STATE MANDATES

Re: TEST CLAIM OF Clovis Unified School District
Statutes of 2002/Chapter 1121
California Environmental Quality Act (CEQA)

Dear Ms. Higashi:

Enclosed are the original and seven copies of the Clovis Unified School District test claim for the above referenced mandate.

I have been appointed by the District as its representative for the test claim. The District requests that all correspondence originating from your office and documents subject to service by other parties be directed to me, with copies to:

William C. McGuire,
Associate Superintendent
Clovis Unified School District
1450 Herndon Avenue
Clovis, California 95811-0599

AND Thomas J. Donner, Executive Vice President,
Business and Administration
Santa Monica Community College District
1900 Pico Boulevard
Santa Monica, California 90405-1628

The Commission regulations provide for an informal conference of the interested parties

within thirty days. If this meeting is deemed necessary, I request that it be conducted in conjunction with a regularly scheduled Commission hearing.

Sincerely,

For Keith B. Petersen

C: William C. McGuire, Associate Superintendent
Clovis Unified School District

Thomas J. Donner, Executive Vice President,
Business and Administration
Santa Monica Community College District

Test Claim Completeness Checklist

X = Requirement was not met. Test claim is deemed incomplete.

Title 2 California Code of Regulations, Section 1183 - Test Claim Requirements.

(d) Content of a Test Claim. All test claims, or amendments thereto, shall be filed on a form provided by the commission. All test claims or amendments thereto shall contain at least the following elements and documents:

✓ (d)(1) Requirement No. 1 - A copy of the statute, or executive order alleged to contain or impact a mandate.

✓ (d)(1) Requirement No. 2 - The specific sections of chaptered bill or executive order alleged to contain a mandate must be identified.

✓ (d)(2) Requirement No. 1 - A copy of relevant portions of state constitutional provisions, federal statutes, and executive orders that may impact the alleged mandate and a copy of administrative decisions and court decisions that may impact the alleged mandate.

___ (d)(2) Requirement No. 2 - The specific chapters, articles, sections, or page numbers must be identified.

✓ (d)(3) Requirement No. 1 - A written narrative which includes a detailed description of:

___ (A) What activities were required under prior law or executive order, and

___ (B) What activities are required under the statute or executive order alleged to contain or impact a mandate and

___ (C) How any increased level of service and/or cost was incurred or is expected to be incurred.

✓ (d)(4) Requirement No. 1 - If the narrative describing an alleged mandate involves more than discussion of statutes or regulations or legal argument and utilizes assertions or representations of fact, such assertions or representations must be supported by documentary evidence which shall be submitted with the test claim.

___ (d)(4) Requirement No. 2 - All documentary evidence must be authenticated by declarations under penalty of perjury signed by persons who are authorized and competent to do so and must be based upon the declarant's personal knowledge or information or belief.

___ (d)(5) Requirement No. 1 - A statement of actual and/or estimated costs which result from the alleged mandate should be identified by function and by fiscal year.

PART I. AUTHORITY FOR THE CLAIM

The Commission on State Mandates has the authority pursuant to Government Code section 17551(a) to "...hear and decide upon a claim by a local agency or school district that the local agency or school district is entitled to be reimbursed by the state for costs mandated by the state as required by Section 6 of Article XIII B of the California Constitution." Clovis Unified School District is a "school district" as defined in

Government Code section 17519.[1]

PART II. LEGISLATIVE HISTORY OF THE CLAIM

This test claim alleges mandated costs reimbursable by the state for school districts, county offices of education, and community college districts to comply with the requirements of the California Environmental Quality Act.

SECTION 1. LEGISLATIVE HISTORY

Government Code

Chapter 9.3 of the Government Code, commencing with Section 66030, governs the Mediation and Resolution of Land Use Disputes.

Chapter 799, Statutes of 1996, amended Government Code Section 66031.[2]

---

[1] Government Code Section 17519, as added by Chapter 1459/84:

"School District" means any school district, community college district, or county superintendent of schools."

[2] Government Code Section 66031, added by Chapter 300, Statutes of 1994, Section 1, as amended by Chapter 799, Statutes of 1996, Section 7:

"(a) Notwithstanding any other provision of law, any action brought in the superior court relating to any of the following subjects may be subject to a mediation proceeding conducted pursuant to this chapter:

(1) The approval or denial by a public agency of any development project.

(2) Any act or decision of a public agency made pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code).

(3) The failure of a public agency to meet the time limits specified in Chapter 4.5 (commencing with Section 65920), commonly known as the Permit Streamlining Act, or in the Subdivision Map Act (Division 2 (commencing with Section 66410)).

(4) Fees determined pursuant to Sections 53080 to 53082, inclusive, or Chapter 4.9 (commencing with Section 65995).

Subdivision (a)(1) provides that any act or decision of a public agency made pursuant to

(5) Fees determined pursuant to Chapter 5 (commencing with Section 66000).

(6) The adequacy of a general plan or specific plan adopted pursuant to Chapter 3 (commencing with Section 65100).

(7) The validity of any sphere of influence, urban service area, change of organization or reorganization, or any other decision made pursuant to the Cortese-Knox Local Government Reorganization Act (Division 3 (commencing with Section 56000) of Title 5).

(8) The adoption or amendment of a redevelopment plan pursuant to the Community Redevelopment Law (Part 1 (commencing with Section 33000) of Division 24 of the Health and Safety Code).

(9) The validity of any zoning decision made pursuant to Chapter 4 (commencing with Section 65800).

(10) The validity of any decision made pursuant to Article 3.5 (commencing with Section 21670) of Chapter 4 of Part 1 of Division 9 of the Public Utilities Code.

(b) Within five days after the deadline for the respondent or defendant to file its reply to an action, the court may invite the parties to consider resolving their dispute by selecting a mutually acceptable person to serve as a mediator, or an organization or agency to provide a mediator.

(c) In selecting a person to serve as a mediator, or an organization or agency to provide a mediator, the parties shall consider the following:

(1) The council of governments having jurisdiction in the county where the dispute arose.

(2) Any subregional or countywide council of governments in the county where the dispute arose.

(3) The Office of Permit Assistance within the Trade and Commerce Agency, pursuant to its authority in Article 1 (commencing with Section 15399.50) of Chapter 11 of Part 6.7 of Division 3 of Title 2.

(4) Any other person with experience or training in mediation including those with experience in land use issues, or any other organization or agency which can provide a person with experience or training in mediation, including those with experience in land use issues.

(d) If the court invites the parties to consider mediation, the parties shall notify the court within 30 days if they have selected a mutually acceptable person to serve as a mediator. If the parties have not selected a mediator within 30 days, the action shall proceed. The court shall not draw any implication, favorable or otherwise, from the refusal by a party to accept the invitation by the court to consider mediation. Nothing in this section shall preclude the parties from using mediation at any other time while the action is pending."

the California Environmental Quality Act (Division 13 (commencing with Section 21000 of the Public Resources Code) is subject to a mediation proceeding conducted pursuant to this Chapter. Subdivision (b) provides that, within five days after the deadline for the respondent or defendant to file its reply to an action, the court may invite the parties to consider resolving their dispute by selecting a mutually acceptable person to serve as a mediator, or an organization or agency to provide a mediator. Subdivision (d) provides that, if the court invites the parties to consider mediation, the parties shall notify the court within 30 days if they have selected a mutually acceptable person to serve as a mediator. If the parties have not selected a mediator within 30 days, the action shall proceed.

Chapter 300, Statutes of 1994, Section 1, added Government Code Section 66034[3] and provides that, if the mediation does not resolve the action, the court may, in its discretion, schedule a settlement conference before a judge of the superior court.

Chapter 1016, Statutes of 2002, amended Government Code Section 66037[4] and

---

[3] Government Code Section 66034, added by Chapter 300, Statutes of 1994, Section 1:

"If the mediation does not resolve the action, the court may, in its discretion, schedule a settlement conference before a judge of the superior court. If the action is later heard on its merits, the judge hearing the action shall not be the same judge who conducted the settlement conference, except in counties with only one judge of the superior court."

[4] Government Code Section 66037, added by Chapter 300, Statutes of 1994, Section 1, as amended by Chapter 1016, Statutes of 2002, Section 9:

"No action filed on or after January 1, 2006, shall be subject to this chapter unless a later enacted statute, which is chaptered before January 1, 2006, extends this date or

provides a sunset date to the chapter No action filed on or after January 1, 2006, shall be subject to this chapter unless a later enacted statute, which is chaptered before January 1, 2006, extends this date or deletes this section.

Education Code

Chapter 277, Statutes of 1996, Section 2, added Education Code Section 17025[5]. Subdivision (a) provides that the board shall not authorize a contract for the construction of any new school, or for the addition to, or reconstruction or alteration of, any existing building, for lease-purchase to any school district unless the applicant district has submitted plans therefor to the Department of General Services and obtained the written approval of the department pursuant to Article 3 (commencing with Section 17280) of Chapter 3 of Part 10.5. Subdivision (b) requires that the board, or the self-certifying

---

deletes this section."

[5] Education Code Section 17025, added by Chapter 277, Statutes of 1996. Section 2:

"(a) The board shall not authorize a contract for the construction of any new school, or for the addition to, or reconstruction or alteration of, any existing building, for lease-purchase to any school district unless the applicant district has submitted plans therefor to the Department of General Services and obtained the written approval of the department pursuant to Article 3 (commencing with Section 17280) of Chapter 3 of Part 10.5.

(b) The board, or the self-certifying district, as applicable, shall certify the compliance of a project with Sections 17212, 17212.5, and 17213, with Division 13 (commencing with Section 21000) of the Public Resources Code, and with any other law that applies to that project, but may require documentation of compliance only as to requirements that are applicable under this chapter. Notwithstanding any other law, for purposes of Division 13 (commencing with Section 21000) of the Public Resources Code, the applicant district shall be deemed to be the "lead agency" with regard to any project funded for that district under this chapter."

district, as applicable, shall certify the compliance of a project with Division 13 (commencing with Section 21000) of the Public Resources Code. Subdivision (b) also provides that notwithstanding any other law, for purposes of Division 13 (commencing with Section 21000) of the Public Resources Code, the applicant district shall be deemed to be the "lead agency" with regard to any project funded for that district.

Part A - Public Resources Code

Division 13 (commencing with Section 21000) of the Public Resources Code sets forth the California Environmental Quality Act.[6]

Chapter 1433, Statutes of 1970, Section 1, added Public Resources Code Section 21000 which states the legislative intent concerning environmental quality.

Chapter 1433, Statutes of 1970, Section 1, added Public Resources Code Section 21001 which states additional intentions of the Legislature concerning environmental quality.

Chapter 1514, Statutes of 1984, Section 1, added Public Resources Code Section 21001.1 and states the further findings of the Legislature and declares that it is the policy of the state that projects to be carried out by public agencies be subject to the same level of review and consideration under this division as that of private projects required to be approved by public agencies.

Chapter 1230, Statutes of 1994, Section 1, last amended Public Resources Code

[6] Copies of all Public Resources Code sections cited below are attached hereto as Exhibit 4 and are incorporated herein by reference.

Section 21002.1 [added in 1976]. Subdivision (a) provides that the purpose of an environmental impact report is to identify the significant effects on the environment of a project, to identify alternatives to the project, and to indicate the manner in which those significant effects can be mitigated or avoided. Subdivision (b) provides that each public agency shall mitigate or avoid the significant effects on the environment of projects that it carries out or approves whenever it is feasible to do so. Subdivision (c) provides that if economic, social, or other conditions make it infeasible to mitigate one or more significant effects on the environment of a project, the project may nonetheless be carried out or approved at the discretion of a public agency if the project is otherwise permissible under applicable laws and regulations. Subdivision (d) provides that in applying the policies of subdivisions (b) and (c) to individual projects, the responsibility of the lead agency shall differ from that of a responsible agency. The lead agency shall be responsible for considering the effects, both individual and collective, of all activities involved in a project. A responsible agency shall be responsible for considering only the effects of those activities involved in a project which it is required by law to carry out or approve. This subdivision applies only to decisions by a public agency to carry out or approve a project and does not otherwise affect the scope of the comments that the public agency may wish to make pursuant to Section 21104 or 21153. Subdivision (e) provides that to provide more meaningful public disclosure, reduce the time and cost required to prepare an environmental impact report, and focus on potentially significant effects on the environment of a proposed project, lead agencies shall, in accordance

with Section 21100, focus the discussion in the environmental impact report on those potential effects on the environment of a proposed project which the lead agency has determined are or may be significant.

Chapter 1130, Statutes of 1993, Section 2, amended Public Resources Code Section 21003 [added in 1976] and sets forth further legislative findings and declares that it is the policy of the state that:

(a) Local agencies integrate the requirements of this division with planning and environmental review procedures otherwise required by law or by local practice so that all those procedures, to the maximum feasible extent, run concurrently, rather than consecutively.

(b) Documents prepared pursuant to this division be organized and written in a manner that will be meaningful and useful to decisionmakers and to the public.

(c) Environmental impact reports omit unnecessary descriptions of projects and emphasize feasible mitigation measures and feasible alternatives to projects.

(d) Information developed in individual environmental impact reports be incorporated into a data base which can be used to reduce delay and duplication in preparation of subsequent environmental impact reports.

(e) Information developed in environmental impact reports and negative declarations be incorporated into a data base which may be used to make subsequent or supplemental environmental determinations.

(f) All persons and public agencies involved in the environmental review process

be responsible for carrying out the process in the most efficient, expeditious manner in order to conserve the available financial, governmental, physical, and social resources with the objective that those resources may be better applied toward the mitigation of actual significant effects on the environment.

Chapter 85, Statutes of 1985, Section 1, added Public Resources Code Section 21003.1 and sets forth the findings of the Legislature and declares it is the policy of the state that:

(a) Comments from the public and public agencies on the environmental effects of a project shall be made to lead agencies as soon as possible in the review of environmental documents, including, but not limited to, draft environmental impact reports and negative declarations, in order to allow the lead agencies to identify, at the earliest possible time in the environmental review process, potential significant effects of a project, alternatives, and mitigation measures which would substantially reduce the effects.

(b) Information relevant to the significant effects of a project, alternatives, and mitigation measures which substantially reduce the effects shall be made available as soon as possible by lead agencies, other public agencies, and interested persons and organizations.

Chapter 1312, Statutes of 1976, Section 3, amended Public Resources Code Section 21050 [added in 1970] and provides that Division 13 of the Public Resources Code shall be known and may be cited as the California Environmental Quality Act.

Chapter 1312, Statutes of 1976, Section 5, amended Public Resources Code Section 21061 [added in 1972] and provides the definition for "environmental impact report".

Chapter 222, Statutes of 1975, Section 1, amended Public Resources Code Section 21062 [added in 1972] and provides the definition for "local agency" as any public agency other than a state agency, board, or commission.

Chapter 1154, Statutes of 1972, Section 1, added Public Resources Code Section 21063 and provides that "public agency" includes any state agency, board, or commission, any county, city and county, city, regional agency, public district, redevelopment agency, or other political subdivision.

Chapter 1312, Statutes of 1976, Section 6, added Public Resources Code Section 21064 and provides that a "negative declaration" means a written statement briefly describing the reasons that a proposed project will not have a significant effect on the environment and does not require the preparation of an environmental impact report.

Chapter 1230, Statutes of 1994, Section 3, amended Public Resources Code Section 21064.5 [added in 1993] and provides that a "mitigated negative declaration" means a negative declaration prepared for a project when the initial study has identified potentially significant effects on the environment, but (1) revisions in the project plans or proposals made by, or agreed to by, the applicant before the proposed negative declaration and initial study are released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effect on the environment

would occur, and (2) there is no substantial evidence in light of the whole record before the public agency that the project, as revised, may have a significant effect on the environment.

Chapter 1230, Statutes of 1994, Section 4, amended Public Resources Code Section 21065 [added in 1972] to define "project" to mean an activity which may cause either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment, and which is any of the following:

(a) An activity directly undertaken by any public agency.

(b) An activity undertaken by a person which is supported, in whole or in part, through contracts, grants, subsidies, loans, or other forms of assistance from one or more public agencies.

(c) An activity that involves the issuance to a person of a lease, permit, license, certificate, or other entitlement for use by one or more public agencies.

Chapter 1154, Statutes of 1972, Section 1, added Public Resources Code Section 21067 and provides that "lead agency" means the public agency which has the principal responsibility for carrying out or approving a project which may have a significant effect upon the environment.

Chapter 967, Statutes of 1983, Section 1, added Public Resources Code Section 21068.5 and defines "tiering" or "tier" to mean the coverage of general matters and environmental effects in an environmental impact report prepared for a policy, plan, program or ordinance followed by narrower or site-specific environmental impact reports

which incorporate by reference the discussion in any prior environmental impact report and which concentrate on the environmental effects which (a) are capable of being mitigated, or (b) were not analyzed as significant effects on the environment in the prior environmental impact report.

Chapter 1312, Statutes of 1976, Section 7.1, added Public Resources Code Section 21069 which defines "responsible agency" to mean a public agency, other than the lead agency, which has responsibility for carrying out or approving a project.

Chapter 547, Statutes of 1996, Section 1, amended Public Resources Code Section 21080 [added in 1983]. Subdivision (a), provides that, except as otherwise provided in this division, this division shall apply to discretionary projects proposed to be carried out or approved by public agencies, including, but not limited to, the enactment and amendment of zoning ordinances, the issuance of zoning variances, the issuance of conditional use permits, and the approval of tentative subdivision maps. Subdivision (b) sets forth a list of projects to which the division does not apply.

Chapter 659, Statutes of 1989, Section 1, added Public Resources Code Section 21080.09. Subdivision (a) provides that, for purposes of this section, the following definitions apply:

(1) "Public higher education" has the same meaning as specified in Section 66010 of the Education Code.

(2) "Long range development plan" means a physical development and land use plan to meet the academic and institutional objectives for a particular campus of public

higher education.

(b) The selection of a location for a particular campus and the approval of a long range development plan are subject to this division and require the preparation of an environmental impact report. Environmental effects relating to changes in enrollment levels shall be considered for each campus of public higher education in the environmental impact report prepared for the long range development plan for the campus.

(c) The approval of a project on a particular campus of public higher education is subject to this division and may be addressed, subject to the other provisions of this division, in a tiered environmental analysis based upon a long range development plan environmental impact report.

(d) Compliance with this section satisfies the obligations of public higher education pursuant to this division to consider the environmental impact of academic and enrollment plans as they affect campuses, provided that any such plans shall become effective for a campus only after the environmental effects of those plans have been analyzed as required by this division in a long range development plan environmental impact report or tiered analysis based upon that environmental impact report for that campus, and addressed as required by this division.

Chapter 1230, Statutes of 1994, Section 6, amended Public Resources Code Section 21080.1 [added in 1977]. Subdivision (a) provides that the lead agency shall be responsible for determining whether an environmental impact report, a negative

declaration, or a mitigated negative declaration shall be required for any project which is subject to this division.

Chapter 1130, Statutes of 1993, Section 5, amended Public Resources Code Section 21080.3 [added in 1977]. Subdivision (a) provides that, prior to determining whether a negative declaration or environmental impact report is required for a project, the lead agency shall consult with all responsible agencies and with any other public agency which has jurisdiction by law over natural resources affected by the project which are held in trust for the people of the State of California. Prior to that required consultation, the lead agency may informally contact any such agency. Subdivision (b) provides that, in order to expedite the requirements of subdivision (a), the Office of Planning and Research, upon request of a lead agency, shall assist the lead agency in determining the various responsible agencies for a proposed project.

Chapter 738, Statutes of 2000, Section 1, amended Public Resources Code Section 21080.4 [added in 1977]. Subdivision (a) provides that, if a lead agency determines that an environmental impact report is required for a project, the lead agency shall immediately send notice of that determination by certified mail or an equivalent procedure to each responsible agency, the Office of Planning and Research, and those public agencies having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California. Subdivision (b) provides that, to expedite the requirements of subdivision (a), the lead agency, any responsible agency, the Office of Planning and Research, or a public agency having jurisdiction by

law over natural resources affected by the project that are held in trust for the people of the State of California, may request one or more meetings between representatives of those agencies and the office for the purpose of assisting the lead agency to determine the scope and content of the environmental information that any of those responsible agencies, the office, or the public agencies may require. The meetings shall be convened by the lead agency as soon as possible, but not later than 30 days after the date that the meeting was requested.

Chapter 1294, Statutes of 1994, Section 2, amended Public Resources Code Section 21081 [added in 1976] and provides that no public agency shall approve or carry out a project for which an environmental impact report has been certified which identifies one or more significant effects on the environment that would occur if the project is approved or carried out unless both of the following occur:

(a) The public agency makes one or more of the following findings with respect to each significant effect:

(1) Changes or alterations have been required in, or incorporated into, the project which mitigate or avoid the significant effects on the environment.

(2) Those changes or alterations are within the responsibility and jurisdiction of another public agency and have been, or can and should be, adopted by that other agency.

(3) Specific economic, legal, social, technological, or other considerations, including considerations for the provision of employment opportunities for highly

trained workers, make infeasible the mitigation measures or alternatives identified in the environmental impact report.

(b) With respect to significant effects which were subject to a finding under paragraph (3) of subdivision (a), the public agency finds that specific overriding economic, legal, social, technological, or other benefits of the project outweigh the significant effects on the environment.

Chapter 1294, Statutes of 1994, Section 4.5, amended Public Resources Code Section 21081.6 [added in 1988]. Subdivision (a) provides that, when making the findings required by paragraph (1) of subdivision (a) of Section 21081 or when adopting a mitigated negative declaration pursuant to paragraph (2) of subdivision (c) of Section 21080, the following requirements shall apply:

(1) The public agency shall adopt a reporting or monitoring program for the changes made to the project or conditions of project approval, adopted in order to mitigate or avoid significant effects on the environment.

(2) The lead agency shall specify the location and custodian of the documents or other material which constitute the record of proceedings upon which its decision is based.

Subdivision (b) requires that a public agency shall provide that measures to mitigate or avoid significant effects on the environment are fully enforceable through permit conditions, agreements, or other measures.

Chapter 1312, Statutes of 1976, Section 9.5, amended Public Resources Code

Section 21082 [added in 1972] to require all public agencies adopt by ordinance, resolution, rule, or regulation, objectives, criteria, and procedures for the evaluation of projects and the preparation of environmental impact reports pursuant to this division.

Chapter 1052, Statutes of 2002, Section 1, amended Public Resources Code Section 21082.1 [added in 1976]. Subdivision (a), provides that any draft environmental impact report, environmental impact report, negative declaration, or mitigated negative declaration prepared pursuant to the requirements of this division shall be prepared directly by, or under contract to, a public agency. Subdivision (c) requires that the lead agency shall do all of the following:

(1) Independently review and analyze any report or declaration required by this division.

(2) Circulate draft documents that reflect its independent judgment.

(3) As part of the adoption of a negative declaration or a mitigated negative declaration, or certification of an environmental impact report, find that the report or declaration reflects the independent judgment of the lead agency.

(4) Submit a sufficient number of copies of the draft environmental impact report, proposed negative declaration, or proposed mitigated negative declaration, and a copy of the report or declaration in an electronic form as required by the guidelines adopted pursuant to Section 21083, to the State Clearinghouse for review and comment by state agencies, if any of the following apply:

(A) A state agency is any of the following:

(i) The lead agency.

(ii) A responsible agency.

(iii) A trustee agency.

(B) A state agency otherwise has jurisdiction by law with respect to the project.

(C) The proposed project is of sufficient statewide, regional, or areawide environmental significance as determined pursuant to the guidelines certified and adopted pursuant to Section 21083.

Chapter 1131, Statutes of 1993, Section 7, amended Public Resources Code Section 21082.2 [added in 1984]. Subdivision (a) requires a lead agency to determine whether a project may have a significant effect on the environment based on substantial evidence in light of the whole record. Subdivision (d) requires a lead agency to prepare an environmental impact report if there is substantial evidence, in light of the whole record before the lead agency, that a project may have a significant effect on the environment.

Chapter 1052, Statutes of 2002, Section 2, amended Public Resources Code Section 21083 [added in 1972] to require public agencies to implement the guidelines developed by the Office of Planning and Research. The guidelines were to specifically include criteria for public agencies to follow in determining whether or not a proposed project may have a "significant effect on the environment", and include procedures for determining the lead agency pursuant to the provisions of Section 21165.

Chapter 375, Statutes of 1993, Section 1, amended Public Resources Code

Section 21083.2 [added in 1982]. Subdivision (a) provides that, as part of the determination made pursuant to Section 21080.1, the lead agency shall determine whether the project may have a significant effect on archaeological resources. If the lead agency determines that the project may have a significant effect on unique archaeological resources, the environmental impact report shall address the issue of those resources. Subdivision (b) provides that, if it can be demonstrated that a project will cause damage to a unique archaeological resource, the lead agency may require reasonable efforts to be made to permit any or all of these resources to be preserved in place or left in an undisturbed state. Subdivision (c) provides that, to the extent that unique archaeological resources are not preserved in place or not left in an undisturbed state, mitigation measures shall be required as provided in this subdivision. Subdivision (g) provides that, as used in this section, "unique archaeological resource" means an archaeological artifact, object, or site about which it can be clearly demonstrated that, without merely adding to the current body of knowledge, there is a high probability that it meets any of the following criteria:

(1) Contains information needed to answer important scientific research questions and that there is a demonstrable public interest in that information.

(2) Has a special and particular quality such as being the oldest of its type or the best available example of its type.

(3) Is directly associated with a scientifically recognized important prehistoric or historic event or person. Subdivision (i) provides that, as part of the objectives, criteria,

and procedures required by Section 21082 or as part of conditions imposed for mitigation, a lead agency may make provisions for archaeological sites accidentally discovered during construction. These provisions may include an immediate evaluation of the find. If the find is determined to be a unique archaeological resource, contingency funding and a time allotment sufficient to allow recovering an archaeological sample or to employ one of the avoidance measures may be required under the provisions set forth in this section. Construction work may continue on other parts of the building site while archaeological mitigation takes place.

Chapter 1052, Statutes of 2002, Section 3, amended Public Resources Code Section 21091 [added in 1989]. Subdivision (a) provides that the public review period for a draft environmental impact report shall not be less than 30 days. If the draft environmental impact report is submitted to the State Clearinghouse for review, the review period shall be at least 45 days, and the lead agency shall provide a sufficient number of copies of the document to the State Clearinghouse for review and comment by state agencies. Subdivision (b) provides that the public review period for a proposed negative declaration or proposed mitigated negative declaration shall not be less than 20 days. If the proposed negative declaration or proposed mitigated negative declaration is submitted to the State Clearinghouse for review, the review period shall be at least 30 days, and the lead agency shall provide a sufficient number of copies of the document to the State Clearinghouse for review and comment by state agencies. Subdivision (c) provides that, notwithstanding subdivisions (a) and (b), if a draft environmental impact

report, proposed negative declaration, or proposed mitigated negative declaration is submitted to the State Clearinghouse for review and the period of review by the State Clearinghouse is longer than the public review period established pursuant to subdivision (a) or (b), whichever is applicable, the public review period shall be at least as long as the period of review by the State Clearinghouse. Subdivision (d)(1) requires the lead agency to consider any comments it receives on a draft environmental impact report, proposed negative declaration, or proposed mitigated negative declaration if those comments are received within the public review period. Subdivision (2)(A) requires a lead agency to evaluate any comments on environmental issues that are received from persons who have reviewed the draft and shall prepare a written response pursuant to subparagraph (B). The lead agency may also respond to comments that are received after the close of the public review period. Subdivision (e)(3) provides that any request for a shortened review period shall only be made in writing by the decisionmaking body of the lead agency to the Office of Planning and Research. The decisionmaking body may designate by resolution or ordinance a person authorized to request a shortened review period. Any designated person shall notify the decisionmaking body of this request.

Chapter 1130, Statutes of 1993, Section 12, amended Public Resources Code Section 21092 [added in 1976]. Subdivision (a) provides that any lead agency which is preparing an environmental impact report or a negative declaration or making a determination pursuant to Section 21157 shall provide public notice of that fact within a

reasonable period of time prior to certification of the environmental impact report or adoption of the negative declaration. Subdivision (b)(1) requires the notice to specify the period during which comments will be received on the draft environmental report or negative declaration, and shall include the date, time, and place of any public meetings or hearings on the proposed project, a brief description of the proposed project and its location, the significant effects on the environment, if any, anticipated as a result of the project, and the address where copies of the draft environmental impact report or negative declaration, and all documents referenced in the draft environmental impact report or negative declaration, are available for review. Subdivision (b)(3) requires the notice required by this section to be given to the last known name and address of all organizations and individuals who have previously requested notice and shall also be given by at least one of the following procedures:

(A) Publication, no fewer times than required by Section 6061 of the Government Code, by the public agency in a newspaper of general circulation in the area affected by the proposed project. If more than one area will be affected, the notice shall be published in the newspaper of largest circulation from among the newspapers of general circulation in those areas.

(B) Posting of notice by the lead agency on- and off-site in the area where the project is to be located.

(C) Direct mailing to the owners and occupants of contiguous property shown on the latest equalized assessment roll.

Chapter 1514, Statutes of 1984, Section 7, added Public Resources Code Section 21092.1 to provide that when significant new information is added to an environmental impact report after notice has been given pursuant to Section 21092, and consultation has occurred pursuant to Sections 21104 and 21153, but prior to certification, the public agency shall give notice again pursuant to Section 21092, and consult again pursuant to Sections 21104 and 21153 before certifying the environmental impact report.

Chapter 867, Statutes of 2001, Section 3, amended Public Resources Code Section 21092.2 [added in 1989] to provide that the notices required pursuant to Sections 21080.4, 21083.9, 21092, 21108, and 21152 shall be mailed to any person who has filed a written request for notices with either the clerk of the governing body or, if there is no governing body, the director of the agency.

Chapter 1130, Statutes of 1993, Section 13, amended Public Resources Code Section 21092.3 [added in 1989] requires that the notices required pursuant to Sections 21080.4 and 21092 for an environmental impact report shall be posted in the office of the county clerk of each county in which the project will be located and shall remain posted for a period of 30 days. The notice required pursuant to Section 21092 for a negative declaration shall be so posted for a period of 20 days, unless otherwise required by law to be posted for 30 days.

Chapter 626, Statutes of 1989, Section 2, added Public Resources Code Section 21092.4. Subdivision (a) provides that, for a project of statewide, regional, or areawide

significance, the lead agency shall consult with transportation planning agencies and public agencies which have transportation facilities within their jurisdictions which could be affected by the project. Consultation shall be conducted in the same manner as for responsible agencies pursuant to this division, and shall be for the purpose of the lead agency obtaining information concerning the project's effect on major local arterials, public transit, freeways, highways, and rail transit service within the jurisdiction of a transportation planning agency or a public agency which is consulted by the lead agency. A transportation planning agency or public agency which provides information to the lead agency shall be notified of, and provided with copies of, environmental documents pertaining to the project.

Chapter 905, Statutes of 1991, Section 2, added Public Resources Code Section 21092.5. Subdivision (a) provides that, at least 10 days prior to certifying an environmental impact report, the lead agency shall provide a written proposed response to a public agency on comments made by that agency which conform with the requirements of this division. Subdivision (b) requires the lead agency to notify any public agency which comments on a negative declaration, of the public hearing or hearings, if any, on the project for which the negative declaration was prepared.

Chapter 1212, Statutes of 1991, Section 3, added Public Resources Code Section 21092.6. Subdivision (a) requires the lead agency to consult the lists compiled pursuant to Section 65962.5 of the Government Code to determine whether the project and any alternatives are located on a site which is included on any list. The lead agency

shall indicate whether a site is on any list not already identified by the applicant, specify the list, and include the information in the statement required pursuant to subdivision (f) of Section 65962.5 of the Government Code, in the notice required pursuant to Section 21080.4, a negative declaration, and a draft environmental impact report. Subdivision (b) provides that if a project or any alternatives are located on a site which is included on any of the lists compiled pursuant to Section 65962.5 of the Government Code and the lead agency did not accurately specify or did not specify any list pursuant to subdivision (a), the California Environmental Protection Agency shall notify the lead agency specifying any list with the site when it receives notice pursuant to Section 21080.4, a negative declaration, and a draft environmental impact report. The California Environmental Protection Agency shall not be liable for failure to notify the lead agency pursuant to this subdivision.

Chapter 1294, Statutes of 1994, Section 6, amended Public Resources Code Section 21094 [added in 1984]. Subdivision (a) provides that, where a prior environmental impact report has been prepared and certified for a program, plan, policy, or ordinance, the lead agency for a later project that meets the requirements of this section shall examine significant effects of the later project upon the environment by using a tiered environmental impact report, except that the report on the later project need not examine those effects which the lead agency determines were either (1) mitigated or avoided pursuant to paragraph (1) of subdivision (a) of Section 21081 as a result of the prior environmental impact report, or (2) examined at a sufficient level of

detail in the prior environmental impact report to enable those effects to be mitigated or avoided by site specific revisions, the imposition of conditions, or by other means in connection with the approval of the later project. Subdivision (b) provides that the section applies only to a later project which the lead agency determines (1) is consistent with the program, plan, policy, or ordinance for which an environmental impact report has been prepared and certified, (2) is consistent with applicable local land use plans and zoning of the city, county, or city and county in which the later project would be located, and (3) is not subject to Section 21166. Subdivision (c) provides that, for purposes of compliance with this section, an initial study shall be prepared to assist the lead agency in making the determinations required by this section. The initial study shall analyze whether the later project may cause significant effects on the environment that were not examined in the prior environmental impact report. Subdivision (d) provides that all public agencies which propose to carry out or approve the later project may utilize the prior environmental impact report and the environmental impact report on the later project to fulfill the requirements of Section 21081. Subdivision (e) provides that when tiering is used pursuant to this section, an environmental impact report prepared for a later project shall refer to the prior environmental impact report and state where a copy of the prior environmental impact report may be examined.

Chapter 1230, Statutes of 1994, Section 9, amended Public Resources Code Section 21100 [added in 1970]. Subdivision (a) requires all lead agencies to prepare, or cause to be prepared by contract, and certify the completion of, an environmental impact

report on any project which they propose to carry out or approve that may have a significant effect on the environment. Subdivision (b) requires the environmental impact report to include a detailed statement setting forth all of the following:

(1) All significant effects on the environment of the proposed project.

(2) In a separate section:

(A) Any significant effect on the environment that cannot be avoided if the project is implemented.

(B) Any significant effect on the environment that would be irreversible if the project is implemented.

(3) Mitigation measures proposed to minimize significant effects on the environment, including, but not limited to, measures to reduce the wasteful, inefficient, and unnecessary consumption of energy.

(4) Alternatives to the proposed project.

(5) The growth-inducing impact of the proposed project.

Subdivision (c) requires that the report shall also contain a statement briefly indicating the reasons for determining that various effects on the environment of a project are not significant and consequently have not been discussed in detail in the environmental impact report.

Chapter 1154, Statutes of 1972, Section 3, amended Public Resources Code Section 21102 [added in 1970] and provides that no state agency, board, or commission shall request funds, nor shall any state agency, board, or commission which authorizes

expenditures of or expenditure for any project, other than a project involving only feasibility or planning studies for possible future actions which the agency, board, or commission has not approved, adopted or funded, which may have a significant effect on the environment unless such request or authorization is accompanied by an environmental impact report. Feasibility and planning studies exempted by this section from the preparation of an environmental impact report shall nevertheless include consideration of environmental factors.

Chapter 1154, Statutes of 1972, Section 10, amended Public Resources Code Section 21150 [added in 1970] to provide that state agencies, boards, and commissions, responsible for allocating state or federal funds on a project-by-project basis to local agencies for any project which may have a significant effect on the environment, shall require from the responsible local governmental agency a detailed statement setting forth the matters specified in Section 21100 prior to the allocation of any funds other than funds solely for projects involving only feasibility or planning studies for possible future actions which the agency, board, or commission has not approved, adopted, or funded.

Chapter 1121, Statutes of 2002, Section 2, amended Public Resources Code Section 21151 [added in 1970]. Subdivision (a) requires all local agencies to prepare, or cause to be prepared by contract, and certify the completion of, an environmental impact report on any project that they intend to carry out or approve which may have a significant effect on the environment. Subdivision (b) provides that, for purposes of this

section, any significant effect on the environment shall be limited to substantial, or potentially substantial, adverse changes in physical conditions which exist within the area as defined in Section 21060.5. Subdivision (c) provides that, if a nonelected decisionmaking body of a local lead agency certifies an environmental impact report, approves a negative declaration or mitigated negative declaration, or determines that a project is not subject to this division, that certification, approval, or determination may be appealed to the agency's elected decisionmaking body, if any.

Chapter 1452, Statutes of 1987, Section 533, added Public Resources Code Section 21151.2 which requires the governing board of each school district, before acquiring title to property for a new school site or for an addition to a present school site, to give the planning commission having jurisdiction notice in writing of the proposed acquisition. The governing board shall not acquire title to the property until the report of the planning commission has been received. If the report does not favor the acquisition of the property for a school site, or for an addition to a present school site, the governing board of the school district shall not acquire title to the property until 30 days after the commission's report is received.

Chapter 1183, Statutes of 1991, Section 18, amended Public Resources Code Section 21151.8 [added in 1990]. Subdivision (a) provides that no environmental impact report or negative declaration shall be approved for any project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless all of the following occur:

(1) The environmental impact report or negative declaration includes information which is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

(A) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

(B) A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

(2) The lead agency preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed schoolsite is located, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed schoolsite which might reasonably be anticipated to emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste. The notification by the lead agency shall include a list of the locations for which information is sought.

(3) The governing board of the school district makes one of the following written findings:

(A) Consultation identified no such facilities specified in paragraph (2).

(B) The facilities specified in paragraph (2) exist, but one of the following conditions applies:

(i) The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes such a finding, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

(4) Each administering agency, air pollution control district, or air quality management district receiving written notification from a lead agency to identify facilities pursuant to paragraph (2) shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. The environmental impact report or negative declaration shall be conclusively presumed to

comply with this section as to the area of responsibility of any agency which does not respond within 30 days.

Chapter 1294, Statutes of 1994, Section 11, amended Public Resources Code Section 21152 [added in 1972]. Subdivision (a) provides that, whenever a local agency approves or determines to carry out a project which is subject to this division, it shall file notice of the approval or the determination within five working days after the approval or determination becomes final, with the county clerk of each county in which the project will be located. The notice shall indicate the determination of the local agency whether the project will, or will not, have a significant effect on the environment and shall indicate whether an environmental impact report has been prepared pursuant to this division. The notice shall also include certification that the final environmental impact report, if one was prepared, together with comments and responses, is available to the general public. Subdivision (b) provides that whenever a local agency determines that a project is not subject to this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085 or 21172, and it approves or determines to carry out the project, it, or the person specified in subdivision (b) or (c) of Section 21065, may file a notice of the determination with the county clerk of each county in which the project will be located. Any notice filed pursuant to this subdivision by a person specified in subdivision (b) or (c) of Section 21065 shall have a certificate of determination attached to it issued by the local agency responsible for making the determination that the project is not subject to this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085

or 21172. Subdivision (c) requires that all notices filed pursuant to this section be available for public inspection, and shall be posted within 24 hours of receipt in the office of the county clerk. The local agency shall retain the notice for not less than nine months.

Chapter 415, Statutes of 1997, Section 3, amended Public Resources Code Section 21153 [added in 1972]. Subdivision (a) provides that, prior to completing an environmental impact report, every local lead agency shall consult with, and obtain comments from, each responsible agency, any public agency that has jurisdiction by law with respect to the project, and any city or county that borders on a city or county within which the project is located unless otherwise designated annually by agreement between the local lead agency and the city or county, and may consult with any person who has special expertise with respect to any environmental impact involved. Subdivision (b) provides that, in the case of a project described in subdivision (a) of Section 21065, the lead agency may provide for early consultation to identify the range of actions, alternatives, mitigation measures, and significant effects to be analyzed in depth in the environmental impact report.

Chapter 1154, Statutes of 1972, Section 14, added Public Resources Code Section 21154 which provides that whenever any state agency, board, or commission issues an order which requires a local agency to carry out a project which may have a significant effect on the environment, any environmental impact report which the local agency may prepare shall be limited to consideration of those factors and alternatives

which will not conflict with such order.

Chapter 444, Statutes of 1996, Section 2, amended Public Resources Code Section 21157 [added in 1993]. Subdivision (a) sets forth specific projects for which a master environmental impact report may be prepared. Subdivision (a)(2) includes a project that consists of smaller individual projects which will be carried out in phases. Subdivision (b) provides that, when a lead agency prepares a master environmental impact report, the document shall include all of the following:

(1) A detailed statement as required by Section 21100.

(2) A description of anticipated subsequent projects that would be within the scope of the master environmental impact report, that contains sufficient information with regard to the kind, size, intensity, and location of the subsequent projects, including, but not limited to, all of the following:

(A) The specific type of project anticipated to be undertaken.

(B) The maximum and minimum intensity of any anticipated subsequent project.

(C) The anticipated location and alternative locations for any development projects.

(D) A capital outlay or capital improvement program, or other scheduling or implementing device that governs the submission and approval of subsequent projects.

(3) A description of potential impacts of anticipated subsequent projects for which

there is not sufficient information reasonably available to support a full assessment of potential impacts in the master environmental impact report. This description shall not be construed as a limitation on the impacts which may be considered in a focused environmental impact report.

Chapter 1294, Statutes of 1994, Section 13, amended Public Resources Code Section 21157.1 [added in 1993] to provide that the preparation and certification of a master environmental impact report, if prepared and certified consistent with this division, may allow for the limited review of subsequent projects that were described in the master environmental impact report as being within the scope of the report, in accordance with the following requirements:

(a) The lead agency for a subsequent project shall be the lead agency or any responsible agency identified in the master environmental impact report.

(b) The lead agency shall prepare an initial study on any proposed subsequent project. This initial study shall analyze whether the subsequent project may cause any significant effect on the environment that was not examined in the master environmental impact report and whether the subsequent project was described in the master environmental impact report as being within the scope of the report.

(c) If the lead agency, based on the initial study, determines that a proposed subsequent project will have no additional significant effect on the environment, as defined in subdivision (d) of Section 21158, that was not identified in the master environmental impact report and that no new or additional mitigation measures or

alternatives may be required, the lead agency shall make a written finding based upon the information contained in the initial study that the subsequent project is within the scope of the project covered by the master environmental impact report. No new environmental document nor findings pursuant to Section 21081 shall be required by this division. Prior to approving or carrying out the proposed subsequent project, the lead agency shall provide notice of this fact pursuant to Section 21092 and incorporate all feasible mitigation measures or feasible alternatives set forth in the master environmental impact report which are appropriate to the project. Whenever a lead agency approves or determines to carry out any subsequent project pursuant to this section, it shall file a notice pursuant to Section 21108 or 21152.

(d) Where a lead agency cannot make the findings required in subdivision (c), the lead agency shall prepare, pursuant to Section 21157.7, either a mitigated negative declaration or environmental impact report.

Chapter 1130, Statutes of 1993, Section 18, added Public Resources Code Section 21157.5. Subdivision (a) requires that a proposed mitigated negative declaration shall be prepared for any proposed subsequent project if both of the following occur:

(1) An initial study has identified potentially new or additional significant effect on the environment that were not analyzed in the master environmental impact report.

(2) Feasible mitigation measures or alternatives will be incorporated to revise the proposed subsequent project, before the negative declaration is released for public

review, in order to avoid the effects or mitigate the effects to a point where clearly no significant effect on the environment will occur.

Subdivision (b) provides that, if there is substantial evidence in light of the whole record before the lead agency that the proposed subsequent project may have a significant effect on the environment and a mitigated negative declaration is not prepared, the lead agency shall prepare an environmental impact report or a focused environmental impact report pursuant to Section 21158.

Chapter 1294, Statutes of 1994, Section 16, amended Public Resources Code Section 21158 [added in 1993]. Subdivision (a) defines a focused environmental impact report as an environmental impact report on a subsequent project identified in a master environmental impact report. A focused environmental impact report may be utilized only if the lead agency finds that the analysis in the master environmental impact report of cumulative impacts, growth inducing impacts, and irreversible significant effects on the environment is adequate for the subsequent project. The focused environmental impact report shall incorporate, by reference, the master environmental impact report and analyze only the subsequent project's additional significant effects on the environment, as defined in subdivision (d), and any new or additional mitigation measures or alternatives that were not identified and analyzed by the master environmental impact report. Subdivision (c) provides that a focused environmental impact report on any subsequent project shall analyze any significant effects on the environment where substantial new or additional information shows that the adverse

environmental impact may be more significant than was described in the master environmental impact report. The substantial new or additional information may also show that mitigation measures or alternatives identified in the master environmental impact report, which were previously determined to be infeasible, are feasible and will avoid or reduce the significant effects on the environment of the subsequent project to a level of insignificance.

Chapter 571, Statutes of 1984, Section 2, amended Public Resources Code Section 21161 [added in 1972] provides that, whenever a public agency has completed an environmental impact report, it shall cause a notice of completion of that report to be filed with the Office of Planning and Research. The notice of completion shall briefly identify the project and shall indicate that an environmental impact report has been prepared. Failure to file the notice required by this section shall not affect the validity of a project.

Chapter 1200, Statutes of 1977, Section 15, amended Public Resources Code Section 21165 [added in 1972] which provides that, when a project is to be carried out or approved by two or more public agencies, the determination of whether the project may have a significant effect on the environment shall be made by the lead agency; and such agency shall prepare, or cause to be prepared by contract, the environmental impact report for the project, if such a report is required by this division. In the event that a dispute arises as to which is the lead agency, any public agency may submit the question to the Office of Planning and Research, and the Office of Planning and

Research shall designate, within 21 days of receiving such request, the lead agency, giving due consideration to the capacity of such agency to adequately fulfill the requirements of this division.

Chapter 1200, Statutes of 1977, Section 16, amended Public Resources Code Section 21166 [added in 1972] which provides that, when an environmental impact report has been prepared for a project pursuant to this division, no subsequent or supplemental environmental impact report shall be required by the lead agency or by any responsible agency, unless one or more of the following events occurs:

(a) Substantial changes are proposed in the project which will require major revisions of the environmental impact report.

(b) Substantial changes occur with respect to the circumstances under which the project is being undertaken which will require major revisions in the environmental impact report.

(c) New information, which was not known and could not have been known at the time the environmental impact report was certified as complete, becomes available.

Chapter 801, Statutes of 1995, Section 1, amended Public Resources Code Section 21167 [added in 1972] which provides statutes of limitation for actions or proceedings to attack, review, set aside, void, or annul acts or decisions of a public agency on the grounds of noncompliance with this division.

Chapter 1121, Statutes of 2002, Section 4, amended Public Resources Code Section 21167.6 [added in 1984]. Subdivision (b)(1) requires a public agency to prepare

and certify the record of proceedings not later than 60 days from the date that the request specified in subdivision (a) was served upon the public agency. Upon certification, the public agency shall lodge a copy of the record of proceedings with the court and shall serve on the parties notice that the record of proceedings has been certified and lodged with the court. The parties shall pay any reasonable costs or fees imposed for the preparation of the record of proceedings in conformance with any law or rule of court. Subdivision (e) provides that the record of proceedings shall include, but is not limited to, all of the following items:

(1) All project application materials.

(2) All staff reports and related documents prepared by the respondent public agency with respect to its compliance with the substantive and procedural requirements of this division and with respect to the action on the project.

(3) All staff reports and related documents prepared by the respondent public agency and written testimony or documents submitted by any person relevant to any findings or statement of overriding considerations adopted by the respondent agency pursuant to this division.

(4) Any transcript or minutes of the proceedings at which the decisionmaking body of the respondent public agency heard testimony on, or considered any environmental document on, the project, and any transcript or minutes of proceedings before any advisory body to the respondent public agency that were presented to the decisionmaking body prior to action on the environmental documents or on the project.

(5) All notices issued by the respondent public agency to comply with this division or with any other law governing the processing and approval of the project.

(6) All written comments received in response to, or in connection with, environmental documents prepared for the project, including responses to the notice of preparation.

(7) All written evidence or correspondence submitted to, or transferred from, the respondent public agency with respect to compliance with this division or with respect to the project.

(8) Any proposed decisions or findings submitted to the decisionmaking body of the respondent public agency by its staff, or the project proponent, project opponents, or other persons.

(9) The documentation of the final public agency decision, including the final environmental impact report, mitigated negative declaration, or negative declaration, and all documents, in addition to those referenced in paragraph (3), cited or relied on in the findings or in a statement of overriding considerations adopted pursuant to this division.

(10) Any other written materials relevant to the respondent public agency's compliance with this division or to its decision on the merits of the project, including the initial study, any drafts of any environmental document, or portions thereof, that have been released for public review, and copies of studies or other documents relied upon in any environmental document prepared for the project and either made available to the public during the public review period or included in the respondent public agency's files

on the project, and all internal agency communications, including staff notes and memoranda related to the project or to compliance with this division.

(11) The full written record before any inferior administrative decisionmaking body whose decision was appealed to a superior administrative decisionmaking body prior to the filing of litigation.

Chapter 1121, Statutes of 2002, Section 5, added Public Resources Code Section 21167.6.5. Subdivision (b) requires a public agency to provide a petitioner or plaintiff, not later than 10 business days following service of the petition or complaint on the public agency, with a list of responsible agencies and any public agency having jurisdiction over a natural resource affected by the project.

Chapter 801, Statutes of 1995, Section 2, amended Public Resources Code Section 21167.8 [added in 1984]. Subdivision (a) requires a public agency to file with the court a notice setting forth the time and place at which all parties shall meet and attempt to settle the litigation. Subdivision (b), requires the parties to meet and confer regarding anticipated issues to be raised in the litigation and attempt in good faith to settle the litigation and the dispute which forms the basis of the litigation at the time and place specified in the notice filed with the court. The settlement meeting discussions shall be comprehensive in nature and shall focus on the legal issues raised by the parties concerning the project that is the subject of the litigation. Subdivision (d) provides that, if the litigation is not settled, the court, in its discretion, may, or at the request of any party, shall, schedule a further settlement conference before a judge of

authority to disapprove a project than does a responsible agency.

Section 15043 (added in 1983) provides that a public agency may approve a project even though the project would cause a significant effect on the environment if the agency makes a fully informed and publicly disclosed decision that:

1) There is no feasible way to lessen or avoid the significant effect; and

2) Specifically identified expected benefits from the project outweigh the policy of reducing or avoiding significant environmental impacts of the project.

Section 15044 (added in 1983 and last amended in 1986) provides that any person or entity, other than a responsible agency, may submit comments to a lead agency concerning any environmental effects of a project being considered by the lead agency.

Section 15045 (added in 1983 and last amended in 1998), subdivision (b), provides that public agencies may charge and collect a reasonable fee from members of the public for a copy of an environmental document not to exceed the actual cost of reproducing a copy.

Article 4. Lead Agency

Section 15050 (added in 1983 and last amended in 1983), subdivision (a), provides that where a project is to be carried out by more than one public agency, one public agency shall be responsible for preparing an EIR or negative declaration for the project. This agency shall be called the lead agency. Subdivision (c) provides that the determination of the lead agency of whether to prepare an EIR or a negative declaration

the superior court. Subdivision (f) requires the petitioner or plaintiff to file and serve on all other parties a statement of issues which the petitioner or plaintiff intends to raise in any brief or at any hearing or trial. Not later than 10 days from the date on which the respondent or real party in interest has been served with the statement of issues from the petitioner or plaintiff, each respondent and real party in interest shall file and serve on all other parties a statement of issues which that party intends to raise in any brief or at any hearing or trial.

Chapter 1131, Statutes of 1993, Section 9, amended Public Resources Code Section 21168.9 [added in 1984] and provides for certain orders that a court may make as a result of a trial, hearing or remand from an appellate court, including, in subdivision (a)(3) a mandate that a public agency take specific action as may be necessary to bring the determination, finding, or decision into compliance with this division.

Part B - Title 5, California Code of Regulations[7]

Section 14011, (added in 1970 and last amended in 2000), provides that a state-funded school district is defined as a school district having a project funded under Chapter 12.5 (commencing with Section 17070.10) of the Education Code. A state-funded school district, before acquiring title to real property for school use, is required to obtain written approval from the California Department of Education using

[7] Copies of these Title 5 Regulations are attached hereto as Exhibit 7 and are incorporated herein by reference.

the following procedures:

(a) Request a preliminary conference with a consultant from the School Facilities Planning Division and, in consultation, review and evaluate sites under final consideration.

(b) Contact the School Facilities Planning Division of the California Department of Education to obtain a "School Facilities Planning Division Field Site Review," form SFPD 4.0, published by the California Department of Education, as last amended in December 1999 and incorporated into this section by reference, in toto, which lists the site options in order of merit according to the site selection standards delineated in Section 14010.

(c) Prepare a statement of policies as delineated on the "School Facilities Planning Division School Site Report," form SFPD 4.02, as last amended in December 1999 and incorporated into this section by reference, in toto, covering the range and organization of grades to be served, the transportation of pupils, and the ultimate maximum pupil enrollment to be housed on the site. Prepare a statement showing how the site is appropriate in size as justified by the school district's Facilities Master Plan, including acreage increases above the California Department of Education recommendation made to compensate for off-site mitigation. A school district may choose, in place of a master plan, a developer fee justification document or a five-year plan if it addresses enrollment projections, needed schools, and site sizes.

(d) Prepare maps showing present and proposed school sites, significant roads or highways, unsanitary or hazardous installations, such as airports or industries and the indicated boundary of the pupil attendance area to be served as delineated on form SFPD 4.02.

(e) Meet with appropriate local government, recreation, and park authorities to consider possible joint use of the grounds and buildings and to coordinate the design to benefit the intended users as required by Education Code Section 35275.

(f) Give written notice to the local planning agency having jurisdiction to review the proposed school site or addition to an existing school site and request a written report from the local planning agency of the investigations and recommendations for each proposed site with respect to conformity with the adopted general plan as required by Public Resources Code Section 21151.2 and Government Code Section 65402.

(g) Comply with Education Code Sections 17212 and 17212.5, with particular emphasis upon an engineering investigation made of the site to preclude locating the school on terrain that may be potentially hazardous:

(1) The geological and soils engineering study shall address all of the following:

(A) Nature of the site including a discussion of liquefaction, subsidence or expansive soils, slope, stability, dam or flood

inundation and street flooding.

(B) Whether the site is located within a special study zone as defined in Education Code Section 17212.

(C) Potential for earthquake or other geological hazard damage.

(D) Whether the site is situated on or near a pressure ridge, geological fault or fault trace that may rupture during the life of the school building and the student risk factor.

(E) Economic feasibility of the construction effort to make the school building safe for occupancy.

(2) Other studies shall include the following:

(A) Population trends,

(B) Transportation,

(C) Water supply,

(D) Waste disposal facilities,

(E) Utilities,

(F) Traffic hazards,

(G) Surface drainage conditions, and

(H) Other factors affecting initial and operating costs.

(h) Prepare an environmental impact report, or negative declaration in compliance with the Environmental Quality Act, Public Resources Code, Division 13, (commencing with Section 21000 with particular attention to Section

21151.8).

(i) and (j) omitted intentionally

(k) Follow the recommendations of the State Superintendent of Public Instruction report based upon the Department of Transportation, Division of Aeronautics, findings, if the proposed site is within two miles of the center line of an airport runway or proposed runway as required by Education Code Section 17215.

(l) Follow the standards for school site selection in Section 14010 of this article.

(m) Conduct a public hearing by the governing board of the school district as required in Education Code Section 17211 to evaluate the property using the standards described in Section 14010 of this article. The school district's facility advisory committee may provide an evaluation of the proposed site to the governing board.

(n) Submit the request for exemption from a standard in Section 14010 of this article, with a description of the mitigation that overrides the standard, to the California Department of Education.

(o) Certify there are no available alternative school district-owned sites for the project deemed usable for school purposes by the California Department of Education or certify that the school district intends to sell an available alternative school district-owned site and use the proceeds from the sale for the purchase of the new school site.

Division 6, Chapter 8, Subchapter 2.

Section 57100, (added in 1974 and last amended in 1991), subdivision (a), provides that the regulations adopted under this Chapter are pursuant to the California Environmental Quality Act of 1970 (Division 13 commencing with section 21000 of the Public Resources Code) and Guidelines adopted by Secretary for Resources in Division 6, Title 14, California Administrative Code. Subdivision (b) provides that the purpose of these regulations is to provide basic principles, objectives, criteria and definitions for use by the Chancellor of the California Community Colleges in reviews required by the Education Code of community college construction projects. Subdivision (c) provides that it is the intent of the Board of Governors to adopt in substance the Guidelines adopted by the Secretary for Resources in Division 6, Title 14, California Administrative Code, section 15000 et seq.

Section 57121, (added in 1974 and last amended in 1997), subdivision (a), provides that when reviewing proposals from Community College districts for acquisition of land to be used as a site for college facilities, the Chancellor shall also review the Community College district's Initial Study (section 15080, Title 14, California Administrative Code) of the development intended on the land and include the result of this review in a site review report. Subdivision (b) provides that the Chancellor shall require that proposals for initial construction of facilities for a new campus be accompanied by a long-range plan for physical development approved by the district governing board which shows the intended use of all portions of the land and

approximate location of buildings and facilities. Subdivision (c) provides that the Chancellor shall require that an Initial Study, pursuant to section 15080, title 14, California Administrative Code, be submitted to the Chancellor's office concurrent with other required information. Subdivision (d) provides that the Chancellor shall require that a copy of the (1) finding of Categorical Exemption (section 15023, Title 14, California Administrative Code); Negative Declaration (section 15083, Title 14, California Administrative Code); or Notice of Completion (section 15085(c), Title 14, California Administrative Code), whichever is appropriate, be submitted to his office concurrently with preliminary plans. Subdivision (e) provides that the Chancellor shall require a copy of the findings of Categorical Exemption or Notice of Determination (section 15085(g), Title 14, California Administrative Code), whichever is appropriate, be submitted to the Chancellor's office concurrently with plans submitted for approval in accordance with section 81837 (approval by board of governors) of the Education Code. Subdivision (f) requires that the Chancellor withhold authorization of the use of state funds for construction until requirements of the California Environmental Quality Act of 1970 have been met.

Part C - Title 14, California Code of Regulations[8]

Section 3, Title 14, California Code of Regulations, Chapter 3, sets forth guidelines for implementation of the California Environmental Quality Act.

Article 1. General

Section 15000 (added in 1973 and last amended in 1983), provides that the

[8] Copies of all Title 14, Code of Regulations Sections cited are attached hereto as Exhibit 8 and incorporated herein by reference.

regulations contained in this chapter are prescribed by the Secretary for Resources to be followed by all state and local agencies in California in the implementation of the California Environmental Quality Act.

Section 15001 (added in 1975 and last amended in 1983), provided that these guidelines may be cited as the "State CEQA Guidelines".

Section 15002 (added in 1980 and last amended in 1983), subdivision (b) provides which governmental actions may take place:

1) Activities directly undertaken by a governmental agency,

2) Activities financed in whole or in part by a governmental agency, or

3) Private activities which require approval from a governmental agency.

Subdivision (d) provides that a "project" is an activity subject to CEQA. The term "project" has been interpreted to mean far more than the ordinary dictionary definition of the term. Subdivision (e) provides that a governmental agency is required to comply with CEQA procedures when the agency proposes to carry out or approve the activity. Subdivision (f) provides that an environmental impact report (EIR) is the public document used by the governmental agency to analyze the significant environmental effects of a proposed project, to identify alternatives, and to disclose possible ways to reduce or avoid the possible environmental damage. An EIR is prepared when the public agency finds substantial evidence that the project may have a significant effort on the environment. When the agency finds that there is no substantial evidence that a project may have a significant environmental effect, the agency will prepare a "Negative

Declaration" instead of an EIR. Subdivision (i) provides that, CEQA applies in situations where a governmental agency can use its judgement in deciding whether and how to carry out or approve a project. Subdivision (j) provides that under CEQA, an agency must solicit and respond to comments from the public and from other agencies concerned with the project. Subdivision (k) provides that an agency will normally take up to the following three steps in deciding which document to prepare for a project subject to CEQA:

1) Examine the project to determine whether the project is subject to CEQA at all. If the project is exempt, the process does not need to proceed any farther. The agency may prepare a notice of exemption.

2) If the project is not exempt, the lead agency takes the second step and conducts an initial study to determine whether the project may have a significant effect on the environment.

3) If the initial study shows that the project may have a significant effect, the lead agency takes the third step and prepares an EIR.

Section 15004 (added in 1983 and last amended in 1998), subdivision (b), requires the preparation of EIRs and Negative Declarations as early as feasible in the planning process. Subdivision (b)(1) requires project sponsors of public projects to incorporate environmental considerations into project conceptualization, design and planning and recommends CEQA compliance prior to acquisition of a site for a public project. Subdivision (c) provides that the environmental document preparation and

review should be coordinated in a timely fashion with the existing planning, review, and project approval processes being used by each public agency.

Section 15005 (added in 1983 and last amended in 1983), provides definitions of terms to be used in the chapter.

Article 2. General Responsibilities.

Section 15020 (added in 1983 and last amended in 1983) requires that each public agency is responsible for complying with CEQA and these Guidelines.

Section 15021 (added in 1983), subdivision (a), provides that CEQA establishes a duty for public agencies to avoid or minimize environmental damage where feasible. In regulating public or private activities, agencies are required to give major consideration to preventing environmental damage. Subdivision (b) provides that an agency may consider specific economic, environmental, legal, social, and technological factors, when deciding whether changes in a project are feasible. Subdivision (c) provides that the duty to prevent or minimize environmental damage is implemented through the findings required by Section 15091. Subdivision (d) provides that a public agency has an obligation to balance a variety of public objectives, including economic, environmental, and social factors.

Section 15022 (added in 1983), requires each pubic agency to adopt objectives, criteria, and specific procedures consistent with CEQA and these Guidelines for administering its responsibilities under CEQA, including the orderly evaluation of projects and preparation of environmental documents. The implementing procedures

should at least contain provisions for:

1) Identifying the activities that are exempt from CEQA, which are provided.

2) Conducting initial studies.

3) Preparing negative declarations.

4) Preparing draft and final EIRs.

5) Consulting with and obtaining comments from other public agencies and members of the public with regard to the environmental effects of projects.

6) Assuring adequate opportunity and time for public review and comment on the Draft EIR of Negative Declaration.

7) Evaluating and responding to comments received on environmental documents.

8) Assigning responsibility for determining the adequacy of an EIR or negative declaration.

9) Reviewing and considering environmental documents by the person or decision making body who will approve or disapprove a project.

10) Filing documents required or authorized by CEQA and these Guidelines.

11) Providing adequate comments on environmental documents which are submitted to the public agency for review.

12) Assigning responsibility for specific functions to particular units of the public agency.

13) Providing time periods for performing functions under CEQA.

Subdivision (b) provides that any district, including a school district, need not adopt objectives, criteria, and procedures of its own if it uses the objectives, criteria, and procedures of another public agency whose boundaries are coterminous with or entirely encompass the district. Subdivision (c) requires that public agencies revise their implementing procedures to conform to amendments to these guidelines within 120 days after the effective date of the amendments. Subdivision (d) provides that in adopting procedures to implement CEQA, a public agency may adopt the State CEQA Guidelines through incorporation by reference. The agency may then adopt only those specific procedures or provisions which are necessary to tailor the general provisions of these guidelines to the specific operations of the agency. A public agency may also choose to adopt a complete set of procedures identifying in one document all the necessary requirements.

Section 15023 (added in 1983 and last amended in 1986), subdivision (c), provides that the State Clearinghouse in the Office of Planning and Research (OPR) shall be responsible for distributing environmental documents to State agencies, departments, boards, and commissions for review and comment. Subdivision (d) provides that upon request of a Lead Agency, OPR shall provide assistance in identifying the various responsible agencies and any federal agencies which have responsibility for carrying out or approving a proposed project. Subdivision (e) provides that OPR shall ensure that state responsible agencies provide the necessary information to lead agencies in response to notices of preparation within at most 30 days after

receiving a notice of preparation. Subdivision (f) provides that OPR shall resolve disputes as to which agency is the lead agency for a project. Subdivision (g) provides that OPR shall receive and file all notices of completion, and determination, and exemption.

Section 15025 (added in 1983), subdivision (a), provides that a public agency may assign specific functions to its staff to assist in administering CEQA. Subdivision (b) provides that the decision making body of a public agency shall not delegate the following functions:

1) Reviewing and considering a final EIR or approving a negative declaration prior to approving a project.

2) The making of findings as required by Sections 15091 and 15093.

Article 3. Authorities Granted to Public Agencies by CEQA

Section 15041 (added in 1983 and last amended in 1998) provides that within the limitations described in Section 15040 a lead agency for a project has authority to require feasible changes in any or all activities involved in the project in order to substantially lessen or avoid significant effects on the environment, consistent with applicable constitutional requirements such as the "nexus" and "rough proportionality" standards established by case law.

Section 15042 (added in 1983), provides that a public agency may disapprove a project if necessary in order to avoid one or more significant effects on the environment that would occur if the project were approved as proposed. A lead agency has broader

shall be final and conclusive for all persons, including responsible agencies, unless:

1) The decision is successfully challenged, as provided in Section 21167 of the Public Resources Code,

2) Circumstances or conditions change, as provided in Section 15162, or

3) A responsible agency becomes a lead agency under Section 15062.

Section 15051 (added in 1983) provides that where two or more public agencies will be involved with a project, the determination of which agency will be the lead agency shall be governed by the following criteria:

1) If the project will be carried out by a public agency, that agency shall be the lead agency even if the project would be located within the jurisdiction of another public agency.

2) If the project is to be carried out by a non-governmental person or entity, the lead agency shall be the public agency with the greatest responsibility for supervising or approving the project as a whole.

3) Where more than one public agency equally meet the criteria in subsection (2), the agency which will act first on the project in question shall be the lead agency.

4) Where the provisions of the above subsections leave two or more public agencies with a substantial claim to be the lead agency, the public agencies may by agreement designate an agency as the lead agency.

Section 15053 (added in 1983), subdivision (a), provides that if there is a dispute

over which of several agencies should be the lead agency for a project, the disputing agencies should consult with each other in an effort to resolve the dispute prior to submitting it to OPR. Subdivision (b) requires OPR to designate a lead agency within 21 days after receiving a completed request to resolve a dispute.

Article 5. Preliminary Review of Projects and Conduct of Initial Study

Section 15060 (added in 1983 and last amended in 1998), subdivision (c), provides that a lead agency must first determine whether an activity is subject to CEQA before conducting an initial study. An activity is not subject to CEQA if:

1) The activity does not involve the exercise of discretionary powers by a public agency;

2) The activity will not result in a direct or reasonably foreseeable indirect physical change in the environment; or

3) The activity is not a project as defined in Section 15378.

Subdivision (d) provides that if the lead agency can determine that an EIR will be clearly required for a project, the agency may skip further initial review of the project and begin work directly on the EIR process.

Section 15061 (added in 1983 and last amended in 1998), subdivision (a), provides that once a lead agency has determined that an activity is a project subject to CEQA, a lead agency shall determine whether the project is exempt from CEQA. Subdivision (b) provides that a project is exempt from CEQA if:

1) The project is exempt by a statute.

2) The project is exempt pursuant to a categorical exemption and the application of that categorical exemption is not barred by one of the exceptions set forth in Section 15300.2.

3) The activity is covered by the general rule that CEQA applies only to projects which have the potential for causing a significant effect on the environment.

4) The project will be rejected or disapproved by a public agency.

Subdivision (c) provides that each public agency should include in its implementing procedures a listing of the projects often handled by the agency that the agency has determined to be exempt. Subdivision (d) provides that after determining that a project is exempt, the agency may prepare a notice of exemption.

Section 15062 (added in 1983 and last amended in 1998), subdivision (a), provides that when a public agency decides that a project is exempt from CEQA and the public agency approves or determines to carry out the project, the agency may file a notice of exemption. The notice shall be filed, if at all, after approval of the project. Such notice shall include a brief description of the project, a finding that the project is exempt from CEQA, and a brief statement of reasons to support the finding. Subdivision (b) provides that a notice of exemption may be filled out and may accompany the project application through the approval process. Subdivision (c) provides that when a public agency approves an applicant's project, either the agency or the applicant may file a notice of exemption. When a local agency files this notice, the notice of exemption is

filed with the county clerk of each county in which the project will be located. Copies of such notices will be available for public inspection and shall be retained for not less than 9 months. Subdivision (d) provides that the filing of a Notice of Exemption and the posting on the list of notices start a 35-day statute of limitations period on legal challenges to the agency's decision that the project is exempt from CEQA.

Section 15063 (added in 1983 and last amended in 1998), subdivision (a), provides that, following preliminary review, the lead agency shall conduct an initial study to determine if the project may have a significant effect on the environment. Subdivision (b) provides that:

1) If the agency determines that there is substantial evidence that any aspect of the project, either individually or cumulatively, may cause a significant effect on the environment, regardless of whether the overall effect of the project is adverse or beneficial, the lead agency shall do one of the following:

a) prepare an EIR, or

b) use a previously prepared EIR, or

c) determine which of a project's effects were adequately examined by an earlier EIR or negative declaration.

2) The lead agency shall prepare a negative declaration if there is no substantial evidence that the project or any of its aspects may cause a significant effect on the environment.

Subdivision (c) provides that the purposes of an initial study are to:

1) Provide the lead agency with information to use as the basis for deciding whether to prepare an EIR or negative declaration;

2) Enable an applicant or lead agency to modify a project, mitigating adverse impact before an EIR is prepared, thereby enabling the project to qualify for a negative declaration;

3) Assist the preparation of an EIR, if one is required;

4) Facilitate environmental assessment early in the design of a project;

5) Provide documentation of the factual basis for the finding in a negative declaration that a project will not have a significant effect on the environment;

6) Eliminate unnecessary EIRs;

7) Determine whether a previously prepared EIR could be used with the project.

Subdivision (d) provides that an initial study shall contain in brief form:

1) A description of the project including the location of the project;

2) An identification of the environmental setting;

3) An identification of environmental effects by use of a checklist, matrix, or other method, provided that entries on a checklist or other form are briefly explained to indicate that there is some evidence to support the entries.

4) A discussion of ways to mitigate the significant effects identified, if any;

5) An examination of whether the project would be consistent with existing zoning, plans, and other applicable land use controls;

6) The name of the person or persons who prepared or participated in the initial study.

Subdivision (g) provides that, as soon as a lead agency has determined that an initial study will be required for the project, the lead agency shall consult informally with all responsible agencies and all trustee agencies responsible for resources affected by the project to obtain the recommendations of those agencies as to whether an EIR or a negative declaration should be prepared.

Subdivision 15064 (added in 1983 and last amended in 2001), subdivision (a)(1), provides that, if there is substantial evidence, in light of the whole record before a lead agency, that a project may have a significant effect on the environment, the agency shall prepare a draft EIR. Subdivision (a)(2) provides that, when a final EIR identifies one or more significant effects, the lead agency and each responsible agency shall make a finding under Section 15091 for each significant effect and may need to make a statement of overriding consideration under Section 15093 for the project. Subdivision (c) provides that in determining whether an effect will be adverse or beneficial, the lead agency shall consider the views held by members of the public in all areas affected. Subdivision (d) requires the lead agency to consider direct physical changes in the environment which may be caused by the project and reasonablely foreseeable indirect physical changes in the environment which may be caused by the project. Subdivision (e) provides that economic and social changes resulting from a project shall not be treated as significant effects on the environment. Subdivision (f) provides that the

decision as to whether a project may have one or more significant effects shall be based on substantial evidence in the record of the lead agency. Subdivision (g) provides that after application of the principles set forth above in Section 15064(f), and in marginal cases where it is not clear whether there is substantial evidence that a project may have a significant effect on the environment, the lead agency shall be guided by the following principle; If there is disagreement among expert opinion supported by facts over the significance of an effect on the environment, the Lead Agency shall treat the effect as significant and shall prepare an EIR. Subdivision (i) provides that:

1) When assessing whether a cumulative effect requires an EIR, the lead agency shall consider whether the cumulative impact is significant and whether the effects of the project are cumulatively considerable.

2) A lead agency may determine in an initial study that a project's contribution to a significant cumulative impact will be rendered less than cumulatively considerable and thus is not significant.

3) A lead agency may determine that a project's incremental contribution to a cumulative effect is not cumulatively considerable if the project will comply with the requirements in a previously approved plan or mitigation program which provides specific requirements that will avoid or substantially lessen the cumulative problem within the geographic area in which the project is located.

4) A lead agency may determine that the incremental impacts of a project are not cumulatively considerable when they are so small that they make only a de

minimis contribution to a significant cumulative impact caused by other projects that would exist in the absence of the proposed project.

5) The mere existence of significant cumulative impacts caused by other projects alone shall not constitute substantial evidence that the proposed project's incremental effects are cumulatively considerable.

Section 15064.5 (added in 1998), subdivision (a), provides examples of the term "historical resources". Subdivision (b) provides that a project with an effect that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment. A lead agency is required to identify potentially feasible measures to mitigate significant adverse changes in the significance of an historical resource and ensure that any adopted measures to mitigate or avoid significant adverse changes are fully enforceable through permit conditions, agreements, or other measures. Subdivision (c) provides that CEQA applies to effects on archaeological sites. Subdivision (d) provides that when an initial study identifies the existence of, or the probable likelihood, of Native American human remains within the project, a lead agency shall work with the appropriate native americans as identified by the Native American Heritage commission as provided in Public Resources Code section 5097.98. Subdivision (e) provides that in the event of the accidental discovery or recognition of any human remains in any location other than a dedicated cemetery, the following steps should be taken;

1) There shall be no further excavation or disturbance of the site or any

nearby area reasonably suspected to overlie adjacent human remains until the proper steps are taken.

2) Where the following conditions occur, the landowner or his authorized representative shall rebury the Native American human remains and associated grave goods with appropriate dignity on the property in a location not subject to further subsurface disturbance.

Subdivision (f) provides that as part of the objectives, criteria, and procedures required by Section 21082 of the Public Resources Code, a lead agency should make provisions for historical or unique archaeological resources accidentally discovered during construction.

Section 15064.7 (added in 1998), subdivision (a), provides that each public agency is encouraged to develop and publish thresholds of significance that the agency uses in the determination of the significance of environmental effects. Subdivision (b) provides that thresholds of significance to be adopted for general use as part of lead agency's environmental review process must be adopted by ordinance, resolution, rule, or regulation, and developed through a public review process and be supported by substantial evidence.

Section 15065 (added in 1983 and last amended in 1998) requires a lead agency to find that a project may have a significant effect on the environment and thereby require an EIR to be prepared for the project where any of the following conditions occur:

1) The project has the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of an endangered, rare or threatened species, or eliminate important examples of the major periods of California history or prehistory.

2) The project has the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals.

3) The project has possible environmental effects which are individually limited by cumulatively considerable.

4) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

Article 6. Negative Declaration Process

Section 15070 (added in 1983 and last amended in 1997), requires that a public agency shall prepare, or have prepared, a proposed negative declaration or mitigated negative declaration for a project subject to CEQA when:

a) The initial study shows that there is no substantial evidence, in light of the whole record before the agency, that the project may have a significant effect on the environment, or

b) The initial study identifies potentially significant effects, but

(1) Revisions in the project plans or proposals made by or agreed to by

the applicant before a proposed mitigated negative declaration and initial study are released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur, and

(2) There is no substantial evidence, in light of the whole record before the agency, that the project as revised may have a significant effect on the environment.

Section 15071 (added in 1983) provides that a negative declaration circulated for public review shall include:

a) A brief description of the project, including a commonly used name for the project, if any;

b) The location of the project, preferably shown on a map, and the name of the project proponent;

c) A proposed finding that the project will not have a significant effect on the environment;

d) An attached copy of the initial study documenting reasons to support the finding; and

e) Mitigation measures, if any, included in the project to avoid potentially significant effects.

Section 15072 (added in 1983 and last amended in 1997), subdivision (a), requires a lead agency to provide a notice of intent to adopt a negative declaration or mitigated negative declaration to the public, responsible agencies, trustee agencies, and

the county clerk of each county within which the proposed project is located, sufficiently prior to adoption by the lead agency of the negative declaration or mitigated negative declaration to allow the public and agencies the review period provided under Section 15105. Subdivision (b) requires the lead agency to mail a notice of intent to adopt a negative declaration or mitigated negative declaration to the last known name and address of all organizations and individuals who have previously requested such notice in writing and shall also give notice of intent to adopt a negative declaration or mitigated negative declaration by at least one of the following procedures to allow the public the review period provided under Section 15105:

1) Publication at least one time by the lead agency in a newspaper of general circulation in the area affected by the proposed project.

2) Posting of notice by the lead agency on and off site in the area where the project is to be located.

3) Direct mailing to the owners and occupants of property contiguous to the project.

Subdivision (e) provides that for a project of statewide, regional, or area wide significance, the lead agency shall also provide notice to transportation planning agencies and public agencies which have transportation facilities within their jurisdictions which could be affected by the project as specified in Section 21092.4(a) of the Public Resources Code. Subdivision (f) provides that a notice of intent to adopt a negative declaration or mitigated negative declaration shall specify the following:

1) A brief description of the proposed project and its location.

2) The starting and ending dates for the review period during which the lead agency will receive comments on the proposed negative declaration or mitigated negative declaration.

3) The date, time, and place of any scheduled public meetings or hearings to be held by the lead agency on the proposed project, when known to the lead agency at the time of notice.

4) The address or addresses where copies of the proposed negative declaration or mitigated negative declaration including the revisions developed under Section 15070(b) and all documents referenced in the proposed negative declaration or mitigated negative declaration are available for review.

5) The presence of the site on any of the lists enumerated under Section 65962.5 of the Government Code including, but not limited to lists of hazardous waste facilities, land designated as hazardous waste property, and hazardous waste disposal sites, and the information in the Hazardous Waste and Substances Statement required under subsection (f) of that section.

6) Other information specifically required by statute or regulation for a particular project or type of project.

Section 15073 (added in 1983 and last amended in 1997), subdivision (a), requires the lead agency to provide a public review period pursuant to Section 15105 of not less than 20 days. Subdivision (b) provides that when a proposed negative

declaration or mitigated negative declaration and initial study have been submitted to the State Clearinghouse for review by state agencies, the public review period shall be at least as long as the review period established by the State Clearinghouse. Subdivision (c) provides that a copy of the proposed negative declaration or mitigated negative declaration and the initial study shall be attached to the notice of intent to adopt the proposed declaration that is sent to every responsible agency and trustee agency concerned with the project and every other public agency with jurisdiction by law over resources affected by the project. Subdivision (d) provides that where one or more state agencies will be a responsible agency or a trustee agency or will exercise jurisdiction by law over natural resources affected by the project, or where the project is of statewide, regional, or area wide environmental significance, the lead agency shall send copies of the proposed negative declaration or mitigated negative declaration to the State Clearinghouse for distribution to the state agencies. Subdivision (e) provides that the lead agency shall notify in writing any public agency which comments on a proposed negative declaration or mitigated negative declaration of any public hearing to be held for the project for which the document was prepared.

Section 15073.5 (added in 1998), subdivision (a), provides that a lead agency is required to re-circulate a negative declaration when the document must be substantially revised after public notice of its availability has previously been given pursuant to Section 15072, but prior to it adoption. Subdivision (b) provides the meaning of a "substantial revision" of the negative declaration. Subdivision (c) provides the

circumstances in which re-circulation is not required. Subdivision (d) provides that if during the negative declaration process there is substantial evidence in light of the whole record, before the lead agency that the project, as revised, may have a significant effect on the environment which cannot be mitigated or avoided, the lead agency shall prepare a draft EIR and certify a final EIR prior to approving the project.

Section 15074 (added in 1983 and last amended in 1997), subdivision(b), provides that, prior to approving a project, the decision making body of the lead agency shall consider the proposed negative declaration together with any comments received during the public review process. Subdivision (c) provides that, when adopting a mitigated negative declaration or mitigated negative declaration, the lead agency shall specify the location and custodian of the documents or other materials which constitute the record of proceedings upon which its decision is based. Subdivision (d) provides that, when adopting a mitigated negative declaration, the lead agency shall also adopt a program for reporting on or monitoring the changes which it has either required in the project or made a condition of approval to mitigate or avoid significant environmental effects.

Section 15074.1 (added in 1997), subdivision (a), provides that as a result of the public review process for a proposed mitigated negative declaration, including any administrative decisions or public hearings conducted on the project prior to its approval, the lead agency may conclude that certain mitigation measures identified in the mitigated negative declaration are infeasible or otherwise undesirable. Subdivision (b)

provides that, prior to deleting and substituting for a mitigation measure, the lead agency shall do both of the following:

1) Hold a public hearing on the matter.

2) Adopt a written finding that the new measure is equivalent or more effective in mitigating or avoiding potential significant effects and that it in itself will not cause any potentially significant effect on the environment.

Subdivision (c) provides that no re-circulation of the proposed mitigated negative declaration pursuant to Section 15072 is required where the new mitigation measures are made conditions of, or are otherwise incorporated into, project approval in accordance with this section.

Section 15075 (added in 1983 and last amended in 1998), subdivision (a), provides that, after deciding to carry out or approve a project for which a negative declaration or mitigated negative declaration has been approved, the lead agency shall file a notice of determination. For projects with phases, the lead agency shall file a notice of determination after deciding to carry out or approve each phase. Subdivision (b) provides that the notice of determination must include:

1) An identification of the project including its common name where possible, and its location.

2) A brief description of the project.

3) The date on which the agency approved the project.

4) The determination of the agency that the project will not have a significant

effect on the environment.

5) A statement that a negative declaration or a mitigated negative declaration has been prepared pursuant to the provisions of CEQA.

6) The address where a copy of the negative declaration or mitigated negative declaration may be examined.

Subdivision (c) provides that if the lead agency is a state agency, the lead agency shall file the notice of determination with OPR. Subdivision (d) provides that if the lead agency is a local agency, the local agency shall file the notice of determination with the county clerk of the county or counties in which the project will be located within five working days after approval of the project by the lead agency. Subdivision (e) provides that all notices filed pursuant to this section shall be available for public inspection and shall be posted by the county clerk within 24 hours of receipt. Subdivision (f) provides that public agencies are encouraged to make copies of all notices filed pursuant to this section available in electronic format on the Internet.

Article 7. EIR process

Section 15080 (added in 1983 and last amended in 1983) provides that to the extent possible, the EIR process should be combined with the existing planning, review, and project approval process used by each public agency.

Section 15081 (added in 1983) provides that the EIR process starts with the decision to prepare an EIR. This decision will be made either during preliminary review under Section 15060 or at the conclusion of an initial study after applying the standards

described in Section 15064.

Section 15081.5 (added in 1997), subdivision (a) provides a list of projects for which a lead agency is required to prepare, or have prepared, an EIR. Subdivision (b) provides that a lead agency shall prepare or have prepared an EIR for the selection of a California Community College campus location and approval of a long range development plan for that campus.

Section 15082 (added in 1983 and last amended in 2001), subdivision (a) provides that immediately after deciding that an environmental impact report is required for a project, the lead agency shall send to each responsible agency a notice of preparation stating that an environmental impact report will be prepared. This notice shall also be sent to every federal agency involved in approving or funding the project and to each trustee agency responsible for natural resources affected by the project. Subdivision (b) provides that within 30 days after receiving the notice of preparation under subdivision (a), each responsible agency shall provide the lead agency with specific detail about the scope and content of the environmental information related to the responsible agency's area of statutory responsibility which must be included in the draft EIR. Subdivision (c) provides that, in order to expedite the consultation, the lead agency, a responsible agency, a trustee agency, or a project applicant may request one or more meetings between representatives of the agencies involved to assist the lead agency in determining the scope and content of the environmental information which the responsible agency may require. Subdivision (d) provides that, when one or more state

agencies will be a responsible agency or a trustee agency, the lead agency shall send a notice of preparation to each state responsible agency and each trustee agency with a copy to the State Clearinghouse in the Office of Planning and Research. Subdivision (e) provides that, when the notice of preparation is submitted to the State Clearinghouse, the state identification number issued by the Clearinghouse shall be the identification number for all subsequent environmental documents on the project.

Section 15083 (added in 1983) provides that, prior to completing the draft EIR, the lead agency may also consult directly with any person or organization it believes will be concerned with the environmental effects of the project. This early consultation may be called "scoping". Subdivision (c) provides that where scoping is used, it should be combined to the extent possible with consultation under Section 15082.

Section 15084 (added in 1983), subdivision (a), provides that the draft EIR shall be prepared directly by, or under contract to, the lead agency. Subdivision (c) provides that any person may submit information or comments to the lead agency to assist in the preparation of the draft EIR. Subdivision (d) provides that the lead agency may choose one of the following arrangements, or a combination of them, for preparing a draft EIR;

(1) Preparing the draft EIR directly with its own staff.

(2) Contracting with another entity, public or private, to prepare the draft EIR.

(3) Accepting a draft prepared by the applicant, a consultant retained by the applicant, or any other person.

(4) Executing a third party contract or memorandum or understanding with the

applicant to govern the preparation of a draft EIR by an independent contractor.

(5) Using a previously prepared EIR.

Subdivision (e) provides that before using a draft prepared by another person, the lead agency shall subject the draft to the agency's own review and analysis.

Section 15085 (added in 1983 and last amended in 1986), subdivision (a), provides that as soon as the draft EIR is completed, a notice of completion must be filed with OPR in a printed hard copy or in electronic form on a diskette or by electronic mail transmission. Subdivision (b) provides that the notice of completion shall include:

1) A brief description of the project,

2) The proposed location of the project,

3) An address where copies of the draft EIR are available, and

4) The period during which comments will be received on the draft EIR.

Section 15086 (added in 1983 and last amended in 2001), subdivision (a), provides that the lead agency shall consult with and request comments on the draft EIR from:

1) Responsible agencies,

2) Trustee agencies with resources affected by the project, and

3) Any other state, federal , and local agencies which have jurisdiction by law with respect to the project or which exercise authority over resources which may be affected by the project, including water agencies consulted pursuant to section

15083.5,

4) Any city or county which borders on a city or county within which the project is located, and

5) For a project of statewide, regional, or area wide significance, the transportation planning agencies and public agencies which have transportation facilities within their jurisdictions which could be affected by the project.

Subdivision (b) provides that the lead agency may consult directly with:

1) Any person who has special expertise with respect to any environmental impact involve,

2) Any member of the public who has filed a written request for notice with the lead agency or the clerk of the governing body.

3) Any person identified by the applicant whom the applicant believes will be concerned with the environmental effects of the project.

Section 15087 (added in 1983 and last amended in 1997), subdivision (a), requires that the lead agency provide public notice of the availability of a draft EIR at the same time as it sends a notice of completion to OPR. This notice shall be given as provided under Section 15105. Notice shall be mailed to the last known name and address of all organizations and individuals who have previously requested such notice in writing, and shall also be given by at least one of the following procedures:

(1) Publication at least one time by the public agency in a newspaper of general circulation in the area affected by the proposed project. If more than one

area is affected, the notice shall be published in the newspaper of largest circulation from among the newspapers of general circulation in those areas.

(2) Posting of notice by the public agency on and off the site in the area where the project is to be located.

(3) Direct mailing to the owners and occupants of property contiguous to the parcel or parcels on which the project is located. Owners of such property shall be identified as shown on the latest equalized assessment roll.

Subdivision (c) provides that the notice shall disclose the following:

(1) A brief description of the proposed project and its location.

(2) The starting and ending dates for the review period during which the lead agency will receive comments. If the review period is shortened, the notice shall disclose that fact.

(3) The date, time, and place of any scheduled public meetings or hearings to be held by the lead agency on the proposed project when known to the lead agency at the time of notice.

(4) A list of the significant environmental effects anticipated as a result of the project, to the extent which such effects are known to the lead agency at the time of the notice.

(5) The address where copies of the EIR and all documents referenced in the EIR will be available for public review. This location shall be readily accessible to the public during the lead agency's normal working hours.

(6) The presence of the site on any of the lists of sites enumerated under Section 65962.5 of the Government Code including, but not limited to lists of hazardous waste facilities, land designated as hazardous waste property, hazardous waste disposal sites and others, and the information in the Hazardous Waste and Substances Statement required under subsection (f) of that Section.

Subdivision (d) provides that the notice required under this section shall be posted in the office of the county clerk of each county in which the project will be located for a period of at least 30 days. The county clerk shall post such notices within 24 hours of receipt.

Subdivision (e) provides that in order to provide sufficient time for public review, the review period for a draft EIR shall be as provided in Section 15105. The review period shall be combined with the consultation required under Section 15086. When a draft EIR has been submitted to the State Clearinghouse, the public review period shall be at least as long as the review period established by the Clearinghouse.

Subdivision (f) provides that public agencies shall use the State Clearinghouse to distribute draft EIRs to state agencies for review and should use areawide clearinghouses to distribute the documents to regional and local agencies.

Subdivision (g) provides that in order to make copies of EIRs available to the public, lead agencies should furnish copies of draft EIRs to public library systems serving the area involved. Copies should also be available in offices of the lead agency. Subdivision (h) provides that public agencies should compile listings of other agencies, particularly local agencies, which have jurisdiction by law and/or special expertise with respect to various projects and project locations. Such listings should be a guide in determining which agencies should be consulted with regard to a particular project.

Section 15088 (added in 1983), subdivision (a), requires the lead agency to evaluate comments on environmental issues received from persons who reviewed the draft EIR and shall prepare a written response. The lead agency shall respond to comments received during the noticed comment period and any extensions and may respond to late comments. Subdivision (b) provides that the written response shall describe the disposition of significant environmental issues raised. In particular, the major environmental issues raised when the lead agency's position is at variance with recommendations and objections raised in the comments must be addressed in detail giving reasons why specific comments and suggestions were not accepted. Subdivision (c) provides that the response to comments may take the form of a revision to the draft EIR or may be a separate section in the final EIR. Where the response to comments makes important changes in the information contained in the text of the draft EIR, the lead agency should either:

(1) Revise the text in the body of the EIR, or

(2) Include marginal notes showing that the information is revised in the response to comments.

Section 15088.5 (added in 1983 and last amended in 1998), subdivision (a), requires a lead agency to recirculate an EIR when significant new information is added to the EIR after public notice is given of the availability of the draft EIR for public review under Section 15087 but before certification. Subdivision (b) provides that recirculation is not required where the new information added to the EIR merely clarifies or amplifies or makes insignificant modifications in an adequate EIR. Subdivision (c) provides that if the revision is limited to a few chapters or portions of the EIR, the lead agency need only recirculate the chapters or portions that have been modified. Subdivision (d) provides that recirculation of an EIR requires notice pursuant to Section 15087, and consultation pursuant to Section 15086. Subdivision (e) provides that a decision not to recirculate an EIR must be supported by substantial evidence in the administrative record. Subdivision (f) requires that the lead agency evaluate and respond to comments as provided in Section 15088. Subdivision (g) provides that, when recirculating a revised EIR, either in whole or in part, the lead agency shall, in the revised EIR or by an attachment to the revised EIR, summarize the revisions made to the previously circulated draft EIR.

Section 15089 (added in 1983), subdivision (a), requires that the lead agency prepare a final EIR before approving the project. Subdivision (b) provides that lead

agencies may provide an opportunity for review of the final EIR by the public or by commenting agencies before approving the project. The review of a final EIR should focus on the responses to comments on the draft EIR.

Section 15090 (added in 1983 and last amended in 1997), subdivision (a), provides that prior to approving a project the lead agency shall certify that:

(1) The final EIR has been completed in compliance with CEQA;

(2) The final EIR was presented to the decision-making body of the lead agency and that the decision-making body reviewed and considered the information contained in the final EIR prior to approving the project; and

(3) The final EIR reflects the lead agency's independent judgment and analysis.

Subdivision (b) provides that when an EIR is certified by a non-elected decision-making body within a local lead agency, that certification may be appealed to the local lead agency's elected decision-making body, if one exists. Each local lead agency shall provide for such appeals.

Section 15091 (added in 1983 and last amended in 1998), subdivision (a), provides that no public agency shall approve or carry out a project for which an EIR has been certified which identifies one or more significant environmental effects of the project unless the public agency makes one or more written findings for each of those significant effects, accompanied by a brief explanation of the rationale for each finding.

The possible findings are:

(1) Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.

(2) Such changes or alterations are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.

(3) Specific economic, legal, social, technological, or other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.

Subdivision (b) provides that the findings required by subsection (a) shall be supported by substantial evidence in the record. Subdivision (c) provides that the finding in subsection (a)(2) shall not be made if the agency making the finding has concurrent jurisdiction with another agency to deal with identified feasible mitigation measures or alternatives. The finding in subsection (a)(3) shall describe the specific reasons for rejecting identified mitigation measures and project alternatives. Subdivision (d) provides that, when making the findings required in subsection (a)(1), the agency shall also adopt a program for reporting on or monitoring the changes which it has either

required in the project or made a condition of approval to avoid or substantially lessen significant environmental effects. These measures must be fully enforceable through permit conditions, agreements, or other measures. Subdivision (e) requires the public agency to specify the location and custodian of the documents or other material which constitute the record of the proceedings upon which its decision is based.

Section 15092 (added in 1983), subdivision (a), provides that after considering the final EIR and in conjunction with making findings under Section 15091, the lead agency may decide whether or how to approve or carry out the project. Subdivision (b) provides that a public agency shall not decide to approve or carry out a project for which an EIR was prepared unless either:

(1) The project as approved will not have a significant effect on the environment, or

(2) The agency has:

(A) Eliminated or substantially lessened all significant effects on the environment where feasible as shown in findings under Section 15091, and

(B) Determined that any remaining significant effects on the environment found to be unavoidable under Section 15091 are acceptable due to overriding concerns as described in Section 15093.

Section 15093 (added in 1983 and last amended in 1998), subdivision (a),

provides that CEQA requires the decision-making agency to balance, as applicable, the economic, legal, social, technological, or other benefits of a proposed project against its unavoidable environmental risks when determining whether to approve the project. If the specific economic, legal, social, technological, or other benefits of a proposal project outweigh the unavoidable adverse environmental effects, the adverse environmental effects may be considered "acceptable." Subdivision (b) provides that, when the lead agency approves a project which will result in the occurrence of significant effects which are identified in the final EIR but are not avoided or substantially lessened, the agency shall state in writing the specific reasons to support its action based on the final EIR and/or other information in the record. The statement of overriding considerations shall be supported by substantial evidence in the record. Subdivision (c) provides that, if an agency makes a statement of overriding considerations, the statement should be included in the record of the project approval and should be mentioned in the notice of determination. This statement does not substitute for, and shall be in addition to, findings required pursuant to Section 15091.

Section 15094 (added in 1983 and last amended in 1997), subdivision (a), requires that the lead agency file a notice of determination within 5 working days after approval of the project by the lead agency. The notice shall include:

(1) An identification of the project including its common name where possible and its location.

(2) A brief description of the project.

(3) The date when the agency approved the project.

(4) The determination of the agency whether the project in its approved form will have a significant effect on the environment.

(5) A statement that an EIR was prepared and certified pursuant to the provisions of CEQA.

(6) Whether mitigation measures were made a condition of the approval of the project.

(7) Whether findings were made pursuant to Section 15091.

(8) Whether a statement of overriding considerations was adopted for the project.

(9) The address where a copy of the final EIR and the record of project approval may be examined.

Subdivision (c) provides that if a local agency is the lead agency, the notice of determination shall be filed with the county clerk of the county or counties in which the project will be located. If the project requires discretionary approval from a state agency, the notice of determination shall also be filed with OPR. Subdivision (d) provides that a notice of determination filed with the county clerk is available for public inspection and shall be posted within 24 hours of receipt for a period of at least 30 days. The local lead agency shall retain the notice for not less than 9 months. Subdivision (f) provides that

the filing of the notice of determination and the posting of such notice starts a 30-day statute of limitations on court challenges to the approval under CEQA.

Section 15095 (added in 1983) requires the lead agency to:

(a) File a copy of the final EIR with the appropriate planning agency of any city, county, or city and county where significant effects on the environment may occur.

(b) Include the final EIR as part of the regular project report which is used in the existing project review and budgetary process if such a report is used.

(c) Retain one or more copies of the final EIR as public records for a reasonable period of time.

Section 15097 (added in 1983 and last amended in 1998), subdivision (a), provides that this section applies when a public agency has made the findings required under paragraph (1) of subdivision (a) of Section 15091 relative to an EIR or adopted a mitigated negative declaration in conjunction with approving a project. In order to ensure that the mitigation measures and project revisions identified in the EIR or negative declaration are implemented, the public agency shall adopt a program for monitoring or reporting on the revisions which it has required in the project and the measures it has imposed to mitigate or avoid significant environmental effects. A public agency may delegate reporting or monitoring responsibilities to another public agency or to a private entity which accepts the delegation; however, until mitigation measures have been

completed, the lead agency remains responsible for ensuring that implementation of the mitigation measures occurs in accordance with the program. Subdivision (c) provides that the public agency may choose whether its program will monitor mitigation, report on mitigation, or both. "Reporting" generally consists of a written compliance review that is presented to the decision making body or authorized staff person. "Monitoring" is generally an ongoing or periodic process of project oversight. The choice of program may be guided by the following:

(1) Reporting is suited to projects which have readily measurable or quantitative mitigation measures or which already involve regular review.

(2) Monitoring is suited to projects with complex mitigation measures, such as wetlands restoration or archeological protection, which may exceed the expertise of the local agency to oversee, are expected to be implemented over a period of time, or require careful implementation to assure compliance.

Subdivision (e) provides that, at its discretion, an agency may adopt standardized policies and requirements to guide individually adopted monitoring or reporting programs. Subdivision (g) provides that when a project is of statewide, regional, or areawide importance, any transportation information generated by a required monitoring or reporting program shall be submitted to the transportation planning agency in the region where the project is located. Each transportation planning agency shall adopt guidelines for the submittal of such information.

Article 8. Time Limits

Section 15100 (added in 1983 and last amended in 1983), subdivision (a), requires public agencies to adopt time limits to govern their implementation of CEQA consistent with this article.

Section 15104 (added in 1983) requires the lead agency to convene a meeting with agency representatives to discuss the scope and content of the environmental information a responsible agency will need in the EIR as soon as possible but no later than 30 days after receiving a request for the meeting. The meeting may be requested by the lead agency, a responsible agency, a trustee agency, or by the project applicant.

Section 15105 (added in 1983 and last amended in 2001), subdivision (a), provides that the public review period for a draft EIR shall not be less than 30 days nor should it be longer than 60 days except in unusual circumstances. When a draft EIR is submitted to the State Clearinghouse for review by state agencies, the public review period shall not be less than 45 days, unless a shorter period, not less than 30 days, is approved by the State Clearinghouse. Subdivision (b) provides that the public review period for a proposed negative declaration or mitigated negative declaration shall be not

less than 20 days. When a proposed negative declaration or mitigated negative declaration is submitted to the State Clearinghouse for review by state agencies, the public review period shall not be less than 30 days, unless a shorter period, not less than 20 days, is approved by the State Clearinghouse. Subdivision (c) provides that if a draft EIR or proposed negative declaration or mitigated negative declaration has been submitted to the State Clearinghouse for review by state agencies, the public review period shall be at least as long as the review period established by the State Clearinghouse. Subdivision (d) provides that a shortened Clearinghouse review period may be granted.

Section 15112 (added in 1983), subdivision (b), provides that the project sponsor may proceed to carry out the project as soon as the necessary permits have been granted. The statute of limitations cuts off the right of another person to file a court action challenging approval of the project after the specified time period has expired. Subdivision (c) provides that the statute of limitations periods under CEQA are as follows:

(1) Where the public agency filed a notice of determination in compliance with

Sections 15075 or 15094, 30 days after the filing of the notice and the posting on a list of such notices.

(2) Where the public agency filed a notice of exemption in compliance with Section 15062, 35 days after the filing of the notice and the posting on a list of such notices.

(3) Where a certified state regulatory agency files a notice of decision in compliance with Public Resources Code Section 21080.5(d)(2)(V), 30 days after the filing of the notice.

(4) Where the Secretary for Resources certifies a state environmental regulatory agency under Public Resources Code Section 21080.5, the certification may be challenged only during the 30 days following the certification decision.

(5) Where none of the other statute of limitations periods in this section apply, 180 days after either:

(A) The public agency's decision to carry out or approve the project, or

(B) Commencement of the project if the project is undertaken without a

formal decision by the public agency.

Article 9. Contents of Environmental Impact Reports

Section 15120 (added in 1983 and last amended in 1998), subdivision (a), provides that Environmental Impact Reports shall contain the information outlined in this article, but the format of the document may be varied. Each element must be covered, and when these elements are not separated into distinct sections, the document shall state where in the document each element is discussed. Subdivision (b) provides that the EIR may be prepared as a separate document, as part of a general plan, or as part of a project report. If prepared as a part of the project report, it must still contain one separate and distinguishable section providing either analysis of all the subjects required in an EIR or as a minimum, a table showing where each of the subjects is discussed. Subdivision (c) provides that draft EIRs shall contain the information required by Sections 15122 through 15131. Final EIRs shall contain the same information and the subjects described in Section 15132. Subdivision (d) provides that no document prepared pursuant to this article that is available for public examination shall include a "trade secret" as defined in Section 6254.7 of the Government Code, information about

the location of archaeological sites and sacred lands, or any other information that is subject to the disclosure restrictions of Section 6254 of the Government Code.

Section 15122 (added in 1983) provides that an EIR shall contain at least a table of contents or an index to assist readers in finding the analysis of different subjects and issues.

Section 15123 (added in 1983), subdivision (a), provides that an EIR shall contain a brief summary of the proposed actions and its consequences. The language of the summary should be as clear and simple as reasonably practical. Subdivision (b) provides that the summary shall identify:

(1) Each significant effect with proposed mitigation measures and alternatives that would reduce or avoid that effect;

(2) Areas of controversy known to the lead agency including issues raised by agencies and the public; and

(3) Issues to be resolved including the choice among alternatives and whether or how to mitigate the significant effects.

Section 15124 (added in 1983 and last amended in 1998) provides that the

description of the project shall contain the following information but should not supply extensive detail beyond that needed for evaluation and review of the environmental impact:

(a) The precise location and boundaries of the proposed project shall be shown on a detailed map, preferably topographic. The location of the project shall also appear on a regional map.

(b) A statement of the objectives sought by the proposed project to help the lead agency develop a reasonable range of alternatives to evaluate in the EIR and aid the decision makers in preparing findings or a statement of overriding considerations, if necessary. The statement of objectives should include the underlying purpose of the project.

(c) A general description of the project's technical, economic, and environmental characteristics, considering the principal engineering proposals if any and supporting public service facilities.

(d) A statement briefly describing the intended uses of the EIR.

(1) This statement shall include, to the extent that the information is

known to the lead agency,

(A) A list of the agencies that are expected to use the EIR in their decision-making, and

(B) A list of permits and other approvals required to implement the project.

(C) A list of related environmental review and consultation requirements required by federal, state, or local laws, regulations, or policies. To the fullest extent possible, the lead agency should integrate CEQA review with these related environmental review and consultation requirements.

(2) If a public agency must make more than one decision on a project, all its decisions subject to CEQA should be listed, preferably in the order in which they will occur. On request, the Office of Planning and Research will provide assistance in identifying state permits for a project.

Section 15125 (added in 1983 and last amended in 1998), subdivision (a), provides that an EIR must include a description of the physical environmental conditions

in the vicinity of the project, as they exist at the time the notice of preparation is published, or if no notice of preparation is published, at the time environmental analysis is commenced, from both a local and regional perspective.

Section 15126 (added in 1983 and last amended in 1998) provides that all phases of a project must be considered when evaluating its impact on the environment: planning, acquisition, development, and operation. The subjects listed below shall be discussed as directed in Sections 15126.2, 15126.4 and 15126.6, preferably in separate sections or paragraphs of the EIR. If they are not discussed separately, the EIR shall include a table showing where each of the subjects is discussed.

(a) Significant Environmental Effects of the Proposed Project.

(b) Significant Environmental Effects Which Cannot be Avoided if the Proposed Project is Implemented.

(c) Significant Irreversible Environmental Changes Which Would be Involved in the Proposed Project Should it be Implemented.

(d) Growth-Inducing Impact of the Proposed Project.

(e) The Mitigation Measures Proposed to Minimize the Significant Effects.

(f) Alternatives to the Proposed Project.

Section 15126.2 (added in 1898), subdivision (a), provides for the Significant Environmental Effects of the Proposed Project. An EIR shall identify and focus on the significant environmental effects of the proposed project. Subdivision (b) provides for significant environmental effects which cannot be avoided if the proposed project is implemented to include any significant impacts, including those which can be mitigated but not reduced to a level of insignificance. Where there are impacts that cannot be alleviated without imposing an alternative design, their implications and the reasons why the project is being proposed, notwithstanding their effect, should be described. Subdivision (c) provides for significant irreversible environmental changes which would be caused by the proposed project should it be implemented, such as uses of nonrenewable resources during the initial and continued phases of the project may be irreversible since a large commitment of such resources makes removal or nonuse thereafter unlikely.

Section 15126.4 (added in 1998), subdivision (a), provides for mitigation measures in general:

(1) An EIR shall describe feasible measures which could minimize significant adverse impacts, including where relevant, inefficient and unnecessary consumption of energy.

(A) The discussion of mitigation measures shall distinguish between the measures which are proposed by project proponents to be included in the project and other measures proposed by the lead, responsible or trustee agency or other persons which are not included but the lead agency determines could reasonably be expected to reduce adverse impacts if required as conditions of approving the project. This discussion shall identify mitigation measures for each significant environmental effect identified in the EIR.

(B) Where several measures are available to mitigate an impact, each should be discussed and the basis for selecting a particular measure should be identified. Formulation of mitigation measures should not be deferred until some future time. However, measures may specify performance standards which would mitigate the significant effect of the

project and which may be accomplished in more than one specified way.

(C) Energy conservation measures, as well as other appropriate mitigation measures, shall be discussed when relevant.

(D) If a mitigation measure would cause one or more significant effects in addition to those that would be caused by the project as proposed, the effects of the mitigation measure shall be discussed but in less detail than the significant effects of the project as proposed.

(2) Mitigation measures must be fully enforceable through permit conditions, agreements, or other legally-binding instruments.

(3) Mitigation measures are not required for effects which are not found to be significant.

(4) Mitigation measures must be consistent with all applicable constitutional requirements, including the following:

(A) There must be an essential nexus (i.e. connection) between the mitigation measure and a legitimate governmental interest; and

(B) The mitigation measure must be "roughly proportional" to the

impacts of the project. Where the mitigation measure is an ad hoc exaction, it must be "roughly proportional" to the impacts of the project.

(5) If the lead agency determines that a mitigation measure cannot be legally imposed, the measure need not be proposed or analyzed. Instead, the EIR may simply reference that fact and briefly explain the reasons underlying the lead agency's determination.

Subdivision (b) provides for mitigation measures related to impacts on historical resources:

(1) Where maintenance, repair, stabilization, rehabilitation, restoration, preservation, conservation or reconstruction of the historical resource will be conducted in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings (1995), Weeks and Grimmer, the project's impact on the historical resource shall generally be considered mitigated below a level of significance and thus is not significant.

(2) In some circumstances, documentation of an historical resource, by way of historic narrative, photographs or architectural drawings, as mitigation for the effects of demolition of the resource will not mitigate the effects to a point where clearly no significant effect on the environment would occur.

(3) Public agencies should, whenever feasible, seek to avoid damaging effects on any historical resource of an archaeological nature. The following factors shall be considered and discussed in an EIR for a project involving such an archaeological site:

(A) Preservation in place is the preferred manner of mitigating impacts to archaeological sites. Preservation in place maintains the relationship between artifacts and the archaeological context. Preservation may also avoid conflict with religious or cultural values of groups associated with the site.

(B) Preservation in place may be accomplished by, but is not limited to, the following:

1. Planning construction to avoid archaeological sites;

2. Incorporation of sites within parks, greenspace, or other open space;

3. Covering the archaeological sites with a layer of chemically stable soil before building tennis courts, parking lots, or similar facilities on the site; and/or

4. Deeding the site into a permanent conservation easement.

C) When data recovery through excavation is the only feasible mitigation, a data recovery plan, which makes provision for adequately recovering the scientifically consequential information from and about the historical resource, shall be prepared and adopted prior to any excavation being undertaken. Such studies shall be deposited with the California Historical Resources Regional Information Center. Archaeological sites known to contain human remains shall be treated in accordance with the provisions of Section 7050.5 Health and Safety Code.

(D) Data recovery shall not be required for an historical resource if the lead agency determines that testing or studies already completed have

adequately recovered the scientifically consequential information from and about the archaeological or historical resource, provided that the determination is documented in the EIR and that the studies are deposited with the California Historical Resources Regional Information Center.

Section 15126.6 (added in 1998), subdivision (a), provides that an EIR shall describe a range of reasonable alternatives to the project, or to the location of the project, which would feasibly attain most of the basic objectives of the project but would avoid or substantially lessen any of the significant effects of the project, and evaluate the comparative merits of the alternatives. The lead agency is responsible for selecting a range of project alternatives for examination and must publicly disclose its reasoning for selecting those alternatives. Subdivision (b) requires the discussion of alternatives to focus on alternatives to the project or its location which are capable of avoiding or substantially lessening any significant effects of the project, even if these alternatives would impede to some degree the attainment of the project objectives, or would be more costly. Subdivision (c) requires the range of potential alternatives to the proposed project to include those that could feasibly accomplish most of the basic objectives of

the project and could avoid or substantially lessen one or more of the significant effects. The EIR should briefly describe the rationale for selecting the alternatives to be discussed. The EIR should also identify any alternatives that were considered by the lead agency but were rejected as infeasible during the scoping process and briefly explain the reasons underlying the lead agency's determination. Subdivision (d) requires the EIR to include sufficient information about each alternative to allow meaningful evaluation, analysis, and comparison with the proposed project. A matrix displaying the major characteristics and significant environmental effects of each alternative may be used to summarize the comparison. If an alternative would cause one or more significant effects in addition to those that would be caused by the project as proposed, the significant effects of the alternative shall be discussed, but in less detail than the significant effects of the project as proposed. Subdivision (e) requires the specific alternative of "no project" to also be evaluated along with its impact. The purpose of describing and analyzing a no project alternative is to allow decisionmakers to compare the impacts of approving the proposed project with the impacts of not approving the proposed project. The "no project" analysis shall discuss the existing

conditions at the time the notice of preparation is published, or if no notice of preparation is published, at the time environmental analysis is commenced, as well as what would be reasonably expected to occur in the foreseeable future if the project were not approved, based on current plans and consistent with available infrastructure and community services. Subdivision (f) provides for the rule of reason which requires the EIR to set forth only those alternatives necessary to permit a reasoned choice. The alternatives shall be limited to ones that would avoid or substantially lessen any of the significant effects of the project. Of those alternatives, the EIR need examine in detail only the ones that the lead agency determines could feasibly attain most of the basic objectives of the project. The range of feasible alternatives shall be selected and discussed in a manner to foster meaningful public participation and informed decision making.

Section 15128 (added in 1983) requires that an EIR shall contain a statement briefly indicating the reasons that various possible significant effects of a project were determined not to be significant and were therefore not discussed in detail in the EIR. Such a statement may be contained in an attached copy of an initial study.

Section 15129 (added in 1983) requires that an EIR shall identify all federal, state, or local agencies, other organizations, and private individuals consulted in preparing the draft EIR, and the persons, firm, or agency preparing the draft EIR, by contract or other authorization.

Section 15130 (added in 1983 and last amended in 2001), subdivision (a), requires that an EIR shall discuss cumulative impacts of a project when the project's incremental effect is cumulatively considerable, as defined in section 15065(c). Where a lead agency is examining a project with an incremental effect that is not "cumulatively considerable," a lead agency need not consider that effect significant, but shall briefly describe its basis for concluding that the incremental effect is not cumulatively considerable. Subdivision (b) provides that the discussion of cumulative impacts shall reflect the severity of the impacts and their likelihood of occurrence, but the discussion need not provide as great detail as is provided for the effects attributable to the project alone. The discussion should be guided by the standards of practicality and reasonableness, and should focus on the cumulative impact to which the identified other projects contribute rather than the attributes of other projects which do not contribute to the cumulative impact.

Subdivision (c) provides that with some projects, the only feasible mitigation for cumulative impacts may involve the adoption of ordinances or regulations rather than the imposition of conditions on a project-by-project basis. Subdivision (d) provides that previously approved land use documents such as general plans, specific plans, and local coastal plans may be used in cumulative impact analysis.

Section 15131 (added in 1983), subdivision (a), provides that economic or social effects of a project shall not be treated as significant effects on the environment. Subdivision (b) provides that economic or social effects of a project may be used to determine the significance of physical changes caused by the project.

Section 15132 (added in 1983) requires that the final EIR consist of:

(a) The Draft EIR or a revision of the draft.

(b) Comments and recommendations received on the Draft EIR either verbatim or in summary.

(c) A list of persons, organizations, and public agencies commenting on the Draft EIR.

(d) The responses of the Lead Agency to significant environmental points raised in the review and consultation process.

(e) Any other information added by the lead agency.

Article 10. Considerations in Preparing EIRs and Negative Declarations

Section 15140 (added in 1983) requires that EIRs shall be written in plain language and may use appropriate graphics so that decisionmakers and the public can rapidly understand the documents.

Section 15141 (added in 1983) provides that the text of draft EIRs should normally be less than 150 pages and for proposals of unusual scope or complexity should normally be less than 300 pages.

Section 15142 (added in 1983) provides that an EIR shall be prepared using an interdisciplinary approach which will ensure the integrated use of the natural and social sciences and the consideration of qualitative as well as quantitative factors. The interdisciplinary analysis shall be conducted by competent individuals, but no single discipline shall be designated or required to undertake this evaluation.

Section 15143 (added in 1983) provides that the EIR shall focus on the significant effects on the environment. The significant effects should be discussed with emphasis in proportion to their severity and probability of occurrence.

Section 15144 (added in 1983) provides that drafting an EIR or preparing a negative declaration necessarily involves some degree of forecasting. While foreseeing the unforeseeable is not possible, an agency must use its best efforts to find out and disclose all that it reasonably can.

Section 15145 (added in 1983) provides that if, after thorough investigation, a lead agency finds that a particular impact is too speculative for evaluation, the agency should note its conclusion and terminate discussion of the impact.

Section 15146 (added in 1983) provides that the degree of specificity required in an EIR will correspond to the degree of specificity involved in the underlying activity which is described in the EIR.

Section 15147 (added in 1983) provides that the information contained in an EIR shall include summarized technical data, maps, plot plans, diagrams, and similar relevant information sufficient to permit full assessment of significant environmental

impacts by reviewing agencies and members of the public. Placement of highly technical and specialized analysis and data in the body of an EIR should be avoided through inclusion of supporting information and analyses as appendices to the main body of the EIR.

Section 15148 (added in 1983) provides that the preparation of EIRs is dependent upon information from many sources, including engineering project reports and many scientific documents relating to environmental features. These documents should be cited but not included in the EIR. The EIR shall cite all documents used in its preparation including, where possible, the page and section number of any technical reports which were used as the basis for any statements in the EIR.

Section 15149 (added in 1983), subdivision (b), provides that the lead agency should establish requirements or conditions on project design, construction, or operation in order to protect or enhance the environment.

Section 15150 (added in 1983), subdivision (a), provides that an EIR or negative declaration may incorporate by reference all or portions of another document which is a matter of public record or is generally available to the public. Subdivision (b) provides

that where part of another document is incorporated by reference, such other document shall be made available to the public for inspection at a public place or public building. The EIR or negative declaration shall state where the incorporated documents will be available for inspection. Subdivision (c) provides that where an EIR or negative declaration uses incorporation by reference, the incorporated part of the referenced document shall be briefly summarized where possible or briefly described if the data or information cannot be summarized. Subdivision (d) provides that where an agency incorporates information from an EIR that has previously been reviewed through the state review system, the state identification number of the incorporated document should be included in the summary or designation described in Subsection (c). Subdivision (e) provides examples of materials that may be incorporated by reference. Subdivision (f) provides that incorporation by reference is most appropriate for including long, descriptive, or technical materials that provide general background but do not contribute directly to the analysis of the problem at hand.

Section 15151 (added in 1983) provides that an EIR should be prepared with a sufficient degree of analysis to provide decisionmakers with information which enables

them to make a decision which intelligently takes account of environmental consequences.

Section 15152 (added in 1983 and last amended in 1998), subdivision (a), provides that "Tiering" refers to using the analysis of general matters contained in a broader EIR (such as one prepared for a general plan or policy statement) with later EIRs and negative declarations on narrower projects; incorporating by reference the general discussions from the broader EIR; and concentrating the later EIR or negative declaration solely on the issues specific to the later project. Subdivision (b) provides that agencies are encouraged to tier the environmental analyses which they prepare for separate but related projects including general plans, zoning changes, and development projects. This approach can eliminate repetitive discussions of the same issues and focus the later EIR or negative declaration on the actual issues ripe for decision at each level of environmental review. Tiering is appropriate when the sequence of analysis is from an EIR prepared for a general plan, policy, or program to an EIR or negative declaration for another plan, policy, or program of lesser scope, or to a site-specific EIR or negative declaration. Tiering does not excuse the lead agency from adequately analyzing reasonably foreseeable significant environmental effects of the project and does not justify deferring such analysis to a later tier EIR or negative declaration. Subdivision (d) provides that where an EIR has been prepared and certified for a program, plan, policy, or ordinance consistent with the requirements of this section, any

lead agency for a later project pursuant to or consistent with the program, plan, policy, or ordinance should limit the EIR or negative declaration on the later project to effects which:

(1) Were not examined as significant effects on the environment in the prior EIR; or

(2) Are susceptible to substantial reduction or avoidance by the choice of specific revisions in the project, by the imposition of conditions, or other means.

Subdivision (e) provides that tiering, under this section, shall be limited to situations where the project is consistent with the general plan and zoning of the city or county in which the project is located, except that a project requiring a rezone to achieve or maintain conformity with a general plan may be subject to tiering. Subdivision (f) provides that a later EIR shall be required when the initial study or other analysis finds that the later project may cause significant effects on the environment that were not adequately addressed in the prior EIR. A negative declaration shall be required when the provisions of Section 15070 are met. Subdivision (g) provides that when tiering is used, the later EIRs or negative declarations shall refer to the prior EIR and state where a copy of the prior EIR may be examined. The later EIR or negative declaration should state that the lead agency is using the tiering concept and that it is being tiered with the earlier EIR.

Section 15153 (added in 1983), subdivision (a), provides that the lead agency may employ a single EIR to describe more than one project, if such projects are essentially the same in terms of environmental impact. Further, the lead agency may use an earlier EIR prepared in connection with an earlier project to apply to a later project, if the circumstances of the projects are essentially the same. Subdivision (b) provides that when a lead agency proposes to use an EIR from an earlier project as the EIR for a separate, later project, the lead agency shall use the following procedures:

(1) The lead agency shall review the proposed project with an initial study, using incorporation by reference if necessary, to determine whether the EIR would adequately describe:

(A) The general environmental setting of the project,

(B) The significant environmental impacts of the project, and

(C) Alternatives and mitigation measures related to each significant effect.

(2) If the lead agency believes that the EIR would meet the requirements of Subsection (1), it shall provide public review as provided in Section 15087 stating that it plans to use the previously prepared EIR as the draft EIR for this project. The notice shall include as a minimum:

(A) An identification of the project with a brief description;

(B) A statement that the agency plans to use a certain EIR prepared for a previous project as the EIR for this project;

(C) A listing of places where copies of the EIR may be examined; and

(D) A statement that the key issues involving the EIR are whether the EIR should be used for this project and whether there are any additional, reasonable alternatives or mitigation measures that should be considered as ways of avoiding or reducing the significant effects of the project.

(3) The lead agency shall prepare responses to comments received during the review period.

(4) Before approving the project, the decisionmaker in the lead agency shall:

(A) Consider the information in the EIR including comments received during the review period and responses to those comments,

(B) Decide either on its own or on a staff recommendation whether the EIR is adequate for the project at hand, and

(C) Make or require certification to be made as described in Section 15090.

(D) Make findings as provided in Sections 15091 and 15093 as necessary.

(5) After making a decision on the project, the lead agency shall file a notice of determination.

Subdivision (c) provides that an EIR prepared for an earlier project may also be used as part of an initial study to document a finding that a later project will not have a significant effect. In this situation a negative declaration will be prepared. Subdivision (d) provides that an EIR prepared for an earlier project shall not be used as the EIR for a later project if any of the conditions described in Section 15162 would require preparation of a subsequent or supplemental EIR.

Article 11. Types of EIRs

Section 15160 (added in 1983 and last amended in 1983) provides that lead agencies may use other variations consistent with the guidelines to meet the needs of other circumstances. All EIRs must meet the content requirements discussed in Article 9 beginning with Section 15120.

Section 15161 (added in 1983) provides that the most common type of EIR examines the environmental impacts of a specific development project. This type of EIR should focus primarily on the changes in the environment that would result from the development project. The EIR shall examine all phases of the project including planning, construction, and operation.

Section 15162 (added in 1983 and last amended in 1998), subdivision (a), provides that when an EIR has been certified or a negative declaration adopted for a project, no subsequent EIR shall be prepared for that project unless the lead agency

determines, on the basis of substantial evidence in the light of the whole record, one or more of the following:

(1) Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;

(2) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or

(3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the negative declaration was adopted, shows any of the following:

(A) The project will have one or more significant effects not discussed in the previous EIR or negative declaration;

(B) Significant effects previously examined will be substantially more severe than shown in the previous EIR;

(C) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or

(D) Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

Subdivision (b) provides that, if changes to a project or its circumstances occur or new information becomes available after adoption of a negative declaration, the lead agency shall prepare a subsequent EIR if required under subsection (a). Otherwise the lead agency shall determine whether to prepare a subsequent negative declaration, an addendum, or no further documentation. Subdivision (c) provides that once a project has been approved, the lead agency's role in project approval is completed, unless further discretionary approval on that project is required. Information appearing after an approval does not require reopening of that approval. If after the project is approved, any of the conditions described in subsection (a) occurs, a subsequent EIR or negative declaration shall only be prepared by the public agency which grants the next discretionary approval for the project, if any. In this situation no other responsible agency shall grant an approval for the project until the subsequent EIR has been

certified or subsequent negative declaration adopted. Subdivision (d) provides that a subsequent EIR or subsequent negative declaration shall be given the same notice and public review as required under Section 15087 or Section 15072. A subsequent EIR or negative declaration shall state where the previous document is available and can be reviewed.

Section 15163 (added in 1983), subdivision (a), provides that the lead or responsible agency may choose to prepare a supplement to an EIR rather than a subsequent EIR if:

(1) Any of the conditions described in Section 15162 would require the preparation of a subsequent EIR, and

(2) Only minor additions or changes would be necessary to make the previous EIR adequately apply to the project in the changed situation.

Subdivision (b) provides that the supplement to the EIR need contain only the information necessary to make the previous EIR adequate for the project as revised. Subdivision (c) provides that a supplement to an EIR shall be given the same kind of notice and public review as is given to a draft EIR under Section 15087. Subdivision (d) provides that a supplement to an EIR may be circulated by itself without recirculating the previous draft or final EIR. Subdivision (e) provides that when the agency decides whether to approve the project, the decision-making body shall consider the previous

EIR as revised by the supplemental EIR. A finding under Section 15091 shall be made for each significant effect shown in the previous EIR as revised.

Section 15164 (added in 1983 and last amended in 1998), subdivision (a), provides that the lead agency or a responsible agency shall prepare an addendum to a previously certified EIR if some changes or additions are necessary but none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred. Subdivision (b) provides that an addendum to an adopted negative declaration may be prepared if only minor technical changes or additions are necessary or none of the conditions described in Section 15162 calling for the preparation of a subsequent EIR or negative declaration have occurred. Subdivision (c) provides that an addendum need not be circulated for public review but can be included in or attached to the final EIR or adopted negative declaration. Subdivision (d) provides that the decision-making body shall consider the addendum with the final EIR or adopted negative declaration prior to making a decision on the project. Subdivision (e) provides that a brief explanation of the decision not to prepare a subsequent EIR pursuant to Section 15162 should be included in an addendum to an EIR, the lead agency's required findings on the project, or elsewhere in the record. The explanation must be supported by substantial evidence.

Section 15165 (added in 1983) provides that where individual projects are, or a phased project is, to be undertaken and where the total undertaking comprises a project

with significant environmental effect, the lead agency shall prepare a single program EIR for the ultimate project as described in Section 15168. Where an individual project is a necessary precedent for action on a larger project, or commits the lead agency to a larger project, with significant environmental effect, an EIR must address itself to the scope of the larger project. Where one project is one of several similar projects of a public agency, but is not deemed a part of a larger undertaking or a larger project, the agency may prepare one EIR for all projects, or one for each project, but shall in either case comment upon the cumulative effect.

Section 15166 (added in 1983) provides that the requirements for preparing an EIR on a local general plan, element, or amendment thereof will be satisfied by using the general plan, or element document, as the EIR and no separate EIR will be required, if:

(1) the general plan addresses all the points required to be in an EIR by Article 9 of these guidelines and

(2) the document contains a special section or a cover sheet identifying where the general plan document addresses each of the points required.

Subdivision (b) provides that where an EIR rather than a negative declaration has been prepared for a general plan, element, or amendment thereto, the EIR shall be forwarded to the State Clearinghouse for review. The requirement shall apply regardless of whether the EIR is prepared as a separate document or as a part of the general plan or element document.

Section 15167 (added in 1983), subdivision (a), provides that where a large capital project will require a number of discretionary approvals from government agencies and one of the approvals will occur more than two years before construction will begin, a staged EIR may be prepared covering the entire project in a general form. The staged EIR shall evaluate the proposal in light of current and contemplated plans and produce an informed estimate of the environmental consequences of the entire project. The aspect of the project before the public agency for approval shall be discussed with a greater degree of specificity. Subdivision (b) provides that when a staged EIR has been prepared, a supplement to the EIR shall be prepared when a later approval is required for the project, and the information available at the time of the later approval would permit consideration of additional environmental impacts, mitigation measures, or reasonable alternatives to the project. Subdivision (c) provides that where a statute such as the Warren-Alquist Energy Resources Conservation and Development Act provides that a specific agency shall be the lead agency for a project and requires the lead agency to prepare an EIR, a responsible agency which must grant an approval for the project before the lead agency has completed the EIR may prepare and consider a staged EIR. Subdivision (d) provides that an agency requested to prepare a staged EIR may decline to act as the lead agency if it determines, among other factors, that:

(1) Another agency would be the appropriate lead agency; and

(2) There is no compelling need to prepare a staged EIR and grant an approval for the project before the appropriate lead agency will take its action on the project.

Section 15168 (added in 1983), subdivision (a), provides that a program EIR is an EIR which may be prepared on a series of actions that can be characterized as one large project and are related either:

(1) Geographically,

(2) As logical parts in the chain of contemplated actions,

(3) In connection with issuance of rules, regulations, plans, or other general criteria to govern the conduct of a continuing program, or

(4) As individual activities carried out under the same authorizing statutory or regulatory authority and having generally similar environmental effects which can be mitigated in similar ways.

Subdivision (b) provides that use of a program EIR can provide the following advantages. The program EIR can:

(1) Provide an occasion for a more exhaustive consideration of effects and alternatives than would be practical in an EIR on an individual action,

(2) Ensure consideration of cumulative impacts that might be slighted in a case-by-case analysis,

(3) Avoid duplicative reconsideration of basic policy considerations,

(4) Allow the lead agency to consider broad policy alternatives and program wide mitigation measures at an early time when the agency has greater flexibility to deal with basic problems or cumulative impacts,

(5) Allow reduction in paperwork.

Subdivision (c) provides that subsequent activities in the program must be examined in the light of the program EIR to determine whether an additional environmental document must be prepared.

(1) If a later activity would have effects that were not examined in the program EIR, a new initial study would need to be prepared leading to either an EIR or a negative declaration.

(2) If the agency finds that pursuant to Section 15162, no new effects could occur or no new mitigation measures would be required, the agency can approve the activity as being within the scope of the project covered by the program EIR, and no new environmental document would be required.

(3) An agency shall incorporate feasible mitigation measures and alternatives developed in the program EIR into subsequent actions in the program.

(4) Where the subsequent activities involve site specific operations, the agency should use a written checklist or similar device to document the evaluation of the site and the activity to determine whether the environmental effects of the operation were covered in the program EIR.

(5) A program EIR will be most helpful in dealing with subsequent activities if it deals with the effects of the program as specifically and comprehensively as possible. With a good and detailed analysis of the program, many subsequent activities could be found to be within the scope of the project described in the program EIR, and no further environmental documents would be required.

Subdivision (d) provides that a program EIR can be used to simplify the task of preparing environmental documents on later parts of the program. The program EIR can:

(1) Provide the basis in an initial study for determining whether the later activity may have any significant effects.

(2) Be incorporated by reference to deal with regional influences, secondary effects, cumulative impacts, broad alternatives, and other factors that apply to the program as a whole.

(3) Focus an EIR on a subsequent project to permit discussion solely of new effects which had not been considered before.

Subdivision (e) provides that when a law other than CEQA requires public notice when the agency later proposes to carry out or approve an activity within the program and to rely on the program EIR for CEQA compliance, the notice for the activity shall include a statement that:

(1) This activity is within the scope of the program approved earlier, and

(2) The program EIR adequately describes the activity for the purposes of CEQA.

Section 15169 (added in 1983), subdivision (a), provides that a public agency may prepare a master environmental assessment, inventory, or data base for all, or a portion of, the territory subject to its control in order to provide information which may be used or referenced in EIRs or negative declarations. Neither the content, the format, nor the procedures to be used to develop a master environmental assessment are prescribed by these guidelines. The descriptions contained in this section are advisory. A master environmental assessment is suggested solely as an approach to identify and organize environmental information for a region or area of the state. Subdivision (b) provides that a master environmental assessment may contain an inventory of the physical and biological characteristics of the area for which it is prepared and may contain such additional data and information as the public agency determines is useful or necessary to describe environmental characteristics of the area. It may include identification of existing levels of quality and supply of air and water, capacities and levels of use of existing services and facilities, and generalized incremental effects of different categories of development projects by type, scale, and location. Subdivision (c) outlines preparation:

(1) A master environmental assessment or inventory may be prepared in many possible ways. For example, a master environmental assessment may be

prepared as a special, comprehensive study of the area involved, as part of the EIR on a general plan, or as a data base accumulated by indexing EIRs prepared for individual projects or programs in the area involved.

(2) The information contained in a master environmental assessment should be reviewed periodically and revised as needed so that it is accurate and current.

(3) When advantageous to do so, master environmental assessments may be prepared through a joint exercise of powers agreement with neighboring local agencies or with the assistance of the appropriate Council of Governments.

Subdivision (d) outlines uses:

(1) A master environmental assessment can identify the environmental characteristics and constraints of an area. This information can be used to influence the design and location of individual projects.

(2) A master environmental assessment may provide information agencies can use in initial studies to decide whether certain environmental effects are likely to occur and whether certain effects will be significant.

(3) A master environmental assessment can provide a central source of current information for use in preparing individual EIRs and negative declarations.

(4) Relevant portions of a master environmental assessment can be referenced and summarized in EIRs and negative declarations.

(5) A master environmental assessment can assist in identifying long range, areawide, and cumulative impacts of individual projects proposed in the area covered by the assessment.

(6) A master environmental assessment can assist a city or county in formulating a general plan or any element of such a plan by identifying environmental characteristics and constraints that need to be addressed in the general plan.

(7) A master environmental assessment can serve as a reference document to assist public agencies which review other environmental documents dealing with activities in the area covered by the assessment. The public agency preparing the assessment should forward a completed copy to each agency which will review projects in the area.

Section 15170 (added in 1983) provides that a lead agency under CEQA may work with a federal agency to prepare a joint document which will meet the requirements of both CEQA and NEPA. Use of such a joint document is described in Article 14, beginning with Section 15220.

Article 11.5. Master Environmental Impact Report

Section 15175 (added in 1997), subdivision (a), provides that the Master EIR procedure is an alternative to preparing a project EIR, staged EIR, or program EIR for certain projects which will form the basis for later decision making. It is intended to

streamline the later environmental review of projects or approval included within the project, plan or program analyzed in the Master EIR. Accordingly, a Master EIR shall, to the greatest extent feasible, evaluate the cumulative impacts, growth inducing impacts, and irreversible significant effects on the environment of subsequent projects.

Subdivision (b) provides that a lead agency may prepare a Master EIR for any of the following classes of projects:

(1) A general plan, general plan update, general plan element, general plan amendment, or specific plan.

(2) Public or private projects that will be carried out or approved pursuant to, or in furtherance of, a redevelopment plan.

(3) A project that consists of smaller individual projects which will be carried out in phases.

(4) A rule or regulation which will be implemented by later projects.

(5) Projects that will be carried out or approved pursuant to a development agreement.

(6) A state highway project or mass transit project which will be subject to multiple stages of review or approval.

(7) A plan proposed by a local agency, including a joint powers authority, for the reuse of a federal military base or reservation that has been closed or is proposed for closure by the federal government.

(8) A regional transportation plan or congestion management plan.

(9) Regulations adopted by the California Department of Fish and Game for the regulation of hunting and fishing.

Subdivision (c) provides that a lead agency may develop and implement a fee program in accordance with applicable provisions of law to generate the revenue necessary to prepare a Master EIR.

Section 15176 (added in 1997 and last amended in 2001) provides that a lead agency shall include in a Master EIR all of the following:

(a) A detailed discussion as required by Section 15126.

(b) A description of anticipated subsequent projects that are within the scope of the Master EIR, including information with regard to the kind, size, intensity, and location of the subsequent projects, including, but not limited to all of the following:

(1) The specific type of project anticipated to be undertaken such as a single family development, office-commercial development, sewer line installation or other activities.

(2) The maximum and minimum intensity of any anticipated subsequent project, such as the number of residences in a residential development, and with regard to a public works facility, its anticipated capacity and service area.

(3) The anticipated location for any subsequent development projects, and, consistent with the rule of reason set forth in Section 15126.6(f), alternative locations for any such projects.

(4) A capital outlay or capital improvement program, or other scheduling or implementing device that governs the submission and approval of subsequent projects, or an explanation as to why practical planning considerations render it impractical to identify any such program or scheduling or other device at the time of preparing the Master EIR.

Subdivision (c) provides that a description of potential impacts of anticipated projects for which there is not sufficient information reasonably available to support a full assessment of potential impacts in the Master EIR. This description shall not be construed as a limitation on the impacts which may be considered in a focused EIR. Subdivision (d) provides that where a Master EIR is prepared in connection with a project identified in subdivision (b)(1) of section 15175, the anticipated subsequent projects included within a Master EIR may consist of later planning approvals, including parcel-specific approvals, consistent with the overall planning decision (e.g., general plan, or specific plan, or redevelopment plan) for which the Master EIR has been prepared. Such subsequent projects shall be adequately described for purposes of subdivision (b) or of this section (15176) if the Master EIR and any other documents embodying or relating to the overall planning decision identify the land use designations

and the permissible densities and intensities of use for the affected parcel(s). The proponents of such subsequent projects shall not be precluded from relying on the Master EIR solely because that document did not specifically identify or list, by name, the subsequent project as ultimately proposed for approval.

Section 15177 (added in 1997), subdivision (a), provides that after a Master EIR has been prepared and certified, subsequent projects which the lead agency determines as being within the scope of the Master EIR will be subject to only limited environmental review. Subdivision (b) provides that, except as provided in subsection (2) of this subdivision, neither a new environmental document nor the preparation of findings pursuant to section 15091 shall be required of a subsequent project when all of the following requirements are met:

(1) The lead agency for the subsequent project is the lead agency or any responsible agency identified in the Master EIR.

(2) The lead agency for the subsequent project prepares an initial study on the proposal. The initial study shall analyze whether the subsequent project was described in the Master EIR and whether the subsequent project may cause any additional significant effect on the environment which was not previously examined in the Master EIR.

(3) The lead agency for the subsequent project determines, on the basis of written findings, that no additional significant environmental effect will result from

the proposal, no new additional mitigation measures or alternatives may be required, and that the project is within the scope of the Master EIR. "Additional significant environmental effect" means any project-specific effect which was not addressed as a significant effect in the Master EIR.

Subdivision (c) provides that whether a subsequent project is within the scope of the Master EIR is a question of fact to be determined by the lead agency based upon a review of the initial study to determine whether there are additional significant effects or new additional mitigation measures or alternatives required for the subsequent project that are not already discussed in the Master EIR. Subdivision (d) provides that, prior to approval of the proposed subsequent project, the lead agency shall incorporate all feasible mitigation measures or feasible alternatives appropriate to the project as set forth in the Master EIR and provide notice in the manner required by Section 15087. Subdivision (e) provides that when the lead agency approves a project pursuant to this section, the lead agency shall file a notice in the manner required by Section 15075.

Section 15178 (added in 1997), subdivision (a), provides that when a proposed subsequent project is identified in the Master EIR, but the lead agency cannot make a determination pursuant to Section 15177 that the subsequent project is within the scope of the Master EIR, and the lead agency determines that the cumulative impacts, growth inducing impacts and irreversible significant effects analysis in the Master EIR is adequate for the subsequent project, the lead agency shall prepare a mitigated negative

declaration or a focused EIR if, after preparing an initial study, the lead agency determines that the project may result in new or additional significant effects. Whether the cumulative impacts, growth inducing impacts and irreversible significant effects analyses are adequate is a question of fact to be determined by the lead agency based upon a review of the proposed subsequent project in light of the Master EIR.

Subdivision (b) requires a lead agency to prepare a mitigated negative declaration for any proposed subsequent project if both of the following occur:

(1) The initial study prepared pursuant to Section 15177 has identified potentially new or additional significant environmental effects that were not analyzed in the Master EIR; and

(2) Feasible mitigation measures or alternatives will be incorporated to revise the subsequent project before the negative declaration is released for public review pursuant to Section 15073 in order to avoid or mitigate the identified effects to a level of insignificance.

Subdivision (c) provides that a lead agency shall prepare a focused EIR if the subsequent project may have a significant effect on the environment and a mitigated negative declaration pursuant to subdivision (b) of this section cannot be prepared.

(1) The focused EIR shall incorporate by reference the Master EIR and analyze only the subsequent project's additional significant environmental effects and any new or additional mitigation measures or alternatives that were not

identified and analyzed by the Master EIR. "Additional significant environmental effects" are those project-specific effects on the environment which were not addressed as significant in the Master EIR.

(2) A focused EIR need not examine those effects which the lead agency, prior to public release of the focused EIR, finds, on the basis of the initial study, related documents, and commitments from the proponent of a subsequent project, have been mitigated in one of the following manners:

(A) Mitigated or avoided as a result of mitigation measures identified in the Master EIR which the lead agency will require as part of the approval of the subsequent project;

(B) Examined at a sufficient level of detail in the Master EIR to enable those significant effects to be mitigated or avoided by specific revisions to the project, the imposition of conditions of approval, or by other means in connection with approval of the subsequent project; or

(C) The mitigation or avoidance of which is the responsibility of and within the jurisdiction of another public agency and is, or can and should be, undertaken by that agency.

(3) The lead agency's findings pursuant to subdivision (2) shall be included in the focused EIR prior to public release pursuant to Section 15087.

(4) A focused EIR prepared pursuant to this section shall analyze any

significant environmental effects when:

(A) Substantial new or additional information shows that the adverse environmental effect may be more significant that was described in the Master EIR; or

(B) Substantial new or additional information shows that mitigation measures or alternatives which were previously determined to be infeasible are feasible and will avoid or reduce the significant effects of the subsequent project to a level of insignificance.

Subdivision (d) provides that a lead agency shall file a notice of determination pursuant to Section 15075 if a project has been approved for which a mitigated negative declaration has been prepared pursuant to this section and a notice of determination shall be filed pursuant to Section 15094 if a project has been approved for which a focused EIR has been prepared pursuant to this section. Subdivision (e) provides that when a lead agency determines that the cumulative impacts, growth inducing impacts and irreversible significant effects analysis in the Master EIR is inadequate for the subsequent project, the subsequent project is no longer eligible for the limited environmental review available under the Master EIR process and shall be reviewed according to Article 7 (commencing with Section 15080) of these guidelines. The lead agency shall tier the project specific EIR upon the Master EIR to the extent feasible under Section 15152.

Section 15179 (added in 1997) provides that the certified Master EIR shall not be used in accordance with this article if either (i) it was certified more than five years prior to the filing of an application for a later project, or (ii) a project not identified in the certified Master EIR as an anticipated subsequent project is approved and the approved project may affect the adequacy of the Master EIR, unless the lead agency does one of the following:

(a) Reviews the Master EIR and finds that no substantial changes have occurred with respect to the circumstances under which the Master EIR was certified, or that there is no new available information which was not known and could not have been known at the time the Master EIR was certified; or

(b) Prepares a subsequent or supplemental EIR that updates or revises the Master EIR and which either (i) is incorporated into the previously certified Master EIR, or (ii) references any deletions, additions or other modifications to the previously certified Master EIR.

Article 12. Special Situations

Section 15184 (added in 1983) provides that whenever a state agency issues an order which requires a local agency to carry out a project subject to CEQA, the following rules apply:

(a) If an EIR is prepared for the project, the local agency shall limit the EIR to considering those factors and alternatives which will not conflict with the order.

(b) If a local agency undertakes a project to implement a rule or regulation imposed by a certified state environmental regulatory program listed in Section 15251, the project shall be exempt from CEQA with regard to the significant effects analyzed in the document prepared by the state agency as a substitute for an EIR. The local agency shall comply with CEQA with regard to any site-specific effect of the project which was not analyzed by the certified state agency as a significant effect on the environment. The local agency need not re-examine the general environmental effects of the state rule or regulation.

Section 15185 (added in 1983), subdivision (a), provides that where an agency allows administrative appeals upon the adequacy of an environmental document, an appeal shall be handled according to the procedures of that agency. Public notice shall be handled in accordance with individual agency requirements and Section 15202(e). Subdivision (b) provides that the decisionmaking body to which an appeal has been made shall consider the environmental document and make findings under Sections 15091 and 15093 if appropriate.

Section 15186 (added in 1983 and last amended in 1998), subdivision (a), provides that CEQA establishes a special requirement for certain school projects, as well as certain projects near schools, to ensure that potential health impacts resulting from exposure to hazardous materials, wastes, and substances will be carefully examined and disclosed in a negative declaration or EIR, and that the lead agency will

consult with other agencies in this regard. Subdivision (b) provides that when a project located within one-fourth mile of a school involves the construction or alteration of a facility which might reasonably be anticipated to emit hazardous or acutely hazardous air emissions, or which would handle acutely hazardous material or a mixture containing acutely hazardous material in a quantity equal to or greater than that specified in subdivision (a) of Section 25536 of the Health and Safety Code, which may impose a health or safety hazard to persons who would attend or would be employed at the school, the lead agency must:

(1) Consult with the affected school district or districts regarding the potential impact of the project on the school when circulating the proposed negative declaration or draft EIR for review.

(2) Notify the affected school district of the project, in writing, not less than 30 days prior to approval or certification of the negative declaration or EIR. This subdivision does not apply to projects for which an application was submitted prior to January 1, 1992.

Subdivision (c) provides that when the project involves the purchase of a school site or the construction of a secondary or elementary school, the negative declaration or EIR prepared for the project shall not be approved or certified by the school board unless:

(1) The negative declaration or EIR contains sufficient information to determine whether the property is:

(A) The site of a current or former hazardous waste or solid waste disposal facility and, if so, whether wastes have been removed.

(B) A hazardous substance release site identified by the Department of Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) The site of one or more buried or above ground pipelines which carry hazardous substances, acutely hazardous materials, or hazardous wastes, as defined in Division 20 of the Health and Safety Code. This does not include a natural gas pipeline used only to supply the school or neighborhood.

(2) The lead agency has notified in writing and consulted with the county or city administering agency (as designated pursuant to Section 25502 of the Health and Safety Code) and with any air pollution control district or air quality management district having jurisdiction, to identify facilities within one-fourth mile of the proposed school site which might reasonably be anticipated to emit hazardous emissions or handle hazardous or acutely hazardous material, substances, or waste. The notice shall include a list of the school sites for which information is sought. Each agency or district receiving notice shall provide the

requested information and provide a written response to the lead agency within 30 days of receiving the notification. If any such agency or district fails to respond within that time, the negative declaration or EIR shall be conclusively presumed to comply with this section as to the area of responsibility of that agency.

(3) The school board makes, on the basis of substantial evidence, one of the following written findings:

(A) Consultation identified none of the facilities specified in paragraph (2).

(B) The facilities specified in paragraph (2) exist, but one of the following conditions applies:

1. The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

2. Corrective measures required under an existing order by another agency having jurisdiction over the facilities will, before the school is occupied, mitigate all chronic or accidental hazardous air emissions to levels that do not constitute any actual or potential public health danger to persons who would attend or be employed at the proposed school. When the school district board makes such a finding, it shall also make a subsequent finding, prior to

occupancy of the school, that the emissions have been so mitigated.

This finding shall be in addition to any findings which may be required pursuant to Sections 15074, 15091 or 15093. Subdivision (d) provides that when the lead agency has carried out the consultation required by paragraph (2) of subdivision (b), the negative declaration or EIR shall be conclusively presumed to comply with this section, notwithstanding any failure of the consultation to identify an existing facility. Subdivision (e) provides that the following definitions shall apply for the purposes of this section:

(1) "Acutely hazardous material," is as defined in 22 C.C.R. §66260.10.

(2) "Administering agency," is as defined in Section 25501 of the Health and Safety Code.

(3) "Hazardous air emissions," is as defined in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(4) "Hazardous substance," is as defined in Section 25316 of the Health and Safety Code.

(5) "Hazardous waste," is as defined in Section 25117 of the Health and Safety Code.

(6) "Hazardous waste disposal site," is as defined in Section 25114 of the Health and Safety Code.

Article 13. Review and Evaluations of EIRs and Negative Declarations

Section 15200 (added in 1983 and last amended in 1983) provides that the purpose of review of EIRs and negative declaration include:

(a) Sharing expertise,

(b) Disclosing agency analyses,

(c) Checking for accuracy,

(d) Detecting omissions,

(e) Discovering public concerns, and

(f) Soliciting counter proposals.

Section 15201 (added in 1983 and last amended in 1998), provides that public participation is an essential part of the CEQA process. Each public agency should include provisions in its CEQA procedures for wide public involvement, formal and informal, consistent with its existing activities and procedures, in order to receive and evaluate public reactions to environmental issues related to the agency's activities. Such procedures should include, whenever possible, making environmental information available in electronic format on the Internet, on a web site maintained or utilized by the public agency.

Section 15202 (added in 1983 and last amended in 1998), subdivision (a), provides that CEQA does not require formal hearings at any stage of the environmental review process. Public comments may be restricted to written communications. Subdivision (b) provides that if an agency provides a public hearing on its decision to

carry out or approve a project, the agency should include environmental review as one of the subjects for the hearing. Subdivision (c) provides that a public hearing on the environmental impact of a project should usually be held when the lead agency determines it would facilitate the purposes and goals of CEQA to do so. The hearing may be held in conjunction with and as a part of normal planning activities. Subdivision (d) provides that a draft EIR or negative declaration should be used as a basis for discussion at a public hearing. The hearing may be held at a place where public hearings are regularly conducted by the lead agency or at another location expected to be convenient to the public. Subdivision (e) requires that notice of all public hearings be given in a timely manner. This notice may be given in the same form and time as notice for other regularly conducted public hearings of the public agency. To the extent that the public agency maintains an Internet web site, notice of all public hearings should be made available in electronic format on that site. Subdivision (f) provides that a public agency may include, in its implementing procedures, procedures for the conducting of public hearings pursuant to this section. The procedures may adopt existing notice and hearing requirements of the public agency for regularly conducted legislative, planning, and other activities. Subdivision (g) provides that there is no requirement for a public agency to conduct a public hearing in connection with its review of an EIR prepared by another public agency.

Section 15203 (added in 1983) provides that the lead agency shall provide adequate time for other public agencies and members of the public to review and comment on a draft EIR or negative declaration that it has prepared. Subdivision (a) provides that public agencies may establish time periods for review in their implementing procedures and shall notify the public and reviewing agencies of the time for receipt of comments on EIRs. These time periods shall be consistent with applicable statutes, the State CEQA Guidelines, and applicable clearinghouse review periods. Subdivision (b) provides that a review period for an EIR does not require a halt in other planning or evaluation activities related to a project. Planning should continue in conjunction with environmental evaluation.

Section 15204 (added in 1983 and last amended in 1998), subdivision (a), provides that in reviewing draft EIRs, persons and public agencies should focus on the sufficiency of the document in identifying and analyzing the possible impacts on the environment and ways in which the significant effects of the project might be avoided or mitigated. Comments are most helpful when they suggest additional specific alternatives or mitigation measures that would provide better ways to avoid or mitigate the significant environmental effects. At the same time, reviewers should be aware that the adequacy of an EIR is determined in terms of what is reasonably feasible, in light of factors such as the magnitude of the project at issue, the severity of its likely environmental impacts, and the geographic scope of the project. CEQA does not require a lead agency to

conduct every test or perform all research, study, and experimentation recommended or demanded by commentors. When responding to comments, lead agencies need only respond to significant environmental issues and do not need to provide all information requested by reviewers, as long as a good faith effort at full disclosure is made in the EIR. Subdivision (b) provides that in reviewing negative declarations, persons and public agencies should focus on the proposed finding that the project will not have a significant effect on the environment. If persons and public agencies believe that the project may have a significant effect, they should:

(1) Identify the specific effect,

(2) Explain why they believe the effect would occur, and

(3) Explain why they believe the effect would be significant.

Subdivision (c) provides that reviewers should explain the basis for their comments, and should submit data or references offering facts, reasonable assumptions based on facts, or expert opinion supported by facts in support of the comments. Pursuant to Section 15064, an effect shall not be considered significant in the absence of substantial evidence. Subdivision (d) provides that reviewing agencies or organizations should include with their comments the name of a contact person who would be available for later consultation if necessary. Each responsible agency and trustee agency shall focus its comments on environmental information germane to that agency's statutory responsibility. Subdivision (e) provides that this section shall not be used to restrict the

ability of reviewers to comment on the general adequacy of a document or of the lead agency to reject comments not focused as recommended by this section. Subdivision (f) provides that, prior to the close of the public review period for an EIR or mitigated negative declaration, a responsible or trustee agency which has identified significant effects on the environment may submit to the lead agency proposed mitigation measures which would address those significant effects. Any such measures shall be limited to impacts affecting those resources which are subject to the statutory authority of that agency. If mitigation measures are submitted, the responsible or trustee agency shall either submit to the lead agency complete and detailed performance objectives for the mitigation measures, or shall refer the lead agency to appropriate, readily available guidelines or reference documents which meet the same purpose.

Section 15205 (added in 1983 and last amended in 2001), subdivision (a), provides that draft EIRs and negative declarations to be reviewed by state agencies shall be submitted to the State Clearinghouse, 1400 Tenth Street, Sacramento, California 95814. For U.S. Mail, submit to P.O. Box 3044, Sacramento, California 95812-3044. When submitting such documents to the State Clearinghouse, the public agency shall include, in addition to the printed copy, a copy of the document in electronic form on a diskette or by electronic mail transmission, if available. Subdivision (b) provides that the following environmental documents shall be submitted to the State Clearinghouse for review by state agencies:

(1) Draft EIRs and negative declarations prepared by a state agency where such agency is a lead agency.

(2) Draft EIRs and negative declarations prepared by a public agency where a state agency is a responsible agency, trustee agency, or otherwise has jurisdiction by law with respect to the project.

(3) Draft EIRs and negative declarations on projects identified in Section 15206 as being of statewide, regional, or areawide significance.

(4) Draft EIRs, environmental assessments, and findings of no significant impact prepared pursuant to NEPA, the Federal Guidelines (Title 40 CFR, Part 1500, commencing with Section 1500.1).

Subdivision (c) provides that public agencies may send environmental documents to the State Clearinghouse for review where a state agency has special expertise with regard to the environmental impacts involved. The areas of statutory authorities of state agencies are identified in Appendix B. Any such environmental documents submitted to the State Clearinghouse shall include, in addition to the printed copy, a copy of the document in electronic format, on a diskette or by electronic mail transmission, if available. Subdivision (d) provides that when an EIR or negative declaration is submitted to the State Clearinghouse for review, the review period set by the lead agency shall be at least as long as the period provided in the state review system operated by the State Clearinghouse. In the state review system, the normal review

period is 45 days for EIRs and 30 days for negative declarations. In exceptional circumstances, the State Clearinghouse may set shorter review periods when requested by the lead agency. Subdivision (e) provides that the number of copies of an EIR or negative declaration submitted to the State Clearinghouse shall not be less than ten unless the State Clearinghouse approves a lower number in advance. Subdivision (f) provides that, while the lead agency is encouraged to contact the regional and district offices of state responsible agencies, the lead agency must, in all cases, submit documents to the State Clearinghouse for distribution in order to comply with the review requirements of this section.

Section 15206 (added in 1983 and last amended in 2001), subdivision (a), provides that projects meeting the criteria in this section shall be deemed to be of statewide, regional, or areawide significance.

(1) A draft EIR or negative declaration prepared by any public agency on a project described in this section shall be submitted to the State Clearinghouse and should be submitted also to the appropriate metropolitan area council of governments for review and comment.

(2) When such documents are submitted to the State Clearinghouse, the public agency shall include, in addition to the printed copy, a copy of the document in electronic format on a diskette or by electronic mail transmission, if available.

Subdivision (b) requires the lead agency to determine that a proposed project is of statewide, regional, or areawide significance if the project meets any of the following criteria:

(1) A proposed local general plan, element, or amendment thereof for which an EIR was prepared. If a negative declaration was prepared for the plan, element, or amendment, the document need not be submitted for review.

(2) A project has the potential for causing significant effects on the environment extending beyond the city or county in which the project would be located. Examples of the effects include generating significant amounts of traffic or interfering with the attainment or maintenance of state or national air quality standards. Projects subject to this subsection include:

(A) A proposed residential development of more than 500 dwelling units.

(B) A proposed shopping center or business establishment employing more than 1,000 persons or encompassing more than 500,000 square feet of floor space.

(C) A proposed commercial office building employing more than 1,000 persons or encompassing more than 250,000 square feet of floor space.

(D) A proposed hotel/motel development of more than 500 rooms.

(E) A proposed industrial, manufacturing, or processing plant, or industrial park planned to house more than 1,000 persons, occupying more than 40 acres of land, or encompassing more than 650,000 square feet of floor area.

(3) A project which would result in the cancellation of an open space contract made pursuant to the California Land Conservation Act of 1965 (Williamson Act) for any parcel of 100 or more acres.

(4) A project for which an EIR and not a negative declaration was prepared which would be located in and would substantially impact the following areas of critical environmental sensitivity:

(A) The Lake Tahoe Basin.

(B) The Santa Monica Mountains Zone as defined by Section 33105 of the Public Resources Code.

(C) The California Coastal Zone as defined in, and mapped pursuant to, Section 30103 of the Public Resources Code.

(D) An area within 1/4 mile of a wild and scenic river as defined by Section 5093.5 of the Public Resources Code.

(E) The Sacramento-San Joaquin Delta, as defined in Water Code Section 12220.

(F) The Suisun Marsh as defined in Public Resources Code Section 29101.

(G) The jurisdiction of the San Francisco Bay Conservation and Development Commission as defined in Government Code Section 66610.

(5) A project which would substantially affect sensitive wildlife habitats including but not limited to riparian lands, wetlands, bays, estuaries, marshes, and habitats for endangered, rare and threatened species as defined by Section 15380 of this Chapter.

(6) A project which would interfere with attainment of regional water quality standards as stated in the approved areawide waste treatment management plan.

(7) A project which would provide housing, jobs, or occupancy for 500 or more people within 10 miles of a nuclear power plant.

Section 15208 (added in 1983) provides that comments received through the consultation process shall be retained for a reasonable period and available for public inspection at an address given in the final EIR. Comments which may be received on a draft EIR or negative declaration under preparation shall also be considered and kept on file.

Article 14. Projects Also Subject to the National Environmental Policy Act (NEPA)

Section 15220 (added in 1983 and last amended in 1983) provides that this article applies to projects that are subject to both CEQA and NEPA. NEPA applies to projects which are carried out, financed, or approved in whole or in part by federal agencies. Accordingly, this article applies to projects which involve one or more state or local agencies and one or more federal agencies.

Section 15221 (added in 1983), subdivision (a), provides that when a project will require compliance with both CEQA and NEPA, state or local agencies should use the EIS or finding of no significant impact rather than preparing an EIR or negative declaration if the following two conditions occur:

(1) An EIS or finding of no significant impact will be prepared before an EIR or negative declaration would otherwise be completed for the project; and

(2) The EIS or finding of no significant impact complies with the provisions of these guidelines.

Subdivision (b) provides that because NEPA does not require separate discussion of mitigation measures or growth inducing impacts, these points of analysis will need to be added, supplemented, or identified before the EIS can be used as an EIR.

Section 15222 (added in 1983) provides that if a lead agency finds that an EIS or finding of no significant impact for a project would not be prepared by the federal agency by the time when the lead agency will need to consider an EIR or negative declaration, the lead agency should try to prepare a combined EIR-EIS or negative declaration-

finding of no significant impact. To avoid the need for the federal agency to prepare a separate document for the same project, the lead agency must involve the federal agency in the preparation of the joint document. This involvement is necessary because federal law generally prohibits a federal agency from using an EIR prepared by a state agency unless the federal agency was involved in the preparation of the document.

Section 15223 (added in 1983) provides that when it plans to use an EIS or finding of no significant impact or to prepare such a document jointly with a federal agency, the lead agency shall consult as soon as possible with the federal agency.

Section 15225 (added in 1983 and last amended in 1997), subdivision (a), provides that where the federal agency circulated the EIS or finding of no significant impact for public review as broadly as state or local law may require and gave notice meeting the standards in Section 15072(a) or 15087(a), the lead agency under CEQA may use the federal document in the place of an EIR or negative declaration without recirculating the federal document for public review. One review and comment period is enough. Prior to using the federal document in this situation, the lead agency shall give notice that it will use the federal document in the place of an EIR or negative declaration and that it believes that the federal document meets the requirements of CEQA. The notice shall be given in the same manner as a notice of the public availability of a draft EIR under Section 15087.

Section 15226 (added in 1983) provides that state and local agencies should cooperate with federal agencies to the fullest extent possible to reduce duplication between the California Environmental Quality Act and the National Environmental Policy Act. Such cooperation should, to the fullest extent possible, include:

(a) Joint planning processes,

(b) Joint environmental research and studies,

(c) Joint public hearings, and

(d) Joint environmental documents.

Section 15228 (added in 1983) provides that where a federal agency will not cooperate in the preparation of joint document and will require separate NEPA compliance for the project at a later time, the state or local agency should persist in efforts to cooperate with the federal agency. Because NEPA expressly allows federal agencies to use environmental documents prepared by an agency of statewide jurisdiction, a local agency should try to involve a state agency in helping prepare an EIR or negative declaration for the project. In this way there will be a greater chance that the federal agency may later use the CEQA document and not require the applicant to pay for preparation of a second document to meet NEPA requirements at a later time.

Article 15. Litigation

Section 15230 (added in 1983) provides that litigation under CEQA must be handled under the time limits and criteria described in Sections 21167 et seq. of the

Public Resources Code and Section 15112 of these guidelines in addition to provisions in this article.

