect migrating and resident wildlife
17. **Fish and Game**—(18) Noise control and abatement
    As excessive noise may affect wildlife
18. **Fish and Game**—(24) Sanitation and waste systems
    As water quality may affect fish and wildlife
19. **Parks and Recreation**—(7) Environmental effects with special impact in low-income neighborhoods
    In impacted areas only
20. **Reclamation Board**—(8), (17) and (32)
    In areas of Board's jurisdiction only
21. **State Water Resources Control Board**—(4), (30), (33) and (34)
    As may pertain to water quality
22. **Conservation**—(5), (10), (20) and (23)
    With respect to forest land

23. **Conservation**—(6) and (32)
As related to fire protection or State (fire protection) responsibility land

24. **Air Resources Board**—(4), (22), (32), (33) and (36)
As may pertain to residential, commercial, industrial or transportation growth

REVISION RECORD FOR REGISTER 73, No. 50
(December 15, 1973)

TITLE 14. NATURAL RESOURCES

DIVISION 6. RESOURCES AGENCY

CHAPTER 3. GUIDELINES FOR IMPLEMENTATION OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT OF 1970

(Originally printed 2-10-73; revised 12-14-73)

This part of Register 73, No. 50, contains all the additions, amendments, and repeals affecting the above-entitled portion of the California Administrative Code which were filed with the Secretary of State from 12-8-73, to and including 12-15-73. The latest prior register containing regulations of the above agency is Register 73, No. 40 (10-6-73).

It is important that the holders of the above-entitled portion of the code check the section numbers listed below as well as the page numbers when inserting this material in the code and removing the superseded material. In case of doubt rely upon the section numbers rather than the page numbers since the section numbers must run consecutively even though there may be an error in the paging.

PAGE CHANGES

REMOVE Old Pages	INSERT Attached Pages
285–324	285–324
----	324.1–324.2

It Is Suggested That Superseded Material Be Retained. Save it and place it in a separate file under the original heading (either the appropriate title or register heading). It will then always be possible to find the prior wording of any section by using the history notes provided.

NOTE: This revision sheet is not a part of the code. It is chiefly for filing purposes. If preserved with the removed pages, it will afford a ready reference to the sections affected by agency action.

It is suggested that the latest Revision Record be retained for convenience in verifying whether or not the prior Register has been received.

Appendices

Appendix A. Flow Chart
Appendix B. Statutory Authority of State Departments
Appendix C. Notice of Completion Form
Appendix D. Notice of Intent

Article 1. General

15000. Authority. The regulations contained herein are prescribed by the Secretary for Resources pursuant to authority granted in Public Resources Code Section 21083 to be followed by all state agencies, boards, and commisions, all counties, cities and counties, cities including charter cities, regional agencies, public districts, redevelopment agencies, and all other political subdivisions of the State in the implementation of the Environmental Quality Act of 1970 dealing with environmental quality, the evaluation of projects, and the preparation and evaluation of environmental impact reports. These Guidelines have been developed by the Office of Planning and Research for adoption by the Secretary for Resources in accordance with Section 21083. Additional information may be obtained by writing:

Secretary for Resources
Room 1311, 1416 Ninth Street
Sacramento, CA 95814

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New Chapter 3, Articles 1 through 10 (§§ 15000 through 15166, not consecutive) filed 2-7-73; designated effective upon filing as provided in Section 21083, Public Resources Code (Register 73, No. 6).

Article 2. Purpose

15005. Purpose. The purpose of these Guidelines is to provide public agencies with principles, objectives, criteria, and definitions of statewide application to be used in the implementation of the California Environmental Quality Act of 1970, Public Resources Code Sections 21000–21174 as amended by Chapter 1154 of the Statutes of 1972 (AB 889). Public agencies shall adopt objectives, criteria, and procedures for the orderly evaluation of projects and the preparation of environmental documents. Such procedures, objectives, and criteria shall be consistent with CEQA and these guidelines.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

Article 3. Policy

15010. Legislative Declaration. The Legislature has declared that:

(a) Every citizen has a responsibility to contribute to the preservation and enhancement of the environment.

(b) It is the intent of the Legislature that all agencies of the state government which regulate activities of private individuals, corporations, and public agencies which are found to affect the quality of the environment, shall regulate such activities so that major consideration is given to preventing environmental damage.

15011. State Policy. The Legislature has declared that it is the policy of the state to:

(a) Develop and maintain a high-quality environment now and in the future, and take all action necessary to protect, rehabilitate, and enhance the environmental quality of the state.

(b) Take all action necessary to provide the people of this state with clean air and water, enjoyment of aesthetic, natural, scenic, and historic environmental qualities, and freedom from excessive noise.

(c) Prevent the elimination of fish or wildlife species due to man's activities, insure that fish and wildlife populations do not drop below self-perpetuating levels, and preserve for future generations representations of all plant and animal communities and examples of the major periods of California history.

(d) Ensure that the long-term protection of the environment shall be the guiding criterion in public decisions.

(e) Create and maintain conditions under which man and nature can exist in productive harmony to fulfill the social and economic requirements of present and future generations.

(f) Require governmental agencies at all levels to develop standards and procedures necessary to protect environmental quality.

(g) Require governmental agencies at all levels to consider qualitative factors as well as economic and technical factors and long-term benefits and costs, in addition to short-term benefits and costs and to consider alternatives to proposed actions affecting the environment.

15012. Informational Document. An Environmental Impact Report is an informational document which, when fully prepared in accordance with the CEQA and these Guidelines, will inform public decision-makers and the general public of the environmental effects of projects they propose to carry out or approve. The EIR process is intended to enable public agencies to evaluate a project to determine whether it may have a significant effect on the environment, to examine and institute methods of reducing adverse impacts, and to consider alternatives to the project as proposed. These things must be done prior to approval or disapproval of the project. An EIR may not be used as an instrument to rationalize approval of a project, nor do indications of adverse impact, as enunciated in an EIR, require that a project be disapproved. While CEQA requires that major consideration be given to preventing environmental damage, it is recognized that public agencies have obligations to balance other public objectives, including economic and social factors in determining whether and how a project should be approved. Economic information may be included in an EIR or may be presented in whatever form the agency desires.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15013. Early Preparation. An EIR is a useful planning tool to enable environmental constraints and opportunities to be considered before project plans are finalized. EIRs should be prepared as early in the planning process as possible to enable environmental considerations to influence project program or design.

15014. Application. (a) These Guidelines have only general application to the diversity of projects undertaken or approved by public agencies. They provide basic principles, objectives, criteria and definitions which individual public agencies shall adapt for internal use, interpreting these Guidelines in terms of specific projects. To implement these principles, objectives, criteria, and definitions, public agencies shall specify procedures to be followed which must be consistent with CEQA and these Guidelines.

(b) Until February 15, 1974, any objectives, criteria, and procedures adopted by public agencies in compliance with CEQA and these Guidelines may continue to govern the evaluation of projects and the preparation of environmental impact reports without being brought into conformity with the amendments to these Guidelines adopted by the Secretary for Resources in December, 1973. Public agencies may bring their objectives, criteria, and procedures into conformity with the amended guidelines before February 15, 1974.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15015. Terminology. The following words are used to indicate whether a particular subject in the Guidelines is mandatory, advisory, or permissive:

(a) "Must" or "shall" identifies a mandatory element which all public agencies are required to follow.

(b) "Should" identifies guidance provided by the Secretary for Resources based on policy considerations contained in CEQA, in the legislative history of the statute, or in federal court decisions which California courts can be expected to follow. Public agencies are advised to follow this guidance in the absence of compelling, countervailing considerations.

(c) "May" identifies a permissive element which is left fully to the discretion of the public agencies involved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No.50).

Article 4. Definitions

15020. General. Whenever the following words are used in these Guidelines, unless otherwise defined, they shall have the meaning ascribed to them in this article. These definitions are intended to clarify but not to replace or negate the definitions used in CEQA.

15020.5. Applicant. Applicant means a person who proposes to carry out a project which needs a lease, permit, license, certificate, or other entitlement to use or financial assistance from one or more public agencies when that person applies for the governmental approval or assistance.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15021. Approval. Approval means the decision by a public agency which commits the agency to a definite course of action in regard to a project intended to be carried out by any person. The exact date of approval of any project is a matter determined by each public agency according to its rules, regulations, and ordinances. Legislative action in regard to a project often constitutes approval.

In connection with private activities, approval occurs upon the earliest commitment to issue or the issuance by the public agency of a discretionary contract, grant, subsidy, loan, or other form of financial assistance, lease, permit, license, certificate, or other entitlement for use of the project.

15022. CEQA—California Environmental Quality Act. California Environmental Quality Act (CEQA) means California Public Resources Code Sections 21000 through 21174.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15023. Categorical Exemption. Categorical Exemption means an exception from the requirements of CEQA for a class of projects based on a finding by the Secretary for Resources that the class of projects does not have a significant effect on the environment.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15024. Discretionary Project. Discretionary project means an activity defined as a project which requires the exercise of judgment, deliberation, or decision on the part of the public agency or body in the process of approving or disapproving a particular activity, as distinguished from situations where the public agency or body merely has to determine whether there has been conformity with applicable statutes, ordinances, or regulations.

15025. Emergency. Emergency means a sudden, unexpected occurrence demanding immediate action to prevent or mitigate loss or damage to life, health, property, or essential public services.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15026. Environment. Environment means the physical conditions which exist within the area which will be affected by a proposed project including land, air, water, minerals, flora, fauna, ambient noise, objects of historic or aesthetic significance.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15026.5. Environmental Documents. Environmental documents means Draft and Final EIRs, Initial Studies, Negative Declarations, Notices of Completion, and Notices of Determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included. (Register 73, No. 50).

15027. EIR—Environmental Impact Report. Environmental Impact Report (EIR) means a detailed statement setting forth the environmental effects and considerations pertaining to a project as specified in Section 21100 of the California Environmental Quality Act.

(a) Draft EIR means an EIR containing the information specified in Sections 15141, 15142, and 15143 of these Guidelines.

(b) Final EIR means an EIR containing the information specified in Sections 15141, 15142, 15143, and 15144 of these Guidelines, a section for comments received in the consultation process, and the response of the lead agency to the comments received. The final EIR is discussed in detail in Section 15146.

History: 1. Amendment of subsection (b) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15028. EIS—Environmental Impact Statement. Environmental Impact Statement (EIS) means an environmental impact report prepared pursuant to the National Environmental Policy Act (NEPA). The Federal Government uses the term EIS in the place of the term EIR which is used in CEQA.

15029. Feasible. Feasible means capable of being accomplished in a successful manner by reasonably available, economic, and workable means.

15029.5 Initial Study. Initial study means a preliminary analysis prepared by the lead agency pursuant to Section 15080 to determine whether an EIR or a Negative Declaration must be prepared

NOTE: Authority cited: Sections 21083 and 21174, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15030. Lead Agency. Lead Agency means the public agency which has the principal responsibility for preparing environmental documents and for carrying out or approving a project which may have a significant effect on the environment.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15031. Local Agency. Local agency means any public agency other than a state agency, board or commission. Local agency includes but is not limited to cities, counties, charter cities and counties, districts, school districts, special district, redevelopment agencies and any board, commission, or organizational subdivision of a local agency when so designated by order or resolution of the governing legislative body of the local agency.

History: 1. Amendment filed 12-14-73 as an emergency, effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15032. Ministerial Projects. Ministerial projects as a general rule, include those activities defined as projects which are undertaken or approved by a governmental decision which a public officer or public agency makes upon a given state of facts in a prescribed manner in obedience to the mandate of legal authority. With these projects, the officer or agency must act upon the given facts without regard to his own judgment or opinion concerning the propriety or wisdom of the act although the statute, ordinance, or regulation may require, in some degree, a construction of its language by the officer.

15033. Negative Declaration. Negative declaration means a statement by the lead agency briefly presenting the reasons that the project, although not otherwise exempt, would not have a significant effect on the environment and therefore does not require an EIR.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15034. Notice of Completion. Notice of Completion means a brief report filed with the Secretary for Resources as soon as a lead agency has completed a draft EIR and is prepared to send out copies for review. The contents of this notice are explained in Section 15085(c).

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15035. Notice of Determination. Notice of Determination means a brief notice to be filed by a public agency when it approves or determines to carry out a project which is subject to the requirements of CEQA. The contents of this report are explained in Section 15085(g).

15036. Person. Person includes any person, firm, association, organization, partnership, business, trust, corporation, company, district, county, city and county, city, town, the State, and any of the agencies' political subdivisions of such entities.

15037. Project. (a) Project means the whole of an action, resulting in physical impact on the environment, directly or ultimately, that is any of the following:

(1) An activity directly undertaken by any public agency including but not limited to public works construction and related activities, clearing or grading of land, improvements to existing public structures, enactment and amendment of zoning ordinances, and the adoption of local General Plans or elements thereof pursuant to Government Code Sections 65100–65700.

(2) An activity undertaken by a person which is supported in whole or in part through public agency contracts, grants, subsidies, loans, or other forms of assistance from one or more public agencies.

(3) An activity involving the issuance to a person of a lease, permit, license, certificate, or other entitlement for use by one or more public agencies.

(b) Project does not include:

(1) Anything specifically exempted by state law.

(2) Proposals for legislation to be enacted by the state Legislature.

(3) Continuing administrative or maintenance activities, such as purchases for supplies, personnel-related actions, emergency repairs to public service facilities, general policy and procedure making (except as they are applied to specific instances covered above), feasibility or planning studies.

(4) The submittal of proposals to a vote of the people of the State or of a particular community.

(c) The term "project" refers to the underlying activity and not to the governmental approval process.

History: 1. Amendment of subsection (a) (1) and new subsection (c) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15038. Public Agency. Public agency includes any state agency, board or commission and any local or regional agency, as defined in these Guidelines. It does not include the courts of the State. This term does not include agencies of the federal government.

15039. Responsible Agency. Responsible agency means a public agency which proposes to undertake or approve a project, but is not the lead agency for the project. It includes all public agencies other than the lead agency which have approval power over the project.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15040. Significant Effect. Significant effect means a substantial adverse impact on the environment.

Article 5. General Responsibilities.

15050. Public Agencies. All public agencies are responsible for complying with the CEQA, according to these Guidelines. They must develop their own procedures consistent with these Guidelines. Where a public agency is a lead agency and prepares an EIR itself or contracts for the preparation, that public agency is responsible entirely for the adequacy and objectivity of the EIR.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15051. Office of Planning and Research (OPR). OPR is responsible for the preparation and development of principles, objectives, criteria and definitions to implement the CEQA, prior to adoption by the Secretary for Resources. OPR also, as part of guideline development, shall consider proposals for Categorical Exemption and makes appropriate recommendations to the Secretary for Resources. OPR shall be responsible for resolving disputes over Lead Agency designation.

15052. The Secretary of the Resources Agency. The guidelines shall be officially adopted by the Secretary of the Resources Agency, including a finding that each class of projects given a Categorical Exemption will not have a significant effect on the environment. He also has the responsibility for consolidating all state comments on federally sponsored projects. The Secretary of the Resources Agency may issue supplements to these Guidelines, containing amendments and/or additions.

15053. Fees. (a) All lead agencies preparing EIRs or Negative Declarations for projects to be carried out by any person other than the lead agency itself may charge and collect a reasonable fee from such person or entity, in order to recover the estimated costs incurred in preparing the EIR or Negative Declaration.

(b) Public agencies may charge and collect a fee from members of the public for the actual cost of reproducing a copy of an environmental document requested by the member of the public.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15054. Timely Compliance. Public agencies should carry out their responsibilities for preparing and reviewing EIRs within a reasonable period of time. The requirement for the preparation of an EIR should not cause undue delays in the processing of applications for permits or other entitlements to use.

Article 6. Application of the Act to Projects

15060. General Rule. The requirements set forth in these Guidelines apply to projects which may have a significant effect on the environment and which involve discretionary governmental action. Where it can be seen with certainty that the activity in question will not have a significant effect on the environment, the activity is not covered by the requirements set forth in CEQA, and these Guidelines concerning the evaluation of projects and the preparation and review of environmental impact reports do not apply.

15061. Projects Controlled by State or Local Agencies. (a) When a public agency plans to carry out or approve a project which may have a significant effect on the environment, the lead agency shall prepare environmental documents through its own efforts or by contract unless the project is otherwise exempted by these Guidelines.

(b) Where a project which may have a significant effect on the environment is to be carried out by a nongovernmental person subject to approval, financial support, or some other involvement by a public agency, the lead agency will prepare environmental documents by its own efforts or by contract. However, the agency may require the person to supply data and information, both to determine whether the project may have a significant effect on the environment, and to assist in the preparation of an EIR by the agency. This information may be submitted in the form of a draft EIR, if the agency desires. If information is provided in the form of a draft EIR, the lead agency may not use the draft EIR as its own without independent evaluation and analysis. The draft EIR which is sent out for public review must reflect the independent judgement of the lead agency. The lead agency should require an applicant to specify to the best of his knowledge which other public agencies will have approval authority over the project.

(c) Where the project is to be undertaken by a local agency, as defined in these Guidelines, but requires state approval or financial assistance, the state agency shall require the local agency to prepare the EIR or Negative Declaration, to be submitted with the request for approval of the proposed project. This must also be done where federal funds are involved, but only if a state agency has discretionary authority over the use of those funds. If the local project has been mandated on the local agency by a state agency, the EIR prepared by the local agency may be limited to consideration of those factors and alternatives which do not conflict with the order.

(d) The EIR may be prepared as a separate document, or as part of a project report. If prepared as a part of the project report, it must still contain in one separate and distinguishable section the elements required of an EIR, including the seven elements specified in Section 15143 of these Guidelines.

(e) All public and private activities or undertakings pursuant to or in furtherance of a redevelopment plan constitute a single project, which shall be deemed approved at the time of adoption of the redevelopment plan by the legislative body. The EIR in connection with the redevelopment plan shall be submitted in accordance with Section 33352 of the Health and Safety Code.

(f) All of the above is subject to the lead agency principle which provides that not more than one EIR shall be prepared in connection with the same underlying activity and that th EIR shall be prepared by the lead agency.

History: 1. Amendment of subsections (a), (b) and (f) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15062. Private Projects.

History: 1. Repealer filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15063. Federal Projects. (a) In regard to any proposed federal project in this state which may have a significant effect on the environment and on which the state officially comments, the state officials responsible for such comments shall include in their comments an EIR setting forth the matters specified in Section 15143 of these Guidelines.

(b) In cases where these Guidelines require the preparation of an EIR by a lead agency and an EIS has been or will be prepared for the same project pursuant to the requirements of the National Environmental Policy Act of 1969 and implementing regulations thereto, all or any part of such statement may be submitted in lieu of all or any part of an EIR required by these Guidelines, provided that the EIS or the part thereof so used, shall comply with the requirements of these Guidelines. In most cases where the federal EIS is used, discussion of mitigation measures and growth inducing impact will have to be added because these elements are required by CEQA but not by the National Environmental Policy Act.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15064. Lead Agency Principle. Where a project is to be carried out or approved by more than one public agency only one public agency shall be responsible for preparation of environmental documents and it will be the lead agency. Such environmental documents will be prepared by the lead agency in consultation with all other responsible agencies. The lead agency's environmental documents shall be the environmental documentation for all responsible agencies. Such responsible agencies shall consider the lead agency's EIR or negative declaration prior to acting upon or approving the projects, and they shall certify that their decision-making bodies have reviewed and considered the information contained in them.

History: 1. (Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15065. Lead Agency Criteria. Where two or more public agencies are involved with a project, which agency shall be the Lead Agency shall be determined by the following principles:

(a) If the project is to be carried out by a public agency, the lead agency shall be the public agency which proposes to carry out the project.

(b) If the project is to be carried out by a nongovernmental person, the lead agency shall be the public agency with the greatest responsibility for supervising or approving the project as a whole. The lead agency will generally be the agency with general governmental powers rather than an agency with a single or limited purpose which is involved by reason of the need to provide a public service or public utility to the project; in such cases, the single or limited purpose agency will, upon request, provide data concerning all aspects of its activities required to furnish service to the project to the agency drafting the EIR, and no separate EIR will be required in regard to such activities.

(c) Where more than one public agency equally meet the criteria set forth in paragraph (b) above, the agency which is to act first on the project in question shall be the lead agency (following the principle that the environmental impact should be assessed as early as possible in governmental planning).

(d) Where the provisions of subsections (a), (b), and (c) leave two or more public agencies with an equal claim to be the lead agency, the public agencies may by agreement designate which agency will be the lead agency.

History: 1. Amendment of subsection (a) and repealer and new subsection (d) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15065.5. Designation of Lead Agency by Office of Planning and Research. (a) In the event that the designation of a lead agency is in dispute, the following criteria shall apply:

(1) Public agencies should consult with each other in an effort to resolve the dispute prior to submitting it to OPR.

(2) If an agreement cannot be reached, any public agency involved may submit the dispute to the OPR for resolution.

(b) Regulations adopted by OPR for resolving lead agency disputes may include the following:

(1) Submission of written statements to OPR and other disputing public agencies;

(2) Certification by OPR that a lead agency dispute exists;

(3) Publication of notice that a dispute has been submitted to OPR;

(4) Determination of the dispute on the basis of written statements or by a hearing.

(c) Designation of a lead agency by OPR shall be based on conssideration of the criteria in Section 15065 as well as the capacity of the agency to adequately fulfill the requirements of CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing (Register 73, No. 50).

15066. Consultation with Responsible Agencies. When more than one public agency will be involved in undertaking or approving a project, the lead agency shall consult with all responsible agencies (i.e., all the other public agencies involved in carrying out or approving the project) before completing a draft EIR or Negative Declaration. This early consultation is designed to insure that the EIR or Negative Declaration will reflect the concerns of all responsible agencies which will issue approvals for the project. After completing the draft EIR or Negative Declaration, the lead agency shall also consult with other public agencies having jurisdiction by law and should consult with persons having special expertise as described in Sections 15083 and 15085.

History: 1. Repealer and new section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15067. Subsequent EIR. Where an EIR has been prepared, no additional EIR need be prepared unless:

(a) Substantial changes are proposed in the project which will require major revisions of the EIR, due to the involvement of new environmental impacts not considered in a previous EIR on the project;

(b) There are substantial changes with respect to the circumstances under which the project is to be undertaken, such as a change in the proposed location of the project, which will require major revisions in the EIR due to the involvement of new environmental impacts not covered in a previous EIR.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15068. Use of a Single EIR. The lead agency may employ a single EIR to describe more than one project, if such projects are essentially the same in terms of environmental impact. Further, the lead agency may use an earlier EIR prepared in connection with an earlier project to apply to a later project, if the circumstances of the projects are essentially the same. Lead agencies may elect to write EIRs in advance for entire programs or regulations, in order to be prepared for project applications to come. Whenever an agency chooses to utilize any of these alternatives, however, it must find that the environmental effects of the projects are similar enough to warrant the same treatment in an EIR and that the EIR will adequately cover the impacts of any single project. If these tests are not met, an agency should amend the EIR it prepares for a program to apply it to an individual project with unusual characteristics.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15069. Multiple and Phased Projects. Where individual projects are, or a phased project is, to be undertaken and where the total undertaking comprises a project with significant environmental effect, the lead agency must prepare a single EIR for the ultimate project. Where an individual project is a necessary precedent for action on a larger project, or commits the lead agency to a larger project, with significant environmental effect, an EIR must address itself to the scope of the larger project. Where one project is one of several similar projects of a public agency, but is not deemed a part of a larger undertaking or a larger project, the agency may prepare one EIR for all projects, or one for each project, but should in either case comment upon the combined effect.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15070. Ongoing Project. (a) A project as defined in Section 15037(a)(1) of these Guidelines, approved prior to November 23, 1970, shall require an Environmental Impact Report or a Negative Declaration if the project may have a significant effect on the environment, and either of the following conditions exists:

(1) A substantial portion of public funds allocated for the project have not been spent and it is still feasible to modify the project to mitigate potentially adverse environmental effects, or to choose feasible alternatives to the project, including the alternative of "no project" or halting the project; provided that this Section (1) shall not apply to projects which come under the jurisdiction of the National Environmental Policy Act (NEPA) and which, through regulations promulgated under NEPA, were held to be too far advanced at the time of NEPA's effective date to require an EIS in compliance with those regulations.

(2) A public agency proposes to modify the project in such a way that the project might have a new significant effect on the environment.

(b) A project as defined in Section 15037(a)(3) or in Section 15037(a)(2) as it relates to contracts, where the permit or other entitlement was issued, or the contract approved, prior to April 5, 1973, shall not require an EIR or Negative Declaration, subject to the following provisions:

(1) CEQA expressly does not prohibit a public agency from considering environmental factors in connection with the approval or disapproval of a project, or from imposing reasonable fees on the appropriate private person or entity for preparing an environmental report. Local agencies may require environmental reports for projects covered by this paragraph pursuant to local ordinances during this interim period.

(2) Where the issuance or approval occurred prior to December 5, 1972, and prior to said date the project was legally challenged for noncompliance with CEQA, the project shall be bound by special rules set forth in Section 21170 of CEQA.

(3) Where a project involving the issuance of a lease, permit, license, certificate or other entitlement to use has been granted a discretionary governmental approval for part of the project before April 5, 1973, and another or additional discretionary governmental approvals after April 5, 1973, the project shall require an EIR or Negative Declaration only if the approval or approvals after April 5, 1973, involve a greater degree of responsibility or control over the project as a whole than did the approval or approvals prior to that date.

(c) Any EIR which has been completed or on which substantial work has been performed on or before February 15, 1974, in compliance with procedures of a public agency consistent with CEQA and these Guidelines as adopted on February 3, 1973, shall be deemed to be in compliance with these Guidelines. No further EIR shall be required except as provided in subsections (a) and (b).

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15071. Emergency Projects. The following emergency projects are exempt from the requirements of CEQA, and no EIR is required.

(a) Projects undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish or replace property or facilities damaged or destroyed as a result of a disaster in a disaster stricken area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing with Section 8550) of Division 1, Title 2 of the Government Code.

(b) Emergency repairs to public service facilities necessary to maintain service.

(c) Projects undertaken as immediate action necessary to prevent or mitigate an emergency.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15072. Feasibility and Planning Studies. A project involving only feasibility or planning studies for possible future actions which the agency, board, or commission has not approved, adopted, or funded does not require the preparation of an environmental impact report but does require consideration of environmental factors as required by Section 21102 of CEQA.

15073. Ministerial Projects. Ministerial projects are exempt from the requirements of CEQA, and no EIR is required. The determination of what is "ministerial" can most appropriately be made by the particular public agency involved based upon its analysis of its own laws, and it is anticipated that each public agency will make such determination either as a part of its implementing regulations or on a case-by-case basis. It is further anticipated that the following actions will, in most cases, be ministerial in nature.

(a) Issuance of building permits.
(b) Issuance of business licenses.
(c) Approval of final subdivision maps.
(d) Approval of individual utility service connections and disconnections.

In the absence of any discretionary provision contained in local ordinance, it shall be presumed that these four actions are ministerial. Each public agency may, in its implementing regulations or ordinances, provide an identification or itemization of its projects and actions which are deemed ministerial under the applicable laws and ordinances.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

Article 7. Evaluating Projects

15080. Initial Study. If the project is not part of a class of projects that qualifies for a Categorical Exemption and there is a possibility that the project may have a significant effect on the environment, the lead agency should conduct an initial study to determine if the project may have a significant effect on the environment. If any of the effects of a project may have a substantial adverse impact on the environment, regardless of whether the overall effect of the project is adverse or beneficial, then an environmental impact report must be prepared where discretionary governmental action is involved.

If the project is to be carried out by a nongovernmental person, the lead agency may require such person to submit data and information which will enable the agency to make this determination.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15081. Determining Significant Effect. (a) The determination of whether a project may have a significant effect on the environment calls for careful judgment on the part of the public agency involved, based to the extent possible on scientific and factual data. An iron clad definition of significant effect is not possible because the significance of an activity may vary with the setting. For example, an activity which may not be significant in an urban area may be significant in a rural area. There may be a difference of opinion on whether a particular effect should be considered adverse or beneficial, but where there is, or anticipated to be, a substantial body of opinion that considers or will consider the effect to be adverse, the lead agency should prepare an EIR to explore the environmental effects involved.

(b) In evaluating the significance of the environmental effect of a project, the lead agency shall consider both primary or direct and secondary or indirect consequences. Primary consequences are immediately related to the project (the construction of a new treatment plant may facilitate population growth in a particular area), while secondary consequences are related more to primary consequences than to the project itself (an impact upon the resource base, including land, air, water and energy use of the area in question may result from the population growth).

(c) Some examples of consequences which may have a significant effect on the environment in connection with most projects where they occur, include a change that:

(1) Is in conflict with environmental plans and goals that have been adopted by the community where the project is to be located;

(2) Has a substantial and demonstrable negative aesthetic effect;

(3) Substantially affects a rare or endangered species of animal or plant, or habitat of such a species;

(4) Causes substantial interference with the movement of any resident or migratory fish or wildlife species;

(5) Breaches any published national, state, or local standards relating to solid waste or litter cont[illegible];

(6) Results in a substantial detrimental effect on air or water quality, or on ambient noise levels for adjoining areas;
(7) Involves the possibility of contaminating a public water supply system or adversely affecting ground water;
(8) Could cause substantial flooding, erosion or siltation;
(9) Could expose people or structures to major geologic hazards.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15082. Mandatory Findings of Significance. In every case where any of the following conditions are found to exist as a result of a project, the project shall be found to have impacts with a significant effect on the environment:

(a) Impacts which have the potential to degrade the quality of the environment or curtail the range of the environment.

(b) Impacts which achieve short-term, to the disadvantage of long-term, environmental goals. A short-term impact on the environment is one which occurs in a relatively brief, definitive period of time while long-term impacts will endure well into the future.

(c) Impacts for a project which are individually limited, but cumulatively considerable. A project may affect two or more separate resources where the impact on each resource is relatively small. If the effect of the total of those impacts on the environment is significant, an EIR must be prepared. This mandatory finding of significance does not apply to two or more separate projects where the impact of each is insignificant.

(d) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15083. Negative Declaration. (a) A Negative Declaration shall be prepared for a project which could potentially have a significant effect on the environment, but which the lead agency finds on the basis of an Initial Study will not have a significant effect on the environment.

(b) A Negative Declaration must include a brief description of the project as proposed, a finding that the project will not have a significant effect on the environment, a brief statement of reasons to support the findings, and a statement indicating who prepared the initial study and where a copy of it may be obtained. The Negative Declaration should normally not exceed one page in length.

(c) The Negative Declaration shall be made available to the public with sufficient time before the project is approved to provide an opportunity for members of the public to respond to the finding.

(d) After making a decision to carry out or approve the project, the lead agency shall file a Notice of Determination with a copy of the Negative Declaration attached. The Notice of Determination shall include the decision of the agency to approve or disapprove the project, the determination of the agency whether the project will have a significant effect on the environment, and a statement that no EIR has been prepared pursuant to the provisions of CEQA.

(1) If the lead agency is a state agency, the Notice of Determination shall be filed with the Secretary for Resources.

(2) If the lead agency is a local agency, the Notice of Determination shall be filed with the county clerk of the county or counties in which the project will be located.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15084. Decision to Prepare an EIR. If the lead agency finds, after an initial study, that the project may have a significant effect on the environment, the lead agency must prepare or cause to be prepared an Environmental Impact Report.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15085. EIR Process. The following steps shall be followed after the lead agency decides to prepare an EIR.

(a) If the project is to be carried out by a nongovernmental person, the lead agency may require such person to submit data and information necessary to enable the lead agency to prepare the EIR. This information may be transmitted in the form of a draft EIR. The draft EIR which is sent out for public review must reflect the independent judgment of the lead agency. Use of a draft EIR submitted by an applicant is discussed in Section 15061(b).

(b) The content of an EIR is described in Article 9 of these Guidelines. Each element of an EIR must be covered, and these elements should be separated into distinct selections. Before completing a draft EIR consisting of the information specified in Section 15141, 15142, and 15143 of these Guidelines, the lead agency should consult directly with any person or organization it believes will be concerned with the environmental effects of the project. Many public agencies have found that early consultation solves many potential problems that would arise in more serious form later in the review process. After completing a draft EIR, the lead agency must consult with, and obtain the comments of, any public agency which has jurisdiction by law with respect to the project and may consult with any person who has special expertise with respect to any environmental impact involved. Opportunity for comments from the general public should be provided.

(c) As soon as the draft EIR is completed, but before copies are sent out for review, an official notice stating that the draft EIR has been completed must be filed with the Secretary for the Resources Agency. The notice shall include a brief description of the project, its proposed location, and an address where copies of the EIR are available. This notice shall be referred to as a Notice of Completion. A form for this notice is provided in the Appendices. The Notice of Completion will provide the basis for information published by the Secretary for Resources in an EIR Monitor. Where the EIR will be reviewed through the state review process handled by the State Clearinghouse, a Notice of Intent will be completed and filed with the State Clearinghouse. The Notice of Intent will serve as the Notice of Completion, and no Notice of Completion need be sent to the Resources Agency. A form for the Notice of Intent is shown in Appendix D.

(d) The lead agency shall evaluate comments received from persons who reviewed the draft EIR.

(e) The lead agency shall prepare a final EIR. The contents of a final EIR are specified in Section 15146 of these Guidelines.

(f) The final EIR shall be presented to the decision-making body of the lead agency. The lead agency shall certify that the final EIR has been completed in compliance with CEQA and the state guidelines and that the decision-making body or administrative official having final approval authority over the project has reviewed and considered the information contained in the EIR.

(g) After making a decision on the project, the lead agency shall file a notice of action taken on the project. This notice shall be referred to as a Notice of Determination. Such notice shall include (1) the decision of the agency to approve or disapprove the project, (2) the determination of the agency whether the project will or will not have a significant effect on the environment, and (3) a statement that an EIR has been prepared pursuant to the provisions of CEQA.

(1) If the lead agency is a state agency, the Notice of Determination shall be filed with the Secretary for Resources.

(2) If the lead agency is a local agency, the Notice of Determination shall be filed with the county clerk of the county or counties in which the project would be located.

(h) If the lead agency is a state agency, a copy of the final EIR shall be filed with the appropriate planning agency of any city, county, or city and county which will be affected by the project.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15086. EIR Combined with Existing Planning and Review Process. To the extent possible, the EIR process should be combined with the existing planning, review, and project approval process being used by each responsible agency. The lead agency shall include the EIR as a part of the regular project report where such a report is used in the existing review and budgetary process.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15087. Additional Notices. In their implementing procedures, public agencies may provide for the filing of notices in addition to the notices required by these Guidelines. Additional notices may include the determination that a project is categorically exempt, that a project is covered by the emergency exemption or the ministerial exemption, or that an activity is not covered by the act at all. Such notice should include reference to the documentation on which the determination is based.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15088. Statement of Overriding Considerations. If a public agency decides to approve a project for which serious adverse environmental consequences have been identified in an EIR, the agency may wish to make a statement identifying the other interests that warrant approval in its point of view. If such a statement is made, it should be included in the record of the project approval and may be attached to the Notice of Determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

Article 8. Categorical Exemptions

15100. Categorical Exemptions. Section 21084 of the Public Resources Code requires these Guidelines to include a list of classes of projects which have been determined not to have a significant effect on the environment and which shall, therefore, be exempt from the provisions of the Environmental Quality Act of 1970.

In response to that mandate, the Secretary for Resources has found that the following classes of projects listed in this article do not have a significant effect on the environment and they are declared to be categorically exempt from the requirement for the preparation of an EIR.

15101. Class 1: Existing Facilities. Class 1 consists of the operation, repair, maintenance or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that previously existing, including but not limited to:

(a) Interior or exterior alterations involving such things as interior partitions, plumbing, and electrical conveyances;

(b) Existing facilities of both investor and publicly owned utilities used to provide electric power, natural gas, sewerage, or other public utility services;

(c) Existing highways and streets (within already established rights-of-way) sidewalks, gutters, bicycle and pedestrian trails, and similar facilities;

(d) Restoration, or rehabilitation of deteriorated or damaged structures, facilities or mechanical equipment to meet current standards of public health and safety, unless it is determined that the damage was substantial and resulted from an environmental hazard such as earthquake, landslide or flood;

(e) Additions to existing structures provided that the addition will not result in an increase of more than 50 percent of the floor area of the structures before the addition or 2500 square feet, whichever is less;

(f) Addition of safety or health protection devices for use during construction of or in conjunction with existing structures, facilities or mechanical equipment, or topographical features including navigational devices;

(g) New copy on existing on and off-premise signs;
(h) Maintenance of existing landscaping, native growth and water supply reservoirs (excluding the use of economic poisons, as defined in Division 7, Chapter 2, California Agricultural Code);
(i) Maintenance of fish screens, fish ladders, wildlife habitat areas, artificial wildlife waterway devices, streamflows, springs and waterholes, and stream channels (clearing of debris) to protect fish and wildlife resources;
(j) Fish stocking by the California Department of Fish and Game;
(k) Division of existing multiple family rental units into condominiums;
(*l*) Demolition and removal of buildings and related structures except where they are of historical, archaeological or architectural significance as officially designated by Federal, State or local governmental action.

History: 1. Amendment of subsections (b), (e), (f) and (*l*) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15102. Class 2: Replacement or Reconstruction. Class 2 consists of replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced, including but not limited to:
(a) Replacement or reconstruction of existing schools and hospitals to provide earthquake resistant structures which do not increase capacity more than 50%;
(b) Replacement of a commercial structure with a new structure of substantially the same size and purpose.

15103. Class 3: New Construction of Small Structures. Class 3 consists of construction and location of single, new, small facilities or structures and installation of small new equipment and facilities including but not limited to:
(a) Single family residences not in conjunction with the building of two or more such units;
(b) Motels, apartments, and duplexes designed for not more than four dwelling units if not in conjunction with the building of two or more such structures;
(c) Stores, offices, and restaurants if designed for an occupant load of 20 persons of less, if not in conjunction with the building of two or more such structures;
(d) Water main, sewage, electrical, gas and other utility extensions of reasonable length to serve such construction;
(e) Accessory (appurtenant) structures including garages, carports, patios, swimming pools and fences.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15104. Class 4: Minor Alterations to Land. Class 4 consists of minor public or private alterations in the condition of land, water and/or vegetation which do not involve removal of mature, scenic trees except for forestry and agricultural purposes. Examples include but are not limited to:

(a) Grading on land with a slope of less than 10 percent, except where it is to be located in a waterway, in any wetland, in an officially designated (by Federal, State or local governmental action) scenic area, or in officially mapped areas of severe geologic hazard.

(b) New gardening or landscaping.

(c) Filling of earth into previously excavated land with material compatible with the natural features of the site.

(d) Minor alterations in land, water and vegetation on existing officially designated wildlife management areas or fish production facilities which result in improvement of habitat for fish and wildlife resources or greater fish production;

(e) Minor temporary uses of land having negligible or no permanent effects on the environment, including carnivals, sales of Christmas trees, etc.

(f) Minor trenching and backfilling where the surface is restored.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15105. Class 5: Alterations in Land Use Limitations. Class 5 consists of minor alterations in land use limitations, except zoning, including but not limited to:

(a) Minor lot line adjustments, side yard and set back variances not resulting in the creation of any new parcel nor in any change in land use or density;

(b) Issuance of minor encroachment permits.

15106. Class 6: Information Collection. Class 6 consists of basic data collection, research, experimental management and resource evaluation activities which do not result in a serious or major disturbance to an environmental resource. These may be for strictly information gathering purposes, or as part of a study leading to an action which a public agency has not yet approved, adopted or funded.

15107. Class 7: Actions by Regulatory Agencies for Protection of Natural Resources. Class 7 consists of actions taken by regulatory agencies as authorized by state law or local ordinance to assure the maintenance, restoration, or enhancement of a natural resource where the regulatory process involves procedures for protection of the environment. Examples include but are not limited to wildlife preservation activities of the State Department of Fish and Game. Construction activities are not included in this exemption.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15108. Class 8: Actions by Regulatory Agencies for Protection of the Environment. Class 8 consists of actions taken by regulatory agencies, as authorized by state or local ordinance, to assure the maintenance, restoration, enhancement, or protection of the environment where the regulatory process involves procedures for protection of the environment. Construction activities are not included in this exemption.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15109. Class 9: Inspections. Class 9 consists of activities limited entirely to inspection, to check for performance of an operation, or quality, health or safety of a project, including related activities such as inspection for possible mislabeling, misrepresentation or adulteration of products.

15110. Class 10: Loans. Class 10 consists of loans made by the Department of Veterans Affairs under the Veterans Farm and Home Purchase Act of 1943, mortgages for the purchase of existing structures where the loan will not be used for new construction and the purchase of such mortgages by financial institutions. Class 10 includes but is not limited to the following examples:

(a) Loans made by the Department of Veterans Affairs under the Veterans Farm and Home Purchase Act of 1943.

(b) Purchases of mortgages from banks and mortgage companies by the Public Employees Retirement System and by the State Teachers Retirement System.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15111. Class 11: Accessory Structures. Class 11 consists of construction, or placement of minor structures accessory to (appurtenant to) existing commercial, industrial, or institutional facilities, including but not limited to:

(a) On-premise signs;

(b) Small parking lots.

15112. Class 12: Surplus Government Property Sales. Class 12 consists of sales of surplus government property except for parcels of land located in an area of statewide interest or potential area of critical concern as identified in the Governor's Environmental Goals and Policy Report of June 1, 1973.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15113. Relation to Ministerial Projects. Section 21080 of the Public Resources Code as added by Chapter 1154, Statutes of 1972, exempts all ministerial projects and activities of public agencies from application of the CEQA. The matter of what is or is not a ministerial project is up to the determination of each public agency, based on an examination of the applicable laws and ordinances. Thus, while the Categorical Exemptions listed in this subsection contain classes or examples of projects which in many cases will be ministerial, the inclusion of them is in no way intended to imply any finding here that, in any particular jurisdiction, they are ministerial or discretionary. The exemptions, naturally, only apply where the project in question is found to be discretionary.

15114. Exception by Location. Class 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located—a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. Therefore, these classes are considered to apply in all instances, EXCEPT where the project may impact on an environmental resource of hazardous or critical concern as may be hereafter designated, precisely mapped, and officially adopted pursuant to law by federal, state or local agencies. Moreover, all exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant—for example, annual additions to an existing building under Class 1.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15115. Revisions to List of Categorical Exemptions. Any public agency may, at any time, request that a new class of Categorical Exemptions be added, or an existing one amended or deleted. This request must be made in writing to the Office of Planning and Research and shall contain detailed information to support the request.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15116. Application by Public Agencies. Each public agency shall, in the course of establishing its own procedures, list those specific activities which fall within each of the exempt classes, subject to the qualification that these lists must be consistent with both the letter and the intent expressed in the classes. Public agencies may omit from their implementing procedures classes and examples that do not apply to their activities, but they may not require EIRs for projects described in the classes and examples in this article except under the provisions of Section 15114.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

Article 9. Contents of Environmental Impact Reports

15140. General. Environmental impact reports shall contain the information outlined in this article.

15141. Description of Project. The description of the project shall contain the following information but should not supply extensive detail beyond that needed for evaluation and review of the environmental impact.

(a) The precise location and boundaries of the proposed project shall be shown on a detailed map, preferably topographic. The location of the project shall also appear on a regional map.

(b) A statement of the objectives sought by the proposed project.

(c) A general description of the project's technical, economic, and environmental characteristics, considering the principal engineering proposals and supporting public service facilities.

History: 1. Amendment of subsection (c) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15142. Description of Environmental Setting. An EIR must include a description of the environment in the vicinity of the project, as it exists before commencement of the project, from both a local and regional perspective. Knowledge of the regional setting is critical to the assessment of environmental impacts. Special emphasis should be placed on environmental resources that are rare or unique to that region. Specific reference to related projects, both public and private, both existent and planned, in the region should also be included, for purposes of examining the possible cumulative impact of such projects.

15143. Environmental Impact. All phases of a project must be considered when evaluating its impact on the environment: planning, acquisition, development and operation. The following subjects shall be discussed, preferably in separate sections or paragraphs.

(a) **The Environmental Impact of the Proposed Action:** Describe the direct and indirect impacts of the project on the environment, giving due consideration to both the short-term and long-term effects. It should include specifics of the area, the resources involved, physical changes, alterations to ecological systems and changes induced in population distribution, population concentration, the human use of the land (including commercial and residential development) and other aspects of the resource base such as water, scenic quality and public services.

(b) **Any Adverse Environmental Effects Which Cannot Be Avoided if the Proposal is Implemented:** Describe any adverse impacts, including those which can be reduced to an insignificant level but not eliminated. Where there are impacts that cannot be alleviated without imposing an alternative design, their implications and the reasons why the project is being proposed, notwithstanding their effect, should be described. Do not neglect impacts on any aesthetically valuable surroundings, or on human health.

(c) **Mitigation Measures Proposed to Minimize the Impact:** Describe any mitigation measures written into the project plan to reduce significant environmentally adverse impacts to insignificant levels, and the basis for considering these levels acceptable. Where a particular mitigation measure has been chosen from among several alternatives should be discussed and reasons should be given for the choice made.

(d) **Alternatives to the Proposed Action:** Describe any known alternatives to the project or to the location of the project, which could feasibly attain the basic objectives of the project, and why they were rejected in favor of the ultimate choice. The specific alternative of "no project" must also always be evaluated, along with the impact. Attention should be paid to alternatives capable of substantially reducing or eliminating any environmentally adverse impacts, even if these alternatives substantially impede the attainment of the project objectives, and are most costly.

(e) **The Relationship Between Local Short-Term Uses of Man's Environment and the Maintenance and Enhancement of Long-Term Productivity:** Describe the cumulative and long-term effects of the proposed project which adversely affect the state of the environment. Special attention should be given to impacts which narrow the range of beneficial uses of the environment or pose long-term risks to health or safety. In addition, the reasons why the proposed project is believed by the sponsor to be justified now, rather than reserving an option for further alternatives, should be explained.

(f) **Any Irreversible Environmental Changes Which Would Be Involved in the Proposed Action Should It Be Implemented:** Uses of nonrenewable resources during the initial and continued phases of the project may be irreversible since a large commitment of such resources makes removal or nonuse thereafter unlikely. Primary impacts and, particularly, secondary impacts (such as a highway improvement which provides access to a nonaccessible area) generally commit future generations to similar uses. Also irreversible damage can result from environmental accidents associated with the project. Irretrievable commitments of resources should be evaluated to assure that such current consumption is justified.

(g) **The Growth-Inducing Impact of the Proposed Action:** Discuss the ways in which the proposed project could foster economic or population growth, either directly or indirectly, in the surrounding environment. Included in this are projects which would remove obstacles to population growth (a major expansion of a waste water treatment plant might, for example, allow for more construction in service areas). Increases in the population may further tax existing community service facilities so consideration must be given to this impact. Also discuss the characteristic of some projects which may encourage and facilitate other activities that could significantly affect the environment, either individually or cumulatively. It must not be assumed that growth in any area is necessarily beneficial, detrimental, or of little significance to the environment.

15144. Organizations and Persons Consulted. The identity of all federal, state or local agencies, other organizations and private individuals consulted in preparing the EIR, and the identity of the persons, firm or agency preparing the EIR, by contract or other authorization must be given.

15145. Water Quality Aspects. With respect to water quality aspects of the proposed project which have been previously certified by the appropriate state or interstate organization as being in substantial compliance with applicable water quality standards, reference to the certification should be made.

15146. Contents of Final Environmental Impact Report. (a) The Final EIR shall consist of the Draft EIR containing the elements described in Sections 15141, 15142, and 15143 of these Guidelines, a section listing the organizations and persons consulted and containing the comments received through the consultation process described in Article 10, either verbatim or in summary, and the response of the lead agency to the significant environmental points raised in the review and consultation process.

(b) The response of the lead agency to comments received may take the form of a revision of the Draft EIR or may be an attachment to the Draft EIR. The response shall describe the disposition of significant environmental issues raised (e.g., revisions to the proposed project to mitigate anticipated impacts or objections). In particular the major issues raised when the lead agency's position is at variance with recommendations and objections raised in the comments must be addressed in detail giving reasons why specific comments and suggestions were not accepted, and factors of overriding importance warranting an override of the suggestions.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing (Register 73, No. 50)

15147. Degree of Specificity. The degree of specificity required in an EIR will correspond to the degree of specificity involved in the underlying activity which is described in the EIR.

(a) An EIR on a construction project will necessarily be more detailed in the specific effects of the project than will be an EIR on the adoption of a local general plan or comprehensive zoning ordinance because the effects of the construction can be predicted with greater accuracy.

(b) An EIR on projects such as the adoption or amendment of a comprehensive zoning ordinance or a local general plan should focus on the secondary effects that can be expected to follow from the adoption, but the EIR need not be as detailed as an EIR on the specific construction projects that might follow.

(c) The requirements for an EIR on a local general plan or element thereof will be satisfied by the general plan or element document, i.e., no separate EIR will be required, if: (1) the general plan addresses all the points required to be in an EIR by Article 9 of these Guidelines and (2) the document contains a special section or a cover sheet identifying where the general plan document addresses each of the points required.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

Article 10. Evaluation of Environmental Impact Reports

15160. Adequate Time for Review and Comment. The lead agency should provide adequate time for other public agencies and members of the public to review and comment on an EIR that it has prepared.

(a) Public agencies may establish time periods for review in their implementing procedures and shall notify reviewing agencies of the time periods.

(b) In setting time periods for review, public agencies shall give consideration to their obligation to obtain comments from public agencies having jurisdiction by law with respect to the project and to the policy favoring public participation.

(c) In order to provide sufficient time for public review, review periods for draft EIRs should not be less than 30 days nor longer than 90 days except in unusual situations. While state and local agencies are not bound by federal guidelines for implementing the National Environmental Policy Act, the time limits in the federal guidelines provide an example that may be followed in some situations. The federal guidelines require at least 90 days for review of a draft EIR and another 30 days for the review of a final EIR. Review periods of this length may be desirable for some large projects, but shorter periods may be provided where the shorter period will still allow adequate review.

(d) A review period for an EIR does not require a halt in other planning activities related to a project. Planning should continue in conjunction with environmental evaluation.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15161. Review of Environmental Impact Reports. (a) Public agencies must develop procedures to ensure that lead agencies obtain and receive adequate comments on their EIRs from public agencies which have jurisdiction by law with respect to the project. Such procedures should include provisions for consultation with persons who have special expertise in environmental matters. It is suggested that public agencies utilize existing state, and regional or local clearinghouses to distribute EIRs and other environmental documents to appropriate agencies.

(b) Cities and counties should compile listings of other agencies, particularly local agencies, which have legal jurisdiction and/or special expertise with respect to various projects and project locations. Appendix B to these Guidelines identifies state agencies which have legal jurisdiction over, or special expertise in, various impacts. This could be the basis for a part of such listings. Such listings should be a guide in determining which agencies should be consulted with regard to a particular project.

(c) Reviewers should focus on the sufficiency of the EIR in discussing possible impacts upon the environment, ways in which adverse effects might be minimized, and alternatives to the project, in light of the intent of the act to provide decision-makers with useful information about such factors.

(d) Upon completion of reviewing an EIR, it is suggested that reviewing agencies supply the project sponsor with the name of a contact person who is available for later consultation should this prove necessary.

(e) EIRs and Negative Declarations to be reviewed by state agencies shall be submitted to the State Clearinghouse, 1400 Tenth Street, Sacramento, California 95814. When EIRs are submitted to the State Clearinghouse, the review periods set by the lead agency shall be at least as long as the period provided in the state review system operated by the State Clearinghouse.

History: 1. Amendment of subsections (a) and (b) and new subsection (e) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15162. Failure to Comment. If any public agency or person who is consulted with regard to an EIR fails to comment within a reasonable time as specified by the Responsible Agency, it shall be assumed, absent a request for a specific extension of time, that such agency or person has no comment to make.

15163. Requests for Environmental Documents. The Responsible Agency, after preparing an EIR or other environmental document described in these Guidelines, is responsible for making such documents available to the public for inspection. Members of the general public requesting copies of the EIR may be charged for the actual cost of reproducing that copy.

15164. Public Participation. While the Environmental Quality Act of 1970 does not require formal public hearings at any stage of the environmental review procedure, it is a widely accepted desirable goal of this process to encourage public participation. All public agencies adopting implementing procedures in response to these Guidelines should make provisions in their procedures for wide public involvement, formal and informal, consistent with their existing activities and procedures, in order to properly receive and evaluate public reactions, adverse and favorable, based on environmental issues.

15165. Public Hearings. (a) A public hearing on the environmental impact of a project should usually be held when the lead agency determines it would facilitate the purposes and goals of the CEQA and these Guidelines to do so. The hearing may be held in conjunction with and as a part of normal planning activities. To as great a degree as possible, these hearings should include comments from reviewing agencies made pursuant to these Guidelines.

(b) A Draft EIR should be used as a basis for discussion at a public hearing. The hearing may be held at a place where public hearings are regularly conducted by the lead agency or at another location expected to be convenient to the public.

(c) Notice shall be given of all public hearings in a timely manner. This notice may be given in the same form and time as notice for other regularly conducted public hearings of the public agency.

(d) A public agency may include, in its implementing procedures, procedures for the conducting of public hearings pursuant to this section, which procedures may be consistent with already existing hearing and notice requirements of the public agency for regularly conducted legislative, planning and other proceedings.

(e) There is no requirement for a public agency to conduct a public hearing in connection with its review of an EIR prepared by another public agency.

History: 1. Amendment of subsections (a) and (b) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15166. Retention and Availability of Comments. Comments received through the consultation process shall be kept on file for a reasonable period and available for public inspection at an address given in the Final EIR. Comments which may be received independently of the review of the Draft EIR shall also be considered and kept on file.

Article 11. EIR Monitor

15180. EIR Monitor. The Secretary for Resources will provide for publication of a bulletin entitled "California EIR Monitor" on a subscription basis to provide public notice of amendments to the Guidelines, the completion of draft EIRs and other matters as deemed appropriate. Inquiries and subscription requests should be sent to the following address:

Secretary for Resources
Attention: California EIR Monitor
1416 Ninth Street, Room 1311
Sacramento, California 95814

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New Article 11 (Section 15180) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

APPENDICES

Appendix A	Flow Chart
Appendix B	Statutory Authority of State Departments
Appendix C	Notice of Completion Form
Appendix D	Notice of Intent.

NOTE: The following entities will also receive reports for review but their areas of environmental concern are not yet established: San Francisco Bay Conservation and Development Commission, California Tahoe Regional Planning Agency and Wildlife Conservation Board.

History: 1. Amendment of Appendix B filed 12-15-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

APPENDIX B FOOTNOTES

No.

1. **Agriculture**—(1) Air quality and air pollution control
   Effects on plants and animals
2. **Agriculture**—(12) Human Ecology
   Protection of food and fibre
3. **Agriculture**—(24) Sanitation and waste systems
   Agriculture, dairy and feed lot systems
4. **Agricultural**—(28) Transportation and handling of hazardous materials
   As pertains to transportation, handling, storage and decontamination of pesticides.
5. **Agriculture**—(30) Fish and wildlife
   Pesticide effects, predatory animal control, bird control
6. **CHP**—(1) Air quality and air pollution control
   Enforcement of motor vehicle regulations
7. **Public Health**—(3) Coastal areas, wetlands, etc.
   Beach sanitation, water pollution, solid waste and mosquito control
8. **Public Health**—(4) Congestion in urban areas, housing and building displacement
   Pertains to health component
9. **Public Health**—(7) Environmental effects with special impact in low-income neighborhoods
   Most of these are strongly related to health
10. **Public Health**—(16) Navigable airways
    Pertains to noise
11. **Public Health**—(22) Regional comprehensive planning
    Pertains to personal and environmental health components
12. **Public Health**—(30) Wildlife
    As it may pertain to human health hazards
13. **Public Health**—(31) Activities with special impact on regional jurisdictions
    Pertains to comprehensive health planning
14. **Colorado River Board**—(2), (3), (5), (6), (8), (10), (13), (17), (19), (21), (22), (24), (26), (27), (29), (30), (31), (32) and (33).
    As pertains to the Colorado, New and Alamo Rivers
15. **Fish and Game**—(15) Natural gas energy development, generation and supply
    As field development and distribution systems may affect fish and wildlife
16. **Fish and Game**—(16) Navigable airways
    As may affect migrating and resident wildlife
17. **Fish and Game**—(18) Noise control and abatement
    As excessive noise may affect wildlife
18. **Fish and Game**—(24) Sanitation and waste systems
    As water quality may affect fish and wildlife
19. **Parks and Recreation**—(7) Environmental effects with special impact in low-income neighborhoods
    In impacted areas only
20. **Reclamation Board**—(8), (17), (31) and (32)
    In areas of Board's jurisdiction only
21. **State Water Resources Control Board**—(4), (30), (33) and (34)
    As may pertain to water quality
22. **Conservation**—(5), (10), (20) and (23)
    With respect to forest land

SPONSOR'S PROJECT I.D. NUMBER (OPTIONAL) (12-21)

SIGNATURE OF AUTHORIZED REPRESENTATIVE

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New Appendix D filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15014. Application. (a) These Guidelines have only general application to the diversity of projects undertaken or approved by public agencies. They provide basic principles, objectives, criteria and definitions which individual public agencies shall adapt for internal use, interpreting these Guidelines in terms of specific projects. To implement these principles, objectives, criteria, and definitions, public agencies shall specify procedures to be followed which must be consistent with CEQA and these Guidelines.

(b) Until February 15, 1974, any objectives, criteria, and procedures adopted by public agencies in compliance with CEQA and these Guidelines may continue to govern the evaluation of projects and the preparation of environmental impact reports without being brought into conformity with the amendments to these Guidelines adopted by the Secretary for Resources in December, 1973. Public agencies may bring their objectives, criteria, and procedures into conformity with the amended guidelines before February 15, 1974.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsection (b) filed 1-18-74 as an emergency; effective upon filing (Register 74, No. 3).
3. Amendment of subsection (b) filed 1-25-74 as an emergency; effective immediately upon filing. Certificate of Compliance included (Register 74, No. 4).

15015. Terminology. The following words are used to indicate whether a particular subject in the Guidelines is mandatory, advisory, or permissive:

(a) "Must" or "shall" identifies a mandatory element which all public agencies are required to follow.

(b) "Should" identifies guidance provided by the Secretary for Resources based on policy considerations contained in CEQA, in the legislative history of the statute, or in federal court decisions which California courts can be expected to follow. Public agencies are advised to follow this guidance in the absence of compelling, countervailing considerations.

(c) "May" identifies a permissive element which is left fully to the discretion of the public agencies involved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No.50).

Article 4. Definitions

15020. General. Whenever the following words are used in these Guidelines, unless otherwise defined, they shall have the meaning ascribed to them in this article. These definitions are intended to clarify but not to replace or negate the definitions used in CEQA.

15020.5. Applicant. Applicant means a person who proposes to carry out a project which needs a lease, permit, license, certificate, or other entitlement to use or financial assistance from one or more public agencies when that person applies for the governmental approval or assistance.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15021. Approval. Approval means the decision by a public agency which commits the agency to a definite course of action in regard to a project intended to be carried out by any person. The exact date of approval of any project is a matter determined by each public agency according to its rules, regulations, and ordinances. Legislative action in regard to a project often constitutes approval.

In connection with private activities, approval occurs upon the earliest commitment to issue or the issuance by the public agency of a discretionary contract, grant, subsidy, loan, or other form of financial assistance, lease, permit, license, certificate, or other entitlement for use of the project.

15022. CEQA—California Environmental Quality Act. California Environmental Quality Act (CEQA) means California Public Resources Code Sections 21000 through 21174.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15023. Categorical Exemption. Categorical Exemption means an exception from the requirements of CEQA for a class of projects based on a finding by the Secretary for Resources that the class of projects does not have a significant effect on the environment.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15024. Discretionary Project. Discretionary project means an activity defined as a project which requires the exercise of judgment, deliberation, or decision on the part of the public agency or body in the process of approving or disapproving a particular activity, as distinguished from situations where the public agency or body merely has to determine whether there has been conformity with applicable statutes, ordinances, or regulations.

15025. Emergency. Emergency means a sudden, unexpected occurrence demanding immediate action to prevent or mitigate loss or damage to life, health, property, or essential public services.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15026. Environment. Environment means the physical conditions which exist within the area which will be affected by a proposed project including land, air, water, minerals, flora, fauna, ambient noise, objects of historic or aesthetic significance.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15026.5. Environmental Documents. Environmental documents means Draft and Final EIRs, Initial Studies, Negative Declarations, Notices of Completion, and Notices of Determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included. (Register 73, No. 50).

15027. EIR—Environmental Impact Report. Environmental Impact Report (EIR) means a detailed statement setting forth the environmental effects and considerations pertaining to a project as specified in Section 21100 of the California Environmental Quality Act.

(a) Draft EIR means an EIR containing the information specified in Sections 15141, 15142, and 15143 of these Guidelines.

(b) Final EIR means an EIR containing the information specified in Sections 15141, 15142, 15143, and 15144 of these Guidelines, a section for comments received in the consultation process, and the response of the lead agency to the comments received. The final EIR is discussed in detail in Section 15146.

History: 1. Amendment of subsection (b) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15028. EIS—Environmental Impact Statement. Environmental Impact Statement (EIS) means an environmental impact report prepared pursuant to the National Environmental Policy Act (NEPA). The Federal Government uses the term EIS in the place of the term EIR which is used in CEQA.

15029. Feasible. Feasible means capable of being accomplished in a successful manner by reasonably available, economic, and workable means.

15029.5 Initial Study. Initial study means a preliminary analysis prepared by the lead agency pursuant to Section 15080 to determine whether an EIR or a Negative Declaration must be prepared

NOTE: Authority cited: Sections 21083 and 21174, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15030. Lead Agency. Lead Agency means the public agency which has the principal responsibility for preparing environmental documents and for carrying out or approving a project which may have a significant effect on the environment.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15031. Local Agency. Local agency means any public agency other than a state agency, board or commission. Local agency includes but is not limited to cities, counties, charter cities and counties, districts, school districts, special district, redevelopment agencies and any board, commission, or organizational subdivision of a local agency when so designated by order or resolution of the governing legislative body of the local agency.

History: 1. Amendment filed 12-14-73 as an emergency, effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15032. Ministerial Projects. Ministerial projects as a general rule, include those activities defined as projects which are undertaken or approved by a governmental decision which a public officer or public agency makes upon a given state of facts in a prescribed manner in obedience to the mandate of legal authority. With these projects, the officer or agency must act upon the given facts without regard to his own judgment or opinion concerning the propriety or wisdom of the act although the statute, ordinance, or regulation may require, in some degree, a construction of its language by the officer.

15033. Negative Declaration. Negative declaration means a statement by the lead agency briefly presenting the reasons that the project, although not otherwise exempt, would not have a significant effect on the environment and therefore does not require an EIR.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15034. Notice of Completion. Notice of Completion means a brief report filed with the Secretary for Resources as soon as a lead agency has completed a draft EIR and is prepared to send out copies for review. The contents of this notice are explained in Section 15085(c).

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15035. Notice of Determination. Notice of Determination means a brief notice to be filed by a public agency when it approves or determines to carry out a project which is subject to the requirements of CEQA. The contents of this report are explained in Section 15085(g).

15035.5. Notice of Exemption. Notice of exemption means a brief notice which may be filed by a public agency when it has approved or determined to carry out a project, and it has determined that it is ministerial, categorically exempt or an emergency project. Such a notice may also be filed by an applicant where such a deterination has been made by a public agency which must approve the project. The contents of this notice are explained in Sec. 15074(a) and (b).

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21108, 21152, 21167, Public Resources Code and Chap. 56 of Stats. 1974.

History: 1. New section filed 3-26-74 as an emergency; effective upon filing (Register 74, No. 13).

15036. Person. Person includes any person, firm, association, organization, partnership, business, trust, corporation, company, district, county, city and county, city, town, the State, and any of the agencies' political subdivisions of such entities.

15037. Project. (a) Project means the whole of an action, resulting in physical impact on the environment, directly or ultimately, that is any of the following:

(1) An activity directly undertaken by any public agency including but not limited to public works construction and related activities, clearing or grading of land, improvements to existing public structures, enactment and amendment of zoning ordinances, and the adoption of local General Plans or elements thereof pursuant to Government Code Sections 65100–65700.

(1) A substantial portion of public funds allocated for the project have not been spent and it is still feasible to modify the project to mitigate potentially adverse environmental effects, or to choose feasible alternatives to the project, including the alternative of "no project" or halting the project; provided that this Section (1) shall not apply to projects which come under the jurisdiction of the National Environmental Policy Act (NEPA) and which, through regulations promulgated under NEPA, were held to be too far advanced at the time of NEPA's effective date to require an EIS in compliance with those regulations.

(2) A public agency proposes to modify the project in such a way that the project might have a new significant effect on the environment.

(b) A project as defined in Section 15037(a)(3) or in Section 15037(a)(2) as it relates to contracts, where the permit or other entitlement was issued, or the contract approved, prior to April 5, 1973, shall not require an EIR or Negative Declaration, subject to the following provisions:

(1) CEQA expressly does not prohibit a public agency from considering environmental factors in connection with the approval or disapproval of a project, or from imposing reasonable fees on the appropriate private person or entity for preparing an environmental report. Local agencies may require environmental reports for projects covered by this paragraph pursuant to local ordinances during this interim period.

(2) Where the issuance or approval occurred prior to December 5, 1972, and prior to said date the project was legally challenged for noncompliance with CEQA, the project shall be bound by special rules set forth in Section 21170 of CEQA.

(3) Where a project involving the issuance of a lease, permit, license, certificate or other entitlement to use has been granted a discretionary governmental approval for part of the project before April 5, 1973, and another or additional discretionary governmental approvals after April 5, 1973, the project shall require an EIR or Negative Declaration only if the approval or approvals after April 5, 1973, involve a greater degree of responsibility or control over the project as a whole than did the approval or approvals prior to that date.

(c) Any EIR which has been completed or on which substantial work has been performed on or before February 15, 1974, in compliance with procedures of a public agency consistent with CEQA and these Guidelines as adopted on February 3, 1973, shall be deemed to be in compliance with these Guidelines. No further EIR shall be required except as provided in subsections (a) and (b).

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15071. Emergency Projects. The following emergency projects are exempt from the requirements of CEQA, and no EIR is required.

(a) Projects undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish or replace property or facilities damaged or destroyed as a result of a disaster in a disaster stricken area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing with Section 8550) of Division 1, Title 2 of the Government Code.

(b) Emergency repairs to public service facilities necessary to maintain service.

(c) Projects undertaken as immediate action necessary to prevent or mitigate an emergency.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15072. Feasibility and Planning Studies. A project involving only feasibility or planning studies for possible future actions which the agency, board, or commission has not approved, adopted, or funded does not require the preparation of an environmental impact report but does require consideration of environmental factors as required by Section 21102 of CEQA.

15073. Ministerial Projects. Ministerial projects are exempt from the requirements of CEQA, and no EIR is required. The determination of what is "ministerial" can most appropriately be made by the particular public agency involved based upon its analysis of its own laws, and it is anticipated that each public agency will make such determination either as a part of its implementing regulations or on a case-by-case basis. It is further anticipated that the following actions will, in most cases, be ministerial in nature.

(a) Issuance of building permits.
(b) Issuance of business licenses.
(c) Approval of final subdivision maps.
(d) Approval of individual utility service connections and disconnections.

In the absence of any discretionary provision contained in local ordinance, it shall be presumed that these four actions are ministerial. Each public agency may, in its implementing regulations or ordinances, provide an identification or itemization of its projects and actions which are deemed ministerial under the applicable laws and ordinances.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15074. Notice of Exemption. (a) When a public agency determines that a project is exempt from the requirements of CEQA because it is an emergency project, a ministerial project or categorically exempt, and the public agency approves or determines to carry out the project, it may file a notice of exemption. Such a notice shall include (1) a brief description of the project, (2) a finding that the project is exempt, including a citation to the State Guidelines section under which it is found to be exempt, and (3) a brief statement of reasons to support the findings.

(b) Whenever a public agency approves an applicant's project, it or the applicant may file a notice of exemption. The notice of exemption filed by an applicant shall contain the information required in subdivision (a) above, together with a certified document issued by the public agency stating that it has found the project to be exempt. This may be a certified copy of an existing document or record of the public agency.

(c) If the public agency is a state agency, the notice of exemption will be filed with the Secretary for Resources. A form for this notice is provided in Appendix E. Copies of all such notices shall be posted on a weekly basis at the Resources Building Information Desk, 1416 9th Street, Sacramento. Each such list will remain posted for 30 days.

(d) If the public agency is a local agency, the notice of exemption will be filed with the County Clerk of the county or counties in which the project will be located. Copies of all such notices will be available for public inspection and a list of such notices shall be posted on a weekly basis in the office of the county clerk. Each such list shall remain posted for a period of 30 days.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21108, 21152, 21167, Public Resources Code and Chap. 56 of Stats. 1974.

History: 1. New section filed 3-26-74 as an emergency; effective upon filing (Register 74, No. 13).

15026.5. Environmental Documents. Environmental documents means Draft and Final EIRs, Initial Studies, Negative Declarations, Notices of Completion, and Notices of Determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included. (Register 73, No. 50).

15027. EIR—Environmental Impact Report. Environmental Impact Report (EIR) means a detailed statement setting forth the environmental effects and considerations pertaining to a project as specified in Section 21100 of the California Environmental Quality Act.

(a) Draft EIR means an EIR containing the information specified in Sections 15141, 15142, and 15143 of these Guidelines.

(b) Final EIR means an EIR containing the information specified in Sections 15141, 15142, 15143, and 15144 of these Guidelines, a section for comments received in the consultation process, and the response of the lead agency to the comments received. The final EIR is discussed in detail in Section 15146.

History: 1. Amendment of subsection (b) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15028. EIS—Environmental Impact Statement. Environmental Impact Statement (EIS) means an environmental impact report prepared pursuant to the National Environmental Policy Act (NEPA). The Federal Government uses the term EIS in the place of the term EIR which is used in CEQA.

15029. Feasible. Feasible means capable of being accomplished in a successful manner by reasonably available, economic, and workable means.

15029.5 Initial Study. Initial study means a preliminary analysis prepared by the lead agency pursuant to Section 15080 to determine whether an EIR or a Negative Declaration must be prepared

NOTE: Authority cited: Sections 21083 and 21174, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15030. Lead Agency. Lead Agency means the public agency which has the principal responsibility for preparing environmental documents and for carrying out or approving a project which may have a significant effect on the environment.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15031. Local Agency. Local agency means any public agency other than a state agency, board or commission. Local agency includes but is not limited to cities, counties, charter cities and counties, districts, school districts, special district, redevelopment agencies and any board, commission, or organizational subdivision of a local agency when so designated by order or resolution of the governing legislative body of the local agency.

History: 1. Amendment filed 12-14-73 as an emergency, effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15032. Ministerial Projects. Ministerial projects as a general rule, include those activities defined as projects which are undertaken or approved by a governmental decision which a public officer or public agency makes upon a given state of facts in a prescribed manner in obedience to the mandate of legal authority. With these projects, the officer or agency must act upon the given facts without regard to his own judgment or opinion concerning the propriety or wisdom of the act although the statute, ordinance, or regulation may require, in some degree, a construction of its language by the officer.

15033. Negative Declaration. Negative declaration means a statement by the lead agency briefly presenting the reasons that the project, although not otherwise exempt, would not have a significant effect on the environment and therefore does not require an EIR.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15034. Notice of Completion. Notice of Completion means a brief report filed with the Secretary for Resources as soon as a lead agency has completed a draft EIR and is prepared to send out copies for review. The contents of this notice are explained in Section 15085(c).

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15035. Notice of Determination. Notice of Determination means a brief notice to be filed by a public agency when it approves or determines to carry out a project which is subject to the requirements of CEQA. The contents of this report are explained in Section 15085(g).

15035.5. Notice of Exemption. Notice of exemption means a brief notice which may be filed by a public agency when it has approved or determined to carry out a project, and it has determined that it is ministerial, categorically exempt or an emergency project. Such a notice may also be filed by an applicant where such a determination has been made by a public agency which must approve the project. The contents of this notice are explained in Sec. 15074(a) and (b).

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21108, 21152, 21167, Public Resources Code and Chap. 56 of Stats. 1974.

History: 1. New section filed 3-26-74 as an emergency; effective upon filing (Register 74, No. 13).
2. Certificate of Compliance filed 6-26-74 (Register 74, No. 26).

(b) Whenever a public agency approves an applicant's project, it or the applicant may file a notice of exemption. The notice of exemption filed by an applicant shall contain the information required in subdivision (a) above, together with a certified document issued by the public agency stating that it has found the project to be exempt. This may be a certified copy of an existing document or record of the public agency.

(c) If the public agency is a state agency, the notice of exemption will be filed with the Secretary for Resources. A form for this notice is provided in Appendix E. Copies of all such notices shall be posted on a weekly basis at the Resources Building Information Desk, 1416 9th Street, Sacramento. Each such list will remain posted for 30 days.

(d) If the public agency is a local agency, the notice of exemption will be filed with the County Clerk of the county or counties in which the project will be located. Copies of all such notices will be available for public inspection and a list of such notices shall be posted on a weekly basis in the office of the county clerk. Each such list shall remain posted for a period of 30 days.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21108, 21152, 21167, Public Resources Code and Chap. 56 of Stats. 1974.

History: 1. New section filed 3-26-74 as an emergency; effective upon filing (Register 74, No. 13).

2. Certificate of Compliance filed 6-26-74 (Register 74, No. 26).

Title

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21108, 21152, 21167, Public Resources Code and Chap. 56, Stats. 1974.

History: 1. New Appendix E filed 3-26-74 as an emergency; effective upon filing (Register 74, No. 13).
2. Certificate of Compliance filed 6-26-74 (Register 74, No. 26).

15014. Application. (a) These Guidelines have only general application to the diversity of projects undertaken or approved by public agencies. They provide basic principles, objectives, criteria and definitions which individual public agencies shall adapt for internal use, interpreting these Guidelines in terms of specific projects. To implement these principles, objectives, criteria, and definitions, public agencies shall specify procedures to be followed which must be consistent with CEQA and these Guidelines.

(b) Until February 15, 1974, any objectives, criteria, and procedures adopted by public agencies in compliance with CEQA and these Guidelines may continue to govern the evaluation of projects and the preparation of environmental impact reports without being brought into conformity with the amended guidelines before February 15, 1974.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-18-74 as an emergency; effective upon filing (Register 74, No. 3).

15015. Terminology. The following words are used to indicate whether a particular subject in the Guidelines is mandatory, advisory, or permissive:

(a) "Must" or "shall" identifies a mandatory element which all public agencies are required to follow.

(b) "Should" identifies guidance provided by the Secretary for Resources based on policy considerations contained in CEQA, in the legislative history of the statute, or in federal court decisions which California courts can be expected to follow. Public agencies are advised to follow this guidance in the absence of compelling, countervailing considerations.

(c) "May" identifies a permissive element which is left fully to the discretion of the public agencies involved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No.50).

Article 4. Definitions

15020. General. Whenever the following words are used in these Guidelines, unless otherwise defined, they shall have the meaning ascribed to them in this article. These definitions are intended to clarify but not to replace or negate the definitions used in CEQA.

15020.5. Applicant. Applicant means a person who proposes to carry out a project which needs a lease, permit, license, certificate, or other entitlement to use or financial assistance from one or more public agencies when that person applies for the governmental approval or assistance.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15021. Approval. Approval means the decision by a public agency which commits the agency to a definite course of action in regard to a project intended to be carried out by any person. The exact date of approval of any project is a matter determined by each public agency according to its rules, regulations, and ordinances. Legislative action in regard to a project often constitutes approval.

In connection with private activities, approval occurs upon the earliest commitment to issue or the issuance by the public agency of a discretionary contract, grant, subsidy, loan, or other form of financial assistance, lease, permit, license, certificate, or other entitlement for use of the project.

15022. CEQA—California Environmental Quality Act. California Environmental Quality Act (CEQA) means California Public Resources Code Sections 21000 through 21174.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15023. Categorical Exemption. Categorical Exemption means an exception from the requirements of CEQA for a class of projects based on a finding by the Secretary for Resources that the class of projects does not have a significant effect on the environment.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15024. Discretionary Project. Discretionary project means an activity defined as a project which requires the exercise of judgment, deliberation, or decision on the part of the public agency or body in the process of approving or disapproving a particular activity, as distinguished from situations where the public agency or body merely has to determine whether there has been conformity with applicable statutes, ordinances, or regulations.

15025. Emergency. Emergency means a sudden, unexpected occurrence demanding immediate action to prevent or mitigate loss or damage to life, health, property, or essential public services.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15026. Environment. Environment means the physical conditions which exist within the area which will be affected by a proposed project including land, air, water, minerals, flora, fauna, ambient noise, objects of historic or aesthetic significance.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

Article 1. General

15000. Authority. The regulations contained herein are prescribed by the Secretary for Resources pursuant to authority granted in Public Resources Code Section 21083 to be followed by all state agencies, boards, and commisions, all counties, cities and counties, cities including charter cities, regional agencies, public districts, redevelopment agencies, and all other political subdivisions of the State in the implementation of the Environmental Quality Act of 1970 dealing with environmental quality, the evaluation of projects, and the preparation and evaluation of environmental impact reports. These Guidelines have been developed by the Office of Planning and Research for adoption by the Secretary for Resources in accordance with Section 21083. Additional information may be obtained by writing:

Secretary for Resources
Room 1311, 1416 Ninth Street
Sacramento, CA 95814

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New Chapter 3, Articles 1 through 10 (§§ 15000 through 15166, not consecutive) filed 2-7-73; designated effective upon filing as provided in Section 21083, Public Resources Code (Register 73, No. 6).

15001. Short Title. These Guidelines may be cited as the "State EIR Guidelines."

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000–21174, Public Resources Code.

History: 1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

Article 2. Purpose

15005. Purpose. The purpose of these Guidelines is to provide public agencies with principles, objectives, criteria, and definitions of statewide application to be used in the implementation of the California Environmental Quality Act of 1970, Public Resources Code Sections 21000 et seq. These Guidelines are binding on all public agencies.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

Article 3. Policy

15010. Legislative Declaration. The Legislature has declared that:

(a) Every citizen has a responsibility to contribute to the preservation and enhancement of the environment.

(b) It is the intent of the Legislature that all agencies of the state government which regulate activities of private individuals, corporations, and public agencies which are found to affect the quality of the environment, shall regulate such activities so that major consideration is given to preventing environmental damage.

15011. State Policy. The Legislature has declared that it is the policy of the state to:

(a) Develop and maintain a high-quality environment now and in the future, and take all action necessary to protect, rehabilitate, and enhance the environmental quality of the state.

(b) Take all action necessary to provide the people of this state with clean air and water, enjoyment of aesthetic, natural, scenic, and historic environmental qualities, and freedom from excessive noise.

(c) Prevent the elimination of fish or wildlife species due to man's activities, insure that fish and wildlife populations do not drop below self-perpetuating levels, and preserve for future generations representations of all plant and animal communities and examples of the major periods of California history.

(d) Ensure that the long-term protection of the environment shall be the guiding criterion in public decisions.

(e) Create and maintain conditions under which man and nature can exist in productive harmony to fulfill the social and economic requirements of present and future generations.

(f) Require governmental agencies at all levels to develop standards and procedures necessary to protect environmental quality.

(g) Require governmental agencies at all levels to consider qualitative factors as well as economic and technical factors and long-term benefits and costs, in addition to short-term benefits and costs and to consider alternatives to proposed actions affecting the environment.

15012. Informational Document. An Environmental Impact Report is an informational document which, when fully prepared in accordance with the CEQA and these Guidelines, will inform public decision-makers and the general public of the environmental effects of projects they propose to carry out or approve. The EIR process is intended to enable public agencies to evaluate a project to determine whether it may have a significant effect on the environment, to examine and institute methods of reducing adverse impacts, and to consider alternatives to the project as proposed. These things must be done prior to approval or disapproval of the project. An EIR may not be used as an instrument to rationalize approval of a project, nor do indications of adverse impact, as enunciated in an EIR, require that a project be disapproved. While CEQA requires that major consideration be given to preventing environmental damage, it is recognized that public agencies have obligations to balance other public objectives, including economic and social factors in determining whether and how a project should be approved. Economic information may be included in an EIR or may be presented in whatever form the agency desires.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15013. Early Preparation. An EIR is a useful planning tool to enable environmental constraints and opportunities to be considered before project plans are finalized. EIRs should be prepared as early in the planning process as possible to enable environmental considerations to influence project program or design.

15014. Applicability. (a) These Guidelines have only general application to the diversity of projects undertaken or approved by public agencies. They provide basic principles, objectives, criteria and definitions which individual public agencies shall adapt for internal use, interpreting these Guidelines in terms of specific projects.

(b) Until April 1, 1975, the objectives, criteria, and procedures adopted by public agencies in compliance with CEQA and these Guidelines may continue to govern the evaluation of projects and the preparation of environmental documents without being brought into conformity with the amendments to these Guidelines adopted by the Secretary for Resources in December, 1974. However, the amendment to Section 15143(c) dealing with mitigation measures, must be complied with effective January 7, 1975, regardless of whether its provisions have been included in the procedures being used by a public agency.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsection (b) filed 1-18-74 as an emergency; effective upon filing (Register 74, No. 3).
3. Amendment of subsection (b) filed 1-25-74 as an emergency; effective immediately upon filing. Certificate of Compliance included (Register 74, No. 4).
4. Amendment filed 12-31-74 as an emergency; designated effective 1-7-75 (Register 75, No. 1).

15015. Terminology. The following words are used to indicate whether a particular subject in the Guidelines is mandatory, advisory, or permissive:

(a) "Must" or "shall" identifies a mandatory element which all public agencies are required to follow.

(b) "Should" identifies guidance provided by the Secretary for Resources based on policy considerations contained in CEQA, in the legislative history of the statute, or in federal court decisions which California courts can be expected to follow. Public agencies are advised to follow this guidance in the absence of compelling, countervailing considerations.

(c) "May" identifies a permissive element which is left fully to the discretion of the public agencies involved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

Article 4. Definitions

15020. General. Whenever the following words are used in these Guidelines, unless otherwise defined, they shall have the meaning ascribed to them in this article. These definitions are intended to clarify but not to replace or negate the definitions used in CEQA.

15020.5. Applicant. Applicant means a person who proposes to carry out a project which needs a lease, permit, license, certificate, or other entitlement to use or financial assistance from one or more public agencies when that person applies for the governmental approval or assistance.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15021. Approval. Approval means the decision by a public agency which commits the agency to a definite course of action in regard to a project intended to be carried out by any person. The exact date of approval of any project is a matter determined by each public agency according to its rules, regulations, and ordinances. Legislative action in regard to a project often constitutes approval.

In connection with private activities, approval occurs upon the earliest commitment to issue or the issuance by the public agency of a discretionary contract, grant, subsidy, loan, or other form of financial assistance, lease, permit, license, certificate, or other entitlement for use of the project.

15022. CEQA—California Environmental Quality Act. California Environmental Quality Act (CEQA) means California Public Resources Code Sections 21000 et seq.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15023. Categorical Exemption. Categorical Exemption means an exception from the requirements of CEQA for a class of projects based on a finding by the Secretary for Resources that the class of projects does not have a significant effect on the environment.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15024. Discretionary Project. Discretionary project means an activity defined as a project which requires the exercise of judgment, deliberation, or decision on the part of the public agency or body in the process of approving or disapproving a particular activity, as distinguished from situations where the public agency or body merely has to determine whether there has been conformity with applicable statutes, ordinances, or regulations.

15025. Emergency. Emergency means a sudden, unexpected occurrence demanding immediate action to prevent or mitigate loss or damage to life, health, property, or essential public services.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15026. Environment. Environment means the physical conditions which exist within the area which will be affected by a proposed project including land, air, water, minerals, flora, fauna, ambient noise, objects of historic or aesthetic significance.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15026.5. Environmental Documents. Environmental documents means Draft and Final EIRs, Initial Studies, Negative Declarations, Notices of Completion, and Notices of Determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included. (Register 73, No. 50).

15027. EIR—Environmental Impact Report. Environmental Impact Report (EIR) means a detailed statement setting forth the environmental effects and considerations pertaining to a project as specified in Section 21100 of the California Environmental Quality Act, and may mean either a draft or a final EIR.

(a) Draft EIR means an EIR containing the information specified in Sections 15141, 15142, and 15143 of these Guidelines. Where a Lead Agency consults with Responsible Agencies in the preparation of a draft EIR, the draft EIR shall also contain the information specified in Section 15144.

(b) Final EIR means an EIR containing the information contained in the draft EIR, comments either verbatim or in summary received in the review process, a list of persons commenting, and the response of the Lead Agency to the comments received. The final EIR is discussed in detail in Section 15146.

History: 1. Amendment of subsection (b) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15028. EIS—Environmental Impact Statement. Environmental Impact Statement (EIS) means an environmental impact document prepared pursuant to the National Environmental Policy Act (NEPA). The Federal Government uses the term EIS in the place of the term EIR which is used in CEQA.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15029. Feasible. Feasible means capable of being accomplished in a successful manner by reasonably available, economic, and workable means.

15029.5 Initial Study. Initial study means a preliminary analysis prepared by the lead agency pursuant to Section 15080 to determine whether an EIR or a Negative Declaration must be prepared

NOTE: Authority cited: Sections 21083 and 21174, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15029.6. Jurisdiction by Law. (a) Jurisdiction by law means the authority of any public agency (1) to grant a permit for or provide funding for the project in question, or (2) to exercise authority over resources which may be affected by the project.

(b) A city or county will have jurisdiction by law with respect to a project when the city or county is the site of the project, the area in which the major environmental effects will occur, and/or the area in which reside those citizens most directly concerned by any such environmental effects.

15035. Notice of Determination. Notice of Determination means a brief notice to be filed by a public agency after it approves or determines to carry out a project which is subject to the requirements of CEQA. The contents of this notice are explained in Sections 15083(d) and 15085(h). A copy of this notice appears in Appendix D.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15035.5. Notice of Exemption. Notice of Exemption means a brief notice which may be filed by a public agency when it has approved or determined to carry out a project, and it has determined that it is ministerial, categorically exempt or an emergency project. Such a notice may also be filed by an applicant where such a determination has been made by a public agency which must approve the project. The contents of this notice are explained in Sec. 15074(a) and (b). A copy of this notice appears in Appendix E.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21108, 21152, 21167, Public Resources Code and Chap. 56 of Stats. 1974.

History: 1. New section filed 3-26-74 as an emergency; effective upon filing (Register 74, No. 13).
2. Certificate of Compliance filed 6-26-74 (Register 74, No. 26).
3. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15036. Person. Person includes any person, firm, association, organization, partnership, business, trust, corporation, company, district, county, city and county, city, town, the State, and any of the agencies' political subdivisions of such entities.

15037. Project. (a) Project means the whole of an action, which has a potential for physical impact on the environment, directly or ultimately, that is any of the following:

(1) An activity directly undertaken by any public agency including but not limited to public works construction and related activities, clearing or grading of land, improvements to existing public structures, enactment and amendment of zoning ordinances, and the adoption and amendment of local General Plans or elements thereof pursuant to Government Code Sections 65100–65700.

(2) An activity undertaken by a person which is supported in whole or in part through public agency contracts, grants, subsidies, loans, or other forms of assistance from one or more public agencies.

(3) An activity involving the issuance to a person of a lease, permit, license, certificate, or other entitlement for use by one or more public agencies.

(b) Project does not include:

(1) Anything specifically exempted by state law.

(2) Proposals for legislation to be enacted by the State Legislature other than requests by state agencies for authorization or funding for projects independently from the Budget Act.

(3) Continuing administrative or maintenance activities, such as purchases for supplies, personnel-related actions, emergency repairs to public service facilities, general policy and procedure making (except as they are applied to specific instances covered above), feasibility or planning studies.

(4) The submittal of proposals to a vote of the people of the State or of a particular community.

(c) The term "project" refers to the underlying activity and not to the governmental approval process.

History: 1. Amendment of subsection (a) (1) and new subsection (c) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15038. Public Agency. Public agency includes any state agency, board or commission and any local or regional agency, as defined in these Guidelines. It does not include the courts of the State. This term does not include agencies of the federal government.

15039. Responsible Agency. Responsible agency means a public agency which proposes to undertake or approve a project, but is not the lead agency for the project. It includes all public agencies other than the lead agency which have approval power over the project.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15040. Significant Effect. Significant effect means a substantial adverse impact on the environment.

Article 5. General Responsibilities.

15050. Public Agency Implementation. (a) Each public agency is responsible for complying with CEQA and these Guidelines. Each public agency must develop its own procedures consistent with these Guidelines.

(b) Where a public agency is a Lead Agency and prepares an EIR itself, contracts for the preparation, or accepts data and information in the form of a draft EIR from an applicant, that public agency is responsible entirely for the adequacy and objectivity of the EIR.

(c) Public agencies shall adopt objectives, criteria, and specific procedures consistent with CEQA and these Guidelines for the orderly evaluation of projects and the preparation of environmental documents. These implementing procedures should contain at least the following provisions:

(1) Procedures for identifying the activities that are exempt from CEQA. These procedures should contain:

(A) Provisions for evaluating a proposed activity to determine if there is no possibility that the activity may have a significant effect on the environment.

(B) A list of projects over which the public agency has only ministerial authority.

(C) A list of specific activities which the public agency has found to be categorically exempt pursuant to Section 15100.4.

(2) Procedures for the conduct of initial studies.

(3) Provisions for the preparation of Negative Declarations.

(4) Provisions for the preparation of EIR's.

(5) Provisions for consulting with and obtaining comments from other public agencies and members of the public with regard to the environmental effects of projects.

(6) Provisions assuring adequate opportunity and time for the public review and comment on the Draft EIR or Negative Declaration.

(7) Provisions for evaluating and responding to comments received on environmental documents.

(8) Provisions for the review and consideration of environmental documents by the person or decision-making body who will approve or disapprove a project.

(9) Provisions for filing documents required or authorized by CEQA and these Guidelines.

(10) Provisions to ensure that Lead Agencies obtain adequate comments on environmental documents which they submit to the public agency for review.

(11) The assignment of responsibility for specific functions to specific units of the public agency.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15051. Office of Planning and Research (OPR). OPR is responsible for the preparation and development of principles, objectives, criteria and definitions to implement the CEQA, prior to adoption by the Secretary for Resources. OPR also, as part of guideline development, shall consider proposals for Categorical Exemption and makes appropriate recommendations to the Secretary for Resources. OPR shall be responsible for resolving disputes over Lead Agency designation.

15052. The Secretary for Resources. The Guidelines shall be officially adopted by the Secretary for Resources, including a finding that each class of projects given a Categorical Exemption will not have a significant effect on the environment. The Secretary also has the responsibility for consolidating all state comments on federally sponsored projects. The Secretary for Resources may issue amendments to these Guidelines.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15053. Fees. (a) All Lead Agencies preparing EIRs or Negative Declarations for projects to be carried out by any person other than the Lead Agency itself may charge and collect a reasonable fee from such person or entity, in order to recover the estimated costs incurred in preparing the EIR or Negative Declaration.

(b) Public agencies may charge and collect a reasonable fee from members of the public for a copy of an environmental document not to exceed the actual cost of reproducing a copy.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15054. Timely Compliance. Public agencies should carry out their responsibilities for preparing and reviewing EIRs within a reasonable period of time. The requirement for the preparation of an EIR should not cause undue delays in the processing of applications for permits or other entitlements to use.

Article 6. Application of the Act to Projects

15060. General Rule. The requirements set forth in these Guidelines apply to projects which may have a significant effect on the environment and which involve discretionary governmental action. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not covered by the requirements set forth in CEQA, and these Guidelines concerning the evaluation of projects and the preparation and review of environmental documents do not apply.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15061. Projects Controlled by State or Local Agencies. (a) When a public agency plans to carry out or approve a project which may have a significant effect on the environment, the Lead Agency shall prepare environmental documents through its own efforts or by contract unless the project is otherwise exempted by these Guidelines.

(b) Where a project which may have a significant effect on the environment is to be carried out by a non-governmental person subject to approval, financial support, or some other involvement by a public agency, the Lead Agency will prepare environmental documents by its own efforts or by contract. However, the Lead Agency may require the person to supply data and information, both to determine whether the project may have a significant effect on the environment, and to assist in the preparation of an EIR by the Agency. This information may be submitted in the form of a draft EIR, if the Agency desires. If information is provided in the form of a draft EIR, the Lead Agency may not use the draft EIR as its own without independent evaluation and analysis. The draft EIR which is sent out for public review must reflect the independent judgment of the Lead Agency. The Lead Agency should require an applicant to specify to the best of his knowledge which other public agencies will have jurisdiction by law over the project.

(c) Where the project is to be undertaken by a local agency, as defined in these Guidelines, but requires state approval or financial assistance, the state agency shall require the local agency to prepare the EIR or Negative Declaration, to be submitted with the request for approval of the proposed project. This must also be done where federal funds are involved, but only if a state agency has discretionary authority over the use of those funds. If the local project has been mandated on the local agency by a state agency, the EIR prepared by the local agency may be limited to consideration of those factors and alternatives which do not conflict with the order.

(d) The EIR may be prepared as a separate document, or as part of a project report. If prepared as a part of the project report, it must still contain in one separate and distinguishable section the elements required of an EIR, including the seven elements specified in Section 15143 of these Guidelines.

(e) All public and private activities or undertakings pursuant to or in furtherance of a redevelopment plan constitute a single project, which shall be deemed approved at the time of adoption of the redevelopment plan by the legislative body. The EIR in connection with the redevelopment plan shall be submitted in accordance with Section 33352 of the Health and Safety Code.

(f) All of the above is subject to the Lead Agency principle which provides that not more than one EIR shall be prepared in connection with the same underlying activity and that th EIR shall be prepared by the lead agency.

History: 1. Amendment of subsections (a), (b) and (f) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsections (a) and (b) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15062. Private Projects.

History: 1. Repealer filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15063. Federal Projects. (a) In regard to any proposed federal project in this state which may have a significant effect on the environment and on which the state officially comments, the state officials responsible for such comments shall include in their comments a discussion of the matters specified in Section 15143 of these Guidelines.

(b) In cases where these Guidelines require the preparation of an EIR by a Lead Agency and an EIS has been or will be prepared for the same project pursuant to the requirements of the National Environmental Policy Act of 1969 and implementing regulations thereto, all or any part of such statement may be submitted in lieu of all or any part of an EIR required by these Guidelines, provided that the EIS or the part thereof so used, shall comply with the requirements of these Guidelines. In cases where the federal EIS is used, discussion of mitigation measures and growth inducing impact will have to be added or supplemented if the EIS does not include an adequate discussion of these elements.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15064. Lead Agency Principle. Where a project is to be carried out or approved by more than one public agency only one public agency shall be responsible for preparation of environmental documents and it will be the Lead Agency. Such environmental documents will be prepared by the Lead Agency in consultation with all other responsible agencies. The Lead Agency's environmental documents shall be the environmental documentation for all responsible agencies. Such responsible agencies shall consider the Lead Agency's EIR or negative declaration prior to acting upon or approving the projects, and they shall certify that their decision-making bodies have reviewed and considered the information contained in them.

History: 1. (Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15065. Lead Agency Criteria. Where two or more public agencies are involved with a project, which agency shall be the Lead Agency shall be determined by the following principles:

(a) If the project is to be carried out by a public agency, the Lead Agency shall be the public agency which proposes to carry out the project.

(b) If the project is to be carried out by a nongovernmental person, the Lead Agency shall be the public agency with the greatest responsibility for supervising or approving the project as a whole. The Lead Agency will generally be the agency with general governmental powers rather than an agency with a single or limited purpose which is involved by reason of the need to provide a public service or public utility to the project; in such cases, the single or limited purpose agency will, upon request, provide data concerning all aspects of its activities required to furnish service to the project to the agency drafting the EIR, and no separate EIR will be required in regard to such activities.

(c) Where more than one public agency equally meet the criteria set forth in paragraph (b) above, the agency which is to act first on the project in question shall be the Lead Agency (following the principle that the environmental impact should be assessed as early as possible in governmental planning).

(d) Where the provisions of subsections (a), (b), and (c) leave two or more public agencies with an equal claim to be the Lead Agency, the public agencies may by agreement designate which agency will be the Lead Agency.

History: 1. Amendment of subsection (a) and repealer and new subsection (d) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsection (d) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1)

15065.5. Designation of Lead Agency by Office of Planning and Research. (a) In the event that the designation of a lead agency is in dispute, the following criteria shall apply:

(1) Public agencies should consult with each other in an effort to resolve the dispute prior to submitting it to OPR.

(2) If an agreement cannot be reached, any public agency involved may submit the dispute to the OPR for resolution.

(b) Regulations adopted by OPR for resolving lead agency disputes may include the following:

(1) Submission of written statements to OPR and other disputing public agencies;

(2) Certification by OPR that a Lead Agency dispute exists;

(3) Publication of notice that a dispute has been submitted to OPR;

(4) Determination of the dispute on the basis of written statements or by a hearing.

(c) Designation of a Lead Agency by OPR shall be based on consideration of the criteria in Section 15065 as well as the capacity of the agency to adequately fulfill the requirements of CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing (Register 73, No. 50).

15066. Consultation. When more than one public agency will be involved in undertaking or approving a project, the Lead Agency shall consult with all responsible agencies (i.e., all the other public agencies involved in carrying out or approving the project) before completing a draft EIR or Negative Declaration. This early consultation is designed to insure that the EIR or Negative Declaration will reflect the concerns of all responsible agencies which will issue approvals for the project. After completing the draft EIR or Negative Declaration, the Lead Agency shall also consult with and seek to obtain comments from other public agencies having jurisdiction by law and should consult with persons having special expertise as described in Sections 15083 and 15085.

History: 1. Repealer and new section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15067. Subsequent EIR. Where an EIR has been prepared, no additional EIR need be prepared unless:

(a) Substantial changes are proposed in the project which will require major revisions of the EIR, due to the involvement of new environmental impacts not considered in a previous EIR on the project;

(b) There are substantial changes with respect to the circumstances under which the project is to be undertaken, such as a change in the proposed location of the project, which will require major revisions in the EIR due to the involvement of new environmental impacts not covered in a previous EIR.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15068. Use of a Single EIR. The Lead Agency may employ a single EIR to describe more than one project, if such projects are essentially the same in terms of environmental impact. Further, the Lead Agency may use an earlier EIR prepared in connection with an earlier project to apply to a later project, if the circumstances of the projects are essentially the same. Lead Agencies may elect to write EIRs in advance for entire programs or regulations, in order to be prepared for project applications to come. Whenever an agency chooses to utilize any of these alternatives, however, it must find that the environmental effects of the projects are similar enough to warrant the same treatment in an EIR and that the EIR will adequately cover the impacts of any single project. If these tests are not met, an agency should supplement the EIR it prepares for a program to apply it to an individual project.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15069. Multiple and Phased Projects. Where individual projects are, or a phased project is, to be undertaken and where the total undertaking comprises a project with significant environmental effect, the lead agency must prepare a single EIR for the ultimate project. Where an individual project is a necessary precedent for action on a larger project, or commits the Lead Agency to a larger project, with significant environmental effect, an EIR must address itself to the scope of the larger project. Where one project is one of several similar projects of a public agency, but is not deemed a part of a larger undertaking or a larger project, the agency may prepare one EIR for all projects, or one for each project, but should in either case comment upon the combined effect.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of compliance included (Register 73, No. 50).

15070. Ongoing Project. (a) A project as defined in Section 15037(a)(1) of these Guidelines, approved prior to November 23, 1970, shall require an Environmental Impact Report or a Negative Declaration if the project may have a significant effect on the environment, and either of the following conditions exists:

(1) A substantial portion of public funds allocated for the project have not been spent and it is still feasible to modify the project to mitigate potentially adverse environmental effects, or to choose feasible alternatives to the project, including the alternative of "no project" or halting the project; provided that this Section (1) shall not apply to projects which come under the jurisdiction of the National Environmental Policy Act (NEPA) and which, through regulations promulgated under NEPA, were held to be too far advanced at the time of NEPA's effective date to require an EIS in compliance with those regulations.

(2) A public agency proposes to modify the project in such a way that the project might have a new significant effect on the environment.

(b) A project as defined in Section 15037(a)(3) or in Section 15037(a)(2) as it relates to contracts, where the permit or other entitlement was issued, or the contract approved, prior to April 5, 1973, shall not require an EIR or Negative Declaration, subject to the following provisions:

(1) CEQA expressly does not prohibit a public agency from considering environmental factors in connection with the approval or disapproval of a project, or from imposing reasonable fees on the appropriate private person or entity for preparing an environmental report. Local agencies may require environmental reports for projects covered by this paragraph pursuant to local ordinances during this interim period.

(2) Where the issuance or approval occurred prior to December 5, 1972, and prior to said date the project was legally challenged for noncompliance with CEQA, the project shall be bound by special rules set forth in Section 21170 of CEQA.

(3) Where a project involving the issuance of a lease, permit, license, certificate or other entitlement to use has been granted a discretionary governmental approval for part of the project before April 5, 1973, and another or additional discretionary governmental approvals after April 5, 1973, the project shall require an EIR or Negative Declaration only if the approval or approvals after April 5, 1973, involve a greater degree of responsibility or control over the project as a whole than did the approval or approvals prior to that date.

(c) Any draft EIR which has been completed and sent out for public review on or before January 6, 1975, in compliance with procedures of a public agency consistent with CEQA and these Guidelines as amended in December 1973, shall be deemed to be in compliance with these Guidelines. No further EIR shall be required except as provided in Subsections (a) and (b).

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsection (c) filed 12-31-74 as an emergency, designated effective 1-7-75 (Register 75, No. 1).

15071. Emergency Projects. The following emergency projects are exempt from the requirements of CEQA, and no EIR is required.

(a) Projects undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish or replace property or facilities damaged or destroyed as a result of a disaster in a disaster stricken area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing with Section 8550) of Division 1, Title 2 of the Government Code.

(b) Emergency repairs to public service facilities necessary to maintain service.

(c) Projects undertaken as immediate action necessary to prevent or mitigate an emergency.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15072. Feasibility and Planning Studies. A project involving only feasibility or planning studies for possible future actions which the agency, board, or commission has not approved, adopted, or funded does not require the preparation of an environmental impact report but does require consideration of environmental factors as required by Section 21102 of CEQA.

15073. Ministerial Projects. Ministerial projects are exempt from the requirements of CEQA, and no environmental documents are required. The determination of what is "ministerial" can most appropriately be made by the particular public agency involved based upon its analysis of its own laws, and each public agency should make such determination either as a part of its implementing regulations or on a case-by-case basis. It is further anticipated that the following actions will, in most cases, be ministerial in nature.

(a) Issuance of building permits.
(b) Issuance of business licenses.
(c) Approval of final subdivision maps.
(d) Approval of individual utility service connections and disconnections.

In the absence of any discretionary provision contained in local ordinance, it shall be presumed that these four actions are ministerial. Each public agency may, in its implementing regulations or ordinances, provide an identification or itemization of its projects and actions which are deemed ministerial under the applicable laws and ordinances.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15074. Notice of Exemption. (a) When a public agency determines that a project is exempt from the requirements of CEQA because it is an emergency project, a ministerial project or categorically exempt, and the public agency approves or determines to carry out the project, it may file a notice of exemption. Such a notice shall include (1) a brief description of the project, (2) a finding that the project is exempt, including a citation to the State Guidelines section under which it is found to be exempt, and (3) a brief statement of reasons to support the findings.

(b) Whenever a public agency approves an applicant's project, it or the applicant may file a notice of exemption. The notice of exemption filed by an applicant shall contain the information required in subdivision (a) above, together with a certified document issued by the public agency stating that it has found the project to be exempt. This may be a certified copy of an existing document or record of the public agency.

(c) If the public agency is a state agency, the notice of exemption will be filed with the Secretary for Resources. A form for this notice is provided in Appendix E. Copies of all such notices shall be posted on a weekly basis at the Resources Building Information Desk, 1416 9th Street, Sacramento. Each such list will remain posted for 30 days.

(d) If the public agency is a local agency, the notice of exemption will be filed with the County Clerk of the county or counties in which the project will be located. Copies of all such notices will be available for public inspection and a list of such notices shall be posted on a weekly basis in the office of the county clerk. Each such list shall remain posted for a period of 30 days.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21108, 21152, 21167, Public Resources Code and Chap. 56 of Stats. 1974.

History: 1. New section filed 3-26-74 as an emergency; effective upon filing (Register 74, No. 13).
2. Certificate of Compliance filed 6-26-74 (Register 74, No. 26).

Article 7. Evaluating Projects

15080. Initial Study. If a project is not exempted by these Guidelines from the requirements of CEQA, the Lead Agency should conduct an initial study to determine if the project may have a significant effect on the environment. If any of the effects of a project may have a substantial adverse impact on the environment, regardless of whether the overall effect of the project is adverse or beneficial, then an environmental impact report must be prepared where discretionary governmental action is involved.

If the project is to be carried out by a nongovernmental person, the Lead Agency may require such person to submit data and information which will enable the agency to make this determination.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15081. Determining Significant Effect. (a) The determination of whether a project may have a significant effect on the environment calls for careful judgment on the part of the public agency involved, based to the extent possible on scientific and factual data. An iron clad definition of significant effect is not possible because the significance of an activity may vary with the setting. For example, an activity which may not be significant in an urban area may be significant in a rural area. There may be a difference of opinion on whether a particular effect should be considered adverse or beneficial, but where there is, or anticipated to be, a substantial body of opinion that considers or will consider the effect to be adverse, the lead agency should prepare an EIR to explore the environmental effects involved.

(b) In evaluating the significance of the environmental effect of a project, the Lead Agency shall consider both primary or direct and secondary or indirect consequences. Primary consequences are immediately related to the project (the construction of a new treatment plant may facilitate population growth in a particular area), while secondary consequences are related more to primary consequences than to the project itself (an impact upon the resource base, including land, air, water and energy use of the area in question may result from the population growth).

(c) Some examples of consequences which may have a significant effect on the environment in connection with most projects where they occur, include a change that:

(1) Is in conflict with environmental plans and goals that have been adopted by the community where the project is to be located;

(2) Has a substantial and demonstrable negative aesthetic effect;

(3) Substantially affects a rare or endangered species of animal or plant, or habitat of such a species;

(4) Causes substantial interference with the movement of any resident or migratory fish or wildlife species;

(5) Breaches any published national, state, or local standards relating to solid waste or litter control;

(6) Results in a substantial detrimental effect on air or water quality, or on ambient noise levels for adjoining areas;

(7) Involves the possibility of contaminating a public water supply system or adversely affecting ground water;

(8) Could cause substantial flooding, erosion or siltation;

(9) Could expose people or structures to major geologic hazards.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15082. Mandatory Findings of Significance. In every case where any of the following conditions are found to exist as a result of a project, the project shall be found to have impacts with a significant effect on the environment:

(a) Impacts which have the potential to degrade the quality of the environment or curtail the range of the environment.

(b) Impacts which achieve short-term, to the disadvantage of long-term, environmental goals. A short-term impact on the environment is one which occurs in a relatively brief, definitive period of time while long-term impacts will endure well into the future.

(c) Impacts for a project which are individually limited, but cumulatively considerable. A project may affect two or more separate resources where the impact on each resource is relatively small. If the effect of the total of those impacts on the environment is significant, an EIR must be prepared. This mandatory finding of significance does not apply to two or more separate projects where the impact of each is insignificant.

(d) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15083. Negative Declaration. (a) A Negative Declaration shall be prepared for a project which could potentially have a significant effect on the environment, but which the Lead Agency finds on the basis of an Initial Study will not have a significant effect on the environment. Before completing a Negative Declaration, the Lead Agency shall consult with all responsible agencies pursuant to Section 15066.

(b) A Negative Declaration must include a brief description of the project as proposed, a finding that the project will not have a significant effect on the environment, a brief statement of reasons to support the findings, and a statement indicating who prepared the initial study and where a copy of it may be obtained. The Negative Declaration should normally not exceed one page in length.

(c) The Negative Declaration shall be made available to the public with sufficient time before the project is approved to provide an opportunity for members of the public to respond to the finding.

(d) After making a decision to carry out or approve the project, the Lead Agency shall file a Notice of Determination with a copy of the Negative Declaration attached. The Notice of Determination shall include the decision of the agency to approve or disapprove the project, the determination of the agency whether the project will have a significant effect on the environment, and a statement that no EIR has been prepared pursuant to the provisions of CEQA.

(1) If the Lead Agency is a state agency, the Notice of Determination shall be filed with the Secretary for Resources.

(2) If the Lead Agency is a local agency, the Notice of Determination shall be filed with the county clerk of the county or counties in which the project will be located. If the project requires discretionary approvals from a state agency, the Notice of Determination also shall be filed with the Secretary for Resources.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsections (a) and (d) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1)

15084. Decision to Prepare an EIR. If the Lead Agency finds, after an initial study, that the project may have a significant effect on the environment, the Lead Agency must prepare or cause to be prepared an Environmental Impact Report.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15085. EIR Process. The following steps shall be followed after the Lead Agency decides to prepare an EIR.

(a) **Preparation of EIR.** If the project is to be carried out by a nongovernmental person, the Lead Agency may require such person to submit data and information necessary to enable the Lead Agency to prepare the EIR. This information may be transmitted in the form of a draft EIR. The draft EIR which is sent out for public review must reflect the independent judgment of the Lead Agency. Use of a draft EIR submitted by an applicant is discussed in Section 15061(b).

(b) **Early Consultation.** The content of an EIR is described in Arti- 9 of these Guidelines. Each element of an EIR must be covered, and se elements should be separated into distinct selections. Before com- ting a draft EIR consisting of the information specified in Section 41, 15142, and 15143 of these Guidelines, the Lead Agency shall sult with all Responsible Agencies pursuant to Section 15066. In dition, the Lead Agency at this point should also consult directly with y person or organization it believes will be concerned with the envi- nmental effects of the project. Many public agencies have found that rly consultation solves many potential problems that would arise in ore serious form later in the review process.

(c) **Notice of Completion.** As soon as the draft EIR is completed, notice of completion must be filed with the Secretary for the Re- urces Agency. The notice shall include a brief description of the roject, its proposed location, and an address where copies of the EIR re available and the period during which comments will be received. form for this notice is provided in the Appendices. The Notice of ompletion will provide the basis for information published by the ecretary for Resources in an EIR Monitor. Where the EIR will be eviewed through the State review process handled by the State Clear- nghouse, the cover form required by the State Clearinghouse will serve s the Notice of Completion, and no Notice of Completion need be sent o the Resources Agency.

(d) **Public Review.** After completing a draft EIR, the Lead Agency hall consult with and obtain comments from public agencies having isdiction by law with respect to the project and should consult with ersons having special expertise with respect to any environmental mpact involved. Opportunity for comments from the general public hould be provided.

(1) Public agencies should use existing state, regional, or local clearinghouses to distribute EIR's and other environmental docu- ments to appropriate agencies.

(2) To make copies of EIR's available to the public, Lead Agencies should furnish copies of draft EIR's to appropriate public library systems.

(3) Public agencies should compile listings of other agencies, par- ticularly local agencies, which have jurisdiction by law and/or special expertise with respect to various projects and project locations. Such listings should be a guide in determining which agencies should be consulted with regard to a particular project.

(4) Public hearings may be conducted on the environmental docu- ments, either in separate proceedings or in conjunction with other proceedings of the public agency.

(e) **Evaluation by Lead Agency.** The Lead Agency shall evaluate omments received from persons who reviewed the draft EIR.

(f) **Preparation of Final EIR.** The Lead Agency shall prepare a nal EIR. The contents of a final EIR are specified in Section 15146 of ese Guidelines.

(g) **Certification of Final EIR.** The final EIR shall be presented to the decision-making body of the Lead Agency. The Lead Agency shall certify that the final EIR has been completed in compliance with CEQA and the state guidelines and that the decision-making body or administrative official having final approval authority over the project has reviewed and considered the information contained in the EIR.

(h) **Notice of Determination.** After making a decision on the project, the Lead Agency shall file a Notice of Determination. Such notice shall include (1) the decision of the agency to approve or disapprove the project, (2) the determination of the agency whether the project will or will not have a significant effect on the environment, and (3) a statement that an EIR has been prepared pursuant to the provisions of CEQA.

(1) If the Lead Agency is a state agency, the Notice of Determination shall be filed with the Secretary for Resources.

(2) If the Lead Agency is a local agency, the Notice of Determination shall be filed with the county clerk of the county or counties in which the project would be located. If the project requires discretionary approval from a state agency, the notice shall also be filed with the Secretary for Resources.

(i) **Filing of Final EIR.** If the Lead Agency is a state agency, a copy of the final EIR shall be filed with the appropriate planning agency of any city, county, or city and county which will be affected by the project.

(j) **Use of Final EIR by Responsible Agencies.** Each responsible agency shall consider the Lead Agency's final EIR before acting upon or approving the project pursuant to Section 15064.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15086. EIR Combined with Existing Planning and Review Process. The EIR process should be combined with the existing planning, review, and project approval process being used by each public agency. The Lead Agency shall include the EIR as a part of the regular project report which is used in the existing review and budgetary process.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15087. Additional Notices. In their implementing procedures, public agencies may provide for the filing of notices in addition to the notices required or authorized by these Guidelines.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15088. Statement of Overriding Considerations. If a public agency decides to approve a project for which serious adverse environmental consequences have been identified in an EIR, the agency may wish to make a statement identifying the other interests that warrant approval in its point of view. If such a statement is made, it should be included in the record of the project approval and may be attached to the Notice of Determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

Article 8. Categorical Exemptions

15100. Categorical Exemptions. Section 21084 of the Public Resources Code requires these Guidelines to include a list of classes of projects which have been determined not to have a significant effect on the environment and which shall, therefore, be exempt from the provisions of the Environmental Quality Act of 1970.

In response to that mandate, the Secretary for Resources has found that the following classes of projects listed in this article do not have a significant effect on the environment and they are declared to be categorically exempt from the requirement for the preparation of environmental documents.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15100.1. Relation to Ministerial Projects. Section 21080 of the Public Resources Code exempts from the application of CEQA those projects over which public agencies exercise only ministerial authority. Since ministerial projects are exempt under Section 15073 of these guidelines, Categorical Exemptions should be applied only where a project is not ministerial under a public agency's statutes and ordinances. The inclusion of activities which may be ministerial within the classes and examples contained in this article shall not be construed as a finding by the Secretary for Resources that such an activity is discretionary.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15100.2. Exceptions. (a) **Location.** Classes 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located—a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. Therefore, these classes are considered to apply in all instances, except where the project may impact on an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state or local agencies.

(b) **Cumulative Impact.** All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant—for example, annual additions to an existing building under Class 1.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15100.3. Revisions to List of Categorical Exemptions. Any public agency may, at any time, request that a new class of Categorical Exemptions be added, or an existing one amended or deleted. This request must be made in writing to the Office of Planning and Research and shall contain detailed information to support the request. The granting of such request shall be by amendment to these guidelines.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15100.4. Application by Public Agencies. Each public agency shall, in the course of establishing its own procedures, list those specific activities which fall within each of the exempt classes, subject to the qualification that these lists must be consistent with both the letter and the intent expressed in the classes. Public agencies may omit from their implementing procedures classes and examples that do not apply to their activities, but they may not require EIR's for projects described in the classes and examples in this article except under the provisions of Section 15100.2.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15101. Class 1: Existing Facilities. Class 1 consists of the operation, repair, maintenance or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that previously existing, including but not limited to:

(a) Interior or exterior alterations involving such things as interior partitions, plumbing, and electrical conveyances;

(b) Existing facilities of both investor and publicly owned utilities used to provide electric power, natural gas, sewerage, or other public utility services;

(c) Existing highways and streets, sidewalks, gutters, bicycle and pedestrian trails, and similar facilities;

(d) Restoration, or rehabilitation of deteriorated or damaged structures, facilities or mechanical equipment to meet current standards of public health and safety, unless it is determined that the damage was substantial and resulted from an environmental hazard such as earthquake, landslide or flood;

(e) Additions to existing structures provided that the addition will not result in an increase of more than 50 percent of the floor area of the structures before the addition or 2500 square feet, whichever is less;

(f) Addition of safety or health protection devices for use during construction of or in conjunction with existing structures, facilities or mechanical equipment, or topographical features including navigational devices;

(g) New copy on existing on and off-premise signs;

(h) Maintenance of existing landscaping, native growth and water supply reservoirs (excluding the use of economic poisons, as defined in Division 7, Chapter 2, California Agricultural Code);

(i) Maintenance of fish screens, fish ladders, wildlife habitat areas, artificial wildlife waterway devices, streamflows, springs and waterholes, and stream channels (clearing of debris) to protect fish and wildlife resources;

(j) Fish stocking by the California Department of Fish and Game;

(k) Division of existing multiple family rental units into condominiums;

(*l*) Demolition and removal of buildings and related structures except where they are of historical, archaeological or architectural significance as officially designated by Federal, State or local governmental action.

History: 1. Amendment of subsections (b), (e), (f) and (*l*) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

2. Amendment of subsection (c) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15102. Class 2: Replacement or Reconstruction. Class 2 consists of replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced, including but not limited to:

(a) Replacement or reconstruction of existing schools and hospitals to provide earthquake resistant structures which do not increase capacity more than 50%;

(b) Replacement of a commercial structure with a new structure of substantially the same size and purpose.

15103. Class 3: New Construction of Small Structures. Class 3 consists of construction and location of single, new, small facilities or structures and installation of small new equipment and facilities including but not limited to:

(a) Single family residences not in conjunction with the building of two or more such units;

(b) Motels, apartments, and duplexes designed for not more than four dwelling units if not in conjunction with the building of two or more such structures;

(c) Stores, offices, and restaurants if designed for an occupant load of 20 persons of less, if not in conjunction with the building of two or more such structures;

(d) Water main, sewage, electrical, gas and other utility extensions of reasonable length to serve such construction;

(e) Accessory (appurtenant) structures including garages, carports, patios, swimming pools and fences.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15104. Class 4: Minor Alterations to Land. Class 4 consists of minor public or private alterations in the condition of land, water and/or vegetation which do not involve removal of mature, scenic trees except for foresty and agricultural purposes. Examples include but are not limited to:

(a) Grading on land with a slope of less than 10 percent, except where it is to be located in a waterway, in any wetland, in an officially designated (by Federal, State or local governmental action) scenic area, or in officially mapped areas of severe geologic hazard.

(b) New gardening or landscaping.

(c) Filling of earth into previously excavated land with material compatible with the natural features of the site.

(d) Minor alterations in land, water and vegetation on existing officially designated wildlife management areas or fish production facilities which result in improvement of habitat for fish and wildlife resources or greater fish production;

(e) Minor temporary uses of land having negligible or no permanent effects on the environment, including carnivals, sales of Christmas trees, etc.

(f) Minor trenching and backfilling where the surface is restored.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15105. Class 5: Alterations in Land Use Limitations. Class 5 consists of minor alterations in land use limitations, except zoning, including but not limited to:

(a) Minor lot line adjustments, side yard and set back variances not resulting in the creation of any new parcel nor in any change in land use or density;

(b) Issuance of minor encroachment permits.

15106. Class 6: Information Collection. Class 6 consists of basic data collection, research, experimental management and resource evaluation activities which do not result in a serious or major disturbance to an environmental resource. These may be for strictly information gathering purposes, or as part of a study leading to an action which a public agency has not yet approved, adopted or funded.

15107. Class 7: Actions by Regulatory Agencies for Protection of Natural Resources. Class 7 consists of actions taken by regulatory agencies as authorized by state law or local ordinance to assure the maintenance, restoration, or enhancement of a natural resource where the regulatory process involves procedures for protection of the environment. Examples include but are not limited to wildlife preservation activities of the State Department of Fish and Game. Construction activities are not included in this exemption.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15108. Class 8: Actions by Regulatory Agencies for Protection of the Environment. Class 8 consists of actions taken by regulatory agencies, as authorized by state or local ordinance, to assure the maintenance, restoration, enhancement, or protection of the environment where the regulatory process involves procedures for protection of the environment. Construction activities are not included in this exemption.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15109. Class 9: Inspections. Class 9 consists of activities limited entirely to inspection, to check for performance of an operation, or quality, health or safety of a project, including related activities such as inspection for possible mislabeling, misrepresentation or adulteration of products.

15110. Class 10: Loans. Class 10 consists of loans made by the Department of Veterans Affairs under the Veterans Farm and Home Purchase Act of 1943, mortgages for the purchase of existing structures where the loan will not be used for new construction and the purchase of such mortgages by financial institutions. Class 10 includes but is not limited to the following examples:

(a) Loans made by the Department of Veterans Affairs under the Veterans Farm and Home Purchase Act of 1943.

(b) Purchases of mortgages from banks and mortgage companies by the Public Employees Retirement System and by the State Teachers Retirement System.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15111. Class 11: Accessory Structures. Class 11 consists of construction, or placement of minor structures accessory to (appurtenant to) existing commercial, industrial, or institutional facilities, including but not limited to:

(a) On-premise signs;

(b) Small parking lots.

15112. Class 12: Surplus Government Property Sales. Class 12 consists of sales of surplus government property except for parcels of land located in an area of statewide interest or potential area of critical concern as identified in the Governor's Environmental Goals and Policy Report prepared pursuant to Government Code Section 65041 *et seq.*

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15113. Class 13: Acquisition of Lands for Wildlife Conservation Purposes. Class 13 consists of the acquisition of lands for fish and wildlife conservation purposes including preservation of fish and wildlife habitat, establishing ecological reserves under Fish and Game Code Section 1580, and preserving access to public lands and waters where the purpose of the acquisition is to preserve the land in its natural condition.

History: 1. Repealer and new section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15114. Class 14: Minor Additions to Schools. Class 14 consists of minor additions to existing schools within existing school grounds where the addition does not increase original student capacity by more than 25% or five classrooms, whichever is less. The addition of portable classrooms is included in this exemption.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Repealer and new section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15115. Revisions to List of Categorical Exemptions.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Repealer filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15116. Application by Public Agencies.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Repealer filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

Article 9. Contents of Environmental Impact Reports

15140. General. Environmental impact reports shall contain the information outlined in this article.

15141. Description of Project. The description of the project shall contain the following information but should not supply extensive detail beyond that needed for evaluation and review of the environmental impact.

(a) The precise location and boundaries of the proposed project shall be shown on a detailed map, preferably topographic. The location of the project shall also appear on a regional map.

(b) A statement of the objectives sought by the proposed project.

(c) A general description of the project's technical, economic, and environmental characteristics, considering the principal engineering proposals and supporting public service facilities.

History: 1. Amendment of subsection (c) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15142. Description of Environmental Setting. An EIR must include a description of the environment in the vicinity of the project, as it exists before commencement of the project, from both a local and regional perspective. Knowledge of the regional setting is critical to the assessment of environmental impacts. Special emphasis should be placed on environmental resources that are rare or unique to that region. Specific reference to related projects, both public and private, both existent and planned, in the region should also be included, for purposes of examining the possible cumulative impact of such projects.

15143. Environmental Impact. All phases of a project must be considered when evaluating its impact on the environment: planning, acquisition, development and operation. The following subjects shall be discussed, preferably in separate sections or paragraphs. If they are not discussed separately, the EIR shall include a table showing where each of the subjects is discussed.

(a) **The Environmental Impact of the Proposed Action:** Describe the direct and indirect impacts of the project on the environment, giving due consideration to both the short-term and long-term effects. It should include specifics of the area, the resources involved, physical changes, alterations to ecological systems and changes induced in population distribution, population concentration, the human use of the land (including commercial and residential development) and other aspects of the resource base such as water, scenic quality and public services.

(b) **Any Adverse Environmental Effects Which Cannot Be Avoided if the Proposal is Implemented:** Describe any adverse impacts, including those which can be reduced to an insignificant level but not eliminated. Where there are impacts that cannot be alleviated without imposing an alternative design, their implications and the reasons why the project is being proposed, notwithstanding their effect, should be described. Describe impacts on any aesthetically valuable surroundings, or on human health.

(c) **Mitigation Measures Proposed to Minimize the Impact:** Describe avoidable adverse impacts, including inefficient and unnecessary consumption of energy, and the measures proposed to minimize these impacts. This discussion shall include an identification of the acceptable levels to which such impacts will be reduced, and the basis upon which such levels were identified. Where alternative measures are available to mitigate an impact, each should be discussed and the basis for selecting one alternative should be identified. Energy conservation measures, as well as other appropriate mitigation measures, shall be discussed. Examples of energy conservation measures are provided in Appendix F.

(d) **Alternatives to the Proposed Action:** Describe reasonable alternatives to the project, or to the location of the project, which could feasibly attain the basic objectives of the project, and why they were rejected in favor of the ultimate choice. The specific alternative of "no project" must also always be evaluated, along with the impact. Describe alternatives capable of substantially reducing or eliminating any environmentally adverse impacts, even if these alternatives substantially impede the attainment of the project objectives, and are more costly.

(e) **The Relationship Between Local Short-Term Uses of Man's Environment and the Maintenance and Enhancement of Long-Term Productivity:** Describe the cumulative and long-term effects of the proposed project which adversely affect the state of the environment. Special attention should be given to impacts which narrow the range of beneficial uses of the environment or pose long-term risks to health or safety. In addition, the reasons why the proposed project is believed by the sponsor to be justified now, rather than reserving an option for further alternatives, should be explained.

(f) **Any Irreversible Environmental Changes Which Would Be Involved in the Proposed Action Should It Be Implemented:** Uses of nonrenewable resources during the initial and continued phases of the project may be irreversible since a large commitment of such resources makes removal or nonuse thereafter unlikely. Primary impacts and, particularly, secondary impacts (such as a highway improvement which provides access to a nonaccessible area) generally commit future generations to similar uses. Also irreversible damage can result from environmental accidents associated with the project. Irretrievable commitments of resources should be evaluated to assure that such current consumption is justified.

(g) **The Growth-Inducing Impact of the Proposed Action:** Discuss the ways in which the proposed project could foster economic or population growth, either directly or indirectly, in the surrounding environment. Included in this are projects which would remove obstacles to population growth (a major expansion of a waste water treatment plant might, for example, allow for more construction in service areas). Increases in the population may further tax existing community service facilities so consideration must be given to this impact. Also discuss the characteristic of some projects which may encourage and facilitate other activities that could significantly affect the environment, either individually or cumulatively. It must not be assumed that growth in any area is necessarily beneficial, detrimental, or of little significance to the environment.

History: 1. Amendment filed 12-31-74 as an emergency; designated effective 1-7-75 (Register 75, No. 1).

15144. Organizations and Persons Consulted. The identity of all federal, state or local agencies, other organizations and private individuals consulted in preparing the EIR, and the identity of the persons, firm or agency preparing the EIR, by contract or other authorization must be given.

15145. Water Quality Aspects. Describe in the environmental setting section, and other sections where applicable, water quality aspects of the proposed project which have been previously certified by the appropriate state or interstate organization as being in substantial compliance with applicable water quality standards.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15146. Contents of Final Environmental Impact Report. (a) The Final EIR shall consist of:

(1) The Draft EIR or a revision of the draft.

(2) Comments and recommendations received on the Draft EIR either verbatim or in summary.

(3) A list of persons, organizations and public agencies commenting on the Draft EIR.

(4) The responses of the Lead Agency to significant environmental points raised in the review and consultation process.

(b) The response of the Lead Agency to comments received may take the form of a revision of the Draft EIR or may be an attachment to the Draft EIR. The response shall describe the disposition of significant environmental issues raised (e.g., revisions to the proposed project to mitigate anticipated impacts or objections). In particular the major issues raised when the Lead Agency's position is at variance with recommendations and objections raised in the comments must be addressed in detail giving reasons why specific comments and suggestions were not accepted, and factors of overriding importance warranting an override of the suggestions.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing (Register 73, No. 50)
2. Amendment of subsection (a) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15147. Degree of Specificity. The degree of specificity required in an EIR will correspond to the degree of specificity involved in the underlying activity which is described in the EIR.

(a) An EIR on a construction project will necessarily be more detailed in the specific effects of the project than will be an EIR on the adoption of a local general plan or comprehensive zoning ordinance because the effects of the construction can be predicted with greater accuracy.