Section 15231 (added in 1983 and last amended in 1998) provides that a final EIR prepared by a lead agency or a negative declaration adopted by a lead agency shall be conclusively presumed to comply with CEQA for purposes of use by responsible agencies which were consulted pursuant to Sections 15072 or 15082 unless one of the following conditions occurs:

(a) The EIR or negative declaration is finally adjudged in a legal proceeding not to comply with the requirements of CEQA, or

(b) A subsequent EIR is made necessary by Section 15162 of these guidelines.

Section 15232 (added in 1983) provides that in a writ of mandate proceeding challenging approval of a project under CEQA, the petitioner shall, within 90 days of filing the petition, request a hearing or otherwise be subject to dismissal on the court's own motion or on the motion of any party to the suit.

Article 19. Categorical Exemptions

Section 15300 (added in 1983) provides that section 21084 of the Public Resources Code requires these guidelines to include a list of classes of projects which

have been determined not to have a significant effect on the environment and which shall, therefore, be exempt from the provisions of CEQA.

In response to that mandate, the Secretary for Resources has found that the following classes of projects listed in this article do not have a significant effect on the environment, and they are declared to be categorically exempt from the requirement for the preparation of environmental documents.

Section 15302 (added in 1983), provides that Class 2 consists of replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced, including but not limited to:

(a) Replacement or reconstruction of existing schools and hospitals to provide earthquake resistant structures which do not increase capacity more than 50 percent;

(b) Replacement of a commercial structure with a new structure of substantially the same size, purpose, and capacity.

(c) Replacement or reconstruction of existing utility systems and/or facilities involving negligible or no expansion of capacity.

(d) Conversion of overhead electric utility distribution system facilities to underground including connection to existing overhead electric utility distribution lines where the surface is restored to the condition existing prior to the undergrounding.

Section 15314 (added in 1983) provides that Class 14 consists of minor additions to existing schools within existing school grounds where the addition does not increase original student capacity by more than 25% or ten classrooms, whichever is less. The addition of portable classrooms is included in this exemption.

Section 15320 (added in 1983) provides that Class 20 consists of changes in the organization or reorganization of local governmental agencies where the changes do not change the geographical area in which previously existing powers are exercised. Examples include but are not limited to:

(a) Establishment of a subsidiary district.

(b) Consolidation of two or more districts having identical powers.

(c) Merger with a city of a district lying entirely within the boundaries of the city.

Section 15322 (added in 1983) provides that Class 22 consists of the adoption, alteration, or termination of educational or training programs which involve no physical alteration in the area affected or which involve physical changes only in the interior of existing school or training structures. Examples include but are not limited to:

(a) Development of or changes in curriculum or training methods.

(b) Changes in the grade structure in a school which do not result in changes in student transportation.

Article 20. Definitions

Section 15350 (added in 1983) provides that the definitions contained in this article apply to terms used throughout the guidelines unless a term is otherwise defined in a particular section. Although all of these definitional sections are incorporated by reference, the following sections are particularly useful to this test claim:

Section 15367 (added in 1983) provides that "lead agency" means the public agency which has the principal responsibility for carrying out or approving a project. The lead agency will decide whether an EIR or negative declaration will be required for the project and will cause the document to be prepared. Criteria for determining which agency will be the lead agency for a project are contained in Section 15051.

Section 15368 (added in 1983) provides that "local agency" means any public agency other than a state agency, board, or commission. Local agency includes but is not limited to cities, counties, charter cities and counties, districts, school districts, special districts, redevelopment agencies, local agency formation commissions, and any board, commission, or organizational subdivision of a local agency when so designated by order or resolution of the governing legislative body of the local agency.

Section 15383 (added in 1983) provides that "state agency" means a governmental agency in the executive branch of the State Government or an entity which operates under the direction and control of an agency in the executive branch of State Government and is funded primarily by the State Treasury.

Part D - Executive Orders -California State Clearinghouse Handbook

The Governor's Office of Planning and Research has published a document entitled "California State Clearinghouse Handbook" in January of 2000, a copy of which is attached hereto as Exhibit 9 and is incorporated herein by reference. This is an executive order within the meaning of Government Code Section 17516.

Negative Declaration Process

A draft Negative Declaration submitted to the State Clearing House (SCH) for state agency review must comply with the following steps:

Step 1: Submittal of Negative Declaration to State Clearinghouse. When a Negative Declaration requires state agency review, at least fifteen copies must be sent to the SCH, by the Lead Agency or by a party clearly authorized by the Lead Agency. The minimum content requirements for a Negative Declaration are:

a) Description and title of the project;

b) Location of the project, preferably shown on a map;

c) Name of the project proponent;

d) A proposed finding that the project will not have a significant effect on the environment;

e) An attached copy of the Initial Study documenting reasons to support the finding; and

f) Mitigation measures, if any, included in the project to avoid potentially significant effects.

Step 2: Distribution and Review Period. When a Negative Declaration is received by the SCH for distribution, a staff analyst assigns an SCH number to the project. The Lead Agency is required to reference any previously assigned number, if applicable. The normal review period for Negative Declarations submitted to SCH is 30 calendar days. The review period begins when SCH circulates the document, which is usually the same day it is received.

Step 3: Review of Negative Declaration. After SCH has distributed a Negative Declaration to state agencies, those agencies assign the document to staff members in either their Sacramento or regional offices for review, analysis and comment. If an extension is granted, the Lead Agency is notified.

Step 4: Negative Declaration Comments. At the end of the state review period, all comments from the reviewing state agencies are collected at SCH. A closing letter and

a complete package of comments are forwarded to the Lead Agency on the day following the close of the review period.

Step 5: Notice of Determination. Within five working days of approving a project for which a Negative Declaration has been adopted, a local Lead Agency must file a Notice of Determination (NOD) with the county clerk of the county or counties where the project is located. If a project requires discretionary approval from a state agency, the NOD also must be filed with SCH. If the Lead Agency is a state agency, the NOD must be filed with the SCH. The information required in a Notice of Determination is listed in Section 15075 of the CEQA Guidelines (Title 14). The filing of the NOD begins a 30-calendar-day statute of limitations on court challenges to the project approval under CEQA.

The Negative Declaration process also provides some "helpful hints" to follow which include:

a) Submit one completed NOC with the Negative Declaration.

b) Submit 15 copies of each Negative Declaration. Submit additional copies if you have identified more than 15 state agencies that should receive a copy.

c) Include a cover letter if you have special instructions for the SCH staff

d) Assume that the 30-day review period will commence within 24 hours of receipt by SCH.

e) Plan ahead if you will need a shortened review period by calling SCH before mailing your document.

f) Call SCH in advance if you have any questions regarding these procedures.

EIR Process

Step 1: Notice of Preparation. To assist the EIR scoping process, a Lead Agency must circulate a Notice of Preparation (NOP) to all Responsible and Trustee Agencies advising them of its intention to prepare a Draft EIR. Lead Agencies are required to send copies of a NOP directly to all Responsible and Trustee Agencies. When there is a Responsible or Trustee state agency involved in a project, a copy of the NOP also

must be sent to the SCH. The Lead Agency's distribution list for the NOP should be attached to SCH's copy of the NOP. The minimum content requirements for a NOP are:

a) Description of the project;

b) Location of the project, indicated either on an attached map (preferably a topographical map), or by a street address in an urbanized area;

c) Salient environmental issues; and

d) Probable environmental effects of the project.

Step 2: SCH Number and Distribution. When a NOP is submitted to SCH, a number is assigned to the project. SCH receipt of the NOP will be acknowledged by letter to the Lead Agency, noting the SCH number that is to be used for all subsequent environmental documents for that project. A state agency distribution list will be sent with the acknowledgment letter noting any agencies to which SCH has forwarded a copy of the NOP.

Step 3: NOP Review Period. Responsible agencies have a maximum of 30 calendar days from receipt of a NOP to comment on a proposed project (Section 15103). When a state agency comments on a NOP, a copy of the comment letter must

be submitted to SCH. The SCH does not compile and transmit state agency comment letters on NOP's after the end of the 30-day NOP commend period. Each commenting state agency must send its comment letter directly to the Lead Agency, with a copy to SCH.

Step 4: Submittal of Draft EIR to SCH. When a Draft EIR requires state agency review, at least fifteen copies must be submitted to SCH together with one copy of the NOC form. Lead Agencies are required to submit their Draft EIR and NOC form to SCH when:

a) The Lead Agency is a state agency,

b) The project involves one or more Responsible or Trustee state agencies, or

c) The project has statewide, regional, or area wide significance.

Submittal of Draft EIRs to SCH must be done by the Lead Agency or by a party clearly authorized by the Lead Agency.

Step 5: Draft EIR Review Period. When a Draft EIR is submitted to SCH for distribution, the SCH number assigned to the NOP should be referenced on the NOC

and/or EIR title page. The state review period typically starts on the same date the Draft EIR is submitted to the SCH if the document is complete, and received by noon.

Step 6: Review of Draft EIR. When the Draft EIR is received by reviewing state agencies, those agencies assign the document to staff members for review, analysis and comment.

Step 7: Draft EIR Comments. On the day following the close of the review period, a complete package of comments is forwarded to the Lead Agency by SCH.

Step 8: Final EIR. After receiving all public comments, including those of state agencies, the Lead Agency must prepare written responses and include them in the Final EIR. The Lead Agency must then certify the Final EIR before approving the project.

Step 9: Notice of Determination. Within five working days of approving a project for which an EIR was prepared, a local Lead Agency must file a Notice of Determination (NOD) with the county clerk of the county or counties where the project will be located. If the project requires discretionary approval from a state agency, the NOD also must be filed with SCH. State Lead Agencies must file the NOD with the SCH. State Lead

Agencies must file the NOD with the SCH. The NOD must be signed by the proper authority of the Lead Agency and completed in full before SCH will post it.

The EIR process provides some "helpful hints" which include:

a) Send the NOP to Responsible and Trustee agencies using certified mail or a similar method to ensure documentation of receipt.

b) Submit one NOC with your Draft EIR.

c) Submit 15 copies of each Draft EIR. Submit additional copies if you have identified more than 15 state agencies that should receive a copy.

d) Include a cover letter to SCH if you have special instructions.

e) Advise SCH in advance of Draft EIRs that may require special handling or oversized packaging.

f) Call SCH in advance if you have any questions regarding these procedures.

g) SCH does not retain copies of all environmental documents it receives.

Shortened Review Process

SCH may shorten the normal review periods for draft Negative Declarations and EIRs, when requested by the Lead Agency. It is strongly advised that the Lead Agency contact the SCH prior to submitting a request for shortened review. Written requests for shortened reviews are required to be submitted to SCH together with the required 15 copies of the draft environmental document. The request letter must explain why the shortened review is needed and identify prior approval from Responsible state agencies. A request for a shortened review period will only be considered prior to the start of the state review period. SCH will consider a request for a shortened review if one or more of the following criteria are met:

1) The Lead Agency is operating under an extension of the one-year period for completion of an EIR and would not otherwise be able to complete the EIR within the extended period.

2) The public project applicant is under severe time constraints with regard to obtaining financing or exercising options which cannot be met without shortening the review period.

3) The document is a supplement to a draft EIR or proposed negative declaration or mitigated negative declaration previously submitted to the State Clearinghouse.

4) The health and safety of the community would be at risk unless the project is approved expeditiously.

5) The document is a revised draft EIR, or proposed negative declaration or mitigated negative declaration, where changes in the document are primarily the result of comments from agencies and the public.

The Lead Agency shall provide evidence that there has been prior consultation with Responsible and Trustee state agencies. In the case of a Draft EIR, the Lead Agency should have sent a NOP to the Responsible and Trustee state agencies. For Negative Declarations, the Lead Agency should have previously consulted, formally or informally, with Responsible and Trustee state agencies. Before submitting a shortened review request, the Lead Agency must have obtained verbal or written approval for a shortened review period from Responsible and Trustee state agencies. The request letter from the

Lead Agency must identify which state agencies have been contacted and the agencies' responses to the request.

Shortened review request procedures include:

1) The request must be made to SCH in writing by the decision-making body of the Lead Agency, or an authorized representative of the Lead Agency, and shall be made on Lead Agency letterhead. When submitted by a representative, a copy of the resolution or ordinance from the decision-making body of the Lead Agency delegating authority should be attached.

2) The request must explain the "exceptional circumstances" for making the request.

3) The request must be accompanied by 15 copies of the environmental document.

4) The request will not be approved if the project has statewide, regional, or area wide significance.

5) SCH approval of a shortened review period must be granted before issuing the public notice of availability.

6) The public review period must be at least as long as the review period set by SCH.

7) The review period for a Negative Declaration shall not be shorter than 20 days. The Lead Agency must specify the requested length of the shortened review period.

8) The review period for a Draft EIR shall not be shorter than 30 days. The Lead Agency must specify the requested length of the shortened review period.

9) The Lead Agency may use the Shortened Review Application form contained in this Handbook.

General Activities and Services

The SCH provides services that can be useful to those involved in the land use field which include: posting of certain notices, publication of a bimonthly newsletter, and providing a computer database search service.

Filing Environmental Notices

As of January 1, 1985, the process for filing environmental notices under CEQA was changed in order to centralize and simplify the process. Notices of Completion, Exemption, and Determination that previously were filed with the Resources Agency are now filed with the Governor's Office of Planning and Research.

Notice of Completion

CEQA requires that a Notice of Completion be filed at SCH by a public agency whenever a Draft EIR is completed. SCH requests that Lead Agencies also submit a NOC for Negative Declarations and NOPs. The Notice of Completion Form contained in the appendices to this Handbook, satisfies this requirement.

Notice of Availability

Public notice of the availability of a Draft EIR or a Negative Declaration must be provided by the Lead Agency to enable public agencies and individuals to review and comment on the document.

Minimum Contents of Public Notice of Availability

1) Description of proposed project;

2) Location of proposed project;

3) Specific period during which comments on proposed project will be accepted;

4) Date, time, and place of any public meetings on proposed project;

5) Address where copies of Draft EIR or Negative Declaration are available for review; and

6) Environmental effects of the project, if any.

The notice must be provided to all organizations and individuals who previously requested notice. At least one of the following notification methods must be used:

1) Publication by the Lead Agency in a newspaper of general circulation in the area affected by the proposed project.

2) Posting of the notice by the Lead Agency on- and off-site in the area where the project is to be located.

3) Direct mailing to the owners and occupants of contiguous property shown on the latest equalized assessment roll.

A Notice of Availability does not need to be filed with SCH. However, the Lead Agency may submit this notice together with its Draft EIR or Negative Declaration to provide additional information to state agencies.

Notice of Determination

A Notice of Determination (NOD) is a document filed by a public agency within 5 days after it approves or determines to carry out a project that is subject to the requirements of CEQA.

Filing the NOD starts a 30-day statute of limitations on court challenges to the project approval under CEQA. If a NOD is not filed, the statute of limitations is 180 days.

Filing requirements for state and local agencies differ as follows:

1) Local Lead Agency: If a local Lead Agency is acting on the project, it must file the NOD with the county clerk of the county or counties where the project will be located within 5 working days of approving the project. In addition, if the project requires discretionary

approval from any state agency, the Local Lead Agency also must file a copy of the NOD with SCH.

2) State Lead Agency: When a state agency is the Lead Agency, the NOD must be filed with SCH.

Minimum Contents of a Notice of Determination:

For a Negative Declaration:

1) Identification of the project, including its common name or title, if possible;

2) Location of the project;

3) Brief description of the project;

4) Date the agency approved the project;

5) The determination by the approving agency that the project in its approved form will not have a significant effect on the environment;

6) Statement that a Negative Declaration was prepared pursuant to the provisions of CEQA; and

7) Address where a copy of the environmental document and record of project approval can be examined.

For an Environmental Impact Report (EIR):

1) Identification of the project, including its common name or title, if possible;

2) Location of the project;

3) Brief description of the project;

4) Date the agency approved the project;

5) Determination by the approving agency whether the project in its approved form will have a significant effect on the environment;

6) Statement that an EIR was prepared pursuant to the provisions of CEQA;

7) Whether mitigation measures were made a condition of the approval of the project;

8) Whether a statement of overriding considerations was adopted for the project;

9) Whether findings were made pursuant to Section 15091 of the CEQA Guidelines; and

10) Address where a copy of the final EIR and record of project approval may be examined.

Additionally, the notice shall be mailed to any person who has filed a written request for such notice.

Notice of Exemption

A Notice of Exemption (NOE) is a brief notice that can (but is not required to) be filed after a public agency has decided to carry out or approve a project it has determined is exempt from CEQA.

If a NOE is filed, it should be filed with the county clerk or SCH after the project has been approved. When a public agency approves an applicant's project, either the agency or the applicant may file a Notice of Exemption.

There are different filing requirements for state agencies, local agencies, and project applicants, as follows:

State Lead Agency: If a state agency, board, or commission determines that a project is not subject to CEQA, it may file a NOE with SCH after the project has been approved.

Local Lead Agency: When a local agency files this notice, it must be fled with the county clerk of the county or counties where the project is to be located.

Applicant: When an applicant files a NOE, the notice must be fled in the same place as if it were filed by the Lead Agency. Additionally, the notice shall be accompanied by a certified document issued by the public Lead Agency stating that the agency has found the project to be exempt.

The notice must be mailed to any person who has filed a written request for such notice. This filing begins a 35-day statute of limitations on legal challenges to the Lead Agency's decision that the project is exempt from CEQA. If a NOE is not filed, a 180-day statute of limitations applies.

Minimum Contents of a Notice of Exemption:

1) brief description of the project;

2) a finding that the project is exempt, including a citation that references the CEQA Guidelines or statutory section under which it is found to be exempt; and

3) brief statement of reasons to support the finding.

General CEQA Information

Definitions are provided for "Lead Agency", "Local Agency", "Public Agency", "Responsible Agency", "State Agency", and "Trustee Agency". Lead agencies are responsible for determining the appropriate type of CEQA document for its project based on interpretation of the CEQA Statutes and CEQA Guidelines. Definitions are also provided for the following types of documents; "Negative Declaration", "Environmental Impact Report", "Notice of Preparation", "Project EIR", "Program EIR", "Supplement to an EIR", "Subsequent EIR and Negative Declaration", "Addendum to an EIR or Negative Declaration", and "Final EIR".

Definitions of certain Comments are provided, including; "Authority to Comment", "Response to Notice of Preparation", "Responsible Agency Comments on Draft EIRs and Negative Declarations", "Consideration of Comments on a Negative Declaration",

"Evaluation of and Response to EIR Comments", "Contents of the Final EIR", "Failure to Comment", and "Retention and Availability of Comments".

The purposes of reviewing EIRs and Negative Declarations include:

a) Sharing expertise,

b) Disclosing agency analyses,

c) Checking for accuracy,

d) Detecting omissions,

e) Discovering public concerns, and

f) Soliciting counter proposals.

State Clearinghouse Forms

Standard forms are used by SCH, and although the forms provided in this section have been carefully developed to transmit the information required under CEQA, the statute does not require agencies to use these particular forms. Agencies are free to devise their own forms. However, agencies choosing to create their own forms must be sure to include all the information required in the CEQA Guidelines. SCH strongly encourages Lead Agencies to use the following forms:

1) Form A: Notice of Completion. Section 15085 requires agencies to file a Notice of Completion (NOC) form with OPR as soon as the Draft EIR is complete.

2) Form B: Notice of Preparation. Section 15082 discusses the required contents of a Notice of Preparation (NOP).

3) Form C: Notice of Determination. Section 15075 outlines the content requirements for filing a Notice of Determination (NOD). The NOD form in the Handbook can be used to file with SCH and/or the county clerk.

4) Form D: Notice of Exemption. Section 15062 discusses the content requirements for filing a Notice of Exemption (NOE). The NOE form in this Handbook can be used to file with SCH and/or the county clerk.

5) Form E: Shortened Review. Public Resources Code Section 21091 allows for shortened review periods under certain circumstances. A form for requesting shortened review has been provided in this

Handbook to ensure that the requesting agency provides all the information necessary for SCH to make a determination.

Explanation of the Notice of Completion Form

This form is required to be submitted with 15 copies of every draft Environmental Impact Report and Negative Declaration that is reviewed through the State Clearinghouse. It is used by the Clearinghouse to transmit all environmental documents.

Appendices

Appendix A provides which projects require State Clearinghouse review. Appendix B provides a flowchart in the process of a Lead Agency's decision to prepare an EIR. Appendix C provides the CEQA process flowchart. Appendix D provides the time periods for review of environmental documents. Appendix E provides an explanation of the State Clearinghouse Number. Appendix F provides the reviewing state agencies address list.

PART III. STATEMENT OF THE CLAIM

The Statutes, Public Resources Code Sections, Education Code Section, Government Code sections and California Code of Regulations sections referenced in

this test claim result in school districts incurring costs mandated by the state, as defined in Government Code section 17514[9], by creating new state-mandated duties related to the uniquely governmental function of providing services to the public and these statutes apply to school districts and do not apply generally to all residents and entities in the state.[10]

The new duties mandated by the state upon school districts and county offices of education require state reimbursement of the direct and indirect costs of labor, materials and supplies, data processing services and software, contracted services and

---

[9] Government Code section 17514, as added by Chapter 1459/84:

"Costs mandated by the state" means any increased costs which a local agency or school district is required to incur after July 1, 1980, as a result of any statute enacted on or after January 1, 1975, or any executive order implementing any statute enacted on or after January 1, 1975, which mandates a new program or higher level of service of an existing program within the meaning of Section 6 of Article XIIIB of the California Constitution.

[10] Public schools are a Article XIII B, Section 6 "program," pursuant to Long Beach Unified School District v. State of California, (1990) 225 Cal.App.3d 155, 172; 275 Cal.Rptr. 449:

"In the instant case, although numerous private schools exist, education in our society is considered to be a peculiarly government function. (Cf. Carmel Valley Fire Protection Dist. v. State of California (1987) 190 Cal.App.3d at p.537) Further, public education is administered by local agencies to provide service to the public. Thus public education constitutes a 'program' within the meaning of Section 6."

consultants, equipment and capital assets, staff and student training and travel to implement the activities set forth in the declarations of William C. McGuire and Thomas J. Donner, attached hereto and incorporated herein by reference.

SECTION 2. EXCEPTIONS TO MANDATE REIMBURSEMENT

None of the Government Code Section 17556[1] statutory exceptions to a finding of costs mandated by the state apply to this test claim. Note, that to the extent school districts

---

[1] Government Code section 17556, as last amended by Chapter 589, Statutes of 1989:

"The commission shall not find costs mandated by the state, as defined in Section 17514, in any claim submitted by a local agency or school district, if, after a hearing, the commission finds that:

(a) The claim is submitted by a local agency or school district which requested legislative authority for that local agency or school district to implement the program specified in the statute, and that statute imposes costs upon that local agency or school district requesting the legislative authority. A resolution from the governing body or a letter from a delegated representative of the governing body of a local agency or school district which requests authorization for that local agency or school district to implement a given program shall constitute a request within the meaning of this paragraph.

(b) The statute or executive order affirmed for the state that which had been declared existing law or regulation by action of the courts.

(c) The statute or executive order implemented a federal law or regulation and resulted in costs mandated by the federal government, unless the statute or executive order mandates costs which exceed the mandate in that federal law or regulation.

(d) The local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service.

(e) The statute or executive order provides for offsetting savings to local agencies or school districts which result in no net costs to the local agencies or school districts, or includes additional revenue that was specifically intended to fund the costs of the state mandate in an amount sufficient to fund the cost of the state mandate.

(f) The statute or executive order imposed duties which were expressly included in a ballot measure approved by the voters in a statewide election.

(g) The statute created a new crime or infraction, eliminated a crime or infraction, or changed the penalty for a crime or infraction, but only for that portion of the statute relating directly to the enforcement of the crime or infraction."

may have previously performed functions similar to those mandate by the referenced code sections, such efforts did not establish a preexisting duty that would relieve the State of its constitutional requirement to later reimburse school districts when these activities became mandated.[2]

SECTION 3. FUNDING PROVIDED FOR THE MANDATED PROGRAM

No funds are appropriated by the state for reimbursement of these costs mandated by the state and there is no other provision of law for recovery of costs from any other source.

PART IV. ADDITIONAL CLAIM REQUIREMENTS

The following elements of this claim are provided pursuant to Section 1183, Title 2, California Code of Regulations:

Exhibit 1: Declaration of William C. McGuire, Associate Superintendent
Clovis Unified School District

Exhibit 2: Declaration of Thomas J. Donner, Executive Vice President
Business and Administration
Santa Monica Community College District

California Environmental Quality Act (CEQA)

I, William C. McGuire, Associate Superintendent , Clovis Unified School District, make the following declaration and statement.

In my capacity as Associate Superintendent, I am responsible for the district's compliance with the California Environmental Quality Act. I am familiar with the provisions and requirements of the Statutes, Education Code Sections, Government Code Sections, Public Resources Code Sections, the Title 5 and Title 14 Code of Regulations Sections and the California State Clearinghouse Handbook enumerated above.

These statutes, code sections, regulations and executive orders, so far as applicable to K-12 school districts, require the Clovis Unified School District to:

All Programs: Pursuant to the Public Resources Code Sections, Education Code Sections, Government Code Sections, California Code of Regulations and Executive Orders cited, developing, adopting and implementing policies and procedures, and periodically revising those polices and procedures, to comply with the requirements of

the California Environmental Quality Act, and related statutes and regulations.

Education Code

1) Pursuant to Education Code Section 17025, subdivision (a), submitting plans and obtaining the written approval of Department of General Services when requesting authorization for the construction of any new school, or for the addition to, or reconstruction or alteration of, any existing building, for lease-purchase to any school district.

2) Pursuant to Education Code Section 17025, subdivision (b), certifying the compliance of a project with Division 13 (commencing with Section 21000) of the Public Resources Code when requesting authorization for the construction of any new school, or for the addition to, or reconstruction or alteration of, any existing building, for lease-purchase to any school district.

3) Pursuant to Education Code Section 17025, subdivision (b), and notwithstanding any other law, for purposes of Division 13 (commencing with Section 21000) of the Public Resources Code, complying with all the requirements of a "lead agency" with regard to any project funded for that district.

Government Code

4) Pursuant to Government Code Section 66031 Government Code Section 66031, subdivision (a)(1), mediating the acts or decisions of a district, county office or community college district made pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources

Code).

5) Pursuant to Government Code Section 66031, subdivision (d), notifying the court if a mutually acceptable person has been chosen to serve as a mediator.

6) Pursuant to Government Code Section 66034, appearing and participating in settlement conferences ordered by the court.

Part A - Public Resources Code

A1) Pursuant to Public Resources Code Section 21002.1, subdivision (b), mitigating or avoiding the significant effects on the environment of projects that it carries out or approves whenever it is feasible to do so.

A2) Pursuant to Public Resources Code Section 21002.1, subdivision (d), being responsible for considering the effects, both individual and collective, of all activities involved in a project.

A3) Pursuant to Public Resources Code Section 21002.1, subdivision (e), reducing the time and cost required to prepare an environmental impact report, and focusing on potentially significant effects on the environment of a proposed project and focusing the discussion in the environmental impact report on those potential effects on the environment of a proposed project which the lead agency has determined are or may be significant.

A4) Pursuant to Public Resources Code Section 21003, subdivision (a), integrating the requirements of this division with planning and environmental review procedures otherwise required by law or by local practice so that all those

procedures, to the maximum feasible extent, run concurrently, rather than consecutively.

A5) Pursuant to Public Resources Code Section 21003, subdivision (b), preparing and writing documents in an organized manner that will be meaningful and useful to decision makers and to the public.

A6) Pursuant to Public Resources Code Section 21003, subdivision (c), omitting unnecessary descriptions of projects and emphasizing feasible mitigation measures and feasible alternatives to projects when preparing environmental impact reports.

A7) Pursuant to Public Resources Code Section 21003, subdivision (d), developing information in individual environmental impact reports so as to be incorporated into a data base which can be used to reduce delay and duplication in preparation of subsequent environmental impact reports.

A8) Pursuant to Public Resources Code Section 21003, subdivision (e), incorporating information developed in environmental impact reports and negative declarations into a data base which may be used to make subsequent or supplemental environmental determinations.

A9) Pursuant to Public Resources Code Section 21003, subdivision (f), being responsible for carrying out the environmental review process in the most efficient, expeditious manner in order to conserve the available financial, governmental, physical, and social resources with the objective that those

resources may be better applied toward the mitigation of actual significant effects on the environment.

A10) Pursuant to Public Resources Code Section 21003.1, subdivision (b), making information relevant to the significant effects of a project, alternatives, and mitigation measures which substantially reduce those effects available as soon as possible to interested persons and organizations.

A11) Pursuant to Public Resources Code Section 21080.09, subdivision (b), (for community college districts only) preparing an environmental impact report when selecting a location for a particular campus and approving a long range development plan which considers the environmental effects relating to changes in enrollment levels for each campus.

A12) Pursuant to Public Resources Code Section 21080.09, subdivision (c), (for community college districts only) when appropriate, addressing the approval of a project on a particular campus of public higher education, subject to the other provisions of this division, in a tiered environmental analysis based upon a long range development plan environmental impact report.

A13) Pursuant to Public Resources Code Section 21080.1, subdivision (a), determining whether an environmental impact report, a negative declaration, or a mitigated negative declaration shall be required for any project which is subject to this division.

A14) Pursuant to Public Resources Code Section 21080.3, subdivision (a), prior to

determining whether a negative declaration or environmental impact report is required for a project, consulting with all responsible agencies and with any other public agency which has jurisdiction by law over natural resources affected by the project which are held in trust for the people of the State of California.

A15) Pursuant to Public Resources Code Section 21080.4, subdivision (a), upon determination that an environmental impact report is required for a project, immediately sending notice of that determination by certified mail or an equivalent procedure to each responsible agency, the Office of Planning and Research, and those public agencies having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California.

A16) Pursuant to Public Resources Code Section 21080.4, subdivision (b), meeting with any responsible agency, the Office of Planning and Research, or a public agency having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California, when requested, for the purpose of determining the scope and content of the environmental information that any of those responsible agencies, the office, or the public agencies may require.

A17) Pursuant to Public Resources Code Section 21081, before approving or carrying out a project for which an environmental impact report has been certified which identifies one or more significant effects on the environment that would occur if the project is approved or carried out, assuring that both of the following occur:

(a) The district or county office makes one or more of the following findings with respect to each significant effect:

(1) Changes or alterations have been required in, or incorporated into, the project which mitigate or avoid the significant effects on the environment.

(2) Those changes or alterations are within the responsibility and jurisdiction of another public agency and have been, or can and should be, adopted by that other agency.

(3) Specific economic, legal, social, technological, or other considerations, including considerations for the provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or alternatives identified in the environmental impact report.

(b) With respect to significant effects which were subject to a finding under paragraph (3) of subdivision (a), the public agency finds that specific overriding economic, legal, social, technological, or other benefits of the project outweigh the significant effects on the environment.

A18) Pursuant to Public Resources Code Section 21081.6, subdivision (a), adopting a reporting or monitoring program for the changes made to the project or conditions of project approval in order to mitigate or avoid significant effects on the environment and specifying the location and custodian of the documents or other material which constitute the record of proceedings upon which its decision is

based.

A19) Pursuant to Public Resources Code Section 21081.6, subdivision (b), providing that measures to mitigate or avoid significant effects on the environment are fully enforceable through permit conditions, agreements, or other measures.

A20) Pursuant to Public Resources Code Section 21082, adopting by resolution, rule, or regulation, objectives, criteria, and procedures for the evaluation of projects and the preparation of environmental impact reports pursuant to this division.

A21) Pursuant to Public Resources Code Section 21082.1, subdivision (a), preparing any draft environmental impact report, environmental impact report, negative declaration, or mitigated negative declaration directly, or under contract to a third party.

A22) Pursuant to Public Resources Code Section 21082.1, subdivision (c), doing all of the following:

(1) Independently reviewing and analyzing any report or declaration required by this division.

(2) Circulating draft documents that reflect its independent judgment.

(3) As part of the adoption of a negative declaration or a mitigated negative declaration, or certification of an environmental impact report, finding that the report or declaration reflects the independent judgment of the lead agency.

(4) Submitting a sufficient number of copies of the draft environmental

impact report, proposed negative declaration, or proposed mitigated negative declaration, and a copy of the report or declaration in an electronic form as required by the guidelines adopted pursuant to Section 21083, to the State Clearinghouse for review and comment by state agencies, if any of the following apply:

(A) A state agency is any of the following:

(i) The lead agency.

(ii) A responsible agency.

(iii) A trustee agency.

(B) A state agency otherwise has jurisdiction by law with respect to the project.

(C) The proposed project is of sufficient statewide, regional, or area wide environmental significance as determined pursuant to the guidelines certified and adopted pursuant to Section 21083.

A23) Pursuant to Public Resources Code Section 21082.2, subdivision (a), determining whether a project may have a significant effect on the environment based on substantial evidence in light of the whole record.

A24) Pursuant to Public Resources Code Section 21082.2, subdivision (d), preparing an environmental impact report if there is substantial evidence, in light of the whole record before the lead agency, that a project may have a significant effect on the environment.

A25) Pursuant to Public Resources Code Section 21083, implementing the guidelines developed by the Office of Planning and Research, specifically implementing the criteria for public agencies to follow in determining whether or not a proposed project may have a "significant effect on the environment" and the procedures for determining the lead agency pursuant to the provisions of Section 21165.

A26) Pursuant to Public Resources Code Section 21083.2, subdivision (a), determining whether the project may have a significant effect on archaeological resources and, if so, addressing the issue of those resources in the environmental impact report.

A27) Pursuant to Public Resources Code Section 21083.2, subdivision (b), if it can be demonstrated that a project will cause damage to a unique archaeological resource, requiring reasonable efforts to be made to permit any or all of these resources to be preserved in place or left in an undisturbed state.

A28) Pursuant to Public Resources Code Section 21083.2, subdivision (c), to the extent that unique archaeological resources are not preserved in place or not left in an undisturbed state, requiring mitigation measures as provided in this subdivision.

A29) Pursuant to Public Resources Code Section 21083.2, subdivision (i) making provisions for archaeological sites accidentally discovered during construction, including an immediate evaluation of the find. If the find is determined to be a unique archaeological resource, providing contingency funding and a time

allotment sufficient to allow recovering an archaeological sample or to employ one of the avoidance measures that may be required under the provisions set forth in this section

A30) Pursuant to Public Resources Code Section 21091, subdivision (a), providing a public review period for a draft environmental impact report of not less than 30 days. If the draft environmental impact report is submitted to the State Clearinghouse for review, the review period shall be at least 45 days, and providing a sufficient number of copies of the document to the State Clearinghouse for review and comment by state agencies.

A31) Pursuant to Public Resources Code Section 21091, subdivision (b), providing a public review period for a proposed negative declaration or proposed mitigated negative declaration of not be less than 20 days. If the proposed negative declaration or proposed mitigated negative declaration is submitted to the State Clearinghouse for review, the review period shall be at least 30 days, and providing a sufficient number of copies of the document to the State Clearinghouse for review and comment by state agencies.

A32) Pursuant to Public Resources Code Section 21091, subdivision (c), if a draft environmental impact report, proposed negative declaration, or proposed mitigated negative declaration is submitted to the State Clearinghouse for review and the period of review by the State Clearinghouse is longer than the public review period established pursuant to subdivision (a) or (b), whichever is

applicable, providing a public review period at least as long as the period of review by the State Clearinghouse.

A33) Pursuant to Public Resources Code Section 21091, subdivision (d)(1), considering any comments received on a draft environmental impact report, proposed negative declaration, or proposed mitigated negative declaration if those comments are received within the public review period.

A34) Pursuant to Public Resources Code Section 21091, subdivision (d)(2)(A), evaluating any comments on environmental issues that are received from persons who have reviewed the draft and preparing a written response to those comments.

A35) Pursuant to Public Resources Code Section 21091, subdivision (e)(3), when necessary, requesting a shortened review period in writing by the decision making body to the Office of Planning and Research.

A36) Pursuant to Public Resources Code Section 21092, subdivision (a), providing notice of preparing an environmental impact report or a negative declaration or making a determination pursuant to Section 21157 within a reasonable period of time prior to certification of the environmental impact report or adoption of the negative declaration.

A37) Pursuant to Public Resources Code Section 21092, subdivision (b)(1), specifying in the notice the period during which comments will be received on the draft environmental report or negative declaration, and including the date, time, and

place of any public meetings or hearings on the proposed project, a brief description of the proposed project and its location, the significant effects on the environment, if any, anticipated as a result of the project, and the address where copies of the draft environmental impact report or negative declaration, and all documents referenced in the draft environmental impact report or negative declaration, are available for review. Conducting public meetings or hearings on the proposed project.

A38) Pursuant to Public Resources Code Section 21092, subdivision (b)(3), giving the notice required by this section to the last known name and address of all organizations and individuals who have previously requested notice and be given by at least one of the following procedures:

(A) Publication, no fewer times than required by Section 6061 of the Government Code, in a newspaper of general circulation in the area affected by the proposed project. If more than one area will be affected, the notice shall be published in the newspaper of largest circulation from among the newspapers of general circulation in those areas.

(B) Posting of notice on- and off-site in the area where the project is to be located.

(C) Direct mailing to the owners and occupants of contiguous property shown on the latest equalized assessment roll.

A39) Pursuant to Public Resources Code Section 21092.1, when significant new

information is added to an environmental impact report after notice has been given pursuant to Section 21092, and consultation has occurred pursuant to Sections 21104 and 21153, but prior to certification, giving notice again pursuant to Section 21092, and consulting again pursuant to Sections 21104 and 21153 before certifying the environmental impact report.

A40) Pursuant to Public Resources Code Section 21092.2, mailing the notices required pursuant to Sections 21080.4, 21083.9, 21092, 21108, and 21152 to any person who has filed a written request for notices with either the clerk of the governing body or, if there is no governing body, the director of the agency.

A41) Pursuant to Public Resources Code Section 21092.3, posting the notices required pursuant to Sections 21080.4 and 21092 for an environmental impact report in the office of the county clerk of each county in which the project will be located. The notice required pursuant to Section 21092 for a negative declaration shall be so posted for a period of 20 days, unless otherwise required by law to be posted for 30 days.

A42) Pursuant to Public Resources Code Section 21092.4, subdivision (a), for a project of statewide, regional, or area wide significance, consulting with transportation planning agencies and public agencies which have transportation facilities within their jurisdictions which could be affected by the project for the purpose of obtaining information concerning the project's effect on major local arterials, public transit, freeways, highways, and rail transit service within the

jurisdiction of a transportation planning agency or a public agency which is consulted by the lead agency. Notifying a transportation planning agency or public agency which provides information to the lead agency of, and providing copies of, environmental documents pertaining to the project.

A43) Pursuant to Public Resources Code Section 21092.5, subdivision (a), at least 10 days prior to certifying an environmental impact report, providing a written proposed response to comments made by that agency which conform with the requirements of this division.

A44) Pursuant to Public Resources Code Section 21092.5, subdivision (b), notifying any public agency which comments on a negative declaration, of the public hearing or hearings, if any, on the project for which the negative declaration was prepared.

A45) Pursuant to Public Resources Code Section 21092.6, subdivision (a), consulting the lists compiled pursuant to Section 65962.5 of the Government Code to determine whether the project and any alternatives are located on a site which is included on any list.

A46) Pursuant to Public Resources Code Section 21094, subdivision (a), where a prior environmental impact report has been prepared and certified for a program, plan, policy, or ordinance, for a later project that meets the requirements of this section, examining significant effects of the later project upon the environment by using a tiered environmental impact report.

A47) Pursuant to Public Resources Code Section 21094, subdivision (c), for purposes of compliance with this section, preparing an initial study to assist in making the determinations required by this section, which analyze whether the later project may cause significant effects on the environment that were not examined in the prior environmental impact report.

A48) Pursuant to Public Resources Code Section 21094, subdivision (e), when tiering is used pursuant to this section, referring to the prior environmental impact report and stating where a copy of the prior environmental impact report may be examined.

A49) Pursuant to Public Resources Code Section 21100, subdivision (a), preparing , or causing to be prepared by contract, and certifying the completion of, an environmental impact report on any project proposed to be carried out or approved that may have a significant effect on the environment.

A50) Pursuant to Public Resources Code Section 21100, subdivision (b), including in any environmental impact report a detailed statement setting forth all of the following:

(1) All significant effects on the environment of the proposed project.

(2) In a separate section:

(A) Any significant effect on the environment that cannot be avoided if the project is implemented.

(B) Any significant effect on the environment that would be

irreversible if the project is implemented.

(3) Mitigation measures proposed to minimize significant effects on the environment, including, but not limited to, measures to reduce the wasteful, inefficient, and unnecessary consumption of energy.

(4) Alternatives to the proposed project.

(5) The growth-inducing impact of the proposed project.

A51) Pursuant to Public Resources Code Section 21100, subdivision (c), including in each environmental impact report a statement briefly indicating the reasons for determining that various effects on the environment of a project are not significant and consequently have not been discussed in detail in the environmental impact report.

A52) Pursuant to Public Resources Code Section 21102, accompanying each request for funds for any project, other than a project involving only feasibility or planning studies for possible future actions, with an environmental impact report.

A53) Pursuant to Public Resources Code Section 21102, including environmental factors in feasibility and planning studies exempted by this section from the preparation of an environmental impact report.

A54) Pursuant to Public Resources Code Section 21150, including a detailed statement setting forth the matters specified in Section 21100 when requesting allocation of any funds, other than funds solely for projects involving only feasibility or planning studies for possible future actions, for any project which

may have a significant effect on the environment.

A55) Pursuant to Public Resources Code Section 21151, subdivision (a), preparing, or causing to be prepared by contract, and certifying the completion of, an environmental impact report on any project intended to be carried out or approved which may have a significant effect on the environment.

A56) Pursuant to Public Resources Code Section 21151, subdivision (c), if a nonelected decision making body certifies an environmental impact report, approves a negative declaration or mitigated negative declaration, or determines that a project is not subject to this division, responding to any appeal of that certification, approval, or determination in any hearing or proceeding before the elected decision making body.

A57) Pursuant to Public Resources Code Section 21151.2, before acquiring title to property for a new school site or for an addition to a present school site, giving notice in writing to the planning commission having jurisdiction of the proposed acquisition.

A58) Pursuant to Public Resources Code Section 21151.8, subdivision (a), before approving an environmental impact report or negative declaration for any project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district, making sure that all of the following occur:

(1) The environmental impact report or negative declaration includes information which is needed to determine if the property proposed to be

purchased, or to be constructed upon, is any of the following:

(A) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

(B) A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) A site which contains one or more pipelines, situated underground or above ground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

(2) Notifying in writing and consulting with the administering agency in which the proposed schoolsite is located, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed schoolsite which might reasonably be anticipated to emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste. The notification shall include a list of the locations for which information is sought.

(3) The governing board of the school district makes one of the following written findings:

(A) Consultation identified no such facilities specified in paragraph (2).

(B) The facilities specified in paragraph (2) exist, but one of the following conditions applies:

(i) The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes such a finding, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

(4) Each administering agency, air pollution control district, or air quality management district receiving written notification to identify facilities pursuant to paragraph (2) has provided the requested information and provide a written

response to the lead agency within 30 days of receiving the notification.

A59) Pursuant to Public Resources Code Section 21152, subdivision (a), whenever a local agency approves or determines to carry out a project which is subject to this division, it shall file notice of the approval or the determination within five working days after the approval or determination becomes final, with the county clerk of each county in which the project will be located. The notice shall indicate the determination of the local agency whether the project will, or will not, have a significant effect on the environment and shall indicate whether an environmental impact report has been prepared pursuant to this division. The notice shall also include certification that the final environmental impact report, if one was prepared, together with comments and responses, is available to the general public. Making the notice of the approval or the determination available to the public.

A60) Pursuant to Public Resources Code Section 21152, subdivision (b), whenever a determination is made that a project is not subject to this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085 or 21172, and a local agency approves or determines to carry out the project, it, or the person specified in subdivision (b) or (c) of Section 21065, filing a notice of the determination with the county clerk of each county in which the project will be located. Any notice filed pursuant to this subdivision by a person specified in subdivision (b) or (c) of Section 21065 shall have a certificate of determination

attached to it issued by the local agency responsible for making the determination that the project is not subject to this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085 or 21172.

A61) Pursuant to Public Resources Code Section 21152, subdivision (c), making all notices filed pursuant to this section available for public inspection, and posted within 24 hours of receipt in the office of the county clerk and retaining the notice for not less than nine months.

A62) Pursuant to Public Resources Code Section 21153, subdivision (a), prior to completing an environmental impact report, consulting with, and obtaining comments from, each responsible agency, any public agency that has jurisdiction by law with respect to the project, and any city or county that borders on a city or county within which the project is located unless otherwise designated annually by agreement with the local lead agency and the city or county, and consulting with any person who has special expertise with respect to any environmental impact involved.

A63) Pursuant to Public Resources Code Section 21153, subdivision (b), in the case of a project described in subdivision (a) of Section 21065, providing for early consultation to identify the range of actions, alternatives, mitigation measures, and significant effects to be analyzed in depth in the environmental impact report.

A64) Pursuant to Public Resources Code Section 21154, whenever any state agency, board, or commission issues an order which requires a district or county office to

carry out a project which may have a significant effect on the environment, limiting any environmental impact report prepared to consideration of those factors and alternatives which will not conflict with such order.

A65) Pursuant to Public Resources Code Section 21157, subdivision (a), preparing a master environmental impact report when required or appropriate.

A66) Pursuant to Public Resources Code Section 21157, subdivision (a)(2), preparing a master environmental impact report when planning a project that consists of smaller individual projects which will be carried out in phases.

A67) Pursuant to Public Resources Code Section 21157, subdivision (b), when preparing a master environmental impact report, including in the document all of the following:

(1) A detailed statement as required by Section 21100.

(2) A description of anticipated subsequent projects that would be within the scope of the master environmental impact report, that contains sufficient information with regard to the kind, size, intensity, and location of the subsequent projects, including, but not limited to, all of the following:

(A) The specific type of project anticipated to be undertaken.

(B) The maximum and minimum intensity of any anticipated subsequent project.

(C) The anticipated location and alternative locations for any development projects.

(D) A capital outlay or capital improvement program, or other scheduling or implementing device that governs the submission and approval of subsequent projects.

(3) A description of potential impacts of anticipated subsequent projects for which there is not sufficient information reasonably available to support a full assessment of potential impacts in the master environmental impact report.

A68) Pursuant to Public Resources Code Section 21157.1, when preparing and certifying a master environmental impact report, allowing for the limited review of subsequent projects that were described in the master environmental impact report as being within the scope of the report, in accordance with the following requirements:

(a) The lead agency for a subsequent project shall be the lead agency or any responsible agency identified in the master environmental impact report.

(b) The lead agency shall prepare an initial study on any proposed subsequent project. This initial study shall analyze whether the subsequent project may cause any significant effect on the environment that was not examined in the master environmental impact report and whether the subsequent project was described in the master environmental impact report as being within the scope of the report.

(c) If the lead agency, based on the initial study, determines that a proposed subsequent project will have no additional significant effect on the

environment, as defined in subdivision (d) of Section 21158, that was not identified in the master environmental impact report and that no new or additional mitigation measures or alternatives may be required, making a written finding based upon the information contained in the initial study that the subsequent project is within the scope of the project covered by the master environmental impact report. Prior to approving or carrying out the proposed subsequent project, providing notice of this fact pursuant to Section 21092 and incorporating all feasible mitigation measures or feasible alternatives set forth in the master environmental impact report which are appropriate to the project. Whenever a lead agency approves or determines to carry out any subsequent project pursuant to this section, it shall file a notice pursuant to Section 21108 or 21152.

(d) Where findings cannot be made as required in subdivision (c), the lead agency shall prepare, pursuant to Section 21157.7, either a mitigated negative declaration or environmental impact report.

A69) Pursuant to Public Resources Code Section 21157.5, subdivision (a), preparing a proposed mitigated negative declaration for any proposed subsequent project if both of the following occur:

(1) An initial study has identified potentially new or additional significant effects on the environment that were not analyzed in the master environmental impact report.

(2) Feasible mitigation measures or alternatives will be incorporated to

revise the proposed subsequent project, before the negative declaration is released for public review, in order to avoid the effects or mitigate the effects to a point where clearly no significant effect on the environment will occur.

A70) Pursuant to Public Resources Code Section 21157.5, subdivision (b), if there is substantial evidence in light of the whole record that a proposed subsequent project may have a significant effect on the environment and a mitigated negative declaration is not prepared, the lead agency shall prepare an environmental impact report or a focused environmental impact report pursuant to Section 21158.

A71) Pursuant to Public Resources Code Section 21158, subdivision (a), incorporating by reference in a focused environmental impact report the master environmental impact report and analyzing only the subsequent project's additional significant effects on the environment, as defined in subdivision (d), and any new or additional mitigation measures or alternatives that were not identified and analyzed by the master environmental impact report.

A72) Pursuant to Public Resources Code Section 21158, subdivision (c), analyzing, in a focused environmental impact report on any subsequent project, any significant effects on the environment where substantial new or additional information shows that the adverse environmental impact may be more significant than was described in the master environmental impact report. The substantial new or additional information may also show that mitigation measures or alternatives

identified in the master environmental impact report, which were previously determined to be infeasible, are feasible and will avoid or reduce the significant effects on the environment of the subsequent project to a level of insignificance.

A73) Pursuant to Public Resources Code Section 21161, upon completion of an environmental impact report, causing a notice of completion of that report to be filed with the Office of Planning and Research which shall briefly identify the project and shall indicate that an environmental impact report has been prepared.

A74) Pursuant to Public Resources Code Section 21165, when a project is to be carried out or approved by two or more public agencies, making the determination of whether the project may have a significant effect on the environment and preparing, or causing to be prepared by contract, the environmental impact report for the project, if such a report is required by this division.

A75) Pursuant to Public Resources Code Section 21166, when an environmental impact report has been prepared for a project pursuant to this division, preparing a subsequent or supplemental environmental impact report when one or more of the following events occurs:

(a) Substantial changes are proposed in the project which will require major revisions of the environmental impact report.

(b) Substantial changes occur with respect to the circumstances under which the project is being undertaken which will require major revisions in the

environmental impact report.

(c) New information, which was not known and could not have been known at the time the environmental impact report was certified as complete, becomes available.

A76) Pursuant to Public Resources Code Section 21167, responding to legal actions or proceedings to attack, review, set aside, void, or annul acts or decisions on the grounds of noncompliance with this division.

A77) Pursuant to Public Resources Code Section 21167.6, subdivision (b)(1), preparing and certifying the record of proceedings not later than 60 days from the date that the request specified in subdivision (a) was served upon the public agency. Upon certification, lodging a copy of the record of proceedings with the court and serving on the parties notice that the record of proceedings has been certified and lodged with the court. Subdivision (e) provides that the record of proceedings shall include, but is not limited to, all of the following items:

(1) All project application materials.

(2) All staff reports and related documents prepared by the respondent public agency with respect to its compliance with the substantive and procedural requirements of this division and with respect to the action on the project.

(3) All staff reports and related documents prepared by the respondent public agency and written testimony or documents submitted by any person relevant to any findings or statement of overriding considerations adopted by the

respondent agency pursuant to this division.

(4) Any transcript or minutes of the proceedings at which the decision making body of the respondent public agency heard testimony on, or considered any environmental document on, the project, and any transcript or minutes of proceedings before any advisory body to the respondent public agency that were presented to the decision making body prior to action on the environmental documents or on the project.

(5) All notices issued by the respondent public agency to comply with this division or with any other law governing the processing and approval of the project.

(6) All written comments received in response to, or in connection with, environmental documents prepared for the project, including responses to the notice of preparation.

(7) All written evidence or correspondence submitted to, or transferred from, the respondent public agency with respect to compliance with this division or with respect to the project.

(8) Any proposed decisions or findings submitted to the decision making body of the respondent public agency by its staff, or the project proponent, project opponents, or other persons.

(9) The documentation of the final public agency decision, including the final environmental impact report, mitigated negative declaration, or negative

declaration, and all documents, in addition to those referenced in paragraph (3), cited or relied on in the findings or in a statement of overriding considerations adopted pursuant to this division.

(10) Any other written materials relevant to the respondent public agency's compliance with this division or to its decision on the merits of the project, including the initial study, any drafts of any environmental document, or portions thereof, that have been released for public review, and copies of studies or other documents relied upon in any environmental document prepared for the project and either made available to the public during the public review period or included in the respondent public agency's files on the project, and all internal agency communications, including staff notes and memoranda related to the project or to compliance with this division.

(11) The full written record before any inferior administrative decision making body whose decision was appealed to a superior administrative decision making body prior to the filing of litigation.

A78) Pursuant to Public Resources Code Section 21167.6.5, subdivision (b), providing a petitioner or plaintiff, not later than 10 business days following service of the petition or complaint, with a list of responsible agencies and any public agency having jurisdiction over a natural resource affected by the project.

A79) Pursuant to Public Resources Code Section 21167.8, subdivision (a), filing with the court a notice setting forth the time and place at which all parties shall meet

and attempt to settle the litigation.

A80) Pursuant to Public Resources Code Section 21167.8, subdivision (b), meeting and conferring with the other parties regarding anticipated issues to be raised in the litigation and attempting in good faith to settle the litigation and the dispute which forms the basis of the litigation at the time and place specified in the notice filed with the court.

A81) Pursuant to Public Resources Code Section 21167.8, subdivision (d), participating in further settlement conferences when the court, in its discretion or at the request of any party, schedules a further settlement conference before a judge of the superior court.

A82) Pursuant to Public Resources Code Section 21167.8, subdivision (f), not later than 10 days from the date on which the respondent or real party in interest has been served with the statement of issues from the petitioner or plaintiff, filing and serving on all other parties a statement of issues which that party intends to raise in any brief or at any hearing or trial.

A83) Pursuant to Public Resources Code Section 21168.9, complying with orders that a court may make as a result of a trial, hearing or remand from an appellate court, including, in subdivision (a)(3), a mandate that a public agency take specific action as may be necessary to bring the determination, finding, or decision into compliance with this division.

Part B - Title 5, California Code of Regulations

B1) Pursuant to Title 5, California Code of Regulations, Section 14011, subdivision (h), preparing an environmental impact report, or negative declaration in compliance with the Environmental Quality Act, Public Resources Code, Division 13, (commencing with Section 21000 with particular attention to Section 21151.8). Pursuant to subdivision (k), following the recommendations of the State Superintendent of Public Instruction report based upon the Department of Transportation, Division of Aeronautics, findings, if the proposed site is within two miles of the center line of an airport runway or proposed runway as required by Education Code Section 17215. Pursuant to subdivision (l), following the standards for school site selection in Section 14010 of this article. Pursuant to subdivision (m), conducting a public hearing, as required in Education Code Section 17211, to evaluate the property using the standards described in Section 14010. Pursuant to subdivision (n), submitting the request for exemption from a standard in Section 14010 of this article, with a description of the mitigation that overrides the standard, to the California Department of Education. Pursuant to subdivision (o), certifying there are no available alternative school district-owned sites for the project deemed usable for school purposes by the California Department of Education or certify that the school district intends to sell an available alternative school district-owned site and use the proceeds from the sale for the purchase of the new school site.

B2) Pursuant to Title 5, California Code of Regulations, Section 57121, subdivision

(b), (for community college districts) including, in proposals for initial construction of facilities for a new campus, a long-range plan for physical development approved by the district governing board which shows the intended use of all portions of the land and approximate location of buildings and facilities.

B3) Pursuant to Title 5, California Code of Regulations, Section 57121, subdivision (c), (for community college districts) submitting an Initial Study, pursuant to section 15080, Title 14, California Administrative Code, to the Chancellor's office concurrent with other required information.

B4) Pursuant to Title 5, California Code of Regulations, Section 57121, subdivision (d), (for community college districts) submitting copies of the:

(a) Finding of Categorical Exemption (section 15023, Title 14, California Administrative Code);

(b) Negative Declaration (section 15083, Title 14, California Administrative Code); or

(c) Notice of Completion (section 15085(c), Title 14, California Administrative Code), whichever is appropriate.

B5) Pursuant to Title 5, California Code of Regulations, Section 57121, subdivision (e), (for community college districts) submitting a copy of the findings of Categorical Exemption or Notice of Determination (section 15085(g), Title 14, California Administrative Code), whichever is appropriate, to the Chancellor's office concurrently with plans submitted for approval in accordance with section

81837 (approval by board of governors) of the Education Code.

PART C - TITLE 14, CALIFORNIA CODE OF REGULATIONS

Article 1. General

C1) Pursuant to Title 14, California Code of Regulations, Section 15002, subdivision (e), complying with all CEQA procedures when carrying out an activity subject to its provisions, including:

(a) Preparing an EIR when the district finds substantial evidence that the project may have a significant effort on the environment.

(b) Preparing a "Negative Declaration" instead of an EIR when the district finds that there is no substantial evidence that a project may have a significant environmental effect.

(c) Soliciting and responding to comments from the public and from other agencies concerned with the project.

C2) Pursuant to Title 14, California Code of Regulations, Section 15002, subdivision (k) taking at least the following three steps in deciding which document to prepare for a project subject to CEQA:

(a) Examining the project to determine whether the project is subject to CEQA at all. If the project is exempt, the process does not need to proceed any farther. The agency may then prepare a notice of exemption.

(b) If the project is not exempt, taking the second step and conducting an initial study to determine whether the project may have a significant effect

on the environment.

(c) If the initial study shows that the project may have a significant effect, the lead agency takes the third step and prepares an EIR.

C3) Pursuant to Title 14, California Code of Regulations, Section 15004, subdivision (b), preparing an EIR or Negative Declaration as early as feasible in the planning process. Pursuant to subdivision (b)(1), incorporating environmental considerations into project conceptualization, design and planning prior to acquisition of a site for a public project. Subdivision (c) requires that the environmental document preparation and review be coordinated in a timely fashion with existing planning, review, and project approval processes being used by the district.

Article 2. General Responsibilities.

C4) Pursuant to Title 14, California Code of Regulations, Section 15020, complying with CEQA and these Guidelines.

C5) Pursuant to Title 14, California Code of Regulations, Section 15021, subdivision (a), avoiding or minimizing environmental damage where feasible. In regulating public or private activities, giving major consideration to preventing environmental damage.

C6) Pursuant to Title 14, California Code of Regulations, Section 15021, subdivision (d), balancing a variety of public objectives, including economic, environmental, and social factors.

C7) Pursuant to Title 14, California Code of Regulations, Section 15022 adopting objectives, criteria, and specific procedures consistent with CEQA and these Guidelines for administering its responsibilities under CEQA, including the orderly evaluation of projects and preparation of environmental documents. The implementing procedures should at least contain provisions for:

(a) Identifying the activities that are exempt from CEQA.

(b) Conducting initial studies.

(c) Preparing negative declarations.

(d) Preparing draft and final EIRs.

(e) Consulting with and obtaining comments from other public agencies and members of the public with regard to the environmental effects of projects.

(f) Assuring adequate opportunity and time for public review and comment on the Draft EIR of Negative Declaration.

(g) Evaluating and responding to comments received on environmental documents.

(h) Assigning responsibility for determining the adequacy of an EIR or negative declaration.

(i) Reviewing and considering environmental documents by the person or decision making body who will approve or disapprove a project.

(j) Filing documents required or authorized by CEQA and these Guidelines.

(k) Providing adequate comments on environmental documents which are

submitted to the public agency for review.

(l) Assigning responsibility for specific functions to particular units of the public agency.

(m) Providing time periods for performing functions under CEQA.

C8) Pursuant to Title 14, California Code of Regulations, Section 15022, subdivision (c), revising implementing procedures to conform to amendments to these guidelines within 120 days after the effective date of the amendments.

C9) Pursuant to Title 14, California Code of Regulations, Section 15025, subdivision (b), performing the following functions, without delegation:

(a) Reviewing and considering a final EIR or approving a negative declaration prior to approving a project.

(b) The making of findings as required by Sections 15091 and 15093.

Article 3. Authorities Granted to Public Agencies by CEQA

C10) Pursuant to Title 14, California Code of Regulations, Section 15041, having authority to require feasible changes in any or all activities involved in the project in order to substantially lessen or avoid significant effects on the environment, consistent with applicable constitutional requirements such as the "nexus" and "rough proportionality" standards established by case law.

C11) Pursuant to Title 14, California Code of Regulations, Section 15042, avoiding one or more significant effects on the environment that would occur if the project were approved as proposed.

C12) Pursuant to Title 14, California Code of Regulations, Section 15043, approving a project even though the project would cause a significant effect on the environment if the agency makes a fully informed and publicly disclosed decision that:

1) There is no feasible way to lessen or avoid the significant effect; and

2) Specifically identified expected benefits from the project outweigh the policy of reducing or avoiding significant environmental impacts of the project.

Article 4. Lead Agency

C13) Pursuant to Title 14, California Code of Regulations, Section 15050, subdivision (a), being responsible for preparing an EIR or negative declaration for the project.

C14) Pursuant to Title 14, California Code of Regulations, Section 15053, subdivision (a), if there is a dispute over which of several agencies should be the lead agency for a project, the disputing agencies should consult with each other in an effort to resolve the dispute prior to submitting it to OPR.

Article 5. Preliminary Review of Projects and Conduct of Initial Study

C15) Pursuant to Title 14, California Code of Regulations, Section 15060, subdivision (c), first determining whether an activity is subject to CEQA before conducting an initial study. An activity is not subject to CEQA if:

(a) The activity does not involve the exercise of discretionary powers by a public agency;

(b) The activity will not result in a direct or reasonably foreseeable indirect physical change in the environment; or

(c) The activity is not a project as defined in Section 15378.

C16) Pursuant to Title 14, California Code of Regulations, Section 15060, subdivision (d), if the lead agency can determine that an EIR will clearly be required for a project, skipping further initial review of the project and begin working directly on the EIR process.

C17) Pursuant to Title 14, California Code of Regulations, Section 15061, subdivision (a), once a lead agency has determined that an activity is a project subject to CEQA, determining whether the project is exempt from CEQA.

C18) Pursuant to Title 14, California Code of Regulations, Section 15061, subdivision (c), including in its implementing procedures a listing of the projects often handled by the agency that the agency has determined to be exempt.

C19) Pursuant to Title 14, California Code of Regulations, Section 15062, subdivision (a), upon deciding that a project is exempt from CEQA and the public agency approves or determines to carry out the project, filing a notice of exemption. The notice shall be filed, if at all, after approval of the project, and shall include a brief description of the project, a finding that the project is exempt from CEQA, and a brief statement of reasons to support the finding.

C20) Pursuant to Title 14, California Code of Regulations, Section 15062, subdivision (c), when a public agency approves an applicant's project, either the agency or

the applicant may file a notice of exemption. When a local agency files this notice, filing the notice of exemption with the county clerk of each county in which the project will be located, making available copies of the notices for public inspection, retaining them for not less than 9 months.

C21) Pursuant to Title 14, California Code of Regulations, Section 15063, subdivision (a), following preliminary review, conducting an initial study to determine if the project may have a significant effect on the environment.

C22) Pursuant to Title 14, California Code of Regulations, Section 15063, subdivision (b):

(a) If the agency determines that there is substantial evidence that any aspect of the project, either individually or cumulatively, may cause a significant effect on the environment, regardless of whether the overall effect of the project is adverse or beneficial, doing one of the following:

(i) preparing an EIR, or

(ii) using a previously prepared EIR, or

(iii) determining which of a project's effects were adequately examined by an earlier EIR or negative declaration.

(b) Preparing a negative declaration if there is no substantial evidence that the project or any of its aspects may cause a significant effect on the environment.

C23) Pursuant to Title 14, California Code of Regulations, Section 15063, subdivision

(d), containing in an initial study:

(a) A description of the project including the location of the project;

(b) An identification of the environmental setting:

(c) An identification of environmental effects by use of a checklist, matrix, or other method, provided that entries on a checklist or other form are briefly explained to indicate that there is some evidence to support the entries.

(d) A discussion of ways to mitigate the significant effects identified, if any;

(e) An examination of whether the project would be consistent with existing zoning, plans, and other applicable land use controls;

(f) The name of the person or persons who prepared or participated in the initial study.

C24) Pursuant to Title 14, California Code of Regulations, Section 15063, subdivision (g), as soon as a lead agency has determined that an initial study will be required for the project, consulting informally with all responsible agencies and all trustee agencies responsible for resources affected by the project to obtain the recommendations of those agencies as to whether an EIR or a negative declaration should be prepared.

C25) Pursuant to Title 14, California Code of Regulations, Section 15064, subdivision (a)(1), if there is substantial evidence, in light of the whole record before a lead agency, that a project may have a significant effect on the environment, preparing a draft EIR.

C26) Pursuant to Title 14, California Code of Regulations, Section 15064, subdivision (a)(2), when a final EIR identifies one or more significant effects, making a finding under Section 15091 for each significant effect and, when necessary, making a statement of overriding consideration under Section 15093 for the project.

C27) Pursuant to Title 14, California Code of Regulations, Section 15064, subdivision (c), considering the views held by members of the public in all areas affected in determining whether an effect will be adverse or beneficial.

C28) Pursuant to Title 14, California Code of Regulations, Section 15064, subdivision (d), considering direct physical changes in the environment which may be caused by the project and reasonablely foreseeable indirect physical changes in the environment which may be caused by the project.

C29) Pursuant to Title 14, California Code of Regulations, Section 15064, subdivision (g), if there is disagreement among expert opinion supported by facts over the significance of an effect on the environment, treating the effect as significant and preparing an EIR.

C30) Pursuant to Title 14, California Code of Regulations, Section 15064, subdivision (i):

(a) Considering whether the cumulative impact is significant and whether the effects of the project are cumulatively considerable when assessing whether a cumulative effect requires an EIR .

(b) Determining in an initial study that a project's contribution to a significant

cumulative impact will be rendered less than cumulatively considerable and thus is not significant.

(c) Determining that a project's incremental contribution to a cumulative effect is not cumulatively considerable if the project will comply with the requirements in a previously approved plan or mitigation program which provides specific requirements that will avoid or substantially lessen the cumulative problem within the geographic area in which the project is located.

(d) Determining that the incremental impacts of a project are not cumulatively considerable when they are so small that they make only a de minimis contribution to a significant cumulative impact caused by other projects that would exist in the absence of the proposed project.

C31) Pursuant to Title 14, California Code of Regulations, Section 15064.5, subdivision (b), identifying potentially feasible measures to mitigate significant adverse changes in the significance of an historical resource and ensuring that any adopted measures to mitigate or avoid significant adverse changes are fully enforceable through permit conditions, agreements, or other measures.

C32) Pursuant to Title 14, California Code of Regulations, Section 15064.5, subdivision (f), making provisions for historical or unique archaeological resources accidentally discovered during construction.

C33) Pursuant to Title 14, California Code of Regulations, Section 15064.7, subdivision

(b), adopting by resolution, rule, or regulation; developing through a public review process; and being supported by substantial evidence, thresholds of significance for general use as part of the environmental review process.

C34) Pursuant to Title 14, California Code of Regulations, Section 15065, finding that a project may have a significant effect on the environment and thereby preparing an EIR for the project where any of the following conditions occur:

(a) The project has the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of an endangered, rare or threatened species, or eliminate important examples of the major periods of California history or prehistory.

(b) The project has the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals.

(c) The project has possible environmental effects which are individually limited by cumulatively considerable effects.

(d) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

Article 6. Negative Declaration Process

C35) Pursuant to Title 14, California Code of Regulations, Section 15070, preparing, or

arranging preparation of, a proposed negative declaration or mitigated negative declaration for a project subject to CEQA when:

(a) The initial study shows that there is no substantial evidence, in light of the whole record before the agency, that the project may have a significant effect on the environment, or

(b) The initial study identifies potentially significant effects, but

(I) Revisions in the project plans or proposals made by or agreed to by the applicant before a proposed mitigated negative declaration and initial study are released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur, and

(ii) There is no substantial evidence, in light of the whole record before the agency, that the project as revised may have a significant effect on the environment.

C36) Pursuant to Title 14, California Code of Regulations, Section 15071, including in a negative declaration circulated for public review:

(a) A brief description of the project, including a commonly used name for the project, if any:

(b) The location of the project, preferably shown on a map, and the name of the project proponent;

(c) A proposed finding that the project will not have a significant effect on the

environment;

(d) An attached copy of the initial study documenting reasons to support the finding; and

(e) Mitigation measures, if any, included in the project to avoid potentially significant effects.

C37) Pursuant to Title 14, California Code of Regulations, Section 15072, subdivision (a), providing a notice of intent to adopt a negative declaration or mitigated negative declaration to the public, responsible agencies, trustee agencies, and the county clerk of each county within which the proposed project is located, sufficiently prior to adopting the negative declaration or mitigated negative declaration to allow the public and agencies the review period provided under Section 15105.

C38) Pursuant to Title 14, California Code of Regulations, Section 15072, subdivision (b), mailing a notice of intent to adopt a negative declaration or mitigated negative declaration to the last known name and address of all organizations and individuals who have previously requested such notice in writing and giving notice of intent to adopt a negative declaration or mitigated negative declaration by at least one of the following procedures to allow the public the review period provided under Section 15105:

(a) Publication at least one time by the lead agency in a newspaper of general circulation in the area affected by the proposed project.

(b) Posting of notice by the lead agency on and off site in the area where the project is to be located.

(c) Direct mailing to the owners and occupants of property contiguous to the project.

C39) Pursuant to Title 14, California Code of Regulations, Section 15072, subdivision (e), for a project of statewide, regional, or area wide significance, providing notice to transportation planning agencies and public agencies which have transportation facilities within their jurisdictions which could be affected by the project as specified in Section 21092.4(a) of the Public Resources Code.

C40) Pursuant to Title 14, California Code of Regulations, Section 15072, subdivision (f), including in a notice of intent to adopt a negative declaration or mitigated negative declaration the following:

(a) A brief description of the proposed project and its location.

(b) The starting and ending dates for the review period during which the lead agency will receive comments on the proposed negative declaration or mitigated negative declaration.

(c) The date, time, and place of any scheduled public meetings or hearings to be held by the lead agency on the proposed project, when known to the lead agency at the time of notice.

(d) The address or addresses where copies of the proposed negative declaration or mitigated negative declaration including the revisions

developed under Section 15050(b) and all documents referenced in the proposed negative declaration or mitigated negative declaration are available for review.

(e) The presence of the site on any of the lists enumerated under Section 65962.5 of the Government Code including, but not limited to lists of hazardous waste facilities, land designated as hazardous waste property, and hazardous waste disposal sites, and the information in the Hazardous Waste and Substances Statement required under subsection (f) of that section.

(f) Other information specifically required by statute or regulation for a particular project or type of project.

C41) Pursuant to Title 14, California Code of Regulations, Section 15073, subdivision (a), providing a public review period pursuant to Section 15105 of not less than 20 days.

C42) Pursuant to Title 14, California Code of Regulations, Section 15073, subdivision (c), attaching a copy of the proposed negative declaration or mitigated negative declaration and the initial study to the notice of intent to adopt the proposed declaration that is sent to every responsible agency and trustee agency concerned with the project and every other public agency with jurisdiction by law over resources affected by the project.

C43) Pursuant to Title 14, California Code of Regulations, Section 15073, subdivision

(d), sending copies of the proposed negative declaration or mitigated negative declaration to the State Clearinghouse for distribution to the state agencies, where one or more state agencies will be a responsible agency or a trustee agency or will exercise jurisdiction by law over natural resources affected by the project, or where the project is of statewide, regional, or area wide environmental significance.

C44) Pursuant to Title 14, California Code of Regulations, Section 15073, subdivision (e), notifying, in writing, any public agency which comments on a proposed negative declaration or mitigated negative declaration of any public hearing to be held for the project for which the document was prepared.

C45) Pursuant to Title 14, California Code of Regulations, Section 15073.5, subdivision (a), re-circulating a negative declaration when the document must be substantially revised after public notice of its availability has previously been given pursuant to Section 15072, but prior to it adoption.

C46) Pursuant to Title 14, California Code of Regulations, Section 15073.5, subdivision (d), preparing a draft EIR and certifying a final EIR prior to approving the project, if during the negative declaration process there is substantial evidence in light of the whole record that the project, as revised, may have a significant effect on the environment which cannot be mitigated or avoided.

C47) Pursuant to Title 14, California Code of Regulations, Section 15074, subdivision (b), considering, prior to approving a project, the proposed negative declaration

together with any comments received during the public review process.

C48) Pursuant to Title 14, California Code of Regulations, Section15074, subdivision (c), specifying the location and custodian of the documents or other materials which constitute the record of proceedings upon which its decision is based, when adopting a mitigated negative declaration or mitigated negative declaration.

C49) Pursuant to Title 14, California Code of Regulations, Section15074, subdivision (d), adopting a program for reporting on or monitoring the changes which it has either required in the project or made a condition of approval to mitigate or avoid significant environmental effects, when adopting a mitigated negative declaration.

C50) Pursuant to Title 14, California Code of Regulations, Section 15074.1, subdivision (b), prior to deleting and substituting for a mitigation measure, doing both of the following:

(a) Holding a public hearing on the matter.

(b) Adopting a written finding that the new measure is equivalent or more effective in mitigating or avoiding potential significant effects and that it in itself will not cause any potentially significant effect on the environment.

C51) Pursuant to Title 14, California Code of Regulations, Section 15075, subdivision (a), filing a notice of determination, after deciding to carry out or approve a project for which a negative declaration or mitigated negative declaration has been approved; and for projects with phases, filing a notice of determination after deciding to carry out or approve each phase.

C52) Pursuant to Title 14, California Code of Regulations, Section 15075, subdivision (b), include in the notice of determination:

(a) An identification of the project including its common name where possible, and its location.

(b) A brief description of the project.

(c) The date on which the agency approved the project.

(d) The determination of the agency that the project will not have a significant effect on the environment.

(e) A statement that a negative declaration or a mitigated negative declaration has been prepared pursuant to the provisions of CEQA.

(f) The address where a copy of the negative declaration or mitigated negative declaration may be examined.

C53) Pursuant to Title 14, California Code of Regulations, Section 15075, subdivision (c), filing a notice of determination with OPR.

Article 7. EIR process

C54) Pursuant to Title 14, California Code of Regulations, Section 15081.5, subdivision (a), preparing, or having prepared, an EIR for specified projects.

C55) Pursuant to Title 14, California Code of Regulations, Section 15081.5, subdivision (b), preparing or having prepared an EIR for the selection of a California Community College campus location and approval of a long range development plan for that campus.

C56) Pursuant to Title 14, California Code of Regulations, Section 15082, subdivision (a), immediately after deciding that an environmental impact report is required for a project, sending to each responsible agency a notice of preparation stating that an environmental impact report will be prepared, and to every federal agency involved in approving or funding the project and to each trustee agency responsible for natural resources affected by the project.

C57) Pursuant to Title 14, California Code of Regulations, Section 15082, subdivision (d), when one or more state agencies will be a responsible agency or a trustee agency, sending a notice of preparation to each state responsible agency and each trustee agency with a copy to the State Clearinghouse in the Office of Planning and Research.

C58) Pursuant to Title 14, California Code of Regulations, Section 15084, subdivision (a), preparing the draft EIR directly or under contract to a third party.

C59) Pursuant to Title 14, California Code of Regulations, Section 15084, subdivision (d), choosing one of the following arrangements, or a combination of them, in preparing a draft EIR;

(a) Preparing the draft EIR directly with its own staff.

(b) Contracting with another entity, public or private, to prepare the draft EIR.

(c) Accepting a draft prepared by the applicant, a consultant retained by the applicant, or any other person.

(d) Executing a third party contract or memorandum of understanding with the

applicant to govern the preparation of a draft EIR by an independent contractor.

(e) Using a previously prepared EIR.

C60) Pursuant to Title 14, California Code of Regulations, Section 15084, subdivision (e), subjecting the draft to their own review and analysis, before using a draft prepared by another person.

C61) Pursuant to Title 14, California Code of Regulations, Section 15085, subdivision (a), filing a notice of completion with OPR in a printed hard copy or in electronic form on a diskette or by electronic mail transmission, as soon as the draft EIR is completed.

C62) Pursuant to Title 14, California Code of Regulations, Section 15085, subdivision (b), including in the notice of completion:

(a) A brief description of the project,

(b) The proposed location of the project,

(c) An address where copies of the draft EIR are available, and

(d) The period during which comments will be received on the draft EIR.

C63) Pursuant to Title 14, California Code of Regulations, Section 15086, subdivision (a), consulting with and requesting comments on the draft EIR from:

(a) Responsible agencies,

(b) Trustee agencies with resources affected by the project, and

(c) Any other state, federal , and local agencies which have jurisdiction by law

with respect to the project or which exercise authority over resources which may be affected by the project, including water agencies consulted pursuant to section 15083.5.

(d) Any city or county which borders on a city or county within which the project is located, and

(e) For a project of statewide, regional, or area wide significance, the transportation planning agencies and public agencies which have transportation facilities within their jurisdictions which could be affected by the project.

C64) Pursuant to Title 14, California Code of Regulations, Section 15087, subdivision (a), providing public notice of the availability of a draft EIR at the same time as sending a notice of completion to OPR, as provided under Section 15105. Mailing the notice to the last known name and address of all organizations and individuals who have previously requested such notice in writing by at least one of the following procedures:

(a) Publication at least one time by the public agency in a newspaper of general circulation in the area affected by the proposed project. If more than one area is affected, the notice shall be published in the newspaper of largest circulation from among the newspapers of general circulation in those areas.

(b) Posting of notice by the public agency on and off the site in the area where the project is to be located.

(c) Direct mailing to the owners and occupants of property contiguous to the parcel or parcels on which the project is located. Owners of such property shall be identified as shown on the latest equalized assessment roll.

C65) Pursuant to Title 14, California Code of Regulations, Section 15087, subdivision (c), disclosing the following in the notice:

(a) A brief description of the proposed project and its location.

(b) The starting and ending dates for the review period during which the lead agency will receive comments. If the review period is shortened, the notice shall disclose that fact.

(c) The date, time, and place of any scheduled public meetings or hearings to be held by the lead agency on the proposed project when known to the lead agency at the time of notice.

(d) A list of the significant environmental effects anticipated as a result of the project, to the extent which such effects are known to the lead agency at the time of the notice.

(e) The address where copies of the EIR and all documents referenced in the EIR will be available for public review. This location shall be readily accessible to the public during the lead agency's normal working hours.

(f) The presence of the site on any of the lists of sites enumerated under Section 65962.5 of the Government Code including, but not limited to lists of hazardous waste facilities, land designated as hazardous waste property, hazardous waste disposal sites and others, and the information in the Hazardous Waste and Substances Statement required under subsection (f) of that Section.

C66) Pursuant to Title 14, California Code of Regulations, Section 15087, subdivision (g), furnishing copies of draft EIRs to public library systems serving in the area involve in order to make copies of EIRs available to the public.

C67) Pursuant to Title 14, California Code of Regulations, Section 15088, subdivision (a), evaluating comments on environmental issues received from persons who reviewed the draft EIR, preparing a written response, and responding to comments received during the noticed comment period.

C68) Pursuant to Title 14, California Code of Regulations, Section 15088, subdivision (b), describing in the written response the disposition of significant environmental issues raised. In particular, the major environmental issues raised when the lead agency's position is at variance with recommendations and objections raised in the comments must be addressed in detail giving reasons why specific comments and suggestions were not accepted.

C69) Pursuant to Title 14, California Code of Regulations, Section 15088, subdivision (c), where the response to comments makes important changes in the information contained in the text of the draft EIR, either:

(1) Revising the text in the body of the EIR, or

(2) Including marginal notes showing that the information is revised in the response to comments.

C70) Pursuant to Title 14, California Code of Regulations, Section 15088.5, subdivision (a), recirculating an EIR when significant new information is added to the EIR after public notice is given of the availability of the draft EIR for public review under Section 15087 but before certification.

C71) Pursuant to Title 14, California Code of Regulations, Section 15088.5, subdivision (e), supporting a decision not to recirculate an EIR by substantial evidence in the administrative record.

C72) Pursuant to Title 14, California Code of Regulations, Section 15088.5, subdivision (f), evaluating and responding to comments as provided in Section 15088.

C73) Pursuant to Title 14, California Code of Regulations, Section 15088.5, subdivision (g),summarizing the revisions made to the previously circulated draft EIR, when recirculating a revised EIR, either in whole or in part, in the revised EIR or by an attachment to the revised EIR.

C74) Pursuant to Title 14, California Code of Regulations, Section 15089, subdivision

(a), preparing a final EIR before approving the project.

C75) Pursuant to Title 14, California Code of Regulations, Section 15090, subdivision (a), certifying, prior to approving a project, that:

(a) The final EIR has been completed in compliance with CEQA;

(b) The final EIR was presented to the decision-making body of the lead agency and that the decision-making body reviewed and considered the information contained in the final EIR prior to approving the project; and

(c) The final EIR reflects the lead agency's independent judgment and analysis.

C76) Pursuant to Title 14, California Code of Regulations, Section 15091, subdivision (a), not approving or carrying out a project for which an EIR has been certified which identifies one or more significant environmental effects of the project unless making one or more written findings for each of those significant effects, accompanied by a brief explanation of the rationale for each finding.

C77) Pursuant to Title 14, California Code of Regulations, Section 15091, subdivision (b), supporting the findings required by subsection (a) by substantial evidence in the record.

C78) Pursuant to Title 14, California Code of Regulations, Section 15091, subdivision (d), when making the findings required in subsection (a)(1), adopting a program for reporting on or monitoring the changes which it has either required in the

project or made a condition of approval to avoid or substantially lessen significant environmental effects. These measures must be fully enforceable through permit conditions, agreements, or other measures.

C79) Pursuant to Title 14, California Code of Regulations, Section 15091, subdivision (e), specifying the location and custodian of the documents or other material which constitute the record of the proceedings upon which its decision is based.

C80) Pursuant to Title 14, California Code of Regulations, Section 15092, subdivision (b), not deciding to approve or carry out a project for which an EIR was prepared unless either:

(a) The project as approved will not have a significant effect on the environment, or

(b) The agency has:

(i) Eliminated or substantially lessened all significant effects on the environment where feasible as shown in findings under Section 15091, and

(ii) Determined that any remaining significant effects on the environment found to be unavoidable under Section 15091 are acceptable due to overriding concerns as described in Section 15093.

C81) Pursuant to Title 14, California Code of Regulations, Section 15093, subdivision

(a), balancing, as applicable, the economic, legal, social, technological, or other benefits of a proposed project against its unavoidable environmental risks when determining whether to approve the project.

C82) Pursuant to Title 14, California Code of Regulations, Section 15093, subdivision (b), when approving a project which will result in the occurrence of significant effects which are identified in the final EIR but are not avoided or substantially lessened, stating in writing the specific reasons to support its action based on the final EIR and/or other information in the record. The statement of overriding considerations shall be supported by substantial evidence in the record.

C83) Pursuant to Title 14, California Code of Regulations, Section 15093, subdivision (c), if an agency makes a statement of overriding considerations, including the statement in the record of the project approval and mentioning it in the notice of determination.

C84) Pursuant to Title 14, California Code of Regulations, Section 15093, subdivision (c), if a local agency is the lead agency, filing the notice of determination with the county clerk of the county or counties in which the project will be located. If the project requires discretionary approval from a state agency, filing the notice of determination with OPR.

C85) Pursuant to Title 14, California Code of Regulations, Section 15093, subdivision (d), retaining a notice of determination for not less than 9 months.

C86) Pursuant to Title 14, California Code of Regulations, Section 15094, subdivision (a), filing a notice of determination within 5 working days after approval of the project by the lead agency, which includes:

(a) An identification of the project including its common name where possible and its location.

(b) A brief description of the project.

(c) The date when the agency approved the project.

(d) The determination of the agency whether the project in its approved form will have a significant effect on the environment.

(e) A statement that an EIR was prepared and certified pursuant to the provisions of CEQA.

(f) Whether mitigation measures were made a condition of the approval of the project.

(g) Whether findings were made pursuant to Section 15091.

(h) Whether a statement of overriding considerations was adopted for the project.

(I) The address where a copy of the final EIR and the record of project approval may be examined.

C87) Pursuant to Title 14, California Code of Regulations, Section 15095:

(a) Filing a copy of the final EIR with the appropriate planning agency of any city, county, or city and county where significant effects on the environment may occur.

(b) Including the final EIR as part of the regular project report which is used in the existing project review and budgetary process if such a report is used.

(c) Retaining one or more copies of the final EIR as public records for a reasonable period of time.

Article 8. Time Limits

C88) Pursuant to Title 14, California Code of Regulations, Section 15100, subdivision (a), adopting time limits to govern their implementation of CEQA consistent with this article.

C89) Pursuant to Title 14, California Code of Regulations, Section 15104, convening a meeting with agency representatives to discuss the scope and content of the environmental information a responsible agency will need in the EIR as soon as possible but no later than 30 days after receiving a request for the meeting.

Article 9. Contents of Environmental Impact Reports

C90) Pursuant to Title 14, California Code of Regulations, Section 15122, including in an EIR at least a table of contents or an index to assist readers in finding the analysis of different subjects and issues.

C91) Pursuant to Title 14, California Code of Regulations, Section 15123, subdivision (a), including in an EIR a brief summary of the proposed actions and its consequences. The language of the summary should be as clear and simple as reasonably practical.

C92) Pursuant to Title 14, California Code of Regulations, Section 15123, subdivision (b), identifying in the summary:

(a) Each significant effect with proposed mitigation measures and alternatives that would reduce or avoid that effect;

(b) Areas of controversy known to the lead agency including issues raised by agencies and the public; and

(c) Issues to be resolved including the choice among alternatives and whether or how to mitigate the significant effects.

C93) Pursuant to Title 14, California Code of Regulations, Section 15124, containing the following information in the description of the project:

(a) The precise location and boundaries of the proposed project shall be shown on a detailed map, preferably topographic. The location of the project shall also appear on a regional map.

(b) A statement of the objectives sought by the proposed project to help the lead agency develop a reasonable range of alternatives to evaluate in the EIR and aid the decision makers in preparing findings or a statement of

overriding considerations, if necessary. The statement of objectives should include the underlying purpose of the project.

(c) A general description of the project's technical, economic, and environmental characteristics, considering the principal engineering proposals if any and supporting public service facilities.

(d) A statement briefly describing the intended uses of the EIR, and including, to the extent that the information is know:

(i) A list of the agencies that are expected to use the EIR in their decision-making,

(ii) A list of permits and other approvals required to implement the project, and

(iii) A list of related environmental review and consultation requirements required by federal, state, or local laws, regulations, or policies. To the fullest extent possible, the lead agency should integrate CEQA review with these related environmental review and consultation requirements.

C94) Pursuant to Title 14, California Code of Regulations, Section 15125, subdivision (a), including in an EIR, a description of the physical environmental conditions in the vicinity of the project, as they exist at the time the notice of preparation is

C98) Pursuant to Title 14, California Code of Regulations, Section 15126.6, subdivision (a), describing in an EIR, a range of reasonable alternatives to the project, or to the location of the project, which would feasibly attain most of the basic objectives of the project but would avoid or substantially lessen any of the significant effects of the project, evaluating the comparative merits of the alternatives, and selecting a range of project alternatives for examination and publicly disclosing its reasoning for selecting those alternatives.

C99) Pursuant to Title 14, California Code of Regulations, Section 15126.6, subdivision (b), focusing the discussion of alternatives on alternatives to the project or its location which are capable of avoiding or substantially lessening any significant effects of the project, even if these alternatives would impede to some degree the attainment of the project objectives, or would be more costly.

C100) Pursuant to Title 14, California Code of Regulations, Section 15126.6, subdivision (d), including in the EIR, sufficient information about each alternative to allow meaningful evaluation, analysis, and comparison with the proposed project.

C101) Pursuant to Title 14, California Code of Regulations, Section 15126.6, subdivision (e), evaluating the specific alternative of "no project" along with its impact.

C102) Pursuant to Title 14, California Code of Regulations, Section 15126.6, subdivision (f), setting forth in the EIR, the rule of reason, which requires only those alternatives necessary to permit a reasoned choice. Of those alternatives,

examining in detail in the EIR, only the ones that have been determined could feasibly attain most of the basic objectives of the project.

C103) Pursuant to Title 14, California Code of Regulations, Section 15128, containing, in an EIR, a statement briefly indicating the reasons that various possible significant effects of a project were determined not to be significant and were therefore not discussed in detail in the EIR.

C104) Pursuant to Title 14, California Code of Regulations, Section 15129, identifying, in an EIR, all federal, state, or local agencies, other organizations, and private individuals consulted in preparing the draft EIR, and the persons, firm, or agency preparing the draft EIR, by contract or other authorization.

C105) Pursuant to Title 14, California Code of Regulations, Section 15130, subdivision (a), discussing in an EIR, cumulative impacts of a project when the project's incremental effect is cumulatively considerable, as defined in section 15065(c). Where a lead agency is examining a project with an incremental effect that is not "cumulatively considerable," a lead agency need not consider that effect significant, but shall briefly describe its basis for concluding that the incremental effect is not cumulatively considerable.

C106) Pursuant to Title 14, California Code of Regulations, Section 15130, subdivision (b), reflecting in the discussion of cumulative impacts, the severity of the impacts

and their likelihood of occurrence, but the discussion need not provide as great detail as is provided for the effects attributable to the project alone.

C107) Pursuant to Title 14, California Code of Regulations, Section 15132, including in the final EIR:

(a) The Draft EIR or a revision of the draft.

(b) Comments and recommendations received on the Draft EIR either verbatim or in summary.

(c) A list of persons, organizations, and public agencies commenting on the Draft EIR.

(d) The responses of the lead agency to significant environmental points raised in the review and consultation process.

(e) Any other information added by the lead agency.

Article 10. Considerations in Preparing EIRs and Negative Declarations

C108) Pursuant to Title 14, California Code of Regulations, Section 15140, writing EIRs in plain language and using appropriate graphics so that decision makers and the public can rapidly understand the documents.

C109) Pursuant to Title 14, California Code of Regulations, Section 15142, preparing an EIR using an interdisciplinary approach which will ensure the integrated use of the natural and social sciences and the consideration of qualitative as well as quantitative factors.

C110) Pursuant to Title 14, California Code of Regulations, Section 15143, focusing the the EIR on the significant effects on the environment and discussing them with emphasis in proportion to their severity and probability of occurrence.

C111) Pursuant to Title 14, California Code of Regulations, Section 15145, if, after thorough investigation, a lead agency finds that a particular impact is too speculative for evaluation, noting its conclusion and terminating discussion of the impact.

C112) Pursuant to Title 14, California Code of Regulations, Section 15147, including, in an EIR, summarized technical data, maps, plot plans, diagrams, and similar relevant information sufficient to permit full assessment of significant environmental impacts by reviewing agencies and members of the public.

C113) Pursuant to Title 14, California Code of Regulations, Section 15148, citing in the EIR, all documents used in its preparation including, where possible, the page and section number of any technical reports which were used as the basis for any statements in the EIR.

C114) Pursuant to Title 14, California Code of Regulations, Section 15149, subdivision (b), establishing requirements or conditions on project design, construction, or operation in order to protect or enhance the environment.

C115) Pursuant to Title 14, California Code of Regulations, Section 15150, subdivision (b), stating in the EIR or negative declaration where the incorporated documents will be available for inspection.

C116) Pursuant to Title 14, California Code of Regulations, Section 15150, subdivision (c), where an EIR or negative declaration uses incorporation by reference, briefly summarizing the incorporated part of the referenced document where possible or briefly describing if the data or information cannot be summarized.

C117) Pursuant to Title 14, California Code of Regulations, Section 15150, subdivision (d), where an agency incorporates information from an EIR that has previously been reviewed through the state review system, including in the summary or designation described in subdivision (c), the state identification number of the incorporated document.

C118) Pursuant to Title 14, California Code of Regulations, Section 15152, subdivision (f) providing a later EIR when the initial study or other analysis finds that the later project may cause significant effects on the environment that were not adequately addressed in the prior EIR, and providing a negative declaration when the provisions of Section 15070 are met.

C119) Pursuant to Title 14, California Code of Regulations, Section 15153, subdivision (b), when a lead agency proposes to use an EIR from an earlier project as the EIR for a separate, later project, using the following procedures:

(a) Reviewing the proposed project with an initial study, using incorporation by reference if necessary, to determine whether the EIR would adequately describe:

(I) The general environmental setting of the project,

(ii) The significant environmental impacts of the project, and

(iii) Alternatives and mitigation measures related to each significant effect.

(b) If the lead agency believes that the EIR would meet the requirements of Subsection (1), providing public review as provided in Section 15087 stating that it plans to use the previously prepared EIR as the draft EIR for this project, and including in the notice as a minimum:

(i) An identification of the project with a brief description;

(ii) A statement that the agency plans to use a certain EIR prepared for a previous project as the EIR for this project;

(iii) A listing of places where copies of the EIR may be examined; and

(iv) A statement that the key issues involving the EIR are whether the EIR should be used for this project and whether there are any additional, reasonable alternatives or mitigation measures that should be considered as ways of avoiding or reducing the significant effects of the project.

(c) Preparing responses to comments received during the review period.

(d) Before approving the project:

(i) Considering the information in the EIR including comments received during the review period and responses to those comments,

(ii) Deciding either on its own or on a staff recommendation whether the EIR is adequate for the project at hand,

(iii) Making or requiring certification to be made as described in Section 15090, and

(iv) Making findings as provided in Sections 15091 and 15093 as necessary.

(e) After making a decision on the project, filing a notice of determination.

Article 11. Types of EIRs

C120) Pursuant to Title 14, California Code of Regulations, Section 15162, subdivision (a), determining, in order for a subsequent EIR to be prepared for that project, when an EIR has been certified or a negative declaration adopted for a project, on the basis of substantial evidence in the light of the whole record, one or more of the following:

(a) Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the

involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;

(b) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or

(c) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the negative declaration was adopted, shows any of the following:

(i) The project will have one or more significant effects not discussed in the previous EIR or negative declaration;

(ii) Significant effects previously examined will be substantially more severe than shown in the previous EIR;

(iii) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or

(iv) Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

C121) Pursuant to Title 14, California Code of Regulations, Section 15162, subdivision (b), preparing a subsequent EIR if required under subsection (a), if changes to a project or its circumstances occur or new information becomes available after adoption of a negative declaration, otherwise, determining whether to prepare a subsequent negative declaration, an addendum, or no further documentation.

C122) Pursuant to Title 14, California Code of Regulations, Section 15164, subdivision (a), preparing an addendum to a previously certified EIR if some changes or additions are necessary but none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred.

C123) Pursuant to Title 14, California Code of Regulations, Section 15164, subdivision (e), including in an addendum to an EIR, their findings on the project, or elsewhere in the record, a brief explanation of the decision not to prepare a subsequent EIR pursuant to Section 15162, and supporting the explanation by substantial evidence.

C124) Pursuant to Title 14, California Code of Regulations, Section 15165, preparing a single program EIR for the ultimate project as described in Section 15168, where

individual projects are, or a phased project is, to be undertaken and where the total undertaking comprises a project with significant environmental effect.

C125) Pursuant to Title 14, California Code of Regulations, Section 15167, subdivision (a), subdivision (b), when a staged EIR has been prepared, preparing a supplement to the EIR when a later approval is required for the project, and the information available at the time of the later approval would permit consideration of additional environmental impacts, mitigation measures, or reasonable alternatives to the project.

C126) Pursuant to Title 14, California Code of Regulations, Section 15168, subdivision (c), examining subsequent activities in the program in the light of the program EIR to determine whether an additional environmental document must be prepared.

C127) Pursuant to Title 14, California Code of Regulations, Section 15168, subdivision (e), when a law other than CEQA requires public notice when the agency later proposes to carry out or approve an activity within the program and to rely on the program EIR for CEQA compliance, including in the notice for the activity a statement that:

(a) This activity is within the scope of the program approved earlier, and

(b) The program EIR adequately describes the activity for the purposes of CEQA.

Article 11.5. Master Environmental Impact Report

C128) Pursuant to Title 14, California Code of Regulations, Section 15176, if using a Master EIR, including all of the following:

(a) A detailed discussion as required by Section 15126.

(b) A description of anticipated subsequent projects that are within the scope of the Master EIR, including information with regard to the kind, size, intensity, and location of the subsequent projects, including, but not limited to all of the following:

(i) The specific type of project anticipated to be undertaken.

(ii) The maximum and minimum intensity of any anticipated subsequent project.

(iii) The anticipated location for any subsequent development projects, and, consistent with the rule of reason set forth in Section 15126.6(f), alternative locations for any such projects.

(iv) A capital outlay or capital improvement program, or other scheduling or implementing device that governs the submission and approval of subsequent projects, or an explanation as to why practical planning considerations render it impractical to identify any such program or scheduling or other device at the time of preparing the Master EIR.

C129) Pursuant to Title 14, California Code of Regulations, Section 15177, subdivision

(c), determining whether a subsequent project is within the scope of the Master EIR based upon a review of the initial study to determine whether there are additional significant effects or new additional mitigation measures or alternatives required for the subsequent project that are not already discussed in the Master EIR.

C130) Pursuant to Title 14, California Code of Regulations, Section 15177, subdivision (d), prior to approval of the proposed subsequent project, incorporating all feasible mitigation measures or feasible alternatives appropriate to the project as set forth in the Master EIR and provide notice in the manner required by Section 15087.

C131) Pursuant to Title 14, California Code of Regulations, Section 15177, subdivision (e), when approving a project pursuant to this section, filing a notice in the manner required by Section 15075.

C132) Pursuant to Title 14, California Code of Regulations, Section 15178, subdivision (a), when a proposed subsequent project is identified in the Master EIR, but the lead agency cannot make a determination pursuant to Section 15177 that the subsequent project is within the scope of the Master EIR, and the lead agency determines that the cumulative impacts, growth inducing impacts and irreversible significant effects analysis in the Master EIR is adequate for the subsequent project, preparing a mitigated negative declaration or a focused EIR if, after

preparing an initial study, the lead agency determines that the project may result in new or additional significant effects. Determining whether the cumulative impacts, growth inducing impacts and irreversible significant effects analyses are adequate based upon a review of the proposed subsequent project in light of the Master EIR.

C133) Pursuant to Title 14, California Code of Regulations, Section 15178, subdivision (b), preparing a mitigated negative declaration for any proposed subsequent project if both of the following occur:

(a) The initial study prepared pursuant to Section 15177 has identified potentially new or additional significant environmental effects that were not analyzed in the Master EIR; and

(b) Feasible mitigation measures or alternatives will be incorporated to revise the subsequent project before the negative declaration is released for public review pursuant to Section 15073 in order to avoid or mitigate the identified effects to a level of insignificance.

C134) Pursuant to Title 14, California Code of Regulations, Section 15178, subdivision (c), preparing a focused EIR if the subsequent project may have a significant effect on the environment and a mitigated negative declaration pursuant to subdivision (b) of this section cannot be prepared, according to the following:

(a) Incorporating, in the focused EIR, by reference the Master EIR and

analyzing only the subsequent project's additional significant environmental effects and any new or additional mitigation measures or alternatives that were not identified and analyzed by the Master EIR.

(b) A focused EIR need not examine those effects upon, finding, prior to public release of the focused EIR, on the basis of the initial study, related documents, and commitments from the proponent of a subsequent project, have been mitigated in one of the following manners:

(i) Mitigated or avoided as a result of mitigation measures identified in the Master EIR which the lead agency will require as part of the approval of the subsequent project;

(ii) Examined at a sufficient level of detail in the Master EIR to enable those significant effects to be mitigated or avoided by specific revisions to the project, the imposition of conditions of approval, or by other means in connection with approval of the subsequent project; or

(iii) The mitigation or avoidance of which is the responsibility of and within the jurisdiction of another public agency and is, or can and should be, undertaken by that agency.

(c) Including the above findings in the focused EIR prior to public release pursuant to Section 15087.

(d) Analyzing any significant environmental effects when:

(i) Substantial new or additional information shows that the adverse environmental effect may be more significant that was described in the Master EIR; or

(ii) Substantial new or additional information shows that mitigation measures or alternatives which were previously determined to be infeasible are feasible and will avoid or reduce the significant effects of the subsequent project to a level of insignificance.

C135) Pursuant to Title 14, California Code of Regulations, Section 15178, subdivision (d), filing a notice of determination pursuant to Section 15075 if a project has been approved for which a mitigated negative declaration has been prepared pursuant to this section and filing a notice of determination pursuant to Section 15094 if a project has been approved for which a focused EIR has been prepared pursuant to this section.

C136) Pursuant to Title 14, California Code of Regulations, Section 15178, subdivision (e), upon determining that the cumulative impacts, growth inducing impacts and irreversible significant effects analysis in the Master EIR is inadequate for the subsequent project, the subsequent project is no longer eligible for the limited environmental review available under the Master EIR process, reviewing according to Article 7 (commencing with Section 15080) of these guidelines, and

tiering the project specific EIR upon the Master EIR to the extent feasible under Section 15152.

C137) Pursuant to Title 14, California Code of Regulations, Section 15179, the certified Master EIR shall not be used in accordance with this article if either (i) it was certified more than five years prior to the filing of an application for a later project, or (ii) a project not identified in the certified Master EIR as an anticipated subsequent project is approved and the approved project may affect the adequacy of the Master EIR, unless the lead agency does one of the following:

(a) Reviews the Master EIR and finds that no substantial changes have occurred with respect to the circumstances under which the Master EIR was certified, or that there is no new available information which was not known and could not have been known at the time the Master EIR was certified; or

(b) Prepares a subsequent or supplemental EIR that updates or revises the Master EIR and which either (i) is incorporated into the previously certified Master EIR, or (ii) references any deletions, additions or other modifications to the previously certified Master EIR.

Article 12. Special Situations

C138) Pursuant to Title 14, California Code of Regulations, Section 15184, whenever a state agency issues an order which requires a local agency to carry out a project subject to CEQA, the following rules apply:

(a) If an EIR is prepared for the project, limiting the EIR to considering those factors and alternatives which will not conflict with the order.

(b) If a local agency undertakes a project to implement a rule or regulation imposed by a certified state environmental regulatory program listed in Section 15251, the project shall be exempt from CEQA with regard to the significant effects analyzed in the document prepared by the state agency as a substitute for an EIR. Complying with CEQA with regard to any site-specific effect of the project which was not analyzed by the certified state agency as a significant effect on the environment.

C139) Pursuant to Title 14, California Code of Regulations, Section 15185, subdivision (b), the decision making body to which an appeal has been made shall consider the environmental document and make findings under Sections 15091 and 15093 if appropriate.

C140) Pursuant to Title 14, California Code of Regulations, Section 15186, subdivision (a), consulting with other agencies in the case that CEQA establishes a special requirement for certain school projects, as well as certain projects near schools, to ensure that potential health impacts resulting from exposure to hazardous

materials, wastes, and substances will be carefully examined and disclosed in a negative declaration or EIR.

C141) Pursuant to Title 14, California Code of Regulations, Section 15186, subdivision (b), when a project located within one-fourth mile of a school involves the construction or alteration of a facility which might reasonably be anticipated to emit hazardous or acutely hazardous air emissions, or which would handle acutely hazardous material or a mixture containing acutely hazardous material in a quantity equal to or greater than that specified in subdivision (a) of Section 25536 of the Health and Safety Code, which may impose a health or safety hazard to persons who would attend or would be employed at the school, performing the following:

(a) Consulting with the affected school district or districts regarding the potential impact of the project on the school when circulating the proposed negative declaration or draft EIR for review.

(b) Notifying the affected school district of the project, in writing, not less than 30 days prior to approval or certification of the negative declaration or EIR.

C142) Pursuant to Title 14, California Code of Regulations, Section 15186, subdivision (c), when the project involves the purchase of a school site or the construction of a secondary or elementary school, the negative declaration or EIR prepared for the project shall not be approved or certified by the school board unless:

(a) Notifying in writing and consulting with the county or city administering agency (as designated pursuant to Section 25502 of the Health and Safety Code) and with any air pollution control district or air quality management district having jurisdiction, to identify facilities within one-fourth mile of the proposed school site which might reasonably be anticipated to emit hazardous emissions or handle hazardous or acutely hazardous material, substances, or waste. Including in the notice a list of the school sites for which information is sought. Each agency or district receiving notice shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification.

(b) Making, on the basis of substantial evidence, one of the following written findings:

(i) Consultation identified none of the facilities specified in paragraph (2).

(ii) The facilities specified in paragraph (2) exist, but one of the following conditions applies:

1. The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

2. Corrective measures required under an existing order by another agency having jurisdiction over the facilities will, before the school is occupied, mitigate all chronic or accidental hazardous air emissions to levels that do not constitute any actual or potential public health danger to persons who would attend or be employed at the proposed school. When the school district board makes such a finding, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

Article 13. Review and Evaluations of EIRs and Negative Declarations

C143) Pursuant to Title 14, California Code of Regulations, Section 15201, Including provisions in its CEQA procedures for wide public involvement, formal and informal, consistent with its existing activities and procedures, in order to receive and evaluate public reactions to environmental issues related to the agency's activities.

C144) Pursuant to Title 14, California Code of Regulations, Section 15203, providing adequate time for other public agencies and members of the public to review and comment on a draft EIR or negative declaration that it has prepared.

C145) Pursuant to Title 14, California Code of Regulations, Section 15205, subdivision (a), submitting draft EIRs and negative declarations to be reviewed by state

agencies to the State Clearinghouse, and including, in addition to the printed copy, a copy of the document in electronic form on a diskette or by electronic mail transmission, if available.

C146) Pursuant to Title 14, California Code of Regulations, Section 15205, subdivision (b), submitting the following environmental documents to the State Clearinghouse for review by state agencies:

(a) Draft EIRs and negative declarations prepared by a state agency where such agency is a lead agency.

(b) Draft EIRs and negative declarations prepared by a public agency where a state agency is a responsible agency, trustee agency, or otherwise has jurisdiction by law with respect to the project.

(c) Draft EIRs and negative declarations on projects identified in Section 15206 as being of statewide, regional, or areawide significance.

(d) Draft EIRs, environmental assessments, and findings of no significant impact prepared pursuant to NEPA, the Federal Guidelines (Title 40 CFR, Part 1500, commencing with Section 1500.1).

C147) Pursuant to Title 14, California Code of Regulations, Section 15205, subdivision (c), including with any environmental documents submitted to the State Clearinghouse, in addition to the printed copy, a copy of the document in electronic format, on a diskette or by electronic mail transmission, if available.

C148) Pursuant to Title 14, California Code of Regulations, Section 15205, subdivision (d), when an EIR or negative declaration is submitted to the State Clearinghouse for review, setting the review period at least as long as the period provided in the state review system operated by the State Clearinghouse, and in exceptional circumstances, requesting shorter review periods.

C149) Pursuant to Title 14, California Code of Regulations, Section 15205, subdivision (e), submitting no less ten copies of an EIR or negative declaration unless the State Clearinghouse approves a lower number in advance.

C150) Pursuant to Title 14, California Code of Regulations, Section 15205, subdivision (f), submitting documents to the State Clearinghouse for distribution in order to comply with the review requirements of this section.

C151) Pursuant to Title 14, California Code of Regulations, Section 15206, subdivision (a), submitting a draft EIR or negative declaration to the State Clearinghouse and to the appropriate metropolitan area council of governments for review and comment, and when such documents are submitted to the State Clearinghouse, including, in addition to the printed copy, a copy of the document in electronic format on a diskette or by electronic mail transmission, if available.

C152) Pursuant to Title 14, California Code of Regulations, Section 15206, subdivision (b), determining that a proposed project is of statewide, regional, or areawide significance if the project meets any of the following criteria:

(a) A proposed local general plan, element, or amendment thereof for which an EIR was prepared. If a negative declaration was prepared for the plan, element, or amendment, the document need not be submitted for review.

(b) A project has the potential for causing significant effects on the environment extending beyond the city or county in which the project would be located.

(c) A project which would result in the cancellation of an open space contract made pursuant to the California Land Conservation Act of 1965 (Williamson Act) for any parcel of 100 or more acres.

(d) A project for which an EIR and not a negative declaration was prepared which would be located in and would substantially impact specific areas of critical environmental.

(e) A project which would substantially affect sensitive wildlife habitats including but not limited to riparian lands, wetlands, bays, estuaries, marshes, and habitats for endangered, rare and threatened species as defined by Section 15380 of this Chapter.

(f) A project which would interfere with attainment of regional water quality standards as stated in the approved areawide waste treatment management plan.

(g) A project which would provide housing, jobs, or occupancy for 500 or more people within 10 miles of a nuclear power plant.

C153) Pursuant to Title 14, California Code of Regulations, Section 15208, keeping on file comments which may be received on a draft EIR or negative declaration.

Article 14. Projects Also Subject to the National Environmental Policy Act (NEPA)

C154) Pursuant to Title 14, California Code of Regulations, Section 15223, when planning to use an EIS or finding of no significant impact or to prepare such a document jointly with a federal agency, consulting as soon as possible with the federal agency.

C155) Pursuant to Title 14, California Code of Regulations, Section 15225, subdivision (a), prior to using the federal document in this situation, giving notice, in the same manner as a notice of the public availability of a draft EIR under Section 15087, that it will use the federal document in the place of an EIR or negative declaration and that it believes that the federal document meets the requirements of CEQA.

Article 20. Definitions

C156) Pursuant to Title 14, California Code of Regulations, Section 15367, deciding whether an EIR or negative declaration will be required for the project and causing the document to be prepared.

Part D - California State Clearinghouse Handbook

D1) Pursuant to the California State Clearinghouse Handbook, pages 5-6, when submitting a draft negative declaration to SCH,

(1) Sending at least 15 copies which contain:

(a) Description and title of the project;

(b) Location of the project, preferably shown on a map;

(c) Name of the project proponent;

(d) A proposed finding that the project will not have a significant effect on the environment;

(e) An attached copy of the Initial Study documenting reasons to support the finding; and

(f) Mitigation measures, if any, included in the project to avoid potentially significant effects.

(2) Referencing any previously assigned number, if applicable.

D2) Pursuant to California State Clearinghouse Handbook, page 6, within five working days of approving a project for which a Negative Declaration has been adopted,

filing a Notice of Determination (NOD) with the county clerk of the county or counties where the project is located and with SCH.

D3) Pursuant to California State Clearinghouse Handbook, page 7, circulating a Notice of Preparation (NOP) to all Responsible and Trustee Agencies advising them of the district's intention to prepare a Draft EIR. This includes sending copies directly to all Responsible and Trustee Agencies. When there is a Responsible or Trustee state agency involved in a project, sending a copy of the NOP to the SCH, attaching the district's distribution list. The minimum content requirements for a NOP are:

(1) Description of the project;

(2) Location of the project, indicated either on an attached map (preferably a topographical map), or by a street address in an urbanized area;

(3) Salient environmental issues; and

(4) Probable environmental effects of the project.

D4) Pursuant to California State Clearinghouse Handbook, page 7, using a project number for all subsequent environmental documents for a project.

D5) Pursuant to California State Clearinghouse Handbook, page 7, submitting at least fifteen copies of any Draft EIR to SCH together with one copy of the NOC form.

D6) Pursuant to California State Clearinghouse Handbook, page 8, after receiving all public comments, including those of state agencies, preparing written responses and including them in the Final EIR. Certifying the Final EIR before approving the project.

D7) Pursuant to California State Clearinghouse Handbook, page 9, within five working days of approving a project for which an EIR was prepared, filing a Notice of Determination (NOD) with the county clerk of the county or counties where the project will be located and with SCH.

D8) Pursuant to California State Clearinghouse Handbook, page 10, when requesting a shortened review process for draft Negative Declarations and EIRs, contacting the SCH prior to submitting a request for shortened review explaining why the shortened review is needed and identify prior approval from Responsible state agencies. The request shall include the following criteria:

(1) The district is operating under an extension of the one-year period for completion of an EIR and would not otherwise be able to complete the EIR within the extended period.

(2) The district is under severe time constraints with regard to financing or exercising options which cannot be met without shortening the review period.

(3) The document is a supplement to a draft EIR or proposed negative declaration or mitigated negative declaration previously submitted to the State Clearinghouse.

(4) The health and safety of the community would be at risk unless the project is approved expeditiously.

(5) The document is a revised draft EIR, or proposed negative declaration or mitigated negative declaration, where changes in the document are primarily the result of comments from agencies and the public.

(6) The district shall provide evidence that there has been prior consultation with Responsible and Trustee state agencies.

(7) Before submitting a shortened review request, the district must have obtained verbal or written approval for a shortened review period from Responsible and Trustee state agencies. The request letter from the district must identify which state agencies have been contacted and the agencies' responses to the request.

D9) Pursuant to California State Clearinghouse Handbook, page 10, when requesting a shortened review process, following the following procedures:

(1) The request must be made to SCH in writing by the decision-making body of the district, or an authorized representative of the district, and shall be made on district letterhead. When submitted by a representative, a copy of the resolution or ordinance from the district board delegating authority should be attached.

(2) The request must explain the "exceptional circumstances" for making the request.

(3) The request must be accompanied by 15 copies of the environmental document.

(4) SCH approval of a shortened review period must be granted before issuing the public notice of availability.

(5) The public review period must be at least as long as the review period set by SCH.

(6) The review period for a Negative Declaration shall not be shorter than 20 days. The district must specify the requested length of the shortened review period.

(7) The review period for a Draft EIR shall not be shorter than 30 days. The district must specify the requested length of the shortened review period.

(8) The district may use the Shortened Review Application form contained in the Handbook.

D10) Pursuant to California State Clearinghouse Handbook, page 15, filing Notices of Completion at SCH.

D11) Pursuant to California State Clearinghouse Handbook, page 15, providing public notice of the availability of a Draft EIR or a Negative Declaration which contains at least the following:

(1) Description of proposed project;

(2) Location of proposed project;

(3) Specific period during which comments on proposed project will be accepted;

(4) Date, time, and place of any public meetings on proposed project;

(5) Address where copies of Draft EIR or Negative Declaration are available for review; and

(6) Environmental effects of the project, if any.

D12) Pursuant to California State Clearinghouse Handbook, page 15, providing the notice of availability to all organizations and individuals who previously requested notice using at least one of the following notification methods:

(1) Publication in a newspaper of general circulation in the area affected by the proposed project.

(2) Posting of the notice on- and off-site in the area where the project is to be located.

(3) Direct mailing to the owners and occupants of contiguous property shown on the latest equalized assessment roll.

D13) Pursuant to California State Clearinghouse Handbook, page 15, filing a Notice of Determination (NOD) within 5 days after a district approves or determines to carry out a project with the county clerk of the county or counties where the project will be located and SCH.

D14) Pursuant to California State Clearinghouse Handbook, pages 15-16, including in a Notice of Determination:

For a Negative Declaration:

(1) Identification of the project, including its common name or title, if possible;

(2) Location of the project;

(3) Brief description of the project;

(4) Date the agency approved the project;

(5) The determination by the approving agency that the project in its approved form will not have a significant effect on the environment;

(6) Statement that a Negative Declaration was prepared pursuant to the provisions of CEQA; and

(7) Address where a copy of the environmental document and record of project approval can be examined.

For an Environmental Impact Report (EIR):

(1) Identification of the project, including its common name or title, if possible;

(2) Location of the project;

(3) Brief description of the project;

(4) Date the agency approved the project;

(5) Determination by the approving agency whether the project in its approved form will have a significant effect on the environment;

(6) Statement that an EIR was prepared pursuant to the provisions of CEQA;

(7) Whether mitigation measures were made a condition of the approval of the project;

(8) Whether a statement of overriding considerations was adopted for the project;

(9) Whether findings were made pursuant to Section 15091 of the CEQA Guidelines; and

(10) Address where a copy of the final EIR and record of project approval may be examined.

Additionally, the notice shall be mailed to any person who has filed a written request for such notice.

D15) Pursuant to California State Clearinghouse Handbook, page 16, filing a Notice of Exemption (NOE) with the county clerk of the county or counties where the project is to be located. In addition the notice must be mailed to any person who has filed a written request for such notice.

D16) Pursuant to California State Clearinghouse Handbook, pages 16, including in any Notice of Exemption (NOE):

(1) A brief description of the project;

(2) A finding that the project is exempt, including a citation that references the CEQA Guidelines or statutory section under which it is found to be exempt; and

(3) A brief statement of reasons to support the finding.

It is estimated that the Clovis Unified School District incurred more than $1,000 in staffing and other costs for the period from July 1, 2002 through June 30, 2003 to implement the new duties applicable to K-12 school districts mandated by the state for which the school district has not been reimbursed by any federal, state, or local government agency, and for which it cannot otherwise obtain reimbursement.

The foregoing facts are known to me personally and, if so required, I could testify to the statements made herein. I hereby declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct except where stated upon

/

California Environmental Quality Act (CEQA)

I, Thomas J. Donner, Executive Vice President, Business and Administration, Santa Monica Community College District, make the following declaration and statement.

In my capacity as Executive Vice President, Business and Administration, I am responsible for the district's compliance with the California Environmental Quality Act. I am familiar with the provisions and requirements of the Statutes, Education Code Section, Public Resources Code Sections, Government Code Sections, the Title 5 and Title 14 Code of Regulations Sections and the California State Clearinghouse Handbook enumerated above.

These statutes, code sections, regulations and executive orders, so far as applicable to community college districts, require the Santa Monica Community College District to:

All Programs: Pursuant to the Public Resources Code Sections, Education Code Sections, Government Code Sections, California Code of Regulations and Executive

Orders cited, developing, adopting and implementing policies and procedures, and periodically revising those polices and procedures, to comply with the requirements of the California Environmental Quality Act, and related statutes and regulations.

Education Code

1) Pursuant to Education Code Section 17025, subdivision (a), submitting plans and obtaining the written approval of Department of General Services when requesting authorization for the construction of any new school, or for the addition to, or reconstruction or alteration of, any existing building, for lease-purchase to any school district.

2) Pursuant to Education Code Section 17025, subdivision (b), certifying the compliance of a project with Division 13 (commencing with Section 21000) of the Public Resources Code when requesting authorization for the construction of any new school, or for the addition to, or reconstruction or alteration of, any existing building, for lease-purchase to any school district.

3) Pursuant to Education Code Section 17025, subdivision (b), and notwithstanding any other law, for purposes of Division 13 (commencing with Section 21000) of the Public Resources Code, complying with all the requirements of a "lead agency" with regard to any project funded for that district.

Government Code

4) Pursuant to Government Code Section 66031 Government Code Section 66031, subdivision (a)(1), mediating the acts or decisions of a district, county office or

community college district made pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code).

5) Pursuant to Government Code Section 66031, subdivision (d), notifying the court if a mutually acceptable person has been chosen to serve as a mediator.

6) Pursuant to Government Code Section 66034, appearing and participating in settlement conferences ordered by the court.

Part A - Public Resources Code

A1) Pursuant to Public Resources Code Section 21002.1, subdivision (b), mitigating or avoiding the significant effects on the environment of projects that it carries out or approves whenever it is feasible to do so.

A2) Pursuant to Public Resources Code Section 21002.1, subdivision (d), being responsible for considering the effects, both individual and collective, of all activities involved in a project.

A3) Pursuant to Public Resources Code Section 21002.1, subdivision (e), reducing the time and cost required to prepare an environmental impact report, and focusing on potentially significant effects on the environment of a proposed project and focusing the discussion in the environmental impact report on those potential effects on the environment of a proposed project which the lead agency has determined are or may be significant.

A4) Pursuant to Public Resources Code Section 21003, subdivision (a), integrating

the requirements of this division with planning and environmental review procedures otherwise required by law or by local practice so that all those procedures, to the maximum feasible extent, run concurrently, rather than consecutively.

A5) Pursuant to Public Resources Code Section 21003, subdivision (b), preparing and writing documents in an organized manner that will be meaningful and useful to decision makers and to the public.

A6) Pursuant to Public Resources Code Section 21003, subdivision (c), omitting unnecessary descriptions of projects and emphasizing feasible mitigation measures and feasible alternatives to projects when preparing environmental impact reports.

A7) Pursuant to Public Resources Code Section 21003, subdivision (d), developing information in individual environmental impact reports so as to be incorporated into a data base which can be used to reduce delay and duplication in preparation of subsequent environmental impact reports.

A8) Pursuant to Public Resources Code Section 21003, subdivision (e), incorporating information developed in environmental impact reports and negative declarations into a data base which may be used to make subsequent or supplemental environmental determinations.

A9) Pursuant to Public Resources Code Section 21003, subdivision (f), being responsible for carrying out the environmental review process in the most

efficient, expeditious manner in order to conserve the available financial, governmental, physical, and social resources with the objective that those resources may be better applied toward the mitigation of actual significant effects on the environment.

A10) Pursuant to Public Resources Code Section 21003.1, subdivision (b), making information relevant to the significant effects of a project, alternatives, and mitigation measures which substantially reduce those effects available as soon as possible to interested persons and organizations.

A11) Pursuant to Public Resources Code Section 21080.09, subdivision (b), (for community college districts only) preparing an environmental impact report when selecting a location for a particular campus and approving a long range development plan which considers the environmental effects relating to changes in enrollment levels for each campus.

A12) Pursuant to Public Resources Code Section 21080.09, subdivision (c), (for community college districts only) when appropriate, addressing the approval of a project on a particular campus of public higher education, subject to the other provisions of this division, in a tiered environmental analysis based upon a long range development plan environmental impact report.

A13) Pursuant to Public Resources Code Section 21080.1, subdivision (a), determining whether an environmental impact report, a negative declaration, or a mitigated negative declaration shall be required for any project which is subject to this

division.

A14) Pursuant to Public Resources Code Section 21080.3, subdivision (a), prior to determining whether a negative declaration or environmental impact report is required for a project, consulting with all responsible agencies and with any other public agency which has jurisdiction by law over natural resources affected by the project which are held in trust for the people of the State of California.

A15) Pursuant to Public Resources Code Section 21080.4, subdivision (a), upon determination that an environmental impact report is required for a project, immediately sending notice of that determination by certified mail or an equivalent procedure to each responsible agency, the Office of Planning and Research, and those public agencies having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California.

A16) Pursuant to Public Resources Code Section 21080.4, subdivision (b), meeting with any responsible agency, the Office of Planning and Research, or a public agency having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California, when requested, for the purpose of determining the scope and content of the environmental information that any of those responsible agencies, the office, or the public agencies may require.

A17) Pursuant to Public Resources Code Section 21081, before approving or carrying out a project for which an environmental impact report has been certified which

identifies one or more significant effects on the environment that would occur if the project is approved or carried out, assuring that both of the following occur:

(a) The district or county office makes one or more of the following findings with respect to each significant effect:

(1) Changes or alterations have been required in, or incorporated into, the project which mitigate or avoid the significant effects on the environment.

(2) Those changes or alterations are within the responsibility and jurisdiction of another public agency and have been, or can and should be, adopted by that other agency.

(3) Specific economic, legal, social, technological, or other considerations, including considerations for the provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or alternatives identified in the environmental impact report.

(b) With respect to significant effects which were subject to a finding under paragraph (3) of subdivision (a), the public agency finds that specific overriding economic, legal, social, technological, or other benefits of the project outweigh the significant effects on the environment.

A18) Pursuant to Public Resources Code Section 21081.6, subdivision (a), adopting a reporting or monitoring program for the changes made to the project or conditions of project approval in order to mitigate or avoid significant effects on the

environment and specifying the location and custodian of the documents or other material which constitute the record of proceedings upon which its decision is based.

A19) Pursuant to Public Resources Code Section 21081.6, subdivision (b), providing that measures to mitigate or avoid significant effects on the environment are fully enforceable through permit conditions, agreements, or other measures.

A20) Pursuant to Public Resources Code Section 21082, adopting by resolution, rule, or regulation, objectives, criteria, and procedures for the evaluation of projects and the preparation of environmental impact reports pursuant to this division.

A21) Pursuant to Public Resources Code Section 21082.1, subdivision (a), preparing any draft environmental impact report, environmental impact report, negative declaration, or mitigated negative declaration directly, or under contract to a third party.

A22) Pursuant to Public Resources Code Section 21082.1, subdivision (c), doing all of the following:

(1) Independently reviewing and analyzing any report or declaration required by this division.

(2) Circulating draft documents that reflect its independent judgment.

(3) As part of the adoption of a negative declaration or a mitigated negative declaration, or certification of an environmental impact report, finding that the report or declaration reflects the independent judgment of the lead

agency.

(4) Submitting a sufficient number of copies of the draft environmental impact report, proposed negative declaration, or proposed mitigated negative declaration, and a copy of the report or declaration in an electronic form as required by the guidelines adopted pursuant to Section 21083, to the State Clearinghouse for review and comment by state agencies, if any of the following apply:

(A) A state agency is any of the following:

(i) The lead agency.

(ii) A responsible agency.

(iii) A trustee agency.

(B) A state agency otherwise has jurisdiction by law with respect to the project.

(C) The proposed project is of sufficient statewide, regional, or area wide environmental significance as determined pursuant to the guidelines certified and adopted pursuant to Section 21083.

A23) Pursuant to Public Resources Code Section 21082.2, subdivision (a), determining whether a project may have a significant effect on the environment based on substantial evidence in light of the whole record.

A24) Pursuant to Public Resources Code Section 21082.2, subdivision (d), preparing an environmental impact report if there is substantial evidence, in light of the

whole record before the lead agency, that a project may have a significant effect on the environment.

A25) Pursuant to Public Resources Code Section 21083, implementing the guidelines developed by the Office of Planning and Research, specifically implementing the criteria for public agencies to follow in determining whether or not a proposed project may have a "significant effect on the environment" and the procedures for determining the lead agency pursuant to the provisions of Section 21165.

A26) Pursuant to Public Resources Code Section 21083.2, subdivision (a), determining whether the project may have a significant effect on archaeological resources and, if so, addressing the issue of those resources in the environmental impact report.

A27) Pursuant to Public Resources Code Section 21083.2, subdivision (b), if it can be demonstrated that a project will cause damage to a unique archaeological resource, requiring reasonable efforts to be made to permit any or all of these resources to be preserved in place or left in an undisturbed state.

A28) Pursuant to Public Resources Code Section 21083.2, subdivision (c), to the extent that unique archaeological resources are not preserved in place or not left in an undisturbed state, requiring mitigation measures as provided in this subdivision.

A29) Pursuant to Public Resources Code Section 21083.2, subdivision (i) making provisions for archaeological sites accidentally discovered during construction,

including an immediate evaluation of the find. If the find is determined to be a unique archaeological resource, providing contingency funding and a time allotment sufficient to allow recovering an archaeological sample or to employ one of the avoidance measures that may be required under the provisions set forth in this section

A30) Pursuant to Public Resources Code Section 21091, subdivision (a), providing a public review period for a draft environmental impact report of not less than 30 days. If the draft environmental impact report is submitted to the State Clearinghouse for review, the review period shall be at least 45 days, and providing a sufficient number of copies of the document to the State Clearinghouse for review and comment by state agencies.

A31) Pursuant to Public Resources Code Section 21091, subdivision (b), providing a public review period for a proposed negative declaration or proposed mitigated negative declaration of not be less than 20 days. If the proposed negative declaration or proposed mitigated negative declaration is submitted to the State Clearinghouse for review, the review period shall be at least 30 days, and providing a sufficient number of copies of the document to the State Clearinghouse for review and comment by state agencies.

A32) Pursuant to Public Resources Code Section 21091, subdivision (c), if a draft environmental impact report, proposed negative declaration, or proposed mitigated negative declaration is submitted to the State Clearinghouse for review

and the period of review by the State Clearinghouse is longer than the public review period established pursuant to subdivision (a) or (b), whichever is applicable, providing a public review period at least as long as the period of review by the State Clearinghouse.

A33) Pursuant to Public Resources Code Section 21091, subdivision (d)(1), considering any comments received on a draft environmental impact report, proposed negative declaration, or proposed mitigated negative declaration if those comments are received within the public review period.

A34) Pursuant to Public Resources Code Section 21091, subdivision (d)(2)(A), evaluating any comments on environmental issues that are received from persons who have reviewed the draft and preparing a written response to those comments.

A35) Pursuant to Public Resources Code Section 21091, subdivision (e)(3), when necessary, requesting a shortened review period in writing by the decision making body to the Office of Planning and Research.

A36) Pursuant to Public Resources Code Section 21092, subdivision (a), providing notice of preparing an environmental impact report or a negative declaration or making a determination pursuant to Section 21157 within a reasonable period of time prior to certification of the environmental impact report or adoption of the negative declaration.

A37) Pursuant to Public Resources Code Section 21092, subdivision (b)(1), specifying

in the notice the period during which comments will be received on the draft environmental report or negative declaration, and including the date, time, and place of any public meetings or hearings on the proposed project, a brief description of the proposed project and its location, the significant effects on the environment, if any, anticipated as a result of the project, and the address where copies of the draft environmental impact report or negative declaration, and all documents referenced in the draft environmental impact report or negative declaration, are available for review. Conducting public meetings or hearings on the proposed project.

A38) Pursuant to Public Resources Code Section 21092, subdivision (b)(3), giving the notice required by this section to the last known name and address of all organizations and individuals who have previously requested notice and be given by at least one of the following procedures:

(A) Publication, no fewer times than required by Section 6061 of the Government Code, in a newspaper of general circulation in the area affected by the proposed project. If more than one area will be affected, the notice shall be published in the newspaper of largest circulation from among the newspapers of general circulation in those areas.

(B) Posting of notice on- and off-site in the area where the project is to be located.

(C) Direct mailing to the owners and occupants of contiguous property

shown on the latest equalized assessment roll.

A39) Pursuant to Public Resources Code Section 21092.1, when significant new information is added to an environmental impact report after notice has been given pursuant to Section 21092, and consultation has occurred pursuant to Sections 21104 and 21153, but prior to certification, giving notice again pursuant to Section 21092, and consulting again pursuant to Sections 21104 and 21153 before certifying the environmental impact report.

A40) Pursuant to Public Resources Code Section 21092.2, mailing the notices required pursuant to Sections 21080.4, 21083.9, 21092, 21108, and 21152 to any person who has filed a written request for notices with either the clerk of the governing body or, if there is no governing body, the director of the agency.

A41) Pursuant to Public Resources Code Section 21092.3, posting the notices required pursuant to Sections 21080.4 and 21092 for an environmental impact report in the office of the county clerk of each county in which the project will be located. The notice required pursuant to Section 21092 for a negative declaration shall be so posted for a period of 20 days, unless otherwise required by law to be posted for 30 days.

A42) Pursuant to Public Resources Code Section 21092.4, subdivision (a), for a project of statewide, regional, or area wide significance, consulting with transportation planning agencies and public agencies which have transportation facilities within their jurisdictions which could be affected by the project for the

purpose of obtaining information concerning the project's effect on major local arterials, public transit, freeways, highways, and rail transit service within the jurisdiction of a transportation planning agency or a public agency which is consulted by the lead agency. Notifying a transportation planning agency or public agency which provides information to the lead agency of, and providing copies of, environmental documents pertaining to the project.

A43) Pursuant to Public Resources Code Section 21092.5, subdivision (a), at least 10 days prior to certifying an environmental impact report, providing a written proposed response to comments made by that agency which conform with the requirements of this division.

A44) Pursuant to Public Resources Code Section 21092.5, subdivision (b), notifying any public agency which comments on a negative declaration, of the public hearing or hearings, if any, on the project for which the negative declaration was prepared.

A45) Pursuant to Public Resources Code Section 21092.6, subdivision (a), consulting the lists compiled pursuant to Section 65962.5 of the Government Code to determine whether the project and any alternatives are located on a site which is included on any list.

A46) Pursuant to Public Resources Code Section 21094, subdivision (a), where a prior environmental impact report has been prepared and certified for a program, plan, policy, or ordinance, for a later project that meets the requirements of this

section, examining significant effects of the later project upon the environment by using a tiered environmental impact report.

A47) Pursuant to Public Resources Code Section 21094, subdivision (c), for purposes of compliance with this section, preparing an initial study to assist in making the determinations required by this section, which analyze whether the later project may cause significant effects on the environment that were not examined in the prior environmental impact report.

A48) Pursuant to Public Resources Code Section 21094, subdivision (e), when tiering is used pursuant to this section, referring to the prior environmental impact report and stating where a copy of the prior environmental impact report may be examined.

A49) Pursuant to Public Resources Code Section 21100, subdivision (a), preparing , or causing to be prepared by contract, and certifying the completion of, an environmental impact report on any project proposed to be carried out or approved that may have a significant effect on the environment.

A50) Pursuant to Public Resources Code Section 21100, subdivision (b), including in any environmental impact report a detailed statement setting forth all of the following:

(1) All significant effects on the environment of the proposed project.

(2) In a separate section:

(A) Any significant effect on the environment that cannot be avoided

if the project is implemented.

(B) Any significant effect on the environment that would be irreversible if the project is implemented.

(3) Mitigation measures proposed to minimize significant effects on the environment, including, but not limited to, measures to reduce the wasteful, inefficient, and unnecessary consumption of energy.

(4) Alternatives to the proposed project.

(5) The growth-inducing impact of the proposed project.

A51) Pursuant to Public Resources Code Section 21100, subdivision (c), including in each environmental impact report a statement briefly indicating the reasons for determining that various effects on the environment of a project are not significant and consequently have not been discussed in detail in the environmental impact report.

A52) Pursuant to Public Resources Code Section 21102, accompanying each request for funds for any project, other than a project involving only feasibility or planning studies for possible future actions, with an environmental impact report.

A53) Pursuant to Public Resources Code Section 21102, including environmental factors in feasibility and planning studies exempted by this section from the preparation of an environmental impact report.

A54) Pursuant to Public Resources Code Section 21150, including a detailed statement setting forth the matters specified in Section 21100 when requesting

allocation of any funds, other than funds solely for projects involving only feasibility or planning studies for possible future actions, for any project which may have a significant effect on the environment.

A55) Pursuant to Public Resources Code Section 21151, subdivision (a), preparing, or causing to be prepared by contract, and certifying the completion of, an environmental impact report on any project intended to be carried out or approved which may have a significant effect on the environment.

A56) Pursuant to Public Resources Code Section 21151, subdivision (c), if a nonelected decision making body certifies an environmental impact report, approves a negative declaration or mitigated negative declaration, or determines that a project is not subject to this division, responding to any appeal of that certification, approval, or determination in any hearing or proceeding before the elected decision making body.

A57) Pursuant to Public Resources Code Section 21151.2, before acquiring title to property for a new school site or for an addition to a present school site, giving notice in writing to the planning commission having jurisdiction of the proposed acquisition.

A58) Pursuant to Public Resources Code Section 21151.8, subdivision (a), before approving an environmental impact report or negative declaration for any project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district, making sure that all of the following occur:

(1) The environmental impact report or negative declaration includes information which is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

(A) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

(B) A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) A site which contains one or more pipelines, situated underground or above ground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

(2) Notifying in writing and consulting with the administering agency in which the proposed schoolsite is located, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed schoolsite which might reasonably be anticipated to emit hazardous emissions or handle hazardous or

acutely hazardous materials, substances, or waste. The notification shall include a list of the locations for which information is sought.

(3) The governing board of the school district makes one of the following written findings:

(A) Consultation identified no such facilities specified in paragraph (2).

(B) The facilities specified in paragraph (2) exist, but one of the following conditions applies:

(i) The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes such a finding, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

(4) Each administering agency, air pollution control district, or air quality

management district receiving written notification to identify facilities pursuant to paragraph (2) has provided the requested information and provide a written response to the lead agency within 30 days of receiving the notification.

A59) Pursuant to Public Resources Code Section 21152, subdivision (a), whenever a local agency approves or determines to carry out a project which is subject to this division, it shall file notice of the approval or the determination within five working days after the approval or determination becomes final, with the county clerk of each county in which the project will be located. The notice shall indicate the determination of the local agency whether the project will, or will not, have a significant effect on the environment and shall indicate whether an environmental impact report has been prepared pursuant to this division. The notice shall also include certification that the final environmental impact report, if one was prepared, together with comments and responses, is available to the general public. Making the notice of the approval or the determination available to the public.

A60) Pursuant to Public Resources Code Section 21152, subdivision (b), whenever a determination is made that a project is not subject to this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085 or 21172, and a local agency approves or determines to carry out the project, it, or the person specified in subdivision (b) or (c) of Section 21065, filing a notice of the determination with the county clerk of each county in which the project will be

located. Any notice filed pursuant to this subdivision by a person specified in subdivision (b) or (c) of Section 21065 shall have a certificate of determination attached to it issued by the local agency responsible for making the determination that the project is not subject to this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085 or 21172.

A61) Pursuant to Public Resources Code Section 21152, subdivision (c), making all notices filed pursuant to this section available for public inspection, and posted within 24 hours of receipt in the office of the county clerk and retaining the notice for not less than nine months.

A62) Pursuant to Public Resources Code Section 21153, subdivision (a), prior to completing an environmental impact report, consulting with, and obtaining comments from, each responsible agency, any public agency that has jurisdiction by law with respect to the project, and any city or county that borders on a city or county within which the project is located unless otherwise designated annually by agreement with the local lead agency and the city or county, and consulting with any person who has special expertise with respect to any environmental impact involved.

A63) Pursuant to Public Resources Code Section 21153, subdivision (b), in the case of a project described in subdivision (a) of Section 21065, providing for early consultation to identify the range of actions, alternatives, mitigation measures, and significant effects to be analyzed in depth in the environmental impact report.

A64) Pursuant to Public Resources Code Section 21154, whenever any state agency, board, or commission issues an order which requires a district or county office to carry out a project which may have a significant effect on the environment, limiting any environmental impact report prepared to consideration of those factors and alternatives which will not conflict with such order.

A65) Pursuant to Public Resources Code Section 21157, subdivision (a), preparing a master environmental impact report when required or appropriate.

A66) Pursuant to Public Resources Code Section 21157, subdivision (a)(2), preparing a master environmental impact report when planning a project that consists of smaller individual projects which will be carried out in phases.

A67) Pursuant to Public Resources Code Section 21157, subdivision (b), when preparing a master environmental impact report, including in the document all of the following:

(1) A detailed statement as required by Section 21100.

(2) A description of anticipated subsequent projects that would be within the scope of the master environmental impact report, that contains sufficient information with regard to the kind, size, intensity, and location of the subsequent projects, including, but not limited to, all of the following:

(A) The specific type of project anticipated to be undertaken.

(B) The maximum and minimum intensity of any anticipated subsequent project.

(C) The anticipated location and alternative locations for any development projects.

(D) A capital outlay or capital improvement program, or other scheduling or implementing device that governs the submission and approval of subsequent projects.

(3) A description of potential impacts of anticipated subsequent projects for which there is not sufficient information reasonably available to support a full assessment of potential impacts in the master environmental impact report.

A68) Pursuant to Public Resources Code Section 21157.1, when preparing and certifying a master environmental impact report, allowing for the limited review of subsequent projects that were described in the master environmental impact report as being within the scope of the report, in accordance with the following requirements:

(a) The lead agency for a subsequent project shall be the lead agency or any responsible agency identified in the master environmental impact report.

(b) The lead agency shall prepare an initial study on any proposed subsequent project. This initial study shall analyze whether the subsequent project may cause any significant effect on the environment that was not examined in the master environmental impact report and whether the subsequent project was described in the master environmental impact report as being within the scope of the report.

(c) If the lead agency, based on the initial study, determines that a proposed subsequent project will have no additional significant effect on the environment, as defined in subdivision (d) of Section 21158, that was not identified in the master environmental impact report and that no new or additional mitigation measures or alternatives may be required, making a written finding based upon the information contained in the initial study that the subsequent project is within the scope of the project covered by the master environmental impact report. Prior to approving or carrying out the proposed subsequent project, providing notice of this fact pursuant to Section 21092 and incorporating all feasible mitigation measures or feasible alternatives set forth in the master environmental impact report which are appropriate to the project. Whenever a lead agency approves or determines to carry out any subsequent project pursuant to this section, it shall file a notice pursuant to Section 21108 or 21152.

(d) Where findings cannot be made as required in subdivision (c), the lead agency shall prepare, pursuant to Section 21157.7, either a mitigated negative declaration or environmental impact report.

A69) Pursuant to Public Resources Code Section 21157.5, subdivision (a), preparing a proposed mitigated negative declaration for any proposed subsequent project if both of the following occur:

(1) An initial study has identified potentially new or additional significant effects on the environment that were not analyzed in the master environmental

impact report.

(2) Feasible mitigation measures or alternatives will be incorporated to revise the proposed subsequent project, before the negative declaration is released for public review, in order to avoid the effects or mitigate the effects to a point where clearly no significant effect on the environment will occur.

A70) Pursuant to Public Resources Code Section 21157.5, subdivision (b), if there is substantial evidence in light of the whole record that a proposed subsequent project may have a significant effect on the environment and a mitigated negative declaration is not prepared, the lead agency shall prepare an environmental impact report or a focused environmental impact report pursuant to Section 21158.

A71) Pursuant to Public Resources Code Section 21158, subdivision (a), incorporating by reference in a focused environmental impact report the master environmental impact report and analyzing only the subsequent project's additional significant effects on the environment, as defined in subdivision (d), and any new or additional mitigation measures or alternatives that were not identified and analyzed by the master environmental impact report.

A72) Pursuant to Public Resources Code Section 21158, subdivision (c), analyzing, in a focused environmental impact report on any subsequent project, any significant effects on the environment where substantial new or additional information shows that the adverse environmental impact may be more significant than was

described in the master environmental impact report. The substantial new or additional information may also show that mitigation measures or alternatives identified in the master environmental impact report, which were previously determined to be infeasible, are feasible and will avoid or reduce the significant effects on the environment of the subsequent project to a level of insignificance.

A73) Pursuant to Public Resources Code Section 21161, upon completion of an environmental impact report, causing a notice of completion of that report to be filed with the Office of Planning and Research which shall briefly identify the project and shall indicate that an environmental impact report has been prepared.

A74) Pursuant to Public Resources Code Section 21165, when a project is to be carried out or approved by two or more public agencies, making the determination of whether the project may have a significant effect on the environment and preparing, or causing to be prepared by contract, the environmental impact report for the project, if such a report is required by this division.

A75) Pursuant to Public Resources Code Section 21166, when an environmental impact report has been prepared for a project pursuant to this division, preparing a subsequent or supplemental environmental impact report when one or more of the following events occurs:

(a) Substantial changes are proposed in the project which will require major revisions of the environmental impact report.

(b) Substantial changes occur with respect to the circumstances under which the project is being undertaken which will require major revisions in the environmental impact report.

(c) New information, which was not known and could not have been known at the time the environmental impact report was certified as complete, becomes available.

A76) Pursuant to Public Resources Code Section 21167, responding to legal actions or proceedings to attack, review, set aside, void, or annul acts or decisions on the grounds of noncompliance with this division.

A77) Pursuant to Public Resources Code Section 21167.6, subdivision (b)(1), preparing and certifying the record of proceedings not later than 60 days from the date that the request specified in subdivision (a) was served upon the public agency. Upon certification, lodging a copy of the record of proceedings with the court and serving on the parties notice that the record of proceedings has been certified and lodged with the court. Subdivision (e) provides that the record of proceedings shall include, but is not limited to, all of the following items:

(1) All project application materials.

(2) All staff reports and related documents prepared by the respondent public agency with respect to its compliance with the substantive and procedural requirements of this division and with respect to the action on the project.

(3) All staff reports and related documents prepared by the respondent

public agency and written testimony or documents submitted by any person relevant to any findings or statement of overriding considerations adopted by the respondent agency pursuant to this division.

(4) Any transcript or minutes of the proceedings at which the decision making body of the respondent public agency heard testimony on, or considered any environmental document on, the project, and any transcript or minutes of proceedings before any advisory body to the respondent public agency that were presented to the decision making body prior to action on the environmental documents or on the project.

(5) All notices issued by the respondent public agency to comply with this division or with any other law governing the processing and approval of the project.

(6) All written comments received in response to, or in connection with, environmental documents prepared for the project, including responses to the notice of preparation.

(7) All written evidence or correspondence submitted to, or transferred from, the respondent public agency with respect to compliance with this division or with respect to the project.

(8) Any proposed decisions or findings submitted to the decision making body of the respondent public agency by its staff, or the project proponent, project opponents, or other persons.

(9) The documentation of the final public agency decision, including the final environmental impact report, mitigated negative declaration, or negative declaration, and all documents, in addition to those referenced in paragraph (3), cited or relied on in the findings or in a statement of overriding considerations adopted pursuant to this division.

(10) Any other written materials relevant to the respondent public agency's compliance with this division or to its decision on the merits of the project, including the initial study, any drafts of any environmental document, or portions thereof, that have been released for public review, and copies of studies or other documents relied upon in any environmental document prepared for the project and either made available to the public during the public review period or included in the respondent public agency's files on the project, and all internal agency communications, including staff notes and memoranda related to the project or to compliance with this division.

(11) The full written record before any inferior administrative decision making body whose decision was appealed to a superior administrative decision making body prior to the filing of litigation.

A78) Pursuant to Public Resources Code Section 21167.6.5, subdivision (b), providing a petitioner or plaintiff, not later than 10 business days following service of the petition or complaint, with a list of responsible agencies and any public agency having jurisdiction over a natural resource affected by the project.

A79) Pursuant to Public Resources Code Section 21167.8, subdivision (a), filing with the court a notice setting forth the time and place at which all parties shall meet and attempt to settle the litigation.

A80) Pursuant to Public Resources Code Section 21167.8, subdivision (b), meeting and conferring with the other parties regarding anticipated issues to be raised in the litigation and attempting in good faith to settle the litigation and the dispute which forms the basis of the litigation at the time and place specified in the notice filed with the court.

A81) Pursuant to Public Resources Code Section 21167.8, subdivision (d), participating in further settlement conferences when the court, in its discretion or at the request of any party, schedules a further settlement conference before a judge of the superior court.

A82) Pursuant to Public Resources Code Section 21167.8, subdivision (f), not later than 10 days from the date on which the respondent or real party in interest has been served with the statement of issues from the petitioner or plaintiff, filing and serving on all other parties a statement of issues which that party intends to raise in any brief or at any hearing or trial.

A83) Pursuant to Public Resources Code Section 21168.9, complying with orders that a court may make as a result of a trial, hearing or remand from an appellate court, including, in subdivision (a)(3), a mandate that a public agency take specific action as may be necessary to bring the determination, finding, or

decision into compliance with this division.

Part B - Title 5, California Code of Regulations

B1) Pursuant to Title 5, California Code of Regulations, Section 14011, subdivision (h), preparing an environmental impact report, or negative declaration in compliance with the Environmental Quality Act, Public Resources Code, Division 13, (commencing with Section 21000 with particular attention to Section 21151.8). Pursuant to subdivision (k), following the recommendations of the State Superintendent of Public Instruction report based upon the Department of Transportation, Division of Aeronautics, findings, if the proposed site is within two miles of the center line of an airport runway or proposed runway as required by Education Code Section 17215. Pursuant to subdivision (l), following the standards for school site selection in Section 14010 of this article. Pursuant to subdivision (m), conducting a public hearing, as required in Education Code Section 17211, to evaluate the property using the standards described in Section 14010. Pursuant to subdivision (n), submitting the request for exemption from a standard in Section 14010 of this article, with a description of the mitigation that overrides the standard, to the California Department of Education. Pursuant to subdivision (o), certifying there are no available alternative school district-owned sites for the project deemed usable for school purposes by the California Department of Education or certify that the school district intends to sell an available alternative school district-owned site and use the proceeds from the

sale for the purchase of the new school site.

B2) Pursuant to Title 5, California Code of Regulations, Section 57121, subdivision (b), (for community college districts) including, in proposals for initial construction of facilities for a new campus, a long-range plan for physical development approved by the district governing board which shows the intended use of all portions of the land and approximate location of buildings and facilities.

B3) Pursuant to Title 5, California Code of Regulations, Section 57121, subdivision (c), (for community college districts) submitting an Initial Study, pursuant to section 15080, Title 14, California Administrative Code, to the Chancellor's office concurrent with other required information.

B4) Pursuant to Title 5, California Code of Regulations, Section 57121, subdivision (d), (for community college districts) submitting copies of the:

(a) Finding of Categorical Exemption (section 15023, Title 14, California Administrative Code);

(b) Negative Declaration (section 15083, Title 14, California Administrative Code); or

(c) Notice of Completion (section 15085(c), Title 14, California Administrative Code), whichever is appropriate.

B5) Pursuant to Title 5, California Code of Regulations, Section 57121, subdivision (e), (for community college districts) submitting a copy of the findings of Categorical Exemption or Notice of Determination (section 15085(g), Title 14,

California Administrative Code), whichever is appropriate, to the Chancellor's office concurrently with plans submitted for approval in accordance with section 81837 (approval by board of governors) of the Education Code.

PART C - TITLE 14, CALIFORNIA CODE OF REGULATIONS

Article 1. General

C1) Pursuant to Title 14, California Code of Regulations, Section 15002, subdivision (e), complying with all CEQA procedures when carrying out an activity subject to its provisions, including:

(a) Preparing an EIR when the district finds substantial evidence that the project may have a significant effort on the environment.

(b) Preparing a "Negative Declaration" instead of an EIR when the district finds that there is no substantial evidence that a project may have a significant environmental effect.

(c) Soliciting and responding to comments from the public and from other agencies concerned with the project.

C2) Pursuant to Title 14, California Code of Regulations, Section 15002, subdivision (k) taking at least the following three steps in deciding which document to prepare for a project subject to CEQA:

(a) Examining the project to determine whether the project is subject to CEQA at all. If the project is exempt, the process does not need to proceed any farther. The agency may then prepare a notice of exemption.

(b) If the project is not exempt, taking the second step and conducting an initial study to determine whether the project may have a significant effect on the environment.

(c) If the initial study shows that the project may have a significant effect, the lead agency takes the third step and prepares an EIR.

C3) Pursuant to Title 14, California Code of Regulations, Section 15004, subdivision (b), preparing an EIR or Negative Declaration as early as feasible in the planning process. Pursuant to subdivision (b)(1), incorporating environmental considerations into project conceptualization, design and planning prior to acquisition of a site for a public project. Subdivision (c) requires that the environmental document preparation and review be coordinated in a timely fashion with existing planning, review, and project approval processes being used by the district.

Article 2. General Responsibilities.

C4) Pursuant to Title 14, California Code of Regulations, Section 15020, complying with CEQA and these Guidelines.

C5) Pursuant to Title 14, California Code of Regulations, Section 15021, subdivision (a), avoiding or minimizing environmental damage where feasible. In regulating public or private activities, giving major consideration to preventing environmental damage.

C6) Pursuant to Title 14, California Code of Regulations, Section 15021, subdivision

(d), balancing a variety of public objectives, including economic, environmental, and social factors.

C7) Pursuant to Title 14, California Code of Regulations, Section 15022 adopting objectives, criteria, and specific procedures consistent with CEQA and these Guidelines for administering its responsibilities under CEQA, including the orderly evaluation of projects and preparation of environmental documents. The implementing procedures should at least contain provisions for:

(a) Identifying the activities that are exempt from CEQA.

(b) Conducting initial studies.

(c) Preparing negative declarations.

(d) Preparing draft and final EIRs.

(e) Consulting with and obtaining comments from other public agencies and members of the public with regard to the environmental effects of projects.

(f) Assuring adequate opportunity and time for public review and comment on the Draft EIR of Negative Declaration.

(g) Evaluating and responding to comments received on environmental documents.

(h) Assigning responsibility for determining the adequacy of an EIR or negative declaration.

(i) Reviewing and considering environmental documents by the person or decision making body who will approve or disapprove a project.

(j) Filing documents required or authorized by CEQA and these Guidelines.

(k) Providing adequate comments on environmental documents which are submitted to the public agency for review.

(l) Assigning responsibility for specific functions to particular units of the public agency.

(m) Providing time periods for performing functions under CEQA.

C8) Pursuant to Title 14, California Code of Regulations, Section 15022, subdivision (c), revising implementing procedures to conform to amendments to these guidelines within 120 days after the effective date of the amendments.

C9) Pursuant to Title 14, California Code of Regulations, Section 15025, subdivision (b), performing the following functions, without delegation:

(a) Reviewing and considering a final EIR or approving a negative declaration prior to approving a project.

(b) The making of findings as required by Sections 15091 and 15093.

Article 3. Authorities Granted to Public Agencies by CEQA

C10) Pursuant to Title 14, California Code of Regulations, Section 15041, having authority to require feasible changes in any or all activities involved in the project in order to substantially lessen or avoid significant effects on the environment, consistent with applicable constitutional requirements such as the "nexus" and "rough proportionality" standards established by case law.

C11) Pursuant to Title 14, California Code of Regulations, Section 15042, avoiding one

or more significant effects on the environment that would occur if the project were approved as proposed.

C12) Pursuant to Title 14, California Code of Regulations, Section 15043, approving a project even though the project would cause a significant effect on the environment if the agency makes a fully informed and publicly disclosed decision that:

1) There is no feasible way to lessen or avoid the significant effect; and

2) Specifically identified expected benefits from the project outweigh the policy of reducing or avoiding significant environmental impacts of the project.

Article 4. Lead Agency

C13) Pursuant to Title 14, California Code of Regulations, Section 15050, subdivision (a), being responsible for preparing an EIR or negative declaration for the project.

C14) Pursuant to Title 14, California Code of Regulations, Section 15053, subdivision (a), if there is a dispute over which of several agencies should be the lead agency for a project, the disputing agencies should consult with each other in an effort to resolve the dispute prior to submitting it to OPR.

Article 5. Preliminary Review of Projects and Conduct of Initial Study

C15) Pursuant to Title 14, California Code of Regulations, Section 15060, subdivision (c), first determining whether an activity is subject to CEQA before conducting an initial study. An activity is not subject to CEQA if:

(a) The activity does not involve the exercise of discretionary powers by a public agency;

(b) The activity will not result in a direct or reasonably foreseeable indirect physical change in the environment; or

(c) The activity is not a project as defined in Section 15378.

C16) Pursuant to Title 14, California Code of Regulations, Section 15060, subdivision (d), if the lead agency can determine that an EIR will clearly be required for a project, skipping further initial review of the project and begin working directly on the EIR process.

C17) Pursuant to Title 14, California Code of Regulations, Section 15061, subdivision (a), once a lead agency has determined that an activity is a project subject to CEQA, determining whether the project is exempt from CEQA.

C18) Pursuant to Title 14, California Code of Regulations, Section 15061, subdivision (c), including in its implementing procedures a listing of the projects often handled by the agency that the agency has determined to be exempt.

C19) Pursuant to Title 14, California Code of Regulations, Section 15062, subdivision (a), upon deciding that a project is exempt from CEQA and the public agency approves or determines to carry out the project, filing a notice of exemption. The notice shall be filed, if at all, after approval of the project, and shall include a brief description of the project, a finding that the project is exempt from CEQA, and a brief statement of reasons to support the finding.

C20) Pursuant to Title 14, California Code of Regulations, Section 15062, subdivision (c), when a public agency approves an applicant's project, either the agency or the applicant may file a notice of exemption. When a local agency files this notice, filing the notice of exemption with the county clerk of each county in which the project will be located, making available copies of the notices for public inspection, retaining them for not less than 9 months.

C21) Pursuant to Title 14, California Code of Regulations, Section 15063, subdivision (a), following preliminary review, conducting an initial study to determine if the project may have a significant effect on the environment.

C22) Pursuant to Title 14, California Code of Regulations, Section 15063, subdivision (b):

(a) If the agency determines that there is substantial evidence that any aspect of the project, either individually or cumulatively, may cause a significant effect on the environment, regardless of whether the overall effect of the project is adverse or beneficial, doing one of the following:

(i) preparing an EIR, or

(ii) using a previously prepared EIR, or

(iii) determining which of a project's effects were adequately examined by an earlier EIR or negative declaration.

(b) Preparing a negative declaration if there is no substantial evidence that the project or any of its aspects may cause a significant effect on the

environment.

C23) Pursuant to Title 14, California Code of Regulations, Section 15063, subdivision (d), containing in an initial study:

(a) A description of the project including the location of the project;

(b) An identification of the environmental setting:

(c) An identification of environmental effects by use of a checklist, matrix, or other method, provided that entries on a checklist or other form are briefly explained to indicate that there is some evidence to support the entries.

(d) A discussion of ways to mitigate the significant effects identified, if any;

(e) An examination of whether the project would be consistent with existing zoning, plans, and other applicable land use controls;

(f) The name of the person or persons who prepared or participated in the initial study.

C24) Pursuant to Title 14, California Code of Regulations, Section 15063, subdivision (g), as soon as a lead agency has determined that an initial study will be required for the project, consulting informally with all responsible agencies and all trustee agencies responsible for resources affected by the project to obtain the recommendations of those agencies as to whether an EIR or a negative declaration should be prepared.

C25) Pursuant to Title 14, California Code of Regulations, Section 15064, subdivision (a)(1), if there is substantial evidence, in light of the whole record before a lead

agency, that a project may have a significant effect on the environment, preparing a draft EIR.

C26) Pursuant to Title 14, California Code of Regulations, Section 15064, subdivision (a)(2), when a final EIR identifies one or more significant effects, making a finding under Section 15091 for each significant effect and, when necessary, making a statement of overriding consideration under Section 15093 for the project.

C27) Pursuant to Title 14, California Code of Regulations, Section 15064, subdivision (c), considering the views held by members of the public in all areas affected in determining whether an effect will be adverse or beneficial.

C28) Pursuant to Title 14, California Code of Regulations, Section 15064, subdivision (d), considering direct physical changes in the environment which may be caused by the project and reasonablely foreseeable indirect physical changes in the environment which may be caused by the project.

C29) Pursuant to Title 14, California Code of Regulations, Section 15064, subdivision (g), if there is disagreement among expert opinion supported by facts over the significance of an effect on the environment, treating the effect as significant and preparing an EIR.

C30) Pursuant to Title 14, California Code of Regulations, Section 15064, subdivision (i):

(a) Considering whether the cumulative impact is significant and whether the effects of the project are cumulatively considerable when assessing

whether a cumulative effect requires an EIR .

(b) Determining in an initial study that a project's contribution to a significant cumulative impact will be rendered less than cumulatively considerable and thus is not significant.

(c) Determining that a project's incremental contribution to a cumulative effect is not cumulatively considerable if the project will comply with the requirements in a previously approved plan or mitigation program which provides specific requirements that will avoid or substantially lessen the cumulative problem within the geographic area in which the project is located.

(d) Determining that the incremental impacts of a project are not cumulatively considerable when they are so small that they make only a de minimis contribution to a significant cumulative impact caused by other projects that would exist in the absence of the proposed project.

C31) Pursuant to Title 14, California Code of Regulations, Section 15064.5, subdivision (b), identifying potentially feasible measures to mitigate significant adverse changes in the significance of an historical resource and ensuring that any adopted measures to mitigate or avoid significant adverse changes are fully enforceable through permit conditions, agreements, or other measures.

C32) Pursuant to Title 14, California Code of Regulations, Section 15064.5, subdivision (f), making provisions for historical or unique archaeological resources

accidentally discovered during construction.

C33) Pursuant to Title 14, California Code of Regulations, Section 15064.7, subdivision (b), adopting by resolution, rule, or regulation; developing through a public review process; and being supported by substantial evidence, thresholds of significance for general use as part of the environmental review process.

C34) Pursuant to Title 14, California Code of Regulations, Section 15065, finding that a project may have a significant effect on the environment and thereby preparing an EIR for the project where any of the following conditions occur:

(a) The project has the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of an endangered, rare or threatened species, or eliminate important examples of the major periods of California history or prehistory.

(b) The project has the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals.

(c) The project has possible environmental effects which are individually limited by cumulatively considerable effects.

(d) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

Article 6. Negative Declaration Process

C35) Pursuant to Title 14, California Code of Regulations, Section 15070, preparing, or arranging preparation of, a proposed negative declaration or mitigated negative declaration for a project subject to CEQA when:

(a) The initial study shows that there is no substantial evidence, in light of the whole record before the agency, that the project may have a significant effect on the environment, or

(b) The initial study identifies potentially significant effects, but

(i) Revisions in the project plans or proposals made by or agreed to by the applicant before a proposed mitigated negative declaration and initial study are released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur, and

(ii) There is no substantial evidence, in light of the whole record before the agency, that the project as revised may have a significant effect on the environment.

C36) Pursuant to Title 14, California Code of Regulations, Section 15071, including in a negative declaration circulated for public review:

(a) A brief description of the project, including a commonly used name for the project, if any:

(b) The location of the project, preferably shown on a map, and the name of

the project proponent;

(c) A proposed finding that the project will not have a significant effect on the environment;

(d) An attached copy of the initial study documenting reasons to support the finding; and

(e) Mitigation measures, if any, included in the project to avoid potentially significant effects.

C37) Pursuant to Title 14, California Code of Regulations, Section 15072, subdivision (a), providing a notice of intent to adopt a negative declaration or mitigated negative declaration to the public, responsible agencies, trustee agencies, and the county clerk of each county within which the proposed project is located, sufficiently prior to adopting the negative declaration or mitigated negative declaration to allow the public and agencies the review period provided under Section 15105.

C38) Pursuant to Title 14, California Code of Regulations, Section 15072, subdivision (b), mailing a notice of intent to adopt a negative declaration or mitigated negative declaration to the last known name and address of all organizations and individuals who have previously requested such notice in writing and giving notice of intent to adopt a negative declaration or mitigated negative declaration by at least one of the following procedures to allow the public the review period provided under Section 15105:

(a) Publication at least one time by the lead agency in a newspaper of general circulation in the area affected by the proposed project.

(b) Posting of notice by the lead agency on and off site in the area where the project is to be located.

(c) Direct mailing to the owners and occupants of property contiguous to the project.

C39) Pursuant to Title 14, California Code of Regulations, Section 15072, subdivision (e), for a project of statewide, regional, or area wide significance, providing notice to transportation planning agencies and public agencies which have transportation facilities within their jurisdictions which could be affected by the project as specified in Section 21092.4(a) of the Public Resources Code.

C40) Pursuant to Title 14, California Code of Regulations, Section 15072, subdivision (f), including in a notice of intent to adopt a negative declaration or mitigated negative declaration the following:

(a) A brief description of the proposed project and its location.

(b) The starting and ending dates for the review period during which the lead agency will receive comments on the proposed negative declaration or mitigated negative declaration.

(c) The date, time, and place of any scheduled public meetings or hearings to be held by the lead agency on the proposed project, when known to the lead agency at the time of notice.

(d) The address or addresses where copies of the proposed negative declaration or mitigated negative declaration including the revisions developed under Section 15050(b) and all documents referenced in the proposed negative declaration or mitigated negative declaration are available for review.

(e) The presence of the site on any of the lists enumerated under Section 65962.5 of the Government Code including, but not limited to lists of hazardous waste facilities, land designated as hazardous waste property, and hazardous waste disposal sites, and the information in the Hazardous Waste and Substances Statement required under subsection (f) of that section.

(f) Other information specifically required by statute or regulation for a particular project or type of project.

C41) Pursuant to Title 14, California Code of Regulations, Section 15073, subdivision (a), providing a public review period pursuant to Section 15105 of not less than 20 days.

C42) Pursuant to Title 14, California Code of Regulations, Section 15073, subdivision (c), attaching a copy of the proposed negative declaration or mitigated negative declaration and the initial study to the notice of intent to adopt the proposed declaration that is sent to every responsible agency and trustee agency concerned with the project and every other public agency with jurisdiction by law

over resources affected by the project.

C43) Pursuant to Title 14, California Code of Regulations, Section 15073, subdivision (d), sending copies of the proposed negative declaration or mitigated negative declaration to the State Clearinghouse for distribution to the state agencies, where one or more state agencies will be a responsible agency or a trustee agency or will exercise jurisdiction by law over natural resources affected by the project, or where the project is of statewide, regional, or area wide environmental significance.

C44) Pursuant to Title 14, California Code of Regulations, Section 15073, subdivision (e), notifying, in writing, any public agency which comments on a proposed negative declaration or mitigated negative declaration of any public hearing to be held for the project for which the document was prepared.

C45) Pursuant to Title 14, California Code of Regulations, Section 15073.5, subdivision (a), re-circulating a negative declaration when the document must be substantially revised after public notice of its availability has previously been given pursuant to Section 15072, but prior to it adoption.

C46) Pursuant to Title 14, California Code of Regulations, Section 15073.5, subdivision (d), preparing a draft EIR and certifying a final EIR prior to approving the project, if during the negative declaration process there is substantial evidence in light of the whole record that the project, as revised, may have a significant effect on the environment which cannot be mitigated or avoided.

C47) Pursuant to Title 14, California Code of Regulations, Section 15074, subdivision (b), considering, prior to approving a project, the proposed negative declaration together with any comments received during the public review process.

C48) Pursuant to Title 14, California Code of Regulations, Section15074, subdivision (c), specifying the location and custodian of the documents or other materials which constitute the record of proceedings upon which its decision is based, when adopting a mitigated negative declaration or mitigated negative declaration.

C49) Pursuant to Title 14, California Code of Regulations, Section15074, subdivision (d), adopting a program for reporting on or monitoring the changes which it has either required in the project or made a condition of approval to mitigate or avoid significant environmental effects, when adopting a mitigated negative declaration.

C50) Pursuant to Title 14, California Code of Regulations, Section 15074.1, subdivision (b), prior to deleting and substituting for a mitigation measure, doing both of the following:

(a) Holding a public hearing on the matter.

(b) Adopting a written finding that the new measure is equivalent or more effective in mitigating or avoiding potential significant effects and that it in itself will not cause any potentially significant effect on the environment.

C51) Pursuant to Title 14, California Code of Regulations, Section 15075, subdivision (a), filing a notice of determination, after deciding to carry out or approve a project for which a negative declaration or mitigated negative declaration has been

approved; and for projects with phases, filing a notice of determination after deciding to carry out or approve each phase.

C52) Pursuant to Title 14, California Code of Regulations, Section 15075, subdivision (b), include in the notice of determination:

(a) An identification of the project including its common name where possible, and its location.

(b) A brief description of the project.

(c) The date on which the agency approved the project.

(d) The determination of the agency that the project will not have a significant effect on the environment.

(e) A statement that a negative declaration or a mitigated negative declaration has been prepared pursuant to the provisions of CEQA.

(f) The address where a copy of the negative declaration or mitigated negative declaration may be examined.

C53) Pursuant to Title 14, California Code of Regulations, Section 15075, subdivision (c), filing a notice of determination with OPR.

Article 7. EIR process

C54) Pursuant to Title 14, California Code of Regulations, Section 15081.5, subdivision (a), preparing, or having prepared, an EIR for specified projects.

C55) Pursuant to Title 14, California Code of Regulations, Section 15081.5, subdivision (b), preparing or having prepared an EIR for the selection of a California

Community College campus location and approval of a long range development plan for that campus.

C56) Pursuant to Title 14, California Code of Regulations, Section 15082, subdivision (a), immediately after deciding that an environmental impact report is required for a project, sending to each responsible agency a notice of preparation stating that an environmental impact report will be prepared, and to every federal agency involved in approving or funding the project and to each trustee agency responsible for natural resources affected by the project.

C57) Pursuant to Title 14, California Code of Regulations, Section 15082, subdivision (d), when one or more state agencies will be a responsible agency or a trustee agency, sending a notice of preparation to each state responsible agency and each trustee agency with a copy to the State Clearinghouse in the Office of Planning and Research.

C58) Pursuant to Title 14, California Code of Regulations, Section 15084, subdivision (a), preparing the draft EIR directly or under contract to a third party.

C59) Pursuant to Title 14, California Code of Regulations, Section 15084, subdivision (d), choosing one of the following arrangements, or a combination of them, in preparing a draft EIR;

(a) Preparing the draft EIR directly with its own staff.

(b) Contracting with another entity, public or private, to prepare the draft EIR.

(c) Accepting a draft prepared by the applicant, a consultant retained by the

applicant, or any other person.

(d) Executing a third party contract or memorandum of understanding with the applicant to govern the preparation of a draft EIR by an independent contractor.

(e) Using a previously prepared EIR.

C60) Pursuant to Title 14, California Code of Regulations, Section 15084, subdivision (e), subjecting the draft to their own review and analysis, before using a draft prepared by another person.

C61) Pursuant to Title 14, California Code of Regulations, Section 15085, subdivision (a), filing a notice of completion with OPR in a printed hard copy or in electronic form on a diskette or by electronic mail transmission, as soon as the draft EIR is completed.

C62) Pursuant to Title 14, California Code of Regulations, Section 15085, subdivision (b), including in the notice of completion:

(a) A brief description of the project,

(b) The proposed location of the project,

(c) An address where copies of the draft EIR are available, and

(d) The period during which comments will be received on the draft EIR.

C63) Pursuant to Title 14, California Code of Regulations, Section 15086, subdivision (a), consulting with and requesting comments on the draft EIR from:

(a) Responsible agencies,

(b) Trustee agencies with resources affected by the project, and

(c) Any other state, federal , and local agencies which have jurisdiction by law with respect to the project or which exercise authority over resources which may be affected by the project, including water agencies consulted pursuant to section 15083.5.

(d) Any city or county which borders on a city or county within which the project is located, and

(e) For a project of statewide, regional, or area wide significance, the transportation planning agencies and public agencies which have transportation facilities within their jurisdictions which could be affected by the project.

C64) Pursuant to Title 14, California Code of Regulations, Section 15087, subdivision (a), providing public notice of the availability of a draft EIR at the same time as sending a notice of completion to OPR, as provided under Section 15105. Mailing the notice to the last known name and address of all organizations and individuals who have previously requested such notice in writing by at least one of the following procedures:

(a) Publication at least one time by the public agency in a newspaper of general circulation in the area affected by the proposed project. If more than one area is affected, the notice shall be published in the newspaper

of largest circulation from among the newspapers of general circulation in those areas.

(b) Posting of notice by the public agency on and off the site in the area where the project is to be located.

(c) Direct mailing to the owners and occupants of property contiguous to the parcel or parcels on which the project is located. Owners of such property shall be identified as shown on the latest equalized assessment roll.

C65) Pursuant to Title 14, California Code of Regulations, Section 15087, subdivision (c), disclosing the following in the notice:

(a) A brief description of the proposed project and its location.

(b) The starting and ending dates for the review period during which the lead agency will receive comments. If the review period is shortened, the notice shall disclose that fact.

(c) The date, time, and place of any scheduled public meetings or hearings to be held by the lead agency on the proposed project when known to the lead agency at the time of notice.

(d) A list of the significant environmental effects anticipated as a result of the project, to the extent which such effects are known to the lead agency at the time of the notice.

(e) The address where copies of the EIR and all documents referenced in the EIR will be available for public review. This location shall be readily accessible to the public during the lead agency's normal working hours.

(f) The presence of the site on any of the lists of sites enumerated under Section 65962.5 of the Government Code including, but not limited to lists of hazardous waste facilities, land designated as hazardous waste property, hazardous waste disposal sites and others, and the information in the Hazardous Waste and Substances Statement required under subsection (f) of that Section.

C66) Pursuant to Title 14, California Code of Regulations, Section 15087, subdivision (g), furnishing copies of draft EIRs to public library systems serving in the area involve in order to make copies of EIRs available to the public.

C67) Pursuant to Title 14, California Code of Regulations, Section 15088, subdivision (a), evaluating comments on environmental issues received from persons who reviewed the draft EIR, preparing a written response, and responding to comments received during the noticed comment period.

C68) Pursuant to Title 14, California Code of Regulations, Section 15088, subdivision (b), describing in the written response the disposition of significant environmental issues raised. In particular, the major environmental issues raised when the lead agency's position is at variance with recommendations and objections raised in

the comments must be addressed in detail giving reasons why specific comments and suggestions were not accepted.

C69) Pursuant to Title 14, California Code of Regulations, Section 15088, subdivision (c), where the response to comments makes important changes in the information contained in the text of the draft EIR, either:

(1) Revising the text in the body of the EIR, or

(2) Including marginal notes showing that the information is revised in the response to comments.

C70) Pursuant to Title 14, California Code of Regulations, Section 15088.5, subdivision (a), recirculating an EIR when significant new information is added to the EIR after public notice is given of the availability of the draft EIR for public review under Section 15087 but before certification.

C71) Pursuant to Title 14, California Code of Regulations, Section 15088.5, subdivision (e), supporting a decision not to recirculate an EIR by substantial evidence in the administrative record.

C72) Pursuant to Title 14, California Code of Regulations, Section 15088.5, subdivision (f), evaluating and responding to comments as provided in Section 15088.

C73) Pursuant to Title 14, California Code of Regulations, Section 15088.5, subdivision (g),summarizing the revisions made to the previously circulated draft EIR, when recirculating a revised EIR, either in whole or in part, in the revised EIR or by an

attachment to the revised EIR.

C74) Pursuant to Title 14, California Code of Regulations, Section 15089, subdivision (a), preparing a final EIR before approving the project.

C75) Pursuant to Title 14, California Code of Regulations, Section 15090, subdivision (a), certifying, prior to approving a project, that:

(a) The final EIR has been completed in compliance with CEQA;

(b) The final EIR was presented to the decision-making body of the lead agency and that the decision-making body reviewed and considered the information contained in the final EIR prior to approving the project; and

(c) The final EIR reflects the lead agency's independent judgment and analysis.

C76) Pursuant to Title 14, California Code of Regulations, Section 15091, subdivision (a), not approving or carrying out a project for which an EIR has been certified which identifies one or more significant environmental effects of the project unless making one or more written findings for each of those significant effects, accompanied by a brief explanation of the rationale for each finding.

C77) Pursuant to Title 14, California Code of Regulations, Section 15091, subdivision (b), supporting the findings required by subsection (a) by substantial evidence in the record.

C78) Pursuant to Title 14, California Code of Regulations, Section 15091, subdivision

(d), when making the findings required in subsection (a)(1), adopting a program for reporting on or monitoring the changes which it has either required in the project or made a condition of approval to avoid or substantially lessen significant environmental effects. These measures must be fully enforceable through permit conditions, agreements, or other measures.

C79) Pursuant to Title 14, California Code of Regulations, Section 15091, subdivision (e), specifying the location and custodian of the documents or other material which constitute the record of the proceedings upon which its decision is based.

C80) Pursuant to Title 14, California Code of Regulations, Section 15092, subdivision (b), not deciding to approve or carry out a project for which an EIR was prepared unless either:

(a) The project as approved will not have a significant effect on the environment, or

(b) The agency has:

(i) Eliminated or substantially lessened all significant effects on the environment where feasible as shown in findings under Section 15091, and

(ii) Determined that any remaining significant effects on the environment found to be unavoidable under Section 15091 are acceptable due to overriding concerns as described in Section

15093.

C81) Pursuant to Title 14, California Code of Regulations, Section 15093, subdivision (a), balancing, as applicable, the economic, legal, social, technological, or other benefits of a proposed project against its unavoidable environmental risks when determining whether to approve the project.

C82) Pursuant to Title 14, California Code of Regulations, Section 15093, subdivision (b), when approving a project which will result in the occurrence of significant effects which are identified in the final EIR but are not avoided or substantially lessened, stating in writing the specific reasons to support its action based on the final EIR and/or other information in the record. The statement of overriding considerations shall be supported by substantial evidence in the record.

C83) Pursuant to Title 14, California Code of Regulations, Section 15093, subdivision (c), if an agency makes a statement of overriding considerations, including the statement in the record of the project approval and mentioning it in the notice of determination.

C84) Pursuant to Title 14, California Code of Regulations, Section 15093, subdivision (c), if a local agency is the lead agency, filing the notice of determination with the county clerk of the county or counties in which the project will be located. If the project requires discretionary approval from a state agency, filing the notice of determination with OPR.

C85) Pursuant to Title 14, California Code of Regulations, Section 15093, subdivision (d), retaining a notice of determination for not less than 9 months.

C86) Pursuant to Title 14, California Code of Regulations, Section 15094, subdivision (a), filing a notice of determination within 5 working days after approval of the project by the lead agency, which includes:

(a) An identification of the project including its common name where possible and its location.

(b) A brief description of the project.

(c) The date when the agency approved the project.

(d) The determination of the agency whether the project in its approved form will have a significant effect on the environment.

(e) A statement that an EIR was prepared and certified pursuant to the provisions of CEQA.

(f) Whether mitigation measures were made a condition of the approval of the project.

(g) Whether findings were made pursuant to Section 15091.

(h) Whether a statement of overriding considerations was adopted for the project.

(i) The address where a copy of the final EIR and the record of project approval may be examined.

C87) Pursuant to Title 14, California Code of Regulations, Section 15095:

(a) Filing a copy of the final EIR with the appropriate planning agency of any city, county, or city and county where significant effects on the environment may occur.

(b) Including the final EIR as part of the regular project report which is used in the existing project review and budgetary process if such a report is used.

(c) Retaining one or more copies of the final EIR as public records for a reasonable period of time.

Article 8. Time Limits

C88) Pursuant to Title 14, California Code of Regulations, Section 15100, subdivision (a), adopting time limits to govern their implementation of CEQA consistent with this article.

C89) Pursuant to Title 14, California Code of Regulations, Section 15104, convening a meeting with agency representatives to discuss the scope and content of the environmental information a responsible agency will need in the EIR as soon as possible but no later than 30 days after receiving a request for the meeting.

Article 9. Contents of Environmental Impact Reports

C90) Pursuant to Title 14, California Code of Regulations, Section 15122, including in an EIR at least a table of contents or an index to assist readers in finding the analysis of different subjects and issues.

C91) Pursuant to Title 14, California Code of Regulations, Section 15123, subdivision (a), including in an EIR a brief summary of the proposed actions and its consequences. The language of the summary should be as clear and simple as reasonably practical.

C92) Pursuant to Title 14, California Code of Regulations, Section 15123, subdivision (b), identifying in the summary:

(a) Each significant effect with proposed mitigation measures and alternatives that would reduce or avoid that effect;

(b) Areas of controversy known to the lead agency including issues raised by agencies and the public; and

(c) Issues to be resolved including the choice among alternatives and whether or how to mitigate the significant effects.

C93) Pursuant to Title 14, California Code of Regulations, Section 15124, containing the following information in the description of the project:

(a) The precise location and boundaries of the proposed project shall be shown on a detailed map, preferably topographic. The location of the project shall also appear on a regional map.

(b) A statement of the objectives sought by the proposed project to help the lead agency develop a reasonable range of alternatives to evaluate in the EIR and aid the decision makers in preparing findings or a statement of

overriding considerations, if necessary. The statement of objectives should include the underlying purpose of the project.

(c) A general description of the project's technical, economic, and environmental characteristics, considering the principal engineering proposals if any and supporting public service facilities.

(d) A statement briefly describing the intended uses of the EIR, and including, to the extent that the information is know:

(i) A list of the agencies that are expected to use the EIR in their decision-making,

(ii) A list of permits and other approvals required to implement the project, and

(iii) A list of related environmental review and consultation requirements required by federal, state, or local laws, regulations, or policies. To the fullest extent possible, the lead agency should integrate CEQA review with these related environmental review and consultation requirements.

C94) Pursuant to Title 14, California Code of Regulations, Section 15125, subdivision (a), including in an EIR, a description of the physical environmental conditions in the vicinity of the project, as they exist at the time the notice of preparation is

published, or if no notice of preparation is published, at the time environmental analysis is commenced, from both a local and regional perspective.

C95) Pursuant to Title 14, California Code of Regulations, Section 15126, considering all phases of a project when evaluating its impact on the environment: planning, acquisition, development, and operation. Listing the subjects below, preferably in separate sections or paragraphs of the EIR, if they are not discussed separately, including in the EIR, a table showing where each of the subjects is discussed.

(a) Significant Environmental Effects of the Proposed Project.

(b) Significant Environmental Effects Which Cannot be Avoided if the Proposed Project is Implemented.

(c) Significant Irreversible Environmental Changes Which Would be Involved in the Proposed Project Should it be Implemented.

(d) Growth-Inducing Impact of the Proposed Project.

(e) The Mitigation Measures Proposed to Minimize the Significant Effects.

(f) Alternatives to the Proposed Project.

C96) Pursuant to Title 14, California Code of Regulations, Section 15126.2, subdivision (a), identifying and focusing on the significant environmental effects of the proposed project, in an EIR.

C97) Pursuant to Title 14, California Code of Regulations, Section 15126.4, including and discussing mitigating measures in an EIR.

C98) Pursuant to Title 14, California Code of Regulations, Section 15126.6, subdivision (a), describing in an EIR, a range of reasonable alternatives to the project, or to the location of the project, which would feasibly attain most of the basic objectives of the project but would avoid or substantially lessen any of the significant effects of the project, evaluating the comparative merits of the alternatives, and selecting a range of project alternatives for examination and publicly disclosing its reasoning for selecting those alternatives.

C99) Pursuant to Title 14, California Code of Regulations, Section 15126.6, subdivision (b), focusing the discussion of alternatives on alternatives to the project or its location which are capable of avoiding or substantially lessening any significant effects of the project, even if these alternatives would impede to some degree the attainment of the project objectives, or would be more costly.

C100) Pursuant to Title 14, California Code of Regulations, Section 15126.6, subdivision (d), including in the EIR, sufficient information about each alternative to allow meaningful evaluation, analysis, and comparison with the proposed project.

C101) Pursuant to Title 14, California Code of Regulations, Section 15126.6, subdivision (e), evaluating the specific alternative of "no project" along with its impact.

C102) Pursuant to Title 14, California Code of Regulations, Section 15126.6, subdivision (f), setting forth in the EIR, the rule of reason, which requires only those alternatives necessary to permit a reasoned choice. Of those alternatives,

examining in detail in the EIR, only the ones that have been determined could feasibly attain most of the basic objectives of the project.

C103) Pursuant to Title 14, California Code of Regulations, Section 15128, containing, in an EIR, a statement briefly indicating the reasons that various possible significant effects of a project were determined not to be significant and were therefore not discussed in detail in the EIR.

C104) Pursuant to Title 14, California Code of Regulations, Section 15129, identifying, in an EIR, all federal, state, or local agencies, other organizations, and private individuals consulted in preparing the draft EIR, and the persons, firm, or agency preparing the draft EIR, by contract or other authorization.

C105) Pursuant to Title 14, California Code of Regulations, Section 15130, subdivision (a), discussing in an EIR, cumulative impacts of a project when the project's incremental effect is cumulatively considerable, as defined in section 15065(c). Where a lead agency is examining a project with an incremental effect that is not "cumulatively considerable," a lead agency need not consider that effect significant, but shall briefly describe its basis for concluding that the incremental effect is not cumulatively considerable.

C106) Pursuant to Title 14, California Code of Regulations, Section 15130, subdivision (b), reflecting in the discussion of cumulative impacts, the severity of the impacts

and their likelihood of occurrence, but the discussion need not provide as great detail as is provided for the effects attributable to the project alone.

C107) Pursuant to Title 14, California Code of Regulations, Section 15132, including in the final EIR:

(a) The Draft EIR or a revision of the draft.

(b) Comments and recommendations received on the Draft EIR either verbatim or in summary.

(c) A list of persons, organizations, and public agencies commenting on the Draft EIR.

(d) The responses of the lead agency to significant environmental points raised in the review and consultation process.

(e) Any other information added by the lead agency.

Article 10. Considerations in Preparing EIRs and Negative Declarations

C108) Pursuant to Title 14, California Code of Regulations, Section 15140, writing EIRs in plain language and using appropriate graphics so that decision makers and the public can rapidly understand the documents.

C109) Pursuant to Title 14, California Code of Regulations, Section 15142, preparing an EIR using an interdisciplinary approach which will ensure the integrated use of the natural and social sciences and the consideration of qualitative as well as quantitative factors.

C110) Pursuant to Title 14, California Code of Regulations, Section 15143, focusing the the EIR on the significant effects on the environment and discussing them with emphasis in proportion to their severity and probability of occurrence.

C111) Pursuant to Title 14, California Code of Regulations, Section 15145, if, after thorough investigation, a lead agency finds that a particular impact is too speculative for evaluation, noting its conclusion and terminating discussion of the impact.

C112) Pursuant to Title 14, California Code of Regulations, Section 15147, including, in an EIR, summarized technical data, maps, plot plans, diagrams, and similar relevant information sufficient to permit full assessment of significant environmental impacts by reviewing agencies and members of the public.

C113) Pursuant to Title 14, California Code of Regulations, Section 15148, citing in the EIR, all documents used in its preparation including, where possible, the page and section number of any technical reports which were used as the basis for any statements in the EIR.

C114) Pursuant to Title 14, California Code of Regulations, Section 15149, subdivision (b), establishing requirements or conditions on project design, construction, or operation in order to protect or enhance the environment.

C115) Pursuant to Title 14, California Code of Regulations, Section 15150, subdivision (b), stating in the EIR or negative declaration where the incorporated documents will be available for inspection.

C116) Pursuant to Title 14, California Code of Regulations, Section 15150, subdivision (c), where an EIR or negative declaration uses incorporation by reference, briefly summarizing the incorporated part of the referenced document where possible or briefly describing if the data or information cannot be summarized.

C117) Pursuant to Title 14, California Code of Regulations, Section 15150, subdivision (d), where an agency incorporates information from an EIR that has previously been reviewed through the state review system, including in the summary or designation described in subdivision (c), the state identification number of the incorporated document.

C118) Pursuant to Title 14, California Code of Regulations, Section 15152, subdivision (f) providing a later EIR when the initial study or other analysis finds that the later project may cause significant effects on the environment that were not adequately addressed in the prior EIR, and providing a negative declaration when the provisions of Section 15070 are met.

C119) Pursuant to Title 14, California Code of Regulations, Section 15153, subdivision (b), when a lead agency proposes to use an EIR from an earlier project as the EIR for a separate, later project, using the following procedures:

(a) Reviewing the proposed project with an initial study, using incorporation by reference if necessary, to determine whether the EIR would adequately describe:

(i) The general environmental setting of the project,

(ii) The significant environmental impacts of the project, and

(iii) Alternatives and mitigation measures related to each significant effect.

(b) If the lead agency believes that the EIR would meet the requirements of Subsection (1), providing public review as provided in Section 15087 stating that it plans to use the previously prepared EIR as the draft EIR for this project, and including in the notice as a minimum:

(i) An identification of the project with a brief description;

(ii) A statement that the agency plans to use a certain EIR prepared for a previous project as the EIR for this project;

(iii) A listing of places where copies of the EIR may be examined; and

(iv) A statement that the key issues involving the EIR are whether the EIR should be used for this project and whether there are any additional, reasonable alternatives or mitigation measures that should be considered as ways of avoiding or reducing the significant effects of the project.

(c) Preparing responses to comments received during the review period.

(d) Before approving the project:

(i) Considering the information in the EIR including comments received during the review period and responses to those comments,

(ii) Deciding either on its own or on a staff recommendation whether the EIR is adequate for the project at hand,

(iii) Making or requiring certification to be made as described in Section 15090, and

(iv) Making findings as provided in Sections 15091 and 15093 as necessary.

(e) After making a decision on the project, filing a notice of determination.

Article 11. Types of EIRs

C120) Pursuant to Title 14, California Code of Regulations, Section 15162, subdivision (a), determining, in order for a subsequent EIR to be prepared for that project, when an EIR has been certified or a negative declaration adopted for a project, on the basis of substantial evidence in the light of the whole record, one or more of the following:

(a) Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the

involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;

(b) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or

(c) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the negative declaration was adopted, shows any of the following:

(i) The project will have one or more significant effects not discussed in the previous EIR or negative declaration;

(ii) Significant effects previously examined will be substantially more severe than shown in the previous EIR;

(iii) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or

(iv) Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

C121) Pursuant to Title 14, California Code of Regulations, Section 15162, subdivision (b), preparing a subsequent EIR if required under subsection (a), if changes to a project or its circumstances occur or new information becomes available after adoption of a negative declaration, otherwise, determining whether to prepare a subsequent negative declaration, an addendum, or no further documentation.

C122) Pursuant to Title 14, California Code of Regulations, Section 15164, subdivision (a), preparing an addendum to a previously certified EIR if some changes or additions are necessary but none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred.

C123) Pursuant to Title 14, California Code of Regulations, Section 15164, subdivision (e), including in an addendum to an EIR, their findings on the project, or elsewhere in the record, a brief explanation of the decision not to prepare a subsequent EIR pursuant to Section 15162, and supporting the explanation by substantial evidence.

C124) Pursuant to Title 14, California Code of Regulations, Section 15165, preparing a single program EIR for the ultimate project as described in Section 15168, where

individual projects are, or a phased project is, to be undertaken and where the total undertaking comprises a project with significant environmental effect.

C125) Pursuant to Title 14, California Code of Regulations, Section 15167, subdivision (a), subdivision (b), when a staged EIR has been prepared, preparing a supplement to the EIR when a later approval is required for the project, and the information available at the time of the later approval would permit consideration of additional environmental impacts, mitigation measures, or reasonable alternatives to the project.

C126) Pursuant to Title 14, California Code of Regulations, Section 15168, subdivision (c), examining subsequent activities in the program in the light of the program EIR to determine whether an additional environmental document must be prepared.

C127) Pursuant to Title 14, California Code of Regulations, Section 15168, subdivision (e), when a law other than CEQA requires public notice when the agency later proposes to carry out or approve an activity within the program and to rely on the program EIR for CEQA compliance, including in the notice for the activity a statement that:

(a) This activity is within the scope of the program approved earlier, and

(b) The program EIR adequately describes the activity for the purposes of CEQA.

Article 11.5. Master Environmental Impact Report

C128) Pursuant to Title 14, California Code of Regulations, Section 15176, if using a Master EIR, including all of the following:

(a) A detailed discussion as required by Section 15126.

(b) A description of anticipated subsequent projects that are within the scope of the Master EIR, including information with regard to the kind, size, intensity, and location of the subsequent projects, including, but not limited to all of the following:

(i) The specific type of project anticipated to be undertaken.

(ii) The maximum and minimum intensity of any anticipated subsequent project.

(iii) The anticipated location for any subsequent development projects, and, consistent with the rule of reason set forth in Section 15126.6(f), alternative locations for any such projects.

(iv) A capital outlay or capital improvement program, or other scheduling or implementing device that governs the submission and approval of subsequent projects, or an explanation as to why practical planning considerations render it impractical to identify any such program or scheduling or other device at the time of preparing the Master EIR.

C129) Pursuant to Title 14, California Code of Regulations, Section 15177, subdivision

(c), determining whether a subsequent project is within the scope of the Master EIR based upon a review of the initial study to determine whether there are additional significant effects or new additional mitigation measures or alternatives required for the subsequent project that are not already discussed in the Master EIR.

C130) Pursuant to Title 14, California Code of Regulations, Section 15177, subdivision (d), prior to approval of the proposed subsequent project, incorporating all feasible mitigation measures or feasible alternatives appropriate to the project as set forth in the Master EIR and provide notice in the manner required by Section 15087.

C131) Pursuant to Title 14, California Code of Regulations, Section 15177, subdivision (e), when approving a project pursuant to this section, filing a notice in the manner required by Section 15075.

C132) Pursuant to Title 14, California Code of Regulations, Section 15178, subdivision (a), when a proposed subsequent project is identified in the Master EIR, but the lead agency cannot make a determination pursuant to Section 15177 that the subsequent project is within the scope of the Master EIR, and the lead agency determines that the cumulative impacts, growth inducing impacts and irreversible significant effects analysis in the Master EIR is adequate for the subsequent project, preparing a mitigated negative declaration or a focused EIR if, after

preparing an initial study, the lead agency determines that the project may result in new or additional significant effects. Determining whether the cumulative impacts, growth inducing impacts and irreversible significant effects analyses are adequate based upon a review of the proposed subsequent project in light of the Master EIR.

C133) Pursuant to Title 14, California Code of Regulations, Section 15178, subdivision (b), preparing a mitigated negative declaration for any proposed subsequent project if both of the following occur:

(a) The initial study prepared pursuant to Section 15177 has identified potentially new or additional significant environmental effects that were not analyzed in the Master EIR; and

(b) Feasible mitigation measures or alternatives will be incorporated to revise the subsequent project before the negative declaration is released for public review pursuant to Section 15073 in order to avoid or mitigate the identified effects to a level of insignificance.

C134) Pursuant to Title 14, California Code of Regulations, Section 15178, subdivision (c), preparing a focused EIR if the subsequent project may have a significant effect on the environment and a mitigated negative declaration pursuant to subdivision (b) of this section cannot be prepared, according to the following:

(a) Incorporating, in the focused EIR, by reference the Master EIR and

analyzing only the subsequent project's additional significant environmental effects and any new or additional mitigation measures or alternatives that were not identified and analyzed by the Master EIR.

(b) A focused EIR need not examine those effects upon, finding, prior to public release of the focused EIR, on the basis of the initial study, related documents, and commitments from the proponent of a subsequent project, have been mitigated in one of the following manners:

(i) Mitigated or avoided as a result of mitigation measures identified in the Master EIR which the lead agency will require as part of the approval of the subsequent project;

(ii) Examined at a sufficient level of detail in the Master EIR to enable those significant effects to be mitigated or avoided by specific revisions to the project, the imposition of conditions of approval, or by other means in connection with approval of the subsequent project; or

(iii) The mitigation or avoidance of which is the responsibility of and within the jurisdiction of another public agency and is, or can and should be, undertaken by that agency.

(c) Including the above findings in the focused EIR prior to public release pursuant to Section 15087.

(d) Analyzing any significant environmental effects when:

(i) Substantial new or additional information shows that the adverse environmental effect may be more significant that was described in the Master EIR; or

(ii) Substantial new or additional information shows that mitigation measures or alternatives which were previously determined to be infeasible are feasible and will avoid or reduce the significant effects of the subsequent project to a level of insignificance.

C135) Pursuant to Title 14, California Code of Regulations, Section 15178, subdivision (d), filing a notice of determination pursuant to Section 15075 if a project has been approved for which a mitigated negative declaration has been prepared pursuant to this section and filing a notice of determination pursuant to Section 15094 if a project has been approved for which a focused EIR has been prepared pursuant to this section.

C136) Pursuant to Title 14, California Code of Regulations, Section 15178, subdivision (e), upon determining that the cumulative impacts, growth inducing impacts and irreversible significant effects analysis in the Master EIR is inadequate for the subsequent project, the subsequent project is no longer eligible for the limited environmental review available under the Master EIR process, reviewing according to Article 7 (commencing with Section 15080) of these guidelines, and

tiering the project specific EIR upon the Master EIR to the extent feasible under Section 15152.

C137) Pursuant to Title 14, California Code of Regulations, Section 15179, the certified Master EIR shall not be used in accordance with this article if either (i) it was certified more than five years prior to the filing of an application for a later project, or (ii) a project not identified in the certified Master EIR as an anticipated subsequent project is approved and the approved project may affect the adequacy of the Master EIR, unless the lead agency does one of the following:

(a) Reviews the Master EIR and finds that no substantial changes have occurred with respect to the circumstances under which the Master EIR was certified, or that there is no new available information which was not known and could not have been known at the time the Master EIR was certified; or

(b) Prepares a subsequent or supplemental EIR that updates or revises the Master EIR and which either (i) is incorporated into the previously certified Master EIR, or (ii) references any deletions, additions or other modifications to the previously certified Master EIR.

Article 12. Special Situations

C138) Pursuant to Title 14, California Code of Regulations, Section 15184, whenever a state agency issues an order which requires a local agency to carry out a project subject to CEQA, the following rules apply:

(a) If an EIR is prepared for the project, limiting the EIR to considering those factors and alternatives which will not conflict with the order.

(b) If a local agency undertakes a project to implement a rule or regulation imposed by a certified state environmental regulatory program listed in Section 15251, the project shall be exempt from CEQA with regard to the significant effects analyzed in the document prepared by the state agency as a substitute for an EIR. Complying with CEQA with regard to any site-specific effect of the project which was not analyzed by the certified state agency as a significant effect on the environment.

C139) Pursuant to Title 14, California Code of Regulations, Section 15185, subdivision (b), the decision making body to which an appeal has been made shall consider the environmental document and make findings under Sections 15091 and 15093 if appropriate.

C140) Pursuant to Title 14, California Code of Regulations, Section 15186, subdivision (a), consulting with other agencies in the case that CEQA establishes a special requirement for certain school projects, as well as certain projects near schools, to ensure that potential health impacts resulting from exposure to hazardous

materials, wastes, and substances will be carefully examined and disclosed in a negative declaration or EIR.

C141) Pursuant to Title 14, California Code of Regulations, Section 15186, subdivision (b), when a project located within one-fourth mile of a school involves the construction or alteration of a facility which might reasonably be anticipated to emit hazardous or acutely hazardous air emissions, or which would handle acutely hazardous material or a mixture containing acutely hazardous material in a quantity equal to or greater than that specified in subdivision (a) of Section 25536 of the Health and Safety Code, which may impose a health or safety hazard to persons who would attend or would be employed at the school, performing the following:

(a) Consulting with the affected school district or districts regarding the potential impact of the project on the school when circulating the proposed negative declaration or draft EIR for review.

(b) Notifying the affected school district of the project, in writing, not less than 30 days prior to approval or certification of the negative declaration or EIR.

C142) Pursuant to Title 14, California Code of Regulations, Section 15186, subdivision (c), when the project involves the purchase of a school site or the construction of a secondary or elementary school, the negative declaration or EIR prepared for the project shall not be approved or certified by the school board unless:

(a) Notifying in writing and consulting with the county or city administering agency (as designated pursuant to Section 25502 of the Health and Safety Code) and with any air pollution control district or air quality management district having jurisdiction, to identify facilities within one-fourth mile of the proposed school site which might reasonably be anticipated to emit hazardous emissions or handle hazardous or acutely hazardous material, substances, or waste. Including in the notice a list of the school sites for which information is sought. Each agency or district receiving notice shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification.

(b) Making, on the basis of substantial evidence, one of the following written findings:

(i) Consultation identified none of the facilities specified in paragraph (2).

(ii) The facilities specified in paragraph (2) exist, but one of the following conditions applies:

1. The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

2. Corrective measures required under an existing order by another agency having jurisdiction over the facilities will, before the school is occupied, mitigate all chronic or accidental hazardous air emissions to levels that do not constitute any actual or potential public health danger to persons who would attend or be employed at the proposed school. When the school district board makes such a finding, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

Article 13. Review and Evaluations of EIRs and Negative Declarations

C143) Pursuant to Title 14, California Code of Regulations, Section 15201, Including provisions in its CEQA procedures for wide public involvement, formal and informal, consistent with its existing activities and procedures, in order to receive and evaluate public reactions to environmental issues related to the agency's activities.

C144) Pursuant to Title 14, California Code of Regulations, Section 15203, providing adequate time for other public agencies and members of the public to review and comment on a draft EIR or negative declaration that it has prepared.

C145) Pursuant to Title 14, California Code of Regulations, Section 15205, subdivision (a), submitting draft EIRs and negative declarations to be reviewed by state

agencies to the State Clearinghouse, and including, in addition to the printed copy, a copy of the document in electronic form on a diskette or by electronic mail transmission, if available.

C146) Pursuant to Title 14, California Code of Regulations, Section 15205, subdivision (b), submitting the following environmental documents to the State Clearinghouse for review by state agencies:

(a) Draft EIRs and negative declarations prepared by a state agency where such agency is a lead agency.

(b) Draft EIRs and negative declarations prepared by a public agency where a state agency is a responsible agency, trustee agency, or otherwise has jurisdiction by law with respect to the project.

(c) Draft EIRs and negative declarations on projects identified in Section 15206 as being of statewide, regional, or areawide significance.

(d) Draft EIRs, environmental assessments, and findings of no significant impact prepared pursuant to NEPA, the Federal Guidelines (Title 40 CFR, Part 1500, commencing with Section 1500.1).

C147) Pursuant to Title 14, California Code of Regulations, Section 15205, subdivision (c), including with any environmental documents submitted to the State Clearinghouse, in addition to the printed copy, a copy of the document in electronic format, on a diskette or by electronic mail transmission, if available.

C148) Pursuant to Title 14, California Code of Regulations, Section 15205, subdivision (d), when an EIR or negative declaration is submitted to the State Clearinghouse for review, setting the review period at least as long as the period provided in the state review system operated by the State Clearinghouse, and in exceptional circumstances, requesting shorter review periods.

C149) Pursuant to Title 14, California Code of Regulations, Section 15205, subdivision (e), submitting no less ten copies of an EIR or negative declaration unless the State Clearinghouse approves a lower number in advance.

C150) Pursuant to Title 14, California Code of Regulations, Section 15205, subdivision (f), submitting documents to the State Clearinghouse for distribution in order to comply with the review requirements of this section.

C151) Pursuant to Title 14, California Code of Regulations, Section 15206, subdivision (a), submitting a draft EIR or negative declaration to the State Clearinghouse and to the appropriate metropolitan area council of governments for review and comment, and when such documents are submitted to the State Clearinghouse, including, in addition to the printed copy, a copy of the document in electronic format on a diskette or by electronic mail transmission, if available.

C152) Pursuant to Title 14, California Code of Regulations, Section 15206, subdivision (b), determining that a proposed project is of statewide, regional, or areawide significance if the project meets any of the following criteria:

(a) A proposed local general plan, element, or amendment thereof for which an EIR was prepared. If a negative declaration was prepared for the plan, element, or amendment, the document need not be submitted for review.

(b) A project has the potential for causing significant effects on the environment extending beyond the city or county in which the project would be located.

(c) A project which would result in the cancellation of an open space contract made pursuant to the California Land Conservation Act of 1965 (Williamson Act) for any parcel of 100 or more acres.

(d) A project for which an EIR and not a negative declaration was prepared which would be located in and would substantially impact specific areas of critical environmental.

(e) A project which would substantially affect sensitive wildlife habitats including but not limited to riparian lands, wetlands, bays, estuaries, marshes, and habitats for endangered, rare and threatened species as defined by Section 15380 of this Chapter.

(f) A project which would interfere with attainment of regional water quality standards as stated in the approved areawide waste treatment management plan.

(g) A project which would provide housing, jobs, or occupancy for 500 or more people within 10 miles of a nuclear power plant.

C153) Pursuant to Title 14, California Code of Regulations, Section 15208, keeping on file comments which may be received on a draft EIR or negative declaration.

Article 14. Projects Also Subject to the National Environmental Policy Act (NEPA)

C154) Pursuant to Title 14, California Code of Regulations, Section 15223, when planning to use an EIS or finding of no significant impact or to prepare such a document jointly with a federal agency, consulting as soon as possible with the federal agency.

C155) Pursuant to Title 14, California Code of Regulations, Section 15225, subdivision (a), prior to using the federal document in this situation, giving notice, in the same manner as a notice of the public availability of a draft EIR under Section 15087, that it will use the federal document in the place of an EIR or negative declaration and that it believes that the federal document meets the requirements of CEQA.

Article 20. Definitions

C156) Pursuant to Title 14, California Code of Regulations, Section 15367, deciding whether an EIR or negative declaration will be required for the project and causing the document to be prepared.

Part D - California State Clearinghouse Handbook

D1) Pursuant to the California State Clearinghouse Handbook, pages 5-6, when submitting a draft negative declaration to SCH,

(1) Sending at least 15 copies which contain:

(a) Description and title of the project;

(b) Location of the project, preferably shown on a map;

(c) Name of the project proponent;

(d) A proposed finding that the project will not have a significant effect on the environment;

(e) An attached copy of the Initial Study documenting reasons to support the finding; and

(f) Mitigation measures, if any, included in the project to avoid potentially significant effects.

(2) Referencing any previously assigned number, if applicable.

D2) Pursuant to California State Clearinghouse Handbook, page 6, within five working days of approving a project for which a Negative Declaration has been adopted,

filing a Notice of Determination (NOD) with the county clerk of the county or counties where the project is located and with SCH.

D3) Pursuant to California State Clearinghouse Handbook, page 7, circulating a Notice of Preparation (NOP) to all Responsible and Trustee Agencies advising them of the district's intention to prepare a Draft EIR. This includes sending copies directly to all Responsible and Trustee Agencies. When there is a Responsible or Trustee state agency involved in a project, sending a copy of the NOP to the SCH, attaching the district's distribution list. The minimum content requirements for a NOP are:

(1) Description of the project;

(2) Location of the project, indicated either on an attached map (preferably a topographical map), or by a street address in an urbanized area;

(3) Salient environmental issues; and

(4) Probable environmental effects of the project.

D4) Pursuant to California State Clearinghouse Handbook, page 7, using a project number for all subsequent environmental documents for a project.

D5) Pursuant to California State Clearinghouse Handbook, page 7, submitting at least fifteen copies of any Draft EIR to SCH together with one copy of the NOC form.

D6) Pursuant to California State Clearinghouse Handbook, page 8, after receiving all public comments, including those of state agencies, preparing written responses and including them in the Final EIR. Certifying the Final EIR before approving the project.

D7) Pursuant to California State Clearinghouse Handbook, page 9, within five working days of approving a project for which an EIR was prepared, filing a Notice of Determination (NOD) with the county clerk of the county or counties where the project will be located and with SCH.

D8) Pursuant to California State Clearinghouse Handbook, page 10, when requesting a shortened review process for draft Negative Declarations and EIRs, contacting the SCH prior to submitting a request for shortened review explaining why the shortened review is needed and identify prior approval from Responsible state agencies. The request shall include the following criteria:

(1) The district is operating under an extension of the one-year period for completion of an EIR and would not otherwise be able to complete the EIR within the extended period.

(2) The district is under severe time constraints with regard to financing or exercising options which cannot be met without shortening the review period.

(3) The document is a supplement to a draft EIR or proposed negative declaration or mitigated negative declaration previously submitted to the State Clearinghouse.

(4) The health and safety of the community would be at risk unless the project is approved expeditiously.

(5) The document is a revised draft EIR, or proposed negative declaration or mitigated negative declaration, where changes in the document are primarily the result of comments from agencies and the public.

(6) The district shall provide evidence that there has been prior consultation with Responsible and Trustee state agencies.

(7) Before submitting a shortened review request, the district must have obtained verbal or written approval for a shortened review period from Responsible and Trustee state agencies. The request letter from the district must identify which state agencies have been contacted and the agencies' responses to the request.

D9) Pursuant to California State Clearinghouse Handbook, page 10, when requesting a shortened review process, following the following procedures:

(1) The request must be made to SCH in writing by the decision-making body of the district, or an authorized representative of the district, and shall be made on district letterhead. When submitted by a representative, a copy of the resolution or ordinance from the district board delegating authority should be attached.

(2) The request must explain the "exceptional circumstances" for making the request.

(3) The request must be accompanied by 15 copies of the environmental document.

(4) SCH approval of a shortened review period must be granted before issuing the public notice of availability.

(5) The public review period must be at least as long as the review period set by SCH.

(6) The review period for a Negative Declaration shall not be shorter than 20 days. The district must specify the requested length of the shortened review period.

(7) The review period for a Draft EIR shall not be shorter than 30 days. The district must specify the requested length of the shortened review period.

(8) The district may use the Shortened Review Application form contained in the Handbook.

D10) Pursuant to California State Clearinghouse Handbook, page 15, filing Notices of Completion at SCH.

D11) Pursuant to California State Clearinghouse Handbook, page 15, providing public notice of the availability of a Draft EIR or a Negative Declaration which contains at least the following:

(1) Description of proposed project;

(2) Location of proposed project;

(3) Specific period during which comments on proposed project will be accepted;

(4) Date, time, and place of any public meetings on proposed project;

(5) Address where copies of Draft EIR or Negative Declaration are available for review; and

(6) Environmental effects of the project, if any.

D12) Pursuant to California State Clearinghouse Handbook, page 15, providing the notice of availability to all organizations and individuals who previously requested notice using at least one of the following notification methods:

(1) Publication in a newspaper of general circulation in the area affected by the proposed project.

(2) Posting of the notice on- and off-site in the area where the project is to be located.

(3) Direct mailing to the owners and occupants of contiguous property shown on the latest equalized assessment roll.

D13) Pursuant to California State Clearinghouse Handbook, page 15, filing a Notice of Determination (NOD) within 5 days after a district approves or determines to carry out a project with the county clerk of the county or counties where the project will be located and SCH.

D14) Pursuant to California State Clearinghouse Handbook, pages 15-16, including in a Notice of Determination:

For a Negative Declaration:

(1) Identification of the project, including its common name or title, if possible;

(2) Location of the project;

(3) Brief description of the project;

(4) Date the agency approved the project;

(5) The determination by the approving agency that the project in its approved form will not have a significant effect on the environment;

(6) Statement that a Negative Declaration was prepared pursuant to the provisions of CEQA; and

(7) Address where a copy of the environmental document and record of project approval can be examined.

For an Environmental Impact Report (EIR):

(1) Identification of the project, including its common name or title, if possible;

(2) Location of the project;

(3) Brief description of the project;

(4) Date the agency approved the project;

(5) Determination by the approving agency whether the project in its approved form will have a significant effect on the environment;

(6) Statement that an EIR was prepared pursuant to the provisions of CEQA;

(7) Whether mitigation measures were made a condition of the approval of the project;

(8) Whether a statement of overriding considerations was adopted for the project;

(9) Whether findings were made pursuant to Section 15091 of the CEQA Guidelines; and

(10) Address where a copy of the final EIR and record of project approval may be examined.

Additionally, the notice shall be mailed to any person who has filed a written request for such notice.

D15) Pursuant to California State Clearinghouse Handbook, page 16, filing a Notice of Exemption (NOE) with the county clerk of the county or counties where the project is to be located. In addition the notice must be mailed to any person who has filed a written request for such notice.

D16) Pursuant to California State Clearinghouse Handbook, pages 16, including in any Notice of Exemption (NOE):

(1) A brief description of the project;

(2) A finding that the project is exempt, including a citation that references the CEQA Guidelines or statutory section under which it is found to be exempt; and

(3) A brief statement of reasons to support the finding.

It is estimated that the Santa Monica Community College District incurred more than $1,000 in staffing and other costs for the period from July 1, 2002 through June 30, 2003 to implement the new duties applicable community college districts mandated by the state for which the district has not been reimbursed by any federal, state, or local government agency, and for which it cannot otherwise obtain reimbursement.

The foregoing facts are known to me personally and, if so required, I could testify to the statements made herein. I hereby declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct except where stated upon

CHAPTER 1433

An act to add Division 13 (commencing with Section 21000) to the Public Resources Code, relating to environmental quality.

[Approved by Governor September 18, 1970. Filed with Secretary of State September 18, 1970.]

The people of the State of California do enact as follows:

SECTION 1. Division 13 (commencing with Section 21000) is added to the Public Resources Code, to read:

DIVISION 13. ENVIRONMENTAL QUALITY

CHAPTER 1. POLICY

21000. The Legislature finds and declares as follows:

(a) The maintenance of a quality environment for the people of this state now and in the future is a matter of statewide concern.

(b) It is necessary to provide a high-quality environment that at all times is healthful and pleasing to the senses and intellect of man.

(c) There is a need to understand the relationship between the maintenance of high-quality ecological systems and the general welfare of the people of the state, including their enjoyment of the natural resources of the state.

(d) The capacity of the environment is limited, and it is the intent of the Legislature that the government of the state take immediate steps to identify any critical thresholds for the health and safety of the people of the state and take all coordinated actions necessary to prevent such thresholds being reached.

(e) Every citizen has a responsibility to contribute to the preservation and enhancement of the environment.

(f) The interrelationship of policies and practices in the management of natural resources and waste disposal requires systematic and concerted efforts by public and private interests to enhance environmental quality and to control environmental pollution.

(g) It is the intent of the Legislature that all agencies of the state government which regulate activities of private individuals, corporations, and public agencies which are found to affect the quality of the environment, shall regulate such activi-

ties so that major consideration is given to preventing environmental damage.

21001. The Legislature further finds and declares that it is the policy of the state to:

(a) Develop and maintain a high-quality environment now and in the future, and take all action necessary to protect, rehabilitate, and enhance the environmental quality of the state.

(b) Take all action necessary to provide the people of this state with clean air and water, enjoyment of aesthetic, natural, scenic, and historic environmental qualities, and freedom from excessive noise.

(c) Prevent the elimination of fish or wildlife species due to man's activities, insure that fish and wildlife populations do not drop below self-perpetuating levels, and preserve for future generations representations of all plant and animal communities and examples of the major periods of California history.

(d) Ensure that the long-term protection of the environment shall be the guiding criterion in public decisions.

(e) Create and maintain conditions under which man and nature can exist in productive harmony to fulfill the social and economic requirements of present and future generations.

(f) Require governmental agencies at all levels to develop standards and procedures necessary to protect environmental quality.

(g) Require governmental agencies at all levels to consider qualitative factors as well as economic and technical factors and long-term benefits and costs, in addition to short-term benefits and costs and to consider alternatives to proposed actions affecting the environment.

CHAPTER 2. SHORT TITLE

21050. This division shall be known and may be cited as the Environmental Quality Act of 1970.

CHAPTER 3. STATE AGENCIES, BOARDS AND COMMISSIONS

21100. All ~~state agencies,~~ boards, and commissions shall include in any report on any project they propose to carry out which could have a significant effect on the environment of the state, a detailed statement by the responsible state official setting forth the following:

(a) The environmental impact of the proposed action.

(b) Any adverse environmental effects which cannot be avoided if the proposal is implemented.

(c) Mitigation measures proposed to minimize the impact.

(d) Alternatives to the proposed action.

(e) The relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity.

(f) Any irreversible environmental changes which would be involved in the proposed action should it be implemented.

21101. In regard to any proposed federal project in this state which may have a significant effect on the environment and on which the state officially comments, the state officials responsible for such comments shall include in their report a detailed statement setting forth the matters specified in Section 21100 prior to transmitting the comments of the state to the federal government. No report shall be transmitted to the federal government unless it includes such a detailed statement as to the matters specified in Section 21100.

21102. No state agency, board, or commission shall request funds, nor shall any state agency, board, or commission which authorizes expenditures of funds, other than funds appropriated in the Budget Act, authorize funds for expenditure for any project, other than a project involving only planning, which could have a significant effect on the environment unless such request or authorization is accompanied by a detailed statement setting forth the matters specified in Section 21100.

21103. The Office of Planning and Research shall, in conjunction with appropriate state, regional, and local agencies, coordinate the development of objectives, criteria, and procedures to assure the orderly preparation and evaluation of environmental impact reports required by this division.

21104. Prior to the making of a detailed statement, the responsible state official shall consult with, and obtain comments from, any governmental agency which has jurisdiction by law or special expertise with respect to any environmental impact involved.

21105. The responsible state official shall include the environmental impact report, together with any comments received from other governmental agencies pursuant to Section 21104, as a part of the regular project report used in the existing review and budgetary process. It shall be available to the Legislature and to the general public.

21106. All state agencies, boards, and commissions shall request in their budgets the funds necessary to protect the environment in relation to problems caused by their activities.

21107. Every state agency, board and commission shall review its present statutory authority, rules, regulations, policies and procedures to determine any inconsistencies or deficiencies in such provisions which would hinder compliance with the provisions of this division, and shall propose to the Governor and the Legislature no later than January 1971, any measures necessary to comply with the intent, policies, and procedures of this division.

CHAPTER 4. LOCAL AGENCIES

21150. State agencies, boards, and commissions, responsible for allocating state or federal funds on a project-by-project basis to local governmental agencies for land acquisition or

construction projects which may have a significant effect on the environment, shall, unless exempted by formal procedures developed under the provisions of Section 21103, require from the responsible local governmental agency a detailed statement setting forth the matters specified in Section 21100 prior to the allocation of any funds, other than funds solely for planning purposes.

21151. The legislative bodies of all cities and counties which have an officially adopted conservation element of a general plan shall make a finding that any project they intend to carry out, which may have a significant effect on the environment, is in accord with the conservation element of the general plan. All other local governmental agencies shall make an environmental impact report on any project they intend to carry out which may have a significant effect on the environment and shall submit it to the appropriate local planning agency as part of the report required by Section 65402 of the Government Code.

CHAPTER 1154

An act to amend Sections 21100, 21102, 21104, 21105, 21150, and 21151 of, to add Sections 21108, 21152, 21153, and 21154 to, to add Chapter 2.5 (commencing with Section 21060), Chapter 2.6 (commencing with Section 21080), Chapter 5 (commencing with Section 21160), and Chapter 6 (commencing with Section 21165) to Division 13 of,

0889 15120 458

to repeal Sections 21103 and 21107 of, and to repeal Sections 21152 and 21153, as added by Chapter 971 of the Statutes of 1972, of, the Public Resources Code, relating to environmental quality, and declaring the urgency thereof, to take effect immediately.

[Approved by Governor December 5, 1972. Filed with Secretary of State December 5, 1972.]

The people of the State of California do enact as follows:

SECTION 1. Chapter 2.5 (commencing with Section 21060) is added to Division 13 of the Public Resources Code, to read:

CHAPTER 2.5. DEFINITIONS

21060. Unless the context otherwise requires, the definitions in this chapter govern the construction of this division.

21060.5. "Environment" means the physical conditions which exist within the area which will be affected by a proposed project, including land, air, water, minerals, flora, fauna, noise, objects of historic or aesthetic significance.

21061. "Environmental impact report" means a detailed statement setting forth the matters specified in Section 21100. It includes any comments on an environmental impact report which are obtained pursuant to Section 21104 or 21153, or which are required to be obtained pursuant to this division.

An environmental impact report is an informational document which, when its preparation is required by this division, shall be considered by every public agency prior to its approval or disapproval of a project. The purpose of an environmental impact report is to provide public agencies with detailed information about the effect which a proposed project is likely to have on the environment; to list ways in which any adverse effects of such a project might be minimized; and to suggest alternatives to such a project.

21062. "Local agency" means any public agency other than a state agency, board, or commission. For purposes of this division a redevelopment agency is a local agency, and not a state agency, board or commission.

21063. "Public agency" includes any state agency, board, or commission, any county, city and county, city, regional agency, public district, redevelopment agency, or other political subdivision.

21065. "Project" means the following:

(a) Activities directly undertaken by any public agency.

(b) Activities undertaken by a person which are supported in whole or in part through contracts, grants, subsidies, loans, or other forms of assistance from one or more public agencies.

(c) Activities involving the issuance to a person of a lease, permit, license, certificate, or other entitlement for use by one or more

public agencies.

21066. "Person" includes any person, firm, association, organization, partnership, business, trust, corporation, company, district, county, city and county, city, town, the state, and any of the agencies and political subdivisions of such entities.

21067. "Lead agency" means the public agency which has the principal responsibility for carrying out or approving a project which may have a significant effect upon the environment.

SEC. 2.3. Chapter 2.6 (commencing with Section 21080) is added to Division 13 of the Public Resources Code, to read:

CHAPTER 2.6. GENERAL

21080. (a) Except as otherwise provided in this division, this division shall apply to discretionary projects proposed to be carried out or approved by public agencies, including, but not limited to, the enactment and amendment of zoning ordinances, the issuance of zoning variances, the issuance of conditional use permits and the approval of tentative subdivision maps (except where such a project is exempt from the preparation of an environmental impact report pursuant to Section 21166).

(b) This division shall not apply to ministerial projects proposed to be carried out or approved by public agencies.

21082. All public agencies shall adopt by ordinance, resolution, rule or regulation, objectives, criteria and procedures for the evaluation of projects and the preparation of environmental impact reports pursuant to this division. The objectives, criteria and procedures shall be consistent with the provisions of this division and with the guidelines adopted by the Secretary of the Resources Agency pursuant to Section 21083. Such objectives, criteria and procedures shall be adopted by each public agency no later than 60 days after the Secretary of the Resources Agency has adopted guidelines pursuant to Section 21083.

21083. The Office of Planning and Research shall prepare and develop proposed guidelines for the implementation of this division by public agencies. Such guidelines shall include objectives and criteria for the orderly evaluation of projects and the preparation of environmental impact reports in a manner consistent with this division.

Such guidelines shall specifically include criteria for public agencies to follow in determining whether or not a proposed project may have a "significant effect on the environment". Such criteria shall require a finding of "significant effect on the environment" if any of the following conditions exist:

(a) A proposed project has the potential to degrade the quality of the environment, curtail the range of the environment, or to achieve short-term, to the disadvantage of long-term, environmental goals;

(b) The possible effects of a project are individually limited but cumulatively considerable;

0889 15160 466

(c) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

Such guidelines shall also include procedures for determining the lead agency pursuant to the provisions of Section 21165.

The Office of Planning and Research shall develop and prepare such proposed guidelines as soon as possible and shall transmit them immediately to the Secretary of the Resources Agency. No later than 60 days after the effective date of this section the Secretary of the Resources Agency shall certify and adopt such guidelines pursuant to Chapter 4.5 (commencing with Section 11371) of Part 1, Division 3, Title 2, of the Government Code, which shall become effective upon the filing thereof, provided that such guidelines shall not be adopted without compliance with Sections 11423, 11424 and 11425 of the Government Code.

21083.5. The guidelines prepared and adopted pursuant to Section 21083 may provide that when an environmental impact statement has been, or will be, prepared for the same project pursuant to the requirements of the National Environmental Policy Act of 1969 and implementing regulations thereto, all or any part of such statement may be submitted in lieu of all or any part of an environmental impact report required by this division, provided that such statement, or the part thereof so used, shall comply with the requirements of this division and the guidelines adopted pursuant thereto.

21084. The guidelines prepared and adopted pursuant to Section 21083 shall include a list of classes of projects which have been determined not to have a significant effect on the environment and which shall be exempt from the provisions of this division. In adopting the guidelines, the Secretary of the Resources Agency shall make a finding that the list or classification of projects referred to in this section do not have a significant effect on the environment.

21085. All classes of projects designated pursuant to Section 21084, together with emergency repairs to public service facilities necessary to maintain service, shall be exempt from the provisions of this division.

21086. A public agency may, at any time, request the addition or deletion of a class of projects, to the list designated pursuant to Section 21084. Such a request shall be made in writing to the Office of Planning and Research and shall include information supporting the public agency's position that such class of projects does, or does not, have a significant effect on the environment.

The Office of Planning and Research shall review each such request and, as soon as possible, shall submit its recommendation to the Secretary of the Resources Agency. Following the receipt of such recommendation, the Secretary of the Resources Agency may add or delete the class of projects to the list of classes of projects designated pursuant to Section 21084 which are exempt from the requirements of this division.

The addition or deletion of a class of projects, as provided in this

72—2192

0889 15175 469

section, to the list specified in Section 21084 shall constitute an amendment to the guidelines adopted pursuant to Section 21083 and shall be adopted in the manner prescribed in Sections 21083, 21084, and 21087.

21087. The Office of Planning and Research shall periodically review the guidelines adopted pursuant to Section 21083 and shall recommend proposed changes or amendments to the Secretary of the Resources Agency. Changes or amendments to the guidelines shall be adopted by the Secretary of the Resources Agency in the same manner as provided in Section 21083 for the adoption of the original guidelines.

21088. The Secretary of the Resources Agency shall provide for the timely distribution to all public agencies of the guidelines and any amendments or changes thereto. In addition, the Secretary of the Resources Agency may provide for publication of a bulletin to provide public notice of the guidelines, or any amendments or changes thereto, and of the completion of environmental impact reports prepared in compliance with this division.

21089. A public agency may charge and collect a reasonable fee from any person proposing a project subject to the provisions of this division in order to recover the estimated costs incurred by the public agency in preparing an environmental impact report for such project.

21090. For all purposes of this division all public and private activities or undertakings pursuant to or in furtherance of a redevelopment plan shall be deemed a single project.

SEC. 2.5. Section 21100 of the Public Resources Code is amended to read:

21100. All state agencies, boards, and commissions shall prepare, or cause to be prepared by contract, and certify the completion of an environmental impact report on any project they propose to carry out or approve which may have a significant effect on the environment. Such a report shall include a detailed statement setting forth the following:

(a) The environmental impact of the proposed action.

(b) Any adverse environmental effects which cannot be avoided if the proposal is implemented.

(c) Mitigation measures proposed to minimize the impact.

(d) Alternatives to the proposed action.

(e) The relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity.

(f) Any irreversible environmental changes which would be involved in the proposed action should it be implemented.

(g) The growth-inducing impact of the proposed action.

SEC. 3. Section 21102 of the Public Resources Code is amended to read:

21102. No state agency, board, or commission shall request funds, nor shall any state agency, board, or commission which authorizes

0889 15190 472

expenditures of funds, other than funds appropriated in the Budget Act, authorize funds for expenditure for any project, other than a project involving only feasibility or planning studies for possible future actions which the agency, board, or commission has not approved, adopted or funded, which may have a significant effect on the environment unless such request or authorization is accompanied by an environmental impact report.

Feasibility and planning studies exempted by this section from the preparation of an environmental impact report shall nevertheless include consideration of environmental factors.

SEC. 4. Section 21103 of the Public Resources Code is repealed.

SEC. 6. Section 21104 of the Public Resources Code is amended to read:

21104. Prior to completing an environmental impact report, the responsible state agency shall consult with, and obtain comments from, any public agency which has jurisdiction by law with respect to the project, and may consult with any person who has special expertise with respect to any environmental impact involved.

SEC. 7. Section 21105 of the Public Resources Code is amended to read:

21105. The responsible state agency shall include the environmental impact report as a part of the regular project report used in the existing review and budgetary process. It shall be available to the Legislature. It shall also be available for inspection by the general public who may secure a copy thereof by paying for the actual cost of such a copy. It shall be filed by the responsible state agency with the appropriate local planning agency of any city, county, or city and county which will be affected by the project.

SEC. 8. Section 21107 of the Public Resources Code is repealed.

SEC. 9. Section 21108 is added to the Public Resources Code, to read:

21108. Whenever a state agency, board or commission approves or determines to carry out a project which is subject to the provisions of this division, it shall file notice of such approval or such determination with the Secretary of the Resources Agency. Such notice shall indicate the determination of the agency, board or commission whether the project will, or will not, have a significant effect on the environment and shall indicate whether an environmental impact report has been prepared pursuant to the provisions of this division.

SEC. 10. Section 21150 of the Public Resources Code is amended to read:

21150. State agencies, boards, and commissions, responsible for allocating state or federal funds on a project-by-project basis to local agencies for any project which may have a significant effect on the environment, shall require from the responsible local governmental agency a detailed statement setting forth the matters specified in Section 21100 prior to the allocation of any funds other than funds solely for projects involving only feasibility or planning studies for

possible future actions which the agency, board, or commission has not approved, adopted, or funded.

SEC. 11. Section 21151 of the Public Resources Code is amended to read:

21151. All local agencies shall prepare, or cause to be prepared by contract, and certify the completion of an environmental impact report on any project they intend to carry out or approve which may have a significant effect on the environment. When a report is required by Section 65402 of the Government Code, the environmental impact report may be submitted as a part of that report.

SEC. 11.5. Section 21152, as added to the Public Resources Code by Chapter 971 of the Statutes of 1972, is repealed.

SEC. 12. Section 21152 is added to the Public Resources Code, to read:

21152. Whenever a local agency approves or determines to carry out a project which is subject to the provisions of this division, it shall file notice of such approval or such determination with the county clerk of the county, or counties, in which the project will be located. Such notice shall indicate the determination of the local agency whether the project will, or will not, have a significant effect on the environment and shall indicate whether an environmental impact report has been prepared pursuant to the provisions of this division.

SEC. 12.5. Section 21153, as added to the Public Resources Code by Chapter 971 of the Statutes of 1972, is repealed.

SEC. 13. Section 21153 is added to the Public Resources Code, to read:

21153. Prior to completing an environmental impact report, every local agency shall consult with, and obtain comments from, any public agency which has jurisdiction by law with respect to the project, and may consult with any person who has special expertise with respect to any environmental impact involved.

SEC. 14. Section 21154 is added to the Public Resources Code, to read:

21154. Whenever any state agency, board, or commission issues an order which requires a local agency to carry out a project which may have a significant effect on the environment, any environmental impact report which the local agency may prepare shall be limited to consideration of those factors and alternatives which will not conflict with such order.

SEC. 15. Chapter 5 (commencing with Section 21160) is added to Division 13 of the Public Resources Code, to read:

CHAPTER 5. SUBMISSION OF INFORMATION

21160. Whenever any person applies to any public agency for a lease, permit, license, certificate, or other entitlement for use, the public agency may require that person to submit data and information which may be necessary to enable the public agency to

0889 15245 483

determine whether the proposed project may have a significant effect on the environment or to prepare an environmental impact report.

If any or all of the information so submitted is a "trade secret" as defined in Section 6254.7 of the Government Code by those submitting that information, it shall not be included in the impact report or otherwise disclosed by any public agency. This section shall not be construed to prohibit the exchange of properly designated trade secrets between public agencies who have lawful jurisdiction over the preparation of the impact report.

21161. Whenever a public agency has completed an environmental impact report, it shall cause a notice of completion of such report to be filed with the Secretary of the Resources Agency. The notice of completion shall briefly identify the project and shall indicate that an environmental impact report has been prepared. Failure to file the notice required by this section shall not affect the validity of a project.

SEC. 16. Chapter 6 (commencing with Section 21165) is added to Division 13 of the Public Resources Code, to read:

CHAPTER 6. LIMITATIONS

21165. When a project is to be carried out or approved by two or more public agencies, the determination of whether the project may have a significant effect on the environment shall be made by the lead agency and such agency shall prepare, or cause to be prepared by contract, the environmental impact report for the project, if such a report is required by this division. In the event that a dispute arises as to which is the lead agency, any public agency may submit the question to the Office of Planning and Research, and the Office of Planning and Research shall designate the lead agency, giving due consideration to the capacity of such agency to adequately fulfill the requirements of this division.

21166. When an environmental impact report has been prepared for a project pursuant to this division, no subsequent environmental impact report shall be required unless either of the following occurs:

(a) Substantial changes are proposed in the project which will require major revisions of the environmental impact report.

(b) Substantial changes occur with respect to the circumstances under which the project is being undertaken which will require major revisions in the environmental impact report.

21167. Any action or proceeding to attack, review, set aside, void, or annul the following acts or decisions of a public agency on the grounds of noncompliance with this division shall be commenced as follows:

(a) An action or proceeding alleging that a public agency is carrying out or has approved a project which may have a significant effect on the environment without having determined whether the project may have a significant effect on the environment shall be

0889 15965 487

commenced within 180 days of the public agency's decision to carry out or approve the project, or, if a project is undertaken without a formal decision by the public agency, within 180 days after commencement of the project.

(b) Any action or proceeding alleging that a public agency has improperly determined whether a project may have a significant effect on the environment shall be commenced within 30 days after the filing of the notice required by Section 21108 or 21152.

(c) Any action or proceeding alleging that an environmental impact report does not comply with the provisions of this division shall be commenced within 30 days after the filing of the notice required by Sections 21108 or 21152.

21167.5. Proof of prior service by mail upon the public agency carrying out or approving the project of a written notice of the commencement of any action or proceeding described in Section 21167 identifying the project shall be filed concurrently with the initial pleading in such action or proceeding.

21168. Any action or proceeding to attack, review, set aside, void or annul a determination or decision of a public agency, made as a result of a proceeding in which by law a hearing is required to be given, evidence is required to be taken and discretion in the determination of facts is vested in a public agency, on the grounds of noncompliance with the provisions of this division shall be in accordance with the provisions of Section 1094.5 of the Code of Civil Procedure.

In any such action, the court shall not exercise its independent judgment on the evidence but shall only determine whether the act or decision is supported by substantial evidence in the light of the whole record.

21168.5. In any action or proceeding, other than an action or proceeding under Section 21168, to attack, review, set aside, void or annul a determination or decision of a public agency on the grounds of noncompliance with this division, the inquiry shall extend only to whether there was a prejudicial abuse of discretion. Abuse of discretion is established if the agency has not proceeded in a manner required by law or if the determination or decision is not supported by substantial evidence.

21168.6. In any action or proceeding under Sections 21168 or 21168.5 against the Public Utilities Commission the writ of mandate shall lie only from the Supreme Court to such commission.

21168.7. Sections 21168 and 21168.5 are declaratory of existing law with respect to the judicial review of determinations or decisions of public agencies made pursuant to this division.

21169. Any project defined in subdivision (c) of Section 21065 undertaken, carried out or approved on or before the effective date of this section and the issuance by any public agency of any lease, permit, license, certificate or other entitlement for use executed or issued on or before the effective date of this section notwithstanding a failure to comply with this division, if otherwise legal and valid, is

0889 15290 492

hereby confirmed, validated and declared legally effective. Any project undertaken by a person which was supported in whole or part through contracts with one or more public agencies on or before the effective date of this section, notwithstanding a failure to comply with this division, if otherwise legal and valid, is hereby confirmed, validated and declared legally effective.

21170. (a) Section 21169 shall not operate to confirm, validate or give legal effect to any project the legality of which was being contested in a judicial proceeding in which proceeding the pleadings, prior to the effective date of this section, alleged facts constituting a cause of action for, or raised the issue of, a violation of this division and which was pending and undetermined on the effective date of this section; provided, however, that Section 21169 shall operate to confirm, validate or give legal effect to any project to which this subdivision applies if, prior to the commencement of judicial proceedings and in good faith and in reliance upon the issuance by a public agency of any lease, permit, license, certificate or other entitlement for use, substantial construction has been performed and substantial liabilities for construction and necessary materials have been incurred.

(b) Section 21169 shall not operate to confirm, validate or give legal effect to any project which had been determined in any judicial proceeding, on or before the effective date of this section to be illegal, void or ineffective because of noncompliance with this division.

21171. This division, except for Section 21169, shall not apply to the issuance of any lease, permit, license, certificate or other entitlement for use for any project defined in subdivision (c) of Section 21065 or to any project undertaken by a person which is supported in whole or in part through contracts with one or more public agencies until the 121st day after the effective date of this section. This section shall not apply to any project to which Section 21170 is applicable or to any successor project which is the same as, or substantially identical to, such a project.

This section shall not prohibit or prevent a public agency, prior to the 121st day after the effective date of this section, from considering environmental factors in connection with the approval or disapproval of a project and from imposing reasonable fees in connection therewith.

21172. This division shall not apply to any project undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish or replace property or facilities damaged or destroyed as a result of a disaster in a disaster stricken area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing with Section 8550) of Division 1, Title 2 of the Government Code.

21172.5. Until the 121st day after the effective date of this section, any objectives, criteria and procedures adopted by public agencies in compliance with this division shall govern the evaluation of

0 889 1 5 305 705

projects defined in subdivisions (a) and (b) of Section 21065 and the preparation of environmental impact reports on such projects when required by this division.

Any environmental impact report which has been completed or on which substantial work has been performed on or before the 121st day after the effective date of this section, if otherwise legally sufficient, shall, when completed, be deemed to be in compliance with this division and no further environmental impact report shall be required except as provided in Section 21166.

21173. If any provision of this division or the application thereof to any person or circumstances is held invalid, such invalidity shall not affect other provisions or applications of this division which can be given effect without the invalid provision or application thereof, and to this end the provisions of this division are severable.

21174. No provision of this division is a limitation or restriction on the power or authority of any public agency in the enforcement or administration of any provision of law which it is specifically permitted or required to enforce or administer including, but not limited to, the powers and authority granted to the California Coastal Zone Conservation Commission or any regional coastal zone conservation commission pursuant to Division 18 (commencing with Section 27000) of the Public Resources Code. To the extent of any inconsistency or conflict between the provisions of the California Coastal Zone Conservation Act of 1972, Division 18 (commencing with Section 27000) of the Public Resources Code, and the provisions of this division, the provisions of Division 18 (commencing with Section 27000) of the Public Resources Code shall control.

SEC. 17. The Legislature finds and declares that Section 1 of this act is intended to clarify existing provisions of the Environmental Quality Act of 1970 and thereby to facilitate and to promote uniform administration of the Environmental Quality Act of 1970 throughout the state. It is therefore the intent of the Legislature in enacting Section 1 of this act only to declare and to clarify existing law.

SEC. 18. Sections 11.5 and 12.5 of this act shall become operative at the same time as Chapter 971 of the Statutes of 1972 becomes effective.

SEC. 19. This act is an urgency statute necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into effect immediately. The facts constituting such necessity are: In order to provide a clear definition of the responsibilities of governmental agencies under the Environmental Quality Act of 1970, and in order to lend certainty to the status of various projects which have been, or are about to be, undertaken so as to permit the orderly processing and evaluation of such projects at the earliest possible time it is necessary that this act take effect immediately.

0889 15325 499

CHAPTER 222

An act to amend Section 21062 of, and to add Sections 21175 and 21176 to, the Public Resources Code, relating to environmental quality, and declaring the urgency thereof, to take effect immediately.

[Approved by Governor July 4, 1975. Filed with Secretary of State July 5, 1975.]

The people of the State of California do enact as follows:

0335 28 10 90 429

3016

SECTION 1. Section 21062 of the Public Resources Code is amended to read:

21062. "Local agency" means any public agency other than a state agency, board, or commission. For purposes of this division a redevelopment agency and a local agency formation commission are local agencies, and neither is a state agency, board, or commission.

SEC. 2. Section 21175 is added to the Public Resources Code, to read:

21175. In the event that a local agency formation commission, acting pursuant to the provisions of Chapter 6.6 (commencing with Section 54773) of Part 1 of Division 2 of Title 5 of, or pursuant to Division 1 (commencing with Section 56000) of Title 6 of, the Government Code, has approved a project without complying with this division, such approval is hereby confirmed, validated, and declared legally effective notwithstanding the failure to comply with this division; provided, that such approval shall have occurred prior to February 7, 1975.

SEC. 3. Section 21176 is added to the Public Resources Code, to read:

21176. (a) Section 21175 shall not operate to confirm, validate, or give legal effect to any project, the legality of which was being contested in a judicial proceeding in which proceeding the pleadings, prior to February 7, 1975, alleged facts constituting a cause of action for, or raised the issue of, a violation of this division, and which was pending and undetermined on February 7, 1975.

(b) Section 21175 shall not operate to confirm, validate, or give legal effect to any project which had been determined in any judicial proceeding, on or before the effective date of this section, to be illegal, void, or ineffective because of noncompliance with this division.

SEC. 4. Notwithstanding any other provision of law, any matter initiated pursuant to Chapter 6.6 (commencing with Section 54773) of Part 1 of Division 2 of Title 5 of, or pursuant to Division 1 (commencing with Section 56000) of Title 6 of, the Government Code, and pending before a local agency formation commission on February 7, 1975, may be continued by such local agency formation commission for such time as may be necessary to comply with the provisions of Division 13 (commencing with Section 21000) of the Public Resources Code.

SEC. 5. This act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

In order to remove ambiguity about the status of various proposals which have been approved by local agency formation commissions and about proposals currently pending before such commissions as soon as possible, it is necessary that this act take effect immediately.

0335 28 10 110 433

CHAPTER 1312

An act to amend Sections 21050, 21061, 21080, 21082, 21083, 21084, 21085, 21087, 21089, 21100, 21168, and 21168.5 of, and to add Sections 21002, 21002.1, 21003, 21060.3, 21061.1, 21064, 21068, 21069, 21081, 21082.1, 21092, 21100.1, 21151.5, and 21167.1 to, the Public Resources Code, relating to environmental quality.

[Approved by Governor September 28, 1976. Filed with Secretary of State September 29, 1976.]

The people of the State of California do enact as follows:

SECTION 1. Section 21002 is added to the Public Resources Code, to read:

21002. The Legislature finds and declares that it is the policy of the state that public agencies should not approve projects as

proposed if there are feasible alternatives or feasible mitigation measures available which would substantially lessen the significant environmental effects of such projects, and that the procedures required by this division are intended to assist public agencies in systematically identifying both the significant effects of proposed projects and the feasible alternatives or feasible mitigation measures which will avoid or substantially lessen such significant effects. The Legislature further finds and declares that in the event specific economic, social, or other conditions make infeasible such project alternatives or such mitigation measures, individual projects may be approved in spite of one of more significant effects thereof.

SEC. 1.5. Section 21002.1 is added to the Public Resources Code, to read:

21002.1. In order to achieve the objectives set forth in Section 21002 the Legislature finds and delares that the following policy shall apply to the use of environmental impact reports prepared pursuant to the provisions of this division:

(a) The purpose of an environmental impact report is to identify the significant effects of a project on the environment, to identify alternatives to the project, and to indicate the manner in which such significant effects can be mitigated or avoided.

(b) Each public agency shall mitigate or avoid the significant effects on the environment of projects it approves or carries out whenever it is feasible to do so.

(c) In the event that economic, social, or other conditions make it infeasible to mitigate one or more significant effects of a project on the environment, such project may nonetheless be approved or carried out at the discretion of a public agency, provided that the project is otherwise permissible under applicable laws and regulations.

(d) In applying the policies of subdivisions (b) and (c) to individual projects, the responsibility of a local agency which is functioning as a lead agency shall differ from that of a local agency which is functioning as a responsible agency. A local agency functioning as a lead agency shall have responsibility for considering the effects, both individual and collective, of all activities involved in a project. A local agency functioning as a responsible agency shall have responsibility for considering only the effects of those activities involved in a project, which it is required by law to carry out or approve.

SEC. 2. Section 21003 is added to the Public Resources Code, to read:

21003. The Legislature further finds and declares that it is the policy of the state that:

(a) Local agencies integrate the requirements of this division with planning and environmental review procedures otherwise required by law or by local practice so that all such procedures, to the maximum feasible extent, run concurrently, rather than consecutively.

(b) Documents prepared pursuant to this division be organized and written in such a manner that they will be meaningful and useful to decisionmakers and to the public.

(c) Environmental impact reports omit unnecessary descriptions of projects and emphasize feasible mitigation measures and alternatives to projects.

(d) Information developed in individual environmental impact reports be incorporated into a data base which can be used to reduce delay and duplication in preparation of subsequent environmental impact reports.

(e) Information developed in environmental impact reports covering larger geographical areas be used to contribute to information required in specific environmental impact reports.

SEC. 3. Section 21050 of the Public Resources Code is amended to read:

21050. This division shall be known and may be cited as the California Environmental Quality Act.

SEC. 4. Section 21060.3 is added to the Public Resources Code, to read:

21060.3. "Emergency" means a sudden, unexpected occurrence, involving a clear and imminent danger, demanding immediate action to prevent or mitigate loss of, or damage to, life, health, property, or essential public services. "Emergency" includes such occurrences as fire, flood, earthquake, or other soil or geologic movements, as well as such occurrences as riot, accident, or sabotage.

SEC. 5. Section 21061 of the Public Resources Code is amended to read:

21061. "Environmental impact report" means a detailed statement setting forth the matters specified in Sections 21100 and 21100.1; provided that information or data which is relevant to such a statement and is a matter of public record or is generally available to the public need not be repeated in its entirety in such statement, but may be specifically cited as the source for conclusions stated therein; and provided further that such information or data shall be briefly described, that its relationship to the environmental impact report shall be indicated, and that the source thereof shall be reasonably available for inspection at a public place or public building. An environmental impact report also includes any comments which are obtained pursuant to Section 21104 or 21153, or which are required to be obtained pursuant to this division.

An environmental impact report is an informational document which, when its preparation is required by this division, shall be considered by every public agency prior to its approval or disapproval of a project. The purpose of an environmental impact report is to provide public agencies and the public in general with detailed information about the effect which a proposed project is likely to have on the environment; to list ways in which the significant effects of such a project might be minimized; and to indicate alternatives to such a project.

02679 28 4 100 29

In order to facilitate the use of environmental impact reports, public agencies shall require that such reports contain an index or table of contents and a summary. Failure to include such index, table of contents, or summary shall not constitute a cause of action pursuant to Section 21167.

SEC. 5.1. Section 21061.1 is added to the Public Resources Code, to read:

21061.1. "Feasible" means capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, social, and technological factors.

SEC. 6. Section 21064 is added to the Public Resources Code, to read:

21064. "Negative declaration" means a written statement briefly describing the reasons that a proposed project will not have a significant effect on the environment and does not require the preparation of an environmental impact report.

SEC. 7. Section 21068 is added to the Public Resources Code, to read:

21068. "Significant effect on the environment" means a substantial, or potentially substantial, adverse change in the environment.

SEC. 7.1. Section 21069 is added to the Public Resources Code, to read:

21069. "Responsible agency" means a public agency, other than the lead agency, which has responsibility for carrying out or approving a project.

SEC. 8. Section 21080 of the Public Resources Code is amended to read:

21080. (a) Except as otherwise provided in this division, this division shall apply to discretionary projects proposed to be carried out or approved by public agencies, including, but not limited to, the enactment and amendment of zoning ordinances, the issuance of zoning variances, the issuance of conditional use permits and the approval of tentative subdivision maps (except where such a project is exempt from the preparation of an environmental impact report pursuant to Section 21166).

(b) This division shall not apply to the following:

(1) Ministerial projects proposed to be carried out or approved by public agencies.

(2) Emergency repairs to public service facilities necessary to maintain service.

(3) Projects undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish, or replace property or facilities damaged or destroyed as a result of a disaster in a disaster-stricken area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing with Section 8550) of Division 1 of Title 2 of the Government Code.

(4) Specific actions, necessary to prevent or mitigate an emergency.

(c) In the event that a public agency determines that a proposed project, not otherwise exempt from the provisions of this division, does not have a significant effect on the environment, such public agency shall adopt a negative declaration to that effect.

SEC. 9. Section 21081 is added to the Public Resources Code, to read:

21081. Pursuant to the policy stated in Sections 21002 and 21002.1, no public agency shall approve or carry out a project for which an environmental impact report has been completed which identifies one or more significant effects thereof unless such public agency makes one, or more, of the following findings:

(a) Changes or alterations have been required in, or incorporated into, such project which mitigate or avoid the significant environmental effects thereof as identified in the completed environmental impact report.

(b) Such changes or alterations are within the responsibility and jurisdiction of another public agency and such changes have been adopted by such other agency, or can and should be adopted by such other agency.

(c) Specific economic, social, or other considerations make infeasible the mitigation measures or project alternatives identified in the environmental impact report.

SEC. 9.5. Section 21082 of the Public Resources Code is amended to read:

21082. All public agencies shall adopt by ordinance, resolution, rule, or regulation, objectives, criteria, and procedures for the evaluation of projects and the preparation of environmental impact reports and negative declarations pursuant to this division. A school district, or any other district, whose boundaries are coterminous with a city, county, or city and county, may utilize the objectives, criteria, and procedures of the city, county, or city and county, as may be applicable, in which case, the school district or other district need not adopt objectives, criteria, and procedures of its own. The objectives, criteria, and procedures shall be consistent with the provisions of this division and with the guidelines adopted by the Secretary of the Resources Agency pursuant to Section 21083. Such objectives, criteria, and procedures shall be adopted by each public agency no later than 60 days after the Secretary of the Resources Agency has adopted guidelines pursuant to Section 21083.

SEC. 9.6. Section 21082.1 is added to the Public Resources Code, to read:

21082.1. Any environmental impact report or negative declaration prepared pursuant to the requirement of this division shall be prepared directly by, or under contract to, a public agency.

This section is not intended to prohibit, and shall not be construed as prohibiting, any person from submitting information to the public agency responsible for preparing an environmental impact report or negative declaration. Such information may be submitted in any format and may be included in whole or in part in any such report or declaration.

02679 284125 34

SEC. 10. Section 21083 of the Public Resources Code is amended to read:

21083. The Office of Planning and Research shall prepare and develop proposed guidelines for the implementation of this division by public agencies. Such guidelines shall include objectives and criteria for the orderly evaluation of projects and the preparation of environmental impact reports and negative declarations in a manner consistent with this division.

Such guidelines shall specifically include criteria for public agencies to follow in determining whether or not a proposed project may have a "significant effect on the environment". Such criteria shall require a finding that a project may have a "significant effect on the environment" if any of the following conditions exist:

(a) A proposed project has the potential to degrade the quality of the environment, curtail the range of the environment, or to achieve short-term, to the disadvantage of long-term, environmental goals.

(b) The possible effects of a project are individually limited but cumulatively considerable. As used in this subdivision, "cumulatively considerable" means that the incremental effects of an individual project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.

(c) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

Such guidelines shall also include procedures for determining the lead agency pursuant to the provisions of Section 21165.

Such guidelines shall also include criteria for public agencies to use in determining when a proposed project is of sufficient statewide, regional, or areawide environmental significance that it should be submitted to appropriate state agencies for review and comment prior to completion of an environmental impact report or negative declaration thereon.

The Office of Planning and Research shall develop and prepare such proposed guidelines as soon as possible and shall transmit them immediately to the Secretary of the Resources Agency. No later than 60 days after the effective date of this section the Secretary of the Resources Agency shall certify and adopt such guidelines pursuant to Chapter 4.5 (commencing with Section 11371) of Part 1, Division 3, Title 2 of the Government Code, which shall become effective upon the filing thereof, provided that such guidelines shall not be adopted without compliance with Sections 11423, 11424, and 11425 of the Government Code.

SEC. 10.5. Section 21084 of the Public Resources Code is amended to read:

21084. (a) The guidelines prepared and adopted pursuant to Section 21083 shall include a list of classes of projects which have been determined not to have a significant effect on the environment and which shall be exempt from the provisions of this division. In

02679 28 4 135 36

adopting the guidelines, the Secretary of the Resources Agency shall make a finding that the list or classification of projects referred to in this section do not have a significant effect on the environment.

(b) No project of the Department of Transportation which will result in damage to scenic resources, including, but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within an official state scenic highway, as designated pursuant to Section 262 of the Streets and Highways Code, shall be exempted from this division pursuant to subdivision (a).

SEC. 11. Section 21085 of the Public Resources Code is amended to read:

21085. All classes of projects designated pursuant to Section 21084 shall be exempt from the provisions of this division.

SEC. 12. Section 21087 of the Public Resources Code is amended to read:

21087. The Office of Planning and Research shall periodically review the guidelines adopted pursuant to Section 21083 and shall recommend proposed changes or amendments to the Secretary of the Resources Agency. Changes or amendments to the guidelines shall be adopted by the Secretary of the Resources Agency in conformance with Chapter 4.5 (commencing with Section 11371) of Part 1, Division 3, Title 2 of the Government Code.

SEC. 13. Section 21089 of the Public Resources Code is amended to read:

21089. A public agency may charge and collect a reasonable fee from any person proposing a project subject to the provisions of this division in order to recover the estimated costs incurred by the public agency in preparing a negative declaration or an environmental impact report for such project.

SEC. 15. Section 21092 is added to the Public Resources Code, to read:

21092. Any public agency which is preparing an environmental impact report or a negative declaration shall provide public notice of such fact within a reasonable period of time prior to final adoption by the public agency of such environmental impact report or negative declaration. Notice shall be given to all organizations and individuals who have previously requested such notice and shall also be given by at least one of the following procedures:

(a) Publication, no fewer times than required by Section 6061 of the Government Code, by the public agency in a newspaper of general circulation in the area affected by the proposed project.

(b) Posting of notice by the public agency on- and off-site in the area where the project is to be located.

(c) Direct mailing to owners of contiguous property.

The alternatives for providing notice specified in subdivisions (a) to (c), inclusive, shall not preclude a public agency from providing additional notice by other means if such agency so desires, nor shall the requirements of this section preclude a public agency from providing the public notice required herein at the same time and in

the same manner as public notice otherwise required by law for such project.

SEC. 16. Section 21100 of the Public Resources Code is amended to read:

21100. All state agencies, boards, and commissions shall prepare, or cause to be prepared by contract, and certify the completion of an environmental impact report on any project they propose to carry out or approve which may have a significant effect on the environment. Such a report shall include a detailed statement setting forth the following:

(a) The significant environmental effects of the proposed project.

(b) Any significant environmental effects which cannot be avoided if the project is implemented.

(c) Mitigation measures proposed to minimize the significant environmental effects including, but not limited to, measures to reduce wasteful, inefficient, and unnecessary consumption of energy.

(d) Alternatives to the proposed project.

(e) The relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity.

(f) Any significant irreversible environmental changes which would be involved in the proposed project should it be implemented.

(g) The growth-inducing impact of the proposed project.

The report shall also contain a statement briefly indicating the reasons for determining that various effects of a project are not significant and consequently have not been discussed in detail in the environmental impact report.

SEC. 17. Section 21100.1 is added to the Public Resources Code, to read:

21100.1. The information described in subdivisions (e) and (f) of Section 21100 shall be required only in environmental impact reports prepared in connection with the following:

(a) The adoption, amendment, or enactment of a plan, policy, or ordinance of a public agency.

(b) The adoption by a local agency formation commission of a resolution making determinations.

(c) A project which will be subject to the requirement for preparing an environmental impact statement pursuant to the requirements of the National Environmental Policy Act of 1969.

SEC. 18. Section 21151.5 is added to the Public Resources Code, to read:

21151.5. Local agencies shall establish, by ordinance or resolution, time limits, not to exceed one year, for completing environmental impact reports and negative declarations for projects described in subdivision (c) of Section 21065. Such ordinances or resolutions may establish different time limits for different types or classes of projects, but all such limits shall be measured from the date on which an application requesting approval of such project is received by the

02679 28 4 165 42

local agency. The ordinances required by this section may provide for a reasonable extension of such time period in the event that unforeseen circumstances justify additional time and that the project applicant consents thereto.

SEC. 19. Section 21167.1 is added to the Public Resources Code, to read:

21167.1. In all actions brought pursuant to Section 21167, including the hearing of any such action on appeal from the decision of a lower court, all courts wherein such actions are or may hereafter be pending, shall give such actions preference over all other civil actions therein, in the matter of setting the same for hearing or trial, and in hearing the same, to the end that all such actions shall be quickly heard and determined.

SEC. 19.1. Section 21168 of the Public Resources Code is amended to read:

21168. Any action or proceeding to attack, review, set aside, void or annul a determination, finding, or decision of a public agency, made as a result of a proceeding in which by law a hearing is required to be given, evidence is required to be taken and discretion in the determination of facts is vested in a public agency, on the grounds of noncompliance with the provisions of this division shall be in accordance with the provisions of Section 1094.5 of the Code of Civil Procedure.

In any such action, the court shall not exercise its independent judgment on the evidence but shall only determine whether the act or decision is supported by substantial evidence in the light of the whole record.

SEC. 19.2. Section 21168.5 of the Public Resources Code is amended to read:

21168.5. In any action or proceeding, other than an action or proceeding under Section 21168, to attack, review, set aside, void or annul a determination, finding, or decision of a public agency on the grounds of noncompliance with this division, the inquiry shall extend only to whether there was a prejudicial abuse of discretion. Abuse of discretion is established if the agency has not proceeded in a manner required by law or if the determination or decision is not supported by substantial evidence.

SEC. 20. Notwithstanding Section 2231 of the Revenue and Taxation Code, there shall be no reimbursement pursuant to this section nor shall there be any appropriation made by this act because there are minor savings as well as minor costs in this act which, in the aggregate, do not result in significant identifiable cost changes.

SEC. 21. The Legislature declares that it makes no finding whether Sections 21002, 21002.1, and 21082.1, as added to the Public Resources Code by this act, are, or are not, declaratory of existing law.

02679 28 4 180 45

CHAPTER 1200

An act to add Chapter 4.5 (commencing with Section 65920) to Division 1 of Title 7 of the Government Code, and to amend Sections 21002.1, 21080, 21080.5, 21083.5, 21104, 21105, 21151.5, 21153, 21165, 21166, 21167, and 21174 of, and to add Sections 21080.1, 21080.2, 21080.3, 21080.4, 21083.6, 21083.7, 21100.2, 21167.2, and 21167.3 to, the Public Resources Code, relating to development projects, and making an appropriation therefor.

[Approved by Governor September 30, 1977. Filed with Secretary of State October 1, 1977.]

The people of the State of California do enact as follows:

SECTION 1. Chapter 4.5 (commencing with Section 65920) is added to Division 1 of Title 7 of the Government Code, to read:

CHAPTER 4.5. REVIEW AND APPROVAL OF DEVELOPMENT PROJECTS

Article 1. General Provisions

65920. Notwithstanding any other provision of law, the provisions of this chapter shall apply to all public agencies to the extent specified in this chapter. To the extent that the provisions of this chapter conflict with any other provision of law, the provisions of this chapter shall prevail.

65921. The Legislature finds and declares that there is a statewide need to ensure clear understanding of the specific requirements which must be met in connection with the approval of development projects and to expedite decisions on such projects. Consequently, the provisions of this chapter shall be applicable to all public agencies, including charter cities.

65922. The provisions of this chapter shall not apply to the State Energy Resources Conservation and Development Commission.

65923. The Office of Planning and Research shall ensure that all state agencies comply with applicable requirements of this chapter.

65924. With respect to any development project an application for which has been accepted as complete prior to January 1, 1978, the deadlines specified in Sections 65950 and 65952 shall be measured from January 1, 1978.

0884 1010 1200

Article 2. Definitions

65925. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

65926. "Air pollution control district" means any district created or continued in existence pursuant to the provisions of Part 3 (commencing with Section 40000) of Division 26 of the Health and Safety Code.

65927. "Development" means, on land, in or under water, the placement or erection of any solid material or structure; discharge or disposal of any dredged material or of any gaseous, liquid, solid, or thermal waste; grading, removing, dredging, mining, or extraction of any materials; change in the density or intensity of use of land, including, but not limited to, subdivision pursuant to the Subdivision Map Act (commencing with Section 66410 of the Government Code), and any other division of land except where the land division is brought about in connection with the purchase of such land by a public agency for public recreational use; change in the intensity of use of water, or of access thereto; construction, reconstruction, demolition, or alteration of the size of any structure, including any facility of any private, public, or municipal utility; and the removal or harvesting of major vegetation other than for agricultural purposes, kelp harvesting, and timber operations which are in accordance with a timber harvesting plan submitted pursuant to the provisions of the Z'berg-Nejedly Forest Practice Act of 1973 (commencing with Section 4511 of the Public Resources Code).

As used in this section, "structure" includes, but is not limited to, any building, road, pipe, flume, conduit, siphon, aqueduct, telephone line, and electrical power transmission and distribution line.

65928. "Development project" means any project undertaken for the purpose of development.

65929. "Lead agency" means the public agency which has the principal responsibility for carrying out or approving a project.

65930. "Local agency" means any public agency other than a state agency. For purposes of this chapter, a redevelopment agency and a local agency formation commission are local agencies and neither is a state agency.

65931. "Project" means any activity involving the issuance to a person of a lease, permit, license, certificate, or other entitlement for use by one or more public agencies.

65932. "Public agency" means any state agency, any county, city and county, city, regional agency, public district, redevelopment agency, or other political subdivision.

65933. "Responsible agency" means a public agency, other than the lead agency, which has responsibility for carrying out or approving a project.

65934. "State agency" means any agency, board, or commission of state government. For all purposes of this chapter, the term "state agency" shall include an air pollution control district.

0884 1020 1200

Article 3. Applications for Development Projects

65940. Not later than June 30, 1978, each state agency shall compile one or more lists which shall specify in detail the information which will be required from any applicant for a development project. Copies of such information shall be made available to all applicants for development projects and to any person who requests such information.

65941. The information compiled pursuant to Section 65940 shall also indicate the criteria which such agency will apply in order to determine the completeness of any application submitted to it for a development project.

65942. The information and the criteria specified in Sections 65940 and 65941 shall be revised as needed so that they shall be current and accurate at all times.

65943. Not later than 30 calendar days after any public agency has received an application for a development project, such agency shall determine in writing whether such application is complete and shall immediately transmit such determination to the applicant for the development project. In the event that the application is determined not to be complete, the agency's determination shall specify those parts of the application which are incomplete and shall indicate the manner in which they can be made complete.

65944. After a public agency accepts an application as complete, such agency shall not subsequently request of an applicant any new or additional information which, with respect to a state agency, was not specified in the list prepared pursuant to Section 65940, or, with respect to a local agency, was not required as part of the application. Such agency may, in the course of processing the application, request the applicant to clarify, amplify, correct, or otherwise supplement the information required for the application.

Article 4. Consolidated Hearings on Development Projects

65945. In the event that a development project requires approval by more than one public agency, the Office of Planning and Research shall, to the maximum extent feasible, consolidate the various hearings which may be required in order to minimize the time required for such hearings. Such consolidation shall be for procedural purposes only and shall not be construed as consolidating the statutory responsibilities of the public agencies conducting the consolidated hearings.

Article 5. Approval of Development Permits

65950. Any public agency which is the lead agency for a development project shall approve or disapprove such project within one year from the date on which an application requesting approval of such project has been received and accepted as complete by such

0884 1030 1200

agency.

65951. In the event that a combined environmental impact report-environmental impact statement is being prepared on a development project pursuant to Section 21083.6 of the Public Resources Code, a lead agency may waive the time limits established in Section 65950. In any event, such lead agency shall approve or disapprove such project within 60 days after the combined environmental impact report-environmental impact statement has been completed and adopted.

65952. Any public agency which is a responsible agency for a development project shall approve or disapprove such project within whichever of the following periods of time is longer:

(a) Within 180 days from the date on which the lead agency has approved or disapproved such project.

(b) Within 180 days of the date on which completed applications for such projects have been received and accepted as complete by each such responsible agency.

65953. All time limits specified in this article are maximum time limits for approving or disapproving development projects. All public agencies shall, if possible, approve or disapprove development projects in shorter periods of time.

65954. The time limits established by this article shall not apply in the event that federal statutes or regulations require time schedules which exceed such time limits.

65955. The time limits established by this article shall not apply to applications to appropriate water where such applications have been protested pursuant to Chapter 4 (commencing with Section 1330) of Part 2 of Division 2 of the Water Code.

65956. In the event that a lead agency or a responsible agency fails to act to approve or to disapprove a project within the time limits required by this article, such failure to act shall be deemed approval of the development project.

65957. The time limits established by Sections 65950 and 65952 may be extended for a period not to exceed 90 days upon consent of the public agency and the applicant.

SEC. 1.5. Section 21002.1 of the Public Resources Code is amended to read:

21002.1. In order to achieve the objectives set forth in Section 21002, the Legislature finds and declares that the following policy shall apply to the use of environmental impact reports prepared pursuant to the provisions of this division:

(a) The purpose of an environmental impact report is to identify the significant effects of a project on the environment, to identify alternatives to the project, and to indicate the manner in which such significant effects can be mitigated or avoided.

(b) Each public agency shall mitigate or avoid the significant effects on the environment of projects it approves or carries out whenever it is feasible to do so.

(c) In the event that economic, social, or other conditions make

it infeasible to mitigate one or more significant effects of a project on the environment, such project may nonetheless be approved or carried out at the discretion of a public agency, provided that the project is otherwise permissible under applicable laws and regulations.

(d) In applying the policies of subdivisions (b) and (c) to individual projects, the responsibility of a public agency which is functioning as a lead agency shall differ from that of a public agency which is functioning as a responsible agency. A public agency functioning as a lead agency shall have responsibility for considering the effects, both individual and collective, of all activities involved in a project. A public agency functioning as a responsible agency shall have responsibility for considering only the effects of those activities involved in a project, which it is required by law to carry out or approve. The provisions of this subdivision shall apply only to decisions by a public agency to carry out or approve a project and shall not limit the scope of the comments such agency may wish to make pursuant to Section 21104 or 21153.

SEC. 2. Section 21080 of the Public Resources Code is amended to read:

21080. (a) Except as otherwise provided in this division, this division shall apply to discretionary projects proposed to be carried out or approved by public agencies, including, but not limited to, the enactment and amendment of zoning ordinances, the issuance of zoning variances, the issuance of conditional use permits, and the approval of tentative subdivision maps (except where such a project is exempt from the preparation of an environmental impact report pursuant to Section 21166).

(b) This division shall not apply to the following:

(1) Ministerial projects proposed to be carried out or approved by public agencies.

(2) Emergency repairs to public service facilities necessary to maintain service.

(3) Projects undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish, or replace property or facilities damaged or destroyed as a result of a disaster in a disaster-stricken area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing with Section 8550) of Division 1 of Title 2 of the Government Code.

(4) Specific actions, necessary to prevent or mitigate an emergency.

(5) Projects which a public agency rejects or disapproves.

(c) In the event that a lead agency determines that a proposed project, not otherwise exempt from the provisions of this division, does not have a significant effect on the environment, such lead agency shall adopt a negative declaration to that effect.

SEC. 3. Section 21080.1 is added to the Public Resources Code, to read:

21080.1. The lead agency shall have the responsibility for

0882 505 7000

determining whether an environmental impact report or a negative declaration shall be required for any project subject to the provisions of this division. Such determination shall be final and conclusive on all persons, including responsible agencies, unless challenged as provided in Section 21167.

SEC. 4. Section 21080.2 is added to the Public Resources Code, to read:

21080.2. In the case of a project described in subdivision (c) of Section 21065, the determination required by Section 21080.1 shall be made within 45 days from the date on which an application for a project has been received and accepted as complete by the lead agency.

SEC. 5. Section 21080.3 is added to the Public Resources Code, to read:

21080.3. (a) Prior to determining whether a negative declaration or environmental impact report is required for a project, the lead agency shall consult with all responsible agencies.

(b) In order to expedite the requirements of subdivision (a), the Office of Planning and Research, upon request of a lead agency, shall assist such lead agency in determining the various responsible agencies for a proposed project. In the case of a project described in subdivision (c) of Section 21065, such a request may also be made by the project applicant.

SEC. 6. Section 21080.4 is added to the Public Resources Code, to read:

21080.4. (a) In the event that a lead agency determines that an environmental impact report is required for a project, such lead agency shall immediately send notice of such determination by certified mail to each responsible agency. Upon receipt of such notice, each responsible agency shall specify to the lead agency the scope and content of the environmental information which is germane to such responsible agency's statutory responsibilities in connection with the proposed project and which, pursuant to the requirements of this division, shall be included in the environmental impact report. Such information shall be specified in writing and shall be communicated to the lead agency by certified mail not later than 45 days after receipt of the notice of the lead agency's determination. The lead agency shall request similar guidance from appropriate federal agencies.

(b) In order to expedite the requirements of subdivision (a), the lead agency or any responsible agency may request one or more meetings between representatives of such agencies for the purpose of assisting the lead agency to determine the scope and content of the environmental information such responsible agency may require. In the case of a project described in subdivision (c) of Section 21065, such a request may also be made by the project applicant. Such meetings shall be convened by the lead agency as soon as possible, but no later than 30 days, after they have been requested.

(c) In order to expedite the requirements of subdivision (a), the Office of Planning and Research, upon request of a lead agency, shall assist such lead agency in determining the various responsible agencies and any federal agencies which have responsibility for carrying out or approving a proposed project. In the case of a project described in subdivision (c) of Section 21065, such a request may also be made by the project applicant.

(d) In the event that a state agency is a responsible agency subject to the requirements of subdivision (a), the Office of Planning and Research shall ensure that the information required by subdivision (a) is transmitted to the lead agency within the required time period.

SEC. 6.5. Section 21080.5 of the Public Resources Code is amended to read:

21080.5. (a) When the regulatory program of a state agency, board, or commission requires a plan or other written documentation, containing environmental information and complying with the requirements of paragraph (3) of subdivision (d) of this section, to be submitted in support of any of the activities listed in subdivision (b), such plan or other written documentation may be submitted in lieu of the environmental impact report required by this division; provided, that the Secretary of the Resources Agency has certified the regulatory program pursuant to this section.

(b) The provisions of this section shall apply only to regulatory programs or portions thereof which involve:

(1) The issuance to a person, other than a public agency, of a lease, permit, license, certificate, or other entitlement for use; or

(2) The adoption or approval of standards, rules, regulations or plans for use in the regulatory program.

(c) A regulatory program certified pursuant to this section is exempt from the provisions of Chapter 3 (commencing with Section 21100) of this division.

(d) In order to qualify for certification pursuant to this section, a regulatory program shall require utilization of an interdisciplinary approach which will ensure the integrated use of the natural and social sciences in decisionmaking and shall meet all of the following criteria;

(1) The enabling legislation of the regulatory program shall:

(i) Include protection of the environment among its principal purposes.

(ii) Contain authority for the administering agency to promulgate rules and regulations for the protection of the environment, guided by standards set forth in the enabling legislation.

(2) The rules and regulations adopted by the administering agency shall:

(i) Require that an activity will not be approved or adopted as proposed if there are feasible alternatives or feasible mitigation measures available which would substantially lessen any significant adverse impact which the activity may have on the environment.

0884 6510 1200

(ii) Include guidelines for the orderly evaluation of proposed activities and the preparation of the plan or other written documentation in a manner consistent with the environmental protection purposes of the regulatory program.

(iii) Require the administering agency to consult with all public agencies which have jurisdiction, by law, with respect to the proposed activity.

(iv) Require that final action on the proposed activity include the written responses of the issuing authority to significant environmental points raised during the evaluation process.

(v) Require the filing of a notice of the decision by the administering agency on the proposed activity with the Secretary of the Resources Agency. Such notices shall be available for public inspection, and a list of such notices shall be posted on a weekly basis in the office of the Resources Agency. Each such list shall remain posted for a period of 30 days.

(vi) Require notice of the filing of the plan or other written documentation to be made to the public and to any person who requests, in writing, such notification. The notification shall be made in a manner that will provide the public or any such person with sufficient time to review and comment on such filing.

(3) The plan or other written documentation required by the regulatory program shall:

(i) Include a description of the proposed activity with alternatives to the activity, and mitigation measures to minimize any significant adverse environmental impact.

(ii) Be available for a reasonable time for review and comment by other public agencies and the general public.

(e) The Secretary of the Resources Agency shall certify a regulatory program which the secretary determines meets all the qualifications for certification set forth in this section, and withdraw certification on determination that the regulatory program no longer meets such qualifications. Certification and withdrawal of certification shall occur only after compliance with Chapter 4.5 (commencing with Section 11371) of Part 1 of Division 3 of Title 2 of the Government Code.

(f) Any action or proceeding to attack, review, set aside, void, or annul a determination or decision of a state agency, board, or commission approving or adopting a proposed activity under a regulatory program which has been certified pursuant to this section on the basis that the plan or other written documentation prepared pursuant to paragraph (3) of subdivision (d) does not comply with the provisions of this section shall be commenced no later than 30 days from the date of the filing of notice of the approval or adoption of the activity.

SEC. 7. Section 21083.5 of the Public Resources Code is amended to read:

21083.5. The guidelines prepared and adopted pursuant to Section 21083 shall provide that when an environmental impact statement

has been, or will be, prepared for the same project pursuant to the requirements of the National Environmental Policy Act of 1969 and implementing regulations thereto, all or any part of such statement may be submitted in lieu of all or any part of an environmental impact report required by this division, provided that such statement, or the part thereof so used, shall comply with the requirements of this division and the guidelines adopted pursuant thereto.

SEC. 8. Section 21083.6 is added to the Public Resources Code, to read:

21083.6. In the event that a project requires both an environmental impact report prepared pursuant to the requirements of this division and an environmental impact statement prepared pursuant to the requirements of the National Environmental Policy Act of 1969, an applicant may request and the lead agency may waive the time limits established pursuant to Section 21100.2 or 21151.5 if it finds that additional time is required to prepare a combined environmental impact report-environmental impact statement and that the time required to prepare such a combined document would be shorter than that required to prepare each document separately.

SEC. 9. Section 21083.7 is added to the Public Resources Code, to read:

21083.7. In the event that a project requires both an environmental impact report prepared pursuant to the requirements of this division and an environmental impact statement prepared pursuant to the requirements of the National Environmental Policy Act of 1969, the lead agency shall, whenever possible, use the environmental impact statement as such environmental impact report as provided in Section 21083.5. In order to implement the provisions of this section, each lead agency to which this section is applicable shall consult, as soon as possible, with the agency required to prepare such environmental impact statement.

SEC. 10. Section 21100.2 is added to the Public Resources Code, to read:

21100.2. Each state agency shall establish, by resolution or order, time limits, not to exceed one year for completing and certifying environmental impact reports, and 105 days for negative declarations, for projects described in subdivision (c) of Section 21065. Such time limits shall apply only to those circumstances in which such state agency is the lead agency for a project. Such resolutions or orders may establish different time limits for different types or classes of projects, but all such limits shall be measured from the date on which an application requesting approval of such project is received and accepted as complete by the state agency. The resolutions or orders required by this section may provide for a reasonable extension of such time period in the event that compelling circumstances justify additional time and the project applicant consents thereto.

SEC. 11. Section 21104 of the Public Resources Code is amended

0884 1105 1200

to read:

21104. Prior to completing an environmental impact report, the state lead agency shall consult with, and obtain comments from, each responsible agency and any public agency which has jurisdiction by law with respect to the project, and may consult with any person who has special expertise with respect to any environmental impact involved.

The state lead agency shall consult with, and obtain comments from, the State Air Resources Board in preparing an environmental impact report on a highway or freeway project, as to the air pollution impact of the potential vehicular use of such highway or freeway.

SEC. 12. Section 21105 of the Public Resources Code is amended to read:

21105. The state lead agency shall include the environmental impact report as a part of the regular project report used in the existing review and budgetary process. It shall be available to the Legislature. It shall also be available for inspection by any member of the general public, who may secure a copy thereof by paying for the actual cost of such a copy. It shall be filed by the state lead agency with the appropriate local planning agency of any city, county, or city and county which will be affected by the project.

SEC. 13. Section 21151.5 of the Public Resources Code is amended to read:

21151.5. Each local agency shall establish, by ordinance or resolution, time limits, not to exceed one year for completing and certifying environmental impact reports, and 105 days for negative declarations, for projects described in subdivision (c) of Section 21065. Such time limits shall apply only to those circumstances in which such local agency is the lead agency for a project. Such ordinances or resolutions may establish different time limits for different types or classes of projects, but all such limits shall be measured from the date on which an application requesting approval of such project is received and accepted as complete by the local agency. The ordinances required by this section may provide for a reasonable extension of such time period in the event that compelling circumstances justify additional time and the project applicant consents thereto.

SEC. 14. Section 21153 of the Public Resources Code is amended to read:

21153. Prior to completing an environmental impact report, every local lead agency shall consult with, and obtain comments from, each responsible agency and any public agency which has jurisdiction by law with respect to the project, and may consult with any person who has special expertise with respect to any environmental impact involved.

SEC. 15. Section 21165 of the Public Resources Code is amended to read:

21165. When a project is to be carried out or approved by two or more public agencies, the determination of whether the project may

have a significant effect on the environment shall be made by the lead agency; and such agency shall prepare, or cause to be prepared by contract, the environmental impact report for the project, if such a report is required by this division. In the event that a dispute arises as to which is the lead agency, any public agency, or in the case of a project described in subdivision (c) of Section 21065 the applicant for such project, may submit the question to the Office of Planning and Research, and the Office of Planning and Research shall designate, within 21 days of receiving such request, the lead agency, giving due consideration to the capacity of such agency to adequately fulfill the requirements of this division.

SEC. 16. Section 21166 of the Public Resources Code is amended to read:

21166. When an environmental impact report has been prepared for a project pursuant to this division, no subsequent or supplemental environmental impact report shall be required by the lead agency or by any responsible agency, unless one or more of the following events occurs:

(a) Substantial changes are proposed in the project which will require major revisions of the environmental impact report.

(b) Substantial changes occur with respect to the circumstances under which the project is being undertaken which will require major revisions in the environmental impact report.

(c) New information, which was not known and could not have been known at the time the environmental impact report was certified as complete, becomes available.

SEC. 17. Section 21167 of the Public Resources Code is amended to read:

21167. Any action or proceeding to attack, review, set aside, void, or annul the following acts or decisions of a public agency on the grounds of noncompliance with this division shall be commenced as follows:

(a) An action or proceeding alleging that a public agency is carrying out or has approved a project which may have a significant effect on the environment without having determined whether the project may have a significant effect on the environment shall be commenced within 180 days of the public agency's decision to carry out or approve the project, or, if a project is undertaken without a formal decision by the public agency, within 180 days after commencement of the project.

(b) Any action or proceeding alleging that a public agency has improperly determined whether a project may have a significant effect on the environment shall be commenced within 30 days after the filing of the notice required by subdivision (a) of Section 21108 or subdivision (a) of Section 21152.

(c) Any action or proceeding alleging that an environmental impact report does not comply with the provisions of this division shall be commenced within 30 days after the filing of the notice required by subdivision (a) of Section 21108 or subdivision (a) of

Section 21152 by the lead agency.

(d) Any action or proceeding alleging that a public agency has improperly determined that a project is not subject to the provisions of this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085 or 21172 shall be commenced within 35 days after the filing by the public agency, or person specified in subdivision (b) or (c) of Section 21065, of the notice authorized by subdivision (b) of Section 21108 or subdivision (b) of Section 21152. If such notice has not been filed, such action or proceeding shall be commenced within 180 days of the public agency's decision to carry out or approve the project, or, if a project is undertaken without a formal decision by the public agency, within 180 days after commencement of the project.

(e) Any action or proceeding alleging that any other act or omission of a public agency does not comply with the provisions of this division shall be commenced within 30 days after the filing of the notice required by subdivision (a) of Section 21108 or subdivision (a) of Section 21152.

SEC. 18. Section 21167.2 is added to the Public Resources Code, to read:

21167.2. If no action or proceeding alleging that an environmental impact report does not comply with the provisions of this division is commenced during the period prescribed in subdivision (c) of Section 21167, the environmental impact report shall be conclusively presumed to comply with the provisions of this division for purposes of its use by responsible agencies, unless the provisions of Section 21166 are applicable.

SEC. 19. Section 21167.3 is added to the Public Resources Code, to read:

21167.3. If an action or proceeding alleging that an environmental impact report does not comply with the provisions of this division is commenced during the period described in subdivision (c) of Section 21167, responsible agencies shall assume that the environmental impact report for a project does comply with the provisions of this division and shall issue a conditional approval or disapproval of such project according to the timetable for agency action in Article 5 (commencing with Section 65950) of Chapter 4.5 of Division 1 of Title 7 of the Government Code. A conditional approval shall constitute permission to proceed with a project when and only when such action or proceeding results in a final determination that the environmental impact report does comply with the provisions of this division.

SEC. 19.1. Section 21174 of the Public Resources Code is amended to read:

21174. No provision of this division is a limitation of restriction on the power or authority of any public agency in the enforcement or administration of any provision of law which it is specifically permitted or required to enforce or administer, including, but not limited to, the powers and authority granted to the California Coastal

Commission or any regional coastal commission pursuant to Division 20 (commencing with Section 30000) of the Public Resources Code. To the extent of any inconsistency or conflict between the provisions of the California Coastal Act of 1976, Division 20 (commencing with Section 30000) of the Public Resources Code, and the provisions of this division, the provisions of Division 20 (commencing with Section 30000) of the Public Resources Code shall control.

SEC. 19.2. Nothing in Division 13 (commencing with Section 21000) of the Public Resources Code shall be construed to apply to any action or activity governed by Division 7 (commencing with Section 12501) of the Food and Agricultural Code. This section shall remain in effect only until July 1, 1978 and, as of such date is repealed. In enacting this section, the Legislature does not intend any comment upon the issues raised in Attorney General's Opinion No. 5075/16.

SEC. 19.3. The sum of four hundred three thousand fifty dollars ($403,050) is hereby appropriated from the General Fund in the State Treasury for expenditure during the 1977–1978 fiscal year in accordance with the following schedule:

(a) The sum of three hundred thirty-one thousand two hundred fifty dollars ($331,250) to the State Water Resources Control Board in support of the cost of meeting the various deadlines imposed by this act.

(b) The sum of twenty-five thousand dollars ($25,000) to the Department of Fish and Game in support of the cost of meeting the responsibilities imposed by this act.

(c) The sum of forty-six thousand eight hundred dollars ($46,800) to the Office of Planning and Research in support of the cost of meeting the responsibilities imposed by this act.

SEC. 20. Section 21080 of the Public Resources Code is amended to read:

21080. (a) Except as otherwise provided in this division, this division shall apply to discretionary projects proposed to be carried out or approved by public agencies, including, but not limited to, the enactment and amendment of zoning ordinances, the issuance of zoning variances, the issuance of conditional use permits and the approval of tentative subdivision maps (except where such a project is exempt from the preparation of an environmental impact report pursuant to Section 21166).

(b) This division shall not apply to the following:

(1) Ministerial projects proposed to be carried out or approved by public agencies.

(2) Emergency repairs to public service facilities necessary to maintain service.

(3) Projects undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish, or replace property or facilities damaged or destroyed as a result of a disaster in a disaster-stricken area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing

with Section 8550) of Division 1 of Title 2 of the Government Code.

(4) Specific actions, necessary to prevent or mitigate an emergency.

(5) Projects which a public agency rejects or disapproves.

(6) Actions undertaken by a public agency relating to any powerplant site or facility, including the expenditure, obligation, or encumbrance of funds by a public agency for planning, engineering, or design purposes, or for the purchase of equipment, fuel, steam, or power for such a powerplant, if the powerplant site and related facility will be the subject of an environmental impact report or negative declaration prepared by the State Energy Resources Conservation and Development Commission, by the Public Utilities Commission, or by the city or county in which the powerplant and related facility would be located.

(c) In the event that a lead agency determines that a proposed project, not otherwise exempt from the provisions of this division, does not have a significant effect on the environment, such lead agency shall adopt a negative declaration to that effect.

SEC. 21. Section 21080 of the Public Resources Code is amended to read:

21080. (a) Except as otherwise provided in this division, this division shall apply to discretionary projects proposed to be carried out or approved by public agencies, including, but not limited to, the enactment and amendment of zoning ordinances, the issuance of zoning variances, the issuance of conditional use permits and the approval of tentative subdivision maps (except where such a project is exempt from the preparation of an environmental impact report pursuant to Section 21166).

(b) This division shall not apply to the following:

(1) Ministerial projects proposed to be carried out or approved by public agencies.

(2) Emergency repairs to public service facilities necessary to maintain service.

(3) Projects undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish, or replace property or facilities damaged or destroyed as a result of a disaster in a disaster-stricken area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing with Section 8550) of Division 1 of Title 2 of the Government Code.

(4) Specific actions, necessary to prevent or mitigate an emergency.

(5) Projects which a public agency rejects or disapproves.

(6) Activities or approvals necessary to the bidding for, hosting or staging of, and funding or carrying out of, an Olympic games under the authority of the International Olympic Committee, except for the construction of facilities necessary for such Olympic games.

(c) In the event that a lead agency determines that a proposed project, not otherwise exempt from the provisions of this division, does not have a significant effect on the environment, such lead

agency shall adopt a negative declaration to that effect.

SEC. 22. Section 21080 of the Public Resources Code is amended to read:

21080. (a) Except as otherwise provided in this division, this division shall apply to discretionary projects proposed to be carried out or approved by public agencies, including, but not limited to, the enactment and amendment of zoning ordinances, the issuance of zoning variances, the issuance of conditional use permits and the approval of tentative subdivision maps (except where such a project is exempt from the preparation of an environmental impact report pursuant to Section 21166).

(b) This division shall not apply to the following:

(1) Ministerial projects proposed to be carried out or approved by public agencies.

(2) Emergency repairs to public service facilities necessary to maintain service.

(3) Projects undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish, or replace property or facilities damaged or destroyed as a result of a disaster in a disaster-stricken area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing with Section 8550) of Division 1 of Title 2 of the Government Code.

(4) Specific actions, necessary to prevent or mitigate an emergency.

(5) Projects which a public agency rejects or disapproves.

(6) Actions undertaken by a public agency relating to any powerplant site or facility, including the expenditure, obligation, or encumbrance of funds by a public agency for planning, engineering, or design purposes, or for the purchase of equipment, fuel, steam, or power for such a powerplant, if the powerplant site and related facility will be the subject of an environmental impact report or negative declaration prepared by the State Energy Resources Conservation and Development Commission, by the Public Utilities Commission, or by the city or county in which the powerplant and related facility would be located.

(7) Activities or approvals necessary to the bidding for, hosting or staging of, and funding or carrying out of, an Olympic games under the authority of the International Olympic Committee, except for the construction of facilities necessary for such Olympic games.

(c) In the event that a lead agency determines that a proposed project, not otherwise exempt from the provisions of this division, does not have a significant effect on the environment, such lead agency shall adopt a negative declaration to that effect.

SEC. 23. It is the intent of the Legislature that if this bill and Assembly Bill No. 1466 or Senate Bill No. 1040, or both, are chaptered and become effective on or before January 1, 1978, each of the bills amend Section 21080 of the Public Resources Code, and this bill is chaptered last, that amendments proposed by each of the bills which are chaptered be given effect as follows:

(1) If this bill and Assembly Bill No. 1466 are both chaptered and become effective January 1, 1978, both bills amend Section 21080 of the Public Resources Code, but Senate Bill No. 1040 is not chaptered or as chaptered does not amend that section, and this bill is chaptered after Assembly Bill No. 1466, the amendments proposed by both bills shall be given effect and incorporated in Section 21080 in the form set forth in Section 20 of this act. Therefore, if this bill and Assembly Bill No. 1466 are both chaptered and become effective January 1, 1978, both bills amend Section 21080, this bill is chaptered after Assembly Bill No. 1466, and Senate Bill No. 1040 is not chaptered or as chaptered does not amend that section, Section 20 of this act shall be operative and Sections 2, 21, and 22 of this act shall not become operative.

(2) If this bill and Senate Bill No. 1040 are both chaptered and become effective on or before January 1, 1978, both bills amend Section 21080 of the Public Resources Code, but Assembly Bill No. 1466 is not chaptered or as chaptered does not amend that section, and this bill is chaptered after Senate Bill No. 1040, Section 21080 of the Public Resources Code, as amended by Section 1 of Senate Bill No. 1040, shall be further amended on the effective date of this act in the form set forth in Section 21 of this act to incorporate the changes in Section 21080 proposed by this bill. Therefore, if this bill and Senate Bill No. 1040 are both chaptered and become effective on or before January 1, 1978, both bills amend Section 21080, this bill is chaptered after Senate Bill No. 1040, and Assembly Bill No. 1466 is not chaptered or as chaptered does not amend that section, Section 21 shall be operative and Sections 2, 20, and 22 of this act shall not become operative.

(3) If this bill and Assembly Bill No. 1466 and Senate Bill No. 1040 are all chaptered and become effective on or before January 1, 1978, all three bills amend Section 21080 of the Public Resources Code, and this bill is chaptered after Assembly Bill No. 1466 and Senate Bill No. 1040, Section 21080 of the Public Resources Code, as amended by Section 1 of Senate Bill No. 1040, shall be further amended on the effective date of this act in the form set forth in Section 22 of this act to incorporate the changes proposed by all three bills. Therefore, if this bill and Assembly Bill No. 1466 and Senate Bill No. 1040 are all chaptered and become effective on or before January 1, 1978, all three bills amend Section 21080 of the Public Resources Code, and this bill is chaptered after Assembly Bill No. 1466 and Senate Bill No. 1040, Section 22 of this act shall be operative and Sections 2, 20, and 21 of this act shall not become operative.

SEC. 24. There are no state-mandated local costs in this act that require reimbursement under Section 2231 of the Revenue and Taxation Code because there are no new duties, obligations, or responsibilities imposed on local government by this act.

3042

CHAPTER 967

An act to add Sections 21068.5 and 21093 to, and to add and repeal Section 21151.6 of, the Public Resources Code, relating to environmental quality.

[Approved by Governor September 20, 1983. Filed with Secretary of State September 21, 1983.]

The people of the State of California do enact as follows:

SECTION 1. Section 21068.5 is added to the Public Resources Code, to read:

21068.5. "Tiering" or "tier" means the coverage of general matters and environmental effects in an environmental impact report prepared for a policy, plan, program or ordinance followed by narrower or site-specific environmental impact reports which incorporate by reference the discussion in any prior environmental impact report and which concentrate on the environmental effects which (a) are capable of being mitigated, or (b) were not analyzed as significant effects on the environment in the prior environmental impact report.

SEC. 2. Section 21093 is added to the Public Resources Code, to

read:

21093. (a) The Legislature finds and declares that tiering of environmental impact reports will promote construction of needed housing and other development projects by (1) streamlining regulatory procedures, (2) avoiding repetitive discussions of the same issues in successive environmental impact reports, and (3) ensuring that environmental impact reports prepared for later projects which are consistent with a previously approved policy, plan, program, or ordinance concentrate upon environmental effects which may be mitigated or avoided in connection with the decision on each later project. The Legislature further finds and declares that tiering is appropriate when it helps a public agency to focus upon the issues ripe for decision at each level of environmental review and in order to exclude duplicative analysis of environmental effects examined in previous environmental impact reports.

(b) To achieve this purpose, public agencies may tier environmental impact reports wherever possible.

SEC. 3. Section 21151.6 is added to the Public Resources Code, to read:

21151.6. (a) At the time that an application is received and accepted as complete by a local agency requiring a discretionary approval subject to this division, the agency shall determine whether or not it is able to meet the time limits specified in this chapter for assessing environmental impacts. If the local agency determines that it will be unable to meet those time limits with its existing staff resources, the agency shall, upon request of an applicant, contract with or employ qualified private entities or persons on a temporary basis to perform the services necessary to permit the agency to meet the time limits. In choosing the entity or person to perform the necessary services, the agency shall take into consideration the views of the applicant. The entity or person is solely responsible to the local agency. However, a local agency need not enter into a contract or employ persons if it determines that no entities or persons are available or qualified to perform the services.

(b) Entities or persons contracted with or employed by a local agency may, pursuant to an agreement with the local agency, perform functions necessary to meet the requirements of this division and shall not perform those functions reserved by this division or local ordinance to the decisionmaking body.

(c) A local agency may charge and may require the applicant to pay a fee in the amount necessary to defray costs directly attributable to employing or contracting with entities or persons performing services pursuant to this section.

(d) This section shall not be construed to affect any provision of this division which may require independent judgment of the lead agency.

(e) This section shall remain in effect only until January 1, 1990, and as of that date is repealed, unless a later enacted statute, which is chaptered before January 1, 1990, deletes or extends that date.

SEC. 4. Notwithstanding Section 6 of Article XIII B of the California Constitution and Section 2231 or 2234 of the Revenue and Taxation Code, no appropriation is made by this act for the purpose of making reimbursement pursuant to these sections. It is recognized, however, that a local agency or school district may pursue any remedies to obtain reimbursement available to it under Chapter 3 (commencing with Section 2201) of Part 4 of Division 1 of that code.

CHAPTER 571

An act to amend Sections 21108 and 21161 of the Public Resources Code, relating to environmental quality.

[Approved by Governor July 17, 1984. Filed with Secretary of State July 18, 1984.]

The people of the State of California do enact as follows:

SECTION 1. Section 21108 of the Public Resources Code is amended to read:

21108. (a) Whenever a state agency, board, or commission approves or determines to carry out a project which is subject to this division, it shall file notice of that approval or that determination with the Office of Planning and Research. The notice shall indicate

the determination of the agency, board, or commission whether the project will, or will not, have a significant effect on the environment and shall indicate whether an environmental impact report has been prepared pursuant to this division.

(b) Whenever a state agency, board, or commission determines that a project is not subject to this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085 or 21172, and it approves or determines to carry out that project, it, or the person specified in subdivision (b) or (c) of Section 21065, may file notice of the determination with the Office of Planning and Research. Any notice filed pursuant to this subdivision by a person specified in subdivision (b) or (c) of Section 21065 shall have a certificate of determination attached to it issued by the state agency, board, or commission responsible for making the determination that a project is not subject to the provisions of this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085 or 21172. The certificate of determination may be in the form of a certified copy of an existing document or record of the state agency, board, or commission.

(c) All notices filed pursuant to this section shall be available for public inspection, and a list of these notices shall be posted on a weekly basis in the Office of Planning and Research. Each list shall remain posted for a period of 30 days.

SEC. 2. Section 21161 of the Public Resources Code is amended to read:

21161. Whenever a public agency has completed an environmental impact report, it shall cause a notice of completion of that report to be filed with the Office of Planning and Research. The notice of completion shall briefly identify the project and shall indicate that an environmental impact report has been prepared. Failure to file the notice required by this section shall not affect the validity of a project.

CHAPTER 1514

An act to amend Sections 21002.1, 21104, and 21153 of, and to add Sections 21001.1, 21005, 21081.5, 21082.2, 21092.1, 21094, 21166.1, 21167.6, 21167.8, and 21177 to, the Public Resources Code, relating to environmental control.

[Approved by Governor September 28, 1984. Filed with Secretary of State September 28, 1984.]

The people of the State of California do enact as follows:

SECTION 1. Section 21001.1 is added to the Public Resources Code, to read:

21001.1. The Legislature further finds and declares that it is the policy of the state that projects to be carried out by public agencies be subject to the same level of review and consideration under this division as that of private projects required to be approved by public agencies.

SEC. 2. Section 21002.1 of the Public Resources Code is amended to read:

21002.1. In order to achieve the objectives set forth in Section 21002, the Legislature finds and declares that the following policy shall apply to the use of environmental impact reports prepared pursuant to this division:

(a) The purpose of an environmental impact report is to identify the significant effects of a project on the environment, to identify alternatives to the project, and to indicate the manner in which those significant effects can be mitigated or avoided.

10 05

(b) Each public agency shall mitigate or avoid the significant effects on the environment of projects it approves or carries out whenever it is feasible to do so.

(c) In the event that economic, social, or other conditions make it infeasible to mitigate one or more significant effects of a project on the environment, the project may nonetheless be approved or carried out at the discretion of a public agency, provided that the project is otherwise permissible under applicable laws and regulations.

(d) In applying the policies of subdivisions (b) and (c) to individual projects, the responsibility of a public agency which is functioning as a lead agency shall differ from that of a public agency which is functioning as a responsible agency. A public agency functioning as a lead agency shall have responsibility for considering the effects, both individual and collective, of all activities involved in a project. A public agency functioning as a responsible agency shall have responsibility for considering only the effects of those activities involved in a project, which it is required by law to carry out or approve. This subdivision applies only to decisions by a public agency to carry out or approve a project and does not otherwise affect the scope of the comments the agency may wish to make pursuant to Section 21104 or 21153.

SEC. 3. Section 21005 is added to the Public Resources Code, to read:

21005. The Legislature finds and declares that it is the policy of the state that noncompliance with the information disclosure provisions of this division which precludes relevant information from being presented to the public agency or with substantive requirements of this division may constitute a prejudicial abuse of discretion within the meaning of Sections 21168 and 21168.5, regardless of whether a different outcome would have resulted if the public agency had complied with those provisions.

The Legislature further finds and declares that in undertaking judicial review pursuant to Sections 21168 and 21168.5, courts shall continue to follow the established principle that there is no presumption that error is prejudicial.

SEC. 5. Section 21081.5 is added to the Public Resources Code, to read:

21081.5. In making the findings required by subdivision (c) of Section 21081, the public agency shall base its findings on substantial evidence in the record.

SEC. 6. Section 21082.2 is added to the Public Resources Code, to read:

21082.2. (a) The lead agency shall determine whether a project may have a significant effect on the environment based on substantial evidence in the record. The existence of public controversy over the environmental effects of a project shall not require preparation of an environmental impact report if there is no substantial evidence before the agency that the project may have a

10 05

3049

significant effect on the environment.

(b) Statements in an environmental impact report and comments with respect to an environmental impact report shall not be deemed determinative of whether the project may have a significant effect on the environment.

SEC. 7. Section 21092.1 is added to the Public Resources Code, to read:

21092.1. When significant new information is added to an environmental impact report after notice has been given pursuant to Section 21092 and consultation has occurred pursuant to Sections 21104 and 21153, but prior to certification, the public agency shall give notice again pursuant to Section 21092, and consult again pursuant to Sections 21104 and 21153 before certifying the environmental impact report.

SEC. 8. Section 21094 is added to the Public Resources Code, to read:

21094. (a) Where a prior environmental impact report has been prepared for a program, plan, policy, or ordinance, the lead agency for a later project that meets the requirements of this section may examine significant effects of the later project upon the environment by using a tiered environmental impact report, except that the report need not examine those effects which the lead agency determines were either (1) mitigated or avoided pursuant to subdivision (a) of Section 21081 as a result of the prior environmental impact report, or (2) examined at a sufficient level of detail in the prior environmental impact report to enable those effects to be mitigated or avoided by site specific revisions, the imposition of conditions, or by other means in connection with the approval of the later project.

(b) This section applies only to a later project which the lead agency finds (1) is consistent with the previously approved program, plan, policy, or ordinance, (2) is consistent with any applicable local land use plan and zoning of the city and county in which the later project would be located, and (3) is not subject to Section 21166.

(c) For purposes of compliance with this section, an initial study shall be prepared to assist the agency in making the determinations and findings required by this section. The initial study shall analyze whether the later project may cause significant effects on the environment that were not examined in the prior environmental impact report.

(d) All public agencies which propose to carry out or approve the later project may utilize the prior environmental impact report and the environmental impact report on the later project to fulfill the requirements of Section 21081.

(e) When tiering is used pursuant to this section, an environmental impact report prepared for a later project shall refer to the prior environmental impact report and state where a copy of the prior environmental impact report may be examined.

SEC. 9. Section 21104 of the Public Resources Code is amended

10 05

3050

presented to the public agency orally or in writing by any person.

(b) No person shall maintain an action or proceeding unless that person objected to the approval of the project orally or in writing.

(c) This section does not preclude any organization formed after the approval of a project from maintaining an action pursuant to Section 21167 if a member of that organization has complied with subdivision (b).

(d) This section does not apply to the Attorney General.

(e) This section does not apply when there was no public hearing or other opportunity for members of the public to raise objections prior to the approval of the project or when the public agency failed to give the notice required by law.

SEC. 14.5. It is the intent of the Legislature in adding Section 21177 to the Public Resources Code in Section 14 of this act to codify the exhaustion of administrative remedies doctrine. It is not the intent to limit or modify any exception to the doctrine of administrative remedies contained in case law.

SEC. 15. Section 9.5 of this bill incorporates amendments to Section 21104 of the Public Resources Code proposed by both this bill and AB 2411. It shall only become operative if (1) both bills are enacted and become effective on January 1, 1985, (2) each bill amends Section 21104 of the Public Resources Code, and (3) this bill is enacted after AB 2411, in which case Section 9 of this bill shall not become operative.

SEC. 16. Section 10.5 of this bill incorporates amendments to Section 21153 of the Public Resources Code proposed by both this bill and AB 2411. It shall only become operative if (1) both bills are enacted and become effective on January 1, 1985, (2) each bill amends Section 21153 of the Public Resources Code, and (3) this bill is enacted after AB 2411, in which case Section 10 of this bill shall not become operative.

SEC. 17. Notwithstanding Section 6 of Article XIII B of the California Constitution and Section 2231 or 2234 of the Revenue and Taxation Code, no appropriation is made by this act for the purpose of making reimbursement pursuant to these sections. It is recognized, however, that a local agency or school district may pursue any remedies to obtain reimbursement available to it under Chapter 3 (commencing with Section 2201) of Part 4 of Division 1 of that code.

SEC. 18. Notwithstanding Section 2231.5 of the Revenue and Taxation Code, this act does not contain a repealer, as required by that section; therefore, the provisions of this act shall remain in effect unless and until they are amended or repealed by a later enacted act.

10 05

CHAPTER 85

An act to add Section 21003.1 to the Public Resources Code, relating to environmental quality.

10 05

[Approved by Governor June 19, 1985. Filed with Secretary of State June 19, 1985.]

The people of the State of California do enact as follows:

SECTION 1. Section 21003.1 is added to the Public Resources Code, to read:

21003.1. The Legislature further finds and declares it is the policy of the state that:

(a) Comments from the public and public agencies on the environmental effects of a project shall be made to lead agencies as soon as possible in the review of environmental documents, including, but not limited to, draft environmental impact reports and negative declarations, in order to allow the lead agencies to identify, at the earliest possible time in the environmental review process, potential significant effects of a project, alternatives, and mitigation measures which would substantially reduce the effects.

(b) Information relevant to the significant effects of a project, alternatives, and mitigation measures which substantially reduce the effects shall be made available as soon as possible by lead agencies, other public agencies, and interested persons and organizations.

(c) Nothing in subdivisions (a) or (b) reduces or otherwise limits public review or comment periods currently prescribed either by statute or in guidelines prepared and adopted pursuant to Section 21083 for environmental documents, including, but not limited to, draft environmental impact reports and negative declarations.

CHAPTER 1452

An act to amend Sections 1007, 1011, 1080, 1205, 1208, 1240, 1249, 4010, 8321, 8322, 10000, 10902, 12130, 14050, 14058, 18330, 18385, 18710, 18720, 18731, 18740, 18741, 18743, 18744, 18745, 18746, 18747, 18765, 19143, 19167, 19301, 19320, 19321, 19325, 19330, 19331, 19332, 19333, 19425, 19524, 19601, 19644, 19901, 22609, 33420, 35000, 35001, 35023, 35031, 35034, 35124, 35145, 35161, 35512, 35734, 37201, 39007, 39365.5, 39802, 39839, 39902, 41002, 41032, 41306, 41350, 41901, 41903, 42125, 42238.5, 42600, 42601, 42631, 42636, 42646, 42821, 44015, 44032, 44265, 44492, 44897, 44903.7, 44981, 45303, 46201, 46320, 46360, 48000, 48010,

153850

48200, 48205, 48980, 51210, 51833, 52001, 52035, 52500, 52857, 54004.7, 54301, 54659, 56027, 56100, 56101, 56129, 56156, 56156.5, 56157, 56159, 56170, 56172, 56194, 56200, 56220, 56240, 56242, 56300, 56301, 56302, 56322, 56328, 56340, 56341, 56342, 56344, 56345, 56345.5, 56360, 56361.5, 56363.3, 56363.5, 56364.5, 56365, 56365.5, 56366, 56366.1, 56366.5, 56369, 56380, 56450, 56451, 56454, 56456, 56500, 56601, 56602, 56606, 56700, 56760, 56761, 56824, 56825, 56826, 56851, 60241, 60242.5, 60246, 60285, 60660, and 60690 of, to amend the heading of Article 10 (commencing with Section 39480) of Chapter 3 of Part 23 of, to amend and renumber Sections 8480, 8481, 8482, 8483, 8485, 8486, 8490, 8491, 8492, 35104, 37227.6, 37228, 39118, 39119, 40005, 42637.5, 44882, 44883, and 48012 of, to add Sections 1278, 33319.5, 35160.1, 39304.5, 41002.5, 46307, 46307.1, and 51204.5 to, to add Article 2.7 (commencing with Section 44929.20) to Chapter 4 of Part 25 of, to add Chapter 10 (commencing with Section 49600) to Part 27 of, to repeal Sections 88, 1209, 1210, 1211, 1212, 1213, 1241, 1242, 1247, 1248, 1257, 1264, 1265, 1291, 1624, 1925, 1930, 1931, 2001, 2500, 2500.1, 2500.3, 2502, 2503, 2504, 2506, 2506.1, 2506.5, 2506.7, 2507, 2507.5, 2507.7, 2508, 2510, 2559, 5001, 5015, 5015.5, 5032, 5226, 5305, 5364, 5444, 8323, 8325, 10002, 10010, 10915, 14002.1, 14051, 14053, 16030, 16071, 18331, 18332, 18334, 18512, 18514, 18516, 18517, 18721, 18748, 18752, 19144, 19304, 19305, 19523, 19602, 19606, 19607, 19609, 19800, 23500, 23502, 23503, 23504, 23507, 23508, 23509, 23513, 23514, 23515, 23516, 23517, 23518, 23519, 23520, 23521, 23522, 23523, 23524, 23525, 23527, 23600, 23601, 23602, 23603, 23604, 23605, 23606, 23607, 23608, 23609, 23610, 23611, 23612, 23613, 23616, 24006, 24101, 35002, 35027, 35036, 35037, 35040, 35042, 35043, 35122, 35123, 35125, 35147, 35148, 35169, 35173, 35176, 35209, 35210, 35212, 35270, 35273, 35274, 35276, 35340, 37000.5, 37001, 37002, 37003, 37004, 37005, 37006, 37007, 37008, 37060, 37061, 37062, 37065, 37073, 37074, 37075, 37076, 37077, 37078, 37079, 37084, 37087, 37088, 37203, 37222, 37223, 37224, 37225, 37226, 37227, 37227.5, 37229, 37230, 37231, 37232, 37250, 37430, 39001, 39003, 39004, 39009, 39010, 39011, 39117, 39121, 39122, 39123, 39124, 39230.5, 39362, 39365, 39373, 39482, 39483, 39484, 39491, 39600, 39642, 39645, 39651, 39659, 39840.5, 40004, 40010, 40012, 40013, 41301.3, 41302, 41331, 41351, 41377, 41760, 42237.7, 42237.9, 42241, 42243.5, 42244.7, 42660, 42834, 44013, 44804, 44841, 44880, 44882, 44883, 44884, 44885, 44885.5, 44886, 44887, 44889, 44890, 44891, 44978.5, 45021, 45026, 45027, 45053, 45054, 45133, 46013.9, 46116, 46143, 46180.1, 46361, 46362, 46363, 46365, 46366, 46367, 48001, 48013, 48020, 48030, 48040, 48227, 48228, 48229, 48810, 49401, 49404, 49420, 49421, 49453, 49502, 51001, 51201, 51211, 51213, 51227, 51700, 51701, 51710, 51830, 51831, 51832, 52043, 52380, 52463, 54030, 54424, 54487, 56032, 60314, 60315, 60640, 60641, 60642, 60643, 60664, and 63002 of, to repeal the heading of Article 11 (commencing with Section 39490) of Chapter 3 of Part 23 of, to repeal Article 5 (commencing with Section 1110) of Chapter 2 of Part 2 of, Article 11 (commencing with Section 35300) of Chapter 2 of Part 21 of, Article 2 (commencing with Section 37020) of, Article 3 (commencing with Section 37040) of, Article 4 (commencing with Section 37050) of, and Article 6 (commencing

153880

3055

with Section 37100) of, Chapter 1 of, Article 2 (commencing with Section 37210) of Chapter 2 of, and Article 2 (commencing with Section 37410) of Chapter 3 of, Part 22 of, Article 7 (commencing with Section 39240) of Chapter 2 of, Article 8 (commencing with Section 39440) of, Article 12 (commencing with Section 39500) of, and Article 16 (commencing with Section 39560) of, Chapter 3 of, and Article 3.5 (commencing with Section 39660) of Chapter 4 of, Part 23 of, Article 1 (commencing with Section 41700) of, Article 2 (commencing with Section 41730) of, Article 3 (commencing with Section 41750) of, and Article 7 (commencing with Section 41810) of, Chapter 5 of, Article 1 (commencing with Section 42200) of Chapter 7 of, and Article 3.5 (commencing with Section 42625) of Chapter 9 of, Part 24 of, Chapter 4 (commencing with Section 46500) of Part 26 of, and Article 3 (commencing with Section 48650) of Chapter 4 of, and Article 3 (commencing with Section 49440) of Chapter 9 of, Part 27 of, to repeal Chapter 9 (commencing with Section 2200) of Part 2 of, Chapter 4 (commencing with Section 10300) of Part 7 of, Chapter 14 (commencing with Section 23300) of Part 13 of, Chapter 2 (commencing with Section 41200) of, Chapter 5.5 (commencing with Section 42000) of, Chapter 5.7 (commencing with Section 42050) of, Chapter 8 (commencing with Section 42400) of, Chapter 8.5 (commencing with Section 42501) of, and Chapter 8.7 (commencing with Section 42521) of, Part 24 of, and to repeal and add Sections 37060, 37220 and 37221 of, and to repeal and add Article 2 (commencing with Section 35010) of Chapter 1 of Part 21 of, and Article 8.5 (commencing with Section 41835) of Chapter 5 of Part 24 of, the Education Code, to add Part 4 (commencing with Section 24000) to Division 14 of the Elections Code, to amend Sections 20330 and 53853 of the Government Code, to add Sections 20117, 20118, 20118.1, 20118.3, and 20118.4 to, and to add and repeal Section 20118.2 of, the Public Contract Code, to add Section 21151.2 to the Public Resources Code, and to add Article 28 (commencing with Section 960) to Chapter 2 of Part 1 of Division 2 of the Welfare and Institutions Code, relating to education.

[Approved by Governor September 30, 1987. Filed with Secretary of State September 30, 1987.]

The people of the State of California do enact as follows:

SECTION 1. The Legislature finds and declares that, in 1972, the people of the state adopted an amendment to Section 14 of Article IX of the California Constitution, which permits the Legislature to authorize the governing boards of school districts to initiate and carry on any programs, activities, or to otherwise act in any manner which is not in conflict with the laws and purposes for which school districts are established.

It is the intent of the Legislature, in enacting this act, to implement more fully, for the school districts, county boards of education, and

and the cost agreed upon between the governing board and the contractor. The board may authorize the contractor to proceed with performance of the change or alteration without the formality of securing bids, if the cost so agreed upon does not exceed the greater of:

(a) The amount specified in Section 20111 or 20114, whichever is applicable to the original contract; or

(b) Ten percent of the original contract price.

The governing board of any school district, or of two or more school districts governed by governing boards of identical personnel, having an average daily attendance of 400,000 or more as shown by the annual report of the county superintendent of schools for the preceding year, may also authorize any change or alteration of a contract for reconstruction or rehabilitation work other than for the construction of new buildings or other new structures, where the cost of the change or alteration is in excess of the limitations in subdivisions (a) and (b) but does not exceed 25 percent of the original contract price, without the formality of securing bids, when such change or alteration is a necessary and integral part of the work under the contract and the taking of bids would delay the completion of the contract. Changes exceeding 15 percent of the original contract price shall be approved by an affirmative vote of not less than 75 percent of the members of the governing board.

SEC. 533. Section 21151.2 is added to the Public Resources Code, to read:

21151.2. To promote the safety of pupils and comprehensive community planning the governing board of each school district before acquiring title to property for a new school site or for an addition to a present school site, shall give the planning commission having jurisdiction notice in writing of the proposed acquisition. The planning commission shall investigate the proposed site and within 30 days after receipt of the notice shall submit to the governing board a written report of the investigation and its recommendations concerning acquisition of the site.

The governing board shall not acquire title to the property until the report of the planning commission has been received. If the report does not favor the acquisition of the property for a school site, or for an addition to a present school site, the governing board of the school district shall not acquire title to the property until 30 days after the commission's report is received.

SEC. 534. Article 28 (commencing with Section 960) is added to Chapter 2 of Part 1 of Division 2 of the Welfare and Institutions Code, to read:

Article 28. Adjustment Schools

960. This article shall be construed in conformity with the intent as well as the expressed provisions thereof, and the governing board of any adjustment school may do all those lawful acts that it deems

(f) Divulge evidence of unlawful activity discovered, pursuant to this article, from records or testimony not otherwise privileged or confidential, to the Attorney General or to any prosecuting attorney who has a responsibility for investigating the unlawful activity discovered, or to any governmental agency responsible for enforcing laws related to the unlawful activity discovered.

CHAPTER 626

An act to add Sections 21081.7 and 21092.4 to the Public Resources Code, relating to environmental quality.

[Approved by Governor September 21, 1989. Filed with Secretary of State September 21, 1989.]

The people of the State of California do enact as follows:

SECTION 1. Section 21081.7 is added to the Public Resources Code, to read:

21081.7. Transportation information resulting from the reporting or monitoring program required to be adopted by a public agency pursuant to Section 21081.6 shall be submitted to the transportation planning agency in the region where the project is located when the project has impacts that are of statewide, regional, or areawide significance according to criteria developed pursuant to Section 21083. The transportation planning agency shall adopt guidelines for the submittal of those reporting or monitoring programs.

54660

SEC. 2. Section 21092.4 is added to the Public Resources Code, to read:

21092.4. (a) For a project of statewide, regional, or areawide significance, the lead agency shall consult with transportation planning agencies and public agencies which have transportation facilities within their jurisdictions which could be affected by the project. Consultation shall be conducted in the same manner as for responsible agencies pursuant to this division, and shall be for the purpose of the lead agency obtaining information concerning the project's effect on major local arterials, public transit, freeways, highways, and rail transit service within the jurisdiction of a transportation planning agency or a public agency which is consulted by the lead agency. A transportation planning agency or public agency which provides information to the lead agency shall be notified of, and provided with copies of, environmental documents pertaining to the project.

(b) As used in this section, "transportation facilities" includes major local arterials and public transit within five miles of the project site and freeways, highways, and rail transit service within 10 miles of the project site.

SEC. 3. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because the local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the program or level of service mandated by this act. Notwithstanding Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

CHAPTER 659

An act to add Section 21080.09 to the Public Resources Code, relating to environmental quality.

[Approved by Governor September 21, 1989. Filed with Secretary of State September 22, 1989.]

The people of the State of California do enact as follows:

SECTION 1. Section 21080.09 is added to the Public Resources Code, to read:

21080.09. (a) For purposes of this section, the following definitions apply:

(1) "Public higher education" has the same meaning as specified in Section 66010 of the Education Code.

(2) "Long range development plan" means a physical development and land use plan to meet the academic and institutional objectives for a particular campus or medical center of public higher education.

(b) The selection of a location for a particular campus and the approval of a long range development plan are subject to this division and require the preparation of an environmental impact report. Environmental effects relating to changes in enrollment levels shall be considered for each campus or medical center of public higher education in the environmental impact report prepared for the long range development plan for the campus or medical center.

(c) The approval of a project on a particular campus or medical center of public higher education is subject to this division and may be addressed, subject to the other provisions of this division, in a tiered environmental analysis based upon a long range development plan environmental impact report.

(d) Compliance with this section satisfies the obligations of public higher education pursuant to this division to consider the environmental impact of academic and enrollment plans as they affect campuses or medical centers, provided that any such plans shall become effective for a campus or medical center only after the environmental effects of those plans have been analyzed as required by this division in a long range development plan environmental impact report or tiered analysis based upon that environmental impact report for that campus or medical center, and addressed as required by this division.

CHAPTER 905

An act to amend Section 21082.1 of, and to add Section 21092.5 to, the Public Resources Code, relating to environmental quality.

[Approved by Governor October 12, 1991. Filed with Secretary of State October 14, 1991.]

The people of the State of California do enact as follows:

SECTION 1. (a) Section 21082.1 of the Public Resources Code is amended to read:

21082.1. (a) Any draft environmental impact report, environmental impact report, or negative declaration prepared pursuant to the requirements of this division shall be prepared directly by, or under contract to, a public agency.

(b) This section is not intended to prohibit, and shall not be construed as prohibiting, any person from submitting information or other comments to the public agency responsible for preparing an environmental impact report, draft environmental impact report, or negative declaration. The information or other comments may be submitted in any format, shall be considered by the public agency, and may be included, in whole or in part, in any report or declaration.

(c) The lead agency shall do all of the following:

(1) Independently review and analyze any report or declaration required by this division.

(2) Circulate draft documents which reflect its independent judgment.

(3) As part of the adoption of a negative declaration or certification of an environmental impact report, find that the report or declaration reflects the independent judgment of the lead agency.

SEC. 2. Section 21092.5 is added to the Public Resources Code, to read:

21092.5. (a) At least 10 days prior to certifying an environmental impact report, the lead agency shall provide a written proposed response to a public agency on comments made by that agency which conform with the requirements of this division. Proposed responses shall conform with the legal standards established for

responses to comments on draft environmental impact reports. Copies of responses or the environmental document in which they are contained, prepared in conformance with other requirements of this division and the guidelines adopted pursuant to Section 21083, may be used to meet the requirements imposed by this section.

(b) The lead agency shall notify any public agency which comments on a negative declaration, of the public hearing or hearings, if any, on the project for which the negative declaration was prepared. If notice to the commenting public agency is provided pursuant to Section 21092, the notice shall satisfy the requirement of this subdivision.

(c) Nothing in this section requires the lead agency to respond to comments not received within the comment periods specified in this division, to reopen comment periods, or to delay acting on a negative declaration or environmental impact report.

SEC. 3. The amendments to Section 21082.1 of the Public Resources Code made by this act, and the provisions of Section 21092.5 of the Public Resources Code, apply only to projects for which notice has not been provided pursuant to Section 21092 of the Public Resources Code as of January 1, 1992.

SEC. 4. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because the local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the program or level of service mandated by this act. Notwithstanding Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

CHAPTER 1183

An act to amend Sections 39003 and 39120 of the Education Code, to amend Section 65759 of, and to repeal and add Section 65850.2 of, the Government Code, to amend Sections 13143.9, 25534.1, 25535, 25538, 25541, 42301.6, and 42301.9 of, and to add Sections 25501.3, 25507.10, 25514.3, and 25534.2 to, the Health and Safety Code, and to amend Sections 21151.4 and 21151.8 of, and to repeal Section 21151.3 of, the Public Resources Code, relating to hazardous materials.

[Approved by Governor October 14, 1991. Filed with Secretary of State October 14, 1991.]

The people of the State of California do enact as follows:

SECTION 1. Section 39003 of the Education Code is amended to read:

39003. The governing board of a school district shall not approve a project involving the acquisition of a schoolsite by a school district unless all of the following occur:

(a) The lead agency, as defined in Section 21067 of the Public Resources Code, determines that the property purchased or to be built upon is not any of the following:

(1) The site of a current or former hazardous waste disposal site or solid waste disposal site unless, if the site was a former solid waste disposal site, the governing board of the school district concludes that the wastes have been removed.

(2) A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(3) A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

(b) The lead agency, as defined in Section 21067 of the Public Resources Code, preparing the environmental impact report or negative declaration has consulted with the administering agency in which the proposed schoolsite is located and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed schoolsite which might reasonably be anticipated to emit hazardous air emissions, or to handle hazardous or acutely hazardous materials, substances, or waste. The lead agency shall include a list of the locations for which information is sought.

(c) The governing board of the school district makes one of the following written findings:

the notice makes a good faith effort to follow the procedures prescribed by law for giving the notice, and, in these circumstances, failure of any person to receive the notice shall not affect the validity of any permit subsequently issued by the officer.

(e) Nothing in this section shall be deemed to limit any existing authority of any district.

(f) An applicant for a permit shall certify whether the proposed source or modification is located within 1,000 feet of a schoolsite. Misrepresentation of this fact may result in the denial of a permit.

(g) The notice requirements of this section shall not apply if the air pollution control officer determines that the application to construct or modify a source will result in a reduction or equivalent amount of air contaminants, as defined in Section 39013, or which are hazardous air emissions.

(h) As used in this section:

(1) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the state board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(2) "Acutely hazardous material" means any material defined pursuant to subdivision (a) of Section 25532.

SEC. 15. Section 42301.9 of the Health and Safety Code is amended to read:

42301.9. For the purposes of Sections 42301.4 to 42301.8, inclusive:

(a) "School" means any public or private school used for purposes of the education of more than 12 children in kindergarten or any of grades 1 to 12, inclusive, but does not include any private school in which education is primarily conducted in private homes.

(b) "Air contaminant" means any contaminant defined pursuant to Section 39013.

(c) "Administering agency" means an agency designated pursuant to Section 25502.

(d) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

SEC. 16. Section 21151.3 of the Public Resources Code is repealed.

SEC. 17. Section 21151.4 of the Public Resources Code is amended to read:

21151.4. No environmental impact report or negative declaration shall be approved for any project involving the construction or alteration of a facility within ¼ of a mile of a school which might reasonably be anticipated to emit hazardous or acutely hazardous air emission, or which would handle acutely hazardous material or a mixture containing acutely hazardous material in a quantity equal to

or greater than the quantity specified in subdivision (a) of Section 25536 of the Health and Safety Code, which may pose a health or safety hazard to persons who would attend or would be employed at the school, unless both of the following occur:

(a) The lead agency preparing the environmental impact report or negative declaration has consulted with the school district having jurisdiction regarding the potential impact of the project on the school.