(b) An EIR on projects such as the adoption or amendment of a comprehensive zoning ordinance or a local general plan should focus on the secondary effects that can be expected to follow from the adoption, but the EIR need not be as detailed as an EIR on the specific construction projects that might follow.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Renumbering and amendment of subsection (c) to Section 15148 filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15148. EIR as Part of General Plan. The requirements for an EIR on a local general plan, element or amendment thereof will be satisfied by the general plan or element document, and no separate EIR will be required, if: (1) the general plan addresses all the points required to be in an EIR by Article 9 of these Guidelines and (2) the document contains a special section or a cover sheet identifying where the general plan document addresses each of the points required.

History: 1. New Section 15148 filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

Article 10. Evaluation of Environmental Impact Reports

15160. Adequate Time for Review and Comment. The lead agency should provide adequate time for other public agencies and members of the public to review and comment on an EIR that it has prepared.

(a) Public agencies may establish time periods for review in their implementing procedures and shall notify the public and others described in Sections 15085 (b) and (d) of these Guidelines of the time for receipt of comments on EIR's.

(b) In setting time periods for review, public agencies shall give consideration to their obligation to obtain comments from public agencies having jurisdiction by law with respect to the project and to the policy favoring public participation.

(c) In order to provide sufficient time for public review, review periods for draft EIRs should not be less than 30 days nor longer than 90 days except in unusual situations. While state and local agencies are not bound by federal guidelines for implementing the National Environmental Policy Act, the time limits in the federal guidelines provide an example that may be followed in some situations. The federal guidelines require at least 45 days for review of a draft EIS and at least 30 days for review of a final EIS, but not less than 90 days in total. Review periods of this length may be desirable for some large projects under CEQA, but shorter periods may be provided where the shorter period will still allow adequate review.

(d) A review period for an EIR does not require a halt in other planning activities related to a project. Planning should continue in conjunction with environmental evaluation.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing Certificate of Compliance included. (Register 73, No. 50).
2. Amendment of subsections (a) and (c) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15161. Review of Environmental Impact Reports. (a) Public agencies must develop procedures for reviewing EIR's which Lead Agencies submit to them for comments.

(b) Cities and counties should compile listings of other agencies, particularly local agencies, which have jurisdiction by law and/or special expertise with respect to various projects and project locations. Such listings should be a guide in determining which agencies should be consulted with regard to a particular project.

(c) Reviewers should focus on the sufficiency of the EIR in discussing possible impacts upon the environment, ways in which adverse effects might be minimized, and alternatives to the project, in light of the intent of the act to provide decision-makers with useful information about such factors.

(d) Upon completion of reviewing an EIR, it is suggested that reviewing agencies supply the Lead Agency with the name of a contact person who is available for later consultation should this prove necessary.

History: 1. Amendment of subsections (a) and (b) and new subsection (e) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsections (a), (b), and (d), and repealer of subsection (e) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15161.5. Review by State Agencies. (a) EIR's and Negative Declarations to be reviewed by state agencies shall be submitted to the State Clearinghouse, 1400 Tenth Street, Sacramento, California 95814.

(b) The following environmental documents shall be submitted to the State Clearinghouse for review by state agencies:

(1) Draft EIR's and Negative Declarations prepared by a state agency where such agency is a Lead Agency.

(2) Draft EIR's and Negative Declarations prepared by a public agency where a state agency is a Responsible Agency or otherwise has jurisdiction by law with respect to the project.

(3) Draft EIS's and Negative Declarations prepared pursuant to NEPA, the Federal Guidelines (Title 40 CFR, Part 1500, commencing with Section 1500.1) and Parts I and II of Office of Management and Budget Circular A-95.

(c) Public agencies may send environmental documents to the State Clearinghouse for review where a state agency has special expertise with regard to the environmental impacts involved.

(d) When an EIR is submitted to the State Clearinghouse, the review period set by the Lead Agency shall be at least as long as the period provided in the state review system operated by the State Clearinghouse. In exceptional circumstances, The State Clearinghouse may set shorter review periods when requested by the Lead Agency.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15162. Failure to Comment. If any public agency or person who is consulted with regard to an EIR fails to comment within a reasonable time as specified by the Lead Agency, it shall be assumed, absent a request for a specific extension of time, that such agency or person has no comment to make.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15163. Requests for Environmental Documents. (a) The Lead Agency, after preparing an EIR or other environmental document described in these Guidelines, is responsible for making such documents available to the public for inspection. Members of the general public requesting copies of the EIR may be charged for the actual cost of reproducing that copy.

(b) The Lead Agency should file draft EIR's in appropriate public library systems in order to improve public access to the draft EIR.

History: 1. Amendment and new subsection (b) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15164. Public Participation. While the Environmental Quality Act of 1970 does not require formal public hearings at any stage of the environmental review procedure, it is a widely accepted desirable goal of this process to encourage public participation. All public agencies adopting implementing procedures in response to these Guidelines should make provisions in their procedures for wide public involvement, formal and informal, consistent with their existing activities and procedures, in order to properly receive and evaluate public reactions, adverse and favorable, based on environmental issues.

15014. Applicability. (a) These Guidelines have only general application to the diversity of projects undertaken or approved by public agencies. They provide basic principles, objectives, criteria and definitions which individual public agencies shall adapt for internal use, interpreting these Guidelines in terms of specific projects.

(b) Until April 1, 1975, the objectives, criteria, and procedures adopted by public agencies in compliance with CEQA and these Guidelines may continue to govern the evaluation of projects and the preparation of environmental documents without being brought into conformity with the amendments to these Guidelines adopted by the Secretary for Resources in December, 1974. However, the amendment to Section 15143(c) dealing with mitigation measures, must be complied with effective January 7, 1975, regardless of whether its provisions have been included in the procedures being used by a public agency.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsection (b) filed 1-18-74 as an emergency; effective upon filing (Register 74, No. 3).
3. Amendment of subsection (b) filed 1-25-74 as an emergency; effective immediately upon filing. Certificate of Compliance included (Register 74, No. 4).
4. Amendment filed 12-31-74 as an emergency; designated effective 1-7-75 (Register 75, No. 1).

15015. Terminology. The following words are used to indicate whether a particular subject in the Guidelines is mandatory, advisory, or permissive:

(a) "Must" or "shall" identifies a mandatory element which all public agencies are required to follow.

(b) "Should" identifies guidance provided by the Secretary for Resources based on policy considerations contained in CEQA, in the legislative history of the statute, or in federal court decisions which California courts can be expected to follow. Public agencies are advised to follow this guidance in the absence of compelling, countervailing considerations.

(c) "May" identifies a permissive element which is left fully to the discretion of the public agencies involved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

Article 4. Definitions

15020. General. Whenever the following words are used in these Guidelines, unless otherwise defined, they shall have the meaning ascribed to them in this article. These definitions are intended to clarify but not to replace or negate the definitions used in CEQA.

15020.5. Applicant. Applicant means a person who proposes to carry out a project which needs a lease, permit, license, certificate, or other entitlement to use or financial assistance from one or more public agencies when that person applies for the governmental approval or assistance.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15021. Approval. Approval means the decision by a public agency which commits the agency to a definite course of action in regard to a project intended to be carried out by any person. The exact date of approval of any project is a matter determined by each public agency according to its rules, regulations, and ordinances. Legislative action in regard to a project often constitutes approval.

In connection with private activities, approval occurs upon the earliest commitment to issue or the issuance by the public agency of a discretionary contract, grant, subsidy, loan, or other form of financial assistance, lease, permit, license, certificate, or other entitlement for use of the project.

15022. CEQA—California Environmental Quality Act. California Environmental Quality Act (CEQA) means California Public Resources Code Sections 21000 et seq.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15023. Categorical Exemption. Categorical Exemption means an exception from the requirements of CEQA for a class of projects based on a finding by the Secretary for Resources that the class of projects does not have a significant effect on the environment.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15024. Discretionary Project. Discretionary project means an activity defined as a project which requires the exercise of judgment, deliberation, or decision on the part of the public agency or body in the process of approving or disapproving a particular activity, as distinguished from situations where the public agency or body merely has to determine whether there has been conformity with applicable statutes, ordinances, or regulations. A timber harvesting plan submitted to the State Forester for approval under the requirements of the Z'berg-Nejedly Forest Practice Act of 1973 (Pub. Res. Code § 4511 et seq.) constitutes a discretionary project within the meaning of the California Environmental Quality Act. § 21065(c).

History: 1. Amendment filed 1-30-75 as an emergency; effective upon filing (Register 75, No. 5).

15025. Emergency. Emergency means a sudden, unexpected occurrence demanding immediate action to prevent or mitigate loss or damage to life, health, property, or essential public services.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15026. Environment. Environment means the physical conditions which exist within the area which will be affected by a proposed project including land, air, water, minerals, flora, fauna, ambient noise, objects of historic or aesthetic significance.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

(c) Public agencies shall adopt objectives, criteria, and specific procedures consistent with CEQA and these Guidelines for the orderly evaluation of projects and the preparation of environmental documents. These implementing procedures should contain at least the following provisions:

(1) Procedures for identifying the activities that are exempt from CEQA. These procedures should contain:

(A) Provisions for evaluating a proposed activity to determine if there is no possibility that the activity may have a significant effect on the environment.

(B) A list of projects over which the public agency has only ministerial authority.

(C) A list of specific activities which the public agency has found to be categorically exempt pursuant to Section 15100.4.

(2) Procedures for the conduct of initial studies.

(3) Provisions for the preparation of Negative Declarations.

(4) Provisions for the preparation of EIR's.

(5) Provisions for consulting with and obtaining comments from other public agencies and members of the public with regard to the environmental effects of projects.

(6) Provisions assuring adequate opportunity and time for the public review and comment on the Draft EIR or Negative Declaration.

(7) Provisions for evaluating and responding to comments received on environmental documents.

(8) Provisions for the review and consideration of environmental documents by the person or decision-making body who will approve or disapprove a project.

(9) Provisions for filing documents required or authorized by CEQA and these Guidelines.

(10) Provisions to ensure that Lead Agencies obtain adequate comments on environmental documents which they submit to the public agency for review.

(11) The assignment of responsibility for specific functions to specific units of the public agency.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15051. Office of Planning and Research (OPR). OPR is responsible for the preparation and development of principles, objectives, criteria and definitions to implement the CEQA, prior to adoption by the Secretary for Resources. OPR also, as part of guideline development, shall consider proposals for Categorical Exemption and makes appropriate recommendations to the Secretary for Resources. OPR shall be responsible for resolving disputes over Lead Agency designation.

15052. The Secretary for Resources. The Guidelines shall be officially adopted by the Secretary for Resources, including a finding that each class of projects given a Categorical Exemption will not have a significant effect on the environment. The Secretary also has the responsibility for consolidating all state comments on federally sponsored projects. The Secretary for Resources may issue amendments to these Guidelines.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15053. Fees. (a) All Lead Agencies preparing EIRs or Negative Declarations for projects to be carried out by any person other than the Lead Agency itself may charge and collect a reasonable fee from such person or entity, in order to recover the estimated costs incurred in preparing the EIR or Negative Declaration.

(b) Public agencies may charge and collect a reasonable fee from members of the public for a copy of an environmental document not to exceed the actual cost of reproducing a copy.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15054. Timely Compliance. Public agencies should carry out their responsibilities for preparing and reviewing EIRs within a reasonable period of time. The requirement for the preparation of an EIR should not cause undue delays in the processing of applications for permits or other entitlements to use.

15054.1 Projects Received for Filing. In those cases where a public agency under its enabling legislation or officer (such as the State Forester) ordinarily must act upon a proposed project as defined by Section 21065(c) of CEQA within a certain specified period of time of 30 days or less from the date of receipt of such application or such project otherwise becomes automatically approved by operation of law, the application shall not be deemed received for filing until such time as any environmental documentation required under CEQA has been completed.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21174, Public Resources Code.

History: 1. New section filed 1-30-75 as an emergency; effective upon filing (Register 75, No. 5).

Article 6. Application of the Act to Projects

15060. General Rule. The requirements set forth in these Guidelines apply to projects which may have a significant effect on the environment and which involve discretionary governmental action. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not covered by the requirements set forth in CEQA, and these Guidelines concerning the evaluation of projects and the preparation and review of environmental documents do not apply.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15061. Projects Controlled by State or Local Agencies. (a) When a public agency plans to carry out or approve a project which may have a significant effect on the environment, the Lead Agency shall prepare environmental documents through its own efforts or by contract unless the project is otherwise exempted by these Guidelines.

(b) Whenever a public agency approves an applicant's project, it or the applicant may file a notice of exemption. The notice of exemption filed by an applicant shall contain the information required in subdivision (a) above, together with a certified document issued by the public agency stating that it has found the project to be exempt. This may be a certified copy of an existing document or record of the public agency.

(c) If the public agency is a state agency, the notice of exemption will be filed with the Secretary for Resources. A form for this notice is provided in Appendix E. Copies of all such notices shall be posted on a weekly basis at the Resources Building Information Desk, 1416 9th Street, Sacramento. Each such list will remain posted for 30 days.

(d) If the public agency is a local agency, the notice of exemption will be filed with the County Clerk of the county or counties in which the project will be located. Copies of all such notices will be available for public inspection and a list of such notices shall be posted on a weekly basis in the office of the county clerk. Each such list shall remain posted for a period of 30 days.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21108, 21152, 21167, Public Resources Code and Chap. 56 of Stats. 1974.

History: 1. New section filed 3-26-74 as an emergency; effective upon filing (Register 74, No. 13).
2. Certificate of Compliance filed 6-26-74 (Register 74, No. 26).

Article 7. Evaluating Projects

15080. Initial Study. If a project is not exempted by these Guidelines from the requirements of CEQA, the Lead Agency should conduct an initial study to determine if the project may have a significant effect on the environment. If any of the effects of a project may have a substantial adverse impact on the environment, regardless of whether the overall effect of the project is adverse or beneficial, then an environmental impact report must be prepared where discretionary governmental action is involved.

If the project is to be carried out by a nongovernmental person, the Lead Agency may require such person to submit data and information which will enable the agency to make this determination.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15081. Determining Significant Effect. (a) The determination of whether a project may have a significant effect on the environment calls for careful judgment on the part of the public agency involved, based to the extent possible on scientific and factual data. An iron clad definition of significant effect is not possible because the significance of an activity may vary with the setting. For example, an activity which may not be significant in an urban area may be significant in a rural area. There may be a difference of opinion on whether a particular effect should be considered adverse or beneficial, but where there is, or anticipated to be, a substantial body of opinion that considers or will consider the effect to be adverse, the lead agency should prepare an EIR to explore the environmental effects involved.

(b) In evaluating the significance of the environmental effect of a project, the Lead Agency shall consider both primary or direct and secondary or indirect consequences. Primary consequences are immediately related to the project (the construction of a new treatment plant may facilitate population growth in a particular area), while secondary consequences are related more to primary consequences than to the project itself (an impact upon the resource base, including land, air, water and energy use of the area in question may result from the population growth).

(c) Some examples of consequences which may have a significant effect on the environment in connection with most projects where they occur, include a change that:

(1) Is in conflict with environmental plans and goals that have been adopted by the community where the project is to be located;

(2) Has a substantial and demonstrable negative aesthetic effect;

(3) Substantially affects a rare or endangered species of animal or plant, or habitat of such a species;

(4) Causes substantial interference with the movement of any resident or migratory fish or wildlife species;

(5) Breaches any published national, state, or local standards relating to solid waste or litter control;

(6) Results in a substantial detrimental effect on air or water quality, or on ambient noise levels for adjoining areas;

(7) Involves the possibility of contaminating a public water supply system or adversely affecting ground water;

(8) Could cause substantial flooding, erosion or siltation;

(9) Could expose people or structures to major geologic hazards.

(10) Involves timber operations wherein the degree of potential for soil erosion or water quality degradation or the amount of acreage involved is substantial; or where the operation is adjacent to, or affects an area of special or unique importance such as a park, public reserve or wildlife refuge; the habitat of a rare or endangered plant or animal species or site of archaeological, paleontological, or historical resource; or a wild or scenic river or scenic highway; or any other area of special concern or treatment; or where the operation if approved, is likely to be a highly controversial one.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

2. New subsection (c) (10) filed 1-30-75 as an emergency; effective upon filing (Register 75, No. 5).

15082. Mandatory Findings of Significance. In every case where any of the following conditions are found to exist as a result of a project, the project shall be found to have impacts with a significant effect on the environment:

(a) Impacts which have the potential to degrade the quality of the environment or curtail the range of the environment.

(b) Impacts which achieve short-term, to the disadvantage of long-term, environmental goals. A short-term impact on the environment is one which occurs in a relatively brief, definitive period of time while long-term impacts will endure well into the future.

(c) Impacts for a project which are individually limited, but cumulatively considerable. A project may affect two or more separate resources where the impact on each resource is relatively small. If the effect of the total of those impacts on the environment is significant, an EIR must be prepared. This mandatory finding of significance does not apply to two or more separate projects where the impact of each is insignificant.

(d) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

Title 14, CCR, Register 75-18

§ 15014

§ 15070

§ 15074

15014. Applicability. (a) These Guidelines have only general application to the diversity of projects undertaken or approved by public agencies. They provide basic principles, objectives, criteria and definitions which individual public agencies shall adapt for internal use, interpreting these Guidelines in terms of specific projects.

(b) Until April 1, 1975, the objectives, criteria, and procedures adopted by public agencies in compliance with CEQA and these Guidelines may continue to govern the evaluation of projects and the preparation of environmental documents without being brought into conformity with the amendments to these Guidelines adopted by the Secretary for Resources in December, 1974. However, the amendment to Section 15143(c) dealing with mitigation measures, must be complied with effective January 7, 1975, regardless of whether its provisions have been included in the procedures being used by a public agency.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsection (b) filed 1-18-74 as an emergency; effective upon filing (Register 74, No. 3).
3. Amendment of subsection (b) filed 1-25-74 as an emergency; effective immediately upon filing. Certificate of Compliance included (Register 74, No. 4).
4. Amendment filed 12-31-74 as an emergency; designated effective 1-7-75 (Register 75, No. 1).
5. Certificate of Compliance filed 4-29-75 (Register 75, No. 18).

15015. Terminology. The following words are used to indicate whether a particular subject in the Guidelines is mandatory, advisory, or permissive:

(a) "Must" or "shall" identifies a mandatory element which all public agencies are required to follow.

(b) "Should" identifies guidance provided by the Secretary for Resources based on policy considerations contained in CEQA, in the legislative history of the statute, or in federal court decisions which California courts can be expected to follow. Public agencies are advised to follow this guidance in the absence of compelling, countervailing considerations.

(c) "May" identifies a permissive element which is left fully to the discretion of the public agencies involved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

Article 4. Definitions

15020. General. Whenever the following words are used in these Guidelines, unless otherwise defined, they shall have the meaning ascribed to them in this article. These definitions are intended to clarify but not to replace or negate the definitions used in CEQA.

15020.5. Applicant. Applicant means a person who proposes to carry out a project which needs a lease, permit, license, certificate, or other entitlement to use or financial assistance from one or more public agencies when that person applies for the governmental approval or assistance.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15021. Approval. Approval means the decision by a public agency which commits the agency to a definite course of action in regard to a project intended to be carried out by any person. The exact date of approval of any project is a matter determined by each public agency according to its rules, regulations, and ordinances. Legislative action in regard to a project often constitutes approval.

In connection with private activities, approval occurs upon the earliest commitment to issue or the issuance by the public agency of a discretionary contract, grant, subsidy, loan, or other form of financial assistance, lease, permit, license, certificate, or other entitlement for use of the project.

15022. CEQA—California Environmental Quality Act. California Environmental Quality Act (CEQA) means California Public Resources Code Sections 21000 et seq.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15023. Categorical Exemption. Categorical Exemption means an exception from the requirements of CEQA for a class of projects based on a finding by the Secretary for Resources that the class of projects does not have a significant effect on the environment.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

(1) A substantial portion of public funds allocated for the project have not been spent and it is still feasible to modify the project to mitigate potentially adverse environmental effects, or to choose feasible alternatives to the project, including the alternative of "no project" or halting the project; provided that this Section (1) shall not apply to projects which come under the jurisdiction of the National Environmental Policy Act (NEPA) and which, through regulations promulgated under NEPA, were held to be too far advanced at the time of NEPA's effective date to require an EIS in compliance with those regulations.

(2) A public agency proposes to modify the project in such a way that the project might have a new significant effect on the environment.

(b) A project as defined in Section 15037(a)(3) or in Section 15037(a)(2) as it relates to contracts, where the permit or other entitlement was issued, or the contract approved, prior to April 5, 1973, shall not require an EIR or Negative Declaration, subject to the following provisions:

(1) CEQA expressly does not prohibit a public agency from considering environmental factors in connection with the approval or disapproval of a project, or from imposing reasonable fees on the appropriate private person or entity for preparing an environmental report. Local agencies may require environmental reports for projects covered by this paragraph pursuant to local ordinances during this interim period.

(2) Where the issuance or approval occurred prior to December 5, 1972, and prior to said date the project was legally challenged for noncompliance with CEQA, the project shall be bound by special rules set forth in Section 21170 of CEQA.

(3) Where a project involving the issuance of a lease, permit, license, certificate or other entitlement to use has been granted a discretionary governmental approval for part of the project before April 5, 1973, and another or additional discretionary governmental approvals after April 5, 1973, the project shall require an EIR or Negative Declaration only if the approval or approvals after April 5, 1973, involve a greater degree of responsibility or control over the project as a whole than did the approval or approvals prior to that date.

(c) Any draft EIR which has been completed and sent out for public review on or before January 6, 1975, in compliance with procedures of a public agency consistent with CEQA and these Guidelines as amended in December 1973, shall be deemed to be in compliance with these Guidelines. No further EIR shall be required except as provided in Subsections (a) and (b).

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsection (c) filed 12-31-74 as an emergency, designated effective 1-7-75 (Register 75, No. 1).
3. Certificate of Compliance filed 4-29-75 (Register 75, No. 18).

15071. Emergency Projects. The following emergency projects are exempt from the requirements of CEQA, and no EIR is required.

(a) Projects undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish or replace property or facilities damaged or destroyed as a result of a disaster in a disaster stricken area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing with Section 8550) of Division 1, Title 2 of the Government Code.

(b) Emergency repairs to public service facilities necessary to maintain service.

(c) Projects undertaken as immediate action necessary to prevent or mitigate an emergency.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15072. Feasibility and Planning Studies. A project involving only feasibility or planning studies for possible future actions which the agency, board, or commission has not approved, adopted, or funded does not require the preparation of an environmental impact report but does require consideration of environmental factors as required by Section 21102 of CEQA.

15073. Ministerial Projects. Ministerial projects are exempt from the requirements of CEQA, and no environmental documents are required. The determination of what is "ministerial" can most appropriately be made by the particular public agency involved based upon its analysis of its own laws, and each public agency should make such determination either as a part of its implementing regulations or on a case-by-case basis. It is further anticipated that the following actions will, in most cases, be ministerial in nature.

(a) Issuance of building permits.

(b) Issuance of business licenses.

(c) Approval of final subdivision maps.

(d) Approval of individual utility service connections and disconnections.

In the absence of any discretionary provision contained in local ordinance, it shall be presumed that these four actions are ministerial. Each public agency may, in its implementing regulations or ordinances, provide an identification or itemization of its projects and actions which are deemed ministerial under the applicable laws and ordinances.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15074. Notice of Exemption. (a) When a public agency determines that a project is exempt from the requirements of CEQA because it is an emergency project, a ministerial project or categorically exempt, and the public agency approves or determines to carry out the project, it may file a notice of exemption. Such a notice shall include (1) a brief description of the project, (2) a finding that the project is exempt, including a citation to the State Guidelines section under which it is found to be exempt, and (3) a brief statement of reasons to support the findings.

(c) **Mitigation Measures Proposed to Minimize the Impact:** Describe avoidable adverse impacts, including inefficient and unnecessary consumption of energy, and the measures proposed to minimize these impacts. This discussion shall include an identification of the acceptable levels to which such impacts will be reduced, and the basis upon which such levels were identified. Where alternative measures are available to mitigate an impact, each should be discussed and the basis for selecting one alternative should be identified. Energy conservation measures, as well as other appropriate mitigation measures, shall be discussed. Examples of energy conservation measures are provided in Appendix F.

(d) **Alternatives to the Proposed Action:** Describe reasonable alternatives to the project, or to the location of the project, which could feasibly attain the basic objectives of the project, and why they were rejected in favor of the ultimate choice. The specific alternative of "no project" must also always be evaluated, along with the impact. Describe alternatives capable of substantially reducing or eliminating any environmentally adverse impacts, even if these alternatives substantially impede the attainment of the project objectives, and are more costly.

(e) **The Relationship Between Local Short-Term Uses of Man's Environment and the Maintenance and Enhancement of Long-Term Productivity:** Describe the cumulative and long-term effects of the proposed project which adversely affect the state of the environment. Special attention should be given to impacts which narrow the range of beneficial uses of the environment or pose long-term risks to health or safety. In addition, the reasons why the proposed project is believed by the sponsor to be justified now, rather than reserving an option for further alternatives, should be explained.

(f) **Any Irreversible Environmental Changes Which Would Be Involved in the Proposed Action Should It Be Implemented:** Uses of nonrenewable resources during the initial and continued phases of the project may be irreversible since a large commitment of such resources makes removal or nonuse thereafter unlikely. Primary impacts and, particularly, secondary impacts (such as a highway improvement which provides access to a nonaccessible area) generally commit future generations to similar uses. Also irreversible damage can result from environmental accidents associated with the project. Irretrievable commitments of resources should be evaluated to assure that such current consumption is justified.

(g) **The Growth-Inducing Impact of the Proposed Action:** Discuss the ways in which the proposed project could foster economic or population growth, either directly or indirectly, in the surrounding environment. Included in this are projects which would remove obstacles to population growth (a major expansion of a waste water treatment plant might, for example, allow for more construction in service areas). Increases in the population may further tax existing community service facilities so consideration must be given to this impact. Also discuss the characteristic of some projects which may encourage and facilitate other activities that could significantly affect the environment, either individually or cumulatively. It must not be assumed that growth in any area is necessarily beneficial, detrimental, or of little significance to the environment.

History: 1. Amendment filed 12-31-74 as an emergency; designated effective 1-7-75 (Register 75, No. 1).
2. Certificate of Compliance filed 4-29-75 (Register 75, No. 18).

15144. Organizations and Persons Consulted. The identity of all federal, state or local agencies, other organizations and private individuals consulted in preparing the EIR, and the identity of the persons, firm or agency preparing the EIR, by contract or other authorization must be given.

15145. Water Quality Aspects. Describe in the environmental setting section, and other sections where applicable, water quality aspects of the proposed project which have been previously certified by the appropriate state or interstate organization as being in substantial compliance with applicable water quality standards.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15146. Contents of Final Environmental Impact Report. (a) The Final EIR shall consist of:

(1) The Draft EIR or a revision of the draft.

(2) Comments and recommendations received on the Draft EIR either verbatim or in summary.

(3) A list of persons, organizations and public agencies commenting on the Draft EIR.

(4) The responses of the Lead Agency to significant environmental points raised in the review and consultation process.

(b) The response of the Lead Agency to comments received may take the form of a revision of the Draft EIR or may be an attachment to the Draft EIR. The response shall describe the disposition of significant environmental issues raised (e.g., revisions to the proposed project to mitigate anticipated impacts or objections). In particular the major issues raised when the Lead Agency's position is at variance with recommendations and objections raised in the comments must be addressed in detail giving reasons why specific comments and suggestions were not accepted, and factors of overriding importance warranting an override of the suggestions.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing (Register 73, No. 50)
2. Amendment of subsection (a) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15147. Degree of Specificity. The degree of specificity required in an EIR will correspond to the degree of specificity involved in the underlying activity which is described in the EIR.

(a) An EIR on a construction project will necessarily be more detailed in the specific effects of the project than will be an EIR on the adoption of a local general plan or comprehensive zoning ordinance because the effects of the construction can be predicted with greater accuracy.

15165. Public Hearings. (a) A public hearing on the environmental impact of a project should usually be held when the lead agency determines it would facilitate the purposes and goals of the CEQA and these Guidelines to do so. The hearing may be held in conjunction with and as a part of normal planning activities. To as great a degree as possible, these hearings should include comments from reviewing agencies made pursuant to these Guidelines.

(b) A Draft EIR should be used as a basis for discussion at a public hearing. The hearing may be held at a place where public hearings are regularly conducted by the lead agency or at another location expected to be convenient to the public.

(c) Notice shall be given of all public hearings in a timely manner. This notice may be given in the same form and time as notice for other regularly conducted public hearings of the public agency.

(d) A public agency may include, in its implementing procedures, procedures for the conducting of public hearings pursuant to this section, which procedures may be consistent with already existing hearing and notice requirements of the public agency for regularly conducted legislative, planning and other proceedings.

(e) There is no requirement for a public agency to conduct a public hearing in connection with its review of an EIR prepared by another public agency.

History: 1. Amendment of subsections (a) and (b) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15166. Retention and Availability of Comments. Comments received through the consultation process shall be kept on file for a reasonable period and available for public inspection at an address given in the Final EIR. Comments which may be received independently of the review of the Draft EIR shall also be considered and kept on file.

Article 11. EIR Monitor

15180. EIR Monitor. The Secretary for Resources will provide for publication of a bulletin entitled "California EIR Monitor" on a subscription basis to provide public notice of amendments to the Guidelines, the completion of draft EIRs and other matters as deemed appropriate. Inquiries and subscription requests should be sent to the following address:

Secretary for Resources
Attention: California EIR Monitor
1416 Ninth Street, Room 1311
Sacramento, California 95814

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New Article 11 (Section 15180) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

Appendix F
Energy Conservation

The California Environmental Quality Act was amended, effective January 7, 1975, to require that the discussion of mitigation measures in an EIR include a discussion of measures to reduce the inefficient and unnecessary consumption of energy. The following discussion is offered as assistance in meeting this requirement.

Energy conservation is the wise use of energy resources. The wisdom of a certain kind of energy use will vary according to the circumstances. In late 1974, a leading consideration in energy use is the reduction in dependence upon high priced imported petroleum. Other considerations are the reduction in pollution from energy use and finding ways to make resources in short supply last longer and be used for the most essential purposes.

Energy conservation measures, including both the available alternatives and those incorporated into the design and operation of a proposed project need to be discussed in EIR's. There are many ways in which a project may be designed or operated to make more efficient and wise use of energy. The following list of conservation measures provides examples that may be used in EIR's where relevant. The list is not exhaustive, and it is not necessary to discuss each example in every EIR.

(1) Insulation and other protection from heat loss or heat gain to conserve fuel used to heat or cool buildings and mobile homes.

(2) Use of resource conserving forms of energy such as solar energy for water and space heating, wind for operating pumps, falling water for generating electricity, and heat pumps.

(3) Energy efficient building design including such features as orientation of structures to summer and winter sunlight to absorb winter solar heat and reflect or avoid summer solar heat.

(4) Measures to reduce energy consumption in transportation such as:

(a) Providing access to alternative means of transportation for people such as bus lines, mass transit, bicycle lanes, pedestrian facilities, and car pooling.

(b) Use of small cars rather than large cars where possible.

(c) Use of alternative means of shipping which allow for energy savings.

(5) Efficient lighting practices including use of indirect natural light, use of efficient lighting fixtures and/or sources, establishment of reasonable lighting criteria to prevent over illumination, and minimum use of architectural or display lighting.

(6) Energy conserving construction practices.

(7) Use of energy conservation devices such as flywheels.
(8) Rate structures which discourage unnecessary energy consumption.
(9) Use of human or animal power where such use is feasible.
(10) Waste heat recovery.
(11) Recycling and use of recycled materials.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000–21174, Public Resources Code.

History: 1. New Appendix F filed 12-31-74 as an emergency; designated effective 1-7-75 (Register 75, No. 1).
2. Certificate of Compliance filed 4-29-75 (Register 75, No. 18).

15024. Discretionary Project. Discretionary project means an activity defined as a project which requires the exercise of judgment, deliberation, or decision on the part of the public agency or body in the process of approving or disapproving a particular activity, as distinguished from situations where the public agency or body merely has to determine whether there has been conformity with applicable statutes, ordinances, or regulations. A timber harvesting plan submitted to the State Forester for approval under the requirements of the Z'berg-Nejedly Forest Practice Act of 1973 (Pub. Res. Code § 4511 et seq.) constitutes a discretionary project within the meaning of the California Environmental Quality Act. § 21065(c).

History: 1. Amendment filed 1-30-75 as an emergency; effective upon filing (Register 75, No. 5).
2. Certificate of Compliance filed 5-29-75 (Register 75, No. 22).

15025. Emergency. Emergency means a sudden, unexpected occurrence demanding immediate action to prevent or mitigate loss or damage to life, health, property, or essential public services.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15026. Environment. Environment means the physical conditions which exist within the area which will be affected by a proposed project including land, air, water, minerals, flora, fauna, ambient noise, objects of historic or aesthetic significance.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

(c) Public agencies shall adopt objectives, criteria, and specific procedures consistent with CEQA and these Guidelines for the orderly evaluation of projects and the preparation of environmental documents. These implementing procedures should contain at least the following provisions:

(1) Procedures for identifying the activities that are exempt from CEQA. These procedures should contain:

(A) Provisions for evaluating a proposed activity to determine if there is no possibility that the activity may have a significant effect on the environment.

(B) A list of projects over which the public agency has only ministerial authority.

(C) A list of specific activities which the public agency has found to be categorically exempt pursuant to Section 15100.4.

(2) Procedures for the conduct of initial studies.

(3) Provisions for the preparation of Negative Declarations.

(4) Provisions for the preparation of EIR's.

(5) Provisions for consulting with and obtaining comments from other public agencies and members of the public with regard to the environmental effects of projects.

(6) Provisions assuring adequate opportunity and time for the public review and comment on the Draft EIR or Negative Declaration.

(7) Provisions for evaluating and responding to comments received on environmental documents.

(8) Provisions for the review and consideration of environmental documents by the person or decision-making body who will approve or disapprove a project.

(9) Provisions for filing documents required or authorized by CEQA and these Guidelines.

(10) Provisions to ensure that Lead Agencies obtain adequate comments on environmental documents which they submit to the public agency for review.

(11) The assignment of responsibility for specific functions to specific units of the public agency.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15051. Office of Planning and Research (OPR). OPR is responsible for the preparation and development of principles, objectives, criteria and definitions to implement the CEQA, prior to adoption by the Secretary for Resources. OPR also, as part of guideline development, shall consider proposals for Categorical Exemption and makes appropriate recommendations to the Secretary for Resources. OPR shall be responsible for resolving disputes over Lead Agency designation.

15052. The Secretary for Resources. The Guidelines shall be officially adopted by the Secretary for Resources, including a finding that each class of projects given a Categorical Exemption will not have a significant effect on the environment. The Secretary also has the responsibility for consolidating all state comments on federally sponsored projects. The Secretary for Resources may issue amendments to these Guidelines.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15053. Fees. (a) All Lead Agencies preparing EIRs or Negative Declarations for projects to be carried out by any person other than the Lead Agency itself may charge and collect a reasonable fee from such person or entity, in order to recover the estimated costs incurred in preparing the EIR or Negative Declaration.

(b) Public agencies may charge and collect a reasonable fee from members of the public for a copy of an environmental document not to exceed the actual cost of reproducing a copy.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15054. Timely Compliance. Public agencies should carry out their responsibilities for preparing and reviewing EIRs within a reasonable period of time. The requirement for the preparation of an EIR should not cause undue delays in the processing of applications for permits or other entitlements to use.

15054.1. Projects Received for Filing. In those cases where a public agency under its enabling legislation or officer (such as the State Forester) ordinarily must act upon a proposed project as defined by Section 21065(c) of CEQA within a certain specified period of time of 30 days or less from the date of receipt of such application or such project otherwise becomes automatically approved by operation of law, the application shall not be deemed received for filing until such time as any environmental documentation required under CEQA has been completed.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21174, Public Resources Code.

History: 1. New section filed 1-30-75 as an emergency; effective upon filing (Register 75, No. 5).
2. Certificate of Compliance filed 5-29-75 (Register 75, No. 22).

Appendix F
Energy Conservation

The California Environmental Quality Act was amended, effective January 7, 1975, to require that the discussion of mitigation measures in an EIR include a discussion of measures to reduce the inefficient and unnecessary consumption of energy. The following discussion is offered as assistance in meeting this requirement.

Energy conservation is the wise use of energy resources. The wisdom of a certain kind of energy use will vary according to the circumstances. In late 1974, a leading consideration in energy use is the reduction in dependence upon high priced imported petroleum. Other considerations are the reduction in pollution from energy use and finding ways to make resources in short supply last longer and be used for the most essential purposes.

Energy conservation measures, including both the available alternatives and those incorporated into the design and operation of a proposed project need to be discussed in EIR's. There are many ways in which a project may be designed or operated to make more efficient and wise use of energy. The following list of conservation measures provides examples that may be used in EIR's where relevant. The list is not exhaustive, and it is not necessary to discuss each example in every EIR.

(1) Insulation and other protection from heat loss or heat gain to conserve fuel used to heat or cool buildings and mobile homes.

(2) Use of resource conserving forms of energy such as solar energy for water and space heating, wind for operating pumps, falling water for generating electricity, and heat pumps.

(3) Energy efficient building design including such features as orientation of structures to summer and winter sunlight to absorb winter solar heat and reflect or avoid summer solar heat.

(4) Measures to reduce energy consumption in transportation such as:

(a) Providing access to alternative means of transportation for people such as bus lines, mass transit, bicycle lanes, pedestrian facilities, and car pooling.

(b) Use of small cars rather than large cars where possible.

(c) Use of alternative means of shipping which allow for energy savings.

(5) Efficient lighting practices including use of indirect natural light, use of efficient lighting fixtures and/or sources, establishment of reasonable lighting criteria to prevent over illumination, and minimum use of architectural or display lighting.

(6) Energy conserving construction practices.

(7) Use of energy conservation devices such as flywheels.
(8) Rate structures which discourage unnecessary energy consumption.
(9) Use of human or animal power where such use is feasible.
(10) Waste heat recovery.
(11) Recycling and use of recycled materials.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000–21174, Public Resources Code.

History: 1. New Appendix F filed 12-31-74 as an emergency; designated effective 1-7-75 (Register 75, No. 1).
2. Certificate of Compliance filed 4-29-75 (Register 75, No. 18).

Article 12. Exemption for Certified State Regulatory Programs

15190. General. Section 21080.5 of the Public Resources Code provides that a regulatory program of a state agency shall be certified by the Secretary for Resources as being exempt from the requirements for preparing EIRs, Negative Declarations, and Initial Studies if the Secretary finds that the program meets the criteria contained in that code section.

NOTE: Authority cited: Sections 21080.5, 21083, 21087, Public Resources Code. Reference: Section 21080.5, Public Resources Code.

History: 1. New Article 12 (Sections 15190–15192) filed 1-6-76 as an emergency; effective upon filing (Register 76, No. 2).

15191. Notices. Notices filed with the Secretary for Resources related to programs exempted by this article shall:
(a) Be available for public inspection.
(b) Be posted in a weekly list in the office of the Resources Agency.
(c) Remain posted for a period of 30 days.

15192. List of Exempt Programs. The following programs of state regulatory programs have been certified by the Secretary for Resources as meeting the requirements of Section 21080.5:
(a) The regulation of private timber harvesting operations by the California Division of Forestry and the State Board of Forestry pursuant to Chapter 8, commencing with Section 4511 of Part 2 of Division 4 of the Public Resources Code.

Appendix F
Energy Conservation

The California Environmental Quality Act was amended, effective January 7, 1975, to require that the discussion of mitigation measures in an EIR include a discussion of measures to reduce the inefficient and unnecessary consumption of energy. The following discussion is offered as assistance in meeting this requirement.

Energy conservation is the wise use of energy resources. The wisdom of a certain kind of energy use will vary according to the circumstances. In late 1974, a leading consideration in energy use is the reduction in dependence upon high priced imported petroleum. Other considerations are the reduction in pollution from energy use and finding ways to make resources in short supply last longer and be used for the most essential purposes.

Energy conservation measures, including both the available alternatives and those incorporated into the design and operation of a proposed project need to be discussed in EIR's. There are many ways in which a project may be designed or operated to make more efficient and wise use of energy. The following list of conservation measures provides examples that may be used in EIR's where relevant. The list is not exhaustive, and it is not necessary to discuss each example in every EIR.

(1) Insulation and other protection from heat loss or heat gain to conserve fuel used to heat or cool buildings and mobile homes.

(2) Use of resource conserving forms of energy such as solar energy for water and space heating, wind for operating pumps, falling water for generating electricity, and heat pumps.

(3) Energy efficient building design including such features as orientation of structures to summer and winter sunlight to absorb winter solar heat and reflect or avoid summer solar heat.

(4) Measures to reduce energy consumption in transportation such as:

(a) Providing access to alternative means of transportation for people such as bus lines, mass transit, bicycle lanes, pedestrian facilities, and car pooling.

(b) Use of small cars rather than large cars where possible.

(c) Use of alternative means of shipping which allow for energy savings.

(5) Efficient lighting practices including use of indirect natural light, use of efficient lighting fixtures and/or sources, establishment of reasonable lighting criteria to prevent over illumination, and minimum use of architectural or display lighting.

(6) Energy conserving construction practices.

(7) Use of energy conservation devices such as flywheels.
(8) Rate structures which discourage unnecessary energy consumption.
(9) Use of human or animal power where such use is feasible.
(10) Waste heat recovery.
(11) Recycling and use of recycled materials.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000–21174, Public Resources Code.

History: 1. New Appendix F filed 12-31-74 as an emergency; designated effective 1-7-75 (Register 75, No. 1).
2. Certificate of Compliance filed 4-29-75 (Register 75, No. 18).

Article 12. Exemption for Certified State Regulatory Programs

15190. General. Section 21080.5 of the Public Resources Code provides that a regulatory program of a state agency shall be certified by the Secretary for Resources as being exempt from the requirements for preparing EIRs, Negative Declarations, and Initial Studies if the Secretary finds that the program meets the criteria contained in that code section.

NOTE: Authority cited: Sections 21080.5, 21083, 21087, Public Resources Code. Reference: Section 21080.5, Public Resources Code.

History: 1. New Article 12 (Sections 15190–15192) filed 1-6-76 as an emergency; effective upon filing (Register 76, No. 2).
2. Certificate of Compliance filed 4-2-76 (Register 76, No. 14).

15191. Notices. Notices filed with the Secretary for Resources related to programs exempted by this article shall:
(a) Be available for public inspection.
(b) Be posted in a weekly list in the office of the Resources Agency.
(c) Remain posted for a period of 30 days.

15192. List of Exempt Programs. The following programs of state regulatory programs have been certified by the Secretary for Resources as meeting the requirements of Section 21080.5:
(a) The regulation of private timber harvesting operations by the California Division of Forestry and the State Board of Forestry pursuant to Chapter 8, commencing with Section 4511 of Part 2 of Division 4 of the Public Resources Code.

Article 12. Exemption for Certified State Regulatory Programs

Section
15190. General
15191. Notices
15192. List of Exempt Programs

Article 1. General

15000. Authority. The regulations contained herein are prescribed by the Secretary for Resources pursuant to authority granted in Public Resources Code Section 21083 to be followed by all state agencies, boards, and commisions, all counties, cities and counties, cities including charter cities, regional agencies, public districts, redevelopment agencies, and all other political subdivisions of the State in the implementation of the Environmental Quality Act of 1970 dealing with environmental quality, the evaluation of projects, and the preparation and evaluation of environmental impact reports. These Guidelines have been developed by the Office of Planning and Research for adoption by the Secretary for Resources in accordance with Section 21083. Additional information may be obtained by writing:

Secretary for Resources
Room 1311, 1416 Ninth Street
Sacramento, CA 95814

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New Chapter 3, Articles 1 through 10 (§§ 15000 through 15166, not consecutive) filed 2-7-73; designated effective upon filing as provided in Section 21083, Public Resources Code (Register 73, No. 6).

15001. Short Title. These Guidelines may be cited as the "State EIR Guidelines."

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000–21174, Public Resources Code.

History: 1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

Article 2. Purpose

15005. Purpose. The purpose of these Guidelines is to provide public agencies with principles, objectives, criteria, and definitions of statewide application to be used in the implementation of the California Environmental Quality Act of 1970, Public Resources Code Sections 21000 et seq. These Guidelines are binding on all public agencies.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

Article 3. Policy

15010. Legislative Declaration. The Legislature has declared that:

(a) Every citizen has a responsibility to contribute to the preservation and enhancement of the environment.

(b) It is the intent of the Legislature that all agencies of the state government which regulate activities of private individuals, corporations, and public agencies which are found to affect the quality of the environment, shall regulate such activities so that major consideration is given to preventing environmental damage.

15011. State Policy. The Legislature has declared that it is the policy of the state to:

(a) Develop and maintain a high-quality environment now and in the future, and take all action necessary to protect, rehabilitate, and enhance the environmental quality of the state.

(b) Take all action necessary to provide the people of this state with clean air and water, enjoyment of aesthetic, natural, scenic, and historic environmental qualities, and freedom from excessive noise.

(c) Prevent the elimination of fish or wildlife species due to man's activities, insure that fish and wildlife populations do not drop below self-perpetuating levels, and preserve for future generations representations of all plant and animal communities and examples of the major periods of California history.

(d) Ensure that the long-term protection of the environment shall be the guiding criterion in public decisions.

(e) Create and maintain conditions under which man and nature can exist in productive harmony to fulfill the social and economic requirements of present and future generations.

(f) Require governmental agencies at all levels to develop standards and procedures necessary to protect environmental quality.

(g) Require governmental agencies at all levels to consider qualitative factors as well as economic and technical factors and long-term benefits and costs, in addition to short-term benefits and costs and to consider alternatives to proposed actions affecting the environment.

15011.5. Additional Policies. The courts of this state have found the following policies to be implicit in CEQA:

(a) The EIR requirement is the heart of CEQA. (*County of Inyo* v. *Yorty,* 32 Cal. App. 3d 795.)

(b) The EIR serves not only to protect the environment but also to demonstrate to the public that it is being protected. (*County of Inyo* v. *Yorty,* 32 Cal. App. 3d 795.)

(c) The EIR is to inform other governmental agencies and the public generally of the environmental impact of a proposed project. (*No Oil, Inc.* v. *City of Los Angeles,* 13 C. 3d 68.)

(d) The EIR is to demonstrate to an apprehensive citizenry that the agency has in fact analyzed and considered the ecological implications of its action. (*People ex rel. Department of Public Works* v. *Bosio,* 47 Cal. App. 3d 495.)

(e) The EIR process will enable the public to determine the environmental and economic values of their elected and appointed officials thus allowing for appropriate action come election day should a majority of the voters disagree. (*People* v. *County of Kern,* 39 Cal. App. 3d 830.)

(f) CEQA was intended to be interpreted in such manner as to afford the fullest possible protection to the environment within the reasonable scope of the statutory language. (*Friends of Mammoth* v. *Board of Supervisors,* 8 C. 3d 247.)

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15012. Informational Document. An Environmental Impact Report is an informational document which, when fully prepared in accordance with the CEQA and these Guidelines, will inform public decision-makers and the general public of the environmental effects of projects they propose to carry out or approve. The EIR process is intended to enable public agencies to evaluate a project to determine whether it may have a significant effect on the environment, to examine and institute methods of reducing adverse impacts, and to consider alternatives to the project as proposed. These things must be done prior to approval or disapproval of the project. An EIR may not be used as an instrument to rationalize approval of a project, nor do indications of adverse impact, as enunciated in an EIR, require that a project be disapproved. While CEQA requires that major consideration be given to preventing environmental damage, it is recognized that public agencies have obligations to balance other public objectives, including economic and social factors in determining whether and how a project should be approved. Economic information may be included in an EIR or may be presented in whatever form the agency desires.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15013. **Time of Preparation.** (a) Environmental documents are useful planning tools to enable environmental constraints and opportunities to be considered before project plans are finalized.

(b) Environmental documents should be prepared as early as feasible in the planning process to enable environmental considerations to influence project program and design.

(1) With public projects, at the earliest feasible time, project sponsors shall incorporate environmental considerations into project conceptualization, design and planning.

(2) With private projects, the Lead Agency shall encourage the project proponent to incorporate environmental considerations into project conceptualization, design and planning at the earliest feasible time.

(c) The environmental document preparation and review should be coordinated in a timely fashion with the existing planning, review and project approval processes being used by each public agency. When the Lead Agency is a State Agency, the environmental document shall be included as part of the regular project report which is used in its existing review and budgetary process.

History: 1. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15014. **Applicability.** (a) These Guidelines have only general application to the diversity of projects undertaken or approved by public agencies. They provide basic principles, objectives, criteria and definitions which individual public agencies shall adapt for internal use, interpreting these Guidelines in terms of specific projects.

(b) Until April 1, 1975, the objectives, criteria, and procedures adopted by public agencies in compliance with CEQA and these Guidelines may continue to govern the evaluation of projects and the preparation of environmental documents without being brought into conformity with the amendments to these Guidelines adopted by the Secretary for Resources in December, 1974. However, the amendment to Section 15143(c) dealing with mitigation measures, must be complied with effective January 7, 1975, regardless of whether its provisions have been included in the procedures being used by a public agency.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsection (b) filed 1-18-74 as an emergency; effective upon filing (Register 74, No. 3).
3. Amendment of subsection (b) filed 1-25-74 as an emergency; effective immediately upon filing. Certificate of Compliance included (Register 74, No. 4).
4. Amendment filed 12-31-74 as an emergency; designated effective 1-7-75 (Register 75, No. 1).
5. Certificate of Compliance filed 4-29-75 (Register 75, No. 18).

15015. Terminology. The following words are used to indicate whether a particular subject in the Guidelines is mandatory, advisory, or permissive:

(a) "Must" or "shall" identifies a mandatory element which all public agencies are required to follow.

(b) "Should" identifies guidance provided by the Secretary for Resources based on policy considerations contained in CEQA, in the legislative history of the statute, or in federal court decisions which California courts can be expected to follow. Public agencies are advised to follow this guidance in the absence of compelling, countervailing considerations.

(c) "May" identifies a permissive element which is left fully to the discretion of the public agencies involved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

Article 4. Definitions

15020. General. Whenever the following words are used in these Guidelines, unless otherwise defined, they shall have the meaning ascribed to them in this article. These definitions are intended to clarify but not to replace or negate the definitions used in CEQA.

15020.5. Applicant. Applicant means a person who proposes to carry out a project which needs a lease, permit, license, certificate, or other entitlement to use or financial assistance from one or more public agencies when that person applies for the governmental approval or assistance.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15021. Approval. Approval means the decision by a public agency which commits the agency to a definite course of action in regard to a project intended to be carried out by any person. The exact date of approval of any project is a matter determined by each public agency according to its rules, regulations, and ordinances. Legislative action in regard to a project often constitutes approval.

In connection with private activities, approval occurs upon the earliest commitment to issue or the issuance by the public agency of a discretionary contract, grant, subsidy, loan, or other form of financial assistance, lease, permit, license, certificate, or other entitlement for use of the project.

15022. CEQA—California Environmental Quality Act. California Environmental Quality Act (CEQA) means California Public Resources Code Sections 21000 et seq.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15023. **Categorical Exemption.** Categorical Exemption means an exception from the requirements of CEQA for a class of projects based on a finding by the Secretary for Resources that the class of projects does not have a significant effect on the environment.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15023.5. **Cumulative Impacts.** Cumulative impacts refer to two or more individual small effects which, when considered together, are considerable or which compound or increase other environmental impacts. The individual effects may be changes resulting from a single project or a number of separate projects.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15024. **Discretionary Project.** Discretionary project means an activity defined as a project which requires the exercise of judgment, deliberation, or decision on the part of the public agency or body in the process of approving or disapproving a particular activity, as distinguished from situations where the public agency or body merely has to determine whether there has been conformity with applicable statutes, ordinances, or regulations. A timber harvesting plan submitted to the State Forester for approval under the requirements of the Z'berg-Nejedly Forest Practice Act of 1973 (Pub. Res. Code § 4511 et seq.) constitutes a discretionary project within the meaning of the California Environmental Quality Act. § 21065(c).

History: 1. Amendment filed 1-30-75 as an emergency; effective upon filing (Register 75, No. 5).
2. Certificate of Compliance filed 5-29-75 (Register 75, No. 22).

15025. **Emergency.** Emergency means a sudden, unexpected occurrence, involving a clear and imminent danger, demanding immediate action to prevent or mitigate loss of, or damage to life, health, property, or essential public services. Emergency includes such occurrences as fire, flood, earthquake, or other soil or geologic movements, as well as such occurrences as riot, accident, or sabotage.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15026. **Environment.** Environment means the physical conditions which exist within the area which will be affected by a proposed project including land, air, water, minerals, flora, fauna, ambient noise, objects of historic or aesthetic significance.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15026.5. Environmental Documents. Environmental documents means Draft and Final EIRs, Initial Studies, Negative Declarations, Notices of Completion, and Notices of Determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included. (Register 73, No. 50).

15027. EIR—Environmental Impact Report. Environmental Impact Report (EIR) means a detailed statement setting forth the environmental effects and considerations pertaining to a project as specified in Section 21100 of the California Environmental Quality Act, and may mean either a draft or a final EIR.

(a) Draft EIR means an EIR containing the information specified in Sections 15141, 15142, and 15143 of these Guidelines. Where a Lead Agency consults with Responsible Agencies in the preparation of a draft EIR, the draft EIR shall also contain the information specified in Section 15144.

(b) Final EIR means an EIR containing the information contained in the draft EIR, comments either verbatim or in summary received in the review process, a list of persons commenting, and the response of the Lead Agency to the comments received. The final EIR is discussed in detail in Section 15146.

History: 1. Amendment of subsection (b) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15028. EIS—Environmental Impact Statement. Environmental Impact Statement (EIS) means an environmental impact document prepared pursuant to the National Environmental Policy Act (NEPA). The Federal Government uses the term EIS in the place of the term EIR which is used in CEQA.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15029. Feasible. Feasible means capable of being accomplished in a successful manner <u>within a reasonable period of time, taking into account economic, environmental, social, and technological factors.</u>

History: 1. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15029.5. Initial Study. Initial study means a preliminary analysis prepared by the lead agency pursuant to Section 15080 to determine whether an EIR or a Negative Declaration must be prepared

NOTE: Authority cited: Sections 21083 and 21174, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15029.6. Jurisdiction by Law. (a) Jurisdiction by law means the authority of any public agency

(1) <u>to grant a permit or other entitlement for use,</u>
(2) <u>to provide funding for the project in question, or</u>

(3) to exercise authority over resources which may be affected by the project.

(b) A city or county will have jurisdiction by law with respect to a project when the city or county is the site of the project, the area in which the major environmental effects will occur, and/or the area in which reside those citizens most directly concerned by any such environmental effects.

(c) Where an agency having jurisdiction by law must exercise discretionary authority over a project in order for the project to proceed, it is also a responsible agency, see Section 15039, or the Lead Agency, see Section 15030.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000-21174, Public Resources Code.

History: 1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
2. Amendment of subsection (a) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15030. Lead Agency. Lead Agency means the public agency which has the principal responsibility for preparing environmental documents and for carrying out or approving a project which may have a significant effect on the environment.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15031. Local Agency. Local agency means any public agency other than a state agency, board or commission. Local agency includes but is not limited to cities, counties, charter cities and counties, districts, school districts, special district, redevelopment agencies, local agency formation commissions and any board, commission, or organizational subdivision of a local agency when so designated by order or resolution of the governing legislative body of the local agency.

History: 1. Amendment filed 12-14-73 as an emergency, effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15032. Ministerial Projects. Ministerial projects as a general rule, include those activities defined as projects which are undertaken or approved by a governmental decision which a public officer or public agency makes upon a given state of facts in a prescribed manner in obedience to the mandate of legal authority. With these projects, the officer or agency must act upon the given facts without regard to his own judgment or opinion concerning the propriety or wisdom of the act although the statute, ordinance, or regulation may require, in some degree, a construction of its language by the officer. In summary, a ministerial decision involves only the use of fixed standards or objective measurements without personal judgment.

History: 1. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15033. Negative Declaration. Negative declaration means a written statement by the Lead Agency briefly describing the reasons that a proposed project, although not otherwise exempt, will not have a significant effect on the environment and therefore does not require the preparation of an EIR.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15034. Notice of Completion. Notice of Completion means a brief notice filed with the Secretary for Resources by a Lead Agency as soon as it has completed a draft EIR and is prepared to send out copies for review. The contents of this notice are explained in Section 15085(c). A copy of this notice appears in Appendix C.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15035. Notice of Determination. Notice of Determination means a brief notice to be filed by a public agency after it approves or determines to carry out a project which is subject to the requirements of CEQA. The contents of this notice are explained in Sections 15083(d) and 15085(h). A copy of this notice appears in Appendix D.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15035.5. Notice of Exemption. Notice of Exemption means a brief notice which may be filed by a public agency when it has approved or determined to carry out a project, and it has determined that it is ministerial, categorically exempt or an emergency project. Such a notice may also be filed by an applicant where such a determination has been made by a public agency which must approve the project. The contents of this notice are explained in Sec. 15074(a) and (b). A copy of this notice appears in Appendix E.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21108, 21152, 21167, Public Resources Code and Chap. 56 of Stats. 1974.

History: 1. New section filed 3-26-74 as an emergency; effective upon filing (Register 74, No. 13).
2. Certificate of Compliance filed 6-26-74 (Register 74, No. 26).
3. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15036. Person. Person includes any person, firm, association, organization, partnership, business, trust, corporation, company, district, county, city and county, city, town, the State, and any of the agencies' political subdivisions of such entities.

15037. Project. (a) Project means the whole of an action, which has a potential for resulting in a physical change in the environment, directly or ultimately, that is any of the following:

(1) An activity directly undertaken by any public agency including but not limited to public works construction and related activities, clearing or grading of land, improvements to existing public structures, enactment and amendment of zoning ordinances, and the adoption and amendment of local General Plans or elements thereof pursuant to Government Code Sections 65100–65700.

(2) An activity undertaken by a person which is supported in whole or in part through public agency contracts, grants, subsidies, loans, or other forms of assistance from one or more public agencies.

(3) An activity involving the issuance to a person of a lease, permit, license, certificate, or other entitlement for use by one or more public agencies.

(b) Project does not include:

(1) Anything specifically exempted by state law.

(2) Proposals for legislation to be enacted by the State Legislature other than requests by state agencies for authorization or funding for projects independently from the Budget Act.

(3) Continuing administrative or maintenance activities, such as purchases for supplies, personnel-related actions, emergency repairs to public service facilities, general policy and procedure making (except as they are applied to specific instances covered above), feasibility or planning studies.

(4) The submittal of proposals to a vote of the people of the State or of a particular community.

(c) The term "project" refers to the activity which is being approved and which may be subject to several discretionary approvals by governmental agencies. The term "project" does not mean each separate governmental approval.

History: 1. Amendment of subsection (a) (1) and new subsection (c) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15038. Public Agency. Public agency includes any state agency, board or commission and any local or regional agency, as defined in these Guidelines. It does not include the courts of the State. This term does not include agencies of the federal government.

15039. Responsible Agency. Responsible agency means a public agency which proposes to carry out a project, but is not the Lead Agency for the project. It includes all public agencies other than the Lead Agency which have approval power over the project.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15040. Significant Effect on the Environment. Significant effect on the environment means a substantial, or potentially substantial, adverse change in any of the physical conditions within the area affected by the activity including land, air, water, minerals, flora, fauna, ambient noise, and objects of historic or aesthetic significance.

History: 1. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

Article 5. General Responsibilities.

15050. Public Agency Implementation. (a) Each public agency is responsible for complying with CEQA and these Guidelines. Each public agency must develop its own procedures consistent with these Guidelines.

(b) Where a public agency is a Lead Agency and prepares an EIR itself, contracts for the preparation, or accepts data and information in the form of a draft EIR from an applicant, that public agency is responsible entirely for the adequacy and objectivity of the EIR.

(c) Public agencies shall adopt objectives, criteria, and specific procedures consistent with CEQA and these Guidelines for the orderly evaluation of projects and the preparation of environmental documents. These implementing procedures should contain at least the following provisions:

(1) Procedures for identifying the activities that are exempt from CEQA. These procedures should contain:

(A) Provisions for evaluating a proposed activity to determine if there is no possibility that the activity may have a significant effect on the environment.

(B) A list of projects over which the public agency has only ministerial authority.

(C) A list of specific activities which the public agency has found to be categorically exempt pursuant to Section 15100.4.

(2) Procedures for the conduct of initial studies.

(3) Provisions for the preparation of Negative Declarations.

(4) Provisions for the preparation of EIR's.

(5) Provisions for consulting with and obtaining comments from other public agencies and members of the public with regard to the environmental effects of projects.

(6) Provisions assuring adequate opportunity and time for the public review and comment on the Draft EIR or Negative Declaration.

(7) Provisions for evaluating and responding to comments received on environmental documents.

(8) Provisions for the review and consideration of environmental documents by the person or decision-making body who will approve or disapprove a project.

(9) Provisions for filing documents required or authorized by CEQA and these Guidelines.

(10) Provisions to ensure that Lead Agencies obtain adequate comments on environmental documents which they submit to the public agency for review.

(11) The assignment of responsibility for specific functions to specific units of the public agency.

(d) Any district, including a school district, need not adopt objectives, criteria and procedures of its own if it uses the objectives, criteria and procedures of another public agency whose boundaries are coterminous with the district. Any public agency may adopt the objectives, criteria, and procedures of another public agency whose boundaries are coterminous with or entirely encompass its own.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. New subsection (d) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15051. Office of Planning and Research (OPR). (a) OPR is responsible for the preparation and development of principles, objectives, criteria and definitions to implement the CEQA, prior to adoption by the Secretary for Resources. OPR also, as part of guideline development, shall consider proposals for Categorical Exemption and makes appropriate recommendations to the Secretary for Resources. OPR shall be responsible for resolving disputes over Lead Agency designation.

(b) The State Clearinghouse in the Office of Planning and Research is responsible for distributing environmental documents to State agencies, departments, boards and commissions for review and comment.

History: 1. New subsection (b) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15052. The Secretary for Resources. The Guidelines shall be officially adopted by the Secretary for Resources, including a finding that each class of projects given a Categorical Exemption will not have a significant effect on the environment. The Secretary also has the responsibility for consolidating all state comments on federally sponsored projects. The Secretary for Resources may issue amendments to these Guidelines.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15053. Fees. (a) All Lead Agencies preparing EIRs or Negative Declarations for projects to be carried out by any person other than the Lead Agency itself may charge and collect a reasonable fee from such person or entity, in order to recover the estimated costs incurred in preparing the EIR or Negative Declaration.

(b) Public agencies may charge and collect a reasonable fee from members of the public for a copy of an environmental document not to exceed the actual cost of reproducing a copy.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15054. Timely Compliance. Public agencies should carry out their responsibilities for preparing and reviewing EIRs within a reasonable period of time. The requirement for the preparation of an EIR should not cause undue delays in the processing of applications for permits or other entitlements to use.

15054.1. Projects Received for Filing. In those cases where a public agency under its enabling legislation or officer (such as the State Forester) ordinarily must act upon a proposed project as defined by Section 21065(c) of CEQA within a certain specified period of time of 30 days or less from the date of receipt of such application or such project otherwise becomes automatically approved by operation of law, the application shall not be deemed received for filing until such time as any environmental documentation required under CEQA has been completed.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21174, Public Resources Code.

History: 1. New section filed 1-30-75 as an emergency; effective upon filing (Register 75, No. 5).
2. Certificate of Compliance filed 5-29-75 (Register 75, No. 22).

Article 6. Application of the Act to Projects

15060. General Rule. The requirements set forth in these Guidelines apply to projects which may have a significant effect on the environment and which involve discretionary governmental action. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not covered by the requirements set forth in CEQA, and these Guidelines concerning the evaluation of projects and the preparation and review of environmental documents do not apply.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15061. Projects Controlled by State or Local Agencies. (a) When a public agency plans to carry out or approve a project which is subject to CEQA, which may have a significant effect on the environment, the EIR or Negative Declaration for the project shall be prepared directly by, or under contract to, a public agency.

(b) Where a project which is subject to CEQA is to be carried out by a nongovernmental person subject to approval, financial support, or some other involvement by a public agency, the EIR or Negative Declaration shall be prepared directly by, or under contract to, the Lead Agency. However, the Lead Agency may require the person to supply data and information, both to determine whether the project may have a significant effect on the environment, and to assist in the preparation of an EIR or Negative Declaration by the Lead Agency. This information may be submitted in the form of a draft EIR if the Lead Agency desires. If information is provided in the form of a draft EIR or Negative Declaration, the Lead Agency may not use the document as its own without independent evaluation and analysis. The draft EIR or Negative Declaration which is sent out for public review must reflect the independent judgment of the Lead Agency. The Lead Agency should require an applicant to specify to the best of his knowledge which other public agencies will have jurisdiction by law over the project.

(c) Where the project is to be undertaken by a local agency, as defined in these Guidelines, but requires state approval or financial assistance, the state agency shall require the local agency to prepare the EIR or Negative Declaration, to be submitted with the request for approval of the proposed project. This must also be done where federal funds are involved, but only if a state agency has discretionary authority over the use of those funds. If the local project has been mandated on the local agency by a state agency, the EIR prepared by the local agency may be limited to consideration of those factors and alternatives which do not conflict with the order.

(d) The EIR may be prepared as a separate document, or as part of a project report. If prepared as a part of the project report, it must still contain in one separate and distinguishable section the elements required of an EIR, including the seven elements specified in Section 15143 of these Guidelines.

(e) All public and private activities or undertakings pursuant to or in furtherance of a redevelopment plan constitute a single project, which shall be deemed approved at the time of adoption of the redevelopment plan by the legislative body. The EIR in connection with the redevelopment plan shall be submitted in accordance with Section 33352 of the Health and Safety Code.

(f) All of the above is subject to the Lead Agency principle which provides that not more than one EIR shall be prepared in connection with the same underlying activity and that the EIR shall be prepared by the lead agency.

(g) Any person may submit information to the Lead Agency to assist in the preparation of an EIR or Negative Declaration. Such information may be submitted in any format and may be included in whole or in part in any such EIR or Negative Declaration if the Lead Agency subjects the information to its own independent evaluation and analysis.

History: 1. Amendment of subsections (a), (b) and (f) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsections (a) and (b) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. New subsection (g) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15062. Private Projects.

History: 1. Repealer filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15063. Federal Projects. (a) In regard to any proposed federal project in this state which may have a significant effect on the environment and on which the state officially comments, the state officials responsible for such comments shall include in their comments a discussion of the matters specified in Section 15143 of these Guidelines.

(b) In cases where these Guidelines require the preparation of an EIR by a Lead Agency and an EIS has been or will be prepared for the same project pursuant to the requirements of the National Environmental Policy Act of 1969 and implementing regulations thereto, all or any part of such statement may be submitted in lieu of all or any part of an EIR required by these Guidelines, provided that the EIS or the part thereof so used, shall comply with the requirements of these Guidelines. In cases where the federal EIS is used, discussion of mitigation measures, growth inducing impact and energy conservation will have to be added or supplemented if the EIS does not include an adequate discussion of these elements.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15064. Lead Agency Principle. Where a project is to be carried out or approved by more than one public agency, only one public agency shall be responsible for preparation of environmental documents, and it will be the Lead Agency. Such environmental documents will be prepared by the Lead Agency in consultation with all responsible Agencies. The Lead Agency's environmental documents shall be the environmental documentation for all Responsible Agencies. Except as provided in Section 15069.5(c), such Responsible Agencies shall consider the Lead Agency's EIR or Negative Declaration prior to acting upon or approving the projects, and they shall certify that their decision-making bodies have reviewed and considered the information contained in them.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15065. Lead Agency Criteria. Where two or more public agencies are involved with a project, which agency shall be the Lead Agency shall be determined by the following principles:

(a) If the project is to be carried out by a public agency, the Lead Agency shall be the public agency which proposes to carry out the project.

(b) If the project is to be carried out by a nongovernmental person, the Lead Agency shall be the public agency with the greatest responsibility for supervising or approving the project as a whole.

(1) The Lead Agency will generally be the agency with general governmental powers rather than an agency with a single or limited purpose which is involved by reason of the need to provide a public service or public utility to the project; in such cases, the single or limited purpose agency will, upon request, provide data concerning all aspects of its activities required to furnish service to the project to the agency drafting the EIR, and no separate EIR will be required in regard to such activities.

(2) Where a city has prezoned an area, the city will be the appropriate Lead Agency for any subsequent annexation of the area and should prepare the required environmental document at the time of the prezoning. The city shall consult with the local agency formation commission, and the EIR shall include the comments of the local agency formation commission.

(c) Where more than one public agency equally meet the criteria set forth in paragraph (b) above, the agency which is to act first on the project in question shall be the Lead Agency (following the principle that the environmental impact should be assessed as early as possible in governmental planning).

(d) Where the provisions of subsections (a), (b), and (c) leave two or more public agencies with a substantial claim to be the Lead Agency, the public agencies may by agreement designate which agency will be the Lead Agency. An agreement may also provide for cooperative efforts by contract, joint exercise of powers, or similar devices.

(e) Where a Responsible Agency is called on to grant an approval for a project subject to CEQA for which another public agency was the appropriate Lead Agency, the Responsible Agency shall begin to act as the Lead Agency when the following conditions occur:

(1) The Lead Agency did not prepare any environmental documents for the project, and

(2) The statute of limitations has expired for a challenge to the action of the appropriate Lead Agency.

History: 1. Amendment of subsection (a) and repealer and new subsection (d) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsection (d) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. New subsection (e) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15065.5. Designation of Lead Agency by Office of Planning and Research. (a) In the event that the designation of a lead agency is in dispute, the following criteria shall apply:

(1) Public agencies should consult with each other in an effort to resolve the dispute prior to submitting it to OPR.

(2) If an agreement cannot be reached, any public agency involved may submit the dispute to the OPR for resolution.

(b) Regulations adopted by OPR for resolving lead agency disputes may include the following:

(1) Submission of written statements to OPR and other disputing public agencies;

(2) Certification by OPR that a Lead Agency dispute exists;

(3) Publication of notice that a dispute has been submitted to OPR;

(4) Determination of the dispute on the basis of written statements or by a hearing.

(c) Designation of a Lead Agency by OPR shall be based on consideration of the criteria in Section 15065 as well as the capacity of the agency to adequately fulfill the requirements of CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing (Register 73, No. 50).

15066. Consultation. When more than one public agency will be involved in undertaking or approving a project, the Lead Agency shall consult with all responsible agencies (i.e., all the other public agencies involved in carrying out or approving the project) before completing a draft EIR or Negative Declaration. This early consultation is designed to insure that the EIR or Negative Declaration will reflect the concerns of all responsible agencies which will issue approvals for the project. After completing the draft EIR or Negative Declaration, the Lead Agency shall also consult with and seek to obtain comments from other public agencies having jurisdiction by law and should consult with persons having special expertise as described in Sections 15083 and 15085.

History: 1. Repealer and new section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15067. Subsequent EIR. Where an EIR has been prepared, no additional EIR need be prepared unless:

(a) Substantial changes are proposed in the project which will require major revisions of the EIR, due to the involvement of new environmental impacts not considered in a previous EIR on the project;

(b) There are substantial changes with respect to the circumstances under which the project is to be undertaken, such as a change in the proposed location of the project, which will require major revisions in the EIR due to the involvement of new environmental impacts not covered in a previous EIR.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15068. Use of a Single EIR. The Lead Agency may employ a single EIR to describe more than one project, if such projects are essentially the same in terms of environmental impact. Further, the Lead Agency may use an earlier EIR prepared in connection with an earlier project to apply to a later project, if the circumstances of the projects are essentially the same. Lead Agencies may elect to write EIRs in advance for entire programs or regulations, in order to be prepared for project applications to come. Whenever an agency chooses to utilize any of these alternatives, however, it must find that the environmental effects of the projects are similar enough to warrant the same treatment in an EIR and that the EIR will adequately cover the impacts of any single project. If these tests are not met, an agency should supplement the EIR it prepares for a program to apply it to an individual project.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15068.5. Use of a General Plan EIR With Subsequent Projects. The EIR on a general plan may be used as the foundation document for EIRs subsequently prepared for specific projects within the geographic area covered by the general plan. The subsequent EIRs may reference and summarize material in the EIR on the general plan for the description of the general environmental setting and as much of the description of the environmental impacts as applies to the specific project. Detailed information in the EIR on the specific project may be limited to a description of the project, the specific environmental setting and those impacts which are not adequately described for the specific project in the EIR on the general plan. When a subsequent EIR refers to an EIR on the general plan for part of its description of the environment and the environmental impacts, copies of the EIR on the general plan shall be made available to the public in a number of locations in the community and to any clearinghouses which will assist in public review of the EIR. The purpose of this section is not to restrict analysis of environmental issues but is to avoid the necessity for repeating detail from a General Plan EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15069. Multiple and Phased Projects. Where individual projects are, or a phased project is, to be undertaken and where the total undertaking comprises a project with significant environmental effect, the Lead Agency must prepare a single EIR for the ultimate project. Where an individual project is a necessary precedent for action on a larger project, or commits the Lead Agency to a larger project, with significant environmental effect, an EIR must address itself to the scope of the larger project. Where one project is one of several similar projects of a public agency, but is not deemed a part of a larger undertaking or a larger project, the agency may prepare one EIR for all projects, or one for each project, but shall in either case comment upon the cumulative effect.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15069.5. Staged EIR. (a) Where a large capital project will require a number of discretionary approvals from governmental agencies and one of the approvals will occur more than 2 years before construction will begin, a staged EIR may be prepared covering the entire project in a general form. The staged EIR should evaluate the proposal in light of current and contemplated plans and produce an informed estimate of the environmental consequences of the entire project. The aspect of the project before the public agency for approval shall be discussed with a greater degree of specificity.

(b) When a staged EIR has been prepared, a supplement to the EIR shall be prepared when a later approval is required for the project, and the information available at the time of the later approval would permit consideration of additional environmental impacts, mitigation measures, or reasonable alternatives to the project.

(c) Where a statute such as the Warren-Alquist Energy Resources Conservation and Development Act provides that a specific agency shall be the Lead Agency for a project and requires the Lead Agency to prepare an EIR, a Responsible Agency which must grant an approval for the project before the Lead Agency has completed the EIR may prepare and consider a staged EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15070. Ongoing Project. (a) A project as defined in Section 15037(a)(1) of these Guidelines, approved prior to November 23, 1970, shall require an Environmental Impact Report or a Negative Declaration if the project may have a significant effect on the environment, and either of the following conditions exists:

(1) A substantial portion of public funds allocated for the project have not been spent and it is still feasible to modify the project to mitigate potentially adverse environmental effects, or to choose feasible alternatives to the project, including the alternative of "no project" or halting the project; provided that this Section (1) shall not apply to projects which come under the jurisdiction of the National Environmental Policy Act (NEPA) and which, through regulations promulgated under NEPA, were held to be too far advanced at the time of NEPA's effective date to require an EIS in compliance with those regulations.

(2) A public agency proposes to modify the project in such a way that the project might have a new significant effect on the environment.

(b) A project as defined in Section 15037(a)(3) or in Section 15037(a)(2) as it relates to contracts, where the permit or other entitlement was issued, or the contract approved, prior to April 5, 1973, shall not require an EIR or Negative Declaration, subject to the following provisions:

(1) CEQA expressly does not prohibit a public agency from considering environmental factors in connection with the approval or disapproval of a project, or from imposing reasonable fees on the appropriate private person or entity for preparing an environmental report. Local agencies may require environmental reports for projects covered by this paragraph pursuant to local ordinances during this interim period.

(2) Where the issuance or approval occurred prior to December 5, 1972, and prior to said date the project was legally challenged for noncompliance with CEQA, the project shall be bound by special rules set forth in Section 21170 of CEQA.

(3) Where a project involving the issuance of a lease, permit, license, certificate or other entitlement to use has been granted a discretionary governmental approval for part of the project before April 5, 1973, and another or additional discretionary governmental approvals after April 5, 1973, the project shall require an EIR or Negative Declaration only if the approval or approvals after April 5, 1973, involve a greater degree of responsibility or control over the project as a whole than did the approval or approvals prior to that date.

(c) Any draft EIR which has been completed or sent out for public review on or before January 1, 1977, in compliance with procedures of a public agency consistent with CEQA and these Guidelines as amended in February 1975, shall be deemed to be in compliance with these Guidelines. No further EIR shall be required except as provided in Subsections (a) and (b).

(d) Any project approved before February 7, 1975, by a local agency formation commission without complying with CEQA is declared legally effective unless:

(1) The legality of the project was contested in a legal proceeding in which a violation of CEQA was alleged prior to February 7, 1975, and the case was pending and undecided by February 7, 1975, or (P.R.C. 21176(a)).

(2) The project was determined to be illegal, void, or ineffective because of noncompliance with CEQA in any judicial proceeding decided before July 6, 1975. (P.R.C. 21176(b))

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsection (c) filed 12-31-74 as an emergency, designated effective 1-7-75 (Register 75, No. 1).
3. Certificate of Compliance filed 4-29-75 (Register 75, No. 18).
4. Amendment of subsection (c) and new subsection (d) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15071. Emergency Projects. The following emergency projects are exempt from the requirements of CEQA, and no EIR is required.

(a) Projects undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish or replace property or facilities damaged or destroyed as a result of a disaster in a disaster stricken area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing with Section 8550) of Division 1, Title 2 of the Government Code.

(b) Emergency repairs to public service facilities necessary to maintain service.

(c) Specific actions necessary to prevent or mitigate an emergency.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsection (c) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15072. Feasibility and Planning Studies. A project involving only feasibility or planning studies for possible future actions which the agency, board, or commission has not approved, adopted, or funded does not require the preparation of an environmental impact report but does require consideration of environmental factors as required by Section 21102 of CEQA.

15073. Ministerial Projects. (a) Ministerial projects are exempt from the requirements of CEQA, and no environmental documents are required. The determination of what is "ministerial" can most appropriately be made by the particular public agency involved based upon its analysis of its own laws, and each public agency should make such determination either as a part of its implementing regulations or on a case-by-case basis. (P.R.C. 21080(b)).

(b) In the absence of any discretionary provision contained in the relevant local ordinance, it shall be presumed that the following actions are ministerial:

(1) Issuance of building permits.
(2) Issuance of business licenses.
(3) Approval of final subdivision maps.
(4) Approval of individual utility service connections and disconnections.

(c) Each public agency should, in its implementing regulations or ordinances, provide an identification or itemization of its projects and actions which are deemed ministerial under the applicable laws and ordinances.

(d) Where a project involves an approval that contains elements of both a ministerial action and a discretionary action, the project will be deemed to be discretionary and will be subject to the requirements of CEQA.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15074. Notice of Exemption. (a) When a public agency determines that a project is exempt from the requirements of CEQA because it is an emergency project, a ministerial project or categorically exempt, and the public agency approves or determines to carry out the project, it may file a notice of exemption. Such a notice shall include (1) a brief description of the project, (2) a finding that the project is exempt, including a citation to the State Guidelines section under which it is found to be exempt, and (3) a brief statement of reasons to support the findings.

(b) Whenever a public agency approves an applicant's project, it or the applicant may file a notice of exemption. The notice of exemption filed by an applicant shall contain the information required in subdivision (a) above, together with a certified document issued by the public agency stating that it has found the project to be exempt. This may be a certified copy of an existing document or record of the public agency.

(c) If the public agency is a state agency, the notice of exemption will be filed with the Secretary for Resources. A form for this notice is provided in Appendix E. Copies of all such notices shall be posted on a weekly basis at the Resources Building Information Desk, 1416 9th Street, Sacramento. Each such list will remain posted for 30 days.

(d) If the public agency is a local agency, the notice of exemption will be filed with the County Clerk of the county or counties in which the project will be located. Copies of all such notices will be available for public inspection and a list of such notices shall be posted on a weekly basis in the office of the county clerk. Each such list shall remain posted for a period of 30 days.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21108, 21152, 21167, Public Resources Code and Chap. 56 of Stats. 1974.

History: 1. New section filed 3-26-74 as an emergency; effective upon filing (Register 74, No. 13).
2. Certificate of Compliance filed 6-26-74 (Register 74, No. 26).

15075. Use of Registered Professionals in Preparing EIRs. (a) A number of statutes provide that certain professional services can be provided to the public only by individuals who have been registered by a registration board established under California law. Such statutory restrictions apply to a number of professions including but not limited to engineering, land surveying, forestry, geology and geophysics.

(b) In its intended usage, an EIR is not a technical document that can be prepared only by a registered professional. The EIR serves as a public disclosure document explaining the effects of the proposed project on the environment, alternatives to the project and ways to minimize adverse effects and to increase beneficial effects. As a result of information in the EIR, the Lead Agency should establish requirements or conditions on project design, construction, or operation in order to protect or enhance the environment. State statutes may provide that only registered professionals can prepare technical studies which will be used in or which will control the detailed design, construction, or operation of the proposed project and which will be prepared in support of an EIR.

NOTE Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000-21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41) Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77

Article 7. Evaluating Projects

15080. Initial Study. (a) If a project is subject to the requirements of CEQA and not exempted by these Guidelines, the Lead Agency shall conduct an Initial Study to determine if the project may have a significant effect on the environment unless the Lead Agency can determine that the project will clearly have a significiant effect. If any aspects of the project, either individually or cumulatively, may cause a significant effect on the environment, regardless of whether the overall effect of the project is adverse or beneficial, then an EIR must be prepared. All phases of project planning, implementation, and operation must be considered in the Initial Study of the project. To meet the requirements of this section, the Lead Agency may use an Initial Study prepared pursuant to the National Environmental Policy Act.

(b) **Purposes.** The purposes of an Initial Study are to:

(1) Identify environmental impacts;

(2) Enable an applicant or Lead Agency to modify a project, mitigating adverse impacts before an EIR is written;

(3) Focus an EIR, if one is required, on potentially significant environmental effects;

(4) Facilitate environmental assessment early in the design of a project;

(5) Provide documentation of the factual basis for the finding in a Negative Declaration that a project will not have a significant effect on the environment;

(6) Eliminate unnecessary EIRs.

(c) **Contents.** An Initial Study shall contain in brief form:

(1) A description of the project,

(2) An identification of the environmental setting,

(3) An identification of environmental effects by use of a checklist, matrix, or other method,

(4) A discussion of ways to mitigate the significant effects identified, if any,

(5) An examination of whether the project is compatible with existing zoning and plans,

(6) The name of the person or persons who prepared or participated in the Initial Study.

(d) **Uses.** (1) The Initial Study shall be used to provide a written determination of whether a Negative Declaration or an EIR shall be prepared for a project.

(2) Where a project is revised in response to an Initial Study so that potential adverse effects are mitigated to a point where no significant environmental effects would occur, a Negative Declaration shall be prepared instead of an EIR. If the project would still result in one or more significant effects on the environment after mitigation measures are added to the project, an EIR shall be prepared.

(3) The EIR shall emphasize study of the impacts determined to be significant and can omit further examination of those impacts found to be clearly insignificant in the Initial Study.

(e) **Submission of Data.** If the project is to be carried out by a private person or private organization, the Lead Agency may require such person or organization to submit data and information which will enable the Lead Agency to prepare the Initial Study.

(f) **Format.** Sample forms for an applicant's project description and a review form for use by the Lead Agency are contained in Appendices H and I. When used together; these forms would meet the requirements for an Initial Study. These forms are only suggested, and public agencies are free to devise their own format for an Initial Study.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15081. Determining Significant Effect. (a) The determination of whether a project may have a significant effect on the environment calls for careful judgment on the part of the public agency involved, based to the extent possible on scientific and factual data. An iron clad definition of significant effect is not possible because the significance of an activity may vary with the setting. For example, an activity which may not be significant in an urban area may be significant in a rural area. There may be a difference of opinion on whether a particular effect should be considered adverse or beneficial, but where there is, or anticipated to be, a substantial body of opinion that considers or will consider the effect to be adverse, the lead agency should prepare an EIR to explore the environmental effects involved.

(b) In evaluating the significance of the environmental effect of a project, the Lead Agency shall consider both primary or direct and secondary or indirect consequences. Primary consequences are immediately related to the project (the construction of a new treatment plant may facilitate population growth in a particular area), while secondary consequences are related more to primary consequences than to the project itself (an impact upon the resource base, including land, air, water and energy use of the area in question may result from the population growth).

(c) Some examples of consequences which may be deemed to be a significant effect on the environment are contained in Appendix G.

History: 1. Amendment of subsection (c) filed 10-8-76; effective thirtieth day thereafter (Register 76, No 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77. For prior history, see Register 75, No. 44.

15082. Mandatory Findings of Significance. A project shall be found to have a significant effect on the environment if:

(a) The project has the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory.

(b) The project has the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals.

(c) The project has possible environmental effects which are individually limited but cumulatively considerable. As used in the subsection, "cumulatively considerable" means that the incremental effects of an individual project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.

(d) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15083. Negative Declaration. (a) General. A Negative Declaration shall be prepared for a project which could potentially have a significant effect on the environment, but which the Lead Agency finds on the basis of an Initial Study will not have a significant effect on the environment.

(b) Consultation. Before completing a Negative Declaration, the Lead Agency shall consult with all responsible agencies pursuant to Section 15066.

(c) Contents. A Negative Declaration shall include:

(1) A brief description of the project; including a commonly used name for the project if any;

(2) The location of the project and the name of the project proponent;

(3) A finding that the project will not have a significant effect on the environment;

(4) An attached copy of the Initial Study documenting reasons to support the finding.

(5) Mitigation measures, if any, included in the project to avoid potentially significant effects.

(d) Notice. (1) Notice of the preparation on a Negative Declaration shall be provided to the public within a reasonable period of time prior to final adoption by the public agency of the Negative Declaration. Notice shall be given to all organizations and individuals who have previously requested such notice and shall also be given by at least one of the following procedures:

A. Publication, no fewer times than required by Section 6061 of the Government Code, by the public agency in a newspaper of general circulation in the area affected by the proposed project.

B. Posting of notice by the public agency on and off site in the area where the project is to be located.

C. Direct mailing to owners of property contiguous to the project.

(2) The alternatives for providing notice specified in subsection (1) shall not preclude a public agency from providing additional notice by other means if such agency so desires, nor shall the requirements of this section preclude a public agency from providing the public notice required herein at the same time and in the same manner as public notice otherwise required by law for such project.

(e) Public Review. The Negative Declaration shall be made available to the public with sufficient time before the project is approved to provide an opportunity for members of the public to respond to the finding. Special requirements for review of Negative Declarations review are contained in Sections 15161.5, 15162, and 15164.

(f) Notice of Determination. (1) After making a decision to carry out or approve a project for which a Negative Declaration has been prepared, the Lead Agency shall file a Notice of Determination with a copy of the Negative Declaration attached.

(2) The Notice of Determination shall include:

A. The decision of the agency to approve the project,

B. The determination of the agency whether the project will have a significant effect on the environment, and

C. A statement that no EIR has been prepared pursuant to the provisions of CEQA.

(3) If the Lead Agency is a state agency, the Notice of Determination shall be filed with the Secretary for Resources.

(4) If the Lead Agency is a local agency, the Notice of Determination shall be filed with the county clerk of the county or counties in which the project will be located. If the project requires discretionary approvals from a state agency, the Notice of Determination also shall be filed with the Secretary for Resources.

(5) The filing of the Notice of Determination with the Secretary for Resources or the County Clerk starts a 30 day statute of limitations on court challenges to the approval under CEQA. (P.R.C. 21167(b))

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsections (a) and (d) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1)
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15084. Decision to Prepare an EIR. (a) If the Lead Agency finds, after an initial study, that the project may have a significant effect on the environment, the Lead Agency must prepare or cause to be prepared an Environmental Impact Report.

(b) An EIR should be prepared whenever it can be fairly argued on the basis of substantial evidence that the project may have a significant effect on the environment.

(c) An EIR should be prepared when there is serious public controversy concerning the environmental effects of a project. Controversy not related to an environmental issue does not require the preparation of an EIR.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15085. EIR Process. The following steps shall be followed after the Lead Agency decides to prepare an EIR.

(a) **General.** When an agency decides that an EIR will be required for a project, it shall follow the procedures contained in this section.

(b) **Early Consultation.** (1) Before completing a draft EIR consisting of the information specified in Section 15141, 15142, and 15143 of these Guidelines, the Lead Agency shall consult with all Responsible Agencies pursuant to Section 15066. In addition, if it has not already done so, the Lead Agency should also consult directly with any person or organization it believes will be concerned with the environmental effects of the project. Many public agencies have found that early consultation solves many potential problems that would arise in more serious form later in the review process.

(2) For projects where federal involvement might require preparation of a federal EIS, the Lead Agency under CEQA should consult with the appropriate federal agency on the need for an EIS. If both an EIR and EIS are needed, the documents should be prepared jointly where federal regulations or procedures allow, or the EIR should be prepared pursuant to Section 15063(b). Preparation of a separate EIR and EIS for the same project should be avoided, if possible.

(c) **Notice of Completion.** As soon as the draft EIR is completed, a notice of completion must be filed with the Secretary for the Resources Agency. The notice shall include a brief description of the project, its proposed location, and an address where copies of the EIR are available and the period during which comments will be received. A form for this notice is provided in the Appendices. The Notice of Completion will provide the basis for information published by the Secretary for Resources in an EIR Monitor. Where the EIR will be reviewed through the State review process handled by the State Clearinghouse, the cover form required by the State Clearinghouse will serve as the Notice of Completion, and no Notice of Completion need be sent to the Resources Agency.

(d) **Public Review.** (1) After completing a draft EIR, the Lead Agency shall consult with and obtain comments from public agencies having jurisdiction by law with respect to the project and should consult with persons having special expertise with respect to any environmental impact involved. The Lead Agency shall provide the general public with an opportunity to comment on the EIR.

(2) The Lead Agency shall provide public notice of the completion of a draft EIR at the same time as it sends a Notice of Completion to the Resources Agency. Notice shall be given to all organizations and individuals who have previously requested such notice and shall also be given by at least one of the following procedures:

A. Publication, no fewer times than required by Section 6061 of the Government Code, by the public agency in a newspaper of general circulation in the area affected by the proposed project.

B. Posting of notice by the public agency on and off the site in the area where the project is to be located.

C. Direct mailing to owners of property contiguous to the project.

(3) The alternatives for providing notice specified in subsection (2) shall not preclude a public agency from providing additional notice by other means if such agency so desires, nor shall the requirements of this section preclude a public agency from providing the public notice required by this section at the same time and in the same manner as public notice otherwise required by law for such project.

(4) Public agencies shall use the State Clearinghouse to distribute EIRs and other environmental documents to state agencies for review and should use areawide clearinghouses to distribute the documents to regional and local agencies.

(5) To make copies of EIRs available to the public, Lead Agencies should furnish copies of draft EIRs to appropriate public library systems.

(6) Public agencies should compile listings of other agencies, particularly local agencies, which have jurisdiction by law and/or special expertise with respect to various projects and project locations. Such listings should be a guide in determining which agencies should be consulted with regard to a particular project.

(7) Public hearings may be conducted on the environmental documents, either in separate proceedings or in conjunction with other proceedings of the public agency.

(e) **Evaluation by Lead Agency.** The Lead Agency shall evaluate comments received from persons who reviewed the draft EIR.

(f) **Preparation of Final EIR.** The Lead Agency shall prepare a final EIR. The contents of a final EIR are specified in Section 15146 of these Guidelines.

(g) **Certification of Final EIR.** The final EIR shall be presented to the decision-making body of the Lead Agency. The Lead Agency shall certify that the final EIR has been completed in compliance with CEQA and the state guidelines and that the decision-making body or administrative official having final approval authority over the project has reviewed and considered the information contained in the EIR prior to the approval of the project.

(h) **Notice of Determination.** (1) After approving a project for which an EIR has been prepared, the Lead Agency shall file a Notice of Determination. Such notice shall include:

A. An identification of the project by its common name where possible;

B. The decision of the Lead Agency to approve or carry out the project;

C. The determination of the Lead Agency whether the project in its approved form will have a significant effect on the environment;

D. A brief statement of the mitigation measures which were adopted by the Lead Agency to reduce the impacts of the approved project; and

E. A statement that an EIR was prepared pursuant to the provisions of CEQA and was certified as required by Section 15085(g).

(2) If the Lead Agency is a state agency, the Notice of Determination shall be filed with the Secretary for Resources.

(3) If the Lead Agency is a local agency, the Notice of Determination shall be filed with the county clerk of the county or counties in which the project would be located. If the project requires discretionary approval from a state agency, the notice shall also be filed with the Secretary for Resources.

(4) The filing of the Notice of Determination starts a 30 day statute of limitations on court challenges to the approval under CEQA. (P.R.C. 21167(c))

(i) **Filing of Final EIR.** If the Lead Agency is a state agency, a copy of the final EIR shall be filed with the appropriate planning agency of any city, county, or city and county which will be affected by the project.

(j) **Use of Final EIR by Responsible Agencies.** Each responsible agency shall consider the Lead Agency's final EIR before acting upon or approving the project pursuant to Section 15064.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment of subsections (a), (b), (d), (g) and (h) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15086. EIR Combined with Existing Planning and Review Process. The EIR process should be combined with the existing planning, review, and project approval process being used by each public agency. The Lead Agency shall include the EIR as a part of the regular project report which is used in the existing review and budgetary process.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15087. Additional Notices. In their implementing procedures, public agencies may provide for the filing of notices in addition to the notices required or authorized by these Guidelines.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15088. Statement of Overriding Considerations. (a) Existing law requires public agencies to have reasons to support their decisions. Where agencies have taken action without preparing written reasons to support the decision based on information in the written record, courts have invalidated the action.

(b) Where the decision of the public agency allows the occurrence of substantial adverse environmental consequences identified in the final EIR, the agency must state in writing reasons to support its action based on the final EIR or other information in the record. This statement need not be contained in the EIR.

(c) The reasons to support an action described in Subsection (b) may be set forth in a Statement of Overriding Considerations. If such a statement is made, it should be included in the record of the project approval and may be attached to the Notice of Determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

Article 8. Categorical Exemptions

15100. Categorical Exemptions. Section 21084 of the Public Resources Code requires these Guidelines to include a list of classes of projects which have been determined not to have a significant effect on the environment and which shall, therefore, be exempt from the provisions of the Environmental Quality Act of 1970.

In response to that mandate, the Secretary for Resources has found that the following classes of projects listed in this article do not have a significant effect on the environment and they are declared to be categorically exempt from the requirement for the preparation of environmental documents.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15100.1. Relation to Ministerial Projects. Section 21080 of the Public Resources Code exempts from the application of CEQA those projects over which public agencies exercise only ministerial authority. Since ministerial projects are exempt under Section 15073 of these guidelines, Categorical Exemptions should be applied only where a project is not ministerial under a public agency's statutes and ordinances. The inclusion of activities which may be ministerial within the classes and examples contained in this article shall not be construed as a finding by the Secretary for Resources that such an activity is discretionary.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15100.2. Exceptions. (a) **Location.** Classes 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located—a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. Therefore, these classes are considered to apply in all instances, except where the project may impact on an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state or local agencies.

(b) **Cumulative Impact.** All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant—for example, annual additions to an existing building under Class 1.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15100.3. Revisions to List of Categorical Exemptions. Any public agency may, at any time, request that a new class of Categorical Exemptions be added, or an existing one amended or deleted. This request must be made in writing to the Office of Planning and Research and shall contain detailed information to support the request. The granting of such request shall be by amendment to these guidelines.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15100.4. Application by Public Agencies. Each public agency shall, in the course of establishing its own procedures, list those specific activities which fall within each of the exempt classes, subject to the qualification that these lists must be consistent with both the letter and the intent expressed in the classes. Public agencies may omit from their implementing procedures classes and examples that do not apply to their activities, but they may not require EIR's for projects described in the classes and examples in this article except under the provisions of Section 15100.2.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15101. Class 1: Existing Facilities. Class 1 consists of the operation, repair, maintenance or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that previously existing, including but not limited to:

(a) Interior or exterior alterations involving such things as interior partitions, plumbing, and electrical conveyances;

(b) Existing facilities of both investor and publicly owned utilities used to provide electric power, natural gas, sewerage, or other public utility services;

(c) Existing highways and streets, sidewalks, gutters, bicycle and pedestrian trails, and similar facilities except where the activity will involve removal of a scenic resource including a stand of trees, a rock outcropping, or an historic building.

(d) Restoration, or rehabilitation of deteriorated or damaged structures, facilities or mechanical equipment to meet current standards of public health and safety, unless it is determined that the damage was substantial and resulted from an environmental hazard such as earthquake, landslide or flood;

(e) Additions to existing structures provided that the addition will not result in an increase of more than 50 percent of the floor area of the structures before the addition or 2500 square feet, whichever is less;

(f) Addition of safety or health protection devices for use during construction of or in conjunction with existing structures, facilities or mechanical equipment, or topographical features including navigational devices;

(g) New copy on existing on and off-premise signs;

(h) Maintenance of existing landscaping, native growth and water supply reservoirs (excluding the use of economic poisons, as defined in Division 7, Chapter 2, California Agricultural Code);

(i) Maintenance of fish screens, fish ladders, wildlife habitat areas, artificial wildlife waterway devices, streamflows, springs and waterholes, and stream channels (clearing of debris) to protect fish and wildlife resources;

(j) Fish stocking by the California Department of Fish and Game;

(k) Division of existing multiple family rental units into condominiums;

(*l*) Demolition and removal of individual small structures listed in this subsection except where the structures are of historical, archaeological or architectural significance:

(1) Single family residences not in conjunction with the demolition of two or more units,

(2) Motels, apartments, and duplexes designed for not more than four dwelling units if not in conjunction with the demolition of two or more such structures,

(3) Stores, offices, and restaurants if designed for an occupant load of 20 persons or less, if not in conjunction with the demolition of two or more such structures,

(4) Accessory (appurtenant) structures including garages, carports, patios, swimming pools, and fences.

(m) Minor repairs and alterations to existing dams and appurtenant structures under the supervision of the Department of Water Resources.

History: 1. Amendment of subsections (b), (e), (f) and (*l*) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsection (c) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15102. Class 2: Replacement or Reconstruction. Class 2 consists of replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced, including but not limited to:

(a) Replacement or reconstruction of existing schools and hospitals to provide earthquake resistant structures which do not increase capacity more than 50%;

(b) Replacement of a commercial structure with a new structure of substantially the same size and purpose.

15103. Class 3: New Construction of Small Structures. Class 3 consists of construction and location of single, new, small facilities or structures and installation of small new equipment and facilities including but not limited to:

(a) Single family residences not in conjunction with the building of two or more such units;

(b) Motels, apartments, and duplexes designed for not more than four dwelling units if not in conjunction with the building of two or more such structures;

(c) Stores, offices, and restaurants if designed for an occupant load of 20 persons of less, if not in conjunction with the building of two or more such structures;

(d) Water main, sewage, electrical, gas and other utility extensions of reasonable length to serve such construction;

(e) Accessory (appurtenant) structures including garages, carports, patios, swimming pools and fences.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15104. Class 4: Minor Alterations to Land. Class 4 consists of minor public or private alterations in the condition of land, water and/or vegetation which do not involve removal of mature, scenic trees except for foresty and agricultural purposes. Examples include but are not limited to:

(a) Grading on land with a slope of less than 10 percent, except where it is to be located in a waterway, in any wetland, in an officially designated (by Federal, State or local governmental action) scenic area, or in officially mapped areas of severe geologic hazard.

(b) New gardening or landscaping.

(c) Filling of earth into previously excavated land with material compatible with the natural features of the site.

(d) Minor alterations in land, water and vegetation on existing officially designated wildlife management areas or fish production facilities which result in improvement of habitat for fish and wildlife resources or greater fish production;

(e) Minor temporary uses of land having negligible or no permanent effects on the environment, including carnivals, sales of Christmas trees, etc.

(f) Minor trenching and backfilling where the surface is restored.

(g) Maintenance dredging where the spoil is deposited in a spoil area authorized by all applicable state and federal regulatory agencies.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. New subsection (g) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15105. Class 5: Alterations in Land Use Limitations. Class 5 consists of minor alterations in land use limitations, except zoning, including but not limited to:

(a) Minor lot line adjustments, side yard and set back variances not resulting in the creation of any new parcel nor in any change in land use or density;

(b) Issuance of minor encroachment permits.

15106. Class 6: Information Collection. Class 6 consists of basic data collection, research, experimental management and resource evaluation activities which do not result in a serious or major disturbance to an environmental resource. These may be for strictly information gathering purposes, or as part of a study leading to an action which a public agency has not yet approved, adopted or funded.

15107. Class 7: Actions by Regulatory Agencies for Protection of Natural Resources. Class 7 consists of actions taken by regulatory agencies as authorized by state law or local ordinance to assure the maintenance, restoration, or enhancement of a natural resource where the regulatory process involves procedures for protection of the environment. Examples include but are not limited to wildlife preservation activities of the State Department of Fish and Game. Construction activities are not included in this exemption.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15108. Class 8: Actions by Regulatory Agencies for Protection of the Environment. Class 8 consists of actions taken by regulatory agencies, as authorized by state or local ordinance, to assure the maintenance, restoration, enhancement, or protection of the environment where the regulatory process involves procedures for protection of the environment. Construction activities are not included in this exemption.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15109. Class 9: Inspections. Class 9 consists of activities limited entirely to inspection, to check for performance of an operation, or quality, health or safety of a project, including related activities such as inspection for possible mislabeling, misrepresentation or adulteration of products.

15110. Class 10: Loans. Class 10 consists of loans made by the Department of Veterans Affairs under the Veterans Farm and Home Purchase Act of 1943, mortgages for the purchase of existing structures where the loan will not be used for new construction and the purchase of such mortgages by financial institutions. Class 10 includes but is not limited to the following examples:

(a) Loans made by the Department of Veterans Affairs under the Veterans Farm and Home Purchase Act of 1943.

(b) Purchases of mortgages from banks and mortgage companies by the Public Employees Retirement System and by the State Teachers Retirement System.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15111. Class 11: Accessory Structures. Class 11 consists of construction, or placement of minor structures accessory to (appurtenant to) existing commercial, industrial, or institutional facilities, including but not limited to:

(a) On-premise signs;
(b) Small parking lots.

15112. Class 12: Surplus Government Property Sales. Class 12 consists of sales of surplus government property except for parcels of land located in an area of statewide interest or potential area of critical concern as identified in the Governor's Environmental Goals and Policy Report prepared pursuant to Government Code Section 65041 *et seq.* However, if the surplus property to be sold is located in those areas identified in Governor's Environmental Goals and Policy Report, its sale is exempt if:

(a) The property does not have significant values for wildlife habitat or other environmental purposes, and

(b) Any of the following conditions exist:

(1) The property is of such size or shape that it is incapable of independent development or use, or

(2) The property to be sold would qualify for an exemption under any other class of categorical exemption in Article 8 of these guidelines, or

(3) The use of the property and adjacent property has not changed since the time of purchase by the public agency.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15113. Class 13: Acquisition of Lands for Wildlife Conservation Purposes. Class 13 consists of the acquisition of lands for fish and wildlife conservation purposes including preservation of fish and wildlife habitat, establishing ecological reserves under Fish and Game Code Section 1580, and preserving access to public lands and waters where the purpose of the acquisition is to preserve the land in its natural condition.

History: 1. Repealer and new section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15114. Class 14: Minor Additions to Schools. Class 14 consists of minor additions to existing schools within existing school grounds where the addition does not increase original student capacity by more than 25% or five classrooms, whichever is less. The addition of portable classrooms is included in this exemption.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Repealer and new section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15115. Class 15: Functional Equivalent of an EIR.

History: 1. New section filed 2-18-75 as an emergency; effective upon filing (Register 75, No. 8). For prior history, see Register 75, No. 1.
2. Repealer by operation of Section 11422.1(c) Gov. C. (Register 75, No. 44).

15116. Class 16: Transfer of Ownership of Land in Order to Create Parks. Class 16 consists of the acquisition or sale of land in order to establish a park where the land is in a natural condition or contains historic sites or archaeological sites and either:

(a) The management plan for the park has not been prepared, or

(b) The management plan proposes to keep the area in a natural condition or preserve the historic or archaeological site. CEQA will apply when a management plan is proposed that will change the area from its natural condition or significantly change the historic or archaeological site.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Repealer filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15117. Class 17: Open Space Contracts or Easements. Class 17 consists of the establishment of agricultural preserves, the making and renewing of open space contracts under the Williamson Act, or the acceptance of easements or fee interests in order to maintain the open space character of the area. The cancellation of such preserves, contracts, interests or easements is not included.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15118. Class 18: Designation of Wilderness Areas. Class 18 consists of the designation of wilderness areas under the California Wilderness System.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15119. Class 19: Annexations of Existing Facilities and Lots For Exempt Facilities. Class 19 consists of only the following annexations:

(a) Annexations to a city or special district of areas containing existing public or private structures developed to the density allowed by the current zoning or pre-zoning of either the gaining or losing governmental agency whichever is more restrictive, provided, however, that the extension of utility services to the existing facilities would have a capacity to serve only the existing facilities.

(b) Annexations of individual small parcels of the minimum size for facilities exempted by Section 15103, New Construction of Small Structures.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15120. Class 20: Changes in Organization of Local Agencies. Class 20 consists of changes in the organization or reorganization of local governmental agencies where the changes do not change the geographical area in which previously existing powers are exercised. Examples include but are not limited to:

(a) Establishment of a subsidiary district.

(b) Consolidation of two or more districts having identical powers.

(c) Merger with a city of a district lying entirely within the boundaries of the city.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176 Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

Article 9. Contents of Environmental Impact Reports

15140. General. (a) Environmental Impact Reports shall contain the information outlined in this article. Each element must be covered, and when these elements are not separated into distinct sections, the document shall state where in the document each element is discussed.

(b) Each report shall contain a brief summary of the proposed action and its consequences in language sufficiently simple that the issues can be understood by the average member of the lay public. The EIR shall also contain a table of contents or an index.

(c) The information contained in an EIR shall include summarized technical data, maps, plot plans, diagrams and similar relevant information sufficient to permit full assessment of significant environmental impacts by reviewing agencies and members of the public. Placement of highly technical and specialized analysis and data in the body of an EIR should be avoided through inclusion of supporting information and analyses as appendices to the main body of the EIR. Appendices to the EIR may be prepared in volumes separate from the basic EIR document but shall be available for public examination and shall be submitted to all clearinghouses which assist in public review.

(d) The EIR should be prepared using a systematic, interdisciplinary approach. The interdisciplinary analysis shall be conducted by competent individuals, but no single discipline shall be designated or required to undertake this evaluation. Preparation of EIRs is dependent upon information from many sources, including the engineering project report and many scientific documents relating to environmental features. The EIR shall reference all documents used in its preparation including where possible, a citation to the page and section number of any technical reports which were used as the basis for any statements in the EIR.

(e) The EIR should discuss environmental effects in proportion to their severity and probability of occurrence. Effects dismissed in an Initial Study as clearly insignificant and unlikely to occur need not be discussed further in the EIR unless the Lead Agency subsequently receives information inconsistent with the finding in the Initial Study. A copy of the Initial Study shall be attached to the EIR to provide the basis for limiting the impacts discussed.

(f) An EIR shall contain a statement briefly indicating the reasons for determining that various effects of a project that could possibly be considered significant were not found to be significant and consequently were not discussed in detail in the EIR.

(g) Drafting an EIR necessarily involves some degree of forecasting. While foreseeing the unforeseeable is not possible, an agency must use its best efforts to find out and disclose all that it reasonably can.

(h) If, after thorough investigation, a Lead Agency finds that a particular impact is too speculative for evaluation, the agency should note its conclusion and terminate discussion of the impact.

History: 1. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15141. Description of Project. The description of the project shall contain the following information but should not supply extensive detail beyond that needed for evaluation and review of the environmental impact.

(a) The precise location and boundaries of the proposed project shall be shown on a detailed map, preferably topographic. The location of the project shall also appear on a regional map.

(b) A statement of the objectives sought by the proposed project.

(c) A general description of the project's technical, economic, and environmental characteristics, considering the principal engineering proposals and supporting public service facilities.

History: 1. Amendment of subsection (c) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15142. Description of Environmental Setting. An EIR must include a description of the environment in the vicinity of the project, as it exists before commencement of the project, from both a local and regional perspective. Knowledge of the regional setting is critical to the assessment of environmental impacts. Special emphasis should be placed on environmental resources that are rare or unique to that region. Specific reference to related projects, both public and private, both existent and planned, in the region should also be included, for purposes of examining the possible cumulative impact of such projects.

15143. Environmental Impact. All phases of a project must be considered when evaluating its impact on the environment: planning, acquisition, development and operation. The following subjects shall be discussed, preferably in separate sections or paragraphs. If they are not discussed separately, the EIR shall include a table showing where each of the subjects is discussed.

(a) **The Significant Environmental Effects of the Proposed Project:** Describe the direct and indirect significant effects of the project on the environment, giving due consideration to both the short-term and long-term effects.

It should include relevant specifics of the area, the resources involved, physical changes, alterations to ecological systems and changes induced in population distribution, population concentration, the human use of the land (including commercial and residential development) and other aspects of the resource base such as water, scenic quality and public services.

(b) **Any Significant Environmental Effects Which Cannot Be Avoided if the Proposal is Implemented:** Describe any significant impacts, including those which can be reduced to an insignificant level but not eliminated. Where there are impacts that cannot be alleviated without imposing an alternative design, their implications and the reasons why the project is being proposed, notwithstanding their effect, should be described. Describe significant impacts on any aesthetically valuable surroundings, or on human health.

(c) **Mitigation Measures Proposed to Minimize the Significant Effects:** Describe significant, avoidable, adverse impacts, including inefficient and unnecessary consumption of energy, and measures to minimize these impacts. The discussion of mitigation measures shall distinguish between the measures which are proposed by project proponents to be included in the project and other measures that are not included but could reasonably be expected to reduce adverse impacts. This discussion shall include an identification of the acceptable levels to which such impacts will be reduced, and the basis upon which such levels were identified. Where several measures are available to mitigate an impact, each should be discussed and the basis for selecting a particular measure should be identified. Energy conservation measures, as well as other appropriate mitigation measures, shall be discussed when relevant. Examples of energy conservation measures are provided in Appendix F.

(d) **Alternatives to the Proposed Action:** Describe all reasonable alternatives to the project, or to the location of the project, which could feasibly attain the basic objectives of the project, and why they were rejected in favor of the ultimate choice. The specific alternative of "no project" must also always be evaluated, along with the impact. The discussion of alternatives shall include alternatives capable of substantially reducing or eliminating any significant environmental effects, even if these alternatives substantially impede the attainment of the project objectives, and are more costly.

(e) **The Relationship Between Local Short-Term Uses of Man's Environment and the Maintenance and Enhancement of Long-Term Productivity:** Describe the cumulative and long-term effects of the proposed project which adversely affect the state of the environment. Special attention should be given to impacts which narrow the range of beneficial uses of the environment or pose long-term risks to health or safety. In addition, the reasons why the proposed project is believed by the sponsor to be justified now, rather than reserving an option for further alternatives, should be explained.

(f) **Any Significant Irreversible Environmental Changes Which Would Be Involved in the Proposed Action Should It Be Implemented:** Uses of nonrenewable resources during the initial and continued phases of the project may be irreversible since a large commitment of such resources makes removal or nonuse thereafter unlikely. Primary impacts and, particularly, secondary impacts (such as a highway improvement which provides access to a nonaccessible area) generally commit future generations to similar uses. Also irreversible damage can result from environmental accidents associated with the project. Irretrievable commitments of resources should be evaluated to assure that such current consumption is justified.

(g) **The Growth-Inducing Impact of the Proposed Action:** Discuss the ways in which the proposed project could foster economic or population growth, either directly or indirectly, in the surrounding environment. Included in this are projects which would remove obstacles to population growth (a major expansion of a waste water treatment plant might, for example, allow for more construction in service areas). Increases in the population may further tax existing community service facilities so consideration must be given to this impact. Also discuss the characteristic of some projects which may encourage and facilitate other activities that could significantly affect the environment, either individually or cumulatively. It must not be assumed that growth in any area is necessarily beneficial, detrimental, or of little significance to the environment.

History: 1. Amendment filed 12-31-74 as an emergency; designated effective 1-7-75 (Register 75, No. 1).
2. Certificate of Compliance filed 4-29-75 (Register 75, No. 18).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15143.5. Effects Found Not to be Significant. An EIR shall contain a statement briefly indicating the reasons that various possibly significant effects of a project were determined not to be significant and were therefore not discussed in detail in the EIR. Such a statement may be contained in an attached copy of an Initial Study.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15144. Organizations and Persons Consulted. The identity of all federal, state or local agencies, other organizations and private individuals consulted in preparing the EIR, and the identity of the persons, firm or agency preparing the EIR, by contract or other authorization must be given.

15145. Water Quality Aspects. Describe in the environmental setting section, and other sections where applicable, water quality aspects of the proposed project which have been previously certified by the appropriate state or interstate organization as being in substantial compliance with applicable water quality standards.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15146. Contents of Final Environmental Impact Report. (a) The Final EIR shall consist of:

(1) The Draft EIR or a revision of the draft.

(2) Comments and recommendations received on the Draft EIR either verbatim or in summary.

(3) A list of persons, organizations and public agencies commenting on the Draft EIR.

(4) The responses of the Lead Agency to significant environmental points raised in the review and consultation process.

(b) The response of the Lead Agency to comments received may take the form of a revision of the Draft EIR or may be an attachment to the Draft EIR. The response shall describe the disposition of significant environmental issues raised (e.g., revisions to the proposed project to mitigate anticipated impacts or objections). In particular the major issues raised when the Lead Agency's position is at variance with recommendations and objections raised in the comments must be addressed in detail giving reasons why specific comments and suggestions were not accepted, and factors of overriding importance warranting an override of the suggestions.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing (Register 73, No. 50)

2. Amendment of subsection (a) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15147. Degree of Specificity. The degree of specificity required in an EIR will correspond to the degree of specificity involved in the underlying activity which is described in the EIR.

(a) An EIR on a construction project will necessarily be more detailed in the specific effects of the project than will be an EIR on the adoption of a local general plan or comprehensive zoning ordinance because the effects of the construction can be predicted with greater accuracy.

(b) An EIR on projects such as the adoption or amendment of a comprehensive zoning ordinance or a local general plan should focus on the secondary effects that can be expected to follow from the adoption, but the EIR need not be as detailed as an EIR on the specific construction projects that might follow.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Renumbering and amendment of subsection (c) to Section 15148 filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15148. EIR as Part of General Plan. (a) The requirements for an EIR on a local general plan, element or amendment thereof will be satisfied by the general plan or element document, and no separate EIR will be required, if:

(1) the general plan addresses all the points required to be in an EIR by Article 9 of these Guidelines and

(2) the document contains a special section or a cover sheet identifying where the general plan document addresses each of the points required.

(b) The Lead Agency for the general plan, element, or amendment shall forward the appropriate documents to the State Clearinghouse for State review.

History: 1. New Section 15148 filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15149. Incorporation by Reference. (a) An EIR may incorporate by reference all or portions of another document which is a matter of public record or is generally available to the public. Where all or part of another document is incorporated by reference, the incorporated language shall be considered to be set forth in full as part of the text of the EIR.

(b) Where part of another document is incorporated by reference, such other document shall be made available to the public for inspection at a public place or public building. The EIR shall state where the incorporated documents will be available for inspection. At a minimum, the incorporated document shall be made available to the public in an office of the Lead Agency in the county where the project would be carried out or in one or more public buildings such as county offices or public libraries if the Lead Agency does not have an office in the county.

(c) Where an EIR uses incorporation by reference, the incorporated part of the referenced document shall be briefly summarized where possible or briefly described if the data or information cannot be summarized. The relationship between the incorporated part of the referenced document and the EIR shall be described.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15150. Standards for Adequacy of an EIR. An EIR should be prepared with a sufficient degree of analysis to provide decision makers with information which enables them to make a decision which intelligently takes account of environmental consequences. An evaluation of the environmental effects of a proposed project need not be exhaustive, but the sufficiency of an EIR is to be reviewed in the light of what is reasonably feasible. Disagreement among experts does not make an EIR inadequate. The courts have looked not for perfection but for adequacy, completeness, and a good faith effort at full disclosure.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

Article 10. Evaluation of Environmental Impact Reports

15160. Adequate Time for Review and Comment. The lead agency should provide adequate time for other public agencies and members of the public to review and comment on an EIR that it has prepared.

(a) Public agencies may establish time periods for review in their implementing procedures and shall notify the public and others described in Sections 15085 (b) and (d) of these Guidelines of the time for receipt of comments on EIR's.

(b) In setting time periods for review, public agencies shall give consideration to their obligation to obtain comments from public agencies having jurisdiction by law with respect to the project and to the policy favoring public participation.

(c) In order to provide sufficient time for public review, review periods for draft EIRs should not be less than 30 days nor longer than 90 days except in unusual situations. The review period for draft EIRs for which a state agency is the Lead Agency or a Responsible Agency shall be at least 45 days unless a shorter period is approved by the State Clearinghouse.

(d) A review period for an EIR does not require a halt in other planning activities related to a project. Planning should continue in conjunction with environmental evaluation.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing Certificate of Compliance included. (Register 73, No. 50).
2. Amendment of subsections (a) and (c) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment of subsection (c) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15160.5. Purpose of Review. The legally required preparation, review and comment procedures for environmental documents provide the opportunity for citizens, all professional disciplines, and public agencies to evaluate critically the environmental document and the manner in which technical data are used.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15161. Review of Environmental Impact Reports. (a) Public agencies must develop procedures for reviewing EIR's which Lead Agencies submit to them for comments.

(b) Cities and counties should compile listings of other agencies, particularly local agencies, which have jurisdiction by law and/or special expertise with respect to various projects and project locations. Such listings should be a guide in determining which agencies should be consulted with regard to a particular project.

(c) Reviewers should focus on the sufficiency of the EIR in discussing possible impacts upon the environment, ways in which adverse effects might be minimized, and alternatives to the project, in light of the intent of the Act to provide decision-makers with useful information about such factors. Public agencies reviewing projects should explain the basis for their comments, and whenever possible, should submit data or references in support of such comments.

(d) Upon completion of reviewing an EIR, it is suggested that reviewing agencies supply the Lead Agency with the name of a contact person who is available for later consultation should this prove necessary.

History: 1. Amendment of subsections (a) and (b) and new subsection (e) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsections (a), (b), and (d), and repealer of subsection (e) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment of subsection (c) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15161.5. Review by State Agencies. (a) EIR's and Negative Declarations to be reviewed by state agencies shall be submitted to the State Clearinghouse, 1400 Tenth Street, Sacramento, California 95814.

(b) The following environmental documents shall be submitted to the State Clearinghouse for review by state agencies:

(1) Draft EIR's and Negative Declarations prepared by a state agency where such agency is a Lead Agency.

(2) Draft EIR's and Negative Declarations prepared by a public agency where a state agency is a Responsible Agency or otherwise has jurisdiction by law with respect to the project.

(3) Draft EIS's and Negative Declarations prepared pursuant to NEPA, the Federal Guidelines (Title 40 CFR, Part 1500, commencing with Section 1500.1) and Parts I and II of Office of Management and Budget Circular A-95.

(c) Public agencies may send environmental documents to the State Clearinghouse for review where a state agency has special expertise with regard to the environmental impacts involved.

(d) When an EIR is submitted to the State Clearinghouse, the review period set by the Lead Agency shall be at least as long as the period provided in the state review system operated by the State Clearinghouse. In exceptional circumstances, The State Clearinghouse may set shorter review periods when requested by the Lead Agency.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15162. Failure to Comment. If any public agency or person who is consulted with regard to an EIR fails to comment within a reasonable time as specified by the Lead Agency, it shall be assumed, absent a request for a specific extension of time, that such agency or person has no comment to make.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15163. Requests for Environmental Documents. (a) The Lead Agency, after preparing an EIR or other environmental document described in these Guidelines, is responsible for making such documents available to the public for inspection. Members of the general public requesting copies of the EIR may be charged for the actual cost of reproducing that copy.

(b) The Lead Agency should file draft EIR's in appropriate public library systems in order to improve public access to the draft EIR.

History: 1. Amendment and new subsection (b) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15164. Public Participation. While the Environmental Quality Act of 1970 does not require formal public hearings at any stage of the environmental review procedure, it is a widely accepted desirable goal of this process to encourage public participation. All public agencies adopting implementing procedures in response to these Guidelines should make provisions in their procedures for wide public involvement, formal and informal, consistent with their existing activities and procedures, in order to properly receive and evaluate public reactions, adverse and favorable, based on environmental issues.

15165. Public Hearings. (a) A public hearing on the environmental impact of a project should usually be held when the lead agency determines it would facilitate the purposes and goals of the CEQA and these Guidelines to do so. The hearing may be held in conjunction with and as a part of normal planning activities. To as great a degree as possible, these hearings should include comments from reviewing agencies made pursuant to these Guidelines.

(b) A Draft EIR should be used as a basis for discussion at a public hearing. The hearing may be held at a place where public hearings are regularly conducted by the lead agency or at another location expected to be convenient to the public.

(c) Notice shall be given of all public hearings in a timely manner. This notice may be given in the same form and time as notice for other regularly conducted public hearings of the public agency.

(d) A public agency may include, in its implementing procedures, procedures for the conducting of public hearings pursuant to this section, which procedures may be consistent with already existing hearing and notice requirements of the public agency for regularly conducted legislative, planning and other proceedings.

(e) There is no requirement for a public agency to conduct a public hearing in connection with its review of an EIR prepared by another public agency.

History: 1. Amendment of subsections (a) and (b) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15166. Retention and Availability of Comments. Comments received through the consultation process shall be kept on file for a reasonable period and available for public inspection at an address given in the Final EIR. Comments which may be received independently of the review of the Draft EIR shall also be considered and kept on file.

15167. Comments on Initiative of Public Agencies. Every public agency may comment on environmental documents dealing with projects which affect resources with which the agency has special expertise regardless of whether its comments were solicited.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

Article 11. EIR Monitor

15180. EIR Monitor. The Secretary for Resources will provide for publication of a bulletin entitled "California EIR Monitor" on a subscription basis to provide public notice of amendments to the Guidelines, the completion of draft EIRs and other matters as deemed appropriate. Inquiries and subscription requests should be sent to the following address:

Secretary for Resources
Attention: California EIR Monitor
1416 Ninth Street, Room 1311
Sacramento, California 95814

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New Article 11 (Section 15180) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

Article 12. Exemption for Certified State Regulatory Programs

15190. General. Section 21080.5 of the Public Resources Code provides that a regulatory program of a state agency shall be certified by the Secretary for Resources as being exempt from the requirements for preparing EIRs, Negative Declarations, and Initial Studies if the Secretary finds that the program meets the criteria contained in that code section.

NOTE: Authority cited: Sections 21080.5, 21083, 21087, Public Resources Code. Reference: Section 21080.5, Public Resources Code.

History: 1. New Article 12 (Sections 15190–15192) filed 1-6-76 as an emergency; effective upon filing (Register 76, No. 2).
2. Certificate of Compliance filed 4-2-76 (Register 76, No. 14).

15191. Notices. Notices filed with the Secretary for Resources related to programs exempted by this article shall:
(a) Be available for public inspection.
(b) Be posted in a weekly list in the office of the Resources Agency.
(c) Remain posted for a period of 30 days.

15192. List of Exempt Programs. The following programs of state regulatory programs have been certified by the Secretary for Resources as meeting the requirements of Section 21080.5:
(a) The regulation of private timber harvesting operations by the California Division of Forestry and the State Board of Forestry pursuant to Chapter 8, commencing with Section 4511 of Part 2 of Division 4 of the Public Resources Code.

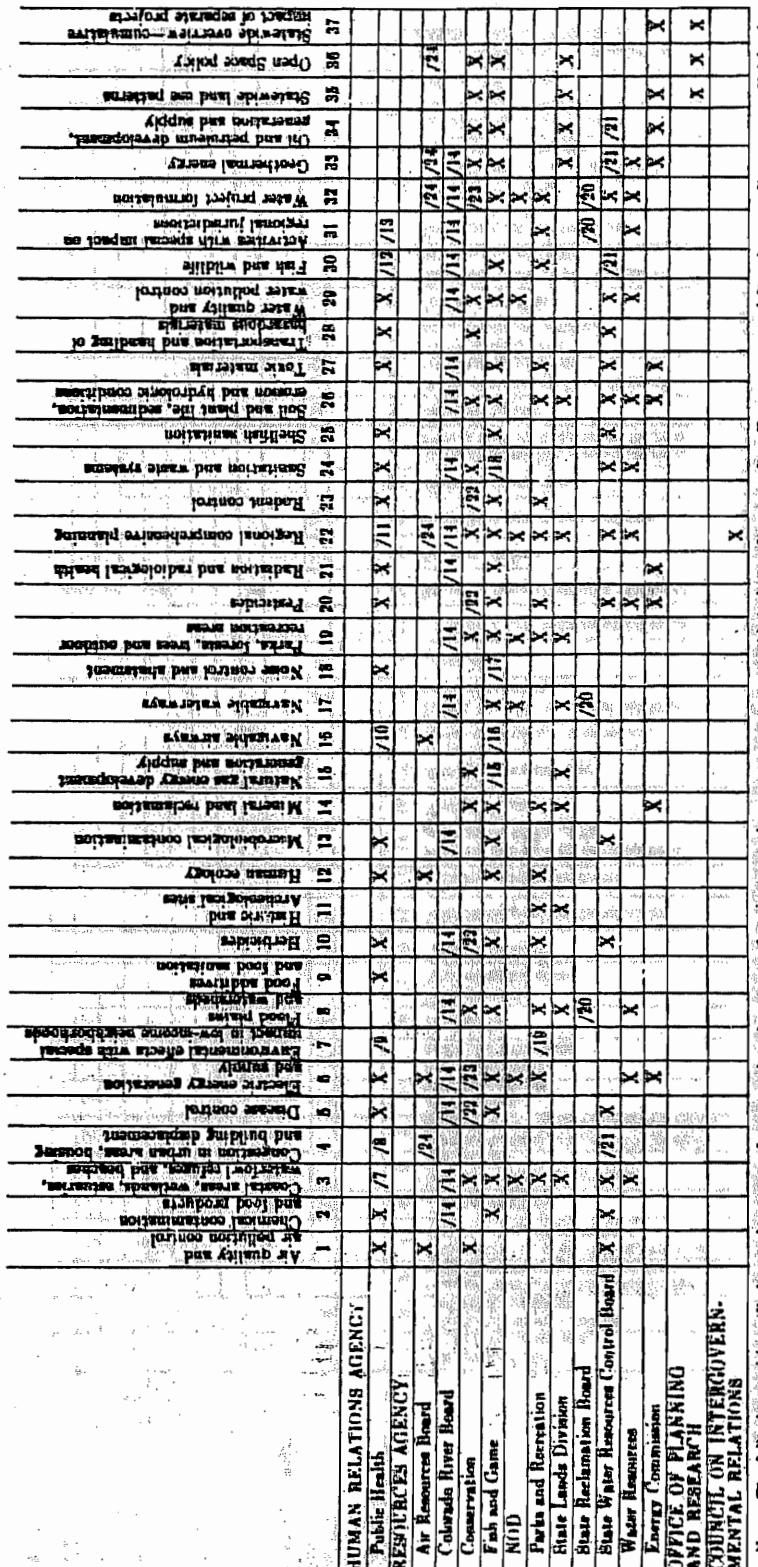
* See Appendix B footnotes.



Note: The following entities will also receive reports for review but their areas of environmental concern are not yet established: San Francisco Bay Conservation and Development Commission, California Tahoe Regional Planning Agency and Wildlife Conservation Board.

History: 1. Amendment of Appendix B filed 12-15-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of Appendix B filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

APPENDIX B FOOTNOTES

No.