(b) The school district has been given written notification of the project not less than 30 days prior to the proposed approval of the environmental impact report or negative declaration.

SEC. 18. Section 21151.8 of the Public Resources Code is amended to read:

21151.8. (a) No environmental impact report or negative declaration shall be approved for any project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless all of the following occur:

(1) The environmental impact report or negative declaration includes information which is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

(A) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

(B) A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

(2) The lead agency preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency in which the proposed schoolsite is located, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed schoolsite which might reasonably be anticipated to emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste. The notification by the lead agency shall include a list of the locations for which information is sought.

(3) The governing board of the school district makes one of the following written findings:

(A) Consultation identified no such facilities specified in paragraph (2).

(B) The facilities specified in paragraph (2) exist, but one of the

following conditions applies:

(i) The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes such a finding, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

(4) Each administering agency, air pollution control district, or air quality management district receiving written notification from a lead agency to identify facilities pursuant to paragraph (2) shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. The environmental impact report or negative declaration shall be conclusively presumed to comply with this section as to the area of responsibility of any agency which does not respond within 30 days.

(b) If a lead agency has carried out the consultation required by paragraph (2) of subdivision (a), the environmental impact report or the negative declaration shall be conclusively presumed to comply with this section, notwithstanding any failure of the consultation to identify an existing facility specified in paragraph (2) of subdivision (a).

(c) As used in this section and Section 21151.4, the following definitions shall apply:

(1) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(2) "Acutely hazardous material" means any material defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(5) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(6) "Administering agency" means an agency designated pursuant to Section 25502 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing

with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

SEC. 19. Sections 3, 5, 10, 10.5, 11, 14, 15, and 17 of this act shall not apply to projects for which an application is submitted pursuant to Section 65943 of the Government Code prior to January 1, 1992.

SEC. 20. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution for those costs which may be incurred by a local agency or school district because this act creates a new crime or infraction, changes the definition of a crime or infraction, changes the penalty for a crime or infraction, or eliminates a crime or infraction.

Moreover, no reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution for other costs because the local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for those other costs.

However, notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars ($1,000,000), reimbursement shall be made from the State Mandates Claims Fund. Notwithstanding Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

SEC. 21. If any provision of this act or its application to any person or circumstances is held invalid, that invalidity shall not affect other provisions or applications of the act which can be given effect without the invalid provision or application, and to this end the provisions of this act are severable.

CHAPTER 1212

An act to amend Section 65962.5 of the Government Code, and to amend Section 21084 of, and to add Section 21092.6 to, the Public Resources Code, relating to environmental quality.

[Approved by Governor October 14, 1991. Filed with Secretary of State October 14, 1991.]

The people of the State of California do enact as follows:

SECTION 1. Section 65962.5 of the Government Code is amended to read:

65962.5. (a) The Department of Toxic Substances Control shall compile and update as appropriate, but at least annually, and shall submit to the Secretary for Environmental Protection, a list of all of the following:

(1) All hazardous waste facilities subject to corrective action pursuant to Section 25187.5 of the Health and Safety Code.

(2) All land designated as hazardous waste property or border zone property pursuant to Article 11 (commencing with Section 25220) of Chapter 6.5 of Division 20 of the Health and Safety Code.

(3) All information received by the Department of Toxic Substances Control pursuant to Section 25242 of the Health and Safety Code on hazardous waste disposals on public land.

(4) All sites listed pursuant to Section 25356 of the Health and Safety Code.

(5) All sites included in the Abandoned Site Assessment Program.

(b) The State Department of Health Services shall compile and update as appropriate, but at least annually, and shall submit to the Secretary for Environmental Protection, a list of all public drinking water wells which contain detectable levels of organic contaminants and which are subject to water analysis pursuant to Section 4026.2 or

4026.3 of the Health and Safety Code.

(c) The State Water Resources Control Board shall compile and update as appropriate, but at least annually, and shall submit to the Secretary for Environmental Protection, a list of all of the following:

(1) All underground storage tanks for which an unauthorized release report is filed pursuant to Section 25295 of the Health and Safety Code.

(2) All solid waste disposal facilities from which there is a migration of hazardous waste and for which a California regional water quality control board has notified the Department of Toxic Substances Control pursuant to subdivision (e) of Section 13273 of the Water Code.

(3) All cease and desist orders issued after January 1, 1986, pursuant to Section 13301 of the Water Code, and all cleanup or abatement orders issued after January 1, 1986, pursuant to Section 13304 of the Water Code, which concern the discharge of wastes which are hazardous materials.

(d) The local enforcement agency, as designated pursuant to Section 18051 of Title 14 of the California Code of Regulations, shall compile as appropriate, but at least annually, and shall submit to the California Integrated Waste Management Board, a list of all solid waste disposal facilities from which there is a known migration of hazardous waste. The California Integrated Waste Management Board shall compile the local lists into a statewide list which shall be submitted to the Secretary for Environmental Protection and shall be available to any person who requests the information.

(e) The Secretary for Environmental Protection shall consolidate the information submitted pursuant to this section and distribute it in a timely fashion to each city and county in which sites on the lists are located. The secretary shall distribute the information to any other person upon request. The secretary may charge a reasonable fee to persons requesting the information, other than cities, counties, or cities and counties, to cover the cost of developing, maintaining, and reproducing and distributing the information.

(f) Before a lead agency accepts as complete an application for any development project which will be used by any person, the applicant shall consult the lists sent to the appropriate city or county and shall submit a signed statement to the local agency indicating whether the project and any alternatives are located on a site which is included on any of the lists compiled pursuant to this section and shall specify any list. If the site is included on a list, and the list is not specified on the statement, the lead agency shall notify the applicant pursuant to Section 65943. The statement shall read as follows:

HAZARDOUS WASTE AND SUBSTANCES STATEMENT

The development project and any alternatives proposed in this application are contained on the lists compiled pursuant to Section 65962.5 of the Government Code. Accordingly, the project

applicant is required to submit a signed statement which contains the following information:

Name of applicant:
Address:
Phone number:
Address of site (street name and number if available, and ZIP Code):
Local agency (city/county):
Assessor's book, page, and parcel number:
Specify any list pursuant to Section 65962.5 of the Government Code:
Regulatory identification number:
Date of list:

_____

Applicant, date

(g) The changes made to this section by the act amending this section, which takes effect January 1, 1992, apply only to projects for which applications have not been deemed complete on or before January 1, 1992, pursuant to Section 65943.

SEC. 2. Section 21084 of the Public Resources Code is amended to read:

21084. (a) The guidelines prepared and adopted pursuant to Section 21083 shall include a list of classes of projects which have been determined not to have a significant effect on the environment and which shall be exempt from this division. In adopting the guidelines, the Secretary of the Resources Agency shall make a finding that the listed classes of projects referred to in this section do not have a significant effect on the environment.

(b) No project which may result in damage to scenic resources, including, but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway designated as an official state scenic highway, pursuant to Article 2.5 (commencing with Section 260) of Chapter 2 of Division 1 of the Streets and Highways Code, shall be exempted from this division pursuant to subdivision (a). This subdivision does not apply to improvements as mitigation for a project for which a negative declaration has been approved or an environmental impact report has been certified.

(c) No project located on a site which is included on any list compiled pursuant to Section 65962.5 of the Government Code shall be exempted from this division pursuant to subdivision (a).

(d) The changes made to this section by the act amending this section, which takes effect January 1, 1992, apply only to projects for which applications have not been deemed complete on or before January 1, 1992, pursuant to Section 65943 of the Government Code.

SEC. 3. Section 21092.6 is added to the Public Resources Code, to read:

21092.6. (a) The lead agency shall consult the lists compiled pursuant to Section 65962.5 of the Government Code to determine whether the project and any alternatives are located on a site which

is included on any list. The lead agency shall indicate whether a site is on any list not already identified by the applicant. The lead agency shall specify the list and include the information in the statement required pursuant to subdivision (f) of Section 65962.5 of the Government Code, in the notice required pursuant to Section 21080.4, a negative declaration, and a draft environmental impact report. The requirement in this section to specify any list shall not be construed to limit compliance with this division.

(b) If a project or any alternatives are located on a site which is included on any of the lists compiled pursuant to Section 65962.5 of the Government Code and the lead agency did not accurately specify or did not specify any list pursuant to subdivision (a), the California Environmental Protection Agency shall notify the lead agency specifying any list with the site when it receives notice pursuant to Section 21080.4, a negative declaration, and a draft environmental impact report. The California Environmental Protection Agency shall not be liable for failure to notify the lead agency pursuant to this subdivision.

(c) This section applies only to projects for which applications have not been deemed complete pursuant to Section 65943 of the Government Code on or before January 1, 1992.

SEC. 4. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because the local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the program or level of service mandated by this act. Notwithstanding Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

CHAPTER 375

An act to amend Section 21083.2 of the Public Resources Code, relating to environmental quality.

[Approved by Governor September 7, 1993. Filed with Secretary of State September 8, 1993.]

The people of the State of California do enact as follows:

SECTION 1. Section 21083.2 of the Public Resources Code is amended to read:

21083.2. (a) As part of the determination made pursuant to Section 21080.1, the lead agency shall determine whether the project may have a significant effect on archaeological resources. If the lead agency determines that the project may have a significant effect on unique archaeological resources, the environmental impact report shall address the issue of those resources. An environmental impact report, if otherwise necessary, shall not address the issue of nonunique archaeological resources. A negative declaration shall be issued with respect to a project if, but for the issue of nonunique archaeological resources, the negative declaration would be otherwise issued.

(b) If it can be demonstrated that a project will cause damage to a unique archaeological resource, the lead agency may require reasonable efforts to be made to permit any or all of these resources to be preserved in place or left in an undisturbed state. Examples of that treatment, in no order of preference, may include, but are not limited to, any of the following:

(1) Planning construction to avoid archaeological sites.

(2) Deeding archaeological sites into permanent conservation easements.

(3) Capping or covering archaeological sites with a layer of soil before building on the sites.

(4) Planning parks, greenspace, or other open space to incorporate archaeological sites.

(c) To the extent that unique archaeological resources are not preserved in place or not left in an undisturbed state, mitigation measures shall be required as provided in this subdivision. The project applicant shall provide a guarantee to the lead agency to pay one-half the estimated cost of mitigating the significant effects of the project on unique archaeological resources. In determining payment, the lead agency shall give due consideration to the in-kind value of project design or expenditures that are intended to permit any or all archaeological resources or California Native American culturally significant sites to be preserved in place or left in an undisturbed state. When a final decision is made to carry out or approve the project, the lead agency shall, if necessary, reduce the specified mitigation measures to those which can be funded with the

money guaranteed by the project applicant plus the money voluntarily guaranteed by any other person or persons for those mitigation purposes. In order to allow time for interested persons to provide the funding guarantee referred to in this subdivision, a final decision to carry out or approve a project shall not occur sooner than 60 days after completion of the recommended special environmental impact report required by this section.

(d) Excavation as mitigation shall be restricted to those parts of the unique archaeological resource that would be damaged or destroyed by the project. Excavation as mitigation shall not be required for a unique archaeological resource if the lead agency determines that testing or studies already completed have adequately recovered the scientifically consequential information from and about the resource, if this determination is documented in the environmental impact report.

(e) In no event shall the amount paid by a project applicant for mitigation measures required pursuant to subdivision (c) exceed the following amounts:

(1) An amount equal to one-half of 1 percent of the projected cost of the project for mitigation measures undertaken within the site boundaries of a commercial or industrial project.

(2) An amount equal to three-fourths of 1 percent of the projected cost of the project for mitigation measures undertaken within the site boundaries of a housing project consisting of a single unit.

(3) If a housing project consists of more than a single unit, an amount equal to three-fourths of 1 percent of the projected cost of the project for mitigation measures undertaken within the site boundaries of the project for the first unit plus the sum of the following:

(A) Two hundred dollars ($200) per unit for any of the next 99 units.

(B) One hundred fifty dollars ($150) per unit for any of the next 400 units.

(C) One hundred dollars ($100) per unit in excess of 500 units.

(f) Unless special or unusual circumstances warrant an exception, the field excavation phase of an approved mitigation plan shall be completed within 90 days after final approval necessary to implement the physical development of the project or, if a phased project, in connection with the phased portion to which the specific mitigation measures are applicable. However, the project applicant may extend that period if he or she so elects. Nothing in this section shall nullify protections for Indian cemeteries under any other provision of law.

(g) As used in this section, "unique archaeological resource" means an archaeological artifact, object, or site about which it can be clearly demonstrated that, without merely adding to the current body of knowledge, there is a high probability that it meets any of the following criteria:

(1) Contains information needed to answer important scientific

research questions and that there is a demonstrable public interest in that information.

(2) Has a special and particular quality such as being the oldest of its type or the best available example of its type.

(3) Is directly associated with a scientifically recognized important prehistoric or historic event or person.

(h) As used in this section, "nonunique archaeological resource" means an archaeological artifact, object, or site which does not meet the criteria in subdivision (g). A nonunique archaeological resource need be given no further consideration, other than the simple recording of its existence by the lead agency if it so elects.

(i) As part of the objectives, criteria, and procedures required by Section 21082 or as part of conditions imposed for mitigation, a lead agency may make provisions for archaeological sites accidentally discovered during construction. These provisions may include an immediate evaluation of the find. If the find is determined to be a unique archaeological resource, contingency funding and a time allotment sufficient to allow recovering an archaeological sample or to employ one of the avoidance measures may be required under the provisions set forth in this section. Construction work may continue on other parts of the building site while archaeological mitigation takes place.

(j) This section does not apply to any project described in subdivision (a) or (b) of Section 21065 if the lead agency elects to comply with all other applicable provisions of this division. This section does not apply to any project described in subdivision (c) of Section 21065 if the applicant and the lead agency jointly elect to comply with all other applicable provisions of this division.

(k) Any additional costs to any local agency as a result of complying with this section with respect to a project of other than a public agency shall be borne by the project applicant.

(*l*) Nothing in this section is intended to affect or modify the requirements of Section 21084 or 21084.1.

SEC. 2. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because the local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the program or level of service mandated by this act. Notwithstanding Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

62350

CHAPTER 1130

An act to amend Sections 21003, 21080.1, 21080.3, 21080.7, 21081.6, 21087, 21090, 21091, 21092, 21092.3, 21100, 21151.5, 21152, 21167.1, 21167.4, 21167.6, and 21167.8 of, to add Section 21064.5 to, to add Chapter 4.5 (commencing with Section 21156) to Division 13 of, and to repeal Sections 21087.5, 21155, and 21168.3 of, the Public Resources Code, relating to environmental quality.

[Approved by Governor October 10, 1993. Filed with Secretary of State October 11, 1993.]

The people of the State of California do enact as follows:

SECTION 1. This act shall be known, and may be cited as, the Dills, Allen, Sher California Environmental Quality Act Revision Act of 1993.

SEC. 2. Section 21003 of the Public Resources Code is amended to read:

21003. The Legislature further finds and declares that it is the policy of the state that:

(a) Local agencies integrate the requirements of this division with planning and environmental review procedures otherwise required by law or by local practice so that all those procedures, to the maximum feasible extent, run concurrently, rather than consecutively.

(b) Documents prepared pursuant to this division be organized and written in a manner that will be meaningful and useful to decisionmakers and to the public.

(c) Environmental impact reports omit unnecessary descriptions of projects and emphasize feasible mitigation measures and feasible alternatives to projects.

(d) Information developed in individual environmental impact reports be incorporated into a data base which can be used to reduce delay and duplication in preparation of subsequent environmental impact reports.

(e) Information developed in environmental impact reports and negative declarations be incorporated into a data base which may be used to make subsequent or supplemental environmental determinations.

(f) All persons and public agencies involved in the environmental review process be responsible for carrying out the process in the most efficient, expeditious manner in order to conserve the available financial, governmental, physical, and social resources with the objective that those resources may be better applied toward the mitigation of actual significant effects on the environment.

SEC. 3. Section 21064.5 is added to the Public Resources Code, to read:

21064.5. "Mitigated negative declaration" means a negative declaration prepared for a project when the initial study has identified potentially significant effects on the environment, but (1) revisions in the project plans or proposals made by, or agreed to by, the applicant before the proposed negative declaration is released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effect on the environment would occur, and (2) there is no substantial evidence in light of the whole record before the public agency that the project, as revised, may have a significant effect on the environment.

SEC. 4. Section 21080.1 of the Public Resources Code is amended to read:

21080.1. (a) The lead agency shall have the responsibility for determining whether an environmental impact report or a negative declaration shall be required for any project which is subject to this division. That determination shall be final and conclusive on all persons, including responsible agencies, unless challenged, as provided in Section 21167.

(b) In the case of a project described in subdivision (c) of Section 21065, the lead agency shall, upon the request of a potential applicant, provide for consultation prior to the filing of the application regarding the range of actions, potential alternatives, mitigation measures, and any potential and significant effects on the environment of the project.

SEC. 5. Section 21080.3 of the Public Resources Code is amended to read:

21080.3. (a) Prior to determining whether a negative declaration or environmental impact report is required for a project, the lead agency shall consult with all responsible agencies and with any other public agency which has jurisdiction by law over natural resources affected by the project which are held in trust for the people of the State of California. Prior to that required consultation, the lead agency may informally contact any such agency.

(b) In order to expedite the requirements of subdivision (a), the Office of Planning and Research, upon request of a lead agency, shall assist the lead agency in determining the various responsible agencies for a proposed project. In the case of a project described in

subdivision (c) of Section 21065, the request may also be made by the project applicant.

SEC. 6. Section 21080.7 of the Public Resources Code is amended to read:

21080.7. (a) No environmental impact report or negative declaration is required for any project involving the construction of housing or neighborhood commercial facilities in an urbanized area if the lead agency does all of the following:

(1) Finds, after giving notice pursuant to subdivision (c) or (d) of Section 21092 and following the procedure prescribed by law or regulation which would be necessary to make a determination pursuant to Section 21080.1, all of the following:

(A) The project is consistent with a comprehensive regulatory document which has been adopted pursuant to Article 8 (commencing with Section 65450) of Chapter 3 of Title 7 of the Government Code or, in the coastal zone, a local coastal program certified pursuant to Article 2 (commencing with Section 30510) of Chapter 6 of Division 20.

(B) For purposes of this section, the plan or program was adopted pursuant to the procedure established by Article 8 (commencing with Section 65450) of Chapter 3 of Title 7 of the Government Code not more than five years prior to the finding made pursuant to this section.

(C) The plan or program has been the subject of an environmental impact report.

(D) The environmental impact report is sufficiently detailed so that the significant effects on the environment of the project and measures necessary to mitigate or avoid those effects can be determined, including any significant physical effects on existing structures and neighborhoods of historical or aesthetic significance that exist in the area covered by the plan or program and measures necessary to mitigate or avoid those effects.

(2) Makes one or more of the findings as required pursuant to Section 21081.

(3) Files a notice of the decision on the proposed activity with the county clerk. Those notices shall be available for public inspection, and a list of the notices shall be posted on a weekly basis in the office of the county clerk. Each list shall remain posted for a period of 30 days.

(b) As used in this section:

(1) "Neighborhood commercial facilities" means those commercial facilities which are an integral part of a project involving the construction of housing and which will serve the residents of the housing.

(2) "Urbanized area" means a central city or cities and surrounding closely settled territory, as defined by the United States Department of Commerce Bureau of the Census in the Federal Register, Volume 39, Number 85, for Wednesday, May 1, 1974, at pages 15202 and 15203, and as periodically updated.

204940

SEC. 7. Section 21081.6 of the Public Resources Code is amended to read:

21081.6. When making the findings required by subdivision (a) of Section 21081 or when adopting a negative declaration pursuant to paragraph (2) of subdivision (c) of Section 21080, the following requirements shall apply:

(a) The public agency shall adopt a reporting or monitoring program for the changes to the project which it has adopted or made a condition of project approval in order to mitigate or avoid significant effects on the environment. The reporting or monitoring program shall be designed to ensure compliance during project implementation. For those changes which have been required or incorporated into the project at the request of an agency having jurisdiction by law over natural resources affected by the project, that agency shall, if so requested by the lead or responsible agency, prepare and submit a proposed reporting or monitoring program.

(b) If there is a project for which mitigation is adopted, a public agency shall comply with subdivision (a) by, among other things, adopting mitigation measures as conditions of project approval. Those conditions of project approval may be set forth in referenced documents which address required mitigation measures.

(c) Prior to the close of the public review period for a draft environmental impact report or mitigated negative declaration, a responsible agency, or a public agency having jurisdiction over natural resources affected by the project, shall either submit to the lead agency complete and detailed performance objectives for mitigation measures which would address the significant effects on the environment identified by the responsible agency or agency having jurisdiction over natural resources affected by the project, or refer the lead agency to appropriate, readily available guidelines or reference documents. Any mitigation measures submitted to a lead agency by a responsible agency or an agency having jurisdiction over natural resources affected by the project shall be limited to measures which mitigate impacts to resources which are subject to the statutory authority of, and definitions applicable to, that agency. Compliance or noncompliance by a responsible agency or agency having jurisdiction over natural resources affected by a project with that requirement shall not limit the authority of the responsible agency or agency having jurisdiction over natural resources affected by a project, or the authority of the lead agency, to approve, condition, or deny projects as provided by this division or any other provision of law.

(d) The lead agency shall specify the location and custodian of the documents or other material which constitute the record of proceedings upon which its decision is based.

SEC. 8. Section 21087 of the Public Resources Code is amended to read:

21087. (a) The Office of Planning and Research shall, at least once every two years, review the guidelines adopted pursuant to

Section 21083 and shall recommend proposed changes or amendments to the Secretary of the Resources Agency. The Secretary of the Resources Agency shall certify and adopt guidelines, and any amendments thereto, at least once every two years, pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, which shall become effective upon the filing thereof. However, guidelines shall not be adopted or amended without compliance with Sections 11346.4, 11346.5, and 11346.8 of the Government Code.

(b) On or before July 1, 1995, the Office of Planning and Research shall recommend proposed changes and the Secretary of the Resources Agency shall certify and adopt revisions to the guidelines pursuant to Section 21083 to reflect the changes to this division enacted during 1993.

SEC. 9. Section 21087.5 of the Public Resources Code is repealed.

SEC. 10. Section 21090 of the Public Resources Code is amended to read:

21090. For all purposes of this division, all public and private activities or undertakings pursuant to, or in furtherance of, a redevelopment plan shall be deemed to be a single project. However, further environmental review of any public or private activity or undertaking pursuant to, or in furtherance of, a redevelopment plan shall be conducted if any of the events specified in Section 21166 have occurred.

SEC. 11. Section 21091 of the Public Resources Code is amended to read:

21091. (a) The public review period for a draft environmental impact report shall not be less than 30 days. If the draft environmental impact report is submitted to the State Clearinghouse for review, the review period shall be at least 45 days.

(b) The public review period for a proposed negative declaration shall not be less than 20 days. If the proposed negative declaration is submitted to the State Clearinghouse for review, the review period shall be at least 30 days.

(c) Notwithstanding subdivisions (a) and (b), if a draft environmental impact report or a proposed negative declaration is submitted to the State Clearinghouse for review and the period of review by the State Clearinghouse is longer than the public review period established pursuant to subdivision (a) or (b), whichever is applicable, the public review period shall be at least as long as the period of review by the State Clearinghouse.

(d) (1) The lead agency shall consider any comments it receives on a draft environmental impact report or on a proposed negative declaration, which are received within the public review period.

(2) (A) With respect to the consideration of comments received on a draft environmental impact report, the lead agency shall evaluate any comments on environmental issues that are received from persons who have reviewed the draft and shall prepare a written response pursuant to subparagraph (B). The lead agency

may also respond to comments that are received after the close of the public review period.

(B) The written response shall describe the disposition of any significant environmental issue that is raised by commenters. The responses shall be prepared consistent with Section 15088 of Title 14 of the California Code of Regulations, as those regulations existed on June 1, 1993.

(e) (1) Criteria for shorter review periods by the State Clearinghouse for documents which must be submitted to the State Clearinghouse shall be set forth in the written guidelines issued by the Office of Planning and Research and made available to the public.

(2) Those shortened review periods shall not be less than 30 days for a draft environmental impact report and 20 days for a negative declaration.

(3) Any request for a shortened review period shall only be made in writing by the decisionmaking body of the lead agency to the Office of Planning and Research. The decisionmaking body may designate by resolution or ordinance a person authorized to request a shortened review period. Any designated person shall notify the decisionmaking body of this request.

(4) Any request approved by the State Clearinghouse shall be consistent with the criteria set forth in the written guidelines of the Office of Planning and Research.

(5) A shortened review period shall not be approved by the Office of Planning and Research for any proposed project of statewide, regional, or areawide environmental significance as determined pursuant to Section 21083.

(6) Any approval of a shortened review period shall be given prior to, and reflected in, the public notice required pursuant to Section 21092.

(f) Prior to carrying out or approving a project for which a negative declaration has been adopted, the lead agency shall consider the negative declaration together with any comments that were received and considered pursuant to paragraph (1) of subdivision (d).

SEC. 12. Section 21092 of the Public Resources Code is amended to read:

21092. (a) Any lead agency which is preparing an environmental impact report or a negative declaration or making a determination pursuant to Section 21157 shall provide public notice of that fact within a reasonable period of time prior to certification of the environmental impact report or adoption of the negative declaration.

(b) (1) The notice shall specify the period during which comments will be received on the draft environmental report or negative declaration, and shall include the date, time, and place of any public meetings or hearings on the proposed project, a brief description of the proposed project and its location, the significant

effects on the environment, if any, anticipated as a result of the project, and the address where copies of the draft environmental impact report or negative declaration, and all documents referenced in the draft environmental impact report or negative declaration, are available for review.

(2) This section shall not be construed in any manner which results in the invalidation of an action because of the alleged inadequacy of the notice content, provided that there has been substantial compliance with the notice content requirements of this section.

(3) The notice required by this section shall be given to the last known name and address of all organizations and individuals who have previously requested notice and shall also be given by at least one of the following procedures:

(A) Publication, no fewer times than required by Section 6061 of the Government Code, by the public agency in a newspaper of general circulation in the area affected by the proposed project. If more than one area will be affected, the notice shall be published in the newspaper of largest circulation from among the newspapers of general circulation in those areas.

(B) Posting of notice by the lead agency on- and off-site in the area where the project is to be located.

(C) Direct mailing to the owners and occupants of contiguous property shown on the latest equalized assessment roll.

(c) For any project involving the burning of municipal wastes, hazardous waste, or refuse-derived fuel, including, but not limited to, tires, meeting the qualifications of subdivision (d), notice shall be given to all organizations and individuals who have previously requested notice and shall also be given by at least the procedures specified in subparagraphs (A), (B), and (C) of paragraph (3) of subdivision (b). In addition, notification shall be given by direct mailing to the owners and occupants of property within one-fourth of a mile of any parcel or parcels on which is located a project subject to this subdivision. This subdivision does not apply to any project for which notice has already been provided as of July 14, 1989, in compliance with this section as it existed prior to July 14, 1989.

(d) The notice requirements of subdivision (c) apply to both of the following:

(1) The construction of a new facility.

(2) The expansion of an existing facility which burns hazardous waste which would increase its permitted capacity by more than 10 percent. For purposes of this paragraph, the amount of expansion of an existing facility shall be calculated by comparing the proposed facility capacity with whichever of the following is applicable:

(A) The facility capacity approved in the facility's hazardous waste facilities permit pursuant to Section 25200 of the Health and Safety Code or its grant of interim status pursuant to Section 25200.5 of the Health and Safety Code, or the facility capacity authorized in any state or local agency permit allowing the construction or

operation of a facility for the burning of hazardous waste, granted before January 1, 1990.

(B) The facility capacity authorized in the facility's original hazardous waste facilities permit, grant of interim status, or any state or local agency permit allowing the construction or operation of a facility for the burning of hazardous waste, granted on or after January 1, 1990.

(e) The notice requirements specified in subdivision (b) or (c) shall not preclude a public agency from providing additional notice by other means if the agency so desires, or from providing the public notice required by this section at the same time and in the same manner as public notice otherwise required by law for the project.

SEC. 13. Section 21092.3 of the Public Resources Code is amended to read:

21092.3. The notices required pursuant to Sections 21080.4 and 21092 for an environmental impact report shall be posted in the office of the county clerk of each county in which the project will be located and shall remain posted for a period of 30 days. The notice required pursuant to Section 21092 for a negative declaration shall be so posted for a period of 20 days, unless otherwise required by law to be posted for 30 days. The county clerk shall post the notices within 24 hours of receipt.

SEC. 14. Section 21100 of the Public Resources Code is amended to read:

21100. (a) All state agencies, boards, and commissions shall prepare, or cause to be prepared by contract, and certify the completion of, an environmental impact report on any project which they propose to carry out or approve that may have a significant effect on the environment. Whenever feasible, a standard format shall be used for environmental impact reports. The environment impact report shall include a detailed statement setting forth the following:

(1) The significant effects on the environment of the proposed project.

(2) Any significant effects on the environment which cannot be avoided if the project is implemented.

(3) Any significant effects on the environment which would be irreversible if the project is implemented.

(4) Any growth-inducing impacts of the project.

(5) Mitigation measures proposed to minimize the significant effects on the environment, including, but not limited to, measures to reduce the wasteful, inefficient, and unnecessary consumption of energy.

(6) Alternatives to the proposed project.

(7) The relationship between local short-term uses of the human environment and the maintenance and enhancement of long-term productivity.

(b) The report shall also contain a statement briefly indicating the reasons for determining that various effects on the environment of

a project are not significant and consequently have not been discussed in detail in the environmental impact report.

(c) For purposes of this section, any significant effect on the environment shall be limited to substantial, or potentially substantial, adverse changes in physical conditions which exist within the area as defined in Section 21060.5.

(d) Previously approved land use documents, including, but not limited to, general plans, specific plans, and local coastal plans, may be used in cumulative impact analysis. The cumulative impact analysis for an individual project shall not be required to consider a project for which information first becomes available after completion of the draft environmental impact report and could not otherwise have been reasonably anticipated, if the environmental impact report is certified within 150 days of the close of the public comment period.

SEC. 15. Section 21151.5 of the Public Resources Code is amended to read:

21151.5. (a) Each local agency shall establish, by ordinance or resolution, time limits, not to exceed one year for completing and certifying environmental impact reports, and 105 days for completing negative declarations, for projects described in subdivision (c) of Section 21065. These time limits shall apply only to those circumstances in which the local agency is the lead agency for a project. These ordinances or resolutions may establish different time limits for different types or classes of projects and different types of environmental impact reports, but all limits shall be measured from the date on which an application requesting approval of the project is received and accepted as complete by the local agency. No application for a project may be deemed incomplete for lack of a waiver of time periods prescribed by local ordinance or resolution.

(b) The ordinances or resolutions required by this section may provide for a reasonable extension of the time period in the event that compelling circumstances justify additional time and the project applicant consents thereto.

(c) If a draft environmental impact report, environmental impact report, focused environmental impact report, or negative declaration is prepared under a contract to a public agency, the contract shall be executed within 45 days from the date on which an application requesting approval of the project is received and accepted as complete by the local agency.

SEC. 16. Section 21152 of the Public Resources Code is amended to read:

21152. (a) Whenever a local lead agency approves or determines to carry out a project which is subject to this division, it shall file notice of the approval or the determination within five working days after the approval or determination becomes final, with the county clerk of each county in which the project will be located. The notice shall indicate the determination of the local agency whether the

project will, or will not, have a significant effect on the environment and shall indicate whether an environmental impact report has been prepared pursuant to this division. The notice shall also include certification that the final environmental impact report, if one was prepared, together with comments and responses, is available to the general public.

(b) Whenever a local lead agency determines that a project is not subject to this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085 or 21172, and it approves or determines to carry out the project, it, or the person specified in subdivision (b) or (c) of Section 21065, may file a notice of the determination with the county clerk of each county in which the project will be located. Any notice filed pursuant to this subdivision by a person specified in subdivision (b) or (c) of Section 21065 shall have a certificate of determination attached to it issued by the local lead agency responsible for making the determination that the project is not subject to this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085 or 21172. The certificate of determination may be in the form of a certified copy of an existing document or record of the local lead agency.

(c) All notices filed pursuant to this section shall be available for public inspection, and shall be posted within 24 hours of receipt in the office of the county clerk. Each notice shall remain posted for a period of 30 days. Thereafter, the clerk shall return the notice to the local lead agency with a notation of the period it was posted. The local lead agency shall retain the notice for not less than nine months.

SEC. 17. Section 21155 of the Public Resources Code is repealed.

SEC. 18. Chapter 4.5 (commencing with Section 21156) is added to Division 13 of the Public Resources Code, to read:

CHAPTER 4.5. STREAMLINED ENVIRONMENTAL REVIEW

Article 1. Findings

21156. It is the intent of the Legislature in enacting this chapter that a master environmental impact report shall evaluate the cumulative impacts, growth inducing impacts, and irreversible significant effects on the environment of subsequent projects to the greatest extent feasible. The Legislature further intends that the environmental review of subsequent projects be substantially reduced to the extent that the project impacts have been reviewed and appropriate mitigation measures are set forth in a certified master environmental impact report.

Article 2. Master Environmental Impact Report

21157. (a) A master environmental impact report may be prepared for any one of the following projects:

(1) A general plan, element, general plan amendment, or specific

plan.

(2) A project that consists of smaller individual projects which will be carried out in phases.

(3) A rule or regulation which will be implemented by subsequent projects.

(4) Projects to be carried out pursuant to a development agreement.

(5) Public and private projects pursuant to, or in furtherance of, a redevelopment plan.

(6) A state highway project or mass transit project which will be subject to multiple stages of review or approval.

(b) When a lead agency prepares a master environmental impact report, the document shall include all of the following:

(1) A detailed statement as required by Section 21100.

(2) A description of anticipated subsequent projects that would be within the scope of the master environmental impact report, that contains sufficient information with regard to the kind, size, intensity, and location of the subsequent projects, including, but not limited to, all of the following:

(A) The specific type of project anticipated to be undertaken.

(B) The maximum and minimum intensity of any anticipated subsequent project, such as the number of residences in a residential development, and, with regard to a public works facility, its anticipated capacity and service area.

(C) The anticipated location and alternative locations for any development projects.

(D) A capital outlay or capital improvement program, or other scheduling or implementing device that governs the submission and approval of subsequent projects.

(3) A description of potential impacts of anticipated subsequent projects for which there is not sufficient information reasonably available to support a full assessment of potential impacts in the master environmental impact report. This description shall not be construed as a limitation on the impacts which may be considered in a focused environmental impact report.

(c) Lead agencies may develop and implement a fee program in accordance with applicable provisions of law to generate the revenue necessary to prepare a master environmental impact report.

21157.1. The preparation and certification of a master environmental impact report, if prepared and certified consistent with this division, may allow for the limited review of subsequent projects that were described in the master environmental impact report as being within the scope of the report, in accordance with the following requirements:

(a) The lead agency for a subsequent project shall be the lead agency or any responsible agency identified in the master environmental impact report.

(b) The lead agency shall prepare an initial study on any proposed

subsequent project. This initial study shall analyze whether the subsequent project may cause any significant effect on the environment that was not examined in the master environmental impact report and whether the subsequent project was described in the master environmental impact report as being within the scope of the report.

(c) If the lead agency determines that a proposed subsequent project will have no additional significant effect on the environment, as defined in subdivision (d) of Section 21158, that was not identified in the master environmental impact report and that no new or additional mitigation measures or alternatives may be required, the lead agency shall make a written finding based upon the information contained in the initial study that the subsequent project is within the scope of the project covered by the master environmental impact report. No new environmental document nor findings pursuant to Section 21081 shall be required by this division. Prior to approving or carrying out the proposed subsequent project, the lead agency shall provide notice of this fact pursuant to Section 21092 and incorporate all feasible mitigation measures or feasible alternatives set forth in the master environmental impact report which are appropriate to the project. Whenever a lead agency approves or determines to carry out any subsequent project pursuant to this section, it shall file a notice pursuant to Section 21108 or 21152.

(d) Where a lead agency cannot make the findings required in subdivision (c), the lead agency shall prepare, pursuant to Section 21157.7, either a mitigated negative declaration or environmental impact report.

21157.5. (a) A proposed mitigated negative declaration shall be prepared for any proposed subsequent project if both of the following occur:

(1) An initial study has identified potentially new or additional significant effects on the environment that were not analyzed in the master environmental impact report.

(2) Feasible mitigation measures or alternatives will be incorporated to revise the proposed subsequent project, before the negative declaration is released for public review, in order to avoid the effects or mitigate the effects to a point where clearly no significant effect on the environment will occur.

(b) If there is substantial evidence in light of the whole record before the lead agency that the proposed subsequent project may have a significant effect on the environment and a mitigated negative declaration is not prepared, the lead agency shall prepare an environmental impact report or a focused environmental impact report pursuant to Section 21158.

21157.6. The master environmental impact report shall not be used for the purposes of this chapter if the certification occurred more than five years prior to the filing of an application for a subsequent project unless the lead agency reviews the adequacy of the master environmental impact report and does either of the

following:

(a) Finds that no substantial changes have occurred with respect to the circumstances under which the master environmental impact report was certified or that no new information, which was not known and could not have been known at the time that the master environmental impact report was certified as complete, has become available.

(b) Certifies a subsequent or supplemental environmental impact report which has been either incorporated into the previously certified master environmental impact or references any deletions, additions, or any other modifications to the previously certified environmental impact report.

21157.7. If a later approved project, which was not identified by the lead agency in a certified master environmental impact report as an anticipated subsequent project and was not analyzed in the master environmental impact report's cumulative impacts analysis, makes substantial changes with respect to the circumstances under which the master environmental impact report was certified or provides new information, which was not known and could not have been known at the time that the master environmental impact report was certified, the lead agency shall do one of the following:

(a) Consistent with the requirements of Section 21157.6, prepare a subsequent or supplemental environmental impact report that updates or revises the certified master environmental impact report to include a description of any additional anticipated subsequent projects as being within the scope of the report.

(b) If any new significant effect on the environment of a subsequent project that is described in the certified master environmental impact report as being within the scope of the report can be avoided or mitigated to a point where no significant effect on the environment of a subsequent project that is described in the certified master environmental impact report as being within the scope of the report will occur and no project specific effects mandate the preparation of a focused environmental impact report, prepare a mitigated negative declaration consistent with Section 21157.5 for the subsequent project.

(c) Prepare a focused environmental impact report consistent with Section 21158 for all subsequent projects described in the certified master environmental impact report as being within the scope of the report.

Article 3. Focused Environmental Impact Report

21158. (a) A focused environmental impact report is an environmental impact report on a subsequent project identified in a master environmental impact report. A focused environmental impact report may be utilized only if the lead agency finds that the analysis in the master environmental impact report of cumulative impacts, growth inducing impacts, and irreversible significant effects

on the environment is adequate for the subsequent project. The focused environmental impact report shall incorporate, by reference, the master environmental impact report and analyze only the subsequent project's additional significant effects on the environment, as defined in subdivision (d), and any new or additional mitigation measures or alternatives that were not identified and analyzed by the master environmental impact report.

(b) The focused environmental impact report need not examine those effects which the lead agency finds were one of the following:

(1) Mitigated or avoided pursuant to subdivision (a) of Section 21081 as a result of mitigation measures identified in the master environmental impact report which will be required as part of the approval of the subsequent project.

(2) Examined at a sufficient level of detail in the master environmental impact report to enable those significant environmental effects to be mitigated or avoided by specific revisions to the project, the imposition of conditions, or by other means in connection with the approval of the subsequent project.

(3) Subject to a finding pursuant to subdivision (b) of Section 21081.

(c) A focused environmental impact report on any subsequent project shall analyze any significant effects on the environment where substantial new or additional information shows that the adverse environmental impact may be more significant than was described in the master environmental impact report. The substantial new or additional information may also show that mitigation measures or alternatives identified in the master environmental impact report, which were previously determined to be infeasible, are feasible and will avoid or reduce the significant effects on the environment of the subsequent project to a level of insignificance.

(d) For purposes of this chapter, "additional significant effects on the environment" are those project specific effects on the environment which were not addressed as significant effects on the environment in the master environmental impact report.

(e) Nothing in this chapter is intended to limit or abridge the ability of a lead agency to focus upon the issues that are ripe for decision at each level of environmental review, or to exclude duplicative analysis of environmental effects examined in previous environmental impact reports pursuant to Section 21093.

21158.5. (a) Where a project consists of multiple-family residential development of not more than 100 units or a residential and commercial or retail mixed-use development of not more than 100,000 square feet which complies with all of the following, a focused environmental impact report shall be prepared, notwithstanding that the project was not identified in a master environmental impact report:

(1) Is consistent with a general plan, specific plan, community plan, or zoning ordinance for which an environmental impact report

was prepared within five years of the certification of the focused environmental impact report.

(2) The lead agency cannot make the finding described in subdivision (c) of Section 21157.1, a negative declaration or mitigated negative declaration cannot be prepared pursuant to Section 21080, 21157.5, or 21158, and Section 21166 does not apply.

(3) Meets one or more of the following conditions:

(A) The parcel on which the project is to be developed is surrounded by immediately contiguous urban development.

(B) The parcel on which the project is to be developed has been previously developed with urban uses.

(C) The parcel on which the project is to be developed is within one-half mile of an existing rail transit station.

(b) A focused environmental impact report prepared pursuant to this section shall be limited to a discussion of potentially significant effects on the environment specific to the project, or which substantial new information shows will be more significant than described in the prior environmental impact report. No discussion shall be required of alternatives to the project, cumulative impacts of the project, or the growth inducing impacts of the project.

Article 4.1. Expedited Environmental Review for Environmentally Mandated Projects

21159.1. (a) A focused environmental impact report may be utilized if a project meets all of the following requirements:

(1) The project consists solely of the installation of pollution control equipment required by a rule or regulation of an agency listed in Section 21159.4 and other components necessary to complete the installation of that equipment.

(2) The agency certified an environmental impact report on the rule or regulation or reviewed it pursuant to a certified regulatory program, and, in either case, the review included an assessment of growth inducing impacts and cumulative impacts of, and alternatives to, the project.

(3) The environmental review required by paragraph (2) was completed within five years of certification of the focused environmental impact report.

(4) An environmental impact report is not required pursuant to Section 21166.

(b) The discussion of significant effects on the environment in the focused environmental impact report shall be limited to project-specific potentially significant effects on the environment of the project which were not discussed in the environmental analysis of the rule or regulation required pursuant to subdivision (a) of Section 21159. No discussion of growth-inducing impacts or cumulative impacts shall be required in the focused environmental impact report, and the discussion of alternatives shall be limited to a discussion of alternative means of compliance, if any, with the rule

or regulation.

21159.2. (a) If a project consists solely of compliance with a performance standard or treatment requirement imposed by an agency listed in Section 21159.4, the lead agency for the compliance project shall, to the greatest extent feasible, utilize the environmental analysis required pursuant to subdivision (a) of Section 21159 in the preparation of a negative declaration, mitigated negative declaration, or environmental impact report on the compliance project or in otherwise fulfilling its responsibilities under this division. The use of numerical averages or ranges in an environmental analysis shall not relieve a lead agency of its obligations under this division to identify and evaluate the environmental effects of a compliance project.

(b) If the lead agency determines that an environmental impact report on the compliance project is required, the lead agency shall prepare an environmental impact report which addresses only the project-specific issues related to the compliance project or other issues that were not discussed in sufficient detail in the environmental analysis to enable the lead agency to fulfill its responsibilities under Section 21100 or 21151, as applicable. The mitigation measures imposed by the lead agency for the project shall relate only to the significant effects on the environment to be mitigated. The discussion of alternatives shall be limited to a discussion of alternative means of compliance, if any, with the rule or regulation.

21159.3. In the preparation of any environmental impact report pursuant to Section 21159.1 or 21159.2, the following deadlines shall apply:

(a) A lead agency shall determine whether an environmental impact report should be prepared within 30 days of its determination that the application for the project is complete.

(b) If the environmental impact report will be prepared under contract to the lead agency pursuant to Section 21082.1, the lead agency shall issue a request for proposals for preparation of the environmental impact report as soon as it has enough information to prepare a request for proposals, and in any event, not later than 30 days after the time for response to the notice of preparation has expired. The contract shall be awarded within 30 days of the response date for the request for proposals.

21159.4. This article shall only apply to the State Air Resources Board, a district, as defined in Section 39025 of the Health and Safety Code, the State Water Resources Control Board, a California regional water quality control board, the Department of Toxic Substances Control, and the California Integrated Waste Management Board.

Article 5. Public Assistance Program

21159.9. On or before March 1, 1994, the Office of Planning and Research shall implement, utilizing existing resources, a public

assistance and information program, to ensure efficient and effective implementation of this division, to do both of the following:

(a) Establish a public education and training program for planners, developers, and other interested parties to assist them in implementing this division.

(b) Establish a data base to assist in the preparation of environmental documents.

SEC. 19. Section 21167.1 of the Public Resources Code is amended to read:

21167.1. (a) In all actions or proceedings brought pursuant to Sections 21167, 21168, and 21168.5, including the hearing of the action or proceeding on appeal from the decision of a lower court, all courts wherein the action or proceeding is, or may hereafter be, pending shall give the action or proceeding preference over all other civil actions therein, in the matter of setting the same for hearing or trial, and in hearing the same, to the end that the action or proceeding shall be quickly heard and determined. The court shall regulate the briefing schedule so that, to the extent feasible, the court shall commence hearings on an appeal within one year of the date of the filing of the appeal.

(b) In order to ensure that actions or proceedings brought pursuant to Sections 21167, 21168, and 21168.5 may be quickly heard and determined in the lower courts, the superior courts in all counties with a population of more than 200,000 shall designate one or more judges to develop expertise in this division and related land use and environmental laws, so that those judges will be available to hear, and quickly resolve, actions or proceedings brought pursuant to Sections 21167, 21168, and 21168.5.

SEC. 20. Section 21167.4 of the Public Resources Code is amended to read:

21167.4. (a) In any action or proceeding alleging noncompliance with this division, the petitioner shall request a hearing within 90 days of filing the petition or shall be subject to dismissal on the court's own motion or on the motion of any party interested in the action or proceeding.

(b) The petitioner shall serve a notice of the request for a hearing on all parties within 14 calendar days of filing the request for a hearing.

SEC. 21. Section 21167.6 of the Public Resources Code is amended to read:

21167.6. Notwithstanding any other provision of law, in all actions or proceedings brought pursuant to Section 21167, except those involving the Public Utilities Commission, all of the following shall apply:

(a) At the time the action is filed, the petitioner shall file a request that the respondent public agency prepare the record of proceedings relating to the subject of the action or proceeding. The request, together with the petition, shall be served upon the public agency not later than 10 business days after the action is filed.

(b) (1) The public agency shall prepare and certify the record of proceedings not later than 60 days after the request specified in subdivision (a) is served upon the public agency. The parties shall pay any costs or fees imposed for the preparation of the record of proceedings in conformance with any law or rule of court.

(2) The petitioner may elect to prepare the record of proceedings or the parties may agree to an alternative method of preparation of the record of proceedings, subject to certification of its accuracy by the public agency, within the time limit specified in this subdivision.

(c) The time limit prescribed by subdivision (b) may be extended only upon stipulation of all parties who have been properly served in the action or proceeding or upon order of the court. Extensions shall be liberally granted by the court when the size of the record of proceedings renders infeasible compliance with that time limit. There is no limit on the number of extensions which may be granted by the court, but no single extension shall exceed 60 days unless the court determines that a longer extension is in the public interest.

(d) If the public agency fails to prepare and certify the record within the time limit prescribed in subdivision (b), or any continuances of that time limit, the petitioner may move for sanctions, and the court may, upon that motion, grant appropriate sanctions.

(e) The clerk of the superior court shall prepare and certify the clerk's transcript on appeal not later than 60 days after the notice designating the papers or records to be included in the clerk's transcript is filed with the superior court, if the party or parties pay any costs or fees for preparation of the clerk's transcript imposed in conformance with any law or rules of court. Nothing in this subdivision precludes an election to proceed pursuant to Rule 5.1 of the California Rules of Court.

(f) Extensions of the period for the filing of any brief on appeal may be allowed only by stipulation of the parties or by order of the court for good cause shown. Extensions shall be limited to one 30-day extension for the preparation of an opening brief, and one 30-day extension for the preparation of a responding brief, except that the court may grant a longer extension or additional extensions if it determines that there is a substantial likelihood of settlement that would avoid the necessity of completing the appeal.

(g) At the completion of the filing of briefs, the appellant shall notify the court of completion of the filing of briefs, whereupon the clerk of the reviewing court shall set the appeal for hearing on the first available calendar date.

SEC. 22. Section 21167.8 of the Public Resources Code is amended to read:

21167.8. (a) Not later than 20 days after service upon a public agency of a petition or complaint brought to pursuant to Section 21167, the public agency shall file with the court a notice setting forth the time and place at which all parties shall meet and attempt to settle the litigation. The meeting shall be scheduled and held not

later than 45 days after the date of service of the petition or complaint upon the public agency. The notice of the settlement meeting shall be served by mail upon the counsel for each party. If the public agency does not know the identity of counsel for any party, the notice shall be served by mail upon the party for whom counsel is not known.

(b) The petitioner or plaintiff shall serve a presettlement statement by mail on all parties not less than five days in advance of the meeting. The statement shall include, but not be limited to, all of the following:

(1) A concise description of the case, including a brief procedural history, and all the facts material to a consideration of the issues presented by the litigation.

(2) The anticipated issues to be raised in the litigation. Counsel shall confer with their clients in advance regarding settlement and shall be prepared to negotiate a settlement whenever reasonably possible.

(3) An offer of the position for which the petitioner or plaintiff would settle, which may consist of the petitioner's prayer.

(c) At the time and place specified in the notice filed with the court, the parties shall meet and attempt in good faith to settle the litigation and the dispute which forms the basis of the litigation. The settlement meeting discussions shall be comprehensive in nature and shall focus on the legal issues raised by the parties concerning the project that is the subject of the litigation.

(d) The settlement meeting may be continued from time to time without postponing or otherwise delaying other applicable time limits in the litigation. The settlement meeting is intended to be conducted concurrently with any judicial proceedings.

(e) After the settlement procedure is completed, the parties shall jointly prepare, sign, and file a settlement statement with the court, including, but not limited to, all of the following:

(1) The legal and factual contentions raised by each party.

(2) The contentions that were settled or otherwise agreed upon and the nature of that agreement.

(3) The efforts made by each party to settle the unresolved issues.

(4) The list of participants in the settlement proceedings.

(f) If the litigation is not settled, the court, in its discretion, may, or at the request of any party, shall, schedule a further settlement conference before a judge of the superior court. If the petition or complaint is later heard on its merits, the judge hearing the matter shall not be the same judge conducting the settlement conference, except in counties that have only one judge of the superior court.

(g) The failure of any party, who was notified pursuant to subdivision (a), to participate in the litigation settlement process, without good cause, may result in an imposition of sanctions by the court. The failure of the petitioner or plaintiff to participate in that process, without good cause, shall result in dismissal with prejudice of the action or proceeding.

205410

SEC. 23. Section 21168.3 of the Public Resources Code is repealed.

SEC. 24. This act shall become operative only if Senate Bill 919 of the 1993–94 Regular Session of the Legislature is enacted and takes effect.

SEC. 25. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because the local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the program or level of service mandated by this act. Notwithstanding Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

BILL NUMBER: SB 919 CHAPTERED 10/11/93

CHAPTER 1131
FILED WITH SECRETARY OF STATE OCTOBER 11, 1993
APPROVED BY GOVERNOR OCTOBER 10, 1993
PASSED THE SENATE SEPTEMBER 11, 1993
PASSED THE ASSEMBLY SEPTEMBER 10, 1993
AMENDED IN ASSEMBLY SEPTEMBER 9, 1993
AMENDED IN ASSEMBLY AUGUST 16, 1993
AMENDED IN ASSEMBLY JUNE 22, 1993
AMENDED IN SENATE MAY 17, 1993
AMENDED IN SENATE APRIL 28, 1993

INTRODUCED BY Senator Dills

MARCH 4, 1993

An act to amend Section 65941 of the Government Code, to amend Section 42302.1 of the Health and Safety Code, and to amend Sections 21080, 21081, 21082.2, 21168.9, and 21177 of, and to add Article 4 (commencing with Section 21159) to Chapter 4.5 of Division 13 of, the Public Resources Code, relating to environmental quality.

LEGISLATIVE COUNSEL'S DIGEST

SB 919, Dills. Environmental quality.

(1) Existing law, the California Environmental Quality Act, requires a lead agency, as defined, to prepare an environmental impact report on any project which it proposes to carry out or approve that may have a significant effect on the environment, with specified exemptions.

This bill would exempt from the act a discretionary decision by an air quality management district for a project consisting of the application of coatings within an existing facility at an automotive manufacturing plant if the district makes specified findings. The bill would impose a state-mandated local program by imposing new duties on local agencies with regard to determining the applicability of, and giving notice of, the exemption.

The bill would require an environmental impact report to be prepared if there is substantial evidence, as defined, in light of the whole record before the agency that the project may have a significant effect on the environment, and would prescribe related matters.

(2) The act prohibits a public agency from carrying out or approving a project for which an environmental impact report has been completed which identifies one or more significant effects on the environment unless the agency makes one or more of specified findings, which may include a finding that specific economic, social, or other considerations make infeasible the mitigation measures or alternatives identified in the environmental impact report.

This bill would include legal and technological considerations and provide that those considerations include considerations for the provision of employment opportunities for highly trained workers.

(3) The act requires the lead agency to determine whether a project may have a significant effect on the environment based on substantial evidence in the record, and requires a court, in an action or proceeding challenging an action of a public agency on the grounds of noncompliance with the act, to determine whether the action of the agency is supported by substantial evidence in light of the whole record. State guidelines adopted by the Secretary of the Resources Agency to implement the act

require the preparation of an environmental impact report if it can be fairly argued on the basis of substantial evidence that the proposed project may have a significant effect on the environment.

This bill would require the lead agency to make its determination based on substantial evidence in light of the whole record, as specified.

The bill would require the court to make a specified finding before issuing an order requiring a public agency or real party in interest to suspend activity relating to a project in an action or proceeding under the act, as specified. The bill would prohibit the bringing of an action or proceeding under the act unless the alleged grounds for noncompliance with the act were presented to the public agency, and unless the person bringing the action or proceeding objected during the public comment period, or prior to the close of the public hearing on the project.

(4) Existing law prohibits a lead agency under the act, in establishing criteria for the completeness of an application for a development project, from requiring the informational equivalent of an environmental impact report as a prerequisite for completeness of the application.

This bill would also apply that prohibition to a responsible agency, and would prohibit the lead or responsible agency from otherwise requiring proof of compliance with the act as such a prerequisite. The bill would require a responsibe agency, at the request of the applicant, to commence processing the permit application prior to final action by the lead agency, to the extent that necessary information is available, thereby imposing a state-mandated local program.

(5) The bill would require certain state agencies to perform an environmental analysis containing specified information at the time of adopting a specified rule or regulation, performance standard, or treatment requirement.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(7) The bill would become operative only if AB 1888 is enacted and takes effect.

THE PEOPLE OF THE STATE OF CALIFORNIA DO ENACT AS FOLLOWS:

SECTION 1. (a) The California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) shall not apply to a discretionary decision by an air quality management district for a project consisting of the application of coatings within an existing facility at an automotive manufacturing plant if the district finds all of the following:

(1) The project will not cause a net increase in any emissions of any pollutant for which a national or state ambient air quality standard has been established after the internal emission accounting for previous emission reductions achieved at the facility and recognized by the district.

(2) The project will not cause a net increase in adverse impacts of toxic air contaminants as determined by a health risk assessment. For purposes of this section, the term "net increase in adverse impacts of toxic air contaminants as determined by a health risk assessment" shall be determined in accordance with the rules and regulations of the district.

(3) The project will not cause any other adverse effect on the environment.

(b) The district shall provide a 10-day notice, at the time

of the issuance of a permit, of any such exemption by mail to any person who requests such a notice in writing, and by publication in two newspapers of general circulation in the area of the project. The notice shall state that the complete file on the project and the basis for the district's findings is available for inspection and copying at the office of the air quality management district.

(c) Any person may appeal to the hearing board as provided in Section 42302.1 of the Health and Safety Code, from the issuance of a permit after a decision of any district that a project is exempt pursuant to this section. If there is substantial evidence in light of the whole record before the hearing board that the project may not satisfy one or more of the criteria established pursuant to subdivision (a), the permit shall be revoked. If there is no such substantial evidence, the exemption shall be upheld and there shall be no further compliance with the requirements of Division 13 (commencing with Section 21000) of the Public Resources Code. Any appeal under this subdivision shall be scheduled for hearing on the calendar of the hearing board within 10 working days of the appeal being filed. The hearing board shall give the appeal priority on its calendar and shall render a decision on the appeal within 21 working days of the appeal being filed. The hearing board may delegate the authority to hear and decide such an appeal to a subcommittee of the hearing board.

(d) On or before December 31, 1995, the Resources Agency shall prepare and submit to the Legislature and the Governor a study on the exemption established pursuant to this section in order to determine the advisability of expanding this exemption to include other industrial facilities. The study shall identify the potential benefits and adverse impacts on the environment from an expansion of the exemption and shall determine the potential benefits and adverse impacts on public participation in such an exemption process.

SEC. 2. Section 65941 of the Government Code is amended to read:

65941. (a) The information compiled pursuant to Section 65940 shall also indicate the criteria which the agency will apply in order to determine the completeness of any application submitted to it for a development project.

(b) If a public agency is a lead or responsible agency for purposes of the California Environmental Quality Act, Division 13 (commencing with Section 21000) of the Public Resources Code, that criteria shall not require the applicant to submit the informational equivalent of an environmental impact report as part of a complete application, or to otherwise require proof of compliance with that act as a prerequisite to a permit application being deemed complete. However, that criteria may require sufficient information to permit the agency to make the determination required by Section 21080.1 of the Public Resources Code.

(c) Consistent with this chapter, a responsible agency shall, at the request of the applicant, commence processing a permit application for a development project prior to final action on the project by a lead agency to the extent that the information necessary to commence the processing is available. For purposes of this subdivision, "lead agency" and "responsible agency" shall have the same meaning as those terms are defined in Section 21067 of the Public Resources Code and Section 21069 of the Public Resources Code, respectively.

SEC. 3. Section 42302.1 of the Health and Safety Code is amended to read:

42302.1. Within 10 days of any decision or action pertaining to the issuance of a permit by a district, or within 10 days after mailing of the notice of issuance of the permit to any person who has requested notice or within 10 days of the publication and mailing of notice provided for in Section 1 of the act amending this section in the 1993 Regular Session of the

Legislature, any aggrieved person who, in person or through a representative, appeared, submitted written testimony, or otherwise participated in the action before the district may request the hearing board of the district to hold a public hearing to determine whether the permit was properly issued. Except as provided in Section 1 of the act amending this section in the 1993 Regular Session of the Legislature, within 30 days of the request, the hearing board shall hold a public hearing and shall render a decision on whether the permit was properly issued.

SEC. 5. Section 21080 of the Public Resources Code is amended to read:

21080. (a) Except as otherwise provided in this division, this division shall apply to discretionary projects proposed to be carried out or approved by public agencies, including, but not limited to, the enactment and amendment of zoning ordinances, the issuance of zoning variances, the issuance of conditional use permits, and the approval of tentative subdivision maps unless the project is exempt from this division.

(b) This division shall not apply to any of the following activities:

(1) Ministerial projects proposed to be carried out or approved by public agencies.

(2) Emergency repairs to public service facilities necessary to maintain service.

(3) Projects undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish, or replace property or facilities damaged or destroyed as a result of a disaster in a disaster-stricken area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing with Section 8550) of Division 1 of Title 2 of the Government Code.

(4) Specific actions necessary to prevent or mitigate an emergency.

(5) Projects which a public agency rejects or disapproves.

(6) Actions undertaken by a public agency relating to any thermal powerplant site or facility, including the expenditure, obligation, or encumbrance of funds by a public agency for planning, engineering, or design purposes, or for the conditional sale or purchase of equipment, fuel, water (except groundwater), steam, or power for a thermal powerplant, if the powerplant site and related facility will be the subject of an environmental impact report, negative declaration, or other document, prepared pursuant to a regulatory program certified pursuant to Section 21080.5, which will be prepared by the State Energy Resources Conservation and Development Commission, by the Public Utilities Commission, or by the city or county in which the powerplant and related facility would be located if the environmental impact report, negative declaration, or document includes the environmental impact, if any, of the action described in this paragraph.

(7) Activities or approvals necessary to the bidding for, hosting or staging of, and funding or carrying out of, an Olympic games under the authority of the International Olympic Committee, except for the construction of facilities necessary for the Olympic games.

(8) The establishment, modification, structuring, restructuring, or approval of rates, tolls, fares, or other charges by public agencies which the public agency finds are for the purpose of (A) meeting operating expenses, including employee wage rates and fringe benefits, (B) purchasing or leasing supplies, equipment, or materials, (C) meeting financial reserve needs and requirements, (D) obtaining funds for capital projects necessary to maintain service within existing service areas, or (E) obtaining funds necessary to maintain those intracity transfers as are authorized by city charter. The public agency shall incorporate written findings in the record

of any proceeding in which an exemption under this paragraph is claimed setting forth with specificity the basis for the claim of exemption.

(9) All classes of projects designated pursuant to Section 21084.

(10) A project for the institution or increase of passenger or commuter services on rail or highway rights-of-way already in use, including modernization of existing stations and parking facilities.

(11) A project for the institution or increase of passenger or commuter service on high-occupancy vehicle lanes already in use, including the modernization of existing stations and parking facilities.

(12) Facility extensions not to exceed four miles in length which are required for the transfer of passengers from or to exclusive public mass transit guideway or busway public transit services.

(13) A project for the development of a regional transportation improvement program or the state transportation improvement program.

(14) Any project or portion thereof located in another state which will be subject to environmental impact review pursuant to the National Environmental Policy Act of 1969 (42 U.S.C. Sec. 4321 et seq.) or similar state laws of that state. Any emissions or discharges that would have a significant effect on the environment in this state are subject to this division.

(15) Projects undertaken by a local agency to implement a rule or regulation imposed by a state agency, board, or commission under a certified regulatory program pursuant to Section 21080.5. Any site-specific effect of the project which was not analyzed as a significant effect on the environment in the plan or other written documentation required by Section 21080.5 is subject to this division.

(c) If a lead agency determines that a proposed project, not otherwise exempt from this division, does not have a significant effect on the environment, the lead agency shall adopt a negative declaration to that effect. The negative declaration shall be prepared for the proposed project in either of the following circumstances:

(1) There is no substantial evidence in light of the whole record before the lead agency that the project may have a significant effect on the environment.

(2) An initial study identifies potentially significant effects on the environment, but (A) revisions in the project plans or proposals made by, or agreed to by, the applicant before the proposed negative declaration is released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effect on the environment would occur, and (B) there is no substantial evidence in light of the whole record before the lead agency that the project, as revised, may have a significant effect on the environment.

(d) If there is substantial evidence in light of the whole record before the lead agency that the project may have a significant effect on the environment, an environmental impact report shall be prepared.

(e) Argument, speculation, unsubstantiated opinion or narrative, evidence which is clearly inaccurate or erroneous, or evidence of social or economic impacts which do not contribute to, or are not caused by, physical impacts on the environment, is not substantial evidence. Substantial evidence shall include facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts.

SEC. 6. Section 21081 of the Public Resources Code is amended to read:

21081. Pursuant to the policy stated in Sections 21002 and 21002.1, no public agency shall approve or carry out a project for which an environmental impact report has been certified which identifies one or more significant effects on the

environment that would occur if the project is approved or carried out unless the public agency makes one or more of the following findings:

(a) Changes or alterations have been required in, or incorporated into, the project which mitigate or avoid the significant effects on the environment.

(b) Those changes or alterations are within the responsibility and jurisdiction of another public agency and have been, or can and should be, adopted by that other agency.

(c) Specific economic, legal, social, technological, or other considerations, including considerations for the provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or alternatives identified in the environmental impact report.

SEC. 7. Section 21082.2 of the Public Resources Code is amended to read:

21082.2. (a) The lead agency shall determine whether a project may have a significant effect on the environment based on substantial evidence in light of the whole record.

(b) The existence of public controversy over the environmental effects of a project shall not require preparation of an environmental impact report if there is no substantial evidence in light of the whole record before the lead agency that the project may have a significant effect on the environment.

(c) Argument, speculation, unsubstantiated opinion or narrative, evidence which is clearly inaccurate or erroneous, or evidence of social or economic impacts which do not contribute to, or are not caused by, physical impacts on the environment, is not substantial evidence. Substantial evidence shall include facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts.

(d) If there is substantial evidence, in light of the whole record before the lead agency, that a project may have a significant effect on the environment, an environmental impact report shall be prepared.

(e) Statements in an environmental impact report and comments with respect to an environmental impact report shall not be deemed determinative of whether the project may have a significant effect on the environment.

SEC. 8. Article 4 (commencing with Section 21159) is added to Chapter 4.5 of Division 13 of the Public Resources Code, to read:

Article 4. Expedited Environmental Review for Environmentally Mandated Projects

21159. (a) An agency listed in Section 21159.4 shall perform, at the time of the adoption of a rule or regulation requiring the installation of pollution control equipment, or a performance standard or treatment requirement, an environmental analysis of the reasonably foreseeable methods of compliance. In the preparation of this analysis, the agency may utilize numerical ranges or averages where specific data is not available; however, the agency shall not be required to engage in speculation or conjecture. The environmental analysis shall, at minimum, include, all of the following:

(1) An analysis of the reasonably foreseeable environmental impacts of the methods of compliance.

(2) An analysis of reasonably foreseeable feasible mitigation measures.

(3) An analysis of reasonably foreseeable alternative means of compliance with the rule or regulation.

(b) The preparation of an environmental impact report at the time of adopting a rule or regulation pursuant to this division shall be deemed to satisfy the requirements of this section.

(c) The environmental analysis shall take into account a reasonable range of environmental, economic, and technical

factors, population and geographic areas, and specific sites.
(d) Nothing in this section shall require the agency to conduct a project level analysis.
(e) For purposes of this article, the term "performance standard" includes process or raw material changes or product reformulation.
(f) Nothing in this section is intended, or may be used, to delay the adoption of any rule or regulation for which an analysis is required to be performed pursuant to this section.
21159.4. This article shall apply to the following agencies: the State Air Resources Board, any district as defined in Section 39025 of the Health and Safety Code, the State Water Resources Control Board, a California regional water quality control board, the Department of Toxic Substances Control, and the California Integrated Waste Management Board.
SEC. 9. Section 21168.9 of the Public Resources Code is amended to read:
21168.9. (a) If a court finds, as a result of a trial, hearing, or remand from an appellate court, that any determination, finding, or decision of a public agency has been made without compliance with this division, the court shall enter an order that includes one or more of the following:
(1) A mandate that the determination, finding, or decision be voided by the public agency, in whole or in part.
(2) If the court finds that a specific project activity or activities will prejudice the consideration or implementation of particular mitigation measures or alternatives to the project, a mandate that the public agency and any real parties in interest suspend any or all specific project activity or activities, pursuant to the determination, finding, or decision, that could result in an adverse change or alteration to the physical environment, until the public agency has taken any actions that may be necessary to bring the determination, finding, or decision into compliance with this division.
(3) A mandate that the public agency take specific action as may be necessary to bring the determination, finding, or decision into compliance with this division.
(b) Any order pursuant to subdivision (a) shall include only those mandates which are necessary to achieve compliance with this division and only those specific project activities in noncompliance with this division. The order shall be made by the issuance of a peremptory writ of mandate specifying what action by the public agency is necessary to comply with this division. However, the order shall be limited to that portion of a determination, finding, or decision or the specific project activity or activities found to be in noncompliance only if a court finds that (1) the portion or specific project activity or activities are severable, (2) severance will not prejudice complete and full compliance with this division, and (3) the court has not found the remainder of the project to be in noncompliance with this division. The trial court shall retain jurisdiction over the public agency's proceedings by way of a return to the peremptory writ until the court has determined that the public agency has complied with this division.
(c) Nothing in this section authorizes a court to direct any public agency to exercise its discretion in any particular way. Except as expressly provided in this section, nothing in this section is intended to limit the equitable powers of the court.

SEC. 10. Section 21177 of the Public Resources Code is amended to read:
21177. (a) No action or proceeding may be brought pursuant to Section 21167 unless the alleged grounds for noncompliance with this division were presented to the public agency orally or in writing by any person during the public comment period provided by this division or prior to the close of the public hearing on the project before the issuance of the notice of determination.

(b) No person shall maintain an action or proceeding unless that person objected to the approval of the project orally or in writing during the public comment period provided by this division or prior to the close of the public hearing on the project before the issuance of the notice of determination.

(c) This section does not preclude any organization formed after the approval of a project from maintaining an action pursuant to Section 21167 if a member of that organization has complied with subdivision (b).

(d) This section does not apply to the Attorney General.

(e) This section does not apply to any alleged grounds for noncompliance with this division for which there was no public hearing or other opportunity for members of the public to raise those objections orally or in writing prior to the approval of the project, or if the public agency failed to give the notice required by law.

SEC. 11. No reimbursement is required by this act pursuant to Section 6 of Article XIIIB of the California Constitution because the local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the program or level of service mandated by this act. Notwithstanding Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

SEC. 12. This act shall become operative only if Assembly Bill 1888 is enacted and takes effect.

AMENDED IN SENATE APRIL 12, 1993

INTRODUCED BY Senator Bergeson
(Coauthor: Senator Russell)
(Coauthor: Assembly Member Napolitano)

MARCH 1, 1993

An act to add Chapter 9.3 (commencing with Section 66030) to Division 1 of Title 7 of the Government Code, relating to land use.

LEGISLATIVE COUNSEL'S DIGEST

SB 517, Bergeson. Land use: mediation and resolution of land use disputes.

Existing law contains numerous provisions relating to the use of land, including provisions authorizing the bringing of actions in the superior court relating to land use disputes.

This bill would express specified findings and declarations of the Legislature relating to litigation arising out of land use disputes, and would also express legislative intent in this regard, including a statement that it is not the intent of the Legislature to interfere with litigants' ability to pursue court remedies. The bill would provide that specified land use actions brought in superior court may be subject to a mediation proceeding, as specified, conducted by the council of governments having jurisdiction in the county where the dispute arose, the Office of Permit Assistance within the Trade and Commerce Agency, or other specified persons or entities. The bill would establish procedures for initiating the mediation process, and for selecting a mediator. The bill would prescribe the reports and statements to be filed by the mediator, as specified, and would provide that specified Evidence Code sections apply to mediations conducted pursuant to the bill's provisions. It would also authorize the Judicial Council or courts to adopt rules, forms, and standards as necessary to implement the chapter.

This bill would require the Office of Permit Assistance, in cooperation with the Judicial Council, to report to the Legislature regarding implementation of the mediation program.

The bill would provide that no action filed on or after January 1, 2002, shall be subject to its provisions, unless a later enacted statute, enacted before January 1, 2002, extends that date or deletes the section.

THE PEOPLE OF THE STATE OF CALIFORNIA DO ENACT AS FOLLOWS:

SECTION 1. Chapter 9.3 (commencing with Section 66030) is added to Division 1 of Title 7 of the Government Code, to read:

CHAPTER 9.3. MEDIATION AND RESOLUTION OF LAND USE DISPUTES

66030. (a) The Legislature finds and declares all of the following:

(1) Current law provides that aggrieved agencies, project proponents, and affected residents may bring suit against the land use decisions of state and local governmental agencies. In practical terms, nearly anyone can sue once a project has been approved.

(2) Contention often arises over projects involving local general plans and zoning, redevelopment plans, the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code), development impact fees, annexations and incorporations, and the Permit Streamlining Act (Chapter 4.5 (commencing with Section 65920)).

(3) When a public agency approves a development project that is not in accordance with the law, or when the prerogative to bring suit is abused, lawsuits can delay development, add uncertainty and cost to the development process, make housing more expensive, and damage California's competitiveness. This litigation begins in the superior court, and often progresses on appeal to the Court of Appeal and the Supreme Court, adding to the workload of the state's already overburdened judicial system.

(b) It is, therefore, the intent of the Legislature to help litigants resolve their differences by establishing formal mediation processes for land use disputes. In establishing these mediation processes, it is not the intent of the Legislature to interfere with the ability of litigants to pursue remedies through the courts.

66031. (a) Notwithstanding any other provision of law, any action brought in the superior court relating to any of the following subjects may be subject to a mediation proceeding conducted pursuant to this chapter:

(1) The approval or denial by a public agency of any development project.

(2) Any act or decision of a public agency made pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code).

(3) The failure of a public agency to meet the time limits specified in Chapter 4.5 (commencing with Section 65920), commonly known as the Permit Streamlining Act, or in the Subdivision Map Act (Division 2 (commencing with Section 66410)).

(4) Fees determined pursuant to Sections 53080 to 53082, inclusive, or Chapter 4.9 (commencing with Section 65995).

(5) Fees determined pursuant to Chapter 5 (commencing with Section 66000).

(6) The adequacy of a general plan or specific plan adopted pursuant to Chapter 3 (commencing with Section 65100).

(7) The validity of any sphere of influence, urban service area, change of organization or reorganization, or any other decision made pursuant to the Cortese-Knox Local Government Reorganization Act (Division 3 (commencing with Section 56000) of Title 5).

(8) The adoption or amendment of a redevelopment plan pursuant to the Community Redevelopment Law (Part 1 (commencing with Section 33000) of Division 24 of the Health and Safety Code).

(b) Within five days after the deadline for the respondent or defendant to file its reply to an action, the court may invite the parties to consider resolving their dispute by selecting a mutually acceptable person to serve as a mediator, or an

organization or agency to provide a mediator.
(c) In selecting a person to serve as a mediator, or an organization or agency to provide a mediator, the parties shall consider the following:
(1) The council of governments having jurisdiction in the county where the dispute arose.
(2) Any subregional or countywide council of governments in the county where the dispute arose.
(3) The Office of Permit Assistance within the Trade and Commerce Agency, pursuant to its authority in Article 1 (commencing with Section 15399.50) of Chapter 11 of Part 6.7 of Division 3 of Title 2.
(4) Any other person with experience or training in mediation including those with experience in land use issues, or any other organization or agency which can provide a person with experience or training in mediation, including those with experience in land use issues.
(d) If the court invites the parties to consider mediation, the parties shall notify the court within 30 days if they have selected a mutually acceptable person to serve as a mediator. If the parties have not selected a mediator within 30 days, the action shall proceed. The court shall not draw any implication, favorable or otherwise, from the refusal by a party to accept the invitation by the court to consider mediation. Nothing in this section shall preclude the parties from using mediation at any other time while the action is pending.
66032. (a) Notwithstanding any provision of law to the contrary, all time limits with respect to an action shall be tolled while the mediator conducts the mediation, pursuant to this chapter.
(b) Mediations conducted by a mediator pursuant to this chapter that involve less than a quorum of a legislative body or a state body shall not be considered meetings of a legislative body pursuant to the Ralph M. Brown Act (Chapter 9 (commencing with Section 54950) of Part 1 of Division 2 of Title 5), nor shall they be considered meetings of a state body pursuant to the Bagley-Keene Open Meeting Act (Article 9 (commencing with Section 11120) of Chapter 1 of Part 1 of Division 3 of Title 2).
(c) Any action taken regarding mediation conducted pursuant to this chapter shall be taken in accordance with the provisions of current law.
(d) Ninety days after the commencement of the mediation, and every 90 days thereafter, the action shall be reactivated unless the parties to the action do either of the following:
(1) Arrive at a settlement and implement it in accordance with the provisions of current law.
(2) Agree by written stipulation to extend the mediation for an another 90-day period.
(e) A mediator shall not file, and a court shall not consider, any declaration or finding of any kind by the mediator, other than a required statement of agreement or nonagreement, unless all parties in the mediation expressly agree otherwise, in writing.
(f) Sections 703.5 and 1152.5 of the Evidence Code shall apply to any mediation conducted pursuant to this chapter.
66033. (a) At the end of the mediation, the mediator shall file a report with the Office of Permit Assistance, consistent with Section 1152.5 of the Evidence Code, containing each of the following:
(1) The title of the action.
(2) The names of the parties to the action.
(3) An estimate of the costs avoided, if any, because the parties used mediation instead of litigation to resolve their dispute.
(b) The sole purpose of the report required by this section is the collection of information needed by the office to prepare its report to the Legislature pursuant to Section 66036.

66034. If the mediation does not resolve the action, the court may, in its discretion, schedule a settlement conference before a judge of the superior court. If the action is later heard on its merits, the judge hearing the action shall not be the same judge who conducted the settlement conference, except in counties with only one judge of the superior court.

66035. The Judicial Council may adopt rules, forms, and standards necessary to implement this chapter.

66036. By January 1, 2001, the Office of Permit Assistance within the Trade and Commerce Agency, in cooperation with the Judicial Council, shall report to the Legislature regarding the implementation of this chapter. The office shall consult with persons and interest groups with knowledge of the mediation process, and affected public agencies, including, but not limited to, councils of governments. The report may recommend the extension of the chapter, changes to the chapter, or the repeal of the chapter.

66037. No action filed on or after January 1, 2002, shall be subject to this chapter unless a later enacted statute which is chaptered before January 1, 2002, extends this date or deletes this section.

CHAPTER 1230

An act to amend Sections 21002.1, 21005, 21064.5, 21065, 21080, 21080.1, 21081.6, 21100, 21100.1, and 21167.6 of, and to add Section 21080.14 to, the Public Resources Code, relating to environmental quality, and declaring the urgency thereof, to take effect immediately.

[Approved by Governor September 30, 1994. Filed with Secretary of State September 30, 1994.]

The people of the State of California do enact as follows:

SECTION 1. Section 21002.1 of the Public Resources Code is amended to read:

21002.1. In order to achieve the objectives set forth in Section 21002, the Legislature hereby finds and declares that the following policy shall apply to the use of environmental impact reports prepared pursuant to this division:

(a) The purpose of an environmental impact report is to identify the significant effects on the environment of a project, to identify alternatives to the project, and to indicate the manner in which those significant effects can be mitigated or avoided.

(b) Each public agency shall mitigate or avoid the significant effects on the environment of projects that it carries out or approves whenever it is feasible to do so.

(c) If economic, social, or other conditions make it infeasible to mitigate one or more significant effects on the environment of a project, the project may nonetheless be carried out or approved at

the discretion of a public agency if the project is otherwise permissible under applicable laws and regulations.

(d) In applying the policies of subdivisions (b) and (c) to individual projects, the responsibility of the lead agency shall differ from that of a responsible agency. The lead agency shall be responsible for considering the effects, both individual and collective, of all activities involved in a project. A responsible agency shall be responsible for considering only the effects of those activities involved in a project which it is required by law to carry out or approve. This subdivision applies only to decisions by a public agency to carry out or approve a project and does not otherwise affect the scope of the comments that the public agency may wish to make pursuant to Section 21104 or 21153.

(e) To provide more meaningful public disclosure, reduce the time and cost required to prepare an environmental impact report, and focus on potentially significant effects on the environment of a proposed project, lead agencies shall, in accordance with Section 21100, focus the discussion in the environmental impact report on those potential effects on the environment of a proposed project which the lead agency has determined are or may be significant. Lead agencies may limit discussion on other effects to a brief explanation as to why those effects are not potentially significant.

SEC. 2. Section 21005 of the Public Resources Code is amended to read:

21005. (a) The Legislature finds and declares that it is the policy of the state that noncompliance with the information disclosure provisions of this division which precludes relevant information from being presented to the public agency, or noncompliance with substantive requirements of this division, may constitute a prejudicial abuse of discretion within the meaning of Sections 21168 and 21168.5, regardless of whether a different outcome would have resulted if the public agency had complied with those provisions.

(b) It is the intent of the Legislature that, in undertaking judicial review pursuant to Sections 21168 and 21168.5, courts shall continue to follow the established principle that there is no presumption that error is prejudicial.

(c) It is further the intent of the Legislature that any court, which finds, or, in the process of reviewing a previous court finding, finds, that a public agency has taken an action without compliance with this division, shall specifically address each of the alleged grounds for noncompliance.

SEC. 3. Section 21064.5 of the Public Resources Code is amended to read:

21064.5. "Mitigated negative declaration" means a negative declaration prepared for a project when the initial study has identified potentially significant effects on the environment, but (1) revisions in the project plans or proposals made by, or agreed to by, the applicant before the proposed negative declaration and initial study are released for public review would avoid the effects or

mitigate the effects to a point where clearly no significant effect on the environment would occur, and (2) there is no substantial evidence in light of the whole record before the public agency that the project, as revised, may have a significant effect on the environment.

SEC. 4. Section 21065 of the Public Resources Code is amended to read:

21065. "Project" means an activity which may cause either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment, and which is any of the following:

(a) An activity directly undertaken by any public agency.

(b) An activity undertaken by a person which is supported, in whole or in part, through contracts, grants, subsidies, loans, or other forms of assistance from one or more public agencies.

(c) An activity that involves the issuance to a person of a lease, permit, license, certificate, or other entitlement for use by one or more public agencies.

SEC. 5. Section 21080 of the Public Resources Code is amended to read:

21080. (a) Except as otherwise provided in this division, this division shall apply to discretionary projects proposed to be carried out or approved by public agencies, including, but not limited to, the enactment and amendment of zoning ordinances, the issuance of zoning variances, the issuance of conditional use permits, and the approval of tentative subdivision maps unless the project is exempt from this division.

(b) This division shall not apply to any of the following activities:

(1) Ministerial projects proposed to be carried out or approved by public agencies.

(2) Emergency repairs to public service facilities necessary to maintain service.

(3) Projects undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish, or replace property or facilities damaged or destroyed as a result of a disaster in a disaster-stricken area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing with Section 8550) of Division 1 of Title 2 of the Government Code.

(4) Specific actions necessary to prevent or mitigate an emergency.

(5) Projects which a public agency rejects or disapproves.

(6) Actions undertaken by a public agency relating to any thermal powerplant site or facility, including the expenditure, obligation, or encumbrance of funds by a public agency for planning, engineering, or design purposes, or for the conditional sale or purchase of equipment, fuel, water (except groundwater), steam, or power for a thermal powerplant, if the powerplant site and related facility will be the subject of an environmental impact report, negative declaration, or other document, prepared pursuant to a regulatory

program certified pursuant to Section 21080.5, which will be prepared by the State Energy Resources Conservation and Development Commission, by the Public Utilities Commission, or by the city or county in which the powerplant and related facility would be located if the environmental impact report, negative declaration, or document includes the environmental impact, if any, of the action described in this paragraph.

(7) Activities or approvals necessary to the bidding for, hosting or staging of, and funding or carrying out of, an Olympic games under the authority of the International Olympic Committee, except for the construction of facilities necessary for the Olympic games.

(8) The establishment, modification, structuring, restructuring, or approval of rates, tolls, fares, or other charges by public agencies which the public agency finds are for the purpose of (A) meeting operating expenses, including employee wage rates and fringe benefits, (B) purchasing or leasing supplies, equipment, or materials, (C) meeting financial reserve needs and requirements, (D) obtaining funds for capital projects necessary to maintain service within existing service areas, or (E) obtaining funds necessary to maintain those intracity transfers as are authorized by city charter. The public agency shall incorporate written findings in the record of any proceeding in which an exemption under this paragraph is claimed setting forth with specificity the basis for the claim of exemption.

(9) All classes of projects designated pursuant to Section 21084.

(10) A project for the institution or increase of passenger or commuter services on rail or highway rights-of-way already in use, including modernization of existing stations and parking facilities.

(11) A project for the institution or increase of passenger or commuter service on high-occupancy vehicle lanes already in use, including the modernization of existing stations and parking facilities.

(12) Facility extensions not to exceed four miles in length which are required for the transfer of passengers from or to exclusive public mass transit guideway or busway public transit services.

(13) A project for the development of a regional transportation improvement program or the state transportation improvement program.

(14) Any project or portion thereof located in another state which will be subject to environmental impact review pursuant to the National Environmental Policy Act of 1969 (42 U.S.C. Sec. 4321 et seq.) or similar state laws of that state. Any emissions or discharges that would have a significant effect on the environment in this state are subject to this division.

(15) Projects undertaken by a local agency to implement a rule or regulation imposed by a state agency, board, or commission under a certified regulatory program pursuant to Section 21080.5. Any site-specific effect of the project which was not analyzed as a significant effect on the environment in the plan or other written

documentation required by Section 21080.5 is subject to this division.

(c) If a lead agency determines that a proposed project, not otherwise exempt from this division, would not have a significant effect on the environment, the lead agency shall adopt a negative declaration to that effect. The negative declaration shall be prepared for the proposed project in either of the following circumstances:

(1) There is no substantial evidence in light of the whole record before the lead agency that the project may have a significant effect on the environment.

(2) An initial study identifies potentially significant effects on the environment, but (A) revisions in the project plans or proposals made by, or agreed to by, the applicant before the proposed negative declaration and initial study are released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effect on the environment would occur, and (B) there is no substantial evidence in light of the whole record before the lead agency that the project, as revised, may have a significant effect on the environment.

(d) If there is substantial evidence in light of the whole record before the lead agency that the project may have a significant effect on the environment, an environmental impact report shall be prepared.

(e) Argument, speculation, unsubstantiated opinion or narrative, evidence which is clearly inaccurate or erroneous, or evidence of social or economic impacts which do not contribute to, or are not caused by, physical impacts on the environment, is not substantial evidence. Substantial evidence shall include facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts.

(f) As a result of the public review process for a mitigated negative declaration, including administrative decisions and public hearings, the lead agency may conclude that certain mitigation measures identified pursuant to paragraph (2) of subdivision (c) are infeasible or otherwise undesirable. In those circumstances, the lead agency, prior to approving the project, may delete those mitigation measures and substitute for them other mitigation measures that the lead agency finds, after holding a public hearing on the matter, are equivalent or more effective in mitigating significant effects on the environment to a less than significant level and that do not cause any potentially significant effect on the environment. If those new mitigation measures are made conditions of project approval or are otherwise made part of the project approval, the deletion of the former measures and the substitution of the new mitigation measures shall not constitute an action or circumstance requiring recirculation of the mitigated negative declaration.

(g) Nothing in this section shall preclude a project applicant or any other person from challenging, in an administrative or judicial proceeding, the legality of a condition of project approval imposed by the lead agency. If, however, any condition of project approval set

aside by either an administrative body or court was necessary to avoid or lessen the likelihood of the occurrence of a significant effect on the environment, the lead agency's approval of the negative declaration and project shall be invalid and a new environmental review process shall be conducted before the project can be reapproved, unless the lead agency substitutes a new condition that the lead agency finds, after holding a public hearing on the matter, is equivalent to, or more effective in, lessening or avoiding significant effects on the environment and that does not cause any potentially significant effect on the environment.

SEC. 6. Section 21080.1 of the Public Resources Code is amended to read:

21080.1. (a) The lead agency shall be responsible for determining whether an environmental impact report, a negative declaration, or a mitigated negative declaration shall be required for any project which is subject to this division. That determination shall be final and conclusive on all persons, including responsible agencies, unless challenged as provided in Section 21167.

(b) In the case of a project described in subdivision (c) of Section 21065, the lead agency shall, upon the request of a potential applicant, provide for consultation prior to the filing of the application regarding the range of actions, potential alternatives, mitigation measures, and any potential and significant effects on the environment of the project.

SEC. 7. Section 21080.14 is added to the Public Resources Code, to read:

21080.14. (a) Except as provided in subdivision (c), this division does not apply to any development project which consists of the construction, conversion, or use of residential housing consisting of not more than 45 units in an urbanized area that is affordable to lower income households, as defined in Section 50079.5 of the Health and Safety Code, if the developer of the development project provides sufficient legal commitments to the appropriate local agency to ensure the continued availability and use of the housing units for lower income households for a period of at least 15 years, or that is affordable to low- and moderate-income households, as defined in paragraph (2) of subdivision (h) of Section 65589.5 of the Government Code, if the developer of the development project provides sufficient legal commitments to the appropriate local agency to ensure the continued availability and use of the housing units for low- and moderate-income households at monthly housing costs as determined pursuant to paragraph (2) of subdivision (h) of Section 65589.5 of the Government Code, and the development project meets all of the following requirements:

(1) The development project is consistent with the jurisdiction's general plan as it existed on the date the application was deemed complete.

(2) The development project is consistent with the zoning designation, as specified in the zoning ordinance as it existed on the

date the application was deemed complete, unless the zoning is inconsistent with the general plan because the local agency has not rezoned the property to bring it into conformity with the general plan.

(3) The project site has been previously developed for urban uses, or the immediately contiguous properties surrounding the project site are, or previously have been, developed for urban uses.

(4) The project site is not more than two acres in area.

(5) The project site can be adequately served by utilities.

(6) The project site has no value as a wildlife habitat.

(7) The project site is not included on any list of facilities and sites compiled pursuant to Section 65962.5 of the Government Code.

(8) The project site is subject to an assessment prepared by a California registered environmental assessor to determine the presence of hazardous contaminants on the site and the potential for exposure of site occupants to significant health hazards from nearby properties and activities. If hazardous contaminants on the site are found, the contaminants must be removed or any significant effects of those contaminants must be mitigated to a level of insignificance. If the potential for exposure to significant health hazards from surrounding properties or activities is found to exist, the effects of the potential exposure must be mitigated to a level of insignificance.

(9) The project will not involve the demolition of, or any substantial adverse change in, any district, landmark, object, building, structure, site, area, or place that is listed, or determined to be eligible for listing, in the California Register of Historical Resources.

(b) As used in subdivision (a), "urbanized area" means an area that has a population density of at least 1,000 persons per square mile.

(c) Notwithstanding subdivision (a), this division does apply to a development project described in subdivision (a) if there is a reasonable possibility that the development project would have a significant effect on the environment due to unusual circumstances or due to related or cumulative impacts of reasonably foreseeable projects in the vicinity of the development project.

SEC. 8. Section 21081.6 of the Public Resources Code is amended to read:

21081.6. (a) When making the findings required by subdivision (a) of Section 21081 or when adopting a mitigated negative declaration pursuant to paragraph (2) of subdivision (c) of Section 21080, the following requirements shall apply:

(1) The public agency shall adopt a reporting or monitoring program for the changes made to the project, or conditions of project approval, adopted in order to mitigate or avoid significant effects on the environment. The reporting or monitoring program shall be designed to ensure compliance during project implementation. For those changes which have been required or incorporated into the project at the request of a responsible agency or a public agency having jurisdiction by law over natural resources affected by the

project, that agency shall, if so requested by the lead agency or a responsible agency, prepare and submit a proposed reporting or monitoring program.

(2) The lead agency shall specify the location and custodian of the documents or other material which constitute the record of proceedings upon which its decision is based.

(b) If there is a project for which mitigation is adopted, a public agency shall comply with subdivision (a) by, among other things, adopting mitigation measures as conditions of project approval. Those conditions of project approval may be set forth in referenced documents which address required mitigation measures or, in the case of the adoption of a plan, policy, regulation, or other public project, by incorporating the mitigation measures into the plan, policy, regulation, or project design.

(c) Prior to the close of the public review period for a draft environmental impact report or mitigated negative declaration, a responsible agency, or a public agency having jurisdiction over natural resources affected by the project, shall either submit to the lead agency complete and detailed performance objectives for mitigation measures which would address the significant effects on the environment identified by the responsible agency or agency having jurisdiction over natural resources affected by the project, or refer the lead agency to appropriate, readily available guidelines or reference documents. Any mitigation measures submitted to a lead agency by a responsible agency or an agency having jurisdiction over natural resources affected by the project shall be limited to measures which mitigate impacts to resources which are subject to the statutory authority of, and definitions applicable to, that agency. Compliance or noncompliance by a responsible agency or agency having jurisdiction over natural resources affected by a project with that requirement shall not limit the authority of the responsible agency or agency having jurisdiction over natural resources affected by a project, or the authority of the lead agency, to approve, condition, or deny projects as provided by this division or any other provision of law.

SEC. 8.5. Section 21081.6 of the Public Resources Code is amended to read:

21081.6. (a) When making the findings required by paragraph (1) of subdivision (a) of Section 21081 or when adopting a mitigated negative declaration pursuant to paragraph (2) of subdivision (c) of Section 21080, the following requirements shall apply: (1) The public agency shall adopt a reporting or monitoring program for the changes made to the project or conditions of project approval, adopted in order to mitigate or avoid significant effects on the environment. The reporting or monitoring program shall be designed to ensure compliance during project implementation. For those changes which have been required or incorporated into the project at the request of a responsible agency or a public agency having jurisdiction by law over natural resources affected by the

project, that agency shall, if so requested by the lead agency or a responsible agency, prepare and submit a proposed reporting or monitoring program.

(2) The lead agency shall specify the location and custodian of the documents or other material which constitute the record of proceedings upon which its decision is based.

(b) A public agency shall provide that measures to mitigate or avoid significant effects on the environment are fully enforceable through permit conditions, agreements, or other measures. Conditions of project approval may be set forth in referenced documents which address required mitigation measures or, in the case of the adoption of a plan, policy, regulation, or other public project, by incorporating the mitigation measures into the plan, policy, regulation, or project design.

(c) Prior to the close of the public review period for a draft environmental impact report or mitigated negative declaration, a responsible agency, or a public agency having jurisdiction over natural resources affected by the project, shall either submit to the lead agency complete and detailed performance objectives for mitigation measures which would address the significant effects on the environment identified by the responsible agency or agency having jurisdiction over natural resources affected by the project, or refer the lead agency to appropriate, readily available guidelines or reference documents. Any mitigation measures submitted to a lead agency by a responsible agency or an agency having jurisdiction over natural resources affected by the project shall be limited to measures which mitigate impacts to resources which are subject to the statutory authority of, and definitions applicable to, that agency. Compliance or noncompliance by a responsible agency or agency having jurisdiction over natural resources affected by a project with that requirement shall not limit the authority of the responsible agency or agency having jurisdiction over natural resources affected by a project, or the authority of the lead agency, to approve, condition, or deny projects as provided by this division or any other provision of law.

SEC. 9. Section 21100 of the Public Resources Code is amended to read:

21100. (a) All lead agencies shall prepare, or cause to be prepared by contract, and certify the completion of, an environmental impact report on any project which they propose to carry out or approve that may have a significant effect on the environment. Whenever feasible, a standard format shall be used for environmental impact reports.

(b) The environmental impact report shall include a detailed statement setting forth all of the following:

(1) All significant effects on the environment of the proposed project.

(2) In a separate section:

(A) Any significant effect on the environment that cannot be

avoided if the project is implemented.

(B) Any significant effect on the environment that would be irreversible if the project is implemented.

(3) Mitigation measures proposed to minimize significant effects on the environment, including, but not limited to, measures to reduce the wasteful, inefficient, and unnecessary consumption of energy.

(4) Alternatives to the proposed project.

(5) The growth-inducing impact of the proposed project.

(c) The report shall also contain a statement briefly indicating the reasons for determining that various effects on the environment of a project are not significant and consequently have not been discussed in detail in the environmental impact report.

(d) For purposes of this section, any significant effect on the environment shall be limited to substantial, or potentially substantial, adverse changes in physical conditions which exist within the area as defined in Section 21060.5.

(e) Previously approved land use documents, including, but not limited to, general plans, specific plans, and local coastal plans, may be used in cumulative impact analysis.

SEC. 10. Section 21100.1 of the Public Resources Code is amended to read:

21100.1. The information described in subparagraph (B) of paragraph (2) of subdivision (b) of Section 21100 shall be required only in environmental impact reports prepared in connection with the following:

(a) The adoption, amendment, or enactment of a plan, policy, or ordinance of a public agency.

(b) The adoption by a local agency formation commission of a resolution making determinations.

(c) A project which will be subject to the requirement for preparing an environmental impact statement pursuant to the requirements of the National Environmental Policy Act of 1969.

SEC. 11. Section 21167.6 of the Public Resources Code is amended to read:

21167.6. Notwithstanding any other provision of law, in all actions or proceedings brought pursuant to Section 21167, except those involving the Public Utilities Commission, all of the following shall apply:

(a) At the time that the action or proceeding is filed, the plaintiff or petitioner shall file a request that the respondent public agency prepare the record of proceedings relating to the subject of the action or proceeding. The request, together with the complaint or petition, shall be served upon the public agency not later than 10 business days from the date that the action or proceeding was filed.

(b) (1) The public agency shall prepare and certify the record of proceedings not later than 60 days from the date that the request specified in subdivision (a) was served upon the public agency. Upon certification, the public agency shall lodge a copy of the record of

proceedings with the court and shall serve on the parties notice that the record of proceedings has been certified and lodged with the court. The parties shall pay any costs or fees imposed for the preparation of the record of proceedings in conformance with any law or rule of court.

(2) The plaintiff or petitioner may elect to prepare the record of proceedings or the parties may agree to an alternative method of preparation of the record of proceedings, subject to certification of its accuracy by the public agency, within the time limit specified in this subdivision.

(c) The time limit established by subdivision (b) may be extended only upon the stipulation of all parties who have been properly served in the action or proceeding or upon order of the court. Extensions shall be liberally granted by the court when the size of the record of proceedings renders infeasible compliance with that time limit. There is no limit on the number of extensions which may be granted by the court, but no single extension shall exceed 60 days unless the court determines that a longer extension is in the public interest.

(d) If the public agency fails to prepare and certify the record within the time limit established in subdivision (b), or any continuances of that time limit, the plaintiff or petitioner may move for sanctions, and the court may, upon that motion, grant appropriate sanctions.

(e) The record of proceedings shall include, but is not limited to, all of the following items:

(1) All project application materials.

(2) All staff reports and related documents prepared by the respondent public agency with respect to its compliance with the substantive and procedural requirements of this division and with respect to the action on the project.

(3) All staff reports and related documents prepared by the respondent public agency and written testimony or documents submitted by any person relevant to any findings or statement of overriding considerations adopted by the respondent agency pursuant to this division.

(4) Any transcript or minutes of the proceedings at which the decisionmaking body of the respondent public agency heard testimony on, or considered any environmental document on, the project, and any transcript or minutes of proceedings before any advisory body to the respondent public agency which were presented to the decisionmaking body prior to action on the environmental documents or on the project.

(5) All notices issued by the respondent public agency to comply with this division or with any other law governing the processing and approval of the project.

(6) All written comments received in response to, or in connection with, environmental documents prepared for the project, including responses to the notice of preparation.

244740

(7) All written evidence or correspondence submitted to, or transferred from, the respondent public agency with respect to compliance with this division or with respect to the project.

(8) Any proposed decisions or findings submitted to the decisionmaking body of the respondent public agency by its staff, or the project proponent, project opponents, or other persons.

(9) The documentation of the final public agency decision, including the final environmental impact report, mitigated negative declaration, or negative declaration, and all documents, in addition to those referenced in paragraph (3), cited or relied on in the findings or in a statement of overriding considerations adopted pursuant to this division.

(10) Any other written materials relevant to the respondent public agency's compliance with this division or to its decision on the merits of the project, including the initial study, any drafts of any environmental document, or portions thereof, which have been released for public review, and copies of studies or other documents relied upon in any environmental document prepared for the project and either made available to the public during the public review period or included in the respondent public agency's files on the project, and all internal agency communications, including staff notes and memoranda related to the project or to compliance with this division.

(11) The full written record before any inferior administrative decisionmaking body whose decision was appealed to a superior administrative decisionmaking body prior to the filing of litigation.

(f) In preparing the record of proceedings, the party preparing the record shall strive to do so at reasonable cost in light of the scope of the record.

(g) The clerk of the superior court shall prepare and certify the clerk's transcript on appeal not later than 60 days from the date that the notice designating the papers or records to be included in the clerk's transcript was filed with the superior court, if the party or parties pay any costs or fees for the preparation of the clerk's transcript imposed in conformance with any law or rules of court. Nothing in this subdivision precludes an election to proceed by appendix, as provided in Rule 5.1 of the California Rules of Court.

(h) Extensions of the period for the filing of any brief on appeal may be allowed only by stipulation of the parties or by order of the court for good cause shown. Extensions for the filing of a brief on appeal shall be limited to one 30-day extension for the preparation of an opening brief, and one 30-day extension for the preparation of a responding brief, except that the court may grant a longer extension or additional extensions if it determines that there is a substantial likelihood of settlement that would avoid the necessity of completing the appeal.

(i) At the completion of the filing of briefs on appeal, the appellant shall notify the court of the completion of the filing of briefs, whereupon the clerk of the reviewing court shall set the

appeal for hearing on the first available calendar date.

SEC. 12. (a) In the next scheduled review of the guidelines pursuant to Section 21087 of the Public Resources Code, the Office of Planning and Research shall (1) review the impact of Article 3 (commencing with Section 21158) of Chapter 4.5 of Division 13 of the Public Resources Code and provide further development of the concept of using a focused environmental impact report, and (2) provide recommendations for revising the definition of "project" in the guidelines to conform to Section 21065 of the Public Resources Code, as amended by Section 4 of this act.

(b) The Legislature hereby declares that the amendment of Section 21065 of the Public Resources Code by Section 4 of this act is intended to clarify the definition of "project" as currently set forth in subdivision (a) of Section 15378 of Title 14 of the California Code of Regulations, as adopted by the Secretary of the Resources Agency. The primary purpose of the change is to codify the holdings of Kaufman & Broad-South Bay, Inc. v. Morgan Hill Unified School District (1992), 9 Cal. App. 4th 464, and City of Livermore v. Local Agency Formation Com. (1986), 184 Cal. App. 3d 531.

SEC. 13. (a) The Office of Planning and Research may include in its annual survey questions relating to the impact of the exemption to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) for specified types of residential housing that is provided pursuant to Section 21080.14 of the Public Resources Code, as added by Section 7 of this act, on lead agencies that are considering the approval of housing development projects that are intended for lower income households or that are affordable to low- and moderate-income households.

(b) It is the intent of the Legislature that the survey questions shall include an analysis of the ability of the lead agency to address potential significant effects on the environment that may result from the proposed development project, including the conversion of agricultural lands to urban uses, to impose conditions on the construction of the proposed development project, and to shorten the amount of time within which the proposed development project may be considered and acted upon.

SEC. 14. If this bill and AB 314 are both chaptered, the provisions of this bill that amend Sections 21100, 21100.1, and 21167.6 of the Public Resources Code shall prevail over the provisions of AB 314 that amend those sections of the Public Resources Code regardless of which bill is chaptered last.

SEC. 15. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution to the extent that the local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the program or level of service mandated by this act.

Moreover, no reimbursement shall be made from the State Mandates Claims Fund pursuant to Part 7 (commencing with

Section 17500) of Division 4 of Title 2 of the Government Code for other costs mandated by the state pursuant to this act. It is recognized, however, that a local agency or school district may pursue any remedies to obtain reimbursement available to it under Part 7 (commencing with Section 17500) and any other provisions of law for those other costs.

Notwithstanding Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

SEC. 16. The changes to subdivision (e) of Section 21100 of the Public Resources Code made by this bill shall not become operative until January 1, 1995.

SEC. 17. Section 8.5 of this bill incorporates amendments to Section 21080.6 of the Public Resources Code proposed by this bill and AB 314. It shall only become operative if (1) both bills are enacted and become effective on or before January 1, 1995, (2) each bill amends Section 21080.6 of the Public Resources Code, and (3) this bill is enacted after AB 314, in which case Section 21080.6 of the Public Resources Code, as amended by AB 314, shall remain operative only until the operative date of this bill, at which time Section 8.5 of this bill shall become operative, and Section 8 of this bill shall not become operative.

SEC. 18. This act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting the necessity are:

In order to ensure, as soon as possible, the efficient review of projects subject to the California Environmental Quality Act, thereby protecting the environment and improving the economy of the state, it is necessary that this act take effect immediately.

CHAPTER 1294

An act to amend Section 66474.01 of the Government Code, to amend Sections 21081, 21081.5, 21081.6, 21087, 21094, 21100, 21100.1, 21100.2, 21151.5, 21152, 21157, 21157.1, 21157.6, 21158, 21167, 21167.1, 21167.4, 21167.6, and 21167.8, of, to repeal Sections 21157.7 and 21159.4 of, and to repeal the heading of Article 4.1 (commencing with Section 21159.1) of Chapter 4.5 of Division 13 of, the Public Resources Code, and to amend Section 13264 of the Water Code, relating to environmental quality, and declaring the urgency thereof, to take effect immediately.

[Became law without Governor's signature. Filed with Secretary of State October 4, 1994.

The people of the State of California do enact as follows:

SECTION 1. Section 66474.01 of the Government Code is amended to read:

66474.01. Notwithstanding subdivision (e) of Section 66474, a local government may approve a tentative map, or a parcel map for which a tentative map was not required, if an environmental impact report was prepared with respect to the project and a finding was made pursuant to paragraph (3) of subdivision (a) of Section 21081 of the Public Resources Code that specific economic, social, or other considerations make infeasible the mitigation measures or project alternatives identified in the environmental impact report.

SEC. 2. Section 21081 of the Public Resources Code is amended to read:

21081. Pursuant to the policy stated in Sections 21002 and 21002.1, no public agency shall approve or carry out a project for which an environmental impact report has been certified which identifies one or more significant effects on the environment that would occur if the project is approved or carried out unless both of the following occur:

(a) The public agency makes one or more of the following findings with respect to each significant effect:

(1) Changes or alterations have been required in, or incorporated into, the project which mitigate or avoid the significant effects on the environment.

(2) Those changes or alterations are within the responsibility and jurisdiction of another public agency and have been, or can and should be, adopted by that other agency.

(3) Specific economic, legal, social, technological, or other considerations, including considerations for the provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or alternatives identified in the environmental impact report.

(b) With respect to significant effects which were subject to a finding under paragraph (3) of subdivision (a), the public agency finds that specific overriding economic, legal, social, technological, or other benefits of the project outweigh the significant effects on the environment.

SEC. 3. Section 21081.5 of the Public Resources Code is amended to read:

21081.5. In making the findings required by paragraph (3) of subdivision (a) of Section 21081, the public agency shall base its findings on substantial evidence in the record.

SEC. 4. Section 21081.6 of the Public Resources Code is amended to read:

21081.6. When making the findings required by paragraph (1) of subdivision (a) of Section 21081 or when adopting a negative declaration pursuant to paragraph (2) of subdivision (c) of Section 21080, the following requirements shall apply:

(a) The public agency shall adopt a reporting or monitoring program for the changes to the project which it has adopted or made a condition of project approval in order to mitigate or avoid significant effects on the environment. The reporting or monitoring program shall be designed to ensure compliance during project implementation. For those changes which have been required or incorporated into the project at the request of an agency having jurisdiction by law over natural resources affected by the project, that agency shall, if so requested by the lead or responsible agency, prepare and submit a proposed reporting or monitoring program.

(b) A public agency shall provide that measures to mitigate or avoid significant effects on the environment are fully enforceable through permit conditions, agreements, or other measures. Conditions of project approval may be set forth in referenced documents which address required mitigation measures.

(c) Prior to the close of the public review period for a draft environmental impact report or mitigated negative declaration, a responsible agency, or a public agency having jurisdiction over natural resources affected by the project, shall either submit to the lead agency complete and detailed performance objectives for mitigation measures which would address the significant effects on the environment identified by the responsible agency or agency having jurisdiction over natural resources affected by the project, or refer the lead agency to appropriate, readily available guidelines or reference documents. Any mitigation measures submitted to a lead agency by a responsible agency or an agency having jurisdiction over natural resources affected by the project shall be limited to measures which mitigate impacts to resources which are subject to the statutory authority of, and definitions applicable to, that agency. Compliance or noncompliance by a responsible agency or agency having jurisdiction over natural resources affected by a project with that requirement shall not limit the authority of the responsible agency or agency having jurisdiction over natural resources affected

by a project, or the authority of the lead agency, to approve, condition, or deny projects as provided by this division or any other provision of law.

(d) The lead agency shall specify the location and custodian of the documents or other material which constitute the record of proceedings upon which its decision is based.

SEC. 4.5. Section 21081.6 of the Public Resources Code is amended to read:

21081.6. (a) When making the findings required by paragraph (1) of subdivision (a) of Section 21081 or when adopting a mitigated negative declaration pursuant to paragraph (2) of subdivision (c) of Section 21080, the following requirements shall apply:

(1) The public agency shall adopt a reporting or monitoring program for the changes made to the project or conditions of project approval, adopted in order to mitigate or avoid significant effects on the environment. The reporting or monitoring program shall be designed to ensure compliance during project implementation. For those changes which have been required or incorporated into the project at the request of a responsible agency or a public agency having jurisdiction by law over natural resources affected by the project, that agency shall, if so requested by the lead agency or a responsible agency, prepare and submit a proposed reporting or monitoring program.

(2) The lead agency shall specify the location and custodian of the documents or other material which constitute the record of proceedings upon which its decision is based.

(b) A public agency shall provide that measures to mitigate or avoid significant effects on the environment are fully enforceable through permit conditions, agreements, or other measures. Conditions of project approval may be set forth in referenced documents which address required mitigation measures or, in the case of the adoption of a plan, policy, regulation, or other public project, by incorporating the mitigation measures into the plan, policy, regulation, or project design.

(c) Prior to the close of the public review period for a draft environmental impact report or mitigated negative declaration, a responsible agency, or a public agency having jurisdiction over natural resources affected by the project, shall either submit to the lead agency complete and detailed performance objectives for mitigation measures which would address the significant effects on the environment identified by the responsible agency or agency having jurisdiction over natural resources affected by the project, or refer the lead agency to appropriate, readily available guidelines or reference documents. Any mitigation measures submitted to a lead agency by a responsible agency or an agency having jurisdiction over natural resources affected by the project shall be limited to measures which mitigate impacts to resources which are subject to the statutory authority of, and definitions applicable to, that agency. Compliance or noncompliance by a responsible agency or agency

having jurisdiction over natural resources affected by a project with that requirement shall not limit the authority of the responsible agency or agency having jurisdiction over natural resources affected by a project, or the authority of the lead agency, to approve, condition, or deny projects as provided by this division or any other provision of law.

SEC. 5. Section 21087 of the Public Resources Code is amended to read:

21087. (a) The Office of Planning and Research shall, at least once every two years, review the guidelines adopted pursuant to Section 21083 and shall recommend proposed changes or amendments to the Secretary of the Resources Agency. The Secretary of the Resources Agency shall certify and adopt guidelines, and any amendments thereto, at least once every two years, pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, which shall become effective upon the filing thereof. However, guidelines shall not be adopted or amended without compliance with Sections 11346.4, 11346.5, and 11346.8 of the Government Code.

(b) Within six months of the enactment of AB 314 of the 1993–94 Regular Session of the Legislature, the Office of Planning and Research shall recommend proposed changes and the Secretary of the Resources Agency shall certify and adopt revisions to the guidelines pursuant to Section 21083 to reflect the changes to this division enacted during the 1993–94 Regular Session of the Legislature.

SEC. 6. Section 21094 of the Public Resources Code is amended to read:

21094. (a) Where a prior environmental impact report has been prepared and certified for a program, plan, policy, or ordinance, the lead agency for a later project that meets the requirements of this section shall examine significant effects of the later project upon the environment by using a tiered environmental impact report, except that the report on the later project need not examine those effects which the lead agency determines were either (1) mitigated or avoided pursuant to paragraph (1) of subdivision (a) of Section 21081 as a result of the prior environmental impact report, or (2) examined at a sufficient level of detail in the prior environmental impact report to enable those effects to be mitigated or avoided by site specific revisions, the imposition of conditions, or by other means in connection with the approval of the later project.

(b) This section applies only to a later project which the lead agency determines (1) is consistent with the program, plan, policy, or ordinance for which an environmental impact report has been prepared and certified, (2) is consistent with applicable local land use plans and zoning of the city, county, or city and county in which the later project would be located, and (3) is not subject to Section 21166.

(c) For purposes of compliance with this section, an initial study

shall be prepared to assist the lead agency in making the determinations required by this section. The initial study shall analyze whether the later project may cause significant effects on the environment that were not examined in the prior environmental impact report.

(d) All public agencies which propose to carry out or approve the later project may utilize the prior environmental impact report and the environmental impact report on the later project to fulfill the requirements of Section 21081.

(e) When tiering is used pursuant to this section, an environmental impact report prepared for a later project shall refer to the prior environmental impact report and state where a copy of the prior environmental impact report may be examined.

SEC. 7. Section 21100 of the Public Resources Code is amended to read:

21100. (a) All state agencies, boards, and commissions shall prepare, or cause to be prepared by contract, and certify the completion of, an environmental impact report on any project which they propose to carry out or approve that may have a significant effect on the environment. Whenever feasible, a standard format shall be used for environmental impact reports.

(b) The environmental impact report shall include a detailed statement setting forth all of the following:

(1) The significant effects on the environment of the proposed project.

(2) Any significant effect on the environment that cannot be avoided if the project is implemented.

(3) Any significant effect on the environment that would be irreversible if the project is implemented.

(4) Any growth-inducing impact of the project.

(5) Mitigation measures proposed to minimize the significant effects on the environment, including, but not limited to, measures to reduce the wasteful, inefficient, and unnecessary consumption of energy.

(6) Alternatives to the proposed project.

(7) The relationship between local short-term uses of the human environment and the maintenance and enhancement of long-term productivity.

(c) The report shall also contain a statement briefly indicating the reasons for determining that various effects on the environment of a project are not significant and consequently have not been discussed in detail in the environmental impact report.

(d) For purposes of this section, any significant effect on the environment shall be limited to substantial, or potentially substantial, adverse changes in physical conditions that exist within the area as defined in Section 21060.5.

(e) Previously approved land use documents, including, but not limited to, general plans, specific plans, and local coastal plans, may be used in cumulative impact analysis.

SEC. 8. Section 21100.1 of the Public Resources Code is amended to read:

21100.1. The information described in paragraphs (3) and (7) of subdivision (b) of Section 21100 shall be required only in environmental impact reports prepared in connection with the following:

(a) The adoption, amendment, or enactment of a plan, policy, or ordinance of a public agency.

(b) The adoption by a local agency formation commission of a resolution making determinations.

(c) A project which will be subject to the requirement for the preparation of an environmental impact statement pursuant to the requirements of the National Environmental Policy Act of 1969.

SEC. 9. Section 21100.2 of the Public Resources Code is amended to read:

21100.2. (a) Each state agency shall establish, by resolution or order, time limits, not to exceed one year for completing and certifying environmental impact reports, and 105 days for completing and approving negative declarations, for projects described in subdivision (c) of Section 21065. These time limits shall apply only to those circumstances in which the state agency is the lead agency for a project. These resolutions or orders may establish different time limits for different types or classes of projects, but all limits shall be measured from the date on which an application requesting approval of the project is received and accepted as complete by the state agency. No application for a project may be deemed incomplete for lack of a waiver of time periods prescribed in state regulations. The resolutions or orders required by this section may provide for a reasonable extension of the time period in the event that compelling circumstances justify additional time and the project applicant consents thereto.

(b) If a draft environmental impact report, environmental impact report, focused environmental impact report, or negative declaration is prepared under a contract to a state agency, the contract shall be executed within 45 days from the date on which the state agency determines that a negative declaration or an environmental impact report is required. The state agency may take longer to execute the contract in the event that compelling circumstances justify additional time and the project applicant consents thereto.

SEC. 10. Section 21151.5 of the Public Resources Code is amended to read:

21151.5. (a) Each local agency shall establish, by ordinance or resolution, time limits, not to exceed one year for completing and certifying environmental impact reports, and 105 days for completing negative declarations, for projects described in subdivision (c) of Section 21065. These time limits shall apply only to those circumstances in which the local agency is the lead agency for a project. These ordinances or resolutions may establish different

time limits for different types or classes of projects and different types of environmental impact reports, but all limits shall be measured from the date on which an application requesting approval of the project is received and accepted as complete by the local agency. No application for a project may be deemed incomplete for lack of a waiver of time periods prescribed by local ordinance or resolution. The ordinances or resolutions required by this section may provide for a reasonable extension of the time period in the event that compelling circumstances justify additional time and the project applicant consents thereto.

(b) If a draft environmental impact report, environmental impact report, focused environmental impact report, or negative declaration is prepared under a contract to a local agency, the contract shall be executed within 45 days from the date on which the local agency determines that a negative declaration or an environmental impact report is required. The local agency may take longer to execute the contract in the event that compelling circumstances justify additional time and the project applicant consents thereto.

SEC. 11. Section 21152 of the Public Resources Code is amended to read:

21152. (a) Whenever a local agency approves or determines to carry out a project which is subject to this division, it shall file notice of the approval or the determination within five working days after the approval or determination becomes final, with the county clerk of each county in which the project will be located. The notice shall indicate the determination of the local agency whether the project will, or will not, have a significant effect on the environment and shall indicate whether an environmental impact report has been prepared pursuant to this division. The notice shall also include certification that the final environmental impact report, if one was prepared, together with comments and responses, is available to the general public.

(b) Whenever a local agency determines that a project is not subject to this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085 or 21172, and it approves or determines to carry out the project, it, or the person specified in subdivision (b) or (c) of Section 21065, may file a notice of the determination with the county clerk of each county in which the project will be located. Any notice filed pursuant to this subdivision by a person specified in subdivision (b) or (c) of Section 21065 shall have a certificate of determination attached to it issued by the local agency responsible for making the determination that the project is not subject to this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085 or 21172. The certificate of determination may be in the form of a certified copy of an existing document or record of the local agency.

(c) All notices filed pursuant to this section shall be available for public inspection, and shall be posted within 24 hours of receipt in

the office of the county clerk. Each notice shall remain posted for a period of 30 days. Thereafter, the clerk shall return the notice to the local agency with a notation of the period it was posted. The local agency shall retain the notice for not less than nine months.

SEC. 12. Section 21157 of the Public Resources Code is amended to read:

21157. (a) A master environmental impact report may be prepared for any one of the following projects:

(1) A general plan, element, general plan amendment, or specific plan.

(2) A project that consists of smaller individual projects which will be carried out in phases.

(3) A rule or regulation which will be implemented by subsequent projects.

(4) Projects to be carried out pursuant to a development agreement.

(5) Public and private projects pursuant to, or in furtherance of, a redevelopment plan.

(6) A state highway project or mass transit project which will be subject to multiple stages of review or approval.

(7) A regional transportation plan or congestion management plan.

(b) When a lead agency prepares a master environmental impact report, the document shall include all of the following:

(1) A detailed statement as required by Section 21100.

(2) A description of anticipated subsequent projects that would be within the scope of the master environmental impact report, that contains sufficient information with regard to the kind, size, intensity, and location of the subsequent projects, including, but not limited to, all of the following:

(A) The specific type of project anticipated to be undertaken.

(B) The maximum and minimum intensity of any anticipated subsequent project, such as the number of residences in a residential development, and, with regard to a public works facility, its anticipated capacity and service area.

(C) The anticipated location and alternative locations for any development projects.

(D) A capital outlay or capital improvement program, or other scheduling or implementing device that governs the submission and approval of subsequent projects.

(3) A description of potential impacts of anticipated subsequent projects for which there is not sufficient information reasonably available to support a full assessment of potential impacts in the master environmental impact report. This description shall not be construed as a limitation on the impacts which may be considered in a focused environmental impact report.

(c) Lead agencies may develop and implement a fee program in accordance with applicable provisions of law to generate the revenue necessary to prepare a master environmental impact

report.

SEC. 12.5. Section 21157 of the Public Resources Code is amended to read:

21157. (a) A master environmental impact report may be prepared for any one of the following projects:

(1) A general plan, element, general plan amendment, or specific plan.

(2) A project that consists of smaller individual projects which will be carried out in phases.

(3) A rule or regulation which will be implemented by subsequent projects.

(4) Projects which will be carried out or approved pursuant to a development agreement.

(5) Public or private projects which will be carried out or approved pursuant to, or in furtherance of, a redevelopment plan.

(6) A state highway project or mass transit project which will be subject to multiple stages of review or approval.

(7) A regional transportation plan or congestion management plan.

(8) A plan proposed by a local agency for the reuse of a federal military base or reservation that has been closed or that is proposed for closure.

(b) When a lead agency prepares a master environmental impact report, the document shall include all of the following:

(1) A detailed statement as required by Section 21100.

(2) A description of anticipated subsequent projects that would be within the scope of the master environmental impact report, that contains sufficient information with regard to the kind, size, intensity, and location of the subsequent projects, including, but not limited to, all of the following:

(A) The specific type of project anticipated to be undertaken.

(B) The maximum and minimum intensity of any anticipated subsequent project, such as the number of residences in a residential development, and, with regard to a public works facility, its anticipated capacity and service area.

(C) The anticipated location and alternative locations for any development projects.

(D) A capital outlay or capital improvement program, or other scheduling or implementing device that governs the submission and approval of subsequent projects.

(3) A description of potential impacts of anticipated subsequent projects for which there is not sufficient information reasonably available to support a full assessment of potential impacts in the master environmental impact report. This description shall not be construed as a limitation on the impacts which may be considered in a focused environmental impact report.

(c) Lead agencies may develop and implement a fee program in accordance with applicable provisions of law to generate the revenue necessary to prepare a master environmental impact

report.

SEC. 13. Section 21157.1 of the Public Resources Code is amended to read:

21157.1. The preparation and certification of a master environmental impact report, if prepared and certified consistent with this division, may allow for the limited review of subsequent projects that were described in the master environmental impact report as being within the scope of the report, in accordance with the following requirements:

(a) The lead agency for a subsequent project shall be the lead agency or any responsible agency identified in the master environmental impact report.

(b) The lead agency shall prepare an initial study on any proposed subsequent project. This initial study shall analyze whether the subsequent project may cause any significant effect on the environment that was not examined in the master environmental impact report and whether the subsequent project was described in the master environmental impact report as being within the scope of the report.

(c) If the lead agency, based on the initial study, determines that a proposed subsequent project will have no additional significant effect on the environment, as defined in subdivision (d) of Section 21158, that was not identified in the master environmental impact report and that no new or additional mitigation measures or alternatives may be required, the lead agency shall make a written finding based upon the information contained in the initial study that the subsequent project is within the scope of the project covered by the master environmental impact report. No new environmental document nor findings pursuant to Section 21081 shall be required by this division. Prior to approving or carrying out the proposed subsequent project, the lead agency shall provide notice of this fact pursuant to Section 21092 and incorporate all feasible mitigation measures or feasible alternatives set forth in the master environmental impact report which are appropriate to the project. Whenever a lead agency approves or determines to carry out any subsequent project pursuant to this section, it shall file a notice pursuant to Section 21108 or 21152.

(d) Where a lead agency cannot make the findings required in subdivision (c), the lead agency shall prepare, pursuant to Section 21157.7, either a mitigated negative declaration or environmental impact report.

SEC. 14. Section 21157.6 of the Public Resources Code is amended to read:

21157.6. The master environmental impact report shall not be used for the purposes of this chapter if (1) the certification of the report occurred more than five years prior to the filing of an application for the subsequent project, or (2) if the approval of a project that was not described in the report may affect the adequacy of the environmental review in the report for any subsequent

project, unless the lead agency reviews the adequacy of the master environmental impact report and does either of the following:

(a) Finds that no substantial changes have occurred with respect to the circumstances under which the master environmental impact report was certified or that no new information, which was not known and could not have been known at the time that the master environmental impact report was certified as complete, has become available.

(b) Certifies a subsequent or supplemental environmental impact report which has been either incorporated into the previously certified master environmental impact report or references any deletions, additions, or any other modifications to the previously certified master environmental impact report.

SEC. 15. Section 21157.7 of the Public Resources Code is repealed.

SEC. 16. Section 21158 of the Public Resources Code is amended to read:

21158. (a) A focused environmental impact report is an environmental impact report on a subsequent project identified in a master environmental impact report. A focused environmental impact report may be utilized only if the lead agency finds that the analysis in the master environmental impact report of cumulative impacts, growth inducing impacts, and irreversible significant effects on the environment is adequate for the subsequent project. The focused environmental impact report shall incorporate, by reference, the master environmental impact report and analyze only the subsequent project's additional significant effects on the environment, as defined in subdivision (d), and any new or additional mitigation measures or alternatives that were not identified and analyzed by the master environmental impact report.

(b) The focused environmental impact report need not examine those effects which the lead agency finds were one of the following:

(1) Mitigated or avoided pursuant to paragraph (1) of subdivision (a) of Section 21081 as a result of mitigation measures identified in the master environmental impact report which will be required as part of the approval of the subsequent project.

(2) Examined at a sufficient level of detail in the master environmental impact report to enable those significant environmental effects to be mitigated or avoided by specific revisions to the project, the imposition of conditions, or by other means in connection with the approval of the subsequent project.

(3) Subject to a finding pursuant to paragraph (2) of subdivision (a) of Section 21081.

(c) A focused environmental impact report on any subsequent project shall analyze any significant effects on the environment where substantial new or additional information shows that the adverse environmental impact may be more significant than was described in the master environmental impact report. The substantial new or additional information may also show that

mitigation measures or alternatives identified in the master environmental impact report, which were previously determined to be infeasible, are feasible and will avoid or reduce the significant effects on the environment of the subsequent project to a level of insignificance.

(d) For purposes of this chapter, "additional significant effects on the environment" are those project specific effects on the environment which were not addressed as significant effects on the environment in the master environmental impact report.

(e) Nothing in this chapter is intended to limit or abridge the ability of a lead agency to focus upon the issues that are ripe for decision at each level of environmental review, or to exclude duplicative analysis of environmental effects examined in previous environmental impact reports pursuant to Section 21093.

SEC. 17. The heading of Article 4.1 (commencing with Section 21159.1) of Chapter 4.5 of Division 13 of the Public Resources Code is repealed.

SEC. 18. Section 21159.4 of the Public Resources Code, as added by Chapter 1130 of the Statutes of 1993, is repealed.

SEC. 19. Section 21167 of the Public Resources Code is amended to read:

21167. Any action or proceeding to attack, review, set aside, void, or annul the following acts or decisions of a public agency on the grounds of noncompliance with this division shall be commenced as follows:

(a) An action or proceeding alleging that a public agency is carrying out or has approved a project which may have a significant effect on the environment without having determined whether the project may have a significant effect on the environment shall be commenced within 180 days of the public agency's decision to carry out or approve the project, or, if a project is undertaken without a formal decision by the public agency, within 180 days after commencement of the project.

(b) Any action or proceeding alleging that a public agency has improperly determined whether a project may have a significant effect on the environment shall be commenced within 30 days after the filing of the notice required by subdivision (a) of Section 21108 or subdivision (a) of Section 21152.

(c) Any action or proceeding alleging that an environmental impact report does not comply with the provisions of this division shall be commenced within 30 days after the filing of the notice required by subdivision (a) of Section 21108 or subdivision (a) of Section 21152 by the lead agency.

(d) Any action or proceeding alleging that a public agency has improperly determined that a project is not subject to the provisions of this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085 or 21172 shall be commenced within 35 days after the filing by the public agency, or person specified in subdivision (b) or (c) of Section 21065, of the notice authorized by

subdivision (b) of Section 21108 or subdivision (b) of Section 21152. If the notice has not been filed, the action or proceeding shall be commenced within 180 days of the public agency's decision to carry out or approve the project, or, if a project is undertaken without a formal decision by the public agency, within 180 days after commencement of the project.

(e) Any action or proceeding alleging that any other act or omission of a public agency does not comply with the provisions of this division shall be commenced within 30 days after the filing of the notice required by subdivision (a) of Section 21108 or subdivision (a) of Section 21152.

(f) If a person has made a written request to the public agency for a copy of the notice specified in Section 21108 or 21152 within the posting periods specified in Sections 21108 and 21152, the time periods specified in subdivisions (b), (c), (d), and (e) shall commence from the date that the public agency deposits a written copy of the notice in the United States mail, first-class postage prepaid.

SEC. 20. Section 21167.1 of the Public Resources Code is amended to read:

21167.1. (a) In all actions or proceedings brought pursuant to Sections 21167, 21168, and 21168.5, including the hearing of an action or proceeding on appeal from a decision of a lower court, all courts in which the action or proceeding is pending shall give the action or proceeding preference over all other civil actions, in the matter of setting the action or proceeding for hearing or trial, and in hearing or trying the action or proceeding, so that the action or proceeding shall be quickly heard and determined. The court shall regulate the briefing schedule so that, to the extent feasible, the court shall commence hearings on an appeal within one year of the date of the filing of the appeal.

(b) To ensure that actions or proceedings brought pursuant to Sections 21167, 21168, and 21168.5 may be quickly heard and determined in the lower courts, the superior courts in all counties with a population of more than 200,000 shall designate one or more judges to develop expertise in this division and related land use and environmental laws, so that those judges will be available to hear, and quickly resolve, actions or proceedings brought pursuant to Sections 21167, 21168, and 21168.5.

(c) In any action or proceeding filed pursuant to this chapter that is joined with any other cause of action, the court, upon a motion by any party, may grant severance of the actions. In determining whether to grant severance, the court shall consider such as matters judicial economy, administrative economy, and prejudice to any party.

SEC. 21. Section 21167.4 of the Public Resources Code is amended to read:

21167.4. (a) In any action or proceeding alleging noncompliance with this division, the petitioner shall request a hearing within 90

days from the date of filing the petition or shall be subject to dismissal on the court's own motion or on the motion of any party interested in the action or proceeding.

(b) The petitioner shall serve a notice of the request for a hearing on all parties at the time that the petitioner files the request for a hearing.

(c) Upon the filing of a request by the petitioner for a hearing and upon application by any party, the court shall establish a briefing schedule and a hearing date. In the absence of good cause, briefing shall be completed within 90 days from the date that the request for a hearing is filed, and the hearing, to the extent feasible, shall be held within 30 days thereafter. Good cause may include, but shall not be limited to, the conduct of discovery, determination of the completeness of the record of proceedings, the complexity of the issues, and the length of the record of proceedings and the timeliness of its production. The parties may stipulate to a briefing schedule or hearing date that differs from the schedule set forth in this subdivision if the stipulation is approved by the court.

SEC. 22. Section 21167.6 of the Public Resources Code is amended to read:

21167.6. Notwithstanding any other provision of law, in all actions or proceedings brought pursuant to Section 21167, except those involving the Public Utilities Commission, all of the following procedures shall apply:

(a) At the time that the action is filed, the petitioner shall file a request that the respondent public agency prepare the record of proceedings relating to the subject of the action or proceeding. The request, together with the petition, shall be served upon the public agency not later than 10 business days from the date upon which the action or proceeding is filed.

(b) (1) The public agency shall prepare and certify the record of proceedings not later than 60 days from the date upon which the request specified in subdivision (a) is served upon the public agency. Upon certification, the public agency shall lodge with the court a copy of the record and shall serve on all parties notice that the record of proceedings has been certified and lodged. The parties shall pay any costs or fees imposed for the preparation of the record of proceedings in conformance with any law or rule of court.

(2) The petitioner may elect to prepare the record of proceedings or the parties may agree to an alternative method of preparation of the record of proceedings, subject to certification of its accuracy by the public agency, within the time limit specified in this subdivision.

(c) The time limit prescribed by subdivision (b) may be extended only upon stipulation of all parties who have been properly served in the action or proceeding or upon order of the court. Extensions shall be liberally granted by the court when the size of the record of proceedings renders infeasible compliance with that time limit. There is no limit on the number of extensions which may be granted by the court, but no single extension shall exceed 60 days unless the

court determines that a longer extension is in the public interest.

(d) If the public agency fails to prepare and certify the record within the time limit prescribed in subdivision (b), or any continuances of that time limit, the petitioner may move for sanctions, and the court may, upon that motion, grant appropriate sanctions.

(e) The clerk of the superior court shall prepare and certify the clerk's transcript on appeal not later than 60 days from the date upon which the notice designating the papers or records to be included in the clerk's transcript is filed with the superior court, if the party or parties pay any costs or fees for preparation of the clerk's transcript imposed in conformance with any law or rules of court. Nothing in this subdivision precludes an election to proceed pursuant to Rule 5.1 of the California Rules of Court.

(f) Extensions of the period for the filing of any brief on appeal may be allowed only by stipulation of the parties or by order of the court for good cause shown. Extensions on appeal shall be limited to one 30-day extension for the preparation of an opening brief, and one 30-day extension for the preparation of a responding brief, except that the court may grant a longer extension or additional extensions if it determines that there is a substantial likelihood of settlement that would avoid the necessity of completing the appeal.

(g) At the completion of the filing of briefs on appeal, the appellant shall notify the court of completion of the filing of briefs, whereupon the clerk of the reviewing court shall set the appeal for hearing on the first available calendar date.

SEC. 23. Section 21167.8 of the Public Resources Code is amended to read:

21167.8. (a) Not later than 20 days from the date of service upon a public agency of a petition or complaint brought pursuant to Section 21167, the public agency shall file with the court a notice setting forth the time and place at which all parties shall meet and attempt to settle the litigation. The meeting shall be scheduled and held not later than 45 days from the date of service of the petition or complaint upon the public agency. The notice of the settlement meeting shall be served by mail upon the counsel for each party. If the public agency does not know the identity of counsel for any party, the notice shall be served by mail upon the party for whom counsel is not known.

(b) At the time and place specified in the notice filed with the court, the parties shall meet and confer regarding anticipated issues to be raised in the litigation and shall attempt in good faith to settle the litigation and the dispute which forms the basis of the litigation. The settlement meeting discussions shall be comprehensive in nature and shall focus on the legal issues raised by the parties concerning the project that is the subject of the litigation.

(c) The settlement meeting may be continued from time to time without postponing or otherwise delaying other applicable time limits in the litigation. The settlement meeting is intended to be

conducted concurrently with any judicial proceedings.

(d) If the litigation is not settled, the court, in its discretion, may, or at the request of any party, shall, schedule a further settlement conference before a judge of the superior court. If the petition or complaint is later heard on its merits, the judge hearing the matter shall not be the same judge conducting the settlement conference, except in counties that have only one judge of the superior court.

(e) The failure of any party, who was notified pursuant to subdivision (a), to participate in the litigation settlement process, without good cause, may result in an imposition of sanctions by the court.

(f) Not later than 30 days from the date that notice of certification of the record of proceedings was filed and served in accordance with Section 21167.6, each party shall file and serve on all other parties a statement of issues which that party intends to raise in any brief or at any hearing or trial.

SEC. 24. Section 13264 of the Water Code is amended to read:

13264. (a) No person shall initiate any new discharge of waste or make any material changes in any discharge, or initiate a discharge to, make any material changes in a discharge to, or construct, an injection well, prior to the filing of the report required by Section 13260 and no person shall take any of these actions after filing the report but before whichever of the following occurs first:

(1) The issuance of waste discharge requirements pursuant to Section 13263.

(2) The expiration of 120 days after compliance with Section 13260 if any of the following applies:

(A) The project is not subject to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code).

(B) The regional board is the lead agency for purposes of the California Environmental Quality Act, a negative declaration is required, and at least 105 days have expired since the regional board assumed lead agency responsibility.

(C) The regional board is the lead agency for the purposes of the California Environmental Quality Act, and environmental impact report or written documentation prepared to meet the requirements of Section 21080.5 of the Public Resources Code is required, and at least one year has expired since the regional board assumed lead agency responsibility.

(D) The regional board is a responsible agency for purposes of the California Environmental Quality Act, and at least 90 days have expired since certification or approval of environmental documentation by the lead agency.

(3) The regional board's waiver pursuant to Section 13269.

(b) The Attorney General, at the request of a regional board, shall petition the superior court for the issuance of a temporary restraining order, preliminary injunction, or permanent injunction, or combination thereof, as may be appropriate, prohibiting any

person who is violating or threatening to violate this section from doing any of the following, whichever is applicable:

(1) Discharging the waste or fluid.

(2) Making any material change in the discharge.

(3) Constructing the injection well.

SEC. 25. The changes to subdivision (e) of Section 21100 of the Public Resources Code made by this act shall not become operative until January 1, 1995.

SEC. 26. If this bill and SB 749 are both chaptered, the provisions of SB 749 that amend Sections 21100, 21100.1, and 21167.6 of the Public Resources Code shall become operative, and the provisions of this bill that amend those sections shall not become operative, regardless of which bill is chaptered last.

SEC. 27. Section 4.5 of this bill incorporates amendments to Section 21080.6 of the Public Resources Code proposed by this bill and SB 749. It shall only become operative if (1) both bills are enacted and become effective on or before January 1, 1995, (2) each bill amends Section 21080.6 of the Public Resources Code, and (3) this bill is enacted after SB 749, in which case Section 21080.6 of the Public Resources Code, as amended by SB 749, shall remain operative only until the operative date of this bill, at which time Section 4.5 of this bill shall become operative, and Section 4 of this bill shall not become operative.

SEC. 28. Section 12.5 of this bill incorporates amendments to Section 21157 of the Public Resources proposed by this bill and SB 1971. It shall only become operative if (1) both bills are enacted and become effective on or before January 1, 1995, (2) each bill amends Section 21157 of the Public Resources Code, and (3) this bill is enacted after SB 1971, in which case Section 21157 of the Public Resources Code, as amended by SB 1971, shall remain operative only until the operative date of this bill, at which time Section 12.5 of this bill shall become operative, and Section 12 of this bill shall not become operative.

SEC. 29. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because the local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the program or level of service mandated by this act. Notwithstanding Section 17580 of the Government Code, unless otherwise specified in this act, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

SEC. 30. This act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting the necessity are:

In order that technical corrections, to ensure proper implementation of Chapter 1130 of the Statutes of 1993 are made in a timely manner, it is necessary that this act take effect immediately.

CHAPTER 801

An act to amend Sections 21167 and 21167.8 of the Public Resources Code, relating to environmental quality.

[Approved by Governor October 12, 1995. Filed with Secretary of State October 13, 1995.]

The people of the State of California do enact as follows:

SECTION 1. Section 21167 of the Public Resources Code is amended to read:

21167. Any action or proceeding to attack, review, set aside, void, or annul the following acts or decisions of a public agency on the grounds of noncompliance with this division shall be commenced as follows:

(a) An action or proceeding alleging that a public agency is carrying out or has approved a project which may have a significant effect on the environment without having determined whether the project may have a significant effect on the environment shall be commenced within 180 days from the date of the public agency's decision to carry out or approve the project, or, if a project is undertaken without a formal decision by the public agency, within 180 days from the date of commencement of the project.

(b) Any action or proceeding alleging that a public agency has improperly determined whether a project may have a significant effect on the environment shall be commenced within 30 days from the date of the filing of the notice required by subdivision (a) of Section 21108 or subdivision (a) of Section 21152.

(c) Any action or proceeding alleging that an environmental impact report does not comply with this division shall be commenced within 30 days from the date of the filing of the notice required by subdivision (a) of Section 21108 or subdivision (a) of Section 21152 by the lead agency.

(d) Any action or proceeding alleging that a public agency has improperly determined that a project is not subject to this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085 or 21172 shall be commenced within 35 days from the date of the filing by the public agency, or person specified in subdivision (b) or (c) of Section 21065, of the notice authorized by subdivision (b) of Section 21108 or subdivision (b) of Section 21152. If the notice has not been filed, the action or proceeding shall be commenced within 180 days from the date of the public agency's decision to carry out or approve the project, or, if a project is undertaken without a formal decision by the public agency, within 180 days from the date of commencement of the project.

(e) Any action or proceeding alleging that any other act or omission of a public agency does not comply with this division shall be commenced within 30 days from the date of the filing of the notice required by subdivision (a) of Section 21108 or subdivision (a) of Section 21152.

(f) If a person has made a written request to the public agency for a copy of the notice specified in Section 21108 or 21152 prior to the date on which the agency approves or determines to carry out the project, then not later than five days from the date of the agency's action, the public agency shall deposit a written copy of the notice addressed to that person in the United States mail, first-class postage prepaid. The date upon which this notice is mailed shall not affect the time periods specified in subdivisions (b), (c), (d), and (e).

SEC. 2. Section 21167.8 of the Public Resources Code is amended to read:

21167.8. (a) Not later than 20 days from the date of service upon a public agency of a petition or complaint brought pursuant to Section 21167, the public agency shall file with the court a notice setting forth the time and place at which all parties shall meet and attempt to settle the litigation. The meeting shall be scheduled and held not later than 45 days from the date of service of the petition or complaint upon the public agency. The notice of the settlement meeting shall be served by mail upon the counsel for each party. If the public agency does not know the identity of counsel for any party, the notice shall be served by mail upon the party for whom counsel is not known.

(b) At the time and place specified in the notice filed with the court, the parties shall meet and confer regarding anticipated issues to be raised in the litigation and shall attempt in good faith to settle the litigation and the dispute which forms the basis of the litigation. The settlement meeting discussions shall be comprehensive in nature and shall focus on the legal issues raised by the parties concerning the project that is the subject of the litigation.

(c) The settlement meeting may be continued from time to time without postponing or otherwise delaying other applicable time limits in the litigation. The settlement meeting is intended to be conducted concurrently with any judicial proceedings.

(d) If the litigation is not settled, the court, in its discretion, may, or at the request of any party, shall, schedule a further settlement conference before a judge of the superior court. If the petition or complaint is later heard on its merits, the judge hearing the matter shall not be the same judge conducting the settlement conference, except in counties that have only one judge of the superior court.

(e) The failure of any party, who was notified pursuant to subdivision (a), to participate in the litigation settlement process, without good cause, may result in an imposition of sanctions by the court.

(f) Not later than 30 days from the date that notice of certification of the record of proceedings was filed and served in accordance with Section 21167.6, the petitioner or plaintiff shall file and serve on all other parties a statement of issues which the petitioner or plaintiff intends to raise in any brief or at any hearing or trial. Not later than 10 days from the date on which the respondent or real party in interest has been served with the statement of issues from the petitioner or plaintiff, each respondent and real party in interest shall file and serve on all other parties a statement of issues which that party intends to raise in any brief or at any hearing or trial.

BILL NUMBER: SB 1562 CHAPTERED 07/25/96

CHAPTER 277
FILED WITH SECRETARY OF STATE JULY 25, 1996
APPROVED BY GOVERNOR JULY 24, 1996
PASSED THE ASSEMBLY JULY 11, 1996
PASSED THE SENATE APRIL 25, 1996
AMENDED IN SENATE APRIL 18, 1996

INTRODUCED BY Senator Greene

FEBRUARY 15, 1996

An act to add Part 10.5 (commencing with Section 17211) and Part 23 (commencing with Section 38000) to, to repeal and add Part 10 (commencing with Section 15100) of, and to repeal Part 10.5 (commencing with Section 17900) and Part 23 (commencing with Section 39001) of, the Education Code, and to repeal Sections 53080, 53080.1, 53080.15, 53080.2, 53080.3, 53080.4, 53080.6, and 53081 of the Government Code, relating to school facilities.

LEGISLATIVE COUNSEL'S DIGEST

SB 1562, Greene. School facilities.

(1) Existing law includes various state general obligation bond acts, as approved by the voters, that provide for the issuance of bonds to raise revenues for, among other purposes, elementary and secondary school facility construction.

This bill would repeal and reenact the provisions governing state school bonds including the State School Building Aid Law of 1949, the State School Building Aid Law of 1952, the State School Construction Law of 1957, and the Urban School Construction Aid Law of 1968.

(2) Existing law, the Leroy F. Greene State School Building Lease-Purchase Law of 1976, provides bond funding for the construction, reconstruction, modernization, and replacement of school facilities and the performance of deferred maintenance activities on school facilities.

This bill would repeal and reenact this law and would make technical, nonsubstantive changes in those provisions.

(3) Existing law also provides for the Emergency School Classroom Law of 1979, school district revenue bonds, the Archie-Hudson and Cunneen School Technology Revenue Bond Act, and the California School Finance Authority.

This bill would repeal and reenact those bodies of law and would make technical, nonsubstantive changes in those provisions.

(4) Existing law sets forth specific requirements for the location and construction of school buildings including, among other provisions, the Field Act.

This bill would repeal and reenact those provisions and would make technical, nonsubstantive changes in those provisions.

(5) Under existing law, the governing board of any school district is authorized to levy a fee, charge, dedication, or other requirement against any development project within the boundaries of the school district for the purpose of funding the construction or reconstruction of school facilities.

This bill would repeal and add those provisions and would make technical, nonsubstantive changes in those provisions.

(6) This bill would provide that it is to be construed as a restatement and not as a new enactment.
(7) This bill would provide that the above-referenced provisions of the bill would become operative on January 1, 1998.

THE PEOPLE OF THE STATE OF CALIFORNIA DO ENACT AS FOLLOWS:

SECTION 1. Part 10 (commencing with Section 15100) of the Education Code is repealed.
SEC. 2. Part 10 (commencing with Section 15100) is added to the Education Code, to read:

PART 10. SCHOOL BONDS
CHAPTER 1. BONDS OF SCHOOL DISTRICTS AND COMMUNITY COLLEGE DISTRICTS
Article 1. Purposes for Authorizing Bonds

15100. Except as otherwise provided by law, the governing board of any school district or community college district may, when in its judgment it is advisable, and shall, upon a petition of the majority of the qualified electors residing in the school district or community college district, order the county superintendent of schools to call an election and submit to the electors of the district the question whether the bonds of the district shall be issued and sold for the purpose of raising money for the following purposes:
(a) The purchasing of school lots.
(b) The building or purchasing of school buildings.
(c) The making of alterations or additions to the school building or buildings other than as may be necessary for current maintenance, operation, or repairs.
(d) The repairing, restoring, or rebuilding of any school building damaged, injured, or destroyed by fire or other public calamity.
(e) The supplying of school buildings and grounds with furniture, equipment, or necessary apparatus of a permanent nature.
(f) The permanent improvement of the school grounds.
(g) The refunding of any outstanding valid indebtedness of the district, evidenced by bonds, or of state school building aid loans.

(h) The carrying out of the projects or purposes authorized in Section 17577 or 81613.
(i) The purchase of schoolbuses the useful life of which is at least 20 years.
(j) The demolition or razing of any school building with the intent to replace it with another school building, whether in the same location or in any other location.
Any one or more of the purposes enumerated, except that of refunding any outstanding valid indebtedness of the district evidenced by bonds, may, by order of the governing board entered in its minutes, be united and voted upon as one single proposition.
15101. Notwithstanding any provision of law to the contrary, no election shall be held pursuant to this chapter within 45 days before a statewide election or within 45 days after a statewide election unless conducted at the same time as the statewide election, subject to Part 3 (commencing with Section 10400) of Division 10 of the Elections Code.
15102. The total amount of bonds issued shall not exceed 1.25 percent of the taxable property of the district as shown by the last

CHAPTER 12. STATE SCHOOL BUILDING LEASE-PURCHASE LAW OF 1976
Article 1. General Provisions

17000. This chapter may be cited as the "Leroy F. Greene State School Building Lease-Purchase Law of 1976."

17001. (a) The Legislature hereby declares that it is in the interest of the state and the people thereof for the state to reconstruct, remodel, or replace existing school buildings that are educationally inadequate or that do not meet present-day structural safety requirements, and to acquire new schoolsites and buildings for the purpose of making them available to local school districts for the pupils of the public school system, that system being a matter of general concern inasmuch as the education of the children of the state is an obligation and function of the state.

(b) In order to expedite the elimination of the use of nonconforming school buildings that are used or designed to be used for instructional purposes or intended to be entered by pupils, the State Allocation Board may establish criteria that considers special circumstances under which funds may be allocated for the reconstruction of nonconforming buildings. The funds allocated in accordance with this section shall not exceed 75 percent of the cost of facility replacement.

(c) It is the intent of the Legislature that all construction projects be designed and constructed to maximize the use of educational technology, as set forth in subdivision (b) of Section 17002.

17002. The following terms wherever used or referred to in this chapter, shall have the following meanings, respectively, unless a different meaning appears from the context:

(a) "Board" means the State Allocation Board.

(b) "Cost of project" includes, but is not limited to, the cost of all real estate property rights, and easements acquired, and the cost of developing the site and streets and utilities immediately adjacent thereto, the cost of construction, reconstruction, or modernization of buildings and the furnishing and equipping, including the purchase of educational technology hardware, of those buildings, the supporting wiring and cabling, and the technological modernization of existing buildings to support that hardware, the cost of plans, specifications, surveys, and estimates of costs, and other expenses that are necessary or incidental to the financing of the project. For purposes of this section, "educational technology hardware" includes, but is not limited to, computers, telephones, televisions, and video cassette recorders.

(c) The term "lease" includes a lease with an option to purchase.

(d) "Project" means the facility being constructed or acquired by the state for rental to the applicant school district and may include the reconstruction or modernization of existing buildings, construction of new buildings, the grading and development of sites, acquisition of sites therefor and any easements or rights-of-way pertinent thereto or necessary for its full use including the development of streets and utilities.

(e) "Property" includes all property, real, personal or mixed, tangible or intangible, or any interest therein necessary or desirable for carrying out the purposes of this chapter.

(f) "Apportionment" means a reservation of funds necessary to finance the cost of any project approved by the board for lease to an applicant school district.

17002.1. As used in this chapter, construction shall include, but not be limited to, reconstruction, modernization, and replacement of

of the information certified by self-certifying districts pursuant to subdivision (b), using generally accepted auditing principles, at any time to ensure compliance with the law.

(d) If any information certified by a self-certifying district pursuant to subdivision (b) is found by the department to contain any material inaccuracy, the department shall so notify the board. The board shall thereupon impose both of the following penalties:

(1) Pursuant to a repayment schedule approved by the board of no more than five years, the district shall repay to the board, for deposit in the State School Building Lease-Purchase Fund, an amount equal to the amount of project funding allocated under this chapter to acquire any site that was selected in material violation of the standards adopted by the department pursuant to subdivision (b) of Section 17251, together with interest at the rate paid on moneys in the Pooled Money Investment Account or at the highest rate of interest for the most recent issue of state general obligation bonds as established pursuant to Chapter 4 (commencing with Section 16720) of Part 3 of Division 4 of Title 2 of the Government Code, whichever is greater. The amount of any repayment owing under this paragraph for any fiscal year, which is not repaid otherwise by the district, shall be withheld by the board from any project funding that otherwise would be allocated to that district under this chapter in that fiscal year. As to any repayment obligation remaining for that fiscal year, the board shall notify the Superintendent of Public Instruction, who shall withhold the amount of that remaining obligation from the apportionments to be made to the district from the State School Fund in that fiscal year.

(2) The board shall prohibit the district from exercising the self-certifying authority under subdivision (b) under any subsequent applications for project funding for a period of up to five years following the date of the finding of a material inaccuracy, or until the district's repayment of the entire amount owing under paragraph (1), whichever occurs later.

(e) Any school district against which the board imposed the penalties under paragraphs (1) and (2) of subdivision (d) may submit for binding determination by an arbitrator the issue of whether the penalties imposed are disproportionate to the inaccuracy certified by the district. Except as otherwise provided by this chapter, the procedure governing the arbitration shall be as set forth in Title 9 (commencing with Section 1280) of Part 3 of the Code of Civil Procedure.

(f) It is the intent of the Legislature that audits as described in this section not interfere with the application and construction process under this chapter unless one or more violations are discovered.

17024.5. Upon request of any school district, the State Department of Education shall provide assistance in the evaluation and utilization of existing school facilities and the justification of the need for schoolsites, new facilities, and the rehabilitation or replacement of existing facilities, in accordance with board regulations.

17025. (a) The board shall not authorize a contract for the construction of any new school, or for the addition to, or reconstruction or alteration of, any existing building, for lease-purchase to any school district unless the applicant district has submitted plans therefor to the Department of General Services and obtained the written approval of the department pursuant to Article 3 (commencing with Section 17280) of Chapter 3 of Part 10.5.

(b) The board, or the self-certifying district, as applicable,

shall certify the compliance of a project with Sections 17212, 17212.5, and 17213, with Division 13 (commencing with Section 21000) of the Public Resources Code, and with any other law that applies to that project, but may require documentation of compliance only as to requirements that are applicable under this chapter. Notwithstanding any other law, for purposes of Division 13 (commencing with Section 21000) of the Public Resources Code, the applicant district shall be deemed to be the "lead agency" with regard to any project funded for that district under this chapter.

17029. (a) The board shall authorize the applicant school district to act as its agent in the performance of acts specifically approved by the board and all acts required pursuant to Article 3 (commencing with Section 17280) of Chapter 3 of Part 10.5. That authorization shall include, but is not limited to, the selection of schoolsites, the securing of appraisals, the contracting for architectural services, the advertisement for construction bids and the entering into of contracts therefor and the purchase of furniture and equipment.

(b) If, pursuant to the authority granted under subdivision (a), a self-certifying district submits to the board two or more independent appraisals and certifies to the board that the appraisals were performed by appraisers licensed or certified in accordance with Part 3 (commencing with Section 11300) of Division 4 of the Business and Professions Code and were obtained in accordance with standards and procedures imposed by the board for that purpose, the district shall not be required to document its compliance with those standards and procedures except as specified in Section 17041.2. In addition, the board shall use any of those appraisals, including an appraisal that is not the highest bid appraisal, for the purposes of this section, except that the board may substitute, for the results of those appraisals, the results of one or more independent appraisals, which may include an appraisal performed by the Department of General Services, obtained by the board for that purpose.

(c) If, pursuant to the authority granted under subdivision (a), any bid reported to the board by a self-certifying district as the lowest responsible bid for a construction contract does not exceed the cost limit established by the board for that purpose, and the district certifies to the board that the bid was obtained in accordance with standards and procedures imposed by the board for that purpose, the district shall not be required to document its compliance with those standards and procedures except as specified in Section 17041.2.

17029.5. Notwithstanding any other provisions of this chapter, the funding by the board of contracts entered into by a school district pursuant to this chapter shall not, in itself, make the board liable for any tort, breach of contract, or any other action for damages caused by a school district arising from those contracts. These contracts include, but are not limited to, contracts between the school district and its construction contractors, construction managers, architects, or engineers. The school district shall be liable for all torts, breaches of contract, or any other actions for damages caused by the school district.

17030. (a) In expending funds for any project under this chapter, a school district acts as an agent of the state and all sites purchased and improved, all equipment purchased, and all buildings constructed, altered or added to through the expenditure of funds apportioned under this chapter, are declared to be, and are, the property of the state.

(b) The Director of General Services shall file with the county

of any of the matters permitted by this section or any other provision of this chapter. Notwithstanding any other provision of law, the agent shall have the powers granted by the resolution for purposes of this chapter. The resolution shall be deemed to bind the school district or community college district, as the case may be, to any contract, agreement, instrument, or other document executed by the agent on behalf of the school district or community college district, and all duties, obligations, or responsibilities contained therein on the part of the school district or community college district, to the same extent as if duly authorized, executed, and delivered by the school district or community college district.

(d) This section shall be deemed to provide a complete, additional, and alternative method for accomplishing the acts authorized by this section, and the issuance of bonds to, borrowing of money from, or sale or purchase or lease of educational facilities from or to, the authority. Any agreement entered into in connection with the issuance of bonds, the borrowing of money or the sale, purchase, or lease of educational facilities, including, without limitation, any agreement for liquidity or credit enhancement under this section, need not comply with the requirements of any other law applicable to issuance of bonds, borrowing, selling, purchasing, leasing, pledge, encumbrance, or credit, as the case may be, by a school district or community college district, or by a county or city board of education or superintendent of schools or the Board of Governors of the California Community Colleges or Chancellor of the California Community Colleges.

17199.2. An action may be commenced under Chapter 9 (commencing with Section 860) of Title 10 of Part 2 of the Code of Civil Procedure to determine the validity of any issuance or proposed issuance of revenue bonds, the loan of the proceeds thereof, the sale, purchase, or lease of facilities under this chapter, or the legality and validity of any proceedings previously taken or proposed in a resolution of the authority to be taken for the authorization, issuance, sale, and delivery of the bonds, for the use of the proceeds thereof, or for the payment of the principal and interest thereon.

17199.3. (a) The total amount of revenue bonds which may be issued and outstanding at any time under this chapter shall not exceed four hundred million dollars ($400,000,000).

(b) For purposes of subdivision (a), bonds which meet any of the following conditions shall not be deemed to be outstanding:

(1) Bonds which have been refunded pursuant to Section 17188.

(2) Bonds for which money or securities in amounts necessary to pay or redeem the principal, interest, or any redemption premium on the bonds have been deposited in trust.

(3) Bonds which have been issued to provide working capital.

SEC. 3. Part 10.5 (commencing with Section 17211) is added to the Education Code, to read:

PART 10.5. SCHOOL FACILITIES
CHAPTER 1. SCHOOLSITES
Article 1. General Provisions

17211. Prior to commencing the acquisition of real property for a new schoolsite or an addition to an existing schoolsite, the governing board of a school district shall evaluate the property at a public hearing using the site selection standards established by the State Department of Education pursuant to subdivision (b) of Section 17251. The governing board may direct the district's advisory committee established pursuant to Section 17388 to evaluate the

3147

SEC. 15. To the extent that the provisions of this act are substantially the same as existing statutory provisions relating to the same subject matter, the provisions shall be construed as restatements and continuations of existing statutory provisions and not as a new enactment.

SEC. 16. The Legislature finds and declares that the enactment of this act, in view of the nonsubstantive statutory changes made, will not result in new or additional costs to local agencies charged with any duties or responsibilities in connection therewith.

SEC. 17. Any section of any act enacted by the Legislature during the 1996 calendar year prior to the enactment of this act, that amends, amends and renumbers, adds, repeals and adds, or repeals a section, article, chapter, or part, that is amended, amended and renumbered, added, repealed and added, or repealed by this act, shall prevail over this act until January 1, 1998, at which time Sections 1 to 16 of this act shall become operative.

SEC. 18. The provisions of this act are severable. If any provisions of this act or its application is held invalid, that invalidity shall not affect other provisions or applications that can be given effect without the invalid provision or application.

Senate Bill No. 2073

CHAPTER 444

An act to amend Sections 21157 and 21080.5 of, to add Section 21158.1 to, and to repeal Section 833 of, the Public Resources Code, relating to the California Environmental Quality Act.

[Approved by Governor September 11, 1996. Filed with Secretary of State September 12, 1996.]

LEGISLATIVE COUNSEL'S DIGEST

SB 2073, Leonard. Environmental protection: fish and game.

(1) Existing law, the California Environmental Quality Act, requires state and local lead agencies to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project which it proposes to carry out or approve that may have a significant effect on the environment, as defined, or to adopt a negative declaration if it finds that the project will not have that effect, unless the project is exempt from the act.

The Department of Fish and Game is required to be the lead agency for purposes of the act for any project involving the issuance of a permit required pursuant to certain statutes relating to aquaculture. The act authorizes the preparation of a master environmental impact report for certain projects.

This bill would delete the requirement that the department be the lead agency for any project involving the issuance of a permit required pursuant to those certain statutes relating to aquaculture. The bill would also authorize the preparation of a master environmental impact report for regulations adopted by the Fish and Game Commission for the regulation of hunting and fishing.

(2) The act authorizes a plan or other written documentation required by a certified regulatory program of a state agency to be submitted in lieu of an environmental impact report pursuant to prescribed procedures.

The act authorizes a lead agency, based on an initial study, to make a finding that a proposed subsequent project will have no significant effect on the environment that was not identified in a master environmental impact report and no new or additional mitigation measures may be required. The act also authorizes a lead agency to prepare a focused environmental impact report on a subsequent project identified in a master environmental impact report.

This bill would prohibit the use of such a plan or other written documentation where a lead agency cannot make that finding and is required to prepare an environmental impact report or where the

lead agency is authorized to prepare a focused environmental impact report.

The people of the State of California do enact as follows:

SECTION 1. Section 833 of the Public Resources Code is repealed.