1. **Agriculture**—(1) Air quality and air pollution control
   Effects on plants and animals
2. **Agriculture**—(12) Human Ecology
   Protection of food and fibre
3. **Agriculture**—(24) Sanitation and waste systems
   Agriculture, dairy and feed lot systems
4. **Agricultural**—(28) Transportation and handling of hazardous materials
   As pertains to transportation, handling, storage and decontamination of pesticides.
5. **Agriculture**—(30) Fish and wildlife
   Pesticide effects, predatory animal control, bird control
6. **CHP**—(1) Air quality and air pollution control
   Enforcement of motor vehicle regulations
7. **Public Health**—(3) Coastal areas, wetlands, etc.
   Beach sanitation, water pollution, solid waste and mosquito control
8. **Public Health**—(4) Congestion in urban areas, housing and building displacement
   Pertains to health component
9. **Public Health**—(7) Environmental effects with special impact in low-income neighborhoods
   Most of these are strongly related to health
10. **Public Health**—(16) Navigable airways
    Pertains to noise
11. **Public Health**—(22) Regional comprehensive planning
    Pertains to personal and environmental health components
12. **Public Health**—(30) Wildlife
    As it may pertain to human health hazards
13. **Public Health**—(31) Activities with special impact on regional jurisdictions
    Pertains to comprehensive health planning
14. **Colorado River Board**—(2), (3), (5), (6), (8), (10), (13), (17), (19), (21), (22), (24), (26), (27), (29), (30), (31), (32) and (33).
    As pertains to the Colorado, New and Alamo Rivers
15. **Fish and Game**—(15) Natural gas energy development, generation and supply
    As field development and distribution systems may affect fish and wildlife
16. **Fish and Game**—(16) Navigable airways
    As may affect migrating and resident wildlife
17. **Fish and Game**—(18) Noise control and abatement
    As excessive noise may affect wildlife
18. **Fish and Game**—(24) Sanitation and waste systems
    As water quality may affect fish and wildlife
19. **Parks and Recreation**—(7) Environmental effects with special impact in low-income neighborhoods
    In impacted areas only
20. **Reclamation Board**—(8), (17), (31) and (32)
    In areas of Board's jurisdiction only
21. **State Water Resources Control Board**—(4), (30), (33) and (34)
    As may pertain to water quality
22. **Conservation**—(5), (10), (20) and (23)
    With respect to forest land

23. **Conservation**—(6) and (32)
As related to fire protection or State (fire protection) responsibility land
24. **Air Resources Board**—(4), (22), (32), (33) and (36)
As may pertain to residential, commercial, industrial or transportation growth

Contact Person Area Code Phone Extension

History: 1. Amendment of Appendix C filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

Appendix D

NOTICE OF DETERMINATION

TO: ☐ Secretary for Resources
1416 Ninth Street, Room 1311
Sacramento, California 95814

☐ County Clerk
County of _____

FROM: (Lead Agency) _____

SUBJECT: Filing of Notice of Determination in compliance with Section 21108 or 21152 of the Public Resources Code

Project Title

State Clearinghouse Number (If submitted to State Clearinghouse)

Contact Person Telephone Number

Project Location

Project Description

This is to advise that the _____
(Lead Agency)
has made the following determinations regarding the above described project:

1. The project has been ☐ approved ☐ disapproved by the Lead Agency.
2. The project ☐ will ☐ will not have a significant effect on the environment.
3. ☐ An Environmental Impact Report was prepared for this project pursuant to the provisions of CEQA.
   ☐ A Negative Declaration was prepared for this project pursuant to the provisions of CEQA. A copy of the Negative Declaration is attached.

Date Received for Filing_____

Signature

Title

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New Appendix D filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Repealer and new Appendix D filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

History: 1. New Appendix E filed 3-26-74 as an emergency; effective upon filing. (Register 74, No. 13).
2. Certificate of Compliance filed 6-26-74 (Register 74, No. 26).
3. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

Appendix F

ENERGY CONSERVATION

I. Introduction

The goal of conserving energy implies the wise and efficient use of energy. The means of achieving this goal include:

(1) decreasing overall per capita energy consumption,
(2) decreasing reliance on natural gas and oil, and
(3) increasing reliance on renewable energy sources.

In order to assure that energy implications are considered in project decisions, the California Environmental Quality Act requires that EIRs include a discussion of the potential energy impacts of proposed projects, with particular emphasis on avoiding or reducing inefficient, wasteful and unnecessary consumption of energy.

Energy conservation implies that a project's cost effectiveness be reviewed not only in dollars, but also in terms of energy requirements. For many projects, lifetime costs may be determined more by energy efficiency than by initial dollar costs.

II. EIR Contents

Potentially significant energy implications of a project should be considered in an EIR. The following list of energy impact possibilities and potential conservation measures is designed to assist in the preparation of an EIR. In many instances specific items may not apply or additional items may be needed.

A. Project Description may include the following items:

1. Energy consuming equipment and processes which will be used during construction, operation and/or removal of the project. If appropriate, this discussion should consider the energy intensiveness of materials and equipment required for the project.
2. Total energy requirements of the project by fuel type and end use.
3. Energy conservation equipment and design features.
4. Initial and life-cycle energy costs or supplies.

B. Environmental Setting may include existing energy supplies and energy use patterns in the region and locality.

C. Environmental Impacts may include:

1. The project's energy requirements and its energy use efficiencies by amount and fuel type for each stage of the project's life cycle including construction, operation, maintenance and/or removal. If appropriate, the energy intensiveness of materials may be discussed.
2. The effects of the project on local and regional energy supplies and on requirements for additional capacity.
3. The effects of the project on peak and base period demands for electricity and other forms of energy.
4. The degree to which the project complies with existing energy standards.
5. The effects of the project on energy resources.

D. Mitigation Measures may include:

1. Potential measures to reduce wasteful, inefficient and unnecessary consumption of energy during construction, operation, maintenance and/or removal. The discussion should explain why certain measures were incorporated in the project and why other measures were dismissed.
2. The potential of siting, orientation, and design to minimize energy consumption.
3. The potential for reducing peak energy demand.
4. Alternate fuels (particularly renewable ones) or energy systems.
5. Energy conservation which could result from recycling efforts.

E. Alternatives should be compared in terms of overall energy consumption and in terms of reducing wasteful, inefficient and unnecessary consumption of energy.

F. Unavoidable Adverse Effects may include wasteful, inefficient and unnecessary consumption of energy during the project construction, operation, maintenance and/or removal that cannot be feasibly mitigated.

G. Irreversible Commitment of Resources may include a discussion of how the project preempts future energy development or future energy conservation.

H. Short-Term Gains versus Long-Term Impacts can be compared by calculating the energy costs over the lifetime of the project.

I. Growth Inducing Effects may include the estimated energy consumption of growth induced by the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176. Public Resources Code.

History: 1. New Appendix F filed 12-31-74 as an emergency; designated effective 1-7-75 (Register 75, No. 1).
2. Certificate of Compliance filed 4-29-75 (Register 75, No. 18).
3. Repealer and new Appendix F filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designates that compliance with this appendix is authorized but not mandatory before 1-1-77.

Appendix G

SIGNIFICANT EFFECTS

A project will normally have a significant effect on the environment if it will:

(a) Conflict with adopted environmental plans and goals of the community where it is located;

(b) Have a substantial, demonstrable negative aesthetic effect;

(c) Substantially affect a rare or endangered species of animal or plant or the habitat of the species;

(d) Interfere substantially with the movement of any resident or migratory fish or wildlife species;

(e) Breach published national, state, or local standards relating to solid waste or litter control;

(f) Substantially degrade water quality;

(g) Contaminate a public water supply;

(h) Substantially degrade or deplete ground water resources;

(i) Interfere substantially with ground water recharge;

(j) Disrupt or alter an archaeological site over 200 years old, an historic site or a paleontological site except as part of a scientific study of the site;

(k) Induce substantial growth or concentration of population;

(l) Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system;

(m) Displace a large number of people;

(n) Encourage activities which result in the use of large amounts of fuel or energy;

(o) Use fuel or energy in a wasteful manner;

(p) Increase substantially the ambient noise levels for adjoining areas;

(q) Cause substantial flooding, erosion or siltation;

(r) Expose people or structures to major geologic hazards;

(s) Extend a sewer trunk line with capacity to serve new development;

(t) Substantially diminish habitat for fish, wildlife or plants;

(u) Disrupt or divide the physical arrangement of an established community;

(v) Create a public health hazard or a potential public health hazard;

(w) Conflict with established recreational, educational, religious or scientific uses of the area;

(x) Violate any ambient air quality standard, contribute substantially to an existing or projected air quality violation, or expose sensitive receptors to substantial pollutant concentrations.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New Appendix G filed 10-8-76; effective thirtieth day thereafter (Register 76, No 41). Note: Order designated that compliance with this appendix is authorized but not mandatory before 1-1-77.

Appendix H

ENVIRONMENTAL INFORMATION FORM

(To be completed by applicant)

Date Filed _____

GENERAL INFORMATION

1. Name and address of developer or project sponsor: _____

2. Address of project: _____
Assessor's Block and Lot Number _____

3. Name, address, and telephone number of person to be contacted concerning this project: _____

4. Indicate number of the permit application for the project to which this form pertains: _____

5. List and describe any other related permits and other public approvals required for this project, including those required by city, regional, state and federal agencies: _____

6. Existing zoning district: _____

7. Proposed use of site (Project for which this form is filed):

PROJECT DESCRIPTION

8. Site size.
9. Square footage.
10. Number of floors of construction.
11. Amount of off-street parking provided.
12. Attach plans.
13. Propose scheduling.
14. Associated projects.
15. Anticipated incremental development.
16. If residential, include the number of units, schedule of unit sizes, range of sale prices or rents, and type of household size expected.
17. If commercial, indicate the type, whether neighborhood, city or regionally oriented, square footage of sales area, and loading facilities.
18. If industrial, indicate type, estimated employment per shift, and loading facilities.
19. If institutional, indicate the major function, estimated employment per shift, estimated occupancy, loading facilities, and community benefits to be derived from the project.
20. If the project involves a variance, conditional use or rezoning application, state this and indicate clearly why the application is required.

Are the following items applicable to the project or its effects? Discuss below all items checked yes (attach additional sheets as necessary).

YES	NO	
___	___	21. Change in existing features of any bays, tidelands, beaches, lakes or hills, or substantial alteration of ground contours.
___	___	22. Change in scenic views or vistas from existing residential areas or public lands or roads.
___	___	23. Change in pattern, scale or character of general area of project.

YES NO

___ ___ 24. Significant amounts of solid waste or litter.

___ ___ 25. Change in dust, ash, smoke, fumes or odors in vicinity.

___ ___ 26. Change in ocean, bay, lake, stream or ground water quality or quantity, or alteration of existing drainage patterns.

___ ___ 27. Substantial change in existing noise or vibration levels in the vicinity.

___ ___ 28. Site on filled land or on slope of 10 percent or more.

___ ___ 29. Use of disposal of potentially hazardous materials, such as toxic substances, flammables or explosives.

___ ___ 30. Substantial change in demand for municipal services (police, fire, water, sewage, etc.).

___ ___ 31. Substantially increase fossil fuel consumption (electricity, oil, natural gas, etc.).

___ ___ 32. Relationship to a larger project or series of projects.

ENVIRONMENTAL SETTING

33. Describe the project site as it exists before the project, including information on topography, soil stability, plants and animals, and any cultural, historical or scenic aspects. Describe any existing structures on the site, and the use of the structures. Attach photographs of the site. Snapshots or polaroid photos will be accepted.

34. Describe the surrounding properties, including information on plants and animals and any cultural, historical or scenic aspects. Indicate the type of land use (residential, commercial, etc.), intensity of land use (one-family, apartment houses, shops, department stores, etc.), and scale of development (height, frontage, set-back, rear yard, etc.). Attach photographs of the vicinity. Snapshots or polaroid photos will be accepted.

CERTIFICATION: I hereby certify that the statements furnished above and in the attached exhibits present the data and information required for this initial evaluation to the best of my ability, and that the facts, statements, and information presented are true and correct to the best of my knowledge and belief.

Date _____ _____

(Signature)

For _____

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New Appendix H filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 40). Note: Order designates that compliance with this appendix is authorized but not mandatory before 1-1-77.

Appendix I

ENVIRONMENTAL CHECKLIST FORM

(To be completed by Lead Agency)

I. BACKGROUND.

1. Name of Proponent _____
2. Address and Phone Number of Proponent:

_____

_____

_____

3. Date of Checklist Submitted _____
4. Agency Requiring Checklist _____
5. Name of Proposal, if applicable _____

_____

II. ENVIRONMENTAL IMPACTS

(Explanations of all "yes" and "maybe" answers are required on attached sheets.)

	YES	MAYBE	NO
1. **Earth.** Will the proposal result in:			
a. Unstable earth conditions or in changes in geologic substructures?	___	___	___
b. Disruptions, displacements, compaction or overcovering of the soil?	___	___	___
c. Change in topography or ground surface relief features?	___	___	___
d. The destruction, covering or modification of any unique geologic or physical features?	___	___	___
e. Any increase in wind or water erosion of soils, either on or off the site?	___	___	___
f. Changes in deposition or erosion of beach sands, or changes in siltation, deposition or erosion which may modify the channel of a river or stream or the bed of the ocean or any bay, inlet or lake?	___	___	___
g. Exposure of people or property to geologic hazards such as earthquakes, landslides, mudslides, ground failure, or similar hazards?			
2. **Air.** Will the proposal result in:			
a. Substantial air emissions or deterioration of ambient air quality?	___	___	___
b. The creation of objectionable odors?	___	___	___
c. Alteration of air movement, moisture or temperature, or any change in climate, either locally or regionally?	___	___	___
3. **Water.** Will the proposal result in:			
a. Changes in currents, or the course or direction of water movements, in either marine or fresh waters?	___	___	___
b. Changes in absorption rates, drainage patterns or the rate and amount of surface water runoff?	___	___	___
c. Alterations to the course or flow of flood waters?	___	___	___
d. Change in the amount of surface water in any water body?	___	___	___

	YES	MAYBE	NO
e. Discharge into surface waters, or in any alteration of surface water quality, including but not limited to temperature, dissolved oxygen or turbidity?	___	___	___
f. Alteration of the direction or rate of flow of ground waters?	___	___	___
g. Change in the quantity of ground waters, either through direct additions or withdrawals, or through interception of an aquifer by cuts or excavations?	___	___	___
h. Substantial reduction in the amount of water otherwise available for public water supplies?	___	___	___
i. Exposure of people or property to water related hazards such as flooding or tidal waves?	___	___	___
4. **Plant Life.** Will the proposal result in:			
a. Change in the diversity of species, or number of any species of plants (including trees, shrubs, grass, crops, microflora and aquatic plants)?	___	___	___
b. Reduction of the numbers of any unique, rare or endangered species of plants?	___	___	___
c. Introduction of new species of plants into an area, or in a barrier to the normal replenishment of existing species?	___	___	___
d. Reduction in acreage of any agricultural crop?	___	___	___
5. **Animal Life.** Will the proposal result in:			
a. Change in the diversity of species, or numbers of any species of animals (birds, land animals including reptiles, fish and shellfish, benthic organisms, insects or microfauna)?	___	___	___
b. Reduction of the numbers of any unique, rare or endangered species of animals?	___	___	___
c. Introduction of new species of animals into an area, or result in a barrier to the migration or movement of animals?	___	___	___
d. Deterioration to existing fish or wildlife habitat?	___	___	___
6. **Noise.** Will the proposal result in:			
a. Increases in existing noise levels?	___	___	___
b. Exposure of people to severe noise levels?	___	___	___
7. **Light and Glare.** Will the proposal produce new light or glare?	___	___	___
8. **Land Use.** Will the proposal result in a substantial alteration of the present or planned land use of an area?	___	___	___
9. **Natural Resources.** Will the proposal result in:			
a. Increase in the rate of use of any natural resources?	___	___	___
b. Substantial depletion of any nonrenewable natural resource?	___	___	___
10. **Risk of Upset.** Does the proposal involve a risk of an explosion or the release of hazardous substances (including, but not limited to, oil, pesticides, chemicals or radiation) in the event of an accident or upset conditions?	___	___	___

	YES	MAYBE	NO
11. **Population.** Will the proposal alter the location, distribution, density, or growth rate of the human population of an area?	___	___	___
12. **Housing.** Will the proposal affect existing housing, or create a demand for additional housing?	___	___	___
13. **Transportation/Circulation.** Will the proposal result in:			
a. Generation of substantial additional vehicular movement?	___	___	___
b. Effects on existing parking facilities, or demand for new parking?	___	___	___
c. Substantial impact upon existing transportation systems?	___	___	___
d. Alterations to present patterns of circulation or movement of people and/or goods?	___	___	___
e. Alterations to waterborne, rail or air traffic?	___	___	___
f. Increase in traffic hazards to motor vehicles, bicyclists or pedestrians?			
14. **Public Services.** Will the proposal have an effect upon, or result in a need for new or altered governmental services in any of the following areas:			
a. Fire protection?	___	___	___
b. Police protection?	___	___	___
c. Schools?	___	___	___
d. Parks or other recreational facilities?	___	___	___
e. Maintenance of public facilities, including roads?			
f. Other governmental services?	___	___	___
15. **Energy.** Will the proposal result in:			
a. Use of substantial amounts of fuel or energy?	___	___	___
b. Substantial increase in demand upon existing sources of energy, or require the development of new sources of energy?	___	___	___
16. **Utilities.** Will the proposal result in a need for new systems, or substantial alterations to the following utilities:			
a. Power or natural gas?	___	___	___
b. Communications systems?	___	___	___
c. Water?	___	___	___
d. Sewer or septic tanks?	___	___	___
e. Storm water drainage?	___	___	___
f. Solid waste and disposal?	___	___	___
17. **Human Health.** Will the proposal result in:			
a. Creation of any health hazard or potential health hazard (excluding mental health)?	___	___	___
b. Exposure of people to potential health hazards?	___	___	___
18. **Aesthetics.** Will the proposal result in the obstruction of any scenic vista or view open to the public, or will the proposal result in the creation of an aesthetically offensive site open to public view?	___	___	___

	YES	MAYBE	NO
19. **Recreation.** Will the proposal result in an impact upon the quality or quantity of existing recreational opportunities?	___	___	___
20. **Archeological/Historical.** Will the proposal result in an alteration of a significant archeological or historical site, structure, object or building?	___	___	___
21. **Mandatory Findings of Significance.**			
(a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	___	___	___
b. Does the project have the potential to achieve short-term, to the disadvantage of long-term, environmental goals? (A short-term impact on the environment is one which occurs in a relatively brief, definitive period of time while long-term impacts will endure well into the future.)	___	___	___
c. Does the project have impacts which are individually limited, but cumulatively considerable? (A project may impact on two or more separate resources where the impact on each resource is relatively small, but where the effect of the total of those impacts on the environment is significant.)	___	___	___
d. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	___	___	___

III. DISCUSSION OF ENVIRONMENTAL EVALUATION

IV. DETERMINATION
(To be completed by the Lead Agency)

On the basis of this initial evaluation:

☐ I find the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☐ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because the mitigation measures described on an attached sheet have been added to the project. A NEGATIVE DECLARATION WILL BE PREPARED.

☐ I find the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

Article 1. General

15000. Authority. The regulations contained herein are prescribed by the Secretary for Resources pursuant to authority granted in Public Resources Code Section 21083 to be followed by all state agencies, boards, and commisions, all counties, cities and counties, cities including charter cities, regional agencies, public districts, redevelopment agencies, and all other political subdivisions of the State in the implementation of the Environmental Quality Act of 1970 dealing with environmental quality, the evaluation of projects, and the preparation and evaluation of environmental impact reports. These Guidelines have been developed by the Office of Planning and Research for adoption by the Secretary for Resources in accordance with Section 21083. Additional information may be obtained by writing:

Secretary for Resources
Room 1311, 1416 Ninth Street
Sacramento, CA 95814

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New Chapter 3, Articles 1 through 10 (§§ 15000 through 15166, not consecutive) filed 2-7-73; designated effective upon filing as provided in Section 21083, Public Resources Code (Register 73, No. 6).

15001. Short Title. These Guidelines may be cited as the "State EIR Guidelines."

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000–21174, Public Resources Code.

History: 1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

(2) If the Lead Agency is a state agency, the Notice of Determination shall be filed with the Secretary for Resources.

(3) If the Lead Agency is a local agency, the Notice of Determination shall be filed with the county clerk of the county or counties in which the project would be located. If the project requires discretionary approval from a state agency, the notice shall also be filed with the Secretary for Resources.

(4) The filing of the Notice of Determination starts a 30 day statute of limitations on court challenges to the approval under CEQA. (P.R.C. 21167(c))

(i) **Filing of Final EIR.** If the Lead Agency is a state agency, a copy of the final EIR shall be filed with the appropriate planning agency of any city, county, or city and county which will be affected by the project.

(j) **Use of Final EIR by Responsible Agencies.** Each responsible agency shall consider the Lead Agency's final EIR before acting upon or approving the project pursuant to Section 15064.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment of subsections (a), (b), (d), (g) and (h) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15086. EIR Combined with Existing Planning and Review Process. The EIR process should be combined with the existing planning, review, and project approval process being used by each public agency. The Lead Agency shall include the EIR as a part of the regular project report which is used in the existing review and budgetary process.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15087. Additional Notices. In their implementing procedures, public agencies may provide for the filing of notices in addition to the notices required or authorized by these Guidelines.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15088. Findings. (a) No public agency shall approve or carry out a project for which an environmental impact report has been completed which identifies one or more significant effects of the project unless the public agency makes one or more of the following written findings for each of those significant effects, accompanied by a statement of the facts supporting each finding.

(1) Changes or alterations have been required in, or incorporated into, the project which mitigate or avoid the significant environmental effects thereof as identified in the final EIR.

(2) Such changes or alterations are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.

(3) Specific economic, social, or other considerations make infeasible the mitigation measures or project alternatives identified in the final EIR.

(b) The findings required by subsection (a) shall be supported by substantial evidence in the record.

(c) The finding in subsection (a) (2) shall not be made if the agency making the finding has concurrent jurisdiction with another agency to deal with identified feasible mitigation measures or alternatives.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
3. Amendment filed 12-27-76 as an emergency; designated effective 1-1-77. Certificate of Compliance included (Register 77, No. 1).

15090. Limitations on Local Responsible Agencies. In applying the duty to mitigate or avoid significant effects on the environment whenever it is feasible to do so, the scope of concern of a local agency which is functioning as a Lead Agency shall differ from that of a local agency which is functioning as a Responsible Agency. A local agency functioning as a Lead Agency shall consider the significant effects, both individual and cumulative, of all activities involved in the project. A local agency functioning as a Responsible Agency shall have responsibility for considering only the significant effects of those activities, which it is required by law to carry out or approve that are involved in a project for which a Lead Agency has prepared an EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-27-76 as an emergency; designated effective 1-1-77. Certificate of Compliance included (Register 77, No. 1).

Article 8. Categorical Exemptions

15100. Categorical Exemptions. Section 21084 of the Public Resources Code requires these Guidelines to include a list of classes of projects which have been determined not to have a significant effect on the environment and which shall, therefore, be exempt from the provisions of the Environmental Quality Act of 1970.

In response to that mandate, the Secretary for Resources has found that the following classes of projects listed in this article do not have a significant effect on the environment and they are declared to be categorically exempt from the requirement for the preparation of environmental documents.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15100.1. Relation to Ministerial Projects. Section 21080 of the Public Resources Code exempts from the application of CEQA those projects over which public agencies exercise only ministerial authority. Since ministerial projects are exempt under Section 15073 of these guidelines, Categorical Exemptions should be applied only where a project is not ministerial under a public agency's statutes and ordinances. The inclusion of activities which may be ministerial within the classes and examples contained in this article shall not be construed as a finding by the Secretary for Resources that such an activity is discretionary.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15100.2. Exceptions. (a) **Location.** Classes 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located—a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. Therefore, these classes are considered to apply in all instances, except where the project may impact on an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state or local agencies.

(a) **The Significant Environmental Effects of the Proposed Project:** Describe the direct and indirect significant effects of the project on the environment, giving due consideration to both the short-term and long-term effects.

It should include relevant specifics of the area, the resources involved, physical changes, alterations to ecological systems and changes induced in population distribution, population concentration, the human use of the land (including commercial and residential development) and other aspects of the resource base such as water, scenic quality and public services.

(b) **Any Significant Environmental Effects Which Cannot Be Avoided if the Proposal is Implemented:** Describe any significant impacts, including those which can be reduced to an insignificant level but not eliminated. Where there are impacts that cannot be alleviated without imposing an alternative design, their implications and the reasons why the project is being proposed, notwithstanding their effect, should be described. Describe significant impacts on any aesthetically valuable surroundings, or on human health.

(c) **Mitigation Measures Proposed to Minimize the Significant Effects:** Describe significant, avoidable, adverse impacts, including inefficient and unnecessary consumption of energy, and measures to minimize these impacts. The discussion of mitigation measures shall distinguish between the measures which are proposed by project proponents to be included in the project and other measures that are not included but could reasonably be expected to reduce adverse impacts. This discussion shall include an identification of the acceptable levels to which such impacts will be reduced, and the basis upon which such levels were identified. Where several measures are available to mitigate an impact, each should be discussed and the basis for selecting a particular measure should be identified. Energy conservation measures, as well as other appropriate mitigation measures, shall be discussed when relevant. Examples of energy conservation measures are provided in Appendix F.

(d) **Alternatives to the Proposed Action:** Describe all reasonable alternatives to the project, or to the location of the project, which could feasibly attain the basic objectives of the project, and why they were rejected in favor of the ultimate choice. The specific alternative of "no project" must also always be evaluated, along with the impact. The discussion of alternatives shall include alternatives capable of substantially reducing or eliminating any significant environmental effects, even if these alternatives substantially impede the attainment of the project objectives, and are more costly.

(e) **The Relationship Between Local Short-Term Uses of Man's Environment and the Maintenance and Enhancement of Long-Term Productivity:** Describe the cumulative and long-term effects of the proposed project which adversely affect the state of the environment. Special attention should be given to impacts which narrow the range of beneficial uses of the environment or pose long-term risks to health or safety. In addition, the reasons why the proposed project is believed by the sponsor to be justified now, rather than reserving an option for further alternatives, should be explained.

(f) **Any Significant Irreversible Environmental Changes Which Would Be Involved in the Proposed Action Should It Be Implemented:** Uses of nonrenewable resources during the initial and continued phases of the project may be irreversible since a large commitment of such resources makes removal or nonuse thereafter unlikely. Primary impacts and, particularly, secondary impacts (such as a highway improvement which provides access to a nonaccessible area) generally commit future generations to similar uses. Also irreversible damage can result from environmental accidents associated with the project. Irretrievable commitments of resources should be evaluated to assure that such current consumption is justified.

(g) **The Growth-Inducing Impact of the Proposed Action:** Discuss the ways in which the proposed project could foster economic or population growth, either directly or indirectly, in the surrounding environment. Included in this are projects which would remove obstacles to population growth (a major expansion of a waste water treatment plant might, for example, allow for more construction in service areas). Increases in the population may further tax existing community service facilities so consideration must be given to this impact. Also discuss the characteristic of some projects which may encourage and facilitate other activities that could significantly affect the environment, either individually or cumulatively. It must not be assumed that growth in any area is necessarily beneficial, detrimental, or of little significance to the environment.

History: 1. Amendment filed 12-31-74 as an emergency; designated effective 1-7-75 (Register 75, No. 1).
2. Certificate of Compliance filed 4-29-75 (Register 75, No. 18).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15143.1. Limitations on Discussion of Environmental Impact. The information required by subsections (e) and (f) of Section 15143 need be included only in EIRs prepared in connection with any of the following activities.

(a) The adoption, amendment, or enactment of a plan, policy, or ordinance of a public agency.

(b) The adoption by a local agency formation commission of a resolution making determinations.

(c) A project which will be subject to the requirement for preparing an environmental impact statement pursuant to the requirements of the National Environmental Policy Act of 1969.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21176, Public Resources Code.

History: 1. New section filed 12-27-76 as an emergency; designated effective 1-1-77. Certificate of Compliance included (Register 77, No. 1).

15143.5. Effects Found Not to be Significant. An EIR shall contain a statement briefly indicating the reasons that various possibly significant effects of a project were determined not to be significant and were therefore not discussed in detail in the EIR. Such a statement may be contained in an attached copy of an Initial Study.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

Article 1. General

15000. Authority. The regulations contained herein are prescribed by the Secretary for Resources pursuant to authority granted in Public Resources Code Section 21083 to be followed by all state agencies, boards, and commisions, all counties, cities and counties, cities including charter cities, regional agencies, public districts, redevelopment agencies, and all other political subdivisions of the State in the implementation of the Environmental Quality Act of 1970 dealing with environmental quality, the evaluation of projects, and the preparation and evaluation of environmental impact reports. These Guidelines have been developed by the Office of Planning and Research for adoption by the Secretary for Resources in accordance with Section 21083. Additional information may be obtained by writing:

Secretary for Resources
Room 1311, 1416 Ninth Street
Sacramento, CA 95814

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New Chapter 3, Articles 1 through 10 (§§ 15000 through 15166, not consecutive) filed 2-7-73; designated effective upon filing as provided in Section 21083, Public Resources Code (Register 73, No. 6).

15001. Short Title. These Guidelines may be cited as the "State EIR Guidelines."

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000–21174, Public Resources Code.

History: 1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

Article 2. Purpose

15005. Purpose. The purpose of these Guidelines is to provide public agencies with principles, objectives, criteria, and definitions of statewide application to be used in the implementation of the California Environmental Quality Act of 1970, Public Resources Code Sections 21000 et seq. These Guidelines are binding on all public agencies.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

Article 3. Policy

15010. Legislative Declaration. The Legislature has declared that:

(a) Every citizen has a responsibility to contribute to the preservation and enhancement of the environment.

(b) It is the intent of the Legislature that all agencies of the state government which regulate activities of private individuals, corporations, and public agencies which are found to affect the quality of the environment, shall regulate such activities so that major consideration is given to preventing environmental damage.

15011. State Policy. The Legislature has declared that it is the policy of the state to:

(a) Develop and maintain a high-quality environment now and in the future, and take all action necessary to protect, rehabilitate, and enhance the environmental quality of the state.

(b) Take all action necessary to provide the people of this state with clean air and water, enjoyment of aesthetic, natural, scenic, and historic environmental qualities, and freedom from excessive noise.

(c) Prevent the elimination of fish or wildlife species due to man's activities, insure that fish and wildlife populations do not drop below self-perpetuating levels, and preserve for future generations representations of all plant and animal communities and examples of the major periods of California history.

(d) Ensure that the long-term protection of the environment shall be the guiding criterion in public decisions.

(e) Create and maintain conditions under which man and nature can exist in productive harmony to fulfill the social and economic requirements of present and future generations.

(f) Require governmental agencies at all levels to develop standards and procedures necessary to protect environmental quality.

(g) Require governmental agencies at all levels to consider qualitative factors as well as economic and technical factors and long-term benefits and costs, in addition to short-term benefits and costs and to consider alternatives to proposed actions affecting the environment.

15011.5. Additional Policies. The courts of this state have found the following policies to be implicit in CEQA:

(a) The EIR requirement is the heart of CEQA. (*County of Inyo* v. *Yorty*, 32 Cal. App. 3d 795.)

(b) The EIR serves not only to protect the environment but also to demonstrate to the public that it is being protected. (*County of Inyo* v. *Yorty*, 32 Cal. App. 3d 795.)

(c) The EIR is to inform other governmental agencies and the public generally of the environmental impact of a proposed project. (*No Oil, Inc.* v. *City of Los Angeles*, 13 C. 3d 68.)

(d) The EIR is to demonstrate to an apprehensive citizenry that the agency has in fact analyzed and considered the ecological implications of its action. (*People ex rel. Department of Public Works* v. *Bosio*, 47 Cal. App. 3d 495.)

(e) The EIR process will enable the public to determine the environmental and economic values of their elected and appointed officials thus allowing for appropriate action come election day should a majority of the voters disagree. (*People* v. *County of Kern*, 39 Cal. App. 3d 830.)

(f) CEQA was intended to be interpreted in such manner as to afford the fullest possible protection to the environment within the reasonable scope of the statutory language. (*Friends of Mammoth* v. *Board of Supervisors*, 8 C. 3d 247.)

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15011.6. State Policies Regarding Use of Environmental Impact Reports. The Legislature has declared that the following policies shall apply to the use of environmental impact reports:

(a) The purpose of an environmental impact report is to identify the significant effects of a project on the environment, to identify alternatives to the project, and to indicate the manner in which such significant effects can be mitigated or avoided.

(b) Each public agency shall mitigate or avoid the significant effects on the environment of projects it approves or carries out to the extent it is feasible to do so.

(c) In the event that economic, social, technical, or other conditions make it infeasible to mitigate one or more significant effects of a project on the environment, such project may nonetheless be approved or carried out at the discretion of a public agency, provided that the project is otherwise permissible under applicable laws and regulations.

(d) Environmental impact reports should omit unnecessary descriptions of projects and emphasize feasible mitigation measures and alternatives to projects.

(e) Information developed in individual environmental impact reports should be incorporated into a data base which can be used to reduce delay and duplication in preparation of later environmental impact reports.

(f) The EIR process is intended to enable public agencies in evaluating projects to determine whether a project may have a significant effect on the environment, to examine and institute methods of reducing adverse impacts, and to consider alternatives to a project as proposed. These steps of analysis and evaluation must be completed prior to approval of the project.

History: 1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15012. Informational Document. An Environmental Impact Report is an informational document which, when fully prepared in accordance with the CEQA and these Guidelines, will inform public decision-makers and the general public of the environmental effects of projects they propose to carry out or approve. The information in an EIR constitutes evidence that a public agency shall consider along with any other information which may be presented to the agency. While CEQA requires that major consideration be given to preventing environmental damage, it is recognized that public agencies have obligations to balance other public objectives, including economic and social factors in determining whether and how a project should be approved.

(b) Economic information may be included in an EIR or may be presented in whatever form the agency desires.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15023. Categorical Exemption. Categorical Exemption means an exception from the requirements of CEQA for a class of projects based on a finding by the Secretary for Resources that the class of projects does not have a significant effect on the environment.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15023.5. Cumulative Impacts. Cumulative impacts refer to two or more individual small effects which, when considered together, are considerable or which compound or increase other environmental impacts. The individual effects may be changes resulting from a single project or a number of separate projects.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15023.7. Decision Making Body. "Decision making body" means any person or group of people within a public agency permitted by law to approve or disapprove the project at issue.

History: 1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15024. Discretionary Project. Discretionary project means an activity defined as a project which requires the exercise of judgment, deliberation, or decision on the part of the public agency or body in the process of approving or disapproving a particular activity, as distinguished from situations where the public agency or body merely has to determine whether there has been conformity with applicable statutes, ordinances, or regulations. A timber harvesting plan submitted to the State Forester for approval under the requirements of the Z'berg-Nejedly Forest Practice Act of 1973 (Pub. Res. Code § 4511 et seq.) constitutes a discretionary project within the meaning of the California Environmental Quality Act. § 21065(c).

History: 1. Amendment filed 1-30-75 as an emergency; effective upon filing (Register 75, No. 5).
2. Certificate of Compliance filed 5-29-75 (Register 75, No. 22).

15025. Emergency. Emergency means a sudden, unexpected occurrence, involving a clear and imminent danger, demanding immediate action to prevent or mitigate loss of, or damage to life, health, property, or essential public services. Emergency includes such occurrences as fire, flood, earthquake, or other soil or geologic movements, as well as such occurrences as riot, accident, or sabotage.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15026. Environment. Environment means the physical conditions which exist within the area which will be affected by a proposed project including land, air, water, minerals, flora, fauna, ambient noise, objects of historic or aesthetic significance.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15026.5. Environmental Documents. Environmental documents means Draft and Final EIRs, Initial Studies, Negative Declarations, Notices of Completion, and Notices of Determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included. (Register 73, No. 50).

15027. EIR—Environmental Impact Report. Environmental Impact Report (EIR) means a detailed statement setting forth the environmental effects and considerations pertaining to a project as specified in Section 21100 of the California Environmental Quality Act, and may mean either a draft or a final EIR.

(a) Draft EIR means an EIR containing the information specified in Sections 15141, 15142, and 15143 of these Guidelines. Where a Lead Agency consults with Responsible Agencies in the preparation of a draft EIR, the draft EIR shall also contain the information specified in Section 15144.

(b) Final EIR means an EIR containing the information contained in the draft EIR, comments either verbatim or in summary received in the review process, a list of persons commenting, and the response of the Lead Agency to the comments received. The final EIR is discussed in detail in Section 15146.

History: 1. Amendment of subsection (b) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15028. EIS—Environmental Impact Statement. Environmental Impact Statement (EIS) means an environmental impact document prepared pursuant to the National Environmental Policy Act (NEPA). The Federal Government uses the term EIS in the place of the term EIR which is used in CEQA.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15029. Feasible. Feasible means capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, social, and technological factors.

History: 1. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15029.5. Initial Study. Initial study means a preliminary analysis prepared by the lead agency pursuant to Section 15080 to determine whether an EIR or a Negative Declaration must be prepared

NOTE: Authority cited: Sections 21083 and 21174, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15029.6. Jurisdiction by Law. (a) Jurisdiction by law means the authority of any public agency

(1) to grant a permit or other entitlement for use,
(2) to provide funding for the project in question, or
(3) to exercise authority over resources which may be affected by the project.

(b) A city or county will have jurisdiction by law with respect to a project when the city or county having primary jurisdiction over the area involved is the site of the project, the area in which the major environmental effects will occur, and/or the area in which reside those citizens most directly concerned by any such environmental effects.

(c) Where an agency having jurisdiction by law must exercise discretionary authority over a project in order for the project to proceed, it is also a responsible agency, see Section 15039, or the Lead Agency, see Section 15030.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000–21174, Public Resources Code.

History: 1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
2. Amendment of subsection (a) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
3. Amendment of subsection (b) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15030. Lead Agency. Lead Agency means the public agency which has the principal responsibility for carrying out or approving a project. The Lead Agency will prepare the environmental documents for the project either directly or by contract. Criteria for determining which agency will be the Lead Agency for a project are contained in Section 15065.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15031. Local Agency. Local agency means any public agency other than a state agency, board or commission. Local agency includes but is not limited to cities, counties, charter cities and counties, districts, school districts, special district, redevelopment agencies, local agency formation commissions and any board, commission, or organizational subdivision of a local agency when so designated by order or resolution of the governing legislative body of the local agency.

History: 1. Amendment filed 12-14-73 as an emergency, effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15032. Ministerial Projects. Ministerial projects as a general rule, include those activities defined as projects which are undertaken or approved by a governmental decision which a public officer or public agency makes upon a given state of facts in a prescribed manner in obedience to the mandate of legal authority. With these projects, the officer or agency must act upon the given facts without regard to his own judgment or opinion concerning the propriety or wisdom of the act although the statute, ordinance, or regulation may require, in some degree, a construction of its language by the officer. In summary, a ministerial decision involves only the use of fixed standards or objective measurements without personal judgment.

History: 1. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15033. Negative Declaration. Negative declaration means a written statement by the Lead Agency briefly describing the reasons that a proposed project, although not otherwise exempt, will not have a significant effect on the environment and therefore does not require the preparation of an EIR.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15034. Notice of Completion. Notice of Completion means a brief notice filed with the Secretary for Resources by a Lead Agency as soon as it has completed a draft EIR and is prepared to send out copies for review. The contents of this notice are explained in Section 15085(c). A copy of this notice appears in Appendix C.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15035. Notice of Determination. Notice of Determination means a brief notice to be filed by a public agency after it approves or determines to carry out a project which is subject to the requirements of CEQA. The contents of this notice are explained in Sections 15083(d) and 15085(h). A copy of this notice appears in Appendix D.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15035.5. Notice of Exemption. Notice of Exemption means a brief notice which may be filed by a public agency when it has approved or determined to carry out a project, and it has determined that it is ministerial, categorically exempt or an emergency project. Such a notice may also be filed by an applicant where such a determination has been made by a public agency which must approve the project. The contents of this notice are explained in Sec. 15074(a) and (b). A copy of this notice appears in Appendix E.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21108, 21152, 21167, Public Resources Code and Chap. 56 of Stats. 1974.

History: 1. New section filed 3-26-74 as an emergency; effective upon filing (Register 74, No. 13).
2. Certificate of Compliance filed 6-26-74 (Register 74, No. 26).
3. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15035.7. Notice of Preparation. Notice of Preparation means a brief notice sent by a Lead Agency by certified mail to notify the Responsible Agencies that the Lead Agency plans to prepare an EIR for the project. The purpose of the notice is to solicit guidance from the Responsible Agencies as to the scope and content of the environmental information to be included in the EIR. A sample form is included as Appendix J to these Guidelines. Public Agencies are free to develop their own formats for this notice.

History: 1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15036. Person. Person includes any person, firm, association, organization, partnership, business, trust, corporation, company, district, county, city and county, city, town, the State, and any of the agencies' political subdivisions of such entities.

15037. Project. (a) Project means the whole of an action, which has a potential for resulting in a physical change in the environment, directly or ultimately, that is any of the following:

(1) An activity directly undertaken by any public agency including but not limited to public works construction and related activities, clearing or grading of land, improvements to existing public structures, enactment and amendment of zoning ordinances, and the adoption and amendment of local General Plans or elements thereof pursuant to Government Code Sections 65100–65700.

(2) An activity undertaken by a person which is supported in whole or in part through public agency contracts, grants, subsidies, loans, or other forms of assistance from one or more public agencies.

(3) An activity involving the issuance to a person of a lease, permit, license, certificate, or other entitlement for use by one or more public agencies.

(b) Project does not include:

(1) Anything specifically exempted by state law.

(2) Proposals for legislation to be enacted by the State Legislature other than requests by state agencies for authorization or funding for projects independently from the Budget Act.

(3) Continuing administrative or maintenance activities, such as purchases for supplies, personnel-related actions, emergency repairs to public service facilities, general policy and procedure making (except as they are applied to specific instances covered above), feasibility or planning studies.

(4) The submittal of proposals to a vote of the people of the State or of a particular community.

(c) The term "project" refers to the activity which is being approved and which may be subject to several discretionary approvals by governmental agencies. The term "project" does not mean each separate governmental approval.

History: 1. Amendment of subsection (a) (1) and new subsection (c) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15038. Public Agency. Public agency includes any state agency, board or commission and any local or regional agency, as defined in these Guidelines. It does not include the courts of the State. This term does not include agencies of the federal government.

15039. Responsible Agency. Responsible agency means a public agency which proposes to carry out or approve a project, for which a Lead Agency has prepared the environmental documents. For the purposes of CEQA, the term "responsible agency" includes all public agencies other than the lead agency which have discretionary approval power over the project.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
3. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15040. Significant Effect on the Environment. Significant effect on the environment means a substantial, or potentially substantial, adverse change in any of the physical conditions within the area affected by the activity including land, air, water, minerals, flora, fauna, ambient noise, and objects of historic or aesthetic significance.

History: 1. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

Article 5. General Responsibilities.

15050. Public Agency Implementation. (a) Each public agency is responsible for complying with CEQA and these Guidelines. Each public agency must develop its own procedures consistent with these Guidelines.

(b) Where a public agency is a Lead Agency and prepares an EIR itself, contracts for the preparation, or accepts data and information in the form of a draft EIR from an applicant, that public agency is responsible entirely for the adequacy and objectivity of the EIR.

(c) Public agencies shall adopt objectives, criteria, and specific procedures consistent with CEQA and these Guidelines for the orderly evaluation of projects and the preparation of environmental documents. These implementing procedures should contain at least the following provisions:

(1) Procedures for identifying the activities that are exempt from CEQA. These procedures should contain:

(A) Provisions for evaluating a proposed activity to determine if there is no possibility that the activity may have a significant effect on the environment.

(B) A list of projects over which the public agency has only ministerial authority.

(C) A list of specific activities which the public agency has found to be categorically exempt pursuant to Section 15100.4.

(2) Procedures for the conduct of initial studies.

(3) Provisions for the preparation of Negative Declarations.

(4) Provisions for the preparation of EIR's.

(5) Provisions for consulting with and obtaining comments from other public agencies and members of the public with regard to the environmental effects of projects.

(6) Provisions assuring adequate opportunity and time for the public review and comment on the Draft EIR or Negative Declaration.

(7) Provisions for evaluating and responding to comments received on environmental documents.

(8) Provisions for the review and consideration of environmental documents by the person or decision-making body who will approve or disapprove a project.

(9) Provisions for filing documents required or authorized by CEQA and these Guidelines.

(10) Provisions to ensure that Lead Agencies obtain adequate comments on environmental documents which they submit to the public agency for review.

(11) The assignment of responsibility for specific functions to specific units of the public agency.

(12) Time periods for performing functions under CEQA as described in Section 15054.2.

(d) Any district, including a school district, need not adopt objectives, criteria and procedures of its own if it uses the objectives, criteria and procedures of another public agency whose boundaries are coterminous with the district. Any public agency may adopt the objectives, criteria, and procedures of another public agency whose boundaries are coterminous with or entirely encompass its own.

(e) Public agencies should revise their implementing procedures to conform to amendments to these guidelines within 60 days after the effective date of the amendments. During the period while the public agency is revising its procedures, the agency must conform to any statutory changes in the California Environmental Quality Act that have become effective regardless of whether the public agency has revised its formally adopted procedures to conform to the statutory changes.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. New subsection (d) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
4. New subsections (c)(12) and (e) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15051. Office of Planning and Research (OPR). (a) OPR is responsible for the preparation and development of principles, objectives, criteria, and definitions to implement the CEQA, prior to adoption by the Secretary for Resources. OPR also, as part of guideline development, shall consider proposals for Categorical Exemption and make appropriate recommendations to the Secretary for Resources.

(b) The State Clearinghouse in the Office of Planning and Research is responsible for distributing environmental documents to State agencies, departments, boards, and commissions for review and comment.

(c) Upon request of a Lead Agency or a project applicant, OPR shall provide assistance in determining the various responsible agencies and any federal agencies which have responsibility for carrying out or approving a proposed project.

(d) OPR has responsibility for ensuring that State Responsible Agencies provide the necessary information to Lead Agencies in response to Notices of Preparation within the 45 day period as specified in Section 15066(d).

(e) OPR will resolve disputes as to which agency is the Lead Agency for a project as described in Section 15065.5.

History: 1. New subsection (b) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
2. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15052. The Secretary for Resources. The Guidelines shall be officially adopted by the Secretary for Resources, including a finding that each class of projects given a Categorical Exemption will not have a significant effect on the environment. The Secretary also has the responsibility for consolidating all state comments on federally sponsored projects. The Secretary for Resources may issue amendments to these Guidelines.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15053. Fees. (a) All Lead Agencies preparing EIRs or Negative Declarations for projects to be carried out by any person other than the Lead Agency itself may charge and collect a reasonable fee from such person or entity, in order to recover the estimated costs incurred in preparing the EIR or Negative Declaration.

(b) Public agencies may charge and collect a reasonable fee from members of the public for a copy of an environmental document not to exceed the actual cost of reproducing a copy.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15054. Timely Compliance. Public agencies should carry out their responsibilities for preparing and reviewing EIRs within a reasonable period of time. The requirement for the preparation of an EIR should not cause undue delays in the processing of applications for permits or other entitlements to use.

15054.1. Projects Received for Filing. Where the following conditions occur, a public agency may deem an application for a project not received for filing until such time as the environmental documentation required by CEQA has been completed:

(a) The enabling legislation for a program requires the public agency or an officer (such as the Director of Forestry) to take action on an application within a specified period of time of 30 days or less, and

(b) The enabling legislation provides that the project will become approved by operation of law if the agency or officer fails to take any action within such specified time period, and

(c) The project involves the issuance of a lease, permit, license, certificate, or other entitlement for use.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000-21174, Public Resources Code.

History: 1. New section filed 1-30-75 as an emergency; effective upon filing (Register 75, No. 5).
2. Certificate of Compliance filed 5-29-75 (Register 75, No. 22).
3. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15054.2. Lead Agency CEQA Time Limits. (a) Each public agency shall include in its implementing procedures time periods for performing the functions described in this section.

(b) When the public agency is acting as a Lead Agency for a project for which the agency will grant a lease, license, permit, certificate, or other entitlement for use, the agency shall complete and certify an EIR in not more than one year or complete and adopt a Negative Declaration in not more than 105 days.

(1) Different time limits may be established for different types of projects subject to the 105 day and 1 year maximum time limits.

(2) The time limits shall be measured from the date on which an application requesting approval for the project is received and accepted as complete by the agency.

(A) State agencies are required to adopt lists and criteria by which to determine the completeness of an application. (Government Code Section 65940 & 65941.)

(B) Local agencies may adopt lists and criteria by which to determine the completeness of applications. Different lists and criteria may be developed for different kinds of projects.

(3) The procedures may provide for a reasonable extension of the time periods under this subsection in the event that compelling circumstance justify additional time and the project applicant consents to the extension.

(4) The Lead Agency may waive the one year time period or the 105 day period if all the following conditions occur:

(A) The project will require both an EIR or a Negative Declaration under CEQA and an EIS or a Negative Declaration under the National Environmental Policy Act,

(B) Additional time will be required to prepare a combined EIR-EIS, or a combined Negative Declaration under both laws,

(C) The time required to prepare such a combined document would be less than the time required to prepare each document separately, and

(D) The applicant has requested or consented to the waiver.

(5) If the Lead Agency waives the time periods as provided in subsection (4), the Lead Agency must approve or disapprove the project within 60 days after the combined document under CEQA and NEPA has been completed. (Government Code Section 65951.)

(c) Within 45 days after accepting an application as complete for a project involving issuance of a lease, permit, license, certificate, or other entitlement for use, a Lead Agency shall make an initial determination of whether the project will need an EIR or a Negative Declaration.

(d) A Lead Agency shall convene a meeting with one or more Responsible Agencies to discuss the scope and content of a proposed EIR as soon as possible but not later than 30 days after the meeting is requested as provided in Section 15066(e).

History: 1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15054.3. Responsible Agency CEQA Time Limits. As soon as possible after receiving a Notice of Preparation and in no event more than 45 days after receiving the notice, a Responsible Agency shall inform the Lead Agency of the scope and content of the environmental information that the Responsible Agency would need in the EIR.

History: 1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15055. Delegation of Responsibilities. (a) A public agency may assign specific functions to its staff to assist in administering CEQA. Functions which may be delegated include but are not limited to:

(1) Determination of whether a project is exempt.
(2) Conduct of an initial study.
(3) Preparation of a Negative Declaration or EIR.
(4) Preparation of responses to public comments.
(5) Certification that the decision making body has reviewed and considered an EIR or Negative Declaration.
(6) Filing of Notices.

(b) The decision making body of a public agency may not delegate the following functions:

(1) Review and consideration of a final EIR or Negative Declaration prior to approving a project.
(2) The making of findings as required by Sections 15088 and 15089.

(c) Where an advisory body such as a planning commission is required to make a recommendation on a project to the decision making body, the advisory body shall also review and consider the EIR or Negative Declaration.

History: 1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

Article 6. Application of the Act to Projects

15060. General Rule. The requirements set forth in these Guidelines apply to projects which may have a significant effect on the environment and which involve discretionary governmental action. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not covered by the requirements set forth in CEQA, and these Guidelines concerning the evaluation of projects and the preparation and review of environmental documents do not apply.

History: 1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15061. Projects Controlled by State or Local Agencies.

(a) When a public agency plans to carry out or approve a project which is subject to CEQA, which may have a significant effect on the environment, the EIR or Negative Declaration for the project shall be prepared directly by, or under contract to, a public agency.

(b) Where a project which is subject to CEQA is to be carried out by a nongovernmental person subject to approval, financial support, or some other involvement by a public agency, the EIR or Negative Declaration shall be prepared directly by, or under contract to, the Lead Agency. However, the Lead Agency may require the person to supply data and information, both to determine whether the project may have a significant effect on the environment, and to assist in the preparation of an EIR or Negative Declaration by the Lead Agency. This information may be submitted in the form of a draft EIR if the Lead Agency desires. If information is provided in the form of a draft EIR or Negative Declaration, the Lead Agency may not use the document as its own without independent evaluation and analysis. The draft EIR or Negative Declaration which is sent out for public review must reflect the independent judgment of the Lead Agency. The Lead Agency should require an applicant to specify to the best of his knowledge which other public agencies will have jurisdiction by law over the project.

(c) Where the project is to be undertaken by a local agency, as defined in these Guidelines, but requires state approval or financial assistance, the state agency shall require the local agency to prepare the EIR or Negative Declaration, to be submitted with the request for approval of the proposed project. This must also be done where federal funds are involved, but only if a state agency has discretionary authority over the use of those funds. If the local project has been mandated on the local agency by a state agency, the EIR prepared by the local agency may be limited to consideration of those factors and alternatives which do not conflict with the order.

(d) The EIR may be prepared as a separate document, or as part of a project report. If prepared as a part of the project report, it must still contain in one separate and distinguishable section the elements required of an EIR, including the seven elements specified in Section 15143 of these Guidelines.

(e) All public and private activities or undertakings pursuant to or in furtherance of a redevelopment plan constitute a single project, which shall be deemed approved at the time of adoption of the redevelopment plan by the legislative body. The EIR in connection with the redevelopment plan shall be submitted in accordance with Section 33352 of the Health and Safety Code.

(f) All of the above is subject to the Lead Agency principle which provides that not more than one EIR shall be prepared in connection with the same underlying activity and that the EIR shall be prepared by the lead agency.

(g) Any person may submit information to the Lead Agency to assist in the preparation of an EIR or Negative Declaration. Such information may be submitted in any format and may be included in whole or in part in any such EIR or Negative Declaration if the Lead Agency subjects the information to its own independent evaluation and analysis.

History: 1. Amendment of subsections (a), (b) and (f) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsections (a) and (b) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. New subsection (g) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15062. Private Projects.

History: 1. Repealer filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15063. Federal Projects. (a) When a State Agency officially comments on a proposed federal project which may have a significant effect on the environment, the comments shall include a discussion of the material specified in Section 15143.

(b) When an EIR is required by CEQA and a federal EIS has been or will be prepared for the same project, all or any part of the EIS may be used as all or any part of the EIR if the EIS or part used complies with these Guidelines. In cases where a federal EIS is used, discussion of mitigation measures, growth-inducing impact, and energy conservation will have to be added or supplemented if the EIS does not include an adequate discussion of these elements.

(c) When a project requires both an EIR and an EIS, the Lead Agency shall whenever possible, use the EIS as the EIR as provided in subsection (b).

(d) If a Lead Agency finds that an EIS for a project would not be prepared by the Federal Agency by the time when the Lead Agency will need to consider an EIR, the Lead Agency should try to prepare a combined EIR-EIS. To avoid the need for the federal agency to prepare a separate document for the same project, the Lead Agency must involve the federal agency in the preparation of the EIR-EIS. This involvement is necessary because federal law generally prohibits a federal agency from using an EIR prepared by a state or local agency unless the federal agency was involved in the preparation of the document.

(e) When it plans to use an EIS or prepare a joint EIR-EIS, the Lead Agency shall consult as soon as possible with the agency that would prepare the EIS.

(f) Where a project will be subject to both CEQA and the National Environmental Policy Act, the one year time limit and the 105 day time limit may be waived pursuant to Section 15054.2.

(g) Where the federal agency circulated the EIS for public review as broadly as state or local law may require and gave notice meeting the standards in Section 15085 (d), the Lead Agency under CEQA need not recirculate the EIS for public review. One review and comment period is enough. The Lead Agency shall give notice that it will use the EIS in the place of an EIR and that it believes that the EIS meets the requirements of CEQA.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
4. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15064. Lead Agency Principle. (a) Where a project is to be carried out or approved by more than one public agency, one public agency shall be responsible for preparation of environmental documents, and it will be the Lead Agency. Such environmental documents will be prepared by the Lead Agency in consultation with all responsible Agencies.

(b) The Lead Agency's environmental documents shall be the environmental documentation for all responsible agencies. Except as provided in Section 15069.5 (c), such responsible agencies shall consider the Lead Agency's EIR or Negative Declaration prior to acting upon or approving the projects, and they shall certify that their decision-making bodies have reviewed and considered the information contained in them.

(c) The determination of the Lead Agency of whether to prepare an environmental impact report or a negative declaration shall be final and conclusive on all persons, including Responsible Agencies, as provided by Section 21080.1 of the Public Resources Code, unless:

(1) The decision is challenged as provided in Section 21167 of the Public Resources Code, or

(2) Circumstances change as provided in Section 15067.

(d) Where a decision making body has power to make a final decision on a project subject to appeal to another body, the decision making body shall review and consider the EIR. The appeal body shall also review and consider the EIR before deciding an appeal from a decision on the project.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
3. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15065. Lead Agency Criteria. Where two or more public agencies are involved with a project, which agency shall be the Lead Agency shall be determined by the following principles:

(a) If the project is to be carried out by a public agency, the Lead Agency shall be the public agency which proposes to carry out the project.

(b) If the project is to be carried out by a nongovernmental person, the Lead Agency shall be the public agency with the greatest responsibility for supervising or approving the project as a whole.

(1) The Lead Agency will generally be the agency with general governmental powers rather than an agency with a single or limited purpose which is involved by reason of the need to provide a public service or public utility to the project; in such cases, the single or limited purpose agency will, upon request, provide data concerning all aspects of its activities required to furnish service to the project to the agency drafting the EIR, and no separate EIR will be required in regard to such activities.

(2) Where a city has prezoned an area, the city will be the appropriate Lead Agency for any subsequent annexation of the area and should prepare the required environmental document at the time of the prezoning. The city shall consult with the local agency formation commission, and the EIR shall include the comments of the local agency formation commission.

(c) Where more than one public agency equally meet the criteria set forth in paragraph (b) above, the agency which is to act first on the project in question shall be the Lead Agency (following the principle that the environmental impact should be assessed as early as possible in governmental planning).

(d) Where the provisions of subsections (a), (b), and (c) leave two or more public agencies with a substantial claim to be the Lead Agency, the public agencies may by agreement designate which agency will be the Lead Agency. An agreement may also provide for cooperative efforts by two or more agencies, joint exercise of powers, or similar devices.

History: 1. Amendment of subsection (d) and repealer of subsection (e) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5). For prior history, see Register 76, No. 41.

15065.3. Shift in Lead Agency Responsibilities. (a) Where a Responsible Agency is called on to grant an approval for a project subject to CEQA for which another public agency was the appropriate Lead Agency, the Responsible Agency shall begin to act as the Lead Agency when any of the following conditions occur:

(1) The Lead Agency did not prepare any environmental documents for the project, and the statute of limitations has expired for a challenge to the action of the appropriate Lead Agency.

(2) The Lead Agency prepared environmental documents for the project, but the following conditions occur:

(A) A subsequent EIR is required pursuant to Section 15067,

(B) The Lead Agency has granted a final approval for the project, and

(C) The statute of limitations for challenging the Lead Agency's action under CEQA has expired.

(3) The Lead Agency prepared inadequate environmental documents without consulting with the Responsible Agency as required by Section 15066 and the statute of limitations has expired for a challenge to the action of the appropriate Lead Agency.

(b) When a Responsible Agency assumes the duties of a Lead Agency under this section, the time limits applicable to a Lead Agency shall apply to the actions of the agency.

History: 1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15065.5. Designation of Lead Agency by Office of Planning and Research. (a) In the event that the designation of a Lead Agency is in dispute, the following criteria shall apply:

(1) Public agencies should consult with each other in an effort to resolve the dispute prior to submitting it to OPR.

(2) If an agreement cannot be reached, any public agency, or in the case of a project described in subdivision (c) of Section 21065 of the Public Resources Code, the applicant for such project may submit the dispute to the OPR for resolution.

(b) OPR shall designate a Lead Agency within 21 days after receiving a completed request to resolve a dispute from any public agency or from the applicant pursuant to subsection (a) (2).

(c) Regulations adopted by OPR for resolving Lead Agency disputes may include the following:

(1) Submission of written statements to OPR and other disputing public agencies;

(2) Certification by OPR that a Lead Agency dispute exists;

(3) Publication of notice that a dispute has been submitted to OPR;

(4) Determination of the dispute on the basis of written statements or by a hearing.

(d) Designation of a Lead Agency by OPR shall be based on consideration of the criteria in Section 15065 as well as the capacity of the agency to adequately fulfill the requirements of CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

History: 1. New section filed 12-14-73 as an emergency; effective upon filing (Register 73, No. 50).

2. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15066. Consultation. (a) When more than one public agency will be involved in undertaking or approving a project, the Lead Agency shall consult with all Responsible Agencies (i.e., all the other public agencies involved in carrying out or approving the project) before completing a draft EIR or adopting Negative Declaration. Consultation is designed to insure that the EIR or Negative Declaration will reflect the concerns of all Responsible Agencies which will issue approvals for the project.

(b) Prior to determining whether a negative declaration or environmental impact report is required for a project, the Lead Agency shall consult with all Responsible Agencies. This first step of consultation may be done quickly and informally.

(c) Immediately after deciding that an environmental impact report is required for a project, the Lead Agency shall send to each Responsible Agency by certified mail a Notice of Preparation stating that an environmental impact report will be prepared. This notice shall also be sent to every federal agency involved in approving or funding the project.

(1) The Notice of Preparation shall provide the Responsible Agencies with sufficient information describing the project and the environmental effects to enable the Responsible Agencies to make a meaningful response. At a minimum, the information should include:

(A) Description of the project,
(B) Location of the project, and
(C) Probable environmental effects of the project.

(2) A sample format for a Notice of Preparation is shown in Appendix J. Public agencies are free to devise their own formats for this notice. A copy of the Initial Study may be sent with the notice to supply the necessary information.

(3) The Lead Agency may begin work on the draft EIR immediately without awaiting responses to the Notice of Preparation. The draft EIR in preparation may need to be revised or expanded to conform to responses to the Notice of Preparation.

(d) After receiving the Notice of Preparation under subparagraph (c), each Responsible Agency shall provide the Lead Agency with specific detail about the scope and content of the environmental information related to the Responsible Agency's area of statutory responsibility which must be included in the environmental impact report.

(e) In order to expedite the consultation, the Lead Agency, a Responsible Agency, or a project applicant may request one or more meetings between representatives of the agencies involved to assist the Lead Agency in determining the scope and content of the environmental information which the Responsible Agency may require. Such meetings shall be convened by the Lead Agency as soon as possible, but no later than 30 days, after the meetings were requested.

(f) After completing the draft EIR or Negative Declaration, the Lead Agency shall also consult with and seek to obtain comments from each Responsible Agency and other public agencies having jurisdiction by law and should consult with persons having special expertise as described in Sections 15083 and 15085.

(g) When one or more state agencies will be a Responsible Agency, the Lead Agency shall send a Notice of Preparation by certified mail to each state Responsible Agency with a copy to the State Clearinghouse in the Office of Planning and Research. The State Clearinghouse will ensure that the state Responsible Agencies reply to the Lead Agency within the required time.

History: 1. Repealer and new section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 7, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15067. Subsequent EIR. (a) Where an EIR or Negative Declaration has been prepared, no additional EIR need be prepared unless:

(1) Subsequent changes are proposed in the project which will require major revisions of the EIR, due to the involvement of new environmental impacts not considered in a previous EIR on the project, or

(2) Substantial changes occur with respect to the circumstances under which the project is undertaken, such as a substantial deterioration in the air quality where the project will be located, which will require major revisions in the EIR due to the involvement of new environmental impacts not covered in a previous EIR, or

(3) New information of substantial importance to the project becomes available, and

(A) The information was not known and could not have been known at the time the EIR was certified as complete or the Negative Declaration was adopted, and

(B) The new information shows any of the following:

1. The project will have one or more significant effects not discussed previously in the EIR,

2. Significant effects previously examined will be more severe than shown in the EIR,

3. Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, or

4. Mitigation measures or alternatives which were not previously considered in the EIR would substantially lessen one or more significant effects on the environment.

(b) If the EIR or Negative Declaration has been completed but the project has not yet been approved, the Lead Agency shall prepare or cause to be prepared the subsequent EIR before approving the project.

(c) If the project was approved prior to the occurrence of the conditions described in Subsection (a), the subsequent EIR shall be prepared by the public agency which grants the next discretionary approval for the project. In this situation no other Responsible Agency shall grant an approval for the project until the subsequent EIR has been completed.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15068. Use of a Single EIR. The Lead Agency may employ a single EIR to describe more than one project, if such projects are essentially the same in terms of environmental impact. Further, the Lead Agency may use an earlier EIR prepared in connection with an earlier project to apply to a later project, if the circumstances of the projects are essentially the same. Lead Agencies may elect to write EIRs in advance for entire programs or regulations, in order to be prepared for project applications to come. Whenever an agency chooses to utilize any of these alternatives, however, it must find that the environmental effects of the projects are similar enough to warrant the same treatment in an EIR and that the EIR will adequately cover the impacts of any single project. If these tests are not met, an agency should supplement the EIR it prepares for a program to apply it to an individual project.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15068.5. Use of a General Plan EIR With Subsequent Projects. The EIR on a general plan may be used as the foundation document for EIRs subsequently prepared for specific projects within the geographic area covered by the general plan. The subsequent EIRs may reference and summarize material in the EIR on the general plan for the description of the general environmental setting and as much of the description of the environmental impacts as applies to the specific project. Detailed information in the EIR on the specific project may be limited to a description of the project, the specific environmental setting and those impacts which are not adequately described for the specific project in the EIR on the general plan. When a subsequent EIR refers to an EIR on the general plan for part of its description of the environment and the environmental impacts, copies of the EIR on the general plan shall be made available to the public in a number of locations in the community and to any clearinghouses which will assist in public review of the EIR. The purpose of this section is not to restrict analysis of environmental issues but is to avoid the necessity for repeating detail from a General Plan EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15069. Multiple and Phased Projects. Where individual projects are, or a phased project is, to be undertaken and where the total undertaking comprises a project with significant environmental effect, the Lead Agency must prepare a single EIR for the ultimate project. Where an individual project is a necessary precedent for action on a larger project, or commits the Lead Agency to a larger project, with significant environmental effect, an EIR must address itself to the scope of the larger project. Where one project is one of several similar projects of a public agency, but is not deemed a part of a larger undertaking or a larger project, the agency may prepare one EIR for all projects, or one for each project, but shall in either case comment upon the cumulative effect.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No 41). Note: Order designat1248t compliance with this amendment is authorized but not mandatory before 1-1-77.

15069.5. Staged EIR. (a) Where a large capital project will require a number of discretionary approvals from governmental agencies and one of the approvals will occur more than 2 years before construction will begin, a staged EIR may be prepared covering the entire project in a general form. The staged EIR should evaluate the proposal in light of current and contemplated plans and produce an informed estimate of the environmental consequences of the entire project. The aspect of the project before the public agency for approval shall be discussed with a greater degree of specificity.

(b) When a staged EIR has been prepared, a supplement to the EIR shall be prepared when a later approval is required for the project, and the information available at the time of the later approval would permit consideration of additional environmental impacts, mitigation measures, or reasonable alternatives to the project.

(c) Where a statute such as the Warren-Alquist Energy Resources Conservation and Development Act provides that a specific agency shall be the Lead Agency for a project and requires the Lead Agency to prepare an EIR, a Responsible Agency which must grant an approval for the project before the Lead Agency has completed the EIR may prepare and consider a staged EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

History: 1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15069.6. Master Environmental Assessment. (a) **General.** A public agency may prepare a master environmental assessment, inventory, or data base for all, or a portion of, the territory subject to its control in order to provide information which may be used or referenced in EIRs or Negative Declarations. Neither the content, the format, nor the procedures to be used to develop a master environmental assessment are prescribed by these Guidelines. The descriptions contained in this section are advisory. A master environmental assessment is suggested solely as an approach to identify and organize environmental information for a region or area of the State.

(b) **Contents.** A master environmental assessment may contain an inventory of the physical and biological characteristics of the area for which it is prepared and may contain such additional data and information as the public agency determines is useful or necessary to describe environmental characteristics of the area. It may include identification of existing levels of quality and supply of air and water, capacities and levels of use of existing services and facilities, and generalized incremental effects of different categories of development projects by type, scale, and location.

(c) **Preparation.**

(1) A master environmental assessment or inventory may be prepared in many possible ways. For example, a MEA may be prepared as a special, comprehensive study of the area involved, as part of the EIR on a general plan, or as a data base accumulated by indexing EIRs prepared for individual projects or programs in the area involved.

(2) The information contained in a master environmental assessment should be reviewed periodically and revised as needed so that it is accurate and current.

(3) When advantageous to do so, master environmental assessments may be prepared through a joint exercise of powers agreement with neighboring local agencies or with the assistance of the appropriate Council of Governments.

(d) **Uses.**

(1) A master environmental assessment can identify the environmental characteristics and constraints of an area. This information can be used to influence the design and locations of individual projects.

(2) A master environmental assessment may provide information agencies can use in initial studies to decide whether certain environmental effects are likely to occur and whether certain effects will be significant.

(3) A master environmental assessment can provide a central source of current information for use in preparing individual EIR's and Negative Declarations.

(4) Relevant portions of a master environmental assessment can be referenced and summarized in EIR's and Negative Declarations.

(5) A master environmental assessment can assist in identifying long range, areawide, and cumulative impacts of individual projects proposed in the area covered by the assessment.

(6) A master environmental assessment can assist a city or county in formulating a general plan or any element of such a plan by identifying environmental characteristics and constraints that need to be addressed in the general plan.

(7) A master environmental assessment can serve as a reference document to assist public agencies which review other environmental documents dealing with activities in the area covered by the assessment. The public agency preparing the assessment should forward a completed copy to each agency which will review projects in the area.

History: 1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

Article 6.5. Statutory Exemptions

15070. Ongoing Project. (a) A project as defined in Section 15037(a)(1) of these Guidelines, approved prior to November 23, 1970, shall require an Environmental Impact Report or a Negative Declaration if the project may have a significant effect on the environment, and either of the following conditions exists:

(1) A substantial portion of public funds allocated for the project have not been spent and it is still feasible to modify the project to mitigate potentially adverse environmental effects, or to choose feasible alternatives to the project, including the alternative of "no project" or halting the project; provided that this Section (1) shall not apply to projects which come under the jurisdiction of the National Environmental Policy Act (NEPA) and which, through regulations promulgated under NEPA, were held to be too far advanced at the time of NEPA's effective date to require an EIS in compliance with those regulations.

(2) A public agency proposes to modify the project in such a way that the project might have a new significant effect on the environment.

(b) A project as defined in Section 15037(a)(3) or in Section 15037(a)(2) as it relates to contracts, where the permit or other entitlement was issued, or the contract approved, prior to April 5, 1973, shall not require an EIR or Negative Declaration, subject to the following provisions:

(1) CEQA expressly does not prohibit a public agency from considering environmental factors in connection with the approval or disapproval of a project, or from imposing reasonable fees on the appropriate private person or entity for preparing an environmental report. Local agencies may require environmental reports for projects covered by this paragraph pursuant to local ordinances during this interim period.

(2) Where the issuance or approval occurred prior to December 5, 1972, and prior to said date the project was legally challenged for noncompliance with CEQA, the project shall be bound by special rules set forth in Section 21170 of CEQA.

(3) Where a project involving the issuance of a lease, permit, license, certificate or other entitlement to use has been granted a discretionary governmental approval for part of the project before April 5, 1973, and another or additional discretionary governmental approvals after April 5, 1973, the project shall require an EIR or Negative Declaration only if the approval or approvals after April 5, 1973, involve a greater degree of responsibility or control over the project as a whole than did the approval or approvals prior to that date.

(c) Any draft EIR which has been completed or sent out for public review on or before January 1, 1977, in compliance with procedures of a public agency consistent with CEQA and these Guidelines as amended in February 1975, shall be deemed to be in compliance with these Guidelines. No further EIR shall be required except as provided in Subsections (a) and (b).

(d) Any project approved before February 7, 1975, by a local agency formation commission without complying with CEQA is declared legally effective unless:

(1) The legality of the project was contested in a legal proceeding in which a violation of CEQA was alleged prior to February 7, 1975, and the case was pending and undecided by February 7, 1975, or (P.R.C. 21176(a)).

(2) The project was determined to be illegal, void, or ineffective because of noncompliance with CEQA in any judicial proceeding decided before July 6, 1975. (P.R.C. 21176(b))

(e) Any draft EIR or Negative Declaration which has been completed and sent out for public review before January 1, 1978, in compliance with procedures of a public agency consistent with CEQA and these Guidelines as amended in December 1976, shall be deemed to be in compliance with these Guidelines. No further EIR shall be required except as provided in Subsections (a), (b) or (c) in Section 15067.

History: 1. New subsection (e) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5). For prior history, see Register 76, No. 41.

15071. Emergency Projects. The following emergency projects are exempt from the requirements of CEQA, and no EIR is required.

(a) Projects undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish or replace property or facilities damaged or destroyed as a result of a disaster in a disaster stricken area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing with Section 8550) of Division 1, Title 2 of the Government Code.

(b) Emergency repairs to public service facilities necessary to maintain service.

(c) Specific actions necessary to prevent or mitigate an emergency.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

2. Amendment of subsection (c) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15072. Feasibility and Planning Studies. A project involving only feasibility or planning studies for possible future actions which the agency, board, or commission has not approved, adopted, or funded does not require the preparation of an environmental impact report but does require consideration of environmental factors as required by Section 21102 of CEQA.

15073. Ministerial Projects. (a) Ministerial projects are exempt from the requirements of CEQA, and no environmental documents are required. The determination of what is "ministerial" can most appropriately be made by the particular public agency involved based upon its analysis of its own laws, and each public agency should make such determination either as a part of its implementing regulations or on a case-by-case basis. (P.R.C. 21080(b)).

(b) In the absence of any discretionary provision contained in the relevant local ordinance, it shall be presumed that the following actions are ministerial:

(1) Issuance of building permits.
(2) Issuance of business licenses.
(3) Approval of final subdivision maps.
(4) Approval of individual utility service connections and disconnections.

(c) Each public agency should, in its implementing regulations or ordinances, provide an identification or itemization of its projects and actions which are deemed ministerial under the applicable laws and ordinances.

(d) Where a project involves an approval that contains elements of both a ministerial action and a discretionary action, the project will be deemed to be discretionary and will be subject to the requirements of CEQA.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15074. Notice of Exemption. (a) When a public agency determines that a project is exempt from the requirements of CEQA because it is an emergency project, a ministerial project or categorically exempt, and the public agency approves or determines to carry out the project, it may file a notice of exemption. Such a notice shall include (1) a brief description of the project, (2) a finding that the project is exempt, including a citation to the State Guidelines section under which it is found to be exempt, and (3) a brief statement of reasons to support the findings.

(b) Whenever a public agency approves an applicant's project, it or the applicant may file a notice of exemption. The notice of exemption filed by an applicant shall contain the information required in subdivision (a) above, together with a certified document issued by the public agency stating that it has found the project to be exempt. This may be a certified copy of an existing document or record of the public agency.

(c) When a state agency files this notice, the notice of exemption will be filed with the Secretary for Resources. A form for this notice is provided in Appendix E. Copies of all such notices shall be posted on a weekly basis at the Resources Building Information Desk, 1416 Ninth Street, Sacramento, California. Each such list will remain posted for 30 days.

(d) When a local agency files this notice, the notice of exemption will be filed with the county clerk of the county or counties in which the project will be located. Copies of all such notices will be available for public inspection and a list of such notices shall be posted on a weekly basis in the office of the county clerk. Each such list shall remain posted for a period of 30 days.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21108, 21152, 21167, Public Resources Code and Chap. 56 of Stats. 1974.

History: 1. New section filed 3-26-74 as an emergency; effective upon filing (Register 74, No. 13).
2. Certificate of Compliance filed 7-23-74 (Register 74, No. 26).
3. Amendment of subsections (b), (c) and (d) filed 2-5-75; effective thirtieth day

15075. Projects Which Are Disapproved. (a) CEQA does not apply to projects which a public agency rejects or disapproves. [P.R.C. Section 21080(b) (5)]

(b) This section is intended to allow an initial screening of projects on the merits for quick disapprovals prior to the initiation of the CEQA process where the agency can determine that the project cannot be approved.

(c) This section shall not relieve an applicant from paying the costs for an EIR or Negative Declaration prepared for his project prior to the Lead Agency's disapproval of the project after normal evaluation and processing.

History: 1. Renumbering of former Section 15075 to Section 15151 and new Section 15075 filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5). For prior history of former Section 15075 see Register 76, No. 41.

15076. Early Activities Related to Power Plants. CEQA does not apply to actions undertaken by a public agency relating to any power plant site or facility, including the expenditure, obligation, or encumbrance of funds by a public agency for planning, engineering, or design purposes, or for the purchase of equipment, fuel, steam, or power for such a power plant, if the power plant site and related facility will be the subject of an Environmental Impact Report or Negative Declaration prepared by:

(a) The State Energy Resources Conservation and Development Commission,

(b) The Public Utilities Commission, or

(c) The city or county in which the power plant and related facility would be located [P.R.C. Sec. 21080(b) (6)].

History: 1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15077. Olympic Games. CEQA does not apply to activities or approvals necessary to the bidding for, hosting or staging of, and funding or carrying out of, Olympic games under the authority of the International Olympic Committee, except for the construction of facilities necessary for such Olympic Games [P.R.C. Sec. 21080(b) (7)]. If such facilities are required by the International Olympic Committee as a condition of being awarded the Olympic Games, the Lead Agency need not discuss the "no project" alternative in an EIR with respect to those facilities.

History: 1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15078. Timberland Preserves. Local agencies are exempt from the requirement to prepare an Environmental Impact Report or Negative Declaration on the adoption of timberland preserve zones under Government Code Sections 51100 *et seq.* (Gov. Code, Sec. 51119).

History: 1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15079. Discharge Requirements. The State Water Resources Control Board and the regional boards are exempt from CEQA in the adoption of waste discharge requirements, except requirements for new sources as defined in the Federal Water Pollution Control Act. (Water Code Sec. 13389)

History: 1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

Article 7. Evaluating Projects

15080. Initial Study. (a) If a project is subject to the requirements of CEQA and not exempted by these Guidelines, the Lead Agency shall conduct an Initial Study to determine if the project may have a significant effect on the environment unless the Lead Agency can determine that the project will cle ly have a significiant effect. If any aspects of the project, either individually or cumulatively, may cause a significant effect on the environment, regardless of whether the overall effect of the project is adverse or beneficial, then an EIR must be prepared. All phases of project planning, implementation, and operation must be considered in the Initial Study of the project. To meet the requirements of this section, the Lead Agency may use an Initial Study prepared pursuant to the National Environmental Policy Act.

(b) **Purposes.** The purposes of an Initial Study are to:

(1) Identify environmental impacts;

(2) Enable an applicant or Lead Agency to modify a project, mitigating adverse impacts before an EIR is written;

(3) Focus an EIR, if one is required, on potentially significant environmental effects;

(4) Facilitate environmental assessment early in the design of a project;

(5) Provide documentation of the factual basis for the finding in a Negative Declaration that a project will not have a significant effect on the environment;

(6) Eliminate unnecessary EIRs.

(c) **Contents.** An Initial Study shall contain in brief form:

(1) A description of the project,

(2) An identification of the environmental setting,

(3) An identification of environmental effects by use of a checklist, matrix, or other method,

(4) A discussion of ways to mitigate the significant effects identified, if any,

(5) An examination of whether the project is compatible with existing zoning and plans,

(6) The name of the person or persons who prepared or participated in the Initial Study.

(d) **Uses.** (1) The Initial Study shall be used to provide a written determination of whether a Negative Declaration or an EIR shall be prepared for a project.

(2) Where a project is revised in response to an Initial Study so that potential adverse effects are mitigated to a point where no significant environmental effects would occur, a Negative Declaration shall be prepared instead of an EIR. If the project would still result in one or more significant effects on the environment after mitigation measures are added to the project, an EIR shall be prepared.

(3) The EIR shall emphasize study of the impacts determined to be significant and can omit further examination of those impacts found to be clearly insignificant in the Initial Study.

(e) **Submission of Data.** If the project is to be carried out by a private person or private organization, the Lead Agency may require such person or organization to submit data and information which will enable the Lead Agency to prepare the Initial Study.

(f) **Format.** Sample forms for an applicant's project description and a review form for use by the Lead Agency are contained in Appendices H and I. When used together, these forms would meet the requirements for an Initial Study. These forms are only suggested, and public agencies are free to devise their own format for an Initial Study.

(g) **Consultation.** As soon as a Lead Agency has determined that a project is not exempt and that an initial study will be required to determine whether a Negative Declaration or an EIR is required, the Lead Agency shall consult with all Responsible Agencies as required by Section 15066(b).

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
4. New subsection (g) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15081. Determining Significant Effect. (a) The determination of whether a project may have a significant effect on the environment calls for careful judgment on the part of the public agency involved, based to the extent possible on scientific and factual data. An iron clad definition of significant effect is not possible because the significance of an activity may vary with the setting. For example, an activity which may not be significant in an urban area may be significant in a rural area. There may be a difference of opinion on whether a particular effect should be considered adverse or beneficial, but where there is, or anticipated to be, a substantial body of opinion that considers or will consider the effect to be adverse, the lead agency should prepare an EIR to explore the environmental effects involved.

(b) In evaluating the significance of the environmental effect of a project, the Lead Agency shall consider both primary or direct and secondary or indirect consequences. Primary consequences are immediately related to the project (the construction of a new treatment plant may facilitate population growth in a particular area), while secondary consequences are related more to primary consequences than to the project itself (an impact upon the resource base, including land, air, water and energy use of the area in question may result from the population growth).

(c) Some examples of consequences which may be deemed to be a significant effect on the environment are contained in Appendix G.

History: 1. Amendment of subsection (c) filed 10-8-76; effective thirtieth day thereafter (Register 76, No 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77. For prior history, see Register 75, No. 44.

15082. Mandatory Findings of Significance. A project shall be found to have a significant effect on the environment if:

(a) The project has the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory.

(b) The project has the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals.

(c) The project has possible environmental effects which are individually limited but cumulatively considerable. As used in the subsection, "cumulatively considerable" means that the incremental effects of an individual project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.

(d) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

History: 1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15083. Negative Declaration. (a) **General.** A Negative Declaration shall be prepared for a project which could potentially have a significant effect on the environment, but which the Lead Agency finds on the basis of an Initial Study will not have a significant effect on the environment.

(b) **Consultation.** Before completing a Negative Declaration, the Lead Agency shall consult with all Responsible Agencies pursuant to Section 15066. This consultation may take place during the public review period required by Subsection (e) of this section.

Article 1. General

15000. Authority.

The regulations contained herein are prescribed by the Secretary for Resources pursuant to authority granted in Public Resources Code Section 21083 to be followed by all state agencies, boards, and commisions, all counties, cities and counties, cities including charter cities, regional agencies, public districts, redevelopment agencies, and all other political subdivisions of the State in the implementation of the Environmental Quality Act of 1970 dealing with environmental quality, the evaluation of projects, and the preparation and evaluation of environmental impact reports. These Guidelines have been developed by the Office of Planning and Research for adoption by the Secretary for Resources in accordance with Section 21083. Additional information may be obtained by writing:

Secretary for Resources
Room 1311, 1416 Ninth Street
Sacramento, CA 95814

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

HISTORY:

1. New Chapter 8, Articles 1 through 10 (§§ 15000 through 15166, not consecutive) filed 2-7-73; designated effective upon filing as provided in Section 21083, Public Resources Code (Register 73, No. 6).

15001. Short Title.

These Guidelines may be cited as the "State EIR Guidelines."

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000–21174, Public Resources Code.

HISTORY:

1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15002. General Concepts.

(a) Governmental Action. CEQA applies to governmental action. This action may involve:

(1) Activities directly undertaken by a governmental agency,

(2) Activities financed in whole or in part by a governmental agency, or

(3) Private activities which require approval from a governmental agency.

(b) Private Action. Private action is not subject to CEQA unless the action involves governmental participation, financing, or approval.

(c) Project. A "project" is an activity subject to CEQA. The term "project" has been interpreted to mean far more than the ordinary dictionary definition of the term. See Section 15037.

(d) Time for Compliance. A governmental agency is required to comply with CEQA procedures when the agency proposes to carry out or approve the activity. See Section 15013.

(e) Environmental Impact Reports and Negative Declarations. An environmental impact report (EIR) is the public document used by the governmental agency to analyze the significant environmental effects of a proposed project, to identify alternatives, and to disclose possible ways to reduce or avoid the possible environmental damage. When an agency finds that a project will have no significant environmental effect, the agency will prepare a "Negative Declaration" instead of an EIR.

(1) For a definition of "environmental impact report", see Section 15027.

(2) For the process of using an EIR, see Sections 15080–15089.

(3) For the contents of an EIR, see Sections 15140–15151.

(4) For possible approaches in writing EIRs, see Sections 15067–15069.6.

(5) For a definition of "Negative Declaration", see Section 15033.

(6) For the use of a Negative Declaration, see Section 15083.

(f) Methods for Protecting the Environment. CEQA requires more than merely preparing environmental documents. The EIR by itself does not control the way in which a project can be built or carried out. Rather, when an EIR shows that a project would cause substantial adverse changes in the environment, the governmental agency must respond to the information by one or more of the following methods:

(1) Changing a proposed activity;

(2) Imposing conditions on the approval of the activity;

(3) Adopting plans or ordinances to control a broader class of activities to avoid the problems;

(4) Choosing an alternative way of meeting the same need;

(5) Disapproving the project, or

(6) Finding that changes in, or alterations, the project are not feasible.

(7) Finding that the unavoidable, significant environmental damage is acceptable as provided in Section 15089.

(g) Significant Effect on the Environment. A significant effect on the environment is defined as a substantial adverse change in the physical conditions which exist in the area affected by the proposed project. An EIR must be prepared when a project may have a significant effect on the environment. Further, when an EIR identifies a significant effect, the government agency approving the project must make findings on whether there are feasible ways available to avoid or reduce the adverse environmental effects.

(1) For a definition of the term "significant" effect on the environment, see Section 15040.

(2) For the process of deciding whether an effect is significant, see Sections 15080–15084 and Appendices H and I.

(3) For examples of effects that are often found to be significant, see Appendix G.

(4) For findings which must be made on significant effects found in an EIR, see Sections 15088 and 15089.

(h) Discretionary Action. CEQA applies in situations where a governmental agency can use its judgment in deciding whether and how to approve a project. Environmental information can be helpful only where government has authority to respond to the information.

(1) For a definition of a "discretionary project" which is subject to CEQA, see Section 15024.

(2) Where the law requires a governmental agency to act on a project in a set way without allowing the agency to use its own judgment, the project is called "ministerial", and CEQA does not apply. See Sections 15032 and 15073.

(3) Whether an agency has discretionary or ministerial controls over a project depends on the authority granted by the law providing the controls over the activity. Similar projects may be subject to discretionary controls in one city or county and only ministerial controls in another.

(i) Public Involvement. Under CEQA, an agency must solicit and respond to comments from the public and from other agencies concerned with the project.

(1) For requirements for consulting with other agencies, see Section 15066.

(2) For public notice requirements, see Sections 15083(d) and 15085(d).

(3) For public participation generally and public hearings, see Sections 15164 and 15165.

(4) For the required response to comments, see Section 15146(b).

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

Article 2. Purpose

15005. Purpose.

The purpose of these Guidelines is to provide public agencies with principles, objectives, criteria, and definitions of statewide application to be used in the implementation of the California Environmental Quality Act of 1970, Public Resources Code Sections 21000 et seq. These Guidelines are binding on all public agencies.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15006. Basic Purposes of CEQA.

The basic purposes of CEQA are to:

(1) Inform governmental decision makers and the public about the potential, significant environmental effects of proposed activities.

(2) Identify ways that environmental damage can be avoided or significantly reduced,

(3) Prevent significant, avoidable damage to the environment by requiring changes in projects through the use of alternatives or mitigation measures when the governmental agency finds the changes to be feasible.

(4) Disclose to the public the reasons why a governmental agency approved the project in the manner the agency chose.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21002, 21002.1, Public Resources Code; *E.D.F. v. Coastside County Water District*, 27 Cal. App. 695; *People v. County of Kern*, 39 Cal. App. 830; *Laurel Hills Homeowners Association v. City Council*, 88 Cal. App. 3d 515.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

Article 3. Policy

15010. Legislative Declaration.

The Legislature has declared that:

(a) Every citizen has a responsibility to contribute to the preservation and enhancement of the environment.

(b) It is the intent of the Legislature that all agencies of the state government which regulate activities of private individuals, corporations, and public agencies which are found to affect the quality of the environment, shall regulate such activities so that major consideration is given to preventing environmental damage.

15011. State Policy.

The Legislature has declared that it is the policy of the state to:

(a) Develop and maintain a high-quality environment now and in the future, and take all action necessary to protect, rehabilitate, and enhance the environmental quality of the state.

(b) Take all action necessary to provide the people of this state with clean air and water, enjoyment of aesthetic, natural, scenic, and historic environmental qualities, and freedom from excessive noise.

(c) Prevent the elimination of fish or wildlife species due to man's activities, insure that fish and wildlife populations do not drop below self-perpetuating levels, and preserve for future generations representations of all plant and animal communities and examples of the major periods of California history.

(d) Ensure that the long-term protection of the environment shall be the guiding criterion in public decisions.

(e) Create and maintain conditions under which man and nature can exist in productive harmony to fulfill the social and economic requirements of present and future generations.

(f) Require governmental agencies at all levels to develop standards and procedures necessary to protect environmental quality.

(g) Require governmental agencies at all levels to consider qualitative factors as well as economic and technical factors and long-term benefits and costs, in addition to short-term benefits and costs and to consider alternatives to proposed actions affecting the environment.

15011.5. Additional Policies.

The courts of this state have found the following policies to be implicit in CEQA:

(a) The EIR requirement is the heart of CEQA. (*County of Inyo* v. *Yorty*, 32 Cal. App. 3d 795.)

(b) The EIR serves not only to protect the environment but also to demonstrate to the public that it is being protected. (*County of Inyo* v. *Yorty*, 32 Cal. App. 3d 795.)

(c) The EIR is to inform other governmental agencies and the public generally of the environmental impact of a proposed project. (*No Oil, Inc.* v. *City of Los Angeles*, 13 C. 3d 68.)

(d) The EIR is to demonstrate to an apprehensive citizenry that the agency has in fact analyzed and considered the ecological implications of its action. (*People ex rel. Department of Public Works* v. *Bosio*, 47 Cal. App. 3d 495.)

(e) The EIR process will enable the public to determine the environmental and economic values of their elected and appointed officials thus allowing for appropriate action come election day should a majority of the voters disagree. (*People* v. *County of Kern*, 39 Cal. App. 3d 830.)

(f) CEQA was intended to be interpreted in such manner as to afford the fullest possible protection to the environment within the reasonable scope of the statutory language. (*Friends of Mammoth* v. *Board of Supervisors*, 8 C. 3d 247.)

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41).

NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15011.6. State Policies Regarding Use of Environmental Impact Reports.

The Legislature has declared that the following policies shall apply to the use of environmental impact reports:

(a) The purpose of an environmental impact report is to identify the significant effects of a project on the environment, to identify alternatives to the project, and to indicate the manner in which such significant effects can be mitigated or avoided.

(b) Each public agency shall mitigate or avoid the significant effects on the environment of projects it approves or carries out to the extent it is feasible to do so.

(c) In the event that economic, social, technical, or other conditions make it infeasible to mitigate one or more significant effects of a project on the environment, such project may nonetheless be approved or carried out at the discretion of a public agency, provided that the project is otherwise permissible under applicable laws and regulations.

(d) Environmental impact reports should omit unnecessary descriptions of projects and emphasize feasible mitigation measures and alternatives to projects.

(e) Information developed in individual environmental impact reports should be incorporated into a data base which can be used to reduce delay and duplication in preparation of later environmental impact reports.

(f) The EIR process is intended to enable public agencies in evaluating projects to determine whether a project may have a significant effect on the environment, to examine and institute methods of reducing adverse impacts, and to consider alternatives to a project as proposed. These steps of analysis and evaluation must be completed prior to approval of the project.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15012. Informational Document.

An Environmental Impact Report is an informational document which, when fully prepared in accordance with the CEQA and these Guidelines, will inform public decision-makers and the general public of the environmental effects of projects they propose to carry out or approve. The information in an EIR constitutes evidence that a public agency shall consider along with any other information which may be presented to the agency. While CEQA requires that major consideration be given to preventing environmental damage, it is recognized that public agencies have obligations to balance other public objectives, including economic and social factors in determining whether and how a project should be approved.

(b) Economic information may be included in an EIR or may be presented in whatever form the agency desires.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15013. Time of Preparation.

(a) Environmental documents are useful planning tools to enable environmental constraints and opportunities to be considered before project plans are finalized.

(b) Environmental documents should be prepared as early as feasible in the planning process to enable environmental considerations to influence project program and design.

(1) With public projects, at the earliest feasible time, project sponsors shall incorporate environmental considerations into project conceptualization, design and planning.

(2) With private projects, the Lead Agency shall encourage the project proponent to incorporate environmental considerations into project conceptualization, design and planning at the earliest feasible time.

(c) The environmental document preparation and review should be coordinated in a timely fashion with the existing planning, review and project approval processes being used by each public agency. When the Lead Agency is a State Agency, the environmental document shall be included as part of the regular project report which is used in its existing review and budgetary process.

HISTORY:

1. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15014. Applicability.

(a) These Guidelines have only general application to the diversity of projects undertaken or approved by public agencies. They provide basic principles, objectives, criteria and definitions which individual public agencies shall adapt for internal use, interpreting these Guidelines in terms of specific projects.

(b) Until April 1, 1975, the objectives, criteria, and procedures adopted by public agencies in compliance with CEQA and these Guidelines may continue to govern the evaluation of projects and the preparation of environmental documents without being brought into conformity with the amendments to these Guidelines adopted by the Secretary for Resources in December, 1974. However, the amendment to Section 15143(c) dealing with mitigation measures, must be complied with effective January 7, 1975, regardless of whether its provisions have been included in the procedures being used by a public agency.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsection (b) filed 1-18-74 as an emergency; effective upon filing (Register 74, No. 3).
3. Amendment of subsection (b) filed 1-25-74 as an emergency; effective immediately upon filing. Certificate of Compliance included (Register 74, No. 4).
4. Amendment filed 12-31-74 as an emergency; designated effective 1-7-75 (Register 75, No. 1).
5. Certificate of Compliance filed 4-29-75 (Register 75, No. 18).

15015. Terminology.

The following words are used to indicate whether a particular subject in the Guidelines is mandatory, advisory, or permissive:

(a) "Must" or "shall" identifies a mandatory element which all public agencies are required to follow.

(b) "Should" identifies guidance provided by the Secretary for Resources based on policy considerations contained in CEQA, in the legislative history of the statute, or in federal court decisions which California courts can be expected to follow. Public agencies are advised to follow this guidance in the absence of compelling, countervailing considerations.

(c) "May" identifies a permissive element which is left fully to the discretion of the public agencies involved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

HISTORY:

1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15016. Reducing Delay and Paperwork.

Public agencies should reduce delay and paperwork by:

(a) Integrating the CEQA process into early planning. (15013)

(b) Ensuring the swift and fair resolution of lead agency disputes. (15065.5)

(c) Identifying projects which fit within categorical exemptions and are therefore exempt from CEQA processing. (15100.4)

(d) Using initial studies to identify significant environmental issues and to narrow the scope of EIRs. (15080)

(e) Using a negative declaration when a project not otherwise exempt will not have a significant effect on the environment. (15083)

(f) Consulting with state and local responsible agencies before and during preparation of an environmental impact report so that the document will meet the needs of all the agencies which will use it. (15066)

(g) Allowing applicants to revise projects to eliminate possible significant effects on the environment, thereby enabling the project to qualify for a negative declaration rather than an environmental impact report. (15080(d)(2)).

(h) Integrating CEQA requirements with other environmental review and consultation requirements. (Public Resources Code Section 21080.5)

(i) Eliminating duplication with federal procedures by providing for joint preparation of environmental documents with federal agencies and by adopting completed federal NEPA documents. (15083)

(j) Emphasizing consultation before an environmental impact report is prepared, rather than submitting adversary comments on a completed document. (15066)

(k) Combining environmental documents with other documents such as general plans. (15148)

(l) Eliminating repetitive discussions of the same issues by using environmental impact reports on programs, policies, or plans and tiering from statement of broad scope to those of narrower scope. (15066.5)

(m) Reducing the length of environmental impact reports by means such as setting appropriate page limits. (15140.5)

(n) Preparing analytic rather than encyclopedic environmental impact reports. (15140)

(o) Mentioning only briefly issues other than significant ones in EIRs. (15143.5)

(p) Writing environmental impact reports in plain language. (15140)

(q) Following a clear format for environmental impact reports. (15140)

(r) Emphasizing the portions of the environmental impact report that are useful to decisionmakers and the public and reducing emphasis on background material. (15140(e))

(s) Using incorporation by reference. (15149)

(t) Making comments on environmental impact reports as specific as possible. (15085.5(d))

NOTE: Authority cited: Section 21083, Public Resources Code. References: Sections 21000–21176, Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

Article 4. Definitions

15020. General.

Whenever the following words are used in these Guidelines, unless otherwise defined, they shall have the meaning ascribed to them in this article. These definitions are intended to clarify but not to replace or negate the definitions used in CEQA.

15020.5. Applicant.

Applicant means a person who proposes to carry out a project which needs a lease, permit, license, certificate, or other entitlement to use or financial assistance from one or more public agencies when that person applies for the governmental approval or assistance.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

HISTORY:

1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15021. Approval.

Approval means the decision by a public agency which commits the agency to a definite course of action in regard to a project intended to be carried out by any person. The exact date of approval of any project is a matter determined by each public agency according to its rules, regulations, and ordinances. Legislative action in regard to a project often constitutes approval.

In connection with private activities, approval occurs upon the earliest commitment to issue or the issuance by the public agency of a discretionary contract, grant, subsidy, loan, or other form of financial assistance, lease, permit, license, certificate, or other entitlement for use of the project.

15022. CEQA—California Environmental Quality Act.

California Environmental Quality Act (CEQA) means California Public Resources Code Sections 21000 et seq.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15023. Categorical Exemption.

Categorical Exemption means an exception from the requirements of CEQA for a class of projects based on a finding by the Secretary for Resources that the class of projects does not have a significant effect on the environment.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15023.5. Cumulative Impacts.

Cumulative impacts refer to two or more individual effects which, when considered together, are considerable or which compound or increase other environmental impacts.

(a) The individual effects may be changes resulting from a single project or a number of separate projects.

(b) The cumulative impact from several projects is the change in the environment which results from the incremental impact of the project when added to other closely related past, present, and reasonable foreseeable probable future projects. Cumulative impacts can result from individually minor but collectively significant projects taking place over a period of time.

(c) A discussion of cumulative impacts shall reflect their severity and significance but need not be discussed in as great detail as the direct effects of the project. The discussion of cumulative impacts should be guided by a standard of practicality and reasonableness. The following (three) elements are necessary to an adequate discussion of cumulative impacts:

(1) A list of projects producing related or cumulative impacts, including those projects outside the control of the agency,

(2) A summary of the expected environmental effects to be produced by those projects with specific referenced to additional information where that information is available, and

(3) A reasonable analysis of the cumulative impacts of the relevant projects.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000-21176, Public Resources Code, and *Whitman* v. *Board of Supervisors*, 88 Cal. App. 3d 397.

HISTORY:

1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41).

NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

2. Amendment filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15023.7. Decision Making Body.

"Decision making body" means any person or group of people within a public agency permitted by law to approve or disapprove the project at issue.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15024. Discretionary Project.

Discretionary project means an activity defined as a project which requires the exercise of judgment, deliberation, or decision on the part of the public agency or body in the process of approving or disapproving a particular activity, as distinguished from situations where the public agency or body merely has to determine whether there has been conformity with applicable statutes, ordinances, or regulations. A timber harvesting plan submitted to the State Forester for approval under the requirements of the Z'berg-Nejedly Forest Practice Act of 1973 (Pub. Res. Code § 4511 et seq.) constitutes a discretionary project within the meaning of the California Environmental Quality Act. § 21065(c).

HISTORY:

1. Amendment filed 1-30-75 as an emergency; effective upon filing (Register 75, No. 5).
2. Certificate of Compliance filed 5-29-75 (Register 75, No. 22).

15025. Emergency.

Emergency means a sudden, unexpected occurrence, involving a clear and imminent danger, demanding immediate action to prevent or mitigate loss of, or damage to life, health, property, or essential public services. Emergency includes such occurrences as fire, flood, earthquake, or other soil or geologic movements, as well as such occurrences as riot, accident, or sabotage.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15026. Environment.

Environment means the physical conditions which exist within the area which will be affected by a proposed project including land, air, water, minerals, flora, fauna, ambient noise, objects of historic or aesthetic significance.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15026.5. Environmental Documents.

Environmental documents means Draft and Final EIRs, Initial Studies, Negative Declarations, Notices of Completion, and Notices of Determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

HISTORY:

1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included. (Register 73, No. 50).

15027. EIR—Environmental Impact Report.

Environmental Impact Report (EIR) means a detailed statement setting forth the environmental effects and considerations pertaining to a project as specified in Section 21100 of the California Environmental Quality Act, and may mean either a draft or a final EIR.

(a) Draft EIR means an EIR containing the information specified in Sections 15141, 15142, and 15143 of these Guidelines. Where a Lead Agency consults with Responsible Agencies in the preparation of a draft EIR, the draft EIR shall also contain the information specified in Section 15144.

(b) Final EIR means an EIR containing the information contained in the draft EIR, comments either verbatim or in summary received in the review process, a list of persons commenting, and the response of the Lead Agency to the comments received. The final EIR is discussed in detail in Section 15146.

HISTORY:

1. Amendment of subsection (b) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15028. EIS—Environmental Impact Statement.

Environmental Impact Statement (EIS) means an environmental impact document prepared pursuant to the National Environmental Policy Act (NEPA). The Federal Government uses the term EIS in the place of the term EIR which is used in CEQA.

HISTORY:

1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15029. Feasible.

Feasible means capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, social, and technological factors.

HISTORY:

1. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15029.5. Initial Study.

Initial study means a preliminary analysis prepared by the lead agency pursuant to Section 15080 to determine whether an EIR or a Negative Declaration must be prepared.

NOTE: Authority cited: Sections 21083 and 21174, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

HISTORY:

1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15029.6. Jurisdiction by Law.

(a) Jurisdiction by law means the authority of any public agency

(1) to grant a permit or other entitlement for use,

(2) to provide funding for the project in question, or

(3) to exercise authority over resources which may be affected by the project.

(b) A city or county will have jurisdiction by law with respect to a project when the city or county having primary jurisdiction over the area involved is the site of the project, the area in which the major environmental effects will occur, and/or the area in which reside those citizens most directly concerned by any such environmental effects.

(c) Where an agency having jurisdiction by law must exercise discretionary authority over a project in order for the project to proceed, it is also a responsible agency, see Section 15039, or the Lead Agency, see Section 15030.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000–21174, Public Resources Code.

HISTORY:

1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

2. Amendment of subsection (a) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

3. Amendment of subsection (b) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15030. Lead Agency.

Lead Agency means the public agency which has the principal responsibility for carrying out or approving a project. The Lead Agency will prepare the environmental documents for the project either directly or by contract. Criteria for determining which agency will be the Lead Agency for a project are contained in Section 15065.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15031. Local Agency.

Local agency means any public agency other than a state agency, board or commission. Local agency includes but is not limited to cities, counties, charter cities and counties, districts, school districts, special district, redevelopment agencies, local agency formation commissions and any board, commission, or organizational subdivision of a local agency when so designated by order or resolution of the governing legislative body of the local agency.

HISTORY:

1. Amendment filed 12-14-73 as an emergency, effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41).

NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15032. Ministerial Projects.

Ministerial projects as a general rule, include those activities defined as projects which are undertaken or approved by a governmental decision which a public officer or public agency makes upon a given state of facts in a prescribed manner in obedience to the mandate of legal authority. With these projects, the officer or agency must act upon the given facts without regard to his own judgment or opinion concerning the propriety or wisdom of the act although the statute, ordinance, or regulation may require, in some degree, a construction of its language by the officer. In summary, a ministerial decision involves only the use of fixed standards or objective measurements without personal judgment.

HISTORY:

1. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41).

NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15032.5. Mitigation.

Mitigation includes:

(a) Avoiding the impact altogether by not taking a certain action or parts of an action.

(b) Minimizing impacts by limiting the degree or magnitude of the action and its implementation.

(c) Rectifying the impact by repairing, rehabilitating, or restoring the impacted environment.

(d) Reducing or eliminating the impact over time by preservation and maintenance operations during the life of the action.

(e) Compensating for the impact by replacing or providing substitute resources or environments.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21100, Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15033. Negative Declaration.

Negative declaration means a written statement by the Lead Agency briefly describing the reasons that a proposed project, although not otherwise exempt, will not have a significant effect on the environment and therefore does not require the preparation of an EIR.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41).

NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15034. Notice of Completion.

Notice of Completion means a brief notice filed with the Secretary for Resources by a Lead Agency as soon as it has completed a draft EIR and is prepared to send out copies for review. The contents of this notice are explained in Section 15085(c). A copy of this notice appears in Appendix C.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15035. Notice of Determination.

Notice of Determination means a brief notice to be filed by a public agency after it approves or determines to carry out a project which is subject to the requirements of CEQA. The contents of this notice are explained in Sections 15083(d) and 15085(h). A copy of this notice appears in Appendix D.

HISTORY:

1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15035.5. Notice of Exemption.

Notice of Exemption means a brief notice which may be filed by a public agency when it has approved or determined to carry out a project, and it has determined that it is ministerial, categorically exempt or an emergency project. Such a notice may also be filed by an applicant where such a determination has been made by a public agency which must approve the project. The contents of this notice are explained in Sec. 15074(a) and (b). A copy of this notice appears in Appendix E.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21108, 21152, 21167, Public Resources Code and Chap. 56 of Stats. 1974.

HISTORY:

1. New section filed 3-26-74 as an emergency; effective upon filing (Register 74, No. 13).
2. Certificate of Compliance filed 6-26-74 (Register 74, No. 26).
3. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15035.7. Notice of Preparation.

Notice of Preparation means a brief notice sent by a Lead Agency by certified mail to notify the Responsible Agencies that the Lead Agency plans to prepare an EIR for the project. The purpose of the notice is to solicit guidance from the Responsible Agencies as to the scope and content of the environmental information to be included in the EIR. A sample form is included as Appendix J to these Guidelines. Public Agencies are free to develop their own formats for this notice.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15036. Person.

Person includes any person, firm, association, organization, partnership, business, trust, corporation, company, district, county, city and county, city, town, the State, and any of the agencies' political subdivisions of such entities.

15037. Project.

(a) Project means the whole of an action, which has a potential for resulting in a physical change in the environment, directly or ultimately, that is any of the following:

(1) An activity directly undertaken by any public agency including but not limited to public works construction and related activities, clearing or grading of land, improvements to existing public structures, enactment and amendment of zoning ordinances, and the adoption and amendment of local General Plans or elements thereof pursuant to Government Code Sections 65100–65700.

(2) An activity undertaken by a person which is supported in whole or in part through public agency contracts, grants, subsidies, loans, or other forms of assistance from one or more public agencies.

(3) An activity involving the issuance to a person of a lease, permit, license, certificate, or other entitlement for use by one or more public agencies.

(b) Project does not include:

(1) Anything specifically exempted by state law.

(2) Proposals for legislation to be enacted by the State Legislature.

(3) Continuing administrative or maintenance activities, such as purchases for supplies, personnel-related actions, emergency repairs to public service facilities, general policy and procedure making (except as they are applied to specific instances covered above), feasibility or planning studies.

(4) The submittal of proposals to a vote of the people of the State or of a particular community.

(c) The term "project" refers to the activity which is being approved and which may be subject to several discretionary approvals by governmental agencies. The term "project" does not mean each separate governmental approval.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21065, Public Resources Code; *Friends of Mammoth* v. *Board of Supervisors*, 8 Cal. 3d 247.

HISTORY:

1. Amendment of subsection (a) (1) and new subsection (c) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
4. Amendment of subsection (b) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15038. Public Agency.

Public agency includes any state agency, board or commission and any local or regional agency, as defined in these Guidelines. It does not include the courts of the State. This term does not include agencies of the federal government.

15039. Responsible Agency.

Responsible agency means a public agency which proposes to carry out or approve a project, for which a Lead Agency has prepared the environmental documents. For the purposes of CEQA, the term "responsible agency" includes all public agencies other than the lead agency which have discretionary approval power over the project.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
3. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15040. Significant Effect on the Environment.

Significant effect on the environment means a substantial, or potentially substantial, adverse change in any of the physical conditions within the area affected by the activity including land, air, water, minerals, flora, fauna, ambient noise, and objects of historic or aesthetic significance.

HISTORY:

1. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15041. Tiering.

"Tiering" refers to the coverage of general matters in broad scope or program EIRs with subsequent narrower environmental documents (such as site-specific EIRs) incorporating by reference the general discussions and concentrating solely on the issues specific to the environmental document subsequently prepared.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21003, Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15042. Trustee Agency.

"Trustee agency" means a state agency having jurisdiction by law over natural resources affected by a project which are held in trust for the people of the State of California. Trustee agencies include:

(a) The California Department of Fish and Game with regard to the fish and wildlife of the state.

(b) The State Lands Commission with regard to state owned "sovereign" lands.

(c) The State Department of Parks and Recreation with regard to units of the State Park System.

(d) The University of California with regard to sites within the Natural Land and Water Reserve System.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21080.3 and 21080.4, Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15043. Urbanized Area.

"Urbanized area" means a central city or a group of contiguous cities with a 1970 population of 50,000 or more, together with adjacent densely populated areas having a population density of at least 1,000 persons per square mile as periodically designated by the U.S. Bureau of the Census. Maps of the designated urbanized areas can be found in the California EIR Monitor of February 7, 1979. The maps are also for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The maps are sold in sets only as Stock Number 0301-3466.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21080.7, Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

Article 5. General Responsibilities

15050. Public Agency Implementation.

(a) Each public agency is responsible for complying with CEQA and these Guidelines. Each public agency must develop its own procedures consistent with these Guidelines.

(b) Where a public agency is a Lead Agency and prepares an EIR itself, contracts for the preparation, or accepts data and information in the form of a draft EIR from an applicant, that public agency is responsible entirely for the adequacy and objectivity of the EIR.

(c) Public agencies shall adopt objectives, criteria, and specific procedures consistent with CEQA and these Guidelines for the orderly evaluation of projects and the preparation of environmental documents. These implementing procedures should contain at least the following provisions:

(1) Procedures for identifying the activities that are exempt from CEQA. These procedures should contain:

(A) Provisions for evaluating a proposed activity to determine if there is no possibility that the activity may have a significant effect on the environment.

(B) A list of projects over which the public agency has only ministerial authority.

(C) A list of specific activities which the public agency has found to be categorically exempt pursuant to Section 15100.4.

(2) Procedures for the conduct of initial studies.

(3) Provisions for the preparation of Negative Declarations.

(4) Provisions for the preparation of EIR's.

(5) Provisions for consulting with and obtaining comments from other public agencies and members of the public with regard to the environmental effects of projects.

(6) Provisions assuring adequate opportunity and time for the public review and comment on the Draft EIR or Negative Declaration.

(7) Provisions for evaluating and responding to comments received on environmental documents.

(8) Provisions for the review and consideration of environmental documents by the person or decision-making body who will approve or disapprove a project.

(9) Provisions for filing documents required or authorized by CEQA and these Guidelines.

(10) Provisions to ensure that Lead Agencies obtain adequate comments on environmental documents which they submit to the public agency for review.

(11) The assignment of responsibility for specific functions to specific units of the public agency.

(12) Time periods for performing functions under CEQA as described in Section 15054.2.

(d) Any district, including a school district, need not adopt objectives, criteria and procedures of its own if it uses the objectives, criteria and procedures of another public agency whose boundaries are coterminous with the district. Any public agency may adopt the objectives, criteria, and procedures of another public agency whose boundaries are coterminous with or entirely encompass its own.

(e) Public agencies should revise their implementing procedures to conform to amendments to these guidelines within 60 days after the effective date of the amendments. During the period while the public agency is revising its procedures, the agency must conform to any statutory changes in the California Environmental Quality Act that have become effective regardless of whether the public agency has revised its formally adopted procedures to conform to the statutory changes.

(f) In adopting procedures to implement CEQA, a public agency may adopt the State EIR Guidelines by incorporation by reference. The agency would then need to adopt only those specific procedures or provisions described in subsection (c) which are necessary to tailor the general provisions of the guidelines to the specific operations of the agency. A public agency may also choose to adopt a complete set of procedures identifying in one document all the necessary requirements.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21082, Public Resources Code.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. New subsection (d) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
4. New subsections (c) (12) and (e) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
5. New subsection (f) filed 5-5-80; effective thirtieth day thereafter (Register 80, No. 19).

15051. Office of Planning and Research (OPR).

(a) OPR is responsible for the preparation and development of principles, objectives, criteria, and definitions to implement the CEQA, prior to adoption by the Secretary for Resources. OPR also, as part of guideline development, shall consider proposals for Categorical Exemption and make appropriate recommendations to the Secretary for Resources.

(b) The State Clearinghouse in the Office of Planning and Research is responsible for distributing environmental documents to State agencies, departments, boards, and commissions for review and comment.

(c) Upon request of a Lead Agency or a project applicant, OPR shall provide assistance in determining the various responsible agencies and any federal agencies which have responsibility for carrying out or approving a proposed project.

(d) OPR has responsibility for ensuring that State Responsible Agencies provide the necessary information to Lead Agencies in response to Notices of Preparation within the 45 day period as specified in Section 15066(d).

(e) OPR will resolve disputes as to which agency is the Lead Agency for a project as described in Section 15065.5.

HISTORY:

1. New subsection (b) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
2. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15052. The Secretary for Resources.

The Guidelines shall be officially adopted by the Secretary for Resources, including a finding that each class of projects given a Categorical Exemption will not have a significant effect on the environment. The Secretary also has the responsibility for consolidating all state comments on federally sponsored projects. The Secretary for Resources may issue amendments to these Guidelines.

HISTORY:

1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15053. Fees.

(a) All Lead Agencies preparing EIRs or Negative Declarations for projects to be carried out by any person other than the Lead Agency itself may charge and collect a reasonable fee from such person or entity, in order to recover the estimated costs incurred in preparing the EIR or Negative Declaration.

(b) Public agencies may charge and collect a reasonable fee from members of the public for a copy of an environmental document not to exceed the actual cost of reproducing a copy.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15054. Timely Compliance.

Public agencies should carry out their responsibilities for preparing and reviewing EIRs within a reasonable period of time. The requirement for the preparation of an EIR should not cause undue delays in the processing of applications for permits or other entitlements to use.

15054.1. Projects With Short Time Periods for Approval.

(a) A few statutes require agencies to make decisions on permits within time limits that are so short that review of the project under CEQA would be difficult. To enable the Lead Agency to comply with both the permit statute and CEQA, the Lead Agency shall deem an application for a project not received for filing under the permit statute until such time as the environmental documentation required by CEQA has been completed. This section will apply where all of the following conditions are met:

(1) The enabling legislation for a program, other than Chapter 4.5 (commencing with Section 65920) of Division 1 of Title 7 of the Government Code, requires the Lead Agency to take action on an application within a specified period of time that is six months or less, and

(2) The enabling legislation provides that the project will become approved by operation of law if the Lead Agency fails to take any action within such specified time period, and

(3) The project involves the issuance of a lease, permit, license, certificate, or other entitlement for use.

(b) Examples of time periods subject to this section include but are not limited to:

(1) Action on a tentative subdivision map by a local government within 50 days pursuant to Article 2 (commencing with Section 66452) of Chapter 3, Division 2, Title 2 of the Government Code.

(2) Action on a timber harvesting plan by the Director of Forestry within 15 days pursuant to Section 4582.7 of the Public Resources Code.

(3) Action on a permit by the San Francisco Bay Conservation and Development Commission within 90 days pursuant to Section 66632(f) of the Government Code, and

(4) Action on an oil and gas permit by the Division of Oil and Gas within 10 days pursuant to Section 3203 or 3724 of the Public Resources Code.

(c) In any case described in this section, the environmental document shall be completed or certified and the decision on the application shall be made within one year from the date on which an application requesting approval of such project has been received and accepted as complete for CEQA processing by such agency. This one-year time limit may be extended once for a period not to exceed 90 days upon consent of the public agency and the applicant.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: *Natural Resources Defense Council, Inc.*, v. *Arcata National Corporation*, 59 Cal. App. 3d 959 (1976).

HISTORY:

1. New section filed 1-30-75 as an emergency; effective upon filing (Register 75, No. 5).
2. Certificate of Compliance filed 5-29-75 (Register 75, No. 22).
3. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
4. Amendment filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15054.2. Lead Agency CEQA Time Limits.

(a) Each public agency shall include in its implementing procedures time periods for performing the functions described in this section.

(b) When the public agency is acting as a Lead Agency for a project for which the agency will grant a lease, license, permit, certificate, or other entitlement for use, the agency shall complete and certify an EIR in not more than one year or complete a Negative Declaration in not more than 105 days.

(1) Completion of a Negative Declaration within a 105 day period shall include the conduct of an initial study, public review, and the preparation of a document ready for approval by the decision making body of the public agency. Completion within the 105 day period need not include the approval of the Negative Declaration by the decision making body. Prior to approving a project, the decision making body shall consider and approve the Negative Declaration.

(2) Different time limits may be established for different types of projects subject to the 105 day and one year maximum time limits.

(3) The time limits shall be measured from the date on which an application requesting approval for the project is received and accepted as complete by the agency.

(A) State agencies are required to adopt lists and criteria by which to determine the completeness of an application. (Government Code Sections 65940 and 65941.)

(B) Local agencies may adopt lists and criteria by which to determine the completeness of applications. Different lists and criteria may be developed for different kinds of projects.

(4) The procedures may provide for a reasonable extension of the CEQA time periods under this subsection in the event that compelling circumstances justify additional time and the project applicant agrees to the extension.

(5) The Lead Agency may waive the one year time period or the 105 day period if all the following conditions occur:

(A) The project will require both an EIR or a Negative Declaration under CEQA and an EIS or a Finding of No Significant Impact under the National Environmental Policy Act,

(B) Additional time will be required to prepare a combined EIR-EIS or a combined Negative Declaration under both laws,

(C) The time required to prepare such a combined document would be less than the time required to prepare each document separately, and

(D) The applicant has requested or consented to the waiver.

(6) If the Lead Agency waives the time periods as provided in Subsection (5), the Lead Agency must approve or disapprove the project within 60 days after the combined document under CEQA and NEPA has been completed. (Government Code Section 65951.)

(c) Within 45 days after accepting an application as complete for a project involving issuance of a lease, permit, license, certificate, or other entitlement for use, a Lead Agency shall make an initial determination of whether the project will need an EIR or a Negative Declaration.

(d) A Lead Agency shall convene a meeting with one or more Responsible Agencies to discuss the scope and content of a proposed EIR as soon as possible but not later than 30 days after the meeting is requested as provided in Section 15066(e).

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
2. Amendment of subsection (b) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15054.3. Responsible Agency CEQA Time Limits.

As soon as possible after receiving a Notice of Preparation and in no event more than 45 days after receiving the notice, a Responsible Agency shall inform the Lead Agency of the scope and content of the environmental information that the Responsible Agency would need in the EIR.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15055. Delegation of Responsibilities.

(a) A public agency may assign specific functions to its staff to assist in administering CEQA. Functions which may be delegated include but are not limited to:

(1) Determination of whether a project is exempt.

(2) Conduct of an initial study.

(3) Preparation of a Negative Declaration or EIR.

(4) Determination that a Negative Declaration has been completed within a period of 105 days.

(5) Preparation of responses to public comments.

(6) Certification that the decision making body has reviewed and considered an EIR or Negative Declaration.

(7) Filing of Notices.

(b) The decision making body of a public agency may not delegate the following functions:

(1) Review and consideration of a final EIR or Negative Declaration prior to approving a project.

(2) The making of findings as required by Sections 15088 and 15089.

(c) Where an advisory body such as a planning commission is required to make a recommendation on a project to the decision making body, the advisory body shall also review and consider the EIR or Negative Declaration.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: *Kleist* v. *City of Glendale*, 56 Cal. App. 3d 770.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
2. Amendment of subsection (a) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

Article 6. Application of the Act to Projects

15060. General Rule.

The requirements set forth in these Guidelines apply to projects which may have a significant effect on the environment and which involve discretionary governmental action. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not covered by the requirements set forth in CEQA, and these Guidelines concerning the evaluation of projects and the preparation and review of environmental documents do not apply.

HISTORY:

1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15061. Projects Controlled by State or Local Agencies.

(a) When a public agency plans to carry out or approve a project which is subject to CEQA, which may have a significant effect on the environment, the EIR or Negative Declaration for the project shall be prepared directly by, or under contract to, a public agency.

(b) Where a project which is subject to CEQA is to be carried out by a nongovernmental person subject to approval, financial support, or some other involvement by a public agency, the EIR or Negative Declaration shall be prepared directly by, or under contract to, the Lead Agency. However, the Lead Agency may require the person to supply data and information, both to determine whether the project may have a significant effect on the environment, and to assist in the preparation of an EIR or Negative Declaration by the Lead Agency. This information may be submitted in the form of a draft EIR if the Lead Agency desires. If information is provided in the form of a draft EIR or Negative Declaration, the Lead Agency may not use the document as its own without independent evaluation and analysis. The draft EIR or Negative Declaration which is sent out for public review must reflect the independent judgment of the Lead Agency. The Lead Agency should require an applicant to specify to the best of his knowledge which other public agencies will have jurisdiction by law over the project.

(c) Where the project is to be undertaken by a local agency, as defined in these Guidelines, but requires state approval or financial assistance, the state agency shall require the local agency to prepare the EIR or Negative Declaration, to be submitted with the request for approval of the proposed project. This must also be done where federal funds are involved, but only if a state agency has discretionary authority over the use of those funds. If the local project has been mandated on the local agency by a state agency, the EIR prepared by the local agency may be limited to consideration of those factors and alternatives which do not conflict with the order.

(d) The EIR may be prepared as a separate document, or as part of a project report. If prepared as a part of the project report, it must still contain in one separate and distinguishable section the elements required of an EIR, including the seven elements specified in Section 15143 of these Guidelines.

(e) All public and private activities or undertakings pursuant to or in furtherance of a redevelopment plan constitute a single project, which shall be deemed approved at the time of adoption of the redevelopment plan by the legislative body. The EIR in connection with the redevelopment plan shall be submitted in accordance with Section 33352 of the Health and Safety Code.

(f) All of the above is subject to the Lead Agency principle which provides that not more than one EIR shall be prepared in connection with the same underlying activity and that the EIR shall be prepared by the lead agency.

(g) Any person may submit information to the Lead Agency to assist in the preparation of an EIR or Negative Declaration. Such information may be submitted in any format and may be included in whole or in part in any such EIR or Negative Declaration if the Lead Agency subjects the information to its own independent evaluation and analysis.

HISTORY:

1. Amendment of subsections (a), (b) and (f) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsections (a) and (b) filed 1-8-75; designated effective 4-1-75 (Register 75, No. 1).
3. New subsection (g) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15062. Private Projects.

HISTORY:

1. Repealer filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15063. Federal Projects.

(a) When a State Agency officially comments on a proposed federal project which may have a significant effect on the environment, the comments shall include a discussion of the material specified in Section 15143.

(b) When an EIR is required by CEQA and a federal EIS has been or will be prepared for the same project, all or any part of the EIS may be used as all or any part of the EIR if the EIS or part used complies with these Guidelines. In cases where a federal EIS is used, discussion of mitigation measures, growth-inducing impact, and energy conservation will have to be added or supplemented if the EIS does not include an adequate discussion of these elements.

(c) When a project requires both an EIR and an EIS, the Lead Agency shall whenever possible, use the EIS as the EIR as provided in subsection (b).

(d) If a Lead Agency finds that an EIS for a project would not be prepared by the Federal Agency by the time when the Lead Agency will need to consider an EIR, the Lead Agency should try to prepare a combined EIR-EIS. To avoid the need for the federal agency to prepare a separate document for the same project, the Lead Agency must involve the federal agency in the preparation of the EIR-EIS. This involvement is necessary because federal law generally prohibits a federal agency from using an EIR prepared by a state or local agency unless the federal agency was involved in the preparation of the document.

(e) When it plans to use an EIS or prepare a joint EIR-EIS, the Lead Agency shall consult as soon as possible with the agency that would prepare the EIS.

(f) Where a project will be subject to both CEQA and the National Environmental Policy Act, the one year time limit and the 105 day time limit may be waived pursuant to Section 15054.2.

(g) Where the federal agency circulated the EIS for public review as broadly as state or local law may require and gave notice meeting the standards in Section 15085 (d), the Lead Agency under CEQA need not recirculate the EIS for public review. One review and comment period is enough. The Lead Agency shall give notice that it will use the EIS in the place of an EIR and that it believes that the EIS meets the requirements of CEQA.

(h) State and local agencies should cooperate with federal agencies to the fullest extent possible to reduce duplication between the California Environmental Quality Act and the National Environmental Policy Act. Such cooperation should, to the fullest extent possible, include:

(1) Joint planning processes,
(2) Joint environmental research and studies,
(3) Joint public hearings,
(4) Joint environmental documents.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21083.5, 21083.6, and 21083.7.

HISTORY:

1. Amendment filed 12-14-78 as an emergency; effective upon filing. Certificate of Compliance included (Register 78, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
4. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
5. New subsection (h) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15064. Lead Agency Principle.

(a) Where a project is to be carried out or approved by more than one public agency, one public agency shall be responsible for preparation of environmental documents, and it will be the Lead Agency. Such environmental documents will be prepared by the Lead Agency in consultation with all responsible Agencies.

(b) The Lead Agency's environmental documents shall be the environmental documentation for all responsible agencies. Except as provided in Section 15069.5(c), such responsible agencies shall consider the Lead Agency's EIR or Negative Declaration prior to acting upon or approving the projects, and they shall certify that their decision-making bodies have reviewed and considered the information contained in them.

(c) The determination of the Lead Agency of whether to prepare an environmental impact report or a negative declaration shall be final and conclusive on all persons, including Responsible Agencies, as provided by Section 21080.1 of the Public Resources Code, unless:

(1) The decision is challenged as provided in Section 21167 of the Public Resources Code, or
(2) Circumstances change as provided in Section 15067.

(d) Where a decision making body has power to make a final decision on a project subject to appeal to another body, the decision making body shall review and consider the EIR. The appeal body shall also review and consider the EIR before deciding an appeal from a decision on the project.

HISTORY:

1. Amendment filed 12-14-78 as an emergency; effective upon filing. Certificate of Compliance included (Register 78, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
3. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15065. Lead Agency Criteria.

Where two or more public agencies are involved with a project, which agency shall be the Lead Agency shall be determined by the following principles:

(a) If the project is to be carried out by a public agency, the Lead Agency shall be the public agency which proposes to carry out the project.

(b) If the project is to be carried out by a nongovernmental person, the Lead Agency shall be the public agency with the greatest responsibility for supervising or approving the project as a whole.

(1) The Lead Agency will generally be the agency with general governmental powers rather than an agency with a single or limited purpose which is involved by reason of the need to provide a public service or public utility to the project; in such cases, the single or limited purpose agency will, upon request, provide data concerning all aspects of its activities required to furnish service to the project to the agency drafting the EIR, and no separate EIR will be required in regard to such activities.

(2) Where a city has prezoned an area, the city will be the appropriate Lead Agency for any subsequent annexation of the area and should prepare the required environmental document at the time of the prezoning. The city shall consult with the local agency formation commission, and the EIR shall include the comments of the local agency formation commission.

(c) Where more than one public agency equally meet the criteria set forth in paragraph (b) above, the agency which is to act first on the project in question shall be the Lead Agency (following the principle that the environmental impact should be assessed as early as possible in governmental planning).

(d) Where the provisions of subsections (a), (b), and (c) leave two or more public agencies with a substantial claim to be the Lead Agency, the public agencies may by agreement designate which agency will be the Lead Agency. An agreement may also provide for cooperative efforts by two or more agencies, joint exercise of powers, or similar devices.