SEC. 2. Section 21157 of the Public Resources Code is amended to read:

21157. (a) A master environmental impact report may be prepared for any one of the following projects:

(1) A general plan, element, general plan amendment, or specific plan.

(2) A project that consists of smaller individual projects which will be carried out in phases.

(3) A rule or regulation which will be implemented by subsequent projects.

(4) Projects which will be carried out or approved pursuant to a development agreement.

(5) Public or private projects which will be carried out or approved pursuant to, or in furtherance of, a redevelopment plan.

(6) A state highway project or mass transit project which will be subject to multiple stages of review or approval.

(7) A regional transportation plan or congestion management plan.

(8) A plan proposed by a local agency for the reuse of a federal military base or reservation that has been closed or that is proposed for closure.

(9) Regulations adopted by the Fish and Game Commission for the regulation of hunting and fishing.

(b) When a lead agency prepares a master environmental impact report, the document shall include all of the following:

(1) A detailed statement as required by Section 21100.

(2) A description of anticipated subsequent projects that would be within the scope of the master environmental impact report, that contains sufficient information with regard to the kind, size, intensity, and location of the subsequent projects, including, but not limited to, all of the following:

(A) The specific type of project anticipated to be undertaken.

(B) The maximum and minimum intensity of any anticipated subsequent project, such as the number of residences in a residential development, and, with regard to a public works facility, its anticipated capacity and service area.

(C) The anticipated location and alternative locations for any development projects.

(D) A capital outlay or capital improvement program, or other scheduling or implementing device that governs the submission and approval of subsequent projects.

(3) A description of potential impacts of anticipated subsequent projects for which there is not sufficient information reasonably available to support a full assessment of potential impacts in the master environmental impact report. This description shall not be construed as a limitation on the impacts which may be considered in a focused environmental impact report.

(c) Lead agencies may develop and implement a fee program in accordance with applicable provisions of law to generate the revenue necessary to prepare a master environmental impact report.

SEC. 3. Section 21080.5 of the Public Resources Code is amended to read:

21080.5. (a) Except as provided in Section 21158.1, when the regulatory program of a state agency requires a plan or other written documentation, containing environmental information and complying with paragraph (3) of subdivision (d), to be submitted in support of any activity listed in subdivision (b), the plan or other written documentation may be submitted in lieu of the environmental impact report required by this division if the Secretary of the Resources Agency has certified the regulatory program pursuant to this section.

(b) This section applies only to regulatory programs or portions thereof which involve either of the following:

(1) The issuance to a person of a lease, permit, license, certificate, or other entitlement for use.

(2) The adoption or approval of standards, rules, regulations, or plans for use in the regulatory program.

(c) A regulatory program certified pursuant to this section is exempt from Chapter 3 (commencing with Section 21100), Chapter 4 (commencing with Section 21150), and Section 21167, except as provided in Article 2 (commencing with Section 21157) of Chapter 4.5.

(d) To qualify for certification pursuant to this section, a regulatory program shall require the utilization of an interdisciplinary approach that will ensure the integrated use of the natural and social sciences in decisionmaking and which shall meet all of the following criteria:

(1) The enabling legislation of the regulatory program does both of the following:

(A) Includes protection of the environment among its principal purposes.

(B) Contains authority for the administering agency to adopt rules and regulations for the protection of the environment, guided by standards set forth in the enabling legislation.

(2) The rules and regulations adopted by the administering agency for the regulatory program do all of the following:

(A) Require that an activity will not be approved or adopted as proposed if there are feasible alternatives or feasible mitigation measures available which would substantially lessen any significant adverse effect which the activity may have on the environment.

(B) Include guidelines for the orderly evaluation of proposed activities and the preparation of the plan or other written documentation in a manner consistent with the environmental protection purposes of the regulatory program.

(C) Require the administering agency to consult with all public agencies which have jurisdiction, by law, with respect to the proposed activity.

(D) Require that final action on the proposed activity include the written responses of the issuing authority to significant environmental points raised during the evaluation process.

(E) Require the filing of a notice of the decision by the administering agency on the proposed activity with the Secretary of the Resources Agency. Those notices shall be available for public inspection, and a list of the notices shall be posted on a weekly basis in the Office of the Resources Agency. Each list shall remain posted for a period of 30 days.

(F) Require notice of the filing of the plan or other written documentation to be made to the public and to any person who requests, in writing, notification. The notification shall be made in a manner that will provide the public or any person requesting notification with sufficient time to review and comment on the filing.

(3) The plan or other written documentation required by the regulatory program does both of the following:

(A) Includes a description of the proposed activity with alternatives to the activity, and mitigation measures to minimize any significant adverse effect on the environment of the activity.

(B) Is available for a reasonable time for review and comment by other public agencies and the general public.

(e) (1) The Secretary of the Resources Agency shall certify a regulatory program which the secretary determines meets all the qualifications for certification set forth in this section, and withdraw certification on determination that the regulatory program has been altered so that it no longer meets those qualifications. Certification and withdrawal of certification shall occur only after compliance with Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

(2) In determining whether or not a regulatory program meets the qualifications for certification set forth in this section, the inquiry of the secretary shall extend only to the question of whether the regulatory program meets the generic requirements of subdivision (d). The inquiry shall not extend to individual decisions to be reached

under the regulatory program, including the nature of specific alternatives or mitigation measures which might be proposed to lessen any significant adverse effect on the environment of the activity.

(3) If the secretary determines that the regulatory program submitted for certification does not meet the qualifications for certification set forth in this section, the secretary shall adopt findings setting forth the reasons for the determination.

(f) After a regulatory program has been certified pursuant to this section, any proposed change in the program which could affect compliance with the qualifications for certification specified in subdivision (d) may be submitted to the Secretary of the Resources Agency for review and comment. The scope of the secretary's review shall extend only to the question of whether the regulatory program meets the generic requirements of subdivision (d). The review shall not extend to individual decisions to be reached under the regulatory program, including specific alternatives or mitigation measures which might be proposed to lessen any significant adverse effect on the environment of the activity. The secretary shall have 30 days from the date of receipt of the proposed change to notify the state agency whether the proposed change will alter the regulatory program so that it no longer meets the qualification for certification established in this section and will result in a withdrawal of certification as provided in this section.

(g) Any action or proceeding to attack, review, set aside, void, or annul a determination or decision of a state agency approving or adopting a proposed activity under a regulatory program which has been certified pursuant to this section on the basis that the plan or other written documentation prepared pursuant to paragraph (3) of subdivision (d) does not comply with this section shall be commenced not later than 30 days from the date of the filing of notice of the approval or adoption of the activity.

(h) (1) Any action or proceeding to attack, review, set aside, void, or annul a determination of the Secretary of the Resources Agency to certify a regulatory program pursuant to this section on the basis that the regulatory program does not comply with this section shall be commenced within 30 days from the date of certification by the secretary.

(2) In any action brought pursuant to paragraph (1), the inquiry shall extend only to whether there was a prejudicial abuse of discretion by the secretary. Abuse of discretion is established if the secretary has not proceeded in a manner required by law or if the determination is not supported by substantial evidence.

(i) For purposes of this section, any county agricultural commissioner is a state agency.

(j) For purposes of this section, any air quality management district or air pollution control district is a state agency, except that

the approval, if any, by such a district of a nonattainment area plan is subject to this section only if, and to the extent that, the approval adopts or amends rules or regulations.

SEC. 4. Section 21158.1 is added to the Public Resources Code, to read:

21158.1. When a lead agency is required to prepare an environmental impact report pursuant to subdivision (d) of Section 21157.1 or is authorized to prepare a focused environmental impact report pursuant to Section 21158, the lead agency may not rely on subdivision (a) of Section 21080.5 for that purpose even though the lead agency's regulatory program is otherwise certified in accordance with Section 21080.5.

O

Assembly Bill No. 298

CHAPTER 547

An act to amend Section 21080 of the Public Resources Code, relating to environmental quality.

[Approved by Governor September 15, 1996. Filed with Secretary of State September 16, 1996.]

LEGISLATIVE COUNSEL'S DIGEST

AB 298, Rainey. Environmental impact reports: congestion management programs: exemption.

(1) Existing law, the California Environmental Quality Act, requires a public lead agency to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project which it proposes to carry out or approve that may have a significant effect on the environment, as defined, unless the project is exempt from the act. Existing law also requires certain counties to develop, adopt, and annually update a congestion management program.

This bill would exempt a project for the development of a congestion management program from the act and make clarifying changes in related provisions.

The bill would impose a state-mandated local program by imposing new duties on local agencies with regard to determining the applicability of, and filing and posting notice of, the exemption.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The people of the State of California do enact as follows:

SECTION 1. Section 21080 of the Public Resources Code is amended to read:

21080. (a) Except as otherwise provided in this division, this division shall apply to discretionary projects proposed to be carried out or approved by public agencies, including, but not limited to, the enactment and amendment of zoning ordinances, the issuance of zoning variances, the issuance of conditional use permits, and the approval of tentative subdivision maps unless the project is exempt from this division.

(b) This division does not apply to any of the following activities:

(1) Ministerial projects proposed to be carried out or approved by public agencies.

(2) Emergency repairs to public service facilities necessary to maintain service.

(3) Projects undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish, or replace property or facilities damaged or destroyed as a result of a disaster in a disaster-stricken area in which a state of emergency has been proclaimed by the Governor pursuant to Chapter 7 (commencing with Section 8550) of Division 1 of Title 2 of the Government Code.

(4) Specific actions necessary to prevent or mitigate an emergency.

(5) Projects which a public agency rejects or disapproves.

(6) Actions undertaken by a public agency relating to any thermal powerplant site or facility, including the expenditure, obligation, or encumbrance of funds by a public agency for planning, engineering, or design purposes, or for the conditional sale or purchase of equipment, fuel, water (except groundwater), steam, or power for a thermal powerplant, if the powerplant site and related facility will be the subject of an environmental impact report, negative declaration, or other document, prepared pursuant to a regulatory program certified pursuant to Section 21080.5, which will be prepared by the State Energy Resources Conservation and Development Commission, by the Public Utilities Commission, or by the city or county in which the powerplant and related facility would be located if the environmental impact report, negative declaration, or document includes the environmental impact, if any, of the action described in this paragraph.

(7) Activities or approvals necessary to the bidding for, hosting or staging of, and funding or carrying out of, an Olympic games under the authority of the International Olympic Committee, except for the construction of facilities necessary for the Olympic games.

(8) The establishment, modification, structuring, restructuring, or approval of rates, tolls, fares, or other charges by public agencies which the public agency finds are for the purpose of (A) meeting operating expenses, including employee wage rates and fringe benefits, (B) purchasing or leasing supplies, equipment, or materials, (C) meeting financial reserve needs and requirements, (D) obtaining funds for capital projects necessary to maintain service within existing service areas, or (E) obtaining funds necessary to maintain those intracity transfers as are authorized by city charter. The public agency shall incorporate written findings in the record of any proceeding in which an exemption under this paragraph is claimed setting forth with specificity the basis for the claim of exemption.

(9) All classes of projects designated pursuant to Section 21084.

(10) A project for the institution or increase of passenger or commuter services on rail or highway rights-of-way already in use, including modernization of existing stations and parking facilities.

(11) A project for the institution or increase of passenger or commuter service on high-occupancy vehicle lanes already in use, including the modernization of existing stations and parking facilities.

(12) Facility extensions not to exceed four miles in length which are required for the transfer of passengers from or to exclusive public mass transit guideway or busway public transit services.

(13) A project for the development of a regional transportation improvement program, the state transportation improvement program, or a congestion management program prepared pursuant to Section 65089 of the Government Code.

(14) Any project or portion thereof located in another state which will be subject to environmental impact review pursuant to the National Environmental Policy Act of 1969 (42 U.S.C. Sec. 4321 et seq.) or similar state laws of that state. Any emissions or discharges that would have a significant effect on the environment in this state are subject to this division.

(15) Projects undertaken by a local agency to implement a rule or regulation imposed by a state agency, board, or commission under a certified regulatory program pursuant to Section 21080.5. Any site-specific effect of the project which was not analyzed as a significant effect on the environment in the plan or other written documentation required by Section 21080.5 is subject to this division.

(c) If a lead agency determines that a proposed project, not otherwise exempt from this division, would not have a significant effect on the environment, the lead agency shall adopt a negative declaration to that effect. The negative declaration shall be prepared for the proposed project in either of the following circumstances:

(1) There is no substantial evidence, in light of the whole record before the lead agency, that the project may have a significant effect on the environment.

(2) An initial study identifies potentially significant effects on the environment, but (A) revisions in the project plans or proposals made by, or agreed to by, the applicant before the proposed negative declaration and initial study are released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effect on the environment would occur, and (B) there is no substantial evidence, in light of the whole record before the lead agency, that the project, as revised, may have a significant effect on the environment.

(d) If there is substantial evidence, in light of the whole record before the lead agency, that the project may have a significant effect on the environment, an environmental impact report shall be prepared.

(e) (1) For the purposes of this section and this division substantial evidence includes fact, a reasonable assumptior predicated upon fact, or expert opinion supported by fact.

(2) Substantial evidence is not argument, speculation unsubstantiated opinion or narrative, evidence that is clearly inaccurate or erroneous, or evidence of social or economic impacts that do not contribute to, or are not caused by, physical impacts on the environment.

(f) As a result of the public review process for a mitigated negative declaration, including administrative decisions and public hearings, the lead agency may conclude that certain mitigation measures identified pursuant to paragraph (2) of subdivision (c) are infeasible or otherwise undesirable. In those circumstances, the lead agency, prior to approving the project, may delete those mitigation measures and substitute for them other mitigation measures that the lead agency finds, after holding a public hearing on the matter, are equivalent or more effective in mitigating significant effects on the environment to a less than significant level and that do not cause any potentially significant effect on the environment. If those new mitigation measures are made conditions of project approval or are otherwise made part of the project approval, the deletion of the former measures and the substitution of the new mitigation measures shall not constitute an action or circumstance requiring recirculation of the mitigated negative declaration.

(g) Nothing in this section shall preclude a project applicant or any other person from challenging, in an administrative or judicial proceeding, the legality of a condition of project approval imposed by the lead agency. If, however, any condition of project approval set aside by either an administrative body or court was necessary to avoid or lessen the likelihood of the occurrence of a significant effect on the environment, the lead agency's approval of the negative declaration and project shall be invalid and a new environmental review process shall be conducted before the project can be reapproved, unless the lead agency substitutes a new condition that the lead agency finds, after holding a public hearing on the matter, is equivalent to, or more effective in, lessening or avoiding significant effects on the environment and that does not cause any potentially significant effect on the environment.

SEC. 2. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because a local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the program or level of service mandated by this act, within the meaning of Section 17556 of the Government Code.

Notwithstanding Section 17580 of the Government Code, unless otherwise specified, the provisions of this act shall become operative

on the same date that the act takes effect pursuant to the California Constitution.

O

BILL NUMBER: SB 1748 CHAPTERED 09/24/96

CHAPTER 799
FILED WITH SECRETARY OF STATE SEPTEMBER 24, 1996
APPROVED BY GOVERNOR SEPTEMBER 22, 1996
PASSED THE SENATE AUGUST 31, 1996
PASSED THE ASSEMBLY AUGUST 31, 1996
AMENDED IN ASSEMBLY AUGUST 29, 1996
AMENDED IN ASSEMBLY AUGUST 15, 1996
AMENDED IN ASSEMBLY JUNE 10, 1996
AMENDED IN ASSEMBLY MAY 6, 1996
AMENDED IN SENATE APRIL 11, 1996

INTRODUCED BY Committee on Housing and Land Use (Senators Sher (Chairman), Costa, Kopp, Marks, Monteith, and Watson)

FEBRUARY 22, 1996

An act to amend Section 42238 of the Education Code, to amend Sections 65009, 65040.3, 65352, 65920, and 66031 of, to amend and renumber Section 65302.9 of, to add Section 66000.5 to, and to repeal Sections 65035.1 and 65907 of, the Government Code, to amend Sections 18025.5, 18035.1, 18075.5, 18117, 18304, 19825, 33021, 33320.2, 33324, 33367, 33676, and 51622 of, to repeal Section 33030.5 of, and to repeal Article 4 (commencing with Section 33250) of Chapter 3 of Part 1 of Division 24 of, the Health and Safety Code, relating to the Housing and Land Use Omnibus Act of 1996.

LEGISLATIVE COUNSEL'S DIGEST

SB 1748, Committee on Housing and Land Use. Housing and Land Use Omnibus Act of 1996.

Existing law generally regulates, pursuant to separate bodies of law, the areas of land use, housing and redevelopment.

This bill would enact the Housing and Land Use Omnibus Act of 1996 and would state legislative intent to combine several minor statutory changes relating to housing, land use and related topics into a single measure, and would make related findings and declarations.

This bill would designate specified provisions of existing law relating to imposition, adoption, and protest of various fees related to development as the Fee Mitigation Act. The bill would also designate a specific body of existing law as the Permit Streamlining Act.

Existing law relating to local planning provides that any city or county may adopt an ordinance or other regulation governing the issuance of permits for the use of property for occasional commercial filming, as specified.

This bill would specify that the legislative body of the city or county may perform the above function. In addition, the bill would relocate these provisions, to include them among the provisions of existing law relating to zoning.

Under existing law, any action brought in superior court relating to one of several land use related subjects may be subject to a mediation proceeding, as specified.

This bill would add to the potential mediation subjects specified actions relating to the Airport Land Use Commission.

Existing law relating to redevelopment provides that an unblighted noncontiguous area may not be included in a project area, unless the area is being used predominantly for relocation of owners or tenants from other noncontiguous areas in the project area, as specified, or for affordable housing, as specified.

This bill would revise the above criteria, by requiring that an unblighted noncontiguous area in a redevelopment project area be used for relocation purposes, or for the construction or rehabilitation

3160

of affordable housing.

Existing law relating to the California Housing and Infrastructure Finance Agency requires the agency to prepare an annual evaluation report, including an audit, on the agency's program of loan and bond insurance, as specified. Existing law further requires the agency to submit the annual report to the Governor and to each Member of the Legislature, no later than March 31 of each year.

This bill would instead require that the agency obtain an annual audit, but submit the above evaluation report biennially. The bill would require that audit and report be submitted to the chair and vice-chair of the Senate and Assembly housing policy committees, the Senate and Assembly budget committees, and the Joint Legislative Budget Committee, rather than to each Member of the Legislature. The bill would also change the date upon which the report and audit shall be submitted to November 1, annually for the audit, and biennially for the report.

Existing law requires a city or county that imposes a building permit requirement as a condition to constructing, altering, improving, demolishing, or repairing any building or structure to print specified declarations upon a building permit, relating to building project identification, licensed contractors, owner-builders, workers' compensation, and the construction lending agency.

This bill would delete the requirement for printing these declarations upon a building permit, and would create a state-mandated local program by instead requiring the city or county to require these declarations upon the issuance of any building permit.

This bill would also make technical changes to various provisions of existing law relating to statutes of limitations for land use related actions, manufactured housing safety, the duties of the Office of Planning and Research with respect to providing planning information to local jurisdictions and the adoption of redevelopment plans. The bill would eliminate a reference to truck campers in existing law provisions relating to the payment of registration fees for manufactured homes, mobilehomes, and commercial coaches. Additionally, the bill would correct or delete obsolete statutory cross-references, and would delete references in existing law to obsolete reports, and state and federal redevelopment programs.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that no reimbursement is required for a specified reason.

THE PEOPLE OF THE STATE OF CALIFORNIA DO ENACT AS FOLLOWS:

SECTION 1. This act shall be known and may be cited as, the Housing and Land Use Omnibus Act of 1996. The Legislature finds and declares that Californians desire their government to be run efficiently and economically, and that public officials should avoid waste and duplication whenever possible. The Legislature further finds and declares that it desires to control its own operating costs by reducing the number of separate bills affecting housing, land use, and related topics. Therefore, it is the intent of the Legislature in enacting this act to combine several minor, noncontroversial statutory changes relating to housing, land use, and related topics, into a single measure.

SEC. 1.5. Section 42238 of the Education Code is amended to read:

42238. (a) For the 1984-85 fiscal year and each fiscal year thereafter, the county superintendent of schools shall determine a

3161

revenue limit for each school district in the county pursuant to this section.

(b) The base revenue limit for the current fiscal year shall be determined by adding to the base revenue limit for the prior fiscal year the following amounts:

(1) The inflation adjustment specified in Section 42238.1.

(2) For the 1995-96 fiscal year, the equalization adjustment specified in Section 42238.4.

(3) For the 1996-97 fiscal year, the equalization adjustments specified in Sections 42238.41, 42238.42, and 42238.43.

(4) For the 1985-86 fiscal year, the amount received per unit of average daily attendance in the 1984-85 fiscal year pursuant to Section 42238.7.

(5) For the 1985-86, 1986-87, and 1987-88 fiscal years, the amount per unit of average daily attendance received in the prior fiscal year pursuant to Section 42238.8.

(c) Except for districts subject to subdivision (d), the base revenue limit computed pursuant to subdivision (b) shall be multiplied by the district average daily attendance computed pursuant to Section 42238.5.

(d) For districts for which the number of units of average daily attendance determined pursuant to Section 42238.5 is greater for the current fiscal year than for the 1982-83 fiscal year, compute the following amount, in lieu of the amount computed pursuant to subdivision (c):

(1) Multiply the base revenue limit computed pursuant to subdivision (c) by the average daily attendance computed pursuant to Section 42238.5 for the 1982-83 fiscal year.

(2) Multiply the lesser of the amount in subdivision (c) or 1.05 times the statewide average base revenue limit per unit of average daily attendance for districts of similar type for the current fiscal year by the difference between the average daily attendance computed pursuant to Section 42238.5 for the current and 1982-83 fiscal years.

(3) Add the amounts in paragraphs (1) and (2).

(e) The base revenue limit per unit of average daily attendance shall be the lesser of the following amounts:

(1) The amount determined in subdivision (b).

(2) The amount computed pursuant to Section 42238 for the prior fiscal year divided by the prior fiscal year revenue limit average daily attendance times the sum of 1.0 and twice the percentage increase in revenue limits computed pursuant to Section 42238.1 for the current fiscal year.

(f) For districts electing to compute units of average daily attendance pursuant to paragraph (3) of subdivision (a) of Section 42238.5, the amount computed pursuant to Article 4 (commencing with Section 42280) shall be added to the amount computed in subdivision (c) or (d), as appropriate.

(g) For the 1984-85 fiscal year only, the county superintendent shall reduce the total revenue limit computed in this section by the amount of the decreased employer contributions to the Public Employees' Retirement System resulting from enactment of Chapter 330 of the Statutes of 1982, offset by any increase in those contributions, as of the 1983-84 fiscal year, resulting from subsequent changes in employer contribution rates.

The reduction shall be calculated as follows:

(1) Determine the amount of employer contributions that would have been made in the 1983-84 fiscal year if the applicable Public Employees' Retirement System employer contribution rate in effect immediately prior to the enactment of Chapter 330 of the Statutes of 1982 were in effect during the 1983-84 fiscal year.

(2) Subtract from the amount determined in paragraph (1) the greater of subparagraph (A) or (B):

(A) The amount of employer contributions that would have been made in the 1983-84 fiscal year if the applicable Public Employees' Retirement System employer contribution rate in effect immediately after the enactment of Chapter 330 of the Statutes of 1982 were in effect during the 1983-84 fiscal year.

3162

(B) The actual amount of employer contributions made to the Public Employees' Retirement System in the 1983-84 fiscal year.

(3) For purposes of this subdivision, employer contributions to the Public Employees' Retirement System for any of the following shall be excluded from the calculation specified above:

(A) Positions supported totally by federal funds that were subject to supplanting restrictions.

(B) Positions supported by funds received pursuant to Section 42243.6.

(C) Positions supported, to the extent of employer contributions not exceeding twenty-five thousand dollars ($25,000) by any single educational agency, from a revenue source determined on the basis of equity to be properly excludable from the provisions of this subdivision by the Superintendent of Public Instruction with the approval of the Director of Finance.

(4) For accounting purposes, the reduction made by this subdivision may be reflected as an expenditure from appropriate sources of revenue as directed by the Superintendent of Public Instruction.

(h) The Superintendent of Public Instruction shall apportion to each school district the amount determined in this section less the sum of:

(1) The district's property tax revenue received pursuant to Chapter 3 (commencing with Section 75) and Chapter 6 (commencing with Section 95) of Part 0.5 of the Revenue and Taxation Code.

(2) The amount, if any, received pursuant to Part 18.5 (commencing with Section 38101) of the Revenue and Taxation Code.

(3) The amount, if any, received pursuant to Chapter 3 (commencing with Section 16140) of the Government Code.

(4) Prior years' taxes and taxes on the unsecured roll.

(5) Fifty percent of the amount received pursuant to Section 41603.

(6) The amount of motor vehicle license fees distributed pursuant to Section 11003.4 of the Revenue and Taxation Code.

(7) The amount, if any, received pursuant to any provision of the Community Redevelopment Law (Part 1 (commencing with Section 33000) of Division 24 of the Health and Safety Code), except for any amount received pursuant to Section 33401 or 33676 of the Health and Safety Code that is used for land acquisition, facility construction, reconstruction, or remodeling, or deferred maintenance, except for any amount received pursuant to Section 33492.15, paragraph (4) of subdivision (a) of Section 33607.5, or Section 33607.7 of the Health and Safety Code that is allocated exclusively for educational facilities.

(i) This section shall become operative July 1, 1984.

SEC. 2. Section 65009 of the Government Code is amended to read:

65009. (a) (1) The Legislature finds and declares that there currently is a housing crisis in California and it is essential to reduce delays and restraints upon expeditiously completing housing projects.

(2) The Legislature further finds and declares that a legal action challenging a decision of a city, county, or city and county has a chilling effect on the confidence with which property owners and local governments can proceed with projects. Legal actions filed to attack, review, set aside, void, or annul a decision of a city, county, or city and county pursuant to this division can prevent the completion of needed developments even though the projects have received required governmental approvals.

(3) The purpose of this section is to provide certainty for property owners and local governments regarding decisions made pursuant to this division.

(b) (1) In an action or proceeding to attack, review, set aside, void, or annul a finding, determination, or decision of a public agency made pursuant to this title at a properly noticed public hearing, the issues raised shall be limited to those raised in the public hearing or in written correspondence delivered to the public agency prior to, or at, the public hearing, except where the court finds either of the following:

3163

(A) The issue could not have been raised at the public hearing by persons exercising reasonable diligence.

(B) The body conducting the public hearing prevented the issue from being raised at the public hearing.

(2) If a public agency desires the provisions of this subdivision to apply to a matter, it shall include in any public notice issued pursuant to this title a notice substantially stating all of the following: "If you challenge the (nature of the proposed action) in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice, or in written correspondence delivered to the (public entity conducting the hearing) at, or prior to, the public hearing."

(3) The application of this subdivision to causes of action brought pursuant to subdivision (d) applies only to the final action taken in response to the notice to the city or county clerk. If no final action is taken, then the issue raised in the cause of action brought pursuant to subdivision (d) shall be limited to those matters presented at a properly noticed public hearing or to those matters specified in the notice given to the city or county clerk pursuant to subdivision (d), or both.

(c) Except as provided in subdivisions (d) and (i), no action or proceeding shall be maintained in any of the following cases by any person unless the action or proceeding is commenced and service is made on the legislative body within 90 days after the legislative body's decision:

(1) To attack, review, set aside, void, or annul the decision of a legislative body to adopt or amend a general or specific plan. This paragraph does not apply where an action is brought based upon the complete absence of a general plan or a mandatory element thereof, but does apply to an action attacking a general plan or mandatory element thereof on the basis that it is inadequate.

(2) To attack, review, set aside, void, or annul the decision of a legislative body to adopt or amend a zoning ordinance.

(3) To determine the reasonableness, legality, or validity of any decision to adopt or amend any regulation attached to a specific plan.

(4) To attack, review, set aside, void, or annul the decision of a legislative body to adopt, amend, or modify a development agreement. An action or proceeding to attack, review, set aside, void, or annul the decisions of a legislative body to adopt, amend, or modify a development agreement shall only extend to the specific portion of the development agreement that is the subject of the adoption, amendment, or modification. This paragraph applies to development agreements, amendments, and modifications adopted on or after January 1, 1996.

(5) To attack, review, set aside, void, or annul any decision on the matters listed in Sections 65901 and 65903, or to determine the reasonableness, legality, or validity of any condition attached to a variance, conditional use permit, or any other permit.

(6) Concerning any of the proceedings, acts, or determinations taken, done, or made prior to any of the decisions listed in paragraphs (1), (2), (3), (4), and (5).

(d) An action or proceeding shall be commenced and the legislative body served within one year after the accrual of the cause of action as provided in this subdivision, if the action or proceeding meets both of the following requirements:

(1) It is brought in support of the development of housing which meet the requirements for housing for persons and families with low or moderate incomes set forth in Section 65915.

(2) It is brought with respect to actions taken pursuant to Article 10.6 (commencing with Section 65580) of Chapter 3 of this division, pursuant to Section 65589.5, 65863.6, 65915, or 66474.2 or pursuant to Chapter 4.2 (commencing with Section 65913).

A cause of action brought pursuant to this subdivision shall not be maintained until 60 days have expired following notice to the city or county clerk by the party bringing the cause of action, or his or her representative, specifying the deficiencies of the general plan, specific plan, or zoning ordinance. A cause of action brought

pursuant to this subdivision shall accrue 60 days after notice is filed or the legislative body takes a final action in response to the notice, whichever occurs first. A notice or cause of action brought by one party pursuant to this subdivision shall not bar filing of a notice and initiation of a cause of action by any other party.

(e) Upon the expiration of the time limits provided for in this section, all persons are barred from any further action or proceeding.

(f) Notwithstanding Sections 65700 and 65803, or any other provision of law, this section shall apply to charter cities.

(g) Except as provided in subdivision (d), this section shall not affect any law prescribing or authorizing a shorter period of limitation than that specified herein.

(h) Except as provided in paragraph (4) of subdivision (c), this section shall be applicable to those decisions of the legislative body of a city, county, or city and county made pursuant to this division on or after January 1, 1984.

(i) Where the action or proceeding challenges the adequacy of a housing element, the action or proceeding may be initiated up to 60 days following the date the Department of Housing and Community Development reports its findings concerning the housing element pursuant to subdivision (h) of Section 65585.

SEC. 2.5. Section 65035.1 of the Government Code is repealed.

SEC. 3. Section 65040.3 of the Government Code is amended to read:

65040.3. When requested by a local or regional agency, the office may furnish information and technical and professional advice on the preparation, adoption, amendment, and implementation of general plans, specific plans, or other local or regional plans, the preparation, adoption, amendment, and enforcement of regulations, procedures, programs, and legislation required for the implementation of local or regional plans, and information and technical and professional advice concerning planning problems.

SEC. 4. Section 65302.9 of the Government Code is amended and renumbered to read:

65850.1. (a) The legislative body of any city or county may adopt an ordinance or other regulation governing the issuance of permits to engage in the use of property for occasional commercial filming on location. This section shall not limit the discretion of a city or county to limit, condition, or deny the use of property for occasional commercial filming on location to protect the public health, safety, or welfare.

(b) All ordinances and regulations enacted by a city or county regulating by permit the use of property for occasional commercial filming on location shall not be subject to zoning ordinances or other land use regulations of that jurisdiction unless the filming ordinance or regulation expressly states that it is subject to, or governed by, those zoning ordinances or other land use regulations.

(c) The use of property for occasional commercial filming on location engaged in pursuant to a filming permit issued by a city or county shall be permitted in any zone unless the zoning ordinance or other land use regulations of the jurisdiction expressly prohibit filming in that zone.

SEC. 5. Section 65352 of the Government Code is amended to read:

65352. (a) Prior to action by a legislative body to adopt or substantially amend a general plan, the planning agency shall refer the proposed action to all of the following entities:

(1) Any city or county, within or abutting the area covered by the proposal, and any special district that may be significantly affected by the proposed action, as determined by the planning agency.

(2) Any elementary, high school, or unified school district within the area covered by the proposed action.

(3) The local agency formation commission.

(4) Any areawide planning agency whose operations may be significantly affected by the proposed action, as determined by the planning agency.

(5) Any federal agency if its operations or lands within its

jurisdiction may be significantly affected by the proposed action, as determined by the planning agency.

(6) Any public water system, as defined in Section 116275 of the Health and Safety Code, with 3,000 or more service connections, that serves water to customers within the area covered by the proposal. The public water system shall have at least 45 days to comment on the proposed plan, in accordance with subdivision (b), and to provide the planning agency with the information set forth in Section 65352.5.

(7) The Bay Area Air Quality Management District for a proposed action within the boundaries of the district.

(b) Each entity receiving a proposed general plan or amendment of a general plan pursuant to this section shall have 45 days from the date the referring agency mails it or delivers it in which to comment unless a longer period is specified by the planning agency.

(c) (1) This section is directory, not mandatory, and the failure to refer a proposed action to the other entities specified in this section does not affect the validity of the action, if adopted.

(2) To the extent that the requirements of this section conflict with the requirements of Chapter 4.4 (commencing with Section 65919), the requirements of Chapter 4.4 shall prevail.

SEC. 6. Section 65907 of the Government Code is repealed.

SEC. 6.5. Section 65920 of the Government Code is amended to read:

65920. (a) This chapter shall be known and may be cited as the Permit Streamlining Act.

(b) Notwithstanding any other provision of law, the provisions of this chapter shall apply to all public agencies to the extent specified in this chapter, except that the time limits specified in Division 2 (commencing with Section 66410) of Title 7 shall not be extended by operation of this chapter.

SEC. 6.7. Section 66000.5 is added to the Government Code, to read:

66000.5. This chapter, Chapter 6 (commencing with Section 66010), Chapter 7 (commencing with Section 66012), Chapter 8 (commencing with Section 66016), and Chapter 9 (commencing with Section 66020) shall be known and may be cited as the Mitigation Fee Act.

SEC. 7. Section 66031 of the Government Code is amended to read:

66031. (a) Notwithstanding any other provision of law, any action brought in the superior court relating to any of the following subjects may be subject to a mediation proceeding conducted pursuant to this chapter:

(1) The approval or denial by a public agency of any development project.

(2) Any act or decision of a public agency made pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code).

(3) The failure of a public agency to meet the time limits specified in Chapter 4.5 (commencing with Section 65920), commonly known as the Permit Streamlining Act, or in the Subdivision Map Act (Division 2 (commencing with Section 66410)).

(4) Fees determined pursuant to Sections 53080 to 53082, inclusive, or Chapter 4.9 (commencing with Section 65995).

(5) Fees determined pursuant to Chapter 5 (commencing with Section 66000).

(6) The adequacy of a general plan or specific plan adopted pursuant to Chapter 3 (commencing with Section 65100).

(7) The validity of any sphere of influence, urban service area, change of organization or reorganization, or any other decision made pursuant to the Cortese-Knox Local Government Reorganization Act (Division 3 (commencing with Section 56000) of Title 5).

(8) The adoption or amendment of a redevelopment plan pursuant to the Community Redevelopment Law (Part 1 (commencing with Section 33000) of Division 24 of the Health and Safety Code).

(9) The validity of any zoning decision made pursuant to Chapter 4 (commencing with Section 65800).

(10) The validity of any decision made pursuant to Article 3.5 (commencing with Section 21670) of Chapter 4 of Part 1 of Division 9

of the Public Utilities Code.

(b) Within five days after the deadline for the respondent or defendant to file its reply to an action, the court may invite the parties to consider resolving their dispute by selecting a mutually acceptable person to serve as a mediator, or an organization or agency to provide a mediator.

(c) In selecting a person to serve as a mediator, or an organization or agency to provide a mediator, the parties shall consider the following:

(1) The council of governments having jurisdiction in the county where the dispute arose.

(2) Any subregional or countywide council of governments in the county where the dispute arose.

(3) The Office of Permit Assistance within the Trade and Commerce Agency, pursuant to its authority in Article 1 (commencing with Section 15399.50) of Chapter 11 of Part 6.7 of Division 3 of Title 2.

(4) Any other person with experience or training in mediation including those with experience in land use issues, or any other organization or agency which can provide a person with experience or training in mediation, including those with experience in land use issues.

(d) If the court invites the parties to consider mediation, the parties shall notify the court within 30 days if they have selected a mutually acceptable person to serve as a mediator. If the parties have not selected a mediator within 30 days, the action shall proceed. The court shall not draw any implication, favorable or otherwise, from the refusal by a party to accept the invitation by the court to consider mediation. Nothing in this section shall preclude the parties from using mediation at any other time while the action is pending.

SEC. 8. Section 18025.5 of the Health and Safety Code is amended to read:

18025.5. (a) Pursuant to the National Manufactured Housing Construction and Safety Standards Act of 1974 (42 U.S.C. Sec. 5401 et seq.), the department is authorized to assume responsibility for enforcement of manufactured home and mobilehome construction and safety standards relating to any issue with respect to which a federal standard has been established. The department may adopt regulations to ensure acceptance by the Secretary of Housing and Urban Development of California's plan for administration and enforcement of federal manufactured home and mobilehome safety and construction standards.

(b) The department is authorized to conduct inspections and investigations which it determines may be necessary to secure enforcement of this part and regulations adopted pursuant thereto. For the purposes of enforcement of this part and the related regulations, persons duly designated by the director of the department, upon presenting appropriate credentials to the owner, operator, or agent in charge, may:

(1) Enter, at any reasonable times and without advance notice, any factory, warehouse, sales lot, or establishment in which manufactured homes, mobilehomes, recreational vehicles, commercial coaches, or special purpose commercial coaches are manufactured, stored, held for sale, sold, or offered for sale, rent, or lease.

(2) Inspect, at reasonable times and within reasonable limits and in a reasonable manner, any factory, warehouse, sales lot, or establishment, and inspect the books, papers, records, and documents to ensure compliance with this part.

SEC. 9. Section 18035.1 of the Health and Safety Code is amended to read:

18035.1. (a) As a part of the documents executed for every transaction by or through a dealer to sell or lease with the option to buy a new or used manufactured home or mobilehome, the dealer and purchaser shall sign a receipt for deposit, a copy of which shall be provided to the purchaser and a copy shall be retained by the dealer for not less than three years. It shall state at least the following in type not less than 6-point type size:

3167

(1) A statement that the purchaser shall receive a copy of the purchase contract and receipt for deposit.

(2) A statement that all portions of the purchase documents and receipt for deposit shall be completed prior to obtaining the purchaser's signature.

(3) A statement of the specific amounts of the deposit, downpayment, or other category of funds required to be placed in escrow prior to closing, and a warning that the deposit may be withheld in escrow in case of a dispute between the purchaser and the dealer.

(4) A statement that the amounts of the deposit and downpayment shall be agreed upon by the purchaser and dealer and shall have been entered on the purchase documents and receipt of deposit prior to the purchaser's signing.

(5) Sections 18035, 18035.1, and 18035.3 of this code and Section 1797.3 of the Civil Code reprinted in their entirety.

(6) A statement that any oral promises or commitments that have been made are not binding unless they appear in writing on the purchase documents.

(7) A warning that a warranty document complying with Section 1797.3 of the Civil Code shall be provided to the purchaser of a new manufactured home or mobilehome immediately after signing the purchase documents.

(8) A statement that the terms and duration of any other warranty, not required by law, offered by the dealer shall be in writing.

(9) A statement that, if the purchaser has any complaints with respect to sales practices, delivery, warranty, or other matters related to the manufactured home or mobilehome, he or she may seek administrative relief from the department or legal relief in a court of competent jurisdiction.

(10) A statement that the sale will not be complete until the escrow for the sale closes.

(b) For the sale of a manufactured home or mobilehome not subject to registration by the department, the dealer shall provide a statement of fact, in type not less than 6-point type size, containing the information specified in paragraphs (6), (7), (8), (9), and (10) of subdivision (a) as part of the purchase documents.

(c) Where the sale of a new or used manufactured home or mobilehome subject to registration under this part does not involve a dealer, the department, by regulation, may require the seller and buyer to execute a receipt for deposit containing whatever information of the nature described in this section, the department deems appropriate.

SEC. 10. Section 18075.5 of the Health and Safety Code is amended to read:

18075.5. Manufactured homes, mobilehomes, commercial coaches, and floating homes sold or used within this state shall be subject to annual registration with the department and payment of registration fees prescribed by Section 18114 except as follows:

(a) Manufactured homes, mobilehomes, and floating homes subject to local property taxation pursuant to Part 13 (commencing with Section 5800) of Division 1 of the Revenue and Taxation Code, and not installed on foundation systems pursuant to Section 18551, shall be subject to registration and payment of fees and penalties prescribed by Section 18114 at the time of original registration with the department, and upon subsequent sale, resale, or transfer of title. For purposes of this section, a transfer of title includes, but is not limited to, any change, addition, or deletion of one or more registered owners, legal owners, or junior lienholders.

(b) Manufactured homes, mobilehomes, and commercial coaches installed or to be installed on foundation systems pursuant to Section 18551 shall be exempt from registration so long as they remain affixed to the foundation system. In the event that the manufactured home, mobilehome, or commercial coach, is removed from a foundation system for any purpose other than dismantling or reinstallation on a foundation system, it shall be immediately subject to registration with the department.

(c) Except as otherwise provided in subdivisions (d) and (e), registration of a manufactured home, mobilehome, or commercial coach previously registered in another state is due 20 days after the date of entry into California and is delinquent if application is not made and any fees due are not paid within 40 days after that date of entry.

(d) Any member of the armed forces, whether a resident or nonresident, shall also be entitled to exemption from registration with respect to a manufactured home or mobilehome owned by the person upon which there is displayed a valid registration issued for the manufactured home or mobilehome by the owner's home state of residence or by a foreign jurisdiction where the owner was regularly assigned and stationed for duty by competent military orders at the time the registration was issued. Competent military orders shall not include military orders for leave, for temporary duty, nor for any other assignment of any nature requiring the owner's presence outside the foreign jurisdiction where the owner was regularly assigned and stationed for duty.

(e) Any person who enters California for the purpose of establishing or reestablishing residence or accepting gainful employment following his or her discharge from the armed forces of this country may occupy a manufactured home or mobilehome owned by that person at the time of his or her discharge and registered to him or her in a foreign jurisdiction where his or her military orders required his or her presence without registering the manufactured home or mobilehome in this state until the expiration of the registration period current at the time of his or her discharge and entrance into California.

(f) Any new and previously unregistered, unoccupied manufactured home, mobilehome, or commercial coach which is part of an inventory held for sale by a manufacturer or dealer in the course of business.

The department may adopt regulations for exempting additional classes of manufactured homes, mobilehomes, and commercial coaches from registration under a temporary or one-trip permit system which permits the lawful transportation and use of manufactured homes, mobilehomes, and commercial coaches not otherwise subject to registration.

(g) Floating homes, which are subject to local property taxation, as prescribed by Section 229 of the Revenue and Taxation Code, shall be subject to registration at the time of sale and upon any subsequent sale, resale, or transfer of title. Floating homes are subject to the fees prescribed by subdivision (c) of Section 18114 upon registration or reregistration.

SEC. 11. Section 18117 of the Health and Safety Code is amended to read:

18117. An application for registration under this part of a manufactured home, mobilehome, or commercial coach previously registered outside of this state shall be accompanied by payment of the amount required to be paid under Part 1 (commencing with Section 6001) of Division 2 of the Revenue and Taxation Code with respect to the use of the manufactured home, mobilehome, or commercial coach by the applicant.

SEC. 12. Section 18304 of the Health and Safety Code is amended to read:

18304. (a) This part does not apply to any apartment house, hotel, or dwelling which is subject to the provisions of Part 1.5 (commencing with Section 17910) of this division.

(b) This part does not apply to electric, gas, or water facilities owned, operated, and maintained by a public utility.

SEC. 12.5. Section 19825 of the Health and Safety Code is amended to read:

19825. (a) Every city or county that requires the issuance of a permit as a condition precedent to the construction, alteration, improvement, demolition, or repair of any building or structure shall, in addition to any other requirements, require the following declarations in substantially the following form upon the issuance of any building permit:

BUILDING PROJECT IDENTIFICATION

Applicant's Mailing Address _____

_____

Address of Building _____

_____

Owner's Name if known _____

Telephone No. _____

Contractor's Name _____

Contractor's Mailing Address _____

_____

Lic. No. _____

Architect or Engineer _____

Architect's or Engineer's Address _____

Lic. No. _____

In addition the city or county may require that there be included in the building project identification portion of a building permit, the following:

Assessor's Parcel Number* _____

Permit date _____

Permit number _____

Description of work _____

Building permit valuation _____

*To be entered by issuing agency.

LICENSED CONTRACTORS DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class _____ Lic. No. _____

Date _____ Contractor _____

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

(_) I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the

3170

owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

(_) I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.).

(_) I am exempt under Sec. ____, B.&P.C. for this reason _____

Date _____ Owner _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

___ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

___ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier _____

Policy Number _____

(This section need not be completed if the permit is for one hundred dollars ($100) or less).

___ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: _____ Applicant: _____

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Signature of Applicant or Agent Date

(b) The Contractors' State License Board shall semiannually compile and distribute to city, county, and city and county building departments a list of all contractors who did not secure payment of compensation in compliance with Article 1 (commencing with Section 3700) of Chapter 4 of Part 1 of Division 4 of the Labor Code during any period for which workers were employed during the preceding six months.

SEC. 13. Section 33021 of the Health and Safety Code is amended to read:

33021. Redevelopment includes:

(a) The alteration, improvement, modernization, reconstruction, or rehabilitation, or any combination of these, of existing structures in a project area.

(b) Provision for open-space types of use, such as streets and other public grounds and space around buildings, and public or private buildings, structures and improvements, and improvements of public or private recreation areas and other public grounds.

(c) The replanning or redesign or original development of undeveloped areas as to which either of the following conditions exist.

(1) The areas are stagnant or improperly utilized because of defective or inadequate street layout, faulty lot layout in relation to size, shape, accessibility, or usefulness, or for other causes.

(2) The areas require replanning and land assembly for reclamation or development in the interest of the general welfare because of widely scattered ownership, tax delinquency, or other reasons.

SEC. 14. Section 33030.5 of the Health and Safety Code is repealed.

SEC. 15. Article 4 (commencing with Section 33250) of Chapter 3 of Part 1 of Division 24 of the Health and Safety Code is repealed.

SEC. 16. Section 33320.2 of the Health and Safety Code is amended to read:

33320.2. (a) The area included within a project and a project area may be either contiguous or noncontiguous. All noncontiguous areas of a project area shall be either blighted or necessary for effective redevelopment. An unblighted, noncontiguous area shall be conclusively deemed necessary for effective redevelopment if that area is being used predominantly for:

(1) The relocation of owners or tenants from other noncontiguous areas in the same project area or from other project areas in the community.

(2) The construction and rehabilitation of low- or moderate-income housing.

(b) An unblighted, noncontiguous area shall be deemed not necessary for effective redevelopment if that area is included for the purpose of obtaining the allocation of taxes from such area pursuant to Section 33670 without other substantial justification for its inclusion.

(c) The redevelopment agency shall not use the power of eminent domain for acquisition of property, other than vacant land, in noncontiguous, unblighted areas.

SEC. 17. Section 33324 of the Health and Safety Code is amended to read:

33324. A preliminary plan need not be detailed and is sufficient if it:

(a) Describes the boundaries of the project area.

(b) Contains a general statement of the land uses, layout of principal streets, population densities and building intensities, and standards proposed as the basis for the redevelopment of the project area.

3172

(c) Shows how the purposes of this part would be attained by redevelopment.
(d) Shows that the proposed redevelopment is consistent with the community's general plan.
(e) Describes, generally, the impact of the project upon the area's residents and upon the surrounding neighborhood.
SEC. 18. Section 33367 of the Health and Safety Code is amended to read:
33367. The ordinance shall contain all of the following:
(a) The purposes and intent of the legislative body with respect to the project area.
(b) The plan incorporated by reference.
(c) A designation of the approved plan as the official redevelopment plan of the project area.
(d) The findings and determinations of the legislative body that:

(1) The project area is a blighted area, the redevelopment of which is necessary to effectuate the public purposes declared in this part.
(2) The redevelopment plan would redevelop the area in conformity with this part and in the interests of the public peace, health, safety, and welfare.
(3) The adoption and carrying out of the redevelopment plan is economically sound and feasible.
(4) The redevelopment plan is consistent with the general plan of the community, including, but not limited to, the community's housing element, which substantially complies with the requirements of Article 10.6 (commencing with Section 65580) of Chapter 3 of Division 1 of Title 7 of the Government Code.
(5) The carrying out of the redevelopment plan would promote the public peace, health, safety, and welfare of the community and would effectuate the purposes and policy of this part.
(6) The condemnation of real property, if provided for in the redevelopment plan, is necessary to the execution of the redevelopment plan and adequate provisions have been made for payment for property to be acquired as provided by law.
(7) The agency has a feasible method or plan for the relocation of families and persons displaced from the project area, if the redevelopment plan may result in the temporary or permanent displacement of any occupants of housing facilities in the project area.
(8) (A) There are, or shall be provided, in the project area or in other areas not generally less desirable in regard to public utilities and public and commercial facilities and at rents or prices within the financial means of the families and persons displaced from the project area, decent, safe, and sanitary dwellings equal in number to the number of and available to the displaced families and persons and reasonably accessible to their places of employment.
(B) Families and persons shall not be displaced prior to the adoption of a relocation plan pursuant to Sections 33411 and 33411.1.
Dwelling units housing persons and families of low or moderate income shall not be removed or destroyed prior to the adoption of a replacement housing plan pursuant to Sections 33334.5, 33413, and 33413.5.
(9) All noncontiguous areas of a project area are either blighted or necessary for effective redevelopment and are not included for the purpose of obtaining the allocation of taxes from the area pursuant to Section 33670 without other substantial justification for their inclusion.
(10) Inclusion of any lands, buildings, or improvements which are not detrimental to the public health, safety, or welfare is necessary for the effective redevelopment of the area of which they are a part; that any area included is necessary for effective redevelopment and is not included for the purpose of obtaining the allocation of tax increment revenues from the area pursuant to Section 33670 without other substantial justification for its inclusion.
(11) The elimination of blight and the redevelopment of the project area could not be reasonably expected to be accomplished by

private enterprise acting alone without the aid and assistance of the agency.

(12) The project area is predominantly urbanized, as defined by subdivision (b) of Section 33320.1.

(13) The time limitation and, if applicable, the limitation on the number of dollars to be allocated to the agency that are contained in the plan are reasonably related to the proposed projects to be implemented in the project area and to the ability of the agency to eliminate blight within the project area.

(e) A statement that the legislative body is satisfied that permanent housing facilities will be available within three years from the time occupants of the project area are displaced and that, pending the development of the facilities, there will be available to the displaced occupants adequate temporary housing facilities at rents comparable to those in the community at the time of their displacement.

SEC. 19. Section 33676 of the Health and Safety Code is amended to read:

33676. (a) Prior to the adoption by the legislative body of a redevelopment plan providing for tax increment financing pursuant to Section 33670, any affected taxing agency may elect to be allocated, and every school district and community college district shall be allocated, in addition to the portion of taxes allocated to the affected taxing agency pursuant to subdivision (a) of Section 33670, all or any portion of the tax revenues allocated to the agency pursuant to subdivision (b) of Section 33670 attributable to one or more of the following:

(1) Increases in the rate of tax imposed for the benefit of the taxing agency which levy occurs after the tax year in which the ordinance adopting the redevelopment plan becomes effective.

(2) If an agency pursuant to Section 33354.5 amends a redevelopment plan which does not utilize tax increment financing to add tax increment financing, and pursuant to subdivision (a) of Section 33670 uses the assessment roll last equalized prior to the effective date of the ordinance originally adopting the redevelopment plan, an affected taxing agency may elect to be allocated all or any portion of the tax revenues allocated to the agency pursuant to subdivision (b) of Section 33670 which the affected taxing agency would receive if the agency were to use the assessment roll last equalized prior to the effective date of the ordinance amending the redevelopment plan to add tax increment financing.

(b) (1) Any local education agency that is a basic aid district or office at the time the ordinance adopting a redevelopment plan is adopted and that receives no state funding, other than that provided pursuant to Section 6 of Article IX of the California Constitution, pursuant to Section 2558, 42238, or 84751, as appropriate, of the Education Code, shall receive annually its percentage share of the property taxes from the project area allocated among all of the affected taxing entities during the fiscal year the funds are allocated, increased by an amount equal to the lesser of the following:

(A) The percentage growth in assessed value that occurs throughout the district, excluding the portion of the district within the redevelopment project area.

(B) Eighty percent of the growth in assessed value that occurs within the portion of the district within the redevelopment project area.

(2) Subparagraphs (A) and (B) of paragraph (1) shall not apply to a redevelopment plan adopted by the legislative body of a community if both of the following occur:

(A) The median household income in the community in which the redevelopment project area is located is less than 80 percent of the median household income in the county in which the redevelopment project area is located.

(B) The preliminary plan for the redevelopment plan was adopted on or before September 1, 1993, and the redevelopment plan was adopted on or before August 1, 1994.

(3) Any local education agency that is a basic aid district or

3174

office at the time the ordinance amending a redevelopment plan is adopted pursuant to Section 33607.7 and that receives no state funding, other than that provided pursuant to Section 6 of Article IX of the California Constitution, pursuant to Section 2558, 42238, or 84751, as appropriate, of the Education Code, shall receive either of the following:

(A) If an agreement exists that requires payments to the basic aid district, the amount required to be paid by an agreement between the agency and the basic aid district entered into prior to January 1, 1994.

(B) If an agreement does not exist, the percentage share of the increase in property taxes from the project area allocated among all of the affected taxing entities during the fiscal year the funds in the project area are allocated, derived from 80 percent of the growth in assessed value that occurs within the portion of the district within the redevelopment project area from the year in which the amendment takes effect pursuant to subdivision (c) of Section 33607.7.

(4) The redevelopment agency shall subtract from any payments made pursuant to this section the amount that a basic aid district receives pursuant to Sections 33607.5 and 33607.7 for the purposes of either paragraph (1) of subdivision (h) of Section 42238 of the Education Code or either Section 2558 or 84751 of the Education Code.

(c) The governing body of any affected taxing agency, other than a school district and a community college district, electing to receive allocation of taxes pursuant to this section in addition to taxes allocated to it pursuant to subdivision (a) of Section 33670 shall adopt a resolution to that effect and transmit the same, prior to the adoption of the redevelopment plan, to (1) the legislative body, (2) the agency, and (3) the official or officials performing the functions of levying and collecting taxes for the affected taxing agency. Upon receipt by the official or officials of the resolution, allocation of taxes pursuant to this section to the affected taxing agency which has elected to receive the allocation pursuant to this section by the adoption of the resolution and allocation of taxes pursuant to this section to every school district and community college district shall be made at the time or times allocations are made pursuant to subdivision (a) of Section 33670.

(d) An affected taxing agency, at any time after the adoption of the resolution, may elect not to receive all or any portion of the additional allocation of taxes pursuant to this section by rescinding the resolution or by amending the same, as the case may be, and giving notice thereof to the legislative body, the agency, and the official or officials performing the functions of levying and collecting taxes for the affected taxing agency. After receipt of a notice by the official or officials that an affected taxing agency has elected not to receive all or a portion of the additional allocation of taxes by rescission or amendment of the resolution, any allocation of taxes to the affected taxing agency required to be made pursuant to this section shall not thereafter be made but shall be allocated to the agency and the affected taxing agency shall thereafter be allocated only the portion of taxes provided for in subdivision (a) of Section 33670. After receipt of a notice by the official or officials that an affected taxing agency has elected to receive additional tax revenues attributable to only a portion of the increases in the rate of tax, only that portion of the tax revenues shall thereafter be allocated to the affected taxing agency in addition to the portion of taxes allocated pursuant to subdivision (a) of Section 33670, and the remaining portion thereof shall be allocated to the agency.

(e) As used in this section, "affected taxing agency" means and includes every public agency for the benefit of which a tax is levied upon property in the project area, whether levied by the public agency or on its behalf by another public agency.

(f) This section shall apply only to redevelopment projects for which a final redevelopment plan is adopted pursuant to Article 5

3175

(commencing with Section 33360) of Chapter 4 on or after January 1, 1977.

SEC. 20. Section 51622 of the Health and Safety Code is amended to read:

51622. (a) The agency may contract with any private person or public agency for review of the administration of this part and for assistance in implementing this part.

(b) The agency shall prepare a biennial report on the condition of the program of loan and bond insurance authorized by this part. The report of the evaluation shall include an evaluation of program effectiveness in relation to cost and shall include recommendations and suggested legislation for the improvement of the program, if any.

The agency shall obtain an annual audit of the insurance fund's books and accounts with respect to its activities under this part to be made at least once for each calendar year by an independent certified public accountant. A copy of the annual audit and biennial report shall be transmitted to the Governor, to the chairperson and vice-chairperson of the Senate and Assembly housing policy committees, the Senate and Assembly budget committees, and the Joint Legislative Budget Committee, and made available for review by interested parties no later than November 1 of each year for the annual audit, and November 1 biennially for the program evaluation report.

SEC. 21. No reimbursement is required by Section 12.5 of this act pursuant to Section 6 of Article XIIIB of the California Constitution because the local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the program or level of service mandated by Section 12 of this act.

Notwithstanding Section 17580 of the Government Code, unless otherwise specified, the provisions of this act shall become operative on the same date that the act takes effect pursuant to the California Constitution.

Assembly Bill No. 175

CHAPTER 415

An act to amend Sections 21080.4, 21080.14, and 21153 of the Public Resources Code, relating to environmental quality.

[Approved by Governor September 21, 1997. Filed with Secretary of State September 22, 1997.]

LEGISLATIVE COUNSEL'S DIGEST

AB 175, Torlakson. Environmental quality: development projects: notification.

Existing law, the California Environmental Quality Act, requires a state or local lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project that it proposes to carry out or approve that may have a significant effect on the environment, as defined.

The act exempts specified development projects of not more than 45 units.

This bill would apply that exemption to those projects of not more than 100 units, and make related changes.

The bill would require the Office of Planning and Research to ensure that affected agencies are notified regarding early consultation requested by a lead agency with respect to certain projects, and meetings that are requested with respect to certain of those projects.

The people of the State of California do enact as follows:

SECTION 1. Section 21080.4 of the Public Resources Code is amended to read:

21080.4. (a) If a lead agency determines that an environmental impact report is required for a project, the lead agency shall immediately send notice of that determination by certified mail or an equivalent procedure to each responsible agency and to those public agencies having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California. Upon receipt of the notice, each responsible agency and each public agency having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California shall specify to the lead agency the scope and content of the environmental information that is germane to the statutory responsibilities of that responsible agency or public agency in connection with the proposed project and which, pursuant to the requirements of this division, shall be included in the environmental

impact report. The information shall be specified in writing and shall be communicated to the lead agency by certified mail or equivalent procedure not later than 30 days after the date of receipt of the notice of the lead agency's determination. The lead agency shall request similar guidance from appropriate federal agencies.

(b) To expedite the requirements of subdivision (a), the lead agency or any responsible agency or public agency having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California may request one or more meetings between representatives of those agencies for the purpose of assisting the lead agency to determine the scope and content of the environmental information that any of those responsible agencies or public agencies may require. In the case of a project described in subdivision (c) of Section 21065, the request may also be made by the project applicant. The meetings shall be convened by the lead agency as soon as possible, but not later than 30 days after the date that the meeting was requested.

(c) To expedite the requirements of subdivision (a), the Office of Planning and Research, upon request of a lead agency, shall assist the lead agency in determining the various responsible agencies, public agencies having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California, and any federal agencies that have responsibility for carrying out or approving a proposed project. In the case of a project described in subdivision (c) of Section 21065, such a request may also be made by the project applicant.

(d) If a state agency is a responsible agency or a public agency having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California, subject to the requirements of subdivision (a), the Office of Planning and Research shall ensure that the information required by subdivision (a) is transmitted to the lead agency, and that affected agencies are notified regarding meetings to be held upon request pursuant to subdivision (b), within the required time period.

SEC. 2. Section 21080.14 of the Public Resources Code is amended to read:

21080.14. (a) Except as provided in subdivision (c), this division does not apply to any development project that consists of the construction, conversion, or use of residential housing consisting of not more than 100 units in an urbanized area that is affordable to lower income households, as defined in Section 50079.5 of the Health and Safety Code, if the developer of the development project provides sufficient legal commitments to the appropriate local agency to ensure the continued availability and use of the housing units for lower income households for a period of at least 15 years, or that is affordable to low- and moderate-income households, as defined in paragraph (2) of subdivision (h) of Section 65589.5 of the

Government Code, if the developer of the development project provides sufficient legal commitments to the appropriate local agency to ensure the continued availability and use of the housing units for low- and moderate-income households at monthly housing costs as determined pursuant to paragraph (2) of subdivision (h) of Section 65589.5 of the Government Code, the developer provides sufficient legal commitments to ensure continued availability of units for the lower income households for 30 years as provided in paragraph (3) of subdivision (h) of Section 65589.5 of the Government Code, and the development project meets all of the following requirements:

(1) The development project is consistent with the jurisdiction's general plan or any applicable specific plan or local coastal program as it existed on the date that the application was deemed complete.

(2) The development project is consistent with the zoning designation, as specified in the zoning ordinance as it existed on the date that the application was deemed complete, unless the zoning is inconsistent with the general plan because the local agency has not rezoned the property to bring it into conformity with the general plan.

(3) The project site is an infill site that has been previously developed for urban uses, or the immediately contiguous properties surrounding the project site are, or previously have been, developed for urban uses.

(4) The project site is not more than five acres in area.

(5) The project site can be adequately served by utilities.

(6) The project site has no value as a wildlife habitat.

(7) The project site is not included on any list of facilities and sites compiled pursuant to Section 65962.5 of the Government Code.

(8) The project site is subject to an assessment prepared by a California registered environmental assessor to determine the presence of hazardous contaminants on the site and the potential for exposure of site occupants to significant health hazards from nearby properties and activities. If hazardous contaminants on the site are found, the contaminants shall be removed or any significant effects of those contaminants shall be mitigated to a level of insignificance. If the potential for exposure to significant health hazards from surrounding properties or activities is found to exist, the effects of the potential exposure shall be mitigated to a level of insignificance.

(9) The project will not involve the demolition of, or any substantial adverse change in, any district, landmark, object, building, structure, site, area, or place that is listed, or determined to be eligible for listing, in the California Register of Historical Resources.

(b) As used in subdivision (a), "urbanized area" means an area that has a population density of at least 1,000 persons per square mile.

(c) Notwithstanding subdivision (a), this division does apply to a development project described in subdivision (a) if there is a reasonable possibility that the development project would have a significant effect on the environment or the residents of the development project due to unusual circumstances or due to related or cumulative impacts of reasonably foreseeable projects in the vicinity of the development project.

SEC. 3. Section 21153 of the Public Resources Code is amended to read:

21153. (a) Prior to completing an environmental impact report, every local lead agency shall consult with, and obtain comments from, each responsible agency, any public agency that has jurisdiction by law with respect to the project, and any city or county that borders on a city or county within which the project is located unless otherwise designated annually by agreement between the local lead agency and the city or county, and may consult with any person who has special expertise with respect to any environmental impact involved. In the case of a project described in subdivision (c) of Section 21065, the local lead agency shall, upon the request of the project applicant, provide for early consultation to identify the range of actions, alternatives, mitigation measures, and significant effects to be analyzed in depth in the environmental impact report. The local lead agency may consult with persons identified by the project applicant that the applicant believes will be concerned with the environmental effects of the project and may consult with members of the public who have made written request to be consulted on the project. A request by the project applicant for early consultation shall be made not later than 30 days after the date that the determination required by Section 21080.1 was made with respect to the project. The local lead agency may charge and collect a fee from the project applicant in an amount that does not exceed the actual costs of the consultations.

(b) In the case of a project described in subdivision (a) of Section 21065, the lead agency may provide for early consultation to identify the range of actions, alternatives, mitigation measures, and significant effects to be analyzed in depth in the environmental impact report. At the request of the lead agency, the Office of Planning and Research shall ensure that each responsible agency, and any public agency that has jurisdiction by law with respect to the project, is notified regarding any early consultation.

(c) A responsible agency or other public agency shall only make substantive comments regarding those activities involved in a project that are within an area of expertise of the agency or that are required to be carried out or approved by the agency. Those comments shall be supported by specific documentation.

O

Assembly Bill No. 1807

CHAPTER 738

An act to amend Sections 21080.4 and 21081.7 of the Public Resources Code, relating to environmental quality.

[Approved by Governor September 25, 2000. Filed with Secretary of State September 27, 2000.]

LEGISLATIVE COUNSEL'S DIGEST

AB 1807, Longville. California Environmental Quality Act: Department of Transportation.

(1) Under the existing California Environmental Quality Act (CEQA), if a lead agency determines that an environmental impact report is required, the lead agency is immediately required to send notice of that determination to each responsible agency, and those public agencies having jurisdiction by law over natural resources affected by the project. Existing law then requires those agencies to participate in the environmental review process, as specified.

Under this bill, if the lead agency determines that an environmental impact report is required, the lead agency would also be required to send notice to the Office of Planning and Research.

Existing law requires that transportation information resulting from a specified reporting or monitoring program required to be adopted by a public agency be submitted to the transportation planning agency in the region when the project has impacts that are of statewide, regional, or areawide significance.

This bill would also require the submission of the transportation information to the Department of Transportation under those circumstances.

By imposing new duties on local lead agencies, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The people of the State of California do enact as follows:

SECTION 1. Section 21080.4 of the Public Resources Code is amended to read:

21080.4. (a) If a lead agency determines that an environmental impact report is required for a project, the lead agency shall

immediately send notice of that determination by certified mail or an equivalent procedure to each responsible agency, the Office of Planning and Research, and those public agencies having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California. Upon receipt of the notice, each responsible agency, the office, and each public agency having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California shall specify to the lead agency the scope and content of the environmental information that is germane to the statutory responsibilities of that responsible agency, the office, or the public agency in connection with the proposed project and which, pursuant to the requirements of this division, shall be included in the environmental impact report. The information shall be specified in writing and shall be communicated to the lead agency by certified mail or equivalent procedure not later than 30 days after the date of receipt of the notice of the lead agency's determination. The lead agency shall request similar guidance from appropriate federal agencies.

(b) To expedite the requirements of subdivision (a), the lead agency, any responsible agency, the Office of Planning and Research, or a public agency having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California, may request one or more meetings between representatives of those agencies and the office for the purpose of assisting the lead agency to determine the scope and content of the environmental information that any of those responsible agencies, the office, or the public agencies may require. In the case of a project described in subdivision (c) of Section 21065, the request may also be made by the project applicant. The meetings shall be convened by the lead agency as soon as possible, but not later than 30 days after the date that the meeting was requested.

(c) To expedite the requirements of subdivision (a), the Office of Planning and Research, upon request of a lead agency, shall assist the lead agency in determining the various responsible agencies, public agencies having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California, and any federal agencies that have responsibility for carrying out or approving a proposed project. In the case of a project described in subdivision (c) of Section 21065, that request may also be made by the project applicant.

(d) With respect to the Department of Transportation, and with respect to any state agency that is a responsible agency or a public agency having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California, subject to the requirements of subdivision (a), the Office of Planning and Research shall ensure that the information required

by subdivision (a) is transmitted to the lead agency, and that affected agencies are notified regarding meetings to be held upon request pursuant to subdivision (b), within the required time period.

SEC. 2. Section 21081.7 of the Public Resources Code is amended to read:

21081.7. Transportation information resulting from the reporting or monitoring program required to be adopted by a public agency pursuant to Section 21081.6 shall be submitted to the transportation planning agency in the region where the project is located and to the Department of Transportation when the project has impacts that are of statewide, regional, or areawide significance according to criteria developed pursuant to Section 21083. The transportation planning agency and the Department of Transportation shall adopt guidelines for the submittal of those reporting or monitoring programs.

SEC. 3. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because a local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the program or level of service mandated by this act, within the meaning of Section 17556 of the Government Code.

O

Assembly Bill No. 1532

CHAPTER 867

An act to amend Sections 21081.7, 21083.9, and 21092.2 of the Public Resources Code, relating to environmental quality.

[Approved by Governor October 13, 2001. Filed with Secretary of State October 14, 2001.]

LEGISLATIVE COUNSEL'S DIGEST

AB 1532, Pavley. Environmental quality.

(1) The existing California Environmental Quality Act (CEQA) requires that transportation information resulting from the reporting or monitoring program required to be adopted by a public agency pursuant to a specified provision of CEQA be submitted to the transportation planning agency in the region where the project is located and to the Department of Transportation when the project has impacts that are of statewide, regional, or areawide significance according to specified criteria.

This bill would require that the transportation information be submitted to the transportation planning agency in the region where the project is located and to the Department of Transportation for a project of statewide, regional, or areawide significance according to specified criteria.

(2) CEQA further requires that a lead agency call at least one scoping meeting for a proposed project that may affect highways or other facilities under the jurisdiction of the Department of Transportation if the meeting is requested by the department. CEQA authorizes a lead agency to charge and collect a reasonable fee from any person proposing a project to recover the estimated costs incurred by the lead agency in preparing a negative declaration or environmental impact report and for procedures necessary to comply with CEQA for the project. Existing law requires specified notices to be mailed to any person who has filed a written request for notices with either the clerk of the governing body or, if there is no governing body, the director of the agency.

This bill would additionally require a lead agency to call at least one scoping meeting for a project of statewide, regional, or areawide significance and would require the lead agency to provide notice of the scoping meeting to specified entities, thereby imposing a state-mandated local program.

The bill would require a lead agency to mail the notice of the scoping meeting to a person who has filed a written request for notices with specified entities.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The people of the State of California do enact as follows:

SECTION 1. Section 21081.7 of the Public Resources Code is amended to read:

21081.7. Transportation information resulting from the reporting or monitoring program required to be adopted by a public agency pursuant to Section 21081.6 shall be submitted to the transportation planning agency in the region where the project is located and to the Department of Transportation for a project of statewide, regional, or areawide significance according to criteria developed pursuant to Section 21083. The transportation planning agency and the Department of Transportation shall adopt guidelines for the submittal of those reporting or monitoring programs.

SEC. 2. Section 21083.9 of the Public Resources Code is amended to read:

21083.9. (a) Notwithstanding Section 21080.4, 21104, or 21153, a lead agency shall call at least one scoping meeting for any of the following:

(1) A proposed project that may affect highways or other facilities under the jurisdiction of the Department of Transportation if the meeting is requested by the department. The lead agency shall call the scoping meeting as soon as possible, but not later than 30 days after receiving the request from the Department of Transportation.

(2) A project of statewide, regional, or areawide significance.

(b) The lead agency shall provide notice of at least one scoping meeting held pursuant to paragraph (2) of subdivision (a) to all of the following:

(1) Any county or city that borders on a county or city within which the project is located, unless otherwise designated annually by agreement between the lead agency and the county or city.

(2) Any responsible agency.

(3) Any public agency that has jurisdiction by law with respect to the project.

(4) Any organization or individual who has filed a written request for the notice.

(c) For any entity, organization, or individual that is required to be provided notice of a lead agency public meeting, the requirement for notice of a scoping meeting pursuant to subdivision (b) may be met by including the notice of a scoping meeting in the public meeting notice.

SEC. 3. Section 21092.2 of the Public Resources Code is amended to read:

21092.2. The notices required pursuant to Sections 21080.4, 21083.9, 21092, 21108, and 21152 shall be mailed to any person who has filed a written request for notices with either the clerk of the governing body or, if there is no governing body, the director of the agency. The request may also be filed with any other person designated by the governing body or director to receive these requests. The agency may require requests for notices to be annually renewed. The public agency may charge a fee, except to other public agencies, that is reasonably related to the costs of providing this service. This section may not be construed in any manner that results in the invalidation of an action because of the failure of a person to receive a requested notice, provided that there has been substantial compliance with the requirements of this section.

SEC. 4. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because a local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the program or level of service mandated by this act, within the meaning of Section 17556 of the Government Code.

O

STATE AGENCIES—INFRASTRUCTURE—FUNDS

CHAPTER 1016

A.B. No. 857

AN ACT to amend Sections 13102, 13103, 65041, 65042, 65048, 65049, and 66037 of, and to add Sections 65041.1 and 65404 to, the Government Code, relating to state planning.

[Filed with Secretary of State September 28, 2002.]

LEGISLATIVE COUNSEL'S DIGEST

AB 857, Wiggins. Infrastructure planning: priorities and funding.

(1) Existing law requires the Governor, in conjunction with the Governor's Budget, to submit annually to the Legislature a proposed 5–year infrastructure plan containing specified information concerning infrastructure needed by state agencies, schools, and postsecondary educational institutions and a proposal for funding the needed infrastructure.

This bill would clarify the information that is required to be included in a proposal for funding state infrastructure identified in the 5–year plan.

(2) Existing law requires the Governor to prepare and cause to be maintained, reviewed, and revised a comprehensive State Environmental Goals and Policy Report.

This bill would require any revision to the report on and after January 1, 2004, to provide that the goals are consistent with state planning priorities, and would require a state agency that requests infrastructure to specify how that infrastructure is consistent with those priorities. This bill would define those priorities, which relate to infrastructure that supports infill development and redevelopment, cultural and historic resources, environmental and agricultural resources, and efficient development patterns.

(3) Existing law establishes proceedings for the mediation and resolution of land use disputes and makes those proceedings applicable to specified actions filed prior to January 1, 2002.

This bill would extend that date to January 1, 2006.

The people of the State of California do enact as follows:

SECTION 1. Section 13102 of the Government Code is amended to read:

13102. * * * In conjunction with the Governor's Budget submitted pursuant to Section 13337, the Governor shall submit annually a proposed five-year infrastructure plan to the Legislature. This plan shall cover a five-fiscal-year period beginning with the fiscal year that is the same as that covered by the Governor's Budget with which it is being submitted.

The infrastructure plan shall contain the following information for the five years that it covers:

(a)(1) Identification of new, rehabilitated, modernized, improved, or renovated infrastructure requested by state agencies * * *.

(2) Aggregate funding for transportation as identified in the four-year State Transportation Improvement Program Fund Estimate prepared pursuant to Sections 14524 and 14525.

(3) Infrastructure needs for Kindergarten through grade 12 public schools necessary to accommodate increased enrollment, class size reduction, and school modernization.

(4) The instructional and instructional support facilities needs for the University of California, the California State University, and the California Community Colleges.

(b) The estimated cost of providing the infrastructure identified in subdivision (a).

(c) A proposal for funding the infrastructure identified in subdivision (a), * * * that includes all of the following * * *:

* * * (1) Criteria and priorities used to identify and select the infrastructure it does propose to fund, including criteria used to identify and select infrastructure that by January 1, 2005, shall be consistent with the state planning priorities specified pursuant to Section 65041.1 for infrastructure requested by state agencies pursuant to paragraph (1) of subdivision (a).

(2) * * * Sources of funding* * * , including, but not limited to, General Fund, state special funds, federal funds, general obligation bonds, lease revenue bonds, and installment purchases.

(3) An evaluation of the impact of the new state debt on the state's existing overall debt position if the plan proposes the issuance of new state debt * * *.

* * * (4)(A) Recommended specific projects for funding * * * or the recommended type and amount of infrastructure to be funded in order to meet programmatic objectives that shall be identified in the proposal.

* * * (B) Any capital outlay or local assistance appropriations intended to fund infrastructure included in the Governor's Budget * * * shall derive from, and be encompassed by, the funding proposal contained in the plan.

SEC. 2. Section 13103 of the Government Code is amended to read:

13103. By January 1, 2005, if a state agency requests infrastructure pursuant to paragraph (1) of subdivision (a) of Section 13102, that agency shall specify how that infrastructure is consistent with the state planning priorities specified pursuant to Section 65041.1. The Governor may also order any entity of state government to assist in preparation of the infrastructure plan.

SEC. 3. Section 65041 of the Government Code is amended to read:

65041. The Governor shall prepare and thereafter shall cause to be maintained, regularly reviewed, and revised a comprehensive State Environmental Goals and Policy Report. In the preparation of the report, priority shall be given to the development of statewide land use policy, including the recommendations resulting from the land use planning and implementation program set forth in Section 65040.6, and including the recommendations of the Planning Advisory and Assistance Council established pursuant to subdivision (a) of Section 65040.6. The report shall contain, but not be limited to, the following:

(a) An overview, looking 20 to 30 years ahead, of state growth and development and a statement of approved state environmental goals and objectives, including those directed to land use, population growth and distribution, development, the conservation of natural resources, and air and water quality.

(b) Description of new and revised state policies, programs and other actions of the executive and legislative branches required to implement statewide environmental goals, including intermediate-range plans and actions directed to natural resources, human resources and transportation.

(c) On and after January 1, 2004, any revision to the report shall provide that the goals are consistent with the state planning priorities specified pursuant to Section 65041.1.

SEC. 4. Section 65041.1 is added to the Government Code, to read:

65041.1. The state planning priorities, which are intended to promote equity, strengthen the economy, protect the environment, and promote public health and safety in the state, including in urban, suburban, and rural communities, shall be as follows:

(a) To promote infill development and equity by rehabilitating, maintaining, and improving existing infrastructure that supports infill development and appropriate reuse and redevelopment of previously developed, underutilized land that is presently served by transit, streets, water, sewer, and other essential services, particularly in underserved areas, and to preserving cultural and historic resources.

(b) To protect environmental and agricultural resources by protecting, preserving, and enhancing the state's most valuable natural resources, including working landscapes such as farm, range, and forest lands, natural lands such as wetlands, watersheds, wildlife habitats, and other wildlands, recreation lands such as parks, trails, greenbelts, and other open space, and landscapes with locally unique features and areas identified by the state as deserving special protection.

(c) To encourage efficient development patterns by ensuring that any infrastructure associated with development that is not infill supports new development that uses land efficiently, is built adjacent to existing developed areas to the extent consistent with the priorities specified pursuant to subdivision (b), is in an area appropriately planned for growth, is served by adequate transportation and other essential utilities and services, and minimizes ongoing costs to taxpayers.

SEC. 5. Section 65042 of the Government Code is amended to read:

65042. Every officer, agency, department, or instrumentality of state government shall * * * do all of the following:

(a) Cooperate in the preparation and maintenance of the State Environmental Goals and Policy Report * * *.

(b) By January 1, 2005, ensure that their entity's functional plan is consistent with the state planning priorities specified pursuant to Section 65041.1 and annually demonstrate to the office, and to the Department of Finance when requesting infrastructure pursuant to subdivision (a) of Section 13102, how the plans are consistent with those priorities.

(c) Comply with any request for advice, assistance, information or other material.

SEC. 6. Section 65048 of the Government Code is amended to read:

65048. The State Environmental Goals and Policy Report shall be revised, updated, and * * * transmitted by the Governor to the Legislature every four years. Any revision on and after January 1, 2004, shall be consistent with the state planning priorities specified pursuant to Section 65041.1. The Governor, may at any time, inform and seek advice of the Legislature on proposed changes in state environmental goals, objectives, and policies.

SEC. 7. Section 65049 of the Government Code is amended to read:

65049. Following approval of the State Environmental Goals and Policy Report as provided in Section 65046, the report shall serve as a guide for state expenditures * * *. In transmitting the annual budget to the Legislature, information shall be included relating proposed * * * expenditures to the achievement of statewide goals and objectives set forth in the report.

SEC. 8. Section 65404 is added to the Government Code, to read:

65404. (a) On or before January 1, 2005, the Governor shall develop conflict resolution processes to do all of the following:

(1) Resolve conflicting requirements of two or more state agencies for a local plan, permit, or development project.

(2) Resolve conflicts between state functional plans.

(3) Resolve conflicts between state infrastructure projects.

(b) The conflict resolution process may be requested by a local agency, project applicant, or one or more state agencies.

SEC. 9. Section 66037 of the Government Code is amended to read:

66037. No action filed on or after January 1, 2006, shall be subject to this chapter unless a later enacted statute, which is chaptered before January 1, 2006, extends this date or deletes this section.

Assembly Bill No. 3041

CHAPTER 1052

An act to amend Sections 21082.1, 21083, and 21091 of the Public Resources Code, relating to environmental quality.

[Approved by Governor September 28, 2002. Filed with Secretary of State September 28, 2002.]

LEGISLATIVE COUNSEL'S DIGEST

AB 3041, Committee on Natural Resources. Environmental quality: use of State Clearinghouse by lead agencies.

(1) The existing California Environmental Quality Act (CEQA) requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report (EIR) on a project that it proposes to carry out or approve that may have a significant effect on the environment, or to adopt a negative declaration if it finds that the project will not have that effect. CEQA also requires a lead agency to prepare a mitigated negative declaration for a project that may have a significant effect on the environment, if revisions in the project would avoid or mitigate that effect and there is no substantial evidence that the project, as revised, would have a significant effect on the environment. CEQA also requires any draft EIR, EIR, or negative declaration prepared pursuant to CEQA be prepared directly by, or under contract to, a public agency, and requires the lead agency to circulate draft documents that reflect its independent judgment to appropriate state agencies for review. CEQA defines a responsible agency as a public agency other than a lead agency that has responsibility for carrying out or approving a project, and existing guidelines adopted by the Office of Planning and Research define a trustee agency as a state agency that has jurisdiction by law over natural resources affected by a project that are held in trust for the people of the state. Existing guidelines require each lead agency to submit draft EIRs and negative declarations to the State Clearinghouse in order to be distributed to applicable state agencies for review, and require each lead agency to submit not less than 10 copies of draft EIRs and negative declarations to the State Clearinghouse, unless the State Clearinghouse approves a lower number in advance.

This bill would require any mitigated negative declaration prepared pursuant to CEQA to be prepared directly by, or under contract to, a public agency. The bill would require each lead agency to submit a sufficient number of copies of a draft EIR, proposed negative declaration, or proposed mitigated negative declaration to the State

Clearinghouse for review and comment by state agencies, and to submit a copy of that document in an electronic form, if a state agency is the lead agency, a responsible agency, trustee agency, or otherwise has jurisdiction over the project, or if the project is of statewide, regional, or areawide environmental significance. By imposing additional duties on local lead agencies, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The people of the State of California do enact as follows:

SECTION 1. Section 21082.1 of the Public Resources Code is amended to read:

21082.1. (a) Any draft environmental impact report, environmental impact report, negative declaration, or mitigated negative declaration prepared pursuant to the requirements of this division shall be prepared directly by, or under contract to, a public agency.

(b) This section is not intended to prohibit, and shall not be construed as prohibiting, any person from submitting information or other comments to the public agency responsible for preparing an environmental impact report, draft environmental impact report, negative declaration, or mitigated negative declaration. The information or other comments may be submitted in any format, shall be considered by the public agency, and may be included, in whole or in part, in any report or declaration.

(c) The lead agency shall do all of the following:

(1) Independently review and analyze any report or declaration required by this division.

(2) Circulate draft documents that reflect its independent judgment.

(3) As part of the adoption of a negative declaration or a mitigated negative declaration, or certification of an environmental impact report, find that the report or declaration reflects the independent judgment of the lead agency.

(4) Submit a sufficient number of copies of the draft environmental impact report, proposed negative declaration, or proposed mitigated negative declaration, and a copy of the report or declaration in an electronic form as required by the guidelines adopted pursuant to Section

21083, to the State Clearinghouse for review and comment by state agencies, if any of the following apply:

(A) A state agency is any of the following:

(i) The lead agency.

(ii) A responsible agency.

(iii) A trustee agency.

(B) A state agency otherwise has jurisdiction by law with respect to the project.

(C) The proposed project is of sufficient statewide, regional, or areawide environmental significance as determined pursuant to the guidelines certified and adopted pursuant to Section 21083.

SEC. 2. Section 21083 of the Public Resources Code is amended to read:

21083. (a) The Office of Planning and Research shall prepare and develop proposed guidelines for the implementation of this division by public agencies. The guidelines shall include objectives and criteria for the orderly evaluation of projects and the preparation of environmental impact reports and negative declarations in a manner consistent with this division.

(b) The guidelines shall specifically include criteria for public agencies to follow in determining whether or not a proposed project may have a "significant effect on the environment." The criteria shall require a finding that a project may have a "significant effect on the environment" if any of the following conditions exist:

(1) A proposed project has the potential to degrade the quality of the environment, curtail the range of the environment, or to achieve short-term, to the disadvantage of long-term, environmental goals.

(2) The possible effects of a project are individually limited but cumulatively considerable. As used in this paragraph, "cumulatively considerable" means that the incremental effects of an individual project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.

(3) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

(c) The guidelines shall include procedures for determining the lead agency pursuant to Section 21165.

(d) The guidelines shall include criteria for public agencies to use in determining when a proposed project is of sufficient statewide, regional, or areawide environmental significance that a draft environmental impact report, a proposed negative declaration, or a proposed mitigated negative declaration shall be submitted to appropriate state agencies, through the State Clearinghouse, for review and comment prior to

completion of the environmental impact report, negative declaration, or mitigated negative declaration.

(e) The Office of Planning and Research shall develop and prepare the proposed guidelines as soon as possible and shall transmit them immediately to the Secretary of the Resources Agency. The Secretary of the Resources Agency shall certify and adopt the guidelines pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, which shall become effective upon the filing thereof. However, the guidelines shall not be adopted without compliance with Sections 11346.4, 11346.5, and 11346.8 of the Government Code.

SEC. 3. Section 21091 of the Public Resources Code is amended to read:

21091. (a) The public review period for a draft environmental impact report shall not be less than 30 days. If the draft environmental impact report is submitted to the State Clearinghouse for review, the review period shall be at least 45 days, and the lead agency shall provide a sufficient number of copies of the document to the State Clearinghouse for review and comment by state agencies.

(b) The public review period for a proposed negative declaration or proposed mitigated negative declaration shall not be less than 20 days. If the proposed negative declaration or proposed mitigated negative declaration is submitted to the State Clearinghouse for review, the review period shall be at least 30 days, and the lead agency shall provide a sufficient number of copies of the document to the State Clearinghouse for review and comment by state agencies.

(c) Notwithstanding subdivisions (a) and (b), if a draft environmental impact report, proposed negative declaration, or proposed mitigated negative declaration is submitted to the State Clearinghouse for review and the period of review by the State Clearinghouse is longer than the public review period established pursuant to subdivision (a) or (b), whichever is applicable, the public review period shall be at least as long as the period of review by the State Clearinghouse.

(d) (1) The lead agency shall consider any comments it receives on a draft environmental impact report, proposed negative declaration, or proposed mitigated negative declaration if those comments are received within the public review period.

(2) (A) With respect to the consideration of comments received on a draft environmental impact report, the lead agency shall evaluate any comments on environmental issues that are received from persons who have reviewed the draft and shall prepare a written response pursuant to subparagraph (B). The lead agency may also respond to comments that are received after the close of the public review period.

(B) The written response shall describe the disposition of any significant environmental issue that is raised by commenters. The responses shall be prepared consistent with Section 15088 of Title 14 of the California Code of Regulations, as those regulations existed on June 1, 1993.

(e) (1) Criteria for shorter review periods by the State Clearinghouse for documents that must be submitted to the State Clearinghouse shall be set forth in the written guidelines issued by the Office of Planning and Research and made available to the public.

(2) Those shortened review periods shall not be less than 30 days for a draft environmental impact report and 20 days for a negative declaration.

(3) Any request for a shortened review period shall only be made in writing by the decisionmaking body of the lead agency to the Office of Planning and Research. The decisionmaking body may designate by resolution or ordinance a person authorized to request a shortened review period. Any designated person shall notify the decisionmaking body of this request.

(4) Any request approved by the State Clearinghouse shall be consistent with the criteria set forth in the written guidelines of the Office of Planning and Research.

(5) A shortened review period shall not be approved by the Office of Planning and Research for any proposed project of statewide, regional, or areawide environmental significance as determined pursuant to Section 21083.

(6) Any approval of a shortened review period shall be given prior to, and reflected in, the public notice required pursuant to Section 21092.

(f) Prior to carrying out or approving a project for which a negative declaration has been adopted, the lead agency shall consider the negative declaration together with any comments that were received and considered pursuant to paragraph (1) of subdivision (d).

SEC. 4. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because a local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the program or level of service mandated by this act, within the meaning of Section 17556 of the Government Code.

O

Senate Bill No. 1393

CHAPTER 1121

An act to amend Sections 21080.5, 21151, 21159.9, and 21167.6 of, and to add Section 21167.6.5 to, the Public Resources Code, relating to environmental protection.

[Approved by Governor September 30, 2002. Filed with Secretary of State September 30, 2002.]

LEGISLATIVE COUNSEL'S DIGEST

SB 1393, Kuehl. California Environmental Quality Act.

(1) The existing California Environmental Quality Act (CEQA) requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project that it proposes to carry out or approve that may have a significant effect on the environment, or to adopt a negative declaration if it finds that the project will not have that effect. CEQA authorizes a plan or other written documentation required by a certified regulatory program or state agency to be submitted in lieu of an environmental impact report pursuant to prescribed procedures.

This bill would require the Secretary of the Resources Agency, by July 1, 2003, to develop a protocol for reviewing the prospective application of certified regulatory programs to evaluate the consistency of those programs with the requirements of CEQA, and would require the secretary to provide a report to the Senate Committee on Environmental Quality and the Assembly Committee on Natural Resources regarding the need for a grant of additional statutory authority authorizing the secretary to undertake a review of the certified regulatory programs. The bill would also require the secretary to provide a significant opportunity for public participation in developing that protocol.

(2) CEQA requires the Office of Planning and Research to implement a public assistance and information program that includes establishing a public education and training program, a data base to assist in the preparation of environmental documents, and a central repository for the collection, storage, retrieval, and dissemination of specified CEQA notices.

This bill would require, commencing January 1, 2003, that copies of any documents submitted in electronic format to the office pursuant to CEQA be furnished by the office to the California State Library, and would require the California State Library to be the repository for those

documents and to make them available for viewing by the general public upon request.

(3) CEQA authorizes the appeal of the certification of an environmental impact report by a local lead agency that is not elected to that lead agency's elected decisionmaking body, if that body exists.

This bill would expand that authorization to include any environmental review document that is certified or authorized by a local lead agency that is not elected.

(4) CEQA requires, in any action or proceeding to attack, review, set aside, void, or annul specified actions by a public agency pursuant to CEQA, except the Public Utilities Commission, that the plaintiff or petitioner file a request that the public agency prepare a record of proceedings relating to the subject of the action or proceeding. CEQA also requires that the request, together with the complaint or petition, be served on the public agency not later than 10 business days from the date that the action or proceeding was filed.

This bill would require that request to be served personally on the state agency.

This bill would also require the petitioner or plaintiff to name any recipient of an approval that is the subject of the action or proceeding as a real party in interest, and to serve the petition or complaint on that real party in interest with the petition or complaint not later than 20 business days following service of the petition or complaint on the public agency. The bill would specify that a failure to name any other potential parties would not be grounds for dismissal of the action or proceeding. The bill would also require the public agency to provide the petitioner or plaintiff, not later than 10 business days following service of the petition or complaint on the public agency, with a list of responsible agencies and public agencies with jurisdiction over a natural resource affected by the project, and would require the petitioner or plaintiff to provide those responsible agencies and public agencies with notice of the action or proceeding within 15 days of receipt of that list. By imposing additional duties on local public agencies, this bill would impose a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state,

reimbursement for those costs shall be made pursuant to these statutory provisions.

The people of the State of California do enact as follows:

SECTION 1. Section 21080.5 of the Public Resources Code is amended to read:

21080.5. (a) Except as provided in Section 21158.1, when the regulatory program of a state agency requires a plan or other written documentation containing environmental information and complying with paragraph (3) of subdivision (d) to be submitted in support of any activity listed in subdivision (b), the plan or other written documentation may be submitted in lieu of the environmental impact report required by this division if the Secretary of the Resources Agency has certified the regulatory program pursuant to this section.

(b) This section applies only to regulatory programs or portions thereof that involve either of the following:

(1) The issuance to a person of a lease, permit, license, certificate, or other entitlement for use.

(2) The adoption or approval of standards, rules, regulations, or plans for use in the regulatory program.

(c) A regulatory program certified pursuant to this section is exempt from Chapter 3 (commencing with Section 21100), Chapter 4 (commencing with Section 21150), and Section 21167, except as provided in Article 2 (commencing with Section 21157) of Chapter 4.5.

(d) To qualify for certification pursuant to this section, a regulatory program shall require the utilization of an interdisciplinary approach that will ensure the integrated use of the natural and social sciences in decisionmaking and that shall meet all of the following criteria:

(1) The enabling legislation of the regulatory program does both of the following:

(A) Includes protection of the environment among its principal purposes.

(B) Contains authority for the administering agency to adopt rules and regulations for the protection of the environment, guided by standards set forth in the enabling legislation.

(2) The rules and regulations adopted by the administering agency for the regulatory program do all of the following:

(A) Require that an activity will not be approved or adopted as proposed if there are feasible alternatives or feasible mitigation measures available that would substantially lessen any significant adverse effect that the activity may have on the environment.

(B) Include guidelines for the orderly evaluation of proposed activities and the preparation of the plan or other written documentation in a manner consistent with the environmental protection purposes of the regulatory program.

(C) Require the administering agency to consult with all public agencies that have jurisdiction, by law, with respect to the proposed activity.

(D) Require that final action on the proposed activity include the written responses of the issuing authority to significant environmental points raised during the evaluation process.

(E) Require the filing of a notice of the decision by the administering agency on the proposed activity with the Secretary of the Resources Agency. Those notices shall be available for public inspection, and a list of the notices shall be posted on a weekly basis in the Office of the Resources Agency. Each list shall remain posted for a period of 30 days.

(F) Require notice of the filing of the plan or other written documentation to be made to the public and to any person who requests, in writing, notification. The notification shall be made in a manner that will provide the public or any person requesting notification with sufficient time to review and comment on the filing.

(3) The plan or other written documentation required by the regulatory program does both of the following:

(A) Includes a description of the proposed activity with alternatives to the activity, and mitigation measures to minimize any significant adverse effect on the environment of the activity.

(B) Is available for a reasonable time for review and comment by other public agencies and the general public.

(e) (1) The Secretary of the Resources Agency shall certify a regulatory program that the secretary determines meets all the qualifications for certification set forth in this section, and withdraw certification on determination that the regulatory program has been altered so that it no longer meets those qualifications. Certification and withdrawal of certification shall occur only after compliance with Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

(2) In determining whether or not a regulatory program meets the qualifications for certification set forth in this section, the inquiry of the secretary shall extend only to the question of whether the regulatory program meets the generic requirements of subdivision (d). The inquiry shall not extend to individual decisions to be reached under the regulatory program, including the nature of specific alternatives or mitigation measures that might be proposed to lessen any significant adverse effect on the environment of the activity.

(3) If the secretary determines that the regulatory program submitted for certification does not meet the qualifications for certification set forth in this section, the secretary shall adopt findings setting forth the reasons for the determination.

(f) After a regulatory program has been certified pursuant to this section, any proposed change in the program that could affect compliance with the qualifications for certification specified in subdivision (d) may be submitted to the Secretary of the Resources Agency for review and comment. The scope of the secretary's review shall extend only to the question of whether the regulatory program meets the generic requirements of subdivision (d). The review shall not extend to individual decisions to be reached under the regulatory program, including specific alternatives or mitigation measures that might be proposed to lessen any significant adverse effect on the environment of the activity. The secretary shall have 30 days from the date of receipt of the proposed change to notify the state agency whether the proposed change will alter the regulatory program so that it no longer meets the qualification for certification established in this section and will result in a withdrawal of certification as provided in this section.

(g) Any action or proceeding to attack, review, set aside, void, or annul a determination or decision of a state agency approving or adopting a proposed activity under a regulatory program that has been certified pursuant to this section on the basis that the plan or other written documentation prepared pursuant to paragraph (3) of subdivision (d) does not comply with this section shall be commenced not later than 30 days from the date of the filing of notice of the approval or adoption of the activity.

(h) (1) Any action or proceeding to attack, review, set aside, void, or annul a determination of the Secretary of the Resources Agency to certify a regulatory program pursuant to this section on the basis that the regulatory program does not comply with this section shall be commenced within 30 days from the date of certification by the secretary.

(2) In any action brought pursuant to paragraph (1), the inquiry shall extend only to whether there was a prejudicial abuse of discretion by the secretary. Abuse of discretion is established if the secretary has not proceeded in a manner required by law or if the determination is not supported by substantial evidence.

(i) For purposes of this section, any county agricultural commissioner is a state agency.

(j) For purposes of this section, any air quality management district or air pollution control district is a state agency, except that the approval, if any, by a district of a nonattainment area plan is subject to this section

only if, and to the extent that, the approval adopts or amends rules or regulations.

(k) (1) The secretary, by July 1, 2003, shall develop a protocol for reviewing the prospective application of certified regulatory programs to evaluate the consistency of those programs with the requirements of this division. Following the completion of the development of the protocol, the secretary shall provide a report to the Senate Committee on Environmental Quality and the Assembly Committee on Natural Resources regarding the need for a grant of additional statutory authority authorizing the secretary to undertake a review of the certified regulatory programs.

(2) The secretary shall provide a significant opportunity for public participation in developing the protocol described in paragraph (1) including, but not limited to, at least two public meetings with interested parties. A notice of each meeting shall be provided at least 10 days prior to the meeting to any person who files a written request for a notice with the agency.

SEC. 2. Section 21151 of the Public Resources Code is amended to read:

21151. (a) All local agencies shall prepare, or cause to be prepared by contract, and certify the completion of, an environmental impact report on any project that they intend to carry out or approve which may have a significant effect on the environment. When a report is required by Section 65402 of the Government Code, the environmental impact report may be submitted as a part of that report.

(b) For purposes of this section, any significant effect on the environment shall be limited to substantial, or potentially substantial, adverse changes in physical conditions which exist within the area as defined in Section 21060.5.

(c) If a nonelected decisionmaking body of a local lead agency certifies an environmental impact report, approves a negative declaration or mitigated negative declaration, or determines that a project is not subject to this division, that certification, approval, or determination may be appealed to the agency's elected decisionmaking body, if any.

SEC. 3. Section 21159.9 of the Public Resources Code is amended to read:

21159.9. The Office of Planning and Research shall implement, utilizing existing resources, a public assistance and information program, to ensure efficient and effective implementation of this division, to do all of the following:

(a) Establish a public education and training program for planners, developers, and other interested parties to assist them in implementing this division.

(b) Establish and maintain a data base to assist in the preparation of environmental documents.

(c) Establish and maintain a central repository for the collection, storage, retrieval, and dissemination of notices of exemption, notices of preparation, notices of determination, and notices of completion provided to the office, and make the notices available through the Internet. The office may coordinate with another state agency for that agency to make the notices available through the Internet.

(d) Commencing January 1, 2003, copies of any documents submitted in electronic format to the Office of Planning and Research pursuant to this division shall be furnished by the office to the California State Library. The California State Library shall be the repository for those electronic documents, which shall be made available for viewing by the general public upon request.

SEC. 4. Section 21167.6 of the Public Resources Code is amended to read:

21167.6. Notwithstanding any other provision of law, in all actions or proceedings brought pursuant to Section 21167, except those involving the Public Utilities Commission, all of the following shall apply:

(a) At the time that the action or proceeding is filed, the plaintiff or petitioner shall file a request that the respondent public agency prepare the record of proceedings relating to the subject of the action or proceeding. The request, together with the complaint or petition, shall be served personally upon the public agency not later than 10 business days from the date that the action or proceeding was filed.

(b) (1) The public agency shall prepare and certify the record of proceedings not later than 60 days from the date that the request specified in subdivision (a) was served upon the public agency. Upon certification, the public agency shall lodge a copy of the record of proceedings with the court and shall serve on the parties notice that the record of proceedings has been certified and lodged with the court. The parties shall pay any reasonable costs or fees imposed for the preparation of the record of proceedings in conformance with any law or rule of court.

(2) The plaintiff or petitioner may elect to prepare the record of proceedings or the parties may agree to an alternative method of preparation of the record of proceedings, subject to certification of its accuracy by the public agency, within the time limit specified in this subdivision.

(c) The time limit established by subdivision (b) may be extended only upon the stipulation of all parties who have been properly served in the action or proceeding or upon order of the court. Extensions shall be liberally granted by the court when the size of the record of proceedings renders infeasible compliance with that time limit. There is no limit on the number of extensions that may be granted by the court, but no single extension shall exceed 60 days unless the court determines that a longer extension is in the public interest.

(d) If the public agency fails to prepare and certify the record within the time limit established in paragraph (1) of subdivision (b), or any continuances of that time limit, the plaintiff or petitioner may move for sanctions, and the court may, upon that motion, grant appropriate sanctions.

(e) The record of proceedings shall include, but is not limited to, all of the following items:

(1) All project application materials.

(2) All staff reports and related documents prepared by the respondent public agency with respect to its compliance with the substantive and procedural requirements of this division and with respect to the action on the project.

(3) All staff reports and related documents prepared by the respondent public agency and written testimony or documents submitted by any person relevant to any findings or statement of overriding considerations adopted by the respondent agency pursuant to this division.

(4) Any transcript or minutes of the proceedings at which the decisionmaking body of the respondent public agency heard testimony on, or considered any environmental document on, the project, and any transcript or minutes of proceedings before any advisory body to the respondent public agency that were presented to the decisionmaking body prior to action on the environmental documents or on the project.

(5) All notices issued by the respondent public agency to comply with this division or with any other law governing the processing and approval of the project.

(6) All written comments received in response to, or in connection with, environmental documents prepared for the project, including responses to the notice of preparation.

(7) All written evidence or correspondence submitted to, or transferred from, the respondent public agency with respect to compliance with this division or with respect to the project.

(8) Any proposed decisions or findings submitted to the decisionmaking body of the respondent public agency by its staff, or the project proponent, project opponents, or other persons.

(9) The documentation of the final public agency decision, including the final environmental impact report, mitigated negative declaration, or negative declaration, and all documents, in addition to those referenced in paragraph (3), cited or relied on in the findings or in a statement of overriding considerations adopted pursuant to this division.

(10) Any other written materials relevant to the respondent public agency's compliance with this division or to its decision on the merits of the project, including the initial study, any drafts of any environmental document, or portions thereof, that have been released for public review, and copies of studies or other documents relied upon in any environmental document prepared for the project and either made available to the public during the public review period or included in the respondent public agency's files on the project, and all internal agency communications, including staff notes and memoranda related to the project or to compliance with this division.

(11) The full written record before any inferior administrative decisionmaking body whose decision was appealed to a superior administrative decisionmaking body prior to the filing of litigation.

(f) In preparing the record of proceedings, the party preparing the record shall strive to do so at reasonable cost in light of the scope of the record.

(g) The clerk of the superior court shall prepare and certify the clerk's transcript on appeal not later than 60 days from the date that the notice designating the papers or records to be included in the clerk's transcript was filed with the superior court, if the party or parties pay any costs or fees for the preparation of the clerk's transcript imposed in conformance with any law or rules of court. Nothing in this subdivision precludes an election to proceed by appendix, as provided in Rule 5.1 of the California Rules of Court.

(h) Extensions of the period for the filing of any brief on appeal may be allowed only by stipulation of the parties or by order of the court for good cause shown. Extensions for the filing of a brief on appeal shall be limited to one 30-day extension for the preparation of an opening brief, and one 30-day extension for the preparation of a responding brief, except that the court may grant a longer extension or additional extensions if it determines that there is a substantial likelihood of settlement that would avoid the necessity of completing the appeal.

(i) At the completion of the filing of briefs on appeal, the appellant shall notify the court of the completion of the filing of briefs, whereupon the clerk of the reviewing court shall set the appeal for hearing on the first available calendar date.

SEC. 5. Section 21167.6.5 is added to the Public Resources Code, to read:

21167.6.5. (a) The petitioner or plaintiff shall name, as a real party in interest, any recipient of an approval that is the subject of an action or proceeding brought pursuant to Section 21167, 21168, or 21168.5, and shall serve the petition or complaint on that real party in interest, by personal service, mail facsimile, or any other method permitted by law not later than 20 business days following service of the petition or complaint on the public agency.

(b) The public agency shall provide the petitioner or plaintiff, not later than 10 business days following service of the petition or complaint on the public agency, with a list of responsible agencies and any public agency having jurisdiction over a natural resource affected by the project.

(c) The petitioner or plaintiff shall provide the responsible agencies, and any public agency having jurisdiction over a natural resource affected by the project, with notice of the action or proceeding within 15 days of receipt of the list described in subdivision (b).

(d) Failure to name potential parties, other than those described in subdivision (a) or (b), is not grounds for dismissal pursuant to Section 389 of the Code of Civil Procedure.

(e) Nothing in this section is intended to affect an existing right of a party to intervene in the action.

SEC. 6. Notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars ($1,000,000), reimbursement shall be made from the State Mandates Claims Fund.

O

Exhibit 4
Public Resources Code Sections Cited

§ 21002.1. Use of environmental impact reports; policy

In order to achieve the objectives set forth in Section 21002, the Legislature hereby finds and declares that the following policy shall apply to the use of environmental impact reports prepared pursuant to this division:

(a) The purpose of an environmental impact report is to identify the significant effects on the environment of a project, to identify alternatives to the project, and to indicate the manner in which those significant effects can be mitigated or avoided.

(b) Each public agency shall mitigate or avoid the significant effects on the environment of projects that it carries out or approves whenever it is feasible to do so.

(c) If economic, social, or other conditions make it infeasible to mitigate one or more significant effects on the environment of a project, the project may nonetheless be carried out or approved at the discretion of a public agency if the project is otherwise permissible under applicable laws and regulations.

(d) In applying the policies of subdivisions (b) and (c) to individual projects, the responsibility of the lead agency shall differ from that of a responsible agency. The lead agency shall be responsible for considering the effects, both individual and collective, of all activities involved in a project. A responsible agency shall be responsible for considering only the effects of those activities involved in a project which it is required by law to carry out or approve. This subdivision applies only to decisions by a public agency to carry out or approve a project and does not otherwise affect the scope of the comments that the public agency may wish to make pursuant to Section 21104 or 21153.

(e) To provide more meaningful public disclosure, reduce the time and cost required to prepare an environmental impact report, and focus on potentially significant effects on the environment of a proposed project, lead agencies shall, in accordance with Section 21100, focus the discussion in the environmental impact report on those potential effects on the environment of a proposed project which the lead agency has determined are or may be significant. Lead agencies may limit discussion on other effects to a brief explanation as to why those effects are not potentially significant.

(Added by Stats.1976, c. 1312, § 1.5. Amended by Stats.1977, c. 1200, p. 3996, § 1.5; Stats.1984, c. 1514, § 2; Stats.1994, c. 1230 (S.B.749), § 1, eff. Sept. 30, 1994.)

§ 21003. Planning and environmental review procedures; documents; reports; data base; administration of process

The Legislature further finds and declares that it is the policy of the state that:

(a) Local agencies integrate the requirements of this division with planning and environmental review procedures otherwise required by law or by local practice so that all those procedures, to the maximum feasible extent, run concurrently, rather than consecutively.

(b) Documents prepared pursuant to this division be organized and written in a manner that will be meaningful and useful to decisionmakers and to the public.

(c) Environmental impact reports omit unnecessary descriptions of projects and emphasize feasible mitigation measures and feasible alternatives to projects.

(d) Information developed in individual environmental impact reports be incorporated into a data base which can be used to reduce delay and duplication in preparation of subsequent environmental impact reports.

(e) Information developed in environmental impact reports and negative declarations be incorporated into a data base which may be used to make subsequent or supplemental environmental determinations.

(f) All persons and public agencies involved in the environmental review process be responsible for carrying out the process in the most efficient, expeditious manner in order to conserve the available financial, governmental, physical, and social resources with the objective that those resources may be better applied toward the mitigation of actual significant effects on the environment.

(Added by Stats.1976, c. 1312, § 2. Amended by Stats.1993, c. 1130 (A.B.1888), § 2.)

§ 21003.1. Environmental effects of projects; comments from public and public agencies to lead agencies; availability of information

The Legislature further finds and declares it is the policy of the state that:

(a) Comments from the public and public agencies on the environmental effects of a project shall be made to lead agencies as soon as possible in the review of environmental documents, including, but not limited to, draft environmental impact reports and negative declarations, in order to allow the lead agencies to identify, at the earliest possible time in the environmental review process, potential significant effects of a project, alternatives, and mitigation measures which would substantially reduce the effects.

(b) Information relevant to the significant effects of a project, alternatives, and mitigation measures which substantially reduce the effects shall be made available as soon as possible by lead agencies, other public agencies, and interested persons and organizations.

(c) Nothing in subdivisions (a) or (b) reduces or otherwise limits public review or comment periods currently prescribed either by statute or in guidelines prepared and adopted pursuant to Section 21083 for environmental documents, including, but not limited to, draft environmental impact reports and negative declarations.

(Added by Stats.1985, c. 85, § 1.)

§ 21080.09. Public higher education; campus location; long range development plans

(a) For purposes of this section, the following definitions apply:

(1) "Public higher education" has the same meaning as specified in Section 66010 of the Education Code.

(2) "Long range development plan" means a physical development and land use plan to meet the academic and institutional objectives for a particular campus or medical center of public higher education.

(b) The selection of a location for a particular campus and the approval of a long range development plan are subject to this division and require the preparation of an environmental impact report. Environmental effects relating to changes in enrollment levels shall be considered for each campus or medical center of public higher education in the environmental impact report prepared for the long range development plan for the campus or medical center.

(c) The approval of a project on a particular campus or medical center of public higher education is subject to this division and may be addressed, subject to the other provisions of this division, in a tiered environmental analysis based upon a long range development plan environmental impact report.

(d) Compliance with this section satisfies the obligations of public higher education pursuant to this division to consider the environmental impact of academic and enrollment plans as they affect campuses or medical centers, provided that any such plans shall become effective for a campus or medical center only after the environmental effects of those plans have been analyzed as required by this division in a long range development plan environmental impact report or tiered analysis based upon that environmental impact report for that campus or medical center, and addressed as required by this division.

(Added by Stats.1989, c. 659, § 1.)

§ 21080.1. Environmental impact report or negative declaration; determination by lead agency; finality; consultation

(a) The lead agency shall be responsible for determining whether an environmental impact report, a negative declaration, or a mitigated negative declaration shall be required for any project which is subject to this division. That determination shall be final and conclusive on all persons, including responsible agencies, unless challenged as provided in Section 21167.

(b) In the case of a project described in subdivision (c) of Section 21065, the lead agency shall, upon the request of a potential applicant, provide for consultation prior to the filing of the application regarding the range of actions, potential alternatives, mitigation measures, and any potential and significant effects on the environment of the project.

(Added by Stats.1977, c. 1200, p. 3997, § 3. Amended by Stats.1993, c. 1130 (A.B. 1888), § 4; Stats.1994, c. 1230 (S.B.749), § 6, eff. Sept. 30, 1994.)

§ 21080.3. Consultation with responsible agencies; assistance by office of planning and research

(a) Prior to determining whether a negative declaration or environmental impact report is required for a project, the lead agency shall consult with all responsible agencies and with any other public agency which has jurisdiction by law over natural resources affected by the project which are held in trust for the people of the State of California. Prior to that required consultation, the lead agency may informally contact any such agency.

(b) In order to expedite the requirements of subdivision (a), the Office of Planning and Research, upon request of a lead agency, shall assist the lead agency in determining the various responsible agencies for a proposed project. In the case of a project described in subdivision (c) of Section 21065, the request may also be made by the project applicant.

(Added by Stats.1977, c. 1200, p. 3998, § 5. Amended by Stats.1978, c. 1113, p. 3403, § 8.2, eff. Sept. 26, 1978; Stats.1993, c. 1130 (A.B.1888), § 5.)

§ 21080.4. Environmental impact report; requirement determined by lead agency; duties of responsible agencies and certain public agencies; consultation; assistance by office of planning and research

(a) If a lead agency determines that an environmental impact report is required for a project, the lead agency shall immediately send notice of that determination by certified mail or an equivalent procedure to each responsible agency, the Office of Planning and Research, and * * * those public agencies having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California. Upon receipt of the notice, each responsible agency, the office, and each public agency having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California shall specify to the lead agency the scope and content of the environmental information that is germane to the statutory responsibilities of that responsible agency, the office, or the public agency in connection with the proposed project and which, pursuant to the requirements of this division, shall be included in the environmental impact report. The information shall be specified in writing and shall be communicated to the lead agency by certified mail or equivalent procedure not later than 30 days after the date of receipt of the notice of the lead agency's determination. The lead agency shall request similar guidance from appropriate federal agencies.

(b) To expedite the requirements of subdivision (a), the lead agency, any responsible agency, the Office of Planning and Research, or a public agency having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California, may request one or more meetings between representatives of those agencies and the office for the purpose of assisting the lead agency to determine the scope and content of the environmental information that any of those responsible agencies, the office, or the public agencies may require. In the case of a project described in subdivision (c) of Section 21065, the request may also be made by the project applicant. The meetings shall be convened by the lead agency as soon as possible, but not later than 30 days after the date that the meeting was requested.

(c) To expedite the requirements of subdivision (a), the Office of Planning and Research, upon request of a lead agency, shall assist the lead agency in determining the various responsible agencies, public agencies having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California, and any federal agencies that have responsibility for carrying out or approving a proposed project. In the case of a project described in subdivision (c) of Section 21065, * * * that request may also be made by the project applicant.

(d) * * * With respect to the Department of Transportation, and with respect to any state agency that is a responsible agency or a public agency having jurisdiction by law over natural resources affected by the project that are held in trust for the people of the State of California, subject to the requirements of subdivision (a), the Office of Planning and Research shall ensure that the information required by subdivision (a) is transmitted to the lead agency, and that affected agencies are notified regarding meetings to be held upon request pursuant to subdivision (b), within the required time period.

(Amended by Stats.1997, c. 415 (A.B.175), § 1; Stats.2000, c. 738 (A.B.1807), § 1.)

§ 21081. Necessary findings where environmental impact report identifies effects

Pursuant to the policy stated in Sections 21002 and 21002.1, no public agency shall approve or carry out a project for which an environmental impact report has been certified which identifies one or more significant effects on the environment that would occur if the project is approved or carried out unless both of the following occur:

(a) The public agency makes one or more of the following findings with respect to each significant effect:

(1) Changes or alterations have been required in, or incorporated into, the project which mitigate or avoid the significant effects on the environment.

(2) Those changes or alterations are within the responsibility and jurisdiction of another public agency and have been, or can and should be, adopted by that other agency.

(3) Specific economic, legal, social, technological, or other considerations, including considerations for the provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or alternatives identified in the environmental impact report.

(b) With respect to significant effects which were subject to a finding under paragraph (3) of subdivision (a), the public agency finds that specific overriding economic, legal, social, technological, or other benefits of the project outweigh the significant effects on the environment.

(Added by Stats.1976, c. 1312, § 9. Amended by Stats.1993, c. 1131 (S.B.919), § 6; Stats.1994, c. 1294 (A.B.314), § 2, eff. Oct. 4, 1994.)

§ 21081.6. Findings or negative declarations; reporting or monitoring project changes; effect on environment; conditions

(a) When making the findings required by paragraph (1) of subdivision (a) of Section 21081 or when adopting a mitigated negative declaration pursuant to paragraph (2) of subdivision (c) of Section 21080, the following requirements shall apply:

(1) The public agency shall adopt a reporting or monitoring program for the changes made to the project or conditions of project approval, adopted in order to mitigate or avoid significant effects on the environment. The reporting or monitoring program shall be designed to ensure compliance during project implementation. For those changes which have been required or incorporated into the project at the request of a responsible agency or a public agency having jurisdiction by law over natural resources affected by the project, that agency shall, if so requested by the lead agency or a responsible agency, prepare and submit a proposed reporting or monitoring program.

(2) The lead agency shall specify the location and custodian of the documents or other material which constitute the record of proceedings upon which its decision is based.

(b) A public agency shall provide that measures to mitigate or avoid significant effects on the environment are fully enforceable through permit conditions, agreements, or other measures. Conditions of project approval may be set forth in referenced documents which address required mitigation measures or, in the case of the adoption of a plan, policy, regulation, or other public project, by incorporating the mitigation measures into the plan, policy, regulation, or project design.

(c) Prior to the close of the public review period for a draft environmental impact report or mitigated negative declaration, a responsible agency, or a public agency having jurisdiction over natural resources affected by the project, shall either submit to the lead agency complete and detailed performance objectives for mitigation measures which would address the significant effects on the environment identified by the responsible agency or agency having jurisdiction over natural resources affected by the project, or refer the lead agency to appropriate, readily available guidelines or reference documents. Any mitigation measures submitted to a lead agency by a responsible agency or an agency having jurisdiction over natural resources affected by the project shall be limited to measures which mitigate impacts to resources which are subject to the statutory authority of, and definitions applicable to, that agency. Compliance or noncompliance by a responsible agency or agency having jurisdiction over natural resources affected by a project with that requirement shall not limit the authority of the responsible agency or agency having jurisdiction over natural resources affected by a project, or the authority of the lead agency, to approve, condition, or deny projects as provided by this division or any other provision of law.

(Added by Stats.1988, c. 1232, § 1. Amended by Stats.1992, c. 1070 (A.B.375), § 1; Stats.1993, c. 1130 (A.B.1888), § 7; Stats.1994, c. 1230 (S.B.749), § 8, eff. Sept. 30, 1994; Stats.1994, c. 1294 (A.B.314), § 4.5, eff. Oct. 4, 1994.)

§ 21082. Public agencies; adoption of objectives, criteria and procedures; consistency with guidelines

All public agencies shall adopt by ordinance, resolution, rule, or regulation, objectives, criteria, and procedures for the evaluation of projects and the preparation of environmental impact reports and negative declarations pursuant to this division. A school district, or any other district, whose boundaries are coterminous with a city, county, or city and county, may utilize the objectives, criteria, and procedures of the city, county, or city and county, as may be applicable, in which case, the school district or other district need not adopt objectives, criteria, and procedures of its own. The objectives, criteria, and procedures shall be consistent with the provisions of this division and with the guidelines adopted by the Secretary of the Resources Agency pursuant to Section 21083. Such objectives, criteria, and procedures shall be adopted by each public agency no later than 60 days after the Secretary of the Resources Agency has adopted guidelines pursuant to Section 21083.

(Added by Stats.1972, c. 1154, p. 2272, § 2.3, eff. Dec. 5, 1972. Amended by Stats.1975, c. 242, § 1; Stats.1976, c. 1312, § 9.5.)

§ 21082.1. Draft environmental impact report, environmental impact report, negative declaration, or mitigated negative declaration; preparation by public agency

(a) Any draft environmental impact report, environmental impact report, negative declaration, or mitigated negative declaration prepared pursuant to the requirements of this division shall be prepared directly by, or under contract to, a public agency.

(b) This section is not intended to prohibit, and shall not be construed as prohibiting, any person from submitting information or other comments to the public agency responsible for preparing an environmental impact report, draft environmental impact report, * * * negative declaration, or mitigated negative declaration. The information or other comments may be submitted in any format, shall be considered by the public agency, and may be included, in whole or in part, in any report or declaration.

(c) The lead agency shall do all of the following:

(1) Independently review and analyze any report or declaration required by this division.

(2) Circulate draft documents that reflect its independent judgment.

(3) As part of the adoption of a negative declaration or a mitigated negative declaration, or certification of an environmental impact report, find that the report or declaration reflects the independent judgment of the lead agency.

(4) Submit a sufficient number of copies of the draft environmental impact report, proposed negative declaration, or proposed mitigated negative declaration, and a copy of the report or declaration in an electronic form as required by the guidelines adopted pursuant to Section 21083, to the State Clearinghouse for review and comment by state agencies, if any of the following apply:

(A) A state agency is any of the following:

(i) The lead agency.

(ii) A responsible agency.

(iii) A trustee agency.

(B) A state agency otherwise has jurisdiction by law with respect to the project.

(C) The proposed project is of sufficient statewide, regional, or areawide environmental significance as determined pursuant to the guidelines certified and adopted pursuant to Section 21083.

(Amended by Stats.2002, c. 1052 (A.B.3041), § 1.)

§ 21082.2. Significant effect on environment; determination; environmental impact report preparation

(a) The lead agency shall determine whether a project may have a significant effect on the environment based on substantial evidence in light of the whole record.

(b) The existence of public controversy over the environmental effects of a project shall not require preparation of an environmental impact report if there is no substantial evidence in light of the whole record before the lead agency that the project may have a significant effect on the environment.

(c) Argument, speculation, unsubstantiated opinion or narrative, evidence which is clearly inaccurate or erroneous, or evidence of social or economic impacts which do not contribute to, or are not caused by, physical impacts on the environment, is not substantial evidence. Substantial evidence shall include facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts.

(d) If there is substantial evidence, in light of the whole record before the lead agency, that a project may have a significant effect on the environment, an environmental impact report shall be prepared.

(e) Statements in an environmental impact report and comments with respect to an environmental impact report shall not be deemed determinative of whether the project may have a significant effect on the environment.

(Added by Stats.1984, c. 1514, § 6. Amended by Stats.1993, c. 1131 (S.B.919), § 7.)

§ 21083. Office of Planning and Research; preparation and development of guidelines; conditions

(a) The Office of Planning and Research shall prepare and develop proposed guidelines for the implementation of this division by public agencies. The guidelines shall include objectives and criteria for the orderly evaluation of projects and the preparation of environmental impact reports and negative declarations in a manner consistent with this division.

(b) The guidelines shall specifically include criteria for public agencies to follow in determining whether or not a proposed project may have a "significant effect on the environment." The criteria shall require a finding that a project may have a "significant effect on the environment" if any of the following conditions exist:

(1) A proposed project has the potential to degrade the quality of the environment, curtail the range of the environment, or to achieve short-term, to the disadvantage of long-term, environmental goals.

(2) The possible effects of a project are individually limited but cumulatively considerable. As used in this paragraph, " cumulatively considerable" means that the incremental effects of an individual project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.

(3) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

(c) The guidelines shall * * * include procedures for determining the lead agency pursuant to Section 21165.

(d) The guidelines shall include criteria for public agencies to use in determining when a proposed project is of sufficient statewide, regional, or areawide environmental significance that * * * a draft environmental impact report, a proposed negative declaration, or a proposed mitigated negative declaration shall be submitted to appropriate state agencies * * *, through the State Clearinghouse, for review and comment prior to completion of the environmental impact report, negative declaration * * *, or mitigated negative declaration.

(e) The Office of Planning and Research shall develop and prepare the proposed guidelines as soon as possible and shall transmit them immediately to the Secretary of the Resources Agency. The Secretary of the Resources Agency shall certify and adopt the guidelines pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, which shall become effective upon the filing thereof. However, the guidelines shall not be adopted without compliance with Sections 11346.4, 11346.5, and 11346.8 of the Government Code.

(Amended by Stats.2002, c. 1052 (A.B.3041), § 2.)

§ 21083.2. Archaeological resources; determination of effect of project; EIR or negative declaration; mitigation measures

(a) [**Determination of significant effect on archaeological resources; EIR and negative declarations**] As part of the determination made pursuant to Section 21080.1, the lead agency shall determine whether the project may have a significant effect on archaeological resources. If the lead agency determines that the project may have a significant effect on unique archaeological resources, the environmental impact report shall address the issue of those resources. An environmental impact report, if otherwise necessary, shall not address the issue of nonunique archaeological resources. A negative declaration shall be issued with respect to a project if, but for the issue of nonunique archaeological resources, the negative declaration would be otherwise issued.

(b) [**Preservation or nondisturbance requirements**] If it can be demonstrated that a project will cause damage to a unique archaeological resource, the lead agency may require reasonable efforts to be made to permit any or all of these resources to be preserved in place or left in an undisturbed state. Examples of that treatment, in no order of preference, may include, but are not limited to, any of the following:

(1) Planning construction to avoid archaeological sites.

(2) Deeding archaeological sites into permanent conservation easements.

(3) Capping or covering archaeological sites with a layer of soil before building on the sites.

(4) Planning parks, greenspace, or other open space to incorporate archaeological sites.

(c) [**Mitigation measures**] To the extent that unique archaeological resources are not preserved in place or not left in an undisturbed state, mitigation measures shall be required as provided in this subdivision. The project applicant shall provide a guarantee to the lead agency to pay one-half the estimated cost of mitigating the significant effects of the project on unique archaeological resources. In determining payment, the lead agency shall give due consideration to the in-kind value of project design or expenditures that are intended to permit any or all archaeological resources or California Native American culturally significant sites to be preserved in place or left in an undisturbed state. When a final decision is made to carry out or approve the project, the lead agency shall, if necessary, reduce the specified mitigation measures to those which can be funded with the money guaranteed by the project applicant plus the money voluntarily guaranteed by any other person or persons for those mitigation purposes. In order to allow time for interested persons to provide the funding guarantee referred to in this subdivision, a final decision to carry out or approve a project shall not occur sooner than 60 days after completion of the recommended special environmental impact report required by this section.

(d) [**Excavation as mitigation**] Excavation as mitigation shall be restricted to those parts of the unique archaeological resource that would be damaged or destroyed by the project. Excavation as mitigation shall not be required for a unique archaeological resource if the lead agency determines that testing or studies already completed have adequately recovered the scientifically consequential information from and about the resource, if this determination is documented in the environmental impact report.

§ 21083.2

(e) [**Amount paid for mitigation measures**] In no event shall the amount paid by a project applicant for mitigation measures required pursuant to subdivision (c) exceed the following amounts:

(1) An amount equal to one-half of 1 percent of the projected cost of the project for mitigation measures undertaken within the site boundaries of a commercial or industrial project.

(2) An amount equal to three-fourths of 1 percent of the projected cost of the project for mitigation measures undertaken within the site boundaries of a housing project consisting of a single unit.

(3) If a housing project consists of more than a single unit, an amount equal to three-fourths of 1 percent of the projected cost of the project for mitigation measures undertaken within the site boundaries of the project for the first unit plus the sum of the following:

(A) Two hundred dollars ($200) per unit for any of the next 99 units.

(B) One hundred fifty dollars ($150) per unit for any of the next 400 units.

(C) One hundred dollars ($100) per unit in excess of 500 units.

(f) [**Field excavation phase of mitigation plan**] Unless special or unusual circumstances warrant an exception, the field excavation phase of an approved mitigation plan shall be completed within 90 days after final approval necessary to implement the physical development of the project or, if a phased project, in connection with the phased portion to which the specific mitigation measures are applicable. However, the project applicant may extend that period if he or she so elects. Nothing in this section shall nullify protections for Indian cemeteries under any other provision of law.

(g) [**Unique archaeological resource; definition**] As used in this section, "unique archaeological resource" means an archaeological artifact, object, or site about which it can be clearly demonstrated that, without merely adding to the current body of knowledge, there is a high probability that it meets any of the following criteria:

(1) Contains information needed to answer important scientific research questions and that there is a demonstrable public interest in that information.

(2) Has a special and particular quality such as being the oldest of its type or the best available example of its type.

(3) Is directly associated with a scientifically recognized important prehistoric or historic event or person.

(h) [**Nonunique archaeological resource; definition**] As used in this section, "nonunique archaeological resource" means an archaeological artifact, object, or site which does not meet the criteria in subdivision (g). A nonunique archaeological resource need be given no further consideration, other than the simple recording of its existence by the lead agency if it so elects.

(i) [**Accidental discoveries of archaeological sites; provisions by lead agency**] As part of the objectives, criteria, and procedures required by Section 21082 or as part of conditions imposed for mitigation, a lead agency may make provisions for archaeological sites accidentally discovered during construction.

These provisions may include an immediate evaluation of the find. If the find is determined to be a unique archaeological resource, contingency funding and a time allotment sufficient to allow recovering an archaeological sample or to employ one of the avoidance measures may be required under the provisions set forth in this section. Construction work may continue on other parts of the building site while archaeological mitigation takes place.

(j) [**Application to specified projects**] This section does not apply to any project described in subdivision (a) or (b) of Section 21065 if the lead agency elects to comply with all other applicable provisions of this division. This section does not apply to any project described in subdivision (c) of Section 21065 if the applicant and the lead agency jointly elect to comply with all other applicable provisions of this division.

(k) [**Additional costs to local agencies**] Any additional costs to any local agency as a result of complying with this section with respect to a project of other than a public agency shall be borne by the project applicant.

(*l*) [**Application of section**] Nothing in this section is intended to affect or modify the requirements of Section 21084 or 21084.1.

(Added by Stats.1982, c. 1623, p. 6486, § 1. Amended by Stats.1985, c. 287, § 1; Stats.1993, c. 375 (S.B.104), § 1.)

§ 21091. Draft environmental impact reports, proposed negative declarations, and proposed mitigated negative declarations; review periods

(a) The public review period for a draft environmental impact report shall not be less than 30 days. If the draft environmental impact report is submitted to the State Clearinghouse for review, the review period shall be at least 45 days, and the lead agency shall provide a sufficient number of copies of the document to the State Clearinghouse for review and comment by state agencies.

(b) The public review period for a proposed negative declaration or proposed mitigated negative declaration shall not be less than 20 days. If the proposed negative declaration or proposed mitigated negative declaration is submitted to the State Clearinghouse for review, the review period shall be at least 30 days, and the lead agency shall provide a sufficient number of copies of the document to the State Clearinghouse for review and comment by state agencies.

(c) Notwithstanding subdivisions (a) and (b), if a draft environmental impact report, proposed negative declaration, or * * * proposed mitigated negative declaration is submitted to the State Clearinghouse for review and the period of review by the State Clearinghouse is longer than the public review period established pursuant to subdivision (a) or (b), whichever is applicable, the public review period shall be at least as long as the period of review by the State Clearinghouse.

(d)(1) The lead agency shall consider any comments it receives on a draft environmental impact report * * *, proposed negative declaration, * * * or proposed mitigated negative declaration if those comments are received within the public review period.

(2)(A) With respect to the consideration of comments received on a draft environmental impact report, the lead agency shall evaluate any comments on environmental issues that are received from persons who have reviewed the draft and shall prepare a written response pursuant to subparagraph (B). The lead agency may also respond to comments that are received after the close of the public review period.

(B) The written response shall describe the disposition of any significant environmental issue that is raised by commenters. The responses shall be prepared consistent with Section 15088 of Title 14 of the California Code of Regulations, as those regulations existed on June 1, 1993.

(e)(1) Criteria for shorter review periods by the State Clearinghouse for documents that must be submitted to the State Clearinghouse shall be set forth in the written guidelines issued by the Office of Planning and Research and made available to the public.

(2) Those shortened review periods shall not be less than 30 days for a draft environmental impact report and 20 days for a negative declaration.

(3) Any request for a shortened review period shall only be made in writing by the decisionmaking body of the lead agency to the Office of Planning and Research. The decisionmaking body may designate by resolution or ordinance a person authorized to request a shortened review period. Any designated person shall notify the decisionmaking body of this request.

(4) Any request approved by the State Clearinghouse shall be consistent with the criteria set forth in the written guidelines of the Office of Planning and Research.

(5) A shortened review period shall not be approved by the Office of Planning and Research for any proposed project of statewide, regional, or areawide environmental significance as determined pursuant to Section 21083.

(6) Any approval of a shortened review period shall be given prior to, and reflected in, the public notice required pursuant to Section 21092.

(f) Prior to carrying out or approving a project for which a negative declaration has been adopted, the lead agency shall consider the negative declaration together with any comments that were received and considered pursuant to paragraph (1) of subdivision (d).

(Amended by Stats.2002, c. 1052 (A.B.3041), § 3.)

§ 21092. Public notice of preparation of environmental impact report or negative declaration; publication

(a) Any lead agency which is preparing an environmental impact report or a negative declaration or making a determination pursuant to Section 21157 shall provide public notice of that fact within a reasonable period of time prior to certification of the environmental impact report or adoption of the negative declaration.

(b)(1) The notice shall specify the period during which comments will be received on the draft environmental report or negative declaration, and shall include the date, time, and place of any public meetings or hearings on the proposed project, a brief description of the proposed project and its location, the significant effects on the environment, if any, anticipated as a result of the project, and the address where copies of the draft environmental impact report or negative declaration, and all documents referenced in the draft environmental impact report or negative declaration, are available for review.

(2) This section shall not be construed in any manner which results in the invalidation of an action because of the alleged inadequacy of the notice content, provided that there has been substantial compliance with the notice content requirements of this section.

(3) The notice required by this section shall be given to the last known name and address of all organizations and individuals who have previously requested notice and shall also be given by at least one of the following procedures:

(A) Publication, no fewer times than required by Section 6061 of the Government Code, by the public agency in a newspaper of general circulation in the area affected by the proposed project. If more than one area will be affected, the notice shall be published in the newspaper of largest circulation from among the newspapers of general circulation in those areas.

(B) Posting of notice by the lead agency on- and off-site in the area where the project is to be located.

(C) Direct mailing to the owners and occupants of contiguous property shown on the latest equalized assessment roll.

(c) For any project involving the burning of municipal wastes, hazardous waste, or refuse-derived fuel, including, but not limited to, tires, meeting the qualifications of subdivision (d), notice shall be given to all organizations and individuals who have previously requested notice and shall also be given by at least the procedures specified in subparagraphs (A), (B), and (C) of paragraph (3) of subdivision (b). In addition, notification shall be given by direct mailing to the owners and occupants of property within one-fourth of a mile of any parcel or parcels on which is located a project subject to this subdivision. This subdivision does not apply to any project for which notice has already been provided as of July 14, 1989, in compliance with this section as it existed prior to July 14, 1989.

(d) The notice requirements of subdivision (c) apply to both of the following:

(1) The construction of a new facility.

(2) The expansion of an existing facility which burns hazardous waste which would increase its permitted capacity by more than 10 percent. For purposes of this paragraph, the amount of expansion of an existing facility shall be calculated by comparing the proposed facility capacity with whichever of the following is applicable:

(A) The facility capacity approved in the facility's hazardous waste facilities permit pursuant to Section 25200 of the Health and Safety Code or its grant of interim status pursuant to Section 25200.5 of the Health and Safety Code, or the facility capacity authorized in any state or local agency permit allowing the construction or operation of a facility for the burning of hazardous waste, granted before January 1, 1990.

(B) The facility capacity authorized in the facility's original hazardous waste facilities permit, grant of interim status, or any state or local agency permit allowing the construction or operation of a facility for the burning of hazardous waste, granted on or after January 1, 1990.

(e) The notice requirements specified in subdivision (b) or (c) shall not preclude a public agency from providing additional notice by other means if the agency so desires, or from providing the public notice required by this section at the same time and in the same manner as public notice otherwise required by law for the project.

(Added by Stats.1976, c. 1312, § 15. Amended by Stats.1980, c. 131, p. 303, § 1, eff. May 28, 1980; Stats.1989, c. 141, § 1, eff. July 14, 1989; Stats.1989, c. 907, § 3; Stats.1993, c. 1130 (A.B.1888), § 12.)

§ 21092.1. Addition of new information; notice and consultation

When significant new information is added to an environmental impact report after notice has been given pursuant to Section 21092 and consultation has occurred pursuant to Sections 21104 and 21153, but prior to certification, the public agency shall give notice again pursuant to Section 21092, and consult again pursuant to Sections 21104 and 21153 before certifying the environmental impact report.

(Added by Stats.1984, c. 1514, § 7.)

§ 21092.2. Requests for certain notices

The notices required pursuant to Sections 21080.4, 21083.9, 21092, 21108, and 21152 shall be mailed to any person who has filed a written request for notices with either the clerk of the governing body or, if there is no governing body, the director of the agency. The request may also be filed with any other person designated by the governing body or director to receive these requests. The agency may require requests for notices to be annually renewed. The public agency may charge a fee, except to other public agencies, that is reasonably related to the costs of providing this service. This section may not be construed in any manner that results in the invalidation of an action because of the failure of a person to receive a requested notice, provided that there has been substantial compliance with the requirements of this section.

(Amended by Stats.2001, c. 867 (A.B.1532), § 3.)

§ 21092.3. Posting of certain notices

The notices required pursuant to Sections 21080.4 and 21092 for an environmental impact report shall be posted in the office of the county clerk of each county in which the project will be located and shall remain posted for a period of 30 days. The notice required pursuant to Section 21092 for a negative declaration shall be so posted for a period of 20 days, unless otherwise required by law to be posted for 30 days. The county clerk shall post the notices within 24 hours of receipt.

(Added by Stats.1989, c. 907, § 5. Amended by Stats.1993, c. 1130 (A.B.1888), § 13.)

§ 21092.4. Consultation with transportation planning agencies and public agencies

(a) For a project of statewide, regional, or areawide significance, the lead agency shall consult with transportation planning agencies and public agencies which have transportation facilities within their jurisdictions which could be affected by the project. Consultation shall be conducted in the same manner as for responsible agencies pursuant to this division, and shall be for the purpose of the lead agency obtaining information concerning the project's effect on major local arterials, public transit, freeways, highways, and rail transit service within the jurisdiction of a transportation planning agency or a public agency which is consulted by the lead agency. A transportation planning agency or public agency which provides information to the lead agency shall be notified of, and provided with copies of, environmental documents pertaining to the project.

(b) As used in this section, "transportation facilities" includes major local arterials and public transit within five miles of the project site and freeways, highways, and rail transit service within 10 miles of the project site.

(Added by Stats.1989, c. 626, § 2.)

§ 21092.5. Proposed response to public agency comments received by lead agency; notice to agency commenting on negative declaration; untimely comments

(a) At least 10 days prior to certifying an environmental impact report, the lead agency shall provide a written proposed response to a public agency on comments made by that agency which conform with the requirements of this division. Proposed responses shall conform with the legal standards established for responses to comments on draft environmental impact reports. Copies of responses or the environmental document in which they are contained, prepared in conformance with other requirements of this division and the guidelines adopted pursuant to Section 21083, may be used to meet the requirements imposed by this section.

(b) The lead agency shall notify any public agency which comments on a negative declaration, of the public hearing or hearings, if any, on the project for which the negative declaration was prepared. If notice to the commenting public agency is provided pursuant to Section 21092, the notice shall satisfy the requirement of this subdivision.

(c) Nothing in this section requires the lead agency to respond to comments not received within the comment periods specified in this division, to reopen comment periods, or to delay acting on a negative declaration or environmental impact report.

(Added by Stats.1991, c. 905 (A.B.1642), § 2.)

§ 21092.6. Application of Govt. C. § 65962.5; duties of lead agency; notice by environmental protection agency of failure to specify

(a) The lead agency shall consult the lists compiled pursuant to Section 65962.5 of the Government Code to determine whether the project and any alternatives are located on a site which is included on any list. The lead agency shall indicate whether a site is on any list not already identified by the applicant. The lead agency shall specify the list and include the information in the statement required pursuant to subdivision (f) of Section 65962.5 of the Government Code, in the notice required pursuant to Section 21080.4, a negative declaration, and a draft environmental impact report. The requirement in this section to specify any list shall not be construed to limit compliance with this division.

(b) If a project or any alternatives are located on a site which is included on any of the lists compiled pursuant to Section 65962.5 of the Government Code and the lead agency did not accurately specify or did not specify any list pursuant to subdivision (a), the California Environmental Protection Agency shall notify the lead agency specifying any list with the site when it receives notice pursuant to Section 21080.4, a negative declaration, and a draft environmental impact report. The California Environmental Protection Agency shall not be liable for failure to notify the lead agency pursuant to this subdivision.

(c) This section applies only to projects for which applications have not been deemed complete pursuant to Section 65943 of the Government Code on or before January 1, 1992.

(Added by Stats.1991, c. 1212 (A.B.869), § 3.)

§ 21094. Later projects; tiered environmental impact reports; initial study; use of prior reports

(a) Where a prior environmental impact report has been prepared and certified for a program, plan, policy, or ordinance, the lead agency for a later project that meets the requirements of this section shall examine significant effects of the later project upon the environment by using a tiered environmental impact report, except that the report on the later project need not examine those effects which the lead agency determines were either (1) mitigated or avoided pursuant to paragraph (1) of subdivision (a) of Section 21081 as a result of the prior environmental impact report, or (2) examined at a sufficient level of detail in the prior environmental impact report to enable those effects to be mitigated or avoided by site specific revisions, the imposition of conditions, or by other means in connection with the approval of the later project.

(b) This section applies only to a later project which the lead agency determines (1) is consistent with the program, plan, policy, or ordinance for which an environmental impact report has been prepared and certified, (2) is consistent with applicable local land use plans and zoning of the city, county, or city and county in which the later project would be located, and (3) is not subject to Section 21166.

(c) For purposes of compliance with this section, an initial study shall be prepared to assist the lead agency in making the determinations required by this section. The initial study shall analyze whether the later project may cause significant effects on the environment that were not examined in the prior environmental impact report.

(d) All public agencies which propose to carry out or approve the later project may utilize the prior environmental impact report and the environmental impact report on the later project to fulfill the requirements of Section 21081.

(e) When tiering is used pursuant to this section, an environmental impact report prepared for a later project shall refer to the prior environmental impact report and state where a copy of the prior environmental impact report may be examined.

(Added by Stats.1984, c. 1514, § 8. Amended by Stats.1985, c. 418, § 2; Stats.1994, c. 1294 (A.B.314), § 6, eff. Oct. 4, 1994.)

§ 21100. Environmental impact report on proposed state projects; significant effect; cumulative impact analysis

(a) All lead agencies shall prepare, or cause to be prepared by contract, and certify the completion of, an environmental impact report on any project which they propose to carry out or approve that may have a significant effect on the environment. Whenever feasible, a standard format shall be used for environmental impact reports.

(b) The environmental impact report shall include a detailed statement setting forth all of the following:

(1) All significant effects on the environment of the proposed project.

(2) In a separate section:

(A) Any significant effect on the environment that cannot be avoided if the project is implemented.

(B) Any significant effect on the environment that would be irreversible if the project is implemented.

(3) Mitigation measures proposed to minimize significant effects on the environment, including, but not limited to, measures to reduce the wasteful, inefficient, and unnecessary consumption of energy.

(4) Alternatives to the proposed project.

(5) The growth-inducing impact of the proposed project.

(c) The report shall also contain a statement briefly indicating the reasons for determining that various effects on the environment of a project are not significant and consequently have not been discussed in detail in the environmental impact report.

(d) For purposes of this section, any significant effect on the environment shall be limited to substantial, or potentially substantial, adverse changes in physical conditions which exist within the area as defined in Section 21060.5.

(e) Previously approved land use documents, including, but not limited to, general plans, specific plans, and local coastal plans, may be used in cumulative impact analysis.

(Added by Stats.1970, c. 1433, p. 2781, § 1. Amended by Stats.1972, c. 1154, p. 2274, § 2.5, eff. Dec. 5, 1972; Stats.1974, c. 276, p. 501, § 1, operative Jan. 7, 1975; Stats.1976, c. 1312, § 16; Stats.1981, c. 264, p. 1351, § 1; Stats.1993, c. 1130 (A.B. 1888), § 14; Stats.1994, c. 1294 (A.B.314), § 7, eff. Oct. 4, 1994; Stats.1994, c. 1230 (S.B.749), § 9, eff. Sept. 30, 1994.)

§ 21102. Request for or authorization of expenditure of funds; statement of effect on environment

No state agency, board, or commission shall request funds, nor shall any state agency, board, or commission which authorizes expenditures of funds, other than funds appropriated in the Budget Act, authorize funds for expenditure for any project, other than a project involving only feasibility or planning studies for possible future actions which the agency, board, or commission has not approved, adopted or funded, which may have a significant effect on the environment unless such request or authorization is accompanied by an environmental impact report.

Feasibility and planning studies exempted by this section from the preparation of an environmental impact report shall nevertheless include consideration of environmental factors.

(Added by Stats.1970, c. 1433, p. 2782, § 1. Amended by Stats.1972, c. 1154, p. 2274, § 3, eff. Dec. 5, 1972.)

§ 21150. Environmental impact report required before allocation of state or federal funds

State agencies, boards, and commissions, responsible for allocating state or federal funds on a project-by-project basis to local agencies for any project which may have a significant effect on the environment, shall require from the responsible local governmental agency a detailed statement setting forth the matters specified in Section 21100 prior to the allocation of any funds other than funds solely for projects involving only feasibility or planning studies for possible future actions which the agency, board, or commission has not approved, adopted, or funded.

(Added by Stats.1970, c. 1433, p. 2782, § 1. Amended by Stats.1972, c. 1154, p. 2275, § 10, eff. Dec. 5, 1972.)

§ 21151. Local agencies; preparation and completion of impact report; submission as part of general plan report; significant effect; appeal to elected decision-making body

(a) All local agencies shall prepare, or cause to be prepared by contract, and certify the completion of, an environmental impact report on any project that they intend to carry out or approve which may have a significant effect on the environment. When a report is required by Section 65402 of the Government Code, the environmental impact report may be submitted as a part of that report.

(b) For purposes of this section, any significant effect on the environment shall be limited to substantial, or potentially substantial, adverse changes in physical conditions which exist within the area as defined in Section 21060.5.

(c) * * * If a nonelected decisionmaking body of a local lead agency certifies an environmental impact report, approves a negative declaration or mitigated negative declaration, or determines that a project is not * * * subject to this division, that certification, approval, or determination may be appealed to the agency's elected decisionmaking body, if any.

(Amended by Stats.2002, c. 1121 (S.B.1393), § 2.)

§ 21151.2. School site proposed acquisition or addition; notice to planning commission; investigation; report

To promote the safety of pupils and comprehensive community planning the governing board of each school district before acquiring title to property for a new school site or for an addition to a present school site, shall give the planning commission having jurisdiction notice in writing of the proposed acquisition. The planning commission shall investigate the proposed site and within 30 days after receipt of the notice shall submit to the governing board a written report of the investigation and its recommendations concerning acquisition of the site.

The governing board shall not acquire title to the property until the report of the planning commission has been received. If the report does not favor the acquisition of the property for a school site, or for an addition to a present school site, the governing board of the school district shall not acquire title to the property until 30 days after the commission's report is received.

(Added by Stats.1987, c. 1452, § 533.)

§ 21151.8. Schoolsite acquisition or construction; approval of environmental impact report or negative declaration; conditions

(a) No environmental impact report or negative declaration shall be approved for any project involving the purchase of a schoolsite or the construction of a new elementary or secondary school by a school district unless all of the following occur:

(1) The environmental impact report or negative declaration includes information which is needed to determine if the property proposed to be purchased, or to be constructed upon, is any of the following:

(A) The site of a current or former hazardous waste disposal site or solid waste disposal site and, if so, whether the wastes have been removed.

(B) A hazardous substance release site identified by the State Department of Health Services in a current list adopted pursuant to Section 25356 for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) A site which contains one or more pipelines, situated underground or aboveground, which carries hazardous substances, acutely hazardous materials, or hazardous wastes, unless the pipeline is a natural gas line which is used only to supply natural gas to that school or neighborhood.

(2) The lead agency preparing the environmental impact report or negative declaration has notified in writing and consulted with the administering agency

in which the proposed schoolsite is located, and with any air pollution control district or air quality management district having jurisdiction in the area, to identify facilities within one-fourth of a mile of the proposed schoolsite which might reasonably be anticipated to emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste. The notification by the lead agency shall include a list of the locations for which information is sought.

(3) The governing board of the school district makes one of the following written findings:

(A) Consultation identified no such facilities specified in paragraph (2).

(B) The facilities specified in paragraph (2) exist, but one of the following conditions applies:

(i) The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

(ii) Corrective measures required under an existing order by another agency having jurisdiction over the facilities will, before the school is occupied, result in the mitigation of all chronic or accidental hazardous air emissions to levels that do not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school. If the governing board makes such a finding, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

(4) Each administering agency, air pollution control district, or air quality management district receiving written notification from a lead agency to identify facilities pursuant to paragraph (2) shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. The environmental impact report or negative declaration shall be conclusively presumed to comply with this section as to the area of responsibility of any agency which does not respond within 30 days.

(b) If a lead agency has carried out the consultation required by paragraph (2) of subdivision (a), the environmental impact report or the negative declaration shall be conclusively presumed to comply with this section, notwithstanding any failure of the consultation to identify an existing facility specified in paragraph (2) of subdivision (a).

(c) As used in this section and Section 21151.4, the following definitions shall apply:

(1) "Hazardous substance" means any substance defined in Section 25316 of the Health and Safety Code.

(2) "Acutely hazardous material" means any material defined pursuant to subdivision (a) of Section 25532 of the Health and Safety Code.

(3) "Hazardous waste" means any waste defined in Section 25117 of the Health and Safety Code.

(4) "Hazardous waste disposal site" means any site defined in Section 25114 of the Health and Safety Code.

(5) "Hazardous air emissions" means emissions into the ambient air of air contaminants which have been identified as a toxic air contaminant by the State Air Resources Board or by the air pollution control officer for the jurisdiction in which the project is located. As determined by the air pollution control officer, hazardous air emissions also means emissions into the ambient air from any substances identified in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(6) "Administering agency" means an agency designated pursuant to Section 25502 of the Health and Safety Code.

(7) "Handle" means handle as defined in Article 1 (commencing with Section 25500) of Chapter 6.95 of Division 20 of the Health and Safety Code.

(Added by Stats.1990, c. 1602 (S.B.2262), § 3. Amended by Stats.1991, c. 1183 (A.B.928), § 18.)

§ 21152. Local agency; approval or determination to carry out project; notice; contents; public inspection; posting

(a) Whenever a local agency approves or determines to carry out a project which is subject to this division, it shall file notice of the approval or the determination within five working days after the approval or determination becomes final, with the county clerk of each county in which the project will be located. The notice shall indicate the determination of the local agency whether the project will, or will not, have a significant effect on the environment and shall indicate whether an environmental impact report has been prepared pursuant to this division. The notice shall also include certification that the final environmental impact report, if one was prepared, together with comments and responses, is available to the general public.

(b) Whenever a local agency determines that a project is not subject to this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085 or 21172, and it approves or determines to carry out the project, it, or the person specified in subdivision (b) or (c) of Section 21065, may file a notice of the determination with the county clerk of each county in which the project will be located. Any notice filed pursuant to this subdivision by a person specified in subdivision (b) or (c) of Section 21065 shall have a certificate of determination attached to it issued by the local agency responsible for making the determination that the project is not subject to this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085 or 21172. The certificate of determination may be in the form of a certified copy of an existing document or record of the local agency.

(c) All notices filed pursuant to this section shall be available for public inspection, and shall be posted within 24 hours of receipt in the office of the county clerk. Each notice shall remain posted for a period of 30 days. Thereafter, the clerk shall return the notice to the local agency with a notation of the period it was posted. The local agency shall retain the notice for not less than nine months.

(Added by Stats.1972, c. 1154, p. 2276, § 12, eff. Dec. 5, 1972. Amended by Stats.1974, c. 56, p. 124, § 2, eff. March 4, 1974; Stats.1984, c. 250, § 7; Stats.1984, c. 1357, § 2; Stats.1985, c. 338, § 3; Stats.1993, c. 1130 (A.B.1888), § 16; Stats.1994, c. 1294 (A.B.314), § 11, eff. Oct. 4, 1994.)

§ 21153. Local lead agency; consultations prior to completion of impact report

(a) Prior to completing an environmental impact report, every local lead agency shall consult with, and obtain comments from, each responsible agency, any public agency that has jurisdiction by law with respect to the project, and any city or county that borders on a city or county within which the project is located unless otherwise designated annually by agreement between the local lead agency and the city or county, and may consult with any person who has special expertise with respect to any environmental impact involved. In the case of a project described in subdivision (c) of Section 21065, the local lead agency shall, upon the request of the project applicant, provide for early consultation to identify the range of actions, alternatives, mitigation measures, and significant effects to be analyzed in depth in the environmental impact report. The local lead agency may consult with persons identified by the project applicant that the applicant believes will be concerned with the environmental effects of the project and may consult with members of the public who have made written request to be consulted on the project. A request by the project applicant for early consultation shall be made not later than 30 days after the date that the determination required by Section 21080.1 was made with respect to the project. The local lead agency may charge and collect a fee from the project applicant * * * in an amount that does not exceed the actual costs of the consultations.

(b) In the case of a project described in subdivision (a) of Section 21065, the lead agency may provide for early consultation to identify the range of actions, alternatives, mitigation measures, and significant effects to be analyzed in depth in the environmental impact report. At the request of the lead agency, the Office of Planning and Research shall ensure that each responsible agency, and any public agency that has jurisdiction by law with respect to the project, is notified regarding any early consultation.

(c) A responsible agency or other public agency shall only make substantive comments regarding those activities involved in a project that are within an area of expertise of the agency or that are required to be carried out or approved by the agency. Those comments shall be supported by specific documentation.

(Amended by Stats.1997, c. 415 (A.B.175), § 3.)

§ 21154. Issuance of project order by state; effect on impact report of local agency

Whenever any state agency, board, or commission issues an order which requires a local agency to carry out a project which may have a significant effect on the environment, any environmental impact report which the local agency may prepare shall be limited to consideration of those factors and alternatives which will not conflict with such order.

(Added by Stats.1972, c. 1154, p. 2276, § 14, eff. Dec. 5, 1972.)

§ 21157. Preparation; content; fee program

(a) A master environmental impact report may be prepared for any one of the following projects:

(1) A general plan, element, general plan amendment, or specific plan.

(2) A project that consists of smaller individual projects which will be carried out in phases.

(3) A rule or regulation which will be implemented by subsequent projects.

(4) Projects which will be carried out or approved pursuant to a development agreement.

(5) Public or private projects which will be carried out or approved pursuant to, or in furtherance of, a redevelopment plan.

(6) A state highway project or mass transit project which will be subject to multiple stages of review or approval.

(7) A regional transportation plan or congestion management plan.

(8) A plan proposed by a local agency for the reuse of a federal military base or reservation that has been closed or that is proposed for closure.

(9) Regulations adopted by the Fish and Game Commission for the regulation of hunting and fishing.

(b) When a lead agency prepares a master environmental impact report, the document shall include all of the following:

(1) A detailed statement as required by Section 21100.

(2) A description of anticipated subsequent projects that would be within the scope of the master environmental impact report, that contains sufficient information with regard to the kind, size, intensity, and location of the subsequent projects, including, but not limited to, all of the following:

(A) The specific type of project anticipated to be undertaken.

(B) The maximum and minimum intensity of any anticipated subsequent project, such as the number of residences in a residential development, and, with regard to a public works facility, its anticipated capacity and service area.

(C) The anticipated location and alternative locations for any development projects.

(D) A capital outlay or capital improvement program, or other scheduling or implementing device that governs the submission and approval of subsequent projects.

(3) A description of potential impacts of anticipated subsequent projects for which there is not sufficient information reasonably available to support a full assessment of potential impacts in the master environmental impact report. This description shall not be construed as a limitation on the impacts which may be considered in a focused environmental impact report.

(c) Lead agencies may develop and implement a fee program in accordance with applicable provisions of law to generate the revenue necessary to prepare a master environmental impact report.

(Amended by Stats.1996, c. 444 (S.B.2073), § 2.)

§ 21157.1. Review of subsequent projects described in report; requirements

The preparation and certification of a master environmental impact report, if prepared and certified consistent with this division, may allow for the limited review of subsequent projects that were described in the master environmental impact report as being within the scope of the report, in accordance with the following requirements:

(a) The lead agency for a subsequent project shall be the lead agency or any responsible agency identified in the master environmental impact report.

(b) The lead agency shall prepare an initial study on any proposed subsequent project. This initial study shall analyze whether the subsequent project may cause any significant effect on the environment that was not examined in the master environmental impact report and whether the subsequent project was described in the master environmental impact report as being within the scope of the report.

(c) If the lead agency, based on the initial study, determines that a proposed subsequent project will have no additional significant effect on the environment, as defined in subdivision (d) of Section 21158, that was not identified in the master environmental impact report and that no new or additional mitigation measures or alternatives may be required, the lead agency shall make a written finding based upon the information contained in the initial study that the subsequent project is within the scope of the project covered by the master environmental impact report. No new environmental document nor findings pursuant to Section 21081 shall be required by this division. Prior to approving or carrying out the proposed subsequent project, the lead agency shall provide notice of this fact pursuant to Section 21092 and incorporate all feasible mitigation measures or feasible alternatives set forth in the master environmental impact report which are appropriate to the project. Whenever a lead agency approves or determines to carry out any subsequent project pursuant to this section, it shall file a notice pursuant to Section 21108 or 21152.

(d) Where a lead agency cannot make the findings required in subdivision (c), the lead agency shall prepare, pursuant to Section 21157.7, either a mitigated negative declaration or environmental impact report.

(Added by Stats.1993, c. 1130 (A.B.1888), § 18. Amended by Stats.1994, c. 1294 (A.B.314), § 13, eff. Oct. 4, 1994.)

§ 21157.5. Mitigated negative declarations; preparation; conditions; alternative

(a) A proposed mitigated negative declaration shall be prepared for any proposed subsequent project if both of the following occur:

(1) An initial study has identified potentially new or additional significant effects on the environment that were not analyzed in the master environmental impact report.

(2) Feasible mitigation measures or alternatives will be incorporated to revise the proposed subsequent project, before the negative declaration is released for public review, in order to avoid the effects or mitigate the effects to a point where clearly no significant effect on the environment will occur.

(b) If there is substantial evidence in light of the whole record before the lead agency that the proposed subsequent project may have a significant effect on the environment and a mitigated negative declaration is not prepared, the lead agency shall prepare an environmental impact report or a focused environmental impact report pursuant to Section 21158.

(Added by Stats.1993, c. 1130 (A.B.1888), § 18.)

§ 21158. Purpose; content; additional significant effect on the environment

(a) A focused environmental impact report is an environmental impact report on a subsequent project identified in a master environmental impact report. A focused environmental impact report may be utilized only if the lead agency finds that the analysis in the master environmental impact report of cumulative impacts, growth inducing impacts, and irreversible significant effects on the environment is adequate for the subsequent project. The focused environmental impact report shall incorporate, by reference, the master environmental impact report and analyze only the subsequent project's additional significant effects on the environment, as defined in subdivision (d), and any new or additional mitigation measures or alternatives that were not identified and analyzed by the master environmental impact report.

(b) The focused environmental impact report need not examine those effects which the lead agency finds were one of the following:

(1) Mitigated or avoided pursuant to paragraph (1) of subdivision (a) of Section 21081 as a result of mitigation measures identified in the master environmental impact report which will be required as part of the approval of the subsequent project.

(2) Examined at a sufficient level of detail in the master environmental impact report to enable those significant environmental effects to be mitigated or avoided by specific revisions to the project, the imposition of conditions, or by other means in connection with the approval of the subsequent project.

(3) Subject to a finding pursuant to paragraph (2) of subdivision (a) of Section 21081.

(c) A focused environmental impact report on any subsequent project shall analyze any significant effects on the environment where substantial new or additional information shows that the adverse environmental impact may be more significant than was described in the master environmental impact report. The substantial new or additional information may also show that mitigation measures or alternatives identified in the master environmental impact report, which were previously determined to be infeasible, are feasible and will avoid or reduce the significant effects on the environment of the subsequent project to a level of insignificance.

(d) For purposes of this chapter, "additional significant effects on the environment" are those project specific effects on the environment which were not addressed as significant effects on the environment in the master environmental impact report.

(e) Nothing in this chapter is intended to limit or abridge the ability of a lead agency to focus upon the issues that are ripe for decision at each level of environmental review, or to exclude duplicative analysis of environmental effects examined in previous environmental impact reports pursuant to Section 21093.

(Added by Stats.1993, c. 1130 (A.B.1888), § 18. Amended by Stats.1994, c. 1294 (A.B.314), § 16, eff. Oct. 4, 1994.)