HISTORY:

1. Amendment of subsection (d) and repealer of subsection (e) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5). For prior history, see Register 76, No. 41.

15065.3. Shift in Lead Agency Responsibilities.

(a) Where a Responsible Agency is called on to grant an approval for a project subject to CEQA for which another public agency was the appropriate Lead Agency, the Responsible Agency shall begin to act as the Lead Agency when any of the following conditions occur:

(1) The Lead Agency did not prepare any environmental documents for the project, and the statute of limitations has expired for a challenge to the action of the appropriate Lead Agency.

(2) The Lead Agency prepared environmental documents for the project, but the following conditions occur:

(A) A subsequent EIR is required pursuant to Section 15067,

(B) The Lead Agency has granted a final approval for the project, and

(C) The statute of limitations for challenging the Lead Agency's action under CEQA has expired.

(3) The Lead Agency prepared inadequate environmental documents without consulting with the Responsible Agency as required by Section 15066 and the statute of limitations has expired for a challenge to the action of the appropriate Lead Agency.

(b) When a Responsible Agency assumes the duties of a Lead Agency under this section, the time limits applicable to a Lead Agency shall apply to the actions of the agency.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15065.5. Designation of Lead Agency by Office of Planning and Research.

(a) In the event that the designation of a Lead Agency is in dispute, the following criteria shall apply:

(1) Public agencies should consult with each other in an effort to resolve the dispute prior to submitting it to OPR.

(2) If an agreement cannot be reached, any public agency, or in the case of a project described in subdivision (c) of Section 21065 of the Public Resources Code, the applicant for such project may submit the dispute to the OPR for resolution.

(b) OPR shall designate a Lead Agency within 21 days after receiving a completed request to resolve a dispute from any public agency or from the applicant pursuant to subsection (a) (2).

(c) Regulations adopted by OPR for resolving Lead Agency disputes may include the following:

(1) Submission of written statements to OPR and other disputing public agencies;

(2) Certification by OPR that a Lead Agency dispute exists;

(3) Publication of notice that a dispute has been submitted to OPR;

(4) Determination of the dispute on the basis of written statements or by a hearing.

(d) Designation of a Lead Agency by OPR shall be based on consideration of the criteria in Section 15065 as well as the capacity of the agency to adequately fulfill the requirements of CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

HISTORY:

1. New section filed 12-14-73 as an emergency; effective upon filing (Register 73, No. 50).
2. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15066. Consultation.

(a) General. When more than one public agency will be involved in undertaking or approving a project, the Lead Agency shall consult with all Responsible Agencies before completing a draft EIR or Negative Declaration. Consultation is designed to insure that the EIR or Negative Declaration will reflect the concerns of all Responsible Agencies which will issue approvals for the project.

(b) Determining Significant Effect. Prior to determining whether a negative declaration or environmental impact report is required for a project, the Lead Agency shall consult with all Responsible Agencies and with any Trustee Agencies responsible for natural resources affected by the project. This first step of consultation may be done quickly and informally.

(c) Notice of Preparation. Immediately after deciding that an environmental impact report is required for a project, the Lead Agency shall send to each Responsible Agency a Notice of Preparation stating that an environmental impact report will be prepared. This notice shall also be sent to every federal agency involved in approving or funding the project and to those Trustee Agencies responsible for natural resources affected by the project.

(1) The Notice of Preparation shall provide the Responsible Agencies with sufficient information describing the project and the environmental effects to enable the Responsible Agencies to make a meaningful response. At a minimum, the information shall include:

(A) Description of the project,

(B) Location of the project indicated either on an attached map (preferably a copy of a U.S.G.S. 15′ or 7½′ topographical map identified by quadrangle name, or by a street address in an urbanized area), and

(C) Probable environmental effects of the project.

(2) A sample format for a Notice of Preparation is shown in Appendix J. Public agencies are free to devise their own formats for this notice. A copy of the Initial Study may be sent with the notice to supply the necessary information.

(3) The Lead Agency may begin work on the draft EIR immediately without awaiting responses to the Notice of Preparation. The draft EIR in preparation may need to be revised or expanded to conform to responses to the Notice of Preparation.

(4) To send copies of the Notice of Preparation, the Lead Agency shall use either certified mail or any other method of transmittal which provides it with a record that the notice was received.

(d) Response to Notice of Preparation. After receiving the Notice of Preparation under subparagraph (c), each Responsible Agency shall provide the Lead Agency with specific detail about the scope and content of the environmental information related to the Responsible Agency's area of statutory responsibility which must be included in the draft EIR. The response at a minimum shall identify the significant environmental issues and possible alternatives and mitigation which the responsible agency will need to have explored in the draft EIR.

(e) Meetings. In order to expedite the consultation, the Lead Agency, a Responsible Agency, a Trustee Agency, or a project applicant may request one or more meetings between representatives of the agencies involved to assist the Lead Agency in determining the scope and content of the environmental information which the Responsible Agency may require. Such meetings shall be convened by the Lead Agency as soon as possible, but no later than 30 days, after the meetings were requested.

(f) Review of Documents. After completing the draft EIR or Negative Declaration, the Lead Agency shall also consult with and seek to obtain comments from each Responsible Agency and other public agencies having jurisdiction by law and should consult with persons having special expertise as described in Sections 15083 and 15085.

(g) State Clearinghouse. When one or more state agencies will be a Responsible Agency, the Lead Agency shall send a Notice of Preparation to each state Responsible Agency and each Trustee Agency with a copy to the State Clearinghouse in the Office of Planning and Research. The State Clearinghouse will ensure that the state Responsible Agencies and Trustee Agencies reply to the Lead Agency within the required time.

(h) When the Notice of Preparation is submitted to the State Clearinghouse, the state identification number issued by the Clearinghouse shall be the identification number for all subsequent environmental documents on the project. The identification number should be referenced on all subsequent correspondence regarding the project, specifically on the title page of the draft and final EIR and on the Notice of Determination.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21080.3 and 21080.4, Public Resources Code.

HISTORY:

1. Repealer and new section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 7, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
4. Amendment filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15067. Subsequent EIR.

(a) Where an EIR or Negative Declaration has been prepared, no additional EIR need be prepared unless:

(1) Subsequent changes are proposed in the project which will require important revisions of the EIR, due to the involvement of new significant environmental impacts not considered in a previous EIR on the project.

(2) Substantial changes occur with respect to the circumstances under which the project is undertaken, such as a substantial deterioration in the air quality where the project will be located, which will require important revisions in the EIR due to the involvement of new significant environmental impacts not covered in a previous EIR, or

(3) New information of substantial importance to the project becomes available, and

(A) The information was not known and could not have been known at the time the EIR was certified as complete or the Negative Declaration was adopted, and

(B) The new information shows any of the following:

1. The project will have one or more significant effects not discussed previously in the EIR,

2. Significant effects previously examined will be substantially more severe than shown in the EIR,

3. Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, or

4. Mitigation measures or alternatives which were not previously considered in the EIR would substantially lessen one or more significant effects on the environment.

(b) If the EIR or Negative Declaration has been completed but the project has not yet been approved, the Lead Agency shall prepare or cause to be prepared the subsequent EIR before approving the project.

(c) If the project was approved prior to the occurrence of the conditions described in Subsection (a), the subsequent EIR shall be prepared by the public agency which grants the next discretionary approval for the project. In this situation no other Responsible Agency shall grant an approval for the project until the subsequent EIR has been completed.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21166, Public Resources Code.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
3. Amendment of subsection (a) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15067.5. Supplement to an EIR.

(a) The Lead or Responsible Agency may choose to prepare a supplement to an EIR rather than a subsequent EIR if:

(1) Any of the conditions described in Section 15067 would require the preparation of a subsequent EIR, and

(2) Only minor additions or changes would be necessary to make the previous EIR adequately apply to the project in the changed situation.

(b) The supplement to the EIR need contain only the information necessary to make the previous EIR adequate for the project as revised.

(c) A supplement to an EIR shall be given the same kind of notice and public review as is given to a draft EIR under Section 15085(d).

(d) A supplement to an EIR may be circulated by itself without recirculating the previous draft or final EIR.

(e) When the agency decides whether to approve the project, the decision making body shall consider the previous EIR as revised by the supplemental EIR. A finding under Section 15088 shall be made for each significant effect shown in the previous EIR as revised.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21166, Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15068. Use of a Single EIR.

The Lead Agency may employ a single EIR to describe more than one project, if such projects are essentially the same in terms of environmental impact. Further, the Lead Agency may use an earlier EIR prepared in connection with an earlier project to apply to a later project, if the circumstances of the projects are essentially the same. Lead Agencies may elect to write EIRs in advance for entire programs or regulations, in order to be prepared for project applications to come. Whenever an agency chooses to utilize any of these alternatives, however, it must find that the environmental effects of the projects are similar enough to warrant the same treatment in an EIR and that the EIR will adequately cover the impacts of any single project. If these tests are not met, an agency should supplement the EIR it prepares for a program to apply it to an individual project.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15068.5. Use of a General Plan EIR With Subsequent Projects.

The EIR on a general plan may be used as the foundation document for EIRs subsequently prepared for specific projects within the geographic area covered by the general plan. The subsequent EIRs may reference and summarize material in the EIR on the general plan for the description of the general environmental setting and as much of the description of the environmental impacts as applies to the specific project. Detailed information in the EIR on the specific project may be limited to a description of the project, the specific environmental setting and those impacts which are not adequately described for the specific project in the EIR on the general plan. When a subsequent EIR refers to an EIR on the general plan for part of its description of the environment and the environmental impacts, copies of the EIR on the general plan shall be made available to the public in a number of locations in the community and to any clearinghouse which will assist in public review of the EIR. The purpose of this section is not to restrict analysis of environmental issues but is to avoid the necessity for repeating detail from a General Plan EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15068.6. Housing and Neighborhood Commercial Facilities in Urbanized Areas.

(a) A project involving the construction of housing or neighborhood commercial facilities in an urbanized area may be approved after considering an EIR previously prepared for a specific plan or a local coastal program after the Lead Agency complies with the requirements in this section.

(b) The procedures for complying with this section are as follows:

(1) The Lead Agency shall conduct an initial study to determine whether the project may have one or more significant effects on the environment.

(2) The Lead Agency shall give notice of its proposed use of a previously prepared EIR to all persons who had submitted a written request for notice and shall also give notice by either:

(A) Posting notice on and off the site in the area where the project would be located, or

(B) Mailing notice directly to owners of property contiguous to the project site.

(3) The Lead Agency shall make the following findings with regard to planning and the previously prepared EIR.

(A) That the project is consistent with either:

1. A specific plan which was adopted for the area pursuant to Article 8 (commencing with Section 65450), Article 9 (commencing with Section 65500), and Article 10 (commencing with Section 65550) of Chapter 3 of Title 7 of the Government Code, or

2. A local coastal program or port master plan certified pursuant to Article 2 (commencing with Section 30510) of Chapter 6 of Division 20 of the Public Resources Code.

(B) That the specific plan or local coastal program or port master plan was adopted not more than five years prior to the finding made pursuant to this subsection and that the method of adoption was the procedure specified by Article 9 (commencing with Section 65500) or Chapter 3 of Title 7 of the Government Code for adopting specific plans and regulations.

(C) That the specific plan or local coastal program or port master plan has been the subject of a certified environmental impact report.

(D) That the environmental impact report is sufficiently detailed so that all the significant effects of the project on the environment and measures necessary to mitigate or avoid any such effects can be determined. This examination of the previously prepared EIR shall include a specific finding as to whether there would be any significant physical effects on existing structures and neighborhoods of historical or aesthetic significance if any exist in the area covered by the plan or program, and whether measures necessary to mitigate or avoid such effects are included in the EIR.

(E) That a subsequent EIR is not required pursuant to Public Resources Code Section 21166 and Guidelines Section 15067.

(4) The Lead Agency shall make one or more findings as required by Section 15088 with regard to mitigating or avoiding each significant effect that the project would have on the environment.

(5) The Lead Agency shall file a Notice of Determination with the county clerk if the Lead Agency approves the project.

(c) As used in this section, "neighborhood commercial facilities" means those commercial facilities which are an integral part of a project involving the construction of housing and which will serve the residents of such housing.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21080.7, Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15069. Multiple and Phased Projects.

Where individual projects are, or a phased project is, to be undertaken and where the total undertaking comprises a project with significant environmental effect, the Lead Agency must prepare a single EIR for the ultimate project. Where an individual project is a necessary precedent for action on a larger project, or commits the Lead Agency to a larger project, with significant environmental effect, an EIR must address itself to the scope of the larger project. Where one project is one of several similar projects of a public agency, but is not deemed a part of a larger undertaking or a larger project, the agency may prepare one EIR for all projects, or one for each project, but shall in either case comment upon the cumulative effect.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41).

NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15069.5. Staged EIR.

(a) Where a large capital project will require a number of discretionary approvals from governmental agencies and one of the approvals will occur more than 2 years before construction will begin, a staged EIR may be prepared covering the entire project in a general form. The staged EIR should evaluate the proposal in light of current and contemplated plans and produce an informed estimate of the environmental consequences of the entire project. The aspect of the project before the public agency for approval shall be discussed with a greater degree of specificity.

(b) When a staged EIR has been prepared, a supplement to the EIR shall be prepared when a later approval is required for the project, and the information available at the time of the later approval would permit consideration of additional environmental impacts, mitigation measures, or reasonable alternatives to the project.

(c) Where a statute such as the Warren-Alquist Energy Resources Conservation and Development Act provides that a specific agency shall be the Lead Agency for a project and requires the Lead Agency to prepare an EIR, a Responsible Agency which must grant an approval for the project before the Lead Agency has completed the EIR may prepare and consider a staged EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000-21176, Public Resources Code.

HISTORY:

1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15069.6. Master Environmental Assessment.

(a) General. A public agency may prepare a master environmental assessment, inventory, or data base for all, or a portion of, the territory subject to its control in order to provide information which may be used or referenced in EIRs or Negative Declarations. Neither the content, the format, nor the procedures to be used to develop a master environmental assessment are prescribed by these Guidelines. The descriptions contained in this section are advisory. A master environmental assessment is suggested solely as an approach to identify and organize environmental information for a region or area of the State.

(b) Contents. A master environmental assessment may contain an inventory of the physical and biological characteristics of the area for which it is prepared and may contain such additional data and information as the public agency determines is useful or necessary to describe environmental characteristics of the area. It may include identification of existing levels of quality and supply of air and water, capacities and levels of use of existing services and facilities, and generalized incremental effects of different categories of development projects by type, scale, and location.

(c) Preparation.

(1) A master environmental assessment or inventory may be prepared in many possible ways. For example, a MEA may be prepared as a special, comprehensive study of the area involved, as part of the EIR on a general plan, or as a data base accumulated by indexing EIRs prepared for individual projects or programs in the area involved.

(2) The information contained in a master environmental assessment should be reviewed periodically and revised as needed so that it is accurate and current.

(3) When advantageous to do so, master environmental assessments may be prepared through a joint exercise of powers agreement with neighboring local agencies or with the assistance of the appropriate Council of Governments.

(d) Uses.

(1) A master environmental assessment can identify the environmental characteristics and constraints of an area. This information can be used to influence the design and locations of individual projects.

(2) A master environmental assessment may provide information agencies can use in initial studies to decide whether certain environmental effects are likely to occur and whether certain effects will be significant.

(3) A master environmental assessment can provide a central source of current information for use in preparing individual EIR's and Negative Declarations.

(4) Relevant portions of a master environmental assessment can be referenced and summarized in EIR's and Negative Declarations.

(5) A master environmental assessment can assist in identifying long range, areawide, and cumulative impacts of individual projects proposed in the area covered by the assessment.

(6) A master environmental assessment can assist a city or county in formulating a general plan or any element of such a plan by identifying environmental characteristics and constraints that need to be addressed in the general plan.

(7) A master environmental assessment can serve as a reference document to assist public agencies which review other environmental documents dealing with activities in the area covered by the assessment. The public agency preparing the assessment should forward a completed copy to each agency which will review projects in the area.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15069.7. Tiering.

(a) Agencies are encouraged to tier their EIRs to eliminate repetitive discussions of the same issues and to focus on the actual issues ripe for decision at each level of environmental review.

(b) Whenever a broad scope EIR has been prepared on a program, plan, or policy and an environmental document is prepared later on an action included within the program, plan, or policy (such as a site specific action) the subsequent environmental document need only summarize the issues discussed in the broad scope or program EIR, incorporate discussions from the broader EIR by reference, and concentrate on the specific action proposed. The subsequent document shall state where the earlier document is available.

(c) Tiering may also be appropriate for different stages of actions.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21003, Public Resources Code; *County of Inyo* v. *Yorty*, 32 Cal. App. 3d 795.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15069.8. Program EIR.

(a) General. A program EIR is an EIR which may be prepared on an integrated series of actions that are related either:

(1) Geographically,

(2) As logical parts in the chain of contemplated actions,

(3) In connection with issuance of rules, regulations, plans or other general criteria to govern the conduct of a continuing program, or

(4) As individual projects carried out under the same authorizing statutory or regulatory authority and having generally similar environmental effects which can be mitigated in similar ways.

(b) Advantages. Use of a program EIR can provide the following advantages. The program EIR can:

(1) Provide an occasion for a more exhaustive consideration of effects and alternatives than would be practical in an EIR or an individual action.

(2) Ensure consideration of cumulative impacts that might be slighted in a case-by-case analysis,

(3) Avoid duplicative reconsideration of basic policy considerations,

(4) Allow the lead agency to consider broad policy alternatives and program-wide mitigation measures at an early time when the agency has greater flexibility to deal with basic problems or cumulative impacts.

(5) Allow reduction in paperwork.

(c) Use with Later Activities. Subsequent activities in the program must be examined in the light of the program EIR to determine whether an additional environmental document must be prepared.

(1) If a later activity would have effects that were not examined in the program EIR, a new initial study would need to be prepared leading to either an EIR or a Negative Declaration.

(2) If the agency finds that pursuant to Section 15067, no new effects could occur or no new mitigation measures would be required, the agency can approve the activity as being within the scope of the project covered by the program EIR, and no new environmental document would be required.

(3) An agency shall incorporate feasible mitigation measures and alternatives developed in the program EIR into subsequent actions in the program.

(4) Where the subsequent activities involve site specific operations, the agency should use a written checklist or similar device to document the evaluation of the site and the activity to determine whether the environmental effects of the operation were covered in the program EIR.

(5) A program EIR will be most helpful in dealing with subsequent activities if it deals with the effects of the program as specifically and comprehensively as possible. With a good and detailed analysis of the program, many subsequent activities could be found to be within the scope of the project described in the program EIR, and no further environmental documents would be required.

(d) Use with Subsequent EIRs and Negative Declarations. A program EIR can be used to simplify the task of preparing environmental documents on later parts of the program. The program EIR can:

(1) Provide the basis in an initial study for determining whether the later activity may have any significant effects.

(2) Be incorporated by reference to deal with regional influences, secondary effects, cumulative impacts, broad alternatives, and other factors that apply to the program as a whole.

(3) Focus an EIR on a subsequent project to permit discussion solely of new effects which had not been considered before.

(e) Notice with Later Activities. When a law other than CEQA requires public notice when the agency later proposes to carry out or approve an activity within the program and to rely on the program EIR for CEQA compliance, the notice for the activity shall include a statement that:

(1) This activity is within the scope of the program approved earlier, and

(2) The program EIR adequately describes the activity for the purposes of CEQA.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21003, Public Resources Code; *County of Inyo* v. *Yorty*, 32 Cal. App. 3d 795.

HISTORY:

1. New section filed 5-10-80; effective thirtieth day thereafter (Register 80, No. 19).

Article 6.5. Statutory Exemptions

15070. Ongoing Project.

(a) A project as defined in Section 15037(a)(1) of these Guidelines, approved prior to November 23, 1970, shall require an Environmental Impact Report or a Negative Declaration if the project may have a significant effect on the environment, and either of the following conditions exists:

(1) A substantial portion of public funds allocated for the project have not been spent and it is still feasible to modify the project to mitigate potentially adverse environmental effects, or to choose feasible alternatives to the project, including the alternative of "no project" or halting the project; provided that this Section (1) shall not apply to projects which come under the jurisdiction of the National Environmental Policy Act (NEPA) and which, through regulations promulgated under NEPA, were held to be too far advanced at the time of NEPA's effective date to require an EIS in compliance with those regulations.

(2) A public agency proposes to modify the project in such a way that the project might have a new significant effect on the environment.

(b) A project as defined in Section 15037(a)(3) or in Section 15037(a)(2) as it relates to contracts, where the permit or other entitlement was issued, or the contract approved, prior to April 5, 1973, shall not require an EIR or Negative Declaration, subject to the following provisions:

(1) CEQA expressly does not prohibit a public agency from considering environmental factors in connection with the approval or disapproval of a project, or from imposing reasonable fees on the appropriate private person or entity for preparing an environmental report. Local agencies may require environmental reports for projects covered by this paragraph pursuant to local ordinances during this interim period.

(2) Where the issuance or approval occurred prior to December 5, 1972, and prior to said date the project was legally challenged for noncompliance with CEQA, the project shall be bound by special rules set forth in Section 21170 of CEQA.

(3) Where a project involving the issuance of a lease, permit, license, certificate or other entitlement to use has been granted a discretionary governmental approval for part of the project before April 5, 1973, and another or additional discretionary governmental approvals after April 5, 1973, the project shall require an EIR or Negative Declaration only if the approval or approvals after April 5, 1973, involve a greater degree of responsibility or control over the project as a whole than did the approval or approvals prior to that date.

(c) Any draft EIR which has been completed or sent out for public review on or before January 1, 1977, in compliance with procedures of a public agency consistent with CEQA and these Guidelines as amended in February 1975, shall be deemed to be in compliance with these Guidelines. No further EIR shall be required except as provided in Subsections (a) and (b).

(d) Any project approved before February 7, 1975, by a local agency formation commission without complying with CEQA is declared legally effective unless:

(1) The legality of the project was contested in a legal proceeding in which a violation of CEQA was alleged prior to February 7, 1975, and the case was pending and undecided by February 7, 1975, or

(P.R.C. 21176(a))

(2) The project was determined to be illegal, void, or ineffective because of noncompliance with CEQA in any judicial proceeding decided before July 6, 1975. (P.R.C. 21176(b))

(e) Any draft EIR or Negative Declaration which has been completed and sent out for public review before January 1, 1978, in compliance with procedures of a public agency consistent with CEQA and these Guidelines as amended in December 1976, shall be deemed to be in compliance with these Guidelines. No further EIR shall be required except as provided in Subsections (a), (b) or (c). in Section 15067.

HISTORY:

1. New subsection (e) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5). For prior history, see Register 76, No. 41.

15071. Emergency Projects.

The following emergency projects are exempt from the requirements of CEQA, and no EIR is required.

(a) Projects undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish or replace property or facilities damaged or destroyed as a result of a disaster in a disaster stricken area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing with Section 8550) of Division 1, Title 2 of the Government Code.

(b) Emergency repairs to public service facilities necessary to maintain service.

(c) Specific actions necessary to prevent or mitigate an emergency.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

2. Amendment of subsection (c) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15072. Feasibility and Planning Studies.

A project involving only feasibility or planning studies for possible future actions which the agency, board, or commission has not approved, adopted, or funded does not require the preparation of an environmental impact report but does require consideration of environmental factors as required by Section 21102 of CEQA.

15073. Ministerial Projects.

(a) Ministerial projects are exempt from the requirements of CEQA, and no environmental documents are required. The determination of what is "ministerial" can most appropriately be made by the particular public agency involved based upon its analysis of its own laws, and each public agency should make such determination either as a part of its implementing regulations or on a case-by-case basis. (P.R.C. 21080(b))

(b) In the absence of any discretionary provision contained in the relevant local ordinance, it shall be presumed that the following actions are ministerial:
(1) Issuance of building permits.
(2) Issuance of business licenses.
(3) Approval of final subdivision maps.
(4) Approval of individual utility service connections and disconnections.
(c) Each public agency should, in its implementing regulations or ordinances, provide an identification or itemization of its projects and actions which are deemed ministerial under the applicable laws and ordinances.
(d) Where a project involves an approval that contains elements of both a ministerial action and a discretionary action, the project will be deemed to be discretionary and will be subject to the requirements of CEQA.

HISTORY:
1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41).
NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15074. Notice of Exemption.

(a) When a public agency determines that a project is exempt from the requirements of CEQA and the public agency approves or determines to carry out the project, it may file a notice of exemption. Such a notice shall include:
(1) A brief description of the project,
(2) A finding that the project is exempt, including a citation to the State Guidelines section under which it is found to be exempt, and
(3) A brief statement of reasons to support the findings.
(b) Whenever a public agency approves an applicant's project, it or the applicant may file a notice of exemption. The notice of exemption filed by an applicant shall contain the information required in subdivision (a) above, together with a certified document issued by the public agency stating that it has found the project to be exempt. This may be a certified copy of an existing document or record of the public agency.
(c) When a state agency files this notice, the notice of exemption will be filed with the Secretary for Resources. A form for this notice is provided in Appendix E. Copies of all such notices shall be posted on a weekly basis at the Resources Building Information Desk, 1416 Ninth Street, Sacramento, California. Each such list will remain posted for 30 days.
(d) When a local agency files this notice, the notice of exemption will be filed with the county clerk of the county or counties in which the project will be located. Copies of all such notices will be available for public inspection and a list of such notices shall be posted on a weekly basis in the office of the county clerk. Each such list shall remain posted for a period of 30 days.

(e) The filing of a Notice of Exemption starts a 35 day statute of limitations period on legal challenges to the agency's decision that the project is exempt from CEQA. If a Notice of Exemption is not filed, a 180 day statute of limitations will apply.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21108, 21152, 21167, Public Resources Code and Chap. 56 of Stats. 1974.

HISTORY:

1. New section filed 3-26-74 as an emergency; effective upon filing (Register 74, No. 13).
2. Certificate of Compliance filed 6-26-74 (Register 74, No. 26).
3. Amendment of subsections (c) and (d) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
4. Amendment of subsection (a) and new subsection (e) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15075. Projects Which Are Disapproved.

(a) CEQA does not apply to projects which a public agency rejects or disapproves. [P.R.C. Section 21080(b) (5)]

(b) This section is intended to allow an initial screening of projects on the merits for quick disapprovals prior to the initiation of the CEQA process where the agency can determine that the project cannot be approved.

(c) This section shall not relieve an applicant from paying the costs for an EIR or Negative Declaration prepared for his project prior to the Lead Agency's disapproval of the project after normal evaluation and processing.

HISTORY:

1. Renumbering of former Section 15075 to Section 15151 and new Section 15075 filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5). For prior history of former Section 15075 see Register 76, No. 41.

15076. Early Activities Related to Thermal Power Plants.

(a) CEQA does not apply to actions undertaken by a public agency relating to any thermal power plant site or facility, including the expenditure, obligation, or encumbrance of funds by a public agency for planning, engineering, or design purposes, or for the conditional sale or purchase of equipment, fuel, water (except ground water), steam, or power for such a thermal power plant, if the thermal power plant site and related facility will be the subject of an Environmental Impact Report or Negative Declaration or other document or documents prepared pursuant to a regulatory program certified pursuant to Public Resources Code Section 21080.5, which will be prepared by:

(1) The State Energy Resources Conservation and Development Commission,

(2) The Public Utilities Commission, or

(3) The city or county in which the power plant and related facility would be located.

(b) The EIR, Negative Declaration, or other document prepared for the thermal power plant site or facility documents, shall include the environmental impact, of any, of the action described in this section.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21080(b) (6), Public Resources Code.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
2. Amendment filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15077. Olympic Games.

CEQA does not apply to activities or approvals necessary to the bidding for, hosting or staging of, and funding or carrying out of, Olympic games under the authority of the International Olympic Committee, except for the construction of facilities necessary for such Olympic Games [P.R.C. Sec. 21080(b) (7)]. If such facilities are required by the International Olympic Committee as a condition of being awarded the Olympic Games, the Lead Agency need not discuss the "no project" alternative in an EIR with respect to those facilities.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15078. Timberland Preserves.

Local agencies are exempt from the requirement to prepare an Environmental Impact Report or Negative Declaration on the adoption of timberland preserve zones under Government Code Sections 51100 *et seq.* (Gov. Code, Sec. 51119).

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15079. Discharge Requirements.

The State Water Resources Control Board and the regional boards are exempt from the requirement to prepare an Environmental Impact Report or a Negative Declaration prior to the adoption of waste discharge requirements, except requirements for new sources as defined in the Federal Water Pollution Control Act or in other acts which amend or supplement the Federal Water Pollution Control Act. The term "waste discharge requirements" as used in this section is the equivalent of the term "permits" as used in the Federal Water Pollution Control Act.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 13389, Water Code.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
2. Amendment filed 5-10-80; effective thirtieth day thereafter (Register 80, No. 19).

15079.1. Rates, Tolls, Fares, and Charges.

(a) CEQA does not apply to the establishment, modification, structuring, restructuring, or approval of rates, tolls, fares or other charges by public agencies which the public agency finds are for the purpose of:

(1) Meeting operating expenses, including employee wage rates and fringe benefits,

(2) Purchasing or leasing supplies, equipment or materials,

(3) Meeting financial reserve needs and requirements,

(4) Obtaining funds for capital projects, necessary to maintain service within existing service areas, or

(5) Obtaining funds necessary to maintain such intra-city transfers as are authorized by city charter.

(b) The public agency shall incorporate written findings in the record of any proceeding in which an exemption under this section is claimed setting forth with specificity the basis for the claim of exemption.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21080(b) (8), Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15079.2. Proposition 13 Adjustments.

CEQA does not apply to actions taken prior to January 1, 1982, by a public agency to implement the transition from the property taxation system in effect prior to June 1, 1978, to the system provided for by Article XIII A of the California Constitution. This exemption is limited to projects directly undertaken by any public agency or projects undertaken by a person which are supported in whole or in part through contracts, grants, subsidies, loans, or other forms of assistance from one or more public agencies where the projects:

(a) Initiate or increase fees, rates, or charges charged for any existing public service, program, or activity, or

(b) Reduce or eliminate the availability of an existing public service program, or activity, or

(c) Close publicly owned or operated facilities, or

(d) Reduce or eliminate the availability of an existing publicly owned transit service, program, or activity.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21080(b) (9), Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15079.3. Adoption of Local Coastal Programs.

CEQA does not apply to activities and approvals by any local government, as defined in Section 30109 of the Public Resources Code, necessary for the preparation and adoption of a local coastal program pursuant to the California Coastal Act (commencing with Section 30000 of the Public Resources Code). CEQA shall apply to the certification of a local coastal program by the California Coastal Commission pursuant to Chapter 6 of the California Coastal Act.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21080.9, Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15079.4. Passenger or Commuter Service on Existing Rail Lines.

CEQA does not apply to projects for the institution or increase of passenger or commuter service on rail lines already in use, including the modernization of existing stations and parking facilities.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21085.5, Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15079.5. State and Regional Transportation Improvement Programs.

CEQA does not apply to a project for the development of a regional transportation improvement program or the state transportation improvement program.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21085.6, Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

Article 7. Evaluating Projects

15080. Initial Study.

(a) If a project is subject to the requirements of CEQA and not exempted by these Guidelines, the Lead Agency shall conduct an Initial Study to determine if the project may have a significant effect on the environment unless the Lead Agency can determine that the project will clearly have a significiant effect. If any aspects of the project, either individually or cumulatively, may cause a significant effect on the environment, regardless of whether the overall effect of the project is adverse or beneficial, then an EIR must be prepared. All phases of project planning, implementation, and operation must be considered in the Initial Study of the project. To meet the requirements of this section, the Lead Agency may use an Initial Study prepared pursuant to the National Environmental Policy Act.

(b) Purposes. The purposes of an Initial Study are to:

(1) Identify environmental impacts;

(2) Enable an applicant or Lead Agency to modify a project, mitigating adverse impacts before an EIR is written;

(3) Focus an EIR, if one is required, on potentially significant environmental effects;

(4) Facilitate environmental assessment early in the design of a project;

(5) Provide documentation of the factual basis for the finding in a Negative Declaration that a project will not have a significant effect on the environment;

(6) Eliminate unnecessary EIRs.

(c) Contents. An Initial Study shall contain in brief form:

(1) A description of the project including the location of the project;

(2) An identification of the environmental setting;

(3) An identification of environmental effects by use of a checklist, matrix, or other method;

(4) A discussion of ways to mitigate the significant effects identified, if any;

(5) An examination of whether the project is compatible with existing zoning and plans;

(6) The name of the person or persons who prepared or participated in the Initial Study.

(d) Uses.

(1) The Initial Study shall be used to provide a written determination of whether a Negative Declaration or an EIR shall be prepared for a project.

(2) Where a project is revised in response to an Initial Study so that potential adverse effects are mitigated to a point where no significant environmental effects would occur, a Negative Declaration shall be prepared instead of an EIR. If the project would still result in one or more significant effects on the environment after mitigation measures are added to the project, an EIR shall be prepared.

(3) The EIR shall emphasize study of the impacts determined to be significant and can omit further examination of those impacts found to be clearly insignificant in the Initial Study.

(e) Submission of Data. If the project is to be carried out by a private person or private organization, the Lead Agency may require such person or organization to submit data and information which will enable the Lead Agency to prepare the Initial Study.

(f) Format. Sample forms for an applicant's project description and a review form for use by the Lead Agency are contained in Appendices H and I. When used together, these forms would meet the requirements for an Initial Study. These forms are only suggested, and public agencies are free to devise their own format for an Initial Study.

(g) Consultation. As soon as a Lead Agency has determined that a project is not exempt and that an initial study will be required to determine whether a Negative Declaration or an EIR is required, the Lead Agency shall consult with all Responsible Agencies and all Trustee Agencies responsible for resources affected by the project as required by Section 15063(b).

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21080.3, Public Resources Code.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
4. New subsection (g) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
5. Amendment of subsections (c) (1) and (g) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15081. Determining Significant Effect.

(a) The determination of whether a project may have a significant effect on the environment calls for careful judgment on the part of the public agency involved, based to the extent possible on scientific and factual data. An iron clad definition of significant effect is not possible because the significance of an activity may vary with the setting. For example, an activity which may not be significant in an urban area may be significant in a rural area. There may be a difference of opinion on whether a particular effect should be considered adverse or beneficial, but where there is, or anticipated to be, a substantial body of opinion that considers or will consider the effect to be adverse, the lead agency should prepare an EIR to explore the environmental effects involved.

(b) In evaluating the significance of the environmental effect of a project, the Lead Agency shall consider both primary or direct and secondary or indirect consequences. Primary consequences are immediately related to the project (the construction of a new treatment plant may facilitate population growth in a particular area), while secondary consequences are related more to primary consequences than to the project itself (an impact upon the resource base, including land, air, water and energy use of the area in question may result from the population growth).

(c) Some examples of consequences which may be deemed to be a significant effect on the environment are contained in Appendix G.

HISTORY:

1. Amendment of subsection (c) filed 10-8-76; effective thirtieth day thereafter (Register 76, No 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77. For prior history, see Register 75, No. 44.

15082. Mandatory Findings of Significance.

A project shall be found to have a significant effect on the environment if:

(a) The project has the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory.

(b) The project has the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals.

(c) The project has possible environmental effects which are individually limited but cumulatively considerable. As used in the subsection, "cumulatively considerable" means that the incremental effects of an individual project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.

(d) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15083. Negative Declaration.

(a) General. A Negative Declaration shall be prepared for a project which could potentially have a significant effect on the environment, but which the Lead Agency finds on the basis of an Initial Study will not have a significant effect on the environment.

(b) Consultation. Before completing a Negative Declaration, the Lead Agency shall consult with all Responsible Agencies pursuant to Section 15066. This consultation may take place during the public review period required by Subsection (e) of this section.

(c) Contents. A Negative Declaration shall include:

(1) A brief description of the project; including a commonly used name for the project if any;

(2) The location of the project and the name of the project proponent;

(3) A finding that the project will not have a significant effect on the environment;

(4) An attached copy of the Initial Study documenting reasons to support the finding.

(5) Mitigation measures, if any, included in the project to avoid potentially significant effects.

(d) Notice.

(1) Notice of the preparation on a Negative Declaration shall be provided to the public within a reasonable period of time prior to final adoption by the public agency of the Negative Declaration. Notice shall be given to all organizations and individuals who have previously requested such notice and shall also be given by at least one of the following procedures:

(A) Publication, no fewer times than required by Section 6061 of the Government Code, by the public agency in a newspaper of general circulation in the area affected by the proposed project.

(B) Posting of notice by the public agency on and off site in the area where the project is to be located.

(C) Direct mailing to owners of property contiguous to the project.

(2) The alternatives for providing notice specified in subsection (1) shall not preclude a public agency from providing additional notice by other means if such agency so desires, nor shall the requirements of this section preclude a public agency from providing the public notice required herein at the same time and in the same manner as public notice otherwise required by law for such project.

(3) The noticed review period shall be long enough to provide members of the public with sufficient time to respond to the proposed finding before the Negative Declaration is approved. Special requirements for review of Negative Declarations are contained in Sections 15161.5, 15161.6, 15162 and 15164.

(e) Consideration. Prior to approving the project, the decision-making body of the Lead Agency shall consider the Negative Declaration together with any comments received during the public review process and approve or disapprove the Negative Declaration.

(f) Notice of Determination.

(1) After making a decision to carry out or approve a project for which a Negative Declaration has been prepared, the Lead Agency shall file a Notice of Determination.

(2) The Notice of Determination shall include:

(A) An identification of the project including its common name where possible and its location.

(B) A brief description of the project.

(C) The date on which the agency approved the project.

(D) The determination of the agency that the project will not have a significant effect on the environment.

(E) A statement that a Negative Declaration has been prepared pursuant to the provisions of CEQA.

(F) The address where a copy of the Negative Declaration may be examined.

(3) If the Lead Agency is a State agency, the Notice of Determination shall be filed with the Secretary for Resources.

(4) If the Lead Agency is a local agency, the Notice of Determination shall be filed with the county clerk of the county or counties in which the project will be located. If the project requires a discretionary approval from any State agency, the Notice of Determination also shall be filed with the Secretary for Resources.

(5) The filing of the Notice of Determination with the Secretary for Resources or the county clerk starts a 30-day statute of limitations on court challenges to the approval under CEQA. (P.R.C. 21167(b)).

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21064, 21092, 21104, 21108(a), 21152(a), 21153, and 21167, Public Resources Code; *No Oil, Inc.* v. *City of Los Angeles*, 13 Cal. 3d 68.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsections (a) and (d) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1)
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
4. Amendment of subsections (b) and (f) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
5. Amendment of subsections (d)(3), (e) and (f)(2) filed 5-10-80; effective thirtieth day thereafter (Register 80, No. 19).

15084. Decision to Prepare an EIR.

(a) If the Lead Agency finds, after an initial study, that the project may have a significant effect on the environment, the Lead Agency must prepare or cause to be prepared an Environmental Impact Report.

(b) An EIR should be prepared whenever it can be fairly argued on the basis of substantial evidence that the project may have a significant effect on the environment.

(c) An EIR should be prepared when there is serious public controversy concerning the environmental effects of a project. Controversy not related to an environmental issue does not require the preparation of an EIR.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15085. EIR Process.

The following steps shall be followed after the Lead Agency decides to prepare an EIR.

(a) General. When an agency decides that an EIR will be required for a project, it shall follow the procedures contained in this section.

(b) Early Consultation.

(1) After determining that an EIR will be required for a project, the Lead Agency shall send a Notice of Preparation to each Responsible Agency and Trustee Agency responsible for resources affected by the project and consult with those agencies as required by Section 15086.

(2) Prior to completing the draft EIR, the Lead Agency should also consult directly with any person or organization it believes will be concerned with the environmental effects of the project. Many public agencies have found that early consultation solves many potential problems that would arise in more serious forms later in the review process.

(3) For projects where federal involvement might require preparation of a federal EIS, the Lead Agency under CEQA shall consult with the appropriate federal agencies as provided in Section 15063.

(c) Notice of Completion. As soon as the draft EIR is completed, a notice of completion must be filed with the Secretary for the Resources Agency. The notice shall include a brief description of the project, its proposed location, and an address where copies of the EIR are available and the period during which comments will be received. A form for this notice is provided in the Appendices. The Notice of Completion will provide the basis for information published by the Secretary for Resources in an EIR Monitor. Where the EIR will be reviewed through the State review process handled by the State Clearinghouse, the cover form required by the State Clearinghouse will serve as the Notice of Completion, and no Notice of Completion need be sent to the Resources Agency.

(d) Public Review.

(1) After completing a draft EIR, the Lead Agency shall consult with and obtain comments from public agencies having jurisdiction by law with respect to the project and should consult with persons having special expertise with respect to any environmental impact involved. The Lead Agency shall provide the general public with an opportunity to comment on the EIR.

(2) The Lead Agency shall provide public notice of the completion of a draft EIR at the same time as it sends a Notice of Completion to the Resources Agency. Notice shall be given to all organizations and individuals who have previously requested such notice and shall also be given by at least one of the following procedures:

(A) Publication, no fewer times than required by Section 6061 of the Government Code, by the public agency in a newspaper of general circulation in the area affected by the proposed project.

(B) Posting of notice by the public agency on and off the site in the area where the project is to be located.

(C) Direct mailing to owners of property contiguous to the project.

(3) The alternatives for providing notice specified in subsection (2) shall not preclude a public agency from providing additional notice by other means if such agency so desires, nor shall the requirements of this section preclude a public agency from providing the public notice required by this section at the same time and in the same manner as public notice otherwise required by law for such project.

(4) Public agencies shall use the State Clearinghouse to distribute EIRs and other environmental documents to state agencies for review and should use areawide clearinghouses to distribute the documents to regional and local agencies.

(5) To make copies of EIRs available to the public, Lead Agencies should furnish copies of draft EIRs to appropriate public library systems.

(6) Public agencies should compile listings of other agencies, particularly local agencies, which have jurisdiction by law and/or special expertise with respect to various projects and project locations. Such listings should be a guide in determining which agencies should be consulted with regard to a particular project.

(7) Public hearings may be conducted on the environmental documents, either in separate proceedings or in conjunction with other proceedings of the public agency.

(e) Evaluation by Lead Agency. The Lead Agency shall evaluate comments received from persons who reviewed the draft EIR.

(f) Preparation of Final EIR. The Lead Agency shall prepare a final EIR. The contents of a final EIR are specified in Section 15146 of these Guidelines.

(g) Certification of Final EIR. The final EIR shall be presented to the decision-making body of the Lead Agency. The Lead Agency shall certify that the final EIR has been completed in compliance with CEQA and the state guidelines and that the decision-making body or administrative official having final approval authority over the project has reviewed and considered the information contained in the EIR prior to the approval of the project.

(h) Notice of Determination.

(1) After approving a project for which an EIR has been prepared, the Lead Agency shall file a Notice of Determination. Such notice shall include:

(A) An identification of the project including its common name where possible and its location.

(B) A brief description of the project.

(C) The date when the agency approved the project.

(D) The determination of the agency whether the project in its approved form will have a significant effect on the environment.

(E) A statement that an EIR was prepared and certified pursuant to the provisions of CEQA.

(F) Whether mitigation measures were made a condition of the approval of the project.

(G) Whether a Statement of Overriding Considerations was adopted for the project.

(H) The address where a copy of the EIR and the record of project approval may be examined.

(2) If the Lead Agency is a state agency, the Notice of Determination shall be filed with the Secretary for Resources.

(3) If the Lead Agency is a local agency, the Notice of Determination shall be filed with the county clerk of the county or counties in which the project would be located. If the project requires discretionary approval from a state agency, the notice shall also be filed with the Secretary for Resources.

(4) The filing of the Notice of Determination starts a 30 day statute of limitations on court challenges to the approval under CEQA. (P.R.C. 21167(c))

(i) Filing of Final EIR. If the Lead Agency is a state agency, a copy of the final EIR shall be filed with the appropriate planning agency of any city, county, or city and county which will be affected by the project.

(j) Use of Final EIR by Responsible Agencies. Each responsible agency shall consider the Lead Agency's final EIR before acting upon or approving the project pursuant to Section 15064.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21108(a), 21152(a), and 21167, Public Resources Code.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment of subsections (a), (b), (d), (g) and (h) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
4. Amendment of subsection (b) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
5. Amendment of subsection (h)(1) filed 5-10-80; effective thirtieth day thereafter (Register 80, No. 19).

15085.5. Process for a Responsible Agency.

(a) General. A Responsible Agency complies with CEQA by considering documents prepared by the Lead Agency and by reaching its own conclusions on whether and how to approve the project involved. This section identifies the special duties a public agency will have when acting as a Responsible Agency.

(b) Response to Consultation. A Responsible Agency shall respond to consultation by the Lead Agency in order to assist the Lead Agency in preparing adequate environmental documents for the project. By this means, the Responsible Agency will ensure that the documents it will use will comply with CEQA.

(1) In response to consultation, a Responsible Agency shall explain its reasons for recommending whether the Lead Agency should prepare an EIR or Negative Declaration for a project. Where the Responsible Agency disagrees with the Lead Agency's proposal to prepare a Negative Declaration for a project, the Responsible Agency should identify the significant environmental effects which it believes could result from the project and recommend either that an EIR be prepared or that the project be modified to eliminate the significant effects.

(2) As soon as possible, but not longer than 45 days after receiving a Notice of Preparation from the Lead Agency, the Responsible Agency shall send a written reply by certified mail. The reply shall specify the scope and content of the environmental information which would be germane to the Responsible Agency's statutory responsibilities in connection with the proposed project. The Lead Agency shall include this information in the EIR.

(c) Meetings. The Responsible Agency shall designate employees or representatives to attend meetings requested by the Lead Agency to discuss the scope and content of the EIR.

(d) Comments on Draft EIRs and Negative Declarations. A Responsible Agency should review and comment on draft EIRs and Negative Declarations for projects which the Responsible Agency would later be asked to approve. Comments should focus on any shortcomings in the EIR, the appropriateness of using a Negative Declaration, or on additional alternatives or mitigation measures which the EIR should include. The comments may deal with any aspect of the project or its environmental effects. Comments should be as specific as possible.

(e) Decision on Adequacy of EIR or Negative Declaration. If a Responsible Agency believes that the final EIR or Negative Declaration prepared by the Lead Agency is not adequate for use by the Responsible Agency, the Responsible Agency must either:

(1) Take the issue to court within 30 days after the Lead Agency files a Notice of Determination,

(2) Be deemed to have waived any objection to the adequacy of the EIR or Negative Declaration, or

(3) Prepare a subsequent EIR if permissible under Section 15067.

(f) Consider the EIR or Negative Declaration. Prior to reaching a decision on the project, the Responsible Agency must consider the environmental effects of the project as shown in the EIR or Negative Declaration. A new or supplemental EIR can be prepared only as provided in Section 15067.

(g) Adoption of Alternatives or Mitigation Measures. When an EIR has been prepared for a project, the Responsible Agency shall not approve the project as proposed if the agency finds any feasible alternative or feasible mitigation measure within its powers that would substantially lessen any significant effect the project would have on the environment. When considering alternatives and mitigation measures, a Responsible Agency is more limited than a Lead Agency. In deciding whether to carry out, finance, or approve a project, a Responsible Agency has responsibility for mitigating or avoiding only the environmental effects of those activities which are within the scope of its statutory authorities.

(h) Findings. The Responsible Agency shall make the findings required by Section 15088 for each significant effect of the project and shall make the findings in Section 15089 if necessary.

(i) Notice of Determination. The Responsible Agency should file a Notice of Determination in the same manner as a Lead Agency under Section 15083(f) or 15085(h).

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
2. Amendment of subsection (d) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15086. EIR Combined with Existing Planning and Review Process.

The EIR process should be combined with the existing planning, review, and project approval process being used by each public agency. The Lead Agency shall include the EIR as a part of the regular project report which is used in the existing review and budgetary process.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15087. Additional Notices.

In their implementing procedures, public agencies may provide for the filing of notices in addition to the notices required or authorized by these Guidelines.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15088. Findings.

(a) No public agency shall approve or carry out a project for which an environmental impact report has been completed which identifies one or more significant effects of the project unless the public agency makes one or more of the following written findings for each of those significant effects, accompanied by a statement of the facts supporting each finding.

(1) Changes or alterations have been required in, or incorporated into, the project which mitigate or avoid the significant environmental effects thereof as identified in the final EIR.

(2) Such changes or alterations are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.

(3) Specific economic, social, or other considerations make infeasible the mitigation measures or project alternatives identified in the final EIR.

(b) The findings required by subsection (a) shall be supported by substantial evidence in the record.

(c) The finding in subsection (a) (2) shall not be made if the agency making the finding has concurrent jurisdiction with another agency to deal with identified feasible mitigation measures or alternatives.

(d) A public agency shall not approve or carry out a project as proposed unless the significant environmental effects have been reduced to an acceptable level.

(e) As used in this Section, the term "acceptable level" means that:

(1) All significant environmental effects that can feasibly be avoided have been eliminated or substantially lessened as determined through findings as described in Subsection (a), and

(2) Any remaining, unavoidable significant effects have been found acceptable under Section 15089.

NOTE: Authority cited: Section 21083 and 21087, Public Resources Code. Reference: Sections 21000–21174 and 21081, Public Resources Code; *Laurel Hills Homeowners Association* v. *City Council*, 83 Cal. App. 3d 515 (1978).

HISTORY:

1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
3. Amendment filed 12-27-76 as an emergency; designated effective 1-1-77. Certificate of Compliance included (Register 77, No. 1).
4. New subsections (d) and (e) filed 5-9-80; effective thirtieth day thereafter (Register 80, No. 19).

15089. Statement of Overriding Considerations.

(a) CEQA requires the decision maker to balance the benefits of a proposed project against its unavoidable environmental risks in determining whether to approve the project. Where agencies have taken action resulting in environmental damage without explaining the reasons which supported the decision, courts have invalidated the action.

(b) Where the decision of the public agency allows the occurrence of significant effects which are identified in the final EIR but are not mitigated, the agency must state in writing the reasons to support its action based on the final EIR and/or other information in the record. This statement may be necessary if the agency also makes a finding under Section 15088(a)(2) or (a)(3).

(c) If an agency makes a statement of overriding considerations, the statement should be included in the record of the project approval and should be mentioned in the Notice of Determination.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
2. Amendment of subsection (b) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15090. Limitations on Local Responsible Agencies.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

HISTORY:

1. New section filed 12-27-76 as an emergency; designated effective 1-1-77. Certificate of Compliance included (Register 77, No. 1).
2. Repealer filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

Article 8. Categorical Exemptions

15100. Categorical Exemptions.

Section 21084 of the Public Resources Code requires these Guidelines to include a list of classes of projects which have been determined not to have a significant effect on the environment and which shall, therefore, be exempt from the provisions of the Environmental Quality Act of 1970.

In response to that mandate, the Secretary for Resources has found that the following classes of projects listed in this article do not have a significant effect on the environment and they are declared to be categorically exempt from the requirement for the preparation of environmental documents.

HISTORY:

1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15100.1. Relation to Ministerial Projects.

Section 21080 of the Public Resources Code exempts from the application of CEQA those projects over which public agencies exercise only ministerial authority. Since ministerial projects are exempt under Section 15073 of these guidelines, Categorical Exemptions should be applied only where a project is not ministerial under a public agency's statutes and ordinances. The inclusion of activities which may be ministerial within the classes and examples contained in this article shall not be construed as a finding by the Secretary for Resources that such an activity is discretionary.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

HISTORY:

1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15100.2. Exceptions.

(a) Location. Classes 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located—a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. Therefore, these classes are considered to apply in all instances, except where the project may impact on an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state or local agencies.

(b) Cumulative Impact. All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant—for example, annual additions to an existing building under Class 1.

(c) Significant Effect. A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000–21174, Public Resources Code and *Wildlife Alive* v. *Chickering*, 18 Cal. 3d 190.

HISTORY:

1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
2. New subsection (c) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15100.3. Revisions to List of Categorical Exemptions.

Any public agency may, at any time, request that a new class of Categorical Exemptions be added, or an existing one amended or deleted. This request must be made in writing to the Office of Planning and Research and shall contain detailed information to support the request. The granting of such request shall be by amendment to these guidelines.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

HISTORY:

1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15100.4. Application by Public Agencies.

Each public agency shall, in the course of establishing its own procedures, list those specific activities which fall within each of the exempt classes, subject to the qualification that these lists must be consistent with both the letter and the intent expressed in the classes. Public agencies may omit from their implementing procedures classes and examples that do not apply to their activities, but they may not require EIR's for projects described in the classes and examples in this article except under the provisions of Section 15100.2.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

HISTORY:

1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15101. Class 1: Existing Facilities.

Class 1 consists of the operation, repair, maintenance or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that previously existing, including but not limited to:

(a) Interior or exterior alterations involving such things as interior partitions, plumbing, and electrical conveyances;

(b) Existing facilities of both investor and publicly owned utilities used to provide electric power, natural gas, sewerage, or other public utility services;

(c) Existing highways and streets, sidewalks, gutters, bicycle and pedestrian trails, and similar facilities except where the activity will involve removal of a scenic resource including a stand of trees, a rock outcropping, or an historic building.

(d) Restoration, or rehabilitation of deteriorated or damaged structures, facilities or mechanical equipment to meet current standards of public health and safety, unless it is determined that the damage was substantial and resulted from an environmental hazard such as earthquake, landslide or flood;

(e) Additions to existing structures provided that the addition will not result in an increase of more than:

(1) 50 percent of the floor area of the structures before the addition or 2,500 square feet, whichever is less; or

(2) 10,000 square feet if:

(A) The project is in an area where all public services and facilities are available to allow for maximum development permissible in the General Plan and

(B) The area in which the project is located is not environmentally sensitive.

(f) Addition of safety or health protection devices for use during construction of or in conjunction with existing structures, facilities or mechanical equipment, or topographical features including navigational devices;

(g) New copy on existing on and off-premise signs;

(h) Maintenance of existing landscaping, native growth and water supply reservoirs (excluding the use of economic poisons, as defined in Division 7, Chapter 2, California Agricultural Code);

(i) Maintenance of fish screens, fish ladders, wildlife habitat areas, artificial wildlife waterway devices, streamflows, springs and waterholes, and stream channels (clearing of debris) to protect fish and wildlife resources;

(j) Fish stocking by the California Department of Fish and Game;
(k) Division of existing multiple family rental units into condominiums;
(*l*) Demolition and removal of individual small structures listed in this subsection except where the structures are of historical, archaeological or architectural significance:
(1) Single family residences not in conjunction with the demolition of two or more units,
(2) Motels, apartments, and duplexes designed for not more than four dwelling units if not in conjunction with the demolition of two or more such structures,
(3) Stores, offices, and restaurants if designed for an occupant load of 20 persons or less, if not in conjunction with the demolition of two or more such structures,
(4) Accessory (appurtenant) structures including garages, carports, patios, swimming pools, and fences.
(m) Minor repairs and alterations to existing dams and appurtenant structures under the supervision of the Department of Water Resources.
(n) Conversion of a single family residence to office use.
(o) The conversion of existing commercial units in one structure from single to condominium type ownership.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21084 and 21085, Public Resources Code.

HISTORY:

1. Amendment of subsections (b), (e), (f) and (*l*) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsection (c) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
4. Amendment of subsection (e) and new subsections (n) and (o) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15102. Class 2: Replacement or Reconstruction.

Class 2 consists of replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced, including but not limited to:
(a) Replacement or reconstruction of existing schools and hospitals to provide earthquake resistant structures which do not increase capacity more than 50 percent;
(b) Replacement of a commercial structure with a new structure of substantially the same size, purpose and capacity.
(c) Replacement or reconstruction of existing utility systems and/or facilities involving negligible or no expansion of capacity.
(d) Conversion of overhead electric utility distribution system facilities to underground including connection to existing overhead electric utility distribution lines where the surface is restored to the condition existing prior to the undergrounding.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21084 and 21085, Public Resources Code.

HISTORY:

1. Amendment filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15103. Class 3: New Construction or Conversion of Small Structures.

Class 3 consists of construction and location of limited numbers of new, small facilities or structures; installation of small new equipment and facilities in small structures; and the conversion of existing small structures from one use to another where only minor modifications are made in the exterior of the structure. The numbers of structures described in this section are the maximum allowable within a two year period. Examples of this exemption include but are not limited to:

(a) Single-family residences not in conjunction with the building of two or more such units. In urbanized area, up to three single-family residences may be constructed under this exemption.

(b) Apartments, duplexes and similar structures, with not more than four dwelling units if not in conjunction with the building of two or more such structures. In urbanized areas, the exemption applies to single apartments, duplexes and similar small structures designed for not more than six dwelling units if not constructed in conjunction with the building of two or more such structures.

(c) Stores, motels, offices, restaurants and similar small commercial structures not involving the use of significant amounts of hazardous substances, if designed for an occupant load of 30 persons or less, if not constructed in conjunction with the building of two or more such structures. In urbanized areas, the exemption also applies to commercial buildings on sites zoned for such use, if designed for an occupant load of 30 persons or less, if not constructed in conjunction with the building of 4 or more such structures and if not involving the use of significant amounts of hazardous substances.

(d) Water main, sewage, electrical, gas and other utility extensions of reasonable length to serve such construction.

(e) Accessory (appurtenant) structures including garages, carports, patios, swimming pools and fences.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21084 and 21085, Public Resources Code.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsection (c) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
3. Amendment filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15104. Class 4: Minor Alterations to Land.

Class 4 consists of minor public or private alterations in the condition of land, water and/or vegetation which do not involve removal of mature, scenic trees except for forestry and agricultural purposes. Examples include but are not limited to:

(a) Grading on land with a slope of less than 10 percent, except where it is to be located in a waterway, in any wetland, in an officially designated (by Federal, State or local governmental action) scenic area, or in officially mapped areas of severe geologic hazard.

(b) New gardening or landscaping.
(c) Filling of earth into previously excavated land with material compatible with the natural features of the site.
(d) Minor alterations in land, water and vegetation on existing officially designated wildlife management areas or fish production facilities which result in improvement of habitat for fish and wildlife resources or greater fish production;
(e) Minor temporary uses of land having negligible or no permanent effects on the environment, including carnivals, sales of Christmas trees, etc.
(f) Minor trenching and backfilling where the surface is restored.
(g) Maintenance dredging where the spoil is deposited in a spoil area authorized by all applicable state and federal regulatory agencies.
(h) The creation of bicycle lanes on existing rights-of-way.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21084 and 21085, Public Resources Code.

HISTORY:
1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. New subsection (g) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
3. New subsection (h) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15105. Class 5: Minor Alterations in Land Use Limitations.

Class 5 consists of minor alterations in land use limitations in areas with less than a 20% slope, which do not result in any changes in land use or density, including but not limited to:
(a) Minor lot line adjustments, side yard and set back variances not resulting in the creation of any new parcel;
(b) Issuance of minor encroachment permits.
(c) Reversion to acreage in accordance with the Subdivision Map Act.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21084 and 21085, Public Resources Code.

HISTORY:
1. Amendment filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15106. Class 6: Information Collection.

Class 6 consists of basic data collection, research, experimental management and resource evaluation activities which do not result in a serious or major disturbance to an environmental resource. These may be for strictly information gathering purposes, or as part of a study leading to an action which a public agency has not yet approved, adopted or funded.

15107. Class 7: Actions by Regulatory Agencies for Protection of Natural Resources.

Class 7 consists of actions taken by regulatory agencies as authorized by state law or local ordinance to assure the maintenance, restoration, or enhancement of a natural resource where the regulatory process involves procedures for protection of the environment. Examples include but are not limited to wildlife preservation activities of the State Department of Fish and Game. Construction activities are not included in this exemption.

HISTORY:
1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15108. Class 8: Actions by Regulatory Agencies for Protection of the Environment.

Class 8 consists of actions taken by regulatory agencies, as authorized by state or local ordinance, to assure the maintenance, restoration, enhancement, or protection of the environment where the regulatory process involves procedures for protection of the environment. Construction activities are not included in this exemption.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15109. Class 9: Inspections.

Class 9 consists of activities limited entirely to inspection, to check for performance of an operation, or quality, health or safety of a project, including related activities such as inspection for possible mislabeling, misrepresentation or adulteration of products.

15110. Class 10: Loans.

Class 10 consists of loans made by the Department of Veterans Affairs under the Veterans Farm and Home Purchase Act of 1943, mortgages for the purchase of existing structures where the loan will not be used for new construction and the purchase of such mortgages by financial institutions. Class 10 includes but is not limited to the following examples:

(a) Loans made by the Department of Veterans Affairs under the Veterans Farm and Home Purchase Act of 1943.

(b) Purchases of mortgages from banks and mortgage companies by the Public Employees Retirement System and by the State Teachers Retirement System.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15111. Class 11: Accessory Structures.

Class 11 consists of construction, or placement of minor structures accessory to (appurtenant to) existing commercial, industrial, or institutional facilities, including but not limited to:

(a) On-premise signs;

(b) Small parking lots.

(c) Placement of seasonal or temporary use items such as lifeguard towers, mobile food units, portable restrooms or similar items in generally the same locations from time to time in publicly owned parks, stadiums, or other facilities designed for public use.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21084 and 21085, Public Resources Code.

HISTORY:

1. New subsection (c) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15112. Class 12: Surplus Government Property Sales.

Class 12 consists of sales of surplus government property except for parcels of land located in an area of statewide interest or potential area of critical concern as identified in the Governor's Environmental Goals and Policy Report prepared pursuant to Government Code Section 65041 *et seq.* However, if the surplus property to be sold is located in those areas identified in Governor's Environmental Goals and Policy Report, its sale is exempt if:

(a) The property does not have significant values for wildlife habitat or other environmental purposes, and

(b) Any of the following conditions exist:

(1) The property is of such size or shape that it is incapable of independent development or use, or

(2) The property to be sold would qualify for an exemption under any other class of categorical exemption in Article 8 of these guidelines, or

(3) The use of the property and adjacent property has not changed since the time of purchase by the public agency.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41).

NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15113. Class 13: Acquisition of Lands for Wildlife Conservation Purposes.

Class 13 consists of the acquisition of lands for fish and wildlife conservation purposes including preservation of fish and wildlife habitat, establishing ecological reserves under Fish and Game Code Section 1580, and preserving access to public lands and waters where the purpose of the acquisition is to preserve the land in its natural condition.

HISTORY:

1. Repealer and new section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15114. Class 14: Minor Additions to Schools.

Class 14 consists of minor additions to existing schools within existing school grounds where the addition does not increase original student capacity by more than 25% or five classrooms, whichever is less. The addition of portable classrooms is included in this exemption.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Repealer and new section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15115. Class 15: Minor Land Divisions.

Class 15 consists of the division of property in urbanized areas zoned for residential, commercial, or industrial use into four or fewer parcels when the division is in conformance with the General Plan and zoning, no variances or exceptions are required, all services and access to the proposed parcels to local standards are available, the parcel was not involved in a division of a larger parcel within the previous 2 years, and the parcel does not have a slope greater than 20%.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21084 and 21085, Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19). For history of former section, see Registers 75, No. 44, and 75, No. 1.

15116. Class 16: Transfer of Ownership of Land in Order to Create Parks.

Class 16 consists of the acquisition or sale of land in order to establish a park where the land is in a natural condition or contains historic sites or archaeological sites and either:

(a) The management plan for the park has not been prepared, or

(b) The management plan proposes to keep the area in a natural condition or preserve the historic or archaeological site. CEQA will apply when a management plan is proposed that will change the area from its natural condition or significantly change the historic or archaeological site.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Repealer filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41).

NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15117. Class 17: Open Space Contracts or Easements.

Class 17 consists of the establishment of agricultural preserves, the making and renewing of open space contracts under the Williamson Act, or the acceptance of easements or fee interests in order to maintain the open space character of the area. The cancellation of such preserves, contracts, interests or easements is not included.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41).

NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15118. Class 18: Designation of Wilderness Areas.

Class 18 consists of the designation of wilderness areas under the California Wilderness System.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41).

NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15119. Class 19: Annexations of Existing Facilities and Lots For Exempt Facilities.

Class 19 consists of only the following annexations:

(a) Annexations to a city or special district of areas containing existing public or private structures developed to the density allowed by the current zoning or pre-zoning of either the gaining or losing governmental agency whichever is more restrictive, provided, however, that the extension of utility services to the existing facilities would have a capacity to serve only the existing facilities.

(b) Annexations of individual small parcels of the minimum size for facilities exempted by Section 15103, New Construction of Small Structures.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. New section filed 10-8-76; effective thirtieth day thereafter. (Register 76, No. 41).

NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15120. Class 20: Changes in Organization of Local Agencies.

Class 20 consists of changes in the organization or reorganization of local governmental agencies where the changes do not change the geographical area in which previously existing powers are exercised. Examples include but are not limited to:

(a) Establishment of a subsidiary district.

(b) Consolidation of two or more districts having identical powers.

(c) Merger with a city of a district lying entirely within the boundaries of the city.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176 Public Resources Code.

HISTORY:

1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41).

NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15121. Enforcement Actions by Regulatory Agencies.

(a) Class 21 consists of actions by regulatory agencies to enforce or revoke a lease, permit, license, certificate, or other entitlement for use issued, adopted or prescribed by the regulatory agency or law, general rule, standard, or objective, administered or adopted by the regulatory agency. Such actions include, but are not limited to, the following:

(1) The direct referral of a violation of lease, permit, license, certificate, or entitlement for use or of a general rule, standard, or objective to the Attorney General, District Attorney, or City Attorney as appropriate, for judicial enforcement.

(2) The adoption of an administrative decision or order enforcing or revoking the lease, permit, license, certificate, or entitlement for use or enforcing the general rule, standard, or objective.

(b) Construction activities undertaken by the public agency taking the enforcement or revocation action are not included in this exemption.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15122. Educational or Training Programs Involving No Physical Changes.

Class 22 consists of the adoption, alteration, or termination of educational or training programs which involve no physical alteration in the area affected or which involve physical changes only in the interior of existing school or training structures. Examples include, but are not limited to:

(a) Development of or changes in curriculum or training methods.

(b) Changes in the grade structure in a school which do not result in changes in student transportation.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15123. Normal Operations of Facilities for Public Gatherings.

Class 23 consists of the normal operations of existing facilities for public gatherings for which the facilities were designed, where there is a past history of the facility being used for the same kind of purpose. Facilities included within this exemption include, but are not limited to racetracks, stadiums, convention centers, auditoriums, amphitheaters, planetariums, swimming pools and amusement parks.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15124. Regulation of Working Conditions.

Class 24 consists of actions taken by regulatory agencies, including the Industrial Welfare Commission as authorized by statute, to regulate any of the following:

(a) Employee wages,

(b) Hours of work, or

(c) Working conditions where there will be no demonstrable physical changes outside the place of work.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15125. Class 25: Transfers of Ownership of Interests in Land to Preserve Open Space.

Class 25 consists of the transfers of ownership of interests in land in order to preserve open space. Examples include but are not limited to:

(a) Acquisition of areas to preserve the existing natural conditions.

(b) Acquisition of areas to allow continued agricultural use of the areas.

(c) Acquisition to allow restoration of natural conditions.

(d) Acquisition to prevent encroachment of development into flood plains.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21084 and 21085, Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15126. Class 26: Acquisition of Housing for Housing Assistance Programs.

Class 26 consists of actions by a redevelopment agency, housing authority, or other public agency to implement an adopted Housing Assistance Plan by acquiring an interest in housing units. The housing units may be either in existence or possessing all required permits for construction when the agency makes its final decision to acquire the units.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21084 and 21085, Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15127. Class 27: Leasing New Facilities.

(a) Class 27 consists of the leasing of a newly constructed or previously unoccupied privately owned facility by a local or state agency where the local governing authority determined that the building was exempt from CEQA. To be exempt under this section, the proposed use of the facility:

(1) Shall be in conformance with existing State plans and policies and with general, community, and specific plans for which an EIR or Negative Declaration has been prepared,

(2) Shall be substantially the same as that originally proposed at the time the building permit was issued,

(3) Shall not result in a traffic increase of greater than 10% of front access road capacity, and

(4) Shall include the provision of adequate employee and visitor parking facilities.

(b) Examples of Class 27 include but are not limited to:

(1) Leasing of administrative offices in newly constructed office space

(2) Leasing of client service offices in newly constructed retail space

(3) Leasing of administrative and/or client service offices in newly constructed industrial parks.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21084 and 21085, Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

Article 9. Contents of Environmental Impact Reports

15140. General.

(a) Environmental Impact Reports shall contain the information outlined in this article. Each element must be covered, and when these elements are not separated into distinct sections, the document shall state where in the document each element is discussed.

(b) Each report shall contain a brief summary of the proposed action and its consequences in language sufficiently simple that the issues can be understood by the average member of the lay public. The EIR shall also contain a table of contents or an index. The summary shall stress the major conclusions, areas of controversy (including issues raised by agencies and the public), and the issues to be resolved (including the choice among alternatives and how to mitigate the significant effects). The summary should normally not exceed 15 pages.

(c) The information contained in an EIR shall include summarized technical data, maps, plot plans, diagrams and similar relevant information sufficient to permit full assessment of significant environmental impacts by reviewing agencies and members of the public. Placement of highly technical and specialized analysis and data in the body of an EIR should be avoided through inclusion of supporting information and analyses as appendices to the main body of the EIR. Appendices to the EIR may be prepared in volumes separate from the basic EIR document but shall be available for public examination and shall be submitted to all clearinghouses which assist in public review.

(d) The EIR should be prepared using a systematic, interdisciplinary approach. The interdisciplinary analysis shall be conducted by competent individuals, but no single discipline shall be designated or required to undertake this evaluation. Preparation of EIRs is dependent upon information from many sources, including the engineering project report and many scientific documents relating to environmental features. The EIR shall reference all documents used in its preparation including where possible, a citation to the page and section number of any technical reports which were used as the basis for any statements in the EIR.

(e) The EIR should discuss environmental effects in proportion to their severity and probability of occurrence. Effects dismissed in an Initial Study as clearly insignificant and unlikely to occur need not be discussed further in the EIR unless the Lead Agency subsequently receives information inconsistent with the finding in the Initial Study. A copy of the Initial Study shall be attached to the EIR to provide the basis for limiting the impacts discussed.

(f) An EIR shall contain a statement briefly indicating the reasons for determining that various effects of a project that could possibly be considered significant were not found to be significant and consequently were not discussed in detail in the EIR.

(g) Drafting an EIR necessarily involves some degree of forecasting. While foreseeing the unforeseeable is not possible, an agency must use its best efforts to find out and disclose all that it reasonably can.

(h) If, after thorough investigation, a Lead Agency finds that a particular impact is too speculative for evaluation, the agency should note its conclusion and terminate discussion of the impact.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21083, Public Resources Code.

HISTORY:

1. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41).

NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

2. Amendment of subsection (b) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15140.5. Page Limits.

The text of draft environmental impact reports shall normally be less than 150 pages and for proposals of unusual scope or complexity should normally be less than 300 pages.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21003, Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15141. Description of Project.

The description of the project shall contain the following information but should not supply extensive detail beyond that needed for evaluation and review of the environmental impact.

(a) The precise location and boundaries of the proposed project shall be shown on a detailed map, preferably topographic. The location of the project shall also appear on a regional map.

(b) A statement of the objectives sought by the proposed project.

(c) A general description of the project's technical, economic, and environmental characteristics, considering the principal engineering proposals and supporting public service facilities.

HISTORY:

1. Amendment of subsection (c) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15142. Description of Environmental Setting.

An EIR must include a description of the environment in the vicinity of the project, as it exists before commencement of the project, from both a local and regional perspective.

(a) Knowledge of the regional setting is critical to the assessment of environmental impacts. Special emphasis should be placed on environmental resources that are rare or unique to that region. Specific reference to related projects, both public and private, both existent and planned, in the region should also be included, for purposes of examining the possible cumulative impact of such projects.

(b) The EIR shall discuss any inconsistencies between the proposed project and applicable general plans and regional plans. Such regional plans include, but are not limited to, the applicable Air Quality Management Plan (or State Implementation Plan once adopted), area-wide waste treatment and water quality plans, regional transportation plans, and regional land use plans for the protection of the coastal zone, Lake Tahoe Basin, San Francisco Bay, and Santa Monica Mountains.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: *Bozung* v. *Local Agency Formation Commission*, 13 Cal. 3d 263.

HISTORY:

1. Amendment filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15143. Environmental Impact.

All phases of a project must be considered when evaluating its impact on the environment: planning, acquisition, development and operation. The following subjects shall be discussed, preferably in separate sections or paragraphs. If they are not discussed separately, the EIR shall include a table showing where each of the subjects is discussed.

(a) The Significant Environmental Effects of the Proposed Project. Describe the direct and indirect significant effects of the project on the environment, giving due consideration to both the short-term and long-term effects. It should include relevant specifics of the area, the resources involved, physical changes, alterations to ecological systems and changes induced in population distribution, population concentration, the human use of the land (including commercial and residential development) and other aspects of the resource base such as water, scenic quality and public services. Cumulative effects shall also be discussed when found to be significant.

(b) Any Significant Environmental Effects Which Cannot Be Avoided if the Proposal is Implemented. Describe any significant impacts, including those which can be reduced to an insignificant level but not eliminated. Where there are impacts that cannot be alleviated without imposing an alternative design, their implications and the reasons why the project is being proposed, notwithstanding their effect, should be described. Describe significant impacts on any aesthetically valuable surroundings, or on human health.

(c) Mitigation Measures Proposed to Minimize the Significant Effects. Describe significant, avoidable, adverse impacts, including inefficient and unnecessary consumption of energy, and measures to minimize these impacts. The discussion of mitigation measures shall distinguish between the measures which are proposed by project proponents to be included in the project and other measures that are not included but could reasonably be expected to reduce adverse impacts. This discussion shall identify the mitigation measures which will eliminate such impacts or reduce them to a level of insignificance. Where several measures are available to mitigate an impact, each should be discussed and the basis for selecting a particular measure should be identified. Energy conservation measures, as well as other appropriate mitigation measures, shall be discussed when relevant. Examples of energy conservation measures are provided in Appendix F.

(d) Alternatives to the Proposed Action. Describe all reasonable alternatives to the project, or to the location of the project, which could feasibly attain the basic objectives of the project, and why they were rejected in favor of the ultimate choice. The specific alternative of "no project" must also always be evaluated, along with the impact. The discussion of alternatives shall focus on alternatives capable of eliminating any significant adverse environmental effects or reducing them to a level of insignificance, even if these alternatives substantially impede the attainment of the project objectives, and are more costly. If the environmentally superior alternative is the "no project" alternative, then the EIR shall also identify an environmentally superior alternative among the other alternatives.

(e) The Relationship Between Local Short-Term Uses of Man's Environment and the Maintenance and Enhancement of Long-Term Productivity: Describe the cumulative and long-term effects of the proposed project which adversely affect the state of the environment. Special attention should be given to impacts which narrow the range of beneficial uses of the environment or pose long-term risks to health or safety. In addition, the reasons why the proposed project is believed by the sponsor to be justified now, rather than reserving an option for further alternatives, should be explained.

(f) Any Significant Irreversible Environmental Changes Which Would Be Involved in the Proposed Action Should It Be Implemented: Uses of nonrenewable resources during the initial and continued phases of the project may be irreversible since a large commitment of such resources makes removal or nonuse thereafter unlikely. Primary impacts and, particularly, secondary impacts (such as a highway improvement which provides access to a nonaccessible area) generally commit future generations to similar uses. Also irreversible damage can result from environmental accidents associated with the project. Irretrievable commitments of resources should be evaluated to assure that such current consumption is justified.

(g) The Growth-Inducing Impact of the Proposed Action: Discuss the ways in which the proposed project could foster economic or population growth, either directly or indirectly, in the surrounding environment. Included in this are projects which would remove obstacles to population growth (a major expansion of a waste water treatment plant might, for example, allow for more construction in service areas). Increases in the population may further tax existing community service facilities so consideration must be given to this impact. Also discuss the characteristic of some projects which may encourage and facilitate other activities that could significantly affect the environment, either individually or cumulatively. It must not be assumed that growth in any area is necessarily beneficial, detrimental, or of little significance to the environment.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21100, Public Resources Code; *Laurel Hills Homeowners Association* v. *City Council*, 83 Cal. App. 3d 515 (1978).

HISTORY:

1. Amendment filed 12-31-74 as an emergency; designated effective 1-7-75 (Register 75, No. 1).
2. Certificate of Compliance filed 4-29-75 (Register 75, No. 18).
3. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.
4. Amendment of subsections (a), (c) and (d) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15143.1. Limitations on Discussion of Environmental Impact.

The information required by subsections (e) and (f) of Section 15143 need be included only in EIRs prepared in connection with any of the following activities.

(a) The adoption, amendment, or enactment of a plan, policy, or ordinance of a public agency.

(b) The adoption by a local agency formation commission of a resolution making determinations.

(c) A project which will be subject to the requirement for preparing an environmental impact statement pursuant to the requirements of the National Environmental Policy Act of 1969.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21176, Public Resources Code.

HISTORY:

1. New section filed 12-27-76 as an emergency; designated effective 1-1-77. Certificate of Compliance included (Register 77, No. 1).

15143.5. Effects Found Not to be Significant.

An EIR shall contain a statement briefly indicating the reasons that various possibly significant effects of a project were determined not to be significant and were therefore not discussed in detail in the EIR. Such a statement may be contained in an attached copy of an Initial Study.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15144. Organizations and Persons Consulted.

The identity of all federal, state or local agencies, other organizations and private individuals consulted in preparing the EIR, and the identity of the persons, firm or agency preparing the EIR, by contract or other authorization must be given.

15145. Water Quality Aspects.

Describe in the environmental setting section, and other sections where applicable, water quality aspects of the proposed project which have been previously certified by the appropriate state or interstate organization as being in substantial compliance with applicable water quality standards.

HISTORY:

1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15146. Contents of Final Environmental Impact Report.

(a) The Final EIR shall consist of:

(1) The Draft EIR or a revision of the draft.

(2) Comments and recommendations received on the Draft EIR either verbatim or in summary.

(3) A list of persons, organizations and public agencies commenting on the Draft EIR.

(4) The responses of the Lead Agency to significant environmental points raised in the review and consultation process.

(b) The response of the Lead Agency to comments received may take the form of a revision of the Draft EIR or may be an attachment to the Draft EIR. The response shall describe the disposition of significant environmental issues raised (e.g., revisions to the proposed project to mitigate anticipated impacts or objections). In particular, the major issues raised when the Lead Agency's position is at variance with recommendations and objections raised in the comments must be addressed in detail giving reasons why specific comments and suggestions were not accepted.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: *People* v. *County of Kern*, 39 Cal. App. 3d 830.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing (Register 73, No. 50)
2. Amendment of subsection (a) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment of subsection (b) 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15147. Degree of Specificity.

The degree of specificity required in an EIR will correspond to the degree of specificity involved in the underlying activity which is described in the EIR.

(a) An EIR on a construction project will necessarily be more detailed in the specific effects of the project than will be an EIR on the adoption of a local general plan or comprehensive zoning ordinance because the effects of the construction can be predicted with greater accuracy.

(b) An EIR on projects such as the adoption or amendment of a comprehensive zoning ordinance or a local general plan should focus on the secondary effects that can be expected to follow from the adoption, but the EIR need not be as detailed as an EIR on the specific construction projects that might follow.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

HISTORY:

1. New section filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Renumbering and amendment of subsection (c) to Section 15148 filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15148. EIR as Part of General Plan.

(a) The requirements for an EIR on a local general plan, element or amendment thereof will be satisfied by the general plan or element document, and no separate EIR will be required, if:

(1) the general plan addresses all the points required to be in an EIR by Article 9 of these Guidelines and

(2) the document contains a special section or a cover sheet identifying where the general plan document addresses each of the points required.

(b) Where an EIR has been prepared for a general plan, element, or amendment thereto, the EIR shall be forwarded to the State Clearinghouse for review.

HISTORY:

1. New Section 15148 filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
2. Amendment filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41).

NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

3. Amendment of subsection (b) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15149. Incorporation by Reference.

(a) An EIR may incorporate by reference all or portions of another document which is a matter of public record or is generally available to the public. Where all or part of another document is incorporated by reference, the incorporated language shall be considered to be set forth in full as part of the text of the EIR.

(b) Where part of another document is incorporated by reference, such other document shall be made available to the public for inspection at a public place or public building. The EIR shall state where the incorporated documents will be available for inspection. At a minimum, the incorporated document shall be made available to the public in an office of the Lead Agency in the county where the project would be carried out or in one or more public buildings such as county offices or public libraries if the Lead Agency does not have an office in the county.

(c) Where an EIR uses incorporation by reference, the incorporated part of the referenced document shall be briefly summarized where possible or briefly described if the data or information cannot be summarized. The relationship between the incorporated part of the referenced document and the EIR shall be described.

(d) Where an agency incorporates information from an EIR that has previously been reviewed through the state review system, the state identification number of the incorporated document should be included in the summary or designation described in Subsection (c).

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

2. New subsection (d) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15150. Standards for Adequacy of an EIR.

An EIR should be prepared with a sufficient degree of analysis to provide decision makers with information which enables them to make a decision which intelligently takes account of environmental consequences. An evaluation of the environmental effects of a proposed project need not be exhaustive, but the sufficiency of an EIR is to be reviewed in the light of what is reasonably feasible. Disagreement among experts does not make an EIR inadequate. The courts have looked not for perfection but for adequacy, completeness, and a good faith effort at full disclosure.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15151. Use of Registered Professionals in Preparing EIRs.

(a) A number of statutes provide that certain professional services can be provided to the public only by individuals who have been registered by a registration board established under California law. Such statutory restrictions apply to a number of professions including but not limited to engineering, land surveying, forestry, geology and geophysics.

(b) In its intended usage, an EIR is not a technical document that can be prepared only by a registered professional. The EIR serves as a public disclosure document explaining the effects of the proposed project on the environment, alternatives to the project and ways to minimize adverse effects and to increase beneficial effects. As a result of information in the EIR, the Lead Agency should establish requirements or conditions on project design, construction, or operation in order to protect or enhance the environment. State statutes may provide that only registered professionals can prepare technical studies which will be used in or which will control the detailed design, construction, or operation of the proposed project and which will be prepared in support of an EIR.

HISTORY:

1. Renumbering of Section 15075 to Section 15151 filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5). For prior history of former Section 15075, see Register 76, No. 41.

Article 10. Evaluation of Environmental Impact Reports

15160. Adequate Time for Review and Comment.

The lead agency should provide adequate time for other public agencies and members of the public to review and comment on an EIR that it has prepared.

(a) Public agencies may establish time periods for review in their implementing procedures and shall notify the public and others described in Sections 15085 (b) and (d) of these Guidelines of the time for receipt of comments on EIR's.

(b) In setting time periods for review, public agencies shall give consideration to their obligation to obtain comments from public agencies having jurisdiction by law with respect to the project and to the policy favoring public participation.

(c) In order to provide sufficient time for public review, review periods for draft EIRs should not be less than 30 days nor longer than 90 days except in unusual situations. The review period for draft EIRs for which a state agency is the Lead Agency or a Responsible Agency shall be at least 45 days unless a shorter period is approved by the State Clearinghouse.

(d) A review period for an EIR does not require a halt in other planning activities related to a project. Planning should continue in conjunction with environmental evaluation.

HISTORY:

1. Amendment filed 12-14-73 as an emergency; effective upon filing Certificate of Compliance included. (Register 73, No. 50).
2. Amendment of subsections (a) and (c) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment of subsection (c) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15160.5. Purpose of Review.

The legally required preparation, review and comment procedures for environmental documents provide the opportunity for citizens, all professional disciplines, and public agencies to evaluate critically the environmental document and the manner in which technical data are used.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). Note: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15161. Review of Environmental Impact Reports.

(a) Public agencies must develop procedures for reviewing EIR's which Lead Agencies submit to them for comments.

(b) Cities and counties should compile listings of other agencies, particularly local agencies, which have jurisdiction by law and/or special expertise with respect to various projects and project locations. Such listings should be a guide in determining which agencies should be consulted with regard to a particular project.

(c) Reviewers should focus on the sufficiency of the EIR in discussing possible impacts upon the environment, ways in which adverse effects might be minimized, and alternatives to the project, in light of the intent of the Act to provide decision-makers with useful information about such factors. Public agencies reviewing projects should explain the basis for their comments, and whenever possible, should submit data or references in support of such comments.

(d) Upon completion of reviewing an EIR, it is suggested that reviewing agencies supply the Lead Agency with the name of a contact person who is available for later consultation should this prove necessary.

HISTORY:

1. Amendment of subsections (a) and (b) and new subsection (e) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Amendment of subsections (a), (b), and (d), and repealer of subsection (e) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
3. Amendment of subsection (c) filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

15161.5. Review by State Agencies.

(a) EIR's and Negative Declarations to be reviewed by state agencies shall be submitted to the State Clearinghouse, 1400 Tenth Street, Sacramento, California 95814.

(b) The following environmental documents shall be submitted to the State Clearinghouse for review by state agencies:

(1) Draft EIR's and Negative Declarations prepared by a state agency where such agency is a Lead Agency.

(2) Draft EIR's and Negative Declarations prepared by a public agency where a state agency is a Responsible Agency or otherwise has jurisdiction by law with respect to the project.

(3) Draft EIS's and Negative Declarations prepared pursuant to NEPA, the Federal Guidelines (Title 40 CFR, Part 1500, commencing with Section 1500.1) and Parts I and II of Office of Management and Budget Circular A-95.

(c) Public agencies may send environmental documents to the State Clearinghouse for review where a state agency has special expertise with regard to the environmental impacts involved.

(d) When an EIR or Negative Declaration is submitted to the State Clearinghouse for review, the review period set by the Lead Agency shall be at least as long as the period provided in the state review system operated by the State Clearinghouse. In the state review system, the normal review period is 45 days for EIRs and 30 days for Negative Declarations. In exceptional circumstances, The State Clearinghouse may set shorter review periods when requested by the Lead Agency.

(e) The number of copies of an EIR or Negative Declaration submitted to the State Clearinghouse shall not be less than ten unless the State Clearinghouse approves a lower number in advance.

(f) While the Lead Agency is encouraged to contact the regional and district offices of state Responsible Agencies, the Lead Agency must, in all cases, submit documents to the State Clearinghouse for distribution in order to comply with the review requirements of this section.

NOTE: Authority cited: Sections 21083 and 21088, Public Resources Code. Reference: Sections 21000–21174, Public Resources Code.

HISTORY:

1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
2. Amendment of subsection (d) and new subsections (e) and (f) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15161.6. Projects of Statewide, Regional or Areawide Significance.

(a) Projects meeting the criteria in this section shall be deemed to be of statewide, regional or areawide significance. EIRs or Negative Declarations prepared by any public agency on a project described in this section shall be submitted to the State Clearinghouse and should be submitted also to the appropriate metropolitan area council of governments for review and comment.

(b) The Lead Agency shall determine that a proposed project is of statewide, regional, or areawide significance if the project meets any of the following criteria:

(1) A proposed local general plan, element, or amendment thereof for which an EIR was prepared.

(2) A project which would interfere with the attainment or maintenance of State or national air quality standards including:

(A) A proposed residential development of more than 500 dwelling units.

(B) A proposed shopping center or business establishment employing more than 1,000 persons or encompassing more than 500,000 square feet of floor space.

(C) A proposed commercial office building employing more than 1,000 persons or encompassing more than 250,000 square feet of floor space.

(D) A proposed hotel/motel development of more than 500 rooms.

(E) A proposed industrial manufacturing or processing plant, or industrial park planned to house more than 1,000 persons, occupying more than 40 acres of land, or encompassing more than 650,000 square feet of floor area.

(3) A project which would result in the cancellation of an open space contract made pursuant to the California Land Conservation Act of 1965 (Williamson Act) for any parcel of 100 or more acres.

(4) A project located in and substantially impacting on an area of critical environmental sensitivity for which an EIR was prepared including:

(A) The Lake Tahoe Basin.

(B) The Santa Monica Mountains Zone as defined by Section 67463 of the Government Code.

(C) The California Coastal Zone as defined in, and mapped pursuant to, Section 30103 of the Public Resources Code.

(D) An area within ¼ mile of a wild and scenic river as defined by Section 5093.5 of the Public Resources Code.

(E) The Sacramento-San Joaquin Delta, as defined in Water Code Section 12220.

(F) The Suisun Marsh as defined in Public Resources Code Section 29101.

(G) The jurisdiction of the San Francisco Bay Conservation and Development Commission as defined in Government Code Section 66610.

(5) A project which would substantially affect sensitive wildlife habitats including but not limited to riparian lands, wetlands, bays, estuaries, marshes, and habitats for rare and endangered species as defined by Fish and Game Code Section 903.

(6) A project which would interfere with attainment of regional water quality standards as stated in the approved areawide waste water management plan.

(7) A project which would provide housing, jobs, or occupancy for 500 or more people within 10 miles of a nuclear power plant.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21083, Public Resources Code.

HISTORY:

1. New section filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
2. New subsection (b) (7) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15162. Failure to Comment.

If any public agency or person who is consulted with regard to an EIR fails to comment within a reasonable time as specified by the Lead Agency, it shall be assumed, absent a request for a specific extension of time, that such agency or person has no comment to make.

HISTORY:

1. Amendment filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15163. Requests for Environmental Documents.

(a) The Lead Agency, after preparing an EIR or other environmental document described in these Guidelines, is responsible for making such documents available to the public for inspection. Members of the general public requesting copies of the EIR may be charged for the actual cost of reproducing that copy.

(b) The Lead Agency should file draft EIR's in appropriate public library systems in order to improve public access to the draft EIR.

HISTORY:

1. Amendment and new subsection (b) filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).

15164. Public Participation.

While the Environmental Quality Act of 1970 does not require formal public hearings at any stage of the environmental review procedure, it is a widely accepted desirable goal of this process to encourage public participation. All public agencies adopting implementing procedures in response to these Guidelines should make provisions in their procedures for wide public involvement, formal and informal, consistent with their existing activities and procedures, in order to properly receive and evaluate public reactions, adverse and favorable, based on environmental issues.

15165. Public Hearings.

(a) A public hearing on the environmental impact of a project should usually be held when the lead agency determines it would facilitate the purposes and goals of the CEQA and these Guidelines to do so. The hearing may be held in conjunction with and as a part of normal planning activities. To as great a degree as possible, these hearings should include comments from reviewing agencies made pursuant to these Guidelines.

(b) A Draft EIR should be used as a basis for discussion at a public hearing. The hearing may be held at a place where public hearings are regularly conducted by the lead agency or at another location expected to be convenient to the public.

(c) Notice shall be given of all public hearings in a timely manner. This notice may be given in the same form and time as notice for other regularly conducted public hearings of the public agency.

(d) A public agency may include, in its implementing procedures, procedures for the conducting of public hearings pursuant to this section, which procedures may be consistent with already existing hearing and notice requirements of the public agency for regularly conducted legislative, planning and other proceedings.

(e) There is no requirement for a public agency to conduct a public hearing in connection with its review of an EIR prepared by another public agency.

HISTORY:

1. Amendment of subsections (a) and (b) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

15165.5. Administrative Appeals.

(a) Where an agency allows administrative appeals upon the adequacy of an environmental document, an appeal shall be handled according to public agency procedures. Public notice shall be handled in accordance with individual agency requirements and Section 15165(c).

(b) Administrative appeals based solely upon the merits of the project and not upon the adequacy of the environmental document do not require a new hearing on the environmental document unless the agency holds a de-novo hearing on the project being appealed. The decision making body to which an appeal had been made must, however, consider the environmental document and make findings under Sections 15088 and 15089 if appropriate.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21100 and 21151, Public Resources Code.

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

15166. Retention and Availability of Comments.

Comments received through the consultation process shall be kept on file for a reasonable period and available for public inspection at an address given in the Final EIR. Comments which may be received independently of the review of the Draft EIR shall also be considered and kept on file.

15167. Comments on Initiative of Public Agencies.

Every public agency may comment on environmental documents dealing with projects which affect resources with which the agency has special expertise regardless of whether its comments were solicited.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. New section filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41).

NOTE: Order designated that compliance with this amendment is authorized but not mandatory before 1-1-77.

Article 11. EIR Monitor

15180. EIR Monitor.

The Secretary for Resources will provide for publication of a bulletin entitled "California EIR Monitor" on a subscription basis to provide public notice of amendments to the Guidelines, the completion of draft EIRs and other matters as deemed appropriate. Inquiries and subscription requests should be sent to the following address:

Secretary for Resources
Attention: California EIR Monitor
1416 Ninth Street, Room 1311
Sacramento, California 95814

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000 through 21174, Public Resources Code.

HISTORY:

1. New Article 11 (Section 15180) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).

Article 12. Exemption for Certified State Regulatory Programs

15190. General.

Section 21080.5 of the Public Resources Code provides that a regulatory program of a state agency shall be certified by the Secretary for Resources as being exempt from the requirements for preparing EIRs, Negative Declarations, and Initial Studies if the Secretary finds that the program meets the criteria contained in that code section.

NOTE: Authority cited: Sections 21080.5, 21083, 21087, Public Resources Code. Reference: Section 21080.5, Public Resources Code.

HISTORY:

1. New Article 12 (Sections 15190–15192) filed 1-6-76 as an emergency; effective upon filing (Register 76, No. 2).
2. Certificate of Compliance filed 4-2-76 (Register 76, No. 14).

15191. Notices.

Notices filed with the Secretary for Resources related to programs exempted by this article shall:

(a) Be available for public inspection.
(b) Be posted in a weekly list in the office of the Resources Agency.
(c) Remain posted for a period of 30 days.

15192. List of Exempt Programs.

The following programs of state regulatory agencies have been certified by the Secretary for Resources as meeting the requirements of Section 21080.5:

(a) The regulation of private timber harvesting operations by the California Division of Forestry and the State Board of Forestry pursuant to Chapter 8, commencing with Section 4511 of Part 2 of Division 4 of the Public Resources Code.

(b) The regulatory program of the Fish and Game Commission pursuant to the Fish and Game Code.

(c) The regulatory program of the California Coastal Commission and the regional coast commissions dealing with the consideration and granting of coastal development permits for activities of persons other than public agencies under the California Coastal Act of 1976, Division 20, (commencing with Section 30000) of the Public Resources Code.

(d) That portion of the regulatory program of the Air Resources Board which involves the adoption, approval, amendment or repeal of standards, rules, regulations or plans to be used in the regulatory program for the protection and enhancement of ambient air quality in California.

(e) The regulatory program of the State Board of Forestry in adopting, amending, or repealing standards, rules, regulations, or plans under the Z'berg-Nejedly Forest Practice Act, Chapter 8 (commencing with Section 4511) of Part 2 of Division 4 of the Public Resources Code.

(f) The program of the California Coastal Commission involving the preparation, approval, and certification of local coastal programs as provided in Sections 30500 through 30522 of the Public Resources Code.

(g) The Water Quality Control (Basin)/208 Planning Program of the State Water Resources Control Board and the Regional Water Quality Control Boards.

(h) The permit and planning programs of the San Francisco Bay Conservation and Development Commission under the McAteer-Petris Act, Title 7.2 (commencing with Section 66600) of the Government Code and the Suisun Marsh Preservation Act, Division 19 (commencing with Section 29000) of the Public Resources Code.

(i) The pesticide regulatory program insofar as the program consists of:

(1) The registration, evaluation, and classification of pesticides.

(2) The adoption, amendment, or repeal of regulations and standards for the licensing and regulation of pesticide dealers and pest control operators and advisors.

(3) The adoption, amendment, or repeal of regulations for standards dealing with the monitoring of pesticides and of the human health and environmental effects of pesticides.

(4) The regulation of the use of pesticides in agricultural and urban areas of the State through the permit system administered by the county agricultural commissioners.

(j) The regulation of weather resources management projects through the issuance of operating permits by the State Department of Water Resources pursuant to the California Weather Resources Management Act of 1978 (Water Code Sections 400 et seq.).

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21080.5, Public Resources Code; Chapter 308, Statutes of 1978.

HISTORY:

1. New subsection (d) filed 8-18-78; effective thirtieth day thereafter (Register 78, No. 33). For prior history, see Register 77, No. 22.
2. New subsection (e) filed 5-2-79; effective thirtieth day thereafter (Register 79, No. 18).
3. New subsections (f) and (g) filed 6-4-79; effective thirtieth day thereafter (Register 79, No. 23).
4. New subsection (h) filed 7-24-79; effective thirtieth day thereafter (Register 79, No. 30).
5. New subsections (i) and (j) filed 4-11-80; effective thirtieth day thereafter (Register 80, No. 15).

Article 13. Litigation

15201. Statutory Reference.

Litigation under CEQA must be handled under the time limits and criteria described in Sections 21167 et seq. of the Public Resources Code.

HISTORY:

1. New Article 13 (Sections 15201–15208) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

15202. Adequacy of an EIR or Negative Declaration For Use by Responsible Agencies.

A final EIR prepared by a Lead Agency or a Negative Declaration adopted by a Lead Agency shall be conclusively presumed to comply with CEQA for purposes of use by Responsible Agencies which were consulted pursuant to Section 15066 unless one of the following conditions occurs:

(a) A legal action or proceeding is filed challenging the EIR within the period provided in Section 21167(c), or

(b) A subsequent EIR is made necessary by Section 15067 of these Guidelines.

15203. Conditional Permits.

(a) If a lawsuit is filed challenging an EIR or Negative Declaration for noncompliance with CEQA, Responsible Agencies shall act as if the EIR or Negative Declaration complies with CEQA and continue to process the application for the project according to the time limits for Responsible Agency action contained in Government Code Section 65952. In this situation, the Responsible Agency shall have authority only to grant a conditional approval or disapproval of the project. A conditional approval shall constitute permission to proceed with a project only when the court action results in a final determination that the EIR or Negative Declaration does comply with the provisions of CEQA. (P.R.C. Sec. 21167.3)

(b) This section shall not require a Responsible Agency to process an application for a project where that Responsible Agency has filed a lawsuit challenging the legal adequacy of the environmental documents prepared by or for the Lead Agency.

APPENDIX B FOOTNOTES

No.

1. *Food and Agriculture*—Effects on plants and animals.
2. *Food and Agriculture*—Protection of food and fiber.
3. *Food and Agriculture*—Agricultural, dairy and feed lot systems.
4. *Food and Agriculture*—As pertains to transportation, handling, storage and decontamination of pesticides.
5. *Food and Agriculture*—Pesticide effects, predatory animal control, bird control.
6. *California Highway Patrol*—Enforcement of motor vehicle regulations.
7. *Health Services*—Beach sanitation, water pollution, solid waste and mosquito control.
8. *Health Services*—Pertains to health component.
9. *Health Services*—Most of these are strongly related to health.
10. *Health Services*—Pertains to noise.
11. *Health Services*—Pertains to personal and environmental health components.
12. Health Services—As it may pertain to human health hazards.
13. *Health Services*—Pertains to comprehensive health planning.
14. *Colorado River Board*—As pertains to the Colorado, New and Alamo Rivers.
15. *Fish and Game*—As field development and distribution systems may affect fish and wildlife.
16. *Fish and Game*—As may affect migrating and resident wildlife.
17. *Fish and Game*—As excessive noise may affect wildlife.
18. *Fish and Game*—As water quality may affect fish and wildlife.
19. *Parks and Recreation*—In impacted areas only.
20. *Reclamation Board*—In areas of Board's jurisdiction only—the Sacramento-San Joaquin Valley.
21. *State Water Resources Control Board*—As may pertain to water quality.
22. *Forestry*—With respect to forest land.
23. *Forestry*—(6) and (32)—As related to fire protection or State (fire protection) responsibility land.
24. *Air Resources Board*—(4), (22), (32), (33), and (36)—As may pertain to residential, commercial, industrial or transportation growth.
25. *San Francisco Bay Conservation and Development Commission*—(3), (17), (19), and (30)—With respect to San Francisco Bay, Suisun Bay and adjacent shore areas.
26. *California Coastal Commission*—(3), (4), (6), (8), (11), (12), (14), (15), (17), (19), (22), (23), (26), (29), (30), (31), (34), (35), and (36)—With respect to effects within the California Coastal Zone.
27. *California Tahoe Regional Planning Agency*—With respect to effects in the Tahoe Basin.
28. *Native American Heritage Commission*—With respect to places of special religious or social significance to Native Americans including archaeological sites, cemeteries, and places of worship.

Contact Person Telephone Number

Project Location

Project Description

This is to advise that the _____
(Lead Agency or Responsible Agency)
has approved the above described project and has made the following determinations regarding the above described project:

1. The project ☐ will ☐ will not have a significant effect on the environment.
2. ☐ An Environmental Impact Report was prepared for this project pursuant to the provisions of CEQA.
   ☐ A Negative Declaration was prepared for this project pursuant to the provisions of CEQA.
   The EIR or Negative Declaration and record of project approval may be examined at: _____
3. Mitigation measures ☐ were, ☐ were not, made a condition of the approval of the project.
4. A statement of Overriding Considerations ☐ was, ☐ was not, adopted for this project.

Date Received for Filing _____

Appendix F

ENERGY CONSERVATION

I. Introduction

The goal of conserving energy implies the wise and efficient use of energy. The means of achieving this goal include:

(1) decreasing overall per capita energy consumption,
(2) decreasing reliance on natural gas and oil, and
(3) increasing reliance on renewable energy sources.

In order to assure that energy implications are considered in project decisions, the California Environmental Quality Act requires that EIRs include a discussion of the potential energy impacts of proposed projects, with particular emphasis on avoiding or reducing inefficient, wasteful and unnecessary consumption of energy.

Energy conservation implies that a project's cost effectiveness be reviewed not only in dollars, but also in terms of energy requirements. For many projects, lifetime costs may be determined more by energy efficiency than by initial dollar costs.

II. EIR Contents

Potentially significant energy implications of a project should be considered in an EIR. The following list of energy impact possibilities and potential conservation measures is designed to assist in the preparation of an EIR. In many instances specific items may not apply or additional items may be needed.

A. Project Description may include the following items:

1. Energy consuming equipment and processes which will be used during construction, operation and/or removal of the project. If appropriate, this discussion should consider the energy intensiveness of materials and equipment required for the project.
2. Total energy requirements of the project by fuel type and end use.
3. Energy conservation equipment and design features.
4. Initial and life-cycle energy costs or supplies.
5. Total estimated daily trips to be generated by the project and the additional energy consumed per trip by mode.

B. Environmental Setting may include existing energy supplies and energy use patterns in the region and locality.

C. Environmental Impacts may include:

1. The project's energy requirements and its energy use efficiencies by amount and fuel type for each stage of the project's life cycle including construction, operation, maintenance and/or removal. If appropriate, the energy intensiveness of materials may be discussed.

2. The effects of the project on local and regional energy supplies and on requirements for additional capacity.

3. The effects of the project on peak and base period demands for electricity and other forms of energy.

4. The degree to which the project complies with existing energy standards.

5. The effects of the project on energy resources.

6. The project's projected transportation energy use requirements and its overall use of efficient transportation alternatives.

D. Mitigation Measures may include:

1. Potential measures to reduce wasteful, inefficient and unnecessary consumption of energy during construction, operation, maintenance and/or removal. The discussion should explain why certain measures were incorporated in the project and why other measures were dismissed.

2. The potential of siting, orientation, and design to minimize energy consumption, including transportation energy.

3. The potential for reducing peak energy demand.

4. Alternate fuels (particularly renewable ones) or energy systems.

5. Energy conservation which could result from recycling efforts.

E. Alternatives should be compared in terms of overall energy consumption and in terms of reducing wasteful, inefficient and unnecessary consumption of energy.

F. Unavoidable Adverse Effects may include wasteful, inefficient and unnecessary consumption of energy during the project construction, operation, maintenance and/or removal that cannot be feasibly mitigated.

G. Irreversible Commitment of Resources may include a discussion of how the project preempts future energy development or future energy conservation.

H. Short-Term Gains versus Long-Term Impacts can be compared by calculating the energy costs over the lifetime of the project.

I. Growth Inducing Effects may include the estimated energy consumption of growth induced by the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. New Appendix F filed 12-31-74 as an emergency; designated effective 1-7-75 (Register 75, No. 1).

2. Certificate of Compliance filed 4-29-75 (Register 75, No. 18).

3. Repealer and new Appendix F filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designates that compliance with this appendix is authorized but not mandatory before 1-1-77.

4. Amendment of Section II filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

Appendix G

SIGNIFICANT EFFECTS

A project will normally have a significant effect on the environment if it will:

(a) Conflict with adopted environmental plans and goals of the community where it is located;

(b) Have a substantial, demonstrable negative aesthetic effect;

(c) Substantially affect a rare or endangered species of animal or plant or the habitat of the species;

(d) Interfere substantially with the movement of any resident or migratory fish or wildlife species;

(e) Breach published national, state, or local standards relating to solid waste or litter control;

(f) Substantially degrade water quality;

(g) Contaminate a public water supply;

(h) Substantially degrade or deplete ground water resources;

(i) Interfere substantially with ground water recharge;

(j) Disrupt or adversely affect a prehistoric or historic archaeological site or a property of historic or cultural significance to a community or ethnic or social group; or a paleontological site except as a part of a scientific study;

(k) Induce substantial growth or concentration of population;

(l) Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system;

(m) Displace a large number of people;

(n) Encourage activities which result in the use of large amounts of fuel, water, or energy;

(o) Use fuel, water, or energy in a wasteful manner;

(p) Increase substantially the ambient noise levels for adjoining areas;

(q) Cause substantial flooding, erosion or siltation;

(r) Expose people or structures to major geologic hazards;

(s) Extend a sewer trunk line with capacity to serve new development;

(t) Substantially diminish habitat for fish, wildlife or plants;

(u) Disrupt or divide the physical arrangement of an established community;

(v) Create a potential public health hazard or involve the use, production or disposal of materials which pose a hazard to people or animal or plant populations in the area affected;

(w) Conflict with established recreational, educational, religious or scientific uses of the area;

(x) Violate any ambient air quality standard, contribute substantially to an existing or projected air quality violation, or expose sensitive receptors to substantial pollutant concentrations.

(y) Convert prime agricultural land to non-agricultural use or impair the agricultural productivity of prime agricultural land.

(z) Interfere with emergency response plans or emergency evacuation plans.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. New Appendix G filed 10-8-76; effective thirtieth day thereafter (Register 76, No 41). NOTE: Order designated that compliance with this appendix is authorized but not mandatory before 1-1-77.

2. Amendment of subsections (n) and (o) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

3. Amendment of subsections (j) and (v) and new subsections (y) and (z) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

Appendix H

ENVIRONMENTAL INFORMATION FORM

(To be completed by applicant)

Date Filed _____

GENERAL INFORMATION

1. Name and address of developer or project sponsor: _____

2. Address of project: _____
Assessor's Block and Lot Number _____

3. Name, address, and telephone number of person to be contacted concerning this project: _____

4. Indicate number of the permit application for the project to which this form pertains: _____

5. List and describe any other related permits and other public approvals required for this project, including those required by city, regional, state and federal agencies: _____

6. Existing zoning district: _____

7. Proposed use of site (Project for which this form is filed): _____

PROJECT DESCRIPTION

8. Site size.
9. Square footage.
10. Number of floors of construction.
11. Amount of off-street parking provided.
12. Attach plans.
13. Propose scheduling.
14. Associated projects.
15. Anticipated incremental development.
16. If residential, include the number of units, schedule of unit sizes, range of sale prices or rents, and type of household size expected.
17. If commercial, indicate the type, whether neighborhood, city or regionally oriented, square footage of sales area, and loading facilities.
18. If industrial, indicate type, estimated employment per shift, and loading facilities.
19. If institutional, indicate the major function, estimated employment per shift, estimated occupancy, loading facilities, and community benefits to be derived from the project.
20. If the project involves a variance, conditional use or rezoning application, state this and indicate clearly why the application is required.

Are the following items applicable to the project or its effects? Discuss below all items checked yes (attach additional sheets as necessary).

YES NO

___ ___ 21. Change in existing features of any bays, tidelands, beaches, lakes or hills, or substantial alteration of ground contours.

___ ___ 22. Change in scenic views or vistas from existing residential areas or public lands or roads.

___ ___ 23. Change in pattern, scale or character of general area of project.

___ ___ 24. Significant amounts of solid waste or litter.

___ ___ 25. Change in dust, ash, smoke, fumes or odors in vicinity.

___ ___ 26. Change in ocean, bay, lake, stream or ground water quality or quantity, or alteration of existing drainage patterns.

___ ___ 27. Substantial change in existing noise or vibration levels in the vicinity.

___ ___ 28. Site on filled land or on slope of 10 percent or more.

___ ___ 29. Use of disposal of potentially hazardous materials, such as toxic substances, flammables or explosives.

___ ___ 30. Substantial change in demand for municipal services (police, fire, water, sewage, etc.).

___ ___ 31. Substantially increase fossil fuel consumption (electricity, oil, natural gas, etc.).

___ ___ 32. Relationship to a larger project or series of projects.

ENVIRONMENTAL SETTING

33. Describe the project site as it exists before the project, including information on topography, soil stability, plants and animals, and any cultural, historical or scenic aspects. Describe any existing structures on the site, and the use of the structures. Attach photographs of the site. Snapshots or polaroid photos will be accepted.

34. Describe the surrounding properties, including information on plants and animals and any cultural, historical or scenic aspects. Indicate the type of land use (residential, commercial, etc.), intensity of land use (one-family, apartment houses, shops, department stores, etc.), and scale of development (height, frontage, set-back, rear yard, etc.). Attach photographs of the vicinity. Snapshots or polaroid photos will be accepted.

CERTIFICATION: I hereby certify that the statements furnished above and in the attached exhibits present the data and information required for this initial evaluation to the best of my ability, and that the facts, statements, and information presented are true and correct to the best of my knowledge and belief.

HISTORY:

1. New Appendix H filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 40). NOTE: Order designates that compliance with this appendix is authorized but not mandatory before 1-1-77.
2. Amendment filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

Appendix I

ENVIRONMENTAL CHECKLIST FORM

(To be completed by Lead Agency)

I. BACKGROUND.

1. Name of Proponent _____
2. Address and Phone Number of Proponent:

_____

_____

_____

3. Date of Checklist Submitted _____
4. Agency Requiring Checklist _____
5. Name of Proposal, if applicable _____

_____

II. ENVIRONMENTAL IMPACTS

(Explanations of all "yes" and "maybe" answers are required on attached sheets.)

	YES	MAYBE	NO
1. Earth. Will the proposal result in:			
a. Unstable earth conditions or in changes in geologic substructures?	___	___	___
b. Disruptions, displacements, compaction or overcovering of the soil?	___	___	___
c. Change in topography or ground surface relief features?	___	___	___
d. The destruction, covering or modification of any unique geologic or physical features?	___	___	___
e. Any increase in wind or water erosion of soils, either on or off the site?	___	___	___
f. Changes in deposition or erosion of beach sands, or changes in siltation, deposition or erosion which may modify the channel of a river or stream or the bed of the ocean or any bay, inlet or lake?	___	___	___
g. Exposure of people or property to geologic hazards such as earthquakes, landslides, mudslides, ground failure, or similar hazards?			
2. Air. Will the proposal result in:			
a. Substantial air emissions or deterioration of ambient air quality?	___	___	___
b. The creation of objectionable odors?	___	___	___
c. Alteration of air movement, moisture or temperature, or any change in climate, either locally or regionally?	___	___	___
3. Water. Will the proposal result in:			
a. Changes in currents, or the course or direction of water movements, in either marine or fresh waters?	___	___	___
b. Changes in absorption rates, drainage patterns or the rate and amount of surface water runoff?	___	___	___
c. Alterations to the course or flow of flood waters?	___	___	___
d. Change in the amount of surface water in any water body?	___	___	___

	YES	MAYBE	NO
e. Discharge into surface waters, or in any alteration of surface water quality, including but not limited to temperature, dissolved oxygen or turbidity?	—	—	—
f. Alteration of the direction or rate of flow of ground waters?	—	—	—
g. Change in the quantity of ground waters, either through direct additions or withdrawals, or through interception of an aquifer by cuts or excavations?	—	—	—
h. Substantial reduction in the amount of water otherwise available for public water supplies?	—	—	—
i. Exposure of people or property to water related hazards such as flooding or tidal waves?	—	—	—
4. Plant Life. Will the proposal result in:			
a. Change in the diversity of species, or number of any species of plants (including trees, shrubs, grass, crops, and aquatic plants)?	—	—	—
b. Reduction of the numbers of any unique, rare or endangered species of plants?	—	—	—
c. Introduction of new species of plants into an area, or in a barrier to the normal replenishment of existing species?	—	—	—
d. Reduction in acreage of any agricultural crop?	—	—	—
5. Animal Life. Will the proposal result in:			
a. Change in the diversity of species, or numbers of any species of animals (birds, land animals including reptiles, fish and shellfish, benthic organisms or insects)?	—	—	—
b. Reduction of the numbers of any unique, rare or endangered species of animals?	—	—	—
c. Introduction of new species of animals into an area, or result in a barrier to the migration or movement of animals?	—	—	—
d. Deterioration to existing fish or wildlife habitat?	—	—	—
6. Noise. Will the proposal result in:			
a. Increases in existing noise levels?	—	—	—
b. Exposure of people to severe noise levels?	—	—	—
7. Light and Glare. Will the proposal produce new light or glare?	—	—	—
8. Land Use. Will the proposal result in a substantial alteration of the present or planned land use of an area?	—	—	—
9. Natural Resources. Will the proposal result in:			
a. Increase in the rate of use of any natural resources?	—	—	—
b. Substantial depletion of any nonrenewable natural resource?	—	—	—
10. Risk of Upset. Will the proposal involve:			
a. A risk of an explosion or the release of hazardous substances (including, but not limited to, oil, pesticides, chemicals or radiation) in the event of an accident or upset conditions?	—	—	—
b. Possible interference with an emergency response plan or an emergency evacuation plan?	—	—	—

	YES	MAYBE	NO
11. Population. Will the proposal alter the location, distribution, density, or growth rate of the human population of an area?	___	___	___
12. Housing. Will the proposal affect existing housing, or create a demand for additional housing?	___	___	___
13. Transportation/Circulation. Will the proposal result in:			
a. Generation of substantial additional vehicular movement?	___	___	___
b. Effects on existing parking facilities, or demand for new parking?	___	___	___
c. Substantial impact upon existing transportation systems?	___	___	___
d. Alterations to present patterns of circulation or movement of people and/or goods?	___	___	___
e. Alterations to waterborne, rail or air traffic?	___	___	___
f. Increase in traffic hazards to motor vehicles, bicyclists or pedestrians?			
14. Public Services. Will the proposal have an effect upon, or result in a need for new or altered governmental services in any of the following areas:			
a. Fire protection?	___	___	___
b. Police protection?	___	___	___
c. Schools?	___	___	___
d. Parks or other recreational facilities?	___	___	___
e. Maintenance of public facilities, including roads?			
f. Other governmental services?	___	___	___
15. Energy. Will the proposal result in:			
a. Use of substantial amounts of fuel or energy?	___	___	___
b. Substantial increase in demand upon existing sources of energy, or require the development of new sources of energy?	___	___	___
16. Utilities. Will the proposal result in a need for new systems, or substantial alterations to the following utilities:			
a. Power or natural gas?	___	___	___
b. Communications systems?	___	___	___
c. Water?	___	___	___
d. Sewer or septic tanks?	___	___	___
e. Storm water drainage?	___	___	___
f. Solid waste and disposal?	___	___	___
17. Human Health. Will the proposal result in:			
a. Creation of any health hazard or potential health hazard (excluding mental health)?	___	___	___
b. Exposure of people to potential health hazards?	___	___	___
18. Aesthetics. Will the proposal result in the obstruction of any scenic vista or view open to the public, or will the proposal result in the creation of an aesthetically offensive site open to public view?	___	___	___

	YES	MAYBE	NO
19. Recreation. Will the proposal result in an impact upon the quality or quantity of existing recreational opportunities?	___	___	___
20. Cultural Resources.			
a. Will the proposal result in the alteration of or the destruction of a prehistoric or historic archeological site?	___	___	___
b. Will the proposal result in adverse physical or aesthetic effects to a prehistoric or historic building, structure, or object?	___	___	___
c. Does the proposal have the potential to cause a physical change which would affect unique ethnic cultural values?	___	___	___
d. Will the proposal restrict existing religious or sacred uses within the potential impact area?	___	___	___
21. Mandatory Findings of Significance.			
a. Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	___	___	___
b. Does the project have the potential to achieve short-term, to the disadvantage of long-term, environmental goals? (A short-term impact on the environment is one which occurs in a relatively brief, definitive period of time while long-term impacts will endure well into the future.)	___	___	___
c. Does the project have impacts which are individually limited, but cumulatively considerable? (A project may impact on two or more separate resources where the impact on each resource is relatively small, but where the effect of the total of those impacts on the environment is significant.)	___	___	___
d. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	___	___	___

III. DISCUSSION OF ENVIRONMENTAL EVALUATION

IV. DETERMINATION
(To be completed by the Lead Agency)

On the basis of this initial evaluation:

☐ I find the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☐ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because the mitigation measures described on an attached sheet have been added to the project. A NEGATIVE DECLARATION WILL BE PREPARED.

☐ I find the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

(Responsible Agency) (Lead Agency)

_____ _____
(Address) (Address)

_____ _____

SUBJECT: Notice of Preparation of a Draft Environmental Impact Report

_____ will be the Lead Agency and will prepare an environmental impact report for the project identified below. We need to know the views of your agency as to the scope and content of the environmental information which is germane to your agency's statutory responsibilities in connection with the proposed project. Your agency will need to use the EIR prepared by our agency when considering your permit or other approval for the project.

The project description, location, and the probable environmental effects are contained in the attached materials. A copy of the Initial Study ☐ is, ☐ is not, attached.

Due to the time limits mandated by State law, your response must be sent at the earliest possible date but not later than 45 days after receipt of this notice.

Please send your response to _____ at the address shown above. We will need the name for a contact person in your agency.

Article 1. General

15000. Authority.

The regulations contained in this chapter are prescribed by the Secretary for Resources to be followed by all state and local agencies in California in the implementation of the California Environmental Quality Act. These Guidelines have been developed by the Office of Planning and Research for adoption by the Secretary for Resources in accordance with Section 21083. Additional information may be obtained by writing:

Secretary for Resources
Room 1311, 1416 Ninth Street
Sacramento, CA 95814

These Guidelines are binding on all public agencies in California.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082, 21083 and 21087, Public Resources Code; *City of Santa Ana* v. *City of Garden Grove,* (1979) 100 Cal. App. 3d 521.

HISTORY:

1. New Chapter 3, Articles 1 through 10 (§§ 15000 through 15166, not consecutive) filed 2-7-73; designated effective upon filing as provided in Section 21083, Public Resources Code (Register 73, No. 6).
2. Amendment filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).
3. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15001. Short Title.

These Guidelines may be cited as the "State CEQA Guidelines." Existing references to the "State EIR Guidelines" shall be construed to be references to the "State CEQA Guidelines."

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083 and 21087, Public Resources Code.

HISTORY:

1. New section filed 1-3-75; designated effective 4-1-75 (Register 75, No. 1).
2. Amendment filed 1-7-82; effective thirtieth day thereafter (Register 82, No. 2).
3. Amendment filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).
4. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15002. General Concepts.

(a) Basic Purposes of CEQA. The basic purposes of CEQA are to:

(1) Inform governmental decision makers and the public about the potential, significant environmental effects of proposed activities.

(2) Identify ways that environmental damage can be avoided or significantly reduced.

(3) Prevent significant, avoidable damage to the environment by requiring changes in projects through the use of alternatives or mitigation measures when the governmental agency finds the changes to be feasible.

(4) Disclose to the public the reasons why a governmental agency approved the project in the manner the agency chose if significant environmental effects are involved.

(b) Governmental Action. CEQA applies to governmental action. This action may involve:

(1) Activities directly undertaken by a governmental agency,

(2) Activities financed in whole or in part by a governmental agency, or
(3) Private activities which require approval from a governmental agency.
(c) Private Action. Private action is not subject to CEQA unless the action involves governmental participation, financing, or approval.
(d) Project. A "project" is an activity subject to CEQA. The term "project" has been interpreted to mean far more than the ordinary dictionary definition of the term. See Section 15378.
(e) Time for Compliance. A governmental agency is required to comply with CEQA procedures when the agency proposes to carry out or approve the activity. See Section 15004.
(f) Environmental Impact Reports and Negative Declarations. An environmental impact report (EIR) is the public document used by the governmental agency to analyze the significant environmental effects of a proposed project, to identify alternatives, and to disclose possible ways to reduce or avoid the possible environmental damage.
(1) An EIR is prepared when the public agency finds substantial evidence that the project may have a significant effect on the environment. See Section 15064(a)(1).
(2) When the agency finds that there is no substantial evidence that a project may have a significant environmental effect, the agency will prepare a "Negative Declaration" instead of an EIR. See Section 15070.
(g) Significant Effect on the Environment. A significant effect on the environment is defined as a substantial adverse change in the physical conditions which exist in the area affected by the proposed project. See Section 15382. Further, when an EIR identifies a significant effect, the government agency approving the project must make findings on whether the adverse environmental effects have been substantially reduced or if not, why not. See Section 15091.
(h) Methods for Protecting the Environment. CEQA requires more than merely preparing environmental documents. The EIR by itself does not control the way in which a project can be built or carried out. Rather, when an EIR shows that a project could cause substantial adverse changes in the environment, the governmental agency must respond to the information by one or more of the following methods:
(1) Changing a proposed project;
(2) Imposing conditions on the approval of the project;
(3) Adopting plans or ordinances to control a broader class of projects to avoid the adverse changes;
(4) Choosing an alternative way of meeting the same need;
(5) Disapproving the project;
(6) Finding that changes in, or alterations, the project are not feasible.
(7) Finding that the unavoidable, significant environmental damage is acceptable as provided in Section 15093.
(i) Discretionary Action. CEQA applies in situations where a governmental agency can use its judgment in deciding whether and how to carry out or approve a project. A project subject to such judgmental controls is called a "discretionary project". See Section 15357.
(1) Where the law requires a governmental agency to act on a project in a set way without allowing the agency to use its own judgment, the project is called "ministerial", and CEQA does not apply. See Section 15369.

(2) Whether an agency has discretionary or ministerial controls over a project depends on the authority granted by the law providing the controls over the activity. Similar projects may be subject to discretionary controls in one city or county and only ministerial controls in another. See Section 15268.

(j) Public Involvement. Under CEQA, an agency must solicit and respond to comments from the public and from other agencies concerned with the project. See Sections 15073, 15086, 15087 and 15088.

(k) Three Step Process. An agency will normally take up to three separate steps in deciding which document to prepare for a project subject to CEQA.

(1) In the first step the lead agency examines the project to determine whether the project is subject to CEQA at all. If the project is exempt, the process does not need to proceed any farther. The agency may prepare a notice of exemption. See Sections 15061 and 15062.

(2) If the project is not exempt, the lead agency takes the second step and conducts an initial study (Section 15063) to determine whether the project may have a significant effect on the environment. If the initial study shows that there is no substantial evidence that the project may have a significant effect, the lead agency prepares a negative declaration. See Sections 15070 et seq.

(3) If the initial study shows that the project may have a significant effect, the lead agency takes the third step and prepares an EIR. See Sections 15080 et seq.

(l) Certified Equivalent Programs. A number of environmental regulatory programs have been certified by the Secretary of the Resources Agency as involving essentially the same consideration of environmental issues as is provided by use of EIRs and negative declarations. Certified programs are exempt from preparing EIRs and negative declarations but use other documents instead. Certified programs are discussed in Article 17 and are listed in Section 15251.

(m) This section is intended to present the general concepts of CEQA in a simplified and introductory manner. If there are any conflicts between the short statement of a concept in this section and the provisions of other sections of these guidelines, the other sections shall prevail.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000-21176, Public Resources Code; *No Oil, Inc.* v. *City of Los Angeles*, 13 Cal. 3d 68 (1974); *Running Fence Corp.* v. *Superior Court*, 15 Cal. App. 3d 400 (1975).

HISTORY:

1. New section filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).
2. Amendment filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).
3. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15003. Policies.

In addition to the policies declared by the Legislature concerning environmental protection and administration of CEQA in Sections 21000, 21001, 21002, and 21002.1 of the Public Resources Code, the courts of this state have declared the following policies to be implicit in CEQA:

(a) The EIR requirement is the heart of CEQA. (*County of Inyo* v. *Yorty*, 32 Cal. App. 3d 795.)

(b) The EIR serves not only to protect the environment but also to demonstrate to the public that it is being protected. (*County of Inyo* v. *Yorty*, 32 Cal. App. 3d 795.)

(c) The EIR is to inform other governmental agencies and the public generally of the environmental impact of a proposed project. (*No Oil, Inc.* v. *City of Los Angeles,* 13 C. 3d 68.)

(d) The EIR is to demonstrate to an apprehensive citizenry that the agency has, in fact, analyzed and considered the ecological implications of its action. (*People ex rel. Department of Public Works* v. *Bosio,* 47 Cal. App. 3d 495.)

(e) The EIR process will enable the public to determine the environmental and economic values of their elected and appointed officials thus allowing for appropriate action come election day should a majority of the voters disagree. (*People* v. *County of Kern,* 39 Cal. App. 3d 830.)

(f) CEQA was intended to be interpreted in such a manner as to afford the fullest possible protection to the environment within the reasonable scope of the statutory language. (*Friends of Mammoth* v. *Board of Supervisors,* 8 Cal. 3d 247.)

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. New section filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15004. Time of Preparation.

(a) Before granting any approval of a project subject to CEQA, every lead agency or responsible agency shall consider a final EIR or negative declaration or another document authorized by these guidelines to be used in the place of an EIR or negative declaration. See the definition of "approval" in Section 15352.

(b) Choosing the precise time for CEQA compliance involves a balancing of competing factors. EIRs and negative declarations should be prepared as early as feasible in the planning process to enable environmental considerations to influence project program and design and yet late enough to provide meaningful information for environmental assessment.

(1) With public projects, at the earliest feasible time, project sponsors shall incorporate environmental considerations into project conceptualization, design, and planning. CEQA compliance should be completed prior to acquisition of a site for a public project.

(2) With private projects, the Lead Agency shall encourage the project proponent to incorporate environmental considerations into project conceptualization, design, and planning at the earliest feasible time.

(c) The environmental document preparation and review should be coordinated in a timely fashion with the existing planning, review, and project approval processes being used by each public agency. When the lead agency is a state agency, the environmental document shall be included as part of the regular project report if such a report is used in its existing review and budgetary process.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061 and 21105, Public Resources Code; *Friends of Mammoth* v. *Board of Supervisors,* 8 Cal. 3d 247; *Mount Sutro Defense Committee* v. *Regents of the University of California,* 77 Cal. App. 3d 20.

HISTORY:

1. New section filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15005. Terminology.

The following words are used to indicate whether a particular subject in the Guidelines is mandatory, advisory, or permissive:

(a) "Must" or "shall" identifies a mandatory element which all public agencies are required to follow.

(b) "Should" identifies guidance provide by the Secretary for Resources based on policy considerations contained in CEQA, in the legislative history of the statute, or in federal court decisions which California courts can be expected to follow. Public agencies are advised to follow this guidance in the absence of compelling, countervailing considerations.

(c) "May" identifies a permissive element which is left fully to the discretion of the public agencies involved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082 and 21083, Public Resources Code.

HISTORY:

1. New section filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For history of former section, see Register 75, No. 1.
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15006. Reducing Delay and Paperwork.