§ 21161. Completion of impact report; notice; validity of project

Whenever a public agency has completed an environmental impact report, it shall cause a notice of completion of that report to be filed with the Office of Planning and Research. The notice of completion shall briefly identify the project and shall indicate that an environmental impact report has been prepared. Failure to file the notice required by this section shall not affect the validity of a project.

(Added by Stats.1972, c. 1154, p. 2276, § 15, eff. Dec. 5, 1972. Amended by Stats.1984, c. 571, § 2.)

§ 21165. Lead agency; preparation of impact report

When a project is to be carried out or approved by two or more public agencies, the determination of whether the project may have a significant effect on the environment shall be made by the lead agency; and such agency shall prepare, or cause to be prepared by contract, the environmental impact report for the project, if such a report is required by this division. In the event that a dispute arises as to which is the lead agency, any public agency, or in the case of a project described in subdivision (c) of Section 21065 the applicant for such project, may submit the question to the Office of Planning and Research, and the Office of Planning and Research shall designate, within 21 days of receiving such request, the lead agency, giving due consideration to the capacity of such agency to adequately fulfill the requirements of this division.

(Added by Stats.1972, c. 1154, p. 2277, § 16, eff. Dec. 5, 1972. Amended by Stats.1977, c. 1200, p. 4002, § 15.)

§ 21166. Subsequent or supplemental impact report; conditions

When an environmental impact report has been prepared for a project pursuant to this division, no subsequent or supplemental environmental impact report shall be required by the lead agency or by any responsible agency, unless one or more of the following events occurs:

(a) Substantial changes are proposed in the project which will require major revisions of the environmental impact report.

(b) Substantial changes occur with respect to the circumstances under which the project is being undertaken which will require major revisions in the environmental impact report.

(c) New information, which was not known and could not have been known at the time the environmental impact report was certified as complete, becomes available.

(Added by Stats.1972, c. 1154, p. 2277, § 16, eff. Dec. 5, 1972. Amended by Stats.1977, c. 1200, p. 4003, § 16.)

§ 21167. Commencement of actions or proceedings; time

Any action or proceeding to attack, review, set aside, void, or annul the following acts or decisions of a public agency on the grounds of noncompliance with this division shall be commenced as follows:

(a) An action or proceeding alleging that a public agency is carrying out or has approved a project which may have a significant effect on the environment without having determined whether the project may have a significant effect on the environment shall be commenced within 180 days from the date of the public agency's decision to carry out or approve the project, or, if a project is undertaken without a formal decision by the public agency, within 180 days from the date of commencement of the project.

(b) Any action or proceeding alleging that a public agency has improperly determined whether a project may have a significant effect on the environment shall be commenced within 30 days from the date of the filing of the notice required by subdivision (a) of Section 21108 or subdivision (a) of Section 21152.

(c) Any action or proceeding alleging that an environmental impact report does not comply with this division shall be commenced within 30 days from the date of the filing of the notice required by subdivision (a) of Section 21108 or subdivision (a) of Section 21152 by the lead agency.

(d) Any action or proceeding alleging that a public agency has improperly determined that a project is not subject to this division pursuant to subdivision (b) of Section 21080 or pursuant to Section 21085 or 21172 shall be commenced within 35 days from the date of the filing by the public agency, or person specified in subdivision (b) or (c) of Section 21065, of the notice authorized by subdivision (b) of Section 21108 or subdivision (b) of Section 21152. If the notice has not been filed, the action or proceeding shall be commenced within 180 days from the date of the public agency's decision to carry out or approve the project, or, if a project is undertaken without a formal decision by the public agency, within 180 days from the date of commencement of the project.

(e) Any action or proceeding alleging that any other act or omission of a public agency does not comply with this division shall be commenced within 30 days from the date of the filing of the notice required by subdivision (a) of Section 21108 or subdivision (a) of Section 21152.

(f) If a person has made a written request to the public agency for a copy of the notice specified in Section 21108 or 21152 prior to the date on which the agency approves or determines to carry out the project, then not later than five days from the date of the agency's action, the public agency shall deposit a written copy of the notice addressed to that person in the United States mail, first-class postage prepaid. The date upon which this notice is mailed shall not affect the time periods specified in subdivisions (b), (c), (d), and (e).

(Added by Stats.1972, c. 1154, p. 2277, § 16, eff. Dec. 5, 1972. Amended by Stats.1974, c. 56, p. 125, § 3, eff. March 4, 1974; Stats.1977, c. 1200, p. 4003, § 17; Stats.1994, c. 1294 (A.B.314), § 19, eff. Oct. 4, 1994; Stats.1995, c. 801 (A.B.1860), § 1.)

§ 21167.6. **Record of proceedings; clerk's transcript on appeal; filing briefs on appeal; date of appeal for hearing**

Notwithstanding any other provision of law, in all actions or proceedings brought pursuant to Section 21167, except those involving the Public Utilities Commission, all of the following shall apply:

(a) At the time that the action or proceeding is filed, the plaintiff or petitioner shall file a request that the respondent public agency prepare the record of proceedings relating to the subject of the action or proceeding. The request, together with the complaint or petition, shall be served personally upon the public agency not later than 10 business days from the date that the action or proceeding was filed.

(b)(1) The public agency shall prepare and certify the record of proceedings not later than 60 days from the date that the request specified in subdivision (a) was served upon the public agency. Upon certification, the public agency shall lodge a copy of the record of proceedings with the court and shall serve on the parties notice that the record of proceedings has been certified and lodged with the court. The parties shall pay any reasonable costs or fees imposed for the preparation of the record of proceedings in conformance with any law or rule of court.

(2) The plaintiff or petitioner may elect to prepare the record of proceedings or the parties may agree to an alternative method of preparation of the record of proceedings, subject to certification of its accuracy by the public agency, within the time limit specified in this subdivision.

(c) The time limit established by subdivision (b) may be extended only upon the stipulation of all parties who have been properly served in the action or proceeding or upon order of the court. Extensions shall be liberally granted by the court when the size of the record of proceedings renders infeasible compliance with that time limit. There is no limit on the number of extensions that may be granted by the court, but no single extension shall exceed 60 days unless the court determines that a longer extension is in the public interest.

(d) If the public agency fails to prepare and certify the record within the time limit established in paragraph (1) of subdivision (b), or any continuances of that time limit, the plaintiff or petitioner may move for sanctions, and the court may, upon that motion, grant appropriate sanctions.

(e) The record of proceedings shall include, but is not limited to, all of the following items:

(1) All project application materials.

(2) All staff reports and related documents prepared by the respondent public agency with respect to its compliance with the substantive and procedural requirements of this division and with respect to the action on the project.

(3) All staff reports and related documents prepared by the respondent public agency and written testimony or documents submitted by any person relevant to any findings or statement of overriding considerations adopted by the respondent agency pursuant to this division.

(4) Any transcript or minutes of the proceedings at which the decisionmaking body of the respondent public agency heard testimony on, or considered any environmental document on, the project, and any transcript or minutes of proceedings before any advisory body to the respondent public agency that were presented to the decisionmaking body prior to action on the environmental documents or on the project.

(5) All notices issued by the respondent public agency to comply with this division or with any other law governing the processing and approval of the project.

(6) All written comments received in response to, or in connection with, environmental documents prepared for the project, including responses to the notice of preparation.

(7) All written evidence or correspondence submitted to, or transferred from, the respondent public agency with respect to compliance with this division or with respect to the project.

(8) Any proposed decisions or findings submitted to the decisionmaking body of the respondent public agency by its staff, or the project proponent, project opponents, or other persons.

(9) The documentation of the final public agency decision, including the final environmental impact report, mitigated negative declaration, or negative declaration, and all documents, in addition to those referenced in paragraph (3), cited or relied on in the findings or in a statement of overriding considerations adopted pursuant to this division.

(10) Any other written materials relevant to the respondent public agency's compliance with this division or to its decision on the merits of the project, including the initial study, any drafts of any environmental document, or portions thereof, that have been released for public review, and copies of studies or other documents relied upon in any environmental document prepared for the project and either made available to the public during the public review period or included in the respondent public agency's files on the project, and all internal agency communications, including staff notes and memoranda related to the project or to compliance with this division.

(11) The full written record before any inferior administrative decisionmaking body whose decision was appealed to a superior administrative decisionmaking body prior to the filing of litigation.

(f) In preparing the record of proceedings, the party preparing the record shall strive to do so at reasonable cost in light of the scope of the record.

(g) The clerk of the superior court shall prepare and certify the clerk's transcript on appeal not later than 60 days from the date that the notice designating the papers or records to be included in the clerk's transcript was filed with the superior court, if the party or parties pay any costs or fees for the preparation of the clerk's transcript imposed in conformance with any law or rules of court. Nothing in this subdivision precludes an election to proceed by appendix, as provided in Rule 5.1 of the California Rules of Court.

(h) Extensions of the period for the filing of any brief on appeal may be allowed only by stipulation of the parties or by order of the court for good cause shown. Extensions for the filing of a brief on appeal shall be limited to one 30-day extension for the preparation of an opening brief, and one 30-day extension for the preparation of a responding brief, except that the court may grant a longer extension or additional extensions if it determines that there is a substantial likelihood of settlement that would avoid the necessity of completing the appeal.

(i) At the completion of the filing of briefs on appeal, the appellant shall notify the court of the completion of the filing of briefs, whereupon the clerk of the reviewing court shall set the appeal for hearing on the first available calendar date.

(Amended by Stats.2002, c. 1121 (S.B.1393), § 4.)

§ 21167.6.5. Naming of recipient of an approval that is subject of action or proceeding as real party in interest; service of petition or complaint; list of responsible agencies and any public agency having jurisdiction over a natural resource affected by the project; failure to name potential parties; right to intervene

(a) The petitioner or plaintiff shall name, as a real party in interest, any recipient of an approval that is the subject of an action or proceeding brought pursuant to Section 21167, 21168, or 21168.5, and shall serve the petition or complaint on that real party in interest, by personal service, mail facsimile, or any other method permitted by law not later than 20 business days following service of the petition or complaint on the public agency.

(b) The public agency shall provide the petitioner or plaintiff, not later than 10 business days following service of the petition or complaint on the public agency, with a list of responsible agencies and any public agency having jurisdiction over a natural resource affected by the project.

(c) The petitioner or plaintiff shall provide the responsible agencies, and any public agency having jurisdiction over a natural resource affected by the project, with notice of the action or proceeding within 15 days of receipt of the list described in subdivision (b).

(d) Failure to name potential parties, other than those described in subdivision (a) or (b), is not grounds for dismissal pursuant to Section 389 of the Code of Civil Procedure.

(e) Nothing in this section is intended to affect an existing right of a party to intervene in the action.

(Added by Stats.2002, c. 1121 (S.B.1393), § 5.)

§ 21167.8. Settlement meeting; presettlement and settlement statements; further settlement conference; failure to participate

(a) Not later than 20 days from the date of service upon a public agency of a petition or complaint brought pursuant to Section 21167, the public agency shall file with the court a notice setting forth the time and place at which all parties shall meet and attempt to settle the litigation. The meeting shall be scheduled and held not later than 45 days from the date of service of the petition or complaint upon the public agency. The notice of the settlement meeting shall be served by mail upon the counsel for each party. If the public agency does not know the identity of counsel for any party, the notice shall be served by mail upon the party for whom counsel is not known.

(b) At the time and place specified in the notice filed with the court, the parties shall meet and confer regarding anticipated issues to be raised in the litigation and shall attempt in good faith to settle the litigation and the dispute which forms the basis of the litigation. The settlement meeting discussions shall be comprehensive in nature and shall focus on the legal issues raised by the parties concerning the project that is the subject of the litigation.

(c) The settlement meeting may be continued from time to time without postponing or otherwise delaying other applicable time limits in the litigation. The settlement meeting is intended to be conducted concurrently with any judicial proceedings.

(d) If the litigation is not settled, the court, in its discretion, may, or at the request of any party, shall, schedule a further settlement conference before a judge of the superior court. If the petition or complaint is later heard on its merits, the judge hearing the matter shall not be the same judge conducting the settlement conference, except in counties that have only one judge of the superior court.

(e) The failure of any party, who was notified pursuant to subdivision (a), to participate in the litigation settlement process, without good cause, may result in an imposition of sanctions by the court.

(f) Not later than 30 days from the date that notice of certification of the record of proceedings was filed and served in accordance with Section 21167.6, the petitioner or plaintiff shall file and serve on all other parties a statement of issues which the petitioner or plaintiff intends to raise in any brief or at any hearing or trial. Not later than 10 days from the date on which the respondent or real party in interest has been served with the statement of issues from the petitioner or plaintiff, each respondent and real party in interest shall file and serve on all other parties a statement of issues which that party intends to raise in any brief or at any hearing or trial.

(Added by Stats.1984, c. 1514, § 13. Amended by Stats.1993, c. 1130 (A.B.1888), § 22; Stats.1994, c. 1294 (A.B.314), § 23, eff. Oct. 4, 1994; Stats.1995, c. 801 (A.B.1860), § 2.)

§ 21168.9. Public agency actions; noncompliance with division; court order; content; restrictions

(a) If a court finds, as a result of a trial, hearing, or remand from an appellate court, that any determination, finding, or decision of a public agency has been made without compliance with this division, the court shall enter an order that includes one or more of the following:

(1) A mandate that the determination, finding, or decision be voided by the public agency, in whole or in part.

(2) If the court finds that a specific project activity or activities will prejudice the consideration or implementation of particular mitigation measures or alternatives to the project, a mandate that the public agency and any real parties in interest suspend any or all specific project activity or activities, pursuant to the determination, finding, or decision, that could result in an adverse change or alteration to the physical environment, until the public agency has taken any actions that may be necessary to bring the determination, finding, or decision into compliance with this division.

(3) A mandate that the public agency take specific action as may be necessary to bring the determination, finding, or decision into compliance with this division.

(b) Any order pursuant to subdivision (a) shall include only those mandates which are necessary to achieve compliance with this division and only those specific project activities in noncompliance with this division. The order shall be made by the issuance of a peremptory writ of mandate specifying what action by the public agency is necessary to comply with this division. However, the order shall be limited to that portion of a determination, finding, or decision or the specific project activity or activities found to be in noncompliance only if a court finds that (1) the portion or specific project activity or activities are severable, (2) severance will not prejudice complete and full compliance with this division, and (3) the court has not found the remainder of the project to be in noncompliance with this division. The trial court shall retain jurisdiction over the public agency's proceedings by way of a return to the peremptory writ until the court has determined that the public agency has complied with this division.

(c) Nothing in this section authorizes a court to direct any public agency to exercise its discretion in any particular way. Except as expressly provided in this section, nothing in this section is intended to limit the equitable powers of the court.

(Added by Stats.1984, c. 1213, § 1. Amended by Stats.1993, c. 1131 (S.B.919), § 9.)

Exhibit 5
Education Code Sections Cited

§ 17025. Prior written approval of department of general services; certification by self-certifying district or board

(a) The board shall not authorize a contract for the construction of any new school, or for the addition to, or reconstruction or alteration of, any existing building, for lease-purchase to any school district unless the applicant district has submitted plans therefor to the Department of General Services and obtained the written approval of the department pursuant to Article 3 (commencing with Section 17280) of Chapter 3 of Part 10.5.

(b) The board, or the self-certifying district, as applicable, shall certify the compliance of a project with Sections 17212, 17212.5, and 17213, with Division 13 (commencing with Section 21000) of the Public Resources Code, and with any other law that applies to that project, but may require documentation of compliance only as to requirements that are applicable under this chapter. Notwithstanding any other law, for purposes of Division 13 (commencing with Section 21000) of the Public Resources Code, the applicant district shall be deemed to be the "lead agency" with regard to any project funded for that district under this chapter.

(Added by Stats.1996, c. 277 (S.B.1562), § 2, operative Jan. 1, 1998.)

§ 66031. Actions subject to mediation proceeding; selecting a mediator; considerations; failure to select a mediator

(a) Notwithstanding any other provision of law, any action brought in the superior court relating to any of the following subjects may be subject to a mediation proceeding conducted pursuant to this chapter:

(1) The approval or denial by a public agency of any development project.

(2) Any act or decision of a public agency made pursuant to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code).

(3) The failure of a public agency to meet the time limits specified in Chapter 4.5 (commencing with Section 65920), commonly known as the Permit Streamlining Act, or in the Subdivision Map Act (Division 2 (commencing with Section 66410)).

(4) Fees determined pursuant to Sections 53080 to 53082, inclusive, or Chapter 4.9 (commencing with Section 65995).

(5) Fees determined pursuant to Chapter 5 (commencing with Section 66000).

(6) The adequacy of a general plan or specific plan adopted pursuant to Chapter 3 (commencing with Section 65100).

(7) The validity of any sphere of influence, urban service area, change of organization or reorganization, or any other decision made pursuant to the Cortese–Knox Local Government Reorganization Act (Division 3 (commencing with Section 56000) of Title 5).

(8) The adoption or amendment of a redevelopment plan pursuant to the Community Redevelopment Law (Part 1 (commencing with Section 33000) of Division 24 of the Health and Safety Code).

(9) The validity of any zoning decision made pursuant to Chapter 4 (commencing with Section 65800).

(10) The validity of any decision made pursuant to Article 3.5 (commencing with Section 21670) of Chapter 4 of Part 1 of Division 9 of the Public Utilities Code.

§ 66031.

(b) Within five days after the deadline for the respondent or defendant to file its reply to an action, the court may invite the parties to consider resolving their dispute by selecting a mutually acceptable person to serve as a mediator, or an organization or agency to provide a mediator.

(c) In selecting a person to serve as a mediator, or an organization or agency to provide a mediator, the parties shall consider the following:

(1) The council of governments having jurisdiction in the county where the dispute arose.

(2) Any subregional or countywide council of governments in the county where the dispute arose.

(3) The Office of Permit Assistance within the Trade and Commerce Agency, pursuant to its authority in Article 1 (commencing with Section 15399.50) of Chapter 11 of Part 6.7 of Division 3 of Title 2.

(4) Any other person with experience or training in mediation including those with experience in land use issues, or any other organization or agency which can provide a person with experience or training in mediation, including those with experience in land use issues.

(d) If the court invites the parties to consider mediation, the parties shall notify the court within 30 days if they have selected a mutually acceptable person to serve as a mediator. If the parties have not selected a mediator within 30 days, the action shall proceed. The court shall not draw any implication, favorable or otherwise, from the refusal by a party to accept the invitation by the court to consider mediation. Nothing in this section shall preclude the parties from using mediation at any other time while the action is pending.

(Added by Stats.1994, c. 300 (S.B.517), § 1. Amended by Stats.1995, c. 686 (S.B.660), § 7, eff. Oct. 10, 1995, operative Jan. 1, 1996; Stats.1996, c. 799 (S.B.1748), § 7.)

§ 66034. Failure of mediation to resolve action; settlement conferences

If the mediation does not resolve the action, the court may, in its discretion, schedule a settlement conference before a judge of the superior court. If the action is later heard on its merits, the judge hearing the action shall not be the same judge who conducted the settlement conference, except in counties with only one judge of the superior court.

(Added by Stats.1994, c. 300 (S.B.517), § 1.)

Title 5, California Code of Regulations Sections Cited

§ 14011. Procedures for Site Acquisition — State–Funded School Districts.

A state–funded school district is defined as a school district having a project funded under Chapter 12.5 (commencing with Section 17070.10) of the Education Code. A state–funded school district, before acquiring title to real property for school use, shall obtain written approval from the California Department of Education using the following procedures:

(a) Request a preliminary conference with a consultant from the School Facilities Planning Division and in consultation review and evaluate sites under final consideration.

(b) Contact the School Facilities Planning Division of the California Department of Education to obtain a "School Facilities Planning Division Field Site Review," form SFPD 4.0, published by the California Department of Education, as last amended in December 1999 and incorporated into this section by reference, in toto, which lists the site options in order of merit according to the site selection standards delineated in Section 14010.

(c) Prepare a statement of policies as delineated on the "School Facilities Planning Division School Site Report," form SFPD 4.02, as last amended in December 1999 and incorporated into this section by reference, in toto, covering the range and organization of grades to be served, the transportation of pupils, and the ultimate maximum pupil enrollment to be housed on the site. Prepare a statement showing how the site is appropriate in size as justified by the school district's Facilities Master Plan, including acreage increases above the California Department of Education recommendation made to compensate for off–site mitigation. A school district may choose, in place of a master plan, a developer fee justification document or a five–year plan if it addresses enrollment projections, needed schools, and site sizes.

(d) Prepare maps showing present and proposed school sites, significant roads or highways, unsanitary or hazardous installations, such as airports or industries and the indicated boundary of the pupil attendance area to be served as delineated on form SFPD 4.02.

(e) Meet with appropriate local government, recreation, and park authorities to consider possible joint use of the grounds and buildings and to coordinate the design to benefit the intended users as required by Education Code Section 35275.

(f) Give written notice to the local planning agency having jurisdiction to review the proposed school site or addition to an existing school site and request a written report from the local planning agency of the investigations and recommendations for each proposed site with respect to conformity with the adopted general plan as required by Public Resources Code Section 21151.2 and Government Code Section 65402.

(g) Comply with Education Code Sections 17212 and 17212.5, with particular emphasis upon an engineering investigation made of the site to preclude locating the school on terrain that may be potentially hazardous:

(1) The geological and soils engineering study shall address all of the following:

(A) Nature of the site including a discussion of liquefaction, subsidence or expansive soils, slope, stability, dam or flood inundation and street flooding.

(B) Whether the site is located within a special study zone as defined in Education Code Section 17212.

(C) Potential for earthquake or other geological hazard damage.

(D) Whether the site is situated on or near a pressure ridge, geological fault or fault trace that may rupture during the life of the school building and the student risk factor.

(E) Economic feasibility of the construction effort to make the school building safe for occupancy.

(2) Other studies shall include the following:

(A) Population trends

(B) Transportation

(C) Water supply

(D) Waste disposal facilities

(E) Utilities

(F) Traffic hazards

(G) Surface drainage conditions

(H) Other factors affecting initial and operating costs.

(h) Prepare an environmental impact report, or negative declaration in compliance with the Environmental Quality Act, Public Resources Code, Division 13, (commencing with Section 21000 with particular attention to Section 21151.8). As required by Education Code Section 17213, the written findings of the environmental impact report or negative declaration must include a statement verifying that the site to be acquired for school purposes is not currently or formerly a hazardous, acutely hazardous substance release, or solid waste disposal site or, if so, that the wastes have been removed. Also, the written findings must state that the site does not contain pipelines which carry hazardous wastes or substances other than a natural gas supply line to that school or neighborhood. If hazardous air emissions are identified, the written findings must state that the health risks do not and will not constitute an actual or potential danger of public health of students or staff. If corrective measures of chronic or accidental hazardous air emissions are required under an existing order by another jurisdiction, the governing board shall make a finding that the emissions have been mitigated prior to occupancy of the school.

(i) Consult with, or demonstrate that the lead agency, if other than the district preparing the environmental impact report or negative declaration, has consulted with the appropriate city/county agency and with any air pollution control district or air quality management district having jurisdiction, concerning any facilities having hazardous or acutely hazardous air emissions within one–fourth of a mile of the proposed school site as required by Education Code Section 17213.

(j) For purposes of Environmental Site Assessment, school districts shall comply with Education Code sections 17210.1, 17213.1, and 17213.2.

(k) Follow the recommendations of the State Superintendent of Public Instruction report based upon the Department of Transportation, Division of Aeronautics, findings, if the proposed site is within two miles of the center line of an airport runway or proposed runway as required by Education Code Section 17215.

(l) Follow the standards for school site selection in Section 14010 of this article.

(m) Conduct a public hearing by the governing board of the school district as required in Education Code Section 17211 to evaluate the property using the standards described in Section 14010 of this article. The school district's facility advisory committee may provide an evaluation of the proposed site to the governing board.

(n) Submit the request for exemption from a standard in Section 14010 of this article, with a description of the mitigation that overrides the standard, to the California Department of Education.

(o) Certify there are no available alternative school district–owned sites for the project deemed usable for school purposes by the California Department of Education or certify that the school district intends to sell an available alternative school district–owned site and use the proceeds from the sale for the purchase of the new school site.

NOTE: Authority cited: Sections 17251(b) and 33031, Education Code. Reference: Sections 17070.50, 17072.12, 17210.1, 17211, 17212, 17213 and 17251(b), Education Code.

HISTORY

1. Renumbering and amendment of section 14010 to section 14011 and adoption of NOTE filed 11–12–93; operative 12–13–93 (Register 93, No. 46).
2. Amendment of section heading, section and NOTE filed 10–30–2000; operative 10–30–2000 pursuant to Government Code section 11343.4(d) (Register 2000, No. 44).

§ 14012. Procedures for Site Acquisition – Locally–Funded School Districts.

A locally–funded school district is defined as a school district with a project not applying for funding from any state program administered by the State Allocation Board as defined in Chapter 12.0 (commencing with Section 17000) or Chapter 12.5 (commencing with Section 17070.10) of the Education Code. A locally–funded school district, before acquiring title to real property for school use, shall:

HISTORY

1. Repealer of Article 2 heading and Section 57120 filed 4–27–83; effective thirtieth day thereafter (Register 83, No. 18).

§ 57121. Application.

(a) When reviewing proposals from Community College districts for acquisition of land to be used as a site for college facilities, the Chancellor shall also review the Community College district's Initial Study (section 15080, title 14, California Administrative Code) of the development intended on the land and include the result of this review in a site review report.

(b) The Chancellor shall require that proposals for initial construction of facilities for a new campus be accompanied by a long–range plan for physical development approved by the district governing board which shows the intended use of all portions of the land and approximate location of buildings and facilities.

(c) The Chancellor shall require that an Initial Study, pursuant to section 15080, title 14, California Administrative Code, be submitted to the Chancellor's office concurrent with other required information.

(d) The Chancellor shall require that a copy of the (1) finding of Categorical Exemption (section 15023, title 14, California Administrative Code); Negative Declaration (section 15083, Title 14, California Administrative Code); or Notice of Completion (section 15085(c), title 14, California Administrative Code), whichever is appropriate, be submitted to his office concurrently with preliminary plans.

(e) The Chancellor shall require a copy of the findings of Categorical Exemption or Notice of Determination (section 15085(g), Title 14, California Administrative Code), whichever is appropriate, be submitted to the Chancellor's office concurrently with plans submitted for approval in accordance with section 81837 of the Education Code.

(f) The Chancellor shall withhold authorization of the use of state funds for construction until requirements of the California Environmental Quality Act of 1970 have been met.

Subchapter 3. District Funded Construction Projects

§ 57150. Purpose.

The purpose of these regulations is to provide basic definitions, principles, and standards for use by the Chancellor of the California Community Colleges in considering any district–funded construction project subject to the requirements of section 81837 of the Education Code.

NOTE: Authority cited: Sections 66700, 70901, and 81836, Education Code. Reference: Sections 81836 and 81837, Education Code.

HISTORY

1. New chapter 3 (sections 57150–57158, not consecutive) filed 10–30–80; effective thirtieth day thereafter (Register 80, No. 44).
2. Amendment filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
3. Editorial correction of HISTORY 2 (Register 95, No. 23).

§ 57152. Definitions.

(a) "Capital Outlay Project" includes purchase of land and costs related thereto, including court costs, condemnation costs, legal fees, title fees, etc.; construction projects, including working drawings; and equipment related to a construction project regardless of cost or timing.

(b) "Construction Project" includes new construction, alteration, and extension or betterment of existing structures.

(c) "State–Funded Project" means a capital outlay project qualifying as a project pursuant to section 81805 of the Education Code, and for which a district requests or receives State funding assistance.

(d) "District–Funded Project" means a capital outlay project subject to the provisions of section 81837 of the Education Code for which any funds, other than state funds, are paid or to be paid for erecting, adding to, or altering any community college facility.

(e) "Five–Year Construction Plans" means a plan for capital construction for community college purposes of a community college district for the five–year period commencing with the next proposed year of funding.

NOTE: Authority cited: Sections 66700, 70901 and 81836, Education Code. Reference: Sections 81836 and 81837, Education Code.

HISTORY

1. Amendment filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
2. Editorial correction of HISTORY 1 (Register 95, No. 23).

§ 57154. Application.

In each case, the application for approval of plans for a district–funded project shall be accompanied by the plans and full, complete and accurate take–off of assignable and gross square feet of space, which shall comply with any and all requirements prescribed by the Chancellor.

NOTE: Authority cited: Sections 66700, 70901, and 81836, Education Code. Reference: Sections 81836 and 81837, Education Code.

HISTORY

1. Amendment filed 3–4–91 by Board of Governors of California Community Colleges with the Secretary of State; operative 4–5–91 (Register 91, No. 23). Submitted to OAL for printing only pursuant to Education Code Section 70901.5(b).
2. Editorial correction of HISTORY 1 (Register 95, No. 23).

§ 57156. Review.

The review and evaluation of plans for a district–funded project by the Chancellor, shall include the following elements:

(a) Review and evaluate each district–funded project with reference to the elements of the capital construction program specified in Education Code section 81821.

(b) The review and evaluation shall be directed particularly to ascertain whether the locally funded project is of appropriate size, is appropriately timed and is justified in terms of the elements of the capital construction plans and where applicable, the standards as adopted by the Board of Governors.

Chapter 3. Guidelines for Implementation of the California Environmental Quality Act

(State EIR Guidelines)

(Originally Printed 2–10–73)

Article 1. General

§ 15000. Authority.

The regulations contained in this chapter are prescribed by the Secretary for Resources to be followed by all state and local agencies in California in the implementation of the California Environmental Quality Act. These Guidelines have been developed by the Office of Planning and Research for adoption by the Secretary for Resources in accordance with Section 2108–3. Additional information may be obtained by writing:

SECRETARY FOR RESOURCES
ROOM 1311, 1416 NINTH STREET
SACRAMENTO, CA 95814

These Guidelines are binding on all public agencies in California.

[The next page is 665.]

HISTORY

1. New Chapter 3, Articles 1 through 10 (§§ 15000 through 15166, not consecutive) filed 2–7–73; designated effective upon filing as provided in Section 21083, Public Resources Code (Register 73, No. 6).
2. Amendment filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29).
3. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15001. Short Title.

These Guidelines may be cited as the "State CEQA Guidelines." Existing references to the "State EIR Guidelines" shall be construed to be references to the "State CEQA Guidelines."

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083 and 21087, Public Resources Code.

HISTORY

1. New section filed 1–3–75; designated effective 4–1–75 (Register 75, No. 1).
2. Amendment filed 1–7–82; effective thirtieth day thereafter (Register 82, No. 2).
3. Amendment filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29).
4. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15002. General Concepts.

(a) Basic Purposes of CEQA. The basic purposes of CEQA are to:

(1) Inform governmental decision makers and the public about the potential, significant environmental effects of proposed activities.

(2) Identify ways that environmental damage can be avoided or significantly reduced.

(3) Prevent significant, avoidable damage to the environment by requiring changes in projects through the use of alternatives or mitigation measures when the governmental agency finds the changes to be feasible.

(4) Disclose to the public the reasons why a governmental agency approved the project in the manner the agency chose if significant environmental effects are involved.

(b) Governmental Action. CEQA applies to governmental action. This action may involve:

(1) Activities directly undertaken by a governmental agency,

(2) Activities financed in whole or in part by a governmental agency, or

(3) Private activities which require approval from a governmental agency.

(c) Private Action. Private action is not subject to CEQA unless the action involves governmental participation, financing, or approval.

(d) Project. A "project" is an activity subject to CEQA. The term "project" has been interpreted to mean far more than the ordinary dictionary definition of the term. See Section 15378.

(e) Time for Compliance. A governmental agency is required to comply with CEQA procedures when the agency proposes to carry out or approve the activity. See Section 15004.

(f) Environmental Impact Reports and Negative Declarations. An environmental impact report (EIR) is the public document used by the governmental agency to analyze the significant environmental effects of a proposed project, to identify alternatives, and to disclose possible ways to reduce or avoid the possible environmental damage.

(1) An EIR is prepared when the public agency finds substantial evidence that the project may have a significant effect on the environment. See Section 15064(a)(1).

(2) When the agency finds that there is no substantial evidence that a project may have a significant environmental effect, the agency will prepare a "Negative Declaration" instead of an EIR. See Section 15070.

(g) Significant Effect on the Environment. A significant effect on the environment is defined as a substantial adverse change in the physical conditions which exist in the area affected by the proposed project. See Section 15382. Further, when an EIR identifies a significant effect, the government agency approving the project must make findings on whether the adverse environmental effects have been substantially reduced or if not, why not. See Section 15091.

(h) Methods for Protecting the Environment. CEQA requires more than merely preparing environmental documents. The EIR by itself does not control the way in which a project can be built or carried out. Rather, when an EIR shows that a project could cause substantial adverse changes in the environment, the governmental agency must respond to the information by one or more of the following methods:

(1) Changing a proposed project;

(2) Imposing conditions on the approval of the project;

(3) Adopting plans or ordinances to control a broader class of projects to avoid the adverse changes;

(4) Choosing an alternative way of meeting the same need;

(5) Disapproving the project;

(6) Finding that changes in, or alterations, the project are not feasible.

(7) Finding that the unavoidable, significant environmental damage is acceptable as provided in Section 15093.

(i) Discretionary Action. CEQA applies in situations where a governmental agency can use its judgment in deciding whether and how to carry out or approve a project. A project subject to such judgmental controls is called a "discretionary project." See Section 15357.

(1) Where the law requires a governmental agency to act on a project in a set way without allowing the agency to use its own judgment, the project is called "ministerial," and CEQA does not apply. See Section 15369.

(2) Whether an agency has discretionary or ministerial controls over a project depends on the authority granted by the law providing the controls over the activity. Similar projects may be subject to discretionary controls in one city or county and only ministerial controls in another. See Section 15268.

(j) Public Involvement. Under CEQA, an agency must solicit and respond to comments from the public and from other agencies concerned with the project. See Sections 15073, 15086, 15087 and 15088.

(k) Three Step Process. An agency will normally take up to three separate steps in deciding which document to prepare for a project subject to CEQA.

(1) In the first step the lead agency examines the project to determine whether the project is subject to CEQA at all. If the project is exempt, the process does not need to proceed any farther. The agency may prepare a notice of exemption. See Sections 15061 and 15062.

(2) If the project is not exempt, the lead agency takes the second step and conducts an initial study (Section 15063) to determine whether the project may have a significant effect on the environment. If the initial study shows that there is no substantial evidence that the project may have a significant effect, the lead agency prepares a negative declaration. See Sections 15070 et seq.

(3) If the initial study shows that the project may have a significant effect, the lead agency takes the third step and prepares an EIR. See Sections 15080 et seq.

(*l*) Certified Equivalent Programs. A number of environmental regulatory programs have been certified by the Secretary of the Resources Agency as involving essentially the same consideration of environmental issues as is provided by use of EIRs and negative declarations. Certified programs are exempt from preparing EIRs and negative declarations but use other documents instead. Certified programs are discussed in Article 17 and are listed in Section 15251.

(m) This section is intended to present the general concepts of CEQA in a simplified and introductory manner. If there are any conflicts between the short statement of a concept in this section and the provisions of other sections of these guidelines, the other sections shall prevail.

Angeles, 13 Cal. 3d 68 (1974); *Running Fence Corp.* v. *Superior Court*, 15 Cal. App. 3d 400 (1975).

History

1 New section filed 5–8–80; effective thirtieth day thereafter (Register 80, No.

endment filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29).

3. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15003. Policies.

In addition to the policies declared by the Legislature concerning environmental protection and administration of CEQA in Sections 21000, 21001, 21002, and 21002.1 of the Public Resources Code, the courts of this state have declared the following policies to be implicit in CEQA:

(a) The EIR requirement is the heart of CEQA. (*County of Inyo v. Yorty*, 32 Cal. App. 3d 795.)

(b) The EIR serves not only to protect the environment but also to demonstrate to the public that it is being protected. (*County of Inyo v. Yorty*, 32 Cal. App. 3d 795.)

(c) The EIR is to inform other governmental agencies and the public generally of the environmental impact of a proposed project. (*No Oil, Inc. v. City of Los Angeles*, 13 C. 3d 68.)

(d) The EIR is to demonstrate to an apprehensive citizenry that the agency has, in fact, analyzed and considered the ecological implications of its action. (*People ex rel. Department of Public Works v. Bosio*, 47 Cal. App. 3d 495.)

(e) The EIR process will enable the public to determine the environmental and economic values of their elected and appointed officials thus allowing for appropriate action come election day should a majority of the voters disagree. (*People v. County of Kern*, 39 Cal. App. 3d 830.)

(f) CEQA was intended to be interpreted in such a manner as to afford the fullest possible protection to the environment within the reasonable e of the statutory language. (*Friends of Mammoth v. Board of Super-*, 8 Cal. 3d 247.)

(g) The purpose of CEQA is not to generate paper, but to compel government at all levels to make decisions with environmental consequences in mind. (*Bozung v. LAFCO* (1975) 13 Cal.3d 263)

(h) The lead agency must consider the whole of an action, not simply its constituent parts, when determining whether it will have a significant environmental effect. (*Citizens Assoc. For Sensible Development of Bishop Area v. County of Inyo* (1985) 172 Cal.App.3d 151)

(i) CEQA does not require technical perfection in an EIR, but rather adequacy, completeness, and a good–faith effort at full disclosure. A court does not pass upon the correctness of an EIR's environmental conclusions, but only determines if the EIR is sufficient as an informational document. (*Kings County Farm Bureau v. City of Hanford* (1990) 221 Cal.App.3d 692)

(j) CEQA requires that decisions be informed and balanced. It must not be subverted into an instrument for the oppression and delay of social, economic, or recreational development or advancement. (*Laurel Heights Improvement Assoc. v. Regents of U.C.* (1993) 6 Cal.4th 1112 and *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553)

History

1. New section filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).
3. Editorial correction of 7–13–83 order filed 7–26–83 (Register 83, No. 33).
4. New subsections (g)–(j) filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

)04. Time of Preparation.

(a) Before granting any approval of a project subject to CEQA, every lead agency or responsible agency shall consider a final EIR or negative declaration or another document authorized by these guidelines to be used in the place of an EIR or negative declaration. See the definition of "approval" in Section 15352.

(b) Choosing the precise time for CEQA compliance involves a balancing of competing factors. EIRs and negative declarations should be prepared as early as feasible in the planning process to enable environmental considerations to influence project program and design and yet late enough to provide meaningful information for environmental assessment.

(1) With public projects, at the earliest feasible time, project sponsors shall incorporate environmental considerations into project conceptualization, design, and planning. CEQA compliance should be completed prior to acquisition of a site for a public project.

(2) To implement the above principles, public agencies shall not undertake actions concerning the proposed public project that would have a significant adverse effect or limit the choice of alternatives or mitigation measures, before completion of CEQA compliance. For example, agencies shall not:

(A) Formally make a decision to proceed with the use of a site for facilities which would require CEQA review, regardless of whether the agency has made any final purchase of the site for these facilities, except that agencies may designate a preferred site for CEQA review and may enter into land acquisition agreements when the agency has conditioned the agency's future use of the site on CEQA compliance.

(B) Otherwise take any action which gives impetus to a planned or foreseeable project in a manner that forecloses alternatives or mitigation measures that would ordinarily be part of CEQA review of that public project.

(3) With private projects, the Lead Agency shall encourage the project proponent to incorporate environmental considerations into project conceptualization, design, and planning at the earliest feasible time.

(c) The environmental document preparation and review should be coordinated in a timely fashion with the existing planning, review, and project approval processes being used by each public agency. These procedures, to the maximum extent feasible, are to run concurrently, not consecutively. When the lead agency is a state agency, the environmental document shall be included as part of the regular project report if such a report is used in its existing review and budgetary process.

Note: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21105, Public Resources Code; *Friends of Mammoth* v. *Board of Supervisors*, (1972) 8 Cal. 3d 247; *Mount Sutro Defense Committee* v. *Regents of the University of California*, (1978) 77 Cal. App. 3d 20.

History

1. New section filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).
3. New subsections (b)(2)–(b)(2)(B), subsection renumbering, amendment of subsection (c), and amendment of Note filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15005. Terminology.

The following words are used to indicate whether a particular subject in the Guidelines is mandatory, advisory, or permissive:

(a) "Must" or "shall" identifies a mandatory element which all public agencies are required to follow.

(b) "Should" identifies guidance provided by the Secretary for Resources based on policy considerations contained in CEQA, in the legislative history of the statute, or in federal court decisions which California courts can be expected to follow. Public agencies are advised to follow this guidance in the absence of compelling, countervailing considerations.

(c) "May" identifies a permissive element which is left fully to the discretion of the public agencies involved.

Note: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082 and 21083, Public Resources Code.

History

1. New section filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For history of former section, see Register 75, No. 1.

2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

3. Editorial correction of 7–13–83 order filed 7–26–83 (Register 83, No. 33).

§ 15006. Reducing Delay and Paperwork.

Public agencies should reduce delay and paperwork by:

(a) Integrating the CEQA process into early planning. (15004(c))

(b) Ensuring the swift and fair resolution of lead agency disputes. (15053)

(c) Identifying projects which fit within categorical exemptions and are therefore exempt from CEQA processing. (15300.4)

(d) Using initial studies to identify significant environmental issues and to narrow the scope of EIRs. (15063)

(e) Using a negative declaration when a project not otherwise exempt will not have a significant effect on the environment. (15070)

(f) Using a previously prepared EIR when it adequately addresses the proposed project. (15153)

(g) Consulting with state and local responsible agencies before and during preparation of an environmental impact report so that the document will meet the needs of all the agencies which will use it. (15083)

(h) Urging applicants, either before or after the filing of an application, to revise projects to eliminate possible significant effects on the environment, thereby enabling the project to qualify for a negative declaration rather than an environmental impact report. (15063(c)(2))

(i) Integrating CEQA requirements with other environmental review and consulting requirements. (Public Resources Code Section 21080.5)

(j) Eliminating duplication with federal procedures by providing for joint preparation of environmental documents with federal agencies and by adopting completed federal NEPA documents. (15227)

(k) Emphasizing consultation before an environmental impact report is prepared, rather than submitting adversary comments on a completed document. (15082(b))

(*l*) Combining environmental documents with other documents such as general plans. (15166)

(m) Eliminating repetitive discussions of the same issues by using environmental impact reports on programs, policies, or plans and tiering from reports of broad scope to those of narrower scope. (15152)

(n) Reducing the length of environmental impact reports by means such as setting appropriate page limits. (15141)

(o) Preparing analytic rather than encyclopedic environmental impact reports. (15142)

(p) Mentioning only briefly issues other than significant ones in EIRs. (15143)

(q) Writing environmental impact reports in plain language. (15140)

(r) Following a clear format for environmental impact reports. (15120)

(s) Emphasizing the portions of the environmental impact report that are useful to decision–makers and the public and reducing emphasis on background material. (15143)

(t) Using incorporation by reference. (15150)

(u) Making comments on environmental impact reports as specific as possible. (15204)

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003 and 21083, Public Resources Code.

HISTORY

1. New section filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For history of former section, see Register 80, No. 19.

2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

3. Amendment of subsections (g), (m) and (u) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15007. Amendments.

(a) These guidelines will be amended from time to time to match new developments relating to CEQA.

(b) Amendments to the guidelines apply prospectively only. New requirements in amendments will apply to steps in the CEQA process not yet undertaken by the date when agencies must comply with the amendments.

(c) If a document meets the content requirements in effect when the document is set out for public review, the document shall not need to be revised to conform to any new content requirements in guideline amendments taking effect before the document is finally approved.

(d) Public agencies shall comply with new requirements in amendments to the guidelines beginning with the earlier of the following two dates:

(1) The effective date of the agency's procedures amended to conform to the new guideline amendments; or

(2) The 120th day after the effective date of the guideline amendments.

(e) Public agencies may implement any permissive or advisory elements of the guidelines beginning with the effective date of the guideline amendments.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082 and 21087, Public Resources Code; *Stevens* v. *City of Glendale*, 125 Cal. App. 3d 986.

HISTORY

1. New section filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29).

2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

Article 2. General Responsibilities

§ 15020. General.

Each public agency is responsible for complying with CEQA and these Guidelines. A public agency must meet its own responsibilities under CEQA and shall not rely on comments from other public agencies or private citizens as a substitute for work CEQA requires the lead agency to accomplish. For example, a lead agency is responsible for the adequacy of its environmental documents. The lead agency shall not knowingly release a deficient document hoping that public comments will correct defects in the document.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082, 21082.1, Public Resources Code; *Russian Hill Improvement Association* v. *Board of Permit Appeals*, 44 Cal. App. 3d 158 (1975).

HISTORY

1. Repealer of Article 2 (Sections 15005 and 15006) and new Article 2 (Sections 15020–15025) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 80, No. 19; 75, No. 1; and 73, No. 50.

2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15021. Duty to Minimize Environmental Damage and Balance Competing Public Objectives.

(a) CEQA establishes a duty for public agencies to avoid or minimize environmental damage where feasible.

(1) In regulating public or private activities, agencies are required to give major consideration to preventing environmental damage.

(2) A public agency should not approve a project as proposed if there are feasible alternatives or mitigation measures available that would substantially lessen any significant effects that the project would have on the environment.

(b) In deciding whether changes in a project are feasible, an agency may consider specific economic, environmental, legal, social, and technological factors.

(c) The duty to prevent or minimize environmental damage is implemented through the findings required by Section 15091.

(d) CEQA recognizes that in determining whether and how a project should be approved, a public agency has an obligation to balance a variety of public objectives, including economic, environmental, and social factors and in particular the goal of providing a decent home and satisfying living environment for every Californian. An agency shall prepare a statement of overriding considerations as described in Section 15093 to reflect the ultimate balancing of competing public objectives when the

agency decides to approve a project that will cause one or more significant effects on the environment.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000, 21001, 21002, 21002.1 and 21081, Public Resources Code; *Francisco Ecology Center* v. *City and County of San Francisco*, (1975) 48 Cal. App. 3d 584; *Laurel Hills Homeowners Association* v. *City Council*, (1978) 83 Cal. App. 3d 515.

§ 15022. Public Agency Implementing Procedures.

(a) Each public agency shall adopt objectives, criteria, and specific procedures consistent with CEQA and these Guidelines for administering its responsibilities under CEQA, including the orderly evaluation of projects and preparation of environmental documents. The implementing procedures should contain at least provisions for:

(1) Identifying the activities that are exempt from CEQA. These procedures should contain:

(A) Provisions for evaluating a proposed activity to determine if there is no possibility that the activity may have a significant effect on the environment.

(B) A list of projects or permits over which the public agency has only ministerial authority.

(C) A list of specific activities which the public agency has found to be within the categorical exemptions established by these guidelines.

(2) Conducting initial studies.

(3) Preparing negative declarations.

(4) Preparing draft and final EIRs.

(5) Consulting with and obtaining comments from other public agencies and members of the public with regard to the environmental effects of projects.

(6) Assuring adequate opportunity and time for public review and comment on the Draft EIR or Negative Declaration.

(7) Evaluating and responding to comments received on environmental documents.

Assigning responsibility for determining the adequacy of an EIR or negative declaration.

(9) Reviewing and considering environmental documents by the person or decision making body who will approve or disapprove a project.

(10) Filing documents required or authorized by CEQA and these Guidelines.

(11) Providing adequate comments on environmental documents which are submitted to the public agency for review.

(12) Assigning responsibility for specific functions to particular units of the public agency.

(13) Providing time periods for performing functions under CEQA.

(b) Any district, including a school district, need not adopt objectives, criteria, and procedures of its own if it uses the objectives, criteria, and procedures of another public agency whose boundaries are coterminous with or entirely encompass the district.

(c) Public agencies should revise their implementing procedures to conform to amendments to these guidelines within 120 days after the effective date of the amendments. During the period while the public agency is revising its procedures, the agency must conform to any statutory changes in the California Environmental Quality Act that have become effective regardless of whether the public agency has revised its formally adopted procedures to conform to the statutory changes.

(d) In adopting procedures to implement CEQA, a public agency may adopt the State CEQA Guidelines through incorporation by reference. The agency may then adopt only those specific procedures or provisions described in subsection (a) which are necessary to tailor the general provisions of the guidelines to the specific operations of the agency. A public agency may also choose to adopt a complete set of procedures identifying in one document all the necessary requirements.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082, 21100.2 and 21151.5, Public Resources Code.

§ 15023. Office of Planning and Research (OPR).

(a) From time to time OPR shall review the State CEQA Guidelines and shall make recommendations for amendments to the Secretary for Resources.

(b) OPR shall receive and evaluate proposals for adoption, amendment, or repeal of categorical exemptions and shall make recommendations on the proposals to the Secretary for Resources. People making suggestions concerning categorical exemptions shall submit their recommendations to OPR with supporting information to show that the class of projects in the proposal either will or will not have a significant effect on the environment.

(c) The State Clearinghouse in the Office of Planning and Research shall be responsible for distributing environmental documents to State agencies, departments, boards, and commissions for review and comment.

(d) Upon request of a Lead Agency or a project applicant, OPR shall provide assistance in identifying the various responsible agencies and any federal agencies which have responsibility for carrying out or approving a proposed project.

(e) OPR shall ensure that state responsible agencies provide the necessary information to lead agencies in response to notices of preparation within at most 30 days after receiving a notice of preparation.

(f) OPR shall resolve disputes as to which agency is the lead agency for a project.

(g) OPR shall receive and file all notices of completion, determination, and exemption.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.4, 21083, 21086, 21087, 21108 and 21161, Public Resources Code.

HISTORY

1. Amendment of subsection (e) and new subsection (g) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15024. Secretary for Resources.

(a) The Guidelines shall be adopted by the Secretary for Resources. The Secretary shall make a finding that each class of projects given a categorical exemption will not have a significant effect on the environment.

(b) The Secretary may issue amendments to these Guidelines.

(c) The Secretary shall certify state environmental regulatory programs which meet the standards for certification in Section 21080.5, Public Resources Code.

(d) The Secretary shall receive and file notices required by certified state environmental regulatory programs.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.5, 21083, 21084, 21086, 21087, 21088 and 21152, Public Resources Code.

HISTORY

1. Amendment filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15025. Delegation of Responsibilities.

(a) A public agency may assign specific functions to its staff to assist in administering CEQA. Functions which may be delegated include but are not limited to:

(1) Determining whether a project is exempt.

(2) Conducting an initial study and deciding whether to prepare a draft EIR or negative declaration.

(3) Preparing a negative declaration or EIR.

(4) Determining that a negative declaration has been completed within a period of 105 days.

(5) Preparing responses to comments on environmental documents.

(6) Filing of notices.

(b) The decisionmaking body of a public agency shall not delegate the following functions:

(1) Reviewing and considering a final EIR or approving a negative declaration prior to approving a project.

(2) The making of findings as required by Sections 15091 and 15093.

(c) Where an advisory body such as a planning commission is required to make a recommendation on a project to the decisionmaking body, the advisory body shall also review and consider the EIR or negative declaration in draft or final form.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21082, Public Resources Code; *Kleist v. City of Glendale* (1976) 56 Cal. App. 3d 770.

Article 3. Authorities Granted to Public Agencies by CEQA

§ 15040. Authority Provided by CEQA.

(a) CEQA is intended to be used in conjunction with discretionary powers granted to public agencies by other laws.

(b) CEQA does not grant an agency new powers independent of the powers granted to the agency by other laws.

(c) Where another law grants an agency discretionary powers, CEQA supplements those discretionary powers by authorizing the agency to use the discretionary powers to mitigate or avoid significant effects on the environment when it is feasible to do so with respect to projects subject to the powers of the agency. Prior to January 1, 1983, CEQA provided implied authority for an agency to use its discretionary powers to mitigate or avoid significant effects on the environment. Effective January 1, 1983, CEQA provides express authority to do so.

(d) The exercise of the discretionary powers may take forms that had not been expected before the enactment of CEQA, but the exercise must be within the scope of the power.

(e) The exercise of discretionary powers for environmental protection shall be consistent with express or implied limitations provided by other laws.

NOTE: Authority cited: Sections 21083 and 2187, Public Resources Code. Reference: Sections 21000, 21001, 21002, 21002.1 and 21004, Public Resources Code; Section 4, Chapter 1438, Statutes of 1982; *Golden Gate Bridge, Etc., Dist.* v. *Muzzi*, (1978) 83 Cal. App. 3d 707; *E.D.F.* v. *Mathews*, 410 F. Supp. 336, 339 (D.D.C., 1976); *Friends of Mammoth* v. *Board of Supervisors*, (1972) 8 Cal. 3d 247; *Pinewood Investors* v. *City of Oxnard* (1982) 133 Cal. App. 3d 1030.

HISTORY

1. Repealer of Article 3 (Sections 15010–15016) and new Article 3 (Sections 15040–15045) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 82, No. 2; 80, No. 19; 78, No. 5; 76, No. 41; 75, Nos. 1 and 18; 74, Nos. 3 and 4; and 73, No. 50.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15041. Authority to Mitigate.

Within the limitations described in Section 15040:

(a) A lead agency for a project has authority to require feasible changes in any or all activities involved in the project in order to substantially lessen or avoid significant effects on the environment, consistent with applicable constitutional requirements such as the "nexus" and "rough proportionality" standards established by case law (Nollan v. California Coastal Commission (1987) 483 U.S. 825, Dolan v. City of Tigard, (1994) 512 U.S. 374, Ehrlich v. City of Culver City, (1996) 12 Cal. 4th 854.).

(b) When a public agency acts as a responsible agency for a project, the agency shall have more limited authority than a lead agency. The responsible agency may require changes in a project to lessen or avoid only the effects, either direct or indirect, of that part of the project which the agency will be called on to carry out or approve.

(c) With respect to a project which includes housing development, a lead or responsible agency shall not reduce the proposed number of housing units as a mitigation measure or alternative to lessen a particular significant effect on the environment if that agency determines that there is another feasible, specific mitigation measure or alternative that would provide a comparable lessening of the significant effect.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1 and 21085, Public Resources Code; *Golden Gate Bridge, Etc., District* v. *Muzzi* (1978) 83 Cal. App. 3d 707; and *Laurel Hills Homeowners Assn. v. City Council of City of Los Angeles* (1978) 83 Cal.App.3d 515.

HISTORY

1. Amendment of first paragraph, subsection (a) and NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15042. Authority to Disapprove Projects.

A public agency may disapprove a project if necessary in order to avoid one or more significant effects on the environment that would occur if the project were approved as proposed. A lead agency has broader authority to disapprove a project than does a responsible agency. A responsible agency may refuse to approve a project in order to avoid direct or indirect environmental effects of that part of the project which the responsible agency would be called on to carry out or approve. For example, an air quality management district acting as a responsible agency would not have authority to disapprove a project for water pollution effects that were unrelated to the air quality aspects of the project regulated by the district.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002 and 21002.1, Public Resources Code; *Friends of Mammoth* v. *Mono County*, 8 Cal. App. 3d 247; *San Diego Trust and Savings Bank* v. *Friends of Gill*, 121 Cal. App. 3d 203.

§ 15043. Authority to Approve Projects Despite Significant Effects.

A public agency may approve a project even though the project would cause a significant effect on the environment if the agency makes a fully informed and publicly disclosed decision that:

(a) There is no feasible way to lessen or avoid the significant effect (see Section 15091); and

(b) Specifically identified expected benefits from the project outweigh the policy of reducing or avoiding significant environmental impacts of the project. (See Section 15093.)

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002 and 21002.1, Public Resources Code; *San Francisco Ecology Center* v. *City and County of San Francisco*, (1975) 48 Cal. App. 3d 584; *San Diego Trust & Savings Bank* v. *Friends of Gill*, (1981) 121 Cal. App. 3d 203.

§ 15044. Authority to Comment.

Any person or entity other than a responsible agency may submit comments to a lead agency concerning any environmental effects of a project being considered by the lead agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000, 21001, 21002.1, 21104 and 21153, Public Resources Code.

HISTORY

1. Amendment filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15045. Fees.

(a) For a project to be carried out by any person or entity other than the lead agency, the lead agency may charge and collect a reasonable fee from the person or entity proposing the project in order to recover the estimated costs incurred in preparing environmental documents and for procedures necessary to comply with CEQA on the project. Litigation expenses, costs and fees incurred in actions alleging noncompliance with CEQA are not recoverable under this section.

(b) Public agencies may charge and collect a reasonable fee from members of the public for a copy of an environmental document not to exceed the actual cost of reproducing a copy.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21089 and 21105, Public Resources Code.

HISTORY

1. Amendment of subsection (a) and NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

Article 4. Lead Agency

§ 15050. Lead Agency Concept.

(a) Where a project is to be carried out or approved by more than one public agency, one public agency shall be responsible for preparing an EIR or negative declaration for the project. This agency shall be called the lead agency.

(b) Except as provided in subsection (c), the decisionmaking body of each responsible agency shall consider the lead agency's EIR or negative declaration prior to acting upon or approving the project. Each responsible agency shall certify that its decisionmaking body reviewed and considered the information contained in the EIR or negative declaration on the project.

(c) The determination of the lead agency of whether to prepare an EIR or a negative declaration shall be final and conclusive for all persons, including responsible agencies, unless:

(1) The decision is successfully challenged as provided in Section 21167 of the Public Resources Code,

(2) Circumstances or conditions change as provided in Section 15162, or

(3) A responsible agency becomes a lead agency under Section 15052.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.1, 21165 and 21167.2, Public Resources Code.

HISTORY

1. Repealer of Article 4 (Sections 15020–15043) and new Article 4 (Sections 15050–15053) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 82, No. 2; 80, No. 19; 78, No. 5; 76, No. 41; 75, Nos. 1, 5 and 22; 74, Nos. 13 and 26; and 73, No. 50.

2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15051. Criteria for Identifying the Lead Agency.

Where two or more public agencies will be involved with a project, the determination of which agency will be the lead agency shall be governed by the following criteria:

(a) If the project will be carried out by a public agency, that agency shall be the lead agency even if the project would be located within the jurisdiction of another public agency.

(b) If the project is to be carried out by a nongovernmental person or entity, the lead agency shall be the public agency with the greatest responsibility for supervising or approving the project as a whole.

(1) The lead agency will normally be the agency with general governmental powers, such as a city or county, rather than an agency with a single or limited purpose such as an air pollution control district or a district which will provide a public service or public utility to the project.

(2) Where a city prezones an area, the city will be the appropriate lead agency for any subsequent annexation of the area and should prepare the appropriate environmental document at the time of the prezoning. The local agency formation commission shall act as a responsible agency.

(c) Where more than one public agency equally meet the criteria in subsection (b), the agency which will act first on the project in question shall be the lead agency.

(d) Where the provisions of subsections (a), (b), and (c) leave two or more public agencies with a substantial claim to be the lead agency, the public agencies may by agreement designate an agency as the lead agency. An agreement may also provide for cooperative efforts by two or more agencies by contract, joint exercise of powers, or similar devices.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21165, Public Resources Code.

§ 15052. Shift in Lead Agency Designation.

(a) Where a responsible agency is called on to grant an approval for a project subject to CEQA for which another public agency was the appropriate lead agency, the responsible agency shall assume the role of the lead agency when any of the following conditions occur:

(1) The lead agency did not prepare any environmental documents for the project, and the statute of limitations has expired for a challenge to the action of the appropriate lead agency.

(2) The lead agency prepared environmental documents for the project, but the following conditions occur:

(A) A subsequent EIR is required pursuant to Section 15162,

(B) The lead agency has granted a final approval for the project, and

(C) The statute of limitations for challenging the lead agency's action under CEQA has expired.

(3) The lead agency prepared inadequate environmental documents without consulting with the responsible agency as required by Sections 15072 or 15082, and the statute of limitations has expired for a challenge to the action of the appropriate lead agency.

(b) When a responsible agency assumes the duties of a lead agency under this section, the time limits applicable to a lead agency shall apply to the actions of the agency assuming the lead agency duties.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21165, Public Resources Code.

§ 15053. Designation of Lead Agency by Office of Planning and Research.

(a) If there is a dispute over which of several agencies should be the lead agency for a project, the disputing agencies should consult with each other in an effort to resolve the dispute prior to submitting it to OPR. If an agreement cannot be reached, any public agency, or the applicant if a private project is involved, may submit the dispute to OPR for resolution.

(b) OPR shall designate a lead agency within 21 days after receiving a completed request to resolve a dispute.

(c) Regulations adopted by OPR for resolving lead agency disputes may be found in Title 14, California Administrative Code, Sections 16000 et seq.

(d) Designation of a lead agency by OPR shall be based on consideration of the criteria in Section 15052 as well as the capacity of the agency to adequately fulfill the requirements of CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21165, Public Resources Code; and California Administrative Code, Title 14, Sections 16000–16041.

Article 5. Preliminary Review of Projects and Conduct of Initial Study

§ 15060. Preliminary Review.

(a) A lead agency is allowed 30 days to review for completeness applications for permits or other entitlements for use. While conducting this review for completeness, the agency should be alert for environmental issues that might require preparation of an EIR or that may require additional explanation by the applicant. Accepting an application as complete does not limit the authority of the lead agency to require the applicant to submit additional information needed for environmental evaluation of the project. Requiring such additional information after the application is complete does not change the status of the application.

(b) Except as provided in Section 15111, the lead agency shall begin the formal environmental evaluation of the project after accepting an application as complete and determining that the project is subject to CEQA.

(c) Once an application is deemed complete, a lead agency must first determine whether an activity is subject to CEQA before conducting an initial study. An activity is not subject to CEQA if:

(1) The activity does not involve the exercise of discretionary powers by a public agency;

(2) The activity will not result in a direct or reasonably foreseeable indirect physical change in the environment; or

(3) The activity is not a project as defined in Section 15378.

(d) If the lead agency can determine that an EIR will be clearly required for a project, the agency may skip further initial review of the project and begin work directly on the EIR process described in Article 9, commencing with Section 15080. In the absence of an initial study, the lead agency shall still focus the EIR on the significant effects of the project and indicate briefly its reasons for determining that other effects would not be significant or potentially significant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(b), 21080.2 and 21160, Public Resources Code.

HISTORY

1. Repealer of Article 5 (Sections 15050–15056) and new Article 5 (Sections 15060–15065) filed 7–13–83; effective thirtieth day thereafter (Register 83,

No. 29). For prior history, see Registers 80, No. 19; 78, No. 5; 76, No. 41; 75, Nos. 1, 5 and 22; and 73, No. 50.

2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

3. Amendment of section and NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15060.5. Preapplication Consultation.

(a) For a potential project involving the issuance of a lease, permit, license, certificate, or other entitlement for use by one or more public agencies, the lead agency shall, upon the request of a potential applicant and prior to the filing of a formal application, provide for consultation with the potential applicant to consider the range of actions, potential alternatives, mitigation measures, and any potential significant effects on the environment of the potential project.

(b) The lead agency may include in the consultation one or more responsible agencies, trustee agencies, and other public agencies who in the opinion of the lead agency may have an interest in the proposed project. The lead agency may consult the Office of Permit Assistant in the Trade and Commerce Agency for help in identifying interested agencies.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.1, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15061. Review for Exemption.

(a) Once a lead agency has determined that an activity is a project subject to CEQA, a lead agency shall determine whether the project is exempt from CEQA.

(b) A project is exempt from CEQA if:

(1) The project is exempt by statute (see, e.g. Article 18, commencing with Section 15260).

(2) The project is exempt pursuant to a categorical exemption (see Article 19, commencing with Section 15300) and the application of that categorical exemption is not barred by one of the exceptions set forth in Section 15300.2.

(3) The activity is covered by the general rule that CEQA applies only to projects which have the potential for causing a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA.

(4) The project will be rejected or disapproved by a public agency. (See Section 15270(b)).

(c) Each public agency should include in its implementing procedures a listing of the projects often handled by the agency that the agency has determined to be exempt. This listing should be used in preliminary review.

(d) After determining that a project is exempt, the agency may prepare a notice of exemption as provided in Section 15062. Although the notice may be kept with the project application at this time, the notice shall not be filed with OPR or the county clerk until the project has been approved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(b), 21080.9, 21080.10, 21084, 21108(b) and 21152(b), Public Resources Code; *No Oil, Inc.* v. *City of Los Angeles* (1974) 13 Cal. 3d 68.

HISTORY

1. Amendment of subsection (d) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

2. Amendment of section and NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15062. Notice of Exemption.

(a) When a public agency decides that a project is exempt from CEQA and the public agency approves or determines to carry out the project, the agency may file a notice of exemption. The notice shall be filed, if at all, after approval of the project. Such a notice shall include:

(1) A brief description of the project,

(2) A finding that the project is exempt from CEQA, including a citation to the State Guidelines section or statute under which it is found to be exempt, and

(3) A brief statement of reasons to support the finding.

(b) A notice of exemption may be filled out and may accompany the project application through the approval process. The notice shall not be filed with the county clerk or OPR until the project has been approved.

(c) When a public agency approves an applicant's project, either the agency or the applicant may file a notice of exemption.

(1) When a state agency files this notice, the notice of exemption is filed with OPR. A form for this notice is provided in Appendix E. A list of all such notices shall be posted on a weekly basis at the Office of Planning and Research, 1400 Tenth Street, Sacramento, California. The list shall remain posted for at least 30 days.

(2) When a local agency files this notice, the notice of exemption is filed with the county clerk of each county in which the project will be located. Copies of all such notices will be available for public inspection and such notices shall be posted within 24 hours of receipt in the office of the county clerk. Each notice shall remain posted for a period of 30 days. Thereafter, the clerk shall return the notice to the local agency with a notation of the period it was posted. The local agency shall retain the notice for not less than 9 months.

(3) All public agencies are encouraged to make postings pursuant to this section available in electronic format on the Internet. Such electronic postings are in addition to the procedures required by these guidelines and the Public Resources Code.

(4) When an applicant files this notice, special rules apply.

(A) The notice filed by an applicant is filed in the same place as if it were filed by the agency granting the permit. If the permit was granted by a state agency, the notice is filed with OPR. If the permit was granted by a local agency, the notice is filed with the county clerk of the county or counties in which the project will be located.

(B) The notice of exemption filed by an applicant shall contain the information required in subdivision (a) together with a certified document issued by the public agency stating that the agency has found the project to be exempt. The certified document may be a certified copy of an existing document or record of the public agency.

(C) A notice filed by an applicant is subject to the same posting and time requirements as a notice filed by a public agency.

(d) The filing of a Notice of Exemption and the posting on the list of notices start a 35 day statute of limitations period on legal challenges to the agency's decision that the project is exempt from CEQA. If a Notice of Exemption is not filed, a 180 day statute of limitations will apply.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108 and 21152, Public Resources Code.

HISTORY

1. Amendment of subsections (b) and (c) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

2. Amendment of subsections (a)(2), (c)(1), (c)(2), (c)(3)(A) and (c)(3)(C) filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

3. New subsection (c)(3) and subsection renumbering filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15063. Initial Study.

(a) Following preliminary review, the lead agency shall conduct an initial study to determine if the project may have a significant effect on the environment. If the lead agency can determine that an EIR will clearly be required for the project, an initial study is not required but may still be desirable.

(1) All phases of project planning, implementation, and operation must be considered in the initial study of the project.

(2) To meet the requirements of this section, the lead agency may use an environmental assessment or a similar analysis prepared pursuant to the National Environmental Policy Act.

(3) An initial study may rely upon expert opinion supported by facts, technical studies or other substantial evidence to document its findings. However, an initial study is neither intended nor required to include the level of detail included in an EIR.

(b) Results.

(1) If the agency determines that there is substantial evidence that any aspect of the project, either individually or cumulatively, may cause a significant effect on the environment, regardless of whether the overall effect of the project is adverse or beneficial, the lead agency shall do one of the following:

(A) Prepare an EIR or

(B) Use a previously prepared EIR which the lead agency determines would adequately analyze the project at hand, or

(C) Determine, pursuant to a program EIR, tiering, or another appropriate process, which of a project's effects were adequately examined by an earlier EIR or negative declaration. Another appropriate process may include, for example, a master EIR, a master environmental assessment, approval of housing and neighborhood commercial facilities in urban areas as described in section 15181, approval of residential projects pursuant to a specific plan as described in section 15182, approval of residential projects consistent with a community plan, general plan or zoning as described in section 15183, or an environmental document prepared under a State certified regulatory program. The lead agency shall then ascertain which effects, if any, should be analyzed in a later EIR or negative declaration.

(2) The lead agency shall prepare a negative declaration if there is no substantial evidence that the project or any of its aspects may cause a significant effect on the environment.

(c) Purposes. The purposes of an initial study are to:

(1) Provide the lead agency with information to use as the basis for deciding whether to prepare an EIR or negative declaration;

(2) Enable an applicant or lead agency to modify a project, mitigating adverse impacts before an EIR is prepared, thereby enabling the project to qualify for a negative declaration;

(3) Assist the preparation of an EIR, if one is required, by:

(A) Focusing the EIR on the effects determined to be significant,

(B) Identifying the effects determined not to be significant,

(C) Explaining the reasons for determining that potentially significant effects would not be significant, and

(D) Identifying whether a program EIR, tiering, or another appropriate process can be used for analysis of the project's environmental effects.

(4) Facilitate environmental assessment early in the design of a project;

(5) Provide documentation of the factual basis for the finding in a negative declaration that a project will not have a significant effect on the environment;

(6) Eliminate unnecessary EIRs;

(7) Determine whether a previously prepared EIR could be used with the project.

(d) Contents. An initial study shall contain in brief form:

(1) A description of the project including the location of the project;

(2) An identification of the environmental setting;

(3) An identification of environmental effects by use of a checklist, matrix, or other method, provided that entries on a checklist or other form are briefly explained to indicate that there is some evidence to support the entries. The brief explanation may be either through a narrative or a reference to another information source such as an attached map, photographs, or an earlier EIR or negative declaration. A reference to another document should include, where appropriate, a citation to the page or pages where the information is found.

(4) A discussion of ways to mitigate the significant effects identified, if any;

(5) An examination of whether the project would be consistent with existing zoning, plans, and other applicable land use controls;

(6) The name of the person or persons who prepared or participated in the initial study.

Submission of Data. If the project is to be carried out by a private person or private organization, the lead agency may require such person or organization to submit data and information which will enable the lead agency to prepare the initial study. Any person may submit any information in any form to assist a lead agency in preparing an initial study.

(f) Format. Sample forms for an applicant's project description and a review form for use by the lead agency are contained in Appendices G and H. When used together, these forms would meet the requirements for an initial study, provided that the entries on the checklist are briefly explained pursuant to subsection (d)(3). These forms are only suggested, and public agencies are free to devise their own format for an initial study. A previously prepared EIR may also be used as the initial study for a later project.

(g) Consultation. As soon as a lead agency has determined that an initial study will be required for the project, the lead agency shall consult informally with all responsible agencies and all trustee agencies responsible for resources affected by the project to obtain the recommendations of those agencies as to whether an EIR or a negative declaration should be prepared. During or immediately after preparation of an initial study for a private project, the lead agency may consult with the applicant to determine if the applicant is willing to modify the project to reduce or avoid the significant effects identified in the initial study.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(c), 21080.1, 21080.3, 21082.1, 21100 and 21151, Public Resources Code; *Gentry v. City of Murrieta* (1995) 36 Cal.App.4th 1359, *San Joaquin Raptor/Wildlife Rescue Center v. County of Stanislaus* (1994) 27 Cal.App.4th 713, *Leonoff v. Monterey County Board of Supervisors* (1990) 222 Cal.App.3d 1337.

HISTORY

1. Amendment filed 8–19–94; operative 9–19–94 (Register 94, No. 33).
2. Amendment of subsection (a)(2), new subsection (b)(3) and amendment of NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15064. Determining the Significance of the Environmental Effects Caused by a Project.

(a) Determining whether a project may have a significant effect plays a critical role in the CEQA process.

(1) If there is substantial evidence, in light of the whole record before a lead agency, that a project may have a significant effect on the environment, the agency shall prepare a draft EIR.

(2) When a final EIR identifies one or more significant effects, the lead agency and each responsible agency shall make a finding under Section 15091 for each significant effect and may need to make a statement of overriding considerations under Section 15093 for the project.

(b) The determination of whether a project may have a significant effect on the environment calls for careful judgment on the part of the public agency involved, based to the extent possible on scientific and factual data. An ironclad definition of significant effect is not always possible because the significance of an activity may vary with the setting. For example, an activity which may not be significant in an urban area may be significant in a rural area.

(c) In determining whether an effect will be adverse or beneficial, the lead agency shall consider the views held by members of the public in all areas affected as expressed in the whole record before the lead agency. Before requiring the preparation of an EIR, the lead agency must still determine whether environmental change itself might be substantial.

(d) In evaluating the significance of the environmental effect of a project, the lead agency shall consider direct physical changes in the environment which may be caused by the project and reasonably foreseeable indirect physical changes in the environment which may be caused by the project.

(1) A direct physical change in the environment is a physical change in the environment which is caused by and immediately related to the project. Examples of direct physical changes in the environment are the dust, noise, and traffic of heavy equipment that would result from construction of a sewage treatment plant and possible odors from operation of the plant.

(2) An indirect physical change in the environment is a physical change in the environment which is not immediately related to the proj-

ect, but which is caused indirectly by the project. If a direct physical change in the environment in turn causes another change in the environment, then the other change is an indirect physical change in the environment. For example, the construction of a new sewage treatment plant may facilitate population growth in the service area due to the increase in sewage treatment capacity and may lead to an increase in air pollution.

(3) An indirect physical change is to be considered only if that change is a reasonably foreseeable impact which may be caused by the project. A change which is speculative or unlikely to occur is not reasonably foreseeable.

(e) Economic and social changes resulting from a project shall not be treated as significant effects on the environment. Economic or social changes may be used, however, to determine that a physical change shall be regarded as a significant effect on the environment. Where a physical change is caused by economic or social effects of a project, the physical change may be regarded as a significant effect in the same manner as any other physical change resulting from the project. Alternatively, economic and social effects of a physical change may be used to determine that the physical change is a significant effect on the environment. If the physical change causes adverse economic or social effects on people, those adverse effects may be used as a factor in determining whether the physical change is significant. For example, if a project would cause overcrowding of a public facility and the overcrowding causes an adverse effect on people, the overcrowding would be regarded as a significant effect.

(f) The decision as to whether a project may have one or more significant effects shall be based on substantial evidence in the record of the lead agency.

(1) If the lead agency determines there is substantial evidence in the record that the project may have a significant effect on the environment, the lead agency shall prepare an EIR (*Friends of B Street* v. *City of Hayward* (1980) 106 Cal. App. 3d 988). Said another way, if a lead agency is presented with a fair argument that a project may have a significant effect on the environment, the lead agency shall prepare an EIR even though it may also be presented with other substantial evidence that the project will not have a significant effect (*No Oil, Inc.* v. *City of Los Angeles* (1974) 13 Cal. 3d 68).

(2) If the lead agency determines there is substantial evidence in the record that the project may have a significant effect on the environment but the lead agency determines that revisions in the project plans or proposals made by, or agreed to by, the applicant would avoid the effects or mitigate the effects to a point where clearly no significant effect on the environment would occur and there is no substantial evidence in light of the whole record before the public agency that the project, as revised, may have a significant effect on the environment then a mitigated negative declaration shall be prepared.

(3) If the lead agency determines there is no substantial evidence that the project may have a significant effect on the environment, the lead agency shall prepare a negative declaration (*Friends of B Street* v. *City of Hayward* (1980) 106 Cal. App. 3d 988).

(4) The existence of public controversy over the environment effects of a project will not require preparation of an EIR if there is no substantial evidence before the agency that the project may have a significant effect on the environment.

(5) Argument, speculation, unsubstantiated opinion or narrative, or evidence that is clearly inaccurate or erroneous, or evidence that is not credible, shall not constitute substantial evidence. Substantial evidence shall include facts, reasonable assumptions predicated upon facts, and expert opinion support by facts.

(6) Evidence of economic and social impacts that do not contribute to or are not caused by physical changes in the environment is not substantial evidence that the project may have a significant effect on the environment.

(7) The provisions of sections 15162, 15163, and 15164 apply when the project being analyzed is a change to, or further approval for, a project for which an EIR or negative declaration was previously certified or adopted (e.g. a tentative subdivision, conditional use permit). Under case law, the fair argument standard does not apply to determinations of significance pursuant to sections 15162, 15163, and 15164.

(g) After application of the principles set forth above in Section 15064(f), and in marginal cases where it is not clear whether there is substantial evidence that a project may have a significant effect on the environment, the lead agency shall be guided by the following principle: If there is disagreement among expert opinion supported by facts over the significance of an effect on the environment, the Lead Agency shall treat the effect as significant and shall prepare an EIR.

(h)(1)(A) Except as otherwise required by Section 15065, a change in the environment is not a significant effect if the change complies with a standard that meets the definition in subsection (h)(3).

(B) If there is a conflict between standards, the lead agency shall determine which standard is appropriate for purposes of this subsection based upon substantial evidence in light of the whole record.

(C) Notwithstanding subsection (h)(1)(A), if the lead agency determines on the basis of substantial evidence in light of the whole record that a standard is inappropriate to determine the significance of an effect for a particular project, the lead agency shall determine whether the effect may be significant as otherwise required by this section, Section 15065, and the Guidelines.

(2) In the absence of a standard that satisfies subsection (h)(1)(A), the lead agency shall determine whether the effect may be significant as otherwise required by this section, Section 15065, and the Guidelines.

(3) For the purposes of this subsection a "standard" means a standard of general application that is all of the following:

(A) a quantitative, qualitative or performance requirement found in a statute, ordinance, resolution, rule, regulation, order, or other standard of general application;

(B) adopted for the purpose of environmental protection;

(C) adopted by a public agency through a public review process to implement, interpret, or make specific the law enforced or administered by the public agency;

(D) one that governs the same environmental effect which the change in the environment is impacting; and,

(E) one that governs within the jurisdiction where the project is located.

(4) This definition includes thresholds of significance adopted by lead agencies which meet the requirements of this subsection.

(i)(1) When assessing whether a cumulative effect requires an EIR, the lead agency shall consider whether the cumulative impact is significant and whether the effects of the project are cumulatively considerable. An EIR must be prepared if the cumulative impact may be significant and the project's incremental effect, though individually limited, is cumulatively considerable. "Cumulatively considerable" means that the incremental effects of an individual project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects. "Probable future projects" are defined in Section 15130.

(2) A lead agency may determine in an initial study that a project's contribution to a significant cumulative impact will be rendered less than cumulatively considerable and thus is not significant. When a project might contribute to a significant cumulative impact, but the contribution will be rendered less than cumulatively considerable through mitigation measures set forth in a mitigated negative declaration, the initial study shall briefly indicate and explain how the contribution has been rendered less than cumulatively considerable.

(3) A lead agency may determine that a project's incremental contribution to a cumulative effect is not cumulatively considerable if the project will comply with the requirements in a previously approved plan or mitigation program which provides specific requirements that will avoid or substantially lessen the cumulative problem (e.g. water quality control plan, air quality plan, integrated waste management plan) within the geographic area in which the project is located. Such plans or programs must be specified in law or adopted by the public agency with jurisdiction over

the affected resources through a public review process to implement, interpret, or make specific the law enforced or administered by the public agency.

A lead agency may determine that the incremental impacts of a are not cumulatively considerable when they are so small that they make only a de minimis contribution to a significant cumulative impact caused by other projects that would exist in the absence of the proposed project. Such de minimus incremental impacts, by themselves, do not trigger the obligation to prepare an EIR. A de minimus contribution means that the environmental conditions would essentially be the same whether or not the proposed project is implemented.

(5) The mere existence of significant cumulative impacts caused by other projects alone shall not constitute substantial evidence that the proposed project's incremental effects are cumulatively considerable.

Regents of the University of California* (1993) 6 Cal.4th 1112.

HISTORY

1. Amendment of section heading, section and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).
2. Repealer of subsection (i) and new subsections (i)(1)(A)–(i)(4) filed 8–24–98; operative 8–24–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 35).
3. Repealer of subsection (e), subsection relettering, new subsections (f)(7) and (i)(1)–(i)(5) and amendment of NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).
4. Change without regulatory effect amending subsections (g), (h)(1)(A), (h)(1)(C) and (h)(2) filed 2–1–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 5).

§ 15064.5. Determining the Significance of Impacts to Archaeological and Historical Resources.

For purposes of this section, the term "historical resources" shall include the following:

(1) A resource listed in, or determined to be eligible by the State Historical Resources Commission, for listing in the California Register of Historical Resources (Pub. Res. Code §5024.1, Title 14 CCR, Section 4850 et seq.).

(2) A resource included in a local register of historical resources, as defined in section 5020.1(k) of the Public Resources Code or identified as significant in an historical resource survey meeting the requirements section 5024.1(g) of the Public Resources Code, shall be presumed to be historically or culturally significant. Public agencies must treat any such resource as significant unless the preponderance of evidence demonstrates that it is not historically or culturally significant.

(3) Any object, building, structure, site, area, place, record, or manuscript which a lead agency determines to be historically significant or significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California may be considered to be an historical resource, provided the lead agency's determination is supported by substantial evidence in light of the whole record. Generally, a resource shall be considered by the lead agency to be "historically significant" if the resource meets the criteria for listing on the California Register of Historical Resources (Pub. Res. Code § 5024.1, Title 14 CCR, Section 4852) including the following:

(A) Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;

(B) Is associated with the lives of persons important in our past;

(C) Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values; or

(D) Has yielded, or may be likely to yield, information important in prehistory or history.

(4) The fact that a resource is not listed in, or determined to be eligible for listing in the California Register of Historical Resources, not included in a local register of historical resources (pursuant to section 5020.1(k) of the Public Resources Code), or identified in an historical resources survey (meeting the criteria in section 5024.1(g) of the Public Resources Code) does not preclude a lead agency from determining that the resource may be an historical resource as defined in Public Resources Code sections 5020.1(j) or 5024.1.

(b) A project with an effect that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment.

(1) Substantial adverse change in the significance of an historical resource means physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of an historical resource would be materially impaired.

(2) The significance of an historical resource is materially impaired when a project:

(A) Demolishes or materially alters in an adverse manner those physical characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register of Historical Resources; or

(B) Demolishes or materially alters in an adverse manner those physical characteristics that account for its inclusion in a local register of historical resources pursuant to section 5020.1(k) of the Public Resources Code or its identification in an historical resources survey meeting the requirements of section 5024.1(g) of the Public Resources Code, unless the public agency reviewing the effects of the project establishes by a preponderance of evidence that the resource is not historically or culturally significant; or

(C) Demolishes or materially alters in an adverse manner those physical characteristics of a historical resource that convey its historical significance and that justify its eligibility for inclusion in the California Register of Historical Resources as determined by a lead agency for purposes of CEQA.

(3) Generally, a project that follows the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings or the Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings (1995), Weeks and Grimmer, shall be considered as mitigated to a level of less than a significant impact on the historical resource.

(4) A lead agency shall identify potentially feasible measures to mitigate significant adverse changes in the significance of an historical resource. The lead agency shall ensure that any adopted measures to mitigate or avoid significant adverse changes are fully enforceable through permit conditions, agreements, or other measures.

(5) When a project will affect state–owned historical resources, as described in Public Resources Code Section 5024, and the lead agency is a state agency, the lead agency shall consult with the State Historic Preservation Officer as provided in Public Resources Code Section 5024.5. Consultation should be coordinated in a timely fashion with the preparation of environmental documents.

(c) CEQA applies to effects on archaeological sites.

(1) When a project will impact an archaeological site, a lead agency shall first determine whether the site is an historical resource, as defined in subsection (a).

(2) If a lead agency determines that the archaeological site is an historical resource, it shall refer to the provisions of Section 21084.1 of the Public Resources Code, and this section, Section 15126.4 of the Guidelines, and the limits contained in Section 21083.2 of the Public Resources Code do not apply.

(3) If an archaeological site does not meet the criteria defined in subsection (a), but does meet the definition of a unique archeological resource in Section 21083.2 of the Public Resources Code, the site shall be treated in accordance with the provisions of section 21083.2. The time and cost limitations described in Public Resources Code Section 21083.2 (c–f) do not apply to surveys and site evaluation activities intended to de-

termine whether the project location contains unique archaeological resources.

(4) If an archaeological resource is neither a unique archaeological nor an historical resource, the effects of the project on those resources shall not be considered a significant effect on the environment. It shall be sufficient that both the resource and the effect on it are noted in the Initial Study or EIR, if one is prepared to address impacts on other resources, but they need not be considered further in the CEQA process.

(d) When an initial study identifies the existence of, or the probable likelihood, of Native American human remains within the project, a lead agency shall work with the appropriate native americans as identified by the Native American Heritage Commission as provided in Public Resources Code § 5097.98. The applicant may develop an agreement for treating or disposing of, with appropriate dignity, the human remains and any items associated with Native American burials with the appropriate Native Americans as identified by the Native American Heritage Commission." Action implementing such an agreement is exempt from:

(1) The general prohibition on disinterring, disturbing, or removing human remains from any location other than a dedicated cemetery (Health and Safety Code Section 7050.5).

(2) The requirements of CEQA and the Coastal Act.

(e) In the event of the accidental discovery or recognition of any human remains in any location other than a dedicated cemetery, the following steps should be taken:

(1) There shall be no further excavation or disturbance of the site or any nearby area reasonably suspected to overlie adjacent human remains until:

(A) The coroner of the county in which the remains are discovered must be contacted to determine that no investigation of the cause of death is required, and

(B) If the coroner determines the remains to be Native American:

1. The coroner shall contact the Native American Heritage Commission within 24 hours.

2. The Native American Heritage Commission shall identify the person or persons it believes to be the most likely descended from the deceased native american.

3. The most likely descendent may make recommendations to the landowner or the person responsible for the excavation work, for means of treating or disposing of, with appropriate dignity, the human remains and any associated grave goods as provided in Public Resources Code Section 5097.98, or

(2) Where the following conditions occur, the landowner or his authorized representative shall rebury the Native American human remains and associated grave goods with appropriate dignity on the property in a location not subject to further subsurface disturbance.

(A) The Native American Heritage Commission is unable to identify a most likely descendent or the most likely descendent failed to make a recommendation within 24 hours after being notified by the commission.

(B) The descendant identified fails to make a recommendation; or

(C) The landowner or his authorized representative rejects the recommendation of the descendant, and the mediation by the Native American Heritage Commission fails to provide measures acceptable to the landowner.

(f) As part of the objectives, criteria, and procedures required by Section 21082 of the Public Resources Code, a lead agency should make provisions for historical or unique archaeological resources accidentally discovered during construction. These provisions should include an immediate evaluation of the find by a qualified archaeologist. If the find is determined to be an historical or unique archaeological resource, contingency funding and a time allotment sufficient to allow for implementation of avoidance measures or appropriate mitigation should be available. Work could continue on other parts of the building site while historical or unique archaeological resource mitigation takes place.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.2, 21084 and 21084.1, Public Resources Code; and *Citizens for Responsible Development in West Hollywood v. City of West Hollywood* (1995) 39 Cal.App.4th 490.

HISTORY

1. New section filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15064.7. Thresholds of Significance.

(a) Each public agency is encouraged to develop and publish thresholds of significance that the agency uses in the determination of the significance of environmental effects. A threshold of significance is an identifiable quantitative, qualitative or performance level of a particular environmental effect, non–compliance with which means the effect will normally be determined to be significant by the agency and compliance with which means the effect normally will be determined to be less than significant.

(b) Thresholds of significance to be adopted for general use as part of the lead agency's environmental review process must be adopted by ordinance, resolution, rule, or regulation, and developed through a public review process and be supported by substantial evidence.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082 and 21083, Public Resources Code.

HISTORY

1. New section filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15065. Mandatory Findings of Significance.

A lead agency shall find that a project may have a significant effect on the environment and thereby require an EIR to be prepared for the project where any of the following conditions occur:

(a) The project has the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self–sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of an endangered, rare or threatened species, or eliminate important examples of the major periods of California history or prehistory.

(b) The project has the potential to achieve short–term environmental goals to the disadvantage of long–term environmental goals.

(c) The project has possible environmental effects which are individually limited but cumulatively considerable. "Cumulatively considerable" means that the incremental effects of an individual project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects as defined in Section 15130.

(d) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21001(c) and 21083, Public Resources Code; and *San Joaquin Raptor/Wildlife Center v. County of Stanislaus* (1996) 42 Cal.App.4th 608.

HISTORY

1. Amendment of subsection (a) and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).
2. Amendment of subsection (c) and NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

Article 6. Negative Declaration Process

§ 15070. Decision to Prepare a Negative or Mitigated Negative Declaration.

A public agency shall prepare or have preared a proposed negative declaration or mitigated negative declaration for a project subject to CEQA when:

(a) The initial study shows that there is no substantial evidence, in light of the whole record before the agency, that the project may have a significant effect on the environment, or

(b) The initial study identifies potentially significant effects, but:

(1) Revisions in the project plans or proposals made by or agreed to by the applicant before a proposed mitigated negative declaration and initial study are released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur, and

(2) There is no substantial evidence, in light of the whole record before the agency, that the project as revised may have a significant effect on the environment.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21064, 21064.5, 21080(c) and 21082.1, Public Resources Code; *Friends of B Street* v. *City of Hayward*, (1980) 106 Cal. App. 3d 988; *Running Fence Corp.* v. *Superior Court*, (1975) 51 Cal. App. 3d 400.

HISTORY

1. Repealer of Article 6 (Sections 15060–15069.8) and new Article 6 (Sections 15070–15075) filed 7–13–83; designated effective 8–1–83 (Register 83, No. 29). For prior history, see Registers 80, No. 19; 78, No. 5; 76, No. 41; 75, No. 1; and 73, No. 50).
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).
3. Amendment of section heading, section and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15071. Contents.

A negative declaration circulated for public review shall include:

(a) A brief description of the project, including a commonly used name for the project, if any;

(b) The location of the project, preferably shown on a map, and the name of the project proponent;

(c) A proposed finding that the project will not have a significant effect on the environment;

(d) An attached copy of the initial study documenting reasons to support the finding; and

(e) Mitigation measures, if any, included in the project to avoid potentially significant effects.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(c), Public Resources Code.

§ 15072. Notice of Intent to Adopt a Negative Declaration or Mitigated Negative Declaration.

(a) A lead agency shall provide a notice of intent to adopt a negative declaration or mitigated negative declaration to the public, responsible agencies, trustee agencies, and the county clerk of each county within which the proposed project is located, sufficiently prior to adoption by the lead agency of the negative declaration or mitigated negative declaration to allow the public and agencies the review period provided under Section 15105.

(b) The lead agency shall mail a notice of intent to adopt a negative declaration or mitigated negative declaration to the last known name and address of all organizations and individuals who have previously requested such notice in writing and shall also give notice of intent to adopt a negative declaration or mitigated negative declaration by at least one of the following procedures to allow the public the review period provided under Section 15105:

(1) Publication at least one time by the lead agency in a newspaper of general circulation in the area affected by the proposed project. If more than one area is affected, the notice shall be published in the newspaper of largest circulation from among the newspapers of general circulation in those areas.

(2) Posting of notice by the lead agency on and off site in the area where the project is to be located.

(3) Direct mailing to the owners and occupants of property contiguous to the project. Owners of such property shall be identified as shown on the latest equalized assessment roll.

(c) The alternatives for providing notice specified in subsection (b) shall not preclude a lead agency from providing additional notice by other means if the agency so desires, nor shall the requirements of this section preclude a lead agency from providing the public notice at the same time and in the same manner as public notice required by any other laws for the project.

(d) The county clerk of each county within which the proposed project is located shall post such notices in the office of the county clerk within 24 hours of receipt for a period of at least 20 days.

(e) For a project of statewide, regional, or areawide significance, the lead agency shall also provide notice to transportation planning agencies and public agencies which have transportation facilities within their jurisdictions which could be affected by the project as specified in Section 21092.4(a) of the Public Resources Code. "Transportation facilities" includes: major local arterials and public transit within five miles of the project site and freeways, highways and rail transit service within 10 miles of the project site.

(f) A notice of intent to adopt a negative declaration or mitigated negative declaration shall specify the following:

(1) A brief description of the proposed project and its location.

(2) The starting and ending dates for the review period during which the lead agency will receive comments on the proposed negative declaration or mitigated negative declaration. This shall include starting and ending dates for the review period. If the review period has been is shortened pursuant to Section 15105, the notice shall include a statement to that effect.

(3) The date, time, and place of any scheduled public meetings or hearings to be held by the lead agency on the proposed project, when known to the lead agency at the time of notice.

(4) The address or addresses where copies of the proposed negative declaration or mitigated negative declaration including the revisions developed under Section 15070(b) and all documents referenced in the proposed negative declaration or mitigated negative declaration are available for review. This location or locations shall be readily accessible to the public during the lead agency's normal working hours.

(5) The presence of the site on any of the lists enumerated under Section 65962.5 of the Government Code including, but not limited to lists of hazardous waste facilities, land designated as hazardous waste property, and hazardous waste disposal sites, and the information in the Hazardous Waste and Substances Statement required under subsection (f) of that section.

(6) Other information specifically required by statute or regulation for a particular project or type of project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21091, 21092, 21092.2, 21092.4, 21092.3, 21092.6 and 21151.8, Public Resources Code.

HISTORY

1. Amendment of subsections (a), (a)(3) and NOTE filed 8–19–94; operative 9–19–94 (Register 94, No. 33).
2. Amendment of section heading, section and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15073. Public Review of a Proposed Negative Declaration or Mitigated Negative Declaration.

(a) The lead agency shall provide a public review period pursuant to Section 15105 of not less than 20 days. When a proposed negative declaration or mitigated negative declaration and initial study are submitted to the State Clearinghouse for review by state agencies, the public review period shall not be less than 30 days, unless a shorter period is approved by the State Clearinghouse under Section 15105(d).

(b) When a proposed negative declaration or mitigated negative declaration and initial study have been submitted to the State Clearinghouse for review by state agencies, the public review period shall be at least as long as the review period established by the State Clearinghouse.

(c) A copy of the proposed negative declaration or mitigated negative declaration and the initial study shall be attached to the notice of intent to adopt the proposed declaration that is sent to every responsible agency and trustee agency concerned with the project and every other public agency with jurisdiction by law over resources affected by the project.

(d) Where one or more state agencies will be a responsible agency or a trustee agency or will exercise jurisdiction by law over natural resources affected by the project, or where the project is of statewide, regional, or areawide environmental significance, the lead agency shall send copies of the proposed negative declaration or mitigated negative declaration to the State Clearinghouse for distribution to the state agencies.

(e) The lead agency shall notify in writing any public agency which comments on a proposed negative declaration or mitigated negative dec-

laration of any public hearing to be held for the project for which the document was prepared. A notice provided to a public agency pursuant to Section 15072 satisfies this requirement.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000(e), 21003(b), 21080(c), 21081.6, 21091 and 21092.5, Public Resources Code; *Plaggmier* v. *City of San Jose*, (1980) 101 Cal. App. 3d 842.

HISTORY

1. Amendment of section heading, section and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15073.5. Recirculation of a Negative Declaration Prior to Adoption.

(a) A lead agency is required to recirculate a negative declaration when the document must be substantially revised after public notice of its availability has previously been given pursuant to Section 15072, but prior to its adoption. Notice of recirculation shall comply with Sections 15072 and 15073.

(b) A "substantial revision" of the negative declaration shall mean:

(1) A new, avoidable significant effect is identified and mitigation measures or project revisions must be added in order to reduce the effect to insignificance, or

(2) The lead agency determines that the proposed mitigation measures or project revisions will not reduce potential effects to less than significance and new measures or revisions must be required.

(c) Recirculation is not required under the following circumstances:

(1) Mitigation measures are replaced with equal or more effective measures pursuant to Section 15074.1.

(2) New project revisions are added in response to written or verbal comments on the project's effects identified in the proposed negative declaration which are not new avoidable significant effects.

(3) Measures or conditions of project approval are added after circulation of the negative declaration which are not required by CEQA , which do not create new significant environmental effects and are not necessary to mitigate an avoidable significant effect.

(4) New information is added to the negative declaration which merely clarifies, amplifies, or makes insignificant modifications to the negative declaration.

(d) If during the negative declaration process there is substantial evidence in light of the whole record, before the lead agency that the project, as revised, may have a significant effect on the environment which cannot be mitigated or avoided, the lead agency shall prepare a draft EIR and certify a final EIR prior to approving the project. It shall circulate the draft EIR for consultation and review pursuant to Sections 15086 and 15087, and advise reviewers in writing that a proposed negative declaration had previously been circulated for the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080, Public Resources Code; *Gentry v. City of Murrieta* (1995) 36 Cal.App.4th 1359; *Leonoff v. Monterey County Board of Supervisors* (1990) 222 Cal.App.3d 1337; and *Long Beach Savings and Loan Assn. v. Long Beach Redevelopment Agency* (1986) 188 Cal.App.3d 249.

HISTORY

1. New section filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15074. Consideration and Adoption of a Negative Declaration or Mitigated Negative Declaration.

(a) Any advisory body of a public agency making a recommendation to the decisionmaking body shall consider the proposed negative declaration or mitigated negative declaration before making its recommendation.

(b) Prior to approving a project, the decisionmaking body of the lead agency shall consider the proposed negative declaration or mitigated negative declaration together with any comments received during the public review process. The decisionmaking body shall adopt the proposed negative declaration or mitigated negative declaration only if it finds on the basis of the whole record before it (including the initial study and any comments received), that there is no substantial evidence that the project will have a significant effect on the environment and that the negative declaration or mitigated negative declaration reflects the lead agency's independent judgment and analysis.

(c) When adopting a negative declaration or mitigated negative declaration, the lead agency shall specify the location and custodian of the documents or other material which constitute the record of proceedings upon which its decision is based.

(d) When adopting a mitigated negative declaration, the lead agency shall also adopt a program for reporting on or monitoring the changes which it has either required in the project or made a condition of approval to mitigate or avoid significant environmental effects.

(e) A lead agency shall not adopt a negative declaration or mitigated negative declaration for a project within the boundaries of a comprehensive airport land use plan or, if a comprehensive airport land use plan has not been adopted, for a project within two nautical miles of a public airport or public use airport, without first considering whether the project will result in a safety hazard or noise problem for persons using the airport or for persons residing or working in the project area.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(c), 21081.6, 21082.1 and 21096, Public Resources Code; *Friends of B Street* v. *City of Hayward*, (1980) 106 Cal. App. 3d 988.

HISTORY

1. Amendment of section heading, section and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15074.1. Substitution of Mitigation Measures in a Proposed Mitigated Negative Declaration.

(a) As a result of the public review process for a proposed mitigated negative declaration, including any administrative decisions or public hearings conducted on the project prior to its approval, the lead agency may conclude that certain mitigation measures identified in the mitigated negative declaration are infeasible or otherwise undesirable. Prior to approving the project, the lead agency may, in accordance with this section, delete those mitigation measures and substitute for them other measures which the lead agency determines are equivalent or more effective.

(b) Prior to deleting and substituting for a mitigation measure, the lead agency shall do both of the following:

(1) Hold a public hearing on the matter. Where a public hearing is to be held in order to consider the project, the public hearing required by this section may be combined with that hearing. Where no public hearing would otherwise be held to consider the project, then a public hearing shall be required before a mitigation measure may be deleted and a new measure adopted in its place.

(2) Adopt a written finding that the new measure is equivalent or more effective in mitigating or avoiding potential significant effects and that it in itself will not cause any potentially significant effect on the environment.

(c) No recirculation of the proposed mitigated negative declaration pursuant to Section 15072 is required where the new mitigation measures are made conditions of, or are otherwise incorporated into, project approval in accordance with this section.

(d) "Equivalent or more effective" means that the new measure will avoid or reduce the significant effect to at least the same degree as, or to a greater degree than, the original measure and will create no more adverse effect of its own than would have the original measure.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(f), Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15075. Notice of Determination on a Project for Which a Proposed Negative or Mitigated Negative Declaration Has Been Approved.

(a) After deciding to carry out or approve a project for which a negative declaration or mitigated negative declaration has been approved, the lead agency shall file a notice of determination. For projects with phases, the lead agency shall file a notice of determination after deciding to carry out or approve each phase.

(b) The notice of determination must include:

(1) An identification of the project including its common name where possible, and its location.

(2) A brief description of the project.

(3) The date on which the agency approved the project.

(4) The determination of the agency that the project will not have a significant effect on the environment.

(5) A statement that a negative declaration or a mitigated negative declaration has been prepared pursuant to the provisions of CEQA.

(6) The address where a copy of the negative declaration or mitigated negative declaration may be examined.

(c) If the lead agency is a state agency, the lead agency shall file the notice of determination with OPR.

(d) If the lead agency is a local agency, the local agency shall file the notice of determination with the county clerk of the county or counties in which the project will be located within five working days after approval of the project by the lead agency. If the project requires a discretionary approval from any state agency, the local lead agency shall also file with OPR.

(e) All notices filed pursuant to this section shall be available for public inspection and shall be posted by the county clerk within 24 hours of receipt. Each notice shall remain posted for a period of at least 30 days. Thereafter, the clerk shall return the notice to the local lead agency with a notation of the period it was posted. The local lead agency shall retain the notice for not less than 9 months. The filing of the notice of determination and the posting on a list of such notices starts a 30–day statute of limitations on court challenges to the approval under CEQA.

(f) Public agencies are encouraged to make copies of all notices filed pursuant to this section available in electronic format on the Internet. Such electronic notices are in addition to the posting requirements of these guidelines and the Public Resources Code.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(c), 21108(a) and (c), 21152(a) and (c) and 21167(b), Public Resources Code; *Citizens of Lake Murray Area Association* v. *City Council*, 129 Cal. App. 3d 436.

HISTORY

1. Amendment of subsections (c) and (d) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).
2. Amendment of section heading and section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).
3. New subsection (f) filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

Article 6.5. Statutory Exemptions

HISTORY

1. Repealer of Article 6.5 (Sections 15070–15079.7) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Register 78, No. 5.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

Article 7. EIR Process

§ 15080. General.

To the extent possible, the EIR process should be combined with the existing planning, review, and project approval process used by each public agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061, 21100 and 21151, Public Resources Code.

HISTORY

1. Repealer of Article 7 (Sections 15080–15089) and new Article 7 (Sections 15080–15096) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 82, No. 2; 80, No. 19; 78, No. 5; 77, No. 1; 76, No. 41; 75, No. 1; and 73, No. 50.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15081. Decision to Prepare an EIR.

The EIR process starts with the decision to prepare an EIR. This decision will be made either during preliminary review under Section 15060 or at the conclusion of an initial study after applying the standards described in Section 15064.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code; *No Oil, Inc. v. City of Los Angeles* (1974) 13 Cal. 3d 68; *Friends of B Street* v. *City of Hayward* (1980) 106 Cal. App. 3d 988.

§ 15081.5. EIRs Required by Statute.

(a) A lead agency shall prepare or have prepared an EIR for the following types of projects. An initial study may be prepared to help identify the significant effects of the project.

(1) The burning of municipal wastes, hazardous wastes, or refuse–derived fuel, including but not limited to tires, if the project is either:

(A) The construction of a new facility; or

(B) The expansion of an existing facility that burns hazardous waste that would increase its permitted capacity by more than 10 percent. This does not apply to any project exclusively burning hazardous waste for which a determination to prepare a negative declaration, or mitigated negative declaration or environmental impact report was made prior to July 14, 1989. The amount of expansion of an existing facility is calculated pursuant to subdivision (b) of Section 21151.1 of the Public Resources Code.

(C) Subsection (1) of the subdivision does not apply to:

1. Projects for which the State Energy Resources Conservation and Development Commission has assumed jurisdiction pursuant to Chapter 6 (commencing with Section 25500) of Division 15 of the Public Resources Code.

2. Any of the types of burn or thermal processing projects listed in subdivision (d) of Section 21151.1 of the Public Resources Code.

(2) The initial issuance of a hazardous waste facilities permit to a land disposal facility, as defined in subdivision (d) of Section 25199.1 of the Health and Safety Code. Preparation of an EIR is not mandatory if the facility only manages hazardous waste which is identified or listed pursuant to Section 25140 or Section 25141 of the Health and Safety Code on or after January 1, 1992; or only conducts activities which are regulated pursuant to Chapter 6.5 (commencing with Section 25100) of Division 20 of the Health and Safety Code on or after January 1, 1992. "Initial issuance" does not include the issuance of a closure or postclosure permit pursuant to Chapter 6.5 (commencing with Section 25100) of Division 20 of the Health and Safety Code.

(3) The initial issuance of a hazardous waste facility permit pursuant to Section 25200 of the Health and Safety Code to an off–site large treatment facility, as defined pursuant to subdivision (d) of Section 25205.1 of that code. Preparation of an EIR is not mandatory if the facility only manges hazardous waste which is identified or listed pursuant to Section 25140 or Section 25141 of the Health and Safety Code on or after January 1, 1992; or only conducts activities which are regulated pursuant to Chapter 6.5 (commencing with Section 25100) of Division 20 of the Health and Safety Code on or after January 1, 1992. "Initial issuance" does not include the issuance of a closure or postclosure permit pursuant to Chapter 6.5 (commencing with Section 25100) of Division 20 of the Health and Safety Code.

(4) Any open pit mining operation which is subject to the permit requirements of the Surface Mining and Reclamation Act (beginning at Section 2710 of the Public Resources Code) and which utilizes a cyanide heap–leaching process for the purpose of extracting gold or other precious metals.

(5) An initial base reuse plan as defined in Section 15229.

(b) A lead agency shall prepare or have prepared an EIR for the selection of a California Community College, California State University, University of California, or California Maritime Academy campus location and approval of a long range development plan for that campus.

(1) The EIR for a long range development plan for a campus shall include an analysis of, among other significant impacts, those environmental effects relating to changes in enrollment levels.

(2) Subsequent projects within the campus may be addressed in environmental analyses tiered on the EIR prepared for the long range development plan.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.09, 21083.8, 21083.8.1, 21151.1 and 21151.7, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15082. Determination of Scope of EIR.

(a) Notice of Preparation. Immediately after deciding that an environmental impact report is required for a project, the lead agency shall send to each responsible agency a notice of preparation stating that an environmental impact report will be prepared. This notice shall also be sent to every federal agency involved in approving or funding the project and to each trustee agency responsible for natural resources affected by the project.

(1) The notice of preparation shall provide the responsible agencies with sufficient information describing the project and the potential environmental effects to enable the responsible agencies to make a meaningful response. At a minimum, the information shall include:

(A) Description of the project,

(B) Location of the project indicated either on an attached map (preferably a copy of a U.S.G.S. 15 ' or 7 1/2 ' topographical map identified by quadrangle name, or by a street address in an urbanized area), and

(C) Probable environmental effects of the project.

(2) A sample for a notice of preparation is shown in Appendix I. Public agencies are free to devise their own formats for this notice. A copy of the initial study may be sent with the notice to supply the necessary information.

(3) To send copies of the notice of preparation, the lead agency shall use either certified mail or any other method of transmittal which provides it with a record that the notice was received.

(4) The lead agency may begin work on the draft EIR immediately without awaiting responses to the notice of preparation. The draft EIR in preparation may need to be revised or expanded to conform to responses to the notice of preparation. A lead agency shall not circulate a draft EIR for public review before the time period for responses to the notice of preparation has expired.

(b) Response to Notice of Preparation. Within 30 days after receiving the notice of preparation under subsection (a), each responsible agency shall provide the lead agency with specific detail about the scope and content of the environmental information related to the responsible agency's area of statutory responsibility which must be included in the draft EIR.

(1) The response at a minimum shall identify:

(A) The significant environmental issues and reasonable alternatives and mitigation measures which the responsible agency will need to have explored in the draft EIR; and

(B) Whether the agency will be a responsible agency or trustee agency for the project.

(2) If a responsible agency fails by the end of the 30 day period to provide the lead agency with either a response to the notice or a well justified request for additional time, the lead agency may presume that the responsible agency has no response to make.

(3) A generalized list of concerns not related to the specific project shall not meet the requirements of this section for a response.

(c) Meetings. In order to expedite the consultation, the lead agency, a responsible agency, a trustee agency, or a project applicant may request one or more meetings between representatives of the agencies involved to assist the lead agency in determining the scope and content of the environmental information which the responsible agency may require. Such meetings shall be convened by the lead agency as soon as possible, but no later than 30 days, after the meetings were requested. On request, the Office of Planning and Research will assist in convening meetings which involve state agencies.

(d) State Clearinghouse. When one or more state agencies will be a responsible agency or a trustee agency, the lead agency shall send a notice of preparation to each state responsible agency and each trustee agency with a copy to the State Clearinghouse in the Office of Planning and Research. The State Clearinghouse will ensure that the state responsible agencies and trustees reply to the lead agency within the required time.

(e) Identification Number. When the notice of preparation is submitted to the State Clearinghouse, the state identification number issued by the Clearinghouse shall be the identification number for all subsequent environmental documents on the project. The identification number should be referenced on all subsequent correspondence regarding the project, specifically on the title page of the draft and final EIR and on the notice of determination.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

HISTORY

1. Amendment of subsection (b) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).
2. Change without regulatory effect amending subsection (a)(2) filed 2–1–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 5).

§ 15083. Early Public Consultation.

Prior to completing the draft EIR, the lead agency may also consult directly with any person or organization it believes will be concerned with the environmental effects of the project. Many public agencies have found that early consultation solves many potential problems that would arise in more serious forms later in the review process. This early consultation may be called scoping. Scoping will be necessary when preparing an EIR/EIS jointly with a federal agency.

(a) Scoping has been helpful to agencies in identifying the range of actions, alternatives, mitigation measures, and significant effects to be analyzed in depth in an EIR and in eliminating from detailed study issue found not to be important.

(b) Scoping has been found to be an effective way to bring together and resolve the concerns of affected federal, state, and local agencies, the proponent of the action, and other interested persons including those who might not be in accord with the action on environmental grounds.

(c) Where scoping is used, it should be combined to the extent possible with consultation under Section 15082.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21082.1, Public Resources Code; Section 4, Chapter 480 of the Statutes of 1981; 40 Code of Federal Regulations, Part 1501.7.

§ 15083.5. City or County Consultation with Water Agencies.

This guideline addresses consultation between a city or county and affected water agencies at the notice of preparation stage of environmental review.

(a) This guideline shall apply only to projects which meet all of the following criteria:

(1) The project consists of any of the following activities for which an application has been submitted to a city or county:

(A) A residential development of more than 500 dwelling units.

(B) A shopping center or business establishment that will employ more than 1,000 persons or have more than 500,000 square feet of floor space.

(C) A commercial office building that will employ more than 1,000 persons or have more than 250,000 square feet of floor space.

(D) A hotel, motel or both with more than 500 rooms.

(E) An industrial, manufacturing, or processing plant, or industrial park intended to house more than 1,000 persons, occupying more than 40 acres of land, or having more than 650,000 square feet of floor area

(F) Any mixed–use project that would demand an amount of wat equal to, or greater than, the amount of water needed to serve a 500–dwelling unit project.

(2) As part of approval of the project, any of the following are required:

(A) An amendment to, or revision of, the land use element of a general plan or a specific plan, which would result in a net increase in the stated [illegible]tion density or building intensity to provide for additional devel[illegible]

(B) The adoption of a specific plan, unless the city or county has previously complied with this section for the project.

Notwithstanding the foregoing provisions of this subsection (a)(2), when a project is identified in connection with the revision of any part of a general plan, that project is subject to the requirements of this section only if the project results in a net increase in the stated population density or building intensity, and if the city or county has not previously complied with the requirements of this section for the project in question.

(3) A city or county has determined that an environmental impact report is required in connection with the project.

(b) For projects subject to this guideline, a city or county shall identify any water system that is, or may become, a public water system, as defined in Section 10912 of the Water Code, that may supply water for the project. When a city or county releases a notice of preparation for review, it shall send a copy of the notice to each public water system which serves or would serve the proposed project and request that the system both indicate whether the projected water demand associated with the proposed project was included in its last urban water management plan and assess whether its total projected water supplies available during normal, single–dry, and multiple–dry water years as included in the 20–year projection contained in its urban water management plan will meet the projected water demand associated with the proposed project, in addition to the system's existing and planned future uses.

(c) The governing body of a public water system shall approve and submit its water supply assessment to the city or county not later than 30 days after the date on which the request and notice of preparation were received. If the public water system fails to submit its assessment within [illegible]lotted time, the lead agency may assume, unless there has been a [illegible]t for a specific extension of time from the public water system, that the public water system has no information to submit. If a public water system concludes there would be insufficient water to serve the proposed project, it shall provide the city or county with its plans for acquiring additional water supplies.

(d) The lead agency shall include within the EIR the public water system's assessment and any other information provided by the water agency, up to a maximum of ten typewritten pages. The assessment and information may only exceed that length with the approval of the lead agency. The lead agency may independently evaluate the water system's information and shall determine, based on the entire record, whether projected water supplies will be sufficient to satisfy the demands of the proposed project, in addition to existing and planned future uses. If the lead agency determines that water supplies will not be sufficient, the lead agency must include that determination in its findings for the project pursuant to Sections 15091 and 15093.

(e) For purposes of this section, "public water system" means a system as defined in Section 10912 of the Water Code with 3,000 or more service connections.

(f) This section does not apply to the County of San Diego and the cities in the county as provided in Section 10915 of the Water Code.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21151.9, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15084. Preparing the Draft EIR.

(a) The draft EIR shall be prepared directly by or under contract to the [illegible]agency. The required contents of a draft EIR are discussed in Article [illegible]ginning with Section 15120.

(b) The lead agency may require the project applicant to supply data and information both to determine whether the project may have a significant effect on the environment and to assist the lead agency in preparing the draft EIR. The requested information should include an identification of other public agencies which will have jurisdiction by law over the project.

(c) Any person, including the applicant, may submit information or comments to the lead agency to assist in the preparation of the draft EIR. The submittal may be presented in any format, including the form of a draft EIR. The lead agency must consider all information and comments received. The information or comments may be included in the draft EIR in whole or in part.

(d) The lead agency may choose one of the following arrangements or a combination of them for preparing a draft EIR.

(1) Preparing the draft EIR directly with its own staff.

(2) Contracting with another entity, public or private, to prepare the draft EIR.

(3) Accepting a draft prepared by the applicant, a consultant retained by the applicant, or any other person.

(4) Executing a third party contract or memorandum of understanding with the applicant to govern the preparation of a draft EIR by an independent contractor.

(5) Using a previously prepared EIR.

(e) Before using a draft prepared by another person, the lead agency shall subject the draft to the agency's own review and analysis. The draft EIR which is sent out for public review must reflect the independent judgment of the lead agency. The lead agency is responsible for the adequacy and objectivity of the draft EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21082.1, Public Resources Code.

§ 15085. Notice of Completion.

(a) As soon as the draft EIR is completed, a notice of completion must be filed with OPR in a printed hard copy or in electronic form on a diskette or by electronic mail transmission.

(b) The notice of completion shall include:

(1) A brief description of the project,

(2) The proposed location of the project,

(3) An address where copies of the draft EIR are available, and

(4) The period during which comments will be received on the draft EIR.

(c) A form for the notice of completion is included in the appendices.

(d) Where the EIR will be reviewed through the state review process handled by the State Clearinghouse, the cover form required by the State Clearinghouse will serve as the notice of completion.

(e) Public agencies are encouraged to make copies of notices of completion filed pursuant to this section available in electronic format on the Internet.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21161, Public Resources Code.

HISTORY

1. Amendment of subsections (a) and (d) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).
2. Amendment of subsection (a) and new subsection (e) filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15086. Consultation Concerning Draft EIR.

(a) The lead agency shall consult with and request comments on the draft EIR from:

(1) Responsible agencies,

(2) Trustee agencies with resources affected by the project, and

(3) Any other state, federal, and local agencies which have jurisdiction by law with respect to the project or which exercise authority over resources which may be affected by the project, including water agencies consulted pursuant to section 15083.5.

(4) Any city or county which borders on a city or county within which the project is located.

(5) For a project of statewide, regional, or areawide significance, the transportation planning agencies and public agencies which have transportation facilities within their jurisdictions which could be affected by the project. "Transportation facilities" includes: major local arterials and

public transit within five miles of the project site, and freeways, highways and rail transit service within 10 miles of the project site.

(6) For a state lead agency when the EIR is being prepared for a highway or freeway project, the State Air Resources Board as to the air pollution impact of the potential vehicular use of the highway or freeway and if a non–attainment area, the local air quality management district for a determination of conformity with the air quality management plan.

(7) For a subdivision project located within one mile of a facility of the State Water Resources Development System, the California Department of Water Resources.

(b) The lead agency may consult directly with:

(1) Any person who has special expertise with respect to any environmental impact involved,

(2) Any member of the public who has filed a written request for notice with the lead agency or the clerk of the governing body.

(3) Any person identified by the applicant whom the applicant believes will be concerned with the environmental effects of the project.

(c) A responsible agency or other public agency shall only make substantive comments regarding those activities involved in the project that are within an area of expertise of the agency or which are required to be carried out or approved by the responsible agency. Those comments shall be supported by specific documentation.

(d) Prior to the close of the public review period, a responsible agency or trustee agency which has identified what that agency considers to be significant environmental effects shall advise the lead agency of those effects. As to those effects relevant to its decision, if any, on the project, the responsible or trustee agency shall either submit to the lead agency complete and detailed performance objectives for mitigation measures addressing those effects or refer the lead agency to appropriate, readily available guidelines or reference documents concerning mitigation measures. If the responsible or trustee agency is not aware of mitigation measures that address identified effects, the responsible or trustee agency shall so state.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21081.6, 21092.4, 21092.5, 21104 and 21153, Public Resources Code.

HISTORY

1. Amendment of section and NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).
2. Change without regulatory effect repealing subsection (a)(6) and renumbering subsections filed 2–1–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 5).

§ 15087. Public Review of Draft EIR.

(a) The lead agency shall provide public notice of the availability of a draft EIR at the same time as it sends a notice of completion to OPR. This notice shall be given as provided under Section 15105. Notice shall be mailed to the last known name and address of all organizations and individuals who have previously requested such notice in writing, and shall also be given by at least one of the following procedures:

(1) Publication at least one time by the public agency in a newspaper of general circulation in the area affected by the proposed project. If more than one area is affected, the notice shall be published in the newspaper of largest circulation from among the newspapers of general circulation in those areas.

(2) Posting of notice by the public agency on and off the site in the area where the project is to be located.

(3) Direct mailing to the owners and occupants of property contiguous to the parcel or parcels on which the project is located. Owners of such property shall be identified as shown on the latest equalized assessment roll.

(b) The alternatives for providing notice specified in subsection (a) shall not preclude a public agency from providing additional notice by other means if such agency so desires, nor shall the requirements of this section preclude a public agency from providing the public notice required by this section at the same time and in the same manner as public notice otherwise required by law for the project.

(c) The notice shall disclose the following:

(1) A brief description of the proposed project and its location.

(2) The starting and ending dates for the review period during which the lead agency will receive comments. If the review period is shortened, the notice shall disclose that fact.

(3) The date, time, and place of any scheduled public meetings or hearings to be held by the lead agency on the proposed project when known to the lead agency at the time of notice.

(4) A list of the significant environmental effects anticipated as a result of the project, to the extent which such effects are known to the lead agency at the time of the notice.

(5) The address where copies of the EIR and all documents referenced in the EIR will be available for public review. This location shall be readily accessible to the public during the lead agency's normal working hours.

(6) The presence of the site on any of the lists of sites enumerated under Section 65962.5 of the Government Code including, but not limited to lists of hazardous waste facilities, land designated as hazardous waste property, hazardous waste disposal sites and others, and the information in the Hazardous Waste and Substances Statement required under subsection (f) of that Section.

(d) The notice required under this section shall be posted in the office of the county clerk of each county in which the project will be located for a period of at least 30 days. The county clerk shall post such notices within 24 hours of receipt.

(e) In order to provide sufficient time for public review, the review period for a draft EIR shall be as provided in Section 15105. The review period shall be combined with the consultation required under Section 15086. When a draft EIR has been submitted to the State Clearinghouse, the public review period shall be at least as long as the review period established by the Clearinghouse.

(f) Public agencies shall use the State Clearinghouse to distribute draft EIRs to state agencies for review and should use areawide clearinghouses to distribute the documents to regional and local agencies.

(g) To make copies of EIRs available to the public, lead agencies should furnish copies of draft EIRs to public library systems serving the area involved. Copies should also be available in offices of the lead agency.

(h) Public agencies should compile listings of other agencies, particularly local agencies, which have jurisdiction by law and/or special expertise with respect to various projects and project locations. Such listings should be a guide in determining which agencies should be consulted with regard to a particular project.

(i) Public hearings may be conducted on the environmental documents, either in separate proceedings or in conjunction with other proceedings of the public agency. Public hearings are encouraged, but not required as an element of the CEQA process.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21091, 21092, 21092.2, 21092.3, 21092.6, 21104, 21153 and 21161, Public Resources Code.

HISTORY

1. Amendment of subsection (a) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).
2. Amendment of subsection (a)(3) and NOTE filed 8–19–94; operative 9–19–94 (Register 94, No. 33).
3. Amendment of section and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15088. Evaluation of and Response to Comments.

(a) The lead agency shall evaluate comments on environmental issues received from persons who reviewed the draft EIR and shall prepare a written response. The lead agency shall respond to comments received during the noticed comment period and any extensions and may respond to late comments.

(b) The written response shall describe the disposition of significant environmental issues raised (e.g., revisions to the proposed project to mitigate anticipated impacts or objections). In particular, the major environmental issues raised when the lead agency's position is at variance with recommendations and objections raised in the comments must be

addressed in detail giving reasons why specific comments and suggestions were not accepted. There must be good faith, reasoned analysis in response. Conclusory statements unsupported by factual information will not suffice.

e response to comments may take the form of a revision to the dra. .t or may be a separate section in the final EIR. Where the response to comments makes important changes in the information contained in the text of the draft EIR, the lead agency should either:

(1) Revise the text in the body of the EIR, or

(2) Include marginal notes showing that the information is revised in the response to comments.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code; *People* v. *County of Kern*, (1974) 39 Cal. App. 3d 830; *Cleary v. County of Stanislaus*, (1981) 118 Cal. App. 3d 348.

§ 15088.5. Recirculation of an EIR Prior to Certification.

(a) A lead agency is required to recirculate an EIR when significant new information is added to the EIR after public notice is given of the availability of the draft EIR for public review under Section 15087 but before certification. As used in this section, the term "information" can include changes in the project or environmental setting as well as additional data or other information. New information added to an EIR is not "significant" unless the EIR is changed in a way that deprives the public of a meaningful opportunity to comment upon a substantial adverse environmental effect of the project or a feasible way to mitigate or avoid such an effect (including a feasible project alternative) that the project's proponents have declined to implement. "Significant new information" requiring recirculation include, for example, a disclosure showing that:

(1) A new significant environmental impact would result from the project or from a new mitigation measure proposed to be implemented.

(2) A substantial increase in the severity of an environmental impact would result unless mitigation measures are adopted that reduce the im- a level of insignificance.

feasible project alternative or mitigation measure considerably different from others previously analyzed would clearly lessen the significant environmental impacts of the project, but the project's proponents decline to adopt it.

(4) The draft EIR was so fundamentally and basically inadequate and conclusory in nature that meaningful public review and comment were precluded. (*Mountain Lion Coalition v. Fish & Game Com.* (1989) 214 Cal.App.3d 1043).

(b) Recirculation is not required where the new information added to the EIR merely clarifies or amplifies or makes insignificant modifications in an adequate EIR.

(c) If the revision is limited to a few chapters or portions of the EIR, the lead agency need only recirculate the chapters or portions that have been modified.

(d) Recirculation of an EIR requires notice pursuant to Section 15087, and consultation pursuant to Section 15086.

(e) A decision not to recirculate an EIR must be supported by substantial evidence in the administrative record.

(f) The lead agency shall evaluate and respond to comments as provided in Section 15088. Recirculating an EIR can result in the lead agency receiving more than one set of comments from reviewers. Following are two ways in which the lead agency may identify the set of comments to which it will respond. This dual approach avoids confusion over whether the lead agency must respond to comments which are duplicates or which are no longer pertinent due to revisions to the EIR. In no case shall the lead agency fail to respond to pertinent comments on significant environmental issues.

(1) When the EIR is substantially revised and the entire EIR is recircu- the lead agency may require that reviewers submit new comments ed not respond to those comments received during the earlier circu- on period. The lead agency shall advise reviewers, either within the text of the revised EIR or by an attachment to the revised EIR, that although part of the administrative record, the previous comments do not require a written response in the final EIR, and that new comments must be submitted for the revised EIR. The lead agency need only respond to those comments submitted in response to the recirculated revised EIR. The lead agency shall send directly to every agency, person, or organization that commented on the prior draft EIR a notice of the recirculation specifying that new comments must be submitted.

(2) When the EIR is revised only in part and the lead agency is recirculating only the revised chapters or portions of the EIR, the lead agency may request that reviewers limit their comments to the revised chapters or portions. The lead agency need only respond to (i) comments received during the initial circulation period that relate to chapters or portions of the document that were not revised and recirculated, and (ii) comments received during the recirculation period that relate to the chapters or portions of the earlier EIR that were revised and recirculated. The lead agency's request that reviewers limit the scope of their comments shall be included either within the text of the revised EIR or by an attachment to the revised EIR.

(g) When recirculating a revised EIR, either in whole or in part, the lead agency shall, in the revised EIR or by an attachment to the revised EIR, summarize the revisions made to the previously circulated draft EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21092.1, Public Resources Code; *Laurel Heights Improvement Association v. Regents of the University of California* (1993) 6 Cal. 4th 1112.

HISTORY

1. New section filed 8–19–94; operative 9–19–94 (Register 94, No. 33).
2. New subsections (f)–(g) filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15089. Preparation of Final EIR.

(a) The lead agency shall prepare a final EIR before approving the project. The contents of a final EIR are specified in Section 15132 of these guidelines.

(b) Lead agencies may provide an opportunity for review of the final EIR by the public or by commenting agencies before approving the project. The review of a final EIR should focus on the responses to comments on the draft EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100, 21105 and 21151, Public Resources Code; *City of Carmel–by–the–Sea* v. *Board of Supervisors*, (1977) 71 Cal. App. 3d 84; State Administrative Manual, Section 1060.

§ 15090. Certification of the Final EIR.

(a) Prior to approving a project the lead agency shall certify that:

(1) The final EIR has been completed in compliance with CEQA;

(2) The final EIR was presented to the decisionmaking body of the lead agency and that the decisionmaking body reviewed and considered the information contained in the final EIR prior to approving the project; and

(3) The final EIR reflects the lead agency's independent judgment and analysis.

(b) When an EIR is certified by a non–elected decision–making body within a local lead agency, that certification may be appealed to the local lead agency's elected decision–making body, if one exists. For example, certification of an EIR for a tentative subdivision map by a city's planning commission may be appealed to the city council. Each local lead agency shall provide for such appeals.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082.1, 21100 and 21151, Public Resources Code; *City of Carmel–by–the–Sea* v. *Board of Supervisors* (1977) 71 Cal. App. 3d 84; *Kleist* v. *City of Glendale* (1976) 56 Cal. App. 3d 770.

HISTORY

1. Amendment of section heading, section and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22)

§ 15091. Findings.

(a) No public agency shall approve or carry out a project for which an EIR has been certified which identifies one or more significant environmental effects of the project unless the public agency makes one or more written findings for each of those significant effects, accompanied by a

brief explanation of the rationale for each finding. The possible findings are:

(1) Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.

(2) Such changes or alterations are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.

(3) Specific economic, legal, social, technological, or other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.

(b) The findings required by subsection (a) shall be supported by substantial evidence in the record.

(c) The finding in subsection (a)(2) shall not be made if the agency making the finding has concurrent jurisdiction with another agency to deal with identified feasible mitigation measures or alternatives. The finding in subsection (a)(3) shall describe the specific reasons for rejecting identified mitigation measures and project alternatives.

(d) When making the findings required in subsection (a)(1), the agency shall also adopt a program for reporting on or monitoring the changes which it has either required in the project or made a condition of approval to avoid or substantially lessen significant environmental effects. These measures must be fully enforceable through permit conditions, agreements, or other measures.

(e) The public agency shall specify the location and custodian of the documents or other material which constitute the record of the proceedings upon which its decision is based.

(f) A statement made pursuant to Section 15093 does not substitute for the findings required by this section.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1, 21081 and 21081.6, Public Resources Code; *Laurel Hills Homeowners Association* v. *City Council* (1978) 83 Cal. App. 3d 515; *Cleary* v. *County of Stanislaus* (1981)118 Cal. App. 3d 348; *Sierra Club* v. *Contra Costa County* (1992) 10 Cal.App.4th 1212; *Citizens for Quality Growth* v. *City of Mount Shasta* (1988) 198 Cal.App.3d 433.

HISTORY

1. Amendment of subsections (a) and (a)(3), new subsections (d) and (e), and amendment of NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).
2. Amendment of subsection (c), new subsection (f) and amendment of NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15092. Approval.

(a) After considering the final EIR and in conjunction with making findings under Section 15091, the lead agency may decide whether or how to approve or carry out the project.

(b) A public agency shall not decide to approve or carry out a project for which an EIR was prepared unless either:

(1) The project as approved will not have a significant effect on the environment, or

(2) The agency has:

(A) Eliminated or substantially lessened all significant effects on the environment where feasible as shown in findings under Section 15091, and

(B) Determined that any remaining significant effects on the environment found to be unavoidable under Section 15091 are acceptable due to overriding concerns as described in Section 15093.

(c) With respect to a project which includes housing development, the public agency shall not reduce the proposed number of housing units as a mitigation measure if it determines that there is another feasible specific mitigation measure available that will provide a comparable level of mitigation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1, 21081 and 21085, Public Resources Code; *Friends of Mammoth* v. *Board of Supervisors*, (1972) 8 Cal. App. 3d 247; San *Francisco Ecology Center* v. *City and County of San Francisco*, (1975) 48 Cal. App. 3d 584; *City of Carmel–by–the–Sea* v. *Board of Supervisors*, (1977) 71 Cal. App. 3d 84; *Laurel Hills Homeowners Association* v. *City Council*, (1978) 83 Cal. App. 3d 515.

§ 15093. Statement of Overriding Considerations.

(a) CEQA requires the decision–making agency to balance, as applicable, the economic, legal, social, technological, or other benefits of a proposed project against its unavoidable environmental risks when determining whether to approve the project. If the specific economic, legal, social, technological, or other benefits of a proposal project outweigh the unavoidable adverse environmental effects, the adverse environmental effects may be considered "acceptable."

(b) When the lead agency approves a project which will result in the occurrence of significant effects which are identified in the final EIR but are not avoided or substantially lessened, the agency shall state in writing the specific reasons to support its action based on the final EIR and/or other information in the record. The statement of overriding considerations shall be supported by substantial evidence in the record.

(c) If an agency makes a statement of overriding considerations, the statement should be included in the record of the project approval and should be mentioned in the notice of determination. This statement does not substitute for, and shall be in addition to, findings required pursuant to Section 15091.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002 and 21081, Public Resources Code; *San Francisco Ecology Center* v. *City and County of San Francisco* (1975) 48 Cal. App. 3d 584; *City of Carmel–by–the–Sea* v. *Board of Supervisors* (1977) 71 Cal. App. 3d 84; *Sierra Club v. Contra Costa County* (1992) 10 Cal.App.4th 1212; *Citizens for Quality Growth v. City of Mount Shasta* (1988) 198 Cal.App.3d 433.

HISTORY

1. Amendment of subsections (a) and (b) and amendment of NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).
2. Amendment of subsections (b) and (c) and amendment of NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15094. Notice of Determination.

(a) The lead agency shall file a notice of determination within 5 working days after approval of the project by the lead agency. The notice shall include:

(1) An identification of the project including its common name where possible and its location.

(2) A brief description of the project.

(3) The date when the agency approved the project.

(4) The determination of the agency whether the project in its approved form will have a significant effect on the environment.

(5) A statement that an EIR was prepared and certified pursuant to the provisions of CEQA.

(6) Whether mitigation measures were made a condition of the approval of the project.

(7) Whether findings were made pursuant to Section 15091.

(8) Whether a statement of overriding considerations was adopted for the project.

(9) The address where a copy of the final EIR and the record of project approval may be examined.

(b) If a state agency is the lead agency, the notice of determination shall be filed with OPR.

(c) If a local agency is the lead agency, the notice of determination shall be filed with the county clerk of the county or counties in which the project will be located. If the project requires discretionary approval from a state agency, the notice of determination shall also be filed with OPR.

(d) A notice of determination filed with the county clerk is available for public inspection and shall be posted within 24 hours of receipt for a period of at least 30 days. Thereafter, the clerk shall return the notice to the local lead agency with a notation of the period during which it was posted. The local lead agency shall retain the notice for not less than 9 months.

(e) A notice of determination filed with OPR is available for public spection and shall be posted for a period of at least 30 days.

(f) The filing of the notice of determination and the posting of such notice starts a 30–day statute of limitations on court challenges to the approval under CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108, 21152 and 21167, Public Resources Code; *Citizens of Lake Area Association* v. *City Council*, (1982) 129 Cal. App. 3d 436.

HISTORY

1. Amendment of subsections (b) and (c) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).
2. Amendment of subsection (a), new subsections (d) and (e), subsection reletter-ing, and amendment of newly designated subsection (f) filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15095. Disposition of a Final EIR.

The lead agency shall:

(a) File a copy of the final EIR with the appropriate planning agency of any city, county, or city and county where significant effects on the environment may occur.

(b) Include the final EIR as part of the regular project report which is used in the existing project review and budgetary process if such a report is used.

(c) Retain one or more copies of the final EIR as public records for a reasonable period of time.

(d) Require the applicant to provide a copy of the certified, final EIR to each responsible agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21105, 21151 and 21165, Public Resources Code; *County of Inyo v. Yorty*, (1973) 32 Cal. App. 3d 795.

§ 15096. Process for a Responsible Agency.

(a) General. A responsible agency complies with CEQA by considering the EIR or negative declaration prepared by the lead agency and by reaching its own conclusions on whether and how to approve the project involved. This section identifies the special duties a public agency will ' 'hen acting as a responsible agency.

Response to Consultation. A responsible agency shall respond to consultation by the lead agency in order to assist the lead agency in preparing adequate environmental documents for the project. By this means, the responsible agency will ensure that the documents it will use will comply with CEQA.

(1) In response to consultation, a responsible agency shall explain its reasons for recommending whether the lead agency should prepare an EIR or negative declaration for a project. Where the responsible agency disagrees with the lead agency's proposal to prepare a negative declaration for a project, the responsible agency should identify the significant environmental effects which it believes could result from the project and recommend either that an EIR be prepared or that the project be modified to eliminate the significant effects.

(2) As soon as possible, but not longer than 30 days after receiving a notice of preparation from the lead agency, the responsible agency shall send a written reply by certified mail or any other method which provides the agency with a record showing that the notice was received. The reply shall specify the scope and content of the environmental information which would be germane to the responsible agency's statutory responsibilities in connection with the proposed project. The lead agency shall include this information in the EIR.

(c) Meetings. The responsible agency shall designate employees or representatives to attend meetings requested by the lead agency to discuss the scope and content of the EIR.

(d) Comments on Draft EIRs and Negative Declarations. A responsible agency should review and comment on draft EIRs and negative declarations for projects which the responsible agency would later be asked to approve. Comments should focus on any shortcomings in the EIR, the ' 'priateness of using a negative declaration, or on additional alterna- 'r mitigation measures which the EIR should include. The comments shall be limited to those project activities which are within the agency's area of expertise or which are required to be carried out or approved by the agency or which will be subject to the exercise of powers by the agency. Comments shall be as specific as possible and supported by either oral or written documentation.

(e) Decision on Adequacy of EIR or Negative Declaration. If a responsible agency believes that the final EIR or negative declaration prepared by the lead agency is not adequate for use by the responsible agency, the responsible agency must either:

(1) Take the issue to court within 30 days after the lead agency files a notice of determination;

(2) Be deemed to have waived any objection to the adequacy of the EIR or negative declaration;

(3) Prepare a subsequent EIR if permissible under Section 15162; or

(4) Assume the lead agency role as provided in Section 15052(a)(3).

(f) Consider the EIR or Negative Declaration. Prior to reaching a decision on the project, the responsible agency must consider the environmental effects of the project as shown in the EIR or negative declaration. A subsequent or supplemental EIR can be prepared only as provided in Sections 15162 or 15163.

(g) Adoption of Alternatives or Mitigation Measures.

(1) When considering alternatives and mitigation measures, a responsible agency is more limited than a lead agency. A responsible agency has responsibility for mitigating or avoiding only the direct or indirect environmental effects of those parts of the project which it decides to carry out, finance, or approve.

(2) When an EIR has been prepared for a project, the Responsible Agency shall not approve the project as proposed if the agency finds any feasible alternative or feasible mitigation measures within its powers that would substantially lessen or avoid any significant effect the project would have on the environment. With respect to a project which includes housing development, the responsible agency shall not reduce the proposed number of housing units as a mitigation measure if it determines that there is another feasible specific mitigation measure available that will provide a comparable level of mitigation.

(h) Findings. The responsible agency shall make the findings required by Section 15091 for each significant effect of the project and shall make the findings in Section 15093 if necessary.

(i) Notice of Determination. The responsible agency should file a notice of determination in the same manner as a lead agency under Section 15075 or 15094 except that the responsible agency does not need to state that the EIR or negative declaration complies with CEQA. The responsible agency should state that it considered the EIR or negative declaration as prepared by a lead agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21165, 21080.1, 21080.3, 21080.4, 21082.1 and 21002.1(b) and (d), Public Resources Code.

HISTORY

1. Amendment of subsections (b) and (d) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15097. Mitigation Monitoring or Reporting.

(a) This section applies when a public agency has made the findings required under paragraph (1) of subdivision (a) of Section 15091 relative to an EIR or adopted a mitigated negative declaration in conjunction with approving a project. In order to ensure that the mitigation measures and project revisions identified in the EIR or negative declaration are implemented, the public agency shall adopt a program for monitoring or reporting on the revisions which it has required in the project and the measures it has imposed to mitigate or avoid significant environmental effects. A public agency may delegate reporting or monitoring responsibilities to another public agency or to a private entity which accepts the delegation; however, until mitigation measures have been completed the lead agency remains responsible for ensuring that implementation of the mitigation measures occurs in accordance with the program.

(b) Where the project at issue is the adoption of a general plan, specific plan, community plan or other plan–level document (zoning, ordinance, regulation, policy), the monitoring plan shall apply to policies and any other portion of the plan that is a mitigation measure or adopted alternative. The monitoring plan may consist of policies included in plan–level documents. The annual report on general plan status required pursuant

to the Government Code is one example of a reporting program for adoption of a city or county general plan.

(c) The public agency may choose whether its program will monitor mitigation, report on mitigation, or both. "Reporting" generally consists of a written compliance review that is presented to the decision making body or authorized staff person. A report may be required at various stages during project implementation or upon completion of the mitigation measure. "Monitoring" is generally an ongoing or periodic process of project oversight. There is often no clear distinction between monitoring and reporting and the program best suited to ensuring compliance in any given instance will usually involve elements of both. The choice of program may be guided by the following:

(1) Reporting is suited to projects which have readily measurable or quantitative mitigation measures or which already involve regular review. For example, a report may be required upon issuance of final occupancy to a project whose mitigation measures were confirmed by building inspection.

(2) Monitoring is suited to projects with complex mitigation measures, such as wetlands restoration or archeological protection, which may exceed the expertise of the local agency to oversee, are expected to be implemented over a period of time, or require careful implementation to assure compliance.

(3) Reporting and monitoring are suited to all but the most simple projects. Monitoring ensures that project compliance is checked on a regular basis during and, if necessary after, implementation. Reporting ensures that the approving agency is informed of compliance with mitigation requirements.

(d) Lead and responsible agencies should coordinate their mitigation monitoring or reporting programs where possible. Generally, lead and responsible agencies for a given project will adopt separate and different monitoring or reporting programs. This occurs because of any of the following reasons: the agencies have adopted and are responsible for reporting on or monitoring different mitigation measures; the agencies are deciding on the project at different times; each agency has the discretion to choose its own approach to monitoring or reporting; and each agency has its own special expertise.

(e) At its discretion, an agency may adopt standardized policies and requirements to guide individually adopted monitoring or reporting programs. Standardized policies and requirements may describe, but are not limited to:

(1) The relative responsibilities of various departments within the agency for various aspects of monitoring or reporting, including lead responsibility for administering typical programs and support responsibilities.

(2) The responsibilities of the project proponent.

(3) Agency guidelines for preparing monitoring or reporting programs.

(4) General standards for determining project compliance with the mitigation measures or revisions and related conditions of approval.

(5) Enforcement procedures for noncompliance, including provisions for administrative appeal.

(6) Process for informing staff and decision makers of the relative success of mitigation measures and using those results to improve future mitigation measures.

(f) Where a trustee agency, in timely commenting upon a draft EIR or a proposed mitigated negative declaration, proposes mitigation measures or project revisions for incorporation into a project, that agency, at the same time, shall prepare and submit to the lead or responsible agency a draft monitoring or reporting program for those measures or revisions. The lead or responsible agency may use this information in preparing its monitoring or reporting program.

(g) When a project is of statewide, regional, or areawide importance, any transportation information generated by a required monitoring or reporting program shall be submitted to the transportation planning agency in the region where the project is located. Each transportation planning agency shall adopt guidelines for the submittal of such information.

NOTE: Authority: Sections 21083 and 21087, Public Resources Code. References: Sections 21081.6 and 21081.7, Public Resources Code.

HISTORY

1. New section filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

Article 8. Time Limits

§ 15100. General.

(a) Public agencies shall adopt time limits to govern their implementation of CEQA consistent with this article.

(b) Public agencies should carry out their responsibilities for preparing and reviewing EIRs within a reasonable period of time. The requirement for the preparation of an EIR should not cause undue delays in the processing of applications for permits or other entitlements to use.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY

1. Renumbering and amendment of former Article 8 (Sections 15100–15129) to Article 19 (Sections 15300–15329) and new Article 8 (Sections 15100–15112) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Register 82, No. 2.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15101. Review of Application for Completeness.

A lead agency or responsible agency shall determine whether an application for a permit or other entitlement for use is complete within 30 days from the receipt of the application except as provided in Section 15111. If no written determination of the completeness of the application is made within that period, the application will be deemed complete on the 30th day.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083, Public Resources Code; and Section 65943, Government Code.

§ 15102. Initial Study.

The lead agency shall determine within 30 days after accepting an application as complete whether it intends to prepare an EIR or a negative declaration or use a previously prepared EIR or negative declaration except as provided in Section 15111. The 30 day period may be extended 15 days upon the consent of the lead agency and the project applicant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.2, Public Resources Code.

HISTORY

1. Amendment filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15103. Response to Notice of Preparation.

Responsible agencies and trustee agencies shall provide a response to a notice of preparation to the lead agency within 30 days after receipt of the notice. If a responsible agency fails to reply within the 30 days with either a response or a well justified request for additional time, the lead agency may assume that the responsible agency has no response and any ignore a late response.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

HISTORY

1. Amendment filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15104. Convening of Meetings.

The lead agency shall convene a meeting with agency representatives to discuss the scope and content of the environmental information a responsible agency will need in the EIR as soon as possible but no later than 30 days after receiving a request for the meeting. The meeting may be requested by the lead agency, a responsible agency, a trustee agency, or by the project applicant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

§ 15105. Public Review Period for a Draft EIR or a Proposed Negative Declaration or Mitigated Negative Declaration.

(a) The public review period for a draft EIR shall not be less than 30 days nor should it be longer than 60 days except in unusual circumstances. When a draft EIR is submitted to the State Clearinghouse for review by state agencies, the public review period shall not be less than 45 days, unless a shorter period, not less than 30 days, is approved by the State Clearinghouse.

(b) The public review period for a proposed negative declaration or mitigated negative declaration shall be not less than 20 days. When a proposed negative declaration or mitigated negative declaration is submitted to the State Clearinghouse for review by state agencies, the public review period shall not be less than 30 days, unless a shorter period, not less than 20 days, is approved by the State Clearinghouse.

(c) If a draft EIR or proposed negative declaration or mitigated negative declaration has been submitted to the State Clearinghouse for review by state agencies, the public review period shall be at least as long as the review period established by the State Clearinghouse.

(d) A shortened Clearinghouse review period may be granted in accordance with the provisions of Appendix K and the following principles:

(1) A shortened review shall not be granted for any proposed project of statewide, areawide, or regional environmental significance.

(2) Requests for shortened review periods shall be submitted to the Clearinghouse in writing by the decision–making body of the lead agency, or a representative authorized by ordinance, resolution, or delegation of the decision–making body.

(3) The lead agency has contacted responsible and trustee agencies and they have agreed to the shortened review period.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21091 and 21092, Public Resources Code; *People* v. *County of* 9 Cal. App. 3d 830.

HISTORY

1. Amendment of section heading, section and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).
2. Change without regulatory effect amending subsection (d) filed 2–1–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 5).

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code.

HISTORY

1. Repealer filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15107. Completion of Negative Declaration for Certain Private Projects.

With private projects involving the issuance of a lease, permit, license, certificate, or other entitlement for use by one or more public agencies, the negative declaration must be completed and approved within 180 days from the date when the lead agency accepted the application as complete.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code.

HISTORY

1. Amendment of section heading and section filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15108. Completion and Certification of EIR.

With a private project, the lead agency shall complete and certify the EIR as provided in Section 15090 within one year after the date the lead agency accepted the application as complete. Lead agency procedures may provide that the one–year time limit may be extended once for a period of not more than 90 days upon consent of the lead agency and the applicant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code; and Government Code Section 65950.

§ 15109. Suspension of Time Periods.

An unreasonable delay by an applicant in meeting requests by the lead agency necessary for the preparation of a negative declaration or an EIR shall suspend the running of the time periods described in Sections 15107 and 15108 for the period of the unreasonable delay. Alternatively, an agency may disapprove a project application where there is unreasonable delay in meeting requests. The agency may allow a renewed application to start at the same point in the process where the application was when it was disapproved.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code; *Carmel Valley View, Ltd.* v. *Maggini*, 91 Cal. App. 3d 318.

§ 15110. Projects with Federal Involvement.

(a) At the request of an applicant, the lead agency may waive the one–year time limit for completing and certifying a final EIR or the 105–day period for completing a negative declaration if:

(1) The project will be subject to CEQA and to the National Environmental Policy Act,

(2) Additional time will be required to prepare a combined EIR–EIS or combined negative declaration–finding of no significant impact as provided in Section 15221, and

(3) The time required to prepare the combined document will be shorter than the time required to prepare the documents separately.

(b) The time limits for taking final action on a permit for a development project may also be waived where a combined EIR–EIS will be prepared.

(c) The time limits for processing permits for development projects under Government Code Sections 65950–65960 shall not apply if federal statutes or regulations require time schedules which exceed the state time limits. In this event, any state agencies involved shall make a final decision on the project within the federal time limits.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.6 and 21083.7, Public Resources Code; Sections 65951 and 65954, Government Code; Public Law 91–190 as amended, 42 U.S.C.A. 4321–4347.

HISTORY

1. Amendment of subsection (a)(2) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15111. Projects with Short Time Periods for Approval.

(a) A few statutes or ordinances require agencies to make decisions on permits within time limits that are so short that review of the project under CEQA would be difficult. To enable the lead agency to comply with both the permit statute and CEQA, the lead agency shall deem an application for a project not received for filing under the permit statute or ordinance until such time as progress toward completing the environmental documentation required by CEQA is sufficient to enable the lead agency to finish the CEQA process within the short permit time limit. This section will apply where all of the following conditions are met:

(1) The enabling legislation for a program, other than Chapter 4.5 (commencing with Section 65920) of Division 1 of Title 7 of the Government Code, requires the lead agency to take action on an application within a specified period of time that is six months or less, and

(2) The enabling legislation provides that the project will become approved by operation of law if the lead agency fails to take any action within such specified time period, and

(3) The project involves the issuance of a lease, permit, license, certificate, or other entitlement for use.

(b) Examples of time periods subject to this section include but are not limited to:

(1) Action on a timber harvesting plan by the Director of Forestry within 15 days pursuant to Section 4582.7 of the Public Resources Code,

(2) Action on a permit by the San Francisco Bay Conservation and Development Commission within 90 days pursuant to Section 66632(f) of the Government Code, and

(3) Action on an oil and gas permit by the Division of Oil and Gas within 10 days pursuant to Sections 3203 or 3724 of the Public Resources Code.

(c) In any case described in this section, the environmental document shall be completed or certified and the decision on the project shall be made within the period established under the Permit Streamlining Act (Government Code Sections 65920, et seq.).

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100.2 and 21151.5, Public Resources Code; *N.R.D.C.* v. *Arcata National Corp.* (1976) 59 Cal. App. 3d 959.

HISTORY

1. Repealer of subsection (b)(1), subsection renumbering, amendment of subsection (c) and amendment of NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15112. Statutes of Limitations.

(a) CEQA provides unusually short statutes of limitations on filing court challenges to the approval of projects under the act.

(b) The statute of limitations periods are not public review periods or waiting periods for the person whose project has been approved. The project sponsor may proceed to carry out the project as soon as the necessary permits have been granted. The statute of limitations cuts off the right of another person to file a court action challenging approval of the project after the specified time period has expired.

(c) The statute of limitations periods under CEQA are as follows:

(1) Where the public agency filed a notice of determination in compliance with Sections 15075 or 15094, 30 days after the filing of the notice and the posting on a list of such notices.

(2) Where the public agency filed a notice of exemption in compliance with Section 15062, 35 days after the filing of the notice and the posting on a list of such notices.

(3) Where a certified state regulatory agency files a notice of decision in compliance with Public Resources Code Section 21080.5(d)(2)(v), 30 days after the filing of the notice.

(4) Where the Secretary for Resources certifies a state environmental regulatory agency under Public Resources Code Section 21080.5, the certification may be challenged only during the 30 days following the certification decision.

(5) Where none of the other statute of limitations periods in this section apply, 180 days after either:

(A) The public agency's decision to carry out or approve the project, or

(B) Commencement of the project if the project is undertaken without a formal decision by the public agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21167, 21167.3 and 21080.5, Public Resources Code; *Kriebel* v. *City Council*, 112 Cal. App. 3d 693; *Citizens of Lake Murray Area Association* v. *City Council*, (1982) 129 Cal. App. 3d 436.

Article 9. Contents of Environmental Impact Reports

§ 15120. General.

(a) Environmental Impact Reports shall contain the information outlined in this article, but the format of the document may be varied. Each element must be covered, and when these elements are not separated into distinct sections, the document shall state where in the document each element is discussed.

(b) The EIR may be prepared as a separate document, as part of a general plan, or as part of a project report. If prepared as a part of the project report, it must still contain one separate and distinguishable section providing either analysis of all the subjects required in an EIR or as a minimum, a table showing where each of the subjects is discussed. When the lead agency is a state agency, the EIR shall be included as part of the regular project report if such a report is used in the agency's existing review and budgetary process.

(c) Draft EIRs shall contain the information required by Sections 15122 through 15131. Final EIRs shall contain the same information and the subjects described in Section 15132.

(d) No document prepared pursuant to this article that is available for public examination shall include a "trade secret" as defined in Section 6254.7 of the Government Code, information about the location of archaeological sites and sacred lands, or any other information that is subject to the disclosure restrictions of Section 6254 of the Government Code.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100, 21105 and 21160, Public Resources Code.

HISTORY

1. Repealer of Article 9 (Sections 15140–15151) and new Article 9 (Sections 15120–15132) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 82, No. 2; 80, No. 19; 78, No. 5; 77, No. 1; 76, No. 41; 75, Nos. 1 and 18; and 73, No. 50.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).
3. New subsection (d) and amendment of NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15121. Informational Document.

(a) An EIR is an informational document which will inform public agency decisionmakers and the public generally of the significant environmental effect of a project, identify possible ways to minimize the significant effects, and describe reasonable alternatives to the project. The public agency shall consider the information in the EIR along with other information which may be presented to the agency.

(b) While the information in the EIR does not control the agency's ultimate discretion on the project, the agency must respond to each significant effect identified in the EIR by making findings under Section 15091 and if necessary by making a statement of overriding considerations under Section 15093.

(c) The information in an EIR may constitute substantial evidence in the record to support the agency's action on the project if its decision is later challenged in court.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21061, Public Resources Code; *Carmel Valley View, Ltd.* v. *Board of Supervisors*, (1976) 58 Cal. App. 3d 817.

§ 15122. Table of Contents or Index.

An EIR shall contain at least a table of contents or an index to assist readers in finding the analysis of different subjects and issues.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21061, Public Resources Code.

§ 15123. Summary.

(a) An EIR shall contain a brief summary of the proposed actions and its consequences. The language of the summary should be as clear and simple as reasonably practical.

(b) The summary shall identify:

(1) Each significant effect with proposed mitigation measures and alternatives that would reduce or avoid that effect;

(2) Areas of controversy known to the lead agency including issues raised by agencies and the public; and

(3) Issues to be resolved including the choice among alternatives and whether or how to mitigate the significant effects.

(c) The summary should normally not exceed 15 pages.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21061, Public Resources Code.

§ 15124. Project Description.

The description of the project shall contain the following information but should not supply extensive detail beyond that needed for evaluation and review of the environmental impact.

(a) The precise location and boundaries of the proposed project shall be shown on a detailed map, preferably topographic. The location of the project shall also appear on a regional map.

(b) A statement of the objectives sought by the proposed project. A clearly written statement of objectives will help the lead agency develop a reasonable range of alternatives to evaluate in the EIR and will aid the

decision makers in preparing findings or a statement of overriding considerations, if necessary. The statement of objectives should include the underlying purpose of the project.

(c) A general description of the project's technical, economic, and environmental characteristics, considering the principal engineering proposal if any and supporting public service facilities.

(d) A statement briefly describing the intended uses of the EIR.

(1) This statement shall include, to the extent that the information is known to the lead agency,

(A) A list of the agencies that are expected to use the EIR in their decision–making, and

(B) A list of permits and other approvals required to implement the project.

(C) A list of related environmental review and consultation requirements required by federal, state, or local laws, regulations, or policies. To the fullest extent possible, the lead agency should integrate CEQA review with these related environmental review and consultation requirements.

(2) If a public agency must make more than one decision on a project, all its decisions subject to CEQA should be listed, preferably in the order in which they will occur. On request, the Office of Planning and Research will provide assistance in identifying state permits for a project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.3, 21080.4, 21165, 21166 and 21167.2, Public Resources Code; *County of Inyo* v. *City of Los Angeles* (1977) 71 Cal. App. 3d 185.

HISTORY

1. Amendment of subsections (b) and (d)(1)(B), new subsection (d)(1)(C) and amendment of NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15125. Environmental Setting.

(a) An EIR must include a description of the physical environmental conditions in the vicinity of the project, as they exist at the time the notice of preparation is published, or if no notice of preparation is published, at the time environmental analysis is commenced, from both a local and regional perspective. This environmental setting will normally constitute the baseline physical conditions by which a lead agency determines whether an impact is significant. The description of the environmental setting shall be no longer than is necessary to an understanding of the significant effects of the proposed project and its alternatives.

(b) When preparing an EIR for a plan for the reuse of a military base, lead agencies should refer to the special application of the principle of baseline conditions for determining significant impacts contained in Section 15229.

(c) Knowledge of the regional setting is critical to the assessment of environmental impacts. Special emphasis should be placed on environmental resources that are rare or unique to that region and would be affected by the project. The EIR must demonstrate that the significant environmental impacts of the proposed project were adequately investigated and discussed and it must permit the significant effects of the project to be considered in the full environmental context.

(d) The EIR shall discuss any inconsistencies between the proposed project and applicable general plans and regional plans. Such regional plans include, but are not limited to, the applicable air quality attainment or maintenance plan or State Implementation Plan, area–wide waste treatment and water quality control plans, regional transportation plans, regional housing allocation plans, habitat conservation plans, natural community conservation plans and regional land use plans for the protection of the coastal zone, Lake Tahoe Basin, San Francisco Bay, and Santa Monica Mountains.

(e) Where a proposed project is compared with an adopted plan, the analysis shall examine the existing physical conditions at the time the notice of preparation is published, or if no notice of preparation is published, at the time environmental analysis is commenced as well as the potential future conditions discussed in the plan.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061 and 21100, Public Resources Code; *E.P.I.C.* v. *County of El Dorado*, (1982) 131 Cal. App. 3d 350; *San Joaquin Raptor/Wildlife Rescue Center v. County of Stanislaus* (1994) 27 Cal.App.4th 713; *Bloom v. McGurk* (1994) 26 Cal.App.4th 1307.

HISTORY

1. Amendment of section and NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15126. Consideration and Discussion of Environmental Impacts.

All phases of a project must be considered when evaluating its impact on the environment: planning, acquisition, development, and operation. The subjects listed below shall be discussed as directed in Sections 15126.2, 15126.4 and 15126.6, preferably in separate sections or paragraphs of the EIR. If they are not discussed separately, the EIR shall include a table showing where each of the subjects is discussed.

(a) Significant Environmental Effects of the Proposed Project.

(b) Significant Environmental Effects Which Cannot be Avoided if the Proposed Project is Implemented.

(c) Significant Irreversible Environmental Changes Which Would be Involved in the Proposed Project Should it be Implemented.

(d) Growth–Inducing Impact of the Proposed Project.

(e) The Mitigation Measures Proposed to Minimize the Significant Effects.

(f) Alternatives to the Proposed Project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21003, 21100 and 21081.6, Public Resources Code; *Citizens of Goleta Valley v. Board of Supervisors*, (1990) 52 Cal.3d 553; *Laurel Heights Improvement Association v. Regents of the University of California*, (1988) 47 Cal. 3d 376; *Gentry v. City of Murrieta* (1995) 36 Cal.App.4th 1359; and *Laurel Heights Improvement Association v. Regents of the University of California* (1993) 6 Cal. 4th 1112.

HISTORY

1. Amendment of subsection (d), repealer and new subsections (d)(1)–(4), amendment of subsection (d)(5), new subsections (d)(5)(A)–(B)3, designation of subsection (d)(5)(C) and amendment of NOTE filed 8–19–94; operative 9–19–94 (Register 94, No. 33).
2. Amendment of section heading, repealer of subsection (e), subsection relettering, and amendment of NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).
3. Amendment of first paragraph, repealer and new subsections (a)–(f) and amendment of NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15126.2. Consideration and Discussion of Significant Environmental Impacts.

(a) The Significant Environmental Effects of the Proposed Project. An EIR shall identify and focus on the significant environmental effects of the proposed project. In assessing the impact of a proposed project on the environment, the lead agency should normally limit its examination to changes in the existing physical conditions in the affected area as they exist at the time the notice of preparation is published, or where no notice of preparation is published, at the time environmental analysis is commenced. Direct and indirect significant effects of the project on the environment shall be clearly identified and described, giving due consideration to both the short–term and long–term effects. The discussion should include relevant specifics of the area, the resources involved, physical changes, alterations to ecological systems, and changes induced in population distribution, population concentration, the human use of the land (including commercial and residential development), health and safety problems caused by the physical changes, and other aspects of the resource base such as water, historical resources, scenic quality, and public services. The EIR shall also analyze any significant environmental effects the project might cause by bringing development and people into the area affected. For example, an EIR on a subdivision astride an active fault line should identify as a significant effect the seismic hazard to future occupants of the subdivision. The subdivision would have the effect of attracting people to the location and exposing them to the hazards found there.

(b) Significant Environmental Effects Which Cannot be Avoided if the Proposed Project is Implemented. Describe any significant impacts, including those which can be mitigated but not reduced to a level of insignificance. Where there are impacts that cannot be alleviated without imposing an alternative design, their implications and the reasons why the

project is being proposed, notwithstanding their effect, should be described.