Public agencies should reduce delay and paperwork by:

(a) Integrating the CEQA process into early planning. (15004(c))

(b) Ensuring the swift and fair resolution of lead agency disputes. (15053)

(c) Identifying projects which fit within categorical exemptions and are therefore exempt from CEQA processing. (15300.4)

(d) Using initial studies to identify significant environmental issues and to narrow the scope of EIRs. (15063)

(e) Using a negative declaration when a project not otherwise exempt will not have a significant effect on the environment. (15070)

(f) Using a previously prepared EIR when it adequately addresses the proposed project. (15153)

(g) Consulting with state and local responsible agencies before and during preparation of an environmental impact report so that the document will meet the needs of all the agencies which will use it. (15063)

(h) Urging applicants, either before or after the filing of an application, to revise projects to eliminate possible significant effects on the environment, thereby enabling the project to qualify for a negative declaration rather than an environmental impact report. (15063(c)(2))

(i) Integrating CEQA requirements with other environmental review and consulting requirements. (Public Resources Code Section 21080.5)

(j) Eliminating duplication with federal procedures by providing for joint preparation of environmental documents with federal agencies and by adopting completed federal NEPA documents. (15227)

(k) Emphasizing consultation before an environmental impact report is prepared, rather than submitting adversary comments on a completed document. (15082(b))

(l) Combining environmental documents with other documents such as general plans. (15166)

(m) Eliminating repetitive discussions of the same issues by using environmental impact reports on programs, policies, or plans and tiering from reports of broad scope to those of narrower scope. (15151)

(n) Reducing the length of environmental impact reports by means such as setting appropriate page limits. (15141)

(o) Preparing analytic rather than encyclopedic environmental impact reports. (15142)

(p) Mentioning only briefly issues other than significant ones in EIRs. (15143)

(q) Writing environmental impact reports in plain language. (15140)

(r) Following a clear format for environmental impact reports. (15120)

(s) Emphasizing the portions of the environmental impact report that are useful to decision-makers and the public and reducing emphasis on background material. (15143)

(t) Using incorporation by reference. (15150)

(u) Making comments on environmental impact reports as specific as possible. (15205)

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003 and 21083, Public Resources Code.

HISTORY:

1. New section filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For history of former section, see Register 80, No. 19.
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15007. Amendments.

(a) These guidelines will be amended from time to time to match new developments relating to CEQA.

(b) Amendments to the guidelines apply prospectively only. New requirements in amendments will apply to steps in the CEQA process not yet undertaken by the date when agencies must comply with the amendments.

(c) If a document meets the content requirements in effect when the document is set out for public review, the document shall not need to be revised to conform to any new content requirements in guideline amendments taking effect before the document is finally approved.

(d) Public agencies shall comply with new requirements in amendments to the guidelines beginning with the earlier of the following two dates:

(1) The effective date of the agency's procedures amended to conform to the new guideline amendments; or

(2) The 120th day after the effective date of the guideline amendments.

(e) Public agencies may implement any permissive or advisory elements of the guidelines beginning with the effective date of the guideline amendments.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082 and 21087, Public Resources Code; *Stevens* v. *City of Glendale,* 125 Cal. App. 3d 986.

HISTORY:

1. New section filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

Article 2. General Responsibilities

15020. General.

Each public agency is responsible for complying with CEQA and these Guidelines. A public agency must meet its own responsibilities under CEQA and shall not rely on comments from other public agencies or private citizens as a substitute for work CEQA requires the lead agency to accomplish. For example, a lead agency is responsible for the adequacy of its environmental documents. The lead agency shall not knowingly release a deficient document hoping that public comments will correct defects in the document.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082, 21082.1, Public Resources Code; *Russian Hill Improvement Association* v. *Board of Permit Appeals*, 44 Cal. App. 3d 158 (1975).

HISTORY:

1. Repealer of Article 2 (Sections 15005 and 15006) and new Article 2 (Sections 15020–15025) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 80, No. 19; 75, No. 1; and 73, No. 50.
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15021. Duty to Minimize Environmental Damage and Balance Competing Public Objectives.

(a) CEQA establishes a duty for public agencies to avoid or minimize environmental damage where feasible.

(1) In regulating public or private activities, agencies are required to give major consideration to preventing environmental damage.

(2) A public agency should not approve a project as proposed if there are feasible alternatives or mitigation measures available that would substantially lessen any significant effects that the project would have on the environment.

(b) In deciding whether changes in a project are feasible, an agency may consider specific economic, environmental, legal, social, and technological factors.

(c) The duty to prevent or minimize environmental damage is implemented through the findings required by Section 15091.

(d) CEQA recognizes that in determining whether and how a project should be approved, a public agency has an obligation to balance a variety of public objectives, including economic, environmental, and social factors and in particular the goal of providing a decent home and satisfying living environment for every Californian. An agency shall prepare a statement of overriding considerations as described in Section 15093 to reflect the ultimate balancing of competing public objectives when the agency decides to approve a project that will cause one or more significant effects on the environment.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000, 21001, 21002, 21002.1 and 21081, Public Resources Code; *San Francisco Ecology Center* v. *City and County of San Francisco*, (1975) 48 Cal. App. 3d 584; *Laurel Hills Homeowners Association* v. *City Council*, (1978) 83 Cal. App. 3d 515.

15022. Public Agency Implementing Procedures.

(a) Each public agency shall adopt objectives, criteria, and specific procedures consistent with CEQA and these Guidelines for administering its responsibilities under CEQA, including the orderly evaluation of projects and preparation of environmental documents. The implementing procedures should contain at least provisions for:

(1) Identifying the activities that are exempt from CEQA. These procedures should contain:

(A) Provisions for evaluating a proposed activity to determine if there is no possibility that the activity may have a significant effect on the environment.

(B) A list of projects or permits over which the public agency has only ministerial authority.

(C) A list of specific activities which the public agency has found to be within the categorical exemptions established by these guidelines.

(2) Conducting initial studies.

(3) Preparing negative declarations.

(4) Preparing draft and final EIRs.

(5) Consulting with and obtaining comments from other public agencies and members of the public with regard to the environmental effects of projects.

(6) Assuring adequate opportunity and time for public review and comment on the Draft EIR or Negative Declaration.

(7) Evaluating and responding to comments received on environmental documents.

(8) Assigning responsibility for determining the adequacy of an EIR or negative declaration.

(9) Reviewing and considering environmental documents by the person or decisionmaking body who will approve or disapprove a project.

(10) Filing documents required or authorized by CEQA and these Guidelines.

(11) Providing adequate comments on environmental documents which are submitted to the public agency for review.

(12) Assigning responsibility for specific functions to particular units of the public agency.

(13) Providing time periods for performing functions under CEQA.

(b) Any district, including a school district, need not adopt objectives, criteria, and procedures of its own if it uses the objectives, criteria, and procedures of another public agency whose boundaries are coterminous with or entirely encompass the district.

(c) Public agencies should revise their implementing procedures to conform to amendments to these guidelines within 120 days after the effective date of the amendments. During the period while the public agency is revising its procedures, the agency must conform to any statutory changes in the California Environmental Quality Act that have become effective regardless of whether the public agency has revised its formally adopted procedures to conform to the statutory changes.

(d) In adopting procedures to implement CEQA, a public agency may adopt the State CEQA Guidelines through incorporation by reference. The agency may then adopt only those specific procedures or provisions described in subsection (a) which are necessary to tailor the general provisions of the guidelines to the specific operations of the agency. A public agency may also choose to adopt a complete set of procedures identifying in one document all the necessary requirements.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082, 21100.2 and 21151.5, Public Resources Code.

15023. Office of Planning and Research (OPR).

(a) From time to time OPR shall review the State CEQA Guidelines and shall make recommendations for amendments to the Secretary for Resources.

(b) OPR shall receive and evaluate proposals for adoption, amendment, or repeal of categorical exemptions and shall make recommendations on the proposals to the Secretary for Resources. People making suggestions concerning categorical exemptions shall submit their recommendations to OPR with supporting information to show that the class of projects in the proposal either will or will not have a significant effect on the environment.

(c) The State Clearinghouse in the Office of Planning and Research shall be responsible for distributing environmental documents to State agencies, departments, boards, and commissions for review and comment.

(d) Upon request of a Lead Agency or a project applicant, OPR shall provide assistance in identifying the various responsible agencies and any federal agencies which have responsibility for carrying out or approving a proposed project.

(e) OPR shall ensure that state responsible agencies provide the necessary information to lead agencies in response to notices of preparation within at most 45 days after receiving a notice of preparation.

(f) OPR shall resolve disputes as to which agency is the lead agency for a project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.4, 21083, 21086 and 21087, Public Resources Code.

15024. Secretary for Resources.

(a) The Guidelines shall be adopted by the Secretary for Resources. The Secretary shall make a finding that each class of projects given a categorical exemption will not have a significant effect on the environment.

(b) The Secretary may issue amendments to these Guidelines.

(c) The Secretary shall certify state environmental regulatory programs which meet the standards for certification in Section 21080.5, Public Resources Code.

(d) The Secretary shall receive and file notices of completion, determination, and exemption, as well as other notices required by certified state environmental regulatory programs.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.5, 21083, 21084, 21086, 21087, 21088 and 21152, Public Resources Code.

15025. Delegation of Responsibilities.

(a) A public agency may assign specific functions to its staff to assist in administering CEQA. Functions which may be delegated include but are not limited to:

(1) Determining whether a project is exempt.

(2) Conducting an initial study and deciding whether to prepare a draft EIR or negative declaration.

(3) Preparing a negative declaration or EIR.

(4) Determining that a negative declaration has been completed within a period of 105 days.

(5) Preparing responses to comments on environmental documents.

(6) Filing of notices.

(b) The decisionmaking body of a public agency shall not delegate the following functions:

(1) Reviewing and considering a final EIR or approving a negative declaration prior to approving a project.

(2) The making of findings as required by Sections 15091 and 15093.

(c) Where an advisory body such as a planning commission is required to make a recommendation on a project to the decisionmaking body, the advisory body shall also review and consider the EIR or negative declaration in draft or final form.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21082, Public Resources Code; *Kleist* v. *City of Glendale* (1976) 56 Cal. App. 3d 770.

Article 3. Authorities Granted to Public Agencies by CEQA

15040. Authority Provided by CEQA.

(a) CEQA is intended to be used in conjunction with discretionary powers granted to public agencies by other laws.

(b) CEQA does not grant an agency new powers independent of the powers granted to the agency by other laws.

(c) Where another law grants an agency discretionary powers, CEQA supplements those discretionary powers by authorizing the agency to use the discretionary powers to mitigate or avoid significant effects on the environment when it is feasible to do so with respect to projects subject to the powers of the agency. Prior to January 1, 1983, CEQA provided implied authority for an agency to use its discretionary powers to mitigate or avoid significant effects on the environment. Effective January 1, 1983, CEQA provides express authority to do so.

(d) The exercise of the discretionary powers may take forms that had not been expected before the enactment of CEQA, but the exercise must be within the scope of the power.

(e) The exercise of discretionary powers for environmental protection shall be consistent with express or implied limitations provided by other laws.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000, 21001, 21002, 21002.1 and 21004, Public Resources Code; Section 4, Chapter 1438, Statutes of 19...; *Golden Gate Bridge, Etc., Dist.* v. *Muzzi*, (1978) 83 Cal. App. 3d 707; *E.D.F.* v. *Mathews*, 410 F. Supp. 336, 339 (D.D.C., 1976); *Friends of Mammoth* v. *Board of Supervisors*, (1972) 8 Cal. 3d 247; *Pinewood Investors* v. *City of Oxnard* (1982) 133 Cal. App. 3d 1030.

HISTORY:

1. Repealer of Article 3 (Sections 15010–15016) and new Article 3 (Sections 15040–15045) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 82, No. 2; 80, No. 19; 78, No. 5; 76, No. 41; 75, Nos. 1 and 18; 74, Nos. 3 and 4; and 73, No. 50.

2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15041. Authority to Mitigate.

Within the limitations described in Section 15040, (a) A lead agency for a project has authority to require changes in any or all activities involved in the project in order to lessen or avoid significant effects on the environment.

(b) When a public agency acts as a responsible agency for a project, the agency shall have more limited authority than a lead agency. The responsible agency may require changes in a project to lessen or avoid only the effects, either direct or indirect, of that part of the project which the agency will be called on to carry out or approve.

(c) With respect to a project which includes housing development, a lead or responsible agency shall not reduce the proposed number of housing units as a mitigation measure or alternative to lessen a particular significant effect on the environment if that agency determines that there is another feasible, specific mitigation measure or alternative that would provide a comparable lessening of the significant effect.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1 and 21085, Public Resources Code; *Golden Gate Bridge, Etc., District* v. *Muzzi,* 83 Cal. App. 3d 707.

15042. Authority to Disapprove Projects.

A public agency may disapprove a project if necessary in order to avoid one or more significant effects on the environment that would occur if the project were approved as proposed. A lead agency has broader authority to disapprove a project than does a responsible agency. A responsible agency may refuse to approve a project in order to avoid direct or indirect environmental effects of that part of the project which the responsible agency would be called on to carry out or approve. For example, an air quality management district acting as a responsible agency would not have authority to disapprove a project for water pollution effects that were unrelated to the air quality aspects of the project regulated by the district.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002 and 21002.1, Public Resources Code; *Friends of Mammoth* v. *Mono County,* 8 Cal. App. 3d 247; *San Diego Trust and Savings Bank* v. *Friends of Gill,* 121 Cal. App. 3d 203.

15043. Authority to Approve Projects Despite Significant Effects.

A public agency may approve a project even though the project would cause a significant effect on the environment if the agency makes a fully informed and publicly disclosed decision that:

(a) There is no feasible way to lessen or avoid the significant effect (see Section 15091); and

(b) Specifically identified expected benefits from the project outweigh the policy of reducing or avoiding significant environmental impacts of the project. (See Section 15093.)

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002 and 21002.1, Public Resources Code; *San Francisco Ecology Center* v. *City and County of San Francisco,* (1975) 48 Cal. App. 3d 584; *San Diego Trust & Savings Bank* v. *Friends of Gill,* (1981) 121 Cal. App. 3d 203.

15044. Authority to Comment.

Any public agency or other person or entity may submit comments to a lead agency concerning any environmental effects of a project being considered by the lead agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000, 21001, 21002.1, 21104 and 21153, Public Resources Code.

15045. Fees.

(a) All lead agencies preparing EIRs and negative declarations for projects to be carried out by any person or entity other than the lead agency itself may charge and collect a reasonable fee from such person or entity, in order to recover the estimated costs incurred in preparing the EIR or negative declaration.

(b) Public agencies may charge and collect a reasonable fee from members of the public for a copy of an environmental document not to exceed the actual cost of reproducing a copy.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21089 and 21105, Public Resources Code; and Sections 6250 et seq., Government Code.

Article 4. Lead Agency

15050. Lead Agency Concept.

(a) Where a project is to be carried out or approved by more than one public agency, one public agency shall be responsible for preparing an EIR or negative declaration for the project. This agency shall be called the lead agency.

(b) Except as provided in subsection (c), the decisionmaking body of each responsible agency shall consider the lead agency's EIR or negative declaration prior to acting upon or approving the project. Each responsible agency shall certify that its decisionmaking body reviewed and considered the information contained in the EIR or negative declaration on the project.

(c) The determination of the lead agency of whether to prepare an EIR or a negative declaration shall be final and conclusive for all persons, including responsible agencies, unless:

(1) The decision is successfully challenged as provided in Section 21167 of the Public Resources Code,

(2) Circumstances or conditions change as provided in Section 15162, or

(3) A responsible agency becomes a lead agency under Section 15052.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.1, 21165 and 21167.2, Public Resources Code.

HISTORY:

1. Repealer of Article 4 (Sections 15020–15043) and new Article 4 (Sections 15050–15053) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 82, No. 2; 80, No. 19; 78, No. 5; 78, No. 41; 75, Nos. 1, 5 and 22; 74, Nos. 13 and 26; and 73, No. 50.

2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15051. Criteria for Identifying the Lead Agency.

Where two or more public agencies will be involved with a project, the determination of which agency will be the lead agency shall be governed by the following criteria:

(a) If the project will be carried out by a public agency, that agency shall be the lead agency even if the project would be located within the jurisdiction of another public agency.

(b) If the project is to be carried out by a nongovernmental person or entity, the lead agency shall be the public agency with the greatest responsibility for supervising or approving the project as a whole.

(1) The lead agency will normally be the agency with general governmental powers, such as a city or county, rather than an agency with a single or limited purpose such as an air pollution control district or a district which will provide a public service or public utility to the project.

(2) Where a city prezones an area, the city will be the appropriate lead agency for any subsequent annexation of the area and should prepare the appropriate environmental document at the time of the prezoning. The local agency formation commission shall act as a responsible agency.

(c) Where more than one public agency equally meet the criteria in subsection (b), the agency which will act first on the project in question shall be the lead agency.

(d) Where the provisions of subsections (a), (b), and (c) leave two or more public agencies with a substantial claim to be the lead agency, the public agencies may by agreement designate an agency as the lead agency. An agreement may also provide for cooperative efforts by two or more agencies by contract, joint exercise of powers, or similar devices.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21165, Public Resources Code.

15052. Shift in Lead Agency Designation.

(a) Where a responsible agency is called on to grant an approval for a project subject to CEQA for which another public agency was the appropriate lead agency, the responsible agency shall assume the role of the lead agency when any of the following conditions occur:

(1) The lead agency did not prepare any environmental documents for the project, and the statute of limitations has expired for a challenge to the action of the appropriate lead agency.

(2) The lead agency prepared environmental documents for the project, but the following conditions occur:

(A) A subsequent EIR is required pursuant to Section 15162,

(B) The lead agency has granted a final approval for the project, and

(C) The statute of limitations for challenging the lead agency's action under CEQA has expired.

(3) The lead agency prepared inadequate environmental documents without consulting with the responsible agency as required by Sections 15072 or 15082, and the statute of limitations has expired for a challenge to the action of the appropriate lead agency.

(b) When a responsible agency assumes the duties of a lead agency under this section, the time limits applicable to a lead agency shall apply to the actions of the agency assuming the lead agency duties.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21165, Public Resources Code.

15053. Designation of Lead Agency by Office of Planning and Research.

(a) If there is a dispute over which of several agencies should be the lead agency for a project, the disputing agencies should consult with each other in an effort to resolve the dispute prior to submitting it to OPR. If an agreement cannot be reached, any public agency, or the applicant if a private project is involved, may submit the dispute to OPR for resolution.

(b) OPR shall designate a lead agency within 21 days after receiving a completed request to resolve a dispute.

(c) Regulations adopted by OPR for resolving lead agency disputes may be found in Title 14, California Administrative Code, Sections 16000 et seq.

(d) Designation of a lead agency by OPR shall be based on consideration of the criteria in Section 15052 as well as the capacity of the agency to adequately fulfill the requirements of CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21165, Public Resources Code; and California Administrative Code, Title 14, Sections 16000–16041.

Article 5. Preliminary Review of Projects and Conduct of Initial Study

15060. Preliminary Review.

(a) A public agency is allowed 30 days to review for completeness applications for permits or other entitlements for use. While conducting this review for completeness, the agency should be alert for environmental issues that might require preparation of an EIR or that may require additional explanation by the applicant.

(b) Except as provided in Section 15111, the lead agency shall begin the formal environmental evaluation of the project after accepting an application as complete and determining that the project is subject to CEQA. Accepting an application as complete does not limit the authority of the lead agency to require the applicant to submit additional information needed for environmental evaluation of the project.

(c) If the lead agency can determine that an EIR will be clearly required for a project, the agency may skip further initial review of the project and begin work directly on the EIR process described in Article 9, commencing with Section 15080. In the absence of an initial study, the lead agency shall still focus the EIR on the significant effects of the project and indicate briefly its reasons for determining that other effects would not be significant or potentially significant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 65944, Government Code; Section 21080.2, Public Resources Code.

HISTORY:

1. Repealer of Article 5 (Sections 15050–15056) and new Article 5 (Sections 15060–15065) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 80, No. 19; 78, No. 5; 76, No. 41; 75, Nos. 1, 5 and 22; and 73, No. 50.
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15061. Review for Exemption.

(a) As part of the preliminary review, a public agency shall determine whether a particular activity is exempt from CEQA.

(b) Possible exemptions from CEQA include:

(1) The activity is not a project as defined in Section 15378.

(2) The project has been granted an exemption by statute (see Article 18, commencing with Section 15260) or by categorical exemption (see Article 19, commencing with Section 15300).

(3) The activity is covered by the general rule that CEQA applies only to projects which have the potential for causing a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA.

(c) Each public agency should include in its implementing procedures a listing of the projects often handled by the agency that the agency has determined to be exempt. This listing should be used in preliminary review.

(d) After determining that a project is exempt, the agency may prepare a notice of exemption as provided in Section 15062. Although the notice may be kept with the project application at this time, the notice shall not be filed with the Resources Agency or the county clerk until the project has been approved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(b), 21080.9, 21080.10, 21084, 21108(b) and 21152(b), Public Resources Code; *No Oil, Inc. v. City of Los Angeles*, 13 Cal. 3d 68.

15062. Notice of Exemption.

(a) When a public agency decides that a project is exempt from CEQA and the public agency approves or determines to carry out the project, the agency may file a notice of exemption. The notice shall be filed, if at all, after approval of the project. Such a notice shall include:

(1) A brief description of the project,

(2) A finding that the project is exempt, including a citation to the State Guidelines section under which it is found to be exempt, and

(3) A brief statement of reasons to support the finding.

(b) A notice of exemption may be filled out and may accompany the project application through the approval process. The notice shall not be filed with the county clerk or the Secretary for Resources until the project has been approved.

(c) When a public agency approves an applicant's project, either the agency or the applicant may file a notice of exemption.

(1) When a state agency files this notice, the notice of exemption shall be filed with the Secretary for Resources. A form for this notice is provided in Appendix E. A list of all such notices shall be posted on a weekly basis at the Office of the Secretary for Resources, Room 1311, 1416 Ninth Street, Sacramento, California. The list shall remain posted for at least 30 days.

(2) When a local agency files this notice, the notice of exemption will be filed with the county clerk of the county or counties in which the project will be located. Copies of all such notices will be available for public inspection and a list of such notices shall be posted on a weekly basis in the office of the county clerk. Each such list shall remain posted for a period of 30 days.

(3) When an applicant files this notice, special rules apply.

(A) The notice filed by an applicant shall be filed in the same place as if it were filed by the agency granting the permit. If the permit was granted by a state agency, the notice shall be filed with the Secretary for Resources. If the permit was granted by a local agency, the notice shall be filed with the county clerk of the county or counties in which the project will be located.

(B) The notice of exemption filed by an applicant shall contain the information required in subdivision (a) together with a certified document issued by the public agency stating that the agency has found the project to be exempt. The certified document may be a certified copy of an existing document or record of the public agency.

(C) A notice filed by an applicant shall be subject to the same posting and time requirements as a notice filed by a public agency.

(d) The filing of a Notice of Exemption and the posting on the list of notices start a 35 day statute of limitations period on legal challenges to the agency's decision that the project is exempt from CEQA. If a Notice of Exemption is not filed, a 180 day statute of limitations will apply.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108 and 21152, Public Resources Code.

15063. Initial Study.

(a) Following preliminary review, the lead agency shall conduct an initial study to determine if the project may have a significant effect on the environment. If the lead agency can determine that an EIR will clearly be required for the project, an initial study is not required but may still be desirable.

(1) All phases of project planning, implementation, and operation must be considered in the initial study of the project.

(2) To meet the requirements of this section, the lead agency may use an initial study or a similar analysis prepared pursuant to the National Environmental Policy Act.

(b) Results.

(1) If the agency determines that there is substantial evidence that any aspect of the project, either individually or cumulatively, may cause a significant effect on the environment, regardless of whether the overall effect of the project is adverse or beneficial, the lead agency shall either:

(A) Prepare an EIR or

(B) Use a previously prepared EIR which the lead agency determines would adequately analyze the project at hand.

(2) The lead agency shall prepare a negative declaration if the agency perceives no substantial evidence that the project or any of its aspects may cause a significant effect on the environment.

(c) Purposes. The purposes of an initial study are to:

(1) Provide the lead agency with information to use as the basis for deciding whether to prepare an EIR or negative declaration;

(2) Enable an applicant or lead agency to modify a project, mitigating adverse impacts before an EIR is prepared, thereby enabling the project to qualify for a negative declaration;

(3) Assist the preparation of an EIR, if one is required, by:

(A) Focusing the EIR on the effects determined to be significant,

(B) Identifying the effects determined not to be significant, and

(C) Explaining the reasons for determining that potentially significant effects would not be significant.

(4) Facilitate environmental assessment early in the design of a project;

(5) Provide documentation of the factual basis for the finding in a negative declaration that a project will not have a significant effect on the environment;

(6) Eliminate unnecessary EIRs;

(7) Determine whether a previously prepared EIR could be used with the project.

(d) Contents. An initial study shall contain in brief form:

(1) A description of the project including the location of the project;

(2) An identification of the environmental setting;

(3) An identification of environmental effects by use of a checklist, matrix, or other method;

(4) A discussion of ways to mitigate the significant effects identified, if any;

(5) An examination of whether the project would be consistent with existing zoning, plans, and other applicable land use controls;

(6) The name of the person or persons who prepared or participated in the initial study.

(e) Submission of Data. If the project is to be carried out by a private person or private organization, the lead agency may require such person or organization to submit data and information which will enable the lead agency to prepare the initial study. Any person may submit any information in any form to assist a lead agency in preparing an initial study.

(f) Format. Sample forms for an applicant's project description and a review form for use by the lead agency are contained in Appendices H and I. When used together, these forms would meet the requirements for an initial study. These forms are only suggested, and public agencies are free to devise their own format for an initial study. A previously prepared EIR may also be used as the initial study for a later project.

(g) Consultation. As soon as a lead agency has determined that an initial study will be required for the project, the lead agency shall consult informally with all responsible agencies and all trustee agencies responsible for resources affected by the project to obtain the recommendations of those agencies as to whether an EIR or a negative declaration should be prepared. During or immediately after preparation of an initial study for a private project, the lead agency may consult with the applicant to determine if the applicant is willing to modify the project to reduce or avoid the significant effects identified in the initial study.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(c), 21080.1, 21080.3, 21082.1, 21100 and 21151, Public Resources Code.

15064. Determining Significant Effect.

(a) Determining whether a project may have a significant effect plays a critical role in the CEQA process.

(1) When a lead agency determines that there is substantial evidence that a project may have a significant effect on the environment, the agency shall prepare a draft EIR.

(2) When a final EIR identifies one or more significant effects, the lead agency and each responsible agency shall make a finding under Section 15091 for each significant effect and may need to make a statement of overriding considerations under Section 15093 for the project.

(b) The determination of whether a project may have a significant effect on the environment calls for careful judgment on the part of the public agency involved, based to the extent possible on scientific and factual data. An iron clad definition of significant effect is not possible because the significance of an activity may vary with the setting. For example, an activity which may not be significant in an urban area may be significant in a rural area.

(c) In determining whether an effect will be adverse or beneficial, the lead agency shall consider the views held by members of the public in all areas affected. If the lead agency expects that there will be a substantial body of opinion that considers or will consider the effect to be adverse, the lead agency shall regard the effect as adverse. Before requiring the preparation of an EIR, the lead agency must still determine whether environmental change itself might be substantial.

(d) In evaluating the significance of the environmental effect of a project, the lead agency shall consider both primary or direct and secondary or indirect consequences.

(1) Primary consequences are immediately related to the project such as the dust, noise, and traffic of heavy equipment that would result from construction of a sewage treatment plant and possible odors from operation of the plant.

(2) Secondary consequences are related more to effects of the primary consequences than to the project itself and may be several steps removed from the project in a chain of cause and effect. For example, the construction of a new sewage treatment plant may facilitate population growth in the service area due to the increase in sewage treatment capacity and may lead to an increase in air pollution.

(e) Some examples of consequences which may be deemed to be a significant effect on the environment are contained in Appendix G.

(f) Economic and social changes resulting from a project shall not be treated as significant effects on the environment. Economic or social changes may be used, however, to determine that a physical change shall be regarded as a significant effect on the environment. Where a physical change is caused by economic or social effects of a project, the physical change may be regarded as a significant effect in the same manner as any other physical change resulting from the project. Alternatively, economic and social effects of a physical change may be used to determine that the physical change is a significant effect on the environment. If the physical change causes adverse economic or social effects on people, those adverse effects may be used as the basis for determining that the physical change is significant. For example, if a project would cause overcrowding of a public facility and the overcrowding causes an adverse effect on people, the overcrowding would be regarded as a significant effect.

(g) The decision as to whether a project may have one or more significant effects shall be based on information in the record of the lead agency.

(1) If the lead agency finds there is substantial evidence in the record that the project may have a significant effect on the environment, the lead agency shall prepare an EIR (Friends of B Street v. City of Hayward (1980) 106 Cal. App. 3d 988). Said another way, if a lead agency is presented with a fair argument that a project may have a significant effect on the environment, the lead agency shall prepare an EIR even though it may also be presented with other substantial evidence that the project will not have a significant effect (No Oil, Inc. v. City of Los Angeles (1974) 13 Cal. 3d 68).

(2) If the lead agency finds there is no substantial evidence that the project may have a significant effect on the environment, the lead agency shall prepare a negative declaration (Friends of B Street v. City of Hayward (1980) 106 Cal. App. 3d 988).

(h) In marginal cases where it is not clear whether there is substantial evidence that a project may have a significant effect on the environment, the lead agency shall be guided by the following factors:

(1) If there is serious public controversy over the environmental effects of a project, the lead agency shall consider the effect or effects subject to the controversy to be significant and shall prepare an EIR. Controversy unrelated to an environmental issue does not require preparation of an EIR.

(2) If there is a disagreement between experts over the significance of an effect on the environment, the lead agency shall treat the effect as significant and shall prepare an EIR.

(i) If an air emission or water discharge meets the existing standard for a particular pollutant, the lead agency may presume that the emission or discharge of the pollutant will not be a significant effect on the environment. If other information is presented suggesting that the emission or discharge may cause a significant effect, the lead agency shall evaluate the effect and decide whether it may be significant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21068, 21083 and 21100, Public Resources Code; *No Oil, Inc.* v. *City of Los Angeles.*

15065. Mandatory Findings of Significance.

A lead agency shall find that a project may have a significant effect on the environment and thereby require an EIR to be prepared for the project where any of the following conditions occur:

(a) The project has the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory.

(b) The project has the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals.

(c) The project has possible environmental effects which are individually limited but cumulatively considerable. As used in the subsection, "cumulatively considerable" means that the incremental effects of an individual project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.

(d) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083, Public Resources Code.

Article 6. Negative Declaration Process

15070. Decision to Prepare a Negative Declaration.

A proposed negative declaration shall be prepared for a project subject to CEQA when either:

(a) The initial study shows that there is no substantial evidence that the project may have a significant effect on the environment, or

(b) The initial study identified potentially significant effects but:

(1) Revisions in the project plans or proposals made by or agreed to by the applicant before the proposed negative declaration is released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur, and

(2) There is no substantial evidence before the agency that the project as revised may have a significant effect on the environment.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(c), Public Resources Code; *Friends of B Street* v. *City of Hayward*, (1980) 106 Cal. App. 3d 988; *Running Fence Corp.* v. *Superior Court*, (1975) 51 Cal. App. 3d 400.

HISTORY:

1. Repealer of Article 6 (Sections 15060–15069.5) and new Article 6 (Sections 15070–15075) filed 7-13-83; designated effective 8-1-83 (Register 83, No. 29). For prior history, see Registers 80, No. 19; 78, No. 5; 76, No. 41; 75, No. 1; and 73, No. 50).

2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15071. Contents.

A negative declaration circulated for public review shall include:

(a) A brief description of the project, including a commonly used name for the project, if any;

(b) The location of the project, preferably shown on a map, and the name of the project proponent;

(c) A proposed finding that the project will not have a significant effect on the environment;

(d) An attached copy of the initial study documenting reasons to support the finding; and

(e) Mitigation measures, if any, included in the project to avoid potentially significant effects.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(c), Public Resources Code.

15072. Public Notice.

(a) Notice that the lead agency proposes to adopt a negative declaration shall be provided to the public within a reasonable period of time prior to adoption by the lead agency of the negative declaration. Notice shall be given to all organizations and individuals who have previously requested such notice and shall also be given by at least one of the following procedures:

(1) Publication at least one time by the lead agency in a newspaper of general circulation in the area affected by the proposed project.

(2) Posting of notice by the lead agency on and off site in the area where the project is to be located.

(3) Direct mailing to owners of property contiguous to the project as such owners are shown on the latest equalized assessment roll.

(b) The alternatives for providing notice specified in subsection (a) shall not preclude a lead agency from providing additional notice by other means if the agency so desires, nor shall the requirements of this section preclude a lead agency from providing the public notice at the same time and in the same manner as public notice required by any other laws for the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21092, Public Resources Code; Section 6061, Government Code.

15073. Public Review of a Negative Declaration.

(a) The lead agency shall provide a public review period for a proposed negative declaration. The noticed public review period shall be long enough to provide members of the public with sufficient time to respond to the proposed finding before the negative declaration is approved.

(b) A copy of the notice with the proposed negative declaration shall be sent to every responsible agency and trustee agency concerned with the project and every other public agency with jurisdiction by law over resources affected by the project.

(c) Where one or more state agencies will be a responsible agency or a trustee agency or will exercise jurisdiction by law over natural resources affected by the project, the lead agency shall send copies of the negative declaration to the State Clearinghouse for distribution to the state agencies.

(d) When a negative declaration is submitted to the State Clearinghouse for review by state agencies, the public review period shall be not less than 30 days unless a shorter period is approved by the State Clearinghouse.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000(e), 21003(b) and 21080(c), Public Resources Code; *Plaggmier* v. *City of San Jose*, (1980) 101 Cal. App. 3d 842.

15074. Consideration and Approval of Negative Declaration.

(a) Any advisory body of a public agency making a recommendation to the decisionmaking body shall consider the proposed negative declaration before making its recommendation.

(b) Prior to approving the project, the decisionmaking body of the lead agency shall consider the proposed negative declaration together with any comments received during the public review process. The decisionmaking body shall approve the negative declaration if it finds on the basis of the initial study and any comments received that there is no substantial evidence that the project will have a significant effect on the environment.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(c), Public Resources Code; *Friends of B Street* v. *City of Hayward*, (1980) 106 Cal. App. 3d 988.

15075. Notice of Determination.

(a) After deciding to carry out or approve a project for which a negative declaration has been approved, the lead agency shall file a notice of determination.

(b) The notice of determination shall include:

(1) An identification of the project including its common name where possible, and its location.

(2) A brief description of the project.

(3) The date on which the agency approved the project.

(4) The determination of the agency that the project will not have a significant effect on the environment.

(5) A statement that a negative declaration has been prepared pursuant to the provisions of CEQA.

(6) The address where a copy of the negative declaration may be examined.

(c) If the lead agency is a state agency, the notice of determination shall be filed with the Secretary for Resources.

(d) If the lead agency is a local agency, the notice of determination shall be filed with the county clerk of the county or counties in which the project will be located. If the project requires a discretionary approval from any state agency, the notice of determination also shall be filed with the Secretary for Resources.

(e) The filing of the notice of determination and the posting on a list of such notices starts a 30-day statute of limitations on court challenges to the approval under CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(c), 21108(a) and (c), 21152(a) and (c) and 21167(b), Public Resources Code; *Citizens of Lake Murray Area Association* v. *City Council*, (1982) 129 Cal. App. 3d 436.

Article 6.5. Statutory Exemptions

HISTORY:

1. Repealer of Article 6.5 (Sections 15070–15079.7) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Register 78, No. 5.
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

Article 7. EIR Process

15080. General.

To the extent possible, the EIR process should be combined with the existing planning, review, and project approval process used by each public agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061, 21100 and 21151, Public Resources Code.

HISTORY:

1. Repealer of Article 7 (Sections 15060–15069) and new Article 7 (Sections 15080–15096) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 82, No. 2; 80, No. 19; 78, No. 5; 77, No. 1; 76, No. 41; 75, No. 1; and 73, No. 50.
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15081. Decision to Prepare an EIR.

The EIR process starts with the decision to prepare an EIR. This decision will be made either during preliminary review under Section 15060 or at the conclusion of an initial study after applying the standards described in Section 15064.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code; *No Oil, Inc.* v. *City of Los Angeles* (1974) 13 Cal. 3d 68; *Friends of B Street* v. *City of Hayward* (1980) 106 Cal. App. 3d 988.

15082. Determination of Scope of EIR.

(a) Notice of Preparation. Immediately after deciding that an environmental impact report is required for a project, the lead agency shall send to each responsible agency a notice of preparation stating that an environmental impact report will be prepared. This notice shall also be sent to every federal agency involved in approving or funding the project and to each trustee agency responsible for natural resources affected by the project.

(1) The notice of preparation shall provide the responsible agencies with sufficient information describing the project and the potential environmental effects to enable the responsible agencies to make a meaningful response. At a minimum, the information shall include:

(A) Description of the project,

(B) Location of the project indicated either on an attached map (preferably a copy of a U.S.G.S. 15' or 7½' topographical map identified by quadrangle name, or by a street address in an urbanized area), and

(C) Probable environmental effects of the project.

(2) A sample for a notice of preparation is shown in Appendix J. Public agencies are free to devise their own formats for this notice. A copy of the initial study may be sent with the notice to supply the necessary information.

(3) To send copies of the notice of preparation, the lead agency shall use either certified mail or any other method of transmittal which provides it with a record that the notice was received.

(4) The lead agency may begin work on the draft EIR immediately without awaiting responses to the notice of preparation. The draft EIR in preparation may need to be revised or expanded to conform to responses to the notice of preparation. A lead agency shall not circulate a draft EIR for public review before the time period for responses to the notice of preparation has expired.

(b) Response to Notice of Preparation. Within 45 days after receiving the notice of preparation under subsection (a), each responsible agency shall provide the lead agency with specific detail about the scope and content of the environmental information related to the responsible agency's area of statutory responsibility which must be included in the draft EIR.

(1) The response at a minimum shall identify:

(A) The significant environmental issues and reasonable alternatives and mitigation measures which the responsible agency will need to have explored in the draft EIR; and

(B) Whether the agency will be a responsible agency or trustee agency for the project.

(2) If a responsible agency fails by the end of the 45 day period to provide the lead agency with either a response to the notice or a well justified request for additional time, the lead agency may presume that the responsible agency has no response to make.

(3) A generalized list of concerns not related to the specific project shall not meet the requirements of this section for a response.

(c) Meetings. In order to expedite the consultation, the lead agency, a responsible agency, a trustee agency, or a project applicant may request one or more meetings between representatives of the agencies involved to assist the lead agency in determining the scope and content of the environmental information which the responsible agency may require. Such meetings shall be convened by the lead agency as soon as possible, but no later than 30 days, after the meetings were requested. On request, the Office of Planning and Research will assist in convening meetings which involve state agencies.

(d) State Clearinghouse. When one or more state agencies will be a responsible agency or a trustee agency, the lead agency shall send a notice of preparation to each state responsible agency and each trustee agency with a copy to the State Clearinghouse in the Office of Planning and Research. The State Clearinghouse will ensure that the state responsible agencies and trustees reply to the lead agency within the required time.

(e) Identification Number. When the notice of preparation is submitted to the State Clearinghouse, the state identification number issued by the Clearinghouse shall be the identification number for all subsequent environmental documents on the project. The identification number should be referenced on all subsequent correspondence regarding the project, specifically on the title page of the draft and final EIR and on the notice of determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

15083. Early Public Consultation.

Prior to completing the draft EIR, the lead agency may also consult directly with any person or organization it believes will be concerned with the environmental effects of the project. Many public agencies have found that early consultation solves many potential problems that would arise in more serious forms later in the review process. This early consultation may be called scoping. Scoping will be necessary when preparing an EIR/EIS jointly with a federal agency.

(a) Scoping has been helpful to agencies in identifying the range of actions, alternatives, mitigation measures, and significant effects to be analyzed in depth in an EIR and in eliminating from detailed study issues found not to be important.

(b) Scoping has been found to be an effective way to bring together and resolve the concerns of affected federal, state, and local agencies, the proponent of the action, and other interested persons including those who might not be in accord with the action on environmental grounds.

(c) Where scoping is used, it should be combined to the extent possible with consultation under Section 15082.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21082.1, Public Resources Code; Section 4, Chapter 480 of the Statutes of 1981; 40 Code of Federal Regulations, Part 1501.7.

15084. Preparing the Draft EIR.

(a) The draft EIR shall be prepared directly by or under contract to the lead agency. The required contents of a draft EIR are discussed in Article 9 beginning with Section 15120.

(b) The lead agency may require the project applicant to supply data and information both to determine whether the project may have a significant effect on the environment and to assist the lead agency in preparing the draft EIR. The requested information should include an identification of other public agencies which will have jurisdiction by law over the project.

(c) Any person, including the applicant, may submit information or comments to the lead agency to assist in the preparation of the draft EIR. The submittal may be presented in any format, including the form of a draft EIR. The lead agency must consider all information and comments received. The information or comments may be included in the draft EIR in whole or in part.

(d) The lead agency may choose one of the following arrangements or a combination of them for preparing a draft EIR.

(1) Preparing the draft EIR directly with its own staff.

(2) Contracting with another entity, public or private, to prepare the draft EIR.

(3) Accepting a draft prepared by the applicant, a consultant retained by the applicant, or any other person.

(4) Executing a third party contract or memorandum of understanding with the applicant to govern the preparation of a draft EIR by an independent contractor.

(5) Using a previously prepared EIR.

(e) Before using a draft prepared by another person, the lead agency shall subject the draft to the agency's own review and analysis. The draft EIR which is sent out for public review must reflect the independent judgment of the lead agency. The lead agency is responsible for the adequacy and objectivity of the draft EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21082.1, Public Resources Code.

15085. Notice of Completion.

(a) As soon as the draft EIR is completed, a notice of completion must be filed with the Secretary for Resources.

(b) The notice of completion shall include:

(1) A brief description of the project,

(2) The proposed location of the project,

(3) An address where copies of the draft EIR are available, and

(4) The period during which comments will be received on the draft EIR.

(c) A form for the notice of completion is included in the appendices.

(d) The notice of completion will provide the basis for information published by the Secretary for Resources in an EIR Monitor. Where the EIR will be reviewed through the state review process handled by the State Clearinghouse, the cover form required by the State Clearinghouse will serve as the notice of completion, and no notice of completion need be sent to the Resources Agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21161, Public Resources Code.

15086. Consultation Concerning Draft EIR.

(a) The lead agency shall consult with and request comments on the draft EIR from:

(1) Responsible agencies,

(2) Trustee agencies with resources affected by the project, and

(3) Other state, federal, and local agencies which exercise authority over resources which may be affected by the project.

(b) The lead agency may consult directly with any person who has special expertise with respect to any environmental impact involved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code.

15087. Public Review of Draft EIR.

(a) The lead agency shall provide public notice of the availability of a draft EIR at the same time as it sends a notice of completion to the Resources Agency. Notice shall be given to all organizations and individuals who have previously requested such notice and shall also be given by at least one of the following procedures:

(1) Publication at least one time by the public agency in a newspaper of general circulation in the area affected by the proposed project.

(2) Posting of notice by the public agency on and off the site in the area where the project is to be located.

(3) Direct mailing to owners of property contiguous to the parcel or parcels on which the project is located as those owners are shown on the latest equalized assessment roll.

(b) The alternatives for providing notice specified in subsection (a) shall not preclude a public agency from providing additional notice by other means if such agency so desires, nor shall the requirements of this section preclude a public agency from providing the public notice required by this section at the same time and in the same manner as public notice otherwise required by law for the project.

(c) In order to provide sufficient time for public review, review periods for draft EIRs should not be less than 30 days nor longer than 90 days from the date of the notice except in unusual situations. The review period for draft EIRs for which a state agency is the lead agency or a responsible agency shall be at least 45 days unless a shorter period is approved by the State Clearinghouse.

(d) Public agencies shall use the State Clearinghouse to distribute draft EIRs to state agencies for review and should use areawide clearinghouses to distribute the documents to regional and local agencies.

(e) To make copies of EIRs available to the public, lead agencies should furnish copies of draft EIRs to public library systems serving the area involved. Copies should also be available in offices of the lead agency.

(f) Public agencies should compile listings of other agencies, particularly local agencies, which have jurisdiction by law and/or special expertise with respect to various projects and project locations. Such listings should be a guide in determining which agencies should be consulted with regard to a particular project.

(g) Public hearings may be conducted on the environmental documents, either in separate proceedings or in conjunction with other proceedings of the public agency. Public hearings are encouraged, but not required as an element of the CEQA process.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21092, 21104 and 21153, Public Resources Code; and Section 6061, Government Code.

15088. Evaluation of and Response to Comments.

(a) The lead agency shall evaluate comments on environmental issues received from persons who reviewed the draft EIR and shall prepare a written response. The lead agency shall respond to comments received during the noticed comment period and any extensions and may respond to late comments.

(b) The written response shall describe the disposition of significant environmental issues raised (e.g., revisions to the proposed project to mitigate anticipated impacts or objections). In particular, the major environmental issues raised when the lead agency's position is at variance with recommendations and objections raised in the comments must be addressed in detail giving reasons why specific comments and suggestions were not accepted. There must be good faith, reasoned analysis in response. Conclusory statements unsupported by factual information will not suffice.

(c) The response to comments may take the form of a revision to the draft EIR or may be a separate section in the final EIR. Where the response to comments makes important changes in the information contained in the text of the draft EIR, the lead agency should either:

(1) Revise the text in the body of the EIR, or

(2) Include marginal notes showing that the information is revised in the response to comments.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code; *People* v. *County of Kern*, (1974) 39 Cal. App. 3d 830; *Cleary* v. *County of Stanislaus*, (1981) 118 Cal. App. 3d 348.

15089. Preparation of Final EIR.

(a) The lead agency shall prepare a final EIR before approving the project. The contents of a final EIR are specified in Section 15132 of these guidelines.

(b) Lead agencies may provide an opportunity for review of the final EIR by the public or by commenting agencies before approving the project. The review of a final EIR should focus on the responses to comments on the draft EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100, 21105 and 21151, Public Resources Code; *City of Carmel-by-the-Sea* v. *Board of Supervisors*, (1977) 71 Cal. App. 3d 84; State Administrative Manual, Section 1060.

15090. Certification of Final EIR.

The lead agency shall certify that:

(a) The final EIR has been completed in compliance with CEQA; and

(b) The final EIR was presented to the decisionmaking body of the lead agency and that the decisionmaking body reviewed and considered the information contained in the final EIR prior to approving the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21106 and 21152, Public Resources Code; *City of Carmel-by-the-Sea* v. *Board of Supervisors* (1977) 71 Cal. App. 3d 84; *Kleist* v. *City of Glendale* (1976) 56 Cal. App. 3d 770.

15091. Findings.

(a) No public agency shall approve or carry out a project for which an EIR has been completed which identifies one or more significant environmental effects of the project unless the public agency makes one or more written findings for each of those significant effects, accompanied by a brief explanation of the rationale for each finding. The possible findings are:

(1) Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.

(2) Such changes or alterations are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.

(3) Specific economic, social, or other considerations make infeasible the mitigation measures or project alternatives identified in the final EIR.

(b) The findings required by subsection (a) shall be supported by substantial evidence in the record.

(c) The finding in subsection (a) (2) shall not be made if the agency making the finding has concurrent jurisdiction with another agency to deal with identified feasible mitigation measures or alternatives.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1 and 21081, Public Resources Code; *Laurel Hills Homeowners Association* v. *City Council*, 83 Cal. App. 3d 515; *Cleary* v. *County of Stanislaus*, 118 Cal. App. 3d 348.

15092. Approval.

(a) After considering the final EIR and in conjunction with making findings under Section 15091, the lead agency may decide whether or how to approve or carry out the project.

(b) A public agency shall not decide to approve or carry out a project for which an EIR was prepared unless either:

(1) The project as approved will not have a significant effect on the environment, or

(2) The agency has:

(A) Eliminated or substantially lessened all significant effects on the environment where feasible as shown in findings under Section 15091, and

(B) Determined that any remaining significant effects on the environment found to be unavoidable under Section 15091 are acceptable due to overriding concerns as described in Section 15093.

(c) With respect to a project which includes housing development, the public agency shall not reduce the proposed number of housing units as a mitigation measure if it determines that there is another feasible specific mitigation measure available that will provide a comparable level of mitigation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1, 21081 and 21085, Public Resources Code; *Friends of Mammoth* v. *Board of Supervisors*, (1972) 8 Cal. App. 3d 247; *San Francisco Ecology Center* v. *City and County of San Francisco*, (1975) 48 Cal. App. 3d 584; *City of Carmel-by-the-Sea* v. *Board of Supervisors*, (1977) 71 Cal. App. 3d 84; *Laurel Hills Homeowners Association* v. *City Council*, (1978) 83 Cal. App. 3d 515.

15093. Statement of Overriding Considerations.

(a) CEQA requires the decisionmaker to balance the benefits of a proposed project against its unavoidable environmental risks in determining whether to approve the project. If the benefits of a proposal project outweigh the unavoidable adverse environmental effects, the adverse environmental effects may be considered "acceptable".

(b) Where the decision of the public agency allows the occurrence of significant effects which are identified in the final EIR but are not at least substantially mitigated, the agency shall state in writing the specific reasons to support its action based on the final EIR and/or other information in the record. This statement may be necessary if the agency also makes a finding under Section 15091 (a) (2) or (a) (3).

(c) If an agency makes a statement of overriding considerations, the statement should be included in the record of the project approval and should be mentioned in the notice of determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: *San Francisco Ecology Center* v. *City and County of San Francisco,* 48 Cal. App. 3d 584 (1975); *City of Carmel-by-the-Sea* v. *Board of Supervisors* 71 Cal. App. 3d 84 (1977).

15094. Notice of Determination.

(a) The lead agency shall file a notice of determination following each project approval for which an EIR was considered. The notice shall include:

(1) An identification of the project including its common name where possible and its location.

(2) A brief description of the project.

(3) The date when the agency approved the project.

(4) The determination of the agency whether the project in its approved form will have a significant effect on the environment.

(5) A statement that an EIR was prepared and certified pursuant to the provisions of CEQA.

(6) Whether mitigation measures were made a condition of the approval of the project.

(7) Whether findings were made pursuant to Section 15091.

(8) Whether a statement of overriding considerations was adopted for the project.

(9) The address where a copy of the final EIR and the record of project approval may be examined.

(b) If a state agency is the lead agency, the notice of determination shall be filed with the Secretary for Resources.

(c) If a local agency is the lead agency, the notice of determination shall be filed with the county clerk of the county or counties in which the project will be located. If the project requires discretionary approval from a state agency, the notice of determination shall also be filed with the Secretary for Resources.

(d) The filing of the notice of determination and the posting on a list of such notice starts a 30-day statute of limitations on court challenges to the approval under CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108, 21152 and 21167, Public Resources Code; *Citizens of Lake Murray Area Association* v. *City Council,* (1982) 129 Cal. App. 3d 436.

15095. Disposition of a Final EIR.

The lead agency shall:

(a) File a copy of the final EIR with the appropriate planning agency of any city, county, or city and county where significant effects on the environment may occur.

(b) Include the final EIR as part of the regular project report which is used in the existing project review and budgetary process if such a report is used.

(c) Retain one or more copies of the final EIR as public records for a reasonable period of time.

(d) Require the applicant to provide a copy of the certified, final EIR to each responsible agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21105, 21151 and 21165, Public Resources Code; *County of Inyo* v. *Yorty,* (1973) 32 Cal. App. 3d 795.

15096. Process for a Responsible Agency.

(a) General. A responsible agency complies with CEQA by considering the EIR or negative declaration prepared by the lead agency and by reaching its own conclusions on whether and how to approve the project involved. This section identifies the special duties a public agency will have when acting as a responsible agency.

(b) Response to Consultation. A responsible agency shall respond to consultation by the lead agency in order to assist the lead agency in preparing adequate environmental documents for the project. By this means, the responsible agency will ensure that the documents it will use will comply with CEQA.

(1) In response to consultation, a responsible agency shall explain its reasons for recommending whether the lead agency should prepare an EIR or negative declaration for a project. Where the responsible agency disagrees with the lead agency's proposal to prepare a negative declaration for a project, the responsible agency should identify the significant environmental effects which it believes could result from the project and recommend either that an EIR be prepared or that the project be modified to eliminate the significant effects.

(2) As soon as possible, but not longer than 45 days after receiving a notice of preparation from the lead agency, the responsible agency shall send a written reply by certified mail or any other method which provides the agency with a record showing that the notice was received. The reply shall specify the scope and content of the environmental information which would be germane to the responsible agency's statutory responsibilities in connection with the proposed project. The lead agency shall include this information in the EIR.

(c) Meetings. The responsible agency shall designate employees or representatives to attend meetings requested by the lead agency to discuss the scope and content of the EIR.

(d) Comments on Draft EIRs and Negative Declarations. A responsible agency should review and comment on draft EIRs and negative declarations for projects which the responsible agency would later be asked to approve. Comments should focus on any shortcomings in the EIR, the appropriateness of using a negative declaration, or on additional alternatives or mitigation measures which the EIR should include. The comments may deal with any aspect of the project or its environmental effects. Comments should be as specific as possible.

(e) Decision on Adequacy of EIR or Negative Declaration. If a responsible agency believes that the final EIR or negative declaration prepared by the lead agency is not adequate for use by the responsible agency, the responsible agency must either:

(1) Take the issue to court within 30 days after the lead agency files a notice of determination;

(2) Be deemed to have waived any objection to the adequacy of the EIR or negative declaration;

(3) Prepare a subsequent EIR if permissible under Section 15162; or

(4) Assume the lead agency role as provided in Section 15052(a)(3).

(f) Consider the EIR or Negative Declaration. Prior to reaching a decision on the project, the responsible agency must consider the environmental effects of the project as shown in the EIR or negative declaration. A subsequent or supplemental EIR can be prepared only as provided in Sections 15162 or 15163.

(g) Adoption of Alternatives or Mitigation Measures.

(1) When considering alternatives and mitigation measures, a responsible agency is more limited than a lead agency. A responsible agency has responsibility for mitigating or avoiding only the direct or indirect environmental effects of those parts of the project which it decides to carry out, finance, or approve.

(2) When an EIR has been prepared for a project, the Responsible Agency shall not approve the project as proposed if the agency finds any feasible alternative or feasible mitigation measures within its powers that would substantially lessen or avoid any significant effect the project would have on the environment. With respect to a project which includes housing development, the responsible agency shall not reduce the proposed number of housing units as a mitigation measure if it determines that there is another feasible specific mitigation measure available that will provide a comparable level of mitigation.

(h) Findings. The responsible agency shall make the findings required by Section 15091 for each significant effect of the project and shall make the findings in Section 15093 if necessary.

(i) Notice of Determination. The responsible agency should file a notice of determination in the same manner as a lead agency under Section 15075 or 15094 except that the responsible agency does not need to state that the EIR or negative declaration complies with CEQA. The responsible agency should state that it considered the EIR or negative declaration as prepared by a lead agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21165, 21080.1, 21080.3, 21080.4, 21082.1 and 21002.1(b) and (d), Public Resources Code.

Article 8. Time Limits

15100. General.

(a) Public agencies shall adopt time limits to govern their implementation of CEQA consistent with this article.

(b) Public agencies should carry out their responsibilities for preparing and reviewing EIRs within a reasonable period of time. The requirement for the preparation of an EIR should not cause undue delays in the processing of applications for permits or other entitlements to use.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. Renumbering and amendment of former Article 8 (Sections 15100–15129) to Article 19 (Sections 15300–15329) and new Article 8 (Sections 15100–15112) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Register 82, No. 2.
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15101. Review of Application for Completeness.

A lead agency or responsible agency shall determine whether an application for a permit or other entitlement for use is complete within 30 days from the receipt of the application except as provided in Section 15111. If no written determination of the completeness of the application is made within that period, the application will be deemed complete on the 30th day.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083, Public Resources Code; and Section 65943, Government Code.

15102. Initial Study.

The lead agency shall determine within 45 days after accepting an application as complete whether it intends to prepare an EIR or a negative declaration or use a previously prepared EIR or negative declaration except as provided in Section 15111.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.2, Public Resources Code.

15103. Response to Notice of Preparation.

Responsible agencies and trustee agencies shall provide a response to a notice of preparation to the lead agency within 45 days after receipt of the notice. If a responsible agency fails to reply within the 45 days with either a response or a well justified request for additional time, the lead agency may assume that the responsible agency has no response and may ignore a late response.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

15104. Convening of Meetings.

The lead agency shall convene a meeting with agency representatives to discuss the scope and content of the environmental information a responsible agency will need in the EIR as soon as possible but no later than 30 days after receiving a request for the meeting. The meeting may be requested by the lead agency, a responsible agency, a trustee agency, or by the project applicant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

15105. Public Review.

(a) The public review period for a draft EIR should not be less than 30 days nor longer than 90 days except in unusual circumstances.

(b) The public review period for a negative declaration shall be a reasonable period of time sufficient to allow members of the public to respond to the proposed finding before the negative declaration is approved.

(c) If a draft EIR or negative declaration has been submitted to the State Clearinghouse for review by state agencies, the public review period shall be at least as long as the review period established by the State Clearinghouse.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21092, Public Resources Code; *People* v. *County of Kern*, 39 Cal. App. 3d 830.

15106. Review by State Agencies.

When a draft EIR or negative declaration is submitted to the State Clearinghouse for review, the normal review period is 45 days for draft EIRs and 30 days for negative declarations. The State Clearinghouse may set shorter review periods when requested by the lead agency due to exceptional circumstances.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code.

15107. Completion of Negative Declaration.

With a private project, the negative declaration must be completed and ready for approval within 105 days from the date when the lead agency accepted the application as complete. The negative declaration may be approved at a later time when the permit or other entitlement is approved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code.

15108. Completion and Certification of EIR.

With a private project, the lead agency shall complete and certify the final EIR as provided in Section 15090 within one year after the date when the lead agency accepted the application as complete. Lead agency procedures may provide that the one-year time limit may be extended once for a period of not more than 90 days upon consent of the lead agency and the applicant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code; and Government Code Section 65950.

15109. Suspension of Time Periods.

An unreasonable delay by an applicant in meeting requests by the lead agency necessary for the preparation of a negative declaration or an EIR shall suspend the running of the time periods described in Sections 15107 and 15108 for the period of the unreasonable delay. Alternatively, an agency may disapprove a project application where there is unreasonable delay in meeting requests. The agency may allow a renewed application to start at the same point in the process where the application was when it was disapproved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code; *Carmel Valley View, Ltd.* v. *Maggini*, 91 Cal. App. 3d 318.

15110. Projects With Federal Involvement.

(a) At the request of an applicant, the lead agency may waive the one-year time limit for completing and certifying a final EIR or the 105-day period for completing a negative declaration if:

(1) The project will be subject to CEQA and to the National Environmental Policy Act,

(2) Additional time will be required to prepare a combined EIR-EIS or combined negative declaration-finding of no significant impact as provided in Section 15222, and

(3) The time required to prepare the combined document will be shorter than the time required to prepare the documents separately.

(b) The time limits for taking final action on a permit for a development project may also be waived where a combined EIR-EIS will be prepared.

(c) The time limits for processing permits for development projects under Government Code Sections 65950–65960 shall not apply if federal statutes or regulations require time schedules which exceed the state time limits. In this event, any state agencies involved shall make a final decision on the project within the federal time limits.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.6 and 21083.7, Public Resources Code; Sections 65951 and 65954, Government Code; Public Law 91-190 as amended, 42 U.S.C.A. 4321–4347.

15111. Projects With Short Time Periods for Approval.

(a) A few statutes or ordinances require agencies to make decisions on permits within time limits that are so short that review of the project under CEQA would be difficult. To enable the lead agency to comply with both the permit statute and CEQA, the lead agency shall deem an application for a project not received for filing under the permit statute or ordinance until such time as progress toward completing the environmental documentation required by CEQA is sufficient to enable the lead agency to finish the CEQA process within the short permit time limit. This section will apply where all of the following conditions are met:

(1) The enabling legislation for a program, other than Chapter 4.5 (commencing with Section 65920) of Division 1 of Title 7 of the Government Code, requires the lead agency to take action on an application within a specified period of time that is six months or less, and

(2) The enabling legislation provides that the project will become approved by operation of law if the lead agency fails to take any action within such specified time period, and

(3) The project involves the issuance of a lease, permit, license, certificate, or other entitlement for use.

(b) Examples of time periods subject to this section include but are not limited to:

(1) Action within 50 days on a tentative subdivision map for which an EIR is being or will be prepared pursuant to Article 2 (commencing with Section 66452) of Chapter 3, Division 2, Title 2 of the Government Code, but a negative declaration for a subdivision map must be completed within the 50 day period (see Government Code Section 66452.1(c)),

(2) Action on a timber harvesting plan by the Director of Forestry within 15 days pursuant to Section 4582.7 of the Public Resources Code,

(3) Action on a permit by the San Francisco Bay Conservation and Development Commission within 90 days pursuant to Section 66632(f) of the Government Code, and

(4) Action on an oil and gas permit by the Division of Oil and Gas within 10 days pursuant to Sections 3203 or 3724 of the Public Resources Code.

(c) In any case described in this section, the environmental document shall be completed or certified and the decision on the application shall be made within one year from the date on which an application requesting approval of such project has been received and accepted as complete for CEQA processing by such agency. This one-year time limit may be extended once for a period not to exceed 90 days upon consent of the public agency and the applicant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code; *N.R.D.C.* v. *Arcata National Corp.*, 59 Cal. App. 3d 959 (1976).

15112. Statutes of Limitations.

(a) CEQA provides unusually short statutes of limitations on filing court challenges to the approval of projects under the act.

(b) The statute of limitations periods are not public review periods or waiting periods for the person whose project has been approved. The project sponsor may proceed to carry out the project as soon as the necessary permits have been granted. The statute of limitations cuts off the right of another person to file a court action challenging approval of the project after the specified time period has expired.

(c) The statute of limitations periods under CEQA are as follows:

(1) Where the public agency filed a notice of determination in compliance with Sections 15075 or 15094, 30 days after the filing of the notice and the posting on a list of such notices.

(2) Where the public agency filed a notice of exemption in compliance with Section 15062, 35 days after the filing of the notice and the posting on a list of such notices.

(3) Where a certified state regulatory agency files a notice of decision in compliance with Public Resources Code Section 21080.5(d)(2)(v), 30 days after the filing of the notice.

(4) Where the Secretary for Resources certifies a state environmental regulatory agency under Public Resources Code Section 21080.5, the certification may be challenged only during the 30 days following the certification decision.

(5) Where none of the other statute of limitations periods in this section apply, 180 days after either:

(A) The public agency's decision to carry out or approve the project, or

(B) Commencement of the project if the project is undertaken without a formal decision by the public agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21167, 21167.3 and 21080.5, Public Resources Code; *Kriebel* v. *City Council*, 112 Cal. App. 3d 693; *Citizens of Lake Murray Area Association* v. *City Council*, (1982) 129 Cal. App. 3d 436.

Article 9. Contents of Environmental Impact Reports

15120. General.

(a) Environmental Impact Reports shall contain the information outlined in this article, but the format of the document may be varied. Each element must be covered, and when these elements are not separated into distinct sections, the document shall state where in the document each element is discussed.

(b) The EIR may be prepared as a separate document, as part of a general plan, or as part of a project report. If prepared as a part of the project report, it must still contain one separate and distinguishable section providing either analysis of all the subjects required in an EIR or as a minimum, a table showing where each of the subjects is discussed. When the lead agency is a state agency, the EIR shall be included as part of the regular project report if such a report is used in the agency's existing review and budgetary process.

(c) Draft EIRs shall contain the information required by Sections 15122 through 15131. Final EIRs shall contain the same information and the subjects described in Section 15132.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100 and 21105, Public Resources Code.

HISTORY:

1. Repealer of Article 9 (Sections 15140–15151) and new Article 9 (Sections 15120–15132) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 82, No. 2; 80, No. 19; 78, No. 5; 77, No. 1; 76, No. 41; 75, Nos. 1 and 18; and 73, No. 50.

2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15121. Informational Document.

(a) An EIR is an informational document which will inform public agency decisionmakers and the public generally of the significant environmental effect of a project, identify possible ways to minimize the significant effects, and describe reasonable alternatives to the project. The public agency shall consider the information in the EIR along with other information which may be presented to the agency.

(b) While the information in the EIR does not control the agency's ultimate discretion on the project, the agency must respond to each significant effect identified in the EIR by making findings under Section 15091 and if necessary by making a statement of overriding considerations under Section 15093.

(c) The information in an EIR may constitute substantial evidence in the record to support the agency's action on the project if its decision is later challenged in court.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21061, Public Resources Code; *Carmel Valley View, Ltd.* v. *Board of Supervisors*, (1976) 58 Cal. App. 3d 817.

15122. Table of Contents or Index.

An EIR shall contain at least a table of contents or an index to assist readers in finding the analysis of different subjects and issues.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21061, Public Resources Code.

15123. Summary.

(a) An EIR shall contain a brief summary of the proposed actions and its consequences. The language of the summary should be as clear and simple as reasonably practical.

(b) The summary shall identify:

(1) Each significant effect with proposed mitigation measures and alternatives that would reduce or avoid that effect;

(2) Areas of controversy known to the lead agency including issues raised by agencies and the public; and

(3) Issues to be resolved including the choice among alternatives and whether or how to mitigate the significant effects.

(c) The summary should normally not exceed 15 pages.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21061, Public Resources Code.

15124. Project Description.

The description of the project shall contain the following information but should not supply extensive detail beyond that needed for evaluation and review of the environmental impact.

(a) The precise location and boundaries of the proposed project shall be shown on a detailed map, preferably topographic. The location of the project shall also appear on a regional map.

(b) A statement of the objectives sought by the proposed project.

(c) A general description of the project's technical, economic, and environmental characteristics, considering the principal engineering proposals if any and supporting public service facilities.

(d) A statement briefly describing the intended uses of the EIR.

(1) This statement shall include, to the extent that the information is known to the lead agency,

(A) A list of the agencies that are expected to use the EIR in their decision-making, and

(B) A list of the approvals for which the EIR will be used.

(2) If a public agency must make more than one decision on a project, all its decisions subject to CEQA should be listed, preferably in the order in which they will occur. On request, the Office of Planning and Research will provide assistance in identifying state permits for a project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.3, 21080.4, 21165, 21166 and 21167.2, Public Resources Code; *County of Inyo* v. *City of Los Angeles*, 71 Cal. App. 3d 185 (1977).

15125. Environmental Setting.

An EIR must include a description of the environment in the vicinity of the project, as it exists before the commencement of the project, from both a local and regional perspective. The description shall be no longer than is necessary to an understanding of the significant effects of the proposed project and its alternatives.

(a) Knowledge of the regional setting is critical to the assessment of environmental impacts. Special emphasis should be placed on environmental resources that are rare or unique to that region and would be affected by the project.

(b) The EIR shall discuss any inconsistencies between the proposed project and applicable general plans and regional plans. Such regional plans include, but are not limited to, the applicable Air Quality Management Plan (or State Implementation Plan once adopted), area-wide waste treatment and water quality control plans, regional transportation plans, regional housing allocation plans, and regional land use plans for the protection of the coastal zone, Lake Tahoe Basin, San Francisco Bay, and Santa Monica Mountains.

(c) Where a proposed project is compared with an adopted plan, the analysis shall examine the existing physical conditions as well as the potential future conditions discussed in the plan.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061 and 21100, Public Resources Code; *E.P.I.C.* v. *County of El Dorado*, (1982) 131 Cal. App. 3d 350.

15126. Environmental Impact.

All phases of a project must be considered when evaluating its impact on the environment: planning, acquisition, development, and operation. The following subjects shall be discussed, preferably in separate sections or paragraphs. If they are not discussed separately, the EIR shall include a table showing where each of the subjects is discussed.

(A) The Significant Environmental Effects of the Proposed Project. An EIR shall identify and focus on the significant environmental effects of the proposed project. Direct and indirect significant effects of the project on the environment shall be clearly identified and described, giving due consideration to both the short-term and long-term effects. The discussion should include relevant specifics of the area, the resources involved, physical changes, alterations to ecological systems, and changes induced in population distribution, population concentration, the human use of the land (including commercial and residential development), health and safety problems caused by the physical changes, and other aspects of the resource base such as water, scenic quality, and public services. The EIR shall also analyze any significant environmental effects the project might cause by bringing development and people into the area affected. For example, an EIR on a subdivision astride an active fault line should identify as a significant effect the seismic hazard to future occupants of the subdivision. The subdivision would have the effect of attracting people to the location and exposing them to the hazards found there.

(b) Any Significant Environmental Effects Which Cannot be Avoided if the Proposal is Implemented. Describe any significant impacts, including those which can be mitigated but not reduced to a level of insignificance. Where there are impacts that cannot be alleviated without imposing an alternative design, their implications and the reasons why the project is being proposed, notwithstanding their effect, should be described.

(c) Mitigation Measures Proposed to Minimize the Significant Effects. Describe measures which could minimize significant adverse impacts, including where relevant, inefficient and unnecessary consumption of energy. The discussion of mitigation measures shall distinguish between the measures which are proposed by project proponents to be included in the project and other measures that are not included but could reasonably be expected to reduce adverse impacts if required as conditions of approving the project. This discussion shall identify mitigation measures for each significant environmental effect identified in the EIR. Where several measures are available to mitigate an impact, each should be discussed and the basis for selecting a particular measure should be identified if one has been selected. Energy conservation measures, as well as other appropriate mitigation measures, shall be discussed when relevant. Examples of energy conservation measures are provided in Appendix F. If a mitigation measure would cause one or more significant effects in addition to those that would be caused by the project as proposed, the effects of the mitigation measure shall be discussed but in less detail than the significant effects of the project as proposed. (*Stevens* v. *City of Glendale,* 125 Cal. App. 3d 986).

(d) Alternatives to the Proposed Action. Describe a range of reasonable alternatives to the project, or to the location of the project, which could feasibly attain the basic objectives of the project and evaluate the comparative merits of the alternatives.

(1) If there is a specific proposed project or a preferred alternative, explain why the other alternatives were rejected in favor of the proposal if they were considered in developing the proposal.

(2) The specific alternative of "no project" shall also be evaluated along with the impact. If the environmentally superior alternative is the "no project" alternative, the EIR shall also identify an environmentally superior alternative among the other alternatives.

(3) The discussion of alternatives shall focus on alternatives capable of eliminating any significant adverse environmental effects or reducing them to a level of insignificance, even if these alternatives would impede to some degree the attainment of the project objectives, or would be more costly.

(4) If an alternative would cause one or more significant effects in addition to those that would be caused by the project as proposed, the significant effects of the alternative shall be discussed but in less detail than the significant effects of the project as proposed. (*County of Inyo* v. *City of Los Angeles,* 124 Cal. App. 3d 1).

(5) The range of alternatives required in an EIR is governed by "rule of reason" that requires the EIR to set forth only those alternatives necessary to permit a reasoned choice. The key issue is whether the selection and discussion of alternatives fosters informed decisionmaking and informed public participation. An EIR need not consider an alternative whose effect cannot be reasonably ascertained and whose implementation is remote and speculative. (*Residents Ad Hoc Stadium Committee* v. *Board of Trustees* (1979) 89 Cal. App. 3d 274).

(e) The Relationship Between Local Short-Term Uses of Man's Environment and the Maintenance and Enhancement of Long-Term Productivity. Describe the cumulative and long-term effects of the proposed project which adversely affect the state of the environment. Special attention should be given to impacts which narrow the range of beneficial uses of the environment or pose long-term risks to health or safety. In addition, the reasons why the proposed project is believed by the sponsor to be justified now, rather than reserving an option for further alternatives, should be explained.

(f) Any Significant Irreversible Environmental Changes Which Would Be Involved in the Proposed Action Should It Be Implemented. Uses of nonrenewable resources during the initial and continued phases of the project may be irreversible since a large commitment of such resources makes removal or nonuse thereafter unlikely. Primary impacts and, particularly, secondary impacts (such as highway improvement which provides access to a previously inaccessible area) generally commit future generations to similar uses. Also irreversible damage can result from environmental accidents associated with the project. Irretrievable commitments of resources should be evaluated to assure that such current consumption is justified.

(g) The Growth-Inducing Impact of the Proposed Action. Discuss the ways in which the proposed project could foster economic or population growth, or the construction of additional housing, either directly or indirectly, in the surrounding environment. Included in this are projects which would remove obstacles to population growth (a major expansion of a waste water treatment plant might, for example, allow for more construction in service areas). Increases in the population may further tax existing community service facilities so consideration must be given to this impact. Also discuss the characteristic of some projects which may encourage and facilitate other activities that could significantly affect the environment, either individually or cumulatively. It must not be assumed that growth in any area is necessarily beneficial, detrimental, or of little significance to the environment.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code. Formerly Section 15143.

15127. Limitations on Discussion of Environmental Impact.

The information required by Section 15126(e) concerning short-term uses versus long-term productivity, and (f) concerning irreversible changes, need be included only in EIRs prepared in connection with any of the following activities:

(a) The adoption, amendment, or enactment of a plan, policy, or ordinance of a public agency;

(b) The adoption by a local agency formation commission of a resolution making determinations; or

(c) A project which will be subject to the requirement for preparing an environmental impact statement pursuant to the requirements of the National Environmental Policy Act of 1969.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100.1, Public Resources Code; 42 U.S.C. 4321–4347.

15128. Effects Not Found to be Significant.

An EIR shall contain a statement briefly indicating the reasons that various possible significant effects of a project were determined not to be significant and were therefore not discussed in detail in the EIR. Such a statement may be contained in an attached copy of an initial study.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code.

15129. Organizations and Persons Consulted.

The EIR shall identify all federal, state, or local agencies, other organizations, and private individuals consulted in preparing the draft EIR, and the persons, firm, or agency preparing the draft EIR, by contract or other authorization.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code.

15130. Cumulative Impacts.

(a) Cumulative impacts shall be discussed when they are significant.

(b) The discussion of cumulative impacts shall reflect the severity of the impacts and their likelihood of occurrence, but the discussion need not provide as great detail as is provided of the effects attributable to the project alone. The discussion should be guided by the standards of practicality and reasonableness. The following elements are necessary to an adequate discussion of cumulative impacts:

(1) Either:

(A) A list of past, present, and reasonably anticipated future projects producing related or cumulative impacts, including those projects outside the control of the agency, or

(B) A summary of projections contained in an adopted general plan or related planning document which is designed to evaluate regional or areawide conditions. Any such planning document shall be referenced and made available to the public at a location specified by the lead agency;

(2) A summary of the expected environmental effects to be produced by those projects with specific reference to additional information stating where that information is available, and

(3) A reasonable analysis of the cumulative impacts of the relevant projects. An EIR shall examine reasonable options for mitigating or avoiding any significant cumulative effects of a proposed project.

(c) With some projects, the only feasible mitigation for cumulative impacts may involve the adoption of ordinances or regulations rather than the imposition of conditions on a project-by-project basis.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083(b), Public Resources Code; *Whitman* v. *Board of Supervisors*, 88 Cal. App. 3d 397.

15131. Economic and Social Effects.

Economic or social information may be included in an EIR or may be presented in whatever form the agency desires.

(a) Economic or social effects of a project shall not be treated as significant effects on the environment. An EIR may trace a chain of cause and effect from a proposed decision on a project through anticipated economic or social changes resulting from the project to physical changes caused in turn by the economic or social changes. The intermediate economic or social changes need not be analyzed in any detail greater than necessary to trace the chain of cause and effect. The focus of the analysis shall be on the physical changes.

(b) Economic or social effects of a project may be used to determine the significance of physical changes caused by the project. For example, if the construction of a new freeway or rail line divides an existing community, the construction would be the physical change, but the social effect on the community would be the basis for determining that the effect would be significant. As an additional example, if the construction of a road and the resulting increase in noise in an area disturbed existing religious practices in the area, the disturbance of the religious practices could be used to determine that the construction and use of the road and the resulting noise would be significant effects on the environment. The religious practices would need to be analyzed only to the extent to show that the increase in traffic and noise would conflict with the religious practices. Where an EIR uses economic or social effects to determine that a physical change is significant, the EIR shall explain the reason for determining that the effect is significant.

(c) Economic, social, and particularly housing factors shall be considered by public agencies together with technological and environmental factors in deciding whether changes in a project are feasible to reduce or avoid the significant effects on the environment identified in the EIR. If information on these factors is not contained in the EIR, the information must be added to the record in some other manner to allow the agency to consider the factors in reaching a decision on the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21001(e) and (g), 21002, 21002.1, 21060.5, 21080.1, 21083(c) and 21100, Public Resources Code.

15132. Contents of Final Environmental Impact Report.

The final EIR shall consist of:

(a) The Draft EIR or a revision of the draft.

(b) Comments and recommendations received on the Draft EIR either verbatim or in summary.

(c) A list of persons, organizations, and public agencies commenting on the Draft EIR.

(d) The responses of the Lead Agency to significant environmental points raised in the review and consultation process.

(e) Any other information added by the lead agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code.

Article 10. Considerations in Preparing EIRs and Negative Declarations

15140. Writing.

EIRs shall be written in plain language and may use appropriate graphics so that decisionmakers and the public can rapidly understand the documents.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003 and 21100, Public Resources Code.

HISTORY:

1. Repealer of Article 10 (Sections 15160–15167) and new Article 10 (Sections 15140–15153) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 80, No. 19; 78, No. 5; 76, No. 41; 75, No. 1; and 73, No. 50.
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15141. Page Limits.

The text of draft EIRs should normally be less than 150 pages and for proposals of unusual scope or complexity should normally be less than 300 pages.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code.

15142. Interdisciplinary Approach.

An EIR shall be prepared using an interdisciplinary approach which will ensure the integrated use of the natural and social sciences and the consideration of qualitative as well as quantitative factors. The interdisciplinary analysis shall be conducted by competent individuals, but no single discipline shall be designated or required to undertake this evaluation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000, 21001 and 21100, Public Resources Code.

15143. Emphasis.

The EIR shall focus on the significant effects on the environment. The significant effects should be discussed with emphasis in proportion to their severity and probability of occurrence. Effects dismissed in an Initial Study as clearly insignificant and unlikely to occur need not be discussed further in the EIR unless the Lead Agency subsequently receives information inconsistent with the finding in the Initial Study. A copy of the Initial Study may be attached to the EIR to provide the basis for limiting the impacts discussed.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

15144. Forecasting.

Drafting an EIR or preparing a negative declaration necessarily involves some degree of forecasting. While foreseeing the unforeseeable is not possible, an agency must use its best efforts to find out and disclose all that it reasonably can.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

15145. Speculation.

If, after thorough investigation, a lead agency finds that a particular impact is too speculative for evaluation, the agency should note its conclusion and terminate discussion of the impact.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code; *Topanga Beach Renters Association* v. *Department of General Services* (1976) 58 Cal. App. 3d 712.

15146. Degree of Specificity.

The degree of specificity required in an EIR will correspond to the degree of specificity involved in the underlying activity which is described in the EIR.

(a) An EIR on a construction project will necessarily be more detailed in the specific effects of the project than will be an EIR on the adoption of a local general plan or comprehensive zoning ordinance because the effects of the construction can be predicted with greater accuracy.

(b) An EIR on a project such as the adoption or amendment of a comprehensive zoning ordinance or a local general plan should focus on the secondary effects that can be expected to follow from the adoption, or amendment, but the EIR need not be as detailed as an EIR on the specific construction projects that might follow.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

15147. Technical Detail.

The information contained in an EIR shall include summarized technical data, maps, plot plans, diagrams, and similar relevant information sufficient to permit full assessment of significant environmental impacts by reviewing agencies and members of the public. Placement of highly technical and specialized analysis and data in the body of an EIR should be avoided through inclusion of supporting information and analyses as appendices to the main body of the EIR. Appendices to the EIR may be prepared in volumes separate from the basic EIR document, but shall be readily available for public examination and shall be submitted to all clearinghouses which assist in public review.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

15148. Citation.

Preparation of EIRs is dependent upon information from many sources, including engineering project reports and many scientific documents relating to environmental features. These documents should be cited but not included in the EIR. The EIR shall cite all documents used in its preparation including, where possible, the page and section number of any technical reports which were used as the basis for any statements in the EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

15149. Use of Registered Professionals in Preparing EIRs.

(a) A number of statutes provide that certain professional services can be provided to the public only by individuals who have been registered by a registration board established under California law. Such statutory restrictions apply to a number of professions including but not limited to engineering, land surveying, forestry, geology, and geophysics.

(b) In its intended usage, an EIR is not a technical document that can be prepared only by a registered professional. The EIR serves as a public disclosure document explaining the effects of the proposed project on the environment, alternatives to the project, and ways to minimize adverse effects and to increase beneficial effects. As a result of information in the EIR, the lead agency should establish requirements or conditions on project design, construction, or operation in order to protect or enhance the environment. State statutes may provide that only registered professionals can prepare technical studies which will be used in or which will control the detailed design, construction, or operation of the proposed project and which will be prepared in support of an EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

15150. Incorporation by Reference.

(a) An EIR or negative declaration may incorporate by reference all or portions of another document which is a matter of public record or is generally available to the public. Where all or part of another document is incorporated by reference, the incorporated language shall be considered to be set forth in full as part of the text of the EIR or negative declaration.

(b) Where part of another document is incorporated by reference, such other document shall be made available to the public for inspection at a public place or public building. The EIR or negative declaration shall state where the incorporated documents will be available for inspection. At a minimum, the incorporated document shall be made available to the public in an office of the lead agency in the county where the project would be carried out or in one or more public buildings such as county offices or public libraries if the lead agency does not have an office in the county.

(c) Where an EIR or negative declaration uses incorporation by reference, the incorporated part of the referenced document shall be briefly summarized where possible or briefly described if the data or information cannot be summarized. The relationship between the incorporated part of the referenced document and the EIR shall be described.

(d) Where an agency incorporates information from an EIR that has previously been reviewed through the state review system, the state identification number of the incorporated document should be included in the summary or designation described in Subsection (c).

(e) Examples of materials that may be incorporated by reference include but are not limited to:

(1) A description of the environmental setting from another EIR.

(2) A description of the air pollution problems prepared by an air pollution control agency concerning a process involved in the project.

(3) A description of the city or county general plan that applies to the location of the project.

(f) Incorporation by reference is most appropriate for including long, descriptive, or technical materials that provide general background but do not contribute directly to the analysis of the problem at hand.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

15151. Standards for Adequacy of an EIR.

An EIR should be prepared with a sufficient degree of analysis to provide decisionmakers with information which enables them to make a decision which intelligently takes account of environmental consequences. An evaluation of the environmental effects of a proposed project need not be exhaustive, but the sufficiency of an EIR is to be reviewed in the light of what is reasonably feasible. Disagreement among experts does not make an EIR inadequate, but the EIR should summarize the main points of disagreement among the experts. The courts have looked not for perfection but for adequacy, completeness, and a good faith effort at full disclosure.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061 and 21100, Public Resources Code; *San Francisco Ecology Center* v. *City and County of San Francisco*, 48 Cal. App. 3d 584 (1975).

15152. Tiering.

(a) Agencies are encouraged to tier EIRs which they prepare for separate but related projects including general plans, zoning changes, and development projects. This approach can eliminate repetitive discussions of the same issues and focus the EIR on the actual issues ripe for decision at each level of environmental review.

(b) Where an EIR has been prepared for a program, plan, policy, or ordinance consistent with the requirements of this section, any lead agency for a later project pursuant to or consistent with the program, plan, policy, or ordinance should limit the EIR on the project to effects which:

(1) Were not examined as significant effects on the environment in the prior EIR; or

(2) Are susceptible to substantial reduction or avoidance by the choice of specific revisions in the project, by the imposition of conditions, or other means.

(c) Tiering under this section shall be limited to situations where the project is consistent with the general plan and zoning of the city or county in which the project would be located.

(d) The initial study shall be used to decide whether and to what extent the prior EIR is still sufficient for the present project.

(e) When tiering is used, the later EIRs or negative declarations shall refer to the prior EIR and state where a copy of the prior EIR may be examined. The later EIR should state that the lead agency is using the tiering concept and that the EIR is being tiered with the earlier EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061, 21100 and 21151, Public Resources Code.

15153. Use of an EIR From an Earlier Project.

(a) The lead agency may employ a single EIR to describe more than one project, if such projects are essentially the same in terms of environmental impact. Further, the lead agency may use an earlier EIR prepared in connection with an earlier project to apply to a later project, if the circumstances of the projects are essentially the same.

(b) When a lead agency proposes to use an EIR from an earlier project as the EIR for a separate, later project, the lead agency shall use the following procedures:

(1) The lead agency shall review the proposed project with an initial study, using incorporation by reference if necessary, to determine whether the EIR would adequately describe:

(A) The general environmental setting of the project,

(B) The significant environmental impacts of the project, and

(C) Alternatives and mitigation measures related to each significant effect.

(2) If the lead agency believes that the EIR would meet the requirements of Subsection (1), it shall provide public review as provided in Section 15087 stating that it plans to use the previously prepared EIR as the draft EIR for this project. The notice shall include as a minimum:

(A) An identification of the project with a brief description;

(B) A statement that the agency plans to use a certain EIR prepared for a previous project as the EIR for this project;

(C) A listing of places where copies of the EIR may be examined; and

(D) A statement that the key issues involving the EIR are whether the EIR should be used for this project and whether there are any additional, reasonable alternatives or mitigation measures that should be considered as ways of avoiding or reducing the significant effects of the project.

(3) The lead agency shall prepare responses to comments received during the review period.

(4) Before approving the project, th[1397]sionmaker in the lead agency shall:

(A) Consider the information in the EIR including comments received during the review period and responses to those comments,

(B) Decide either on its own or on a staff recommendation whether the EIR is adequate for the project at hand, and

(C) Make or require certification to be made as described in Section 15090.

(D) Make findings as provided in Sections 15091 and 15093 as necessary.

(5) After making a decision on the project, the lead agency shall file a notice of determination.

(c) An EIR prepared for an earlier project may also be used as part of an initial study to document a finding that a later project will not have a significant effect. In this situation a negative declaration will be prepared.

(d) An EIR prepared for an earlier project shall not be used as the EIR for a later project if any of the conditions described in Section 15162 would require preparation of a subsequent or supplemental EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100, 21151 and 21166, Public Resources Code.

Article 11. Types of EIRs

15160. General.

This article describes a number of examples of variations in EIRs as the documents are tailored to different situations and intended uses. These variations are not exclusive. Lead agencies may use other variations consistent with the guidelines to meet the needs of other circumstances. All EIRs must meet the content requirements discussed in Article 9 beginning with Section 15120.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061, 21100 and 21151, Public Resources Code.

HISTORY:

1. New Article 11 (Section 15180) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Repealer of Article 11 (Section 15180) and new Article 11 (Sections 15160–15170) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).
3. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15161. Project EIR.

The most common type of EIR examines the environmental impacts of a specific development project. This type of EIR should focus primarily on the changes in the environment that would result from the development project. The EIR shall examine all phases of the project including planning, construction, and operation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061, 21100 and 21151, Public Resources Code.

15162. Subsequent EIR.

(a) Where an EIR or negative declaration has been prepared, no additional EIR need be prepared unless:

(1) Subsequent changes are proposed in the project which will require important revisions of the previous EIR or negative declaration due to the involvement of new significant environmental impacts not considered in a previous EIR or negative declaration on the project;

(2) Substantial changes occur with respect to the circumstances under which the project is undertaken, such as a substantial deterioration in the air quality where the project will be located, which will require important revisions in the previous EIR or negative declaration due to the involvement of new significant environmental impacts not covered in a previous EIR or negative declaration; or

(3) New information of substantial importance to the project becomes available, and

(A) The information was not known and could not have been known at the time the previous EIR was certified as complete or the negative declaration was adopted, and

(B) The new information shows any of the following:

1. The project will have one or more significant effects not discussed previously in the EIR;

2. Significant effects previously examined will be substantially more severe than shown in the EIR;

3. Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project; or

4. Mitigation measures or alternatives which were not previously considered in the EIR would substantially lessen one or more significant effects on the environment.

(b) If the EIR or negative declaration has been completed but the project has not yet been approved, the lead agency shall prepare or cause to be prepared the subsequent EIR before approving the project.

(c) If the project was approved prior to the occurrence of the conditions described in Subsection (a), the subsequent EIR shall be prepared by the public agency which grants the next discretionary approval for the project. In this situation no other responsible agency shall grant an approval for the project until the subsequent EIR has been completed.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21166, Public Resources Code.

15163. Supplement to an EIR.

(a) The lead or responsible agency may choose to prepare a supplement to an EIR rather than a subsequent EIR if:

(1) Any of the conditions described in Section 15162 would require the preparation of a subsequent EIR, and

(2) Only minor additions or changes would be necessary to make the previous EIR adequately apply to the project in the changed situation.

(b) The supplement to the EIR need contain only the information necessary to make the previous EIR adequate for the project as revised.

(c) A supplement to an EIR shall be given the same kind of notice and public review as is given to a draft EIR under Section 15087.

(d) A supplement to an EIR may be circulated by itself without recirculating the previous draft or final EIR.

(e) When the agency decides whether to approve the project, the decision-making body shall consider the previous EIR as revised by the supplemental EIR. A finding under Section 15091 shall be made for each significant effect shown in the previous EIR as revised.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21166, Public Resources Code.

15164. Addendum to an EIR.

(a) The lead agency or a responsible agency shall prepare an addendum to an EIR if:

(1) None of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred;

(2) Only minor technical changes or additions are necessary to make the EIR under consideration adequate under CEQA; and

(3) The changes to the EIR made by the addendum do not raise important new issues about the significant effects on the environment.

(b) An addendum need not be circulated for public review but can be included in or attached to the final EIR.

(c) The decisionmaking body shall consider the addendum with the final EIR prior to making a decision on the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21166, Public Resources Code.

15165. Multiple and Phased Projects.

Where individual projects are, or a phased project is, to be undertaken and where the total undertaking comprises a project with significant environmental effect, the lead agency shall prepare a single program EIR for the ultimate project as described in Section 15168. Where an individual project is a necessary precedent for action on a larger project, or commits the lead agency to a larger project, with significant environmental effect, an EIR must address itself to the scope of the larger project. Where one project is one of several similar projects of a public agency, but is not deemed a part of a larger undertaking or a larger project, the agency may prepare one EIR for all projects, or one for each project, but shall in either case comment upon the cumulative effect.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061, 21100 and 21151, Public Resources Code; *Whitman* v. *Board of Supervisors*, 88 Cal. App. 3d 397 (1979).

15166. EIR as Part of a General Plan.

(a) The requirements for preparing an EIR on a local general plan, element, or amendment thereof will be satisfied by using the general plan, or element document, as the EIR and no separate EIR will be required, if:

(1) the general plan addresses all the points required to be in an EIR by Article 9 of these guidelines and

(2) the document contains a special section or a cover sheet identifying where the general plan document addresses each of the points required.

(b) Where an EIR rather than a negative declaration has been prepared for a general plan, element, or amendment thereto, the EIR shall be forwarded to the State Clearinghouse for review. The requirement shall apply regardless of whether the EIR is prepared as a separate document or as a part of the general plan or element document.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061, 21083, 21100, 21104, 21151 and 21152, Public Resources Code.

15167. Staged EIR.

(a) Where a large capital project will require a number of discretionary approvals from government agencies and one of the approvals will occur more than two years before construction will begin, a staged EIR may be prepared covering the entire project in a general form. The staged EIR shall evaluate the proposal in light of current and contemplated plans and produce an informed estimate of the environmental consequences of the entire project. The aspect of the project before the public agency for approval shall be discussed with a greater degree of specificity.

(b) When a staged EIR has been prepared, a supplement to the EIR shall be prepared when a later approval is required for the project, and the information available at the time of the later approval would permit consideration of additional environmental impacts, mitigation measures, or reasonable alternatives to the project.

(c) Where a statute such as the Warren-Alquist Energy Resources Conservation and Development Act provides that a specific agency shall be the lead agency for a project and requires the lead agency to prepare an EIR, a responsible agency which must grant an approval for the project before the lead agency has completed the EIR may prepare and consider a staged EIR.

(d) An agency requested to prepare a staged EIR may decline to act as the lead agency if it determines, among other factors, that:

(1) Another agency would be the appropriate lead agency; and

(2) There is no compelling need to prepare a staged EIR and grant an approval for the project before the appropriate lead agency will take its action on the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21003, Public Resources Code.

15168. Program EIR.

(a) General. A program EIR is an EIR which may be prepared on a series of actions that can be characterized as one large project and are related either:

(1) Geographically,

(2) As logical parts in the chain of contemplated actions,

(3) In connection with issuance of rules, regulations, plans, or other general criteria to govern the conduct of a continuing program, or

(4) As individual activities carried out under the same authorizing statutory or regulatory authority and having generally similar environmental effects which can be mitigated in similar ways.

(b) Advantages. Use of a program EIR can provide the following advantages. The program EIR can:

(1) Provide an occasion for a more exhaustive consideration of effects and alternatives than would be practical in an EIR on an individual action,

(2) Ensure consideration of cumulative impacts that might be slighted in a case-by-case analysis,

(3) Avoid duplicative reconsideration of basic policy considerations,

(4) Allow the lead agency to consider broad policy alternatives and program-wide mitigation measures at an early time when the agency has greater flexibility to deal with basic problems or cumulative impacts,

(5) Allow reduction in paperwork.

(c) Use With Later Activities. Subsequent activities in the program must be examined in the light of the program EIR to determine whether an additional environmental document must be prepared.

(1) If a later activity would have effects that were not examined in the program EIR, a new initial study would need to be prepared leading to either an EIR or a negative declaration.

(2) If the agency finds that pursuant to Section 15162, no new effects could occur or no new mitigation measures would be required, the agency can approve the activity as being within the scope of the project covered by the program EIR, and no new environmental document would be required.

(3) An agency shall incorporate feasible mitigation measures and alternatives developed in the program EIR into subsequent actions in the program.

(4) Where the subsequent activities involve site specific operations, the agency should use a written checklist or similar device to document the evaluation of the site and the activity to determine whether the environmental effects of the operation were covered in the program EIR.

(5) A program EIR will be most helpful in dealing with subsequent activities if it deals with the effects of the program as specifically and comprehensively as possible. With a good and detailed analysis of the program, many subsequent activities could be found to be within the scope of the project described in the program EIR, and no further environmental documents would be required.

(d) Use With Subsequent EIRS and Negative Declarations. A program EIR can be used to simplify the task of preparing environmental documents on later parts of the program. The program EIR can:

(1) Provide the basis in an initial study for determining whether the later activity may have any significant effects.

(2) Be incorporated by reference to deal with regional influences, secondary effects, cumulative impacts, broad alternatives, and other factors that apply to the program as a whole.

(3) Focus an EIR on a subsequent project to permit discussion solely of new effects which had not been considered before.

(e) Notice With Later Activities. When a law other than CEQA requires public notice when the agency later proposes to carry out or approve an activity within the program and to rely on the program EIR for CEQA compliance, the notice for the activity shall include a statement that:

(1) This activity is within the scope of the program approved earlier, and

(2) The program EIR adequately describes the activity for the purposes of CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21003, Public Resources Code; *County of Inyo v. Yorty*, 32 Cal. App. 3d 795 (1973).

15169. Master Environmental Assessment.

(a) General. A public agency may prepare a master environmental assessment, inventory, or data base for all, or a portion of, the territory subject to its control in order to provide information which may be used or referenced in EIRs or negative declarations. Neither the content, the format, nor the procedures to be used to develop a master environmental assessment are prescribed by these guidelines. The descriptions contained in this section are advisory. A master environmental assessment is suggested solely as an approach to identify and organize environmental information for a region or area of the state.

(b) Contents. A master environmental assessment may contain an inventory of the physical and biological characteristics of the area for which it is prepared and may contain such additional data and information as the public agency determines is useful or necessary to describe environmental characteristics of the area. It may include identification of existing levels of quality and supply of air and water, capacities and levels of use of existing services and facilities, and generalized incremental effects of different categories of development projects by type, scale, and location.

(c) Preparation.

(1) A master environmental assessment or inventory may be prepared in many possible ways. For example, a master environmental assessment may be prepared as a special, comprehensive study of the area involved, as part of the EIR on a general plan, or as a data base accumulated by indexing EIRs prepared for individual projects or programs in the area involved.

(2) The information contained in a master environmental assessment should be reviewed periodically and revised as needed so that it is accurate and current.

(3) When advantageous to do so, master environmental assessments may be prepared through a joint exercise of powers agreement with neighboring local agencies or with the assistance of the appropriate Council of Governments.

(d) Uses.

(1) A master environmental assessment can identify the environmental characteristics and constraints of an area. This information can be used to influence the design and location of individual projects.

(2) A master environmental assessment may provide information agencies can use in initial studies to decide whether certain environmental effects are likely to occur and whether certain effects will be significant.

(3) A master environmental assessment can provide a central source of current information for use in preparing individual EIRs and negative declarations.

(4) Relevant portions of a master environmental assessment can be referenced and summarized in EIRs and negative declarations.

(5) A master environmental assessment can assist in identifying long range, areawide, and cumulative impacts of individual projects proposed in the area covered by the assessment.

(6) A master environmental assessment can assist a city or county in formulating a general plan or any element of such a plan by identifying environmental characteristics and constraints that need to be addressed in the general plan.

(7) A master environmental assessment can serve as a reference document to assist public agencies which review other environmental documents dealing with activities in the area covered by the assessment. The public agency preparing the assessment should forward a completed copy to each agency which will review projects in the area.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21003, Public Resources Code.

15170. Joint EIR-EIS.

A lead agency under CEQA may work with a federal agency to prepare a joint document which will meet the requirements of both CEQA and NEPA. Use of such a joint document is described in Article 14, beginning with Section 15220.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.5 and 21083.7, Public Resources Code.

Article 12. Special Situations

15180. Redevelopment Projects.

(a) All public and private activities or undertakings pursuant to or in furtherance of a redevelopment plan constitute a single project, which shall be deemed approved at the time of adoption of the redevelopment plan by the legislative body. The EIR in connection with the redevelopment plan shall be submitted in accordance with Section 33352 of the Health and Safety Code.

(b) An EIR on a redevelopment plan shall be treated as a program EIR with no subsequent EIRs required for individual components of the redevelopment plan unless a subsequent EIR or a supplement to an EIR would be required by Section 15162 or 15163.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21090, Public Resources Code.

HISTORY:

1. New Article 12 (Sections 15190–15192) filed 1-6-76 as an emergency; effective upon filing (Register 76, No. 2).
2. Certificate of Compliance filed 4-2-76 (Register 76, No. 14).
3. Repealer of Article 12 (Sections 15190–15193) and new Article 12 (Sections 15180–15185) filed 7-13-83; effective 8-1-83 (Register 83, No. 29). For prior history, see Registers 82, No. 2; 81, Nos. 30 and 45; 80, No. 15; 79, Nos. 18, 23 and 30; and 78, No. 33.
4. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15181. Housing and Neighborhood Commercial Facilities in Urbanized Areas.

(a) A lead agency may approve a project involving the construction of housing or neighborhood commercial facilities in an urbanized area with the use of an EIR or negative declaration previously prepared for a specific plan, local coastal program, or port master plan if the lead agency complies with the requirements of this section.

(b) The procedures for complying with this section are as follows:

(1) The lead agency shall conduct an initial study to determine whether the project may have one or more significant effects on the environment.

(2) The lead agency shall give notice of its proposed use of a previously prepared EIR to all persons who had submitted a written request for notice and shall also give notice by either:

(A) Posting notice on and off the site in the area where the project would be located, or

(B) Mailing notice directly to owners of property contiguous to the project site.

(3) The lead agency shall make the following findings with regard to planning and the previously prepared EIR.

(A) That the project is consistent with either:

1. A specific plan which was adopted for the area pursuant to Article 8 (commencing with Section 65450), Article 9 (commencing with Section 65500), and Article 10 (commencing with Section 65550) of Chapter 3 of Title 7 of the Government Code, or

2. A local coastal program or port master plan certified pursuant to Article 2 (commencing with Section 30510) of Chapter 6 of Division 20 of the Public Resources Code.

(B) That the specific plan, local coastal program, or port master plan was adopted not more than five years prior to the finding made pursuant to this subsection and that the method of adoption was the procedure specified by Article 9 (commencing with Section 65500) of Chapter 3 of Title 7 of the Government Code for adopting specific plans and regulations.

(C) That the specific plan or local coastal program or port master plan was the subject of a certified environmental impact report.

(D) That the environmental impact report is sufficiently detailed so that all the significant effects of the project on the environment and measures necessary to mitigate or avoid any such effects can be determined. This examination of the previously prepared EIR shall include a further, specific finding as to:

1. Whether there would be any significant physical effects on existing structures and neighborhoods of historical or aesthetic significance if any exist in the area covered by the plan or program, and

2. Whether measures necessary to mitigate or avoid such effects are included in the EIR.

(E) That a subsequent EIR is not required pursuant to Public Resources Code Section 21166 and Guidelines Section 15162.

(4) The lead agency shall make one or more findings as required by Section 15091 with regard to mitigating or avoiding each significant effect that the project would have on the environment.

(5) The lead agency shall file a notice of determination with the county clerk if the lead agency approves the project.

(c) As used in this section, "neighborhood commercial facilities" means those commercial facilities which are an integral part of a project involving the construction of housing and which will serve the residents of such housing.

(d) As used in this section, "urbanized area" means only those areas mapped and designated as urbanized by the U.S. Bureau of the Census.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.7, Public Resources Code.

15182. Residential Projects Pursuant to a Specific Plan.

(a) Exemption. Where a public agency has prepared an EIR on a specific plan after January 1, 1980, no EIR or negative declaration need be prepared for a residential project undertaken pursuant to and in conformity to that specific plan if the project meets the requirements of this section.

(b) Scope. Residential projects covered by this section include but are not limited to land subdivisions, zoning changes, and residential planned unit developments.

(c) Limitation. This section is subject to the limitation that if after the adoption of the specific plan, an event described in Section 15162 should occur, this exemption shall not apply until the city or county which adopted the specific plan completes a subsequent EIR or a supplement to an EIR on the specific plan. The exemption provided by this section shall again be available to residential projects after the lead agency has filed a Notice of Determination on the specific plan as reconsidered by the subsequent EIR or supplement to the EIR.

(d) Alternative. This section provides an alternative to the procedure described in Section 15181.

(e) Fees. The lead agency has authority to charge fees to applicants for projects which benefit from this section. The fees shall be calculated in the aggregate to defray but not to exceed the cost of developing and adopting the specific plan including the cost of preparing the EIR.

(f) Statute of Limitations. A court action challenging the approval of a project under this section for failure to prepare a supplemental EIR shall be commenced within 30 days after the lead agency's decision to carry out or approve the project in accordance with the specific plan.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 65453, Government Code.

15183. Residential Projects Consistent With a Community Plan or Zoning.

(a) In approving a residential project meeting the requirements of this section, a public agency shall limit its examination of environmental effects under CEQA to effects which:

(1) Are peculiar to the project or the parcel on which the project would be located, although the effect may occur on or off the site of the project, and

(2) Were not analyzed as significant effects in a prior EIR on the zoning or community plan with which the residential project is consistent.

(b) The application of this section shall be limited to residential projects which are consistent with a community plan adopted as part of a general plan or a zoning action which:

(1) Zoned or designated the parcel on which the project would be located to accommodate a particular density of residential development, and

(2) Was the subject of an EIR certified by the lead agency for the planning or zoning action.

(c) This section shall limit the analysis of only those significant environmental effects for which:

(1) Each public agency with authority to mitigate any of the significant effects on the environment identified in the EIR on the planning or zoning action undertakes or requires others to undertake mitigation measures specified in the EIR which the lead agency found to be feasible, and

(2) The lead agency makes a finding at a public hearing as to whether the feasible mitigation measures will be undertaken.

(d) An effect of a project on the environment shall not be considered peculiar to the project or the parcel for the purposes of this section if uniformly applied development policies or standards have been previously adopted by the city or county with a finding that the development policies or standards will substantially mitigate that environmental effect when applied to future projects. The finding shall be based on substantial evidence which need not include an EIR. Examples of uniformly applied development policies or standards include:

(1) Parking ordinances,

(2) Public access requirements,

(3) Grading ordinances.

(e) An environmental effect shall not be considered peculiar to the project or parcel solely because no uniformly applied development policy or standard is applicable to it.

(f) Where a community plan meets the requirements of this section, any rezoning action consistent with the community plan shall be treated as a residential project subject to this section.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083.3, Public Resources Code.

15184. State Mandated Local Projects.

Whenever a state agency issues an order which requires a local agency to carry out a project subject to CEQA, the following rules apply:

(a) If an EIR is prepared for the project, the local agency shall limit the EIR to considering those factors and alternatives which will not conflict with the order.

(b) If a local agency undertakes a project to implement a rule or regulation imposed by a certified state environmental regulatory program listed in Section 15251, the project shall be exempt from CEQA with regard to the significant effects analyzed in the document prepared by the state agency as a substitute for an EIR. The local agency shall comply with CEQA with regard to any site-specific effect of the project which was not analyzed by the certified state agency as a significant effect on the environment. The local agency need not re-examine the general environmental effects of the state rule or regulation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080, 21080.5 and 21154, Public Resources Code.

15185. Administrative Appeals.

(a) Where an agency allows administrative appeals upon the adequacy of an environmental document, an appeal shall be handled according to the procedures of that agency. Public notice shall be handled in accordance with individual agency requirements and Section 15202(e).

(b) The decisionmaking body to which an appeal has been made shall consider the environmental document and make findings under Sections 15091 and 15093 if appropriate.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082 and 21083, Public Resources Code.

Article 13. Review and Evaluation of EIRs and Negative Declarations

15200. Purposes of Review.

The purposes of review of EIRs and negative declarations include:

(a) Sharing expertise,

(b) Disclosing agency analyses,

(c) Checking for accuracy,

(d) Detecting omissions,

(e) Discovering public concerns, and

(f) Soliciting counter proposals.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21000, 21108 and 21152, Public Resources Code; *Environmental Defense Fund* v. *Coastside County Water District* (1972) 27 Cal. App. 3d 695; *County of Inyo* v. *City of Los Angeles* (1977) 71 Cal. App. 3d 185.

HISTORY:

1. New Article 13 (Sections 15201–15203) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
2. Repealer of Article 13 (Sections 15201–15203) and new Article 13 (Sections 15200–15209) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).
3. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15201. Public Participation.

Public participation is an essential part of the CEQA process. Each public agency should include provisions in its CEQA procedures for wide public involvement, formal and informal, consistent with its existing activities and procedures, in order to receive and evaluate public reactions to environmental issues related to the agency's activities.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000, 21082, 21108 and 21152, Public Resources Code; *Environmental Defense Fund* v. *Coastside County Water District* (1972) 27 Cal. App. 3d 695; *People* v. *County of Kern* (1974) 39 Cal. App. 3d 830; *County of Inyo* v. *City of Los Angeles* (1977) 71 Cal. App. 3d 185.

15202. Public Hearings.

(a) CEQA does not require formal hearings at any stage of the environmental review process. Public comments may be restricted to written communications.

(b) If an agency provides a public hearing on its decision to carry out or approve a project, the agency should include environmental review as one of the subjects for the hearing.

(c) A public hearing on the environmental impact of a project should usually be held when the lead agency determines it would facilitate the purposes and goals of CEQA to do so. The hearing may be held in conjunction with and as a part of normal planning activities.

(d) A draft EIR or negative declaration should be used as a basis for discussion at a public hearing. The hearing may be held at a place where public hearings are regularly conducted by the lead agency or at another location expected to be convenient to the public.

(e) Notice of all public hearings shall be given in a timely manner. This notice may be given in the same form and time as notice for other regularly conducted public hearings of the public agency.

(f) A public agency may include, in its implementing procedures, procedures for the conducting of public hearings pursuant to this section. The procedures may adopt existing notice and hearing requirements of the public agency for regularly conducted legislative, planning, and other activities.

(g) There is no requirement for a public agency to conduct a public hearing in connection with its review of an EIR prepared by another public agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000, 21082, 21108 and 21152, Public Resources Code; *Concerned Citizens of Palm Desert, Inc.* v. *Board of Supervisors* (1974) 38 Cal. App. 3d 272.

15203. Adequate Time for Review and Comment.

The lead agency shall provide adequate time for other public agencies and members of the public to review and comment on a draft EIR or negative declaration that it has prepared.

(a) Public agencies may establish time periods for review in their implementing procedures and shall notify the public and reviewing agencies of the time for receipt of comments on EIRs. These time periods shall be consistent with applicable statutes, the State CEQA Guidelines, and applicable clearinghouse review periods.

(b) A review period for an EIR does not require a halt in other planning or evaluation activities related to a project. Planning should continue in conjunction with environmental evaluation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082, 21108 and 21152, Public Resources Code. Formerly Sections 15160(a) and (e).

15204. Focus of Review.

(a) In reviewing draft EIRs, people should focus on the sufficiency of the document in identifying and analyzing the possible impacts on the environment and ways in which the significant effects of the project might be avoided or mitigated. Comments are most helpful when they suggest additional specific alternatives or mitigation measures that would provide better ways to avoid or mitigate the significant environmental effects.

(b) In reviewing negative declarations, people should focus on the proposed finding that the project will not have a significant effect on the environment. If people believe that the project would have a significant effect, they should:

(1) Identify the effect,

(2) Explain why they believe the effect would occur, and

(3) Explain why they believe the effect would be significant.

(c) Reviewers should explain the basis for their comments, and whenever possible, should submit data or references in support of the comments.

(d) Reviewing agencies or organizations should include with their comments the name of a contact person who would be available for later consultation if necessary.

(e) This section shall not be used to restrict the ability of reviewers to comment on broader issues and on the general adequacy of a document or to reject comments not focused as recommended by this section.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code. Formerly Section 15161.

15205. Review by State Agencies.

(a) Draft EIRs and negative declarations to be reviewed by state agencies shall be submitted to the State Clearinghouse, 1400 Tenth Street, Sacramento, California 95814.

(b) The following environmental documents shall be submitted to the State Clearinghouse for review by state agencies:

(1) Draft EIRs and negative declarations prepared by a state agency where such agency is a lead agency.

(2) Draft EIRs and negative declarations prepared by a public agency where a state agency is a responsible agency, trustee agency, or otherwise has jurisdiction by law with respect to the project.

(3) Draft EIRs and negative declarations on projects identified in Section 15206 as being of statewide, regional, or areawide significance.

(4) Draft EISs, environmental assessments, and findings of no significant impact prepared pursuant to NEPA, the Federal Guidelines (Title 40 CFR, Part 1500, commencing with Section 1500.1).

(c) Public agencies may send environmental documents to the State Clearinghouse for review where a state agency has special expertise with regard to the environmental impacts involved. The areas of statutory authorities of state agencies are identified in Appendix B.

(d) When an EIR or negative declaration is submitted to the State Clearinghouse for review, the review period set by the lead agency shall be at least as long as the period provided in the state review system operated by the State Clearinghouse. In the state review system, the normal review period is 45 days for EIRs and 30 days for negative declarations. In exceptional circumstances, the State Clearinghouse may set shorter review periods when requested by the lead agency.

(e) The number of copies of an EIR or negative declaration submitted to the State Clearinghouse shall not be less than ten unless the State Clearinghouse approves a lower number in advance.

(f) While the lead agency is encouraged to contact the regional and district offices of state responsible agencies, the lead agency must, in all cases, submit documents to the State Clearinghouse for distribution in order to comply with the review requirements of this section.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083, 21104 and 21153, Public Resources Code. Formerly Section 15161.5.

15206. Projects of Statewide, Regional, or Areawide Significance.

(a) Projects meeting the criteria in this section shall be deemed to be of statewide, regional, or areawide significance. A draft EIR or negative declaration prepared by any public agency on a project described in this section shall be submitted to the State Clearinghouse and should be submitted also to the appropriate metropolitan area council of governments for review and comment.

(b) The lead agency shall determine that a proposed project is of statewide, regional, or areawide significance if the project meets any of the following criteria:

(1) A proposed local general plan, element, or amendment thereof for which an EIR was prepared. If a negative declaration was prepared for the plan, element, or amendment, the document need not be submitted for review.

(2) A project has the potential for causing significant effects on the environment extending beyond the city or county in which the project would be located. Examples of the effects include generating significant amounts of traffic or interfering with the attainment or maintenance of state or national air quality standards. Projects subject to this subsection include:

(A) A proposed residential development of more than 500 dwelling units.

(B) A proposed shopping center or business establishment employing more than 1,000 persons or encompassing more than 500,000 square feet of floor space.

(C) A proposed commercial office building employing more than 1,000 persons or encompassing more than 250,000 square feet of floor space.

(D) A proposed hotel/motel development of more than 500 rooms.

(E) A proposed industrial, manufacturing, or processing plant, or industrial park planned to house more than 1,000 persons, occupying more than 40 acres of land, or encompassing more than 650,000 square feet of floor area.

(3) A project which would result in the cancellation of an open space contract made pursuant to the California Land Conservation Act of 1965 (Williamson Act) for any parcel of 100 or more acres.

(4) A project for which an EIR and not a negative declaration was prepared which would be located in and would substantially impact the following areas of critical environmental sensitivity:

(A) The Lake Tahoe Basin.

(B) The Santa Monica Mountains Zone as defined by Section 74663 of the Government Code.

(C) The California Coastal Zone as defined in, and mapped pursuant to, Section 30103 of the Public Resources Code.

(D) An area within ¼ mile of a wild and scenic river as defined by Section 5093.5 of the Public Resources Code.

(E) The Sacramento-San Joaquin Delta, as defined in Water Code Section 12220.

(F) The Suisun Marsh as defined in Public Resources Code Section 29101.

(G) The jurisdiction of the San Francisco Bay Conservation and Development Commission as defined in Government Code Section 66610.

(5) A project which would substantially affect sensitive wildlife habitats including but not limited to riparian lands, wet lands, bays, estuaries, marshes, and habitats for rare and endangered species as defined by Fish and Game Code Section 903.

(6) A project which would interfere with attainment of regional water quality standards as stated in the approved areawide waste treatment management plan.

(7) A project which would provide housing, jobs, or occupancy for 500 or more people within 10 miles of a nuclear power plant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference. Section 21083, Public Resources Code.

15207. Failure to Comment.

If any public agency or person who is consulted with regard to an EIR or negative declaration fails to comment within a reasonable time as specified by the lead agency, it shall be assumed, absent a request for a specific extension of time, that such agency or person has no comment to make. Although the lead agency need not respond to late comments, the lead agency may choose to respond to them.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code; *Cleary* v. *County of Stanislaus* (1981) 118 Cal. App. 3d 348. Formerly Section 15162.

15208. Retention and Availability of Comments.

Comments received through the consultation process shall be retained for a reasonable period and available for public inspection at an address given in the final EIR. Comments which may be received on a draft EIR or negative declaration under preparation shall also be considered and kept on file.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104, 21082.1 and 21153, Public Resources Code; Section 4, Chapter 480, Statutes of 1981; *People* v. *County of Kern* (1974) 39 Cal. App. 3d 830.

15209. Comments on Initiative of Public Agencies.

Every public agency may comment on environmental documents dealing with projects which affect resources with which the agency has special expertise regardless of whether its comments were solicited or whether the effects fall within the legal jurisdiction of the agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21104 and 21153, Public Resources Code.

Article 14. Projects Also Subject to the National Environmental Policy Act (NEPA)

15220. General.

This article applies to projects that are subject to both CEQA and NEPA. NEPA applies to projects which are carried out, financed, or approved in whole or in part by federal agencies. Accordingly, this article applies to projects which involve one or more state or local agencies and one or more federal agencies.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.5, 21083.6 and 21083.7, Public Resources Code; National Environmental Policy Act of 1969, Public Law 91-190 as amended, 42 U.S.C.A. 4321–4347; NEPA Regulations, 40 Code of Federal Regulations (C.F.R.) Parts 1500–1508.

HISTORY:

1. New Article 14 (Sections 15220–15228) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15221. NEPA Document Ready Before CEQA Document.

(a) When a project will require compliance with both CEQA and NEPA, state or local agencies should use the EIS or finding of no significant impact rather than preparing an EIR or negative declaration if the following two conditions occur:

(1) An EIS or finding of no significant impact will be prepared before an EIR or negative declaration would otherwise be completed for the project; and

(2) The EIS or finding of no significant impact complies with the provisions of these guidelines.

(b) Because NEPA does not require separate discussion of mitigation measures or growth inducing impacts, these points of analysis will need to be added, supplemented, or identified before the EIS can be used as an EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.5 and 21083.7, Public Resources Code; Section 102(2)(C) of NEPA, 43 U.S.C.A. 4322(2)(C).

15222. Preparation of Joint Documents.

If a lead agency finds that an EIS or finding of no significant impact for a project would not be prepared by the federal agency by the time when the lead agency will need to consider an EIR or negative declaration, the lead agency should try to prepare a combined EIR-EIS or negative declaration-finding of no significant impact. To avoid the need for the federal agency to prepare a separate document for the same project, the lead agency must involve the federal agency in the preparation of the joint document. This involvement is necessary because federal law generally prohibits a federal agency from using an EIR prepared by a state agency unless the federal agency was involved in the preparation of the document.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.5 and 21083.7, Public Resources Code; Section 102(2)(D) of NEPA, 43 U.S.C.A. 4322 (2)(D); 40 C.F.R. Part 1506.2.

15223. Consultation With Federal Agencies.

When it plans to use an EIS or finding of no significant impact or to prepare such a document jointly with a federal agency, the lead agency shall consult as soon as possible with the federal agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.5 and 21083.7, Public Resources Code.

15224. Time Limits.

Where a project will be subject to both CEQA and the National Environmental Policy Act, the one year time limit and the 105 day time limit may be waived pursuant to Section 15110.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083.6, Public Resources Code.

15225. Circulation of Documents.

Where the federal agency circulated the EIS or finding of no significant impact for public review as broadly as state or local law may require and gave notice meeting the standards in Section 15072(a) or 15087(a), the lead agency under CEQA may use the federal document in the place of an EIR or negative declaration without recirculating the federal document for public review. One review and comment period is enough. Prior to using the federal document in this situation, the lead agency shall give notice that it will use the federal document in the place of an EIR or negative declaration and that it believes that the federal document meets the requirements of CEQA. The notice shall be given in the same manner as a notice of the public availability of a draft EIR under Section 15087.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.5 and 21092, Public Resources Code.

15226. Joint Activities.

State and local agencies should cooperate with federal agencies to the fullest extent possible to reduce duplication between the California Environmental Quality Act and the National Environmental Policy Act. Such cooperation should, to the fullest extent possible, include:

(a) Joint planning processes,
(b) Joint environmental research and studies,
(c) Joint public hearings,
(d) Joint environmental documents.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.5 and 21083.7, Public Resources Code; 40 C.F.R. Part 1506.2.

15227. State Comments on a Federal Project.

When a state agency officially comments on a proposed federal project which may have a significant effect on the environment, the comments shall include or reference a discussion of the material specified in Section 15126. An EIS on the federal project may be referenced to meet the requirements of this section.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21101, Public Resources Code.

15228. Where Federal Agency Will Not Cooperate.

Where a federal agency will not cooperate in the preparation of joint document and will require separate NEPA compliance for the project at a later time, the state or local agency should persist in efforts to cooperate with the federal agency. Because NEPA expressly allows federal agencies to use environmental documents prepared by an agency of statewide jurisdiction, a local agency should try to involve a state agency in helping prepare an EIR or negative declaration for the project. In this way there will be a greater chance that the federal agency may later use the CEQA document and not require the applicant to pay for preparation of a second document to meet NEPA requirements at a later time.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083.5, Public Resources Code; Section 102(2)(D) of NEPA, 42 U.S.C.A. 4322(2)(D).

Article 15. Litigation

15230. Time Limits and Criteria.

Litigation under CEQA must be handled under the time limits and criteria described in Sections 21167 et seq. of the Public Resources Code and Section 15112 of these guidelines in addition to provisions in this article.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21167 et seq., Public Resources Code.

HISTORY:

1. New Article 15 (Sections 15230–15233) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15231. Adequacy of EIR or Negative Declaration for Use by Responsible Agencies.

A final EIR prepared by a lead agency or a negative declaration adopted by a lead agency shall be conclusively presumed to comply with CEQA for purposes of use by responsible agencies which were consulted pursuant to Sections 15072 or 15082 unless one of the following conditions occurs:

(a) The EIR or negative declaration is finally adjudged in a legal proceeding not to comply with the requirements of CEQA, or

(b) A subsequent EIR is made necessary by Section 15162 of these guidelines.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.1, 21166, 21167.2 and 21167.3, Public Resources Code.

15232. Request for Hearing.

In a writ of mandate proceeding challenging approval of a project under CEQA, the petitioner shall, within 90 days of filing the petition, request a hearing or otherwise be subject to dismissal on the court's own motion or on the motion of any party to the suit.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21167.4, Public Resources Code.

15233. Conditional Permits.

If a lawsuit is filed challenging an EIR or negative declaration for noncompliance with CEQA, responsible agencies shall act as if the EIR or negative declaration complies with CEQA and continue to process the application for the project according to the time limits for responsible agency action contained in Government Code Section 65952.

(a) If an injunction or a stay has been granted in the lawsuit prohibiting the project from being carried out, the responsible agency shall have authority only to disapprove the project or to grant a conditional approval of the project. A conditional approval shall constitute permission to proceed with a project only when the court action results in a final determination that the EIR or negative declaration does comply with the provisions of CEQA (Public Resources Code Section 21167.3a).

(b) If no injunction or stay is granted in the lawsuit, the responsible agency shall assume that the EIR or negative declaration fully meets the requirements of CEQA. The responsible agency shall approve or disapprove the project within the time limits described in Article 8, commencing with Section 15100, of these guidelines and described in Government Code Section 65952. An approval granted by a responsible agency in this situation provides only permission to proceed with the project at the applicant's risk prior to a final decision in the lawsuit (Public Resources Code Section 21167.3b).

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21167.3, Public Resources Code; *Kriebel* v. *City Council* (1980) 112 Cal. App. 3d 693.

Article 16. EIR Monitor

15240. EIR Monitor.

The Secretary for Resources may provide for publication of a bulletin entitled "California EIR Monitor" on a subscription basis to provide public notice of amendments to the guidelines, the completion of draft EIRs, and other matters as deemed appropriate. Inquiries and subscription requests should be sent to the following address:

Secretary for Resources
Attention: California EIR Monitor
1416 Ninth Street, Room 1311
Sacramento, California 95814

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083, Public Resources Code.

HISTORY:

1. New Article 16 (Section 15240) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

Article 17. Exemption for Certified State Regulatory Programs

15250. General.

Section 21080.5 of the Public Resources Code provides that a regulatory program of a state agency shall be certified by the Secretary for Resources as being exempt from the requirements for preparing EIRs, negative declarations, and initial studies if the Secretary finds that the program meets the criteria contained in that code section. A certified program remains subject to other provisions in CEQA such as the policy of avoiding significant adverse effects on the environment where feasible. This article provides information concerning certified programs.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.5, Public Resources Code.

HISTORY:

1. New Article 17 (Sections 15250–15253) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15251. List of Certified Programs.

The following programs of state regulatory agencies have been certified by the Secretary for Resources as meeting the requirements of Section 21080.5:

(a) The regulation of timber harvesting operations by the California Department of Forestry and the State Board of Forestry pursuant to Chapter 8, commencing with Section 4511 of Part 2 of Division 4 of the Public Resources Code.

(b) The regulatory program of the Fish and Game Commission pursuant to the Fish and Game Code.

(c) The regulatory program of the California Coastal Commission and the regional coastal commissions dealing with the consideration and granting of coastal development permits under the California Coastal Act of 1976, Division 20 (commencing with Section 30000) of the Public Resources Code.

(d) That portion of the regulatory program of the Air Resources Board which involves the adoption, approval, amendment, or repeal of standards, rules, regulations, or plans to be used in the regulatory program for the protection and enhancement of ambient air quality in California.

(e) The regulatory program of the State Board of Forestry in adopting, amending, or repealing standards, rules, regulations, or plans under the Z'berg-Nejedly Forest Practice Act, Chapter 8 (commencing with Section 4511) of Part 2 of Division 4 of the Public Resources Code.

(f) The program of the California Coastal Commission involving the preparation, approval, and certification of local coastal programs as provided in Sections 30500 through 30522 of the Public Resources Code.

(g) The Water Quality Control (Basin)/208 Planning Program of the State Water Resources Control Board and the Regional Water Quality Control Boards.

(h) The permit and planning programs of the San Francisco Bay Conservation and Development Commission under the McAteer-Petris Act, Title 7.2 (commencing with Section 66600) of the Government Code and the Suisun Marsh Preservation Act, Division 19 (commencing with Section 29000) of the Public Resources Code.

(i) The pesticide regulatory program administered by the Department of Food and Agriculture and the county agricultural commissioners insofar as the program consists of:

(1) The registration, evaluation, and classification of pesticides.

(2) The adoption, amendment, or repeal of regulations and standards for the licensing and regulation of pesticide dealers and pest control operators and advisors.

(3) The adoption, amendment, or repeal of regulations for standards dealing with the monitoring of pesticides and of the human health and environmental effects of pesticides.

(4) The regulation of the use of pesticides in agricultural and urban areas of the state through the permit system administered by the county agricultural commissioners.

(j) The regulations of weather resources management projects through the issuance of operating permits by the State Department of Water Resources pursuant to the California Weather Resources Management Act of 1978 (Water Code Sections 400 et seq.).

(k) The power plant site certification program of the State Energy Resources Conservation and Development Commission under Chapter 6 of the Warren-Alquist Act, commencing with Public Resources Code Section 25500.

(*l*) The regulatory program of the State Water Resources Control Board to establish instream beneficial use protection programs.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.5, Public Resources Code.

15252. Substitute Document.

The document used as a substitute for an EIR or negative declaration in a certified program shall include at least the following items:

(a) A description of the proposed activity, and

(b) Either:

(1) Alternatives to the activity and mitigation measures to avoid or reduce any significant or potentially significant effects that the project might have on the environment, or

(2) A statement that the agency's review of the project showed that the project would not have any significant or potentially significant effects on the environment and therefore no alternatives or mitigation measures are proposed to avoid or reduce any significant effects on the environment. This statement shall be supported by a checklist or other documentation to show the possible effects that the agency examined in reaching this conclusion.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.5, Public Resources Code.

15253. Use of an EIR Substitute by a Responsible Agency.

(a) An environmental analysis document prepared for a project under a certified program listed in Section 15251 shall be used by another agency granting an approval for the same project where the conditions in Subsection (b) have been met. In this situation, the certified agency shall act as lead agency, and the other permitting agencies shall act as responsible agencies using the certified agency's document.

(b) The conditions under which a public agency shall act as a responsible agency when approving a project using an environmental analysis document prepared under a certified program in the place of an EIR or negative declaration are as follows:

(1) The certified agency is the first agency to grant a discretionary approval for the project.

(2) The certified agency consults with the responsible agencies, but the consultation need not include the exchange of written notices.

(3) The environmental analysis document identifies:

(A) The significant environmental effects within the jurisdiction or special expertise of the responsible agency.

(B) Alternatives or mitigation measures that could avoid or reduce the severity of the significant environmental effects.

(4) Where written notices were not exchanged in the consultation process, the responsible agency was afforded the opportunity to participate in the review of the property by the certified agency in a regular manner designed to inform the certified agency of the concerns of the responsible agency before release of the EIR substitute for public review.

(5) The certified agency established a consultation period between the certified agency and the responsible agency that was at least as long as the period allowed for public review of the EIR substitute document.

(6) The certified agency exercised the powers of a lead agency by considering all the significant environmental effects of the project and making a finding under Section 15091 for each significant effect.

(c) Certified agencies are not required to adjust their activities to meet the criteria in Subsection (b). Where a certified agency does not meet the criteria in Subsection (b):

(1) The substitute document prepared by the agency shall not be used by other permitting agencies in the place of an EIR or negative declaration, and

(2) Any other agencies granting approvals for the project shall comply with CEQA in the normal manner. A permitting agency shall act as a lead agency and prepare an EIR or a negative declaration. Other permitting agencies, if any, shall act as responsible agencies and use the EIR or negative declaration prepared by the lead agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002.1(d), 21080.5 and 21165, Public Resources Code.

Article 18. Statutory Exemptions

15260. General.

This article describes the exemptions from CEQA granted by the Legislature. The exemptions take several forms. Some exemptions are complete exemptions from CEQA. Other exemptions apply to only part of the requirements of CEQA, and still other exemptions apply only to the timing of CEQA compliance.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b), Public Resources Code.