(c) Significant Irreversible Environmental Changes Which Would be Caused by the Proposed Project Should it be Implemented. Uses of nonrenewable resources during the initial and continued phases of the project may be irreversible since a large commitment of such resources makes removal or nonuse thereafter unlikely. Primary impacts and, particularly, secondary impacts (such as highway improvement which provides access to a previously inaccessible area) generally commit future generations to similar uses. Also irreversible damage can result from environmental accidents associated with the project. Irretrievable commitments of resources should be evaluated to assure that such current consumption is justified.

(d) Growth–Inducing Impact of the Proposed Project. Discuss the ways in which the proposed project could foster economic or population growth, or the construction of additional housing, either directly or indirectly, in the surrounding environment. Included in this are projects which would remove obstacles to population growth (a major expansion of a waste water treatment plant might, for example, allow for more construction in service areas). Increases in the population may tax existing community service facilities, requiring construction of new facilities that could cause significant environmental effects. Also discuss the characteristic of some projects which may encourage and facilitate other activities that could significantly affect the environment, either individually or cumulatively. It must not be assumed that growth in any area is necessarily beneficial, detrimental, or of little significance to the environment.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21003 and 21100, Public Resources Code; *Citizens of Goleta Valley v. Board of Supervisors*, (1990) 52 Cal.3d 553; *Laurel Heights Improvement Association v. Regents of the University of California*, (1988) 47 Cal.3d 376; *Gentry v. City of Murrieta* (1995) 36 Cal.App.4th 1359; *Laurel Heights Improvement Association v. Regents of the University of California* (1993) 6 Cal.4th 1112; and *Goleta Union School Dist. v. Regents of the Univ. Of Calif* (1995) 37 Cal. App.4th 1025.

HISTORY

1. New section filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15126.4. Consideration and Discussion of Mitigation Measures Proposed to Minimize Significant Effects.

(a) Mitigation Measures in General.

(1) An EIR shall describe feasible measures which could minimize significant adverse impacts, including where relevant, inefficient and unnecessary consumption of energy.

(A) The discussion of mitigation measures shall distinguish between the measures which are proposed by project proponents to be included in the project and other measures proposed by the lead, responsible or trustee agency or other persons which are not included but the lead agency determines could reasonably be expected to reduce adverse impacts if required as conditions of approving the project. This discussion shall identify mitigation measures for each significant environmental effect identified in the EIR.

(B) Where several measures are available to mitigate an impact, each should be discussed and the basis for selecting a particular measure should be identified. Formulation of mitigation measures should not be deferred until some future time. However, measures may specify performance standards which would mitigate the significant effect of the project and which may be accomplished in more than one specified way.

(C) Energy conservation measures, as well as other appropriate mitigation measures, shall be discussed when relevant. Examples of energy conservation measures are provided in Appendix F.

(D) If a mitigation measure would cause one or more significant effects in addition to those that would be caused by the project as proposed, the effects of the mitigation measure shall be discussed but in less detail than the significant effects of the project as proposed. (*Stevens v. City of Glendale* (1981) 125 Cal.App.3d 986.)

(2) Mitigation measures must be fully enforceable through permit conditions, agreements, or other legally–binding instruments. In the case of the adoption of a plan, policy, regulation, or other public project, mitigation measures can be incorporated into the plan, policy, regulation, or project design.

(3) Mitigation measures are not required for effects which are not found to be significant.

(4) Mitigation measures must be consistent with all applicable constitutional requirements, including the following:

(A) There must be an essential nexus (i.e. connection) between the mitigation measure and a legitimate governmental interest. *Nollan v. California Coastal Commission*, 483 U.S. 825 (1987); and

(B) The mitigation measure must be "roughly proportional" to the impacts of the project. *Dolan v. City of Tigard*, 512 U.S. 374 (1994). Where the mitigation measure is an ad hoc exaction, it must be "roughly proportional" to the impacts of the project. *Ehrlich v. City of Culver City* (1996) 12 Cal.4th 854.

(5) If the lead agency determines that a mitigation measure cannot be legally imposed, the measure need not be proposed or analyzed. Instead, the EIR may simply reference that fact and briefly explain the reasons underlying the lead agency's determination.

(b) Mitigation Measures Related to Impacts on Historical Resources.

(1) Where maintenance, repair, stabilization, rehabilitation, restoration, preservation, conservation or reconstruction of the historical resource will be conducted in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings (1995), Weeks and Grimmer, the project's impact on the historical resource shall generally be considered mitigated below a level of significance and thus is not significant.

(2) In some circumstances, documentation of an historical resource, by way of historic narrative, photographs or architectural drawings, as mitigation for the effects of demolition of the resource will not mitigate the effects to a point where clearly no significant effect on the environment would occur.

(3) Public agencies should, whenever feasible, seek to avoid damaging effects on any historical resource of an archaeological nature. The following factors shall be considered and discussed in an EIR for a project involving such an archaeological site:

(A) Preservation in place is the preferred manner of mitigating impacts to archaeological sites. Preservation in place maintains the relationship between artifacts and the archaeological context. Preservation may also avoid conflict with religious or cultural values of groups associated with the site.

(B) Preservation in place may be accomplished by, but is not limited to, the following:

1. Planning construction to avoid archaeological sites;

2. Incorporation of sites within parks, greenspace, or other open space;

3. Covering the archaeological sites with a layer of chemically stable soil before building tennis courts, parking lots, or similar facilities on the site.

4. Deeding the site into a permanent conservation easement.

(C) When data recovery through excavation is the only feasible mitigation, a data recovery plan, which makes provision for adequately recovering the scientifically consequential information from and about the historical resource, shall be prepared and adopted prior to any excavation being undertaken. Such studies shall be deposited with the California Historical Resources Regional Information Center. Archaeological sites known to contain human remains shall be treated in accordance with the provisions of Section 7050.5 Health and Safety Code.

(D) Data recovery shall not be required for an historical resource if the lead agency determines that testing or studies already completed have adequately recovered the scientifically consequential information from and about the archaeological or historical resource, provided that the determination is documented in the EIR and that the studies are deposited with the California Historical Resources Regional Information Center.

NOTE: Authority: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21003, 21100 and 21084.1, Public Resources Code; *Citizens of Goleta Valley v. Board of Supervisors*, (1990) 52 Cal.3d 553; *Laurel Heights Improvement Association v. Regents of the University of California*, (1988) 47 Cal.3d 376; *Gentry v. City of Murrieta* (1995) 36 Cal.App.4th 1359; *Laurel Heights Improvement Association v. Regents of the University of California* (1993) 6 Cal.4th 1. *Sacramento Old City Assn. v. City Council of Sacramento* (1991) 229 Cal.App.3d 1011.

HISTORY

1. New section filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15126.6. Consideration and Discussion of Alternatives to the Proposed Project.

(a) Alternatives to the Proposed Project. An EIR shall describe a range of reasonable alternatives to the project, or to the location of the project, which would feasibly attain most of the basic objectives of the project but would avoid or substantially lessen any of the significant effects of the project, and evaluate the comparative merits of the alternatives. An EIR need not consider every conceivable alternative to a project. Rather it must consider a reasonable range of potentially feasible alternatives that will foster informed decisionmaking and public participation. An EIR is not required to consider alternatives which are infeasible. The lead agency is responsible for selecting a range of project alternatives for examination and must publicly disclose its reasoning for selecting those alternatives. There is no ironclad rule governing the nature or scope of the alternatives to be discussed other than the rule of reason. (*Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553 and *Laurel Heights Improvement Association v. Regents of the University of California* (1988) 47 Cal.3d 376).

(b) Purpose. Because an EIR must identify ways to mitigate or avoid the significant effects that a project may have on the environment (Public Resources Code Section 21002.1), the discussion of alternatives shall focus on alternatives to the project or its location which are capable of avoiding or substantially lessening any significant effects of the project, even if these alternatives would impede to some degree the attainment of ject objectives, or would be more costly.

election of a range of reasonable alternatives. The range of potential alternatives to the proposed project shall include those that could feasibly accomplish most of the basic objectives of the project and could avoid or substantially lessen one or more of the significant effects. The EIR should briefly describe the rationale for selecting the alternatives to be discussed. The EIR should also identify any alternatives that were considered by the lead agency but were rejected as infeasible during the scoping process and briefly explain the reasons underlying the lead agency's determination. Additional information explaining the choice of alternatives may be included in the administrative record. Among the factors that may be used to eliminate alternatives from detailed consideration in an EIR are:(i) failure to meet most of the basic project objectives, (ii) infeasibility, or (iii) inability to avoid significant environmental impacts.

(d) Evaluation of alternatives. The EIR shall include sufficient information about each alternative to allow meaningful evaluation, analysis, and comparison with the proposed project. A matrix displaying the major characteristics and significant environmental effects of each alternative may be used to summarize the comparison. If an alternative would cause one or more significant effects in addition to those that would be caused by the project as proposed, the significant effects of the alternative shall be discussed, but in less detail than the significant effects of the project as proposed. (*County of Inyo v. City of Los Angeles* (1981) 124 Cal.App.3d 1).

(e) "No project" alternative.

(1) The specific alternative of "no project" shall also be evaluated along with its impact. The purpose of describing and analyzing a no project alternative is to allow decisionmakers to compare the impacts of approving the proposed project with the impacts of not approving the proposed project. The no project alternative analysis is not the baseline for determining whether the proposed project's environmental impacts may be significant, unless it is identical to the existing environmental setting analysis which does establish that baseline (see Section 15125).

(2) The "no project" analysis shall discuss the existing conditions at the time the notice of preparation is published, or if no notice of preparation is published, at the time environmental analysis is commenced, as well as what would be reasonably expected to occur in the foreseeable future if the project were not approved, based on current plans and consistent with available infrastructure and community services. If the environmentally superior alternative is the "no project" alternative, the EIR shall also identify an environmentally superior alternative among the other alternatives.

(3) A discussion of the "no project" alternative will usually proceed along one of two lines:

(A) When the project is the revision of an existing land use or regulatory plan, policy or ongoing operation, the "no project" alternative will be the continuation of the existing plan, policy or operation into the future. Typically this is a situation where other projects initiated under the existing plan will continue while the new plan is developed. Thus, the projected impacts of the proposed plan or alternative plans would be compared to the impacts that would occur under the existing plan.

(B) If the project is other than a land use or regulatory plan, for example a development project on identifiable property, the "no project" alternative is the circumstance under which the project does not proceed. Here the discussion would compare the environmental effects of the property remaining in its existing state against environmental effects which would occur if the project is approved. If disapproval of the project under consideration would result in predictable actions by others, such as the proposal of some other project, this "no project" consequence should be discussed. In certain instances, the no project alternative means "no build" wherein the existing environmental setting is maintained. However, where failure to proceed with the project will not result in preservation of existing environmental conditions, the analysis should identify the practical result of the project's non–approval and not create and analyze a set of artificial assumptions that would be required to preserve the existing physical environment.

(C) After defining the no project alternative using one of these approaches, the lead agency should proceed to analyze the impacts of the no project alternative by projecting what would reasonably be expected to occur in the foreseeable future if the project were not approved, based on current plans and consistent with available infrastructure and community services.

(f) Rule of reason. The range of alternatives required in an EIR is governed by a "rule of reason" that requires the EIR to set forth only those alternatives necessary to permit a reasoned choice. The alternatives shall be limited to ones that would avoid or substantially lessen any of the significant effects of the project. Of those alternatives, the EIR need examine in detail only the ones that the lead agency determines could feasibly attain most of the basic objectives of the project. The range of feasible alternatives shall be selected and discussed in a manner to foster meaningful public participation and informed decision making.

(1) Feasibility. Among the factors that may be taken into account when addressing the feasibility of alternatives are site suitability, economic viability, availability of infrastructure, general plan consistency, other plans or regulatory limitations, jurisdictional boundaries (projects with a regionally significant impact should consider the regional context), and whether the proponent can reasonably acquire, control or otherwise have access to the alternative site (or the site is already owned by the proponent). No one of these factors establishes a fixed limit on the scope of reasonable alternatives. (*Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553; see *Save Our Residential Environment v. City of West Hollywood* (1992) 9 Cal.App.4th 1745, 1753, fn. 1).

(2) Alternative locations.

(A) Key question. The key question and first step in analysis is whether any of the significant effects of the project would be avoided or substantially lessened by putting the project in another location. Only locations

that would avoid or substantially lessen any of the significant effects of the project need be considered for inclusion in the EIR.

(B) None feasible. If the lead agency concludes that no feasible alternative locations exist, it must disclose the reasons for this conclusion, and should include the reasons in the EIR. For example, in some cases there may be no feasible alternative locations for a geothermal plant or mining project which must be in close proximity to natural resources at a given location.

(C) Limited new analysis required. Where a previous document has sufficiently analyzed a range of reasonable alternative locations and environmental impacts for projects with the same basic purpose, the lead agency should review the previous document. The EIR may rely on the previous document to help it assess the feasibility of potential project alternatives to the extent the circumstances remain substantially the same as they relate to the alternative. (*Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553, 573).

(3) An EIR need not consider an alternative whose effect cannot be reasonably ascertained and whose implementation is remote and speculative. (*Residents Ad Hoc Stadium Committee v. Board of Trustees* (1979) 89 Cal. App.3d 274).

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1, 21003 and 21100, Public Resources Code; *Citizens of Goleta Valley v. Board of Supervisors*, (1990) 52 Cal.3d 553; *Laurel Heights Improvement Association v. Regents of the University of California*, (1988) 47 Cal.3d 376; *Gentry v. City of Murrieta* (1995) 36 Cal.App.4th 1359; and *Laurel Heights Improvement Association v. Regents of the University of California* (1993) 6 Cal.4th 1112.

HISTORY

1. New section filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15127. Limitations on Discussion of Environmental Impact.

The information required by Section 15126.2(c) concerning irreversible changes, need be included only in EIRs prepared in connection with any of the following activities:

(a) The adoption, amendment, or enactment of a plan, policy, or ordinance of a public agency;

(b) The adoption by a local agency formation commission of a resolution making determinations; or

(c) A project which will be subject to the requirement for preparing an environmental impact statement pursuant to the requirements of the National Environmental Policy Act of 1969, 42 U.S.C. 4321–4347.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100.1, Public Resources Code.

HISTORY

1. Amendment of first paragraph, subsection (c) and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).
2. Change without regulatory effect amending first paragraph filed 2–1–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 5).

§ 15128. Effects Not Found to Be Significant.

An EIR shall contain a statement briefly indicating the reasons that various possible significant effects of a project were determined not to be significant and were therefore not discussed in detail in the EIR. Such a statement may be contained in an attached copy of an initial study.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code.

§ 15129. Organizations and Persons Consulted.

The EIR shall identify all federal, state, or local agencies, other organizations, and private individuals consulted in preparing the draft EIR, and the persons, firm, or agency preparing the draft EIR, by contract or other authorization.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code.

§ 15130. Discussion of Cumulative Impacts.

(a) An EIR shall discuss cumulative impacts of a project when the project's incremental effect is cumulatively considerable, as defined in section 15065(c). Where a lead agency is examining a project with an incremental effect that is not "cumulatively considerable," a lead agency need not consider that effect significant, but shall briefly describe its basis for concluding that the incremental effect is not cumulatively considerable.

(1) As defined in Section 15355, a cumulative impact consists of an impact which is created as a result of the combination of the project evaluated in the EIR together with other projects causing related impacts. An EIR should not discuss impacts which do not result in part from the project evaluated in the EIR.

(2) When the combined cumulative impact associated with the project's incremental effect and the effects of other projects is not significant, the EIR shall briefly indicate why the cumulative impact is not significant and is not discussed in further detail in the EIR. A lead agency shall identify facts and analysis supporting the lead agency's conclusion that the cumulative impact is less than significant.

(3) An EIR may determine that a project's contribution to a significant cumulative impact will be rendered less than cumulatively considerable and thus is not significant. A project's contribution is less than cumulatively considerable if the project is required to implement or fund its fair share of a mitigation measure or measures designed to alleviate the cumulative impact. The lead agency shall identify facts and analysis supporting its conclusion that the contribution will be rendered less than cumulatively considerable.

(4) An EIR may determine that a project's contribution to a significant cumulative impact is de minimus and thus is not significant. A de minimus contribution means that the environmental conditions would essentially be the same whether or not the proposed project is implemented.

(b) The discussion of cumulative impacts shall reflect the severity of the impacts and their likelihood of occurrence, but the discussion need not provide as great detail as is provided for the effects attributable to the project alone. The discussion should be guided by the standards of practicality and reasonableness, and should focus on the cumulative impact to which the identified other projects contribute rather than the attributes of other projects which do not contribute to the cumulative impact. The following elements are necessary to an adequate discussion of significant cumulative impacts:

(1) Either:

(A) A list of past, present, and probable future projects producing related or cumulative impacts, including, if necessary, those projects outside the control of the agency, or

(B) A summary of projections contained in an adopted general plan or related planning document, or in a prior environmental document which has been adopted or certified, which described or evaluated regional or areawide conditions contributing to the cumulative impact. Any such planning document shall be referenced and made available to the public at a location specified by the lead agency;

1. When utilizing a list, as suggested in paragraph (1) of subdivision (b), factors to consider when determining whether to include a related project should include the nature of each environmental resource being examined, the location of the project and its type. Location may be important, for example, when water quality impacts are at issue since projects outside the watershed would probably not contribute to a cumulative effect. Project type may be important, for example, when the impact is specialized, such as a particular air pollutant or mode of traffic.

2. "Probable future projects" may be limited to those projects requiring an agency approval for an application which has been received at the time the notice of preparation is released, unless abandoned by the applicant; projects included in an adopted capital improvements program, general plan, regional transportation plan, or other similar plan; projects included in a summary of projections of projects (or development areas designated) in a general plan or a similar plan; projects anticipated as later phase of a previously approved project (e.g. a subdivision); or those public agency projects for which money has been budgeted.

3. Lead agencies should define the geographic scope of the area a fected by the cumulative effect and provide a reasonable explanation fo the geographic limitation used.

(2) A summary of the expected environmental effects to be produced by those projects with specific reference to additional information stating where that information is available, and

(3) A reasonable analysis of the cumulative impacts of the relevant [illegible]. An EIR shall examine reasonable, feasible options for mitigating or avoiding the project's contribution to any significant cumulative effects.

(c) With some projects, the only feasible mitigation for cumulative impacts may involve the adoption of ordinances or regulations rather than the imposition of conditions on a project–by–project basis.

(d) Previously approved land use documents such as general plans, specific plans, and local coastal plans may be used in cumulative impact analysis. A pertinent discussion of cumulative impacts contained in one or more previously certified EIRs may be incorporated by reference pursuant to the provisions for tiering and program EIRs. No further cumulative impacts analysis is required when a project is consistent with a general, specific, master or comparable programmatic plan where the lead agency determines that the regional or areawide cumulative impacts of the proposed project have already been adequately addressed, as defined in section 15152(f), in a certified EIR for that plan.

(e) If a cumulative impact was adequately addressed in a prior EIR for a community plan, zoning action, or general plan, and the project is consistent with that plan or action, then an EIR for such a project should not further analyze that cumulative impact, as provided in Section15183(j).

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083(b), 21093, 21094 and 21100, Public Resources Code; *Whitman v. Board of Supervisors*, (1979) 88 Cal. App. 3d 397; *San Franciscans for Reasonable Growth v. City and County of San Francisco* (1984) 151 Cal.App.3d 61; *Kings County Farm Bureau v. City of Hanford* (1990) 221 Cal.App.3d 692; *Laurel Heights Homeowners Association v. Regents of the University of California* (1988) 47 Cal.3d 376; *Sierra Club v. Gilroy* (1990) 220 Cal.App.3d 30; *Citizens to Preserve the Ojai v. County of Ventura* (1985) 176 Cal.App.3d 421; *Concerned Citizens of South Cent. Los Angeles v. Los Angeles Unified Sch. Dist.* (1994) 24 Cal.App.4th 826; *Las Virgenes Homeowners Fed'n v. County of Los Angeles* (1986) 177 Cal.App.3d 300; *San Joaquin Raptor/Wildlife Rescue Ctr v. [illegible]y of Stanislaus* (1994) 27 Cal.App.4th 713; and *Fort Mojave Indian Tribe Dept. Of Health Services* (1995) 38 Cal.App.4th 1574.

HISTORY

1. Amendment of section heading, new subsection (d) and amendment of NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).
2. Amendment of section and NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).
3. Change without regulatory effect amending subsection (d) filed 2–1–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 5).

§ 15131. Economic and Social Effects.

Economic or social information may be included in an EIR or may be presented in whatever form the agency desires.

(a) Economic or social effects of a project shall not be treated as significant effects on the environment. An EIR may trace a chain of cause and effect from a proposed decision on a project through anticipated economic or social changes resulting from the project to physical changes caused in turn by the economic or social changes. The intermediate economic or social changes need not be analyzed in any detail greater than necessary to trace the chain of cause and effect. The focus of the analysis shall be on the physical changes.

(b) Economic or social effects of a project may be used to determine the significance of physical changes caused by the project. For example, if the construction of a new freeway or rail line divides an existing community, the construction would be the physical change, but the social effect on the community would be the basis for determining that the effect would be significant. As an additional example, if the construction of a road and the resulting increase in noise in an area disturbed existing religious practices in the area, the disturbance of the religious practices could be used to determine that the construction and use of the road and the resulting noise would be significant effects on the environment. The religious practices would need to be analyzed only to the extent to show that the increase in traffic and noise would conflict with the religious practices. Where an EIR uses economic or social effects to determine that a physical change is significant, the EIR shall explain the reason for determining that the effect is significant.

(c) Economic, social, and particularly housing factors shall be considered by public agencies together with technological and environmental factors in deciding whether changes in a project are feasible to reduce or avoid the significant effects on the environment identified in the EIR. If information on these factors is not contained in the EIR, the information must be added to the record in some other manner to allow the agency to consider the factors in reaching a decision on the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21001(e) and (g), 21002, 21002.1, 21060.5, 21080.1, 21083(c) and 21100, Public Resources Code.

§ 15132. Contents of Final Environmental Impact Report.

The final EIR shall consist of:

(a) The Draft EIR or a revision of the draft.

(b) Comments and recommendations received on the Draft EIR either verbatim or in summary.

(c) A list of persons, organizations, and public agencies commenting on the Draft EIR.

(d) The responses of the Lead Agency to significant environmental points raised in the review and consultation process.

(e) Any other information added by the lead agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code.

Article 10. Considerations in Preparing EIRs and Negative Declarations

§ 15140. Writing.

EIRs shall be written in plain language and may use appropriate graphics so that decisionmakers and the public can rapidly understand the documents.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003 and 21100, Public Resources Code.

HISTORY

1. Repealer of Article 10 (Sections 15160–15167) and new Article 10 (Sections 15140–15153) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29). For prior history, see Registers 80, No. 19; 78, No. 5; 76, No. 41; 75, No. 1; and 73, No. 50.
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15141. Page Limits.

The text of draft EIRs should normally be less than 150 pages and for proposals of unusual scope or complexity should normally be less than 300 pages.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code.

§ 15142. Interdisciplinary Approach.

An EIR shall be prepared using an interdisciplinary approach which will ensure the integrated use of the natural and social sciences and the consideration of qualitative as well as quantitative factors. The interdisciplinary analysis shall be conducted by competent individuals, but no single discipline shall be designated or required to undertake this evaluation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000, 21001 and 21100, Public Resources Code.

§ 15143. Emphasis.

The EIR shall focus on the significant effects on the environment. The significant effects should be discussed with emphasis in proportion to their severity and probability of occurrence. Effects dismissed in an Initial Study as clearly insignificant and unlikely to occur need not be discussed further in the EIR unless the Lead Agency subsequently receives information inconsistent with the finding in the Initial Study. A copy of the Initial Study may be attached to the EIR to provide the basis for limiting the impacts discussed.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15144. Forecasting.

Drafting an EIR or preparing a negative declaration necessarily involves some degree of forecasting. While foreseeing the unforeseeable is not possible, an agency must use its best efforts to find out and disclose all that it reasonably can.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15145. Speculation.

If, after thorough investigation, a lead agency finds that a particular impact is too speculative for evaluation, the agency should note its conclusion and terminate discussion of the impact.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code; *Topanga Beach Renters Association* v. *Department of General Services* (1976) 58 Cal. App. 3d 712.

§ 15146. Degree of Specificity.

The degree of specificity required in an EIR will correspond to the degree of specificity involved in the underlying activity which is described in the EIR.

(a) An EIR on a construction project will necessarily be more detailed in the specific effects of the project than will be an EIR on the adoption of a local general plan or comprehensive zoning ordinance because the effects of the construction can be predicted with greater accuracy.

(b) An EIR on a project such as the adoption or amendment of a comprehensive zoning ordinance or a local general plan should focus on the secondary effects that can be expected to follow from the adoption, or amendment, but the EIR need not be as detailed as an EIR on the specific construction projects that might follow.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15147. Technical Detail.

The information contained in an EIR shall include summarized technical data, maps, plot plans, diagrams, and similar relevant information sufficient to permit full assessment of significant environmental impacts by reviewing agencies and members of the public. Placement of highly technical and specialized analysis and data in the body of an EIR should be avoided through inclusion of supporting information and analyses as appendices to the main body of the EIR. Appendices to the EIR may be prepared in volumes separate from the basic EIR document, but shall be readily available for public examination and shall be submitted to all clearinghouses which assist in public review.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15148. Citation.

Preparation of EIRs is dependent upon information from many sources, including engineering project reports and many scientific documents relating to environmental features. These documents should be cited but not included in the EIR. The EIR shall cite all documents used in its preparation including, where possible, the page and section number of any technical reports which were used as the basis for any statements in the EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15149. Use of Registered Professionals in Preparing EIRs.

(a) A number of statutes provide that certain professional services can be provided to the public only by individuals who have been registered by a registration board established under California law. Such statutory restrictions apply to a number of professions including but not limited to engineering, land surveying, forestry, geology, and geophysics.

(b) In its intended usage, an EIR is not a technical document that can be prepared only by a registered professional. The EIR serves as a public disclosure document explaining the effects of the proposed project on the environment, alternatives to the project, and ways to minimize adverse effects and to increase beneficial effects. As a result of information in the EIR, the lead agency should establish requirements or conditions on project design, construction, or operation in order to protect or enhance the environment. State statutes may provide that only registered professionals can prepare technical studies which will be used in or which will control the detailed design, construction, or operation of the proposed project and which will be prepared in support of an EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15150. Incorporation by Reference.

(a) An EIR or negative declaration may incorporate by reference all or portions of another document which is a matter of public record or is generally available to the public. Where all or part of another document is incorporated by reference, the incorporated language shall be considered to be set forth in full as part of the text of the EIR or negative declaration.

(b) Where part of another document is incorporated by reference, such other document shall be made available to the public for inspection at a public place or public building. The EIR or negative declaration shall state where the incorporated documents will be available for inspection. At a minimum, the incorporated document shall be made available to the public in an office of the lead agency in the county where the project would be carried out or in one or more public buildings such as county offices or public libraries if the lead agency does not have an office in the county.

(c) Where an EIR or negative declaration uses incorporation by reference, the incorporated part of the referenced document shall be briefly summarized where possible or briefly described if the data or information cannot be summarized. The relationship between the incorporated part of the referenced document and the EIR shall be described.

(d) Where an agency incorporates information from an EIR that has previously been reviewed through the state review system, the state identification number of the incorporated document should be included in the summary or designation described in Subsection (c).

(e) Examples of materials that may be incorporated by reference include but are not limited to:

(1) A description of the environmental setting from another EIR.

(2) A description of the air pollution problems prepared by an air pollution control agency concerning a process involved in the project.

(3) A description of the city or county general plan that applies to the location of the project.

(f) Incorporation by reference is most appropriate for including long, descriptive, or technical materials that provide general background but do not contribute directly to the analysis of the problem at hand.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15151. Standards for Adequacy of an EIR.

An EIR should be prepared with a sufficient degree of analysis to provide decisionmakers with information which enables them to make a decision which intelligently takes account of environmental consequences. An evaluation of the environmental effects of a proposed project need not be exhaustive, but the sufficiency of an EIR is to be reviewed in the light of what is reasonably feasible. Disagreement among experts does not make an EIR inadequate, but the EIR should summarize the main points of disagreement among the experts. The courts have looked not for perfection but for adequacy, completeness, and a good faith effort at full disclosure.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061 and 21100, Public Resources Code; *San Francisco Ecology Center* v. *City and County of San Francisco*, 48 Cal. App. 3d 584 (1975).

§ 15152. Tiering.

(a) "Tiering" refers to using the analysis of general matters contained in a broader EIR (such as one prepared for a general plan or policy statement) with later EIRs and negative declarations on narrower projects; incorporating by reference the general discussions from the broader EIR;

and concentrating the later EIR or negative declaration solely on the issues specific to the later project.

(b) Agencies are encouraged to tier the environmental analyses which they prepare for separate but related projects including general plans, zoning changes, and development projects. This approach can eliminate repetitive discussions of the same issues and focus the later EIR or negative declaration on the actual issues ripe for decision at each level of environmental review. Tiering is appropriate when the sequence of analysis is from an EIR prepared for a general plan, policy, or program to an EIR or negative declaration for another plan, policy, or program of lesser scope, or to a site-specific EIR or negative declaration. Tiering does not excuse the lead agency from adequately analyzing reasonably foreseeable significant environmental effects of the project and does not justify deferring such analysis to a later tier EIR or negative declaration. However, the level of detail contained in a first tier EIR need not be greater than that of the program, plan, policy, or ordinance being analyzed.

(c) Where a lead agency is using the tiering process in connection with an EIR for a large-scale planning approval, such as a general plan or component thereof (e.g., an area plan or community plan), the development of detailed, site-specific information may not be feasible but can be deferred, in many instances, until such time as the lead agency prepares a future environmental document in connection with a project of a more limited geographical scale, as long as deferral does not prevent adequate identification of significant effects of the planning approval at hand.

(d) Where an EIR has been prepared and certified for a program, plan, policy, or ordinance consistent with the requirements of this section, any lead agency for a later project pursuant to or consistent with the program, plan, policy, or ordinance should limit the EIR or negative declaration on the later project to effects which:

(1) Were not examined as significant effects on the environment in the prior EIR; or

(2) Are susceptible to substantial reduction or avoidance by the choice of specific revisions in the project, by the imposition of conditions, or other means.

(e) Tiering under this section shall be limited to situations where the project is consistent with the general plan and zoning of the city or county in which the project is located, except that a project requiring a rezone to achieve or maintain conformity with a general plan may be subject to tiering.

(f) A later EIR shall be required when the initial study or other analysis finds that the later project may cause significant effects on the environment that were not adequately addressed in the prior EIR. A negative declaration shall be required when the provisions of Section 15070 are met.

(1) Where a lead agency determines that a cumulative effect has been adequately addressed in the prior EIR, that effect is not treated as significant for purposes of the later EIR or negative declaration, and need not be discussed in detail.

(2) When assessing whether there is a new significant cumulative effect, the lead agency shall consider whether the incremental effects of the project would be considerable when viewed in the context of past, present, and probable future projects. At this point, the question is not whether there is a significant cumulative impact, but whether the effects of the project are cumulatively considerable. For a discussion on how to assess whether project impacts are cumulatively considerable, see Section 15064(i).

(3) Significant environmental effects have been "adequately addressed" if the lead agency determines that:

(A) they have been mitigated or avoided as a result of the prior environmental impact report and findings adopted in connection with that prior environmental report;

(B) they have been examined at a sufficient level of detail in the prior environmental impact report to enable those effects to be mitigated or avoided by site specific revisions, the imposition of conditions, or by other means in connection with the approval of the later project; or

(C) they cannot be mitigated to avoid or substantially lessen the significant impacts despite the project proponent's willingness to accept all feasible mitigation measures, and the only purpose of including analysis of such effects in another environmental impact report would be to put the agency in a position to adopt a statement of overriding considerations with respect to the effects.

(g) When tiering is used, the later EIRs or negative declarations shall refer to the prior EIR and state where a copy of the prior EIR may be examined. The later EIR or negative declaration should state that the lead agency is using the tiering concept and that it is being tiered with the earlier EIR.

(h) There are various types of EIRs that may be used in a tiering situation. These include, but are not limited to, the following:

(1) General plan EIR (Section 15166).

(2) Staged EIR (Section 15167).

(3) Program EIR (Section 15168).

(4) Master EIR (Section 15175).

(5) Multiple-family residential development/residential and commercial or retail mixed-use development (Section 15179.5).

(6) Redevelopment project (Section 15180).

(7) Housing/neighborhood commercial facilities in an urbanized area (Section 15181).

(8) Projects consistent with community plan, general plan, or zoning (Section 15183).

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061, 21093, 21094, 21100 and 21151, Public Resources Code; *Stanislaus Natural Heritage Project, Sierra Club v. County of Stanislaus* (1996) 48 Cal.App.4th 182; *Al Larson Boat Shop, Inc. v. Board of Harbor Commissioners* (1993) 18 Cal.App. 4th 729; and *Sierra Club v. County of Sonoma* (1992) 6 Cal.App. 4th 1307.

HISTORY

1. Amendment of section and NOTE filed 10-26-98; operative 10-26-98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15153. Use of an EIR from an Earlier Project.

(a) The lead agency may employ a single EIR to describe more than one project, if such projects are essentially the same in terms of environmental impact. Further, the lead agency may use an earlier EIR prepared in connection with an earlier project to apply to a later project, if the circumstances of the projects are essentially the same.

(b) When a lead agency proposes to use an EIR from an earlier project as the EIR for a separate, later project, the lead agency shall use the following procedures:

(1) The lead agency shall review the proposed project with an initial study, using incorporation by reference if necessary, to determine whether the EIR would adequately describe:

(A) The general environmental setting of the project,

(B) The significant environmental impacts of the project, and

(C) Alternatives and mitigation measures related to each significant effect.

(2) If the lead agency believes that the EIR would meet the requirements of Subsection (1), it shall provide public review as provided in Section 15087 stating that it plans to use the previously prepared EIR as the draft EIR for this project. The notice shall include as a minimum:

(A) An identification of the project with a brief description;

(B) A statement that the agency plans to use a certain EIR prepared for a previous project as the EIR for this project;

(C) A listing of places where copies of the EIR may be examined; and

(D) A statement that the key issues involving the EIR are whether the EIR should be used for this project and whether there are any additional, reasonable alternatives or mitigation measures that should be considered as ways of avoiding or reducing the significant effects of the project.

(3) The lead agency shall prepare responses to comments received during the review period.

(4) Before approving the project, the decisionmaker in the lead agency shall:

(A) Consider the information in the EIR including comments received during the review period and responses to those comments,

(B) Decide either on its own or on a staff recommendation whether the EIR is adequate for the project at hand, and

(C) Make or require certification to be made as described in Section 15090.

(D) Make findings as provided in Sections 15091 and 15093 as necessary.

(5) After making a decision on the project, the lead agency shall file a notice of determination.

(c) An EIR prepared for an earlier project may also be used as part of an initial study to document a finding that a later project will not have a significant effect. In this situation a negative declaration will be prepared.

(d) An EIR prepared for an earlier project shall not be used as the EIR for a later project if any of the conditions described in Section 15162 would require preparation of a subsequent or supplemental EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21100, 21151 and 21166, Public Resources Code.

§ 15154. Projects Near Airports.

(a) When a lead agency prepares an EIR for a project within the boundaries of a comprehensive airport land use plan or, if a comprehensive airport land use plan has not been adopted for a project within two nautical miles of a public airport or public use airport, the agency shall utilize the Airport Land Use Planning Handbook published by Caltrans' Division of Aeronautics to assist in the preparation of the EIR relative to potential airport-related safety hazards and noise problems.

(b) A lead agency shall not adopt a negative declaration or mitigated negative declaration for a project described in subsection (a) unless the lead agency considers whether the project will result in a safety hazard or noise problem for persons using the airport or for persons residing or working in the project area.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21096, Public Resources Code.

HISTORY

1. New section filed 5-27-97; operative 5-27-97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

Article 11. Types of EIRs

§ 15160. General.

This article describes a number of examples of variations in EIRs as the documents are tailored to different situations and intended uses. These variations are not exclusive. Lead agencies may use other variations consistent with the guidelines to meet the needs of other circumstances. All EIRs must meet the content requirements discussed in Article 9 beginning with Section 15120.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061, 21100 and 21151, Public Resources Code.

HISTORY

1. New Article 11 (Section 15180) filed 12-14-73 as an emergency; effective upon filing. Certificate of Compliance included (Register 73, No. 50).
2. Repealer of Article 11 (Section 15180) and new Article 11 (Sections 15160-15170) filed 7-13-83; effective thirtieth day thereafter (Register 83, No. 29).
3. Editorial correction of 7-13-83 order redesignating effective date to 8-1-83 filed 7-14-83 (Register 83, No. 29).

§ 15161. Project EIR.

The most common type of EIR examines the environmental impacts of a specific development project. This type of EIR should focus primarily on the changes in the environment that would result from the development project. The EIR shall examine all phases of the project including planning, construction, and operation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061, 21100 and 21151, Public Resources Code.

§ 15162. Subsequent EIRs and Negative Declarations.

(a) When an EIR has been certified or a negative declaration adopted for a project, no subsequent EIR shall be prepared for that project unless the lead agency determines, on the basis of substantial evidence in the light of the whole record, one or more of the following:

(1) Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;

(2) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or

(3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the negative declaration was adopted, shows any of the following:

(A) The project will have one or more significant effects not discussed in the previous EIR or negative declaration;

(B) Significant effects previously examined will be substantially more severe than shown in the previous EIR;

(C) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or

(D) Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

(b) If changes to a project or its circumstances occur or new information becomes available after adoption of a negative declaration, the lead agency shall prepare a subsequent EIR if required under subsection (a). Otherwise the lead agency shall determine whether to prepare a subsequent negative declaration, an addendum, or no further documentation.

(c) Once a project has been approved, the lead agency's role in project approval is completed, unless further discretionary approval on that project is required. Information appearing after an approval does not require reopening of that approval. If after the project is approved, any of the conditions described in subsection (a) occurs, a subsequent EIR or negative declaration shall only be prepared by the public agency which grants the next discretionary approval for the project, if any. In this situation no other responsible agency shall grant an approval for the project until the subsequent EIR has been certified or subsequent negative declaration adopted.

(d) A subsequent EIR or subsequent negative declaration shall be given the same notice and public review as required under Section 15087 or Section 15072. A subsequent EIR or negative declaration shall state where the previous document is available and can be reviewed.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21166, Public Resources Code; *Bowman v. City of Petaluma* (1986) 185 Cal.App.3d 1065; *Benton v. Board of Supervisors* (1991) 226 Cal.App.3d 1467; and *Fort Mojave Indian Tribe v. California Department of Health Services et al.* (1995) 38 Cal.App.4th 1574.

HISTORY

1. Amendment of section heading, text and NOTE filed 8-19-94; operative 9-19-94 (Register 94, No. 33).
2. Amendment of subsection (c) and NOTE filed 10-26-98; operative 10-26-98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15163. Supplement to an EIR.

(a) The lead or responsible agency may choose to prepare a supplement to an EIR rather than a subsequent EIR if:

(1) Any of the conditions described in Section 15162 would require the preparation of a subsequent EIR, and

(2) Only minor additions or changes would be necessary to make the previous EIR adequately apply to the project in the changed situation.

(b) The supplement to the EIR need contain only the information necessary to make the previous EIR adequate for the project as revised.

(c) A supplement to an EIR shall be given the same kind of notice and public review as is given to a draft EIR under Section 15087.

(d) A supplement to an EIR may be circulated by itself without recirculating the previous draft or final EIR.

(e) When the agency decides whether to approve the project, the decision-making body shall consider the previous EIR as revised by the supplemental EIR. A finding under Section 15091 shall be made for each significant effect shown in the previous EIR as revised.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21166, Public Resources Code.

§ 15164. Addendum to an EIR or Negative Declaration.

(a) The lead agency or a responsible agency shall prepare an addendum to a previously certified EIR if some changes or additions are necessary but none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred.

(b) An addendum to an adopted negative declaration may be prepared if only minor technical changes or additions are necessary or none of the conditions described in Section 15162 calling for the preparation of a subsequent EIR or negative declaration have occurred.

(c) An addendum need not be circulated for public review but can be included in or attached to the final EIR or adopted negative declaration.

(d) The decision-making body shall consider the addendum with the final EIR or adopted negative declaration prior to making a decision on the project.

(e) A brief explanation of the decision not to prepare a subsequent EIR pursuant to Section 15162 should be included in an addendum to an EIR, the lead agency's required findings on the project, or elsewhere in the record. The explanation must be supported by substantial evidence.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21166, Public Resources Code; *Bowman v. City of Petaluma* (1986) 185 Cal.App.3d 1065; and *Benton v. Board of Supervisors* (1991) 226 Cal.App.3d

HISTORY

1. Amendment of section heading, text and NOTE filed 8-19-94; operative 9-19-94 (Register 94, No. 33).
2. Amendment of subection (b) and NOTE filed 10-26-98; operative 10-26-98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15165. Multiple and Phased Projects.

Where individual projects are, or a phased project is, to be undertaken and where the total undertaking comprises a project with significant environmental effect, the lead agency shall prepare a single program EIR for the ultimate project as described in Section 15168. Where an individual project is a necessary precedent for action on a larger project, or commits the lead agency to a larger project, with significant environmental effect, an EIR must address itself to the scope of the larger project. Where one project is one of several similar projects of a public agency, but is not deemed a part of a larger undertaking or a larger project, the agency may prepare one EIR for all projects, or one for each project, but shall in either case comment upon the cumulative effect.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061, 21100 and 21151, Public Resources Code; *Whitman v. Board of Supervisors*, 88 Cal. App. 3d 397 (1979).

§ 15166. EIR As Part of a General Plan.

(a) The requirements for preparing an EIR on a local general plan, element, or amendment thereof will be satisfied by using the general plan, or element document, as the EIR and no separate EIR will be required, if:

(1) the general plan addresses all the points required to be in an EIR by Article 9 of these guidelines and

(2) the document contains a special section or a cover sheet identifying where the general plan document addresses each of the points required.

(b) Where an EIR rather than a negative declaration has been prepared for a general plan, element, or amendment thereto, the EIR shall be forwarded to the State Clearinghouse for review. The requirement shall apply regardless of whether the EIR is prepared as a separate document or as a part of the general plan or element document.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061, 21083, 21100, 21104, 21151 and 21152, Public Resources Code.

§ 15167. Staged EIR.

(a) Where a large capital project will require a number of discretionary approvals from government agencies and one of the approvals will occur more than two years before construction will begin, a staged EIR may be prepared covering the entire project in a general form. The staged EIR shall evaluate the proposal in light of current and contemplated plans and produce an informed estimate of the environmental consequences of the entire project. The aspect of the project before the public agency for approval shall be discussed with a greater degree of specificity.

(b) When a staged EIR has been prepared, a supplement to the EIR shall be prepared when a later approval is required for the project, and the information available at the time of the later approval would permit consideration of additional environmental impacts, mitigation measures, or reasonable alternatives to the project.

(c) Where a statute such as the Warren-Alquist Energy Resources Conservation and Development Act provides that a specific agency shall be the lead agency for a project and requires the lead agency to prepare an EIR, a responsible agency which must grant an approval for the project before the lead agency has completed the EIR may prepare and consider a staged EIR.

(d) An agency requested to prepare a staged EIR may decline to act as the lead agency if it determines, among other factors, that:

(1) Another agency would be the appropriate lead agency; and

(2) There is no compelling need to prepare a staged EIR and grant an approval for the project before the appropriate lead agency will take its action on the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21003, Public Resources Code.

§ 15168. Program EIR.

(a) General. A program EIR is an EIR which may be prepared on a series of actions that can be characterized as one large project and are related either:

(1) Geographically,

(2) As logical parts in the chain of contemplated actions,

(3) In connection with issuance of rules, regulations, plans, or other general criteria to govern the conduct of a continuing program, or

(4) As individual activities carried out under the same authorizing statutory or regulatory authority and having generally similar environmental effects which can be mitigated in similar ways.

(b) Advantages. Use of a program EIR can provide the following advantages. The program EIR can:

(1) Provide an occasion for a more exhaustive consideration of effects and alternatives than would be practical in an EIR on an individual action,

(2) Ensure consideration of cumulative impacts that might be slighted in a case-by-case analysis,

(3) Avoid duplicative reconsideration of basic policy considerations,

(4) Allow the lead agency to consider broad policy alternatives and program wide mitigation measures at an early time when the agency has greater flexibility to deal with basic problems or cumulative impacts,

(5) Allow reduction in paperwork.

(c) Use With Later Activities. Subsequent activities in the program must be examined in the light of the program EIR to determine whether an additional environmental document must be prepared.

(1) If a later activity would have effects that were not examined in the program EIR, a new initial study would need to be prepared leading to either an EIR or a negative declaration.

(2) If the agency finds that pursuant to Section 15162, no new effects could occur or no new mitigation measures would be required, the agency can approve the activity as being within the scope of the project covered by the program EIR, and no new environmental document would be required.

(3) An agency shall incorporate feasible mitigation measures and alternatives developed in the program EIR into subsequent actions in the program.

(4) Where the subsequent activities involve site specific operations, the agency should use a written checklist or similar device to document the evaluation of the site and the activity to determine whether the environmental effects of the operation were covered in the program EIR.

(5) A program EIR will be most helpful in dealing with subsequent activities if it deals with the effects of the program as specifically and comprehensively as possible. With a good and detailed analysis of the program, many subsequent activities could be found to be within the scope of the project described in the program EIR, and no further environmental documents would be required.

(d) Use With Subsequent EIRS and Negative Declarations. A program EIR can be used to simplify the task of preparing environmental documents on later parts of the program. The program EIR can:

(1) Provide the basis in an initial study for determining whether the later activity may have any significant effects.

(2) Be incorporated by reference to deal with regional influences, secondary effects, cumulative impacts, broad alternatives, and other factors that apply to the program as a whole.

(3) Focus an EIR on a subsequent project to permit discussion solely of new effects which had not been considered before.

(e) Notice With Later Activities. When a law other than CEQA requires public notice when the agency later proposes to carry out or approve an activity within the program and to rely on the program EIR for CEQA compliance, the notice for the activity shall include a statement that:

(1) This activity is within the scope of the program approved earlier, and

(2) The program EIR adequately describes the activity for the purposes of CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21003, Public Resources Code; *County of Inyo* v. *Yorty*, 32 Cal. App. 3d 795 (1973).

§ 15169. Master Environmental Assessment.

(a) General. A public agency may prepare a master environmental assessment, inventory, or data base for all, or a portion of, the territory subject to its control in order to provide information which may be used or referenced in EIRs or negative declarations. Neither the content, the format, nor the procedures to be used to develop a master environmental assessment are prescribed by these guidelines. The descriptions contained in this section are advisory. A master environmental assessment is suggested solely as an approach to identify and organize environmental information for a region or area of the state.

(b) Contents. A master environmental assessment may contain an inventory of the physical and biological characteristics of the area for which it is prepared and may contain such additional data and information as the public agency determines is useful or necessary to describe environmental characteristics of the area. It may include identification of existing levels of quality and supply of air and water, capacities and levels of use of existing services and facilities, and generalized incremental effects of different categories of development projects by type, scale, and location.

(c) Preparation.

(1) A master environmental assessment or inventory may be prepared in many possible ways. For example, a master environmental assessment may be prepared as a special, comprehensive study of the area involved, as part of the EIR on a general plan, or as a data base accumulated by indexing EIRs prepared for individual projects or programs in the area involved.

(2) The information contained in a master environmental assessment should be reviewed periodically and revised as needed so that it is accurate and current.

(3) When advantageous to do so, master environmental assessments may be prepared through a joint exercise of powers agreement with neighboring local agencies or with the assistance of the appropriate Council of Governments.

(d) Uses.

(1) A master environmental assessment can identify the environmental characteristics and constraints of an area. This information can be used to influence the design and location of individual projects.

(2) A master environmental assessment may provide information agencies can use in initial studies to decide whether certain environmental effects are likely to occur and whether certain effects will be significant.

(3) A master environmental assessment can provide a central source of current information for use in preparing individual EIRs and negative declarations.

(4) Relevant portions of a master environmental assessment can be referenced and summarized in EIRs and negative declarations.

(5) A master environmental assessment can assist in identifying long range, areawide, and cumulative impacts of individual projects proposed in the area covered by the assessment.

(6) A master environmental assessment can assist a city or county in formulating a general plan or any element of such a plan by identifying environmental characteristics and constraints that need to be addressed in the general plan.

(7) A master environmental assessment can serve as a reference document to assist public agencies which review other environmental documents dealing with activities in the area covered by the assessment. The public agency preparing the assessment should forward a completed copy to each agency which will review projects in the area.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21003, Public Resources Code.

§ 15170. Joint EIR–EIS.

A lead agency under CEQA may work with a federal agency to prepare a joint document which will meet the requirements of both CEQA and NEPA. Use of such a joint document is described in Article 14, beginning with Section 15220.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.5 and 21083.7, Public Resources Code.

Article 11.5. Master Environmental Impact Report

§ 15175. Master EIR.

(a) The Master EIR procedure is an alternative to preparing a project EIR, staged EIR, or program EIR for certain projects which will form the basis for later decision making. It is intended to streamline the later environmental review of projects or approval included within the project, plan or program analyzed in the Master EIR. Accordingly, a Master EIR shall, to the greatest extent feasible, evaluate the cumulative impacts, growth inducing impacts, and irreversible significant effects on the environment of subsequent projects.

(b) A lead agency may prepare a Master EIR for any of the following classes of projects:

(1) A general plan, general plan update, general plan element, general plan amendment, or specific plan.

(2) Public or private projects that will be carried out or approved pursuant to, or in furtherance of, a redevelopment plan.

(3) A project that consists of smaller individual projects which will be carried out in phases.

(4) A rule or regulation which will be implemented by later projects.

(5) Projects that will be carried out or approved pursuant to a development agreement.

(6) A state highway project or mass transit project which will be subject to multiple stages of review or approval.

(7) A plan proposed by a local agency, including a joint powers authority, for the reuse of a federal military base or reservation that has be closed or is proposed for closure by the federal government.

(8) A regional transportation plan or congestion management plan.

(9) Regulations adopted by the California Department of Fish and Game for the regulation of hunting and fishing.

(c) A lead agency may develop and implement a fee program in accord[illegible]with applicable provisions of law to generate the revenue necess[illegible]repare a Master EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21156, 21157 and 21089, Public Resources Code.

HISTORY

1. New article 11.5 (sections 15175–15175.5) and section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15176. Contents of a Master EIR.

A lead agency shall include in a Master EIR all of the following:

(a) A detailed discussion as required by Section 15126.

(b) A description of anticipated subsequent projects that are within the scope of the Master EIR, including information with regard to the kind, size, intensity, and location of the subsequent projects, including, but not limited to all of the following:

(1) The specific type of project anticipated to be undertaken such as a single family development, office–commercial development, sewer line installation or other activities.

(2) The maximum and minimum intensity of any anticipated subsequent project, such as the number of residences in a residential development, and with regard to a public works facility, its anticipated capacity and service area.

(3) The anticipated location for any subsequent development projects, and, consistent with the rule of reason set forth in Section 15126.6(f), alternative locations for any such projects.

(4) A capital outlay or capital improvement program, or other scheduling or implementing device that governs the submission and approval of subsequent projects, or an explanation as to why practical planning considerations render it impractical to identify any such program or schedul[illegible]- other device at the time of preparing the Master EIR.

. description of potential impacts of anticipated projects for which there is not sufficient information reasonably available to support a full assessment of potential impacts in the Master EIR. This description shall not be construed as a limitation on the impacts which may be considered in a focused EIR.

(d) Where a Master EIR is prepared in connection with a project identified in subdivision (b)(1) of section 15175, the anticipated subsequent projects included within a Master EIR may consist of later planning approvals, including parcel–specific approvals, consistent with the overall planning decision (e.g., general plan, or specific plan, or redevelopment plan) for which the Master EIR has been prepared. Such subsequent projects shall be adequately described for purposes of subdivision (b) or of this section (15176) if the Master EIR and any other documents embodying or relating to the overall planning decision identify the land use designations and the permissible densities and intensities of use for the affected parcel(s). The proponents of such subsequent projects shall not be precluded from relying on the Master EIR solely because that document did not specifically identify or list, by name, the subsequent project as ultimately proposed for approval.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21157, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).
2. Change without regulatory effect amending subsection (b)(3) filed 2–1–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 5).

§ 15177. Subsequent Projects Within the Scope of the MEIR.

After a Master EIR has been prepared and certified, subsequent [illegible]cts which the lead agency determines as being within the scope of the Master EIR will be subject to only limited environmental review.

(b) Except as provided in subsection (2) of this subdivision, neither a new environmental document nor the preparation of findings pursuant to section 15091 shall be required of a subsequent project when all of the following requirements are met:

(1) The lead agency for the subsequent project is the lead agency or any responsible agency identified in the Master EIR.

(2) The lead agency for the subsequent project prepares an initial study on the proposal. The initial study shall analyze whether the subsequent project was described in the Master EIR and whether the subsequent project may cause any additional significant effect on the environment which was not previously examined in the Master EIR.

(3) The lead agency for the subsequent project determines, on the basis of written findings, that no additional significant environmental effect will result from the proposal, no new additional mitigation measures or alternatives may be required, and that the project is within the scope of the Master EIR. "Additional significant environmental effect" means any project–specific effect which was not addressed as a significant effect in the Master EIR.

(c) Whether a subsequent project is within the scope of the Master EIR is a question of fact to be determined by the lead agency based upon a review of the initial study to determine whether there are additional significant effects or new additional mitigation measures or alternatives required for the subsequent project that are not already discussed in the Master EIR.

(d) Prior to approval of the proposed subsequent project, the lead agency shall incorporate all feasible mitigation measures or feasible alternatives appropriate to the project as set forth in the Master EIR and provide notice in the manner required by Section 15087.

(e) When the lead agency approves a project pursuant to this section, the lead agency shall file a notice in the manner required by Section 15075.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21157, 21157.6 and 21158, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15178. Subsequent Projects Identified in the MEIR.

(a) When a proposed subsequent project is identified in the Master EIR, but the lead agency cannot make a determination pursuant to Section 15177 that the subsequent project is within the scope of the Master EIR, and the lead agency determines that the cumulative impacts, growth inducing impacts and irreversible significant effects analysis in the Master EIR is adequate for the subsequent project, the lead agency shall prepare a mitigated negative declaration or a focused EIR if, after preparing an initial study, the lead agency determines that the project may result in new or additional significant effects. Whether the cumulative impacts, growth inducing impacts and irreversible significant effects analyses are adequate is a question of fact to be determined by the lead agency based upon a review of the proposed subsequent project in light of the Master EIR.

(b) A lead agency shall prepare a mitigated negative declaration for any proposed subsequent project if both of the following occur:

(1) The initial study prepared pursuant to Section 15177 has identified potentially new or additional significant environmental effects that were not analyzed in the Master EIR; and

(2) Feasible mitigation measures or alternatives will be incorporated to revise the subsequent project before the negative declaration is released for public review pursuant to Section 15073 in order to avoid or mitigate the identified effects to a level of insignificance.

(c) A lead agency shall prepare a focused EIR if the subsequent project may have a significant effect on the environment and a mitigated negative declaration pursuant to subdivision (b) of this section cannot be prepared.

(1) The focused EIR shall incorporate by reference the Master EIR and analyze only the subsequent project's additional significant environmental effects and any new or additional mitigation measures or alternatives that were not identified and analyzed by the Master EIR. "Additional significant environmental effects" are those project–specific effects on the environment which were not addressed as significant in the Master EIR.

(2) A focused EIR need not examine those effects which the lead agency, prior to public release of the focused EIR, finds, on the basis of the initial study, related documents, and commitments from the proponent of a subsequent project, have been mitigated in one of the following manners:

(A) Mitigated or avoided as a result of mitigation measures identified in the Master EIR which the lead agency will require as part of the approval of the subsequent project;

(B) Examined at a sufficient level of detail in the Master EIR to enable those significant effects to be mitigated or avoided by specific revisions to the project, the imposition of conditions of approval, or by other means in connection with approval of the subsequent project; or

(C) The mitigation or avoidance of which is the responsibility of and within the jurisdiction of another public agency and is, or can and should be, undertaken by that agency.

(3) The lead agency's findings pursuant to subdivision (2) shall be included in the focused EIR prior to public release pursuant to Section 15087.

(4) A focused EIR prepared pursuant to this section shall analyze any significant environmental effects when:

(A) Substantial new or additional information shows that the adverse environmental effect may be more significant that was described in the Master EIR; or

(B) Substantial new or additional information shows that mitigation measures or alternatives which were previously determined to be infeasible are feasible and will avoid or reduce the significant effects of the subsequent project to a level of insignificance.

(d) A lead agency shall file a notice of determination shall be filed pursuant to Section 15075 if a project has been approved for which a mitigated negative declaration has been prepared pursuant to this section and a notice of determination shall be filed pursuant to Section 15094 if a project has been approved for which a focused EIR has been prepared pursuant to this section.

(e) When a lead agency determines that the cumulative impacts, growth inducing impacts and irreversible significant effects analysis in the Master EIR is inadequate for the subsequent project, the subsequent project is no longer eligible for the limited environmental review available under the Master EIR process and shall be reviewed according to Article 7 (commencing with Section 15080) of these guidelines. The lead agency shall tier the project specific EIR upon the Master EIR to the extent feasible under Section 15152.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21081(a)(2), 21157.5 and 21158, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15179. Limitations on the Use of the Master EIR.

The certified Master EIR shall not be used in accordance with this article if either (i) it was certified more than five years prior to the filing of an application for a later project, or (ii) a project not identified in the certified Master EIR as an anticipated subsequent project is approved and the approved project may affect the adequacy of the Master EIR, unless the lead agency does one of the following:

(a) Reviews the Master EIR and finds that no substantial changes have occurred with respect to the circumstances under which the Master EIR was certified, or that there is no new available information which was not known and could not have been known at the time the Master EIR was certified; or

(b) Prepares a subsequent or supplemental EIR that updates or revises the Master EIR and which either (i) is incorporated into the previously certified Master EIR, or (ii) references any deletions, additions or other modifications to the previously certified Master EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21157.6, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15179.5. Focused EIRs and Small Projects.

(a) When a project is a multiple family residential development of 100 units or less or is a residential and commercial or retail mixed–use commercial development of not more then 100,000 square feet, whether or not the project is identified in the Master EIR, a focused EIR shall be prepared pursuant to this section when the following conditions are met:

(1) The project is consistent with a general plan, specific plan, community plan, or zoning ordinance for which an EIR was prepared within five years of certification of the focused EIR; and

(2) The parcel on which the project is to be developed is either:

(A) Surrounded by immediately contiguous urban development;

(B) Previously developed with urban uses; or

(C) Within one–half mile of an existing rail transit station.

(b) A focused environmental impact report prepared pursuant to this section shall be limited to a discussion of potentially significant effects on the environment specific to the project, or which substantial new information shows will be more significant than described in the prior environmental impact report. No discussion shall be required of alternatives to the project, cumulative impacts of the project, or the growth inducing impacts of the project.

(c) This section does not apply where the lead agency can make a finding pursuant to Section 15177 that the subsequent project is within the scope of the Master EIR, where the lead agency can prepare a mitigated negative declaration or focused EIR pursuant to Section 15178, or where, pursuant to Section 15162 or Section 15163, the environmental impact report referenced in subdivision (a)(1) of this section must be updated through the preparation of a subsequent environmental impact report or a supplemental environmental impact report.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21158.5, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

Article 12. Special Situations

§ 15180. Redevelopment Projects.

(a) All public and private activities or undertakings pursuant to or in furtherance of a redevelopment plan constitute a single project, which shall be deemed approved at the time of adoption of the redevelopment plan by the legislative body. The EIR in connection with the redevelopment plan shall be submitted in accordance with Section 33352 of the Health and Safety Code.

(b) An EIR on a redevelopment plan shall be treated as a program EIR with no subsequent EIRs required for individual components of the redevelopment plan unless a subsequent EIR or a supplement to an EIR would be required by Section 15162 or 15163.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21090, Public Resources Code.

HISTORY

1. New Article 12 (Sections 15190–15192) filed 1–6–76 as an emergency; effective upon filing (Register 76, No. 2).
2. Certificate of Compliance filed 4–2–76 (Register 76, No. 14).
3. Repealer of Article 12 (Sections 15190–15193) and new Article 12 (Sections 15180–15185) filed 7–13–83; effective 8–1–83 (Register 83, No. 29). For prior history, see Registers 82, No. 2; 81, Nos. 30 and 45; 80, No. 15; 79, Nos. 18, 23 and 30; and 78, No. 33.
4. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15181. Housing and Neighborhood Commercial Facilities in Urbanized Areas.

(a) A lead agency may approve a project involving the construction of housing or neighborhood commercial facilities in an urbanized area with the use of an EIR or negative declaration previously prepared for a specific plan, local coastal program, or port master plan if the lead agency complies with the requirements of this section.

(b) The procedures for complying with this section are as follows:

(1) The lead agency shall conduct an initial study to determine whether the project may have one or more significant effects on the environment.

(2) The lead agency shall give notice of its proposed use of a previously ...ed EIR to all persons who had submitted a written request for no... d shall also give notice by either:

(A) Posting notice on and off the site in the area where the project would be located, or

(B) Mailing notice directly to owners of property contiguous to the project site.

(3) The lead agency shall make the following findings with regard to planning and the previously prepared EIR.

(A) That the project is consistent with either:

1. A specific plan which was adopted for the area pursuant to Article 8 (commencing with Section 65450), Article 9 (commencing with Section 65500), and Article 10 (commencing with Section 65550) of Chapter 3 of Title 7 of the Government Code, or

2. A local coastal program or port master plan certified pursuant to Article 2 (commencing with Section 30510) of Chapter 6 of Division 20 of the Public Resources Code.

(B) That the specific plan, local coastal program, or port master plan was adopted not more than five years prior to the finding made pursuant to this subsection and that the method of adoption was the procedure specified by Article 9 (commencing with Section 65500) of Chapter 3 of Title 7 of the Government Code for adopting specific plans and regulations.

(C) That the specific plan or local coastal program or port master plan was the subject of a certified environmental impact report.

(D) That the environmental impact report is sufficiently detailed so that all the significant effects of the project on the environment and measures necessary to mitigate or avoid any such effects can be determined. This examination of the previously prepared EIR shall include a further, specific finding as to:

Whether there would be any significant physical effects on existing ...es and neighborhoods of historical or aesthetic significance if any exist in the area covered by the plan or program, and

2. Whether measures necessary to mitigate or avoid such effects are included in the EIR.

(E) That a subsequent EIR is not required pursuant to Public Resources Code Section 21166 and Guidelines Section 15162.

(4) The lead agency shall make one or more findings as required by Section 15091 with regard to mitigating or avoiding each significant effect that the project would have on the environment.

(5) The lead agency shall file a notice of determination with the county clerk if the lead agency approves the project.

(c) As used in this section, "neighborhood commercial facilities" means those commercial facilities which are an integral part of a project involving the construction of housing and which will serve the residents of such housing.

(d) As used in this section, "urbanized area" means only those areas mapped and designated as urbanized by the U.S. Bureau of the Census.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.7, Public Resources Code.

§ 15182. Residential Projects Pursuant to a Specific Plan.

(a) Exemption. Where a public agency has prepared an EIR on a specific plan after January 1, 1980, no EIR or negative declaration need be prepared for a residential project undertaken pursuant to and in conformity to that specific plan if the project meets the requirements of this section.

(b) Scope. Residential projects covered by this section include but are not limited to land subdivisions, zoning changes, and residential planned unit developments.

(c) Limitation. This section is subject to the limitation that if after the ...ption of the specific plan, an event described in Section 15162 should occur, this exemption shall not apply until the city or county which adopted the specific plan completes a subsequent EIR or a supplement to an EIR on the specific plan. The exemption provided by this section shall again be available to residential projects after the lead agency has filed a Notice of Determination on the specific plan as reconsidered by the subsequent EIR or supplement to the EIR.

(d) Alternative. This section provides an alternative to the procedure described in Section 15181.

(e) Fees. The lead agency has authority to charge fees to applicants for projects which benefit from this section. The fees shall be calculated in the aggregate to defray but not to exceed the cost of developing and adopting the specific plan including the cost of preparing the EIR.

(f) Statute of Limitations. A court action challenging the approval of a project under this section for failure to prepare a supplemental EIR shall be commenced within 30 days after the lead agency's decision to carry out or approve the project in accordance with the specific plan.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 65453, Government Code.

§ 15183. Projects Consistent with a Community Plan, General Plan, or Zoning.

(a) CEQA mandates that projects which are consistent with the development density established by existing zoning, community plan, or general plan policies for which an EIR was certified shall not require additional environmental review, except as might be necessary to examine whether there are project–specific significant effects which are peculiar to the project or its site. This streamlines the review of such projects and reduces the need to prepare repetitive environmental studies.

(b) In approving a project meeting the requirements of this section, a public agency shall limit its examination of environmental effects to those which the agency determines, in an initial study or other analysis:

(1) Are peculiar to the project or the parcel on which the project would be located,

(2) Were not analyzed as significant effects in a prior EIR on the zoning action, general plan or community plan with which the project is consistent,

(3) Are potentially significant off–site impacts and cumulative impacts which were not discussed in the prior EIR prepared for the general plan, community plan or zoning action, or

(4) Are previously identified significant effects which, as a result of substantial new information which was not known at the time the EIR was certified, are determined to have a more severe adverse impact than discussed in the prior EIR.

(c) If an impact is not peculiar to the parcel or to the project, has been addressed as a significant effect in the prior EIR, or can be substantially mitigated by the imposition of uniformly applied development policies or standards, as contemplated by subdivision (e) below, then an additional EIR need not be prepared for the project solely on the basis of that impact.

(d) This section shall apply only to projects which meet the following conditions:

(1) The project is consistent with:

(A) A community plan adopted as part of a general plan,

(B) A zoning action which zoned or designated the parcel on which the project would be located to accommodate a particular density of development, or

(C) A general plan of a local agency, and

(2) An EIR was certified by the lead agency for the zoning action, the community plan, or the general plan.

(e) This section shall limit the analysis of only those significant environmental effects for which:

(1) Each public agency with authority to mitigate any of the significant effects on the environment identified in the EIR on the planning or zoning action undertakes or requires others to undertake mitigation measures specified in the EIR which the lead agency found to be feasible, and

(2) The lead agency makes a finding at a public hearing as to whether the feasible mitigation measures will be undertaken.

(f) An effect of a project on the environment shall not be considered peculiar to the project or the parcel for the purposes of this section if uniformly applied development policies or standards have been previously

adopted by the city or county with a finding that the development policies or standards will substantially mitigate that environmental effect when applied to future projects, unless substantial new information shows that the policies or standards will not substantially mitigate the environmental effect. The finding shall be based on substantial evidence which need not include an EIR. Such development policies or standards need not apply throughout the entire city or county, but can apply only within the zoning district in which the project is located, or within the area subject to the community plan on which the lead agency is relying. Moreover, such policies or standards need not be part of the general plan or any community plan, but can be found within another pertinent planning document such as a zoning ordinance. Where a city or county, in previously adopting uniformly applied development policies or standards for imposition on future projects, failed to make a finding as to whether such policies or standards would substantially mitigate the effects of future projects, the decisionmaking body of the city or county, prior to approving such a future project pursuant to this section, may hold a public hearing for the purpose of considering whether, as applied to the project, such standards or policies would substantially mitigate the effects of the project. Such a public hearing need only be held if the city or county decides to apply the standards or policies as permitted in this section.

(g) Examples of uniformly applied development policies or standards include, but are not limited to:

(1) Parking ordinances,

(2) Public access requirements,

(3) Grading ordinances.

(4) Hillside development ordinances.

(5) Flood plain ordinances.

(6) Habitat protection or conservation ordinances.

(7) View protection ordinances.

(h) An environmental effect shall not be considered peculiar to the project or parcel solely because no uniformly applied development policy or standard is applicable to it.

(i) Where the prior EIR relied upon by the lead agency was prepared for a general plan or community plan that meets the requirements of this section, any rezoning action consistent with the general plan or community plan shall be treated as a project subject to this section.

(1) "Community plan" is defined as a part of the general plan of a city or county which applies to a defined geographic portion of the total area included in the general plan, includes or references each of the mandatory elements specified in Section 65302 of the Government Code, and contains specific development policies and implementation measures which will apply those policies to each involved parcel.

(2) For purposes of this section, "consistent" means that the density of the proposed project is the same or less than the standard expressed for the involved parcel in the general plan, community plan or zoning action for which an EIR has been certified, and that the project complies with the density–related standards contained in that plan or zoning. Where the zoning ordinance refers to the general plan or community plan for its density standard, the project shall be consistent with the applicable plan.

(j) This section does not affect any requirement to analyze potentially significant offsite or cumulative impacts if those impacts were not adequately discussed in the prior EIR. If a significant offsite or cumulative impact was adequately discussed in the prior EIR, then this section may be used as a basis for excluding further analysis of that offsite or cumulative impact.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083.3, Public Resources Code.

HISTORY

1. Amendment of section heading and subsections (a)(2) and (b) filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).
2. Amendment of section heading and section filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15184. State Mandated Local Projects.

Whenever a state agency issues an order which requires a local agency to carry out a project subject to CEQA, the following rules apply:

(a) If an EIR is prepared for the project, the local agency shall limit the EIR to considering those factors and alternatives which will not conflict with the order.

(b) If a local agency undertakes a project to implement a rule or regulation imposed by a certified state environmental regulatory program listed in Section 15251, the project shall be exempt from CEQA with regard to the significant effects analyzed in the document prepared by the state agency as a substitute for an EIR. The local agency shall comply with CEQA with regard to any site–specific effect of the project which was not analyzed by the certified state agency as a significant effect on the environment. The local agency need not re–examine the general environmental effects of the state rule or regulation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080, 21080.5 and 21154, Public Resources Code.

§ 15185. Administrative Appeals.

(a) Where an agency allows administrative appeals upon the adequacy of an environmental document, an appeal shall be handled according to the procedures of that agency. Public notice shall be handled in accordance with individual agency requirements and Section 15202(e).

(b) The decisionmaking body to which an appeal has been made shall consider the environmental document and make findings under Sections 15091 and 15093 if appropriate.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082 and 21083, Public Resources Code.

§ 15186. School Facilities.

(a) CEQA establishes a special requirement for certain school projects, as well as certain projects near schools, to ensure that potential health impacts resulting from exposure to hazardous materials,wastes, and substances will be carefully examined and disclosed in a negative declaration or EIR, and that the lead agency will consult with other agencies in this regard.

(b) When a project located within one–fourth mile of a school involves the construction or alteration of a facility which might reasonably be anticipated to emit hazardous or acutely hazardous air emissions, or which would handle acutely hazardous material or a mixture containing acutely hazardous material in a quantity equal to or greater than that specified in subdivision (a) of Section 25536 of the Health and Safety Code, which may impose a health or safety hazard to persons who would attend or would be employed at the school, the lead agency must:

(1) Consult with the affected school district or districts regarding the potential impact of the project on the school when circulating the proposed negative declaration or draft EIR for review.

(2) Notify the affected school district of the project, in writing, not less than 30 days prior to approval or certification of the negative declaration or EIR. This subdivision does not apply to projects for which an application was submitted prior to January 1, 1992.

(c) When the project involves the purchase of a school site or the construction of a secondary or elementary school, the negative declaration or EIR prepared for the project shall not be approved or certified by the school board unless:

(1) The negative declaration or EIR contains sufficient information to determine whether the property is:

(A) The site of a current or former hazardous waste or solid waste disposal facility and, if so, whether wastes have been removed.

(B) A hazardous substance release site identified by the Department of Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) The site of one or more buried or above ground pipelines which carry hazardous substances, acutely hazardous materials, or hazardous wastes, as defined in Division 20 of the Health and Safety Code. This do[illegible]t include a natural gas pipeline used only to supply the school or n[illegible]rhood.

(2) The lead agency has notified in writing and consulted with the county or city administering agency (as designated pursuant to Section 25502 of the Health and Safety Code) and with any air pollution control district or air quality management district having jurisdiction, to identify facilities within one-fourth mile of the proposed school site which might reasonably be anticipated to emit hazardous emissions or handle hazardous or acutely hazardous material, substances, or waste. The notice shall include a list of the school sites for which information is sought. Each agency or district receiving notice shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. If any such agency or district fails to respond within that time, the negative declaration or EIR shall be conclusively presumed to comply with this section as to the area of responsibility of that agency.

(3) The school board makes, on the basis of substantial evidence, one of the following written findings:

(A) Consultation identified none of the facilities specified in paragraph (2).

(B) The facilities specified in paragraph (2) exist, but one of the following conditions applies:

1. The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.

2. Corrective measures required under an existing order by another agency having jurisdiction over the facilities will, before the school is occupied, mitigate all chronic or accidental hazardous air emissions to levels that do not constitute any actual or potential public health danger to [illegible]s who would attend or be employed at the proposed school. When [illegible]ool district board makes such a finding, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.

This finding shall be in addition to any findings which may be required pursuant to Sections 15074, 15091 or 15093.

(d) When the lead agency has carried out the consultation required by paragraph (2) of subdivision (b), the negative declaration or EIR shall be conclusively presumed to comply with this section, notwithstanding any failure of the consultation to identify an existing facility.

(e) The following definitions shall apply for the purposes of this section:

(1) "Acutely hazardous material," is as defined in 22 C.C.R. §66260.10.

(2) "Administering agency," is as defined in Section 25501 of the Health and Safety Code.

(3) "Hazardous air emissions," is as defined in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(4) "Hazardous substance," is as defined in Section 25316 of the Health and Safety Code.

(5) "Hazardous waste," is as defined in Section 25117 of the Health and Safety Code.

(6) "Hazardous waste disposal site," is as defined in Section 25114 of the Health and Safety Code.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. References: Sections 21151.4 and 21151.8, Public Resources Code.

HISTORY

1. New section filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

[illegible]187. Environmental Review of New Rules and Regulations.

(a) At the time of the adoption of a rule or regulation requiring the installation of pollution control equipment, establishing a performance standard, or establishing a treatment requirement, the California Air Resources Board, Department of Toxic Substances Control, Integrated Waste Management Board, State Water Resources Control Board, all regional water quality control boards, and all air pollution control districts and air quality management districts, as defined in Section 39025 of the Health and Safety Code, must perform an environmental analysis of the reasonably foreseeable methods by which compliance with that rule or regulation will be achieved.

(b) If an EIR is prepared by the agency at the time of adoption of a rule or regulation, it satisfies the requirements of this section provided that the document contains the information specified in subdivision (c) below. Similarly, for those State agencies whose regulatory programs have been certified by the Resources Agency pursuant to Section 21080.5 of the Public Resources Code, an environmental document prepared pursuant to such programs satisfies the requirements of this section, provided that the document contains the information specified in subdivision (c) below.

(c) The environmental analysis shall include at least the following:

(1) An analysis of reasonably foreseeable environmental impacts of the methods of compliance;

(2) An analysis of reasonably foreseeable feasible mitigation measures relating to those impacts; and

(3) An analysis of reasonably foreseeable alternative means of compliance with the rule or regulation, which would avoid or eliminate the identified impacts.

(d) The environmental analysis shall take into account a reasonable range of environmental, economic, and technical factors, population and geographic areas, and specific sites. The agency may utilize numerical ranges and averages where specific data is not available, but is not required to, nor should it, engage in speculation or conjecture.

(e) Nothing in this section shall require the agency to conduct a project level analysis.

(f) Nothing in this section is intended, or may be used, to delay the adoption of any rule or regulation for which this section requires an environmental analysis.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21159 and 21159.4, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15188. Focused EIR for Pollution Control Equipment.

This section applies to projects consisting solely of the installation of pollution control equipment and other components necessary to the installation of that equipment which are undertaken for the purpose of complying with a rule or regulation which was the subject of an environmental analysis as described in Section 15187.

(a) The lead agency for the compliance project may prepare a focused EIR to analyze the effects of that project when the following occur:

(1) the agency which promulgated the rule or regulation certified an EIR on that rule or regulation, or reviewed it pursuant to an environmental analysis prepared under a certified regulatory program and, in either case, the review included an assessment of growth inducing impacts and cumulative impacts of, and alternatives to, the project;

(2) the focused EIR for the compliance project is certified within five years of the certified EIR or environmental analysis required by subdivision (a)(1); and

(3) the EIR prepared in connection with the adoption of the rule or regulation need not be updated through the preparation of a subsequent EIR or supplemental EIR pursuant to section 15162 or section 15163.

(b) The discussion of significant environmental effects in the focused EIR shall be limited to project-specific, potentially significant effects which were not discussed in the environmental analysis required under Section 15187. No discussion of growth-inducing or cumulative impacts is required. Discussion of alternatives shall be limited to alternative means of compliance, if any, with the rule or regulation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21159.1, Public Resources Code.

8039

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15189. Compliance with Performance Standard or Treatment Requirement Rule or Regulation.

This section applies to projects consisting solely of compliance with a performance standard or treatment requirement which was the subject of an environmental analysis as described in Section 15187.

(a) If preparing a negative declaration, mitigated negative declaration or EIR on the compliance project the lead agency for the compliance project shall, to the greatest extent feasible, use the environmental analysis prepared pursuant to Section 15187. The use of numerical averages or ranges in the environmental analysis prepared under Section 15187 does not relieve the lead agency on the compliance project from its obligation to identify and evaluate the environmental effects of the project.

(b) Where the lead agency determines that an EIR is required for the compliance project, the EIR need address only the project–specific issues or other issues that were not discussed in sufficient detail in the environmental analysis prepared under Section 15187. The mitigation measures imposed by the lead agency shall be limited to addressing the significant effects on the environment of the compliance project. The discussion of alternatives shall be limited to a discussion of alternative means of compliance, if any, with the rule or regulation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21159.2, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15190. Deadlines for Compliance with Sections 15188 and 15189.

(a) The lead agency for a compliance project under either Section 15188 or Section 15189 shall determine whether an EIR or negative declaration should be prepared within 30 days of its determination that the application for the project is complete.

(b) Where the EIR will be prepared under contract to the lead agency for the compliance project, the agency shall issue a request for proposal for preparation of the EIR not later than 30 days after the deadline for response to the notice of preparation has expired. The contract shall be awarded within 30 days of the response date on the request for proposals.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21159.3, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

Article 13. Review and Evaluation of EIRs and Negative Declarations

§ 15200. Purposes of Review.

The purposes of review of EIRs and negative declarations include:

(a) Sharing expertise,

(b) Disclosing agency analyses,

(c) Checking for accuracy,

(d) Detecting omissions,

(e) Discovering public concerns, and

(f) Soliciting counter proposals.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21000, 21108 and 21152, Public Resources Code; *Environmental Defense Fund* v. *Coastside County Water District* (1972) 27 Cal. App. 3d 695; *County of Inyo* v. *City of Los Angeles* (1977) 71 Cal. App. 3d 185.

HISTORY

1. New Article 13 (Sections 15201–15203) filed 2–2–78; effective thirtieth day thereafter (Register 78, No. 5).
2. Repealer of Article 13 (Sections 15201–15203) and new Article 13 (Sections 15200–15209) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29).
3. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15201. Public Participation.

Public participation is an essential part of the CEQA process. Each public agency should include provisions in its CEQA procedures for wide public involvement, formal and informal, consistent with its existing activities and procedures, in order to receive and evaluate public reactions to environmental issues related to the agency's activities. Such procedures should include, whenever possible, making environmental information available in electronic format on the Internet, on a web site maintained or utilized by the public agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000, 21082, 21108 and 21152, Public Resources Code; *Environmental Defense Fund v. Coastside County Water District* (1972) 27 Cal. App. 3d 695; *People* v. *County of Kern* (1974) 39 Cal. App. 3d 830; *County of Inyo* v. *City of Los Angeles* (1977) 71 Cal. App. 3d 185.

HISTORY

1. Amendment filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15202. Public Hearings.

(a) CEQA does not require formal hearings at any stage of the environmental review process. Public comments may be restricted to written communications.

(b) If an agency provides a public hearing on its decision to carry out or approve a project, the agency should include environmental review as one of the subjects for the hearing.

(c) A public hearing on the environmental impact of a project should usually be held when the lead agency determines it would facilitate the purposes and goals of CEQA to do so. The hearing may be held in conjunction with and as a part of normal planning activities.

(d) A draft EIR or negative declaration should be used as a basis for discussion at a public hearing. The hearing may be held at a place where public hearings are regularly conducted by the lead agency or at another location expected to be convenient to the public.

(e) Notice of all public hearings shall be given in a timely manner. This notice may be given in the same form and time as notice for other regularly conducted public hearings of the public agency. To the extent that the public agency maintains an Internet web site, notice of all public hearings should be made available in electronic format on that site.

(f) A public agency may include, in its implementing procedures, procedures for the conducting of public hearings pursuant to this section. The procedures may adopt existing notice and hearing requirements of the public agency for regularly conducted legislative, planning, and other activities.

(g) There is no requirement for a public agency to conduct a public hearing in connection with its review of an EIR prepared by another public agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000, 21082, 21108 and 21152, Public Resources Code; *Concerned Citizens of Palm Desert, Inc.* v. *Board of Supervisors* (1974) 38 Cal. App. 3d 272.

HISTORY

1. Amendment of subsection (e) filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15203. Adequate Time for Review and Comment.

The lead agency shall provide adequate time for other public agencies and members of the public to review and comment on a draft EIR or negative declaration that it has prepared.

(a) Public agencies may establish time periods for review in their implementing procedures and shall notify the public and reviewing agencies of the time for receipt of comments on EIRs. These time periods shall be consistent with applicable statutes, the State CEQA Guidelines, and applicable clearinghouse review periods.

(b) A review period for an EIR does not require a halt in other planning or evaluation activities related to a project. Planning should continue in conjunction with environmental evaluation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21082, 21108 and 21152, Public Resources Code. Formerly Sections 15160(a) and (e).

§ 15204. Focus of Review.

(a) In reviewing draft EIRs, persons and public agencies should focus on the sufficiency of the document in identifying and analyzing the possible impacts on the environment and ways in which the significant effects of the project might be avoided or mitigated. Comments are most helpful when they suggest additional specific alternatives or mitigation measures that would provide better ways to avoid or mitigate the significant environmental effects. At the same time, reviewers should be aware that the adequacy of an EIR is determined in terms of what is reasonably feasible, in light of factors such as the magnitude of the project at issue, the severity of its likely environmental impacts, and the geographic scope of the project. CEQA does not require a lead agency to conduct every test or perform all research, study, and experimentation recommended or demanded by commentors. When responding to comments, lead agencies need only respond to significant environmental issues and do not need to provide all information requested by reviewers, as long as a good faith effort at full disclosure is made in the EIR.

(b) In reviewing negative declarations, persons and public agencies should focus on the proposed finding that the project will not have a significant effect on the environment. If persons and public agencies believe that the project may have a significant effect, they should:

(1) Identify the specfic effect,

(2) Explain why they believe the effect would occur, and

(3) Explain why they believe the effect would be significant.

(c) Reviewers should explain the basis for their comments, and should submit data or references offering facts, reasonable assumptions based on facts, or expert opinion supported by facts in support of the comments. Pursuant to Section 15064, an effect shall not be considered significant in the absence of substantial evidence.

(d) Reviewing agencies or organizations should include with their comments the name of a contact person who would be available for later consultation if necessary. Each responsible agency and trustee agency should focus its comments on environmental information germane to that agency's statutory responsibility.

(e) This section shall not be used to restrict the ability of reviewers to comment on the general adequacy of a document or of the lead agency to reject comments not focused as recommended by this section.

(f) Prior to the close of the public review period for an EIR or mitigated negative declaration, a responsible or trustee agency which has identified significant effects on the environment may submit to the lead agency proposed mitigation measures which would address those significant effects. Any such measures shall be limited to impacts affecting those resources which are subject to the statutory authority of that agency. If mitigation measures are submitted, the responsible or trustee agency shall either submit to the lead agency complete and detailed performance objectives for the mitigation measures, or shall refer the lead agency to appropriate, readily available guidelines or reference documents which meet the same purpose.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080, 21081.6, 21080.4, 21104 and 21153, Public Resources Code, Formerly Section 15161; *San Joaquin Raptor/Wildlife Rescue Center v. County of Stanislaus* (1996) 42 Cal.App.4th 608; and *Leonoff v. Monterey County Board of Supervisors* (1990) 222 Cal.App.3d 1337.

HISTORY

1. Amendment of section and NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15205. Review by State Agencies.

(a) Draft EIRs and negative declarations to be reviewed by state agencies shall be submitted to the State Clearinghouse, 1400 Tenth Street, Sacramento, California 95814. For U.S. Mail, submit to P.O. Box 3044, Sacramento, California 95812–3044. When submitting such documents to the State Clearinghouse, the public agency shall include, in addition to the printed copy, a copy of the document in electronic form on a diskette or by electronic mail transmission, if available.

(b) The following environmental documents shall be submitted to the State Clearinghouse for review by state agencies:

(1) Draft EIRs and negative declarations prepared by a state agency where such agency is a lead agency.

(2) Draft EIRs and negative declarations prepared by a public agency where a state agency is a responsible agency, trustee agency, or otherwise has jurisdiction by law with respect to the project.

(3) Draft EIRs and negative declarations on projects identified in Section 15206 as being of statewide, regional, or areawide significance.

(4) Draft EIRs, environmental assessments, and findings of no significant impact prepared pursuant to NEPA, the Federal Guidelines (Title 40 CFR, Part 1500, commencing with Section 1500.1).

(c) Public agencies may send environmental documents to the State Clearinghouse for review where a state agency has special expertise with regard to the environmental impacts involved. The areas of statutory authorities of state agencies are identified in Appendix B. Any such environmental documents submitted to the State Clearinghouse shall include, in addition to the printed copy, a copy of the document in electronic format, on a diskette or by electronic mail transmission, if available.

(d) When an EIR or negative declaration is submitted to the State Clearinghouse for review, the review period set by the lead agency shall be at least as long as the period provided in the state review system operated by the State Clearinghouse. In the state review system, the normal review period is 45 days for EIRs and 30 days for negative declarations. In exceptional circumstances, the State Clearinghouse may set shorter review periods when requested by the lead agency.

(e) The number of copies of an EIR or negative declaration submitted to the State Clearinghouse shall not be less than ten unless the State Clearinghouse approves a lower number in advance.

(f) While the lead agency is encouraged to contact the regional and district offices of state responsible agencies, the lead agency must, in all cases, submit documents to the State Clearinghouse for distribution in order to comply with the review requirements of this section.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083, 21104 and 21153, Public Resources Code.

HISTORY

1. Amendment of subsections (a) and (c) filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).
2. Change without regulatory effect amending subsection (a) and NOTE filed 2–1–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 5).

§ 15206. Projects of Statewide, Regional, or Areawide Significance.

(a) Projects meeting the criteria in this section shall be deemed to be of statewide, regional, or areawide significance.

(1) A draft EIR or negative declaration prepared by any public agency on a project described in this section shall be submitted to the State Clearinghouse and should be submitted also to the appropriate metropolitan area council of governments for review and comment.

(2) When such documents are submitted to the State Clearinghouse, the public agency shall include, in addition to the printed copy, a copy of the document in electronic format on a diskette or by electronic mail transmission, if available.

(b) The lead agency shall determine that a proposed project is of statewide, regional, or areawide significance if the project meets any of the following criteria:

(1) A proposed local general plan, element, or amendment thereof for which an EIR was prepared. If a negative declaration was prepared for the plan, element, or amendment, the document need not be submitted for review.

(2) A project has the potential for causing significant effects on the environment extending beyond the city or county in which the project would be located. Examples of the effects include generating significant amounts of traffic or interfering with the attainment or maintenance of state or national air quality standards. Projects subject to this subsection include:

(A) A proposed residential development of more than 500 dwelling units.

(B) A proposed shopping center or business establishment employing more than 1,000 persons or encompassing more than 500,000 square feet of floor space.

(C) A proposed commercial office building employing more than 1,000 persons or encompassing more than 250,000 square feet of floor space.

(D) A proposed hotel/motel development of more than 500 rooms.

(E) A proposed industrial, manufacturing, or processing plant, or industrial park planned to house more than 1,000 persons, occupying more than 40 acres of land, or encompassing more than 650,000 square feet of floor area.

(3) A project which would result in the cancellation of an open space contract made pursuant to the California Land Conservation Act of 1965 (Williamson Act) for any parcel of 100 or more acres.

(4) A project for which an EIR and not a negative declaration was prepared which would be located in and would substantially impact the following areas of critical environmental sensitivity:

(A) The Lake Tahoe Basin.

(B) The Santa Monica Mountains Zone as defined by Section 33105 of the Public Resources Code.

(C) The California Coastal Zone as defined in, and mapped pursuant to, Section 30103 of the Public Resources Code.

(D) An area within 1/4 mile of a wild and scenic river as defined by Section 5093.5 of the Public Resources Code.

(E) The Sacramento–San Joaquin Delta, as defined in Water Code Section 12220.

(F) The Suisun Marsh as defined in Public Resources Code Section 29101.

(G) The jurisdiction of the San Francisco Bay Conservation and Development Commission as defined in Government Code Section 66610.

(5) A project which would substantially affect sensitive wildlife habitats including but not limited to riparian lands, wetlands, bays, estuaries, marshes, and habitats for endangered, rare and threatened species as defined by Section 15380 of this Chapter.

(6) A project which would interfere with attainment of regional water quality standards as stated in the approved areawide waste treatment management plan.

(7) A project which would provide housing, jobs, or occupancy for 500 or more people within 10 miles of a nuclear power plant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference. Section 21083, Public Resources Code.

HISTORY

1. Amendment of subsection (b)(5) filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).
2. New subsection (a)(1) designator and new subsection (a)(2) filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).
3. Change without regulatory effect amending subsection (b)(4)(B) filed 2–1–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 5).

§ 15207. Failure to Comment.

If any public agency or person who is consulted with regard to an EIR or negative declaration fails to comment within a reasonable time as specified by the lead agency, it shall be assumed, absent a request for a specific extension of time, that such agency or person has no comment to make. Although the lead agency need not respond to late comments, the lead agency may choose to respond to them.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104 and 21153, Public Resources Code; *Cleary* v. *County of Stanislaus* (1981) 118 Cal. App. 3d 348. Formerly Section 15162.

§ 15208. Retention and Availability of Comments.

Comments received through the consultation process shall be retained for a reasonable period and available for public inspection at an address given in the final EIR. Comments which may be received on a draft EIR or negative declaration under preparation shall also be considered and kept on file.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21104, 21082.1 and 21153, Public Resources Code; Section 4, Chapter 480, Statutes of 1981; *People* v. *County of Kern* (1974) 39 Cal. App. 3d 830.

§ 15209. Comments on Initiative of Public Agencies.

Every public agency may comment on environmental documents dealing with projects which affect resources with which the agency has special expertise regardless of whether its comments were solicited or whether the effects fall within the legal jurisdiction of the agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21104 and 21153, Public Resources Code.

Article 14. Projects Also Subject to the National Environmental Policy Act (NEPA)

§ 15220. General.

This article applies to projects that are subject to both CEQA and NEPA. NEPA applies to projects which are carried out, financed, or approved in whole or in part by federal agencies. Accordingly, this article applies to projects which involve one or more state or local agencies and one or more federal agencies.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.5, 21083.6 and 21083.7, Public Resources Code; National Environmental Policy Act of 1969, Public Law 91–190 as amended, 42 U.S.C.A. 4321–4347; NEPA Regulations, 40 Code of Federal Regulations (C.F.R.) Parts 1500–1508.

HISTORY

1. New Article 14 (Sections 15220–15228) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15221. NEPA Document Ready Before CEQA Document.

(a) When a project will require compliance with both CEQA and NEPA, state or local agencies should use the EIS or finding of no significant impact rather than preparing an EIR or negative declaration if the following two conditions occur:

(1) An EIS or finding of no significant impact will be prepared before an EIR or negative declaration would otherwise be completed for the project; and

(2) The EIS or finding of no significant impact complies with the provisions of these guidelines.

(b) Because NEPA does not require separate discussion of mitigation measures or growth inducing impacts, these points of analysis will need to be added, supplemented, or identified before the EIS can be used as an EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.5 and 21083.7, Public Resources Code; Section 102(2)(C) of NEPA, 43 U.S.C.A. 4322(2)(C).

§ 15222. Preparation of Joint Documents.

If a lead agency finds that an EIS or finding of no significant impact for a project would not be prepared by the federal agency by the time when the lead agency will need to consider an EIR or negative declaration, the lead agency should try to prepare a combined EIR–EIS or negative declaration–finding of no significant impact. To avoid the need for the federal agency to prepare a separate document for the same project, the lead agency must involve the federal agency in the preparation of the joint document. This involvement is necessary because federal law generally prohibits a federal agency from using an EIR prepared by a state agency unless the federal agency was involved in the preparation of the document.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.5 and 21083.7, Public Resources Code; Section 102(2)(D) of NEPA, 43 U.S.C.A. 4322 (2)(D); 40 C.F.R. Part 1506.2.

§ 15223. Consultation with Federal Agencies.

When it plans to use an EIS or finding of no significant impact or to prepare such a document jointly with a federal agency, the lead agency shall consult as soon as possible with the federal agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.5 and 21083.7, Public Resources Code.

§ 15224. Time Limits.

Where a project will be subject to both CEQA and the National Environmental Policy Act, the one year time limit and the 105 day time limit may be waived pursuant to Section 15110.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083.6, Public Resources Code.

§ 15225. Circulation of Documents.

(a) Where the federal agency circulated the EIS or finding of no significant impact for public review as broadly as state or local law may require and gave notice meeting the standards in Section 15072(a) or 15087(a), the lead agency under CEQA may use the federal document in the place of an EIR or negative declaration without recirculating the federal document for public review. One review and comment period is enough. Prior to using the federal document in this situation, the lead agency shall give notice that it will use the federal document in the place of an EIR or negative declaration and that it believes that the federal document meets the requirements of CEQA. The notice shall be given in the same manner as a notice of the public availability of a draft EIR under Section 15087.

(b) If an EIS has been prepared and filed pursuant to NEPA on the closure and reuse of a military base and the Lead Agency decides that the EIS does not fully meet the requirements of CEQA or has not been circulated for public review as state and local law may require, the Lead Agency responsible for preparation of an EIR for a reuse plan for the same base may proceed in the following manner:

(1) Prepare and circulate a notice of preparation pursuant to Section 15082. The notice shall include a description of the reuse plan, a copy of the EIS, an address to which to send comments, and the deadline for submitting comments. The notice shall state that the lead agency intends to utilize the EIS as a draft EIR and requests comments on whether the EIS provides adequate information to serve as a draft EIR and what specific additional information, if any, is necessary.

(2) Upon the close of the comment period, the lead agency may proceed with preparation and circulation for comment of the draft EIR for the reuse plan. To the greatest extent feasible, the lead agency shall avoid duplication and utilize the EIS or information in the EIS as all or part of the draft EIR. The EIR shall be completed in compliance with the provisions of CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.5, 21083.8 and 21092, Public Resources Code.

HISTORY

1. New subsection (a) designator, new subsections (b)–(b)(2), and amendment of NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15226. Joint Activities.

State and local agencies should cooperate with federal agencies to the fullest extent possible to reduce duplication between the California Environmental Quality Act and the National Environmental Policy Act. Such cooperation should, to the fullest extent possible, include:

(a) Joint planning processes,

(b) Joint environmental research and studies,

(c) Joint public hearings,

(d) Joint environmental documents.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.5 and 21083.7, Public Resources Code; 40 C.F.R. Part 1506.2.

§ 15227. State Comments on a Federal Project.

When a state agency officially comments on a proposed federal project which may have a significant effect on the environment, the comments shall include or reference a discussion of the material specified in Section 15126. An EIS on the federal project may be referenced to meet the requirements of this section.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21101, Public Resources Code.

228. Where Federal Agency Will Not Cooperate.

Where a federal agency will not cooperate in the preparation of joint document and will require separate NEPA compliance for the project at a later time, the state or local agency should persist in efforts to cooperate with the federal agency. Because NEPA expressly allows federal agencies to use environmental documents prepared by an agency of statewide jurisdiction, a local agency should try to involve a state agency in helping prepare an EIR or negative declaration for the project. In this way there will be a greater chance that the federal agency may later use the CEQA document and not require the applicant to pay for preparation of a second document to meet NEPA requirements at a later time.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083.5, Public Resources Code; Section 102(2)(D) of NEPA, 42 U.S.C.A. 4322(2)(D).

§ 15229. Baseline Analysis for Military Base Reuse Plan EIRs.

When preparing and certifying an EIR for a plan for the reuse of a military base, including when utilizing an Environmental Impact Statement pursuant to Section 21083.5 of the Public Resources Code, in addition to the procedure authorized pursuant to subdivision (b) of Section 21083.8 of the Public Resources Code, the determination of whether the reuse plan may have a significant effect on the environment may, at the discretion of the lead agency, be based upon the physical conditions which were present at the time that the federal decision for the closure or realignment of the base or reservation became final. These conditions shall be referred to as the "baseline physical conditions." Impacts which do not exceed the baseline physical conditions shall not be considered significant.

(a) Prior to circulating a draft EIR pursuant to the provisions of this Section, the lead agency shall do all of the following, in order:

(1) Prepare proposed baseline physical conditions, identify pertinent responsible and trustee agencies and consult with those agencies prior to the public hearing required by subdivision (a)(2) as to the application of their regulatory authority and permitting standards to the proposed baseline physical conditions, the proposed reuse plan, and specific, planned future nonmilitary land uses of the base or reservation. The affected agencies shall have not less than 30 days prior to the public hearing to review the proposed baseline physical conditions and the proposed reuse plan and to submit their comments to the lead agency.

(2) Hold a public hearing at which is discussed the federal EIS prepared for, or being prepared for, the closure or realignment of the military base or reservation. The discussion shall include the significant effects on the environment, if any, examined in the EIS, potential methods of mitigating those effects, including feasible alternatives, and the mitigative effects of federal, state, and local laws applicable to future nonmilitary activities. Prior to the close of the hearing, the lead agency shall specify whether it will adopt any of the baseline physical conditions for the reuse plan EIR and identify those conditions. The lead agency shall specify particular baseline physical conditions, if any, which it will examine in greater detail than they were examined in the EIS. Notice of the hearing shall be given pursuant to Section 15087. The hearing may be continued from time to time.

(3) Prior to the close of the hearing, the lead agency shall do all of the following:

(A) Specify the baseline physical conditions which it intends to adopt for the reuse plan EIR, and specify particular physical conditions, if any, which it will examine in greater detail than were examined in the EIS.

(B) State specifically how it intends to integrate its discussion of the baseline physical conditions in the EIR with the reuse planning process, taking into account the adopted environmental standards of the community, including but not limited to, the adopted general plan, specific plan or redevelopment plan, and including other applicable provisions of adopted congestion management plans, habitat conservation or natural communities conservation plans, air quality management plans, integrated waste management plans, and county hazardous waste management plans.

(C) State the specific economic or social reasons, including but not limited to, new job creation, opportunities for employment of skilled workers, availability of low and moderate–income housing, and economic continuity which support selection of the baseline physical conditions.

(b) An EIR prepared under this section should identify any adopted baseline physical conditions in the environmental setting section. The baseline physical conditions should be cited in discussions of effects. The no-project alternative analyzed in an EIR prepared under this section shall discuss the conditions on the base as they exist at the time of preparation, as well as what could be reasonably expected to occur in the foreseeable future if the reuse plan were not approved, based on current plans and consistent with available infrastructure and services.

(c) All public and private activities taken pursuant to or in furtherance of a reuse plan for which an EIR was prepared and certified pursuant to this section shall be deemed to be a single project. A subsequent or supplemental EIR shall be required only if the lead agency determines that any of the circumstances described in Section 15162 or 15163 exist.

(d) Limitations:

(1) Nothing in this section shall in any way limit the scope of review or determination of significance of the presence of hazardous or toxic wastes, substances, and materials, including but not limited to, contaminated soils and groundwater. The regulation of hazardous or toxic wastes, substances, and materials shall not be constrained by this section.

(2) This section does not apply to hazardous waste regulation and remediation projects undertaken pursuant to Chapter 6.5 (commencing with Section 25100) or Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code or pursuant to the Porter–Cologne Water Quality Control Act (Water Code Section 13000, et seq.)

(3) All subsequent development at the military base or reservation shall be subject to all applicable federal, state, or local laws, including but not limited to, those relating to air quality, water quality, traffic, threatened and endangered species, noise, and hazardous or toxic wastes, substances, or materials.

(e) "Reuse plan" means the initial plan for the reuse of military base adopted by a local government, including a redevelopment agency or joint powers authority, in the form of a general plan, general plan amendment, specific plan, redevelopment plan, or other planning document. For purposes of this section, a reuse plan also shall include a statement of development policies, a diagram or diagrams illustrating its provisions, including a designation of the proposed general distribution, location, and development intensity for housing, business, industry, open space, recreation, natural resources, public buildings and grounds, roads, and other transportation facilities, infrastructure, and other categories of proposed uses, whether public or private.

(f) This section may be applied to any reuse plan EIR for which a notice of preparation is issued within one year from the date that the federal record of decision was rendered for the military base or reservation closure or realignment and reuse, or prior to January 1, 1997, whichever is later, but only if the EIR is completed and certified within five years from the date that the federal record of decision was rendered.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083.1, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

Article 15. Litigation

§ 15230. Time Limits and Criteria.

Litigation under CEQA must be handled under the time limits and criteria described in Sections 21167 et seq. of the Public Resources Code and Section 15112 of these guidelines in addition to provisions in this article.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21167 et seq., Public Resources Code.

HISTORY

1. New Article 15 (Sections 15230–15233) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15231. Adequacy of EIR or Negative Declaration for Use by Lead and Responsible Agencies.

A final EIR prepared by a lead agency or a negative declaration adopted by a lead agency shall be conclusively presumed to comply with CEQA for purposes of use by responsible agencies which were consulted pursuant to Sections 15072 or 15082 unless one of the following conditions occurs:

(a) The EIR or negative declaration is finally adjudged in a legal proceeding not to comply with the requirements of CEQA, or

(b) A subsequent EIR is made necessary by Section 15162 of these guidelines.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.1, 21166, 21167.2 and 21167.3, Public Resources Code.

HISTORY

1. Amendment of section heading filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15232. Request for Hearing.

In a writ of mandate proceeding challenging approval of a project under CEQA, the petitioner shall, within 90 days of filing the petition, request a hearing or otherwise be subject to dismissal on the court's own motion or on the motion of any party to the suit.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21167.4, Public Resources Code.

§ 15233. Conditional Permits.

If a lawsuit is filed challenging an EIR or negative declaration for noncompliance with CEQA, responsible agencies shall act as if the EIR or negative declaration complies with CEQA and continue to process the application for the project according to the time limits for responsible agency action contained in Government Code Section 65952.

(a) If an injunction or a stay has been granted in the lawsuit prohibiting the project from being carried out, the responsible agency shall have authority only to disapprove the project or to grant a conditional approval of the project. A conditional approval shall constitute permission to proceed with a project only when the court action results in a final determination that the EIR or negative declaration does comply with the provision of CEQA (Public Resources Code Section 21167.3a).

(b) If no injunction or stay is granted in the lawsuit, the responsible agency shall assume that the EIR or negative declaration fully meets the requirements of CEQA. The responsible agency shall approve or disapprove the project within the time limits described in Article 8, commencing with Section 15100, of these guidelines and described in Government Code Section 65952. An approval granted by a responsible agency in this situation provides only permission to proceed with the project at the applicant's risk prior to a final decision in the lawsuit (Public Resources Code Section 21167.3b).

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21167.3, Public Resources Code; *Kriebel* v. *City Council* (1980) 112 Cal. App. 3d 693.

Article 16. EIR Monitor

§ 15240. EIR Monitor.

The Secretary for Resources may provide for publication of a bulletin entitled "California EIR Monitor" on a subscription basis to provide public notice of amendments to the guidelines, the completion of draft EIRs, and other matters as deemed appropriate. Inquiries and subscription requests should be sent to the following address:

SECRETARY FOR RESOURCES
ATTENTION: CALIFORNIA EIR MONITOR
1416 NINTH STREET, ROOM 1311
SACRAMENTO, CALIFORNIA 95814

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21088, Public Resources Code.

HISTORY

1. New Article 16 (Section 15240) filed 7–13–83; effective thirtieth day thereaf. (Register 83, No. 29).
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

Article 17. Exemption for Certified State Regulatory Programs

§ 15. . General.

Section 21080.5 of the Public Resources Code provides that a regulatory program of a state agency shall be certified by the Secretary for Resources as being exempt from the requirements for preparing EIRs, negative declarations, and initial studies if the Secretary finds that the program meets the criteria contained in that code section. A certified program remains subject to other provisions in CEQA such as the policy of avoiding significant adverse effects on the environment where feasible. This article provides information concerning certified programs.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.5, Public Resources Code.

HISTORY

1. New Article 17 (Sections 15250–15253) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15251. List of Certified Programs.

The following programs of state regulatory agencies have been certified by the Secretary for Resources as meeting the requirements of Section 21080.5:

(a) The regulation of timber harvesting operations by the California Department of Forestry and the State Board of Forestry pursuant to Chapter 8, commencing with Section 4511 of Part 2 of Division 4 of the Public Resources Code.

(b) The regulatory program of the Fish and Game Commission pursuant to the Fish and Game Code.

(c) The regulatory program of the California Coastal Commission and the regional coastal commissions dealing with the consideration and gra[illegible]g of coastal development permits under the California Coastal Act of [illegible]Division 20 (commencing with Section 30000) of the Public Resou[illegible]Code.

(d) That portion of the regulatory program of the Air Resources Board which involves the adoption, approval, amendment, or repeal of standards, rules, regulations, or plans to be used in the regulatory program for the protection and enhancement of ambient air quality in California.

(e) The regulatory program of the State Board of Forestry in adopting, amending, or repealing standards, rules, regulations, or plans under the Z'berg–Nejedly Forest Practice Act, Chapter 8 (commencing with Section 4511) of Part 2 of Division 4 of the Public Resources Code.

(f) The program of the California Coastal Commission involving the preparation, approval, and certification of local coastal programs as provided in Sections 30500 through 30522 of the Public Resources Code.

(g) The Water Quality Control (Basin)/208 Planning Program of the State Water Resources Control Board and the Regional Water Quality Control Boards.

(h) The permit and planning programs of the San Francisco Bay Conservation and Development Commission under the McAteer–Petris Act, Title 7.2 (commencing with Section 66600) of the Government Code and the Suisun Marsh Preservation Act, Division 19 (commencing with Section 29000) of the Public Resources Code.

(i) The pesticide regulatory program administered by the Department of Pesticide Regulation and the county agricultural commissioners insofar as the program consists of:

(1) The registration, evaluation, and classification of pesticides.

(2) The adoption, amendment, or repeal of regulations and standards for the licensing and regulation of pesticide dealers and pest control operators and advisors.

[illegible]The adoption, amendment, or repeal of regulations for standards d[illegible]with the monitoring of pesticides and of the human health and environmental effects of pesticides.

(4) The regulation of the use of pesticides in agricultural and urban areas of the state through the permit system administered by the county agricultural commissioners.

(j) The regulations of weather resources management projects through the issuance of operating permits by the State Department of Water Resources pursuant to the California Weather Resources Management Act of 1978 (Water Code Sections 400 et seq.).

(k) The power plant site certification program of the State Energy Resources Conservation and Development Commission under Chapter 6 of the Warren–Alquist Act, commencing with Public Resources Code Section 25500.

(*l*) The regulatory program of the State Water Resources Control Board to establish instream beneficial use protection programs.

(m) That portion of the regulatory program of the South Coast Air Quality Management District which involves the adoption, amendment, and repeal of regulations pursuant to the provisions of the Health and Safety Code.

(n) The program of the Delta Protection Commission involving the preparation and adoption of a Resource Management Plan for the Sacramento–San Joaquin Delta (Pub. Resources Code § 29760 ff.), and the Commission's review and action on general plan amendments proposed by local governments to make their plans consistent with the provisions of the Commission's Resource Management Plan (Pub. Resources Code § 29763.5).

(o) The program of the Department of Fish and Game for the adoption of regulations under the Fish and Game Code.

(p) The program of the Department of Fish and Game implementing the incidental take permit application process under the California Endangered Species Act ("CESA"), Fish and Game Code sections 2080 and 2081, and specifically the regulation governing the Department of Fish and Game's role as a "lead agency" when issuing incidental take permits, found at California Code of Regulations, Title 14, section 783.5(d).

(q) The regulatory program of the Department of Fish and Game for review and approval of voluntary local programs for routine and ongoing agricultural activities, as authorized by the California Endangered Species Act, Fish and Game Code section 2086.

NOTE: Authority cited: Sections 21083 and 21080.5, Public Resources Code. Reference: Section 21080.5, Public Resources Code.

HISTORY

1. New subsection (m) filed 3–1–89; operative 3–31–89 (Register 89, No. 10).
2. New subsection (n) filed 11–9–94; operative 12–9–94 (Register 94, No. 45).
3. New subsection (o) filed 8–27–98; operative 8–27–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 35).
4. New subsection (p) and amendment of NOTE filed 3–29–99; operative 3–29–99 pursuant to Government Code section 11343.4(d) (Register 99, No. 14).
5. Change without regulatory effect amending subsection (i) and NOTE filed 2–1–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 5).
6. New subsection (q) filed 3–4–2003; operative 3–4–2003 pursuant to Public Resources Code section 21083 (Register 2003, No. 10).

§ 15252. Substitute Document.

The document used as a substitute for an EIR or negative declaration in a certified program shall include at least the following items:

(a) A description of the proposed activity, and

(b) Either:

(1) Alternatives to the activity and mitigation measures to avoid or reduce any significant or potentially significant effects that the project might have on the environment, or

(2) A statement that the agency's review of the project showed that the project would not have any significant or potentially significant effects on the environment and therefore no alternatives or mitigation measures are proposed to avoid or reduce any significant effects on the environment. This statement shall be supported by a checklist or other documentation to show the possible effects that the agency examined in reaching this conclusion.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.5, Public Resources Code.

8045

§ 15253. Use of an EIR Substitute by a Responsible Agency.

(a) An environmental analysis document prepared for a project under a certified program listed in Section 15251 shall be used by another agency granting an approval for the same project where the conditions in Subsection (b) have been met. In this situation, the certified agency shall act as lead agency, and the other permitting agencies shall act as responsible agencies using the certified agency's document.

[The next page is 709.]

(b) The conditions under which a public agency shall act as a responsible agency when approving a project using an environmental analysis document prepared under a certified program in the place of an EIR or negative declaration are as follows:

(1) The certified agency is the first agency to grant a discretionary approval for the project.

(2) The certified agency consults with the responsible agencies, but the consultation need not include the exchange of written notices.

(3) The environmental analysis document identifies:

(A) The significant environmental effects within the jurisdiction or special expertise of the responsible agency.

(B) Alternatives or mitigation measures that could avoid or reduce the severity of the significant environmental effects.

(4) Where written notices were not exchanged in the consultation process, the responsible agency was afforded the opportunity to participate in the review of the property by the certified agency in a regular manner designed to inform the certified agency of the concerns of the responsible agency before release of the EIR substitute for public review.

(5) The certified agency established a consultation period between the certified agency and the responsible agency that was at least as long as the period allowed for public review of the EIR substitute document.

(6) The certified agency exercised the powers of a lead agency by considering all the significant environmental effects of the project and making a finding under Section 15091 for each significant effect.

(c) Certified agencies are not required to adjust their activities to meet the criteria in Subsection (b). Where a certified agency does not meet the criteria in Subsection (b):

(1) The substitute document prepared by the agency shall not be used by other permitting agencies in the place of an EIR or negative declaration, and

(2) Any other agencies granting approvals for the project shall comply with CEQA in the normal manner. A permitting agency shall act as a lead agency and prepare an EIR or a negative declaration. Other permitting agencies, if any, shall act as responsible agencies and use the EIR or negative declaration prepared by the lead agency.

Article 18. Statutory Exemptions

§ 15260. General.

This article describes the exemptions from CEQA granted by the Legislature. The exemptions take several forms. Some exemptions are complete exemptions from CEQA. Other exemptions apply to only part of the requirements of CEQA, and still other exemptions apply only to the timing of CEQA compliance.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b), Public Resources Code.

HISTORY

1. New Article 18 (Sections 15260–15277) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15261. Ongoing Project.

(a) If a project being carried out by a public agency was approved prior to November 23, 1970, the project shall be exempt from CEQA unless either of the following conditions exists:

(1) A substantial portion of public funds allocated for the project have not been spent, and it is still feasible to modify the project to mitigate potentially adverse environmental effects, or to choose feasible alternatives to the project, including the alternative of "no project" or halting the project; provided that a project subject to the National Environmental Policy Act (NEPA) shall be exempt from CEQA as an on–going project if, under regulations promulgated under NEPA, the project would be too far advanced as of January 1, 1970, to require preparation of an EIS.

(2) A public agency proposes to modify the project in such a way that the project might have a new significant effect on the environment.

(b) A private project shall be exempt from CEQA if the project received approval of a lease, license, certificate, permit, or other entitlement for use from a public agency prior to April 5, 1973, subject to the following provisions:

(1) CEQA does not prohibit a public agency from considering environmental factors in connection with the approval or disapproval of a project, or from imposing reasonable fees on the appropriate private person or entity for preparing an environmental report under authority other than CEQA. Local agencies may require environmental reports for projects covered by this paragraph pursuant to local ordinances during this interim period.

(2) Where a project was approved prior to December 5, 1972, and prior to that date the project was legally challenged for noncompliance with CEQA, the project shall be bound by special rules set forth in Section 21170 of CEQA.

(3) Where a private project has been granted a discretionary governmental approval for part of the project before April 5, 1973, and another or additional discretionary governmental approvals after April 5, 1973, the project shall be subject to CEQA only if the approval or approvals after April 5, 1973, involve a greater degree of responsibility or control over the project as a whole than did the approval or approvals prior to that date.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21169, 21170 and 21171, Public Resources Code; *County of Inyo* v. *Yorty*, 32 Cal. App. 3d 795.

§ 15262. Feasibility and Planning Studies.

A project involving only feasibility or planning studies for possible future actions which the agency, board, or commission has not approved, adopted, or funded does not require the preparation of an EIR or negative declaration but does require consideration of environmental factors. This section does not apply to the adoption of a plan that will have a legally binding effect on later activities.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21102 and 21150, Public Resources Code.

§ 15263. Discharge Requirements.

The State Water Resources Control Board and the regional boards are exempt from the requirement to prepare an EIR or a negative declaration prior to the adoption of waste discharge requirements, except requirements for new sources as defined in the Federal Water Pollution Control Act or in other acts which amend or supplement the Federal Water Pollution Control Act. The term "waste discharge requirements" as used in this section is the equivalent of the term "permits" as used in the Federal Water Pollution Control Act.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 13389, Water Code.

§ 15264. Timberland Preserves.

Local agencies are exempt from the requirement to prepare an EIR or negative declaration on the adoption of timberland preserve zones under Government Code Sections 51100 et seq. (Gov. Code, Sec. 51119).

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 51119, Government Code.

§ 15265. Adoption of Coastal Plans and Programs.

(a) CEQA does not apply to activities and approvals pursuant to the California Coastal Act (commencing with Section 30000 of the Public Resources Code) by:

(1) Any local government, as defined in Section 30109 of the Public Resources Code, necessary for the preparation and adoption of a local coastal program, or

(2) Any state university or college, as defined in Section 30119, as necessary for the preparation and adoption of a long–range land use development plan.

(b) CEQA shall apply to the certification of a local coastal program or long–range land use development plan by the California Coastal Commission.

(c) This section shifts the burden of CEQA compliance from the local agency or the state university or college to the California Coastal Commission. The Coastal Commission's program of certifying local coastal

programs and long–range land use development plans has been certified under Section 21080.5, Public Resources Code. See Section 15192.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.9, Public Resources Code.

§ 15266. General Plan Time Extension.

CEQA shall not apply to the granting of an extension of time by the Office of Planning and Research to a city or county for the preparation and adoption of one or more elements of a city or county general plan.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.10(a), Public Resources Code.

§ 15267. Financial Assistance to Low or Moderate Income Housing.

CEQA does not apply to actions taken by the Department of Housing and Community Development to provide financial assistance for the development and construction of residential housing for persons and families of low or moderate income, as defined in Section 50093 of the Health and Safety Code. The residential project which is the subject of the application for financial assistance will be subject to CEQA when approvals are granted by another agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.10(b), Public Resources Code.

§ 15268. Ministerial Projects.

(a) Ministerial projects are exempt from the requirements of CEQA. The determination of what is "ministerial" can most appropriately be made by the particular public agency involved based upon its analysis of its own laws, and each public agency should make such determination either as a part of its implementing regulations or on a case–by–case basis.

(b) In the absence of any discretionary provision contained in the local ordinance or other law establishing the requirements for the permit, license, or other entitlement for use, the following actions shall be presumed to be ministerial:

(1) Issuance of building permits.

(2) Issuance of business licenses.

(3) Approval of final subdivision maps.

(4) Approval of individual utility service connections and disconnections.

(c) Each public agency should, in its implementing regulations or ordinances, provide an identification or itemization of its projects and actions which are deemed ministerial under the applicable laws and ordinances.

(d) Where a project involves an approval that contains elements of both a ministerial action and a discretionary action, the project will be deemed to be discretionary and will be subject to the requirements of CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(1), Public Resources Code; *Day* v. *City of Glendale*, 51 Cal. App. 3d 817.

§ 15269. Emergency Projects.

The following emergency projects are exempt from the requirements of CEQA.

(a) Projects to maintain, repair, restore, demolish, or replace property or facilities damaged or destroyed as a result of a disaster in a disaster-stricken area in which a state of emergency has been proclaimed by the Governor pursuant to the California Emergency Services Act, commencing with Section 8550 of the Government Code. This includes projects that will remove, destroy, or significantly alter an historical resource when that resource represents an imminent threat to the public of bodily harm or of damage to adjacent property or when the project has received a determination by the State Office of Historic Preservation pursuant to Section 5028(b) of Public Resources Code.

(b) Emergency repairs to publicly or privately owned service facilities necessary to maintain service essential to the public health, safety or welfare.

(c) Specific actions necessary to prevent or mitigate an emergency. This does not include long–term projects undertaken for the purpose of preventing or mitigating a situation that has a low probability of occurrence in the short–term.

(d) Projects undertaken, carried out, or approved by a public agency to maintain, repair, or restore an existing highway damaged by fire, flood, storm, earthquake, land subsidence, gradual earth movement, or landslide, provided that the project is within the existing right of way of that highway and is initiated within one year of the damage occurring. This exemption does not apply to highways designated as official state scenic highways, nor any project undertaken, carried out, or approved by a public agency to expand or widen a highway damaged by fire, flood, storm, earthquake, land subsidence, gradual earth movement, or landslide.

(e) Seismic work on highways and bridges pursuant to Section180.2 of the Streets and Highways Code, Section 180 et seq.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(b)(2), (3), and (4), 21080.33 and 21172, Public Resources Code; *Castaic Lake Water Agency v. City of Santa Clarita* (1995) 41 Cal.App.4th 1257; and *Western Municipal Water District of Riverside County v. Superior Court of San Bernardino County* (1987) 187 Cal.App.3d 1104.

HISTORY

1. Amendment of section and NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15270. Projects Which Are Disapproved.

(a) CEQA does not apply to projects which a public agency rejects or disapproves.

(b) This section is intended to allow an initial screening of projects on the merits for quick disapprovals prior to the initiation f the CEQA process where the agency can determine that the project cannot be approved.

(c) This section shall not relieve an applicant from paying the costs for an EIR or negative declaration prepared for his project prior to the lead agency's disapproval of the project after normal evaluation and processing.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(5), Public Resources Code.

§ 15271. Early Activities Related to Thermal Power Plants.

(a) CEQA does not apply to actions undertaken by a public agency relating to any thermal power plant site or facility, including the expenditure, obligation, or encumbrance of funds by a public agency for planning, engineering, or design purposes, or for the conditional sale or purchase of equipment, fuel, water (except groundwater), steam, or power for such a thermal power plant, if the thermal power plant site and related facility will be the subject of an EIR or negative declaration or other document or documents prepared pursuant to a regulatory program certified pursuant to Public Resources Code Section 21080.5, which will be prepared by:

(1) The State Energy Resources Conservation and Development Commission,

(2) The Public Utilities Commission, or

(3) The city or county in which the power plant and related facility would be located.

(b) The EIR, negative declaration, or other document prepared for the thermal power plant site or facility, shall include the environmental impact, if any, of the early activities described in this section.

(c) This section acts to delay the timing of CEQA compliance from the early activities of a utility to the time when a regulatory agency is requested to approve the thermal power plant and shifts the responsibility for preparing the document to the regulatory agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 15080(b)(6), Public Resources Code.

§ 15272. Olympic Games.

CEQA does not apply to activities or approvals necessary to the bidding for, hosting or staging of, and funding or carrying out of, Olympic Games under the authority of the International Olympic Committee, except for the construction of facilities necessary for such Olympic Games. If the facilities are required by the International Olympic Committee as a condition of being awarded the Olympic Games, the lead agency need not discuss the "no project" alternative in an EIR with respect to those facilities.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(7), Public Resources Code.

8048

§ 15273. Rates, Tolls, Fares, and Charges.

(a) CEQA does not apply to the establishment, modification, structuring, restructuring, or approval of rates, tolls, fares, and other charges by public agencies which the public agency finds are for the purpose of:

(1) Meeting operating expenses, including employee wage rates and fringe benefits,

(2) Purchasing or leasing supplies, equipment, or materials,

(3)Meeting financial reserve needs and requirements,

(4) Obtaining funds for capital projects, necessary to maintain service within existing service areas, or

(5) Obtaining funds necessary to maintain such intra–city transfers as are authorized by city charter.

(b) Rate increases to fund capital projects for the expansion of a system remain subject to CEQA. The agency granting the rate increase shall act either as the lead agency if no other agency has prepared environmental documents for the capital project or as a responsible agency if another agency has already complied with CEQA as the lead agency.

(c) The public agency shall incorporate written findings in the record of any proceeding in which an exemption under this section is claimed setting forth with specificity the basis for the claim of exemption.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(8), Public Resources Code.

§ 15274. Family Day Care Homes.

(a) CEQA does not apply to establishment or operation of a large family day care home, which provides in–home care for up to fourteen children, as defined in Section 1596.78 of the Health and Safety Code.

(b) Under the Health and Safety Code, local agencies cannot require use permits for the establishment or operation of a small family day care home, which provides in–home care for up to eight children, and the establishment or operation of a small family day care home is a ministerial action which is not subject to CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083, Public Resources Code.

HISTORY

1. Amendment of section heading, repealer and new section, and amendment of NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

2. Change without regulatory effect amending section filed 2–1–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 5).

§ 15275. Specified Mass Transit Projects.

CEQA does not apply to the following mass transit projects:

(a) The institution or increase of passenger or commuter service on rail lines or high–occupancy vehicle lanes already in use, including the modernization of existing stations and parking facilities;

(b) Facility extensions not to exceed four miles in length which are required for transfer of passengers from or to exclusive public mass transit guideway or busway public transit services.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(11), (12), and (13), Public Resources Code.

§ 15276. Transportation Improvement and Congestion Management Programs.

(a) CEQA does not apply to the development or adoption of a regional transportation improvement program or the state transportation improvement program. Individual projects developed pursuant to these programs shall remain subject to CEQA.

(b) CEQA does not apply to preparation and adoption of a congestion management program by a county congestion management agency pursuant to Government Code Section 65089, et seq.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(13), Public Resources Code.

HISTORY

1. Amendment of section heading, section and NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15277. Projects Located Outside California.

CEQA does not apply to any project or portion thereof located outside of California which will be subject to environmental impact review pursuant to the National Environmental Policy Act of 1969 or pursuant to a law of that state requiring preparation of a document containing essentially the same points of analysis as in an environmental impact statement prepared under the National Environmental Policy Act of 1969. Any emissions or discharges that would have a significant effect on the environment in the State of California are subject to CEQA where a California public agency has authority over the emissions or discharges.

NOTE: Authority cited: Sections 21083 and 2187, Public Resources Code. Reference: Section 21080(b)(15), Public Resources Code; 58 Opinions of the California Attorney General 614 (S.O. 75/50).

§ 15278. Application of Coatings.

(a) CEQA does not apply to a discretionary decision by an air quality management district for a project consisting of the application of coatings within an existing facility at an automotive manufacturing plant if the district finds all of the following:

(1) The project will not cause a net increase in any emissions of any pollutant for which a national or state ambient air quality standard has been established after the internal emission accounting for previous emission reductions achieved at the facility and recognized by the district.

(2) The project will not cause a net increase in adverse impacts of toxic air contaminants as determined by a health risk assessment. The term "net increase in adverse impacts of toxic air contaminants as determined by a health risk assessment" shall be determined in accordance with the rules and regulations of the district.

(3) The project will not cause any other adverse effect on the environment.

(b) The district shall provide a 10–day notice, at the time of the issuance of the permit, of any such exemption. Notice shall be published in two newspapers of general circulation in the area of the project and shall be mailed to any person who makes a written request for such a notice. The notice shall state that the complete file on the project and the basis for the district's findings of exemption are available for inspection and copying at the office of the district.

(c) Any person may appeal the issuance of a permit based on an exemption under subdivision (a) to the hearing board as provided in Section 42302.1 of the Health and Safety Code. The permit shall be revoked by the hearing board if there is substantial evidence in light of the whole record before the board that the project may not satisfy one or more of the criteria established pursuant to subdivision (a). If there is no such substantial evidence, the exemption shall be upheld. Any appeal under this subdivision shall be scheduled for hearing on the calendar of the hearing board within 10 working days of the appeal being filed. The hearing board shall give the appeal priority on its calendar and shall render a decision on the appeal within 21 working days of the appeal being filed. The hearing board may delegate the authority to hear and decide such an appeal to a subcommittee of its body.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15279. Housing for Agricultural Employees.

(a) CEQA does not apply to any development project which consists of the construction, conversion, or use of residential housing for agricultural employees, as defined below, provided the development is either:

(1) Affordable to lower income households, as defined in Section 50079.5 of the Health and Safety Code, there is no public financial assistance for the development project, and the developer provides sufficient legal commitments to the appropriate local agency to ensure that the housing units will continue to be available to lower–income households for a period of at least 15 years; or

(2) Affordable to low and moderate–income households, as defined in paragraph (2) of subdivision (h) of Section 65589.5 of the Government

Code, at monthly housing costs determined pursuant to paragraph (2) of subdivision (h) of Section 65589.5 of the Government Code, there is public financial assistance for the project, and the developer provides sufficient legal commitments to the appropriate local agency to ensure that the housing units will continue to be available to low and moderate-income households for a period of at least 15 years.

(b) The development must also meet all the following criteria:

(1) It is consistent with the applicable city, county, or city and county general plan as it existed on the date the project application was deemed complete.

(2) It is consistent with the local zoning, as it existed on the date the project application was deemed complete, unless the zoning is inconsistent with the general plan because the city, county, or city and county has not rezoned the property to bring it into consistency with the general plan.

(3) If the project is proposed in an urbanized area, it does not exceed 45 dwelling units, or if it consists of dormitories, barracks or other group living facilities houses not more than 45 agricultural employees, and its site is adjacent on at least two sides to land that has been previously developed.

(4) If the project is proposed in a nonurbanized area, its site is zoned for general agricultural use and the project consists of not more than 20 dwelling units or, if it consists of dormitories, barracks or other group living facilities, it houses not more than 20 agricultural employees.

(5) Its site is not more than five acres in area, except that a project located in an area with a population density of at least 1000 persons per square mile shall not be more than two acres in area.

(6) Its site is, or can be, adequately served by utilities.

(7) Its site has no value as wildlife habitat.

(8) Its site is not included on any list of hazardous waste or other facilities and sites compiled pursuant to Section 65962 of the Government Code.

(9) It will not involve the demolition of, or any substantial adverse change in, any structure that is listed, or determined to be eligible for listing in the California Register of Historical Resources.

(c) As used in this section, "residential housing for agricultural employees" means housing accommodations for an agricultural employee, as defined in subdivision (b) of Section 1140.4 of the Labor Code.

(d) As used in this section, "urbanized area" means either of the following:

(1) an area with a population density of at least 1000 persons per square mile; or

(2) an area with a population density of less than 1000 persons per square mile that is identified as an urban area in the general plan adopted by the applicable city, county, or city and county and was not designated at the time the application was deemed complete as an area reserved for future urban growth.

(e) This section does not apply if the public agency which is carrying out or approving the development project determines that there is a reasonable possibility that the project would have a significant effect on the environment due to unusual circumstances or that the cumulative impact of successive projects of the same type in the same area over time would be significant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.10, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15280. Lower-Income Housing Projects.

(a) CEQA does not apply to any development project which consists of the construction, conversion, or use of residential housing consisting of not more than 100 units in an urbanized area, provided that it is either:

(1) Affordable to lower-income households, as defined in Section 50079.5 of the Health and Safety Code, and the developer provides sufficient legal commitments to the appropriate local agency to ensure that the housing units will continue to be available to lower income households for a period of at least 15 years; or

(2) Affordable to low and moderate-income households, as defined in paragraph (2) of subdivision (h) of Section 65589.5 of the Government Code, at monthly housing costs determined pursuant to paragraph (2) of subdivision (h) of Section 65589.5 of the Government Code.

(b) The development must also meet all the following criteria:

(1) It is consistent with the local jurisdiction's general plan as it existed on the date the project application was deemed complete.

(2) It is consistent with the local zoning as it existed on the date the project application was deemed complete, unless the zoning is inconsistent with the general plan because the city, county, or city and county has not rezoned the property to bring it into consistency with the general plan.

(3) Its site has been previously developed or is currently developed with urban uses, or the immediately contiguous properties surrounding the site are or have been previously developed with urban uses.

(4) Its site is not more than two acres in area.

(5) Its site is, or can be, adequately served by utilities.

(6) Its site has no value as wildlife habitat.

(7) It will not involve the demolition of, or any substantial adverse change in, any district, landmark, object, building, structure, site, area, or place that is listed, or determined to be eligible for listing in the California Register of Historical Resources.

(8) Its site is not included on any list of hazardous waste or other facilities and sites compiled pursuant to Section 65962.5 of the Government Code, and the site has been subject to an assessment by a California registered environmental assessor to determine both the presence of hazardous contaminants, if any, and the potential for exposure of site occupants to significant health hazards from nearby properties and activities.

(c) For purposes of this section, "urbanized area" means an area that has a population density of at least 1000 persons per square mile.

(d) If hazardous contaminants are found on the site, they must be removed or any significant effects mitigated to a level of insignificance in order to apply this exemption. If a potential for exposure to significant health hazards from nearby properties and activities is found to exist, the effects of the potential exposure must be mitigated to a level of insignificance in order to apply this exemption. Any removal or mitigation to insignificance must be completed prior to any residential occupancy of the project.

(e) This section does not apply if there is a reasonable possibility that the project would have a significant effect on the environment due to unusual circumstances or due to the related or cumulative impacts of reasonably foreseeable other projects in the vicinity.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15282. Other Statutory Exemptions

The following is a list of existing statutory exemptions. Each subsection summarizes statutory exemptions found in the California Code. Lead agencies are not to rely on the language contained in the summaries

below but must rely on the actual statutory language that creates the exemption. This list is intended to assist lead agencies in finding them, but not as a substitute for them. This section is merely a reference tool.

(a) The notification of discovery of Native American burial sites as set forth in Section 5097.98(c) of the Public Resources Code.

(b) Specified prison facilities as set forth in Sections 21080.01, 21080.02, 21080.03 and 21080.07 of the Public Resources Code.

(c) The lease or purchase of the rail right–of–way used for the San Francisco Peninsula commute service between San Francisco and San Jose as set forth in Section 21080.05 of the Public Resources Code.

(d) Any activity or approval necessary for or incidental to project funding or authorization for the expenditure of funds for the project, by the Rural Economic Development Infrastructure Panel as set forth in Section 21080.08 of the Public Resources Code.

(e) The construction of housing or neighborhood commercial facilities in an urbanized area pursuant to the provisions of Section 21080.7 of the Public Resources Code.

(f) The conversion of an existing rental mobilehome park to a resident initiated subdivision, cooperative, or condominium for mobilehomes as set forth in Section 21080.8 of the Public Resources Code.

(g) Settlements of title and boundary problems by the State Lands Commission and to exchanges or leases in connection with those settlements as set forth in Section 21080.11 of the Public Resources Code.

(h) Any railroad grade separation project which eliminates an existing grade crossing or which reconstructs an existing grade separation as set forth in Section 21080.13 of the Public Resources Code.

(i) The adoption of an ordinance regarding second units in a single–family or multifamily residential zone by a city or county to implement the provisions of Sections 65852.1 and 65852.2 of the Government Code as set forth in Section 21080.17 of the Public Resources Code.

(j) The closing of any public school or the transfer of students from that public school to another school in which kindergarten or any grades 1 through 12 is maintained as set forth in 21080.18 of the Public Resources Code.

(k) A project for restriping streets or highways to relieve traffic congestion as set forth in Section 21080.19 of the Public Resources Code.

(*l*) The installation of new pipeline or maintenance, repair, restoration, removal, or demolition of an existing pipeline as set forth in Section 21080.21 of the Public Resources Code, as long as the project does not exceed one mile in length.

(m) The activities and approvals by a local government necessary for the preparation of general plan amendments pursuant to Public Resources Code § 29763 as set forth in Section 21080.22 of the Public Resources Code. Section 29763 of the Public Resources Code refers to local government amendments made for consistency with the Delta Protection Commission's regional plan.

(n) Minor alterations to utilities made for the purposes of complying with Sections 4026.7 and 4026.8 of the Health and Safety Code as set forth in Section 21080.26 of the Public Resources Code.

(o) The adoption of an ordinance exempting a city or county from the provisions of the Solar Shade Control Act as set forth in Section 25985 of the Public Resources Code.

(p) The acquisition of land by the Department of Transportation if received or acquired within a statewide or regional priority corridor designated pursuant to Section 65081.3 of the Government Code as set forth in Section 33911 of the Public Resources Code.

(q) The adoption or amendment of a nondisposal facility element as set forth in Section 41735 of the Public Resources Code.

(r) Cooperative agreements for the development of Solid Waste Management Facilities on Indian country as set forth in Section 44203(g) of the Public Resources Code.

(s) Determinations made regarding a city or county's regional housing needs as set forth in Section 65584 of the Government Code.

(t) Any action necessary to bring a general plan or relevant mandatory element of the general plan into compliance pursuant to a court order as set forth in Section 65759 of the Government Code.

(u) Industrial Development Authority activities as set forth in Section 91543 of the Government Code.

(v) Temporary changes in the point of diversion, place of use, of purpose of use due to a transfer or exchange of water or water rights as set forth in Section 1729 of the Water Code.

(w) The preparation and adoption of Urban Water Management Plans pursuant to the provisions of Section 10652 of the Water Code.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 5097.98(c), 21080.01, 21080.02, 21080.03, 21080.05, 21080.07, 21080.08, 21080.7, 21080.8, 21080.11, 21080.13, 21080.17, 21080.18, 21080.19, 21080.21, 21080.22, 21080.26, 25985, 33911, 41735 and 44203(g), Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15283. Housing Needs Allocation.

CEQA does not apply to regional housing needs determinations made by the Department of Housing and Community Development, a council of governments, or a city or county pursuant to Section 65584 of the Government Code.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 65584, Government Code.

HISTORY

1. New section filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15284. Pipelines.

(a) CEQA does not apply to any project consisting of the inspection, maintenance, repair, restoration, reconditioning, relocation, replacement, or removal of an existing hazardous or volatile liquid pipeline or any valve, flange, meter, or other piece of equipment that is directly attached to the pipeline.

(b) To qualify for this exemption, the diameter of the affected pipeline must not be increased and the project must be located outside the boundaries of an oil refinery. The project must also meet all of the following criteria:

(1) The affected section of pipeline is less than eight miles in length and actual construction and excavation activities are not undertaken over a length of more than one–half mile at a time.

(2) The affected section of pipeline is not less than eight miles distance from any section of pipeline that had been subject to this exemption in the previous 12 months.

(3) The project is not solely for the purpose of excavating soil that is contaminated by hazardous materials.

(4) To the extent not otherwise required by law, the person undertaking the project has, in advance of undertaking the project, prepared a plan that will result in notification of the appropriate agencies so that they may take action, if necessary, to provide for the emergency evacuation of members of the public who may be located in close proximity to the project, and those agencies, including but not limited to the local fire department, police, sheriff, and California Highway Patrol as appropriate, have reviewed and agreed to that plan.

(5) Project activities take place within an existing right–of–way and that right–of–way will be restored to its pre–project condition upon completion of the project.

(6) The project applicant will comply with all conditions otherwise authorized by law, imposed by the city or county as part of any local agency permit process, and to comply with the Keene–Nejedly California Wetlands Preservation Act (Public Resources Code Section 5810, et seq.), the California Endangered Species Act (Fish and Game Code Section 2050, et seq.), other applicable state laws, and all applicable federal laws.

ıotice shall include a brief description of the proposed project and
ıocation, and the date, time, and place of any public meetings or hear-
ıgs on the proposed project. This notice may be combined with the pub-
lic notice required under other law, as applicable, but shall meet the preceding minimum requirements.

(3) In the case of private rights–of–way over private property, receive from the underlying property owner permission for access to the property.

(4) Immediately inform the lead agency if any soil contaminated with hazardous materials is discovered.

(5) Comply with all conditions otherwise authorized by law, imposed by the city or county as part of any local agency permit process, and to comply with the Keene–Nejedly California Wetlands Preservation Act (Public Resources Code Section 5810, et seq.), the California Endangered Species Act (Fish and Game Code Section 2050, et seq.), other applicable state laws, and all applicable federal laws.

(d) For purposes of this section, "pipeline" is used as defined in subdivision (a) of Government Code Section 51010.5. This definition includes every intrastate pipeline used for the transportation of hazardous liquid substances or highly volatile liquid substances, including a common carrier pipeline, and all piping containing those substances located within a refined products bulk loading facility which is owned by a common carrier and is served by a pipeline of that common carrier, and the common carrier owns and serves by pipeline at least five such facilities in California.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.23, Public Resources Code.

HISTORY

1. New section filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15285. Transit Agency Responses to Revenue Shortfalls.

(a) CEQA does not apply to actions taken on or after July 1,1995 to implement budget reductions made by a publicly owned transit agency as a result of a fiscal emergency caused by the failure of agency revenues to adequately fund agency programs and facilities. Actions shall be limited to those directly undertaken by or financially supported in whole or in part by the transit agency pursuant to Section 15378(a)(1) or (2), including actions which reduce or eliminate the availability of an existing publicly owned transit service, facility, program, or activity.

(b) When invoking this exemption, the transit agency shall make a specific finding that there is a fiscal emergency. Before taking its proposed budgetary actions and making the finding of fiscal emergency, the transit agency shall hold a public hearing. After this public hearing, the transit agency shall respond within 30 days at a regular public meeting to suggestions made by the public at that initial hearing. The transit agency may make the finding of fiscal emergency only after it has responded to public suggestions.

(c) For purposes of this subdivision, "fiscal emergency" means that the transit agency is projected to have negative working capital within one year from the date that the agency finds that a fiscal emergency exists. "Working capital" is defined as the sum of all unrestricted cash, unrestricted short–term investments, and unrestricted short–term accounts receivable, minus unrestricted accounts payable. Employee retirements funds, including deferred compensation plans and Section 401(k) plans, health insurance reserves, bond payment reserves, worker's compensation reserves, and insurance reserves shall not be included as working capital.

(d) This exemption does not apply to the action of any publicly owned transit agency to reduce or eliminate a transit service, facility, program, or activity that was approved or adopted as a mitigation measure in any environmental document certified or adopted by any public agency under either CEQA or NEPA. Further, it does not apply to actions of the Los Angeles County Metropolitan Transportation Authority.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080 and 21080.32, Public Resources Code.

HISTORY

1. New section filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

Article 19. Categorical Exemptions

§ 15300. Categorical Exemptions.

Section 21084 of the Public Resources Code requires these guidelines to include a list of classes of projects which have been determined not to have a significant effect on the environment and which shall, therefore, be exempt from the provisions of CEQA.

In response to that mandate, the Secretary for Resources has found that the following classes of projects listed in this article do not have a significant effect on the environment, and they are declared to be categorically exempt from the requirement for the preparation of environmental documents.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

HISTORY

1. Renumbering and amendment of former Article 8 (Sections 15100–15129) to Article 19 (Sections 15300–15329) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15300.1. Relation to Ministerial Projects.

Section 21080 of the Public Resources Code exempts from the application of CEQA those projects over which public agencies exercise only ministerial authority. Since ministerial projects are already exempt, Categorical Exemptions should be applied only where a project is not ministerial under a public agency's statutes and ordinances. The inclusion of activities which may be ministerial within the classes and examples contained in this article shall not be construed as a finding by the Secretary for resources that such an activity is discretionary.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15300.2. Exceptions.

(a) Location. Classes 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located—a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. Therefore, these classes are considered to apply in all instances, except where the project may impact on an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state, or local agencies.

(b) Cumulative Impact. All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.

(c) Significant Effect. A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will

have a significant effect on the environment due to unusual circumstances.

(d) Scenic Highways. A categorical exemption shall not be used for a project which may result in damage to scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated as a state scenic highway. This does not apply to improvements which are required as mitigation by an adopted negative declaration or certified EIR.

(e) Hazardous Waste Sites. A categorical exemption shall not be used for a project located on a site which is included on any list compiled pursuant to Section 65962.5 of the Government Code.

(f) Historical Resources. A categorical exemption shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21084 and 21084.1, Public Resources Code; *Wildlife Alive v. Chickering* (1977) 18 Cal.3d190; *League for Protection of Oakland's Architectural and Historic Resources v. City of Oakland* (1997) 52 Cal.App.4th 896; *Citizens for Responsible Development in West Hollywood v. City of West Hollywood* (1995) 39 Cal.App.4th 925; *City of Pasadena v. State of California* (1993) 14 Cal.App.4th 810; *Association for the Protection etc. Values v. City of Ukiah* (1991) 2 Cal.App.4th 720; and *Baird v. County of Contra Costa* (1995) 32 Cal.App.4th 1464.

HISTORY

1. Amendment of subsection (b), new subsections (d)–(f) and amendment of NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15300.3. Revisions to List of Categorical Exemptions.

Any public agency may, at any time, request that a new class of Categorical Exemptions be added, or an existing one amended or deleted. This request must be made in writing to the Office of Planning and Research and shall contain detailed information to support the request. The granting of such request shall be by amendment to these guidelines.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15300.4. Application by Public Agencies.

Each public agency shall, in the course of establishing its own procedures, list those specific activities which fall within each of the exempt classes, subject to the qualification that these lists must be consistent with both the letter and the intent expressed in the classes. Public agencies may omit from their implementing procedures classes and examples that do not apply to their activities, but they may not require EIRs for projects described in the classes and examples in this article except under the provisions of Section 15300.2.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15301. Existing Facilities.

Class 1 consists of the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that existing at the time of the lead agency's determination. The types of "existing facilities" itemized below are not intended to be all–inclusive of the types of projects which might fall within Class 1. The key consideration is whether the project involves negligible or no expansion of an existing use.

Examples include but are not limited to:

(a) Interior or exterior alterations involving such things as interior partitions, plumbing, and electrical conveyances;

(b) Existing facilities of both investor and publicly–owned utilities used to provide electric power, natural gas, sewerage, or other public utility services;

(c) Existing highways and streets, sidewalks, gutters, bicycle and pedestrian trails, and similar facilities (this includes road grading for the purpose of public safety).

(d) Restoration or rehabilitation of deteriorated or damaged structures, facilities, or mechanical equipment to meet current standards of public health and safety, unless it is determined that the damage was substantial and resulted from an environmental hazard such as earthquake, landslide, or flood;

(e) Additions to existing structures provided that the addition will not result in an increase of more than:

(1) 50 percent of the floor area of the structures before the addition, or 2,500 square feet, whichever is less; or

(2) 10,000 square feet if:

(A) The project is in an area where all public services and facilities are available to allow for maximum development permissible in the General Plan and

(B) The area in which the project is located is not environmentally sensitive.

(f) Addition of safety or health protection devices for use during construction of or in conjunction with existing structures, facilities, or mechanical equipment, or topographical features including navigational devices;

(g) New copy on existing on and off–premise signs;

(h) Maintenance of existing landscaping, native growth, and water supply reservoirs (excluding the use of pesticides, as defined in Section 12753, Division 7, Chapter 2, Food and Agricultural Code);

(i) Maintenance of fish screens, fish ladders, wildlife habitat areas, artificial wildlife waterway devices, streamflows, springs and waterholes, and stream channels (clearing of debris) to protect fish and wildlife resources;

(j) Fish stocking by the California Department of Fish and Game;

(k) Division of existing multiple family or single–family residences into common–interest ownership and subdivision of existing commercial or industrial buildings, where no physical changes occur which are not otherwise exempt;

(*l*) Demolition and removal of individual small structures listed in this subsection;

(2) A duplex or similar multifamily residential structure. In urbanized areas, this exemption applies to duplexes and similar structures where not more than six dwelling units will be demolished.

(3) A store, motel, office, restaurant, and similar small commercial structure if designed for an occupant load of 30 persons or less. In urbanized areas, the exemption also applies to the demolition of up to three such commercial buildings on sites zoned for such use.

(4) Accessory (appurtenant) structures including garages, carports, patios, swimming pools, and fences.

(m) Minor repairs and alterations to existing dams and appurtenant structures under the supervision of the Department of Water Resources.

(n) Conversion of a single family residence to office use.

(o) Installation, in an existing facility occupied by a medical waste generator, of a steam sterilization unit for the treatment of medical waste generated by that facility provided that the unit is installed and operated in accordance with the Medical Waste Management Act (Section 117600, et seq., of the Health and Safety Code) and accepts no offsite waste.

(p) Use of a single–family residence as a small family day care home, as defined in Section 1596.78 of the Health and Safety Code.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21084 and 21084.2, Public Resources Code; *Bloom v. McGurk* (1994) 26 Cal.App.4th 1307.

HISTORY

1. Amendment of subsections (c), (k), (*l*)(1)–(3) and (o), and amendment of NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).
2. Amendment of section and NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).
3. Change without regulatory effect amending subsection (h) filed 2–1–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 5).

§ 15302. Replacement or Reconstruction.

Class 2 consists of replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced, including but not limited to:

(a) Replacement or reconstruction of existing schools and hospitals to provide earthquake resistant structures which do not increase capacity more than 50 percent;

(b) Replacement of a commercial structure with a new structure of substantially the same size, purpose, and capacity.

(c) Replacement or reconstruction of existing utility systems and/or facilities involving negligible or no expansion of capacity.

(d) Conversion of overhead electric utility distribution system facilities to underground including connection to existing overhead electric utility distribution lines where the surface is restored to the condition existing prior to the undergrounding.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15303. New Construction or Conversion of Small Structures.

Class 3 consists of construction and location of limited numbers of new, small facilities or structures; installation of small new equipment and facilities in small structures; and the conversion of existing small structures from one use to another where only minor modifications are made in the exterior of the structure. The numbers of structures described in this section are the maximum allowable on any legal parcel. Examples of this exemption include but are not limited to:

(a) One single–family residence, or a second dwelling unit in a residential zone. In urbanized areas, up to three single–family residences may be constructed or converted under this exemption.

(b) A duplex or similar multi–family residential structure totaling no more than four dwelling units. In urbanized areas, this exemption applies to apartments, duplexes, and similar structures designed for not more than six dwelling units.

(c) A store, motel, office, restaurant or similar structure not involving the use of significant amounts of hazardous substances, and not exceeding 2500 square feet in floor area. In urbanized areas, the exemption also applies to up to four such commercial buildings not exceeding 10,000 square feet in floor area on sites zoned for such use if not involving the use of significant amounts of hazardous substances where all necessary public services and facilities are available and the surrounding area is not environmentally sensitive.

(d) Water main, sewage, electrical, gas, and other utility extensions, including street improvements, of reasonable length to serve such construction.

(e) Accessory (appurtenant) structures including garages, carports, patios, swimming pools, and fences.

(f) An accessory steam sterilization unit for the treatment of medical waste at a facility occupied by a medical waste generator, provided that the unit is installed and operated in accordance with the Medical Waste Management Act (Section 117600, et seq., of the Health and Safety Code) and accepts no offsite waste.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21084 and 21084.2, Public Resources Code.

HISTORY

1. New subsection (f) and amendment of NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).
2. Amendment filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15304. Minor Alterations to Land.

Class 4 consists of minor public or private alterations in the condition of land, water, and/or vegetation which do not involve removal of healthy, mature, scenic trees except for forestry and agricultural purposes. Examples include but are not limited to:

(a) Grading on land with a slope of less than 10 percent, except that grading shall not be exempt in a waterway, in any wetland, in an officially designated (by federal, state, or local government action) scenic area, or in officially mapped areas of severe geologic hazard such as an Alquist–Priolo Earthquake Fault Zone or within an official Seismic Hazard Zone, as delineated by the State Geologist.

(b) New gardening or landscaping, including the replacement of existing conventional landscaping with water efficient or fire resistant landscaping.

(c) Filling of earth into previously excavated land with material compatible with the natural features of the site.

(d) Minor alterations in land, water, and vegetation on existing officially designated wildlife management areas or fish production facilities which result in improvement of habitat for fish and wildlife resources or greater fish production.

(e) Minor temporary use of land having negligible or no permanent effects on the environment, including carnivals, sales of Christmas trees, etc.

(f) Minor trenching and backfilling where the surface is restored.

(g) Maintenance dredging where the spoil is deposited in a spoil area authorized by all applicable state and federal regulatory agencies.

(h) The creation of bicycle lanes on existing rights–of–way.

(i) Fuel management activities within 30 feet of structures to reduce the volume of flammable vegetation, provided that the activities will not result in the taking of endangered, rare, or threatened plant or animal species or significant erosion and sedimentation of surface waters. This exemption shall apply to fuel management activities within 100 feet of a structure if the public agency having fire protection responsibility for the area has determined that 100 feet of fuel clearance is required due to extra hazardous fire conditions.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

HISTORY

1. Amendment of subsections (a) and (b) and new subsection (i) filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15305. Minor Alterations in Land Use Limitations.

Class 5 consists of minor alterations in land use limitations in areas with an average slope of less than 20%, which do not result in any changes in land use or density, including but not limited to:

(a) Minor lot line adjustments, side yard, and set back variances not resulting in the creation of any new parcel;

(b) Issuance of minor encroachment permits;

(c) Reversion to acreage in accordance with the Subdivision Map Act.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15306. Information Collection.

Class 6 consists of basic data collection, research, experimental management, and resource evaluation activities which do not result in a serious or major disturbance to an environmental resource. These may be strictly for information gathering purposes, or as part of a study leading to an action which a public agency has not yet approved, adopted, or funded.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15307. Actions by Regulatory Agencies for Protection of Natural Resources.

Class 7 consists of actions taken by regulatory agencies as authorized by state law or local ordinance to assure the maintenance, restoration, or enhancement of a natural resource where the regulatory process involves procedures for protection of the environment. Examples include but are not limited to wildlife preservation activities of the State Department of Fish and Game. Construction activities are not included in this exemption.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15308. Actions by Regulatory Agencies for Protection of the Environment.

Class 8 consists of actions taken by regulatory agencies, as authorized by state or local ordinance, to assure the maintenance, restoration, enhancement, or protection of the environment where the regulatory process involves procedures for protection of the environment. Construction

activities and relaxation of standards allowing environmental degradation are not included in this exemption.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code; *International Longshoremen's and Warehousemen's Union* v. *Board of Supervisors*, (1981) 116 Cal. App. 3d 265.

§5309. Inspections.

Class 9 consists of activities limited entirely to inspections, to check for performance of an operation, or quality, health, or safety of a project, including related activities such as inspection for possible mislabeling, misrepresentation, or adulteration of products.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15310. Loans.

Class 10 consists of loans made by the Department of Veterans Affairs under the Veterans Farm and Home Purchase Act of 1943, mortgages for the purchase of existing structures where the loan will not be used for new construction and the purchase of such mortgages by financial institutions. Class 10 includes but is not limited to the following examples:

(a) Loans made by the Department of Veterans Affairs under the Veterans Farm and Home Purchase Act of 1943.

(b) Purchases of mortgages from banks and mortgage companies by the Public Employees Retirement System and by the State Teachers Retirement System.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15311. Accessory Structures.

Class 11 consists of construction, or placement of minor structures accessory to (appurtenant to) existing commercial, industrial, or institutional facilities, including but not limited to:

(a) On–premise signs;

(b) Small parking lots;

(c) Placement of seasonal or temporary use items such as lifeguard towers, mobile food units, portable restrooms, or similar items in generally the same locations from time to time in publicly owned parks, stadiums, or other facilities designed for public use.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15312. Surplus Government Property Sales.

Class 12 consists of sales of surplus government property except for parcels of land located in an area of statewide, regional, or areawide concern identified in Section 15206(b)(4). However, even if the surplus property to be sold is located in any of those areas, its sale is exempt if:

(a) The property does not have significant values for wildlife habitat or other environmental purposes, and

(b) Any of the following conditions exist:

(1) The property is of such size, shape, or inaccessibility that it is incapable of independent development or use; or

(2) The property to be sold would qualify for an exemption under any other class of categorical exemption in these guidelines; or

(3) The use of the property and adjacent property has not changed since the time of purchase by the public agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

HISTORY

1. Amendment filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15313. Acquisition of Lands for Wildlife Conservation Purposes.

Class 13 consists of the acquisition of lands for fish and wildlife conservation purposes including preservation of fish and wildlife habitat, establishing ecological reserves under Fish and Game Code Section 1580, and preserving access to public lands and waters where the purpose of the acquisition is to preserve the land in its natural condition.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15314. Minor Additions to Schools.

Class 14 consists of minor additions to existing schools within existing school grounds where the addition does not increase original student capacity by more than 25% or ten classrooms, whichever is less. The addition of portable classrooms is included in this exemption.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15315. Minor Land Divisions.

Class 15 consists of the division of property in urbanized areas zoned for residential, commercial, or industrial use into four or fewer parcels when the division is in conformance with the General Plan and zoning, no variances or exceptions are required, all services and access to the proposed parcels to local standards are available, the parcel was not involved in a division of a larger parcel within the previous 2 years, and the parcel does not have an average slope greater than 20 percent.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15316. Transfer of Ownership of Land in Order to Create Parks.

Class 16 consists of the acquisition, sale, or other transfer of land in order to establish a park where the land is in a natural condition or contains historical or archaeological resources and either:

(a) The management plan for the park has not been prepared, or

(b) The management plan proposes to keep the area in a natural condition or preserve the historic or archaeological resources. CEQA will apply when a management plan is proposed that will change the area from its natural condition or cause substantial adverse change in the significance of the historic or archaeological resource.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21084, 21083.2, and 21084.1, Public Resources Code.

HISTORY

1. Amendment of section and NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15317. Open Space Contracts or Easements.

Class 17 consists of the establishment of agricultural preserves, the making and renewing of open space contracts under the Williamson Act, or the acceptance of easements or fee interests in order to maintain the open space character of the area. The cancellation of such preserves, contracts, interests, or easements is not included and will normally be an action subject to the CEQA process.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15318. Designation of Wilderness Areas.

Class 18 consists of the designation wilderness areas under the California Wilderness System.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15319. Annexations of Existing Facilities and Lots for Exempt Facilities.

Class 19 consists of only the following annexations:

(a) Annexations to a city or special district of areas containing existing public or private structures developed to the density allowed by the current zoning or pre–zoning of either the gaining or losing governmental agency whichever is more restrictive, provided, however, that the extension of utility services to the existing facilities would have a capacity to serve only the existing facilities.

(b) Annexations of individual small parcels of the minimum size for facilities exempted by Section 15303, New Construction or Conversion of Small Structures.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15320. Changes in Organization of Local Agencies.

Class 20 consists of changes in the organization or reorganization of local governmental agencies where the changes do not change the geographical area in which previously existing powers are exercised. Examples include but are not limited to:

(a) Establishment of a subsidiary district.

(b) Consolidation of two or more districts having identical powers.

(c) Merger with a city of a district lying entirely within the boundaries of the city.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15321. Enforcement Actions by Regulatory Agencies.

Class 21 consists of::

(a) Actions by regulatory agencies to enforce or revoke a lease, permit, license, certificate, or other entitlement for use issued, adopted, or prescribed by the regulatory agency or enforcement of a law, general rule, standard, or objective, administered or adopted by the regulatory agency. Such actions include, but are not limited to, the following:

(1) The direct referral of a violation of lease, permit, license, certificate, or entitlement for use or of a general rule, standard, or objective to the Attorney General, District Attorney, or City Attorney as appropriate, for judicial enforcement.

(2) The adoption of an administrative decision or order enforcing or revoking the lease, permit, license, certificate, or entitlement for use or enforcing the general rule, standard, or objective.

(b) Law enforcement activities by peace officers acting under any law that provides a criminal sanction.

(c) Construction activities undertaken by the public agency taking the enforcement or revocation action are not included in this exemption.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15322. Educational or Training Programs Involving No Physical Changes.

Class 22 consists of the adoption, alteration, or termination of educational or training programs which involve no physical alteration in the area affected or which involve physical changes only in the interior of existing school or training structures. Examples include but are not limited to:

(a) Development of or changes in curriculum or training methods.

(b) Changes in the grade structure in a school which do not result in changes in student transportation.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15323. Normal Operations of Facilities for Public Gatherings.

Class 23 consists of the normal operations of existing facilities for public gatherings for which the facilities were designed, where there is a past history of the facility being used for the same or similar kind of purpose. For the purposes of this section, "past history" shall mean that the same or similar kind of activity has been occurring for at least three years and that there is a reasonable expectation that the future occurrence of the activity would not represent a change in the operation of the facility. Facilities included within this exemption include, but are not limited to, racetracks, stadiums, convention centers, auditoriums, amphitheaters, planetariums, swimming pools, and amusement parks.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15324. Regulations of Working Conditions.

Class 24 consists of actions taken by regulatory agencies, including the Industrial Welfare Commission as authorized by statute, to regulate any of the following:

(a) Employee wages,

(b) Hours of work, or

(c) Working conditions where there will be no demonstrable physical changes outside the place of work.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15325. Transfers of Ownership in Land to Preserve Existing Natural Conditions and Historical Resources.

Class 25 consists of the transfers of ownership of interests in land in order to preserve open space, habitat, or historical resources. Examples include but are not limited to:

(a) Acquisition, sale, or other transfer of areas to preserve the existing natural conditions, including plant or animal habitats.

(b) Acquisition, sale, or other transfer of areas to allow continued agricultural use of the areas.

(c) Acquisition, sale, or other transfer to allow restoration of natural conditions, including plant or animal habitats.

(d) Acquisition, sale, or other transfer to prevent encroachment of development into flood plains.

(e) Acquisition, sale, or other transfer to preserve historical resources.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

HISTORY

1. Amendment of section heading and section filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15326. Acquisition of Housing for Housing Assistance Programs.

Class 26 consists of actions by a redevelopment agency, housing authority, or other public agency to implement an adopted Housing Assistance Plan by acquiring an interest in housing units. The housing units may be either in existence or possessing all required permits for construction when the agency makes its final decision to acquire the units.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15327. Leasing New Facilities.