HISTORY:

1. New Article 18 (Sections 15260–15277) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15261. Ongoing Project.

(a) If a project being carried out by a public agency was approved prior to November 23, 1970, the project shall be exempt from CEQA unless either of the following conditions exists:

(1) A substantial portion of public funds allocated for the project have not been spent, and it is still feasible to modify the project to mitigate potentially adverse environmental effects, or to choose feasible alternatives to the project, including the alternative of "no project" or halting the project; provided that a project subject to the National Environmental Policy Act (NEPA) shall be exempt from CEQA as an on-going project if, under regulations promulgated under NEPA, the project would be too far advanced as of January 1, 1970, to require preparation of an EIS.

(2) A public agency proposes to modify the project in such a way that the project might have a new significant effect on the environment.

(b) A private project shall be exempt from CEQA if the project received approval of a lease, license, certificate, permit, or other entitlement for use from a public agency prior to April 5, 1973, subject to the following provisions:

(1) CEQA does not prohibit a public agency from considering environmental factors in connection with the approval or disapproval of a project, or from imposing reasonable fees on the appropriate private person or entity for preparing an environmental report under authority other than CEQA. Local agencies may require environmental reports for projects covered by this paragraph pursuant to local ordinances during this interim period.

(2) Where a project was approved prior to December 5, 1972, and prior to that date the project was legally challenged for noncompliance with CEQA, the project shall be bound by special rules set forth in Section 21170 of CEQA.

(3) Where a private project has been granted a discretionary governmental approval for part of the project before April 5, 1973, and another or additional discretionary governmental approvals after April 5, 1973, the project shall be subject to CEQA only if the approval or approvals after April 5, 1973, involve a greater degree of responsibility or control over the project as a whole than did the approval or approvals prior to that date.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21169, 21170 and 21171, Public Resources Code; *County of Inyo* v. *Yorty*, 32 Cal. App. 3d 795.

15262. Feasibility and Planning Studies.

A project involving only feasibility or planning studies for possible future actions which the agency, board, or commission has not approved, adopted, or funded does not require the preparation of an EIR or negative declaration but does require consideration of environmental factors. This section does not apply to the adoption of a plan that will have a legally binding effect on later activities.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21102 and 21150, Public Resources Code.

15263. Discharge Requirements.

The State Water Resources Control Board and the regional boards are exempt from the requirement to prepare an EIR or a negative declaration prior to the adoption of waste discharge requirements, except requirements for new sources as defined in the Federal Water Pollution Control Act or in other acts which amend or supplement the Federal Water Pollution Control Act. The term "waste discharge requirements" as used in this section is the equivalent of the term "permits" as used in the Federal Water Pollution Control Act.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 13389, Water Code.

15264. Timberland Preserves.

Local agencies are exempt from the requirement to prepare an EIR or negative declaration on the adoption of timberland preserve zones under Government Code Sections 51100 et seq. (Gov. Code, Sec. 51119).

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 51119, Government Code.

15265. Adoption of Coastal Plans and Programs.

(a) CEQA does not apply to activities and approvals pursuant to the California Coastal Act (commencing with Section 30000 of the Public Resources Code) by:

(1) Any local government, as defined in Section 30109 of the Public Resources Code, necessary for the preparation and adoption of a local coastal program, or

(2) Any state university or college, as defined in Section 30119, as necessary for the preparation and adoption of a long-range land use development plan.

(b) CEQA shall apply to the certification of a local coastal program or long-range land use development plan by the California Coastal Commission.

(c) This section shifts the burden of CEQA compliance from the local agency or the state university or college to the California Coastal Commission. The Coastal Commission's program of certifying local coastal programs and long-range land use development plans has been certified under Section 21080.5, Public Resources Code. See Section 15192.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.9, Public Resources Code.

15266. General Plan Time Extension.

CEQA shall not apply to the granting of an extension of time by the Office of Planning and Research to a city or county for the preparation and adoption of one or more elements of a city or county general plan.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.10(a), Public Resources Code.

15267. Financial Assistance to Low or Moderate Income Housing.

CEQA does not apply to actions taken by the Department of Housing and Community Development to provide financial assistance for the development and construction of residential housing for persons and families of low or moderate income, as defined in Section 50093 of the Health and Safety Code. The residential project which is the subject of the application for financial assistance will be subject to CEQA when approvals are granted by another agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.10(b), Public Resources Code.

15268. Ministerial Projects.

(a) Ministerial projects are exempt from the requirements of CEQA. The determination of what is "ministerial" can most appropriately be made by the particular public agency involved based upon its analysis of its own laws, and each public agency should make such determination either as a part of its implementing regulations or on a case-by-case basis.

(b) In the absence of any discretionary provision contained in the local ordinance or other law establishing the requirements for the permit, license, or other entitlement for use, the following actions shall be presumed to be ministerial:

(1) Issuance of building permits.
(2) Issuance of business licenses.
(3) Approval of final subdivision maps.
(4) Approval of individual utility service connections and disconnections.

(c) Each public agency should, in its implementing regulations or ordinances, provide an identification or itemization of its projects and actions which are deemed ministerial under the applicable laws and ordinances.

(d) Where a project involves an approval that contains elements of both a ministerial action and a discretionary action, the project will be deemed to be discretionary and will be subject to the requirements of CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(1), Public Resources Code; *Day* v. *City of Glendale*, 51 Cal. App. 3d 817.

15269. Emergency Projects.

The following emergency projects are exempt from the requirements of CEQA.

(a) Projects to maintain, repair, restore, demolish, or replace property or facilities damaged or destroyed as a result of a disaster in a disaster stricken area in which a state of emergency has been proclaimed by the Governor pursuant to the California Emergency Services Act, commencing with Section 8550 of the Government Code.

(b) Emergency repairs to public service facilities necessary to maintain service.

(c) Specific actions necessary to prevent or mitigate an emergency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(b)(2), (3), and (4) and 21172, Public Resources Code.

15270. Projects Which are Disapproved.

(a) CEQA does not apply to projects which a public agency rejects or disapproves.

(b) This section is intended to allow an initial screening of projects on the merits for quick disapprovals prior to the initiation of the CEQA process where the agency can determine that the project cannot be approved.

(c) This section shall not relieve an applicant from paying the costs for an EIR or negative declaration prepared for his project prior to the lead agency's disapproval of the project after normal evaluation and processing.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(5), Public Resources Code.

15271. Early Activities Related to Thermal Power Plants.

(a) CEQA does not apply to actions undertaken by a public agency relating to any thermal power plant site or facility, including the expenditure, obligation, or encumbrance of funds by a public agency for planning, engineering, or design purposes, or for the conditional sale or purchase of equipment, fuel, water (except groundwater), steam, or power for such a thermal power plant, if the thermal power plant site and related facility will be the subject of an EIR or negative declaration or other document or documents prepared pursuant to a regulatory program certified pursuant to Public Resources Code Section 21080.5, which will be prepared by:

(1) The State Energy Resources Conservation and Development Commission,

(2) The Public Utilities Commission, or
(3) The city or county in which the power plant and related facility would be located.

(b) The EIR, negative declaration, or other document prepared for the thermal power plant site or facility, shall include the environmental impact, if any, of the early activities described in this section.

(c) This section acts to delay the timing of CEQA compliance from the early activities of a utility to the time when a regulatory agency is requested to approve the thermal power plant and shifts the responsibility for preparing the document to the regulatory agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 15080(b)(6), Public Resources Code.

15272. Olympic Games.

CEQA does not apply to activities or approvals necessary to the bidding for, hosting or staging of, and funding or carrying out of, Olympic Games under the authority of the International Olympic Committee, except for the construction of facilities necessary for such Olympic Games. If the facilities are required by the International Olympic Committee as a condition of being awarded the Olympic Games, the lead agency need not discuss the "no project" alternative in an EIR with respect to those facilities.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(7), Public Resources Code.

15273. Rates, Tolls, Fares, and Charges.

(a) CEQA does not apply to the establishment, modification, structuring, restructuring, or approval of rates, tolls, fares, and other charges by public agencies which the public agency finds are for the purpose of:
(1) Meeting operating expenses, including employee wage rates and fringe benefits,
(2) Purchasing or leasing supplies, equipment, or materials,
(3) Meeting financial reserve needs and requirements,
(4) Obtaining funds for capital projects, necessary to maintain service within existing service areas, or
(5) Obtaining funds necessary to maintain such intra-city transfers as are authorized by city charter.

(b) Rate increases to fund capital projects for the expansion of a system remain subject to CEQA. The agency granting the rate increase shall act either as the lead agency if no other agency has prepared environmental documents for the capital project or as a responsible agency if another agency has already complied with CEQA as the lead agency.

(c) The public agency shall incorporate written findings in the record of any proceeding in which an exemption under this section is claimed setting forth with specificity the basis for the claim of exemption.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(8), Public Resources Code.

15274. Responses to Revenue Shortfalls.

(a) CEQA does not apply to actions taken prior to January 1, 1982, by a public agency.

(1) To implement the transition from the property taxation system in effect prior to June 1, 1978, to the system provided for by Article XIII A of the California Constitution (Proposition 13), or

(2) To respond to a reduction in federal funds.

(b) This exemption is limited to projects directly undertaken by any public agency and to projects which are supported in whole or in part through contracts, grants, subsidies, loans, or other forms of assistance from one or more public agencies where the projects:

(1) Initiate or increase fees, rates, or charges charged for any existing public service, program, or activity, or

(2) Reduce or eliminate the availability of an existing public service program, or activity, or

(3) Close publicly owned or operated facilities, or

(4) Reduce or eliminate the availability of an existing publicly owned transit service, program, or activity.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(9), Public Resources Code.

15275. Specified Mass Transit Projects.

CEQA does not apply to the following mass transit projects:

(a) The institution or increase of passenger or commuter service on rail lines or high-occupancy vehicle lanes already in use, including the modernization of existing stations and parking facilities;

(b) Facility extensions not to exceed four miles in length which are required for transfer of passengers from or to exclusive public mass transit guideway or busway public transit services.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(11), (12), and (13), Public Resources Code.

15276. State and Regional Transportation Improvement Programs.

CEQA does not apply to the development or adoption of a regional transportation improvement program or the state transportation improvement program. Individual projects developed pursuant to these programs shall remain subject to CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(14), Public Resources Code.

15277. Projects Located Outside California.

CEQA does not apply to any project or portion thereof located outside of California which will be subject to environmental impact review pursuant to the National Environmental Policy Act of 1969 or pursuant to a law of that state requiring preparation of a document containing essentially the same points of analysis as in an environmental impact statement prepared under the National Environmental Policy Act of 1969. Any emissions or discharges that would have a significant effect on the environment in the State of California are subject to CEQA where a California public agency has authority over the emissions or discharges.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(15), Public Resources Code; 58 Opinions of the California Attorney General 614 (S.O. 75/50).

Article 19. Categorical Exemptions

15300. Categorical Exemptions.

Section 21084 of the Public Resources Code requires these guidelines to include a list of classes of projects which have been determined not to have a significant effect on the environment and which shall, therefore, be exempt from the provisions of CEQA.

In response to that mandate, the Secretary for Resources has found that the following classes of projects listed in this article do not have a significant effect on the environment, and they are declared to be categorically exempt from the requirement for the preparation of environmental documents.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

HISTORY:

1. Renumbering and amendment of former Article 8 (Sections 15100–15129) to Article 19 (Sections 15300–15329) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15300.1. Relation to Ministerial Projects.

Section 21080 of the Public Resources Code exempts from the application of CEQA those projects over which public agencies exercise only ministerial authority. Since ministerial projects are already exempt, Categorical Exemptions should be applied only where a project is not ministerial under a public agency's statutes and ordinances. The inclusion of activities which may be ministerial within the classes and examples contained in this article shall not be construed as a finding by the Secretary for Resources that such an activity is discretionary.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15300.2. Exceptions.

(a) Location. Classes 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located—a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. Therefore, these classes are considered to apply in all instances, except where the project may impact on an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state, or local agencies.

(b) Cumulative Impact. All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant—for example, annual additions to an existing building under Class 1.

(c) Significant Effect. A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code; *Wildlife Alive v. Chickering* (1977) 18 Cal. 3d 190.

15300.3. Revisions to List of Categorical Exemptions.

Any public agency may, at any time, request that a new class of Categorical Exemptions be added, or an existing one amended or deleted. This request must be made in writing to the Office of Planning and Research and shall contain detailed information to support the request. The granting of such request shall be by amendment to these guidelines.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15300.4. Application by Public Agencies.

Each public agency shall, in the course of establishing its own procedures, list those specific activities which fall within each of the exempt classes, subject to the qualification that these lists must be consistent with both the letter and the intent expressed in the classes. Public agencies may omit from their implementing procedures classes and examples that do not apply to their activities, but they may not require EIRs for projects described in the classes and examples in this article except under the provisions of Section 15300.2.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15301. Existing Facilities.

Class 1 consists of the operation, repair, maintenance, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that previously existing, including but not limited to:

(a) Interior or exterior alterations involving such things as interior partitions, plumbing, and electrical conveyances;

(b) Existing facilities of both investor and publicly-owned utilities used to provide electric power, natural gas, sewerage, or other public utility services;

(c) Existing highways and streets, sidewalks, gutters, bicycle and pedestrian trails, and similar facilities except where the activity will involve removal of a scenic resource including a stand of trees, a rock outcropping, or an historic building;

(d) Restoration or rehabilitation of deteriorated or damaged structures, facilities, or mechanical equipment to meet current standards of public health and safety, unless it is determined that the damage was substantial and resulted from an environmental hazard such as earthquake, landslide, or flood;

(e) Additions to existing structures provided that the addition will not result in an increase of more than:

(1) 50 percent of the floor area of the structures before the addition, or 2,500 square feet, whichever is less; or

(2) 10,000 square feet if:

(A) The project is in an area where all public services and facilities are available to allow for maximum development permissible in the General Plan and

(B) The area in which the project is located is not environmentally sensitive.

(f) Addition of safety or health protection devices for use during construction of or in conjunction with existing structures, facilities, or mechanical equipment, or topographical features including navigational devices;

(g) New copy on existing on and off-premise signs;

(h) Maintenance of existing landscaping, native growth, and water supply reservoirs (excluding the use of economic poisons, as defined in Division 7, Chapter 2, California Agricultural Code);

(i) Maintenance of fish screens, fish ladders, wildlife habitat areas, artificial wildlife waterway devices, streamflows, springs and waterholes, and stream channels (clearing of debris) to protect fish and wildlife resources;

(j) Fish stocking by the California Department of Fish and Game;

(k) Division of existing multiple family rental units into condominiums;

(*l*) Demolition and removal of individual small structures listed in this subsection except where the structures are of historical, archaeological, or architectural significance:

(1) Single-family residences not in conjunction with the building of two or more such units. In urbanized areas, up to three single-family residences may be demolished under this exemption.

(2) Apartments, duplexes, and similar structures, with no more than four dwelling units if not in conjunction with the demolition of two or more such structures. In urbanized areas, this exemption applies to single apartments, duplexes, and similar structures designed for not more than six dwelling units if not demolished in conjunction with the demolition of two or more such structures.

(3) Stores, motels, offices, restaurants, and similar small commercial structures if designed for an occupant load of 30 persons or less, if not constructed in conjunction with the demolition of two or more such structures. In urbanized areas, the exemption also applies to commercial buildings on sites zoned for such use, if designed for an occupant load of 30 persons or less if not demolished in conjunction with the demolition of four or more such structures.

(4) Accessory (appurtenant) structures including garages, carports, patios, swimming pools, and fences.

(m) Minor repairs and alterations to existing dams and appurtenant structures under the supervision of the Department of Water Resources.

(n) Conversion of a single family residence to office use.

(o) The conversion of existing commercial units in one structure from single to condominium type ownership.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15302. Replacement or Reconstruction.

Class 2 consists of replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced, including but not limited to:

(a) Replacement or reconstruction of existing schools and hospitals to provide earthquake resistant structures which do not increase capacity more than 50 percent;

(b) Replacement of a commercial structure with a new structure of substantially the same size, purpose, and capacity.

(c) Replacement or reconstruction of existing utility systems and/or facilities involving negligible or no expansion of capacity.

(d) Conversion of overhead electric utility distribution system facilities to underground including connection to existing overhead electric utility distribution lines where the surface is restored to the condition existing prior to the undergrounding.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15303. New Construction or Conversion of Small Structures.

Class 3 consists of construction and location of limited numbers of new, small facilities or structures; installation of small new equipment and facilities in small structures; and the conversion of existing small structures from one use to another where only minor modifications are made in the exterior of the structure. The numbers of structures described in this section are the maximum allowable on any legal parcel or to be associated with a project within a two-year period. Examples of this exemption include but are not limited to:

(a) Single-family residences not in conjunction with the building of two or more such units. In urbanized areas, up to three single-family residences may be constructed or converted under this exemption.

(b) Apartments, duplexes, and similar structures, with no more than four dwelling units if not in conjunction with the building or conversion of two or more such structures. In urbanized areas, exemption applies to single apartments, duplexes, and similar structures designed for not more than six dwelling units if not constructed in conjunction with the building or conversion of two or more such structures.

(c) Stores, motels, offices, restaurants, and similar small commercial structures not involving the use of significant amounts of hazardous substances, if designed for an occupant load of 30 persons or less, if not constructed in conjunction with the building of two or more such structures. In urbanized areas, the exemption also applies to commercial buildings on sites zoned for such use, if designed for an occupant load of 30 persons or less if not constructed in conjuction with the building of four or more such structures and if not involving the use of significant amounts of hazardous substances.

(d) Water main, sewage, electrical, gas, and other utility extensions of reasonable length to serve such construction.

(e) Accessory (appurtenant) structures including garages, carports, patios, swimming pools, and fences.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15304. Minor Alterations to Land.

Class 4 consists of minor public or private alterations in the condition of land, water, and/or vegetation which do not involve removal of mature, scenic trees except for forestry and agricultural purposes. Examples include but are not limited to:

(a) Grading on land with a slope of less than 10 percent, except that grading shall not be exempt in a waterway, in any wetland, in an officially designated (by federal, state, or local government action) scenic area, or in officially mapped areas of severe geologic hazard.

(b) New gardening or landscaping.

(c) Filling of earth into previously excavated land with material compatible with the natural features of the site.

(d) Minor alterations in land, water, and vegetation on existing officially designated wildlife management areas or fish production facilities which result in improvement of habitat for fish and wildlife resources or greater fish production.

(e) Minor temporary use of land having negligible or no permanent effects on the environment, including carnivals, sales of Christmas trees, etc.

(f) Minor trenching and backfilling where the surface is restored.

(g) Maintenance dredging where the spoil is deposited in a spoil area authorized by all applicable state and federal regulatory agencies.

(h) The creation of bicycle lanes on existing rights-of-way.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15305. Minor Alterations in Land Use Limitations.

Class 5 consists of minor alterations in land use limitations in areas with an average slope of less than 20%, which do not result in any changes in land use or density, including but not limited to:

(a) Minor lot line adjustments, side yard, and set back variances not resulting in the creation of any new parcel;

(b) Issuance of minor encroachment permits;

(c) Reversion to acreage in accordance with the Subdivision Map Act.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15306. Information Collection.

Class 6 consists of basic data collection, research, experimental management, and resource evaluation activities which do not result in a serious or major disturbance to an environmental resource. These may be strictly for information gathering purposes, or as part of a study leading to an action which a public agency has not yet approved, adopted, or funded.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15307. Actions by Regulatory Agencies for Protection of Natural Resources.

Class 7 consists of actions taken by regulatory agencies as authorized by state law or local ordinance to assure the maintenance, restoration, or enhancement of a natural resource where the regulatory process involves procedures for protection of the environment. Examples include but are not limited to wildlife preservation activities of the State Department of Fish and Game. Construction activities are not included in this exemption.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15308. Actions by Regulatory Agencies for Protection of the Environment.

Class 8 consists of actions taken by regulatory agencies, as authorized by state or local ordinance, to assure the maintenance, restoration, enhancement, or protection of the environment where the regulatory process involves procedures for protection of the environment. Construction activities and relaxation of standards allowing environmental degradation are not included in this exemption.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code; International Longshoremen's and Warehousemen's Union v. Board of Supervisors, (1981) 116 Cal. App. 3d 265.

15309. Inspections.

Class 9 consists of activities limited entirely to inspections, to check for performance of an operation, or quality, health, or safety of a project, including related activities such as inspection for possible mislabeling, misrepresentation, or adulteration of products.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15310. Loans.

Class 10 consists of loans made by the Department of Veterans Affairs under the Veterans Farm and Home Purchase Act of 1943, mortgages for the purchase of existing structures where the loan will not be used for new construction and the purchase of such mortgages by financial institutions. Class 10 includes but is not limited to the following examples:

(a) Loans made by the Department of Veterans Affairs under the Veterans Farm and Home Purchase Act of 1943.

(b) Purchases of mortgages from banks and mortgage companies by the Public Employees Retirement System and by the State Teachers Retirement System.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15311. Accessory Structures.

Class 11 consists of construction, or placement of minor structures accessory to (appurtenant to) existing commercial, industrial, or institutional facilities, including but not limited to:

(a) On-premise signs;

(b) Small parking lots;

(c) Placement of seasonal or temporary use items such as lifeguard towers, mobile food units, portable restrooms, or similar items in generally the same locations from time to time in publicly owned parks, stadiums, or other facilities designed for public use.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15312. Surplus Government Property Sales.

Class 12 consists of sales of surplus government property except for parcels of land located in an area of statewide, regional, or areawide concern identified in Section 15207(b)(4). However, even if the surplus property to be sold is located in any of those areas, its sale is exempt if:

(a) The property does not have significant values for wildlife habitat or other environmental purposes, and

(b) Any of the following conditions exist:

(1) The property is of such size, shape, or inaccessibility that it is incapable of independent development or use; or

(2) The property to be sold would qualify for an exemption under any other class of categorical exemption in these guidelines; or

(3) The use of the property and adjacent property has not changed since the time of purchase by the public agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15313. Acquisition of Lands for Wildlife Conservation Purposes.

Class 13 consists of the acquisition of lands for fish and wildlife conservation purposes including preservation of fish and wildlife habitat, establishing ecological reserves under Fish and Game Code Section 1580, and preserving access to public lands and waters where the purpose of the acquisition is to preserve the land in its natural condition.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15314. Minor Additions to Schools.

Class 14 consists of minor additions to existing schools within existing school grounds where the addition does not increase original student capacity by more than 25% or ten classrooms, whichever is less. The addition of portable classrooms is included in this exemption.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15315. Minor Land Divisions.

Class 15 consists of the division of property in urbanized areas zoned for residential, commercial, or industrial use into four or fewer parcels when the division is in conformance with the General Plan and zoning, no variances or exceptions are required, all services and access to the proposed parcels to local standards are available, the parcel was not involved in a division of a larger parcel within the previous 2 years, and the parcel does not have an average slope greater than 20 percent.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15316. Tranfer of Ownership of Land in Order to Create Parks.

Class 16 consists of the acquisition or sale of land in order to establish a park where the land is in a natural condition or contains historic sites or archaelogical sites and either:

(a) The management plan for the park has not been prepared, or

(b) The management plan proposes to keep the area in a natural condition or preserve the historical or archaeological site. CEQA will apply when a management plan is proposed that will change the area from its natural condition or significantly change the historic or archaeological site.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15317. Open Space Contracts or Easements.

Class 17 consists of the establishment of agricultural preserves, the making and renewing of open space contracts under the Williamson Act, or the acceptance of easements or fee interests in order to maintain the open space character of the area. The cancellation of such preserves, contracts, interests, or easements is not included and will normally be an action subject to the CEQA process.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15318. Designation of Wilderness Areas.

Class 18 consists of the designation wilderness areas under the California Wilderness System.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15319. Annexations of Existing Facilities and Lots for Exempt Facilities.

Class 19 consists of only the following annexations:

(a) Annexations to a city or special district of areas containing existing public or private structures developed to the density allowed by the current zoning or pre-zoning of either the gaining or losing governmental agency whichever is more restrictive, provided, however, that the extension of utility services to the existing facilities would have a capacity to serve only the existing facilities.

(b) Annexations of individual small parcels of the minimum size for facilities exempted by Section 15303, New Construction or Conversion of Small Structures.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15320. Changes in Organization of Local Agencies.

Class 20 consists of changes in the organization or reorganization of local governmental agencies where the changes do not change the geographical area in which previously existing powers are exercised. Examples include but are not limited to:

(a) Establishment of a subsidiary district.

(b) Consolidation of two or more districts having identical powers.

(c) Merger with a city of a district lying entirely within the boundaries of the city.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15321. Enforcement Actions by Regulatory Agencies.

Class 21 consists of:

(a) Actions by regulatory agencies to enforce or revoke a lease, permit, license, certificate, or other entitlement for use issued, adopted, or prescribed by the regulatory agency or enforcement of a law, general rule, standard, or objective, administered or adopted by the regulatory agency. Such actions include, but are not limited to, the following:

(1) The direct referral of a violation of lease, permit, license, certificate, or entitlement for use or of a general rule, standard, or objective to the Attorney General, District Attorney, or City Attorney as appropriate, for judicial enforcement.

(2) The adoption of an administrative decision or order enforcing or revoking the lease, permit, license, certificate, or entitlement for use or enforcing the general rule, standard, or objective.

(b) Law enforcement activities by peace officers acting under any law that provides a criminal sanction.

(c) Construction activities undertaken by the public agency taking the enforcement or revocation action are not included in this exemption.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15322. Educational or Training Programs Involving No Physical Changes.

Class 22 consists of the adoption, alteration, or termination of educational or training programs which involve no physical alteration in the area affected or which involve physical changes only in the interior of existing school or training structures. Examples include but are not limited to:

(a) Development of or changes in curriculum or training methods.
(b) Changes in the grade structure in a school which do not result in changes in student transportation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15323. Normal Operations of Facilities for Public Gatherings.

Class 23 consists of the normal operations of existing facilities for public gatherings for which the facilities were designed, where there is a past history of the facility being used for the same or similar kind of purpose. For the purposes of this section, "past history" shall mean that the same or similar kind of activity has been occurring for at least three years and that there is a reasonable expectation that the future occurrence of the activity would not represent a change in the operation of the facility. Facilities included within this exemption include, but are not limited to, racetracks, stadiums, convention centers, auditoriums, amphitheaters, planetariums, swimming pools, and amusement parks.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15324. Regulations of Working Conditions.

Class 24 consists of actions taken by regulatory agencies, including the Industrial Welfare Commission as authorized by statute, to regulate any of the following:

(a) Employee wages,
(b) Hours of work, or
(c) Working conditions where there will be no demonstrable physical changes outside the place of work.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15325. Transfers of Ownership of Interest in Land to Preserve Open Space.

Class 25 consists of the transfers of ownership of interests in land in order to preserve open space. Examples include but are not limited to:

(a) Acquisition of areas to preserve the existing natural conditions.
(b) Acquisition of areas to allow continued agricultural use of the areas.
(c) Acquisition to allow restoration of natural conditions.
(d) Acquisition to prevent encroachment of development into flood plains.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15326. Acquisition of Housing for Housing Assistance Programs.

Class 26 consists of actions by a redevelopment agency, housing authority, or other public agency to implement an adopted Housing Assistance Plan by acquiring an interest in housing units. The housing units may be either in existence or possessing all required permits for construction when the agency makes its final decision to acquire the units.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15327. Leasing New Facilities.

(a) Class 27 consists of the leasing of a newly constructed or previously unoccupied privately owned facility by a local or state agency where the local governing authority determined that the building was exempt from CEQA. To be exempt under this section, the proposed use of the facility:

(1) Shall be in conformance with existing state plans and policies and with general, community, and specific plans for which an EIR or negative declaration has been prepared,

(2) Shall be substantially the same as that originally proposed at the time the building permit was issued,

(3) Shall not result in a traffic increase of greater than 10% of front access road capacity, and

(4) Shall include the provision of adequate employee and visitor parking facilities.

(b) Examples of Class 27 include, but are not limited to:

(1) Leasing of administrative offices in newly constructed office space.

(2) Leasing of client service offices in newly constructed retail space.

(3) Leasing of administrative and/or client service offices in newly constructed industrial parks.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15328. Small Hydroelectric Projects at Existing Facilities.

Class 28 consists of the installation of hydroelectric generating facilities in connection with existing dams, canals, and pipelines where:

(a) The capacity of the generating facilities is 5 megawatts or less,

(b) Operation of the generating facilities will not change the flow regime in the affected stream, canal, or pipeline including but not limited to:

(1) Rate and volume of flow,

(2) Temperature,

(3) Amounts of dissolved oxygen to a degree that could adversely affect aquatic life, and

(4) Timing of release.

(c) New power lines to connect the generating facilities to existing power lines will not exceed one mile in length if located on a new right of way and will not be located adjacent to a wild or scenic river.

(d) Repair or reconstruction of the diversion structure will not raise the normal maximum surface elevation of the impoundment.

(e) There will be no significant upstream or downstream passage of fish affected by the project.

(f) The discharge from the power house will not be located more than 300 feet from the toe of the diversion structure.

(g) The project will not cause violations of applicable state or federal water quality standards.

(h) The project will not entail any construction on or alteration of a site included in or eligible for inclusion in the National Register of Historic Places, and

(i) Construction will not occur in the vicinity of any rare or endangered species.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21084, Public Resources Code.

15329. Cogeneration Projects at Existing Facilities.

Class 29 consists of the installation of cogeneration equipment with a capacity of 50 megawatts or less at existing facilities meeting the conditions described in this section.

(a) At existing industrial facilities, the installation of cogeneration facilities will be exempt where it will:

(1) Result in no net increases in air emissions from the industrial facility, or will produce emissions lower than the amount that would require review under the new source review rules applicable in the county, and

(2) Comply with all applicable state, federal, and local air quality laws.

(b) At commercial and industrial facilities, the installation of cogeneration facilities will be exempt if the installation will:

(1) Meet all the criteria described in Subsection (a),

(2) Result in no noticeable increase in noise to nearby residential structures,

(3) Be contiguous to other commercial or institutional structures.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

Article 20. Definitions

15350. General.

The definitions contained in this article apply to terms used throughout the guidelines unless a term is otherwise defined in a particular section.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083, Public Resources Code.

HISTORY:

1. New Article 20 (Sections 15350–15387) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).

2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15351. Applicant.

"Applicant" means a person who proposes to carry out a project which needs a lease, permit, license, certificate, or other entitlement for use or financial assistance from one or more public agencies when that person applies for the governmental approval or assistance.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21065, Public Resources Code.

15352. Approval.

(a) "Approval" means the decision by a public agency which commits the agency to a definite course of action in regard to a project intended to be carried out by any person. The exact date of approval of any project is a matter determined by each public agency according to its rules, regulations, and ordinances. Legislative action in regard to a project often constitutes approval.

(b) With private projects, approval occurs upon the earliest commitment to issue or the issuance by the public agency of a discretionary contract, grant, subsidy, loan, or other form of financial assistance, lease, permit, license, certificate, or other entitlement for use of the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061 and 21065, Public Resources Code.

15353. CEQA.

"CEQA" means the California Environmental Quality Act, California Public Resources Code Sections 21000 et seq.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21050, Public Resources Code.

15354. Categorical Exemption.

"Categorical exemption" means an exemption from CEQA for a class of projects based on a finding by the Secretary for Resources that the class of projects does not have a significant effect on the environment.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(b)(10) and 21084, Public Resources Code.

15355. Cumulative Impacts.

"Cumulative impacts" refer to two or more individual effects which, when considered together, are considerable or which compound or increase other environmental impacts.

(a) The individual effects may be changes resulting from a single project or a number of separate projects.

(b) The cumulative impact from several projects is the change in the environment which results from the incremental impact of the project when added to other closely related past, present, and reasonably foreseeable probable future projects. Cumulative impacts can result from individually minor but collectively significant projects taking place over a period of time.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083(b), Public Resources Code; Whitman v. Board of Supervisors, 88 Cal. App. 3d 397.

15356. Decision-Making Body.

"Decision-making body" means any person or group of people within a public agency permitted by law to approve or disapprove the project at issue.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21003(b), Public Resources Code; Kleist v. City of Glendale (1976) 56 Cal. App. 3d 770.

15357. Discretionary Project

"Discretionary project" means a project which requires the exercise of judgment or deliberation when the public agency or body decides to approve or disapprove a particular activity, as distinguished from situations where the public agency or body merely has to determine whether there has been conformity with applicable statutes, ordinances, or regulations. A timber harvesting plan submitted to the State Forester for approval under the requirments of the Z'berg-Nejedly Forest Practice Act of 1973 (Pub. Res. Code Sections 4511 et seq.) constitutes a discretionary project within the meaning of the California Environmental Quality Act. Section 21065(c).

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(a), Public Resources Code; Johnson v. State of California (1968) 69 Cal. 2d 782; People v. Department of Housing and Community Development (1975) 45 Cal. App. 3d 185; Day v. City of Glendale (1975) 51 Cal. App. 3d 817; N.R.D.C. v. Arcata National Corp. (1976) 59 Cal. App. 3d 959.

15358. Effects.

"Effects" and "impacts" as used in these guidelines are synonymous.

(a) Effects include:

(1) Direct or primary effects which are caused by the project and occur at the same time and place.

(2) Indirect or secondary effects which are caused by the project and are later in time or farther removed in distance, but are still reasonably foreseeable. Indirect or secondary effects may include growth-inducing effects and other effects related to induced changes in the pattern of land use, population density, or growth rate, and related effects on air and water and other natural systems, including ecosystems.

(b) Effects analyzed under CEQA must be related to a physical change.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21068 and 21100, Public Resources Code.

15359. Emergency.

"Emergency" means a sudden, unexpected occurrence, involving a clear and imminent danger, demanding immediate action to prevent or mitigate loss of, or damage to life, health, property, or essential public services. Emergency includes such occurrences as fire, flood, earthquake, or other soil or geologic movements, as well as such occurrences as riot, accident, or sabotage.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(2), (3) and (4), Public Resources Code.

15360. Environment.

"Environment" means the physical conditions which exist within the area which will be affected by a proposed project including land, air, water, minerals, flora, fauna, ambient noise, and objects of historic or aesthetic significance. The area involved shall be the area in which significant effects would occur either directly or indirectly as a result of the project. The "environment" includes both natural and man-made conditions.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21060.5, Public Resources Code.

15361. Environmental Documents.

"Environmental documents" means initial studies, negative declarations, draft and final EIRs, documents prepared as substitutes for EIRs and negative declarations under a program certified pursuant to Public Resources Code Section 21080.5, and documents prepared under NEPA and used by a state or local agency in the place of an initial study, negative declaration, or an EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061, 21080(b), 21080.5, 21108 and 21152, Public Resources Code.

15362. EIR—Environmental Impact Report.

"EIR" or "environmental impact report" means a detailed statement prepared under CEQA describing and analyzing the significant environmental effects of a project and discussing ways to mitigate or avoid the effects. The contents of an EIR are discussed in Article 9, commencing with Section 15120 of these guidelines. The term "EIR" may mean either a draft or a final EIR depending on the context.

(a) Draft EIR means an EIR containing the information specified in Sections 15122 through 15131.

(b) Final EIR means an EIR containing the information contained in the draft EIR, comments either verbatim or in summary received in the review process, a list of persons commenting, and the response of the lead agency to the comments received. The final EIR is discussed in detail in Section 15132.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061, 21100 and 21151, Public Resources Code.

15363. EIS—Environmental Impact Statement.

"EIS" or "Environmental Impact Statement" means an environmental impact document prepared pursuant to the National Environmental Policy Act (NEPA). NEPA uses the term EIS in the place of the term EIR which is used in CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.5, 21083.6 and 21083.7, Public Resources Code; 43 U.S.C.A. 4322(2) (c).

15364. Feasible.

"Feasible" means capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, legal, social, and technological factors.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1, 21004, 21061.1, 21080.5 and 21081, Public Resources Code; Section 4, Chapter 1438 of the Statutes of 1982.

15365. Initial Study.

"Initial study" means a preliminary analysis prepared by the lead agency to determine whether an EIR or a negative declaration must be prepared or to identify the significant environmental effects to be analyzed in an EIR. Use of the initial study is discussed in Article 5, commencing with Section 15060.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.1, 21080.2, 21080.3 and 21100, Public Resources Code.

15366. Jurisdiction by Law.

(a) "Jurisdiction by law" means the authority of any public agency:

(1) To grant a permit or other entitlement for use,

(2) To provide funding for the project in question, or

(3) To exercise authority over resources which may be affected by the project.

(b) A city or county will have jurisdiction by law with respect to a project when the city or county having primary jurisdiction over the area involved is:

(1) The site of the project;

(2) The area in which the major environmental effects will occur; and/or

(3) The area in which reside those citizens most directly concerned by any such environmental effects.

(c) Where an agency having jurisdiction by law must exercise discretionary authority over a project in order for the project to proceed, it is also a responsible agency, see Section 15381, or the lead agency, see Section 15367.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.3, 21080.4, 21104 and 21153, Public Resources Code.

15367. Lead Agency.

"Lead agency" means the public agency which has the principal responsibility for carrying out or approving a project. The lead agency will decide whether an EIR or negative declaration will be required for the project and will cause the document to be prepared. Criteria for determining which agency will be the lead agency for a project are contained in Section 15051.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21165, Public Resources Code.

15368. Local Agency.

"Local agency" means any public agency other than a state agency, board, or commission. Local agency includes but is not limited to cities, counties, charter cities and counties, districts, school districts, special districts, redevelopment agencies, local agency formation commissions, and any board, commission, or organizational subdivision of a local agency when so designated by order or resolution of the governing legislative body of the local agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21062 and 21151, Public Resources Code.

15369. Ministerial.

"Ministerial" describes a governmental decision involving little or no personal judgment by the public official as to the wisdom or manner of carrying out the project. The public official merely applies the law to the facts as presented but uses no special discretion or judgment in reaching a decision. A ministerial decision involves only the use of fixed standards or objective measurements, and the public official cannot use personal, subjective judgment in deciding whether or how the project should be carried out. Common examples of ministerial permits include automobile registrations, dog licenses, and marriage licenses. A building permit is ministerial if the ordinance requiring the permit limits the public official to determining whether the zoning allows the structure to be built in the requested location, the structure would meet the strength requirements in the Uniform Building Code, and the applicant has paid his fee.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(1), Public Resources Code; *Johnson* v. *State of California*, 69 Cal. 2d 782; *Day* v. *City of Glendale*, 51 Cal. App. 3d 817.

15370. Mitigation.

"Mitigation" includes:

(a) Avoiding the impact altogether by not taking a certain action or parts of an action.

(b) Minimizing impacts by limiting the degree or magnitude of the action and its implementation.

(c) Rectifying the impact by repairing, rehabilitating, or restoring the impacted environment.

(d) Reducing or eliminating the impact over time by preservation and maintenance operations during the life of the action.

(e) Compensating for the impact by replacing or providing substitute resources or environments.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1, 21081 and 21100(c), Public Resources Code.

15371. Negative Declaration.

"Negative declaration" means a written statement by the lead agency briefly describing the reasons that a proposed project, not exempt from CEQA, will not have a significant effect on the environment and therefore does not require the preparation of an EIR. The contents of a negative declaration are described in Section 15071.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(c), Public Resources Code.

15372. Notice of Completion.

"Notice of completion" means a brief notice filed with the Secretary for Resources by a lead agency as soon as it has completed a draft EIR and is prepared to send out copies for review. The contents of this notice are explained in Section 15085.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21161, Public Resources Code.

15373. Notice of Determination.

"Notice of determination" means a brief notice to be filed by a public agency after it approves or determines to carry out a project which is subject to the requirements of CEQA. The contents of this notice are explained in Sections 15075 and 15094.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108(a) and 21152, Public Resources Code.

15374. Notice of Exemption.

"Notice of exemption" means a brief notice which may be filed by a public agency after it has decided to carry out or approve a project and has determined that the project is exempt from CEQA as being ministerial, categorically exempt, an emergency, or subject to another exemption from CEQA. Such a notice may also be filed by an applicant where such a determination has been made by a public agency which must approve the project. The contents of this notice are explained in Section 15062.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108(b) and 21152(b), Public Resources Code.

15375. Notice of Preparation.

"Notice of preparation" means a brief notice sent by a lead agency to notify the responsible agencies, trustee agencies, and involved federal agencies that the lead agency plans to prepare an EIR for the project. The purpose of the notice is to solicit guidance from those agencies as to the scope and content of the environmental information to be included in the EIR. Public agencies are free to develop their own formats for this notice. The contents of this notice are described in Section 15082.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

15376. Person.

"Person" includes any person, firm, association, organization, partnership, business, trust, corporation, company, district, city, county, city and county, town, the state, and any of the agencies or political subdivisions of such entities.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21065, Public Resources Code.

15377. Private Project.

A "private project" means a project which will be carried out by a person other than a governmental agency, but the project will need a discretionary approval from one or more governmental agencies for:

(a) A contract or financial assistance, or
(b) A lease, permit, license, certificate, or other entitlement for use.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21065, Public Resources Code.

15378. Project.

(a) "Project" means the whole of an action, which has a potential for resulting in a physical change in the environment, directly or ultimately, and that is any of the following:

(1) An activity directly undertaken by any public agency including but not limited to public works construction and related activities clearing or grading of land, improvements to existing public structures, enactment and amendment of zoning ordinances, and the adoption and amendment of local General Plans or elements thereof pursuant to Government Code Sections 65100–65700.

(2) An activity undertaken by a person which is supported in whole or in part through public agency contracts, grants, subsidies, loans, or other forms of assistance from one or more public agencies.

(3) An activity involving the issuance to a person of a lease, permit, license, certificate, or other entitlement for use by one or more public agencies.

(b) Project does not include:

(1) Anything specifically exempted by state law;

(2) Proposals for legislation to be enacted by the State Legislature;

(3) Continuing administrative or maintenance activities, such as purchases for supplies, personnel-related actions, emergency repairs to public service facilities, general policy and procedure making (except as they are applied to specific instances covered above);

(4) The submittal of proposals to a vote of the people of the state or of a particular community. (Stein v. City of Santa Monica, 110 Cal. App. 3d 458);

(5) The closing of a public school and the transfer of students to another school where the only physical changes involved are categorically exempt. (Prentiss v. Board of Education, 111 Cal. App. 3d 847; But see, Fullerton Joint Union High School District v. State Board of Education (Dec. 2, 1982) Cal. 3d, Slip Opinion Footnote 16 at page 27.)

(c) The term "project" refers to the activity which is being approved and which may be subject to several discretionary approvals by governmental agencies. The term "project" does not mean each separate governmental approval.

(d) Where the lead agency could describe the project as either the adoption of a particular regulation under Subsection (a) (1) or as a development proposal which will be subject to several governmental approvals under Subsections (a) (2) or (a) (3), the lead agency shall describe the project as the development proposal for the purpose of environmental analysis. This approach will implement the lead agency principle as described in Article 4.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21065, Public Resources Code.

15379. Public Agency.

"Public agency" includes any state agency, board, or commission and any local or regional agency, as defined in these guidelines. It does not include the courts of the state. This term does not include agencies of the federal government.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21063, Public Resources Code.

15380. Rare or Endangered Species.

(a) "Species" as used in this section means a species or subspecies of animal or plant or a variety of plant.

(b) A species of animal or plant is:

(1) "Endangered" when its survival and reproduction in the wild are in immediate jeopardy from one or more causes, including loss of habitat, change in habitat, overexploitation, predation, competition, disease, or other factors; or

(2) "Rare" when either:

(A) Although not presently threatened with extinction, the species is existing in such small numbers throughout all or a significant portion of its range that it may become endangered if its environment worsens; or

(B) The species is likely to become endangered within the foreseeable future throughout all or a significant portion of its range and may be considered "threatened" as that term is used in the Federal Endangered Species Act.

(c) A species of animal or plant shall be presumed to be rare or endangered as it is listed in:

(1) Sections 670.2 or 670.5, Title 14, California Administrative Code; or

(2) Title 50, Code of Federal Regulations Sections 17.11 or 17.12 pursuant to the Federal Endangered Species Act as rare, threatened, or endangered.

(d) A species not included in any listing identified in subsection (c) shall nevertheless be considered to be rare or endangered if the species can be shown to meet the criteria in subsection (b).

(e) This definition shall not include any species of the Class Insecta which is a pest whose protection under the provisions of CEQA would present an overwhelming and overriding risk to man as determined by:

(1) The Director of Food and Agriculture with regard to economic pests; or

(2) The Director of Health Services with regard to health risks.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21001(c), Public Resources Code; and Sections 1900–1913 and 2050–2055, Fish and Game Code.

15381. Responsible Agency.

"Responsible agency" means a public agency which proposes to carry out or approve a project, for which a lead agency is preparing or has prepared an EIR or negative declaration. For the purposes of CEQA, the term "responsible agency" includes all public agencies other than the lead agency which have discretionary approval power over the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002.1, 21069, 21080.1, 21080.3, 21080.4, 21167.2 and 21167.3, Public Resources Code.

15382. Significant Effect on the Environment.

"Significant effect on the environment" means a substantial, or potentially substantial, adverse change in any of the physical conditions within the area affected by the project including land, air, water, minerals, flora, fauna, ambient noise, and objects of historic or aesthetic significance. An economic or social change by itself shall not be considered a significant effect on the environment. A social or economic change related to a physical change may be considered in determining whether the physical change is significant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21068, 21083, 21100 and 21151, Public Resources Code; *Hecton* v. *People of the State of California,* 58 Cal. App. 3d 653.

15383. State Agency.

"State agency" means a governmental agency in the executive branch of the State Government or an entity which operates under the direction and control of an agency in the executive branch of State Government and is funded primarily by the State Treasury.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code.

15384. Substantial Evidence.

(a) "Substantial evidence" as used in these guidelines means enough relevant information and reasonable inferences from this information that a fair argument can be made to support a conclusion, even though other conclusions might also be reached. Whether a fair argument can be made is to be determined by examining the entire record. Mere uncorroborated opinion or rumor does not constitute substantial evidence.

(b) This definition is intended to be informative and does not constitute a change in, but is merely reflective of, existing law.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21168 and 21168.5, Public Resources Code; *No Oil, Inc.* v. *City of Los Angeles* (1974) 13 Cal. 3d 68; *Running Fence Corp.* v. *Superior Court* (1975) 51 Cal. App. 3d 400; *Friends of B Street* v. *City of Hayward* (1980) 106 Cal. App. 3d 988.

15385. Tiering.

"Tiering" refers to the coverage of general matters in broader EIRs (such as on general plans or policy statements) with subsequent narrower EIRs or ultimately site-specific EIRs incorporating by reference the general discussions and concentrating solely on the issues specific to the EIR subsequently prepared. Tiering is appropriate when the sequence of EIRs is:

(a) From a general plan, policy, or program EIR to a program, plan, or policy EIR of lesser scope or to a site-specific EIR.

(b) From an EIR on a specific action at an early stage to a subsequent EIR or a supplement to an EIR at a later stage. Tiering in such cases is appropriate when it helps the lead agency to focus on the issues which are ripe for decision and exclude from consideration issues already decided or not yet ripe.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

15386. Trustee Agency.

"Trustee agency" means a state agency having jurisdiction by law over natural resources affected by a project which are held in trust for the people of the State of California. Trustee agencies include:

(a) The California Department of Fish and Game with regard to the fish and wildlife of the state, to designated rare or endangered native plants, and to game refuges, ecological reserves, and other areas administered by the department.

(b) The State Lands Commission with regard to state owned "sovereign" lands such as the beds of navigable waters and state school lands.

(c) The State Department of Parks and Recreation with regard to units of the State Park System.

(d) The University of California with regard to sites within the Natural Land and Water Reserves System.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.3 and 21080.4, Public Resources Code.

15387. Urbanized Area.

"Urbanized area" means a central city or a group of contiguous cities with a population of 50,000 or more, together with adjacent densely populated areas having a population density of at least 1,000 persons per square mile. A lead agency shall determine whether a particular area meets the criteria in this section either by examining the area or by referring to a map prepared by the U.S. Bureau of the Census which designates the area as urbanized. Maps of the designated urbanized areas can be found in the California EIR Monitor of February 7, 1979. The maps are also for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The maps are sold in sets only as Stock Number 0301-3466. Use of the term "urbanized area" in Section 15182 is limited to areas mapped and designated as urbanized by the U.S. Bureau of the Census.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.7, 21083 and 21084, Public Resources Code.

APPENDIX B FOOTNOTES

No.

1. *Food and Agriculture*—Effects on plants and animals.
2. *Food and Agriculture*—Protection of food and fiber.
3. *Food and Agriculture*—Agricultural, dairy and feed lot systems.
4. *Food and Agriculture*—As pertains to transportation, handling, storage and decontamination of pesticides.
5. *Food and Agriculture*—Pesticide effects, predatory animal control, bird control.
6. *California Highway Patrol*—Enforcement of motor vehicle regulations.
7. *Health Services*—Beach sanitation, water pollution, solid waste and mosquito control.
8. *Health Services*—Pertains to health component.
9. *Health Services*—Most of these are strongly related to health.
10. *Health Services*—Pertains to noise.
11. *Health Services*—Pertains to personal and environmental health components.
12. Health Services—As it may pertain to human health hazards.
13. *Health Services*—Pertains to comprehensive health planning.
14. *Colorado River Board*—As pertains to the Colorado, New and Alamo Rivers.
15. *Fish and Game*—As field development and distribution systems may affect fish and wildlife.
16. *Fish and Game*—As may affect migrating and resident wildlife.
17. *Fish and Game*—As excessive noise may affect wildlife.
18. *Fish and Game*—As water quality may affect fish and wildlife.
19. *Parks and Recreation*—In impacted areas only.
20. *Reclamation Board*—In areas of Board's jurisdiction only—the Sacramento-San Joaquin Valley.
21. *State Water Resources Control Board*—As may pertain to water quality.
22. *Forestry*—With respect to forest land.
23. *Forestry*—(6) and (32)—As related to fire protection or State (fire protection) responsibility land.
24. *Air Resources Board*—(4), (22), (32), (33), and (36)—As may pertain to residential, commercial, industrial or transportation growth.
25. *San Francisco Bay Conservation and Development Commission*—(3), (17), (19), and (30)—With respect to San Francisco Bay, Suisun Bay and adjacent shore areas.
26. *California Coastal Commission*—(3), (4), (6), (8), (11), (12), (14), (15), (17), (19), (22), (23), (26), (29), (30), (31), (34), (35), and (36)—With respect to effects within the California Coastal Zone.
27. *California Tahoe Regional Planning Agency*—With respect to effects in the Tahoe Basin.
28. *Native American Heritage Commission*—With respect to places of special religious or social significance to Native Americans including archaeological sites, cemeteries, and places of worship.

Appendix F

ENERGY CONSERVATION

I. Introduction

The goal of conserving energy implies the wise and efficient use of energy. The means of achieving this goal include:

(1) decreasing overall per capita energy consumption,
(2) decreasing reliance on natural gas and oil, and
(3) increasing reliance on renewable energy sources.

In order to assure that energy implications are considered in project decisions, the California Environmental Quality Act requires that EIRs include a discussion of the potential energy impacts of proposed projects, with particular emphasis on avoiding or reducing inefficient, wasteful and unnecessary consumption of energy.

Energy conservation implies that a project's cost effectiveness be reviewed not only in dollars, but also in terms of energy requirements. For many projects, lifetime costs may be determined more by energy efficiency than by initial dollar costs.

II. EIR Contents

Potentially significant energy implications of a project should be considered in an EIR. The following list of energy impact possibilities and potential conservation measures is designed to assist in the preparation of an EIR. In many instances specific items may not apply or additional items may be needed.

A. Project Description may include the following items:

1. Energy consuming equipment and processes which will be used during construction, operation and/or removal of the project. If appropriate, this discussion should consider the energy intensiveness of materials and equipment required for the project.
2. Total energy requirements of the project by fuel type and end use.
3. Energy conservation equipment and design features.
4. Initial and life-cycle energy costs or supplies.
5. Total estimated daily trips to be generated by the project and the additional energy consumed per trip by mode.

B. Environmental Setting may include existing energy supplies and energy use patterns in the region and locality.

C. Environmental Impacts may include:

1. The project's energy requirements and its energy use efficiencies by amount and fuel type for each stage of the project's life cycle including construction, operation, maintenance and/or removal. If appropriate, the energy intensiveness of materials may be discussed.

2. The effects of the project on local and regional energy supplies and on requirements for additional capacity.

3. The effects of the project on peak and base period demands for electricity and other forms of energy.

4. The degree to which the project complies with existing energy standards.

5. The effects of the project on energy resources.

6. The project's projected transportation energy use requirements and its overall use of efficient transportation alternatives.

D. Mitigation Measures may include:

1. Potential measures to reduce wasteful, inefficient and unnecessary consumption of energy during construction, operation, maintenance and/or removal. The discussion should explain why certain measures were incorporated in the project and why other measures were dismissed.

2. The potential of siting, orientation, and design to minimize energy consumption, including transportation energy.

3. The potential for reducing peak energy demand.

4. Alternate fuels (particularly renewable ones) or energy systems.

5. Energy conservation which could result from recycling efforts.

E. Alternatives should be compared in terms of overall energy consumption and in terms of reducing wasteful, inefficient and unnecessary consumption of energy.

F. Unavoidable Adverse Effects may include wasteful, inefficient and unnecessary consumption of energy during the project construction, operation, maintenance and/or removal that cannot be feasibly mitigated.

G. Irreversible Commitment of Resources may include a discussion of how the project preempts future energy development or future energy conservation.

H. Short-Term Gains versus Long-Term Impacts can be compared by calculating the energy costs over the lifetime of the project.

I. Growth Inducing Effects may include the estimated energy consumption of growth induced by the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176. Public Resources Code.

HISTORY:

1. New Appendix F filed 12-31-74 as an emergency; designated effective 1-7-75 (Register 75, No. 1).

2. Certificate of Compliance filed 4-29-75 (Register 75, No. 18).

3. Repealer and new Appendix F filed 10-8-76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designates that compliance with this appendix is authorized but not mandatory before 1-1-77.

4. Amendment of Section II filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

Appendix G

SIGNIFICANT EFFECTS

A project will normally have a significant effect on the environment if it will:

(a) Conflict with adopted environmental plans and goals of the community where it is located;

(b) Have a substantial, demonstrable negative aesthetic effect;

(c) Substantially affect a rare or endangered species of animal or plant or the habitat of the species;

(d) Interfere substantially with the movement of any resident or migratory fish or wildlife species;

(e) Breach published national, state, or local standards relating to solid waste or litter control;

(f) Substantially degrade water quality;

(g) Contaminate a public water supply;

(h) Substantially degrade or deplete ground water resources;

(i) Interfere substantially with ground water recharge;

(j) Disrupt or adversely affect a prehistoric or historic archaeological site or a property of historic or cultural significance to a community or ethnic or social group; or a paleontological site except as a part of a scientific study;

(k) Induce substantial growth or concentration of population;

(l) Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system;

(m) Displace a large number of people;

(n) Encourage activities which result in the use of large amounts of fuel, water, or energy;

(o) Use fuel, water, or energy in a wasteful manner;

(p) Increase substantially the ambient noise levels for adjoining areas;

(q) Cause substantial flooding, erosion or siltation;

(r) Expose people or structures to major geologic hazards;

(s) Extend a sewer trunk line with capacity to serve new development;

(t) Substantially diminish habitat for fish, wildlife or plants;

(u) Disrupt or divide the physical arrangement of an established community;

(v) Create a potential public health hazard or involve the use, production or disposal of materials which pose a hazard to people or animal or plant populations in the area affected;

(w) Conflict with established recreational, educational, religious or scientific uses of the area;

(x) Violate any ambient air quality standard, contribute substantially to an existing or projected air quality violation, or expose sensitive receptors to substantial pollutant concentrations.

(y) Convert prime agricultural land to non-agricultural use or impair the agricultural productivity of prime agricultural land.

(z) Interfere with emergency response plans or emergency evacuation plans.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. New Appendix G filed 10-8-76; effective thirtieth day thereafter (Register 76, No 41). NOTE: Order designated that compliance with this appendix is authorized but not mandatory before 1-1-77.

2. Amendment of subsections (n) and (o) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

3. Amendment of subsections (j) and (v) and new subsections (y) and (z) filed 5-8-80; effective thirtieth day thereafter (Register 80, No. 19).

Appendix H

ENVIRONMENTAL INFORMATION FORM

(To be completed by applicant)

Date Filed _____

GENERAL INFORMATION

1. Name and address of developer or project sponsor: _____

2. Address of project: _____
Assessor's Block and Lot Number _____

3. Name, address, and telephone number of person to be contacted concerning this project: _____

4. Indicate number of the permit application for the project to which this form pertains: _____

5. List and describe any other related permits and other public approvals required for this project, including those required by city, regional, state and federal agencies: _____

6. Existing zoning district: _____

7. Proposed use of site (Project for which this form is filed): _____

PROJECT DESCRIPTION

8. Site size.
9. Square footage.
10. Number of floors of construction.
11. Amount of off-street parking provided.
12. Attach plans.
13. Propose scheduling.
14. Associated projects.
15. Anticipated incremental development.
16. If residential, include the number of units, schedule of unit sizes, range of sale prices or rents, and type of household size expected.
17. If commercial, indicate the type, whether neighborhood, city or regionally oriented, square footage of sales area, and loading facilities.
18. If industrial, indicate type, estimated employment per shift, and loading facilities.
19. If institutional, indicate the major function, estimated employment per shift, estimated occupancy, loading facilities, and community benefits to be derived from the project.
20. If the project involves a variance, conditional use or rezoning application, state this and indicate clearly why the application is required.

Are the following items applicable to the project or its effects? Discuss below all items checked yes (attach additional sheets as necessary).

YES NO

___ ___ 21. Change in existing features of any bays, tidelands, beaches, lakes or hills, or substantial alteration of ground contours.

___ ___ 22. Change in scenic views or vistas from existing residential areas or public lands or roads.

___ ___ 23. Change in pattern, scale or character of general area of project.

___ ___ 24. Significant amounts of solid waste or litter.

___ ___ 25. Change in dust, ash, smoke, fumes or odors in vicinity.

___ ___ 26. Change in ocean, bay, lake, stream or ground water quality or quantity, or alteration of existing drainage patterns.

___ ___ 27. Substantial change in existing noise or vibration levels in the vicinity.

___ ___ 28. Site on filled land or on slope of 10 percent or more.

___ ___ 29. Use of disposal of potentially hazardous materials, such as toxic substances, flammables or explosives.

___ ___ 30. Substantial change in demand for municipal services (police, fire, water, sewage, etc.).

___ ___ 31. Substantially increase fossil fuel consumption (electricity, oil, natural gas, etc.).

___ ___ 32. Relationship to a larger project or series of projects.

ENVIRONMENTAL SETTING

33. Describe the project site as it exists before the project, including information on topography, soil stability, plants and animals, and any cultural, historical or scenic aspects. Describe any existing structures on the site, and the use of the structures. Attach photographs of the site. Snapshots or polaroid photos will be accepted.

34. Describe the surrounding properties, including information on plants and animals and any cultural, historical or scenic aspects. Indicate the type of land use (residential, commercial, etc.), intensity of land use (one-family, apartment houses, shops, department stores, etc.), and scale of development (height, frontage, set-back, rear yard, etc.). Attach photographs of the vicinity. Snapshots or polaroid photos will be accepted.

CERTIFICATION: I hereby certify that the statements furnished above and in the attached exhibits present the data and information required for this initial evaluation to the best of my ability, and that the facts, statements, and information presented are true and correct to the best of my knowledge and belief.

Appendix I

ENVIRONMENTAL CHECKLIST FORM

(To be completed by Lead Agency)

I. BACKGROUND.

1. Name of Proponent _____
2. Address and Phone Number of Proponent:

_____

_____

_____

3. Date of Checklist Submitted _____
4. Agency Requiring Checklist _____
5. Name of Proposal, if applicable _____

_____

II. ENVIRONMENTAL IMPACTS

(Explanations of all "yes" and "maybe" answers are required on attached sheets.)

	YES	MAYBE	NO
1. Earth. Will the proposal result in:			
a. Unstable earth conditions or in changes in geologic substructures?	___	___	___
b. Disruptions, displacements, compaction or overcovering of the soil?	___	___	___
c. Change in topography or ground surface relief features?	___	___	___
d. The destruction, covering or modification of any unique geologic or physical features?	___	___	___
e. Any increase in wind or water erosion of soils, either on or off the site?	___	___	___
f. Changes in deposition or erosion of beach sands, or changes in siltation, deposition or erosion which may modify the channel of a river or stream or the bed of the ocean or any bay, inlet or lake?	___	___	___
g. Exposure of people or property to geologic hazards such as earthquakes, landslides, mudslides, ground failure, or similar hazards?			
2. Air. Will the proposal result in:			
a. Substantial air emissions or deterioration of ambient air quality?	___	___	___
b. The creation of objectionable odors?	___	___	___
c. Alteration of air movement, moisture or temperature, or any change in climate, either locally or regionally?	___	___	___
3. Water. Will the proposal result in:			
a. Changes in currents, or the course or direction of water movements, in either marine or fresh waters?	___	___	___
b. Changes in absorption rates, drainage patterns or the rate and amount of surface water runoff?	___	___	___
c. Alterations to the course or flow of flood waters?	___	___	___
d. Change in the amount of surface water in any water body?	___	___	___

	YES	MAYBE	NO
e. Discharge into surface waters, or in any alteration of surface water quality, including but not limited to temperature, dissolved oxygen or turbidity?	___	___	___
f. Alteration of the direction or rate of flow of ground waters?	___	___	___
g. Change in the quantity of ground waters, either through direct additions or withdrawals, or through interception of an aquifer by cuts or excavations?	___	___	___
h. Substantial reduction in the amount of water otherwise available for public water supplies?	___	___	___
i. Exposure of people or property to water related hazards such as flooding or tidal waves?	___	___	___
4. Plant Life. Will the proposal result in:			
a. Change in the diversity of species, or number of any species of plants (including trees, shrubs, grass, crops, and aquatic plants)?	___	___	___
b. Reduction of the numbers of any unique, rare or endangered species of plants?	___	___	___
c. Introduction of new species of plants into an area, or in a barrier to the normal replenishment of existing species?	___	___	___
d. Reduction in acreage of any agricultural crop?	___	___	___
5. Animal Life. Will the proposal result in:			
a. Change in the diversity of species, or numbers of any species of animals (birds, land animals including reptiles, fish and shellfish, benthic organisms or insects)?	___	___	___
b. Reduction of the numbers of any unique, rare or endangered species of animals?	___	___	___
c. Introduction of new species of animals into an area, or result in a barrier to the migration or movement of animals?	___	___	___
d. Deterioration to existing fish or wildlife habitat?	___	___	___
6. Noise. Will the proposal result in:			
a. Increases in existing noise levels?	___	___	___
b. Exposure of people to severe noise levels?	___	___	___
7. Light and Glare. Will the proposal produce new light or glare?	___	___	___
8. Land Use. Will the proposal result in a substantial alteration of the present or planned land use of an area?	___	___	___
9. Natural Resources. Will the proposal result in:			
a. Increase in the rate of use of any natural resources?	___	___	___
b. Substantial depletion of any nonrenewable natural resource?	___	___	___
10. Risk of Upset. Will the proposal involve:			
a. A risk of an explosion or the release of hazardous substances (including, but not limited to, oil, pesticides, chemicals or radiation) in the event of an accident or upset conditions?	___	___	___
b. Possible interference with an emergency response plan or an emergency evacuation plan?	___	___	___

	YES	MAYBE	NO
11. Population. Will the proposal alter the location, distribution, density, or growth rate of the human population of an area?	___	___	___
12. Housing. Will the proposal affect existing housing, or create a demand for additional housing?	___	___	___
13. Transportation/Circulation. Will the proposal result in:			
a. Generation of substantial additional vehicular movement?	___	___	___
b. Effects on existing parking facilities, or demand for new parking?	___	___	___
c. Substantial impact upon existing transportation systems?	___	___	___
d. Alterations to present patterns of circulation or movement of people and/or goods?	___	___	___
e. Alterations to waterborne, rail or air traffic?	___	___	___
f. Increase in traffic hazards to motor vehicles, bicyclists or pedestrians?			
14. Public Services. Will the proposal have an effect upon, or result in a need for new or altered governmental services in any of the following areas:			
a. Fire protection?	___	___	___
b. Police protection?	___	___	___
c. Schools?	___	___	___
d. Parks or other recreational facilities?	___	___	___
e. Maintenance of public facilities, including roads?			
f. Other governmental services?	___	___	___
15. Energy. Will the proposal result in:			
a. Use of substantial amounts of fuel or energy?	___	___	___
b. Substantial increase in demand upon existing sources of energy, or require the development of new sources of energy?	___	___	___
16. Utilities. Will the proposal result in a need for new systems, or substantial alterations to the following utilities:			
a. Power or natural gas?	___	___	___
b. Communications systems?	___	___	___
c. Water?	___	___	___
d. Sewer or septic tanks?	___	___	___
e. Storm water drainage?	___	___	___
f. Solid waste and disposal?	___	___	___
17. Human Health. Will the proposal result in:			
a. Creation of any health hazard or potential health hazard (excluding mental health)?	___	___	___
b. Exposure of people to potential health hazards?	___	___	___
18. Aesthetics. Will the proposal result in the obstruction of any scenic vista or view open to the public, or will the proposal result in the creation of an aesthetically offensive site open to public view?	___	___	___

	YES	MAYBE	NO
19. Recreation. Will the proposal result in an impact upon the quality or quantity of existing recreational opportunities?	___	___	___
20. Cultural Resources.			
a. Will the proposal result in the alteration of or the destruction of a prehistoric or historic archeological site?	___	___	___
b. Will the proposal result in adverse physical or aesthetic effects to a prehistoric or historic building, structure, or object?	___	___	___
c. Does the proposal have the potential to cause a physical change which would affect unique ethnic cultural values?	___	___	___
d. Will the proposal restrict existing religious or sacred uses within the potential impact area?	___	___	___
21. Mandatory Findings of Significance.			
a. Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	___	___	___
b. Does the project have the potential to achieve short-term, to the disadvantage of long-term, environmental goals? (A short-term impact on the environment is one which occurs in a relatively brief, definitive period of time while long-term impacts will endure well into the future.)	___	___	___
c. Does the project have impacts which are individually limited, but cumulatively considerable? (A project may impact on two or more separate resources where the impact on each resource is relatively small, but where the effect of the total of those impacts on the environment is significant.)	___	___	___
d. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	___	___	___

III. DISCUSSION OF ENVIRONMENTAL EVALUATION

IV. DETERMINATION
(To be completed by the Lead Agency)

On the basis of this initial evaluation:

☐ I find the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☐ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because the mitigation measures described on an attached sheet have been added to the project. A NEGATIVE DECLARATION WILL BE PREPARED.

☐ I find the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

Appendix J

NOTICE OF PREPARATION

TO: _____ FROM: _____
(Responsible Agency) (Lead Agency)
_____ _____
(Address) (Address)
_____ _____

SUBJECT: Notice of Preparation of a Draft Environmental Impact Report

_____ will be the Lead Agency and will prepare an environmental impact report for the project identified below. We need to know the views of your agency as to the scope and content of the environmental information which is germane to your agency's statutory responsibilities in connection with the proposed project. Your agency will need to use the EIR prepared by our agency when considering your permit or other approval for the project.

The project description, location, and the probable environmental effects are contained in the attached materials. A copy of the Initial Study ☐ is, ☐ is not, attached.

Due to the time limits mandated by State law, your response must be sent at the earliest possible date but not later than 45 days after receipt of this notice.

Please send your response to _____ at the address shown above. We will need the name for a contact person in your agency.

Project Title:

Project Applicant, if any:

Date _____ Signature _____
Title _____
Telephone _____

Reference: California Administrative Code, Title 14, Sections 15035.7, 15054.3, 15066.

HISTORY:

1. New Appendix J filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).

Appendix K
Archaeological Impacts

I. CEQA applies to effects on historic and prehistoric archaeological resources.

II. Public agencies should seek to avoid damaging effects on an archaeological resource whenever feasible. If avoidance is not feasible, the importance of the site shall be evaluated using the criteria outlined in Section III.

A. In-situ preservation of a site is the preferred manner of avoiding damage to archaeological resources. Preserving the site is more important than preserving the artifacts alone because the relationship of the artifacts to each other in the site provides valuable information that can be lost when the artifacts are removed. Further, preserving the site keeps it available for more sophisticated future research methods. Preservation may also avoid conflict with religious or cultural values of groups associated with the site.

B. Avoiding damage may be accomplished by many approaches, including:

1. Planning construction to miss archaeological sites;

2. Planning parks, greenspace, or other open space to incorporate archaeological sites;

3. "Capping" or covering archeological sites with a layer of soil before building tennis courts, parking lots, or similar facilities. Capping may be used where:

a. The soils to be covered will not suffer serious compaction;

b. The covering materials are not chemically active;

c. The site is one in which the natural processes of deterioration have been effectively arrested; and

d. The site has been recorded.

4. Deeding archaeological sites into permanent conservation easements.

III. If the lead agency determines that a project may affect an archaeological resource, the agency shall determine whether the effect may be a significant effect on the environment. If the project may cause damage to an important archaeological resource, the project may have a significant effect on the environment. For the purposes of CEQA, an "important archaeological resource" is one which:

A. Is associated with an event or person of:

1. Recognized significance in California or American history or

2. Recognized scientific importance in prehistory.

B. Can provide information which is both of demonstrable public interest and useful in addressing scientifically consequential and reasonable archaeological research questions,

C. Has a special or particular quality such as oldest, best example, largest, or last surviving example of its kind,

D. Is at least 100 years old and possesses substantial stratigraphic integrity, or

E. Involves important research questions that historical research has shown can be answered only with archaeological methods.

IV. If an archaeological resource is not an important archaeological resource, both the resource and the effect on it shall be noted in the initial study or EIR but need not be considered further in the CEQA process.

V. If avoidance of the important archaeological resource is not feasible, the lead agency should include an excavation plan for mitigating the effect of the project on the qualities which make the resource important under Section III.

A. If an excavation plan is prepared, it shall:

1. Be a brief summary of the excavation proposed as part of a mitigation plan;

2. Be available for review only on a need-to-know basis;

3. Not include the specific location of any archaeological resources if the plan will be made known to the general public.

B. An excavation plan may:

1. List and briefly discuss the important information the archaeological resources contain or are likely to contain;

2. Explain how the information should be recovered to be useful in addressing scientifically valid research questions and other concerns identified in subdivision (a);

3. Explain the methods of analysis and, if feasible, display of excavated materials;
4. Provide for final report preparation and distribution; and,
5. Explain the estimated cost of and time required to complete all activities undertaken under the plan.

C. The lead agency may require a mitigation plan to be carried out as a condition of approval of the project.

VI. A public agency following federal clearance process under the National Historic Preservation Act or the National Environmental Policy Act may use the documentation prepared under the federal guidelines in the place of documentation called for in this appendix.

VII. LIMITATIONS ON MITIGATION. Special rules apply to mitigating significant effects on important archaeological resources.

A. If it is not feasible to revise the project to avoid an important archaeological resource, the lead agency shall require the project applicant to guarantee to pay one half of the cost of mitigating the significant effect of the project on important archaeological resources.

1. In determining the payment to be required from the applicant, the lead agency shall consider the in-kind value of project design or expenditures intended to permit any or all important archaeological resources or California Native American culturally significant sites to be undisturbed or preserved in place.

a. Consideration of in-kind values does not require a dollar for dollar set-off against the payment by the project applicant.

b. In deciding on an appropriate set-off, the lead agency shall consider such factors as whether the project design or expenditures would provide other benefits to the applicant and whether the design or expenditures required special changes in the project plans.

2. When it decides to carry out or approve the project, the lead agency shall, if necessary, reduce the mitigation measures specified in the EIR to those which can be funded with:

a. The money guaranteed by the project applicant, and

b. Money voluntarily guaranteed by any other person or persons for the mitigation.

3. In order to allow time for interested persons to provide a voluntary funding guarantee, the lead agency shall not decide to carry out or approve a project having a significant effect on important archaeological resources until 60 days after completing the final EIR on the project.

4. In no event shall the lead agency require the applicant to pay more for mitigation within the site of the project than the following amounts:

a. One half of one percent of the projected cost of the project, if the project is a commercial or industrial project.

b. Three fourths of one percent of the projected cost of the project for a housing project consisting of one unit.

c. If a housing project consists of more than one unit, three fourths of one percent of the projected cost of the first unit plus the sum of the following:

(i) $200 per unit for any of the next 99 units,
(ii) $150 per unit for any of the next 400 units,
(iii) $100 per unit for units in excess of 500.

B. Unless special or unusual circumstances warrant an exception, the field excavation phase of an approved mitigation plan shall be completed within 90 days after the applicant receives the final approval necessary to begin physical development of the project.

1. With a phased project, the mitigation measures shall be completed within 90 days after approval is granted for the phased portion to which the specific mitigation measures apply.

2. The project applicant can elect to extend the time limits for completing the field excavation phase of the approved mitigation plan.

3. A mitigation plan shall not authorize violation of any law protecting American Indian cemeteries.

C. Excavation as part of a mitigation plan shall be restricted to those parts of an important archaeological resource that would be damaged or destroyed by the project unless special circumstances require limited excavation of an immediately adjacent area in order to develop important information about the part of the resource that would be destroyed.

D. Excavation as mitigation shall not be required for an important archaeological resource if the lead agency determines that testing or studies already completed have adequately recovered the scientifically consequential information from and about the resource, provided that the determination is documented in the EIR.

E. The limitations on mitigation shall not apply to:

1. A public project if the lead agency decides to comply with other provisions of CEQA that apply to mitigation of significant effects, and

2. A private project if the applicant and the lead agency jointly elect to comply with other provisions of CEQA that apply to mitigation of significant effects.

F. The time and cost limitations described in this section do not apply to surveys and site evaluation activities intended to determine whether the project location contains archaeological resources, and if so, whether the archaeological resources are important as defined in this appendix.

VIII. Discovery of Human Remains.

A. In the event of discovery or recognition of any human remains in any location other than a dedicated cemetery, there shall be no further excavation or disturbance of the site or any nearby area reasonably suspected to overlie adjacent human remains until:

1. The coroner of the county in which the remains are discovered has been informed and has determined that no investigation of the cause of death is required, and

2. If the remains are of Native American origin,

a. The descendants from the deceased Native Americans have made a recommendation to the landowner or the person responsible for the excavation work, for means of treating or disposing of, with appropriate dignity, the human remains and any associated grave goods as provided in Public Resources Code Section 5097.98, or

b. The Native American Heritage Commission was unable to identify a descendant or the descendant failed to make a recommendation within 24 hours after being notified by the commission.

B. Where the following conditions occur, the landowner or his authorized representative shall reinter the Native American human remains and associated grave goods with appropriate dignity on the property in a location not subject to further subsurface disturbance.

1. The Native American Heritage Commission is unable to identify a descendant;

2. The descendant identified fails to make a recommendation; or

3. The landowner or his authorized representative rejects the recommendation of the descendant, and the mediation by the Native American Heritage Commission fails to provide measures acceptable to the landowner.

C. If the human remains are discovered before the lead agency has finished the CEQA process, the lead agency shall work with the Native American Heritage Commission and the applicant to develop an agreement for treating or disposing, with appropriate dignity, of the human remains and any associated grave goods. Action implementing such an agreement is exempt from:

1. The general prohibition on disinterring, disturbing, or removing human remains from any location other than a dedicated cemetery (Health and Safety Code Section 7050.5).

2. The requirements of CEQA and the Coastal Act.

IX. As part of the objectives, criteria, and procedures required by Section 21082 or as part of conditions imposed for mitigation, a lead agency should make provisions for archaeological sites accidentally discovered during construction. These provisions should include an immediate evaluation of the find. If the find is determined to be an important archaeological resource, contingency funding and a time allotment sufficient to allow recovering an archaeological sample or to employ one of the avoidance measures should be available. Construction work could continue on other parts of the building site while archaeological mitigation takes place.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 7050.5, Health and Safety Code; Sections 5097.98, 21001(b) and (c), and 21083.2, Public Resources Code; *Society for California Archaeology* v. *County of Butte*, (1977) 65 Cal. App. 3d 832.

HISTORY:

1. New Appendix K filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).

2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

§ 15061

§ 15062

§ 15075

§ 15082

§ 15085

§ 15087

§ 15094

15005. Terminology.

The following words are used to indicate whether a particular subject in the Guidelines is mandatory, advisory, or permissive:

(a) "Must" or "shall" identifies a mandatory element which all public agencies are required to follow.

(b) "Should" identifies guidance provide by the Secretary for Resources based on policy considerations contained in CEQA, in the legislative history of the statute, or in federal court decisions which California courts can be expected to follow. Public agencies are advised to follow this guidance in the absence of compelling, countervailing considerations.

(c) "May" identifies a permissive element which is left fully to the discretion of the public agencies involved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082 and 21083, Public Resources Code.

HISTORY:

1. New section filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For history of former section, see Register 75, No. 1.
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).
3. Editorial correction of 7-13-83 order filed 7-26-83 (Register 83, No. 33).

15006. Reducing Delay and Paperwork.

Public agencies should reduce delay and paperwork by:

(a) Integrating the CEQA process into early planning. (15004(c))

(b) Ensuring the swift and fair resolution of lead agency disputes. (15053)

(c) Identifying projects which fit within categorical exemptions and are therefore exempt from CEQA processing. (15300.4)

(d) Using initial studies to identify significant environmental issues and to narrow the scope of EIRs. (15063)

(e) Using a negative declaration when a project not otherwise exempt will not have a significant effect on the environment. (15070)

(f) Using a previously prepared EIR when it adequately addresses the proposed project. (15153)

(g) Consulting with state and local responsible agencies before and during preparation of an environmental impact report so that the document will meet the needs of all the agencies which will use it. (15083)

(h) Urging applicants, either before or after the filing of an application, to revise projects to eliminate possible significant effects on the environment, thereby enabling the project to qualify for a negative declaration rather than an environmental impact report. (15063(c)(2))

(i) Integrating CEQA requirements with other environmental review and consulting requirements. (Public Resources Code Section 21080.5)

(j) Eliminating duplication with federal procedures by providing for joint preparation of environmental documents with federal agencies and by adopting completed federal NEPA documents. (15227)

(k) Emphasizing consultation before an environmental impact report is prepared, rather than submitting adversary comments on a completed document. (15082(b))

(*l*) Combining environmental documents with other documents such as general plans. (15166)

(m) Eliminating repetitive discussions of the same issues by using environmental impact reports on programs, policies, or plans and tiering from reports of broad scope to those of narrower scope. (15152)

(n) Reducing the length of environmental impact reports by means such as setting appropriate page limits. (15141)

(o) Preparing analytic rather than encyclopedic environmental impact reports. (15142)

(p) Mentioning only briefly issues other than significant ones in EIRs. (15143)

(q) Writing environmental impact reports in plain language. (15140)

(r) Following a clear format for environmental impact reports. (15120)

(s) Emphasizing the portions of the environmental impact report that are useful to decision-makers and the public and reducing emphasis on background material. (15143)

(t) Using incorporation by reference. (15150)

(u) Making comments on environmental impact reports as specific as possible. (15204)

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003 and 21083, Public Resources Code.

HISTORY:

1. New section filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For history of former section, see Register 80, No. 19.
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).
3. Amendment of subsections (g), (m) and (u) filed 1-30-96; effective thirtieth day thereafter (Register 96, No. 5).

15007. Amendments.

(a) These guidelines will be amended from time to time to match new developments relating to CEQA.

(b) Amendments to the guidelines apply prospectively only. New requirements in amendments will apply to steps in the CEQA process not yet undertaken by the date when agencies must comply with the amendments.

(c) If a document meets the content requirements in effect when the document is set out for public review, the document shall not need to be revised to conform to any new content requirements in guideline amendments taking effect before the document is finally approved.

(d) Public agencies shall comply with new requirements in amendments to the guidelines beginning with the earlier of the following two dates:

(1) The effective date of the agency's procedures amended to conform to the new guideline amendments; or

(2) The 120th day after the effective date of the guideline amendments.

(e) Public agencies may implement any permissive or advisory elements of the guidelines beginning with the effective date of the guideline amendments.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082 and 21087, Public Resources Code; *Stevens* v. *City of Glendale*, 125 Cal. App. 3d 986.

HISTORY:

1. New section filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15023. Office of Planning and Research (OPR).

(a) From time to time OPR shall review the State CEQA Guidelines and shall make recommendations for amendments to the Secretary for Resources.

(b) OPR shall receive and evaluate proposals for adoption, amendment, or repeal of categorical exemptions and shall make recommendations on the proposals to the Secretary for Resources. People making suggestions concerning categorical exemptions shall submit their recommendations to OPR with supporting information to show that the class of projects in the proposal either will or will not have a significant effect on the environment.

(c) The State Clearinghouse in the Office of Planning and Research shall be responsible for distributing environmental documents to State agencies, departments, boards, and commissions for review and comment.

(d) Upon request of a Lead Agency or a project applicant, OPR shall provide assistance in identifying the various responsible agencies and any federal agencies which have responsibility for carrying out or approving a proposed project.

(e) OPR shall ensure that state responsible agencies provide the necessary information to lead agencies in response to notices of preparation within at most 30 days after receiving a notice of preparation.

(f) OPR shall resolve disputes as to which agency is the lead agency for a project.

(g) OPR shall receive and file all notices of completion, determination, and exemption.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21060.4, 21083, 21086, 21087, 21108 and 21161, Public Resources Code.

HISTORY:

1. Amendment of subsection (e) and new subsection (g) filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

15024. Secretary for Resources.

(a) The Guidelines shall be adopted by the Secretary for Resources. The Secretary shall make a finding that each class of projects given a categorical exemption will not have a significant effect on the environment.

(b) The Secretary may issue amendments to these Guidelines.

(c) The Secretary shall certify state environmental regulatory programs which meet the standards for certification in Section 21080.5, Public Resources Code.

(d) The Secretary shall receive and file notices required by certified state environmental regulatory programs.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.5, 21083, 21084, 21086, 21087, 21088 and 21152, Public Resources Code.

HISTORY:

1. Amendment filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

15025. Delegation of Responsibilities.

(a) A public agency may assign specific functions to its staff to assist in administering CEQA. Functions which may be delegated include but are not limited to:

(1) Determining whether a project is exempt.

(2) Conducting an initial study and deciding whether to prepare a draft EIR or negative declaration.

(3) Preparing a negative declaration or EIR.

(4) Determining that a negative declaration has been completed within a period of 105 days.
(5) Preparing responses to comments on environmental documents.
(6) Filing of notices.
(b) The decisionmaking body of a public agency shall not delegate the following functions:
(1) Reviewing and considering a final EIR or approving a negative declaration prior to approving a project.
(2) The making of findings as required by Sections 15091 and 15093.
(c) Where an advisory body such as a planning commission is required to make a recommendation on a project to the decisionmaking body, the advisory body shall also review and consider the EIR or negative declaration in draft or final form.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21082, Public Resources Code; *Kleist* v. *City of Glendale* (1976) 56 Cal. App. 3d 770.

Article 3. Authorities Granted to Public Agencies by CEQA

15040. Authority Provided by CEQA.
(a) CEQA is intended to be used in conjunction with discretionary powers granted to public agencies by other laws.
(b) CEQA does not grant an agency new powers independent of the powers granted to the agency by other laws.
(c) Where another law grants an agency discretionary powers, CEQA supplements those discretionary powers by authorizing the agency to use the discretionary powers to mitigate or avoid significant effects on the environment when it is feasible to do so with respect to projects subject to the powers of the agency. Prior to January 1, 1983, CEQA provided implied authority for an agency to use its discretionary powers to mitigate or avoid significant effects on the environment. Effective January 1, 1983, CEQA provides express authority to do so.
(d) The exercise of the discretionary powers may take forms that had not been expected before the enactment of CEQA, but the exercise must be within the scope of the power.
(e) The exercise of discretionary powers for environmental protection shall be consistent with express or implied limitations provided by other laws.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000, 21001, 21002, 21002.1 and 21004, Public Resources Code; Section 4, Chapter 1438, Statutes of 1982; *Golden Gate Bridge, Etc., Dist.* v. *Muzzi,* (1978) 83 Cal. App. 3d 707; *E.D.F.* v. *Mathews,* 410 F. Supp. 336, 339 (D.D.C., 1976); *Friends of Mammoth* v. *Board of Supervisors,* (1972) 8 Cal. 3d 247; *Pinewood Investors* v. *City of Oxnard* (1982) 133 Cal. App. 3d 1030.

HISTORY:
1. Repealer of Article 3 (Sections 15010–15016) and new Article 3 (Sections 15040–15045) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 82, No. 2; 80, No. 19; 78, No. 5; 76, No. 41; 75, Nos. 1 and 18; 74, Nos. 3 and 4; and 73, No. 50.
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15041. Authority to Mitigate.

Within the limitations described in Section 15040, (a) A lead agency for a project has authority to require changes in any or all activities involved in the project in order to lessen or avoid significant effects on the environment.

(b) When a public agency acts as a responsible agency for a project, the agency shall have more limited authority than a lead agency. The responsible agency may require changes in a project to lessen or avoid only the effects, either direct or indirect, of that part of the project which the agency will be called on to carry out or approve.

(c) With respect to a project which includes housing development, a lead or responsible agency shall not reduce the proposed number of housing units as a mitigation measure or alternative to lessen a particular significant effect on the environment if that agency determines that there is another feasible, specific mitigation measure or alternative that would provide a comparable lessening of the significant effect.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1 and 21085, Public Resources Code; *Golden Gate Bridge, Etc., District* v. *Muzzi,* 83 Cal. App. 3d 707.

15042. Authority to Disapprove Projects.

A public agency may disapprove a project if necessary in order to avoid one or more significant effects on the environment that would occur if the project were approved as proposed. A lead agency has broader authority to disapprove a project than does a responsible agency. A responsible agency may refuse to approve a project in order to avoid direct or indirect environmental effects of that part of the project which the responsible agency would be called on to carry out or approve. For example, an air quality management district acting as a responsible agency would not have authority to disapprove a project for water pollution effects that were unrelated to the air quality aspects of the project regulated by the district.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002 and 21002.1, Public Resources Code; *Friends of Mammoth* v. *Mono County,* 8 Cal. App. 3d 247; *San Diego Trust and Savings Bank* v. *Friends of Gill,* 121 Cal. App. 3d 203.

15043. Authority to Approve Projects Despite Significant Effects.

A public agency may approve a project even though the project would cause a significant effect on the environment if the agency makes a fully informed and publicly disclosed decision that:

(a) There is no feasible way to lessen or avoid the significant effect (see Section 15091); and

(b) Specifically identified expected benefits from the project outweigh the policy of reducing or avoiding significant environmental impacts of the project. (See Section 15093.)

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002 and 21002.1, Public Resources Code; *San Francisco Ecology Center* v. *City and County of San Francisco,* (1975) 48 Cal. App. 3d 584; *San Diego Trust & Savings Bank* v. *Friends of Gill,* (1981) 121 Cal. App. 3d 203.

15044. Authority to Comment.

Any person or entity other than a responsible agency may submit comments to a lead agency concerning any environmental effects of a project being considered by the lead agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000, 21001, 21002.1, 21104 and 21153, Public Resources Code.

HISTORY:

1. Amendment filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

15045. Fees.

(a) All lead agencies preparing EIRs and negative declarations for projects to be carried out by any person or entity other than the lead agency itself may charge and collect a reasonable fee from such person or entity, in order to recover the estimated costs incurred in preparing the EIR or negative declaration.

(b) Public agencies may charge and collect a reasonable fee from members of the public for a copy of an environmental document not to exceed the actual cost of reproducing a copy.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21089 and 21105, Public Resources Code; and Sections 6250 et seq., Government Code.

Article 4. Lead Agency

15050. Lead Agency Concept.

(a) Where a project is to be carried out or approved by more than one public agency, one public agency shall be responsible for preparing an EIR or negative declaration for the project. This agency shall be called the lead agency.

(b) Except as provided in subsection (c), the decisionmaking body of each responsible agency shall consider the lead agency's EIR or negative declaration prior to acting upon or approving the project. Each responsible agency shall certify that its decisionmaking body reviewed and considered the information contained in the EIR or negative declaration on the project.

(c) The determination of the lead agency of whether to prepare an EIR or a negative declaration shall be final and conclusive for all persons, including responsible agencies, unless:

(1) The decision is successfully challenged as provided in Section 21167 of the Public Resources Code,

(2) Circumstances or conditions change as provided in Section 15162, or

(3) A responsible agency becomes a lead agency under Section 15052.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.1, 21165 and 21167.2, Public Resources Code.

HISTORY:

1. Repealer of Article 4 (Sections 15020–15043) and new Article 4 (Sections 15050–15053) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 82, No. 2; 80, No. 19; 78, No. 5; 76, No. 41; 75, Nos. 1, 5 and 22; 74, Nos. 13 and 26; and 73, No. 50.

2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15051. Criteria for Identifying the Lead Agency.

Where two or more public agencies will be involved with a project, the determination of which agency will be the lead agency shall be governed by the following criteria:

(a) If the project will be carried out by a public agency, that agency shall be the lead agency even if the project would be located within the jurisdiction of another public agency.

(b) If the project is to be carried out by a nongovernmental person or entity, the lead agency shall be the public agency with the greatest responsibility for supervising or approving the project as a whole.

(1) The lead agency will normally be the agency with general governmental powers, such as a city or county, rather than an agency with a single or limited purpose such as an air pollution control district or a district which will provide a public service or public utility to the project.

(2) Where a city prezones an area, the city will be the appropriate lead agency for any subsequent annexation of the area and should prepare the appropriate environmental document at the time of the prezoning. The local agency formation commission shall act as a responsible agency.

(c) Where more than one public agency equally meet the criteria in subsection (b), the agency which will act first on the project in question shall be the lead agency.

(d) Where the provisions of subsections (a), (b), and (c) leave two or more public agencies with a substantial claim to be the lead agency, the public agencies may by agreement designate an agency as the lead agency. An agreement may also provide for cooperative efforts by two or more agencies by contract, joint exercise of powers, or similar devices.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21165, Public Resources Code.

15052. Shift in Lead Agency Designation.

(a) Where a responsible agency is called on to grant an approval for a project subject to CEQA for which another public agency was the appropriate lead agency, the responsible agency shall assume the role of the lead agency when any of the following conditions occur:

(1) The lead agency did not prepare any environmental documents for the project, and the statute of limitations has expired for a challenge to the action of the appropriate lead agency.

(2) The lead agency prepared environmental documents for the project, but the following conditions occur:

(A) A subsequent EIR is required pursuant to Section 15162,

(B) The lead agency has granted a final approval for the project, and

(C) The statute of limitations for challenging the lead agency's action under CEQA has expired.

(3) The lead agency prepared inadequate environmental documents without consulting with the responsible agency as required by Sections 15072 or 15082, and the statute of limitations has expired for a challenge to the action of the appropriate lead agency.

(b) When a responsible agency assumes the duties of a lead agency under this section, the time limits applicable to a lead agency shall apply to the actions of the agency assuming the lead agency duties.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21165, Public Resources Code.

15053. Designation of Lead Agency by Office of Planning and Research.

(a) If there is a dispute over which of several agencies should be the lead agency for a project, the disputing agencies should consult with each other in an effort to resolve the dispute prior to submitting it to OPR. If an agreement cannot be reached, any public agency, or the applicant if a private project is involved, may submit the dispute to OPR for resolution.

(b) OPR shall designate a lead agency within 21 days after receiving a completed request to resolve a dispute.

(c) Regulations adopted by OPR for resolving lead agency disputes may be found in Title 14, California Administrative Code, Sections 16000 et seq.

(d) Designation of a lead agency by OPR shall be based on consideration of the criteria in Section 15052 as well as the capacity of the agency to adequately fulfill the requirements of CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21165, Public Resources Code; and California Administrative Code, Title 14, Sections 16000–16041.

Article 5. Preliminary Review of Projects and Conduct of Initial Study

15060. Preliminary Review.

(a) A public agency is allowed 30 days to review for completeness applications for permits or other entitlements for use. While conducting this review for completeness, the agency should be alert for environmental issues that might require preparation of an EIR or that may require additional explanation by the applicant.

(b) Except as provided in Section 15111, the lead agency shall begin the formal environmental evaluation of the project after accepting an application as complete and determining that the project is subject to CEQA. Accepting an application as complete does not limit the authority of the lead agency to require the applicant to submit additional information needed for environmental evaluation of the project.

(c) If the lead agency can determine that an EIR will be clearly required for a project, the agency may skip further initial review of the project and begin work directly on the EIR process described in Article 9, commencing with Section 15080. In the absence of an initial study, the lead agency shall still focus the EIR on the significant effects of the project and indicate briefly its reasons for determining that other effects would not be significant or potentially significant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 65944, Government Code; Section 21080.2, Public Resources Code.

HISTORY:

1. Repealer of Article 5 (Sections 15050–15056) and new Article 5 (Sections 15060–15065) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 80, No. 19; 78, No. 5; 76, No. 41; 75, Nos. 1, 5 and 22; and 73, No. 50.
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15061. Review for Exemption.

(a) As part of the preliminary review, a public agency shall determine whether a particular activity is exempt from CEQA.

(b) Possible exemptions from CEQA include:

(1) The activity is not a project as defined in Section 15378.

(2) The project has been granted an exemption by statute (see Article 18, commencing with Section 15260) or by categorical exemption (see Article 19, commencing with Section 15300).

(3) The activity is covered by the general rule that CEQA applies only to projects which have the potential for causing a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA.

(c) Each public agency should include in its implementing procedures a listing of the projects often handled by the agency that the agency has determined to be exempt. This listing should be used in preliminary review.

(d) After determining that a project is exempt, the agency may prepare a notice of exemption as provided in Section 15062. Although the notice may be kept with the project application at this time, the notice shall not be filed with OPR or the county clerk until the project has been approved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(b), 21080.9, 21080.10, 21084, 21108(b) and 21152(b), Public Resources Code; *No Oil, Inc.* v. *City of Los Angeles*, 13 Cal. 3d 68.

HISTORY:

1. Amendment of subsection (d) filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

15062. Notice of Exemption.

(a) When a public agency decides that a project is exempt from CEQA and the public agency approves or determines to carry out the project, the agency may file a notice of exemption. The notice shall be filed, if at all, after approval of the project. Such a notice shall include:

(1) A brief description of the project,

(2) A finding that the project is exempt, including a citation to the State Guidelines section under which it is found to be exempt, and

(3) A brief statement of reasons to support the finding.

(b) A notice of exemption may be filled out and may accompany the project application through the approval process. The notice shall not be filed with the county clerk or OPR until the project has been approved.

(c) When a public agency approves an applicant's project, either the agency or the applicant may file a notice of exemption.

(1) When a state agency files this notice, the notice of exemption shall be filed with OPR. A form for this notice is provided in Appendix E. A list of all such notices shall be posted on a weekly basis at the Office of Planning and Research, 1400 Tenth Street, Sacramento, California. The list shall remain posted for at least 30 days.

(2) When a local agency files this notice, the notice of exemption will be filed with the county clerk of the county or counties in which the project will be located. Copies of all such notices will be available for public inspection and a list of such notices shall be posted on a weekly basis in the office of the county clerk. Each such list shall remain posted for a period of 30 days.

(3) When an applicant files this notice, special rules apply.

(A) The notice filed by an applicant shall be filed in the same place as if it were filed by the agency granting the permit. If the permit was granted by a state agency, the notice shall be filed with OPR. If the permit was granted by a local agency, the notice shall be filed with the county clerk of the county or counties in which the project will be located.

(B) The notice of exemption filed by an applicant shall contain the information required in subdivision (a) together with a certified document issued by the public agency stating that the agency has found the project to be exempt. The certified document may be a certified copy of an existing document or record of the public agency.

(C) A notice filed by an applicant shall be subject to the same posting and time requirements as a notice filed by a public agency.

(d) The filing of a Notice of Exemption and the posting on the list of notices start a 35 day statute of limitations period on legal challenges to the agency's decision that the project is exempt from CEQA. If a Notice of Exemption is not filed, a 180 day statute of limitations will apply.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108 and 21152, Public Resources Code.

HISTORY:

1. Amendment of subsections (b) and (c) filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

15063. Initial Study.

(a) Following preliminary review, the lead agency shall conduct an initial study to determine if the project may have a significant effect on the environment. If the lead agency can determine that an EIR will clearly be required for the project, an initial study is not required but may still be desirable.

(1) All phases of project planning, implementation, and operation must be considered in the initial study of the project.

(2) To meet the requirements of this section, the lead agency may use an initial study or a similar analysis prepared pursuant to the National Environmental Policy Act.

(b) Results.

(1) If the agency determines that there is substantial evidence that any aspect of the project, either individually or cumulatively, may cause a significant effect on the environment, regardless of whether the overall effect of the project is adverse or beneficial, the lead agency shall either:

(A) Prepare an EIR or

(B) Use a previously prepared EIR which the lead agency determines would adequately analyze the project at hand.

(2) The lead agency shall prepare a negative declaration if the agency perceives no substantial evidence that the project or any of its aspects may cause a significant effect on the environment.

(c) Purposes. The purposes of an initial study are to:

(1) Provide the lead agency with information to use as the basis for deciding whether to prepare an EIR or negative declaration;

(2) Enable an applicant or lead agency to modify a project, mitigating adverse impacts before an EIR is prepared, thereby enabling the project to qualify for a negative declaration;

(3) Assist the preparation of an EIR, if one is required, by:

(A) Focusing the EIR on the effects determined to be significant,

(B) Identifying the effects determined not to be significant, and

(C) Explaining the reasons for determining that potentially significant effects would not be significant.

(4) Facilitate environmental assessment early in the design of a project;

(5) Provide documentation of the factual basis for the finding in a negative declaration that a project will not have a significant effect on the environment;

(6) Eliminate unnecessary EIRs;

(7) Determine whether a previously prepared EIR could be used with the project.

(d) Contents. An initial study shall contain in brief form:

(1) A description of the project including the location of the project;

(2) An identification of the environmental setting;

(3) An identification of environmental effects by use of a checklist, matrix, or other method;

(4) A discussion of ways to mitigate the significant effects identified, if any;

(5) An examination of whether the project would be consistent with existing zoning, plans, and other applicable land use controls;

(6) The name of the person or persons who prepared or participated in the initial study.

(e) Submission of Data. If the project is to be carried out by a private person or private organization, the lead agency may require such person or organization to submit data and information which will enable the lead agency to prepare the initial study. Any person may submit any information in any form to assist a lead agency in preparing an initial study.

(f) Format. Sample forms for an applicant's project description and a review form for use by the lead agency are contained in Appendices H and I. When used together, these forms would meet the requirements for an initial study. These forms are only suggested, and public agencies are free to devise their own format for an initial study. A previously prepared EIR may also be used as the initial study for a later project.

15075. Notice of Determination.

(a) After deciding to carry out or approve a project for which a negative declaration has been approved, the lead agency shall file a notice of determination.

(b) The notice of determination shall include:

(1) An identification of the project including its common name where possible, and its location.

(2) A brief description of the project.

(3) The date on which the agency approved the project.

(4) The determination of the agency that the project will not have a significant effect on the environment.

(5) A statement that a negative declaration has been prepared pursuant to the provisions of CEQA.

(6) The address where a copy of the negative declaration may be examined.

(c) If the lead agency is a state agency, the notice of determination shall be filed with OPR.

(d) If the lead agency is a local agency, the notice of determination shall be filed with the county clerk of the county or counties in which the project will be located. If the project requires a discretionary approval from any state agency, the notice of determination also shall be filed with OPR.

(e) The filing of the notice of determination and the posting on a list of such notices starts a 30-day statute of limitations on court challenges to the approval under CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(c), 21108(a) and (c), 21152(a) and (c) and 21167(b), Public Resources Code; *Citizens of Lake Murray Area Association* v. *City Council*, (1982) 129 Cal. App. 3d 436.

HISTORY:

1. Amendment of subsections (c) and (d) filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

Article 6.5. Statutory Exemptions

HISTORY:

1. Repealer of Article 6.5 (Sections 15070–15079.7) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Register 78, No. 5.

2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

Article 7. EIR Process

15080. General.

To the extent possible, the EIR process should be combined with the existing planning, review, and project approval process used by each public agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061, 21100 and 21151, Public Resources Code.

HISTORY:

1. Repealer of Article 7 (Sections 15080–15089) and new Article 7 (Sections 15080–15096) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 82, No. 2; 80, No. 19; 78, No. 5; 77, No. 1; 76, No. 41; 75, No. 1; and 73, No. 50.

2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15081. Decision to Prepare an EIR.

The EIR process starts with the decision to prepare an EIR. This decision will be made either during preliminary review under Section 15060 or at the conclusion of an initial study after applying the standards described in Section 15064.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code; *No Oil, Inc.* v. *City of Los Angeles* (1974) 13 Cal. 3d 68; *Friends of B Street* v. *City of Hayward* (1980) 106 Cal. App. 3d 988.

15082. Determination of Scope of EIR.

(a) Notice of Preparation. Immediately after deciding that an environmental impact report is required for a project, the lead agency shall send to each responsible agency a notice of preparation stating that an environmental impact report will be prepared. This notice shall also be sent to every federal agency involved in approving or funding the project and to each trustee agency responsible for natural resources affected by the project.

(1) The notice of preparation shall provide the responsible agencies with sufficient information describing the project and the potential environmental effects to enable the responsible agencies to make a meaningful response. At a minimum, the information shall include:

(A) Description of the project,

(B) Location of the project indicated either on an attached map (preferably a copy of a U.S.G.S. 15′ or 7½′ topographical map identified by quadrangle name, or by a street address in an urbanized area), and

(C) Probable environmental effects of the project.

(2) A sample for a notice of preparation is shown in Appendix J. Public agencies are free to devise their own formats for this notice. A copy of the initial study may be sent with the notice to supply the necessary information.

(3) To send copies of the notice of preparation, the lead agency shall use either certified mail or any other method of transmittal which provides it with a record that the notice was received.

(4) The lead agency may begin work on the draft EIR immediately without awaiting responses to the notice of preparation. The draft EIR in preparation may need to be revised or expanded to conform to responses to the notice of preparation. A lead agency shall not circulate a draft EIR for public review before the time period for responses to the notice of preparation has expired.

(b) Response to Notice of Preparation. Within 30 days after receiving the notice of preparation under subsection (a), each responsible agency shall provide the lead agency with specific detail about the scope and content of the environmental information related to the responsible agency's area of statutory responsibility which must be included in the draft EIR.

(1) The response at a minimum shall identify:

(A) The significant environmental issues and reasonable alternatives and mitigation measures which the responsible agency will need to have explored in the draft EIR; and

(B) Whether the agency will be a responsible agency or trustee agency for the project.

(2) If a responsible agency fails by the end of the 30 day period to provide the lead agency with either a response to the notice or a well justified request for additional time, the lead agency may presume that the responsible agency has no response to make.

(3) A generalized list of concerns not related to the specific project shall not meet the requirements of this section for a response.

(c) Meetings. In order to expedite the consultation, the lead agency, a responsible agency, a trustee agency, or a project applicant may request one or more meetings between representatives of the agencies involved to assist the lead agency in determining the scope and content of the environmental information which the responsible agency may require. Such meetings shall be convened by the lead agency as soon as possible, but no later than 30 days, after the meetings were requested. On request, the Office of Planning and Research will assist in convening meetings which involve state agencies.

(d) State Clearinghouse. When one or more state agencies will be a responsible agency or a trustee agency, the lead agency shall send a notice of preparation to each state responsible agency and each trustee agency with a copy to the State Clearinghouse in the Office of Planning and Research. The State Clearinghouse will ensure that the state responsible agencies and trustees reply to the lead agency within the required time.

(e) Identification Number. When the notice of preparation is submitted to the State Clearinghouse, the state identification number issued by the Clearinghouse shall be the identification number for all subsequent environmental documents on the project. The identification number should be referenced on all subsequent correspondence regarding the project, specifically on the title page of the draft and final EIR and on the notice of determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

HISTORY:

1. Amendment of subsection (b) filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

15083. Early Public Consultation.

Prior to completing the draft EIR, the lead agency may also consult directly with any person or organization it believes will be concerned with the environmental effects of the project. Many public agencies have found that early consultation solves many potential problems that would arise in more serious forms later in the review process. This early consultation may be called scoping. Scoping will be necessary when preparing an EIR/EIS jointly with a federal agency.

(a) Scoping has been helpful to agencies in identifying the range of actions, alternatives, mitigation measures, and significant effects to be analyzed in depth in an EIR and in eliminating from detailed study issues found not to be important.

(b) Scoping has been found to be an effective way to bring together and resolve the concerns of affected federal, state, and local agencies, the proponent of the action, and other interested persons including those who might not be in accord with the action on environmental grounds.

(c) Where scoping is used, it should be combined to the extent possible with consultation under Section 15082.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21082.1, Public Resources Code; Section 4, Chapter 480 of the Statutes of 1981; 40 Code of Federal Regulations, Part 1501.7.

15084. Preparing the Draft EIR.

(a) The draft EIR shall be prepared directly by or under contract to the lead agency. The required contents of a draft EIR are discussed in Article 9 beginning with Section 15120.

(b) The lead agency may require the project applicant to supply data and information both to determine whether the project may have a significant effect on the environment and to assist the lead agency in preparing the draft EIR. The requested information should include an identification of other public agencies which will have jurisdiction by law over the project.

(c) Any person, including the applicant, may submit information or comments to the lead agency to assist in the preparation of the draft EIR. The submittal may be presented in any format, including the form of a draft EIR. The lead agency must consider all information and comments received. The information or comments may be included in the draft EIR in whole or in part.

(d) The lead agency may choose one of the following arrangements or a combination of them for preparing a draft EIR.

(1) Preparing the draft EIR directly with its own staff.

(2) Contracting with another entity, public or private, to prepare the draft EIR.

(3) Accepting a draft prepared by the applicant, a consultant retained by the applicant, or any other person.

(4) Executing a third party contract or memorandum of understanding with the applicant to govern the preparation of a draft EIR by an independent contractor.

(5) Using a previously prepared EIR.

(e) Before using a draft prepared by another person, the lead agency shall subject the draft to the agency's own review and analysis. The draft EIR which is sent out for public review must reflect the independent judgment of the lead agency. The lead agency is responsible for the adequacy and objectivity of the draft EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21082.1, Public Resources Code.

15085. Notice of Completion.

(a) As soon as the draft EIR is completed, a notice of completion must be filed with OPR.

(b) The notice of completion shall include:

(1) A brief description of the project,

(2) The proposed location of the project,

(3) An address where copies of the draft EIR are available, and

(4) The period during which comments will be received on the draft EIR.

(c) A form for the notice of completion is included in the appendices.

(d) Where the EIR will be reviewed through the state review process handled by the State Clearinghouse, the cover form required by the State Clearinghouse will serve as the notice of completion.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21161, Public Resources Code.

HISTORY:

1. Amendment of subsections (a) and (d) filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

15086. Consultation Concerning Draft EIR.

(a) The lead agency shall consult with and request comments on the draft EIR from:

(1) Responsible agencies,

(2) Trustee agencies with resources affected by the project, and

(3) Other state, federal, and local agencies which exercise authority over resources which may be affected by the project.

(b) The lead agency may consult directly with any person who has special expertise with respect to any environmental impact involved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code.

15087. Public Review of Draft EIR.

(a) The lead agency shall provide public notice of the availability of a draft EIR at the same time as it sends a notice of completion to OPR. Notice shall be given to all organizations and individuals who have previously requested such notice and shall also be given by at least one of the following procedures:

(1) Publication at least one time by the public agency in a newspaper of general circulation in the area affected by the proposed project.

(2) Posting of notice by the public agency on and off the site in the area where the project is to be located.

(3) Direct mailing to owners of property contiguous to the parcel or parcels on which the project is located as those owners are shown on the latest equalized assessment roll.

(b) The alternatives for providing notice specified in subsection (a) shall not preclude a public agency from providing additional notice by other means if such agency so desires, nor shall the requirements of this section preclude a public agency from providing the public notice required by this section at the same time and in the same manner as public notice otherwise required by law for the project.

(c) In order to provide sufficient time for public review, review periods for draft EIRs should not be less than 30 days nor longer than 90 days from the date of the notice except in unusual situations. The review period for draft EIRs for which a state agency is the lead agency or a responsible agency shall be at least 45 days unless a shorter period is approved by the State Clearinghouse.

(d) Public agencies shall use the State Clearinghouse to distribute draft EIRs to state agencies for review and should use areawide clearinghouses to distribute the documents to regional and local agencies.

(e) To make copies of EIRs available to the public, lead agencies should furnish copies of draft EIRs to public library systems serving the area involved. Copies should also be available in offices of the lead agency.

(f) Public agencies should compile listings of other agencies, particularly local agencies, which have jurisdiction by law and/or special expertise with respect to various projects and project locations. Such listings should be a guide in determining which agencies should be consulted with regard to a particular project.

(g) Public hearings may be conducted on the environmental documents, either in separate proceedings or in conjunction with other proceedings of the public agency. Public hearings are encouraged, but not required as an element of the CEQA process.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21092, 21104, 21153 and 21161, Public Resources Code; and Section 6061, Government Code.

HISTORY:

1. Amendment of subsection (a) filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

15088. Evaluation of and Response to Comments.

(a) The lead agency shall evaluate comments on environmental issues received from persons who reviewed the draft EIR and shall prepare a written response. The lead agency shall respond to comments received during the noticed comment period and any extensions and may respond to late comments.

(b) The written response shall describe the disposition of significant environmental issues raised (e.g., revisions to the proposed project to mitigate anticipated impacts or objections). In particular, the major environmental issues raised when the lead agency's position is at variance with recommendations and objections raised in the comments must be addressed in detail giving reasons why specific comments and suggestions were not accepted. There must be good faith, reasoned analysis in response. Conclusory statements unsupported by factual information will not suffice.

(c) The response to comments may take the form of a revision to the draft EIR or may be a separate section in the final EIR. Where the response to comments makes important changes in the information contained in the text of the draft EIR, the lead agency should either:

(1) Revise the text in the body of the EIR, or

(2) Include marginal notes showing that the information is revised in the response to comments.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code; *People* v. *County of Kern*, (1974) 39 Cal. App. 3d 830; *Cleary* v. *County of Stanislaus*, (1981) 118 Cal. App. 3d 348.

15089. Preparation of Final EIR.

(a) The lead agency shall prepare a final EIR before approving the project. The contents of a final EIR are specified in Section 15132 of these guidelines.

(b) Lead agencies may provide an opportunity for review of the final EIR by the public or by commenting agencies before approving the project. The review of a final EIR should focus on the responses to comments on the draft EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100, 21105 and 21151, Public Resources Code; *City of Carmel-by-the-Sea* v. *Board of Supervisors*, (1977) 71 Cal. App. 3d 84; State Administrative Manual, Section 1060.

15090. Certification of Final EIR.

The lead agency shall certify that:

(a) The final EIR has been completed in compliance with CEQA; and

(b) The final EIR was presented to the decisionmaking body of the lead agency and that the decisionmaking body reviewed and considered the information contained in the final EIR prior to approving the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108 and 21152, Public Resources Code; *City of Carmel-by-the-Sea* v. *Board of Supervisors* (1977) 71 Cal. App. 3d 84; *Kleist* v. *City of Glendale* (1976) 56 Cal. App. 3d 770.

15091. Findings.

(a) No public agency shall approve or carry out a project for which an EIR has been completed which identifies one or more significant environmental effects of the project unless the public agency makes one or more written findings for each of those significant effects, accompanied by a brief explanation of the rationale for each finding. The possible findings are:

(1) Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.

(2) Such changes or alterations are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.

(3) Specific economic, social, or other considerations make infeasible the mitigation measures or project alternatives identified in the final EIR.

(b) The findings required by subsection (a) shall be supported by substantial evidence in the record.

(c) The finding in subsection (a) (2) shall not be made if the agency making the finding has concurrent jurisdiction with another agency to deal with identified feasible mitigation measures or alternatives.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1 and 21081, Public Resources Code; *Laurel Hills Homeowners Association* v. *City Council*, 83 Cal. App. 3d 515; *Cleary* v. *County of Stanislaus*, 118 Cal. App. 3d 348.

15092. Approval.

(a) After considering the final EIR and in conjunction with making findings under Section 15091, the lead agency may decide whether or how to approve or carry out the project.

(b) A public agency shall not decide to approve or carry out a project for which an EIR was prepared unless either:

(1) The project as approved will not have a significant effect on the environment, or

(2) The agency has:

(A) Eliminated or substantially lessened all significant effects on the environment where feasible as shown in findings under Section 15091, and

(B) Determined that any remaining significant effects on the environment found to be unavoidable under Section 15091 are acceptable due to overriding concerns as described in Section 15093.

(c) With respect to a project which includes housing development, the public agency shall not reduce the proposed number of housing units as a mitigation measure if it determines that there is another feasible specific mitigation measure available that will provide a comparable level of mitigation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1, 21081 and 21085, Public Resources Code; *Friends of Mammoth* v. *Board of Supervisors*, (1972) 8 Cal. App. 3d 247; *San Francisco Ecology Center* v. *City and County of San Francisco*, (1975) 48 Cal. App. 3d 584; *City of Carmel-by-the-Sea* v. *Board of Supervisors*, (1977) 71 Cal. App. 3d 84; *Laurel Hills Homeowners Association* v. *City Council*, (1978) 83 Cal. App. 3d 515.

15093. Statement of Overriding Considerations.

(a) CEQA requires the decisionmaker to balance the benefits of a proposed project against its unavoidable environmental risks in determining whether to approve the project. If the benefits of a proposal project outweigh the unavoidable adverse environmental effects, the adverse environmental effects may be considered "acceptable".

(b) Where the decision of the public agency allows the occurrence of significant effects which are identified in the final EIR but are not at least substantially mitigated, the agency shall state in writing the specific reasons to support its action based on the final EIR and/or other information in the record. This statement may be necessary if the agency also makes a finding under Section 15091 (a) (2) or (a) (3).

(c) If an agency makes a statement of overriding considerations, the statement should be included in the record of the project approval and should be mentioned in the notice of determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: *San Francisco Ecology Center* v. *City and County of San Francisco*, 48 Cal. App. 3d 584 (1975); *City of Carmel-by-the-Sea* v. *Board of Supervisors* 71 Cal. App. 3d 84 (1977).

15094. Notice of Determination.

(a) The lead agency shall file a notice of determination following each project approval for which an EIR was considered. The notice shall include:

(1) An identification of the project including its common name where possible and its location.

(2) A brief description of the project.

(3) The date when the agency approved the project.

(4) The determination of the agency whether the project in its approved form will have a significant effect on the environment.

(5) A statement that an EIR was prepared and certified pursuant to the provisions of CEQA.

(6) Whether mitigation measures were made a condition of the approval of the project.

(7) Whether findings were made pursuant to Section 15091.

(8) Whether a statement of overriding considerations was adopted for the project.

(9) The address where a copy of the final EIR and the record of project approval may be examined.

(b) If a state agency is the lead agency, the notice of determination shall be filed with OPR.

(c) If a local agency is the lead agency, the notice of determination shall be filed with the county clerk of the county or counties in which the project will be located. If the project requires discretionary approval from a state agency, the notice of determination shall also be filed with OPR.

(d) The filing of the notice of determination and the posting on a list of such notice starts a 30-day statute of limitations on court challenges to the approval under CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108, 21152 and 21167, Public Resources Code; *Citizens of Lake Murray Area Association* v. *City Council*, (1982) 129 Cal. App. 3d 436.

HISTORY:

1. Amendment of subsections (b) and (c) filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

15095. Disposition of a Final EIR.

The lead agency shall:

(a) File a copy of the final EIR with the appropriate planning agency of any city, county, or city and county where significant effects on the environment may occur.

(b) Include the final EIR as part of the regular project report which is used in the existing project review and budgetary process if such a report is used.

(c) Retain one or more copies of the final EIR as public records for a reasonable period of time.

(d) Require the applicant to provide a copy of the certified, final EIR to each responsible agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21105, 21151 and 21165, Public Resources Code; *County of Inyo* v. *Yorty*, (1973) 32 Cal. App. 3d 795.

15096. Process for a Responsible Agency.

(a) General. A responsible agency complies with CEQA by considering the EIR or negative declaration prepared by the lead agency and by reaching its own conclusions on whether and how to approve the project involved. This section identifies the special duties a public agency will have when acting as a responsible agency.

(b) Response to Consultation. A responsible agency shall respond to consultation by the lead agency in order to assist the lead agency in preparing adequate environmental documents for the project. By this means, the responsible agency will ensure that the documents it will use will comply with CEQA.

(1) In response to consultation, a responsible agency shall explain its reasons for recommending whether the lead agency should prepare an EIR or negative declaration for a project. Where the responsible agency disagrees with the lead agency's proposal to prepare a negative declaration for a project, the responsible agency should identify the significant environmental effects which it believes could result from the project and recommend either that an EIR be prepared or that the project be modified to eliminate the significant effects.

(2) As soon as possible, but not longer than 30 days after receiving a notice of preparation from the lead agency, the responsible agency shall send a written reply by certified mail or any other method which provides the agency with a record showing that the notice was received. The reply shall specify the scope and content of the environmental information which would be germane to the responsible agency's statutory responsibilities in connection with the proposed project. The lead agency shall include this information in the EIR.

(c) Meetings. The responsible agency shall designate employees or representatives to attend meetings requested by the lead agency to discuss the scope and content of the EIR.

(d) Comments on Draft EIRs and Negative Declarations. A responsible agency should review and comment on draft EIRs and negative declarations for projects which the responsible agency would later be asked to approve. Comments should focus on any shortcomings in the EIR, the appropriateness of using a negative declaration, or on additional alternatives or mitigation measures which the EIR should include. The comments shall be limited to those project activities which are within the agency's area of expertise or which are required to be carried out or approved by the agency or which will be subject to the exercise of powers by the agency. Comments shall be as specific as possible and supported by either oral or written documentation.

(e) Decision on Adequacy of EIR or Negative Declaration. If a responsible agency believes that the final EIR or negative declaration prepared by the lead agency is not adequate for use by the responsible agency, the responsible agency must either:

(1) Take the issue to court within 30 days after the lead agency files a notice of determination;

(2) Be deemed to have waived any objection to the adequacy of the EIR or negative declaration;

(3) Prepare a subsequent EIR if permissible under Section 15162; or

(4) Assume the lead agency role as provided in Section 15052(a)(3).

(f) Consider the EIR or Negative Declaration. Prior to reaching a decision on the project, the responsible agency must consider the environmental effects of the project as shown in the EIR or negative declaration. A subsequent or supplemental EIR can be prepared only as provided in Sections 15162 or 15163.

(g) Adoption of Alternatives or Mitigation Measures.

(1) When considering alternatives and mitigation measures, a responsible agency is more limited than a lead agency. A responsible agency has responsibility for mitigating or avoiding only the direct or indirect environmental effects of those parts of the project which it decides to carry out, finance, or approve.

(2) When an EIR has been prepared for a project, the Responsible Agency shall not approve the project as proposed if the agency finds any feasible alternative or feasible mitigation measures within its powers that would substantially lessen or avoid any significant effect the project would have on the environment. With respect to a project which includes housing development, the responsible agency shall not reduce the proposed number of housing units as a mitigation measure if it determines that there is another feasible specific mitigation measure available that will provide a comparable level of mitigation.

(h) Findings. The responsible agency shall make the findings required by Section 15091 for each significant effect of the project and shall make the findings in Section 15093 if necessary.

(i) Notice of Determination. The responsible agency should file a notice of determination in the same manner as a lead agency under Section 15075 or 15094 except that the responsible agency does not need to state that the EIR or negative declaration complies with CEQA. The responsible agency should state that it considered the EIR or negative declaration as prepared by a lead agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21165, 21080.1, 21080.3, 21080.4, 21082.1 and 21002.1(b) and (d), Public Resources Code.

HISTORY:

1. Amendment of subsections (b) and (d) filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

Article 8. Time Limits

15100. General.

(a) Public agencies shall adopt time limits to govern their implementation of CEQA consistent with this article.

(b) Public agencies should carry out their responsibilities for preparing and reviewing EIRs within a reasonable period of time. The requirement for the preparation of an EIR should not cause undue delays in the processing of applications for permits or other entitlements to use.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY:

1. Renumbering and amendment of former Article 8 (Sections 15100–15129) to Article 19 (Sections 15300–15329) and new Article 8 (Sections 15100–15112) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Register 82, No. 2.
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15101. Review of Application for Completeness.

A lead agency or responsible agency shall determine whether an application for a permit or other entitlement for use is complete within 30 days from the receipt of the application except as provided in Section 15111. If no written determination of the completeness of the application is made within that period, the application will be deemed complete on the 30th day.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083, Public Resources Code; and Section 65943, Government Code.

15102. Initial Study.

The lead agency shall determine within 30 days after accepting an application as complete whether it intends to prepare an EIR or a negative declaration or use a previously prepared EIR or negative declaration except as provided in Section 15111. The 30 day period may be extended 15 days upon the consent of the lead agency and the project applicant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.2, Public Resources Code.

HISTORY:

1. Amendment filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

15103. Response to Notice of Preparation.

Responsible agencies and trustee agencies shall provide a response to a notice of preparation to the lead agency within 30 days after receipt of the notice. If a responsible agency fails to reply within the 30 days with either a response or a well justified request for additional time, the lead agency may assume that the responsible agency has no response and may ignore a late response.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

HISTORY:

1. Amendment filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

15104. Convening of Meetings.

The lead agency shall convene a meeting with agency representatives to discuss the scope and content of the environmental information a responsible agency will need in the EIR as soon as possible but no later than 30 days after receiving a request for the meeting. The meeting may be requested by the lead agency, a responsible agency, a trustee agency, or by the project applicant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

15105. Public Review.

(a) The public review period for a draft EIR should not be less than 30 days nor longer than 90 days except in unusual circumstances.

(b) The public review period for a negative declaration shall be a reasonable period of time sufficient to allow members of the public to respond to the proposed finding before the negative declaration is approved.

(c) If a draft EIR or negative declaration has been submitted to the State Clearinghouse for review by state agencies, the public review period shall be at least as long as the review period established by the State Clearinghouse.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21092, Public Resources Code; *People* v. *County of Kern*, 39 Cal. App. 3d 830.

15106. Review by State Agencies.

When a draft EIR or negative declaration is submitted to the State Clearinghouse for review, the normal review period is 45 days for draft EIRs and 30 days for negative declarations. The State Clearinghouse may set shorter review periods when requested by the lead agency due to exceptional circumstances.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code.

15107. Completion of Negative Declaration.

With a private project, the negative declaration must be completed and ready for approval within 105 days from the date when the lead agency accepted the application as complete. The negative declaration may be approved at a later time when the permit or other entitlement is approved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code.

15108. Completion and Certification of EIR.

With a private project, the lead agency shall complete and certify the final EIR as provided in Section 15090 within one year after the date when the lead agency accepted the application as complete. Lead agency procedures may provide that the one-year time limit may be extended once for a period of not more than 90 days upon consent of the lead agency and the applicant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code; and Government Code Section 65950.

15109. Suspension of Time Periods.

An unreasonable delay by an applicant in meeting requests by the lead agency necessary for the preparation of a negative declaration or an EIR shall suspend the running of the time periods described in Sections 15107 and 15108 for the period of the unreasonable delay. Alternatively, an agency may disapprove a project application where there is unreasonable delay in meeting requests. The agency may allow a renewed application to start at the same point in the process where the application was when it was disapproved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code; *Carmel Valley View, Ltd.* v. *Maggini*, 91 Cal. App. 3d 318.

15110. Projects With Federal Involvement.

(a) At the request of an applicant, the lead agency may waive the one-year time limit for completing and certifying a final EIR or the 105-day period for completing a negative declaration if:

(1) The project will be subject to CEQA and to the National Environmental Policy Act,

(2) Additional time will be required to prepare a combined EIR-EIS or combined negative declaration-finding of no significant impact as provided in Section 15221, and

(3) The time required to prepare the combined document will be shorter than the time required to prepare the documents separately.

(b) The time limits for taking final action on a permit for a development project may also be waived where a combined EIR-EIS will be prepared.

(c) The time limits for processing permits for development projects under Government Code Sections 65950–65960 shall not apply if federal statutes or regulations require time schedules which exceed the state time limits. In this event, any state agencies involved shall make a final decision on the project within the federal time limits.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.6 and 21083.7, Public Resources Code; Sections 65951 and 65954, Government Code; Public Law 91-190 as amended, 42 U.S.C.A. 4321–4347.

HISTORY:

1. Amendment of subsection (a)(2) filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

15111. Projects With Short Time Periods for Approval.

(a) A few statutes or ordinances require agencies to make decisions on permits within time limits that are so short that review of the project under CEQA would be difficult. To enable the lead agency to comply with both the permit statute and CEQA, the lead agency shall deem an application for a project not received for filing under the permit statute or ordinance until such time as progress toward completing the environmental documentation required by CEQA is sufficient to enable the lead agency to finish the CEQA process within the short permit time limit. This section will apply where all of the following conditions are met:

(b) An EIR on a redevelopment plan shall be treated as a program EIR with no subsequent EIRs required for individual components of the redevelopment plan unless a subsequent EIR or a supplement to an EIR would be required by Section 15162 or 15163.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21090, Public Resources Code.

HISTORY:

1. New Article 12 (Sections 15190–15192) filed 1-6-76 as an emergency; effective upon filing (Register 76, No. 2).
2. Certificate of Compliance filed 4-2-76 (Register 76, No. 14).
3. Repealer of Article 12 (Sections 15190–15193) and new Article 12 (Sections 15180–15185) filed 7-13-83; effective 8-1-83 (Register 83, No. 29). For prior history, see Registers 82, No. 2; 81, Nos. 30 and 45; 80, No. 15; 79, Nos. 18, 23 and 30; and 78, No. 33.
4. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15181. Housing and Neighborhood Commercial Facilities in Urbanized Areas.

(a) A lead agency may approve a project involving the construction of housing or neighborhood commercial facilities in an urbanized area with the use of an EIR or negative declaration previously prepared for a specific plan, local coastal program, or port master plan if the lead agency complies with the requirements of this section.

(b) The procedures for complying with this section are as follows:

(1) The lead agency shall conduct an initial study to determine whether the project may have one or more significant effects on the environment.

(2) The lead agency shall give notice of its proposed use of a previously prepared EIR to all persons who had submitted a written request for notice and shall also give notice by either:

(A) Posting notice on and off the site in the area where the project would be located, or

(B) Mailing notice directly to owners of property contiguous to the project site.

(3) The lead agency shall make the following findings with regard to planning and the previously prepared EIR.

(A) That the project is consistent with either:

1. A specific plan which was adopted for the area pursuant to Article 8 (commencing with Section 65450), Article 9 (commencing with Section 65500), and Article 10 (commencing with Section 65550) of Chapter 3 of Title 7 of the Government Code, or

2. A local coastal program or port master plan certified pursuant to Article 2 (commencing with Section 30510) of Chapter 6 of Division 20 of the Public Resources Code.

(B) That the specific plan, local coastal program, or port master plan was adopted not more than five years prior to the finding made pursuant to this subsection and that the method of adoption was the procedure specified by Article 9 (commencing with Section 65500) of Chapter 3 of Title 7 of the Government Code for adopting specific plans and regulations.

(C) That the specific plan or local coastal program or port master plan was the subject of a certified environmental impact report.

(D) That the environmental impact report is sufficiently detailed so that all the significant effects of the project on the environment and measures necessary to mitigate or avoid any such effects can be determined. This examination of the previously prepared EIR shall include a further, specific finding as to:

1. Whether there would be any significant physical effects on existing structures and neighborhoods of historical or aesthetic significance if any exist in the area covered by the plan or program, and

2. Whether measures necessary to mitigate or avoid such effects are included in the EIR.

(E) That a subsequent EIR is not required pursuant to Public Resources Code Section 21166 and Guidelines Section 15162.

(4) The lead agency shall make one or more findings as required by Section 15091 with regard to mitigating or avoiding each significant effect that the project would have on the environment.

(5) The lead agency shall file a notice of determination with the county clerk if the lead agency approves the project.

(c) As used in this section, "neighborhood commercial facilities" means those commercial facilities which are an integral part of a project involving the construction of housing and which will serve the residents of such housing.

(d) As used in this section, "urbanized area" means only those areas mapped and designated as urbanized by the U.S. Bureau of the Census.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.7, Public Resources Code.

15182. Residential Projects Pursuant to a Specific Plan.

(a) Exemption. Where a public agency has prepared an EIR on a specific plan after January 1, 1980, no EIR or negative declaration need be prepared for a residential project undertaken pursuant to and in conformity to that specific plan if the project meets the requirements of this section.

(b) Scope. Residential projects covered by this section include but are not limited to land subdivisions, zoning changes, and residential planned unit developments.

(c) Limitation. This section is subject to the limitation that if after the adoption of the specific plan, an event described in Section 15162 should occur, this exemption shall not apply until the city or county which adopted the specific plan completes a subsequent EIR or a supplement to an EIR on the specific plan. The exemption provided by this section shall again be available to residential projects after the lead agency has filed a Notice of Determination on the specific plan as reconsidered by the subsequent EIR or supplement to the EIR.

(d) Alternative. This section provides an alternative to the procedure described in Section 15181.

(e) Fees. The lead agency has authority to charge fees to applicants for projects which benefit from this section. The fees shall be calculated in the aggregate to defray but not to exceed the cost of developing and adopting the specific plan including the cost of preparing the EIR.

(f) Statute of Limitations. A court action challenging the approval of a project under this section for failure to prepare a supplemental EIR shall be commenced within 30 days after the lead agency's decision to carry out or approve the project in accordance with the specific plan.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 65453, Government Code.

15183. Residential Projects Consistent with a Community Plan, General Plan, or Zoning.

(a) In approving a residential project meeting the requirements of this section, a public agency shall limit its examination of environmental effects under CEQA to effects which:

(1) Are peculiar to the project or the parcel on which the project would be located, although the effect may occur on or off the site of the project, and

(2) Were not analyzed as significant effects in a prior EIR on the zoning, general plan or community plan with which the residential project is consistent.

(b) This section shall apply only to residential projects which meet the following conditions:

(1) The project is consistent with:

(A) A community plan adopted as part of a general plan or zoning action which zoned or designated the parcel on which the project would be located to accommodate a particular density of residential development, or

(B) A general plan of a local agency, and

(2) An EIR was certified by the lead agency for the zoning action or the general plan.

(c) This section shall limit the analysis of only those significant environmental effects for which:

(1) Each public agency with authority to mitigate any of the significant effects on the environment identified in the EIR on the planning or zoning action undertakes or requires others to undertake mitigation measures specified in the EIR which the lead agency found to be feasible, and

(2) The lead agency makes a finding at a public hearing as to whether the feasible mitigation measures will be undertaken.

(d) An effect of a project on the environment shall not be considered peculiar to the project or the parcel for the purposes of this section if uniformly applied development policies or standards have been previously adopted by the city or county with a finding that the development policies or standards will substantially mitigate that environmental effect when applied to future projects. The finding shall be based on substantial evidence which need not include an EIR. Examples of uniformly applied development policies or standards include:

(1) Parking ordinances,

(2) Public access requirements,

(3) Grading ordinances.

(e) An environmental effect shall not be considered peculiar to the project or parcel solely because no uniformly applied development policy or standard is applicable to it.

(f) Where a community plan meets the requirements of this section, any rezoning action consistent with the community plan shall be treated as a residential project subject to this section.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083.3, Public Resources Code.

HISTORY:

1. Amendment of section heading and subsections (a) (2) and (b) filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

15184. State Mandated Local Projects.

Whenever a state agency issues an order which requires a local agency to carry out a project subject to CEQA, the following rules apply:

(a) If an EIR is prepared for the project, the local agency shall limit the EIR to considering those factors and alternatives which will not conflict with the order.

(b) If a local agency undertakes a project to implement a rule or regulation imposed by a certified state environmental regulatory program listed in Section 15251, the project shall be exempt from CEQA with regard to the significant effects analyzed in the document prepared by the state agency as a substitute for an EIR. The local agency shall comply with CEQA with regard to any site-specific effect of the project which was not analyzed by the certified state agency as a significant effect on the environment. The local agency need not re-examine the general environmental effects of the state rule or regulation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080, 21080.5 and 21154, Public Resources Code.

15185. Administrative Appeals.

(a) Where an agency allows administrative appeals upon the adequacy of an environmental document, an appeal shall be handled according to the procedures of that agency. Public notice shall be handled in accordance with individual agency requirements and Section 15202(e).

(b) The decisionmaking body to which an appeal has been made shall consider the environmental document and make findings under Sections 15091 and 15093 if appropriate.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082 and 21083, Public Resources Code.

Article 13. Review and Evaluation of EIRs and Negative Declarations

15200. Purposes of Review.

The purposes of review of EIRs and negative declarations include:

(a) Sharing expertise,
(b) Disclosing agency analyses,
(c) Checking for accuracy,
(d) Detecting omissions,
(e) Discovering public concerns, and
(f) Soliciting counter proposals.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21000, 21108 and 21152, Public Resources Code; *Environmental Defense Fund* v. *Coastside County Water District* (1972) 27 Cal. App. 3d 695; *County of Inyo* v. *City of Los Angeles* (1977) 71 Cal. App. 3d 185.

HISTORY:

1. New Article 13 (Sections 15201–15203) filed 2-2-78; effective thirtieth day thereafter (Register 78, No. 5).
2. Repealer of Article 13 (Sections 15201–15203) and new Article 13 (Sections 15200–15209) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).
3. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

15201. Public Participation.

Public participation is an essential part of the CEQA process. Each public agency should include provisions in its CEQA procedures for wide public involvement, formal and informal, consistent with its existing activities and procedures, in order to receive and evaluate public reactions to environmental issues related to the agency's activities.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000, 21082, 21108 and 21152, Public Resources Code; *Environmental Defense Fund* v. *Coastside County Water District* (1972) 27 Cal. App. 3d 695; *People* v. *County of Kern* (1974) 39 Cal. App. 3d 830; *County of Inyo* v. *City of Los Angeles* (1977) 71 Cal. App. 3d 185.

15202. Public Hearings.

(a) CEQA does not require formal hearings at any stage of the environmental review process. Public comments may be restricted to written communications.

(b) If an agency provides a public hearing on its decision to carry out or approve a project, the agency should include environmental review as one of the subjects for the hearing.

(c) A public hearing on the environmental impact of a project should usually be held when the lead agency determines it would facilitate the purposes and goals of CEQA to do so. The hearing may be held in conjunction with and as a part of normal planning activities.

15310. Loans.

Class 10 consists of loans made by the Department of Veterans Affairs under the Veterans Farm and Home Purchase Act of 1943, mortgages for the purchase of existing structures where the loan will not be used for new construction and the purchase of such mortgages by financial institutions. Class 10 includes but is not limited to the following examples:

(a) Loans made by the Department of Veterans Affairs under the Veterans Farm and Home Purchase Act of 1943.

(b) Purchases of mortgages from banks and mortgage companies by the Public Employees Retirement System and by the State Teachers Retirement System.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15311. Accessory Structures.

Class 11 consists of construction, or placement of minor structures accessory to (appurtenant to) existing commercial, industrial, or institutional facilities, including but not limited to:

(a) On-premise signs;

(b) Small parking lots;

(c) Placement of seasonal or temporary use items such as lifeguard towers, mobile food units, portable restrooms, or similar items in generally the same locations from time to time in publicly owned parks, stadiums, or other facilities designed for public use.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15312. Surplus Government Property Sales.

Class 12 consists of sales of surplus government property except for parcels of land located in an area of statewide, regional, or areawide concern identified in Section 15206(b)(4). However, even if the surplus property to be sold is located in any of those areas, its sale is exempt if:

(a) The property does not have significant values for wildlife habitat or other environmental purposes, and

(b) Any of the following conditions exist:

(1) The property is of such size, shape, or inaccessibility that it is incapable of independent development or use; or

(2) The property to be sold would qualify for an exemption under any other class of categorical exemption in these guidelines; or

(3) The use of the property and adjacent property has not changed since the time of purchase by the public agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

HISTORY:

1. Amendment filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

15313. Acquisition of Lands for Wildlife Conservation Purposes.

Class 13 consists of the acquisition of lands for fish and wildlife conservation purposes including preservation of fish and wildlife habitat, establishing ecological reserves under Fish and Game Code Section 1580, and preserving access to public lands and waters where the purpose of the acquisition is to preserve the land in its natural condition.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15314. Minor Additions to Schools.

Class 14 consists of minor additions to existing schools within existing school grounds where the addition does not increase original student capacity by more than 25% or ten classrooms, whichever is less. The addition of portable classrooms is included in this exemption.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15315. Minor Land Divisions.

Class 15 consists of the division of property in urbanized areas zoned for residential, commercial, or industrial use into four or fewer parcels when the division is in conformance with the General Plan and zoning, no variances or exceptions are required, all services and access to the proposed parcels to local standards are available, the parcel was not involved in a division of a larger parcel within the previous 2 years, and the parcel does not have an average slope greater than 20 percent.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15316. Tranfer of Ownership of Land in Order to Create Parks.

Class 16 consists of the acquisition or sale of land in order to establish a park where the land is in a natural condition or contains historic sites or archaelogical sites and either:

(a) The management plan for the park has not been prepared, or

(b) The management plan proposes to keep the area in a natural condition or preserve the historical or archaeological site. CEQA will apply when a management plan is proposed that will change the area from its natural condition or significantly change the historic or archaeological site.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15317. Open Space Contracts or Easements.

Class 17 consists of the establishment of agricultural preserves, the making and renewing of open space contracts under the Williamson Act, or the acceptance of easements or fee interests in order to maintain the open space character of the area. The cancellation of such preserves, contracts, interests, or easements is not included and will normally be an action subject to the CEQA process.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15318. Designation of Wilderness Areas.

Class 18 consists of the designation wilderness areas under the California Wilderness System.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

15371. Negative Declaration.

"Negative declaration" means a written statement by the lead agency briefly describing the reasons that a proposed project, not exempt from CEQA, will not have a significant effect on the environment and therefore does not require the preparation of an EIR. The contents of a negative declaration are described in Section 15071.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(c), Public Resources Code.

15372. Notice of Completion.

"Notice of completion" means a brief notice filed with the OPR by a lead agency as soon as it has completed a draft EIR and is prepared to send out copies for review. The contents of this notice are explained in Section 15085.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21161, Public Resources Code.

HISTORY:

1. Amendment filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

15373. Notice of Determination.

"Notice of determination" means a brief notice to be filed by a public agency after it approves or determines to carry out a project which is subject to the requirements of CEQA. The contents of this notice are explained in Sections 15075 and 15094.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108(a) and 21152, Public Resources Code.

15374. Notice of Exemption.

"Notice of exemption" means a brief notice which may be filed by a public agency after it has decided to carry out or approve a project and has determined that the project is exempt from CEQA as being ministerial, categorically exempt, an emergency, or subject to another exemption from CEQA. Such a notice may also be filed by an applicant where such a determination has been made by a public agency which must approve the project. The contents of this notice are explained in Section 15062.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108(b) and 21152(b), Public Resources Code.

15375. Notice of Preparation.

"Notice of preparation" means a brief notice sent by a lead agency to notify the responsible agencies, trustee agencies, and involved federal agencies that the lead agency plans to prepare an EIR for the project. The purpose of the notice is to solicit guidance from those agencies as to the scope and content of the environmental information to be included in the EIR. Public agencies are free to develop their own formats for this notice. The contents of this notice are described in Section 15082.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

15376. Person.

"Person" includes any person, firm, association, organization, partnership, business, trust, corporation, company, district, city, county, city and county, town, the state, and any of the agencies or political subdivisions of such entities.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21065, Public Resources Code.

15377. Private Project.

A "private project" means a project which will be carried out by a person other than a governmental agency, but the project will need a discretionary approval from one or more governmental agencies for:

(a) A contract or financial assistance, or

(b) A lease, permit, license, certificate, or other entitlement for use.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21065, Public Resources Code.

15378. Project.

(a) "Project" means the whole of an action, which has a potential for resulting in a physical change in the environment, directly or ultimately, and that is any of the following:

(1) An activity directly undertaken by any public agency including but not limited to public works construction and related activities clearing or grading of land, improvements to existing public structures, enactment and amendment of zoning ordinances, and the adoption and amendment of local General Plans or elements thereof pursuant to Government Code Sections 65100–65700.

(2) An activity undertaken by a person which is supported in whole or in part through public agency contracts, grants, subsidies, loans, or other forms of assistance from one or more public agencies.

(3) An activity involving the issuance to a person of a lease, permit, license, certificate, or other entitlement for use by one or more public agencies.

(b) Project does not include:

(1) Anything specifically exempted by state law;

(2) Proposals for legislation to be enacted by the State Legislature;

(3) Continuing administrative or maintenance activities, such as purchases for supplies, personnel-related actions, emergency repairs to public service facilities, general policy and procedure making (except as they are applied to specific instances covered above);

(4) The submittal of proposals to a vote of the people of the state or of a particular community. (Stein v. City of Santa Monica, 110 Cal. App. 3d 458);

(5) The closing of a public school and the transfer of students to another school where the only physical changes involved are categorically exempt. (Prentiss v. Board of Education, 111 Cal. App. 3d 847; But see, Fullerton Joint Union High School District v. State Board of Education (Dec. 2, 1982) Cal. 3d, Slip Opinion Footnote 16 at page 27.)

(c) The term "project" refers to the activity which is being approved and which may be subject to several discretionary approvals by governmental agencies. The term "project" does not mean each separate governmental approval.

(d) Where the lead agency could describe the project as either the adoption of a particular regulation under Subsection (a) (1) or as a development proposal which will be subject to several governmental approvals under Subsections (a) (2) or (a) (3), the lead agency shall describe the project as the development proposal for the purpose of environmental analysis. This approach will implement the lead agency principle as described in Article 4.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21065, Public Resources Code.

15379. Public Agency.

"Public agency" includes any state agency, board, or commission and any local or regional agency, as defined in these guidelines. It does not include the courts of the state. This term does not include agencies of the federal government.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21063, Public Resources Code.

by a state agency, the notice shall be filed with OPR. If the permit was granted by a local agency, the notice shall be filed with the county clerk of the county or counties in which the project will be located.

(B) The notice of exemption filed by an applicant shall contain the information required in subdivision (a) together with a certified document issued by the public agency stating that the agency has found the project to be exempt. The certified document may be a certified copy of an existing document or record of the public agency.

(C) A notice filed by an applicant shall be subject to the same posting and time requirements as a notice filed by a public agency.

(d) The filing of a Notice of Exemption and the posting on the list of notices start a 35 day statute of limitations period on legal challenges to the agency's decision that the project is exempt from CEQA. If a Notice of Exemption is not filed, a 180 day statute of limitations will apply.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108 and 21152, Public Resources Code.

HISTORY

1. Amendment of subsections (b) and (c) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15063. Initial Study.

(a) Following preliminary review, the lead agency shall conduct an initial study to determine if the project may have a significant effect on the environment. If the lead agency can determine that an EIR will clearly be required for the project, an initial study is not required but may still be desirable.

(1) All phases of project planning, implementation, and operation must be considered in the initial study of the project.

(2) To meet the requirements of this section, the lead agency may use an initial study or a similar analysis prepared pursuant to the National Environmental Policy Act.

(b) Results.

(1) If the agency determines that there is substantial evidence that any aspect of the project, either individually or cumulatively, may cause a significant effect on the environment, regardless of whether the overall effect of the project is adverse or beneficial, the lead agency shall do one of the following:

(A) Prepare an EIR or

(B) Use a previously prepared EIR which the lead agency determines would adequately analyze the project at hand, or

(C) Determine, pursuant to a program EIR, tiering, or another appropriate process, which of a project's effects were adequately examined by an earlier EIR or negative declaration. Another appropriate process may include, for example, a master EIR, a master environmental assessment, approval of housing and neighborhood commercial facilities in urban areas as described in section 15181, approval of residential projects pursuant to a specific plan as described in section 15182, approval of residential projects consistent with a community plan, general plan or zoning as described in section 15183, or an environmental document prepared under a State certified regulatory program. The lead agency shall then ascertain which effects, if any, should be analyzed in a later EIR or negative declaration.

(2) The lead agency shall prepare a negative declaration if there is no substantial evidence that the project or any of its aspects may cause a significant effect on the environment.

(c) Purposes. The purposes of an initial study are to:

(1) Provide the lead agency with information to use as the basis for deciding whether to prepare an EIR or negative declaration;

(2) Enable an applicant or lead agency to modify a project, mitigating adverse impacts before an EIR is prepared, thereby enabling the project to qualify for a negative declaration;

(3) Assist the preparation of an EIR, if one is required, by:

(A) Focusing the EIR on the effects determined to be significant,

(B) Identifying the effects determined not to be significant,

(C) Explaining the reasons for determining that potentially significant effects would not be significant, and

(D) Identifying whether a program EIR, tiering, or another appropriate process can be used for analysis of the project's environmental effects.

(4) Facilitate environmental assessment early in the design of a project;

(5) Provide documentation of the factual basis for the finding in a negative declaration that a project will not have a significant effect on the environment;

(6) Eliminate unnecessary EIRs;

(7) Determine whether a previously prepared EIR could be used with the project.

(d) Contents. An initial study shall contain in brief form:

(1) A description of the project including the location of the project;

(2) An identification of the environmental setting;

(3) An identification of environmental effects by use of a checklist, matrix, or other method, provided that entries on a checklist or other form are briefly explained to indicate that there is some evidence to support the entries. The brief explanation may be either through a narrative or a reference to another information source such as an attached map, photographs, or an earlier EIR or negative declaration. A reference to another document should include, where appropriate, a citation to the page or pages where the information is found.

(4) A discussion of ways to mitigate the significant effects identified, if any;

(5) An examination of whether the project would be consistent with existing zoning, plans, and other applicable land use controls;

(6) The name of the person or persons who prepared or participated in the initial study.

(e) Submission of Data. If the project is to be carried out by a private person or private organization, the lead agency may require such person or organization to submit data and information which will enable the lead agency to prepare the initial study. Any person may submit any information in any form to assist a lead agency in preparing an initial study.

(f) Format. Sample forms for an applicant's project description and a review form for use by the lead agency are contained in Appendices H and I. When used together, these forms would meet the requirements for an initial study, provided that the entries on the checklist are briefly explained pursuant to subsection (d)(3). These forms are only suggested, and public agencies are free to devise their own format for an initial study. A previously prepared EIR may also be used as the initial study for a later project.

(g) Consultation. As soon as a lead agency has determined that an initial study will be required for the project, the lead agency shall consult informally with all responsible agencies and all trustee agencies responsible for resources affected by the project to obtain the recommendations of those agencies as to whether an EIR or a negative declaration should be prepared. During or immediately after preparation of an initial study for a private project, the lead agency may consult with the applicant to determine if the applicant is willing to modify the project to reduce or avoid the significant effects identified in the initial study.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(c), 21080.1, 21080.3, 21082.1, 21100 and 21151, Public Resources Code.

HISTORY

1. Amendment filed 8–19–94; operative 9–19–94 (Register 94, No. 33).

§ 15064. Determining Significant Effect.

(a) Determining whether a project may have a significant effect plays a critical role in the CEQA process.

(1) When a lead agency determines that there is substantial evidence that a project may have a significant effect on the environment, the agency shall prepare a draft EIR.

(2) When a final EIR identifies one or more significant effects, the lead agency and each responsible agency shall make a finding under Section 15091 for each significant effect and may need to make a statement of overriding considerations under Section 15093 for the project.

(b) The determination of whether a project may have a significant effect on the environment calls for careful judgment on the part of the pub-

lic agency involved, based to the extent possible on scientific and factual data. An iron clad definition of significant effect is not possible because the significance of an activity may vary with the setting. For example, an activity which may not be significant in an urban area may be significant in a rural area.

(c) In determining whether an effect will be adverse or beneficial, the lead agency shall consider the views held by members of the public in all areas affected. If the lead agency expects that there will be a substantial body of opinion that considers or will consider the effect to be adverse, the lead agency shall regard the effect as adverse. Before requiring the preparation of an EIR, the lead agency must still determine whether environmental change itself might be substantial.

(d) In evaluating the significance of the environmental effect of a project, the lead agency shall consider both primary or direct and secondary or indirect consequences.

(1) Primary consequences are immediately related to the project such as the dust, noise, and traffic of heavy equipment that would result from construction of a sewage treatment plant and possible odors from operation of the plant.

(2) Secondary consequences are related more to effects of the primary consequences than to the project itself and may be several steps removed from the project in a chain of cause and effect. For example, the construction of a new sewage treatment plant may facilitate population growth in the service area due to the increase in sewage treatment capacity and may lead to an increase in air pollution.

(e) Some examples of consequences which may be deemed to be a significant effect on the environment are contained in Appendix G.

(f) Economic and social changes resulting from a project shall not be treated as significant effects on the environment. Economic or social changes may be used, however, to determine that a physical change shall be regarded as a significant effect on the environment. Where a physical change is caused by economic or social effects of a project, the physical change may be regarded as a significant effect in the same manner as any other physical change resulting from the project. Alternatively, economic and social effects of a physical change may be used to determine that the physical change is a significant effect on the environment. If the physical change causes adverse economic or social effects on people, those adverse effects may be used as the basis for determining that the physical change is significant. For example, if a project would cause overcrowding of a public facility and the overcrowding causes an adverse effect on people, the overcrowding would be regarded as a significant effect.

(g) The decision as to whether a project may have one or more significant effects shall be based on information in the record of the lead agency.

(1) If the lead agency finds there is substantial evidence in the record that the project may have a significant effect on the environment, the lead agency shall prepare an EIR (*Friends of B Street* v. *City of Hayward* (1980) 106 Cal. App. 3d 988). Said another way, if a lead agency is presented with a fair argument that a project may have a significant effect on the environment, the lead agency shall prepare an EIR even though it may also be presented with other substantial evidence that the project will not have a significant effect (*No Oil, Inc.* v. *City of Los Angeles* (1974) 13 Cal. 3d 68).

(2) If the lead agency finds there is no substantial evidence that the project may have a significant effect on the environment, the lead agency shall prepare a negative declaration (*Friends of B Street* v. *City of Hayward* (1980) 106 Cal. App. 3d 988).

(h) In marginal cases where it is not clear whether there is substantial evidence that a project may have a significant effect on the environment, the lead agency shall be guided by the following factors:

(1) If there is serious public controversy over the environmental effects of a project, the lead agency shall consider the effect or effects subject to the controversy to be significant and shall prepare an EIR. Controversy unrelated to an environmental issue does not require preparation of an EIR.

(2) If there is a disagreement between experts over the significance of an effect on the environment, the lead agency shall treat the effect as significant and shall prepare an EIR.

(i) If an air emission or water discharge meets the existing standard for a particular pollutant, the lead agency may presume that the emission or discharge of the pollutant will not be a significant effect on the environment. If other information is presented suggesting that the emission or discharge may cause a significant effect, the lead agency shall evaluate the effect and decide whether it may be significant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21068, 21083 and 21100, Public Resources Code; *No Oil, Inc.* v. *City of Los Angeles*.

§ 15065. Mandatory Findings of Significance.

A lead agency shall find that a project may have a significant effect on the environment and thereby require an EIR to be prepared for the project where any of the following conditions occur:

(a) The project has the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory.

(b) The project has the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals.

(c) The project has possible environmental effects which are individually limited but cumulatively considerable. As used in the subsection, "cumulatively considerable" means that the incremental effects of an individual project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.

(d) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083, Public Resources Code.

Article 6. Negative Declaration Process

§ 15070. Decision to Prepare a Negative Declaration.

A proposed negative declaration shall be prepared for a project subject to CEQA when either:

(a) The initial study shows that there is no substantial evidence that the project may have a significant effect on the environment, or

(b) The initial study identified potentially significant effects but:

(1) Revisions in the project plans or proposals made by or agreed to by the applicant before the proposed negative declaration is released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur, and

(2) There is no substantial evidence before the agency that the project as revised may have a significant effect on the environment.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(c), Public Resources Code; *Friends of B Street* v. *City of Hayward*, (1980) 106 Cal. App. 3d 988; *Running Fence Corp.* v. *Superior Court*, (1975) 51 Cal. App. 3d 400.

HISTORY

1. Repealer of Article 6 (Sections 15060–15069.8) and new Article 6 (Sections 15070–15075) filed 7–13–83; designated effective 8–1–83 (Register 83, No. 29). For prior history, see Registers 80, No. 19; 78, No. 5; 76, No. 41; 75, No. 1; and 73, No. 50).
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15071. Contents.

A negative declaration circulated for public review shall include:

(a) A brief description of the project, including a commonly used name for the project, if any;

(b) The location of the project, preferably shown on a map, and the name of the project proponent;

(c) A proposed finding that the project will not have a significant effect on the environment;

(d) An attached copy of the initial study documenting reasons to support the finding; and

(e) Mitigation measures, if any, included in the project to avoid potentially significant effects.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(c), Public Resources Code.

§ 15072. Public Notice.

(a) Notice that the lead agency proposes to adopt a negative declaration shall be provided to the public within a reasonable period of time, but not less than 20 days (unless the negative declaration is submitted to the State Clearinghouse for review, in which case the review period shall be at least 30 days), prior to adoption by the lead agency of the negative declaration. Notice shall be given to all organizations and individuals who have previously requested such notice and shall also be given by at least one of the following procedures:

(1) Publication at least one time by the lead agency in a newspaper of general circulation in the area affected by the proposed project.

(2) Posting of notice by the lead agency on and off site in the area where the project is to be located.

(3) Direct mailing to owners and occupants of property contiguous to the project. Owners of such property shall be identified as shown on the latest equalized assessment roll.

(b) The alternatives for providing notice specified in subsection (a) shall not preclude a lead agency from providing additional notice by other means if the agency so desires, nor shall the requirements of this section preclude a lead agency from providing the public notice at the same time and in the same manner as public notice required by any other laws for the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21091(b) and 21092, Public Resources Code; Section 6061, Government Code.

HISTORY

1. Amendment of subsections (a), (a)(3) and NOTE filed 8–19–94; operative 9–19–94 (Register 94, No. 33).

§ 15073. Public Review of a Negative Declaration.

(a) The lead agency shall provide a public review period for a proposed negative declaration. The noticed public review period shall be long enough to provide members of the public with sufficient time to respond to the proposed finding before the negative declaration is approved.

(b) A copy of the notice with the proposed negative declaration shall be sent to every responsible agency and trustee agency concerned with the project and every other public agency with jurisdiction by law over resources affected by the project.

(c) Where one or more state agencies will be a responsible agency or a trustee agency or will exercise jurisdiction by law over natural resources affected by the project, the lead agency shall send copies of the negative declaration to the State Clearinghouse for distribution to the state agencies.

(d) When a negative declaration is submitted to the State Clearinghouse for review by state agencies, the public review period shall be not less than 30 days unless a shorter period is approved by the State Clearinghouse.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000(e), 21003(b) and 21080(c), Public Resources Code; *Plagmier* v. *City of San Jose*, (1980) 101 Cal. App. 3d 842.

§ 15074. Consideration and Approval of Negative Declaration.

(a) Any advisory body of a public agency making a recommendation to the decisionmaking body shall consider the proposed negative declaration before making its recommendation.

(b) Prior to approving the project, the decisionmaking body of the lead agency shall consider the proposed negative declaration together with any comments received during the public review process. The decisionmaking body shall approve the negative declaration if it finds on the basis of the initial study and any comments received that there is no substantial evidence that the project will have a significant effect on the environment.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(c), Public Resources Code; *Friends of B Street* v. *City of Hayward*, (1980) 106 Cal. App. 3d 988.

§ 15075. Notice of Determination.

(a) After deciding to carry out or approve a project for which a negative declaration has been approved, the lead agency shall file a notice of determination.

(b) The notice of determination shall include:

(1) An identification of the project including its common name where possible, and its location.

(2) A brief description of the project.

(3) The date on which the agency approved the project.

(4) The determination of the agency that the project will not have a significant effect on the environment.

(5) A statement that a negative declaration has been prepared pursuant to the provisions of CEQA.

(6) The address where a copy of the negative declaration may be examined.

(c) If the lead agency is a state agency, the notice of determination shall be filed with OPR.

(d) If the lead agency is a local agency, the notice of determination shall be filed with the county clerk of the county or counties in which the project will be located. If the project requires a discretionary approval from any state agency, the notice of determination also shall be filed with OPR.

(e) The filing of the notice of determination and the posting on a list of such notices starts a 30–day statute of limitations on court challenges to the approval under CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(c), 21108(a) and (c), 21152(a) and (c) and 21167(b), Public Resources Code; *Citizens of Lake Murray Area Association* v. *City Council*, (1982) 129 Cal. App. 3d 436.

HISTORY

1. Amendment of subsections (c) and (d) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

Article 6.5. Statutory Exemptions

HISTORY

1. Repealer of Article 6.5 (Sections 15070–15079.7) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Register 78, No. 5.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

Article 7. EIR Process

§ 15080. General.

To the extent possible, the EIR process should be combined with the existing planning, review, and project approval process used by each public agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061, 21100 and 21151, Public Resources Code.

HISTORY

1. Repealer of Article 7 (Sections 15080–15089) and new Article 7 (Sections 15080–15096) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 82, No. 2; 80, No. 19; 78, No. 5; 77, No. 1; 76, No. 41; 75, No. 1; and 73, No. 50.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15081. Decision to Prepare an EIR.

The EIR process starts with the decision to prepare an EIR. This decision will be made either during preliminary review under Section 15060

or at the conclusion of an initial study after applying the standards described in Section 15064.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code; *No Oil, Inc. v. City of Los Angeles* (1974) 13 Cal. 3d 68; *Friends of B Street v. City of Hayward* (1980) 106 Cal. App. 3d 988.

§ 15082. Determination of Scope of EIR.

(a) Notice of Preparation. Immediately after deciding that an environmental impact report is required for a project, the lead agency shall send to each responsible agency a notice of preparation stating that an environmental impact report will be prepared. This notice shall also be sent to every federal agency involved in approving or funding the project and to each trustee agency responsible for natural resources affected by the project.

(1) The notice of preparation shall provide the responsible agencies with sufficient information describing the project and the potential environmental effects to enable the responsible agencies to make a meaningful response. At a minimum, the information shall include:

(A) Description of the project,

(B) Location of the project indicated either on an attached map (preferably a copy of a U.S.G.S. 15′ or 7 1/2′ topographical map identified by quadrangle name, or by a street address in an urbanized area), and

(C) Probable environmental effects of the project.

(2) A sample for a notice of preparation is shown in Appendix J. Public agencies are free to devise their own formats for this notice. A copy of the initial study may be sent with the notice to supply the necessary information.

(3) To send copies of the notice of preparation, the lead agency shall use either certified mail or any other method of transmittal which provides it with a record that the notice was received.

(4) The lead agency may begin work on the draft EIR immediately without awaiting responses to the notice of preparation. The draft EIR in preparation may need to be revised or expanded to conform to responses to the notice of preparation. A lead agency shall not circulate a draft EIR for public review before the time period for responses to the notice of preparation has expired.

(b) Response to Notice of Preparation. Within 30 days after receiving the notice of preparation under subsection (a), each responsible agency shall provide the lead agency with specific detail about the scope and content of the environmental information related to the responsible agency's area of statutory responsibility which must be included in the draft EIR.

(1) The response at a minimum shall identify:

(A) The significant environmental issues and reasonable alternatives and mitigation measures which the responsible agency will need to have explored in the draft EIR; and

(B) Whether the agency will be a responsible agency or trustee agency for the project.

(2) If a responsible agency fails by the end of the 30 day period to provide the lead agency with either a response to the notice or a well justified request for additional time, the lead agency may presume that the responsible agency has no response to make.

(3) A generalized list of concerns not related to the specific project shall not meet the requirements of this section for a response.

(c) Meetings. In order to expedite the consultation, the lead agency, a responsible agency, a trustee agency, or a project applicant may request one or more meetings between representatives of the agencies involved to assist the lead agency in determining the scope and content of the environmental information which the responsible agency may require. Such meetings shall be convened by the lead agency as soon as possible, but no later than 30 days, after the meetings were requested. On request, the Office of Planning and Research will assist in convening meetings which involve state agencies.

(d) State Clearinghouse. When one or more state agencies will be a responsible agency or a trustee agency, the lead agency shall send a notice of preparation to each state responsible agency and each trustee agency with a copy to the State Clearinghouse in the Office of Planning and Research. The State Clearinghouse will ensure that the state responsible agencies and trustees reply to the lead agency within the required time.

(e) Identification Number. When the notice of preparation is submitted to the State Clearinghouse, the state identification number issued by the Clearinghouse shall be the identification number for all subsequent environmental documents on the project. The identification number should be referenced on all subsequent correspondence regarding the project, specifically on the title page of the draft and final EIR and on the notice of determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

HISTORY

1. Amendment of subsection (b) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15083. Early Public Consultation.

Prior to completing the draft EIR, the lead agency may also consult directly with any person or organization it believes will be concerned with the environmental effects of the project. Many public agencies have found that early consultation solves many potential problems that would arise in more serious forms later in the review process. This early consultation may be called scoping. Scoping will be necessary when preparing an EIR/EIS jointly with a federal agency.

(a) Scoping has been helpful to agencies in identifying the range of actions, alternatives, mitigation measures, and significant effects to be analyzed in depth in an EIR and in eliminating from detailed study issues found not to be important.

(b) Scoping has been found to be an effective way to bring together and resolve the concerns of affected federal, state, and local agencies, the proponent of the action, and other interested persons including those who might not be in accord with the action on environmental grounds.

(c) Where scoping is used, it should be combined to the extent possible with consultation under Section 15082.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21082.1, Public Resources Code; Section 4, Chapter 480 of the Statutes of 1981; 40 Code of Federal Regulations, Part 1501.7.

§ 15084. Preparing the Draft EIR.

(a) The draft EIR shall be prepared directly by or under contract to the lead agency. The required contents of a draft EIR are discussed in Article 9 beginning with Section 15120.

(b) The lead agency may require the project applicant to supply data and information both to determine whether the project may have a significant effect on the environment and to assist the lead agency in preparing the draft EIR. The requested information should include an identification of other public agencies which will have jurisdiction by law over the project.

(c) Any person, including the applicant, may submit information or comments to the lead agency to assist in the preparation of the draft EIR. The submittal may be presented in any format, including the form of a draft EIR. The lead agency must consider all information and comments received. The information or comments may be included in the draft EIR in whole or in part.

(d) The lead agency may choose one of the following arrangements or a combination of them for preparing a draft EIR.

(1) Preparing the draft EIR directly with its own staff.

(2) Contracting with another entity, public or private, to prepare the draft EIR.

(3) Accepting a draft prepared by the applicant, a consultant retained by the applicant, or any other person.

(4) Executing a third party contract or memorandum of understanding with the applicant to govern the preparation of a draft EIR by an independent contractor.

(5) Using a previously prepared EIR.

(e) Before using a draft prepared by another person, the lead agency shall subject the draft to the agency's own review and analysis. The draft EIR which is sent out for public review must reflect the independent judg-

ment of the lead agency. The lead agency is responsible for the adequacy and objectivity of the draft EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21082.1, Public Resources Code.

§ 15085. Notice of Completion.

(a) As soon as the draft EIR is completed, a notice of completion must be filed with OPR.

(b) The notice of completion shall include:

(1) A brief description of the project,

(2) The proposed location of the project,

(3) An address where copies of the draft EIR are available, and

(4) The period during which comments will be received on the draft EIR.

(c) A form for the notice of completion is included in the appendices.

(d) Where the EIR will be reviewed through the state review process handled by the State Clearinghouse, the cover form required by the State Clearinghouse will serve as the notice of completion.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21161, Public Resources Code.

HISTORY

1. Amendment of subsections (a) and (d) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15086. Consultation Concerning Draft EIR.

(a) The lead agency shall consult with and request comments on the draft EIR from:

(1) Responsible agencies,

(2) Trustee agencies with resources affected by the project, and

(3) Other state, federal, and local agencies which exercise authority over resources which may be affected by the project.

(b) The lead agency may consult directly with any person who has special expertise with respect to any environmental impact involved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code.

§ 15087. Public Review of Draft EIR.

(a) The lead agency shall provide public notice of the availability of a draft EIR at the same time as it sends a notice of completion to OPR. Notice shall be given to all organizations and individuals who have previously requested such notice and shall also be given by at least one of the following procedures:

(1) Publication at least one time by the public agency in a newspaper of general circulation in the area affected by the proposed project.

(2) Posting of notice by the public agency on and off the site in the area where the project is to be located.

(3) Direct mailing to the owners and occupants of property contiguous to the parcel or parcels on which the project is located. Owners of such property shall be identified as shown on the latest equalized assessment roll.

(b) The alternatives for providing notice specified in subsection (a) shall not preclude a public agency from providing additional notice by other means if such agency so desires, nor shall the requirements of this section preclude a public agency from providing the public notice required by this section at the same time and in the same manner as public notice otherwise required by law for the project.

(c) In order to provide sufficient time for public review, review periods for draft EIRs should not be less than 30 days nor longer than 90 days from the date of the notice except in unusual situations. The review period for draft EIRs for which a state agency is the lead agency or a responsible agency shall be at least 45 days unless a shorter period is approved by the State Clearinghouse.

(d) Public agencies shall use the State Clearinghouse to distribute draft EIRs to state agencies for review and should use areawide clearinghouses to distribute the documents to regional and local agencies.

(e) To make copies of EIRs available to the public, lead agencies should furnish copies of draft EIRs to public library systems serving the area involved. Copies should also be available in offices of the lead agency.

(f) Public agencies should compile listings of other agencies, particularly local agencies, which have jurisdiction by law and/or special expertise with respect to various projects and project locations. Such listings should be a guide in determining which agencies should be consulted with regard to a particular project.

(g) Public hearings may be conducted on the environmental documents, either in separate proceedings or in conjunction with other proceedings of the public agency. Public hearings are encouraged, but not required as an element of the CEQA process.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21091, 21092, 21104, 21153 and 21161, Public Resources Code; and Section 6061, Government Code.

HISTORY

1. Amendment of subsection (a) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).
2. Amendment of subsection (a)(3) and NOTE filed 8–19–94; operative 9–19–94 (Register 94, No. 33).

§ 15088. Evaluation of and Response to Comments.

(a) The lead agency shall evaluate comments on environmental issues received from persons who reviewed the draft EIR and shall prepare a written response. The lead agency shall respond to comments received during the noticed comment period and any extensions and may respond to late comments.

(b) The written response shall describe the disposition of significant environmental issues raised (e.g., revisions to the proposed project to mitigate anticipated impacts or objections). In particular, the major environmental issues raised when the lead agency's position is at variance with recommendations and objections raised in the comments must be addressed in detail giving reasons why specific comments and suggestions were not accepted. There must be good faith, reasoned analysis in response. Conclusory statements unsupported by factual information will not suffice.

(c) The response to comments may take the form of a revision to the draft EIR or may be a separate section in the final EIR. Where the response to comments makes important changes in the information contained in the text of the draft EIR, the lead agency should either:

(1) Revise the text in the body of the EIR, or

(2) Include marginal notes showing that the information is revised in the response to comments.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code; *People* v. *County of Kern*, (1974) 39 Cal. App. 3d 830; *Cleary* v. *County of Stanislaus*, (1981) 118 Cal. App. 3d 348.

§ 15088.5. Recirculation of an EIR Prior to Certification.

(a) A lead agency is required to recirculate an EIR when significant new information is added to the EIR after public notice is given of the availability of the draft EIR for public review under Section 15087 but before certification. As used in this section, the term "information" can include changes in the project or environmental setting as well as additional data or other information. New information added to an EIR is not "significant" unless the EIR is changed in a way that deprives the public of a meaningful opportunity to comment upon a substantial adverse environmental effect of the project or a feasible way to mitigate or avoid such an effect (including a feasible project alternative) that the project's proponents have declined to implement. "Significant new information" requiring recirculation include, for example, a disclosure showing that:

(1) A new significant environmental impact would result from the project or from a new mitigation measure proposed to be implemented.

(2) A substantial increase in the severity of an environmental impact would result unless mitigation measures are adopted that reduce the impact to a level of insignificance.

(3) A feasible project alternative or mitigation measure considerably different from others previously analyzed would clearly lessen the significant environmental impacts of the project, but the project's proponents decline to adopt it.

(4) The draft EIR was so fundamentally and basically inadequate and conclusory in nature that meaningful public review and comment were precluded. (*Mountain Lion Coalition v. Fish & Game Com.* (1989) 214 Cal.App.3d 1043).

(b) Recirculation is not required where the new information added to the EIR merely clarifies or amplifies or makes insignificant modifications in an adequate EIR.

(c) If the revision is limited to a few chapters or portions of the EIR, the lead agency need only recirculate the chapters or portions that have been modified.

(d) Recirculation of an EIR requires notice pursuant to Section 15087, and consultation pursuant to Section 15086.

(e) A decision not to recirculate an EIR must be supported by substantial evidence in the administrative record.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21092.1, Public Resources Code; *Laurel Heights Improvement Association v. Regents of the University of California* (1993) 6 Cal. 4th 1112.

HISTORY

1. New section filed 8–19–94; operative 9–19–94 (Register 94, No. 33).

§ 15089. Preparation of Final EIR.

(a) The lead agency shall prepare a final EIR before approving the project. The contents of a final EIR are specified in Section 15132 of these guidelines.

(b) Lead agencies may provide an opportunity for review of the final EIR by the public or by commenting agencies before approving the project. The review of a final EIR should focus on the responses to comments on the draft EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100, 21105 and 21151, Public Resources Code; *City of Carmel–by–the–Sea* v. *Board of Supervisors*, (1977) 71 Cal. App. 3d 84; State Administrative Manual, Section 1060.

§ 15090. Certification of Final EIR.

The lead agency shall certify that:

(a) The final EIR has been completed in compliance with CEQA; and (b) The final EIR was presented to the decisionmaking body of the lead agency and that the decisionmaking body reviewed and considered the information contained in the final EIR prior to approving the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108 and 21152, Public Resources Code; *City of Carmel–by–the–Sea* v. *Board of Supervisors* (1977) 71 Cal. App. 3d 84; *Kleist* v. *City of Glendale* (1976) 56 Cal. App. 3d 770.

§ 15091. Findings.

(a) No public agency shall approve or carry out a project for which an EIR has been completed which identifies one or more significant environmental effects of the project unless the public agency makes one or more written findings for each of those significant effects, accompanied by a brief explanation of the rationale for each finding. The possible findings are:

(1) Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.

(2) Such changes or alterations are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.

(3) Specific economic, social, or other considerations make infeasible the mitigation measures or project alternatives identified in the final EIR.

(b) The findings required by subsection (a) shall be supported by substantial evidence in the record.

(c) The finding in subsection (a)(2) shall not be made if the agency making the finding has concurrent jurisdiction with another agency to deal with identified feasible mitigation measures or alternatives.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1 and 21081, Public Resources Code; *Laurel Hills Homeowners Association* v. *City Council*, 83 Cal. App. 3d 515; *Cleary* v. *County of Stanislaus*, 118 Cal. App. 3d 348.

§ 15092. Approval.

(a) After considering the final EIR and in conjunction with making findings under Section 15091, the lead agency may decide whether or how to approve or carry out the project.

(b) A public agency shall not decide to approve or carry out a project for which an EIR was prepared unless either:

(1) The project as approved will not have a significant effect on the environment, or

(2) The agency has:

(A) Eliminated or substantially lessened all significant effects on the environment where feasible as shown in findings under Section 15091, and

(B) Determined that any remaining significant effects on the environment found to be unavoidable under Section 15091 are acceptable due to overriding concerns as described in Section 15093.

(c) With respect to a project which includes housing development, the public agency shall not reduce the proposed number of housing units as a mitigation measure if it determines that there is another feasible specific mitigation measure available that will provide a comparable level of mitigation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1, 21081 and 21085, Public Resources Code; *Friends of Mammoth v. Board of Supervisors*, (1972) 8 Cal. App. 3d 247; *San Francisco Ecology Center v. City and County of San Francisco*, (1975) 48 Cal. App. 3d 584; *City of Carmel–by–the–Sea* v. *Board of Supervisors*, (1977) 71 Cal. App. 3d 84; *Laurel Hills Homeowners Association v. City Council*, (1978) 83 Cal. App. 3d 515.

§ 15093. Statement of Overriding Considerations.

(a) CEQA requires the decisionmaker to balance the benefits of a proposed project against its unavoidable environmental risks in determining whether to approve the project. If the benefits of a proposal project outweigh the unavoidable adverse environmental effects, the adverse environmental effects may be considered "acceptable."

(b) Where the decision of the public agency allows the occurrence of significant effects which are identified in the final EIR but are not at least substantially mitigated, the agency shall state in writing the specific reasons to support its action based on the final EIR and/or other information in the record. This statement may be necessary if the agency also makes a finding under Section 15091(a)(2) or (a)(3).

(c) If an agency makes a statement of overriding considerations, the statement should be included in the record of the project approval and should be mentioned in the notice of determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: *San Francisco Ecology Center* v. *City and County of San Francisco*, 48 Cal. App. 3d 584 (1975); *City of Carmel–by–the–Sea* v. *Board of Supervisors* 71 Cal. App. 3d 84 (1977).

§ 15094. Notice of Determination.

(a) The lead agency shall file a notice of determination following each project approval for which an EIR was considered. The notice shall include:

(1) An identification of the project including its common name where possible and its location.

(2) A brief description of the project.

(3) The date when the agency approved the project.

(4) The determination of the agency whether the project in its approved form will have a significant effect on the environment.

(5) A statement that an EIR was prepared and certified pursuant to the provisions of CEQA.

(6) Whether mitigation measures were made a condition of the approval of the project.

(7) Whether findings were made pursuant to Section 15091.

(8) Whether a statement of overriding considerations was adopted for the project.

(9) The address where a copy of the final EIR and the record of project approval may be examined.

(b) If a state agency is the lead agency, the notice of determination shall be filed with OPR.

(c) If a local agency is the lead agency, the notice of determination shall be filed with the county clerk of the county or counties in which the project will be located. If the project requires discretionary approval from a state agency, the notice of determination shall also be filed with OPR.

(d) The filing of the notice of determination and the posting on a list of such notice starts a 30–day statute of limitations on court challenges to the approval under CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108, 21152 and 21167, Public Resources Code; *Citizens of Lake Murray Area Association v. City Council*, (1982) 129 Cal. App. 3d 436.

HISTORY

1. Amendment of subsections (b) and (c) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15095. Disposition of a Final EIR.

The lead agency shall:

(a) File a copy of the final EIR with the appropriate planning agency of any city, county, or city and county where significant effects on the environment may occur.

(b) Include the final EIR as part of the regular project report which is used in the existing project review and budgetary process if such a report is used.

(c) Retain one or more copies of the final EIR as public records for a reasonable period of time.

(d) Require the applicant to provide a copy of the certified, final EIR to each responsible agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21105, 21151 and 21165, Public Resources Code; *County of Inyo v. Yorty*, (1973) 32 Cal. App. 3d 795.

§ 15096. Process for a Responsible Agency.

(a) General. A responsible agency complies with CEQA by considering the EIR or negative declaration prepared by the lead agency and by reaching its own conclusions on whether and how to approve the project involved. This section identifies the special duties a public agency will have when acting as a responsible agency.

(b) Response to Consultation. A responsible agency shall respond to consultation by the lead agency in order to assist the lead agency in preparing adequate environmental documents for the project. By this means, the responsible agency will ensure that the documents it will use will comply with CEQA.

(1) In response to consultation, a responsible agency shall explain its reasons for recommending whether the lead agency should prepare an EIR or negative declaration for a project. Where the responsible agency disagrees with the lead agency's proposal to prepare a negative declaration for a project, the responsible agency should identify the significant environmental effects which it believes could result from the project and recommend either that an EIR be prepared or that the project be modified to eliminate the significant effects.

(2) As soon as possible, but not longer than 30 days after receiving a notice of preparation from the lead agency, the responsible agency shall send a written reply by certified mail or any other method which provides the agency with a record showing that the notice was received. The reply shall specify the scope and content of the environmental information which would be germane to the responsible agency's statutory responsibilities in connection with the proposed project. The lead agency shall include this information in the EIR.

(c) Meetings. The responsible agency shall designate employees or representatives to attend meetings requested by the lead agency to discuss the scope and content of the EIR.

(d) Comments on Draft EIRs and Negative Declarations. A responsible agency should review and comment on draft EIRs and negative declarations for projects which the responsible agency would later be asked to approve. Comments should focus on any shortcomings in the EIR, the appropriateness of using a negative declaration, or on additional alternatives or mitigation measures which the EIR should include. The comments shall be limited to those project activities which are within the agency's area of expertise or which are required to be carried out or approved by the agency or which will be subject to the exercise of powers by the agency. Comments shall be as specific as possible and supported by either oral or written documentation.

(e) Decision on Adequacy of EIR or Negative Declaration. If a responsible agency believes that the final EIR or negative declaration prepared by the lead agency is not adequate for use by the responsible agency, the responsible agency must either:

(1) Take the issue to court within 30 days after the lead agency files a notice of determination;

(2) Be deemed to have waived any objection to the adequacy of the EIR or negative declaration;

(3) Prepare a subsequent EIR if permissible under Section 15162; or

(4) Assume the lead agency role as provided in Section 15052(a)(3).

(f) Consider the EIR or Negative Declaration. Prior to reaching a decision on the project, the responsible agency must consider the environmental effects of the project as shown in the EIR or negative declaration. A subsequent or supplemental EIR can be prepared only as provided in Sections 15162 or 15163.

(g) Adoption of Alternatives or Mitigation Measures.

(1) When considering alternatives and mitigation measures, a responsible agency is more limited than a lead agency. A responsible agency has responsibility for mitigating or avoiding only the direct or indirect environmental effects of those parts of the project which it decides to carry out, finance, or approve.

(2) When an EIR has been prepared for a project, the Responsible Agency shall not approve the project as proposed if the agency finds any feasible alternative or feasible mitigation measures within its powers that would substantially lessen or avoid any significant effect the project would have on the environment. With respect to a project which includes housing development, the responsible agency shall not reduce the proposed number of housing units as a mitigation measure if it determines that there is another feasible specific mitigation measure available that will provide a comparable level of mitigation.

(h) Findings. The responsible agency shall make the findings required by Section 15091 for each significant effect of the project and shall make the findings in Section 15093 if necessary.

(i) Notice of Determination. The responsible agency should file a notice of determination in the same manner as a lead agency under Section 15075 or 15094 except that the responsible agency does not need to state that the EIR or negative declaration complies with CEQA. The responsible agency should state that it considered the EIR or negative declaration as prepared by a lead agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21165, 21080.1, 21080.3, 21080.4, 21082.1 and 21002.1(b) and (d), Public Resources Code.

HISTORY

1. Amendment of subsections (b) and (d) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

Article 8. Time Limits

§ 15100. General.

(a) Public agencies shall adopt time limits to govern their implementation of CEQA consistent with this article.

(b) Public agencies should carry out their responsibilities for preparing and reviewing EIRs within a reasonable period of time. The requirement for the preparation of an EIR should not cause undue delays in the processing of applications for permits or other entitlements to use.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY

1. Renumbering and amendment of former Article 8 (Sections 15100–15129) to Article 19 (Sections 15300–15329) and new Article 8 (Sections 15100–15112) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Register 82, No. 2.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15101. Review of Application for Completeness.

A lead agency or responsible agency shall determine whether an application for a permit or other entitlement for use is complete within 30 days from the receipt of the application except as provided in Section 15111. If no written determination of the completeness of the application is made within that period, the application will be deemed complete on the 30th day.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083, Public Resources Code; and Section 65943, Government Code.

§ 15102. Initial Study.

The lead agency shall determine within 30 days after accepting an application as complete whether it intends to prepare an EIR or a negative declaration or use a previously prepared EIR or negative declaration except as provided in Section 15111. The 30 day period may be extended 15 days upon the consent of the lead agency and the project applicant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.2, Public Resources Code.

HISTORY

1. Amendment filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15103. Response to Notice of Preparation.

Responsible agencies and trustee agencies shall provide a response to a notice of preparation to the lead agency within 30 days after receipt of the notice. If a responsible agency fails to reply within the 30 days with either a response or a well justified request for additional time, the lead agency may assume that the responsible agency has no response and any ignore a late response.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

HISTORY

1. Amendment filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15104. Convening of Meetings.

The lead agency shall convene a meeting with agency representatives to discuss the scope and content of the environmental information a responsible agency will need in the EIR as soon as possible but no later than 30 days after receiving a request for the meeting. The meeting may be requested by the lead agency, a responsible agency, a trustee agency, or by the project applicant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

§ 15105. Public Review.

(a) The public review period for a draft EIR should not be less than 30 days nor longer than 90 days except in unusual circumstances.

(b) The public review period for a negative declaration shall be a reasonable period of time sufficient to allow members of the public to respond to the proposed finding before the negative declaration is approved.

(c) If a draft EIR or negative declaration has been submitted to the State Clearinghouse for review by state agencies, the public review period shall be at least as long as the review period established by the State Clearinghouse.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21092, Public Resources Code; *People* v. *County of Kern*, 39 Cal.App. 3d 830.

§ 15106. Review by State Agencies.

When a draft EIR or negative declaration is submitted to the State Clearinghouse for review, the normal review period is 45 days for draft EIRs and 30 days for negative declarations. The State Clearinghouse may set shorter review periods when requested by the lead agency due to exceptional circumstances.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code.

§ 15107. Completion of Negative Declaration.

With a private project, the negative declaration must be completed and ready for approval within 105 days from the date when the lead agency accepted the application as complete. The negative declaration may be approved at a later time when the permit or other entitlement is approved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code.

§ 15108. Completion and Certification of EIR.

With a private project, the lead agency shall complete and certify the final EIR as provided in Section 15090 within one year after the date when the lead agency accepted the application as complete. Lead agency procedures may provide that the one–year time limit may be extended once for a period of not more than 90 days upon consent of the lead agency and the applicant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code; and Government Code Section 65950.

§ 15109. Suspension of Time Periods.

An unreasonable delay by an applicant in meeting requests by the lead agency necessary for the preparation of a negative declaration or an EIR shall suspend the running of the time periods described in Sections 15107 and 15108 for the period of the unreasonable delay. Alternatively, an agency may disapprove a project application where there is unreasonable delay in meeting requests. The agency may allow a renewed application to start at the same point in the process where the application was when it was disapproved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code; *Carmel Valley View, Ltd.* v. *Magglni*, 91 Cal. App. 3d 318.

§ 15110. Projects with Federal Involvement.

(a) At the request of an applicant, the lead agency may waive the one–year time limit for completing and certifying a final EIR or the 105–day period for completing a negative declaration if:

(1) The project will be subject to CEQA and to the National Environmental Policy Act,

(2) Additional time will be required to prepare a combined EIR–EIS or combined negative declaration–finding of no significant impact as provided in Section 15221, and

(3) The time required to prepare the combined document will be shorter than the time required to prepare the documents separately.

(b) The time limits for taking final action on a permit for a development project may also be waived where a combined EIR–EIS will be prepared.

(c) The time limits for processing permits for development projects under Government Code Sections 65950–65960 shall not apply if federal statutes or regulations require time schedules which exceed the state time limits. In this event, any state agencies involved shall make a final decision on the project within the federal time limits.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.6 and 21083.7, Public Resources Code; Sections 65951 and 65954, Government Code; Public Law 91–190 as amended, 42 U.S.C.A. 4321–4347.

HISTORY

1. Amendment of subsection (a)(2) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15111. Projects with Short Time Periods for Approval.

(a) A few statutes or ordinances require agencies to make decisions on permits within time limits that are so short that review of the project under CEQA would be difficult. To enable the lead agency to comply with both the permit statute and CEQA, the lead agency shall deem an application for a project not received for filing under the permit statute or ordinance until such time as progress toward completing the environmental documentation required by CEQA is sufficient to enable the lead agency to finish the CEQA process within the short permit time limit. This section will apply where all of the following conditions are met:

(1) The enabling legislation for a program, other than Chapter 4.5 (commencing with Section 65920) of Division 1 of Title 7 of the Govern-

ment Code, requires the lead agency to take action on an application within a specified period of time that is six months or less, and

(2) The enabling legislation provides that the project will become approved by operation of law if the lead agency fails to take any action within such specified time period, and

(3) The project involves the issuance of a lease, permit, license, certificate, or other entitlement for use.

(b) Examples of time periods subject to this section include but are not limited to:

(1) Action within 50 days on a tentative subdivision map for which an EIR is being or will be prepared pursuant to Article 2 (commencing with Section 66452) of Chapter 3, Division 2, Title 2 of the Government Code, but a negative declaration for a subdivision map must be completed within the 50 day period (see Government Code Section 66452.1(c)),

(2) Action on a timber harvesting plan by the Director of Forestry within 15 days pursuant to Section 4582.7 of the Public Resources Code,

(3) Action on a permit by the San Francisco Bay Conservation and Development Commission within 90 days pursuant to Section 66632(f) of the Government Code, and

(4) Action on an oil and gas permit by the Division of Oil and Gas within 10 days pursuant to Sections 3203 or 3724 of the Public Resources Code.

(c) In any case described in this section, the environmental document shall be completed or certified and the decision on the application shall be made within one year from the date on which an application requesting approval of such project has been received and accepted as complete for CEQA processing by such agency. This one-year time limit may be extended once for a period not to exceed 90 days upon consent of the public agency and the applicant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code; *N.R.D.C. v. Arcata National Corp.*, 59 Cal. App. 3d 959 (1976).

§ 15112. Statutes of Limitations.

(a) CEQA provides unusually short statutes of limitations on filing court challenges to the approval of projects under the act.

(b) The statute of limitations periods are not public review periods or waiting periods for the person whose project has been approved. The project sponsor may proceed to carry out the project as soon as the necessary permits have been granted. The statute of limitations cuts off the right of another person to file a court action challenging approval of the project after the specified time period has expired.

(c) The statute of limitations periods under CEQA are as follows:

(1) Where the public agency filed a notice of determination in compliance with Sections 15075 or 15094, 30 days after the filing of the notice and the posting on a list of such notices.

(2) Where the public agency filed a notice of exemption in compliance with Section 15062, 35 days after the filing of the notice and the posting on a list of such notices.

(3) Where a certified state regulatory agency files a notice of decision in compliance with Public Resources Code Section 21080.5(d)(2)(v), 30 days after the filing of the notice.

(4) Where the Secretary for Resources certifies a state environmental regulatory agency under Public Resources Code Section 21080.5, the certification may be challenged only during the 30 days following the certification decision.

(5) Where none of the other statute of limitations periods in this section apply, 180 days after either:

(A) The public agency's decision to carry out or approve the project, or

(B) Commencement of the project if the project is undertaken without a formal decision by the public agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21167, 21167.3 and 21080.5, Public Resources Code; *Kriebel v. City Council*, 112 Cal. App. 3d 693; *Citizens of Lake Murray Area Association v. City Council*, (1982) 129 Cal. App. 3d 436.

Article 9. Contents of Environmental Impact Reports

§ 15120. General.

(a) Environmental Impact Reports shall contain the information outlined in this article, but the format of the document may be varied. Each element must be covered, and when these elements are not separated into distinct sections, the document shall state where in the document each element is discussed.

(b) The EIR may be prepared as a separate document, as part of a general plan, or as part of a project report. If prepared as a part of the project report, it must still contain one separate and distinguishable section providing either analysis of all the subjects required in an EIR or as a minimum, a table showing where each of the subjects is discussed. When the lead agency is a state agency, the EIR shall be included as part of the regular project report if such a report is used in the agency's existing review and budgetary process.

(c) Draft EIRs shall contain the information required by Sections 15122 through 15131. Final EIRs shall contain the same information and the subjects described in Section 15132.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100 and 21105, Public Resources Code.

HISTORY

1. Repealer of Article 9 (Sections 15140–15151) and new Article 9 (Sections 15120–15132) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 82, No. 2; 80, No. 19; 78, No. 5; 77, No. 1; 76, No. 41; 75, Nos. 1 and 18; and 73, No. 50.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15121. Informational Document.

(a) An EIR is an informational document which will inform public agency decisionmakers and the public generally of the significant environmental effect of a project, identify possible ways to minimize the significant effects, and describe reasonable alternatives to the project. The public agency shall consider the information in the EIR along with other information which may be presented to the agency.

(b) While the information in the EIR does not control the agency's ultimate discretion on the project, the agency must respond to each significant effect identified in the EIR by making findings under Section 15091 and if necessary by making a statement of overriding considerations under Section 15093.

(c) The information in an EIR may constitute substantial evidence in the record to support the agency's action on the project if its decision is later challenged in court.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21061, Public Resources Code; *Carmel Valley View, Ltd. v. Board of Supervisors*, (1976) 58 Cal. App. 3d 817.

§ 15122. Table of Contents or Index.

An EIR shall contain at least a table of contents or an index to assist readers in finding the analysis of different subjects and issues.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21061, Public Resources Code.

§ 15123. Summary.

(a) An EIR shall contain a brief summary of the proposed actions and its consequences. The language of the summary should be as clear and simple as reasonably practical.

(b) The summary shall identify:

(1) Each significant effect with proposed mitigation measures and alternatives that would reduce or avoid that effect;

(2) Areas of controversy known to the lead agency including issues raised by agencies and the public; and

(3) Issues to be resolved including the choice among alternatives and whether or how to mitigate the significant effects.

(c) The summary should normally not exceed 15 pages.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21061, Public Resources Code.

§ 15124. Project Description.

The description of the project shall contain the following information but should not supply extensive detail beyond that needed for evaluation and review of the environmental impact.

(a) The precise location and boundaries of the proposed project shall be shown on a detailed map, preferably topographic. The location of the project shall also appear on a regional map.

(b) A statement of the objectives sought by the proposed project.

(c) A general description of the project's technical, economic, and environmental characteristics, considering the principal engineering proposals if any and supporting public service facilities.

(d) A statement briefly describing the intended uses of the EIR.

(1) This statement shall include, to the extent that the information is known to the lead agency,

(A) A list of the agencies that are expected to use the EIR in their decision-making, and

(B) A list of the approvals for which the EIR will be used.

(2) If a public agency must make more than one decision on a project, all its decisions subject to CEQA should be listed, preferably in the order in which they will occur. On request, the Office of Planning and Research will provide assistance in identifying state permits for a project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.3, 21080.4, 21165, 21166 and 21167.2, Public Resources Code; *County of Inyo* v. *City of Los Angeles*, 71 Cal. App. 3d 185 (1977).

§ 15125. Environmental Setting.

An EIR must include a description of the environment in the vicinity of the project, as it exists before the commencement of the project, from both a local and regional perspective. The description shall be no longer than is necessary to an understanding of the significant effects of the proposed project and its alternatives.

(a) Knowledge of the regional setting is critical to the assessment of environmental impacts. Special emphasis should be placed on environmental resources that are rare or unique to that region and would be affected by the project.

(b) The EIR shall discuss any inconsistencies between the proposed project and applicable general plans and regional plans. Such regional plans include, but are not limited to, the applicable Air Quality Management Plan (or State Implementation Plan once adopted), area-wide waste treatment and water quality control plans, regional transportation plans, regional housing allocation plans, and regional land use plans for the protection of the coastal zone, Lake Tahoe Basin, San Francisco Bay, and Santa Monica Mountains.

(c) Where a proposed project is compared with an adopted plan, the analysis shall examine the existing physical conditions as well as the potential future conditions discussed in the plan.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061 and 21100, Public Resources Code; *E.P.I.C.* v. *County of El Dorado*, (1982) 131 Cal. App. 3d 350.

§ 15126. Environmental Impact.

All phases of a project must be considered when evaluating its impact on the environment: planning, acquisition, development, and operation. The following subjects shall be discussed, preferably in separate sections or paragraphs. If they are not discussed separately, the EIR shall include a table showing where each of the subjects is discussed.

(A) The Significant Environmental Effects of the Proposed Project. An EIR shall identify and focus on the significant environmental effects of the proposed project. Direct and indirect significant effects of the project on the environment shall be clearly identified and described, giving due consideration to both the short-term and long-term effects. The discussion should include relevant specifics of the area, the resources involved, physical changes, alterations to ecological systems, and changes induced in population distribution, population concentration, the human use of the land (including commercial and residential development), health and safety problems caused by the physical changes, and other aspects of the resource base such as water, scenic quality, and public services. The EIR shall also analyze any significant environmental effects the project might cause by bringing development and people into the area affected. For example, an EIR on a subdivision astride an active fault line should identify as a significant effect the seismic hazard to future occupants of the subdivision. The subdivision would have the effect of attracting people to the location and exposing them to the hazards found there.

(b) Any Significant Environmental Effects Which Cannot be Avoided if the Proposal is Implemented. Describe any significant impacts, including those which can be mitigated but not reduced to a level of insignificance. Where there are impacts that cannot be alleviated without imposing an alternative design, their implications and the reasons why the project is being proposed, notwithstanding their effect, should be described.

(c) Mitigation Measures Proposed to Minimize the Significant Effects. Describe measures which could minimize significant adverse impacts, including where relevant, inefficient and unnecessary consumption of energy. The discussion of mitigation measures shall distinguish between the measures which are proposed by project proponents to be included in the project and other measures that are not included but could reasonably be expected to reduce adverse impacts if required as conditions of approving the project. This discussion shall identify mitigation measures for each significant environmental effect identified in the EIR. Where several measures are available to mitigate an impact, each should be discussed and the basis for selecting a particular measure should be identified if one has been selected. Energy conservation measures, as well as other appropriate mitigation measures, shall be discussed when relevant. Examples of energy conservation measures are provided in Appendix F. If a mitigation measure would cause one or more significant effects in addition to those that would be caused by the project as proposed, the effects of the mitigation measure shall be discussed but in less detail than the significant effects of the project as proposed. (*Stevens v. City of Glendale*, 125 Cal. App. 3d 986).

(d) Alternatives to the Proposed Action. Describe a range of reasonable alternatives to the project, or to the location of the project, which would feasibly attain most of the basic objectives of the project but would avoid or substantially lessen any of the significant effects of the project, and evaluate the comparative merits of the alternatives.

(1) Purpose. Because an EIR must identify ways to mitigate or avoid the significant effects that a project may have on the environment (Public Resources Code Section 21002.1), the discussion of alternatives shall focus on alternatives to the project or its location which are capable of avoiding or substantially lessening any significant effects of the project, even if these alternatives would impede to some degree the attainment of the project objectives, or would be more costly.

(2) Selection of a range of reasonable alternatives. The range of potential alternatives to the proposed project shall include those that could feasibly accomplish most of the basic purposes of the project and could avoid or substantially lessen one or more of the significant effects. The EIR should briefly describe the rationale for selecting the alternatives to be discussed. The EIR should also identify any alternatives that were considered by the lead agency but were rejected as infeasible during the scoping process and briefly explain the reasons underlying the lead agency's determination. Additional information explaining the choice of alternatives may be included in the administrative record.

(3) Evaluation of alternatives. The EIR shall include sufficient information about each alternative to allow meaningful evaluation, analysis, and comparison with the proposed project. A matrix displaying the major characteristics and significant environmental effects of each alternative may be used to summarize the comparison. If an alternative would cause one or more significant effects in addition to those that would be caused by the project as proposed, the significant effects of the alternative shall

be discussed but in less detail than the significant effects of the project as proposed. (*County of Inyo v. City of Los Angeles*, 124 Cal.App.3d 1.)

(4) "No project" alternative. The specific alternative of "no project" shall also be evaluated along with its impact. The "no project" analysis shall discuss the existing conditions, as well as what would be reasonably expected to occur in the foreseeable future if the project were not approved, based on current plans and consistent with available infrastructure and community services. If the environmentally superior alternative is the "no project" alternative, the EIR shall also identify an environmentally superior alternative among the other alternatives.

(5) Rule of reason. The range of alternatives required in an EIR is governed by "rule of reason" that requires the EIR to set forth only those alternatives necessary to permit a reasoned choice. The alternatives shall be limited to ones that would avoid or substantially lessen any of the significant effects of the project. Of those alternatives, the EIR need examine in detail only the ones that the lead agency determines could feasibly attain most of the basic objectives of the project. The range of feasible alternatives shall be selected and discussed in a manner to foster meaningful public participation and informed decision making.

(A) Feasibility. Among the factors that may be taken into account when addressing the feasibility of alternatives are site suitability, economic viability, availability of infrastructure, general plan consistency, other plans or regulatory limitations, jurisdictional boundaries (projects with a regionally significant impact should consider the regional context), and whether the proponent can reasonably acquire, control or otherwise have access to the alternative site (or the site is already owned by the proponent). No one of these factors establishes a fixed limit on the scope of reasonable alternatives. (*Citizens of Goleta Valley v. Board of Supervisors*, (1990) 52 Cal.3d 553; see *Save Our Residential Environment v. City of West Hollywood*, (1992) 9 Cal.App.4th 1745, 1753, fn. 1).

(B) Alternative locations.

1. Key question. The key question and first step in analysis is whether any of the significant effects of the project would be avoided or substantially lessened by putting the project in another location. Only locations that would avoid or substantially lessen any of the significant effects of the project need be considered for inclusion in the EIR.

2. None feasible. If the lead agency concludes that no feasible alternative locations exist, it must disclose the reasons for this conclusion, and should include the reasons in the EIR. For example, in some cases there may be no feasible alternative locations fo a geothermal plant or mining project which must be in close proximity to natural resources at a given location.

3. Limited new analysis required. Where a previous document has sufficiently analyzed a range of reasonable alternative locations and environmental impacts for projects with the same basic purpose, the lead agency should review the previous document. The EIR may rely on the previous document to help it assess the feasibility of potential project alternatives to the extent the circumstances remain substantially the same as they relate to the alternative. (*Citizens of Goleta Valley v. Board of Supervisors*, (1990) 52 Cal. 3d 553, 573).

(C) An EIR need not consider an alternative whose effect cannot be reasonably ascertained and whose implementation is remote and speculative. (*Residents Ad Hoc Stadium Committee v. Board of Trustees* (1979) 89 Cal. App. 3d 274).

(e) The Relationship Between Local Short–Term Uses of Man's Environment and the Maintenance and Enhancement of Long–Term Productivity. Describe the cumulative and long–term effects of the proposed project which adversely affect the state of the environment. Special attention should be given to impacts which narrow the range of beneficial uses of the environment or pose long–term risks to health or safety. In addition, the reasons why the proposed project is believed by the sponsor to be justified now, rather than reserving an option for further alternatives, should be explained.

(f) Any Significant Irreversible Environmental Changes Which Would Be Involved in the Proposed Action Should It Be Implemented. Uses of nonrenewable resources during the initial and continued phases of the project may be irreversible since a large commitment of such resources makes removal or nonuse thereafter unlikely. Primary impacts and, particularly, secondary impacts (such as highway improvement which provides access to a previously inaccessible area) generally commit future generations to similar uses. Also irreversible damage can result from environmental accidents associated with the project. Irretrievable commitments of resources should be evaluated to assure that such current consumption is justified.

(g) The Growth–Inducing Impact of the Proposed Action. Discuss the ways in which the proposed project could foster economic or population growth, or the construction of additional housing, either directly or indirectly, in the surrounding environment. Included in this are projects which would remove obstacles to population growth (a major expansion of a waste water treatment plant might, for example, allow for more construction in service areas). Increases in the population may further tax existing community service facilities so consideration must be given to this impact. Also discuss the characteristic of some projects which may encourage and facilitate other activities that could significantly affect the environment, either individually or cumulatively. It must not be assumed that growth in any area is necessarily beneficial, detrimental, or of little significance to the environment.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code; *Citizens of Goleta Valley v. Board of Supervisors*, 52 Cal.3d 553 (1990); *Laurel Heights Improvement Association v. Regents of University of California*, 47 Cal. 3d 376 (1988); and *Laurel Heights Improvement Association v. Regents of the University of California* (1993) 6 Cal. 4th 1112.

HISTORY

1. Amendment of subsection (d), repealer and new subsections (d)(1)–(4), amendment of subsection (d)(5), new subsections (d)(5)(A)–(B)3, designation of subsection (d)(5)(C) and amendment of NOTE filed 8–19–94; operative 9–19–94 (Register 94, No. 33).

§ 15127. Limitations on Discussion of Environmental Impact.

The information required by Section 15126(e) concerning short–term uses versus long–term productivity, and (f) concerning irreversible changes, need be included only in EIRs prepared in connection with any of the following activities:

(a) The adoption, amendment, or enactment of a plan, policy, or ordinance of a public agency;

(b) The adoption by a local agency formation commission of a resolution making determinations; or

(c) A project which will be subject to the requirement for preparing an environmental impact statement pursuant to the requirements of the National Environmental Policy Act of 1969.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100.1, Public Resources Code; 42 U.S.C. 4321–4347.

§ 15128. Effects Not Found to Be Significant.

An EIR shall contain a statement briefly indicating the reasons that various possible significant effects of a project were determined not to be significant and were therefore not discussed in detail in the EIR. Such a statement may be contained in an attached copy of an initial study.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code.

§ 15129. Organizations and Persons Consulted.

The EIR shall identify all federal, state, or local agencies, other organizations, and private individuals consulted in preparing the draft EIR, and the persons, firm, or agency preparing the draft EIR, by contract or other authorization.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code.

§ 15130. Cumulative Impacts.

(a) Cumulative impacts shall be discussed when they are significant.

(b) The discussion of cumulative impacts shall reflect the severity of the impacts and their likelihood of occurrence, but the discussion need

not provide as great detail as is provided of the effects attributable to the project alone. The discussion should be guided by the standards of practicality and reasonableness. The following elements are necessary to an adequate discussion of cumulative impacts:

(1) Either:

(A) A list of past, present, and reasonably anticipated future projects producing related or cumulative impacts, including those projects outside the control of the agency, or

(B) A summary of projections contained in an adopted general plan or related planning document which is designed to evaluate regional or area-wide conditions. Any such planning document shall be referenced and made available to the public at a location specified by the lead agency;

(2) A summary of the expected environmental effects to be produced by those projects with specific reference to additional information stating where that information is available, and

(3) A reasonable analysis of the cumulative impacts of the relevant projects. An EIR shall examine reasonable options for mitigating or avoiding any significant cumulative effects of a proposed project.

(c) With some projects, the only feasible mitigation for cumulative impacts may involve the adoption of ordinances or regulations rather than the imposition of conditions on a project-by-project basis.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083(b), Public Resources Code; *Whitman* v. *Board of Supervisors*, 88 Cal. App. 3d 397.

§ 15131. Economic and Social Effects.

Economic or social information may be included in an EIR or may be presented in whatever form the agency desires.

(a) Economic or social effects of a project shall not be treated as significant effects on the environment. An EIR may trace a chain of cause and effect from a proposed decision on a project through anticipated economic or social changes resulting from the project to physical changes caused in turn by the economic or social changes. The intermediate economic or social changes need not be analyzed in any detail greater than necessary to trace the chain of cause and effect. The focus of the analysis shall be on the physical changes.

(b) Economic or social effects of a project may be used to determine the significance of physical changes caused by the project. For example, if the construction of a new freeway or rail line divides an existing community, the construction would be the physical change, but the social effect on the community would be the basis for determining that the effect would be significant. As an additional example, if the construction of a road and the resulting increase in noise in an area disturbed existing religious practices in the area, the disturbance of the religious practices could be used to determine that the construction and use of the road and the resulting noise would be significant effects on the environment. The religious practices would need to be analyzed only to the extent to show that the increase in traffic and noise would conflict with the religious practices. Where an EIR uses economic or social effects to determine that a physical change is significant, the EIR shall explain the reason for determining that the effect is significant.

(c) Economic, social, and particularly housing factors shall be considered by public agencies together with technological and environmental factors in deciding whether changes in a project are feasible to reduce or avoid the significant effects on the environment identified in the EIR. If information on these factors is not contained in the EIR, the information must be added to the record in some other manner to allow the agency to consider the factors in reaching a decision on the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21001(g) and (g), 21002, 21002.1, 21060.5, 21080.1, 21083(c) and 21100, Public Resources Code.

§ 15132. Contents of Final Environmental Impact Report.

The final EIR shall consist of:

(a) The Draft EIR or a revision of the draft.

(b) Comments and recommendations received on the Draft EIR either verbatim or in summary.

(c) A list of persons, organizations, and public agencies commenting on the Draft EIR.

(d) The responses of the Lead Agency to significant environmental points raised in the review and consultation process.

(e) Any other information added by the lead agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code.

Article 10. Considerations in Preparing EIRs and Negative Declarations

§ 15140. Writing.

EIRs shall be written in plain language and may use appropriate graphics so that decisionmakers and the public can rapidly understand the documents.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003 and 21100, Public Resources Code.

HISTORY

1. Repealer of Article 10 (Sections 15160–15167) and new Article 10 (Sections 15140–15153) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 80, No. 19; 78, No. 5; 76, No. 41; 75, No. 1; and 73, No. 50.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15141. Page Limits.

The text of draft EIRs should normally be less than 150 pages and for proposals of unusual scope or complexity should normally be less than 300 pages.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code.

§ 15142. Interdisciplinary Approach.

An EIR shall be prepared using an interdisciplinary approach which will ensure the integrated use of the natural and social sciences and the consideration of qualitative as well as quantitative factors. The interdisciplinary analysis shall be conducted by competent individuals, but no single discipline shall be designated or required to undertake this evaluation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000, 21001 and 21100, Public Resources Code.

§ 15143. Emphasis.

The EIR shall focus on the significant effects on the environment. The significant effects should be discussed with emphasis in proportion to their severity and probability of occurrence. Effects dismissed in an Initial Study as clearly insignificant and unlikely to occur need not be discussed further in the EIR unless the Lead Agency subsequently receives information inconsistent with the finding in the Initial Study. A copy of the Initial Study may be attached to the EIR to provide the basis for limiting the impacts discussed.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15144. Forecasting.

Drafting an EIR or preparing a negative declaration necessarily involves some degree of forecasting. While foreseeing the unforeseeable is not possible, an agency must use its best efforts to find out and disclose all that it reasonably can.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15145. Speculation.

If, after thorough investigation, a lead agency finds that a particular impact is too speculative for evaluation, the agency should note its conclusion and terminate discussion of the impact.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code; *Topanga Beach Renters Association* v. *Department of General Services* (1976) 58 Cal. App. 3d 712.

§ 15146. Degree of Specificity.

The degree of specificity required in an EIR will correspond to the degree of specificity involved in the underlying activity which is described in the EIR.

(a) An EIR on a construction project will necessarily be more detailed in the specific effects of the project than will be an EIR on the adoption of a local general plan or comprehensive zoning ordinance because the effects of the construction can be predicted with greater accuracy.

(b) An EIR on a project such as the adoption or amendment of a comprehensive zoning ordinance or a local general plan should focus on the secondary effects that can be expected to follow from the adoption, or amendment, but the EIR need not be as detailed as an EIR on the specific construction projects that might follow.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15147. Technical Detail.

The information contained in an EIR shall include summarized technical data, maps, plot plans, diagrams, and similar relevant information sufficient to permit full assessment of significant environmental impacts by reviewing agencies and members of the public. Placement of highly technical and specialized analysis and data in the body of an EIR should be avoided through inclusion of supporting information and analyses as appendices to the main body of the EIR. Appendices to the EIR may be prepared in volumes separate from the basic EIR document, but shall be readily available for public examination and shall be submitted to all clearinghouses which assist in public review.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15148. Citation.

Preparation of EIRs is dependent upon information from many sources, including engineering project reports and many scientific documents relating to environmental features. These documents should be cited but not included in the EIR. The EIR shall cite all documents used in its preparation including, where possible, the page and section number of any technical reports which were used as the basis for any statements in the EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15149. Use of Registered Professionals in Preparing EIRs.

(a) A number of statutes provide that certain professional services can be provided to the public only by individuals who have been registered by a registration board established under California law. Such statutory restrictions apply to a number of professions including but not limited to engineering, land surveying, forestry, geology, and geophysics.

(b) In its intended usage, an EIR is not a technical document that can be prepared only by a registered professional. The EIR serves as a public disclosure document explaining the effects of the proposed project on the environment, alternatives to the project, and ways to minimize adverse effects and to increase beneficial effects. As a result of information in the EIR, the lead agency should establish requirements or conditions on project design, construction, or operation in order to protect or enhance the environment. State statutes may provide that only registered professionals can prepare technical studies which will be used in or which will control the detailed design, construction, or operation of the proposed project and which will be prepared in support of an EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15150. Incorporation by Reference.

(a) An EIR or negative declaration may incorporate by reference all or portions of another document which is a matter of public record or is generally available to the public. Where all or part of another document is incorporated by reference, the incorporated language shall be considered to be set forth in full as part of the text of the EIR or negative declaration.

(b) Where part of another document is incorporated by reference, such other document shall be made available to the public for inspection at a public place or public building. The EIR or negative declaration shall state where the incorporated documents will be available for inspection. At a minimum, the incorporated document shall be made available to the public in an office of the lead agency in the county where the project would be carried out or in one or more public buildings such as county offices or public libraries if the lead agency does not have an office in the county.

(c) Where an EIR or negative declaration uses incorporation by reference, the incorporated part of the referenced document shall be briefly summarized where possible or briefly described if the data or information cannot be summarized. The relationship between the incorporated part of the referenced document and the EIR shall be described.

(d) Where an agency incorporates information from an EIR that has previously been reviewed through the state review system, the state identification number of the incorporated document should be included in the summary or designation described in Subsection (c).

(e) Examples of materials that may be incorporated by reference include but are not limited to:

(1) A description of the environmental setting from another EIR.

(2) A description of the air pollution problems prepared by an air pollution control agency concerning a process involved in the project.

(3) A description of the city or county general plan that applies to the location of the project.

(f) Incorporation by reference is most appropriate for including long, descriptive, or technical materials that provide general background but do not contribute directly to the analysis of the problem at hand.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15151. Standards for Adequacy of an EIR.

An EIR should be prepared with a sufficient degree of analysis to provide decisionmakers with information which enables them to make a decision which intelligently takes account of environmental consequences. An evaluation of the environmental effects of a proposed project need not be exhaustive, but the sufficiency of an EIR is to be reviewed in the light of what is reasonably feasible. Disagreement among experts does not make an EIR inadequate, but the EIR should summarize the main points of disagreement among the experts. The courts have looked not for perfection but for adequacy, completeness, and a good faith effort at full disclosure.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061 and 21100, Public Resources Code; *San Francisco Ecology Center* v. *City and County of San Francisco*, 48 Cal. App. 3d 584 (1975).

§ 15152. Tiering.

(a) Agencies are encouraged to tier EIRs which they prepare for separate but related projects including general plans, zoning changes, and development projects. This approach can eliminate repetitive discussions of the same issues and focus the EIR on the actual issues ripe for decision at each level of environmental review.

(b) Where an EIR has been prepared for a program, plan, policy, or ordinance consistent with the requirements of this section, any lead agency for a later project pursuant to or consistent with the program, plan, policy, or ordinance should limit the EIR on the project to effects which:

(1) Were not examined as significant effects on the environment in the prior EIR; or

(2) Are susceptible to substantial reduction or avoidance by the choice of specific revisions in the project, by the imposition of conditions, or other means.

(c) Tiering under this section shall be limited to situations where the project is consistent with the general plan and zoning of the city or county in which the project would be located.

(d) The initial study shall be used to decide whether and to what extent the prior EIR is still sufficient for the present project.

(e) When tiering is used, the later EIRs or negative declarations shall refer to the prior EIR and state where a copy of the prior EIR may be ex-

amined. The later EIR should state that the lead agency is using the tiering concept and that the EIR is being tiered with the earlier EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061, 21100 and 21151, Public Resources Code.

§ 15153. Use of an EIR from an Earlier Project.

(a) The lead agency may employ a single EIR to describe more than one project, if such projects are essentially the same in terms of environmental impact. Further, the lead agency may use an earlier EIR prepared in connection with an earlier project to apply to a later project, if the circumstances of the projects are essentially the same.

(b) When a lead agency proposes to use an EIR from an earlier project as the EIR for a separate, later project, the lead agency shall use the following procedures:

(1) The lead agency shall review the proposed project with an initial study, using incorporation by reference if necessary, to determine whether the EIR would adequately describe:

(A) The general environmental setting of the project,

(B) The significant environmental impacts of the project, and

(C) Alternatives and mitigation measures related to each significant effect.

(2) If the lead agency believes that the EIR would meet the requirements of Subsection (1), it shall provide public review as provided in Section 15087 stating that it plans to use the previously prepared EIR as the draft EIR for this project. The notice shall include as a minimum:

(A) An identification of the project with a brief description;

(B) A statement that the agency plans to use a certain EIR prepared for a previous project as the EIR for this project;

(C) A listing of places where copies of the EIR may be examined; and

(D) A statement that the key issues involving the EIR are whether the EIR should be used for this project and whether there are any additional, reasonable alternatives or mitigation measures that should be considered as ways of avoiding or reducing the significant effects of the project.

(3) The lead agency shall prepare responses to comments received during the review period.

(4) Before approving the project, the decisionmaker in the lead agency shall:

(A) Consider the information in the EIR including comments received during the review period and responses to those comments,

(B) Decide either on its own or on a staff recommendation whether the EIR is adequate for the project at hand, and

(C) Make or require certification to be made as described in Section 15090.

(D) Make findings as provided in Sections 15091 and 15093 as necessary.

(5) After making a decision on the project, the lead agency shall file a notice of determination.

(c) An EIR prepared for an earlier project may also be used as part of an initial study to document a finding that a later project will not have a significant effect. In this situation a negative declaration will be prepared.

(d) An EIR prepared for an earlier project shall not be used as the EIR for a later project if any of the conditions described in Section 15162 would require preparation of a subsequent or supplemental EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100, 21151 and 21166, Public Resources Code.

Article 11. Types of EIRs

§ 15160. General.

This article describes a number of examples of variations in EIRs as the documents are tailored to different situations and intended uses. These variations are not exclusive. Lead agencies may use other variations consistent with the guidelines to meet the needs of other circumstances. All EIRs must meet the content requirements discussed in Article 9 beginning with Section 15120.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061, 21100 and 21151, Public Resources Code.

HISTORY

1. New Article 11 (Section 15180) filed 12–14–73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Repealer of Article 11 (Section 15180) and new Article 11 (Sections 15160–15170) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29).
3. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15161. Project EIR.

The most common type of EIR examines the environmental impacts of a specific development project. This type of EIR should focus primarily on the changes in the environment that would result from the development project. The EIR shall examine all phases of the project including planning, construction, and operation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061, 21100 and 21151, Public Resources Code.

§ 15162. Subsequent EIRs and Negative Declarations.

(a) When an EIR has been certified or a negative declaration adopted for a project, no subsequent EIR shall be prepared for that project unless the lead agency determines, on the basis of substantial evidence in the light of the whole record, one or more of the following:

(1) Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;

(2) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or

(3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the negative declaration was adopted, shows any of the following:

(A) The project will have one or more significant effects not discussed in the previous EIR or negative declaration;

(B) Significant effects previously examined will be substantially more severe than shown in the previous EIR;

(C) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or

(D) Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

(b) If changes to a project or its circumstances occur or new information becomes available after adoption of a negative declaration, the lead agency shall prepare a subsequent EIR if required under subsection (a). Otherwise the lead agency shall determine whether to prepare a subsequent negative declaration, an addendum, or no further documentation.

(c) If the project was approved prior to the occurrence of the conditions described in Subsection (a), the subsequent EIR or negative declaration shall be prepared by the public agency which grants the next discretionary approval for the project. In this situation no other responsible agency shall grant an approval for the project until the subsequent EIR has been certified or subsequent negative declaration adopted.

(d) A subsequent EIR or subsequent negative declaration shall be given the same notice and public review as required under Section 15087 or Section 15072. A subsequent EIR or negative declaration shall state where the previous document is available and can be reviewed.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21166, Public Resources Code; *Bowman v. City of Petaluma*, 185 Cal.App.3d 1065 (1986); and *Benton v. Board of Supervisors*, 226 Cal.App.3d 1467 (1991).

History

1. Amendment of section heading, text and NOTE filed 8–19–94; operative 9–19–94 (Register 94, No. 33).

§ 15163. Supplement to an EIR.

(a) The lead or responsible agency may choose to prepare a supplement to an EIR rather than a subsequent EIR if:

(1) Any of the conditions described in Section 15162 would require the preparation of a subsequent EIR, and

(2) Only minor additions or changes would be necessary to make the previous EIR adequately apply to the project in the changed situation.

(b) The supplement to the EIR need contain only the information necessary to make the previous EIR adequate for the project as revised.

(c) A supplement to an EIR shall be given the same kind of notice and public review as is given to a draft EIR under Section 15087.

(d) A supplement to an EIR may be circulated by itself without recirculating the previous draft or final EIR.

(e) When the agency decides whether to approve the project, the decision–making body shall consider the previous EIR as revised by the supplemental EIR. A finding under Section 15091 shall be made for each significant effect shown in the previous EIR as revised.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21166, Public Resources Code.

§ 15164. Addendum to an EIR or Negative Declaration.

(a) The lead agency or a responsible agency shall prepare an addendum to a previously certified EIR if some changes or additions are necessary but none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred.

(b) An addendum to an adopted negative declaration may be prepared if only minor technical changes or additions are necessary.

(c) An addendum need not be circulated for public review but can be included in or attached to the final EIR or adopted negative declaration.

(d) The decision–making body shall consider the addendum with the final EIR or adopted negative declaration prior to making a decision on the project.

(e) A brief explanation of the decision not to prepare a subsequent EIR pursuant to Section 15162 should be included in an addendum to an EIR, the lead agency's required findings on the project, or elsewhere in the record. The explanation must be supported by substantial evidence.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21166, Public Resources Code; *Bowman v. City of Petaluma*, 185 Cal.App.3d 1065 (1986); and *Benton v. Board of Supervisors*, 226 Cal.App.3d 1467 (1991).

History

1. Amendment of section heading, text and NOTE filed 8–19–94; operative 9–19–94 (Register 94, No. 33).

§ 15165. Multiple and Phased Projects.

Where individual projects are, or a phased project is, to be undertaken and where the total undertaking comprises a project with significant environmental effect, the lead agency shall prepare a single program EIR for the ultimate project as described in Section 15168. Where an individual project is a necessary precedent for action on a larger project, or commits the lead agency to a larger project, with significant environmental effect, an EIR must address itself to the scope of the larger project. Where one project is one of several similar projects of a public agency, but is not deemed a part of a larger undertaking or a larger project, the agency may prepare one EIR for all projects, or one for each project, but shall in either case comment upon the cumulative effect.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061, 21100 and 21151, Public Resources Code; *Whitman v. Board of Supervisors*, 88 Cal. App. 3d 397 (1979).

§ 15166. EIR As Part of a General Plan.

(a) The requirements for preparing an EIR on a local general plan, element, or amendment thereof will be satisfied by using the general plan, or element document, as the EIR and no separate EIR will be required, if:

(1) the general plan addresses all the points required to be in an EIR by Article 9 of these guidelines and

(2) the document contains a special section or a cover sheet identifying where the general plan document addresses each of the points required.

(b) Where an EIR rather than a negative declaration has been prepared for a general plan, element, or amendment thereto, the EIR shall be forwarded to the State Clearinghouse for review. The requirement shall apply regardless of whether the EIR is prepared as a separate document or as a part of the general plan or element document.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061, 21083, 21100, 21104, 21151 and 21152, Public Resources Code.

§ 15167. Staged EIR.

(a) Where a large capital project will require a number of discretionary approvals from government agencies and one of the approvals will occur more than two years before construction will begin, a staged EIR may be prepared covering the entire project in a general form. The staged EIR shall evaluate the proposal in light of current and contemplated plans and produce an informed estimate of the environmental consequences of the entire project. The aspect of the project before the public agency for approval shall be discussed with a greater degree of specificity.

(b) When a staged EIR has been prepared, a supplement to the EIR shall be prepared when a later approval is required for the project, and the information available at the time of the later approval would permit consideration of additional environmental impacts, mitigation measures, or reasonable alternatives to the project.

(c) Where a statute such as the Warren–Alquist Energy Resources Conservation and Development Act provides that a specific agency shall be the lead agency for a project and requires the lead agency to prepare an EIR, a responsible agency which must grant an approval for the project before the lead agency has completed the EIR may prepare and consider a staged EIR.

(d) An agency requested to prepare a staged EIR may decline to act as the lead agency if it determines, among other factors, that:

(1) Another agency would be the appropriate lead agency; and

(2) There is no compelling need to prepare a staged EIR and grant an approval for the project before the appropriate lead agency will take its action on the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21003, Public Resources Code.

§ 15168. Program EIR.

(a) General. A program EIR is an EIR which may be prepared on a series of actions that can be characterized as one large project and are related either:

(1) Geographically,

(2) As logical parts in the chain of contemplated actions,

(3) In connection with issuance of rules, regulations, plans, or other general criteria to govern the conduct of a continuing program, or

(4) As individual activities carried out under the same authorizing statutory or regulatory authority and having generally similar environmental effects which can be mitigated in similar ways.

(b) Advantages. Use of a program EIR can provide the following advantages. The program EIR can:

(1) Provide an occasion for a more exhaustive consideration of effects and alternatives than would be practical in an EIR on an individual action,

(2) Ensure consideration of cumulative impacts that might be slighted in a case–by–case analysis,

(3) Avoid duplicative reconsideration of basic policy considerations,

(4) Allow the lead agency to consider broad policy alternatives and program wide mitigation measures at an early time when the agency has greater flexibility to deal with basic problems or cumulative impacts,

(5) Allow reduction in paperwork.

(c) Use With Later Activities. Subsequent activities in the program must be examined in the light of the program EIR to determine whether an additional environmental document must be prepared.

(1) If a later activity would have effects that were not examined in the program EIR, a new initial study would need to be prepared leading to either an EIR or a negative declaration.

(2) If the agency finds that pursuant to Section 15162, no new effects could occur or no new mitigation measures would be required, the agency can approve the activity as being within the scope of the project covered by the program EIR, and no new environmental document would be required.

(3) An agency shall incorporate feasible mitigation measures and alternatives developed in the program EIR into subsequent actions in the program.

(4) Where the subsequent activities involve site specific operations, the agency should use a written checklist or similar device to document the evaluation of the site and the activity to determine whether the environmental effects of the operation were covered in the program EIR.

(5) A program EIR will be most helpful in dealing with subsequent activities if it deals with the effects of the program as specifically and comprehensively as possible. With a good and detailed analysis of the program, many subsequent activities could be found to be within the scope of the project described in the program EIR, and no further environmental documents would be required.

(d) Use With Subsequent EIRS and Negative Declarations. A program EIR can be used to simplify the task of preparing environmental documents on later parts of the program. The program EIR can:

(1) Provide the basis in an initial study for determining whether the later activity may have any significant effects.

[The next page is 685.]

§ 15365. Initial Study.

"Initial study" means a preliminary analysis prepared by the lead agency to determine whether an EIR or a negative declaration must be prepared or to identify the significant environmental effects to be analyzed in an EIR. Use of the initial study is discussed in Article 5, commencing with Section 15060.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.1, 21080.2, 21080.3 and 21100, Public Resources Code.

§ 15366. Jurisdiction by Law.

(a) "Jurisdiction by law" means the authority of any public agency:

(1) To grant a permit or other entitlement for use,

(2) To provide funding for the project in question, or

(3) To exercise authority over resources which may be affected by the project.

(b) A city or county will have jurisdiction by law with respect to a project when the city or county having primary jurisdiction over the area involved is:

(1) The site of the project;

(2) The area in which the major environmental effects will occur; and/or

(3) The area in which reside those citizens most directly concerned by any such environmental effects.

(c) Where an agency having jurisdiction by law must exercise discretionary authority over a project in order for the project to proceed, it is also a responsible agency, see Section 15381, or the lead agency, see Section 15367.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.3, 21080.4, 21104 and 21153, Public Resources Code.

§ 15367. Lead Agency.

"Lead agency" means the public agency which has the principal responsibility for carrying out or approving a project. The lead agency will decide whether an EIR or negative declaration will be required for the project and will cause the document to be prepared. Criteria for determining which agency will be the lead agency for a project are contained in Section 15051.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21165, Public Resources Code.

§ 15368. Local Agency.

"Local agency" means any public agency other than a state agency, board, or commission. Local agency includes but is not limited to cities, counties, charter cities and counties, districts, school districts, special districts, redevelopment agencies, local agency formation commissions, and any board, commission, or organizational subdivision of a local agency when so designated by order or resolution of the governing legislative body of the local agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21062 and 21151, Public Resources Code.

§ 15369. Ministerial.

"Ministerial" describes a governmental decision involving little or no personal judgment by the public official as to the wisdom or manner of carrying out the project. The public official merely applies the law to the facts as presented but uses no special discretion or judgment in reaching a decision. A ministerial decision involves only the use of fixed standards or objective measurements, and the public official cannot use personal, subjective judgment in deciding whether or how the project should be carried out. Common examples of ministerial permits include automobile registrations, dog licenses, and marriage licenses. A building permit is ministerial if the ordinance requiring the permit limits the public official to determining whether the zoning allows the structure to be built in the requested location, the structure would meet the strength requirements in the Uniform Building Code, and the applicant has paid his fee.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(1), Public Resources Code; *Johnson v. State of California*, 69 Cal. 2d 782; *Day v. City of Glendale*, 51 Cal. App. 3d 817.

§ 15370. Mitigation.

"Mitigation" includes:

(a) Avoiding the impact altogether by not taking a certain action or parts of an action.

(b) Minimizing impacts by limiting the degree or magnitude of the action and its implementation.

(c) Rectifying the impact by repairing, rehabilitating, or restoring the impacted environment.

(d) Reducing or eliminating the impact over time by preservation and maintenance operations during the life of the action.

(e) Compensating for the impact by replacing or providing substitute resources or environments.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1, 21081 and 21100(c), Public Resources Code.

§ 15371. Negative Declaration.

"Negative declaration" means a written statement by the lead agency briefly describing the reasons that a proposed project, not exempt from CEQA, will not have a significant effect on the environment and therefore does not require the preparation of an EIR. The contents of a negative declaration are described in Section 15071.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(c), Public Resources Code.

§ 15372. Notice of Completion.

"Notice of completion" means a brief notice filed with the OPR by a lead agency as soon as it has completed a draft EIR and is prepared to send out copies for review. The contents of this notice are explained in Section 15085.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21161, Public Resources Code.

HISTORY

1. Amendment filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15373. Notice of Determination.

"Notice of determination" means a brief notice to be filed by a public agency after it approves or determines to carry out a project which is subject to the requirements of CEQA. The contents of this notice are explained in Sections 15075 and 15094.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108(a) and 21152, Public Resources Code.

§ 15374. Notice of Exemption.

"Notice of exemption" means a brief notice which may be filed by a public agency after it has decided to carry out or approve a project and has determined that the project is exempt from CEQA as being ministerial, categorically exempt, an emergency, or subject to another exemption from CEQA. Such a notice may also be filed by an applicant where such a determination has been made by a public agency which must approve the project. The contents of this notice are explained in Section 15062.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108(b) and 21152(b), Public Resources Code.

§ 15375. Notice of Preparation.

"Notice of preparation" means a brief notice sent by a lead agency to notify the responsible agencies, trustee agencies, and involved federal agencies that the lead agency plans to prepare an EIR for the project. The purpose of the notice is to solicit guidance from those agencies as to the scope and content of the environmental information to be included in the EIR. Public agencies are free to develop their own formats for this notice. The contents of this notice are described in Section 15082.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

§ 15376. Person.

"Person" includes any person, firm, association, organization, partnership, business, trust, corporation, company, district, city, county, city and county, town, the state, and any of the agencies or political subdivisions of such entities.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21065, Public Resources Code.

§ 15377. Private Project.

A "private project" means a project which will be carried out by a person other than a governmental agency, but the project will need a discretionary approval from one or more governmental agencies for:

(a) A contract or financial assistance, or

(b) A lease, permit, license, certificate, or other entitlement for use.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21065, Public Resources Code.

§ 15378. Project.

(a) "Project" means the whole of an action, which has a potential for resulting in a physical change in the environment, directly or ultimately, and that is any of the following:

(1) An activity directly undertaken by any public agency including but not limited to public works construction and related activities clearing or grading of land, improvements to existing public structures, enactment and amendment of zoning ordinances, and the adoption and amendment of local General Plans or elements thereof pursuant to Government Code Sections 65100–65700.

(2) An activity undertaken by a person which is supported in whole or in part through public agency contracts, grants, subsidies, loans, or other forms of assistance from one or more public agencies.

(3) An activity involving the issuance to a person of a lease, permit, license, certificate, or other entitlement for use by one or more public agencies.

(b) Project does not include:

(1) Anything specifically exempted by state law;

(2) Proposals for legislation to be enacted by the State Legislature;

(3) Continuing administrative or maintenance activities, such as purchases for supplies, personnel–related actions, general policy and procedure making (except as they are applied to specific instances covered above);

(4) The submittal of proposals to a vote of the people of the state or of a particular community. (*Stein v. City of Santa Monica*, 110 Cal. App. 3d 458);

(5) The creation of government funding mechanisms or other government fiscal activities which do not involve any commitment to any specific project which may result in a potentially significant physical impact on the environment.

(c) The term "project" refers to the activity which is being approved and which may be subject to several discretionary approvals by governmental agencies. The term "project" does not mean each separate governmental approval.

(d) Where the lead agency could describe the project as either the adoption of a particular regulation under Subsection (a)(1) or as a development proposal which will be subject to several governmental approvals under Subsections (a)(2) or (a)(3), the lead agency shall describe the project as the development proposal for the purpose of environmental analysis. This approach will implement the lead agency principle as described in Article 4.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21065, Public Resources Code; *Kaufman and Broad–South Bay, Inc. v. Morgan Hill Unified School District*, 9 Cal.App.4th 464 (1992); and *Fullerton Joint Union High School District v. State Board of Education*, 32 Cal.3d 779 (1982).

HISTORY

1. Amendment of subsection (b)(3), repealer and new subsection (b)(5) and amendment of NOTE filed 8–19–94; operative 9–19–94 (Register 94, No. 33).

§ 15379. Public Agency.

"Public agency" includes any state agency, board, or commission and any local or regional agency, as defined in these guidelines. It does not include the courts of the state. This term does not include agencies of the federal government.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21063, Public Resources Code.

§ 15380. Rare or Endangered Species.

(a) "Species" as used in this section means a species or subspecies of animal or plant or a variety of plant.

(b) A species of animal or plant is:

(1) "Endangered" when its survival and reproduction in the wild are in immediate jeopardy from one or more causes, including loss of habitat, change in habitat, overexploitation, predation, competition, disease, or other factors; or

(2) "Rare" when either:

(A) Although not presently threatened with extinction, the species is existing in such small numbers throughout all or a significant portion of its range that it may become endangered if its environment worsens; or

(B) The species is likely to become endangered within the foreseeable future throughout all or a significant portion of its range and may be considered "threatened" as that term is used in the Federal Endangered Species Act.

(c) A species of animal or plant shall be presumed to be rare or endangered as it is listed in:

(1) Sections 670.2 or 670.5, Title 14, California Administrative Code; or

(2) Title 50, Code of Federal Regulations Sections 17.11 or 17.12 pursuant to the Federal Endangered Species Act as rare, threatened, or endangered.

(d) A species not included in any listing identified in subsection (c) shall nevertheless be considered to be rare or endangered if the species can be shown to meet the criteria in subsection (b).

(e) This definition shall not include any species of the Class Insecta which is a pest whose protection under the provisions of CEQA would present an overwhelming and overriding risk to man as determined by:

(1) The Director of Food and Agriculture with regard to economic pests; or

(2) The Director of Health Services with regard to health risks.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21001(c), Public Resources Code; and Sections 1900–1913 and 2050–2055, Fish and Game Code.

§ 15381. Responsible Agency.

"Responsible agency" means a public agency which proposes to carry out or approve a project, for which a lead agency is preparing or has prepared an EIR or negative declaration. For the purposes of CEQA, the term "responsible agency" includes all public agencies other than the lead agency which have discretionary approval power over the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002.1, 21069, 21080.1, 21080.3, 21080.4, 21167.2 and 21167.3, Public Resources Code.

§ 15382. Significant Effect on the Environment.

"Significant effect on the environment" means a substantial, or potentially substantial, adverse change in any of the physical conditions within the area affected by the project including land, air, water, minerals, flora, fauna, ambient noise, and objects of historic or aesthetic significance. An economic or social change by itself shall not be considered a significant effect on the environment. A social or economic change related to a physical change may be considered in determining whether the physical change is significant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21068, 21083, 21100 and 21151, Public Resources Code; *Heclon v. People of the State of California*, 58 Cal. App. 3d 653.

HISTORY

1. On November 23, 1986 the regulation (Title 14, § 895.1) became effective which clarifies the Board's regulatory interpretation of "effect" and "impact" as specified in CEQA (Public Resources Code § 21068 and § 21080.5(d)(2) and (3)) (Register 86, No. 4).

§ 15383. State Agency.

"State agency" means a governmental agency in the executive branch of the State Government or an entity which operates under the direction and control of an agency in the executive branch of State Government and is funded primarily by the State Treasury.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code.

§ 15384. Substantial Evidence.

(a) "Substantial evidence" as used in these guidelines means enough relevant information and reasonable inferences from this information that a fair argument can be made to support a conclusion, even though other conclusions might also be reached. Whether a fair argument can be made is to be determined by examining the entire record. Mere uncorroborated opinion or rumor does not constitute substantial evidence.

(b) This definition is intended to be informative and does not constitute a change in, but is merely reflective of, existing law.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21168 and 21168.5, Public Resources Code; *No Oil, Inc.* v. *City of Los Angeles* (1974) 13 Cal. 3d 68; *Running Fence Corp.* v. *Superior Court* (1975) 51 Cal. App. 3d 400; *Friends of B Street* v. *City of Hayward* (1980) 106 Cal. App. 3d 988.

§ 15385. Tiering.

"Tiering" refers to the coverage of general matters in broader EIRs (such as on general plans or policy statements) with subsequent narrower EIRs or ultimately site-specific EIRs incorporating by reference the general discussions and concentrating solely on the issues specific to the EIR subsequently prepared. Tiering is appropriate when the sequence of EIRs is:

(a) From a general plan, policy, or program EIR to a program, plan, or policy EIR of lesser scope or to a site-specific EIR.

(b) From an EIR on a specific action at an early stage to a subsequent EIR or a supplement to an EIR at a later stage. Tiering in such cases is appropriate when it helps the lead agency to focus on the issues which are ripe for decision and exclude from consideration issues already decided or not yet ripe.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15386. Trustee Agency.

"Trustee agency" means a state agency having jurisdiction by law over natural resources affected by a project which are held in trust for the people of the State of California. Trustee agencies include: (a) The California Department of Fish and Game with regard to the fish and wildlife of the state, to designated rare or endangered native plants, and to game refuges, ecological reserves, and other areas administered by the department.

(b) The State Lands Commission with regard to state owned "sovereign" lands such as the beds of navigable waters and state school lands.

(c) The State Department of Parks and Recreation with regard to units of the State Park System.

(d) The University of California with regard to sites within the Natural Land and Water Reserves System.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.3 and 21080.4, Public Resources Code.

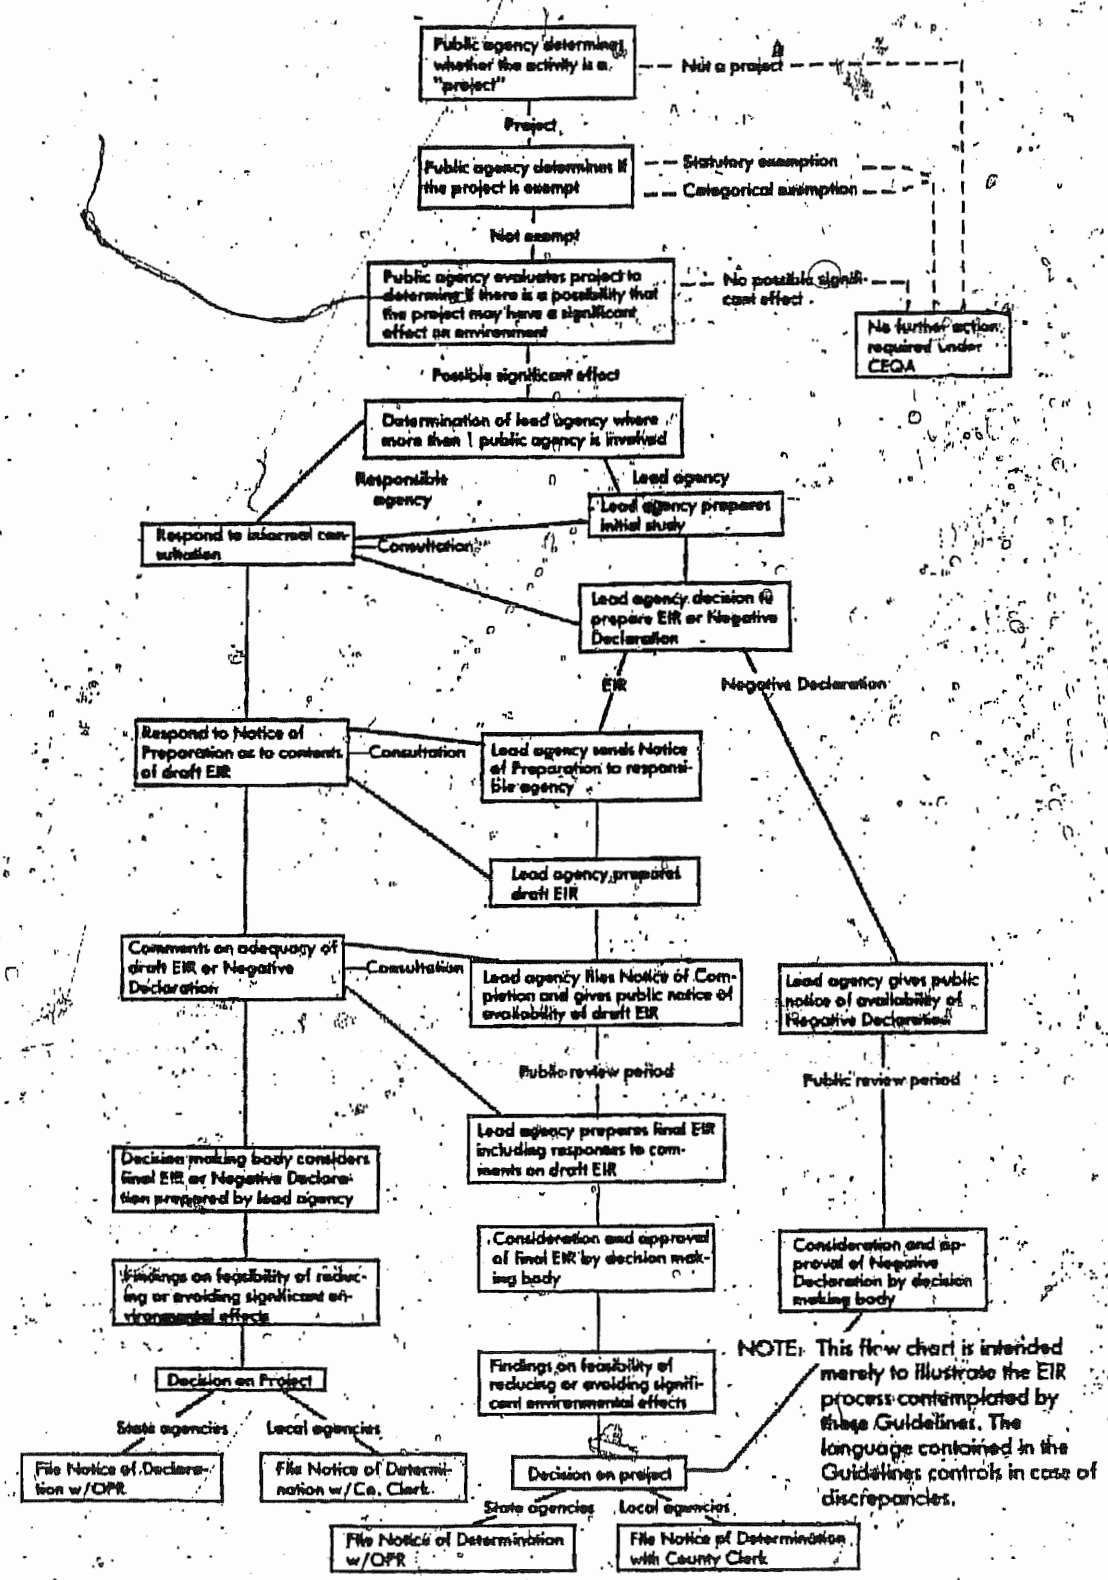
§ 15387. Urbanized Area.

"Urbanized area" means a central city or a group of contiguous cities with a population of 50,000 or more, together with adjacent densely populated areas having a population density of at least 1,000 persons per square mile. A lead agency shall determine whether a particular area meets the criteria in this section either by examining the area or by referring to a map prepared by the U.S. Bureau of the Census which designates the area as urbanized. Maps of the designated urbanized areas can be found in the California EIR Monitor of February 7, 1979. The maps are also for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The maps are sold in sets only as Stock Number 0301-3466. Use of the term "urbanized area" in Section 15182 is limited to areas mapped and designated as urbanized by the U.S. Bureau of the Census.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.7, 21083 and 21084, Public Resources Code.

Appendix A

CEQA PROCESS FLOW CHART



NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY

1. Amendment of Appendix A filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5). For prior history, see Registers 80, No. 19 and 73, No. 50.

Appendix I

ENVIRONMENTAL CHECKLIST FORM

1. Project Title:

2. Lead Agency Name and Address:

3. Contact Person and Phone Number:

4. Project Location:

5. Project Sponsor's Name and Address:

6. General Plan Designation: 7. Zoning:

8. Description of Project: (Describe the whole action involved, including but not limited to later phases of the project, and any secondary, support, or off–site features necessary for its implementation. Attach additional sheets if necessary)

9. Surrounding Land Uses and Setting: Briefly describe the project's surroundings)

10. Other public agencies whose approval is required
(e.g., permits, financing approval, or participation agreement.)

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

☐ Land Use and Planning	☐ Transportation/Circulation	☐ Public Services
☐ Population and Housing	☐ Biological Resources	☐ Utilities and Service Systems
☐ Geological Problems	☐ Energy and Mineral Resources	☐ Aesthetics
☐ Water	☐ Hazards	☐ Cultural Resources
☐ Air Quality	☐ Noise	☐ Recreation
	☐ Mandatory Findings of Significance	

DETERMINATION.

(To be completed by the Lead Agency.)

On the basis of this initial evaluation:

I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared. ☐

I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because the mitigation measures described on an attached sheet have been added to the project. A NEGATIVE DECLARATION will be prepared. ☐

I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required. ☐

I find that the proposed project MAY have a significant effect(s) on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets, if the effect is a "potentially significant impact" or "potentially significant unless mitigated." An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed. ☐

I find that although the proposed project could have a significant effect on the environment, there WILL NOT be a significant effect in this case because all potentially significant effects (a) have been analyzed adequately in an earlier EIR pursuant to applicable standards and (b) have been avoided or mitigated pursuant to that earlier EIR, including revisions or mitigation measures that are imposed upon the proposed project. ☐

Signature _____ Date _____

Printed Name _____ For _____

EVALUATION OF ENVIRONMENTAL IMPACTS:

1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g. the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project–specific factors as well as general standards (e.g. the project will not expose sensitive receptors to pollutants, based on a project–specific screening analysis).
2) All answers must take account of the whole action involved, including off–site as well as on–site, cumulative as well as project–level, indirect as well as direct, and construction as well as operational impacts.
3) "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect is significant If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
4) "Potentially Significant Unless Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from Section XVII, "Earlier Analysis," may be cross–referenced).
5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). Earlier analyses are discussed in Section XVII at the end of the checklist.
6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g. general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated. See the sample question below. A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
7) This is only a suggested form, and lead agencies are free to use different ones.

SAMPLE QUESTION:

Issues (and Supporting Information Sources):	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the proposal result in potential impacts involving:				
Landslides or mudslides? (1, 6)	☐	☐	☐	☐
(Attached source list explains that is the general plan, and 6 is a USGS topo map. This answer would probably not need further explanation.)				
I. LAND USE AND PLANNING. Would the proposal:				
a) Conflict with general plan designation or zoning? (source #(s):)	☐	☐	☐	☐
b) Conflict with applicable environmental plans or policies adopted by agencies with jurisdiction over the project? ( )	☐	☐	☐	☐
c) Be incompatible with existing land use in the vicinity? ( )	☐	☐	☐	☐
d) Affect agricultural resources or operations (e.g., impacts to soils or farmlands, or impacts from incompatible land uses)? ( )	☐	☐	☐	☐
e) Disrupt or divide the physical arrangement of an established community (including a low-income or minority community)? ( )	☐	☐	☐	☐
II. POPULATION AND HOUSING. Would the proposal:				
a) Cumulatively exceed official regional or local population projections? ( )	☐	☐	☐	☐
b) Induce substantial growth in an area either directly or indirectly (e.g., through projects in an undeveloped area or extension of major infrastructure)? ( )	☐	☐	☐	☐
c) Displace existing housing, especially affordable housing? ( )	☐	☐	☐	☐

Issues (and Supporting Information Sources):	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporated	Less Than Significant Impact	No Impact
III. GEOLOGIC PROBLEMS. Would the proposal result in or expose people to potential impacts involving:				
a) Fault rupture? ( )	☐	☐	☐	☐
b) Seismic ground shaking ( )	☐	☐	☐	☐
c) Seismic ground failure, including liquefaction? ( )	☐	☐	☐	☐
d) Seiche, tsunami, or volcanic hazard? ( )	☐	☐	☐	☐
e) Landslides or mudflows? ( )	☐	☐	☐	☐
f) Erosion, changes in topography or unstable soil conditions from excavation, grading, or fill? ( )	☐	☐	☐	☐
g) Subsidence of the land? ( )	☐	☐	☐	☐
h) Expansive soils? ( )				
i) Unique geologic or physical features? ( )	☐	☐	☐	☐
IV. WATER. Would the proposal result in:				
a) Changes in absorption rates, drainage patterns, or the rate and amount of surface runoff? ( )	☐	☐	☐	☐
b) Exposure of people or property to water related hazards such as flooding? ( )	☐	☐	☐	☐
c) Discharge into surface waters or other alteration of surface water quality (e.g. temperature, dissolved oxygen or turbidity)? ( )	☐	☐	☐	☐
d) Changes in the amount of surface water in any water body? ( )	☐	☐	☐	☐
e) Changes in currents, or the course or direction of water movements? ( )	☐	☐	☐	☐
f) Change in the quantity of ground waters, either through direct additions or withdrawals, or through interception of an aquifer by cuts or excavations or through substantial loss of groundwater recharge capability? ( )	☐	☐	☐	☐
g) Altered direction or rate of flow of groundwater? ( )	☐	☐	☐	☐
h) Impacts to groundwater quality? ( )	☐	☐	☐	☐
i) Substantial reduction in the amount of groundwater otherwise available for public water supplies? ( )	☐	☐	☐	☐

Issues (and Supporting Information Sources):	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporated	Less Than Significant Impact	No Impact
V. AIR QUALITY. Would the proposal:				
a) Violate any air quality standard or contribute to an existing or projected air quality violation? ( )	☐	☐	☐	☐
b) Expose sensitive receptors to pollutants? ( )	☐	☐	☐	☐
c) Alter air movement, moisture, or temperature, or cause any change in climate? ( )	☐	☐	☐	☐
d) Create objectionble odors? ( )	☐	☐	☐	☐
VI. TRANSPORTATION/CIRCULATION. Would the proposal result in:	☐			
a) Increased vehicle trips or traffic congestion? ( )	☐	☐	☐	☐
b) Hazards to safety from design features (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)? ( )	☐	☐	☐	☐
c) Inadequate emergency access or access to nearby uses? ( )	☐	☐	☐	☐
d) Insufficient parking capacity on-site or off-site? ( )	☐	☐	☐	☐
e) Hazards or barriers for pedestrians or bicyclists? ( )	☐	☐	☐	☐
f) Conflicts with adopted policies supporting transportation (e.g. bus turnouts, bicycle racks)? ( )	☐	☐	☐	☐
g) Rail, waterborne or air traffic impacts? ( )	☐	☐	☐	☐
VII. BIOLOGICAL RESOURCES. Would the proposal result in impacts to:				
a) Endangered, threatened or rare species or their habitats (including but not limited to plants, fish, insects, animals, and birds)? ( )	☐	☐	☐	☐
b) Locally designated species (e.g. heritage trees)? ( )	☐	☐	☐	☐
c) Locally designated natural communities (e.g. oak forest, coastal habitat, etc.)? ( )	☐	☐	☐	☐
d) Wetland habitat (e.g. marsh, riparian and vernal pool)? ( )	☐	☐	☐	☐
e) Wildlife dispersal or migration corridors? ( )	☐	☐	☐	☐

Issues (and Supporting Information Sources):	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporated	Less Than Significant Impact	No Impact
VIII. ENERGY AND MINERAL RESOURCES. Would the proposal:				
a) Conflict with adopted energy conservation plans? ( )	☐	☐	☐	☐
b) Use non-renewable resources in a wasteful and inefficient manner? ( )	☐	☐	☐	☐
c) Result in the loss of availability of a known mineral resource that would be of future value to the region and the residents of the State? ( )	☐	☐	☐	☐
IX. HAZARDS. Would the proposal involve:				
a) A risk of accidental explosion or release of hazardous substances (including, but not limited to: oil, pesticides, chemicals or radiation)? ( )	☐	☐	☐	☐
b) Possible interference with an emergency response plan or emergency evacuation plan? ( )	☐	☐	☐	☐
c) The creation of any health hazard or potential health hazard? ( )	☐	☐	☐	☐
d) Exposure of people to existing sources of potential health hazards? ( )	☐	☐	☐	☐
e) Increased fire hazard in areas with flammable brush, grass, or trees? ( )	☐	☐	☐	☐
X. NOISE. Would the proposal result in:				
a) Increases in existing noise levels? ( )	☐	☐	☐	☐
b) Exposure of people to severe noise levels? ( )	☐	☐	☐	☐
XI. PUBLIC SERVICES. Would the proposal have an effect upon, or result in a need for new or altered government services in any of the following areas:				
a) Fire protection? ( )	☐	☐	☐	☐
b) Police protection? ( )	☐	☐	☐	☐
c) Schools? ( )	☐	☐	☐	☐
d) Maintenance of public facilities, including roads? ( )	☐	☐	☐	☐
e) Other governmental services? ( )	☐	☐	☐	☐

Issues (and Supporting Information Sources):	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporated	Less Than Significant Impact	No Impact
XII. UTILITIES AND SERVICE SYSTEMS. Would the proposal result in a need for new systems or supplies, or substantial alterations to the following utilities:				
a) Power or natural gas? ( )	☐	☐	☐	☐
b) Communications systems? ( )	☐	☐	☐	☐
c) Local or regional water treatment or distribution facilities? ( )	☐	☐	☐	☐
d) Sewer or septic tanks? ( )	☐	☐	☐	☐
e) Storm water drainage? ( )	☐	☐	☐	☐
f) Solid waste disposal? ( )	☐	☐	☐	☐
g) Local or regional water supplies? ( )	☐	☐	☐	☐
XIII. AESTHETICS. Would the proposal:				
a) Affect a scenic vista or scenic highway? ( )	☐	☐	☐	☐
b) Have a demonstrable negative aesthetic effect? ( )	☐	☐	☐	☐
c) Create light or glare? ( )	☐	☐	☐	☐
XIV. CULTURAL RESOURCES. Would the proposal:				
a) Disturb paleontological resources? ( )	☐	☐	☐	☐
b) Disturb archaeological resources? ( )	☐	☐	☐	☐
c) Affect historical resources? ( )	☐	☐	☐	☐
d) Have the potential to cause a physical change which would affect unique ethnic cultural values? ( )	☐	☐	☐	☐
e) Restrict existing religious or sacred uses within the potential impact area? ( )	☐	☐	☐	☐
XV. RECREATION. Would the proposal:				
a) Increases the demand for neighborhood or regional parks or other recreational facilities? ( )	☐	☐	☐	☐
b) Affect existing recreational opportunities? ( )	☐	☐	☐	☐

Issues (and Supporting Information Sources):	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporated	Less Than Significant Impact	No Impact
XVI. MANDATORY FINDINGS OF SIGNIFICANCE.				
a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	☐	☐	☐	☐
b) Does the project have the potential to achieve short-term, to the disadvantage of long-term, environmental goals?	☐	☐	☐	☐
c) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)	☐	☐	☐	☐
d) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	☐	☐	☐	☐

XVII. EARLIER ANALYSES.

Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, one or more effects have been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case a discussion should identify the following on attached sheets:

a) Earlier analyses used. Identify earlier analyses and state where they are available for review.

b) Impacts adequately addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.

c) Mitigation measures. For effects that are "Less than Significant with Mitigation Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.

§ 15041. Authority to Mitigate.

Within the limitations described in Section 15040, (a) A lead agency for a project has authority to require changes in any or all activities involved in the project in order to lessen or avoid significant effects on the environment.

(b) When a public agency acts as a responsible agency for a project, the agency shall have more limited authority than a lead agency. The responsible agency may require changes in a project to lessen or avoid only the effects, either direct or indirect, of that part of the project which the agency will be called on to carry out or approve.

(c) With respect to a project which includes housing development, a lead or responsible agency shall not reduce the proposed number of housing units as a mitigation measure or alternative to lessen a particular significant effect on the environment if that agency determines that there is another feasible, specific mitigation measure or alternative that would provide a comparable lessening of the significant effect.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1 and 21085, Public Resources Code; *Golden Gate Bridge, Etc., District* v. *Muzzi*, 83 Cal. App. 3d 707.

§ 15042. Authority to Disapprove Projects.

A public agency may disapprove a project if necessary in order to avoid one or more significant effects on the environment that would occur if the project were approved as proposed. A lead agency has broader authority to disapprove a project than does a responsible agency. A responsible agency may refuse to approve a project in order to avoid direct or indirect environmental effects of that part of the project which the responsible agency would be called on to carry out or approve. For example, an air quality management district acting as a responsible agency would not have authority to disapprove a project for water pollution effects that were unrelated to the air quality aspects of the project regulated by the district.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002 and 21002.1, Public Resources Code; *Friends of Mammoth* v. *Mono County*, 8 Cal. App. 3d 247; *San Diego Trust and Savings Bank* v. *Friends of Gill*, 121 Cal. App. 3d 203.

§ 15043. Authority to Approve Projects Despite Significant Effects.

A public agency may approve a project even though the project would cause a significant effect on the environment if the agency makes a fully informed and publicly disclosed decision that:

(a) There is no feasible way to lessen or avoid the significant effect (see Section 15091); and

(b) Specifically identified expected benefits from the project outweigh the policy of reducing or avoiding significant environmental impacts of the project. (See Section 15093.)

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002 and 21002.1, Public Resources Code; *San Francisco Ecology Center* v. *City and County of San Francisco*, (1975) 48 Cal. App. 3d 584; *San Diego Trust & Savings Bank* v. *Friends of Gill*, (1981) 121 Cal. App. 3d 203.

§ 15044. Authority to Comment.

Any person or entity other than a responsible agency may submit comments to a lead agency concerning any environmental effects of a project being considered by the lead agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000, 21001, 21002.1, 21104 and 21153, Public Resources Code.

HISTORY

1. Amendment filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15045. Fees.

(a) All lead agencies preparing EIRs and negative declarations for projects to be carried out by any person or entity other than the lead agency itself may charge and collect a reasonable fee from such person or entity, in order to recover the estimated costs incurred in preparing the EIR or negative declaration.

(b) Public agencies may charge and collect a reasonable fee from members of the public for a copy of an environmental document not to exceed the actual cost of reproducing a copy.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21089 and 21105, Public Resources Code; and Sections 6250 et seq., Government Code.

Article 4. Lead Agency

§ 15050. Lead Agency Concept.

(a) Where a project is to be carried out or approved by more than one public agency, one public agency shall be responsible for preparing an EIR or negative declaration for the project. This agency shall be called the lead agency.

(b) Except as provided in subsection (c), the decisionmaking body of each responsible agency shall consider the lead agency's EIR or negative declaration prior to acting upon or approving the project. Each responsible agency shall certify that its decisionmaking body reviewed and considered the information contained in the EIR or negative declaration on the project.

(c) The determination of the lead agency of whether to prepare an EIR or a negative declaration shall be final and conclusive for all persons, including responsible agencies, unless:

(1) The decision is successfully challenged as provided in Section 21167 of the Public Resources Code,

(2) Circumstances or conditions change as provided in Section 15162, or

(3) A responsible agency becomes a lead agency under Section 15052.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.1, 21165 and 21167.2, Public Resources Code.

HISTORY

1. Repealer of Article 4 (Sections 15020–15043) and new Article 4 (Sections 15050–15053) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 82, No. 2; 80, No. 19; 78, No. 5; 76, No. 41; 75, Nos. 1, 5 and 22; 74, Nos. 13 and 26; and 73, No. 50.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15051. Criteria for Identifying the Lead Agency.

Where two or more public agencies will be involved with a project, the determination of which agency will be the lead agency shall be governed by the following criteria:

(a) If the project will be carried out by a public agency, that agency shall be the lead agency even if the project would be located within the jurisdiction of another public agency.

(b) If the project is to be carried out by a nongovernmental person or entity, the lead agency shall be the public agency with the greatest responsibility for supervising or approving the project as a whole.

(1) The lead agency will normally be the agency with general governmental powers, such as a city or county, rather than an agency with a single or limited purpose such as an air pollution control district or a district which will provide a public service or public utility to the project.

(2) Where a city prezones an area, the city will be the appropriate lead agency for any subsequent annexation of the area and should prepare the appropriate environmental document at the time of the prezoning. The local agency formation commission shall act as a responsible agency.

(c) Where more than one public agency equally meet the criteria in subsection (b), the agency which will act first on the project in question shall be the lead agency.

(d) Where the provisions of subsections (a), (b), and (c) leave two or more public agencies with a substantial claim to be the lead agency, the public agencies may by agreement designate an agency as the lead agency. An agreement may also provide for cooperative efforts by two or more agencies by contract, joint exercise of powers, or similar devices.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21165, Public Resources Code.

§ 15052. Shift in Lead Agency Designation.

(a) Where a responsible agency is called on to grant an approval for a project subject to CEQA for which another public agency was the appropriate lead agency, the responsible agency shall assume the role of the lead agency when any of the following conditions occur:

(1) The lead agency did not prepare any environmental documents for the project, and the statute of limitations has expired for a challenge to the action of the appropriate lead agency.

(2) The lead agency prepared environmental documents for the project, but the following conditions occur:

(A) A subsequent EIR is required pursuant to Section 15162,

(B) The lead agency has granted a final approval for the project, and

(C) The statute of limitations for challenging the lead agency's action under CEQA has expired.

(3) The lead agency prepared inadequate environmental documents without consulting with the responsible agency as required by Sections 15072 or 15082, and the statute of limitations has expired for a challenge to the action of the appropriate lead agency.

(b) When a responsible agency assumes the duties of a lead agency under this section, the time limits applicable to a lead agency shall apply to the actions of the agency assuming the lead agency duties.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21165, Public Resources Code.

§ 15053. Designation of Lead Agency by Office of Planning and Research.

(a) If there is a dispute over which of several agencies should be the lead agency for a project, the disputing agencies should consult with each other in an effort to resolve the dispute prior to submitting it to OPR. If an agreement cannot be reached, any public agency, or the applicant if a private project is involved, may submit the dispute to OPR for resolution.

(b) OPR shall designate a lead agency within 21 days after receiving ompleted request to resolve a dispute.

(c) Regulations adopted by OPR for resolving lead agency disputes ay be found in Title 14, California Administrative Code, Sections 16000 et seq.

(d) Designation of a lead agency by OPR shall be based on consideration of the criteria in Section 15052 as well as the capacity of the agency to adequately fulfill the requirements of CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21165, Public Resources Code; and California Administrative Code, Title 14, Sections 16000–16041.

Article 5. Preliminary Review of Projects and Conduct of Initial Study

§ 15060. Preliminary Review.

(a) A public agency is allowed 30 days to review for completeness applications for permits or other entitlements for use. While conducting this review for completeness, the agency should be alert for environmental issues that might require preparation of an EIR or that may require additional explanation by the applicant.

(b) Except as provided in Section 15111, the lead agency shall begin the formal environmental evaluation of the project after accepting an application as complete and determining that the project is subject to CEQA. Accepting an application as complete does not limit the authority of the lead agency to require the applicant to submit additional information needed for environmental evaluation of the project.

(c) If the lead agency can determine that an EIR will be clearly required for a project, the agency may skip further initial review of the project and begin work directly on the EIR process described in Article 9, commencing with Section 15080. In the absence of an initial study, the lead agency still focus the EIR on the significant effects of the project and indibriefly its reasons for determining that other effects would not be significant or potentially significant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 65944, Government Code; Section 21080.2, Public Resources Code.

HISTORY

1. Repealer of Article 5 (Sections 15050–15056) and new Article 5 (Sections 15060–15065) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 80, No. 19; 78, No. 5; 76, No. 41; 75, Nos. 1, 5 and 22; and 73, No. 50.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15060.5. Preapplication Consultation.

(a) For a potential project involving the issuance of a lease, permit, license, certificate, or other entitlement for use by one or more public agencies, the lead agency shall, upon the request of a potential applicant and prior to the filing of a formal application, provide for consultation with the potential applicant to consider the range of actions, potential alternatives, mitigation measures, and any potential significant effects on the environment of the potential project.

(b) The lead agency may include in the consultation one or more responsible agencies, trustee agencies, and other public agencies who in the opinion of the lead agency may have an interest in the proposed project. The lead agency may consult the Office of Permit Assistant in the Trade and Commerce Agency for help in identifying interested agencies.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.1, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15061. Review for Exemption.

(a) As part of the preliminary review, a public agency shall determine whether a particular activity is exempt from CEQA.

(b) Possible exemptions from CEQA include:

(1) The activity is not a project as defined in Section 15378.

(2) The project has been granted an exemption by statute (see Article 18, commencing with Section 15260) or by categorical exemption (see Article 19, commencing with Section 15300).

(3) The activity is covered by the general rule that CEQA applies only to projects which have the potential for causing a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA.

(c) Each public agency should include in its implementing procedures a listing of the projects often handled by the agency that the agency has determined to be exempt. This listing should be used in preliminary review.

(d) After determining that a project is exempt, the agency may prepare a notice of exemption as provided in Section 15062. Although the notice may be kept with the project application at this time, the notice shall not be filed with OPR or the county clerk until the project has been approved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(b), 21080.9, 21080.10, 21084, 21108(b) and 21152(b), Public Resources Code; *No Oil, Inc.* v. *City of Los Angeles*, 13 Cal. 3d 68.

HISTORY

1. Amendment of subsection (d) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15062. Notice of Exemption.

(a) When a public agency decides that a project is exempt from CEQA and the public agency approves or determines to carry out the project, the agency may file a notice of exemption. The notice shall be filed, if at all, after approval of the project. Such a notice shall include:

(1) A brief description of the project,

(2) A finding that the project is exempt from CEQA, including a citation to the State Guidelines section or statute under which it is found to be exempt, and

(3) A brief statement of reasons to support the finding.

(b) A notice of exemption may be filled out and may accompany the project application through the approval process. The notice shall not be filed with the county clerk or OPR until the project has been approved.

(c) When a public agency approves an applicant's project, either the agency or the applicant may file a notice of exemption.

(1) When a state agency files this notice, the notice of exemption is filed with OPR. A form for this notice is provided in Appendix E. A list of all such notices shall be posted on a weekly basis at the Office of Planning and Research, 1400 Tenth Street, Sacramento, California. The list shall remain posted for at least 30 days.

(2) When a local agency files this notice, the notice of exemption is filed with the county clerk of each county in which the project will be located. Copies of all such notices will be available for public inspection and such notices shall be posted within 24 hours of receipt in the office of the county clerk. Each notice shall remain posted for a period of 30 days. Thereafter, the clerk shall return the notice to the local agency with a notation of the period it was posted. The local agency shall retain the notice for not less than 9 months.

(3) When an applicant files this notice, special rules apply.

(A) The notice filed by an applicant is filed in the same place as if it were filed by the agency granting the permit. If the permit was granted by a state agency, the notice is filed with OPR. If the permit was granted by a local agency, the notice is filed with the county clerk of the county or counties in which the project will be located.

(B) The notice of exemption filed by an applicant shall contain the information required in subdivision (a) together with a certified document issued by the public agency stating that the agency has found the project to be exempt. The certified document may be a certified copy of an existing document or record of the public agency.

(C) A notice filed by an applicant is subject to the same posting and time requirements as a notice filed by a public agency.

(d) The filing of a Notice of Exemption and the posting on the list of notices start a 35 day statute of limitations period on legal challenges to the agency's decision that the project is exempt from CEQA. If a Notice of Exemption is not filed, a 180 day statute of limitations will apply.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108 and 21152, Public Resources Code.

HISTORY

1. Amendment of subsections (b) and (c) filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).
2. Amendment of subsections (a)(2), (c)(1), (c)(2), (c)(3)(A) and (c)(3)(C) filed 5-27-97; operative 5-27-97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15063. Initial Study.

(a) Following preliminary review, the lead agency shall conduct an initial study to determine if the project may have a significant effect on the environment. If the lead agency can determine that an EIR will clearly be required for the project, an initial study is not required but may still be desirable.

(1) All phases of project planning, implementation, and operation must be considered in the initial study of the project.

(2) To meet the requirements of this section, the lead agency may use an initial study or a similar analysis prepared pursuant to the National Environmental Policy Act.

(b) Results.

(1) If the agency determines that there is substantial evidence that any aspect of the project, either individually or cumulatively, may cause a significant effect on the environment, regardless of whether the overall effect of the project is adverse or beneficial, the lead agency shall do one of the following:

(A) Prepare an EIR or

(B) Use a previously prepared EIR which the lead agency determines would adequately analyze the project at hand, or

(C) Determine, pursuant to a program EIR, tiering, or another appropriate process, which of a project's effects were adequately examined by an earlier EIR or negative declaration. Another appropriate process may include, for example, a master EIR, a master environmental assessment, approval of housing and neighborhood commercial facilities in urban areas as described in section 15181, approval of residential projects pursuant to a specific plan as described in section 15182, approval of residential projects consistent with a community plan, general plan or zoning as described in section 15183, or an environmental document prepared under a State certified regulatory program. The lead agency shall then ascertain which effects, if any, should be analyzed in a later EIR or negative declaration.

(2) The lead agency shall prepare a negative declaration if there is no substantial evidence that the project or any of its aspects may cause a significant effect on the environment.

(c) Purposes. The purposes of an initial study are to:

(1) Provide the lead agency with information to use as the basis for deciding whether to prepare an EIR or negative declaration;

(2) Enable an applicant or lead agency to modify a project, mitigating adverse impacts before an EIR is prepared, thereby enabling the project to qualify for a negative declaration;

(3) Assist the preparation of an EIR, if one is required, by:

(A) Focusing the EIR on the effects determined to be significant.

(B) Identifying the effects determined not to be significant,

(C) Explaining the reasons for determining that potentially significant effects would not be significant, and

(D) Identifying whether a program EIR, tiering, or another appropriate process can be used for analysis of the project's environmental effects.

(4) Facilitate environmental assessment early in the design of a project;

(5) Provide documentation of the factual basis for the finding in a negative declaration that a project will not have a significant effect on the environment;

(6) Eliminate unnecessary EIRs;

(7) Determine whether a previously prepared EIR could be used with the project.

(d) Contents. An initial study shall contain in brief form:

(1) A description of the project including the location of the project;

(2) An identification of the environmental setting;

(3) An identification of environmental effects by use of a checklist, matrix, or other method, provided that entries on a checklist or other form are briefly explained to indicate that there is some evidence to support the entries. The brief explanation may be either through a narrative or a reference to another information source such as an attached map, photographs, or an earlier EIR or negative declaration. A reference to another document should include, where appropriate, a citation to the page or pages where the information is found.

(4) A discussion of ways to mitigate the significant effects identified, if any;

(5) An examination of whether the project would be consistent with existing zoning, plans, and other applicable land use controls;

(6) The name of the person or persons who prepared or participated in the initial study.

(e) Submission of Data. If the project is to be carried out by a private person or private organization, the lead agency may require such person or organization to submit data and information which will enable the lead agency to prepare the initial study. Any person may submit any information in any form to assist a lead agency in preparing an initial study.

(f) Format. Sample forms for an applicant's project description and a review form for use by the lead agency are contained in Appendices H and I. When used together, these forms would meet the requirements for an initial study, provided that the entries on the checklist are briefly explained pursuant to subsection (d)(3). These forms are only suggested, and public agencies are free to devise their own format for an initial study. A previously prepared EIR may also be used as the initial study for a later project.

(g) Consultation. As soon as a lead agency has determined that an initial study will be required for the project, the lead agency shall consult informally with all responsible agencies and all trustee agencies responsible for resources affected by the project to obtain the recommendations of those agencies as to whether an EIR or a negative declaration should

be prepared. During or immediately after preparation of an initial study for a private project, the lead agency may consult with the applicant to determine if the applicant is willing to modify the project to reduce or avoid the significant effects identified in the initial study.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(c), 21080.1, 21080.3, 21082.1, 21100 and 21151, Public Resources Code.

HISTORY

1. Amendment filed 8–19–94; operative 9–19–94 (Register 94, No. 33).

§ 15064. Determining the Significance of the Environmental Effects Caused by a Project.

(a) Determining whether a project may have a significant effect plays a critical role in the CEQA process.

(1) If there is substantial evidence, in light of the whole record before a lead agency, that a project may have a significant effect on the environment, the agency shall prepare a draft EIR.

(2) When a final EIR identifies one or more significant effects, the lead agency and each responsible agency shall make a finding under Section 15091 for each significant effect and may need to make a statement of overriding considerations under Section 15093 for the project.

(b) The determination of whether a project may have a significant effect on the environment calls for careful judgment on the part of the public agency involved, based to the extent possible on scientific and factual data. An ironclad definition of significant effect is not always possible because the significance of an activity may vary with the setting. For example, an activity which may not be significant in an urban area may be significant in a rural area.

(c) In determining whether an effect will be adverse or beneficial, the lead agency shall consider the views held by members of the public in all areas affected as expressed in the whole record before the lead agency. Before requiring the preparation of an EIR, the lead agency must still determine whether environmental change itself might be substantial.

(d) In evaluating the significance of the environmental effect of a project, the lead agency shall consider direct physical changes in the environment which may be caused by the project and reasonably foreseeable indirect physical changes in the environment which may be caused by the project.

(1) A direct physical change in the environment is a physical change in the environment which is caused by and immediately related to the project. Examples of direct physical changes in the environment are the dust, noise, and traffic of heavy equipment that would result from construction of a sewage treatment plant and possible odors from operation of the plant.

(2) An indirect physical change in the environment is a physical change in the environment which is not immediately related to the project, but which is caused indirectly by the project. If a direct physical change in the environment in turn causes another change in the environment, then the other change is an indirect physical change in the environment. For example, the construction of a new sewage treatment plant may facilitate population growth in the service area due to the increase in sewage treatment capacity and may lead to an increase in air pollution.

(3) An indirect physical change is to be considered only if that change is a reasonably foreseeable impact which may be caused by the project. A change which is speculative or unlikely to occur is not reasonably foreseeable.

(e) Some examples of physical changes which may be deemed to be a significant effect on the environment are contained in Appendix G.

(f) Economic and social changes resulting from a project shall not be treated as significant effects on the environment. Economic or social changes may be used, however, to determine that a physical change shall be regarded as a significant effect on the environment. Where a physical change is caused by economic or social effects of a project, the physical change may be regarded as a significant effect in the same manner as any other physical change resulting from the project. Alternatively, economic and social effects of a physical change may be used to determine that the physical change is a significant effect on the environment. If the physical change causes adverse economic or social effects on people, those adverse effects may be used as a factor in determining whether the physical change is significant. For example, if a project would cause overcrowding of a public facility and the overcrowding causes an adverse effect on people, the overcrowding would be regarded as a significant effect.

(g) The decision as to whether a project may have one or more significant effects shall be based on substantial evidence in the record of the lead agency.

(1) If the lead agency determines there is substantial evidence in the record that the project may have a significant effect on the environment, the lead agency shall prepare an EIR (*Friends of B Street* v. *City of Hayward* (1980) 106 Cal. App. 3d 988). Said another way, if a lead agency is presented with a fair argument that a project may have a significant effect on the environment, the lead agency shall prepare an EIR even though it may also be presented with other substantial evidence that the project will not have a significant effect (*No Oil, Inc.* v. *City of Los Angeles* (1974) 13 Cal. 3d 68).

(2) If the lead agency determines there is substantial evidence in the record that the project may have a significant effect on the environment but the lead agency determines that revisions in the project plans or proposals made by, or agreed to by, the applicant would avoid the effects or mitigate the effects to a point where clearly no significant effect on the environment would occur and there is no substantial evidence in light of the whole record before the public agency that the project, as revised, may have a significant effect on the environment then a mitigated negative declaration shall be prepared.

(3) If the lead agency determines there is no substantial evidence that the project may have a significant effect on the environment, the lead agency shall prepare a negative declaration (*Friends of B Street* v. *City of Hayward* (1980) 106 Cal. App. 3d 988).

(4) The existence of public controversy over the environment effects of a project will not require preparation of an EIR if there is no substantial evidence before the agency that the project may have a significant effect on the environment.

(5) Argument, speculation, unsubstantiated opinion or narrative, or evidence that is clearly inaccurate or erroneous, or evidence that is not credible, shall not constitute substantial evidence. Substantial evidence shall include facts, reasonable assumptions predicated upon facts, and expert opinion support by facts.

(6) Evidence of economic and social impacts that do not contribute to or are not caused by physical changes in the environment is not substantial evidence that the project may have a significant effect on the environment.

(h) After application of the principles set forth above in Section 15064(g), and in marginal cases where it is not clear whether there is substantial evidence that a project may have a significant effect on the environment, the lead agency shall be guided by the following principle: If there is disagreement among expert opinion supported by facts over the significance of an effect on the environment, the Lead Agency shall treat the effect as significant and shall prepare an EIR.

(i) If an air emission or water discharge meets the existing standard for a particular pollutant, the lead agency may presume that the emission or discharge of the pollutant will not be a significant effect on the environment. If other information is presented suggesting that the emission or discharge may cause a significant effect, the lead agency shall evaluate the effect and decide whether it may be significant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21065, 21068, 21080, 21082, 21082.1, 21082.2, 21083 and 21100, Public Resources Code; *No Oil, Inc.* v. *City of Los Angeles* (1974) 13 Cal.3d 68.

HISTORY

1. Amendment of section heading, section and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15065. Mandatory Findings of Significance.

A lead agency shall find that a project may have a significant effect on the environment and thereby require an EIR to be prepared for the project where any of the following conditions occur:

(a) The project has the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of an endangered, rare or threatened species, or eliminate important examples of the major periods of California history or prehistory.

(b) The project has the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals.

(c) The project has possible environmental effects which are individually limited but cumulatively considerable. As used in the subsection, "cumulatively considerable" means that the incremental effects of an individual project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.

(d) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21001(c) and 21083, Public Resources Code.

HISTORY

1. Amendment of subsection (a) and NOTE filed 5-27-97; operative 5-27-97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

Article 6. Negative Declaration Process

§ 15070. Decision to Prepare a Negative or Mitigated Negative Declaration.

A public agency shall prepare or have prepared a proposed negative declaration or mitigated negative declaration for a project subject to CEQA when:

(a) The initial study shows that there is no substantial evidence, in light of the whole record before the agency, that the project may have a significant effect on the environment, or

(b) The initial study identifies potentially significant effects, but:

(1) Revisions in the project plans or proposals made by or agreed to by the applicant before a proposed mitigated negative declaration and initial study are released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur, and

(2) There is no substantial evidence, in light of the whole record before the agency, that the project as revised may have a significant effect on the environment.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21064, 21064.5, 21080(c) and 21082.1, Public Resources Code; *Friends of B Street v. City of Hayward*, (1980) 106 Cal. App. 3d 988; *Running Fence Corp. v. Superior Court*, (1975) 51 Cal. App. 3d 400.

HISTORY

1. Repealer of Article 6 (Sections 15060-15069.8) and new Article 6 (Sections 15070-15075) filed 7-13-83; designated effective 8-1-83 (Register 83, No. 29). For prior history, see Registers 80, No. 19; 78, No. 5; 76, No. 41; 75, No. 1; and 73, No. 50).
2. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).
3. Amendment of section heading, section and NOTE filed 5-27-97; operative 5-27-97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15071. Contents.

A negative declaration circulated for public review shall include:

(a) A brief description of the project, including a commonly used name for the project, if any;

(b) The location of the project, preferably shown on a map, and the name of the project proponent;

(c) A proposed finding that the project will not have a significant effect on the environment;

(d) An attached copy of the initial study documenting reasons to support the finding; and

(e) Mitigation measures, if any, included in the project to avoid potentially significant effects.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(c), Public Resources Code.

§ 15072. Notice of Intent to Adopt a Negative Declaration or Mitigated Negative Declaration.

(a) A lead agency shall provide a notice of intent to adopt a negative declaration or mitigated negative declaration to the public, responsible agencies, trustee agencies, and the county clerk of each county within which the proposed project is located, sufficiently prior to adoption by the lead agency of the negative declaration or mitigated negative declaration to allow the public and agencies the review period provided under Section 15105.

(b) The lead agency shall mail a notice of intent to adopt a negative declaration or mitigated negative declaration to the last known name and address of all organizations and individuals who have previously requested such notice in writing and shall also give notice of intent to adopt a negative declaration or mitigated negative declaration by at least one of the following procedures to allow the public the review period provided under Section 15105:

(1) Publication at least one time by the lead agency in a newspaper of general circulation in the area affected by the proposed project. If more than one area is affected, the notice shall be published in the newspaper of largest circulation from among the newspapers of general circulation in those areas.

(2) Posting of notice by the lead agency on and off site in the area where the project is to be located.

(3) Direct mailing to the owners and occupants of property contiguous to the project. Owners of such property shall be identified as shown on the latest equalized assessment roll.

(c) The alternatives for providing notice specified in subsection (b) shall not preclude a lead agency from providing additional notice by other means if the agency so desires, nor shall the requirements of this section preclude a lead agency from providing the public notice at the same time and in the same manner as public notice required by any other laws for the project.

(d) The county clerk of each county within which the proposed project is located shall post such notices in the office of the county clerk within 24 hours of receipt for a period of at least 20 days.

(e) For a project of statewide, regional, or areawide significance, the lead agency shall also provide notice to transportation planning agencies and public agencies which have transportation facilities within their jurisdictions which could be affected by the project as specified in Section 21092.4(a) of the Public Resources Code. "Transportation facilities" includes: major local arterials and public transit within five miles of the project site and freeways, highways and rail transit service within 10 miles of the project site.

(f) A notice of intent to adopt a negative declaration or mitigated negative declaration shall specify the following:

(1) A brief description of the proposed project and its location.

(2) The starting and ending dates for the review period during which the lead agency will receive comments on the proposed negative declaration or mitigated negative declaration. This shall include starting and ending dates for the review period. If the review period has been is shortened pursuant to Section 15105, the notice shall include a statement to that effect.

(3) The date, time, and place of any scheduled public meetings or hearings to be held by the lead agency on the proposed project, when known to the lead agency at the time of notice.

(4) The address or addresses where copies of the proposed negative declaration or mitigated negative declaration including the revisions de-

veloped under Section 15070(b) and all documents referenced in the proposed negative declaration or mitigated negative declaration are available for review. This location or locations shall be readily accessible to the public during the lead agency's normal working hours.

(5) The presence of the site on any of the lists enumerated under Section 65962.5 of the Government Code including, but not limited to lists of hazardous waste facilities, land designated as hazardous waste property, and hazardous waste disposal sites, and the information in the Hazardous Waste and Substances Statement required under subsection (f) of that section.

(6) Other information specifically required by statute or regulation for a particular project or type of project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21091, 21092, 21092.2, 21092.4, 21092.3, 21092.6 and 21151.8, Public Resources Code.

HISTORY

1. Amendment of subsections (a), (a)(3) and NOTE filed 8–19–94; operative 9–19–94 (Register 94, No. 33).
2. Amendment of section heading, section and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15073. Public Review of a Proposed Negative Declaration or Mitigated Negative Declaration.

(a) The lead agency shall provide a public review period pursuant to Section 15105 of not less than 20 days. When a proposed negative declaration or mitigated negative declaration and initial study are submitted to the State Clearinghouse for review by state agencies, the public review period shall not be less than 30 days, unless a shorter period is approved by the State Clearinghouse under Section 15105(d).

(b) When a proposed negative declaration or mitigated negative declaration and initial study have been submitted to the State Clearinghouse for review by state agencies, the public review period shall be at least as ng as the review period established by the State Clearinghouse.

(c) A copy of the proposed negative declaration or mitigated negative declaration and the initial study shall be attached to the notice of intent to adopt the proposed declaration that is sent to every responsible agency and trustee agency concerned with the project and every other public agency with jurisdiction by law over resources affected by the project.

(d) Where one or more state agencies will be a responsible agency or a trustee agency or will exercise jurisdiction by law over natural resources affected by the project, or where the project is of statewide, regional, or areawide environmental significance, the lead agency shall send copies of the proposed negative declaration or mitigated negative declaration to the State Clearinghouse for distribution to the state agencies.

(e) The lead agency shall notify in writing any public agency which comments on a proposed negative declaration or mitigated negative declaration of any public hearing to be held for the project for which the document was prepared. A notice provided to a public agency pursuant to Section 15072 satisfies this requirement.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000(e), 21003(b), 21080(c), 21081.6, 21091 and 21092.5, Public Resources Code; *Plaggmier* v. *City of San Jose*, (1980) 101 Cal. App. 3d 842.

HISTORY

1. Amendment of section heading, section and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15074. Consideration and Adoption of a Negative Declaration or Mitigated Negative Declaration.

(a) Any advisory body of a public agency making a recommendation to the decisionmaking body shall consider the proposed negative declaration or mitigated negative declaration before making its recommenda- n.

(b) Prior to approving a project, the decisionmaking body of the lead ency shall consider the proposed negative declaration or mitigated negative declaration together with any comments received during the public review process. The decisionmaking body shall adopt the proposed negative declaration or mitigated negative declaration only if it finds on the basis of the whole record before it (including the initial study and any comments received), that there is no substantial evidence that the project will have a significant effect on the environment and that the negative declaration or mitigated negative declaration reflects the lead agency's independent judgment and analysis.

(c) When adopting a negative declaration or mitigated negative declaration, the lead agency shall specify the location and custodian of the documents or other material which constitute the record of proceedings upon which its decision is based.

(d) When adopting a mitigated negative declaration, the lead agency shall also adopt a program for reporting on or monitoring the changes which it has either required in the project or made a condition of approval to mitigate or avoid significant environmental effects.

(e) A lead agency shall not adopt a negative declaration or mitigated negative declaration for a project within the boundaries of a comprehensive airport land use plan or, if a comprehensive airport land use plan has not been adopted, for a project within two nautical miles of a public airport or public use airport, without first considering whether the project will result in a safety hazard or noise problem for persons using the airport or for persons residing or working in the project area.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(c), 21081.6, 21082.1 and 21096, Public Resources Code; *Friends of B Street* v. *City of Hayward*, (1980) 106 Cal. App. 3d 988.

HISTORY

1. Amendment of section heading, section and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15074.1. Substitution of Mitigation Measures in a Proposed Mitigated Negative Declaration.

(a) As a result of the public review process for a proposed mitigated negative declaration, including any administrative decisions or public hearings conducted on the project prior to its approval, the lead agency may conclude that certain mitigation measures identified in the mitigated negative declaration are infeasible or otherwise undesirable. Prior to approving the project, the lead agency may, in accordance with this section, delete those mitigation measures and substitute for them other measures which the lead agency determines are equivalent or more effective.

(b) Prior to deleting and substituting for a mitigation measure, the lead agency shall do both of the following:

(1) Hold a public hearing on the matter. Where a public hearing is to be held in order to consider the project, the public hearing required by this section may be combined with that hearing. Where no public hearing would otherwise be held to consider the project, then a public hearing shall be required before a mitigation measure may be deleted and a new measure adopted in its place.

(2) Adopt a written finding that the new measure is equivalent or more effective in mitigating or avoiding potential significant effects and that it in itself will not cause any potentially significant effect on the environment.

(c) No recirculation of the proposed mitigated negative declaration pursuant to Section 15072 is required where the new mitigation measures are made conditions of, or are otherwise incorporated into, project approval in accordance with this section.

(d) "Equivalent or more effective" means that the new measure will avoid or reduce the significant effect to at least the same degree as, or to a greater degree than, the original measure and will create no more adverse effect of its own than would have the original measure.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(f), Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15075. Notice of Determination on a Project for Which a Proposed Negative or Mitigated Negative Declaration Has Been Approved.

(a) After deciding to carry out or approve a project for which a negative declaration or mitigated negative declaration has been approved, the lead agency shall file a notice of determination. For projects with phases, the lead agency shall file a notice of determination after deciding to carry out or approve each phase.

(b) The notice of determination must include:

(1) An identification of the project including its common name where possible, and its location.

(2) A brief description of the project.

(3) The date on which the agency approved the project.

(4) The determination of the agency that the project will not have a significant effect on the environment.

(5) A statement that a negative declaration or a mitigated negative declaration has been prepared pursuant to the provisions of CEQA.

(6) The address where a copy of the negative declaration or mitigated negative declaration may be examined.

(c) If the lead agency is a state agency, the lead agency shall file the notice of determination with OPR.

(d) If the lead agency is a local agency, the local agency shall file the notice of determination with the county clerk of the county or counties in which the project will be located within five working days after approval of the project by the lead agency. If the project requires a discretionary approval from any state agency, the local lead agency shall also file with OPR.

(e) All notices filed pursuant to this section shall be available for public inspection and shall be posted by the county clerk within 24 hours of receipt. Each notice shall remain posted for a period of at least 30 days. Thereafter, the clerk shall return the notice to the local lead agency with a notation of the period it was posted. The local lead agency shall retain the notice for not less than 9 months. The filing of the notice of determination and the posting on a list of such notices starts a 30–day statute of limitations on court challenges to the approval under CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(c), 21108(a) and (c), 21152(a) and (c) and 21167(b), Public Resources Code; *Citizens of Lake Murray Area Association* v. *City Council*, (1982) 129 Cal. App. 3d 436.

HISTORY

1. Amendment of subsections (c) and (d) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).
2. Amendment of section heading and section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

Article 6.5. Statutory Exemptions

HISTORY

1. Repealer of Article 6.5 (Sections 15070–15079.7) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Register 78, No. 5.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

Article 7. EIR Process

§ 15080. General.

To the extent possible, the EIR process should be combined with the existing planning, review, and project approval process used by each public agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061, 21100 and 21151, Public Resources Code.

HISTORY

1. Repealer of Article 7 (Sections 15080–15089) and new Article 7 (Sections 15080–15096) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 82, No. 2; 80, No. 19; 78, No. 5; 77, No. 1; 76, No. 41; 75, No. 1; and 73, No. 50.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15081. Decision to Prepare an EIR.

The EIR process starts with the decision to prepare an EIR. This decision will be made either during preliminary review under Section 15060 or at the conclusion of an initial study after applying the standards described in Section 15064.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code; *No Oil, Inc. v. City of Los Angeles* (1974) 13 Cal. 3d 68; *Friends of B Street* v. *City of Hayward* (1980) 106 Cal. App. 3d 988.

§ 15081.5. EIRs Required by Statute.

(a) A lead agency shall prepare or have prepared an EIR for the following types of projects. An initial study may be prepared to help identify the significant effects of the project.

(1) The burning of municipal wastes, hazardous wastes, or refuse–derived fuel, including but not limited to tires, if the project is either:

(A) The construction of a new facility; or

(B) The expansion of an existing facility that burns hazardous waste that would increase its permitted capacity by more than 10 percent. This does not apply to any project exclusively burning hazardous waste for which a determination to prepare a negative declaration, or mitigated negative declaration or environmental impact report was made prior to July 14, 1989. The amount of expansion of an existing facility is calculated pursuant to subdivision (b) of Section 21151.1 of the Public Resources Code.

(C) Subsection (1) of the subdivision does not apply to:

1. Projects for which the State Energy Resources Conservation and Development Commission has assumed jurisdiction pursuant to Chapter 6 (commencing with Section 25500) of Division 15 of the Public Resources Code.

2. Any of the types of burn or thermal processing projects listed in subdivision (d) of Section 21151.1 of the Public Resources Code.

(2) The initial issuance of a hazardous waste facilities permit to a land disposal facility, as defined in subdivision (d) of Section 25199.1 of the Health and Safety Code. Preparation of an EIR is not mandatory if the facility only manages hazardous waste which is identified or listed pursuant to Section 25140 or Section 25141 of the Health and Safety Code on or after January 1, 1992; or only conducts activities which are regulated pursuant to Chapter 6.5 (commencing with Section 25100) of Division 20 of the Health and Safety Code on or after January 1, 1992. "Initial issuance" does not include the issuance of a closure or postclosure permit pursuant to Chapter 6.5 (commencing with Section 25100) of Division 20 of the Health and Safety Code.

(3) The initial issuance of a hazardous waste facility permit pursuant to Section 25200 of the Health and Safety Code to an off–site large treatment facility, as defined pursuant to subdivision (d) of Section 25205.1 of that code. Preparation of an EIR is not mandatory if the facility only manges hazardous waste which is identified or listed pursuant to Section 25140 or Section 25141 of the Health and Safety Code on or after January 1, 1992; or only conducts activities which are regulated pursuant to Chapter 6.5 (commencing with Section 25100) of Division 20 of the Health and Safety Code on or after January 1, 1992. "Initial issuance" does not include the issuance of a closure or postclosure permit pursuant to Chapter 6.5 (commencing with Section 25100) of Division 20 of the Health and Safety Code.

(4) Any open pit mining operation which is subject to the permit requirements of the Surface Mining and Reclamation Act (beginning at Section 2710 of the Public Resources Code) and which utilizes a cyanide heap–leaching process for the purpose of extracting gold or other precious metals.

(5) An initial base reuse plan as defined in Section 15229.

(b) A lead agency shall prepare or have prepared an EIR for the selection of a California Community College, California State University,

University of California, or California Maritime Academy campus location and approval of a long range development plan for that campus.

(1) The EIR for a long range development plan for a campus shall include an analysis of, among other significant impacts, those environmental effects relating to changes in enrollment levels.

(2) Subsequent projects within the campus may be addressed in environmental analyses tiered on the EIR prepared for the long range development plan.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.09, 21083.8, 21083.8.1, 21151.1 and 21151.7, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15082. Determination of Scope of EIR.

(a) Notice of Preparation. Immediately after deciding that an environmental impact report is required for a project, the lead agency shall send to each responsible agency a notice of preparation stating that an environmental impact report will be prepared. This notice shall also be sent to every federal agency involved in approving or funding the project and to each trustee agency responsible for natural resources affected by the project.

(1) The notice of preparation shall provide the responsible agencies with sufficient information describing the project and the potential environmental effects to enable the responsible agencies to make a meaningful response. At a minimum, the information shall include:

(A) Description of the project,

(B) Location of the project indicated either on an attached map (preferably a copy of a U.S.G.S. 15′ or 7 1/2′ topographical map identified by quadrangle name, or by a street address in an urbanized area), and

(C) Probable environmental effects of the project.

(2) A sample for a notice of preparation is shown in Appendix J. Public agencies are free to devise their own formats for this notice. A copy of the initial study may be sent with the notice to supply the necessary information.

(3) To send copies of the notice of preparation, the lead agency shall use either certified mail or any other method of transmittal which provides it with a record that the notice was received.

(4) The lead agency may begin work on the draft EIR immediately without awaiting responses to the notice of preparation. The draft EIR in preparation may need to be revised or expanded to conform to responses to the notice of preparation. A lead agency shall not circulate a draft EIR for public review before the time period for responses to the notice of preparation has expired.

(b) Response to Notice of Preparation. Within 30 days after receiving the notice of preparation under subsection (a), each responsible agency shall provide the lead agency with specific detail about the scope and content of the environmental information related to the responsible agency's area of statutory responsibility which must be included in the draft EIR.

(1) The response at a minimum shall identify:

(A) The significant environmental issues and reasonable alternatives and mitigation measures which the responsible agency will need to have explored in the draft EIR; and

(B) Whether the agency will be a responsible agency or trustee agency for the project.

(2) If a responsible agency fails by the end of the 30 day period to provide the lead agency with either a response to the notice or a well justified request for additional time, the lead agency may presume that the responsible agency has no response to make.

(3) A generalized list of concerns not related to the specific project shall not meet the requirements of this section for a response.

(c) Meetings. In order to expedite the consultation, the lead agency, a responsible agency, a trustee agency, or a project applicant may request one or more meetings between representatives of the agencies involved to assist the lead agency in determining the scope and content of the environmental information which the responsible agency may require. Such meetings shall be convened by the lead agency as soon as possible, but no later than 30 days, after the meetings were requested. On request, the Office of Planning and Research will assist in convening meetings which involve state agencies.

(d) State Clearinghouse. When one or more state agencies will be a responsible agency or a trustee agency, the lead agency shall send a notice of preparation to each state responsible agency and each trustee agency with a copy to the State Clearinghouse in the Office of Planning and Research. The State Clearinghouse will ensure that the state responsible agencies and trustees reply to the lead agency within the required time.

(e) Identification Number. When the notice of preparation is submitted to the State Clearinghouse, the state identification number issued by the Clearinghouse shall be the identification number for all subsequent environmental documents on the project. The identification number should be referenced on all subsequent correspondence regarding the project, specifically on the title page of the draft and final EIR and on the notice of determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

HISTORY

1. Amendment of subsection (b) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15083. Early Public Consultation.

Prior to completing the draft EIR, the lead agency may also consult directly with any person or organization it believes will be concerned with the environmental effects of the project. Many public agencies have found that early consultation solves many potential problems that would arise in more serious forms later in the review process. This early consultation may be called scoping. Scoping will be necessary when preparing an EIR/EIS jointly with a federal agency.

(a) Scoping has been helpful to agencies in identifying the range of actions, alternatives, mitigation measures, and significant effects to be analyzed in depth in an EIR and in eliminating from detailed study issues found not to be important.

(b) Scoping has been found to be an effective way to bring together and resolve the concerns of affected federal, state, and local agencies, the proponent of the action, and other interested persons including those who might not be in accord with the action on environmental grounds.

(c) Where scoping is used, it should be combined to the extent possible with consultation under Section 15082.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21082.1, Public Resources Code; Section 4, Chapter 480 of the Statutes of 1981; 40 Code of Federal Regulations, Part 1501.7.

§ 15083.5. City or County Consultation with Water Agencies.

This guideline addresses consultation between a city or county and affected water agencies at the notice of preparation stage of environmental review.

(a) This guideline shall apply only to projects which meet all of the following criteria:

(1) The project consists of any of the following activities for which an application has been submitted to a city or county:

(A) A residential development of more than 500 dwelling units.

(B) A shopping center or business establishment that will employ more than 1,000 persons or have more than 500,000 square feet of floor space.

(C) A commercial office building that will employ more than 1,000 persons or have more than 250,000 square feet of floor space.

(D) A hotel, motel or both with more than 500 rooms.

(E) An industrial, manufacturing, or processing plant, or industrial park intended to house more than 1,000 persons, occupying more than 40 acres of land, or having more than 650,000 square feet of floor area.

(F) Any mixed–use project that would demand an amount of water equal to, or greater than, the amount of water needed to serve a 500–dwelling unit project.

(2) As part of approval of the project, any of the following are required:

(A) An amendment to, or revision of, the land use element of a general plan or a specific plan, which would result in a net increase in the stated population density or building intensity to provide for additional development.

(B) The adoption of a specific plan, unless the city or county has previously complied with this section for the project.

Notwithstanding the foregoing provisions of this subsection (a)(2), when a project is identified in connection with the revision of any part of a general plan, that project is subject to the requirements of this section only if the project results in a net increase in the stated population density or building intensity, and if the city or county has not previously complied with the requirements of this section for the project in question.

(3) A city or county has determined that an environmental impact report is required in connection with the project.

(b) For projects subject to this guideline, a city or county shall identify any water system that is, or may become, a public water system, as defined in Section 10912 of the Water Code, that may supply water for the project. When a city or county releases a notice of preparation for review, it shall send a copy of the notice to each public water system which serves or would serve the proposed project and request that the system both indicate whether the projected water demand associated with the proposed project was included in its last urban water management plan and assess whether its total projected water supplies available during normal, single–dry, and multiple–dry water years as included in the 20–year projection contained in its urban water management plan will meet the projected water demand associated with the proposed project, in addition to the system's existing and planned future uses.

(c) The governing body of a public water system shall approve and submit its water supply assessment to the city or county not later than 30 days after the date on which the request and notice of preparation were received. If the public water system fails to submit its assessment within the allotted time, the lead agency may assume, unless there has been a request for a specific extension of time from the public water system, that the public water system has no information to submit. If a public water system concludes there would be insufficient water to serve the proposed project, it shall provide the city or county with its plans for acquiring additional water supplies.

(d) The lead agency shall include within the EIR the public water system's assessment and any other information provided by the water agency, up to a maximum of ten typewritten pages. The assessment and information may only exceed that length with the approval of the lead agency. The lead agency may independently evaluate the water system's information and shall determine, based on the entire record, whether projected water supplies will be sufficient to satisfy the demands of the proposed project, in addition to existing and planned future uses. If the lead agency determines that water supplies will not be sufficient, the lead agency must include that determination in its findings for the project pursuant to Sections 15091 and 15093.

(e) For purposes of this section, "public water system" means a system as defined in Section 10912 of the Water Code with 3,000 or more service connections.

(f) This section does not apply to the County of San Diego and the cities in the county as provided in Section 10915 of the Water Code.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21151.9, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15084. Preparing the Draft EIR.

(a) The draft EIR shall be prepared directly by or under contract to the lead agency. The required contents of a draft EIR are discussed in Article 9 beginning with Section 15120.

(b) The lead agency may require the project applicant to supply data and information both to determine whether the project may have a significant effect on the environment and to assist the lead agency in preparing the draft EIR. The requested information should include an identification of other public agencies which will have jurisdiction by law over the project.

(c) Any person, including the applicant, may submit information or comments to the lead agency to assist in the preparation of the draft EIR. The submittal may be presented in any format, including the form of a draft EIR. The lead agency must consider all information and comments received. The information or comments may be included in the draft EIR in whole or in part.

(d) The lead agency may choose one of the following arrangements or a combination of them for preparing a draft EIR.

(1) Preparing the draft EIR directly with its own staff.

(2) Contracting with another entity, public or private, to prepare the draft EIR.

(3) Accepting a draft prepared by the applicant, a consultant retained by the applicant, or any other person.

(4) Executing a third party contract or memorandum of understanding with the applicant to govern the preparation of a draft EIR by an independent contractor.

(5) Using a previously prepared EIR.

(e) Before using a draft prepared by another person, the lead agency shall subject the draft to the agency's own review and analysis. The draft EIR which is sent out for public review must reflect the independent judgment of the lead agency. The lead agency is responsible for the adequacy and objectivity of the draft EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21082.1, Public Resources Code.

§ 15085. Notice of Completion.

(a) As soon as the draft EIR is completed, a notice of completion must be filed with OPR.

(b) The notice of completion shall include:

(1) A brief description of the project,

(2) The proposed location of the project,

(3) An address where copies of the draft EIR are available, and

(4) The period during which comments will be received on the draft EIR.

(c) A form for the notice of completion is included in the appendices.

(d) Where the EIR will be reviewed through the state review process handled by the State Clearinghouse, the cover form required by the State Clearinghouse will serve as the notice of completion.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21161, Public Resources Code.

HISTORY

1. Amendment of subsections (a) and (d) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15086. Consultation Concerning Draft EIR.

(a) The lead agency shall consult with and request comments on the draft EIR from:

(1) Responsible agencies,

(2) Trustee agencies with resources affected by the project, and

(3) Other state, federal, and local agencies which exercise authority over resources which may be affected by the project.

(b) The lead agency may consult directly with any person who has special expertise with respect to any environmental impact involved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code.

§ 15087. Public Review of Draft EIR.

(a) The lead agency shall provide public notice of the availability of a draft EIR at the same time as it sends a notice of completion to OPR. This notice shall be given as provided under Section 15105. Notice shall be mailed to the last known name and address of all organizations and individuals who have previously requested such notice in writing, and shall also be given by at least one of the following procedures:

(1) Publication at least one time by the public agency in a newspaper of general circulation in the area affected by the proposed project. If more than one area is affected, the notice shall be published in the newspaper

of largest circulation from among the newspapers of general circulation in those areas.

(2) Posting of notice by the public agency on and off the site in the area where the project is to be located.

(3) Direct mailing to the owners and occupants of property contiguous to the parcel or parcels on which the project is located. Owners of such property shall be identified as shown on the latest equalized assessment roll.

(b) The alternatives for providing notice specified in subsection (a) shall not preclude a public agency from providing additional notice by other means if such agency so desires, nor shall the requirements of this section preclude a public agency from providing the public notice required by this section at the same time and in the same manner as public notice otherwise required by law for the project.

(c) The notice shall disclose the following:

(1) A brief description of the proposed project and its location.

(2) The starting and ending dates for the review period during which the lead agency will receive comments. If the review period is shortened, the notice shall disclose that fact.

(3) The date, time, and place of any scheduled public meetings or hearings to be held by the lead agency on the proposed project when known to the lead agency at the time of notice.

(4) A list of the significant environmental effects anticipated as a result of the project, to the extent which such effects are known to the lead agency at the time of the notice.

(5) The address where copies of the EIR and all documents referenced in the EIR will be available for public review. This location shall be readily accessible to the public during the lead agency's normal working hours.

(6) The presence of the site on any of the lists of sites enumerated under Section 65962.5 of the Government Code including, but not limited to lists of hazardous waste facilities, land designated as hazardous waste property, hazardous waste disposal sites and others, and the information required by the Hazardous Waste and Substances Statement required under subsection (f) of that Section.

(d) The notice required under this section shall be posted in the office of the county clerk of each county in which the project will be located for a period of at least 30 days. The county clerk shall post such notices within 24 hours of receipt.

(e) In order to provide sufficient time for public review, the review period for a draft EIR shall be as provided in Section 15105. The review period shall be combined with the consultation required under Section 15086. When a draft EIR has been submitted to the State Clearinghouse, the public review period shall be at least as long as the review period established by the Clearinghouse.

(f) Public agencies shall use the State Clearinghouse to distribute draft EIRs to state agencies for review and should use areawide clearinghouses to distribute the documents to regional and local agencies.

(g) To make copies of EIRs available to the public, lead agencies should furnish copies of draft EIRs to public library systems serving the area involved. Copies should also be available in offices of the lead agency.

(h) Public agencies should compile listings of other agencies, particularly local agencies, which have jurisdiction by law and/or special expertise with respect to various projects and project locations. Such listings should be a guide in determining which agencies should be consulted with regard to a particular project.

(i) Public hearings may be conducted on the environmental documents, either in separate proceedings or in conjunction with other proceedings of the public agency. Public hearings are encouraged, but not required as an element of the CEQA process.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21091, 21092, 21092.2, 21092.3, 21092.6, 21104, 21153 and 21161, Public Resources Code.

HISTORY

1. Amendment of subsection (a) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).
2. Amendment of subsection (a)(3) and NOTE filed 8–19–94; operative 9–19–94 (Register 94, No. 33).
3. Amendment of section and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15088. Evaluation of and Response to Comments.

(a) The lead agency shall evaluate comments on environmental issues received from persons who reviewed the draft EIR and shall prepare a written response. The lead agency shall respond to comments received during the noticed comment period and any extensions and may respond to late comments.

(b) The written response shall describe the disposition of significant environmental issues raised (e.g., revisions to the proposed project to mitigate anticipated impacts or objections). In particular, the major environmental issues raised when the lead agency's position is at variance with recommendations and objections raised in the comments must be addressed in detail giving reasons why specific comments and suggestions were not accepted. There must be good faith, reasoned analysis in response. Conclusory statements unsupported by factual information will not suffice.

(c) The response to comments may take the form of a revision to the draft EIR or may be a separate section in the final EIR. Where the response to comments makes important changes in the information contained in the text of the draft EIR, the lead agency should either:

(1) Revise the text in the body of the EIR, or

(2) Include marginal notes showing that the information is revised in the response to comments.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code; *People* v. *County of Kern*, (1974) 39 Cal. App. 3d 830; *Cleary* v. *County of Stanislaus*, (1981) 118 Cal. App. 3d 348.

§ 15088.5. Recirculation of an EIR Prior to Certification.

(a) A lead agency is required to recirculate an EIR when significant new information is added to the EIR after public notice is given of the availability of the draft EIR for public review under Section 15087 but before certification. As used in this section, the term "information" can include changes in the project or environmental setting as well as additional data or other information. New information added to an EIR is not "significant" unless the EIR is changed in a way that deprives the public of a meaningful opportunity to comment upon a substantial adverse environmental effect of the project or a feasible way to mitigate or avoid such an effect (including a feasible project alternative) that the project's proponents have declined to implement. "Significant new information" requiring recirculation include, for example, a disclosure showing that:

(1) A new significant environmental impact would result from the project or from a new mitigation measure proposed to be implemented.

(2) A substantial increase in the severity of an environmental impact would result unless mitigation measures are adopted that reduce the impact to a level of insignificance.

(3) A feasible project alternative or mitigation measure considerably different from others previously analyzed would clearly lessen the significant environmental impacts of the project, but the project's proponents decline to adopt it.

(4) The draft EIR was so fundamentally and basically inadequate and conclusory in nature that meaningful public review and comment were precluded. (*Mountain Lion Coalition* v. *Fish & Game Com.* (1989) 214 Cal.App.3d 1043).

(b) Recirculation is not required where the new information added to the EIR merely clarifies or amplifies or makes insignificant modifications in an adequate EIR.

(c) If the revision is limited to a few chapters or portions of the EIR, the lead agency need only recirculate the chapters or portions that have been modified.

(d) Recirculation of an EIR requires notice pursuant to Section 15087, and consultation pursuant to Section 15086.

(e) A decision not to recirculate an EIR must be supported by substantial evidence in the administrative record.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21092.1, Public Resources Code; *Laurel Heights Improvement Association v. Regents of the University of California* (1993) 6 Cal. 4th 1112.

HISTORY

1. New section filed 8–19–94; operative 9–19–94 (Register 94, No. 33).

§ 15089. Preparation of Final EIR.

(a) The lead agency shall prepare a final EIR before approving the project. The contents of a final EIR are specified in Section 15132 of these guidelines.

(b) Lead agencies may provide an opportunity for review of the final EIR by the public or by commenting agencies before approving the project. The review of a final EIR should focus on the responses to comments on the draft EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100, 21105 and 21151, Public Resources Code; *City of Carmel–by–the–Sea* v. *Board of Supervisors*, (1977) 71 Cal. App. 3d 84; State Administrative Manual, Section 1060.

§ 15090. Certification of the Final EIR.

(a) Prior to approving a project the lead agency shall certify that:

(1) The final EIR has been completed in compliance with CEQA;

(2) The final EIR was presented to the decisionmaking body of the lead agency and that the decisionmaking body reviewed and considered the information contained in the final EIR prior to approving the project; and

(3) The final EIR reflects the lead agency's independent judgment and analysis.

(b) When an EIR is certified by a non–elected decision–making body within a local lead agency, that certification may be appealed to the local lead agency's elected decision–making body, if one exists. For example, certification of an EIR for a tentative subdivision map by a city's planning commission may be appealed to the city council. Each local lead agency shall provide for such appeals.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082.1, 21100 and 21151, Public Resources Code; *City of Carmel–by–the–Sea* v. *Board of Supervisors* (1977) 71 Cal. App. 3d 84; *Kleist* v. *City of Glendale* (1976) 56 Cal. App. 3d 770.

HISTORY

1. Amendment of section heading, section and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15091. Findings.

(a) No public agency shall approve or carry out a project for which an EIR has been certified which identifies one or more significant environmental effects of the project unless the public agency makes one or more written findings for each of those significant effects, accompanied by a brief explanation of the rationale for each finding. The possible findings are:

(1) Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.

(2) Such changes or alterations are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.

(3) Specific economic, legal, social, technological, or other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.

(b) The findings required by subsection (a) shall be supported by substantial evidence in the record.

(c) The finding in subsection (a)(2) shall not be made if the agency making the finding has concurrent jurisdiction with another agency to deal with identified feasible mitigation measures or alternatives.

(d) When making the findings required in subsection (a)(1), the agency shall also adopt a program for reporting on or monitoring the changes which it has either required in the project or made a condition of approval to avoid or substantially lessen significant environmental effects. These measures must be fully enforceable through permit conditions, agreements, or other measures.

(e) The public agency shall specify the location and custodian of the documents or other material which constitute the record of the proceedings upon which its decision is based.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1, 21081 and 21081.6, Public Resources Code; *Laurel Hills Homeowners Association* v. *City Council*, 83 Cal. App. 3d 515; *Cleary* v. *County of Stanislaus*, 118 Cal. App. 3d 348.

HISTORY

1. Amendment of subsections (a) and (a)(3), new subsections (d) and (e), and amendment of NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15092. Approval.

(a) After considering the final EIR and in conjunction with making findings under Section 15091, the lead agency may decide whether or how to approve or carry out the project.

(b) A public agency shall not decide to approve or carry out a project for which an EIR was prepared unless either:

(1) The project as approved will not have a significant effect on the environment, or

(2) The agency has:

(A) Eliminated or substantially lessened all significant effects on the environment where feasible as shown in findings under Section 15091, and

(B) Determined that any remaining significant effects on the environment found to be unavoidable under Section 15091 are acceptable due to overriding concerns as described in Section 15093.

(c) With respect to a project which includes housing development, the public agency shall not reduce the proposed number of housing units as a mitigation measure if it determines that there is another feasible specific mitigation measure available that will provide a comparable level of mitigation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1, 21081 and 21085, Public Resources Code; *Friends of Mammoth* v. *Board of Supervisors*, (1972) 8 Cal. App. 3d 247; *San Francisco Ecology Center* v. *City and County of San Francisco*, (1975) 48 Cal. App. 3d 584; *City of Carmel–by–the–Sea* v. *Board of Supervisors*, (1977) 71 Cal. App. 3d 84; *Laurel Hills Homeowners Association* v. *City Council*, (1978) 83 Cal. App. 3d 515.

§ 15093. Statement of Overriding Considerations.

(a) CEQA requires the decision–making agency to balance, as applicable, the economic, legal, social, technological, or other benefits of a proposed project against its unavoidable environmental risks when determining whether to approve the project. If the specific economic, legal, social, technological, or other benefits of a proposal project outweigh the unavoidable adverse environmental effects, the adverse environmental effects may be considered "acceptable."

(b) Where the decision of the public agency allows the occurrence of significant effects which are identified in the final EIR but are not avoided or substantially lessened the agency shall state in writing the specific reasons to support its action based on the final EIR and/or other information in the record. This statement may be necessary if the agency also makes a finding under Section 15091(a)(2) or (a)(3).

(c) If an agency makes a statement of overriding considerations, the statement should be included in the record of the project approval and should be mentioned in the notice of determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002 and 21081, Public Resources Code; *San Francisco Ecology Center* v. *City and County of San Francisco*, 48 Cal. App. 3d 584 (1975); *City of Carmel–by–the–Sea* v. *Board of Supervisors* 71 Cal. App. 3d 84 (1977).

would substantially lessen or avoid any significant effect the project would have on the environment. With respect to a project which includes housing development, the responsible agency shall not reduce the proposed number of housing units as a mitigation measure if it determines that there is another feasible specific mitigation measure available that will provide a comparable level of mitigation.

(h) Findings. The responsible agency shall make the findings required by Section 15091 for each significant effect of the project and shall make the findings in Section 15093 if necessary.

(i) Notice of Determination. The responsible agency should file a notice of determination in the same manner as a lead agency under Section 15075 or 15094 except that the responsible agency does not need to state that the EIR or negative declaration complies with CEQA. The responsible agency should state that it considered the EIR or negative declaration as prepared by a lead agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21165, 21080.1, 21080.3, 21080.4, 21082.1 and 21002.1(b) and (d), Public Resources Code.

HISTORY

1. Amendment of subsections (b) and (d) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

Article 8. Time Limits

§ 15100. General.

(a) Public agencies shall adopt time limits to govern their implementation of CEQA consistent with this article.

(b) Public agencies should carry out their responsibilities for preparing and reviewing EIRs within a reasonable period of time. The requirement for the preparation of an EIR should not cause undue delays in the processing of applications for permits or other entitlements to use.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY

1. Renumbering and amendment of former Article 8 (Sections 15100–15129) to Article 19 (Sections 15300–15329) and new Article 8 (Sections 15100–15112) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Register 82, No. 2.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15101. Review of Application for Completeness.

A lead agency or responsible agency shall determine whether an application for a permit or other entitlement for use is complete within 30 days from the receipt of the application except as provided in Section 15111. If no written determination of the completeness of the application is made within that period, the application will be deemed complete on the 30th day.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083, Public Resources Code; and Section 65943, Government Code.

§ 15102. Initial Study.

The lead agency shall determine within 30 days after accepting an application as complete whether it intends to prepare an EIR or a negative declaration or use a previously prepared EIR or negative declaration except as provided in Section 15111. The 30 day period may be extended 15 days upon the consent of the lead agency and the project applicant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.2, Public Resources Code.

HISTORY

1. Amendment filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15103. Response to Notice of Preparation.

Responsible agencies and trustee agencies shall provide a response to a notice of preparation to the lead agency within 30 days after receipt of the notice. If a responsible agency fails to reply within the 30 days with either a response or a well justified request for additional time, the lead agency may assume that the responsible agency has no response and any ignore a late response.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

HISTORY

1. Amendment filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15104. Convening of Meetings.

The lead agency shall convene a meeting with agency representatives to discuss the scope and content of the environmental information a responsible agency will need in the EIR as soon as possible but no later than 30 days after receiving a request for the meeting. The meeting may be requested by the lead agency, a responsible agency, a trustee agency, or by the project applicant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

§ 15105. Public Review Period for a Draft EIR or a Proposed Negative Declaration or Mitigated Negative Declaration.

(a) The public review period for a draft EIR shall not be less than 30 days nor should it be longer than 60 days except in unusual circumstances. When a draft EIR is submitted to the State Clearinghouse for review by state agencies, the public review period shall not be less than 45 days, unless a shorter period, not less than 30 days, is approved by the State Clearinghouse.

(b) The public review period for a proposed negative declaration or mitigated negative declaration shall be not less than 20 days. When a proposed negative declaration or mitigated negative declaration is submitted to the State Clearinghouse for review by state agencies, the public review period shall not be less than 30 days, unless a shorter period, not less than 20 days, is approved by the State Clearinghouse.

(c) If a draft EIR or proposed negative declaration or mitigated negative declaration has been submitted to the State Clearinghouse for review by state agencies, the public review period shall be at least as long as the review period established by the State Clearinghouse.

(d) A shortened Clearinghouse review period may be granted in accordance with the provisions of Appendix L and the following principles:

(1) A shortened review shall not be granted for any proposed project of statewide, areawide, or regional environmental significance.

(2) Requests for shortened review periods shall be submitted to the Clearinghouse in writing by the decision-making body of the lead agency, or a representative authorized by ordinance, resolution, or delegation of the decision-making body.

(3) The lead agency has contacted responsible and trustee agencies and they have agreed to the shortened review period.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21091 and 21092, Public Resources Code; *People* v. *County of Kern*, 39 Cal. App. 3d 830.

HISTORY

1. Amendment of section heading, section and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15106. Review by State Agencies.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code.

HISTORY

1. Repealer filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15107. Completion of Negative Declaration.

With a private project, the negative declaration must be completed and ready for approval within 105 days from the date when the lead agency accepted the application as complete. The negative declaration may be approved at a later time when the permit or other entitlement is approved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code.

History

1. Amendment of subsections (a) and (b) and amendment of Note filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15094. Notice of Determination.

(a) The lead agency shall file a notice of determination within 5 working days after approval of the project by the lead agency. The notice shall include:

(1) An identification of the project including its common name where possible and its location.

(2) A brief description of the project.

(3) The date when the agency approved the project.

(4) The determination of the agency whether the project in its approved form will have a significant effect on the environment.

(5) A statement that an EIR was prepared and certified pursuant to the provisions of CEQA.

(6) Whether mitigation measures were made a condition of the approval of the project.

(7) Whether findings were made pursuant to Section 15091.

(8) Whether a statement of overriding considerations was adopted for the project.

(9) The address where a copy of the final EIR and the record of project approval may be examined.

(b) If a state agency is the lead agency, the notice of determination shall be filed with OPR.

(c) If a local agency is the lead agency, the notice of determination shall be filed with the county clerk of the county or counties in which the project will be located. If the project requires discretionary approval from a state agency, the notice of determination shall also be filed with OPR.

(d) A notice of determination filed with the county clerk is available for public inspection and shall be posted within 24 hours of receipt for period of at least 30 days. Thereafter, the clerk shall return the notice the local lead agency with a notation of the period during which it was osted. The local lead agency shall retain the notice for not less than 9 months.

(e) A notice of determination filed with OPR is available for public inspection and shall be posted for a period of at least 30 days.

(f) The filing of the notice of determination and the posting of such notice starts a 30–day statute of limitations on court challenges to the approval under CEQA.

Note: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108, 21152 and 21167, Public Resources Code; *Citizens of Lake Murray Area Association v. City Council*, (1982) 129 Cal. App. 3d 436.

History

1. Amendment of subsections (b) and (c) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).
2. Amendment of subsection (a), new subsections (d) and (e), subsection relettering, and amendment of newly designated subsection (f) filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15095. Disposition of a Final EIR.

The lead agency shall:

(a) File a copy of the final EIR with the appropriate planning agency of any city, county, or city and county where significant effects on the environment may occur.

(b) Include the final EIR as part of the regular project report which is used in the existing project review and budgetary process if such a report is used.

(c) Retain one or more copies of the final EIR as public records for a reasonable period of time.

(d) Require the applicant to provide a copy of the certified, final EIR each responsible agency.

te: Authority cited: Sections 21083 and 21087, Public Resources Code. Refere: Sections 21105, 21151 and 21165, Public Resources Code; *County of Inyo Yorty*, (1973) 32 Cal. App. 3d 795.

§ 15096. Process for a Responsible Agency.

(a) General. A responsible agency complies with CEQA by considering the EIR or negative declaration prepared by the lead agency and by reaching its own conclusions on whether and how to approve the project involved. This section identifies the special duties a public agency will have when acting as a responsible agency.

(b) Response to Consultation. A responsible agency shall respond to consultation by the lead agency in order to assist the lead agency in preparing adequate environmental documents for the project. By this means, the responsible agency will ensure that the documents it will use will comply with CEQA.

(1) In response to consultation, a responsible agency shall explain its reasons for recommending whether the lead agency should prepare an EIR or negative declaration for a project. Where the responsible agency disagrees with the lead agency's proposal to prepare a negative declaration for a project, the responsible agency should identify the significant environmental effects which it believes could result from the project and recommend either that an EIR be prepared or that the project be modified to eliminate the significant effects.

(2) As soon as possible, but not longer than 30 days after receiving a notice of preparation from the lead agency, the responsible agency shall send a written reply by certified mail or any other method which provides the agency with a record showing that the notice was received. The reply shall specify the scope and content of the environmental information which would be germane to the responsible agency's statutory responsibilities in connection with the proposed project. The lead agency shall include this information in the EIR.

(c) Meetings. The responsible agency shall designate employees or representatives to attend meetings requested by the lead agency to discuss the scope and content of the EIR.

(d) Comments on Draft EIRs and Negative Declarations. A responsible agency should review and comment on draft EIRs and negative declarations for projects which the responsible agency would later be asked to approve. Comments should focus on any shortcomings in the EIR, the appropriateness of using a negative declaration, or on additional alternatives or mitigation measures which the EIR should include. The comments shall be limited to those project activities which are within the agency's area of expertise or which are required to be carried out or approved by the agency or which will be subject to the exercise of powers by the agency. Comments shall be as specific as possible and supported by either oral or written documentation.

(e) Decision on Adequacy of EIR or Negative Declaration. If a responsible agency believes that the final EIR or negative declaration prepared by the lead agency is not adequate for use by the responsible agency, the responsible agency must either:

(1) Take the issue to court within 30 days after the lead agency files a notice of determination;

(2) Be deemed to have waived any objection to the adequacy of the EIR or negative declaration;

(3) Prepare a subsequent EIR if permissible under Section 15162; or

(4) Assume the lead agency role as provided in Section 15052(a)(3).

(f) Consider the EIR or Negative Declaration. Prior to reaching a decision on the project, the responsible agency must consider the environmental effects of the project as shown in the EIR or negative declaration. A subsequent or supplemental EIR can be prepared only as provided in Sections 15162 or 15163.

(g) Adoption of Alternatives or Mitigation Measures.

(1) When considering alternatives and mitigation measures, a responsible agency is more limited than a lead agency. A responsible agency has responsibility for mitigating or avoiding only the direct or indirect environmental effects of those parts of the project which it decides to carry out, finance, or approve.

(2) When an EIR has been prepared for a project, the Responsible Agency shall not approve the project as proposed if the agency finds any feasible alternative or feasible mitigation measures within its powers that

distinct sections, the document shall state where in the document each element is discussed.

(b) The EIR may be prepared as a separate document, as part of a general plan, or as part of a project report. If prepared as a part of the project report, it must still contain one separate and distinguishable section providing either analysis of all the subjects required in an EIR or as a minimum, a table showing where each of the subjects is discussed. When the lead agency is a state agency, the EIR shall be included as part of the regular project report if such a report is used in the agency's existing review and budgetary process.

(c) Draft EIRs shall contain the information required by Sections 15122 through 15131. Final EIRs shall contain the same information and the subjects described in Section 15132.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100 and 21105, Public Resources Code.

HISTORY

1. Repealer of Article 9 (Sections 15140–15151) and new Article 9 (Sections 15120–15132) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 82, No. 2; 80, No. 19; 78, No. 5; 77, No. 1; 76, No. 41; 75, Nos. 1 and 18; and 73, No. 50.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15121. Informational Document.

(a) An EIR is an informational document which will inform public agency decisionmakers and the public generally of the significant environmental effect of a project, identify possible ways to minimize the significant effects, and describe reasonable alternatives to the project. The public agency shall consider the information in the EIR along with other information which may be presented to the agency.

(b) While the information in the EIR does not control the agency's ultimate discretion on the project, the agency must respond to each significant effect identified in the EIR by making findings under Section 15091 and if necessary by making a statement of overriding considerations under Section 15093.

(c) The information in an EIR may constitute substantial evidence in the record to support the agency's action on the project if its decision is later challenged in court.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21061, Public Resources Code; *Carmel Valley View, Ltd.* v. *Board of Supervisors*, (1976) 58 Cal. App. 3d 817.

§ 15122. Table of Contents or Index.

An EIR shall contain at least a table of contents or an index to assist readers in finding the analysis of different subjects and issues.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21061, Public Resources Code.

§ 15123. Summary.

(a) An EIR shall contain a brief summary of the proposed actions and its consequences. The language of the summary should be as clear and simple as reasonably practical.

(b) The summary shall identify:

(1) Each significant effect with proposed mitigation measures and alternatives that would reduce or avoid that effect;

(2) Areas of controversy known to the lead agency including issues raised by agencies and the public; and

(3) Issues to be resolved including the choice among alternatives and whether or how to mitigate the significant effects.

(c) The summary should normally not exceed 15 pages.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21061, Public Resources Code.

§ 15124. Project Description.

The description of the project shall contain the following information but should not supply extensive detail beyond that needed for evaluation and review of the environmental impact.

(a) The precise location and boundaries of the proposed project shall be shown on a detailed map, preferably topographic. The location of the project shall also appear on a regional map.

(b) A statement of the objectives sought by the proposed project.

(c) A general description of the project's technical, economic, and environmental characteristics, considering the principal engineering proposals if any and supporting public service facilities.

(d) A statement briefly describing the intended uses of the EIR.

(1) This statement shall include, to the extent that the information is known to the lead agency,

(A) A list of the agencies that are expected to use the EIR in their decision–making, and

(B) A list of the approvals for which the EIR will be used.

(2) If a public agency must make more than one decision on a project, all its decisions subject to CEQA should be listed, preferably in the order in which they will occur. On request, the Office of Planning and Research will provide assistance in identifying state permits for a project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.3, 21080.4, 21165, 21166 and 21167.2, Public Resources Code; *County of Inyo* v. *City of Los Angeles*, 71 Cal. App. 3d 185 (1977).

§ 15125. Environmental Setting.

An EIR must include a description of the environment in the vicinity of the project, as it exists before the commencement of the project, from both a local and regional perspective. The description shall be no longer than is necessary to an understanding of the significant effects of the proposed project and its alternatives.

(a) Knowledge of the regional setting is critical to the assessment of environmental impacts. Special emphasis should be placed on environmental resources that are rare or unique to that region and would be affected by the project.

(b) The EIR shall discuss any inconsistencies between the proposed project and applicable general plans and regional plans. Such regional plans include, but are not limited to, the applicable Air Quality Management Plan (or State Implementation Plan once adopted), area–wide waste treatment and water quality control plans, regional transportation plans, regional housing allocation plans, and regional land use plans for the protection of the coastal zone, Lake Tahoe Basin, San Francisco Bay, and Santa Monica Mountains.

(c) Where a proposed project is compared with an adopted plan, the analysis shall examine the existing physical conditions as well as the potential future conditions discussed in the plan.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061 and 21100, Public Resources Code; *E.P.I.C.* v. *County of El Dorado*, (1982) 131 Cal. App. 3d 350.

§ 15126. Consideration and Discussion of Environmental Impacts.

All phases of a project must be considered when evaluating its impact on the environment: planning, acquisition, development, and operation. The following subjects shall be discussed, preferably in separate sections or paragraphs. If they are not discussed separately, the EIR shall include a table showing where each of the subjects is discussed.

(a) The Significant Environmental Effects of the Proposed Project. An EIR shall identify and focus on the significant environmental effects of the proposed project. Direct and indirect significant effects of the project on the environment shall be clearly identified and described, giving due consideration to both the short–term and long–term effects. The discussion should include relevant specifics of the area, the resources involved, physical changes, alterations to ecological systems, and changes induced in population distribution, population concentration, the human use of the land (including commercial and residential development), health and safety problems caused by the physical changes, and other aspects of the resource base such as water, scenic quality, and public services. The EIR shall also analyze any significant environmental effects the project might cause by bringing development and people into the area affected. For example, an EIR on a subdivision astride an active fault line should identify as a significant effect the seismic hazard to future occupants of the subdivision. The subdivision would have the effect of attracting people to the location and exposing them to the hazards found there.

§ 15108. Completion and Certification of EIR.

With a private project, the lead agency shall complete and certify the final EIR as provided in Section 15090 within one year after the date when the lead agency accepted the application as complete. Lead agency procedures may provide that the one-year time limit may be extended once for a period of not more than 90 days upon consent of the lead agency and the applicant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code; and Government Code Section 65950.

§ 15109. Suspension of Time Periods.

An unreasonable delay by an applicant in meeting requests by the lead agency necessary for the preparation of a negative declaration or an EIR shall suspend the running of the time periods described in Sections 15107 and 15108 for the period of the unreasonable delay. Alternatively, an agency may disapprove a project application where there is unreasonable delay in meeting requests. The agency may allow a renewed application to start at the same point in the process where the application was when it was disapproved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code; *Carmel Valley View, Ltd.* v. *Maggini*, 91 Cal. App. 3d 318.

§ 15110. Projects with Federal Involvement.

(a) At the request of an applicant, the lead agency may waive the one-year time limit for completing and certifying a final EIR or the 105-day period for completing a negative declaration if:

(1) The project will be subject to CEQA and to the National Environmental Policy Act,

(2) Additional time will be required to prepare a combined EIR-EIS or combined negative declaration-finding of no significant impact as provided in Section 15221, and

(3) The time required to prepare the combined document will be shorter than the time required to prepare the documents separately.

(b) The time limits for taking final action on a permit for a development project may also be waived where a combined EIR-EIS will be prepared.

(c) The time limits for processing permits for development projects under Government Code Sections 65950-65960 shall not apply if federal statutes or regulations require time schedules which exceed the state time limits. In this event, any state agencies involved shall make a final decision on the project within the federal time limits.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.6 and 21083.7, Public Resources Code; Sections 65951 and 65954, Government Code; Public Law 91-190 as amended, 42 U.S.C.A. 4321-4347.

HISTORY

1. Amendment of subsection (a)(2) filed 1-30-86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15111. Projects with Short Time Periods for Approval.

(a) A few statutes or ordinances require agencies to make decisions on permits within time limits that are so short that review of the project under CEQA would be difficult. To enable the lead agency to comply with both the permit statute and CEQA, the lead agency shall deem an application for a project not received for filing under the permit statute or ordinance until such time as progress toward completing the environmental documentation required by CEQA is sufficient to enable the lead agency to finish the CEQA process within the short permit time limit. This section will apply where all of the following conditions are met:

(1) The enabling legislation for a program, other than Chapter 4.5 (commencing with Section 65920) of Division 1 of Title 7 of the Government Code, requires the lead agency to take action on an application within a specified period of time that is six months or less, and

(2) The enabling legislation provides that the project will become approved by operation of law if the lead agency fails to take any action within such specified time period, and

(3) The project involves the issuance of a lease, permit, license, certificate, or other entitlement for use.

(b) Examples of time periods subject to this section include but are not limited to:

(1) Action within 50 days on a tentative subdivision map for which an EIR is being or will be prepared pursuant to Article 2 (commencing with Section 66452) of Chapter 3, Division 2, Title 2 of the Government Code, but a negative declaration for a subdivision map must be completed within the 50 day period (see Government Code Section 66452.1(c)),

(2) Action on a timber harvesting plan by the Director of Forestry within 15 days pursuant to Section 4582.7 of the Public Resources Code,

(3) Action on a permit by the San Francisco Bay Conservation and Development Commission within 90 days pursuant to Section 66632(f) of the Government Code, and

(4) Action on an oil and gas permit by the Division of Oil and Gas within 10 days pursuant to Sections 3203 or 3724 of the Public Resources Code.

(c) In any case described in this section, the environmental document shall be completed or certified and the decision on the application shall be made within one year from the date on which an application requesting approval of such project has been received and accepted as complete for CEQA processing by such agency. This one-year time limit may be extended once for a period not to exceed 90 days upon consent of the public agency and the applicant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code; *N.R.D.C.* v. *Arcata National Corp.*, 59 Cal. App. 3d 959 (1976).

§ 15112. Statutes of Limitations.

(a) CEQA provides unusually short statutes of limitations on filing court challenges to the approval of projects under the act.

(b) The statute of limitations periods are not public review periods or waiting periods for the person whose project has been approved. The project sponsor may proceed to carry out the project as soon as the necessary permits have been granted. The statute of limitations cuts off the right of another person to file a court action challenging approval of the project after the specified time period has expired.

(c) The statute of limitations periods under CEQA are as follows:

(1) Where the public agency filed a notice of determination in compliance with Sections 15075 or 15094, 30 days after the filing of the notice and the posting on a list of such notices.

(2) Where the public agency filed a notice of exemption in compliance with Section 15062, 35 days after the filing of the notice and the posting on a list of such notices.

(3) Where a certified state regulatory agency files a notice of decision in compliance with Public Resources Code Section 21080.5(d)(2)(v), 30 days after the filing of the notice.

(4) Where the Secretary for Resources certifies a state environmental regulatory agency under Public Resources Code Section 21080.5, the certification may be challenged only during the 30 days following the certification decision.

(5) Where none of the other statute of limitations periods in this section apply, 180 days after either:

(A) The public agency's decision to carry out or approve the project, or

(B) Commencement of the project if the project is undertaken without a formal decision by the public agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21167, 21167.3 and 21080.5, Public Resources Code; *Kriebel* v. *City Council*, 112 Cal. App. 3d 693; *Citizens of Lake Murray Area Association* v. *City Council*, (1982) 129 Cal. App. 3d 436.

Article 9. Contents of Environmental Impact Reports

§ 15120. General.

(a) Environmental Impact Reports shall contain the information outlined in this article, but the format of the document may be varied. Each element must be covered, and when these elements are not separated into

(b) Any Significant Environmental Effects Which Cannot be Avoided if the Proposal is Implemented. Describe any significant impacts, including those which can be mitigated but not reduced to a level of insignificance. Where there are impacts that cannot be alleviated without imposing an alternative design, their implications and the reasons why the project is being proposed, notwithstanding their effect, should be described.

(c) Mitigation Measures Proposed to Minimize the Significant Effects. Describe measures which could minimize significant adverse impacts, including where relevant, inefficient and unnecessary consumption of energy. The discussion of mitigation measures shall distinguish between the measures which are proposed by project proponents to be included in the project and other measures that are not included but could reasonably be expected to reduce adverse impacts if required as conditions of approving the project. This discussion shall identify mitigation measures for each significant environmental effect identified in the EIR. Where several measures are available to mitigate an impact, each should be discussed and the basis for selecting a particular measure should be identified if one has been selected. Energy conservation measures, as well as other appropriate mitigation measures, shall be discussed when relevant. Examples of energy conservation measures are provided in Appendix F. If a mitigation measure would cause one or more significant effects in addition to those that would be caused by the project as proposed, the effects of the mitigation measure shall be discussed but in less detail than the significant effects of the project as proposed. (*Stevens v. City of Glendale*, 125 Cal. App. 3d 986).

(d) Alternatives to the Proposed Action. Describe a range of reasonable alternatives to the project, or to the location of the project, which would feasibly attain most of the basic objectives of the project but would avoid or substantially lessen any of the significant effects of the project, and evaluate the comparative merits of the alternatives.

(1) Purpose. Because an EIR must identify ways to mitigate or avoid the significant effects that a project may have on the environment (Public Resources Code Section 21002.1), the discussion of alternatives shall focus on alternatives to the project or its location which are capable of avoiding or substantially lessening any significant effects of the project, even if these alternatives would impede to some degree the attainment of the project objectives, or would be more costly.

(2) Selection of a range of reasonable alternatives. The range of potential alternatives to the proposed project shall include those that could feasibly accomplish most of the basic purposes of the project and could avoid or substantially lessen one or more of the significant effects. The EIR should briefly describe the rationale for selecting the alternatives to be discussed. The EIR should also identify any alternatives that were considered by the lead agency but were rejected as infeasible during the scoping process and briefly explain the reasons underlying the lead agency's determination. Additional information explaining the choice of alternatives may be included in the administrative record.

(3) Evaluation of alternatives. The EIR shall include sufficient information about each alternative to allow meaningful evaluation, analysis, and comparison with the proposed project. A matrix displaying the major characteristics and significant environmental effects of each alternative may be used to summarize the comparison. If an alternative would cause one or more significant effects in addition to those that would be caused by the project as proposed, the significant effects of the alternative shall be discussed but in less detail than the significant effects of the project as proposed. (*County of Inyo v. City of Los Angeles*, 124 Cal.App.3d 1.)

(4) "No project" alternative. The specific alternative of "no project" shall also be evaluated along with its impact. The "no project" analysis shall discuss the existing conditions, as well as what would be reasonably expected to occur in the foreseeable future if the project were not approved, based on current plans and consistent with available infrastructure and community services. If the environmentally superior alternative is the "no project" alternative, the EIR shall also identify an environmentally superior alternative among the other alternatives.

(5) Rule of reason. The range of alternatives required in an EIR is governed by "rule of reason" that requires the EIR to set forth only those alternatives necessary to permit a reasoned choice. The alternatives shall be limited to ones that would avoid or substantially lessen any of the significant effects of the project. Of those alternatives, the EIR need examine in detail only the ones that the lead agency determines could feasibly attain most of the basic objectives of the project. The range of feasible alternatives shall be selected and discussed in a manner to foster meaningful public participation and informed decision making.

(A) Feasibility. Among the factors that may be taken into account when addressing the feasibility of alternatives are site suitability, economic viability, availability of infrastructure, general plan consistency, other plans or regulatory limitations, jurisdictional boundaries (projects with a regionally significant impact should consider the regional context), and whether the proponent can reasonably acquire, control or otherwise have access to the alternative site (or the site is already owned by the proponent). No one of these factors establishes a fixed limit on the scope of reasonable alternatives. (*Citizens of Goleta Valley v. Board of Supervisors*, (1990) 52 Cal.3d 553; see *Save Our Residential Environment v. City of West Hollywood*, (1992) 9 Cal.App.4th 1745, 1753, fn. 1).

(B) Alternative locations.

1. Key question. The key question and first step in analysis is whether any of the significant effects of the project would be avoided or substantially lessened by putting the project in another location. Only locations that would avoid or substantially lessen any of the significant effects of the project need be considered for inclusion in the EIR.

2. None feasible. If the lead agency concludes that no feasible alternative locations exist, it must disclose the reasons for this conclusion, and should include the reasons in the EIR. For example, in some cases there may be no feasible alternative locations for a geothermal plant or mining project which must be in close proximity to natural resources at a given location.

3. Limited new analysis required. Where a previous document has sufficiently analyzed a range of reasonable alternative locations and environmental impacts for projects with the same basic purpose, the lead agency should review the previous document. The EIR may rely on the previous document to help it assess the feasibility of potential project alternatives to the extent the circumstances remain substantially the same as they relate to the alternative. (*Citizens of Goleta Valley v. Board of Supervisors*, (1990) 52 Cal. 3d 553, 573).

(C) An EIR need not consider an alternative whose effect cannot be reasonably ascertained and whose implementation is remote and speculative. (*Residents Ad Hoc Stadium Committee v. Board of Trustees* (1979) 89 Cal. App. 3d 274).

(e) Any Significant Irreversible Environmental Changes Which Would Be Involved in the Proposed Action Should It Be Implemented. Uses of nonrenewable resources during the initial and continued phases of the project may be irreversible since a large commitment of such resources makes removal or nonuse thereafter unlikely. Primary impacts and, particularly, secondary impacts (such as highway improvement which provides access to a previously inaccessible area) generally commit future generations to similar uses. Also irreversible damage can result from environmental accidents associated with the project. Irretrievable commitments of resources should be evaluated to assure that such current consumption is justified.

(f) The Growth-Inducing Impact of the Proposed Action. Discuss the ways in which the proposed project could foster economic or population growth, or the construction of additional housing, either directly or indirectly, in the surrounding environment. Included in this are projects which would remove obstacles to population growth (a major expansion of a waste water treatment plant might, for example, allow for more construction in service areas). Increases in the population may further tax existing community service facilities so consideration must be given to this impact. Also discuss the characteristic of some projects which may encourage and facilitate other activities that could significantly affect the

environment, either individually or cumulatively. It must not be assumed that growth in any area is necessarily beneficial, detrimental, or of little significance to the environment.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code; *Citizens of Goleta Valley v. Board of Supervisors*, (1990) 52 Cal.3d 553; *Laurel Heights Improvement Association v. Regents of the University of California*, (1988) 47 Cal. 3d 376; and *Laurel Heights Improvement Association v. Regents of the University of California* (1993) 6 Cal. 4th 1112.

HISTORY

1. Amendment of subsection (d), repealer and new subsections (d)(1)–(4), amendment of subsection (d)(5), new subsections (d)(5)(A)–(B)3, designation of subsection (d)(5)(C) and amendment of NOTE filed 8–19–94; operative 9–19–94 (Register 94, No. 33).
2. Amendment of section heading, repealer of subsection (e), subsection relettering, and amendment of NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15127. Limitations on Discussion of Environmental Impact.

The information required by Section 15126(e) concerning irreversible changes, need be included only in EIRs prepared in connection with any of the following activities:

(a) The adoption, amendment, or enactment of a plan, policy, or ordinance of a public agency;

(b) The adoption by a local agency formation commission of a resolution making determinations; or

(c) A project which will be subject to the requirement for preparing an environmental impact statement pursuant to the requirements of the National Environmental Policy Act of 1969, 42 U.S.C. 4321–4347.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100.1, Public Resources Code.

HISTORY

1. Amendment of first paragraph, subsection (c) and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15128. Effects Not Found to Be Significant.

An EIR shall contain a statement briefly indicating the reasons that various possible significant effects of a project were determined not to be significant and were therefore not discussed in detail in the EIR. Such a statement may be contained in an attached copy of an initial study.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code.

§ 15129. Organizations and Persons Consulted.

The EIR shall identify all federal, state, or local agencies, other organizations, and private individuals consulted in preparing the draft EIR, and the persons, firm, or agency preparing the draft EIR, by contract or other authorization.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code.

§ 15130. Discussion of Cumulative Impacts.

(a) Cumulative impacts shall be discussed when they are significant.

(b) The discussion of cumulative impacts shall reflect the severity of the impacts and their likelihood of occurrence, but the discussion need not provide as great detail as is provided of the effects attributable to the project alone. The discussion should be guided by the standards of practicality and reasonableness. The following elements are necessary to an adequate discussion of cumulative impacts:

(1) Either:

(A) A list of past, present, and reasonably anticipated future projects producing related or cumulative impacts, including those projects outside the control of the agency, or

(B) A summary of projections contained in an adopted general plan or related planning document which is designed to evaluate regional or area-wide conditions. Any such planning document shall be referenced and made available to the public at a location specified by the lead agency;

(2) A summary of the expected environmental effects to be produced by those projects with specific reference to additional information stating where that information is available, and

(3) A reasonable analysis of the cumulative impacts of the relevant projects. An EIR shall examine reasonable options for mitigating or avoiding any significant cumulative effects of a proposed project.

(c) With some projects, the only feasible mitigation for cumulative impacts may involve the adoption of ordinances or regulations rather than the imposition of conditions on a project–by–project basis.

(d) Previously approved land use documents such as general plans, specific plans, and local coastal plans may be used in cumulative impact analysis.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083(b) and 21100, Public Resources Code; *Whitman v. Board of Supervisors*, (1979) 88 Cal. App. 3d 397; *San Franciscans for Reasonable Growth v. City and County of San Francisco* (1984) 151 Cal.App.3d 61.

HISTORY

1. Amendment of section heading, new subsection (d) and amendment of NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15131. Economic and Social Effects.

Economic or social information may be included in an EIR or may be presented in whatever form the agency desires.

(a) Economic or social effects of a project shall not be treated as significant effects on the environment. An EIR may trace a chain of cause and effect from a proposed decision on a project through anticipated economic or social changes resulting from the project to physical changes caused in turn by the economic or social changes. The intermediate economic or social changes need not be analyzed in any detail greater than necessary to trace the chain of cause and effect. The focus of the analysis shall be on the physical changes.

(b) Economic or social effects of a project may be used to determine the significance of physical changes caused by the project. For example, if the construction of a new freeway or rail line divides an existing community, the construction would be the physical change, but the social effect on the community would be the basis for determining that the effect would be significant. As an additional example, if the construction of a road and the resulting increase in noise in an area disturbed existing religious practices in the area, the disturbance of the religious practices could be used to determine that the construction and use of the road and the resulting noise would be significant effects on the environment. The religious practices would need to be analyzed only to the extent to show that the increase in traffic and noise would conflict with the religious practices. Where an EIR uses economic or social effects to determine that a physical change is significant, the EIR shall explain the reason for determining that the effect is significant.

(c) Economic, social, and particularly housing factors shall be considered by public agencies together with technological and environmental factors in deciding whether changes in a project are feasible to reduce or avoid the significant effects on the environment identified in the EIR. If information on these factors is not contained in the EIR, the information must be added to the record in some other manner to allow the agency to consider the factors in reaching a decision on the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21001(e) and (g), 21002, 21002.1, 21060.5, 21080.1, 21083(c) and 21100, Public Resources Code.

§ 15132. Contents of Final Environmental Impact Report.

The final EIR shall consist of:

(a) The Draft EIR or a revision of the draft.

(b) Comments and recommendations received on the Draft EIR either verbatim or in summary.

(c) A list of persons, organizations, and public agencies commenting on the Draft EIR.

(d) The responses of the Lead Agency to significant environmental points raised in the review and consultation process.

(e) Any other information added by the lead agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code.

Article 10. Considerations in Preparing EIRs and Negative Declarations

§ 15140. Writing.

EIRs shall be written in plain language and may use appropriate graphics so that decisionmakers and the public can rapidly understand the documents.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003 and 21100, Public Resources Code.

HISTORY

1. Repealer of Article 10 (Sections 15160–15167) and new Article 10 (Sections 15140–15153) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 80, No. 19; 78, No. 5; 76, No. 41; 75, No. 1; and 73, No. 50.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15141. Page Limits.

The text of draft EIRs should normally be less than 150 pages and for proposals of unusual scope or complexity should normally be less than 300 pages.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code.

§ 15142. Interdisciplinary Approach.

An EIR shall be prepared using an interdisciplinary approach which will ensure the integrated use of the natural and social sciences and the consideration of qualitative as well as quantitative factors. The interdisciplinary analysis shall be conducted by competent individuals, but no single discipline shall be designated or required to undertake this evaluation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000, 21001 and 21100, Public Resources Code.

§ 15143. Emphasis.

The EIR shall focus on the significant effects on the environment. The significant effects should be discussed with emphasis in proportion to their severity and probability of occurrence. Effects dismissed in an Initial Study as clearly insignificant and unlikely to occur need not be discussed further in the EIR unless the Lead Agency subsequently receives information inconsistent with the finding in the Initial Study. A copy of the Initial Study may be attached to the EIR to provide the basis for limiting the impacts discussed.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15144. Forecasting.

Drafting an EIR or preparing a negative declaration necessarily involves some degree of forecasting. While foreseeing the unforeseeable is not possible, an agency must use its best efforts to find out and disclose all that it reasonably can.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15145. Speculation.

If, after thorough investigation, a lead agency finds that a particular impact is too speculative for evaluation, the agency should note its conclusion and terminate discussion of the impact.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code; *Topanga Beach Renters Association* v. *Department of General Services* (1976) 58 Cal. App. 3d 712.

15146. Degree of Specificity.

The degree of specificity required in an EIR will correspond to the degree of specificity involved in the underlying activity which is described in the EIR.

(a) An EIR on a construction project will necessarily be more detailed in the specific effects of the project than will be an EIR on the adoption of a local general plan or comprehensive zoning ordinance because the effects of the construction can be predicted with greater accuracy.

(b) An EIR on a project such as the adoption or amendment of a comprehensive zoning ordinance or a local general plan should focus on the secondary effects that can be expected to follow from the adoption, or amendment, but the EIR need not be as detailed as an EIR on the specific construction projects that might follow.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15147. Technical Detail.

The information contained in an EIR shall include summarized technical data, maps, plot plans, diagrams, and similar relevant information sufficient to permit full assessment of significant environmental impacts by reviewing agencies and members of the public. Placement of highly technical and specialized analysis and data in the body of an EIR should be avoided through inclusion of supporting information and analyses as appendices to the main body of the EIR. Appendices to the EIR may be prepared in volumes separate from the basic EIR document, but shall be readily available for public examination and shall be submitted to all clearinghouses which assist in public review.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15148. Citation.

Preparation of EIRs is dependent upon information from many sources, including engineering project reports and many scientific documents relating to environmental features. These documents should be cited but not included in the EIR. The EIR shall cite all documents used in its preparation including, where possible, the page and section number of any technical reports which were used as the basis for any statements in the EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15149. Use of Registered Professionals in Preparing EIRs.

(a) A number of statutes provide that certain professional services can be provided to the public only by individuals who have been registered by a registration board established under California law. Such statutory restrictions apply to a number of professions including but not limited to engineering, land surveying, forestry, geology, and geophysics.

(b) In its intended usage, an EIR is not a technical document that can be prepared only by a registered professional. The EIR serves as a public disclosure document explaining the effects of the proposed project on the environment, alternatives to the project, and ways to minimize adverse effects and to increase beneficial effects. As a result of information in the EIR, the lead agency should establish requirements or conditions on project design, construction, or operation in order to protect or enhance the environment. State statutes may provide that only registered professionals can prepare technical studies which will be used in or which will control the detailed design, construction, or operation of the proposed project and which will be prepared in support of an EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15150. Incorporation by Reference.

(a) An EIR or negative declaration may incorporate by reference all or portions of another document which is a matter of public record or is generally available to the public. Where all or part of another document is incorporated by reference, the incorporated language shall be considered to be set forth in full as part of the text of the EIR or negative declaration.

(b) Where part of another document is incorporated by reference, such other document shall be made available to the public for inspection at a public place or public building. The EIR or negative declaration shall state where the incorporated documents will be available for inspection. At a minimum, the incorporated document shall be made available to the

public in an office of the lead agency in the county where the project would be carried out or in one or more public buildings such as county offices or public libraries if the lead agency does not have an office in the county.

(c) Where an EIR or negative declaration uses incorporation by reference, the incorporated part of the referenced document shall be briefly summarized where possible or briefly described if the data or information cannot be summarized. The relationship between the incorporated part of the referenced document and the EIR shall be described.

(d) Where an agency incorporates information from an EIR that has previously been reviewed through the state review system, the state identification number of the incorporated document should be included in the summary or designation described in Subsection (c).

(e) Examples of materials that may be incorporated by reference include but are not limited to:

(1) A description of the environmental setting from another EIR.

(2) A description of the air pollution problems prepared by an air pollution control agency concerning a process involved in the project.

(3) A description of the city or county general plan that applies to the location of the project.

(f) Incorporation by reference is most appropriate for including long, descriptive, or technical materials that provide general background but do not contribute directly to the analysis of the problem at hand.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15151. Standards for Adequacy of an EIR.

An EIR should be prepared with a sufficient degree of analysis to provide decisionmakers with information which enables them to make a decision which intelligently takes account of environmental consequences. An evaluation of the environmental effects of a proposed project need not be exhaustive, but the sufficiency of an EIR is to be reviewed in the light of what is reasonably feasible. Disagreement among experts does not make an EIR inadequate, but the EIR should summarize the main points of disagreement among the experts. The courts have looked not for perfection but for adequacy, completeness, and a good faith effort at full disclosure.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061 and 21100, Public Resources Code; *San Francisco Ecology Center* v. *City and County of San Francisco*, 48 Cal. App. 3d 584 (1975).

§ 15152. Tiering.

(a) Agencies are encouraged to tier EIRs which they prepare for separate but related projects including general plans, zoning changes, and development projects. This approach can eliminate repetitive discussions of the same issues and focus the EIR on the actual issues ripe for decision at each level of environmental review.

(b) Where an EIR has been prepared for a program, plan, policy, or ordinance consistent with the requirements of this section, any lead agency for a later project pursuant to or consistent with the program, plan, policy, or ordinance should limit the EIR on the project to effects which:

(1) Were not examined as significant effects on the environment in the prior EIR; or

(2) Are susceptible to substantial reduction or avoidance by the choice of specific revisions in the project, by the imposition of conditions, or other means.

(c) Tiering under this section shall be limited to situations where the project is consistent with the general plan and zoning of the city or county in which the project would be located.

(d) The initial study shall be used to decide whether and to what extent the prior EIR is still sufficient for the present project.

(e) When tiering is used, the later EIRs or negative declarations shall refer to the prior EIR and state where a copy of the prior EIR may be examined. The later EIR should state that the lead agency is using the tiering concept and that the EIR is being tiered with the earlier EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061, 21100 and 21151, Public Resources Code.

§ 15153. Use of an EIR from an Earlier Project.

(a) The lead agency may employ a single EIR to describe more than one project, if such projects are essentially the same in terms of environmental impact. Further, the lead agency may use an earlier EIR prepared in connection with an earlier project to apply to a later project, if the circumstances of the projects are essentially the same.

(b) When a lead agency proposes to use an EIR from an earlier project as the EIR for a separate, later project, the lead agency shall use the following procedures:

(1) The lead agency shall review the proposed project with an initial study, using incorporation by reference if necessary, to determine whether the EIR would adequately describe:

(A) The general environmental setting of the project,

(B) The significant environmental impacts of the project, and

(C) Alternatives and mitigation measures related to each significant effect.

(2) If the lead agency believes that the EIR would meet the requirements of Subsection (1), it shall provide public review as provided in Section 15087 stating that it plans to use the previously prepared EIR as the draft EIR for this project. The notice shall include as a minimum:

(A) An identification of the project with a brief description;

(B) A statement that the agency plans to use a certain EIR prepared for a previous project as the EIR for this project;

(C) A listing of places where copies of the EIR may be examined; and

(D) A statement that the key issues involving the EIR are whether the EIR should be used for this project and whether there are any additional, reasonable alternatives or mitigation measures that should be considered as ways of avoiding or reducing the significant effects of the project.

(3) The lead agency shall prepare responses to comments received during the review period.

(4) Before approving the project, the decisionmaker in the lead agency shall:

(A) Consider the information in the EIR including comments received during the review period and responses to those comments,

(B) Decide either on its own or on a staff recommendation whether the EIR is adequate for the project at hand, and

(C) Make or require certification to be made as described in Section 15090.

(D) Make findings as provided in Sections 15091 and 15093 as necessary.

(5) After making a decision on the project, the lead agency shall file a notice of determination.

(c) An EIR prepared for an earlier project may also be used as part of an initial study to document a finding that a later project will not have a significant effect. In this situation a negative declaration will be prepared.

(d) An EIR prepared for an earlier project shall not be used as the EIR for a later project if any of the conditions described in Section 15162 would require preparation of a subsequent or supplemental EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100, 21151 and 21166, Public Resources Code.

§ 15154. Projects Near Airports.

(a) When a lead agency prepares an EIR for a project within the boundaries of a comprehensive airport land use plan or, if a comprehensive airport land use plan has not been adopted for a project within two nautical miles of a public airport or public use airport, the agency shall utilize the Airport Land Use Planning Handbook published by Caltrans' Division of Aeronautics to assist in the preparation of the EIR relative to potential airport-related safety hazards and noise problems.

(b) A lead agency shall not adopt a negative declaration or mitigated negative declaration for a project described in subsection (a) unless the lead agency considers whether the project will result in a safety hazard or noise problem for persons using the airport or for persons residing or working in the project area.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21096, Public Resources Code.

History

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

Article 11. Types of EIRs

§ 15160. General.

This article describes a number of examples of variations in EIRs as the documents are tailored to different situations and intended uses. These variations are not exclusive. Lead agencies may use other variations consistent with the guidelines to meet the needs of other circumstances. All EIRs must meet the content requirements discussed in Article 9 beginning with Section 15120.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061, 21100 and 21151, Public Resources Code.

History

1. New Article 11 (Section 15180) filed 12–14–73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Repealer of Article 11 (Section 15180) and new Article 11 (Sections 15160–15170) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29).
3. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15161. Project EIR.

The most common type of EIR examines the environmental impacts of a specific development project. This type of EIR should focus primarily on the changes in the environment that would result from the development project. The EIR shall examine all phases of the project including planning, construction, and operation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061, 21100 and 21151, Public Resources Code.

§ 15162. Subsequent EIRs and Negative Declarations.

(a) When an EIR has been certified or a negative declaration adopted for a project, no subsequent EIR shall be prepared for that project unless the lead agency determines, on the basis of substantial evidence in the light of the whole record, one or more of the following:

(1) Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;

(2) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or

(3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the negative declaration was adopted, shows any of the following:

(A) The project will have one or more significant effects not discussed in the previous EIR or negative declaration;

(B) Significant effects previously examined will be substantially more severe than shown in the previous EIR;

(C) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or

(D) Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

(b) If changes to a project or its circumstances occur or new information becomes available after adoption of a negative declaration, the lead agency shall prepare a subsequent EIR if required under subsection (a). Otherwise the lead agency shall determine whether to prepare a subsequent negative declaration, an addendum, or no further documentation.

(c) If the project was approved prior to the occurrence of the conditions described in Subsection (a), the subsequent EIR or negative declaration shall be prepared by the public agency which grants the next discretionary approval for the project. In this situation no other responsible agency shall grant an approval for the project until the subsequent EIR has been certified or subsequent negative declaration adopted.

(d) A subsequent EIR or subsequent negative declaration shall be given the same notice and public review as required under Section 15087 or Section 15072. A subsequent EIR or negative declaration shall state where the previous document is available and can be reviewed.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21166, Public Resources Code; *Bowman v. City of Petaluma*, 185 Cal.App.3d 1065 (1986); and *Benton v. Board of Supervisors*, 226 Cal.App.3d 1467 (1991).

History

1. Amendment of section heading, text and NOTE filed 8–19–94; operative 9–19–94 (Register 94, No. 33).

§ 15163. Supplement to an EIR.

(a) The lead or responsible agency may choose to prepare a supplement to an EIR rather than a subsequent EIR if:

(1) Any of the conditions described in Section 15162 would require the preparation of a subsequent EIR, and

(2) Only minor additions or changes would be necessary to make the previous EIR adequately apply to the project in the changed situation.

(b) The supplement to the EIR need contain only the information necessary to make the previous EIR adequate for the project as revised.

(c) A supplement to an EIR shall be given the same kind of notice and public review as is given to a draft EIR under Section 15087.

(d) A supplement to an EIR may be circulated by itself without recirculating the previous draft or final EIR.

(e) When the agency decides whether to approve the project, the decision–making body shall consider the previous EIR as revised by the supplemental EIR. A finding under Section 15091 shall be made for each significant effect shown in the previous EIR as revised.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21166, Public Resources Code.

§ 15164. Addendum to an EIR or Negative Declaration.

(a) The lead agency or a responsible agency shall prepare an addendum to a previously certified EIR if some changes or additions are necessary but none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred.

(b) An addendum to an adopted negative declaration may be prepared if only minor technical changes or additions are necessary.

(c) An addendum need not be circulated for public review but can be included in or attached to the final EIR or adopted negative declaration.

(d) The decision–making body shall consider the addendum with the final EIR or adopted negative declaration prior to making a decision on the project.

(e) A brief explanation of the decision not to prepare a subsequent EIR pursuant to Section 15162 should be included in an addendum to an EIR, the lead agency's required findings on the project, or elsewhere in the record. The explanation must be supported by substantial evidence.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21166, Public Resources Code; *Bowman v. City of Petaluma*, 185 Cal.App.3d 1065 (1986); and *Benton v. Board of Supervisors*, 226 Cal.App.3d 1467 (1991).

History

1. Amendment of section heading, text and NOTE filed 8–19–94; operative 9–19–94 (Register 94, No. 33).

§ 15165. Multiple and Phased Projects.

Where individual projects are, or a phased project is, to be undertaken and where the total undertaking comprises a project with significant environmental effect, the lead agency shall prepare a single program EIR for the ultimate project as described in Section 15168. Where an individual project is a necessary precedent for action on a larger project, or commits the lead agency to a larger project, with significant environmental effect, an EIR must address itself to the scope of the larger project. Where one

project is one of several similar projects of a public agency, but is not deemed a part of a larger undertaking or a larger project, the agency may prepare one EIR for all projects, or one for each project, but shall in either case comment upon the cumulative effect.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061, 21100 and 21151, Public Resources Code; *Whitman* v. *Board of Supervisors*, 88 Cal. App. 3d 397 (1979).

§ 15166. EIR As Part of a General Plan.

(a) The requirements for preparing an EIR on a local general plan, element, or amendment thereof will be satisfied by using the general plan, or element document, as the EIR and no separate EIR will be required, if:

(1) the general plan addresses all the points required to be in an EIR by Article 9 of these guidelines and

(2) the document contains a special section or a cover sheet identifying where the general plan document addresses each of the points required.

(b) Where an EIR rather than a negative declaration has been prepared for a general plan, element, or amendment thereto, the EIR shall be forwarded to the State Clearinghouse for review. The requirement shall apply regardless of whether the EIR is prepared as a separate document or as a part of the general plan or element document.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061, 21083, 21100, 21104, 21151 and 21152, Public Resources Code.

§ 15167. Staged EIR.

(a) Where a large capital project will require a number of discretionary approvals from government agencies and one of the approvals will occur more than two years before construction will begin, a staged EIR may be prepared covering the entire project in a general form. The staged EIR shall evaluate the proposal in light of current and contemplated plans and produce an informed estimate of the environmental consequences of the entire project. The aspect of the project before the public agency for approval shall be discussed with a greater degree of specificity.

(b) When a staged EIR has been prepared, a supplement to the EIR shall be prepared when a later approval is required for the project, and the information available at the time of the later approval would permit consideration of additional environmental impacts, mitigation measures, or reasonable alternatives to the project.

(c) Where a statute such as the Warren–Alquist Energy Resources Conservation and Development Act provides that a specific agency shall be the lead agency for a project and requires the lead agency to prepare an EIR, a responsible agency which must grant an approval for the project before the lead agency has completed the EIR may prepare and consider a staged EIR.

(d) An agency requested to prepare a staged EIR may decline to act as the lead agency if it determines, among other factors, that:

(1) Another agency would be the appropriate lead agency; and

(2) There is no compelling need to prepare a staged EIR and grant an approval for the project before the appropriate lead agency will take its action on the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21003, Public Resources Code.

§ 15168. Program EIR.

(a) General. A program EIR is an EIR which may be prepared on a series of actions that can be characterized as one large project and are related either:

(1) Geographically,

(2) As logical parts in the chain of contemplated actions,

(3) In connection with issuance of rules, regulations, plans, or other general criteria to govern the conduct of a continuing program, or

(4) As individual activities carried out under the same authorizing statutory or regulatory authority and having generally similar environmental effects which can be mitigated in similar ways.

(b) Advantages. Use of a program EIR can provide the following advantages. The program EIR can:

(1) Provide an occasion for a more exhaustive consideration of effects and alternatives than would be practical in an EIR on an individual action,

(2) Ensure consideration of cumulative impacts that might be slighted in a case–by–case analysis,

(3) Avoid duplicative reconsideration of basic policy considerations,

(4) Allow the lead agency to consider broad policy alternatives and program wide mitigation measures at an early time when the agency has greater flexibility to deal with basic problems or cumulative impacts,

(5) Allow reduction in paperwork.

(c) Use With Later Activities. Subsequent activities in the program must be examined in the light of the program EIR to determine whether an additional environmental document must be prepared.

(1) If a later activity would have effects that were not examined in the program EIR, a new initial study would need to be prepared leading to either an EIR or a negative declaration.

(2) If the agency finds that pursuant to Section 15162, no new effects could occur or no new mitigation measures would be required, the agency can approve the activity as being within the scope of the project covered by the program EIR, and no new environmental document would be required.

(3) An agency shall incorporate feasible mitigation measures and alternatives developed in the program EIR into subsequent actions in the program.

(4) Where the subsequent activities involve site specific operations, the agency should use a written checklist or similar device to document the evaluation of the site and the activity to determine whether the environmental effects of the operation were covered in the program EIR.

(5) A program EIR will be most helpful in dealing with subsequent activities if it deals with the effects of the program as specifically and comprehensively as possible. With a good and detailed analysis of the program, many subsequent activities could be found to be within the scope of the project described in the program EIR, and no further environmental documents would be required.

(d) Use With Subsequent EIRS and Negative Declarations. A program EIR can be used to simplify the task of preparing environmental documents on later parts of the program. The program EIR can:

(1) Provide the basis in an initial study for determining whether the later activity may have any significant effects.

(2) Be incorporated by reference to deal with regional influences, secondary effects, cumulative impacts, broad alternatives, and other factors that apply to the program as a whole.

(3) Focus an EIR on a subsequent project to permit discussion solely of new effects which had not been considered before.

(e) Notice With Later Activities. When a law other than CEQA requires public notice when the agency later proposes to carry out or approve an activity within the program and to rely on the program EIR for CEQA compliance, the notice for the activity shall include a statement that:

(1) This activity is within the scope of the program approved earlier, and

(2) The program EIR adequately describes the activity for the purposes of CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21003, Public Resources Code; *County of Inyo* v. *Yorty*, 32 Cal. App. 3d 795 (1973).

§ 15169. Master Environmental Assessment.

(a) General. A public agency may prepare a master environmental assessment, inventory, or data base for all, or a portion of, the territory subject to its control in order to provide information which may be used or referenced in EIRs or negative declarations. Neither the content, the format, nor the procedures to be used to develop a master environmental assessment are prescribed by these guidelines. The descriptions contained in this section are advisory. A master environmental assessment

is suggested solely as an approach to identify and organize environmental information for a region or area of the state.

(b) Contents. A master environmental assessment may contain an inventory of the physical and biological characteristics of the area for which it is prepared and may contain such additional data and information as the public agency determines is useful or necessary to describe environmental characteristics of the area. It may include identification of existing levels of quality and supply of air and water, capacities and levels of use of existing services and facilities, and generalized incremental effects of different categories of development projects by type, scale, and location.

(c) Preparation.

(1) A master environmental assessment or inventory may be prepared in many possible ways. For example, a master environmental assessment may be prepared as a special, comprehensive study of the area involved, as part of the EIR on a general plan, or as a data base accumulated by indexing EIRs prepared for individual projects or programs in the area involved.

(2) The information contained in a master environmental assessment should be reviewed periodically and revised as needed so that it is accurate and current.

(3) When advantageous to do so, master environmental assessments may be prepared through a joint exercise of powers agreement with neighboring local agencies or with the assistance of the appropriate Council of Governments.

(d) Uses.

(1) A master environmental assessment can identify the environmental characteristics and constraints of an area. This information can be used to influence the design and location of individual projects.

(2) A master environmental assessment may provide information agencies can use in initial studies to decide whether certain environmental effects are likely to occur and whether certain effects will be significant.

(3) A master environmental assessment can provide a central source of current information for use in preparing individual EIRs and negative declarations.

(4) Relevant portions of a master environmental assessment can be referenced and summarized in EIRs and negative declarations.

(5) A master environmental assessment can assist in identifying long range, areawide, and cumulative impacts of individual projects proposed in the area covered by the assessment.

(6) A master environmental assessment can assist a city or county in formulating a general plan or any element of such a plan by identifying environmental characteristics and constraints that need to be addressed in the general plan.

(7) A master environmental assessment can serve as a reference document to assist public agencies which review other environmental documents dealing with activities in the area covered by the assessment. The public agency preparing the assessment should forward a completed copy to each agency which will review projects in the area.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21003, Public Resources Code.

§ 15170. Joint EIR–EIS.

A lead agency under CEQA may work with a federal agency to prepare a joint document which will meet the requirements of both CEQA and NEPA. Use of such a joint document is described in Article 14, beginning with Section 15220.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.5 and 21083.7, Public Resources Code.

Article 11.5. Master Environmental Impact Report

§ 15175. Master EIR.

(a) The Master EIR procedure is an alternative to preparing a project EIR, staged EIR, or program EIR for certain projects which will form the basis for later decision making. It is intended to streamline the later environmental review of projects or approval included within the project, plan or program analyzed in the Master EIR. Accordingly, a Master EIR shall, to the greatest extent feasible, evaluate the cumulative impacts, growth inducing impacts, and irreversible significant effects on the environment of subsequent projects.

(b) A lead agency may prepare a Master EIR for any of the following classes of projects:

(1) A general plan, general plan update, general plan element, general plan amendment, or specific plan.

(2) Public or private projects that will be carried out or approved pursuant to, or in furtherance of, a redevelopment plan.

(3) A project that consists of smaller individual projects which will be carried out in phases.

(4) A rule or regulation which will be implemented by later projects.

(5) Projects that will be carried out or approved pursuant to a development agreement.

(6) A state highway project or mass transit project which will be subject to multiple stages of review or approval.

(7) A plan proposed by a local agency, including a joint powers authority, for the reuse of a federal military base or reservation that has been closed or is proposed for closure by the federal government.

(8) A regional transportation plan or congestion management plan.

(9) Regulations adopted by the California Department of Fish and Game for the regulation of hunting and fishing.

(c) A lead agency may develop and implement a fee program in accordance with applicable provisions of law to generate the revenue necessary to prepare a Master EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21156, 21157 and 21089, Public Resources Code.

HISTORY

1. New article 11.5 (sections 15175–15175.5) and section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15176. Contents of a Master EIR.

A lead agency shall include in a Master EIR all of the following:

(a) A detailed discussion as required by Section 15126.

(b) A description of anticipated subsequent projects that are within the scope of the Master EIR, including information with regard to the kind, size, intensity, and location of the subsequent projects, including, but not limited to all of the following:

(1) The specific type of project anticipated to be undertaken such as a single family development, office–commercial development, sewer line installation or other activities.

(2) The maximum and minimum intensity of any anticipated subsequent project, such as the number of residences in a residential development, and with regard to a public works facility, its anticipated capacity and service area.

(3) The anticipated location for any subsequent development projects, and, consistent with the rule of reason set forth in Section 15126, subdivision (d)(5), alternative locations for any such projects.

(4) A capital outlay or capital improvement program, or other scheduling or implementing device that governs the submission and approval of

subsequent projects, or an explanation as to why practical planning considerations render it impractical to identify any such program or scheduling or other device at the time of preparing the Master EIR.

(c) A description of potential impacts of anticipated projects for which there is not sufficient information reasonably available to support a full assessment of potential impacts in the Master EIR. This description shall not be construed as a limitation on the impacts which may be considered in a focused EIR.

(d) Where a Master EIR is prepared in connection with a project identified in subdivision (b)(1) of section 15175, the anticipated subsequent projects included within a Master EIR may consist of later planning approvals, including parcel–specific approvals, consistent with the overall planning decision (e.g., general plan, or specific plan, or redevelopment plan) for which the Master EIR has been prepared. Such subsequent projects shall be adequately described for purposes of subdivision (b) or of this section (15176) if the Master EIR and any other documents embodying or relating to the overall planning decision identify the land use designations and the permissible densities and intensities of use for the affected parcel(s). The proponents of such subsequent projects shall not be precluded from relying on the Master EIR solely because that document did not specifically identify or list, by name, the subsequent project as ultimately proposed for approval.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21157, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15177. Subsequent Projects Within the Scope of the MEIR.

(a) After a Master EIR has been prepared and certified, subsequent projects which the lead agency determines as being within the scope of the Master EIR will be subject to only limited environmental review.

(b) Except as provided in subsection (2) of this subdivision, neither a new environmental document nor the preparation of findings pursuant to section 15091 shall be required of a subsequent project when all of the following requirements are met:

(1) The lead agency for the subsequent project is the lead agency or any responsible agency identified in the Master EIR.

(2) The lead agency for the subsequent project prepares an initial study on the proposal. The initial study shall analyze whether the subsequent project was described in the Master EIR and whether the subsequent project may cause any additional significant effect on the environment which was not previously examined in the Master EIR.

(3) The lead agency for the subsequent project determines, on the basis of written findings, that no additional significant environmental effect will result from the proposal, no new additional mitigation measures or alternatives may be required, and that the project is within the scope of the Master EIR. "Additional significant environmental effect" means any project–specific effect which was not addressed as a significant effect in the Master EIR.

(c) Whether a subsequent project is within the scope of the Master EIR is a question of fact to be determined by the lead agency based upon a review of the initial study to determine whether there are additional significant effects or new additional mitigation measures or alternatives required for the subsequent project that are not already discussed in the Master EIR.

(d) Prior to approval of the proposed subsequent project, the lead agency shall incorporate all feasible mitigation measures or feasible alternatives appropriate to the project as set forth in the Master EIR and provide notice in the manner required by Section 15087.

(e) When the lead agency approves a project pursuant to this section, the lead agency shall file a notice in the manner required by Section 15075.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21157, 21157.6 and 21158, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15178. Subsequent Projects Identified in the MEIR.

(a) When a proposed subsequent project is identified in the Master EIR, but the lead agency cannot make a determination pursuant to Section 15177 that the subsequent project is within the scope of the Master EIR, and the lead agency determines that the cumulative impacts, growth inducing impacts and irreversible significant effects analysis in the Master EIR is adequate for the subsequent project, the lead agency shall prepare a mitigated negative declaration or a focused EIR if, after preparing an initial study, the lead agency determines that the project may result in new or additional significant effects. Whether the cumulative impacts, growth inducing impacts and irreversible significant effects analyses are adequate is a question of fact to be determined by the lead agency based upon a review of the proposed subsequent project in light of the Master EIR.

(b) A lead agency shall prepare a mitigated negative declaration for any proposed subsequent project if both of the following occur:

(1) The initial study prepared pursuant to Section 15177 has identified potentially new or additional significant environmental effects that were not analyzed in the Master EIR; and

(2) Feasible mitigation measures or alternatives will be incorporated to revise the subsequent project before the negative declaration is released for public review pursuant to Section 15073 in order to avoid or mitigate the identified effects to a level of insignificance.

(c) A lead agency shall prepare a focused EIR if the subsequent project may have a significant effect on the environment and a mitigated negative declaration pursuant to subdivision (b) of this section cannot be prepared.

(1) The focused EIR shall incorporate by reference the Master EIR and analyze only the subsequent project's additional significant environmental effects and any new or additional mitigation measures or alternatives that were not identified and analyzed by the Master EIR. "Additional significant environmental effects" are those project–specific effects on the environment which were not addressed as significant in the Master EIR.

(2) A focused EIR need not examine those effects which the lead agency, prior to public release of the focused EIR, finds, on the basis of the initial study, related documents, and commitments from the proponent of a subsequent project, have been mitigated in one of the following manners:

(A) Mitigated or avoided as a result of mitigation measures identified in the Master EIR which the lead agency will require as part of the approval of the subsequent project;

(B) Examined at a sufficient level of detail in the Master EIR to enable those significant effects to be mitigated or avoided by specific revisions to the project, the imposition of conditions of approval, or by other means in connection with approval of the subsequent project; or

(C) The mitigation or avoidance of which is the responsibility of and within the jurisdiction of another public agency and is, or can and should be, undertaken by that agency.

(3) The lead agency's findings pursuant to subdivision (2) shall be included in the focused EIR prior to public release pursuant to Section 15087.

(4) A focused EIR prepared pursuant to this section shall analyze any significant environmental effects when:

(A) Substantial new or additional information shows that the adverse environmental effect may be more significant that was described in the Master EIR; or

(B) Substantial new or additional information shows that mitigation measures or alternatives which were previously determined to be infeasible are feasible and will avoid or reduce the significant effects of the subsequent project to a level of insignificance.

(d) A lead agency shall file a notice of determination shall be filed pursuant to Section 15075 if a project has been approved for which a mitigated negative declaration has been prepared pursuant to this section and a notice of determination shall be filed pursuant to Section 15094 if a

project has been approved for which a focused EIR has been prepared pursuant to this section.

(e) When a lead agency determines that the cumulative impacts, growth inducing impacts and irreversible significant effects analysis in the Master EIR is inadequate for the subsequent project, the subsequent project is no longer eligible for the limited environmental review available under the Master EIR process and shall be reviewed according to Article 7 (commencing with Section 15080) of these guidelines. The lead agency shall tier the project specific EIR upon the Master EIR to the extent feasible under Section 15152.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21081(a)(2), 21157.5 and 21158, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15179. Limitations on the Use of the Master EIR.

The certified Master EIR shall not be used in accordance with this article if either (i) it was certified more than five years prior to the filing of an application for a later project, or (ii) a project not identified in the certified Master EIR as an anticipated subsequent project is approved and the approved project may affect the adequacy of the Master EIR, unless the lead agency does one of the following:

(a) Reviews the Master EIR and finds that no substantial changes have occurred with respect to the circumstances under which the Master EIR was certified, or that there is no new available information which was not known and could not have been known at the time the Master EIR was certified; or

(b) Prepares a subsequent or supplemental EIR that updates or revises the Master EIR and which either (i) is incorporated into the previously certified Master EIR, or (ii) references any deletions, additions or other modifications to the previously certified Master EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21157.6, Public Resources Code.

HISTORY

New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15179.5. Focused EIRs and Small Projects.

(a) When a project is a multiple family residential development of 100 units or less or is a residential and commercial or retail mixed–use commercial development of not more then 100,000 square feet, whether or not the project is identified in the Master EIR, a focused EIR shall be prepared pursuant to this section when the following conditions are met:

(1) The project is consistent with a general plan, specific plan, community plan, or zoning ordinance for which an EIR was prepared within five years of certification of the focused EIR; and

(2) The parcel on which the project is to be developed is either:

(A) Surrounded by immediately contiguous urban development;

(B) Previously developed with urban uses; or

(C) Within one–half mile of an existing rail transit station.

(b) A focused environmental impact report prepared pursuant to this section shall be limited to a discussion of potentially significant effects on the environment specific to the project, or which substantial new information shows will be more significant than described in the prior environmental impact report. No discussion shall be required of alternatives to the project, cumulative impacts of the project, or the growth inducing impacts of the project.

(c) This section does not apply where the lead agency can make a finding pursuant to Section 15177 that the subsequent project is within the scope of the Master EIR, where the lead agency can prepare a mitigated negative declaration or focused EIR pursuant to Section 15178, or where, pursuant to Section 15162 or Section 15163, the environmental impact report referenced in subdivision (a)(1) of this section must be updated through the preparation of a subsequent environmental impact report or supplemental environmental impact report.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21158.5, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

Article 12. Special Situations

§ 15180. Redevelopment Projects.

(a) All public and private activities or undertakings pursuant to or in furtherance of a redevelopment plan constitute a single project, which shall be deemed approved at the time of adoption of the redevelopment plan by the legislative body. The EIR in connection with the redevelopment plan shall be submitted in accordance with Section 33352 of the Health and Safety Code.

(b) An EIR on a redevelopment plan shall be treated as a program EIR with no subsequent EIRs required for individual components of the redevelopment plan unless a subsequent EIR or a supplement to an EIR would be required by Section 15162 or 15163.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21090, Public Resources Code.

HISTORY

1. New Article 12 (Sections 15190–15192) filed 1–6–76 as an emergency; effective upon filing (Register 76, No. 2).
2. Certificate of Compliance filed 4–2–76 (Register 76, No. 14).
3. Repealer of Article 12 (Sections 15190–15193) and new Article 12 (Sections 15180–15185) filed 7–13–83; effective 8–1–83 (Register 83, No. 29). For prior history, see Registers 82, No. 2; 81, Nos. 30 and 45; 80, No. 15; 79, Nos. 18, 23 and 30; and 78, No. 33.
4. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15181. Housing and Neighborhood Commercial Facilities in Urbanized Areas.

(a) A lead agency may approve a project involving the construction of housing or neighborhood commercial facilities in an urbanized area with the use of an EIR or negative declaration previously prepared for a specific plan, local coastal program, or port master plan if the lead agency complies with the requirements of this section.

(b) The procedures for complying with this section are as follows:

(1) The lead agency shall conduct an initial study to determine whether the project may have one or more significant effects on the environment.

(2) The lead agency shall give notice of its proposed use of a previously prepared EIR to all persons who had submitted a written request for notice and shall also give notice by either:

(A) Posting notice on and off the site in the area where the project would be located, or

(B) Mailing notice directly to owners of property contiguous to the project site.

(3) The lead agency shall make the following findings with regard to planning and the previously prepared EIR.

(A) That the project is consistent with either:

1. A specific plan which was adopted for the area pursuant to Article 8 (commencing with Section 65450), Article 9 (commencing with Section 65500), and Article 10 (commencing with Section 65550) of Chapter 3 of Title 7 of the Government Code, or

2. A local coastal program or port master plan certified pursuant to Article 2 (commencing with Section 30510) of Chapter 6 of Division 20 of the Public Resources Code.

(B) That the specific plan, local coastal program, or port master plan was adopted not more than five years prior to the finding made pursuant to this subsection and that the method of adoption was the procedure specified by Article 9 (commencing with Section 65500) of Chapter 3 of Title 7 of the Government Code for adopting specific plans and regulations.

(C) That the specific plan or local coastal program or port master plan was the subject of a certified environmental impact report.

(D) That the environmental impact report is sufficiently detailed so that all the significant effects of the project on the environment and measures necessary to mitigate or avoid any such effects can be determined.

This examination of the previously prepared EIR shall include a further, specific finding as to:

1. Whether there would be any significant physical effects on existing structures and neighborhoods of historical or aesthetic significance if any exist in the area covered by the plan or program, and

2. Whether measures necessary to mitigate or avoid such effects are included in the EIR.

(E) That a subsequent EIR is not required pursuant to Public Resources Code Section 21166 and Guidelines Section 15162.

(4) The lead agency shall make one or more findings as required by Section 15091 with regard to mitigating or avoiding each significant effect that the project would have on the environment.

(5) The lead agency shall file a notice of determination with the county clerk if the lead agency approves the project.

(c) As used in this section, "neighborhood commercial facilities" means those commercial facilities which are an integral part of a project involving the construction of housing and which will serve the residents of such housing.

(d) As used in this section, "urbanized area" means only those areas mapped and designated as urbanized by the U.S. Bureau of the Census.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.7, Public Resources Code.

§ 15182. Residential Projects Pursuant to a Specific Plan.

(a) Exemption. Where a public agency has prepared an EIR on a specific plan after January 1, 1980, no EIR or negative declaration need be prepared for a residential project undertaken pursuant to and in conformity to that specific plan if the project meets the requirements of this section.

(b) Scope. Residential projects covered by this section include but are not limited to land subdivisions, zoning changes, and residential planned unit developments.

(c) Limitation. This section is subject to the limitation that if after the adoption of the specific plan, an event described in Section 15162 should occur, this exemption shall not apply until the city or county which adopted the specific plan completes a subsequent EIR or a supplement to an EIR on the specific plan. The exemption provided by this section shall again be available to residential projects after the lead agency has filed a Notice of Determination on the specific plan as reconsidered by the subsequent EIR or supplement to the EIR.

(d) Alternative. This section provides an alternative to the procedure described in Section 15181.

(e) Fees. The lead agency has authority to charge fees to applicants for projects which benefit from this section. The fees shall be calculated in the aggregate to defray but not to exceed the cost of developing and adopting the specific plan including the cost of preparing the EIR.

(f) Statute of Limitations. A court action challenging the approval of a project under this section for failure to prepare a supplemental EIR shall be commenced within 30 days after the lead agency's decision to carry out or approve the project in accordance with the specific plan.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 65453, Government Code.

§ 15183. Residential Projects Consistent with a Community Plan, General Plan, or Zoning.

(a) In approving a residential project meeting the requirements of this section, a public agency shall limit its examination of environmental effects under CEQA to effects which:

(1) Are peculiar to the project or the parcel on which the project would be located, although the effect may occur on or off the site of the project, and

(2) Were not analyzed as significant effects in a prior EIR on the zoning, general plan or community plan with which the residential project is consistent.

(b) This section shall apply only to residential projects which meet the following conditions:

(1) The project is consistent with:

(A) A community plan adopted as part of a general plan or zoning action which zoned or designated the parcel on which the project would be located to accommodate a particular density of residential development, or

(B) A general plan of a local agency, and

(2) An EIR was certified by the lead agency for the zoning action or the general plan.

(c) This section shall limit the analysis of only those significant environmental effects for which:

(1) Each public agency with authority to mitigate any of the significant effects on the environment identified in the EIR on the planning or zoning action undertakes or requires others to undertake mitigation measures specified in the EIR which the lead agency found to be feasible, and

(2) The lead agency makes a finding at a public hearing as to whether the feasible mitigation measures will be undertaken.

(d) An effect of a project on the environment shall not be considered peculiar to the project or the parcel for the purposes of this section if uniformly applied development policies or standards have been previously adopted by the city or county with a finding that the development policies or standards will substantially mitigate that environmental effect when applied to future projects. The finding shall be based on substantial evidence which need not include an EIR. Examples of uniformly applied development policies or standards include:

(1) Parking ordinances,

(2) Public access requirements,

(3) Grading ordinances.

(e) An environmental effect shall not be considered peculiar to the project or parcel solely because no uniformly applied development policy or standard is applicable to it.

(f) Where a community plan meets the requirements of this section, any rezoning action consistent with the community plan shall be treated as a residential project subject to this section.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083.3, Public Resources Code.

HISTORY

1. Amendment of section heading and subsections (a)(2) and (b) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15184. State Mandated Local Projects.

Whenever a state agency issues an order which requires a local agency to carry out a project subject to CEQA, the following rules apply:

(a) If an EIR is prepared for the project, the local agency shall limit the EIR to considering those factors and alternatives which will not conflict with the order.