(a) Class 27 consists of the leasing of a newly constructed or previously unoccupied privately owned facility by a local or state agency where the local governing authority determined that the building was exempt from CEQA. To be exempt under this section, the proposed use of the facility:

(1) Shall be in conformance with existing state plans and policies and with general, community, and specific plans for which an EIR or negative declaration has been prepared,

(2) Shall be substantially the same as that originally proposed at the time the building permit was issued,

(3) Shall not result in a traffic increase of greater than 10% of front access road capacity, and

(4) Shall include the provision of adequate employee and visitor parking facilities.

(b) Examples of Class 27 include, but are not limited to:

(1) Leasing of administrative offices in newly constructed office space.

(2) Leasing of client service offices in newly constructed retail space.

(3) Leasing of administrative and/or client service offices in newly constructed industrial parks.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15328. Small Hydroelectric Projects at Existing Facilities.

Class 28 consists of the installation of hydroelectric generating facilities in connection with existing dams, canals, and pipelines where:

(a) The capacity of the generating facilities is 5 megawatts or less,

(b) Operation of the generating facilities will not change the flow regime in the affected stream, canal, or pipeline including but not limited to:

(1) Rate and volume of flow,

(2) Temperature,

(3) Amounts of dissolved oxygen to a degree that could adversely affect aquatic life, and

(4) Timing of release.

(c) New power lines to connect the generating facilities to existing power lines will not exceed one mile in length if located on a new right of way and will not be located adjacent to a wild or scenic river.

(d) Repair or reconstruction of the diversion structure will not raise the normal maximum surface elevation of the impoundment.

(e) There will be no significant upstream or downstream passage of fish affected by the project.

(f) The discharge from the power house will not be located more than 300 feet from the toe of the diversion structure.

(g) The project will not cause violations of applicable state or federal water quality standards.

(h) The project will not entail any construction on or alteration of a site included in or eligible for inclusion in the National Register of Historic Places, and

(i) Construction will not occur in the vicinity of any endangered, rare, or threatened species.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

HISTORY

1. Amendment of subsection (i) and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15329. Cogeneration Projects at Existing Facilities.

Class 29 consists of the installation of cogeneration equipment with a capacity of 50 megawatts or less at existing facilities meeting the conditions described in this section.

(a) At existing industrial facilities, the installation of cogeneration facilities will be exempt where it will:

(1) Result in no net increases in air emissions from the industrial facility, or will produce emissions lower than the amount that would require review under the new source review rules applicable in the county, and

(2) Comply with all applicable state, federal, and local air quality laws.

(b) At commercial and industrial facilities, the installation of cogeneration facilities will be exempt if the installation will:

(1) Meet all the criteria described in Subsection (a),

(2) Result in no noticeable increase in noise to nearby residential structures,

(3) Be contiguous to other commercial or institutional structures.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

§ 15330. Minor Actions to Prevent, Minimize, Stabilize, Mitigate or Eliminate the Release or Threat of Release of Hazardous Waste or Hazardous Substances.

Class 30 consists of any minor cleanup actions taken to prevent, minimize, stabilize, mitigate, or eliminate the release or threat of release of a hazardous waste or substance which are small or medium removal actions costing $1 million or less. No cleanup action shall be subject to this Class 30 exemption if the action requires the onsite use of a hazardous waste incinerator or thermal treatment unit, with the exception of low temperature thermal desorption, or the relocation of residences or businesses, or the action involves the potential release into the air of volatile organic compounds as defined in Health and Safety Code section 25123.6, except for small scale in situ soil vapor extraction and treatment systems which have been permitted by the local Air Pollution Control District or Air Quality Management District. All actions must be consistent with applicable state and local environmental permitting requirements including, but not limited to, air quality rules such as those governing volatile organic compounds and water quality standards, and approved by the regulatory body with jurisdiction over the site. Examples of such minor cleanup actions include but are not limited to:

(a) Removal of sealed, non–leaking drums or barrels of hazardous waste or substances that have been stabilized, containerized and are designated for a lawfully permitted destination;

(b) Maintenance or stabilization of berms, dikes, or surface impoundments;

(c) Construction or maintenance of interim or temporary surface caps;

(d) Onsite treatment of contaminated soils or sludges provided treatment system meets Title 22 requirements and local air district requirements;

(e) Excavation and/or offsite disposal of contaminated soils or sludges in regulated units;

(f) Application of dust suppressants or dust binders to surface soils;

(g) Controls for surface water run–on and run–off that meets seismic safety standards;

(h) Pumping of leaking ponds into an enclosed container;

(i) Construction of interim or emergency ground water treatment systems;

(j) Posting of warning signs and fencing for a hazardous waste or substance site that meets legal requirements for protection of wildlife.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

HISTORY

1. New section filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).
2. Change without regulatory effect amending first paragraph filed 2–1–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 5).

§ 15331. Historical Resource Restoration/Rehabilitation.

Class 31 consists of projects limited to maintenance, repair, stabilization, rehabilitation, restoration, preservation, conservation or reconstruction of historical resources in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings (1995), Weeks and Grimmer.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21084, Public Resources Code.

HISTORY

1. New section filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15332. In-Fill Development Projects.

Class 32 consists of projects characterized as in–fill development meeting the conditions described in this section.

(a) The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.

(b) The proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses.

(c) The project site has no value, as habitat for endangered, rare or threatened species.

(d) Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.

(e) The site can be adequately served by all required utilities and public services.

NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Section 21084, Public Resources Code.

HISTORY

1. New section filed 12–23–98; operative 12–23–98 pursuant to Public Resources Code section 21087 (Register 98, No. 52).

Article 20. Definitions

§ 15350. General.

The definitions contained in this article apply to terms used throughout the guidelines unless a term is otherwise defined in a particular section.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083, Public Resources Code.

HISTORY

1. New Article 20 (Sections 15350–15387) filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).

§ 15351. Applicant.

"Applicant" means a person who proposes to carry out a project which needs a lease, permit, license, certificate, or other entitlement for use or

financial assistance from one or more public agencies when that person applies for the governmental approval or assistance.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21065, Public Resources Code.

§ 15352. Approval.

(a) "Approval" means the decision by a public agency which commits the agency to a definite course of action in regard to a project intended to be carried out by any person. The exact date of approval of any project is a matter determined by each public agency according to its rules, regulations, and ordinances. Legislative action in regard to a project often constitutes approval.

(b) With private projects, approval occurs upon the earliest commitment to issue or the issuance by the public agency of a discretionary contract, grant, subsidy, loan, or other form of financial assistance, lease, permit, license, certificate, or other entitlement for use of the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061 and 21065, Public Resources Code.

§ 15353. CEQA.

"CEQA" means the California Environmental Quality Act, California Public Resources Code Sections 21000 et seq.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21050, Public Resources Code.

§ 15354. Categorical Exemption.

"Categorical exemption" means an exemption from CEQA for a class of projects based on a finding by the Secretary for Resources that the class of projects does not have a significant effect on the environment.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080(b)(10) and 21084, Public Resources Code.

§ 15355. Cumulative Impacts.

"Cumulative impacts" refer to two or more individual effects which, when considered together, are considerable or which compound or increase other environmental impacts.

(a) The individual effects may be changes resulting from a single project or a number of separate projects.

(b) The cumulative impact from several projects is the change in the environment which results from the incremental impact of the project when added to other closely related past, present, and reasonably foreseeable probable future projects. Cumulative impacts can result from individually minor but collectively significant projects taking place over a period of time.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21083(b), Public Resources Code; *Whitman* v. *Board of Supervisors*, 88 Cal. App. 3d 397.

§ 15356. Decision–Making Body.

"Decision–making body" means any person or group of people within a public agency permitted by law to approve or disapprove the project at issue.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21003(b), Public Resources Code; *Kleist* v. *City of Glendale* (1976) 56 Cal. App. 3d 770.

§ 15357. Discretionary Project

"Discretionary project" means a project which requires the exercise of judgment or deliberation when the public agency or body decides to approve or disapprove a particular activity, as distinguished from situations where the public agency or body merely has to determine whether there has been conformity with applicable statutes, ordinances, or regulations. A timber harvesting plan submitted to the State Forester for approval under the requirements of the Z'berg–Nejedly Forest Practice Act of 1973 (Pub. Res. Code Sections 4511 et seq.) constitutes a discretionary project within the meaning of the California Environmental Quality Act. Section 21065(c).

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(a), Public Resources Code; *Johnson* v. *State of California* (1968) 69 Cal. 2d 782; *People* v. *Department of Housing and Community Development* (1975) 45 Cal. App. 3d 185; *Day* v. *City of Glendale* (1975) 51 Cal. App. 3d 817; *N.R.D.C.* v. *Arcata National Corp.* (1976) 59 Cal. App. 3d 959.

§ 15358. Effects.

"Effects" and "impacts" as used in these guidelines are synonymous.

(a) Effects include:

(1) Direct or primary effects which are caused by the project and occur at the same time and place.

(2) Indirect or secondary effects which are caused by the project and are later in time or farther removed in distance, but are still reasonably foreseeable. Indirect or secondary effects may include growth–inducing effects and other effects related to induced changes in the pattern of land use, population density, or growth rate, and related effects on air and water and other natural systems, including ecosystems.

(b) Effects analyzed under CEQA must be related to a physical change.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21068 and 21100, Public Resources Code.

§ 15359. Emergency.

"Emergency" means a sudden, unexpected occurrence, involving a clear and imminent danger, demanding immediate action to prevent or mitigate loss of, or damage to life, health, property, or essential public services. Emergency includes such occurrences as fire, flood, earthquake, or other soil or geologic movements, as well as such occurrences as riot, accident, or sabotage.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(2), (3) and (4), Public Resources Code.

§ 15360. Environment.

"Environment" means the physical conditions which exist within the area which will be affected by a proposed project including land, air, water, minerals, flora, fauna, ambient noise, and objects of historic or aesthetic significance. The area involved shall be the area in which significant effects would occur either directly or indirectly as a result of the project. The "environment" includes both natural and man–made conditions.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21060.5, Public Resources Code.

§ 15361. Environmental Documents.

"Environmental documents" means initial studies, negative declarations, draft and final EIRs, documents prepared as substitutes for EIRs and negative declarations under a program certified pursuant to Public Resources Code Section 21080.5, and documents prepared under NEPA and used by a state or local agency in the place of an initial study, negative declaration, or an EIR.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061, 21080(b), 21080.5, 21108 and 21152, Public Resources Code.

§ 15362. EIR—Environmental Impact Report.

"EIR" or "environmental impact report" means a detailed statement prepared under CEQA describing and analyzing the significant environmental effects of a project and discussing ways to mitigate or avoid the effects. The contents of an EIR are discussed in Article 9, commencing with Section 15120 of these guidelines. The term "EIR" may mean either a draft or a final EIR depending on the context.

(a) Draft EIR means an EIR containing the information specified in Sections 15122 through 15131.

(b) Final EIR means an EIR containing the information contained in the draft EIR, comments either verbatim or in summary received in the review process, a list of persons commenting, and the response of the lead agency to the comments received. The final EIR is discussed in detail in Section 15132.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21061, 21100 and 21151, Public Resources Code.

§ 15363. EIS—Environmental Impact Statement.

"EIS" or "Environmental Impact Statement" means an environmental impact document prepared pursuant to the National Environmental Policy Act (NEPA). NEPA uses the term EIS in the place of the term EIR which is used in CEQA.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21083.5, 21083.6 and 21083.7, Public Resources Code; 43 U.S.C.A. 4322(2)(c).

§ 15364. Feasible.

"Feasible" means capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, legal, social, and technological factors.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1, 21004, 21061.1, 21080.5 and 21081, Public Resources Code; Section 4, Chapter 1438 of the Statutes of 1982.

§ 15365. Initial Study.

"Initial study" means a preliminary analysis prepared by the lead agency to determine whether an EIR or a negative declaration must be prepared or to identify the significant environmental effects to be analyzed in an EIR. Use of the initial study is discussed in Article 5, commencing with Section 15060.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.1, 21080.2, 21080.3 and 21100, Public Resources Code.

§ 15366. Jurisdiction by Law.

(a) "Jurisdiction by law" means the authority of any public agency:

(1) To grant a permit or other entitlement for use,

(2) To provide funding for the project in question, or

(3) To exercise authority over resources which may be affected by the project.

(b) A city or county will have jurisdiction by law with respect to a project when the city or county having primary jurisdiction over the area involved is:

(1) The site of the project;

(2) The area in which the major environmental effects will occur; and/or

(3) The area in which reside those citizens most directly concerned by any such environmental effects.

(c) Where an agency having jurisdiction by law must exercise discretionary authority over a project in order for the project to proceed, it is also a responsible agency, see Section 15381, or the lead agency, see Section 15367.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.3, 21080.4, 21104 and 21153, Public Resources Code.

§ 15367. Lead Agency.

"Lead agency" means the public agency which has the principal responsibility for carrying out or approving a project. The lead agency will decide whether an EIR or negative declaration will be required for the project and will cause the document to be prepared. Criteria for determining which agency will be the lead agency for a project are contained in Section 15051.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21165, Public Resources Code.

§ 15368. Local Agency.

"Local agency" means any public agency other than a state agency, board, or commission. Local agency includes but is not limited to cities, counties, charter cities and counties, districts, school districts, special districts, redevelopment agencies, local agency formation commissions, and any board, commission, or organizational subdivision of a local agency when so designated by order or resolution of the governing legislative body of the local agency.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21062 and 21151, Public Resources Code.

§ 15369. Ministerial.

"Ministerial" describes a governmental decision involving little or no personal judgment by the public official as to the wisdom or manner of carrying out the project. The public official merely applies the law to the facts as presented but uses no special discretion or judgment in reaching a decision. A ministerial decision involves only the use of fixed standards or objective measurements, and the public official cannot use personal, subjective judgment in deciding whether or how the project should be carried out. Common examples of ministerial permits include automobile registrations, dog licenses, and marriage licenses. A building permit is ministerial if the ordinance requiring the permit limits the public official to determining whether the zoning allows the structure to be built in the requested location, the structure would meet the strength requirements in the Uniform Building Code, and the applicant has paid his fee.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(b)(1), Public Resources Code; *Johnson v. State of California*, 69 Cal. 2d 782; *Day* v. *City of Glendale*, 51 Cal. App. 3d 817.

§ 15369.5. Mitigated Negative Declaration.

"Mitigated negative declaration" means a negative declaration prepared for a project when the initial study has identified potentially significant effects on the environment, but (1) revisions in the project plans or proposals made by, or agreed to by, the applicant before the proposed negative declaration and initial study are released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effect on the environment would occur, and (2) there is no substantial evidence in light of the whole record before the public agency that the project, as revised, may have a significant effect on the environment.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21064.5, Public Resources Code.

HISTORY

1. New section filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15370. Mitigation.

"Mitigation" includes:

(a) Avoiding the impact altogether by not taking a certain action or parts of an action.

(b) Minimizing impacts by limiting the degree or magnitude of the action and its implementation.

(c) Rectifying the impact by repairing, rehabilitating, or restoring the impacted environment.

(d) Reducing or eliminating the impact over time by preservation and maintenance operations during the life of the action.

(e) Compensating for the impact by replacing or providing substitute resources or environments.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002, 21002.1, 21081 and 21100(c), Public Resources Code.

§ 15371. Negative Declaration.

"Negative declaration" means a written statement by the lead agency briefly describing the reasons that a proposed project, not exempt from CEQA, will not have a significant effect on the environment and therefore does not require the preparation of an EIR. The contents of a negative declaration are described in Section 15071.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080(c), Public Resources Code.

§ 15372. Notice of Completion.

"Notice of completion" means a brief notice filed with the OPR by a lead agency as soon as it has completed a draft EIR and is prepared to send out copies for review. The contents of this notice are explained in Section 15085.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21161, Public Resources Code.

HISTORY

1. Amendment filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5).

§ 15373. Notice of Determination.

"Notice of determination" means a brief notice to be filed by a public agency after it approves or determines to carry out a project which is subject to the requirements of CEQA. The contents of this notice are explained in Sections 15075 and 15094.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108(a) and 21152, Public Resources Code.

§ 15374. Notice of Exemption.

"Notice of exemption" means a brief notice which may be filed by a public agency after it has decided to carry out or approve a project and has determined that the project is exempt from CEQA as being ministerial, categorically exempt, an emergency, or subject to another exemption from CEQA. Such a notice may also be filed by an applicant where such a determination has been made by a public agency which must approve the project. The contents of this notice are explained in Section 15062.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21108(b) and 21152(b), Public Resources Code.

§ 15375. Notice of Preparation.

"Notice of preparation" means a brief notice sent by a lead agency to notify the responsible agencies, trustee agencies, and involved federal agencies that the lead agency plans to prepare an EIR for the project. The purpose of the notice is to solicit guidance from those agencies as to the scope and content of the environmental information to be included in the EIR. Public agencies are free to develop their own formats for this notice. The contents of this notice are described in Section 15082.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21080.4, Public Resources Code.

§ 15376. Person.

"Person" includes any person, firm, association, organization, partnership, business, trust, corporation, limited liability company, company, district, city, county, city and county, town, the state, and any of the agencies or political subdivisions of such entities.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21066, Public Resources Code.

HISTORY

1. Amendment of section and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15377. Private Project.

A "private project" means a project which will be carried out by a person other than a governmental agency, but the project will need a discretionary approval from one or more governmental agencies for:

(a) A contract or financial assistance, or

(b) A lease, permit, license, certificate, or other entitlement for use.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21065, Public Resources Code.

§ 15378. Project.

(a) "Project" means the whole of an action, which has a potential for resulting in either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment, and that is any of the following:

(1) An activity directly undertaken by any public agency including but not limited to public works construction and related activities clearing or grading of land, improvements to existing public structures, enactment and amendment of zoning ordinances, and the adoption and amendment of local General Plans or elements thereof pursuant to Government Code Sections 65100–65700.

(2) An activity undertaken by a person which is supported in whole or in part through public agency contracts, grants, subsidies, loans, or other forms of assistance from one or more public agencies.

(3) An activity involving the issuance to a person of a lease, permit, license, certificate, or other entitlement for use by one or more public agencies.

(b) Project does not include:

(1) Proposals for legislation to be enacted by the State Legislature;

(2) Continuing administrative or maintenance activities, such as purchases for supplies, personnel–related actions, general policy and procedure making (except as they are applied to specific instances covered above);

(3) The submittal of proposals to a vote of the people of the state or of a particular community. (*Stein* v. *City of Santa Monica*, (1980) 110 Cal. App. 3d 458);

(4) The creation of government funding mechanisms or other government fiscal activities, which do not involve any commitment to any specific project which may result in a potentially significant physical impact on the environment.

(5) Organizational or administrative activities of governments which are political or which are not physical changes in the environment (such as the reorganization of a school district or detachment of park land).

(c) The term "project" refers to the activity which is being approved and which may be subject to several discretionary approvals by governmental agencies. The term "project" does not mean each separate governmental approval.

(d) Where the lead agency could describe the project as either the adoption of a particular regulation under Subsection (a)(1) or as a development proposal which will be subject to several governmental approvals under Subsections (a)(2) or (a)(3), the lead agency shall describe the project as the development proposal for the purpose of environmental analysis. This approach will implement the lead agency principle as described in Article 4.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21065, Public Resources Code; *Kaufman and Broad–South Bay, Inc. v. Morgan Hill Unified School District*, (1992) 9 Cal.App.4th 464; and *Fullerton Joint Union High School District v. State Board of Education*, (1982) 32 Cal.3d 779; *Simi Valley Recreation and Park District v. Local Agency Formation Commission of Ventura County* (1975) 51 Cal.App.3d 648.

HISTORY

1. Amendment of subsection (b)(3), repealer and new subsection (b)(5) and amendment of NOTE filed 8–19–94; operative 9–19–94 (Register 94, No. 33).
2. Amendment of subsection (a) and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).
3. Amendment of subsections (b)(1)–(5) and amendment of NOTE filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

§ 15379. Public Agency.

"Public agency" includes any state agency, board, or commission and any local or regional agency, as defined in these guidelines. It does not include the courts of the state. This term does not include agencies of the federal government.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21063, Public Resources Code.

§ 15380. Endangered, Rare or Threatened Species.

(a) "Species" as used in this section means a species or subspecies of animal or plant or a variety of plant.

(b) A species of animal or plant is:

(1) "Endangered" when its survival and reproduction in the wild are in immediate jeopardy from one or more causes, including loss of habitat, change in habitat, overexploitation, predation, competition, disease, or other factors; or

(2) "Rare" when either:

(A) Although not presently threatened with extinction, the species is existing in such small numbers throughout all or a significant portion of its range that it may become endangered if its environment worsens; or

(B) The species is likely to become endangered within the foreseeable future throughout all or a significant portion of its range and may be considered "threatened" as that term is used in the Federal Endangered Species Act.

(c) A species of animal or plant shall be presumed to be endangered, rare or threatened, as it is listed in:

(1) Sections 670.2 or 670.5, Title 14, California Code of Regulations; or

(2) Title 50, Code of Federal Regulations Sections 17.11 or 17.12 pursuant to the Federal Endangered Species Act as rare, threatened, or endangered.

(d) A species not included in any listing identified in subsection (c) shall nevertheless be considered to be endangered, rare or threatened, if the species can be shown to meet the criteria in subsection (b).

(e) This definition shall not include any species of the Class Insecta which is a pest whose protection under the provisions of CEQA would present an overwhelming and overriding risk to man as determined by:

(1) The Director of Food and Agriculture with regard to economic pests; or

(2) The Director of Health Services with regard to health risks.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21001(c), Public Resources Code.

HISTORY

1. Amendment of section heading, subsections (c), (c)(1) and (d), and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15381. Responsible Agency.

"Responsible agency" means a public agency which proposes to carry out or approve a project, for which a lead agency is preparing or has prepared an EIR or negative declaration. For the purposes of CEQA, the term "responsible agency" includes all public agencies other than the lead agency which have discretionary approval power over the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21002.1, 21069, 21080.1, 21080.3, 21080.4, 21167.2 and 21167.3, Public Resources Code.

§ 15382. Significant Effect on the Environment.

"Significant effect on the environment" means a substantial, or potentially substantial, adverse change in any of the physical conditions within the area affected by the project including land, air, water, minerals, flora, fauna, ambient noise, and objects of historic or aesthetic significance. An economic or social change by itself shall not be considered a significant effect on the environment. A social or economic change related to a physical change may be considered in determining whether the physical change is significant.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21068, 21083, 21100 and 21151, Public Resources Code; *Hecton* v. *People of the State of California*, 58 Cal. App. 3d 653.

HISTORY

1. On November 23, 1986 the regulation (Title 14, § 895.1) became effective which clarifies the Board's regulatory interpretation of "effect" and "impact" as specified in CEQA (Public Resources Code § 21068 and § 21080.5(d)(2) and (3)) (Register 86, No. 4).

§ 15383. State Agency.

"State agency" means a governmental agency in the executive branch of the State Government or an entity which operates under the direction and control of an agency in the executive branch of State Government and is funded primarily by the State Treasury.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Section 21100, Public Resources Code.

§ 15384. Substantial Evidence.

(a) "Substantial evidence" as used in these guidelines means enough relevant information and reasonable inferences from this information that a fair argument can be made to support a conclusion, even though other conclusions might also be reached. Whether a fair argument can be made that the project may have a significant effect on the environment is to be determined by examining the whole record before the lead agency. Argument, speculation, unsubstantiated opinion or narrative, evidence which is clearly erroneous or inaccurate, or evidence of social or economic impacts which do not contribute to or are not caused by physical impacts on the environment does not constitute substantial evidence.

(b) Substantial evidence shall include facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080, 21082.2, 21168 and 21168.5, Public Resources Code; *No Oil, Inc.* v. *City of Los Angeles* (1974) 13 Cal. 3d 68; *Running Fence Corp.* v. *Superior Court* (1975) 51 Cal. App. 3d 400; *Friends of B Street* v. *City of Hayward* (1980) 106 Cal. App. 3d 988.

HISTORY

1. Amendment of section and NOTE filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).

§ 15385. Tiering.

"Tiering" refers to the coverage of general matters in broader EIRs (such as on general plans or policy statements) with subsequent narrower EIRs or ultimately site–specific EIRs incorporating by reference the general discussions and concentrating solely on the issues specific to the EIR subsequently prepared. Tiering is appropriate when the sequence of EIRs is:

(a) From a general plan, policy, or program EIR to a program, plan, or policy EIR of lesser scope or to a site–specific EIR.

(b) From an EIR on a specific action at an early stage to a subsequent EIR or a supplement to an EIR at a later stage. Tiering in such cases is appropriate when it helps the lead agency to focus on the issues which are ripe for decision and exclude from consideration issues already decided or not yet ripe.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21003, 21061 and 21100, Public Resources Code.

§ 15386. Trustee Agency.

"Trustee agency" means a state agency having jurisdiction by law over natural resources affected by a project which are held in trust for the people of the State of California. Trustee agencies include: (a) The California Department of Fish and Game with regard to the fish and wildlife of the state, to designated rare or endangered native plants, and to game refuges, ecological reserves, and other areas administered by the department.

(b) The State Lands Commission with regard to state owned "sovereign" lands such as the beds of navigable waters and state school lands.

(c) The State Department of Parks and Recreation with regard to units of the State Park System.

(d) The University of California with regard to sites within the Natural Land and Water Reserves System.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.3 and 21080.4, Public Resources Code.

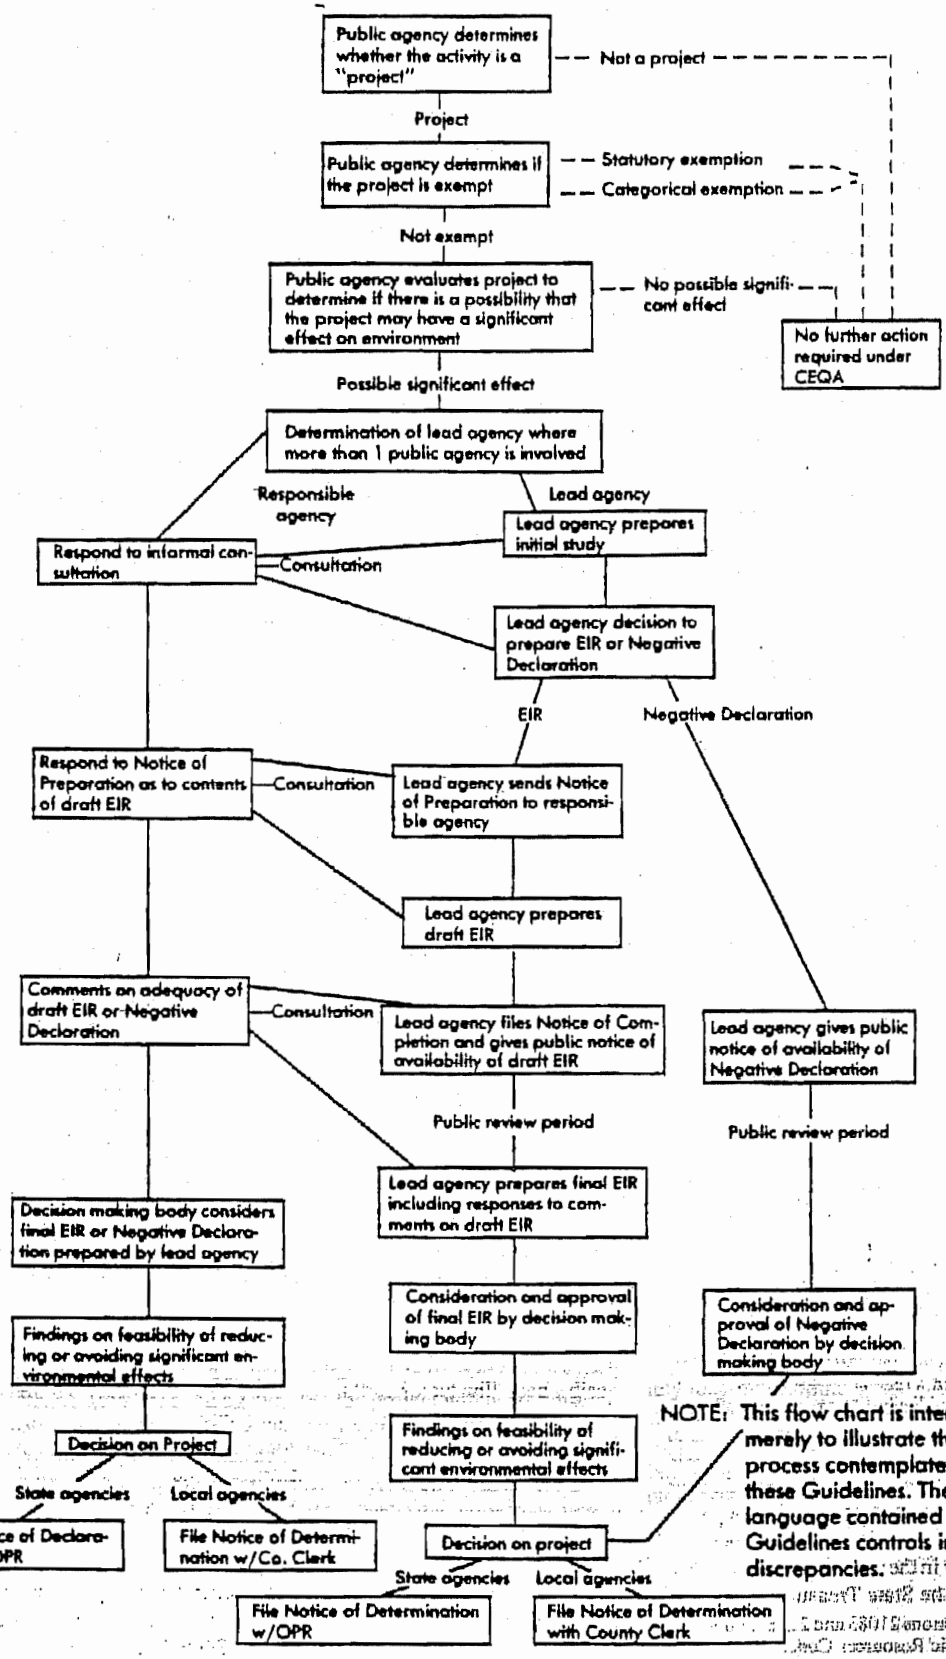
§ 15387. Urbanized Area.

"Urbanized area" means a central city or a group of contiguous cities with a population of 50,000 or more, together with adjacent densely populated areas having a population density of at least 1,000 persons per square mile. A lead agency shall determine whether a particular area meets the criteria in this section either by examining the area or by referring to a map prepared by the U.S. Bureau of the Census which designates the area as urbanized. Maps of the designated urbanized areas can be found in the California EIR Monitor of February 7, 1979. The maps are also for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The maps are sold in sets only as Stock Number 0301–3466. Use of the term "urbanized area" in Section 15182 is limited to areas mapped and designated as urbanized by the U.S. Bureau of the Census.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21080.7, 21083 and 21084, Public Resources Code.

Appendix A

CEQA PROCESS FLOW CHART



NOTE: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY

1. Amendment of Appendix A filed 1–30–86; effective thirtieth day thereafter (Register 86, No. 5). For prior history, see Registers 80, No. 19 and 73, No. 50.

Appendix B

Footnotes

No.

1. *Food and Agriculture*—Effects on plants and animals.
2. *Food and Agriculture*—Protection of food and fiber.
3. *Food and Agriculture*—Agricultural, dairy and feed lot systems.
4. *Food and Agriculture*—As pertains to transportation, handling, storage and decontamination of pesticides.
5. *Food and Agriculture*—Pesticide effects, predatory animal control, bird control.
6. *California Highway Patrol*—Enforcement of motor vehicle regulations.
7. *Health Services*—Beach sanitation, water pollution, solid waste and mosquito control.
8. *Health Services*—Pertains to health component.
9. *Health Services*—Most of these are strongly related to health.
10. *Health Services*—Pertains to noise.
11. *Health Services*—Pertains to personal and environmental health components.
12. *Health Services*—As it may pertain to human health hazards.
13. *Health Services*—Pertains to comprehensive health planning.
14. *Colorado River Board*—As pertains to the Colorado, New and Alamo Rivers.
15. *Fish and Game*—As field development and distribution systems may affect fish and wildlife.
16. *Fish and Game*—As may affect migrating and resident wildlife.
17. *Fish and Game*—As excessive noise may affect wildlife.
18. *Fish and Game*—As water quality may affect fish and wildlife.
19. *Parks and Recreation*—In impacted areas only.
20. *Reclamation Board*—In areas of Board's jurisdiction only—the Sacramento–San Joaquin Valley.
21. *State Water Resources Control Board*—As may pertain to water quality.
22. *Forestry*—With respect to forest land.
23. *Forestry*—(6) and (32)—As related to fire protection or State (fire protection) responsibility land.
24. *Air Resources Board*—(4), (22), (32), (33), and (36)—As may pertain to residential, commercial, industrial or transportation growth.
25. *San Francisco Bay Conservation and Development Commission*—(3), (17), (19), and (30)—With respect to San Francisco Bay, Suisun Bay and adjacent shore areas.
26. *California Coastal Commission*—(3), (4), (6), (8), (11), (12), (14), (15), (17), (19), (22), (23), (26), (29), (30), (31), (34), (35), and (36)—With respect to effects within the California Coastal Zone.
27. *California Tahoe Regional Planning Agency*—With respect to effects in the Tahoe Basin.
28. *Native American Heritage Commission*—With respect to places of special religious or social significance to Native Americans including archaeological sites, cemeteries, and places of worship.

_____
Project Description

_____

This is to advise that the _____
(Lead Agency or Responsible Agency)
has approved the above described project and has made the following determinations regarding the above described project:

1. The project ☐ will ☐ will not have a significant effect on the environment.
2. ☐ An Environmental Impact Report was prepared for this project pursuant to the provisions of CEQA.
   ☐ A Negative Declaration was prepared for this project pursuant to the provisions of CEQA.
   The EIR or Negative Declaration and record of project approval may be examined at: _____
3. Mitigation measures ☐ were, ☐ were not, made a condition of the approval of the project.
4. A statement of Overriding Considerations ☐ was, ☐ was not, adopted for this project.

Appendix F

Energy Conservation

I. Introduction

The goal of conserving energy implies the wise and efficient use of energy. The means of achieving this goal include:

(1) decreasing overall per capita energy consumption,

(2) decreasing reliance on natural gas and oil, and

(3) increasing reliance on renewable energy sources.

In order to assure that energy implications are considered in project decisions, the California Environmental Quality Act requires that EIRs include a discussion of the potential energy impacts of proposed projects, with particular emphasis on avoiding or reducing inefficient, wasteful and unnecessary consumption of energy.

Energy conservation implies that a project's cost effectiveness be reviewed not only in dollars, but also in terms of energy requirements. For many projects, lifetime costs may be determined more by energy efficiency than by initial dollar costs.

II. EIR Contents

Potentially significant energy implications of a project should be considered in an EIR. The following list of energy impact possibilities and potential conservation measures is designed to assist in the preparation of an EIR. In many instances specific items may not apply or additional items may be needed.

A. Project Description may include the following items:

1. Energy consuming equipment and processes which will be used during construction, operation and/or removal of the project. If appropriate, this discussion should consider the energy intensiveness of materials and equipment required for the project.

2. Total energy requirements of the project by fuel type and end use.

3. Energy conservation equipment and design features.

4. Initial and life–cycle energy costs or supplies.

5. Total estimated daily trips to be generated by the project and the additional energy consumed per trip by mode.

B. Environmental Setting may include existing energy supplies and energy use patterns in the region and locality.

C. Environmental Impacts may include:

1. The project's energy requirements and its energy use efficiencies by amount and fuel type for each stage of the project's life cycle including construction, operation, maintenance and/or removal. If appropriate, the energy intensiveness of materials maybe discussed.

2. The effects of the project on local and regional energy supplies and on requirements for additional capacity.

3. The effects of the project on peak and base period demands for electricity and other forms of energy.

4. The degree to which the project complies with existing energy standards.

5. The effects of the project on energy resources.

6. The project's projected transportation energy use requirements and its overall use of efficient transportation alternatives.

D. Mitigation Measures may include:

1. Potential measures to reduce wasteful, inefficient and unnecessary consumption of energy during construction, operation, maintenance and/or removal. The discussion should explain why certain measures were incorporated in the project and why other measures were dismissed.

2. The potential of siting, orientation, and design to minimize energy consumption, including transportation energy.

3. The potential for reducing peak energy demand.

4. Alternate fuels (particularly renewable ones) or energy systems.

5. Energy conservation which could result from recycling efforts.

E. Alternatives should be compared in terms of overall energy consumption and in terms of reducing wasteful, inefficient and unnecessary consumption of energy.

F. Unavoidable Adverse Effects may include wasteful, inefficient and unnecessary consumption of energy during the project construction, operation, maintenance and/or removal that cannot be feasibly mitigated.

G. Irreversible Commitment of Resources may include a discussion of how the project preempts future energy development or future energy conservation.

H. Short–Term Gains versus Long–Term Impacts can be compared by calculating the energy costs over the lifetime of the project.

I. Growth Inducing Effects may include the estimated energy consumption of growth induced by the project.

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176. Public Resources Code.

HISTORY

1. New Appendix F filed 12–31–74 as an emergency; designated effective 1–7–75 (Register 75, No. 1).
2. Certificate of Compliance filed 4–29–75 (Register 75, No. 18).
3. Repealer and new Appendix F filed 10–8–76; effective thirtieth day thereafter (Register 76, No. 41). NOTE: Order designates that compliance with this appendix is authorized but not mandatory before 1–1–77.
4. Amendment of Section II filed 5–8–80; effective thirtieth day thereafter (Register 80, No. 19).
5. Change without regulatory effect amending section II.D.2. filed 2–1–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 5).

_____

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

☐ Aesthetics	☐ Agriculture Resources	☐ Air Quality
☐ Biological Resources	☐ Cultural Resources	☐ Geology/Soils
☐ Hazards & Hazardous Materials	☐ Hydrology/Water Quality	☐ Land Use/Planning
☐ Mineral Resources	☐ Noise	☐ Population/Housing
☐ Public Services	☐ Recreation	☐ Transportation/Traffic
☐ Utilities/Service Systems	☐ Mandatory Findings of Significance	

DETERMINATION: (To be completed by the Lead Agency)

On the basis of this initial evaluation:

☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☐ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☐ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Signature _____ Date _____

Printed Name _____ For _____

EVALUATION OF ENVIRONMENTAL IMPACTS:

1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project–specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project–specific screening analysis).

2) All answers must take account of the whole action involved, including off–site as well as on–site, cumulative as well as project–level, indirect as well as direct, and construction as well as operational impacts.

3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.

4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be cross–referenced).

5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:

a) Earlier Analysis Used. Identify and state where they are available for review.

b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation based on the earlier analysis.

c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site–specific conditions for the project.

6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.

8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.

9) The explanation of each issue should identify:
a) the significance criteria or threshold, if any, used to evaluate each question; and
b) the mitigation measure identified, if any, to reduce the impact to less than significance.

SAMPLE QUESTION:
Issues:

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
I. AESTHETICS—Would the project:				
a) Have a substantial adverse effect on a scenic vista?	☐	☐	☐	☐
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	☐	☐	☐	☐
c) Substantially degrade the existing visual character or quality of the site and its surroundings?	☐	☐	☐	☐
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	☐	☐	☐	☐
II. AGRICULTURE RESOURCES: In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. Would the project:				
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non–agricultural use?	☐	☐	☐	☐
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?	☐	☐	☐	☐
c) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non–agricultural use?	☐	☐	☐	☐
III. AIR QUALITY—Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:				
a) Conflict with or obstruct implementation of the applicable air quality plan?	☐	☐	☐	☐
b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?	☐	☐	☐	☐
c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non–attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?	☐	☐	☐	☐
d) Expose sensitive receptors to substantial pollutant concentrations?	☐	☐	☐	☐
e) Create objectionable odors affecting a substantial number of people?	☐	☐	☐	☐

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
IV. BIOLOGICAL RESOURCES—Would the project:				
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☐	☐	☐
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?	☐	☐	☐	☐
c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	☐	☐	☐	☐
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	☐	☐	☐	☐
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	☐	☐	☐	☐
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	☐	☐	☐	☐
V. CULTURAL RESOURCES—Would the project:				
a) Cause a substantial adverse change in the significance of a historical resource as defined in § 15064.5?	☐	☐	☐	☐
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5?	☐	☐	☐	☐
c) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	☐	☐	☐	☐
d) Disturb any human remains, including those interred outside of formal cemeteries?	☐	☐	☐	☐
VI. GEOLOGY AND SOILS—Would the project:				
a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:	☐	☐	☐	☐
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist–Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.	☐	☐	☐	☐

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
ii) Strong seismic ground shaking?	☐	☐	☐	☐
iii) Seismic–related ground failure, including liquefaction?	☐	☐	☐	☐
iv) Landslides?	☐	☐	☐	☐
b) Result in substantial soil erosion or the loss of topsoil?	☐	☐	☐	☐
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on– or off–site landslide, lateral spreading, subsidence, liquefaction or collapse?	☐	☐	☐	☐
d) Be located on expansive soil, as defined in Table 18–1–B of the Uniform Building Code (1994), creating substantial risks to life or property?	☐	☐	☐	☐
e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste disposal systems where sewers are not available for the disposal of waste water?	☐	☐	☐	☐
VII. HAZARDS AND HAZARDOUS MATERIALS— Would the project:				
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	☐	☐	☐	☐
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	☐	☐	☐	☐
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one–quarter mile of an existing or proposed school?	☐	☐	☐	☐
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	☐	☐	☐	☐
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?	☐	☐	☐	☐
f) For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?	☐	☐	☐	☐
g) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	☐	☐	☐	☐
h) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?	☐	☐	☐	☐

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
VIII. HYDROLOGY AND WATER QUALITY—Would the project:				
a) Violate any water quality standards or waste discharge requirements?	☐	☐	☐	☐
b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre–existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?	☐	☐	☐	☐
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on– or off–site?	☐	☐	☐	☐
d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on– or off–site?	☐	☐	☐	☐
e) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?	☐	☐	☐	☐
f) Otherwise substantially degrade water quality?	☐	☐	☐	☐
g) Place housing within a 100–year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?	☐	☐	☐	☐
h) Place within a 100–year flood hazard area structures which would impede or redirect flood flows?	☐	☐	☐	☐
i) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?	☐	☐	☐	☐
j) Inundation by seiche, tsunami, or mudflow?	☐	☐	☐	☐
IX. LAND USE AND PLANNING—Would the project:				
a) Physically divide an established community?	☐	☐	☐	☐
b) Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?	☐	☐	☐	☐
c) Conflict with any applicable habitat conservation plan or natural community conservation plan?	☐	☐	☐	☐

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
X. MINERAL RESOURCES—Would the project:				
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	☐	☐	☐	☐
b) Result in the loss of availability of a locally–important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	☐	☐	☐	☐
XI. NOISE—				
Would the project result in:	☐	☐	☐	☐
a) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	☐	☐	☐	☐
b) Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?	☐	☐	☐	☐
c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?	☐	☐	☐	☐
d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?	☐	☐	☐	☐
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	☐	☐	☐	☐
f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?	☐	☐	☐	☐
XII. POPULATION AND HOUSING—Would the project:				
a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or directly (for example, through extension of roads or other infrastructure)?	☐	☐	☐	☐
b) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?	☐	☐	☐	☐
c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?	☐	☐	☐	☐

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
XIII. PUBLIC SERVICES				
a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:	☐	☐	☐	☐
Fire protection?	☐	☐	☐	☐
Police protection?	☐	☐	☐	☐
Schools?	☐	☐	☐	☐
Parks?	☐	☐	☐	☐
Other public facilities?	☐	☐	☐	☐
XIV. RECREATION—				
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	☐	☐	☐	☐
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?	☐	☐	☐	☐
XV. TRANSPORTATION/TRAFFIC—Would the project:				
a) Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in either the number of vehicle trips, the volume to capacity ratio on roads, or congestion at intersections)?	☐	☐	☐	☐
b) Exceed, either individually or cumulatively, a level of service standard established by the county congestion management agency for designated roads or highways?	☐	☐	☐	☐
c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?	☐	☐	☐	☐
d) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	☐	☐	☐	☐
e) Result in inadequate emergency access?	☐	☐	☐	☐
f) Result in inadequate parking capacity?	☐	☐	☐	☐
g) Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?	☐	☐	☐	☐

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
XVI. UTILITIES AND SERVICE SYSTEMS—				
Would the project:				
a) Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?	☐	☐	☐	☐
b) Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	☐	☐	☐	☐
c) Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	☐	☐	☐	☐
d) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?	☐	☐	☐	☐
e) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	☐	☐	☐	☐
f) Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?	☐	☐	☐	☐
g) Comply with federal, state, and local statutes and regulations related to solid waste?	☐	☐	☐	☐
XVII. MANDATORY FINDINGS OF SIGNIFICANCE—				
a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	☐	☐	☐	☐
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?	☐	☐	☐	☐
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	☐	☐	☐	☐

HISTORY

1. New Appendix G filed 10–8–76; effective thirtieth day thereafter (Register 76, No 41). NOTE: Order designated that compliance with this appendix is authorized but not mandatory before 1–1–77.

2. Amendment of subsections (n) and (o) filed 2–2–78; effective thirtieth day thereafter (Register 78, No. 5).
3. Amendment of subsections (j) and (v) and new subsections (y) and (z) filed 5–8–80; effective thirtieth day thereafter (Register 80, No. 19).
4. Amendment of first paragraph and subsection (c) filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).
5. Repealer of former Appendix G and relettering and amendment of former Appendix I to new Appendix G filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).
6. Change without regulatory effect amending Appendix G filed 2–1–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 5).

Appendix H

Environmental Information Form

(To be completed by applicant)

Date Filed _____

GENERAL INFORMATION

1. Name and address of developer or project sponsor: _____

2. Address of project: _____

Assessor's Block and Lot Number _____

3. Name, address, and telephone number of person to be contacted concerning this project: _____

4. Indicate number of the permit application for the project to which this form pertains: _____

5. List and describe any other related permits and other public approvals required for this project, including those required by city, regional, state and federal agencies: _____

6. Existing zoning district: _____

7. Proposed use of site (Project for which this form is filed): _____

PROJECT DESCRIPTION

8. Site size.
9. Square footage.
10. Number of floors of construction.
11. Amount of off–street parking provided.
12. Attach plans.
13. Propose scheduling.
14. Associated projects.
15. Anticipated incremental development.
16. If residential, include the number of units, schedule of unit sizes, range of sale prices or rents, and type of household size expected.
17. If commercial, indicate the type, whether neighborhood, city or regionally oriented, square footage of sales area, and loading facilities.
18. If industrial, indicate type, estimated employment per shift, and loading facilities.
19. If institutional, indicate the major function, estimated employment per shift, estimated occupancy, loading facilities, and community benefits to be derived from the project.
20. If the project involves a variance, conditional use or rezoning application, state this and indicate clearly why the application is required.

Are the following items applicable to the project or its effects? Discuss below all items checked yes (attach additional sheets as necessary).

YES NO

___ ___ 21. Change in existing features of any bays, tidelands, beaches, lakes or hills, or substantial alteration of ground contours.
___ ___ 22. Change in scenic views or vistas from existing residential areas or public lands or roads.
___ ___ 23. Change in pattern, scale or character of general area of project.
___ ___ 24. Significant amounts of solid waste or litter.
___ ___ 25. Change in dust, ash, smoke, fumes or odors in vicinity.
___ ___ 26. Change in ocean, bay, lake, stream or ground water quality or quantity, or alteration of existing drainage patterns.
___ ___ 27. Substantial change in existing noise or vibration levels in the vicinity.
___ ___ 28. Site on filled land or on slope of 10 percent or more.
___ ___ 29. Use of disposal of potentially hazardous materials, such as toxic substances, flammables or explosives.
___ ___ 30. Substantial change in demand for municipal services (police, fire, water, sewage, etc.).
___ ___ 31. Substantially increase fossil fuel consumption (electricity, oil, natural gas, etc.).
___ ___ 32. Relationship to a larger project or series of projects.

ENVIRONMENTAL SETTING

33. Describe the project site as it exists before the project, including information on topography, soil stability, plants and animals, and any cultural, historical or scenic aspects. Describe any existing structures on the site, and the use of the structures. Attach photographs of the site. Snapshots or polaroid photos will be accepted.
34. Describe the surrounding properties, including information on plants and animals and any cultural, historical or scenic aspects. Indicate the type of land use (residential, commercial, etc.), intensity of land use (one–family, apartment houses, shops, department stores, etc.), and scale of development (height, frontage, set–back, rear yard, etc.). Attach photographs of the vicinity. Snapshots or polaroid photos will be accepted.

CERTIFICATION: I hereby certify that the statements furnished above and in the attached exhibits present the data and information required for this initial evaluation to the best of my ability, and that the facts, statements, and information presented are true and correct to the best of my knowledge and belief.

Date _____ _____

(Signature)

For _____

NOTE: This is only a suggested form. Public agencies are free to devise their own format for initial studies.)

NOTE: Authority cited: Sections 21083 and 21087, Public Resources Code. Reference: Sections 21000–21176, Public Resources Code.

HISTORY

1. New Appendix H filed 10–8–76; effective thirtieth day thereafter (Register 76, No. 40). NOTE: Order designates that compliance with this appendix is authorized but not mandatory before 1–1–77.
2. Amendment filed 2–2–78; effective thirtieth day thereafter (Register 78, No. 5).

HISTORY

1. Repealer and new Appendix I filed 8–19–94; operative 9–19–94 (Register 94, No. 33). For prior history, see Register 80, No. 19.
2. Relettering of former Appendix I to Appendix G and relettering of former Appendix J to new Appendix I filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

Appendix J

Examples of Tiering EIR's

FIRST TIER EIR (15152)	• project encompasses separate but related projects such as general plan, zoning, development • later tiers move from general to specific analysis of projects
Later Project EIR	• later project is consistent with general plan or zoning • initial study must examine significant effects not covered in prior EIR • later EIR must state lead agency is using tiering concept and must comply with section 15152
STAGED EIR (15167)	• one large project will require a number of discretionary approvals from govt. agencies and one of those approvals will occur more than two years before construction commences
Supplement to the Staged EIR	• supplements to the staged EIR are prepared for later government agency approvals on the same overall project if information available at the time of that later approval would permit consideration of additional environmental impacts, mitigation measures or reasonable alternatives
PROGRAM EIR (15168)	• series of actions or activities that can be characterized as one large project and are related either: • geographically • as logical parts of a change of activities • in connection with rules, regulations, plans or other general criteria governing a continuing program • as individual activities carried out under common authority (statutory or regulatory) and having similar environmental effects which can be mitigated in similar ways
Subsequent Project EIR	• only if subsequent activity has effects not examined in the previously certified program EIR will additional environmental documentation be required (if subsequent activity has no new effects, that activity is covered by the program EIR)
MASTER EIR (15175)	• alternative to project, staged, or program EIR • can be used for: – general plan (or gen. plan element, amendment, or update) – redevelopment plan projects (public or private) – project consisting of phases or smaller individual projects – other activities described in 15175 • after five years from initial certification, adopting authority must review the Master EIR and prepare subsequent or supplemental EIR if substantial changes have occurred with resepct to circumstances under which the original Master EIR was adopted • no new EIR is required for subsequent projects within the scope of the Master EIR which cause no additional significant effect
Focused EIR (15177)	• a subsequent, Focused EIR is required only where: – substantial new/additional information shows adverse environmental effects not examined in Master EIR or more significant than described in EIR, or – substantial new/additional information shows mitigation measures previously determined to be infeasible are now feasible and will avoid/reduce the significant effects to a level of insignificance

SPECIAL SITUATIONS/EIRs

Multiple–family residential development/residential and commercial or retail mixed–use development (PRC 21158.5 and Guideline § 15179.5)

- project is multiple–family residential development up to 100 units or is a residential and commercial or retail mixed–use development of not more than 100,000 square feet
- if project complies with procedures in section 21158.5, only a focused EIR need be prepared, notwithstanding the fact that the project wasn't identified in the Master EIR

Redevelopment Project (15180)

- all public and private activities or undertakings in furtherance of a redevelopment plan (public or private) constitute a single project
- the redevelopment plan EIR is treated as a program EIR
- no subsequent EIR is required for individual components of the redevelopment plan unless substantial changes or substantial new information triggers a subsequent EIR or supplement to an EIR pursuant to (sections 15162 or 15163)

Housing/neighborhood commercial facilities (15181)

- a project involving construction of housing or neighborhood commercial facilities in an urbanized area
- a prior EIR for a specific plan, local coastal program, or port master plan may be used as the EIR for such a project (no new EIR need be prepared) provided section 15181 procedures are complied with

Projects Consistent with Community Plan, General Plan, or Zoning (15183)

- a project which is consistent with a community plan adopted as part of a general plan or zoning ordinance or a general plan of a local agency and where there was an EIR certified for the zoning action or master plan
- the EIR for the residential project need only examine certain significant environmental effects, as outlined in section 15183

Regulations on Pollution Control Equipment (PRC section 21159)

- section 21159 requires environmental analysis of reasonably foreseeable methods of compliance at the time of adoption of rule or regulation requiring the installation of pollution control equipment
- an EIR prepared at the time of adoption of the rule or regulation is deemed to satisfy the requirement of section 21159

Installation of Pollution Control Equipment (PRC section 21159.1)

- a focused EIR is permitted where project 1) consists solely of installation of pollution control equipment; 2) is required by rule or regulation adopted by the State Air Resources Board, an air pollution control district or air quality management district, the State Water Resources Control Board, a California regional water quality control board, the Dept. of Toxic Substances Control, or the California Integrated Waste Management Board; and 3) meets the procedural requirements outlined in section 21159.1

History

1. New Appendix J filed 2–2–78; effective thirtieth day thereafter (Register 78, No. 5).
2. Relettering of former Appendix J to Appendix I and new Appendix J filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

Appendix K

Criteria for Shortened Clearinghouse Review

Under exceptional circumstances, and when requested in writing by the lead agency, the State Clearinghouse in the Office of Planning and Research (OPR) may shorten the usual review periods for proposed negative declarations, mitigated negative declarations and draft EIRs submitted to the Clearinghouse. A request must be made by the decision–making body of the lead agency, or by a properly authorized representative of the decision–making body.

A shortened review period may be granted when any of the following circumstances exist:

(1) The lead agency is operating under an extension of the one–year period for completion of an EIR and would not otherwise be able to complete the EIR within the extended period.

(2) The public project applicant is under severe time constraints with regard to obtaining financing or exercising options which cannot be met without shortening the review period.

(3) The document is a supplement to a draft EIR or proposed negative declaration or mitigated negative declaration previously submitted to the State Clearinghouse.

(4) The health and safety of the community would be at risk unless the project is approved expeditiously.

(5) The document is a revised draft EIR, or proposed negative declaration or mitigated negative declaration, where changes in the document are primarily the result of comments from agencies and the public.

Shortened review cannot be provided to a draft EIR or proposed negative declaration or mitigated negative declaration which has already begun the usual review process. Prior to requesting shortened review, the lead agency should have already issued a notice of preparation and received comments from applicable State agencies, in the case of an EIR, or consulted with applicable State agencies, in the case of a proposed negative declaration or mitigated negative declaration.

No shortened review period shall be granted unless the lead agency has contacted and obtained prior approval for a shortened review from the applicable state responsible and trustee agencies. No shortened review shall be granted for any project which is of statewide, regional, or areawide significance, as defined in Section 15206 of the guidelines.

History

1. New Appendix K filed 7–13–83; effective thirtieth day thereafter (Register 83, No. 29).
2. Editorial correction of 7–13–83 order redesignating effective date to 8–1–83 filed 7–14–83 (Register 83, No. 29).
3. Repealer of Appendix K and relettering of former Appendix L to new Appendix K filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

Appendix L

Criteria for Shortened Clearinghouse Review

History

1. New Appendix L filed 5–27–97; operative 5–27–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 22).
2. Relettering of former Appendix L to new Appendix K filed 10–26–98; operative 10–26–98 pursuant to Public Resources Code section 21087 (Register 98, No. 44).

Chapter 4. Resources Agency—Conflict of Interest Code

NOTE: It having been found, pursuant to Government Code Section 11409(a), that the printing of the regulations constituting the Conflict of Interest Code is impractical and these regulations being of limited and particular application, these regulations are not published in full in the

California Code of Regulations. The regulations are available to the public for review or purchase at cost at the following locations:

RESOURCES AGENCY
1416 NINTH STREET, ROOM 1311
SACRAMENTO, CALIFORNIA 95814

FAIR POLITICAL PRACTICES COMMISSION
1100 K STREET
SACRAMENTO, CALIFORNIA 95814

ARCHIVES
SECRETARY OF STATE
1020 O STREET
SACRAMENTO, CALIFORNIA 95814

The Conflict of Interest Code is designated as Chapter 4, Division 6 of Title 14 of the California Code of Regulations, and consists of sections numbered and titled as follows:

Chapter 4. Resources Agency—Conflict of Interest Code

Section
15411. General Provisions
Appendix

NOTE: Authority cited: Sections 87300 and 87304, Government Code. Reference: Sections 87300 et seq., Government Code.

HISTORY

1. New Chapter 4 (Sections 15411–15454, not consecutive) filed 2–2–78; effective thirtieth day thereafter. Approved by Fair Political Practices Commission 12–7–77 (Register 78, No. 5)
2. Repealer of Chapter 4 (Articles 1–5, Sections 15411–15454, not consecutive) and new Chapter 4 (Section 15411 and Appendix) filed 2–26–81; effective thirtieth day thereafter. Approved by Fair Political Practices Commission 12–1–80 (Register 81, No. 9).
3. Amendment of section and appendix filed 11–21–95; operative 12–21–95. Approved by Fair Political Practices Commission 9–28–95. Submitted to OAL for printing only (Register 95, No. 47).

INTRODUCTION

IN 1973, the State Clearinghouse (SCH) was established to receive and distribute environmental documents prepared pursuant to the California Environmental Quality Act (CEQA) and to coordinate the state-level environmental review process. Located within the Governor's Office of Planning and Research (OPR), the Clearinghouse is the focal point for state agency involvement in the CEQA environmental review process. Operation of the Clearinghouse is governed by the *CEQA Guidelines* (California Code of Regulations, Title 14, Sections 15000-15387), which defines the responsibilities of the Clearinghouse and clarifies its role in the environmental review process. Appendix A describes those projects requiring review through the Clearinghouse.

OPR/SCH also functions as the State Single Point of Contact, under Presidential Executive Order 12372, making it responsible for coordinating state and local review of applications for federal grants or loans under state-selected programs. In this capacity, it is also the function of the Clearinghouse to coordinate state and local review of federal financial assistance applications, federally required state plans, direct federal development activities, and federal environmental documents. The purpose of the process is to afford state and local participation in federal activities occurring within California. The Executive Order does not replace public participation, comment, or review requirements of other federal laws, such as the National Environmental Policy Act (NEPA), but gives the states an additional mechanism to ensure federal agency responsiveness to state and local concerns.

This *State Clearinghouse Handbook* explains the functions of the Clearinghouse under CEQA and Presidential Executive Order 12372.

How the State Clearinghouse Serves Government Agencies and the Public

Coordinating the Distribution and Review of Environmental Documents under CEQA

All draft Environmental Impact Reports (EIRs) and draft Negative Declarations for projects that involve a Responsible or Trustee state agency or are of statewide, regional, or areawide significance must be submitted to SCH. It then distributes these documents to other state agencies and coordinates the transmittal of comments by the Responsible and Trustee agencies to the Lead Agency.

Advice and Assistance to Government Agencies and the Public

The SCH staff provides information and assistance on the environmental review process to state and local government officials and the public. The separate Office of Permit Assistance (OPA), in the Trade and Commerce Agency, is available to organize scoping meetings and help applicants identify potential Lead, Responsible, and Trustee agencies. Contact OPA at (916) 322-4245 for help.

Managing Environmental Information

The SCH maintains a computerized information system of all environmental documents it processes. This valuable information is available for use by other state agencies, local governments, and project applicants.

Where to Find Copies of CEQA and the CEQA Guidelines

The *California Environmental Quality Act* (CEQA) can be found in the California Public Resources Code beginning at Section 21000. It is important to check for changes annually because the Act is subject to amendment.

The *CEQA Guidelines* are found in the California Code of Regulations, Title 14, beginning at Section 15000. The current statute and *Guidelines* (as revised March 29, 1999) are available online at the California Land Use Planning and Information Network (LUPIN) web site (http://ceres.ca.gov/planning/).

9004

ENVIRONMENTAL DOCUMENT REVIEW PROCESS

Requirements for Submittal of Environmental Documents to SCH

LEAD AGENCIES are required to send environmental documents, including draft Negative Declarations, Notices of Preparation, and Draft Environmental Impact Reports, to the SCH pursuant to *CEQA Guidelines* Sections 15205 and 15206.

a) Draft EIRs and Negative Declarations to be reviewed by state agencies must be submitted to the State Clearinghouse, P.O. Box 3044, Sacramento, CA 95812-3044. For courier or hand delivery, submit to: 1400 Tenth Street, Suite 222, Sacramento, CA 95814.
b) The following environmental documents must be submitted to SCH for review by state agencies:
   1) Draft EIRs and Negative Declarations prepared by a state Lead Agency.
   2) Draft EIRs and Negative Declarations prepared by any public agency where a state agency is a Responsible Agency, Trustee Agency, or otherwise has jurisdiction by law with respect to the project.
   3) Draft EIRs and Negative Declarations on projects identified in *CEQA Guidelines* Section 15206 as being of statewide, regional, or areawide significance.
   4) Draft EISs, environmental assessments, and Findings of No Significant Impact (FONSI) prepared pursuant to NEPA, the Federal Guidelines (Title 40 CFR, Part 1500, commencing with Section 1500.1).

The following pages outline the step-by-step environmental document review procedures of SCH.

Negative Declaration Process

This section explains the procedures when a draft Negative Declaration is submitted to SCH for state agency review.

Step 1: Submittal of Negative Declaration to State Clearinghouse

When a Negative Declaration requires state agency review, submit at least ***15 copies*** to the SCH. State review of a Negative Declaration is required when a state agency is the Lead Agency, a Responsible Agency, a Trustee Agency, or otherwise has jurisdiction by law over a project, or when the project has statewide, regional, or areawide impacts as identified in Section 15206 of the *CEQA Guidelines*. As with draft EIRs, submittal of draft Negative Declarations to SCH must be done by the Lead Agency or by a party clearly authorized by the Lead Agency.

The minimum content requirements for a Negative Declaration are:

A. Description and title of the project;
B. Location of the project, preferably shown on a map;
C. Name of the project proponent;
D. A proposed finding that the project will not have a significant effect on the environment;
E. An attached copy of the Initial Study documenting reasons to support the finding; and
F. Mitigation measures, if any, included in the project to avoid potentially significant effects.

Minimum content requirements for a Negative Declaration are discussed in *CEQA Guidelines*, Section 15071.

Although not required by CEQA, SCH requests a completed Notice of Completion (NOC) Form to be submitted with the 15 copies of the draft Negative Declaration. This form facilitates the processing of environmental documents and is circulated to state agencies together with the Negative Declaration. The information from the NOC form is entered into the SCH database.

Step 2: Distribution and Review Period

When a Negative Declaration is received by the SCH for distribution, a staff analyst assigns an SCH number to the project. If the project already has a number from a previous submittal of an environmental document, the Lead Agency should reference the previously assigned SCH number. Next, the document is skimmed to determine its scope and to identify the state agencies that should receive it for review. The SCH will distribute the document to any Responsible or Trustee state agencies, and to any other agencies which may have relevant expertise in the subject or otherwise have a reason to review the document. (Refer to the appendices for a listing of all state agencies and departments to whom environmental documents normally are distributed.)

The SCH staff analyst sets the review dates and attaches a distribution list to the Notice of Completion form. Documents are then mailed or otherwise delivered to the selected agencies for review and comment. An acknowledgement of receipt, containing the assigned review period, will be mailed to the Lead Agency.

The normal review period for Negative Declarations submitted to SCH is 30 calendar days (see *CEQA Guidelines*,

Section 15105). The review period begins when SCH circulates the document, which is usually the same day it is received. Documents received after noon may be distributed the next working day. Specific review dates are calculated by counting as "day 1" the date on which the document is distributed by SCH and concluding on the 30th calendar day thereafter. A shortened review period of not less than 20 days may be granted under special circumstances, as described below. Lead Agencies may request or provide for a longer review period. Such requests or provisions will routinely be honored. The SCH reserves the right to set a review period longer than 30 days. Lead Agencies will be notified of such longer review periods within one working day of document receipt.

Step 3: Review of Negative Declaration

After SCH has distributed a Negative Declaration to state agencies, those agencies assign the document to staff members in either their Sacramento or regional offices for review, analysis and comment. Agency comments are forwarded to SCH prior to the end of the assigned review period.

Occasionally, state agencies may request an extension of a review period. Reasonable requests for extensions will be granted. The SCH will notify the Lead Agency upon approval of an extension.

Step 4: Negative Declaration Comments

At the end of the state review period, all comments from the reviewing state agencies are collected at SCH. A closing letter and a complete package of comments are forwarded to the Lead Agency on the day following the close of the review period.

Step 5: Notice of Determination

Within five working days of approving a project for which a Negative Declaration has been adopted, a local Lead Agency must file a Notice of Determination (NOD) with the county clerk of the county or counties where the project is located. If a project requires discretionary approval from a state agency, the NOD also must be filed with SCH. If the Lead Agency is a state agency, the NOD must be filed with the SCH.

The information required in a Notice of Determination is listed in Section 15075 of the *CEQA Guidelines*. The filing of the NOD begins a 30-calendar-day statute of limitations on court challenges to the project approval under CEQA.

Helpful Hints

- Submit one completed NOC with your Negative Declaration.
- Submit 15 copies of each Negative Declaration. Submit additional copies if you have identified more than 15 state agencies that should receive a copy.
- Include a cover letter if you have special instructions for the SCH staff.
- Assume that the 30-day review period will commence within 24 hours of receipt by SCH.
- Plan ahead if you will need a shortened review period by calling SCH before mailing your document.
- Call SCH in advance if you have any questions regarding these procedures.

State Clearinghouse Negative Declaration Process
STEP-BY-STEP CHECKLIST

		Lead Agency	State Clearinghouse	Reviewing Agency
1	On the basis of the Initial Study, prepare Negative Declaration.	X		
2	Send 15 COPIES of Negative Declaration and one copy of completed NOC form to State Clearinghouse.	X		
3	Assign SCH number and state review period (normally 30 days) and distribute to selected state agencies.		X	
4	Review and comment on Negative Declaration. Send comments to State Clearinghouse within assigned review period.			X
5	Forward comments to Lead agency at end of review period with a closing letter.		X	
6	• Consider comments recieved. • Adopt Negative Declaration. • Make decision on project.	X		
7	File NOD with county clerk. Also file NOD with SCH if project requires discretionary approval from state agency.	X		

9006

EIR Process

Step1: Notice of Preparation

To assist the EIR scoping process, a Lead Agency must circulate a Notice of Preparation (NOP) to all Responsible and Trustee Agencies advising them of its intention to prepare a Draft EIR (*CEQA Guidelines,* Section 15082).

The 30-calendar-day review period for a NOP begins when an agency receives the notice for review. Lead Agencies are required to send copies of a NOP directly to all Responsible and Trustee Agencies. SCH staff can assist in identifying Responsible and Trustee state agencies and distributing the NOP to them.

When there is a Responsible or Trustee state agency involved in a project, a copy of the NOP also must be sent to SCH. The Lead Agency's distribution list for the NOP should be attached to SCH's copy of the NOP. Filing the NOP and distribution list with SCH helps ensure that no Responsible or Trustee state agencies have been overlooked.

The minimum content requirements for a NOP are:

A. Description of the project;
B. Location of the project, indicated either on an attached map (preferably a topographical map), or by a street address in an urbanized area;
C. Salient environmental issues; and
D. Probable environmental effects of the project.

The SCH also requests that a completed Notice of Completion form be submitted with the NOP, to expedite processing of the NOP and to allow for accurate data entry into the database. This form facilitates processing of all environmental documents through SCH.

The project description provided in the NOP should be complete enough to give reviewers sufficient information to make meaningful comments. Even though a map is not required in all cases, provision of a good site map and vicinity map is strongly encouraged. The mapping should show the site in a context broad enough to indicate the area to be affected by the project, including rivers, airports, schools, railways, and highways. The Initial Study, if one has been done, should be included to show the probable environmental effects of the project.

Step 2: SCH Number and Distribution

When a NOP is submitted to SCH, a number is assigned to the project. The SCH staff analyst will check the Lead Agency's distribution list and may send copies of the NOP to additional state agencies that have relevant expertise in the subject or otherwise have reason to review the project, even though they are not Responsible Agencies. This does not extend the 30-day comment period for Responsible and Trustee Agencies that already received the NOP directly from the Lead Agency.

SCH receipt of the NOP will be acknowledged by letter to the Lead Agency, noting the SCH number that is to be used for all subsequent environmental documents for that project. A state agency distribution list will be sent with the acknowledgement letter noting any agencies to which SCH has forwarded a copy of the NOP.

Step 3: NOP Review Period

Responsible agencies have a maximum of 30 calendar days from receipt of a NOP to comment on a proposed project (Section 15103 of the *CEQA Guidelines).* When a state agency comments on a NOP, a copy of the comment letter must be submitted to SCH.

The SCH does not compile and transmit state agency comment letters on NOPs after the end of the 30-day NOP comment period. Each commenting state agency must send its comment letter directly to the Lead Agency, with a copy to SCH.

Step 4: Submittal of Draft EIR to SCH

When a Draft EIR requires state agency review, at least **15 copies** must be submitted to SCH together with one copy of the NOC form. Lead Agencies are required to submit their Draft EIR and NOC form to SCH when: (a) the Lead Agency is a state agency, (b) the project involves one or more Responsible or Trustee state agencies, or (c) the project has statewide, regional, or areawide significance, as identified in Section 15206 of the *CEQA Guidelines*. Submittal of Draft EIRs to SCH must be done by the Lead Agency or by a party clearly authorized by the Lead Agency.

A Draft EIR may not be circulated for public review before the end of the comment period for the NOP (*CEQA Guidelines*, Section 15082[a]).

Step 5: Draft EIR Review Period

When a Draft EIR is submitted to SCH for distribution, the SCH number assigned to the NOP should be referenced on the NOC and/or EIR title page. If the document has no prior SCH number, the staff analyst will assign one.

The Draft EIR is reviewed briefly by the staff analyst to determine its scope and to identify the state agencies that should review it. Review dates are then assigned, a distribution list is attached to the NOC form, and the documents distributed to selected agencies. Reviewing agencies are selected for their expertise in a particular subject matter or geographical areas, or their responsibility for particular types of projects. The appendices of this *Handbook* contain a listing of all state agencies to whom SCH may send environmental documents for review.

The state review period typically starts on the same date the Draft EIR is submitted to the SCH if (a) the document is received by noon, and (b) the submittal is complete. Documents received in the afternoon typically are distributed by the next working day. The standard review period for a Draft EIR submitted to SCH is 45 calendar days (see *CEQA Guidelines*, Section 15105). Day 1 of the review period is the date the document is distributed by SCH. The review period ends at 5 p.m. on the 45th calendar day thereafter. On the day following the close of the review period (i.e., the 46th day), the SCH will prepare and mail a closing letter to the Lead Agency. Attached to the closing letter will be copies of any comments received from reviewing state agencies.

A shortened review period of not less than 30 days may be requested and subsequently granted under exceptional circumstances, as described below. Lead Agencies may request or provide for a longer review period. Such requests will be routinely honored. The SCH reserves the right to set a state review period of longer than 45 days. The Lead Agency will be notified of such longer review periods within 1 working day of document receipt by the SCH.

Step 6: Review of Draft EIR

When the Draft EIR is received by reviewing state agencies, those agencies assign the document to staff members for review, analysis and comment. Some state agencies refer the document to regional offices; others rely on their Sacramento staff. Agency comments are forwarded to SCH prior to the end of the assigned review period.

State agencies may request an extension of a review period while a document is in review. Reasonable requests for extensions will be granted. The SCH will notify the Lead Agency upon approval of an extension.

See *CEQA Guidelines*, Section 15096(d) for more information on how Responsible and Trustee state agencies are expected to comment.

Step 7: Draft EIR Comments

On the day following the close of the review period, a complete package of comments is forwarded to the Lead Agency by SCH.

Step 8: Final EIR

After receiving all public comments, including those of state agencies, the Lead Agency must prepare written responses and include them in the Final EIR. Refer to the *CEQA Guidelines*, Section 15088 for information on how to respond to comments; Section 15132 provides information on the content requirements for a Final EIR.

The Lead Agency then must certify the Final EIR before approving the project (*CEQA Guidelines*, Section 15090).

Although it is not required that Final EIRs be filed with the SCH, it is recommended that a copy be provided for information purposes.

State Clearinghouse EIR Process
STEP-BY-STEP CHECKLIST

		Lead Agency	State Clearinghouse	Reviewing Agency
1	Send NOP to State Clearinghouse with state agency distribution list, and directly to responsible and trustee state agencies.	X		
2	Assign SCH number, check distribution, send to additional state agencies if necessary.		X	
3	Review NOP and send comments to Lead agency with copy to State Clearinghouse within 30 days of receipt.			X
4	Prepare DEIR and send 15 copies with NOC form to State Clearinghouse.	X		
5	Assign DEIR state review period (normally 45 days) and distribute to selected state agencies.		X	
6	Review and comment on DEIR. Send comments to State Clearinghouse within assigned review period.			X
7	Forward state agency comments to Lead agency with closing letter following end of review period.		X	
8	• Respond to comments received. • Prepare and certify FEIR. • Make decision on project.	X		
9	File NOD with county clerk. Also file NOD with SCH if project requires discretionary approval from a state agency.	X		

9008

Step 9: Notice of Determination

Within five working days of approving a project for which an EIR was prepared, a local Lead Agency must file a Notice of Determination (NOD) with the county clerk of the county or counties where the project will be located. If the project requires discretionary approval from a state agency, the NOD also must be filed with SCH. State Lead Agencies must file the NOD with the SCH. The NOD must be signed by the proper authority of the Lead Agency and completed in full before SCH will post it.

The information required in a NOD is listed in Section 15094 of the *CEQA Guidelines*. The filing and posting of the NOD begins a 30-day statute of limitations on court challenges to the project approval under CEQA.

Helpful Hints

- Send the NOP to Responsible and Trustee agencies using certified mail or a similar method to ensure documentation of receipt.
- Submit one NOC with your Draft EIR.
- Submit 15 copies of each Draft EIR. Submit additional copies if you have identified more than 15 state agencies that should receive a copy.
- Include a cover letter to SCH if you have special instructions.
- Advise SCH in advance of Draft EIRs that may require special handling or oversized packaging.
- Call SCH in advance if you have any questions regarding these procedures.
- SCH does not retain copies of all environmental documents it receives.

SHORTENED REVIEW PROCESS

UNDER EXCEPTIONAL circumstances, and when requested by the Lead Agency, SCH may shorten the normal review periods for draft Negative Declarations and EIRs. It is strongly advised that the Lead Agency contact SCH prior to submitting a request for shortened review.

Written requests for shortened reviews *must* be submitted to SCH together with the required 15 copies of the draft environmental document. The request letter must explain why the shortened review is needed and identify prior approval from Responsible state agencies. Certain types of projects are *not* eligible for shortened reviews. Refer to the Shortened Review Request Procedures and criteria below (per Section 21091 (e) of the Public Resources Code).

Criteria for Approving Shortened Review

A request for a shortened review period will only be considered prior to the start of the state review period (i.e., SCH will not shorten a review period while the regular review period is running). SCH will consider a request for a shortened review if one or more of the following criteria are met:

1) The Lead Agency is operating under an extension of the one-year period for completion of an EIR and would not otherwise be able to complete the EIR within the extended period.
2) The public project applicant is under severe time constraints with regard to obtaining financing or exercising options which cannot be met without shortening the review period.
3) The document is a supplement to a draft EIR or proposed negative declaration or mitigated negative declaration previously submitted to the State Clearinghouse.
4) The health and safety of the community would be at risk unless the project is approved expeditiously.
5) The document is a revised draft EIR, or proposed negative declaration or mitigated negative declaration, where changes in the document are primarily the result of comments from agencies and the public.

The Lead Agency should provide evidence that there has been prior consultation with Responsible and Trustee state agencies. In the case of a Draft EIR, the Lead Agency should have sent a NOP to the Responsible and Trustee state agencies. For Negative Declarations, the Lead Agency should have previously consulted, formally or informally, with Responsible and Trustee state agencies.

Before submitting a shortened review request, the Lead Agency must have obtained verbal or written approval for a shortened review period from Responsible and Trustee state agencies. The request letter from the Lead Agency must identify which state agencies have been contacted and the agencies' responses to the request.

Shortened Review Request Procedures

1) The request must be made to SCH in writing by the decision-making body of the Lead Agency, or an authorized representative of the Lead Agency (e.g., City Manager or Planning Director), and shall be made on Lead Agency letterhead. When submitted by a representative, a copy of the resolution or ordinance from the decision-making body of the Lead Agency delegating authority should be attached.
2) The request must explain the "exceptional circumstances" (see criteria) for making the request.
3) The request must be accompanied by 15 copies of the environmental document.
4) The request will not be approved if the project has statewide, regional, or areawide significance (see next page).
5) SCH approval of a shortened review period must be granted before issuing the public notice of availability.
6) The public review period must be at least as long as the review period set by SCH.
7) The review period for a Negative Declaration shall not be shorter than 20 days. The Lead Agency must specify the requested length of the shortened review period.
8) The review period for a Draft EIR shall not be shorter than 30 days. The Lead Agency must specify the requested length of the shortened review period.
9) The Lead Agency may use the Shortened Review Application form contained in this *Handbook* (see Form E).

Projects of Statewide, Regional or Areawide Significance

(From *CEQA Guidelines*, Section 15206)

"A project is considered to be of statewide, regional or areawide significance if the project meets any of the following criteria and shall therefore be ineligible for a shortened review period:

(1) A proposed local general plan, element, or amendment thereof for which an EIR was prepared. If a Negative Declaration was prepared for the plan, element, or amendment, the document need not be submitted for review.

(2) A project has the potential for causing significant effects on the environment extending beyond the city or county in which the project would be located. Examples of the effects include generating significant amounts of traffic or interfering with the attainment or maintenance of state or national air quality standards. Projects subject to this subsection include:

(A) A proposed residential development of more than 500 dwelling units.

(B) A proposed shopping center or business establishment employing more than 1,000 persons or encompassing more than 500,000 square feet of floor space.

(C) A proposed commercial office building employing more than 1,000 persons or encompassing more than 250,000 square feet of floor space.

(D) A proposed hotel/motel development of more than 500 rooms.

(E) A proposed industrial, manufacturing, or processing plant, or industrial park planned to house more than 1,000 persons, occupying more than 40 acres of land, or encompassing more than 650,000 square feet of floor area.

(3) A project which would result in the cancellation of an open space contract made pursuant to the California Land Conservation Act of 1965 (Williamson Act) for any parcel of 100 or more acres.

(4) A project for which an EIR and not a Negative Declaration was prepared which would be located in the following areas of critical environmental sensitivity:

(A) The Lake Tahoe Basin.

(B) The Santa Monica Mountains Zone as defined by Section 67463 of the Government Code.

(C) The California Coastal Zone as defined in, and mapped pursuant to, Section 30103 of the Public Resources Code.

(D) An area within 1/4 mile of a wild and scenic river as defined by Section 5093.5 of the Public Resources Code.

(E) The Sacramento-San Joaquin Delta, as defined in Water Code Section 12220.

(F) The Suisun Marsh as defined in Public Resources Code Section 29101.

(G) The jurisdiction of the San Francisco Bay Conservation and Development Commission as defined in Government Code Section 66610.

(5) A project which would substantially affect sensitive wildlife habitats including but not limited to riparian lands, wetlands, bays, estuaries, marshes, and habitats for endangered, rare and threatened species as defined by Section 15380 of this Chapter.

(6) A project which would interfere with attainment of regional water quality standards as stated in the approved areawide waste treatment management plan.

(7) A project which would provide housing, jobs, or occupancy for 500 or more people within 10 miles of a nuclear power plant."

GRANTS PROCESS

(Presidential Executive Order 12372)

The Governor's Office of Planning and Research (OPR) is responsible for implementing Presidential Executive Order 12372. The Order requires federal agencies to use state and local processes of intergovernmental coordination for review of federal financial assistance applications, direct development activities, and environmental documents.

Many federal financial assistance applications specifically instruct the applicant to contact the State Single Point of Contact to ensure coordination of state and local review. The State Clearinghouse (SCH), within OPR, fulfills this role.

The *Catalog of Federal Domestic Assistance* (CFDA) contains an appendix entitled **"Programs Requiring Executive Order 12372 Review,"** which lists all the programs requiring review in the State of California. Grant applicants should consult the CFDA to determine whether the program they are applying for is generally subject to intergovernmental review. Applicants also may call SCH or check the SCH web site to make this determination.

Of those programs generally subject to intergovernmental review, only some of them may be subject to review by the State of California. OPR is responsible for selecting the federal programs which must be reviewed by the State. If you are applying for a federal grant or loan that is on the CFDA list and it is one of the programs selected for review by the State of California, you must contact the SCH as follows.

Applicants for federal assistance programs covered under E.O. 12372 must send a copy of the Federal Standard Form 424 to SCH and to their appropriate Areawide Clearinghouse (see page 14). Form 424 is the cover sheet of the grant application and is entitled, "Application for Federal Financial Assistance." *It is not necessary to transmit the entire application package to SCH.*

Form 424 is date stamped upon receipt by SCH, which begins a 30-day review period. If a Notice of Intent to Comment is received from any agency within the first 30 days of the review period, the review period is automatically extended 30 days, allowing a total review period of not more than 60 days. This extension is intended to allow a commenting agency sufficient time to submit comments.

SCH does not assign SCH numbers to grant applications, nor are the grant applications tracked in a database. (The grants database has been discontinued.)

SCH notifies the public of the grant applications by publishing a bi-monthly newsletter, which is distributed to state and local agencies and private individuals, upon request. Copies of all Form 424s received by SCH for the preceding two-week period are included in the *SCH Newsletter*. The *Newsletter* allows agencies and individuals the opportunity to review these applications, and to decide whether they would like to comment on a particular application. Since SCH does not receive a complete copy of the federal assistance proposal, any person wishing to review a proposal must contact the applicant directly for more information.

At the end of the review period, SCH will send a Letter of Compliance to the applicant upon request. This ends SCH involvement in the grant review process.

GENERAL ACTIVITIES AND SERVICES

ALTHOUGH coordinating state agency review of environmental documents and grants is the primary function of the State Clearinghouse, the office also has other responsibilities, and provides services that can be useful to those involved in the land use field. These services include posting of certain notices, publication of a bi-monthly newsletter, and providing a computer database search service. These activities are discussed below.

Filing Environmental Notices

As of January 1, 1985, the process for filing environmental notices under CEQA was changed in order to centralize and simplify the process. Notices of Completion, Exemption, and Determination that previously were filed with the Resources Agency are now filed with the Governor's Office of Planning and Research (at SCH).

Notice of Completion

(Public Resources Code, Section 21161)

CEQA requires that a Notice of Completion be filed at SCH by a public agency whenever a Draft EIR is completed. SCH requests that Lead Agencies also submit a NOC for Negative Declarations and NOPs. The Notice of Completion Form contained in the appendices to this *Handbook* satisfies this requirement.

Notice of Availability

(Public Resources Code, Section 21092)

Public notice of the availability of a Draft EIR or a Negative Declaration must be provided by the Lead Agency to enable public agencies and individuals to review and comment on the document.

Minimum Contents of Public Notice of Availability:

1) description of proposed project;
2) location of proposed project;
3) specific period during which comments on proposed project will be accepted;
4) date, time, and place of any public meetings on proposed project;
5) address where copies of Draft EIR or Negative Declaration are available for review; and
6) environmental effects of the project, if any.

The notice must be provided to all organizations and individuals who previously requested notice. At least one of the following notification methods must be used:

1) Publication by the Lead Agency in a newspaper of general circulation in the area affected by the proposed project.
2) Posting of the notice by the Lead Agency on- and off-site in the area where the project is to be located.
3) Direct mailing to the owners and occupants of contiguous property shown on the latest equalized assessment roll.

A Notice of Availability does not need to be filed with SCH. However, the Lead Agency may submit this notice together with its Draft EIR or Negative Declaration to provide additional information to state agencies.

Notice of Determination

(*CEQA Guidelines*, Sections 15075 and 15094)

A Notice of Determination (NOD) is a document filed by a public agency within 5 days after it approves or determines to carry out a project that is subject to the requirements of CEQA.

Filing the NOD starts a 30-calendar-day statute of limitations on court challenges to the project approval under CEQA. (See Form C for an example of a NOD form.) If a NOD is not filed, the statute of limitations is 180 days.

Filing requirements for state and local agencies differ as follows:

- Local Lead Agency: If a local Lead Agency is acting on the project, it must file the NOD with the county clerk of the county or counties where the project will be located within 5 working days of approving the project. In addition, if the project requires discretionary approval from any state agency, the local Lead Agency also must file a copy of the NOD with SCH.
- State Lead Agency: When a state agency is the Lead Agency, the NOD must be filed with SCH.

Minimum Contents of a Notice of Determination:

For a Negative Declaration:

(*CEQA Guidelines*, Section 15075)

1) identification of the project, including its common name or title, if possible;
2) location of the project;
3) brief description of the project;
4) date the agency approved the project;
5) the determination by the approving agency that the project in its approved form will not have a significant effect on the environment;
6) statement that a Negative Declaration was prepared pursuant to the provisions of CEQA; and

9015

7) address where a copy of the environmental document and record of project approval can be examined.

For an Environmental Impact Report (EIR):
(*CEQA Guidelines*, Section 15094)
1) identification of the project, including its common name or title, if possible;
2) location of the project;
3) brief description of the project;
4) date the agency approved the project;
5) determination by the approving agency whether the project in its approved form will have a significant effect on the environment;
6) statement that an EIR was prepared pursuant to the provisions of CEQA;
7) whether mitigation measures were made a condition of the approval of the project;
8) whether a statement of overriding considerations was adopted for the project;
9) whether findings were made pursuant to Section 15091 of the *CEQA Guidelines*; and
10) address where a copy of the final EIR and record of project approval may be examined.

Additionally, the notice shall be mailed to any person who has filed a written request for such notice.

Notice of Exemption
(*CEQA Guidelines*, Section 15062):

A Notice of Exemption (NOE) is a brief notice that can (but is not required to) be filed after a public agency has decided to carry out or approve a project it has determined is exempt from CEQA.

If a NOE is filed, it should be filed with the county clerk or SCH after the project has been approved. When a public agency approves an applicant's project, either the agency or the applicant may file a Notice of Exemption.

There are different filing requirements for state agencies, local agencies, and project applicants, as follows:

- *State Lead Agency:* If a state agency, board, or commission determines that a project is not subject to CEQA, it may file a NOE with SCH after the project has been approved.
- *Local Lead Agency:* When a local agency files this notice, it must be filed with the county clerk of the county or counties where the project is to be located.
- *Applicant:* When an applicant files a NOE, the notice must be filed in the same place as if it were filed by the Lead Agency. Additionally, the notice shall be accompanied by a certified document issued by the public Lead Agency stating that the agency has found the project to be exempt.

Additionally, the notice must be mailed to any person who has filed a written request for such notice.

This filing begins a 35-day statute of limitations on legal challenges to the Lead Agency's decision that the project is exempt from CEQA. If a NOE is not filed, a 180-day statute of limitations applies. (See sample NOE form in the appendices to this *Handbook*.)

Minimum Contents of a Notice of Exemption:
1) brief description of the project;
2) a finding that the project is exempt, including a citation that references the *CEQA Guidelines* or statutory section under which it is found to be exempt; and
3) brief statement of reasons to support the finding.

Computer Database

Environmental Documents

Environmental documents submitted to SCH for review are recorded in a computer database that contains records of all documents filed from 1983 to the present. The information in the database is taken directly from the NOC forms provided by the Lead Agency, and includes the following:
A. title of the project;
B. project's SCH number;
C. name and address of the Lead Agency;
D. name and telephone number of a contact person;
E. type of local action, e.g., specific plan, rezone, etc.;
F. location of the project;
G. description of the project;
H. type of document submitted for review;
I. issues discussed in the document;
J. the state agencies reviewing the document; and
K. the state review period.

This database can be a useful source of information for planners, consultants, and project applicants who are preparing new environmental documents. The SCH has search capabilities to find past environmental documents based on any of the variables listed above. The purpose of the database is to streamline the environmental document preparation process by allowing reuse of relevant information from prior documents for similar projects or issues, and for research.

The SCH charges $22.00 per hour for database searches and related printouts, with time billed for each complete quarter-hour (i.e., the charge for a 15-minute search would be $5.50). There is no fee for searches that take less than 15 minutes.

Notices

The SCH also maintains in its computer database a record of all Notices of Exemption and Determination received since

January 1, 1985. When a NOE or NOD is received, all pertinent data from the form is entered into the computer. It is then possible to verify that a notice has been received by searching under the SCH number (if applicable), the Lead Agency name, project title, or project location. This system has made it easier for the Lead and Responsible agencies, attorneys, and interested parties to confirm the date that a notice was filed at SCH. Copies of all NODs and NOEs received by SCH are kept on file for a period of five years. All records older than five years are removed to archives or destroyed.

Grants

Pursuant to Presidential Executive Order 12372, SCH receives certain State-selected federal grant applications for circulation. Prior to 1997, SCH entered the information from the Form 424 into a database. The database can be searched for grant applications received prior to 1997. The information includes the applicant name, the Catalog of Federal Domestic Assistance (CFDA) number, federal program title, the amount of federal money requested, and a contact name and phone number for each application.

Newsletter

The *SCH Newsletter* is published twice per month. It contains general information regarding SCH, a listing of all federal notices received, a brief listing of all environmental documents received (including NOPs, NOCs, NODs, NOEs, Final EIRs, etc.), and a copy of all Form 424s for federal grant applications received during the preceding two weeks. The newsletter is mailed to approximately 140 agencies and individuals, including state and local agencies, all areawide clearinghouses, some city and county planning departments, depository libraries, and other agencies and individuals upon request.

Faxing

With the increased use of and reliance upon facsimile machines, SCH has developed the following policies regarding faxed information.

In all instances, the faxed document should be addressed to the proper staff person and the fax must be followed up with a mailed copy of the document that expressly mentions the date and time that the fax was sent.

State Agency Comments: The faxing of state agency comments on environmental documents is permitted.

Environmental Documents: The SCH will not accept Negative Declarations or Draft EIRs by fax. After pre-arrangement with the appropriate SCH staff analyst, NOPs may be accepted by fax.

Environmental Notices: NODs and NOEs may be accepted by fax. If the Lead Agency follows up with a duplicate mailed copy of the NOD or NOE, the Lead Agency must indicate to SCH that a prior copy was sent by fax. This is necessary to avoid duplication of posting and data entry by SCH staff.

Federal Grant Form 424: Federal Form 424 will be accepted by fax. It is the express responsibility of the grant applicant to ensure Clearinghouse receipt of the fax.

State Clearinghouse Fax Number:
(916) 323-3018

Useful Web Sites

GENERAL CEQA INFORMATION

Agency Definitions

Lead Agency (*CEQA Guidelines* Section 15367) — the public agency that has the principal responsibility for carrying out or approving a project. *Criteria for determining which agency will be the Lead Agency for a project are contained in Section 15051.*

Local Agency (*CEQA Guidelines* Section 15368) — any public agency other than a state agency, board, or commission.

Public Agency (*CEQA Guidelines* Section 15379) — includes any state agency, board, or commission and any local or regional agency, as defined in the *CEQA Guidelines*. It does not include agencies of the federal government.

Responsible Agency (*CEQA Guidelines* Section 15381) — a public agency that proposes to carry out or approve a project, for which a Lead Agency is preparing or has prepared an EIR or Negative Declaration. For purposes of CEQA, the term "Responsible Agency" includes all public agencies other than the Lead Agency that have discretionary approval power over the project.

State Agency (*CEQA Guidelines* Section 15383) — a governmental agency in the executive branch of state government and funded primarily by the State Treasury. Health and Safety Code Section 25199.1 (o) defines a "state agency" as "any agency, board, or commission of state government . . . include[ing] an air pollution control district and an air quality management district."

Trustee Agency (*CEQA Guidelines* Section 15386) — a state agency having jurisdiction by law over natural resources affected by a project that are held in trust for the people of the State of California. Trustee agencies include:

- California Department of Fish and Game
- State Lands Commission
- State Department of Parks and Recreation
- University of California

Types of Documents

It is the responsibility of the Lead Agency to determine the appropriate type of CEQA document for its project based on interpretation of the CEQA Statutes and *CEQA Guidelines*.

Negative Declaration (*CEQA Guidelines*, Section 15371) — a written statement by the Lead Agency briefly describing the reasons why a proposed project, not exempt from CEQA, will not have a significant effect on the environment and, therefore, does not require the preparation of an EIR.
The contents of the Negative Declaration are described in *CEQA Guidelines*, Section 15071.

Environmental Impact Report (*CEQA Guidelines*, Section 15362) — a detailed statement prepared under CEQA describing and analyzing the significant environmental effects of a project and discussing ways to mitigate or avoid the effects. The contents are also listed under *CEQA Guidelines*, Article 9.

Notice of Preparation (*CEQA Guidelines*, Section 15375) — a brief notice sent by a Lead Agency to notify the Responsible, Trustee, and involved federal agencies that the Lead Agency plans to prepare an EIR for the project. The purpose of the notice is to solicit guidance from those agencies as to the scope and content of the environmental information to be included in the EIR.

Project EIR (*CEQA Guidelines*, Section 15161) — The most common type of EIR examines the environmental impacts of a specific development project. This type of EIR should focus primarily on the changes in the environment that would result from the development project. The EIR shall examine all phases of the project including planning, construction, and operation.

Program EIR (*CEQA Guidelines*, Section 15168) — an EIR that may be prepared on a series of actions that can be characterized as one large project and are related either geographically, or are "logical parts in the chain of contemplated actions, or are in connection with issuance of rules, regulations, plans, or other general criteria to govern the conduct of a continuing program, or as individual activities carried out under the same authorizing statutory or regulatory authority and having generally similar environmental effects which can be mitigated in similar ways."

Supplement to an EIR (*CEQA Guidelines*, Section 15163) — The Lead or Responsible Agency may choose to prepare a supplement to an EIR rather than a subsequent EIR if only minor additions or changes would be necessary to make the previous EIR adequately apply to the project in the changed situation.

The supplement to the EIR need contain only the information necessary to make the previous EIR adequate for the project as revised. A supplement to an EIR shall be given the same kind of notice and public review as is given to a draft EIR under Section 15087. A supplement to an EIR may be circulated by itself without re-circulating the previous draft or final EIR.

Subsequent EIR and Negative Declaration (*CEQA Guidelines*, Section 15162) — Where an EIR or Negative Declaration has been prepared, it is not necessary to prepare an additional EIR or Negative Declaration unless substantial changes occur with respect to the circumstances under which the project is undertaken, and these changes will require important revisions in the previous EIR or Negative Declaration due to the involvement of new significant environmental impacts not covered in a previous document.

Addendum to an EIR or Negative Declaration (*CEQA Guidelines*, Section 15164)—The Lead or Responsible Agency shall prepare an addendum to an EIR or Negative Declaration if only minor technical changes or additions are necessary to make the document adequate, and the changes made by the addendum do not raise important new issues about the significant effects on the environment.

An addendum need not be circulated for public review but can be included in or attached to the final EIR or adopted Negative Declaration. The decision-making body shall consider the addendum with the final EIR or Negative Declaration prior to making a decision on the project.

Final EIR (*CEQA Guidelines*, Sections 15132 and 15362) — an EIR containing the information contained in the draft EIR, comments either verbatim or in summary received in the review process, a list of persons commenting, and the response of the Lead Agency to the comments received.

Comments

Authority to Comment (*CEQA Guidelines*, Section 15044) — Any person or entity other than a Responsible Agency may submit comments to a Lead Agency concerning any environmental effects of a project being considered by the Lead Agency.

Response to Notice of Preparation (*CEQA Guidelines*, Section 15082[b] and Section 15103) — Within 30 days after receiving the Notice of Preparation, each Responsible Agency shall provide the Lead Agency with specific detail about the scope and content of the environmental information related to the Responsible Agency's area of statutory responsibility which must be included in the draft EIR.

The response, at a minimum, shall identify the significant environmental issues and reasonable alternatives and mitigation measures that the Responsible Agency will need to have explored in the DEIR. The response shall also identify whether the agency will be a Responsible Agency or Trustee Agency for the project.

If a Responsible Agency fails to reply within 30 days with either a response or a well-justified request for additional time, the Lead Agency may assume that the Responsible Agency has no response to make and ignore a late response.

Responsible Agency Comments on Draft EIRs and Negative Declarations (*CEQA Guidelines*, Section 15096[d]) — A Responsible Agency should review and comment on draft EIRs and Negative Declarations for projects that the Responsible Agency would later be asked to approve. Comments should focus on any shortcomings in the EIR, the appropriateness of using a Negative Declaration, or additional alternatives or mitigation measures the EIR should include. The comments shall be limited to those project activities within the agency's area of expertise or that are required to be carried out or approved by the agency or that will be subject to the exercise of powers by the agency. Comments shall be as specific as possible and supported by either oral or written documentation.

Consideration of Comments on a Negative Declaration (*CEQA Guidelines*, Section 15074[b]) — Prior to approving the project, the decision-making body of the Lead Agency shall consider the proposed Negative Declaration together with any comments received during the public review process. They shall approve the project if they find there is no substantial evidence the project will have a significant effect on the environment.

Evaluation of and Response to EIR Comments (*CEQA Guidelines*, Section 15088)—The Lead Agency shall evaluate comments on environmental issues received from persons who reviewed the draft EIR and shall prepare a written response. The Lead Agency shall respond to comments received during the noticed comment period and any extensions and may respond to late comments.

The written response shall describe the disposition of significant environmental issues raised (e.g., revisions to the proposed project to mitigate anticipated impacts or objections). In particular, the major environmental issues raised when the Lead Agency's position varies from recommendations and objections raised in the comments must be addressed in detail giving reasons why specific comments and sugges-

tions were not accepted. There must be good faith, reasoned analysis in response. Conclusory statements unsupported by factual information will not suffice.

The response to comments may take the form of a revision to the draft EIR or may be a separate section in the final EIR. Where the response to comments makes important changes in the information contained in the text of the draft EIR, the Lead Agency should either revise the text in the body of the EIR, or include marginal notes showing that the information is revised in the response to comments.

Contents of the Final EIR (*CEQA Guidelines*, Section 15132[d]) — The Final EIR shall consist of, among other things, the responses of the Lead Agency to significant environmental points raised in the review and consultation process.

Failure to Comment (*CEQA Guidelines*, Section 15207) — If any public agency or person who is consulted with regard to an EIR or Negative Declaration fails to comment within a reasonable time as specified by the Lead Agency, it shall be assumed, without a request for a specific extension of time, that such agency or person has no comment to make. Although the Lead Agency need not respond to late comments, it may choose to respond.

Retention and Availability of Comments (*CEQA Guidelines*, Section 15208) — Comments received through the consultation process shall be retained for a reasonable period and available for public inspection at an address given in the final EIR. Comments that may be received on a draft EIR or Negative Declaration under preparation shall also be considered and kept on file.

Purposes of Review

As defined in the *CEQA Guidelines*, Section 15200, the purposes of reviewing Environmental Impact Reports (EIRs) and Negative Declarations include:

a) Sharing expertise,
b) Disclosing agency analyses,
c) Checking for accuracy,
d) Detecting omissions,
e) Discovering public concerns, and
f) Soliciting counter proposals.

STATE CLEARINGHOUSE FORMS

THIS SECTION contains the standard forms used by SCH. Although the forms in this section have been carefully developed to transmit the information required under CEQA, the statute does not require agencies to use these particular forms. Agencies are free to devise their own forms. However, agencies choosing to create their own forms must be sure to include all the information required in the *CEQA Guidelines*.

SCH strongly encourages Lead Agencies to use the following forms.

Form A: ***Notice of Completion***

CEQA Guidelines, Section 15085 requires agencies to file a Notice of Completion (NOC) form with OPR as soon as the Draft EIR is complete. If the Draft EIR will be subject to a state review period, SCH requires that the NOC form accompany the submittal of the required 11 copies of the environmental document.

The NOC form should be used as a document transmittal form when submitting ***any type*** of environmental document to SCH. Note the *Document Type* section on the form and check the appropriate box. This form expedites the processing of environmental documents submitted to SCH for review. SCH also requests that this form be used when submitting Negative Declarations and federal environmental documents.

Form B: ***Notice of Preparation***

CEQA Guidelines, Section 15082 discusses the required contents of a Notice of Preparation (NOP).

Form C: ***Notice of Determination***

CEQA Guidelines, Section 15075 outlines the content requirements for filing a Notice of Determination (NOD). The NOD form in this *Handbook* can be used to file with SCH and/or the county clerk.

Form D: ***Notice of Exemption***

CEQA Guidelines, Section 15062 discusses the content requirements for filing a Notice of Exemption (NOE). The NOE form in this *Handbook* can be used to file with SCH and/or the county clerk.

Form E: ***Shortened Review***

Public Resources Code Section 21091 allows for shortened review periods under certain circumstances. A form for requesting shortened review has been provided in this *Handbook* to ensure that the requesting agency provides all the information necessary for SCH to make a determination. For more information on this process, refer to the Shortened Review Process section of this *Handbook*.

Explanation of the Notice of Completion Form

This form is ***required*** to be submitted with 15 copies of every draft Environmental Impact Report and Negative Declaration that is reviewed through the State Clearinghouse (see *CEQA Guidelines* Section 15085[d]). It is used by the Clearinghouse to transmit all environmental documents.

LEAD AGENCY

Project Title: This is the project's common name. It is best to use project specific words in order to facilitate database searches.

Lead Agency: This is the name of the public agency that has legal responsibility for preparation and review of the environmental document.

Contact Person: Name of contact person from the Lead Agency. This should not be the consultant's name.

Phone: Phone number of the contact person at Lead Agency.

Street Address: This is the mailing address for the contact person at the Lead Agency. State comments will be mailed to this address.

City: City of the Lead Agency address. This is not necessarily the city in which the project is located.

Zip: Zip code of the Lead Agency. Please indicate the new nine-digit zip code if applicable.

County: County of the Lead Agency address. This is not necessarily the county in which the project is located.

PROJECT LOCATION

County: County in which the project is located. Most state agencies assign projects for review according to the county of the project. The State Clearinghouse is not always able to determine the location of the project based on the address of the Lead Agency. An example of this problem is Los Angeles Department of Airports projects located at Ontario International Airport.

City/Nearest Community: City or town in which the project is located, or the community nearest the location of the project.

Cross Streets: Indicate the nearest major cross street or streets.

Total Acres: The total area encompassed by the project site gives some indication of the scope of the project and its regional significance.

Assessor's Parcel Number: For locational purposes.

Section, Township, Range and Base: Please indicate base meridian. If you are not able to provide Assessor's Parcel Number, please indicate Section, Township, and Range.

Highways, Airports, Railroads, Schools, and Waterways (including streams or lakes): These identifiers are of consequence to many projects. By restricting the information to those features within a two-mile radius of the project site, unnecessary data collection can be avoided. Please indicate the name(s) of the waterways, airports, railroads, schools, and the route number(s) of the state highways.

DOCUMENT TYPE

This identifies the nature of the environmental document. Mark appropriate blanks with an "X."

Local Action Type

This helps reviewers understand the type of local approvals that will be required for the project and the nature of the project and its environmental documentation. Mark appropriate blanks with "X."

Development Type

This data category helps identify the scope of the project for distribution purposes. Additionally, the information serves to identify projects of a similar character to assist in the reuse of environmental documents. For some of the development types, the form asks for the number of acres, square footage, and number of permanent employees. Fill in the blanks.

PROJECT ISSUES DISCUSSED IN DOCUMENT

These are the topics on which the environmental document focuses attention. These are not necessarily the adverse impacts of the project, but the issues which are discussed in some depth. Check appropriate blanks.

PRESENT LAND USE AND ZONING

This enables the agencies to understand the extent of the changes proposed and again helps to identify projects with similar environmental issues for later reuse of information.

PROJECT DESCRIPTION

This response should provide a thorough description of the proposed project, enabling reviewing agencies to understand the total project concept. The data categories can provide guidance and structure to the explanation given.

REVIEWING AGENCIES CHECKLIST:

The back of the form lists the agencies and departments to whom SCH may distribute a draft document. The Lead Agency can indicate for SCH's information any Responsible, Trustee, or concerned agencies they would like to review the document, or who have previously been involved in the project's review. Any agencies that received the document directly from the Lead Agency also should be marked.

PUBLIC REVIEW PERIOD

This section is to be filled in when the Notice of Completion form is being filed and not being submitted with environmental documents.

CONSULTING FIRM

This information is to be filled in only if applicable.

APPLICANT

This identifies whether the applicant/project proponent is a private developer or the Lead Agency.

Appendix A

Projects Requiring State Clearinghouse Review

As required by the *CEQA Guidelines*, Sections 15205 and 15206, the following types of environmental documents must be submitted to the State Clearinghouse for state agency review:

1. *Where the lead agency is a state agency (Guidelines* Section 15205*).*

2. *Where there is a responsible or trustee state agency (Guidelines* Section 15205*).*

3. *Where the project has statewide, regional, or areawide significance (Guidelines* Section 15206*).*

With regard to the third criterion, the *CEQA Guidelines* deem the following types of projects as having *statewide, regional, or areawide significance:*

1. A proposed local general plan, element, or amendment for which an EIR was prepared.

2. A proposed residential development of more than 500 dwelling units.

3. A proposed shopping center or business establishment that will employ more than 1,000 persons or encompass more than 500,000 square feet of floor space.

4. A proposed hotel/motel development of more than 500 rooms.

5. A proposed industrial, manufacturing, or processing plant, or industrial park, planned to house more than 1,000 persons and occupy more than 40 acres of land or encompass more than 650,000 square feet of floor area.

6. A project that would result in the cancellation of a Williamson Act Contract for any parcel of 100 or more acres.

7. A project for which an EIR was prepared and which is located in and substantially impacting an area of critical environmental sensitivity. This includes the Lake Tahoe Basin, the California Coastal Zone, the Sacramento-San Joaquin Delta, the Suisun Marsh, any area within 1/4 mile of a wild and scenic river, and the jurisdiction of the San Francisco Bay Conservation and Development Commission.

8. A project that would substantially affect sensitive wildlife habitats such as riparian lands, wetlands, bays, estuaries, marshes, and habitats for rare and endangered species.

9. A project that would interfere with the attainment of regional water quality standards as stated in the approved areawide wastewater management plan.

10. A project that would provide housing, jobs, or occupancy for 500 or more people within ten miles of a nuclear power plant.

Appendix D

Time Periods for Review of Environmental Documents

Document or Action	Effect	Time Period	CEQA Statute & Guidelines
Review of application for completeness	Lead agency has 30 days to review an application for completeness. If no determination is made within this period, it will be deemed complete	30 days	15060 15101
Lead Agency acceptance of an application as complete	Begins maximum one-year period to complete environmental review for certain projects	1 year	15060 PRC 21100.2, 21151.5
Initial Study	Provides 30 days to determine whether an EIR or Neg Dec will be required	30 days	15102
Notice of Preparation	Provides 30 days from receipt of NOP for agencies to respond to the lead agency	30 days	15103
Convening of Scope and Content meetings	Requires a meeting requested by an agency or by the applicant to be convened within 30 days of the request	30 days	15104
Public Review	When an environmental document is submitted to the Clearinghouse, the public review period shall be at least as long as the review set by the Clearinghouse	EIR: 30-60 days ND: 20-30 days	15105
Review by State Agencies	Provides standard 45 days for EIRs and standard 30 days for NDs, through State Clearinghouse	EIR: 45 days ND: 30 days	15105
Completion of Negative Declaration	For a private project, the Neg Dec must be adopted within 180 days after the application is complete	180 days	15107 PRC 21100.2, 21151.5
Completion and certification of EIR	For a private project, an EIR must be completed within one year – May be extended once for up to 90 days	1 year	15108
Notice of Determination – filing	Provides that the notice shall be filed within 5 days	5 days	15075 15094
Notice of Determination – challenges	Filing starts a 30-day statute of limitations to court challenges to the approval of the project	30 days	15075 15094 15112
Suspension of time limits	Unreasonable delay of document preparation caused by the applicant allows suspension of time periods in Guidelines, Sections 15107 and 15108	varies	15109
Projects with federal involvement	Time limits may be waived or superseded by federal time requirements		15110

NOTE: *Related time periods for project approval are contained in Chapter 4.5 of the Government Code beginning at Section 65920.*

9032

Appendix E

Explanation of the State Clearinghouse Number

The State Clearinghouse Number (SCH #) is a ten-digit number which is unique to each project reviewed through the State Clearinghouse. The sequencing of the numbers has evolved through the years. As of January 1, 2000, a new sequencing went into effect. The first four digits indicate the year in which the document was processed by the State Clearinghouse (or *first* processed in the case of projects that circulate through the State Clearinghouse several times). The next two digits indicate the month in which the document was processed. The next digit indicates the geographic location of the project (i.e. "region"). The last three digits indicate the sequence in which the document was processed for that month.

Example: **2000053089** -- *The document having this SCH number was the eighty-ninth document processed in May of 2000 for Region #3.*

2000	05	3	089
YEAR	*MONTH*	*REGION*	*SEQUENCE NUMBER*

The same State Clearinghouse number must be used on all documents relating to a particular project. This enables the Clearinghouse to keep better records of projects and assures that comments and subsequent documents will be correctly filed for future reference.

Please Note: The new sequencing required changing the SCH # from an 8-digit to 10-digit format. Please be advised that all documents received prior to January 1, 2000 will now have a "19" preceding the existing SCH #. We request that you add these two digits to the SCH # of any documents you forward to us that were numbered in the 8-digit format. For example, a project from 1999 would have an SCH # of 1999122001. Additionally, all new environmental documents will be assigned a 10-digit number (i.e. beginning with "2000").

IMPORTANT: Always identify any known SCH number on all communication with the State Clearinghouse. It is especially important to reference the SCH number on environmental documents that have previously been circulated by the Clearinghouse, as the staff can use these numbers for cross-reference.

EXTRA COPY OF TEST CLAIM IN DRAWER BELOW

DEPARTMENT OF FINANCE
ARNOLD SCHWARZENEGGER, GOVERNOR
915 L STREET ■ SACRAMENTO CA ■ 95814-3706 ■ WWW.DOF.CA.GOV

March 8, 2004

RECEIVED
MAR 11 2004
COMMISSION ON
STATE MANDATES

Ms. Paula Higashi
Executive Director
Commission on State Mandates
980 Ninth Street, Suite 300
Sacramento, CA 95814

Dear Ms. Higashi:

As requested in your letter of October 8, 2003, the Department of Finance has reviewed the test claim submitted by the Clovis Unified School District (claimant) asking the Commission to determine whether specified costs incurred under various statutes and executive orders cited in the test claim are reimbursable State mandated costs (Claim No. CSM-03-TC-17 "California Environmental Quality Act"). Commencing with Part III on page 185, of the test claim, claimant has identified new duties, which it asserts are reimbursable State mandates.

As a result of our review, we have concluded that this test claim does not constitute a State reimbursable mandate for the following reasons:

1) California Environmental Quality Act (CEQA) requirements are not unique to local government.

In *County of Los Angeles v. State of California*, (1987) 43 Cal.3d 46, the California Supreme Court held that "...The language in Section 6 (of Article XIII B) is far too vague to support an inference that it was intended that, each time the Legislature passes a law of general application, it must discern the likely effect on local governments and provide an appropriation to pay for any incidental increase in local costs." Therefore, although CEQA may result in additional costs to local entities, those costs are not reimbursable because they are not unique to local government.

The following references show that CEQA is not unique to local government:

Chapter 1514, Statutes of 1984, referenced in the test claim, added section 21001.1 to the Public Resources Code, which reads:

> "The Legislature further finds and declares that it is the policy of the state that projects to be carried out by public agencies be subject to the same level of review and consideration under this division as that of private projects required to be approved by public agencies."

Section 15002, paragraph (b) of the California Code of Regulations, and cited by the test claim, states:

> "Government Action. CEQA applies to government action. This action may involve: ...
> (3) Private activities which require approval from a governmental agency."

Paragraph (c) then states:

> "Private Action. Private action is not subject to CEQA *unless the action involves governmental participation, financing, or approval.*" (emphasis added)

2) CEQA applies to proposed projects and school facilities construction projects proposed by school districts are discretionary.

Nothing in State law or regulation requires a school district to construct additional school facilities or to acquire any site for the purpose of constructing a school building. Instead, the law provides school districts with flexibility, discretion, and choice over the manner in which districts elect to house their student populations. For example, school districts have the discretion to operate year round multi-track schools or two kindergarten sessions per day, use portable classrooms, or transport students to under-used schools. It is the district's voluntary decision to construct a school facility rather than using an aforementioned alternative that forced the district to carry out the activities required under CEQA.

In *Department of Finance v. Commission On State Mandates* (2003) 30 Cal.4th 727, the California Supreme Court confirmed the merits of the argument that where a local government entity voluntarily participates in a statutory program, the State may require the entity to comply with reasonable conditions without providing additional funds to reimburse the entity for increased level of activity. Therefore, since the project is at the school district's discretion, the costs of complying with CEQA are not reimbursable.

3) The costs incurred under CEQA are allowable costs for the use of new construction grants provided by the State Allocation Board.

The State Allocation Board provides new construction grants through the State School Facilities Program (SFP) to cover the State's share of all necessary project costs, which would include costs incurred under CEQA. That State's share is typically 50 percent, but may be up to 100 percent if a district receives financial hardship funding. Therefore, any necessary costs of CEQA are, in fact, funded through voluntary participation in the SFP.

4) School districts have the authority to charge development fees to finance construction projects.

Chapter 6 of Part 10.5 of Division 1 of Title 1 of the Education Code authorizes school districts to levy fees against any construction within its district boundaries for the purpose of funding school construction.

Section 17556(d) of the Government Code provides that the Commission on State Mandates shall not find a reimbursable mandate in a statute or executive order if the affected local agencies have authority to levy service charges, fees, or assessments sufficient to pay for the mandated program in the statute or executive order. In its April 1991 decision in *County of Fresno v. State of California* (1991) 53 Cal.3d, 482, the State Supreme Court held that this code section is facially valid under Section 6 of Article XIII B of the California Constitution. Further, in *Kathleen Connell v. Superior Court of Sacramento County* (1997) 59 Cal.App.4th 382, the court found that the fee authority can exist even if it is not economically feasible or practical to implement the fee. Therefore, although CEQA may result in additional costs to school districts,

those costs are not reimbursable because the affected districts have the authority to cover those costs through development fees.

As required by the Commission's regulations, we are including a "Proof of Service" indicating that the parties included on the mailing list which accompanied your October 8, 2003, letter have been provided with copies of this letter via either United States Mail or, in the case of other state agencies, Interagency Mail Service.

If you have any questions regarding this letter, please contact Walt Schaff, Principal Program Budget Analyst at (916) 445-0328 or Keith Gmeinder, State mandates claims coordinator for the Department of Finance, at (916) 445-8913.

Sincerely,

Jeannie Oropeza

DECLARATION OF WALT SCHAFF
DEPARTMENT OF FINANCE
CLAIM NO. CSM-03-TC-17

1. I am currently employed by the State of California, Department of Finance (Finance), am familiar with the duties of Finance, and am authorized to make this declaration on behalf of Finance.

2. We concur that the various statutes and executive orders sections relevant to this claim are accurately quoted in the test claim submitted by claimants and, therefore, we do not restate them in this declaration.

I certify under penalty of perjury that the facts set forth in the foregoing are true and correct of my own knowledge except as to the matters therein stated as information or belief and, as to those matters, I believe them to be true.

MAR - 8 2004

at Sacramento, CA

Walt Schaff

PROOF OF SERVICE

Test Claim Name: California Environmental Quality Act
Test Claim Number: CSM-03-TC-17

I, the undersigned, declare as follows:
I am employed in the County of Sacramento, State of California, I am 18 years of age or older and not a party to the within entitled cause; my business address is 915 L Street, 7th Floor, Sacramento, CA 95814.

On March 5, 2004, I served the attached recommendation of the Department of Finance in said cause, by facsimile to the Commission on State Mandates and by placing a true copy thereof: (1) to claimants and nonstate agencies enclosed in a sealed envelope with postage thereon fully prepaid in the United States Mail at Sacramento, California; and (2) to state agencies in the normal pickup location at 915 L Street, 7th Floor, for Interagency Mail Service, addressed as follows:

COMMISSION ON
STATE MANDATES

Paula Higashi, Executive Director
Commission on State Mandates
U.S. Bank Plaza Building
980 Ninth Street, Suite 300
Sacramento, California 95814

Re: Test Claim 03-TC-17
Clovis Unified School District
California Environmental Quality Act (CEQA)

Dear Ms. Higashi:

I have received the comments of the Department of Finance ("DOF") dated March 8, 2004[1], to which I now respond on behalf of the test claimant.

A. The Comments of the DOF are Incompetent and Should be Excluded

The test claimant objects to the Opposition and Comments of the DOF, in total, as being legally incompetent and move that they be excluded from the record. Title 2, California Code of Regulations, Section 1183.02(d) requires that any:

> "...written response, opposition, or recommendations and supporting documentation shall be signed at the end of the document, under penalty of perjury by an authorized representative of the state agency, with the declaration that it is true and complete to the best of the representative's personal knowledge or information or belief."

DOF's comments do not comply with this essential requirement. Since the Commission cannot use comments unsupported by declarations, but must make conclusions based upon an analysis of the statutes and facts supported in the record, test claimant requests that the comments of the DOF not be included in the Staff's Analysis.

[1] The proof of service attached indicates the document was mailed on March 5, 2004, three days prior.

B. CEQA Requires Additional Duties For School Districts

DOF first argues that CEQA is entirely a law of general application and, therefore, not a reimbursable mandate. Factually, DOF is mistaken.

Subdivision (b) of Education Code Section 17025 provides, in part:

> "...
> (b) ...Notwithstanding any other law, for purposes of Division 13 (commencing with Section 21000) of the Public Resources Code, the applicant district[2] shall be deemed to be the 'lead agency' with regard to any project funded for that district under this chapter."

Therefore, school districts, when constructing any new school or reconstructing or altering any existing building, is not only required to comply with CEQA, it is also required to fulfill the governmental duties of a lead agency. Other persons and entities are not required to do so. Therefore, as to school districts, CEQA is not entirely a law of general application.

C. Constructing New School Facilities is not Optional

DOF argues that "[N]othing in State law or regulations requires a school district to construct additional school facilities or to acquire any site for the purpose of constructing a school building" and, therefore, complying with the mandates of CEQA are discretionary.

Since its admission to the Union, California has assumed specific responsibility for a statewide public education system open on equal terms to all. The Constitution in 1849 directed the Legislature to "provide for a system of common schools, by which a school shall be kept up and supported in each district." That constitutional command, with the additional proviso that the school maintained by each district be "free" has persisted to the present day. *Butt v. State of California*[3] (1992) 4 Cal.4th 668, 680 Acquiring school sites and constructing school buildings has its root source in the California Constitutional requirement that state and its school districts provide a free public education to every child in the state. As the student population grows, so does the

---

[2] Subdivision (a) refers to an "applicant district" as any school district.

[3] Pursuant to Title 2, California Code of Regulations, Section 1183.03(2), a copy of Butt v. State of California is attached hereto as Exhibit "A".

need for additional school facilities.

The California Research Bureau has published a study entitled "School Facility Financing - A History of the Role of the State Allocation Board and Options for the Distribution of Proposition 1A Funds." (Cohen, Joel, February 1999)[4] In the study, the plight of school districts is described therein as follows:

> "As California enters the 21st Century, its public schools face many challenges. One significant challenge is the serious disrepair of an aging school facility infrastructure. Another challenge is the anticipated growth of nearly 2 million K-12 students during the next decade that will require many districts to build new schools to meet burgeoning student demand." (Cohen, *op.cit.*, at page 1)

This independent study does not say school districts will have the discretion to build new schools, it concludes that districts will be required to build them to meet burgeoning demand.

Even with Proposition 1A money, the report still projected a shortfall of available funds for school construction:

> "The Department of Finance has estimated that $16 billion is needed over the next decade for public school construction and rehabilitation.... However, while the amount (provided by Proposition 1A) appears to be generous, it will not be enough to meet the entire anticipated need of the state. Based on the Department of Finance projections, the six years following this bond issue will require roughly an additional $10 billion in State money." (Cohen, *op.cit.*, at page 19)

Proposition 55 appeared on the March 2, 2004 ballot which enacted the Kindergarten-University Public Education Facilities Bond Act of 2004. According to the official ballot information pamphlet[5] prepared by the California Attorney General and published by the

[5] A true and exact copy of that portion of the ballot information pamphlet relative to Proposition 55 (excluding partisan arguments and text of proposed law) as it appears on the website of the Secretary of State is attached hereto as Exhibit "C" and is

California Secretary of State, school districts identified a need to construct new schools to house nearly 1 million pupils and modernize schools for an additional 1.1 million pupils. For the DOF to argue that school districts need not acquire new school sites or construct additional school facilities ignores practical reality.

Finally, a finding of legal compulsion is not an absolute prerequisite to a finding of a reimbursable mandate. The controlling case law on the subject of non-legal compulsion is still *City of Sacramento v. State of California* (1990) 50 Cal.3rd 51 (hereinafter referred to as *Sacramento II).*

(1) *Sacramento II* Facts:

The adoption of the Social Security Act of 1935 provided for a Federal Unemployment Tax ("FUTA"). FUTA assesses an annual tax on the gross wages paid by covered private employers nationwide. However, employers in a state with a federally "certified" unemployment insurance program receive a "credit" against the federal tax in an amount determined as 90 percent of contributions made to the state system. A "certified" state program also qualifies for federal administrative funds.

California enacted its unemployment insurance system in 1935 and has sought to maintain federal compliance ever since.

In 1976, Congress enacted Public Law number 94-566 which amended FUTA to require, for the first time, that a "certified" state plan include coverage of public employees. States that did not alter their unemployment compensation laws accordingly faced a loss of both the federal tax credit and the administrative subsidy.

In response, the California Legislature adopted Chapter 2, Statutes of 1978 (hereinafter chapter 2/78), to conform to Public Law 94-566, and required the state and all local governments to participate in the state unemployment insurance system on behalf of their employees.

(2) *Sacramento I* Litigation

The City of Sacramento and the County of Los Angeles filed claims with the State Board of Control seeking state subvention of the costs imposed on them by chapter 2/78. The State Board denied the claim. On mandamus, the Sacramento Superior Court overruled the Board and found the costs to be reimbursable. In *City of*

---

incorporated herein by reference.

Sacramento v. State of California (1984) 156 Cal.App.3d 182 (hereinafter *Sacramento I*) the Court of Appeal affirmed concluding, *inter alia*, that chapter 2/78 imposed state-mandated costs reimbursable under section 6 of article XIII B. It also held, however, that the potential loss of federal funds and tax credits did not render Public Law 94-566 so coercive as to constitute a "mandate of the federal government" under Section 9(b).[6]

In other words, *Sacramento I* concluded, *inter alia*, that the loss of federal funds and tax credits did not amount to "compulsion."

(3) *Sacramento II* Litigation

After remand, the case proceeded through the courts again. In *Sacramento II*, the Supreme Court held that the obligations imposed by chapter 2/78 failed to meet the "program" and "service" standards for mandatory subvention because it imposed no "unique" obligation on local governments, nor did it require them to provide new or increased governmental services to the public. The Court of Appeal decision, finding the expenses reimbursable, was overruled.

However, the court also overruled that portion of *Sacramento I* which held that the loss of federal funds and tax credits did not amount to "compulsion."

(4) *Sacramento II* "Compulsion" Reasoning

Plaintiffs argued that the test claim legislation required a clear legal compulsion not present in Public Law 94-566. Defendants responded that the consequences of California's failure to comply with the federal "carrot and stick" scheme were so substantial that the state had no realistic "discretion" to refuse.

In disapproving *Sacramento I,* the court explained:

> "If California failed to conform its plan to new federal requirements as they arose, its businesses faced a new and serious penalty - full, double unemployment taxation by both state and federal governments." (Opinion, at page 74)

Plaintiffs argued that California was not compelled to comply because it could have chosen to terminate its own unemployment insurance system, leaving the state's

[6] Section 1 of article XIII B limits annual "appropriations". Section 9(b) provides that "appropriations subject to limitation" do not include "appropriations required to comply with mandates of the courts or the federal government which, without discretion, require an expenditure for additional services or which unavoidably make the provision of existing services more costly."

employers faced only with the federal tax. The court replied to this suggestion:

> "However, we cannot imagine the drafters and adopters of article XIII B intended to force the state to such draconian ends. (¶) ...The alternatives were so far beyond the realm of practical reality that they left the state 'without discretion' to depart from federal standards." (Opinion, at page 74, emphasis supplied)

In other words, terminating its own system was not an acceptable option because it was so far beyond the realm of practical reality so as to be a draconian response, leaving the state without discretion. The only reasonable alternative was to comply with the new legislation, since the state was practically "without discretion" to do otherwise.

The Supreme Court in *Sacramento II* concluded by stating that there is no final test for a determination of "mandatory" versus "optional":

> "Given the variety of cooperative federal-state-local programs, we here attempt no final test for 'mandatory' versus 'optional' compliance with federal law. A determination in each case must depend on such factors as the nature and purpose of the federal program; whether its design suggests an intent to coerce; when state and/or local participation began; the penalties, if any, assessed for withdrawal or refusal to participate or comply; and any other legal and practical consequences of nonparticipation, noncompliance, or withdrawal." (Opinion, at page 76)

The same can be concluded for the coercive power of the state over local agencies.

(5) The "Kern" Case Did Not Change the Standard

In *Department of Finance v. Commission on State Mandates* (2003) 30 Cal.4th 727, 736, ("Kern") the supreme court first made it clear that the decision did not hold that legal compulsion was necessary in order to find a reimbursable mandate:

> "For the reasons explained below, although we shall analyze the legal compulsion issue, we find it unnecessary in this case to decide whether a finding of legal compulsion is *necessary* in order to establish a right to reimbursement under article XIII B, section 6, because we conclude that even if there are some circumstances in which a state mandate may be found in the absence of legal compulsion, the circumstances presented in this case do not constitute such a mandate." (Emphasis in the original, underlining added)

After concluding that the facts in *Kern* did not rise to the standard of non-legal compulsion, the court reaffirmed that either double taxation or other draconian consequences could result in non-legal compulsion:

> "In sum, the circumstances presented *in the case before us* do not constitute the type of non-legal compulsion that reasonably could constitute, in claimants' phrasing, a 'de facto' reimbursable state mandate. Contrary to the situation that we described in (Sacramento II), a claimant that elects to discontinue participation in one of the programs *here at issue* does not face 'certain and severe...penalties' such as 'double...taxation' or other 'draconian' consequences (citation), but simply must adjust to the withdrawal of grant money along with the lifting of program obligations." (Opinion, at page 754, emphasis supplied to illustrate holding is limited to facts presented)

The test for determining the existence of a mandate is whether compliance with the test claim legislation is a matter of true choice, that is, whether participation is truly voluntary. *Hayes v. Commission on State Mandates* (1992) 11 Cal.App.4th 1564, 1582 In light of the finding that there is a need to construct new schools to house nearly 1 million pupils and the need to modernize schools for an additional 1.1 million pupils, it is beyond the realm of practical reason to opportunistically argue that there is no state law or regulation which requires a school district to construct additional school facilities or acquire any site for the purpose of constructing a school building. The California Constitution requires that those pupils be housed and educated.

D. Necessary Costs are not Funded Through the School Facilities Program

DOF next argues that the State Allocation Board provides new construction grants through the School Facilities Program (SFP) to cover the state's share of all necessary project costs; that the state's share is typically 50 percent, but may be up to 100 percent when a district receives hardship funding. DOF then strangely concludes that "[T]herefore, any necessary costs of CEQA are, in fact, funded through voluntary participation in the SFP."

The district's necessary costs of CEQA are not funded out of the remaining 50 percent given to school districts to construct or modernize schools. CEQA is a separate statutory program. In fact, Education Code Section 17025, subdivision (a) provides that the State Allocation Board shall not authorize a contract for the construction of any new school, or for the addition to, or reconstruction or alteration of, any existing building, for lease-purchase to any school district unless the applicant district has submitted plans

therefor to the Department of General Services and obtained the written approval of the department pursuant to Article 3 (commencing with Section 17280) of Chapter 3 of Part 10.5.

DOF's argument in this regard is bereft of logic or legal foundation.

E. Developer Fees are not Service Charges, Fees or Assessments

DOF cites subdivision (d) of Government Code Section 17556:

> "The commission shall not find costs mandated by the state, as defined in Section 17514, in any claim submitted by a local agency or school district, if, after a hearing, the commission finds that:...
>
> (d) The local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service...."

and argues that the Education Code authorizes school districts to levy fees against any construction within its boundaries for the purpose of funding school construction and, therefore, although CEQA may result in additional costs to school districts, those costs are not reimbursable because the affected districts have the authority to cover those costs through developer fees.

Developer fees are not service charges, fees or assessments to the consumer of public services. Government Code section 17556(d) refers to "service charges, fees or assessments." Education Code section 17620 refers to a "fee, charge, dedication or other requirement." They are not the same.

In addition, Section 17556 presupposes the existence of a mandate which is contrary to DOF's position. Also, subdivision (d) refers to the levy of service charges, fees and assessments against students. The levy of service charges, fees and assessments against students for any aspect of public education would be constitutionally prohibited by Article 9, Section 5, of the California constitution which requires the state to provide free schools.

The California Department of Education has issued Fiscal Management Advisory 97-02[7] which makes it clear that tuition, fees, deposits and other charges may only be

[7] A copy of Fiscal Management Advisory 97-02 and its cover letter dated October 30, 1997 is attached hereto as Exhibit "C" and is incorporated herein by reference.

made when specifically authorized by law. The examples set forth in the advisory clearly demonstrate that the tuition, fees, deposits and other charges referred to in Government Code Section 17556, subdivision (d), clearly do not encompass sources for the construction of school facilities or the costs of complying with CEQA.

Test claimant directs the attention of the Commission to the fact that there is another test claim pending on developer fees. (CSM 02-TC-42) That test claim notes the various restrictions and limitations on the use of developer fees to finance public school construction. For example (and not by way of limitation), Education Code Section 17620(a)(1) limits any fee, charge, dedication, or other requirement to only certain development projects. Likewise, Government Code Section 65995 limits the amount that can be levied (e.g., $1.93 per square foot for residential construction and $0.31 per square foot for commercial or industrial construction). In fact, there is no guaranty that any development projects will be undertaken which may be subject to developer fees.

School districts are limited as to what properties are subject to fees, they are limited as to the amount of the fees they can charge, and they may not charge any fees whatsoever if no development projects are undertaken. In addition, Section 17556(d) requires that the alleged service charges, fees, or assessments were adopted at the same time, or in the same statute, as the test claim legislation.

DOF's reliance on *Kathleen Connell v. The Superior Court of Sacramento County* (1997) 59 Cal.App.4th 382 is misplaced because it is easily distinguishable. In *Connell*, the Department of Health Services amended regulations which increased the level of purity required before reclaimed wastewater could be used for the irrigation of parks, playgrounds and school yards. Several water districts filed a test claim seeking reimbursement of the additional costs to comply with the regulations. At the time, Water Code section 35470 provided:

> "Any district...may... make water available to the holders of title to land or the occupants thereon, and may fix and collect charges therefor. The charges may include standby charges to holders of title to land to which water may be made available, whether the water is actually used or not. The charges may vary in different months and in different localities of the district to correspond to the cost and value of the service, and the district may use so much of the proceeds of the charges as may be necessary to defray the ordinary operation or maintenance expenses of the district and for any other lawful district purpose." (Opinion, at page 398)

The court concluded that section 35470 authorized the districts to levy fees sufficient to pay the costs involved in the regulatory amendment because the districts' authority was

unlimited. (Opinion, at page 398)

Developer fees are very limited: some properties are not subject to fees, when available they are limited in amount, and in a district where there is no development, they are not available at all. Here, DOF has presented no facts which show that all school districts in the state have the authority to levy service charges, fees, or assessments "sufficient to pay for" the mandated program or increased level of service.

CERTIFICATION

I certify by my signature below, under penalty of perjury under the laws of the State of California, that the statements made in this document are true and complete to the best of my own personal knowledge or information and belief.

BUTT V. STATE OF CALIFORNIA (1992)

4 Cal. 4th 668; 15 Cal.Rptr. 480; 842 P.2d 1240

[No. S020835. Dec. 31, 1992.]

THOMAS K. BUTT et al., Plaintiffs and Respondents, v.
THE STATE OF CALIFORNIA et al., Defendants and Appellants.

SUMMARY

Parents of school children enrolled in a unified school district filed a class action for injunctive relief against the state and the district's board of education, seeking to prevent the district from closing its schools six weeks before the official end of the school year due to a projected revenue shortfall. After granting plaintiffs' motion to amend the complaint to include the state Superintendent of Public Instruction and the state Controller as defendants, the trial court granted plaintiffs' motion for a preliminary injunction, ordering the state and the superintendent to ensure that the schools remained open until the end of the school year or to provide the students with a substantially equivalent educational opportunity. The court subsequently issued another order, pursuant to the superintendent's plan, authorizing the Controller to disburse an emergency loan to the district from unspent portions of appropriations for the Greater Avenues for Independence (GAIN) program and another unified school district, and authorizing the superintendent to relieve the present board, and to develop recovery and repayment plans. The state's appeal from the trial court's orders was transferred from the Court of Appeal to the Supreme Court. (Superior Court of Contra Costa County, No. C91-01645, Ellen Sickles James, Judge.)

The Supreme Court reversed the trial court's second order insofar as it approved funding of an emergency loan from appropriations for the GAIN program and the other school district; in all other respects, the court affirmed the orders, and directed the Court of Appeal to remand the matter to the trial court for further proceedings. The court held that the trial court, in deciding the propriety of a preliminary injunction, did not abuse its discretion in finding that there was a reasonable probability that plaintiffs would succeed on the merits of their case, since the early closure of the district's schools would have deprived the students of their fundamental right to basic equality in public education, and the state was required to intervene to prevent a deprivation of that right. The court also held that the trial court properly found that denial of the preliminary injunction would have caused students and their parents substantial and irreparable harm greater than that which defendants would suffer if the injunction were granted. The court held that

the trial court acted within its equitable powers in ordering the superintendent to displace the board, operate the district, and impose a plan for the district's permanent financial recovery, but that it was improper for the trial court to order the state to extend the loan by using unspent funds from appropriations for the GAIN program and the other school district, since those funds were not "reasonably available" for that purpose. (Opinion by Baxter, J., with Panelli, Arabian and George, JJ., concurring. Separate concurring and dissenting opinions by Lucas, C. J., Mosk and Kennard, JJ.)

HEADNOTES

Classified to California Digest of Official Reports

(1) **Appellate Review § 119—Dismissal—Grounds—Mootness—Exception for Matters of Public Interest—Issues Concerning Injunction Requiring Emergency State Loan to Fund School District.**—On the state's appeal from a preliminary injunction requiring it to extend an emergency loan to a school district so that it could keep its schools open until the end of the school year despite revenue shortfalls, and to implement a recovery plan for the district, some issues were moot due to the fact that a plan had already been implemented and the state did not seek rescission of the loan. Nevertheless, the Supreme Court had discretion to decide the issues, which included whether the state was responsible to ensure the students' fundamental right to basic educational equality and whether the trial court had authority to order a loan from funds the Legislature had appropriated for other purposes, since those issues involved potentially recurring questions of public importance. As to the appropriations issue, there was a substantial possibility that similar crises would produce similar emergency orders in the future, thus favoring review. Moreover, the state had fully litigated the issue, and any mootness stemmed from the Supreme Court's denial of the state's request for a stay pending appeal.

(2) **Injunctions § 21—Preliminary Injunctions—Appeal—Scope of Review.**—Appellate review of a trial court's decision as to whether to issue a preliminary injunction is limited to whether the decision was an abuse of discretion. In deciding whether to issue a preliminary injunction, the trial court must weigh two "interrelated" factors: (1) the likelihood that the moving party will ultimately prevail on the merits, and (2) the relative interim harm to the parties resulting from the issuance or nonissuance of the injunction. The trial court's determination must be guided by a "mix" of the two factors, and the greater the

plaintiff's showing on one, the less must be shown on the other to support an injunction. The scope of available preliminary relief is necessarily limited by the scope of the relief likely to be obtained at a trial on the merits, and the trial court may not grant a preliminary injunction, regardless of the balance of interim harm, unless there is some possibility that the plaintiff would ultimately prevail on the merits of the claim. Thus, unless the potential merit of the claim is conceded, the appellate court must address that issue when reviewing an order granting a preliminary injunction.

(3a-3c) **Schools § 4—School Districts; Financing; Funds—Shortening School Year on Emergency Basis Due to Budget Shortfall—State's Obligation.**—In an action for injunctive relief by parents against the state, two state officials, and the board of education of a school district, seeking to prevent the district from ending the school year six weeks early due to a budget shortfall, the trial court, in granting plaintiffs a preliminary injunction, did not abuse its discretion in finding that there was a reasonable probability that plaintiffs would succeed on the merits of their case. Basic equality in public education for all students, regardless of the district in which they reside, is a fundamental right under the California Constitution, and denials of that right are subject to strict scrutiny. The state has the ultimate responsibility for assuring equal operation of the public school system, and is obliged to intervene when a local district's fiscal problems prevent its students from receiving basic educational equality. Moreover, there was no state policy of local autonomy and accountability at the district level that was compelling enough to justify the state's tolerance of the extreme and unprecedented educational deprivation that would have resulted from the early closure of the district's schools.

[See **Cal.Jur.3d,** Schools, §§ 291, 299.]

(4) **Schools § 1—Legislature's Nondelegable Responsibility Over Public School System.**—Public education is an obligation that the state assumed by adoption of the state Constitution. The public school system, although administered through local districts created by the Legislature, is one system applicable to all of the common schools. In view of the importance of education to society and to the individual child, the opportunity to receive the schooling furnished by the state must be made available to all on an equal basis. The Legislature's "plenary" power over public education is subject only to constitutional restrictions. Local districts are the state's agents for local operation of the common school system, and the state's ultimate responsibility for public education cannot be delegated to any other entity.

(5) **Constitutional Law § 87.2—Equal Protection—Classification—Judicial Review—Strict Standard of Review for Suspect Classifications or Classifications Touching on Fundamental Interests—Right to Education.**—Under the equal protection clauses of the federal and state Constitutions, heightened judicial scrutiny applies to state-maintained discrimination whenever the disfavored class is suspect or the disparate treatment has a real and appreciable impact on a fundamental right or interest. Education is such a fundamental interest for purposes of equal protection analysis under the California Constitution.

(6) **Schools § 4—School Districts; Financing; Funds—Shortening School Year on Emergency Basis Due to Budget Shortfall—Preliminary Injunction Against State—Balancing Harm to Parents and Students Against Harm to District.**—In an action for injunctive relief by parents against the state, two state officials, and the board of education of a school district to prevent closure of the district's schools six weeks early due to a budget shortfall, the trial court properly found that denial of the parents' motion for a preliminary injunction would have caused district students and their parents substantial and irreparable harm that was greater than that which defendants would suffer if the injunction were granted. Plaintiffs' declarations suggested that the district's inability to complete the school year arose from its ever-worsening fiscal condition and the deterioration of negotiations for emergency aid, and that the teachers' lesson plans did not provide for the contingency of early closure. They also detailed the difficulties of maintaining the educational progress of over 31,000 suddenly displaced students. While plaintiffs may not have demonstrated that "irreparable" harm to students was unavoidable by other means, the trial court's findings both that plaintiffs had a reasonable probability of success on the merits and that they would suffer more harm if an injunction were denied than the state would suffer if it were granted fully justified its decision to grant the preliminary injunction.

(7a, 7b) **Schools § 4—School Districts; Financing; Funds—District in Financial Distress Due to Mismanagement—Trial Court's Equitable Power to Grant Relief—Ordering Superintendent of Public Instruction to Assume Management.**—In an action for injunctive relief by parents against the state, the state Superintendent of Public Instruction, the state Controller, and the board of education of a school district, seeking to prevent the school district from ending the school year six weeks early due to a budget shortfall, the trial court did not exceed its powers in issuing an order, based on a plan submitted by the superintendent and the Controller, authorizing the superintendent to

displace the board, operate the district, and impose a plan for the district's permanent financial recovery. Although no statute gave the superintendent such authority, the takeover order was within the trial court's inherent equitable power to enforce the state's constitutional obligations in light of the unique situation. The state was justified in satisfying its duty by extending a loan with conditions to ensure appropriate use of the funds and minimize the risk of default, especially since the district's ability to administer the loan under its existing systems and managers was uniquely suspect.

(8) **Constitutional Law § 40—Distribution of Governmental Powers—Between Branches of Government—Judicial Power—To Order Discretionary Acts By Executive or Legislature.**—In general, courts have equitable authority to enforce their constitutional judgments. Principles of comity and separation of powers, however, place significant restraints on the authority of courts to order or ratify acts that are normally committed to the discretion of other branches or officials. In particular, the separation of powers doctrine (Cal. Const., art. III, § 3) obliges the judiciary to respect the separate constitutional roles of the Executive and the Legislature. Moreover, a judicial remedy must be tailored to the harm at issue. A court should always strive for the least disruptive remedy that is adequate to its legitimate task.

(9) **Constitutional Law § 40—Distribution of Governmental Powers—Between Branches of Government—Judicial Power—To Order Spending of Legislative Appropriations—Ordering Emergency Loan to School District From Funds Appropriated for Other Educational Purposes.**—In an action for injunctive relief by parents against the state, two state officials, and the board of education of a school district, seeking to prevent the school district from ending the school year six weeks early due to a budget shortfall, the trial court improperly ordered the state to extend the district an emergency loan of $19 million out of unspent funds appropriated for the Greater Avenues for Independence (GAIN) program and for an emergency loan to another school district. The appropriations did not make funds "reasonably available" for the purpose of financing the remainder of the district's school term. GAIN's purpose is to provide employment, adult education, and job training to recipients of public aid. The GAIN appropriation was expressly designated for that program alone, and was not intended to fund the needs of non-GAIN students. Similarly, the emergency loan to the other district was specifically appropriated for that district, with conditions addressed to the circumstances of that case. The funding of the remainder of the district's term was clearly

outside the particular purposes for which the appropriations were reserved.

Grimes as Amici Curiae on behalf of Plaintiffs and Respondents.

Robert J. Bezemek as Amicus Curiae.

OPINION

BAXTER. J.—In late April 1991, after a period of mounting deficits, the Richmond Unified School District (District) announced it lacked funds to complete the final six weeks of its 1990-1991 school term. The District proposed to close its doors on May 1, 1991. The Superior Court of Contra Costa County issued a preliminary injunction directing the State of California (State), its Controller, and its Superintendent of Public Instruction (SPI) to ensure that the District's students would receive a full school term or its equivalent. The court approved the SPI's plan for an emergency State loan, and for appointment by the SPI of an administrator to take temporary charge of the District's operation.

We declined to stay implementation of the plan pending the State's appeal. However, we transferred the appeal here in order to decide an important issue of first impression: Whether the State has a constitutional duty, aside from the equal allocation of educational funds, to prevent the budgetary problems of a particular school district from depriving its students of "basic" educational equality.

We affirm the trial court's determination that such a duty exists under the California Constitution. Further, the court did not err in concluding, on the basis of the plaintiffs' preliminary showing, that the particular circumstances of this case demanded immediate State intervention. However, the court exceeded its judicial powers by approving the diversion of emergency loan funds from appropriations clearly intended by the Legislature for other purposes.

FACTS AND PROCEDURAL HISTORY[1]

On April 17, 1991, Thomas K. Butt and other named District parents filed a class action for temporary and permanent injunctive relief against the State and the District's board of education (Board).[2] The complaint alleged as follows: The State is responsible for educating all California children, and the Board is the State's agent for carrying out this responsibility in the District. The scheduled final day of the District's 1990-1991 school term was June 14, 1991, but the District had announced that its 44 elementary, secondary, and adult schools would close on May 1, 1991. The resulting loss of six weeks of instruction would cause serious, irreparable harm to the District's 31,500 students and would deny them their "fundamental right to an effective public education" under the California Constitution. Moreover, as an unjustified discrimination against District students compared to those elsewhere in California, the closure would violate equal protection guarantees of the California and United States Constitutions. Therefore, defendants should be enjoined from closing the District's schools before the scheduled end of the scholastic term.

On April 22, 1991, plaintiffs noticed a motion for preliminary injunction. In an attached declaration, Frank R. Calton, a member of the Board, stated

[1]The State, as appellant, has elected to proceed by way of an appendix in lieu of the clerk's transcript, as permitted by rule 5.1 of the California Rules of Court. Some of the documents contained in the appendix, though they include handwritten filing dates, bear no official file stamps and have no proofs of service attached. However, rule 5.1 expressly allows the use of unofficial conformed copies (subd. (c)(1)) and provides that the filing of an appendix "constitutes a representation by counsel that the appendix consists of true and correct copies of the papers in the superior court file" (subd. (i)(1)). No party having urged otherwise, we adopt that assumption for purposes of this opinion.

[2]The named plaintiffs sued on behalf of themselves, their children, and other parents and students of the District.

that the District projected a revenue shortfall of $23 million for the 1990-1991 academic year and only had sufficient funds to pay its employees through April 1991. Calton declared the District would have to close at the end of April unless new funds were obtained or employees agreed to work for registered warrants in lieu of paychecks. He indicated that the District's efforts to obtain an emergency loan from the State had not yet succeeded, and the District was preparing to file for bankruptcy.

Plaintiffs' motion papers also included declarations by District teachers, academicians in the field of education, and members of the Contra Costa County board of education. These statements detailed the serious disruptive effect the proposed closure would have upon the educational process in the District and upon the quality of education afforded its students.

The motion was heard on April 29, 1991. The Attorney General represented the State in opposition. Counsel for the District represented that the Board's appearance was precluded by an automatic bankruptcy stay. The trial court granted plaintiffs' unopposed motion for amendment of the complaint to include the SPI and the Controller as defendants. Pending applications for intervention and amicus curiae status were not formally granted,[3] but as stipulated by the parties, the court heard argument from the applicants and agreed to consider their briefs.

At the conclusion of the hearing, the trial court ruled orally that under the California Constitution, the State itself is responsible for the "fundamental" educational rights of California students and must remedy a local district's inability to provide its students an education "basically equivalent" to that provided elsewhere in the State. Concluding that the threatened closure would deny the District's students a "constitutionally [equal] education," the court ordered the State and the SPI to act as "they deem appropriate" to ensure that District schools remained open until June 14, 1991, or to provide District students a "substantially equivalent educational opportunity" within the statutory school year ending June 30, 1991.

This oral decision was followed by two written orders filed May 2. One of these, drafted by plaintiffs' counsel, purported to formalize the April 29 ruling. It made findings that closure of District schools by May 1 would cause District students irreparable harm, that the balance of harm favored a preliminary injunction, that education is a "fundamental right" in California,

[3]Applications to appear as amici curiae were submitted by the Richmond Federation of Teachers (RFT) and jointly by the Meiklejohn Civil Liberties Institute, the National Lawyers Guild, and Multi-Cultural Education, Training, and Advocacy, Inc. (collectively Meiklejohn). Complaints in intervention and/or applications for leave to intervene were submitted by the Oakland Unified School District (OUSD), RFT, and United Teachers of Richmond (UTR).

that no "compelling interest" justified denying District students six weeks of instruction available to "every other child in the State," and that plaintiffs' ultimate success on the merits was reasonably probable. The State and its agents again were directed to act "as . . . appropriate" to ensure District students, within the school year ending June 30, 1991, an education "equivalent basically" to that provided elsewhere in California for a full school term. The Controller was added as a State official expressly bound by the court's commands.

On the same day, May 2, the SPI and the Controller submitted their plan for compliance with the preliminary injunction. With counsel for all interested parties present, the court took evidence indicating that uncommitted funds exceeding the estimated $19 million necessary to complete the District's school year were available from existing State appropriations to the Greater Avenues for Independence (GAIN) program and for emergency assistance to the OUSD. Counsel for the OUSD stipulated that his client had "no objection" to use of the $10 million OUSD appropriation for purposes of an emergency loan to the District.

Accordingly, the court executed an order, drafted by counsel for the SPI, approving in principle the submitted plan.[4] The order authorized the Controller to disburse an emergency loan to the District from unspent portions of the GAIN and OUSD appropriations. (See Stats. 1989, ch. 93, § 22.00; Stats. 1989, ch. 1438, § 1 et seq.) Meanwhile, the SPI, by virtue of the State's "ultimate responsibility" for equal education and his own statutory obligation to "superintend the schools of this state" (Ed. Code, § 33112, subd. (a)),[5] would have authority to "relieve the . . . [B]oard of its legal duties and powers, appoint a trustee, develop a recovery plan and, subject to the approval of the Controller, [develop] a repayment plan on the [D]istrict's behalf as necessary" to ensure completion of the school term, the District's financial recovery, and the protection of the loaned funds.[6]

The Attorney General timely noticed appeals from the April 29 and May 2 orders on behalf of the State. Defendants SPI and Controller did not

[4]Though the court's order recites that the SPI and the Controller "presented . . . , after notice to all parties, an agreement" to provide an emergency loan, neither the agreement itself, nor a description of its precise terms, has been made part of the record on appeal.

[5]All further statutory references are to the Education Code unless otherwise indicated.

[6]The preliminary injunction motion was litigated with understandable haste, and evidence of the causes of the District's apparent insolvency was not presented below. On appeal, the SPI invites us to take judicial notice of grand jury findings on this subject which were released after the preliminary injunction was granted. (See The Financial Affairs of the Richmond Unified School District, Rep. of 1990-1991 Contra Costa County Grand Jury (May 29, 1991) [hereafter Report].) Without objection, we may note the Report's contents. (Evid. Code, §§ 452, subds. (c), (d), 455, 459; see *People* v. *Gonzalez* (1990) 51 Cal.3d 1179, 1259, fn. 54 [275 Cal.Rptr. 729, 800 P.2d 1159].) Of course, we cannot accept its findings as evidence or its criticisms of the District and the Board as conclusively founded. We are

appeal. The State immediately requested transfer of the appeal from the Court of Appeal, First Appellate District, to this court (see Cal. Rules of Court, rule 20) and also asked that we stay enforcement of the trial court's orders pending appeal. (1)(See fn. 7.) The SPI and the Controller opposed a stay but supported transfer of the appeal to this court. We granted the transfer request but denied a stay.[7]

DISCUSSION

1. *Standard of review.*

(2) In deciding whether to issue a preliminary injunction, a court must weigh two "interrelated" factors: (1) the likelihood that the moving party

particularly loath to do so when the District and the Board were disabled below from defending against claims of mismanagement and, except for a special appearance at oral argument, have not participated in the appeal.

Nonetheless, we cannot ignore the grand jury's assessment that despite repeated warnings, an earnest but financially inexperienced Board permitted massive, accelerating deficit spending over a period of several years to expand staff, boost salaries and benefits, and support innovative programs installed by the District's former superintendent. (Report, pp. 3-5.) According to the Report, the resulting deficit for the years 1986-1990 was $29.5 million, with an $18.1 million deficit for 1990 alone. (*Id.*, at p. 4.) In 1990, the District had received a State emergency loan exceeding $9 million, in consequence of which a limited-powers trustee appointed by the SPI was overseeing District financial affairs during the 1990-1991 school term. (*Id.*, at p. 5.)

[7]Our denial of a stay allowed implementation of the plan approved by the trial court, and the District's school year was completed. Though the State vigorously contends the court lacked power to invade the GAIN and OUSD appropriations, it does not demand actual rescission of the court-approved loan. Moreover, we judicially notice without objection that in June 1992, the SPI approved a repayment and recovery plan adopted by the District, restored the Board's powers, and terminated the court-authorized appointment of the State administrator. (See Evid. Code, §§ 452, subds. (c), (h), 455, 459.) Although portions of the appeal may therefore be technically moot, we have discretion to decide the issues presented as potentially recurring questions of public importance. (E.g., *O'Hare* v. *Superior Court* (1987) 43 Cal.3d 86, 91, fn. 1 [233 Cal.Rptr. 332, 729 P.2d 766]; *DiGiorgio Fruit Corp.* v. *Dept. of Employment* (1961) 56 Cal.2d 54, 58 [13 Cal.Rptr. 663, 362 P.2d 487]; *People* v. *West Coast Shows, Inc.* (1970) 10 Cal.App.3d 462, 468 [89 Cal.Rptr. 290].)

The Chief Justice objects in particular that we neither must nor should address whether the sources of funding approved by the trial court were proper. However, he fails to indicate why this important and sensitive issue is any more moot, or any less worthy of consideration, than other portions of the trial court's order which have also been irretrievably implemented. Indeed, in these uncertain times, the substantial possibility arises that similar future crises will produce similar emergency orders for immediate diversion of State funds from expedient sources. Hence, contrary to the Chief Justice's suggestion, the issue is one capable of repetition but difficult to review, and this concern favors its prompt consideration under the "public interest" exception to the mootness doctrine. (*DiGiorgio Fruit Corp.*, *supra*, 56 Cal.2d at p. 58.) Moreover, the State has fully litigated the merits of the appropriations issue throughout, and any mootness in this or other aspects of the injunction stems from our denial of the State's request for a stay pending appeal. Under these circumstances, the State should not be penalized on appeal for conceding that State funds already expended by the District cannot practicably be recovered.

will ultimately prevail on the merits and (2) the relative interim harm to the parties from issuance or nonissuance of the injunction. (*Common Cause* v. *Board of Supervisors* (1989) 49 Cal.3d 432, 441-442 [261 Cal.Rptr. 574, 777 P.2d 610].) Appellate review is limited to whether the trial court's decision was an abuse of discretion. (*Cohen* v. *Board of Supervisors* (1985) 40 Cal.3d 277, 286 [219 Cal.Rptr. 467, 707 P.2d 840].)

The trial court's determination must be guided by a "mix" of the potential-merit and interim-harm factors; the greater the plaintiff's showing on one, the less must be shown on the other to support an injunction. (*King* v. *Meese* (1987) 43 Cal.3d 1217, 1227-1228 [240 Cal.Rptr. 829, 743 P.2d 889].) Of course, "[t]he scope of available preliminary relief is necessarily limited by the scope of the relief likely to be obtained at trial on the merits." (*Common Cause*, *supra*, 49 Cal.3d at p. 442.) A trial court may not grant a preliminary injunction, regardless of the balance of interim harm, unless there is some possibility that the plaintiff would ultimately prevail on the merits of the claim. (*Id.*, at pp. 442-443.) Unless potential merit is conceded, an appellate court must therefore address that issue when reviewing an order granting a preliminary injunction.

Here, the trial court found that plaintiffs' constitutional demand for State intervention had potential merit, and that the balance of interim harm justified the issuance of a preliminary injunction against the State. For the reasons that follow, we conclude that each of these determinations was within the court's discretion.[8]

2. *Merits of plaintiffs' claims.*

(3a) The trial court expressly found "[t]here is a reasonable probability that plaintiffs will succeed on the merits of their case." The court agreed with plaintiffs' claim that the equal protection guaranties of the California Constitution (art. I, § 7, subds. (a), (b); art. IV, § 16, subd. (a)) require State intervention to ensure that fiscal problems do not deprive a local district's

[8]The State insists that under the circumstances of this case, appellate review should not be limited to whether the trial court "abused its discretion" when weighing "interim" harm and "probable" merit. The State stresses that the unstayed injunction, though preliminary in form, was both final and unprecedented in fact. Accordingly, the State suggests, we must decide, as on appeal from a final judgment, whether plaintiffs were entitled to the relief they received.

We disagree. The abuse-of-discretion standard acknowledges that the propriety of preliminary relief turns upon difficult estimates and predictions from a record which is necessarily truncated and incomplete. Here, the urgency of the situation forced plaintiffs to produce, and the State to rebut, a hasty tentative showing of constitutional necessity. The evidence on which the trial court was forced to act may thus be significantly different from that which would be available after a trial on the merits. Neither the trial court nor this court could undertake a final adjudication of plaintiffs' lawsuit under such circumstances.

students of basic educational equality.[9] The court also accepted plaintiffs' preliminary showing that the effect of the District's crisis on its students' educational rights was serious enough to trigger the State's constitutional duty. The State, supported by amicus curiae Pacific Legal Foundation (Pacific),[10] assails these conclusions on multiple grounds.

At the outset, the State does not claim it lacks any and all constitutional role in local educational affairs. Instead, its reasoning proceeds as follows: The State fulfills its financial responsibility for educational equality by subjecting all local districts, rich and poor, to an equalized statewide revenue base.[11] Unless a district fails to provide the minimum six-month school term set forth in the "free school" clause (Cal. Const., art. IX, § 5),[12] the State has no duty to ensure prudent use of the equalized funds by local administrators. Even if local mismanagement causes one district's services to fall seriously below prevailing statewide standards, the resulting educational inequality is

[9]Article I, section 7, subdivision (a) provides in pertinent part that "[a] person may not be . . . denied equal protection of the laws. . . ." Article I, section 7, subdivision (b) provides in pertinent part that "[a] citizen or class of citizens may not be granted privileges or immunities not granted on the same terms to all citizens. . . ." Article IV, section 16, subdivision (a) provides that "[a]ll laws of a general nature have uniform operation."

[10]The positions adopted by the various parties and numerous amici curiae in this appeal are diverse. The Attorney General, representing the State as defendant and appellant, opposes all aspects of the trial court orders. Though they were joined as defendants below, the SPI and the Controller, deeming themselves "respondents" on appeal, support plaintiffs' view that the orders were proper in all respects. Amicus curiae Pacific supports the State's position. Amici curiae RFT and UTR approve State financial aid but object to displacement of the local governing board by a State administrator. Amici curiae Frank R. Calton and Howard P. Abelson urge that the Board acted correctly by deciding to close District schools and should not have been displaced. Calton and Abelson also suggest the injunction was improper because the Board had no opportunity to appear and defend against claims of mismanagement. Amici curiae Mario Diaz and Rebecca Hazlewood Bezemek (Diaz and Bezemek) take no position on State financial assistance but argue that the SPI's takeover of District government was improper. Amicus curiae briefs in support of plaintiffs have been filed by the American Civil Liberties Union Foundation, Human Rights Advocates, and Meiklejohn.

[11]The funding scheme for public education is complex, but no party disputes the summary description provided in the State's brief: "The Legislature has attempted to equalize school district funding . . . by the use of a 'base revenue limit' for each district. Each district is classified by size and type. ([Ed.] Code, [§] 42238.) Based upon this classification scheme, each district has a 'base revenue limit' per unit of average daily attendance. The base revenue limit for any district includes the amount of property tax revenues a district can raise, with other specific local revenues, coupled with an equalization payment by the State, thus bringing each district into a rough equivalency of revenues. (Compare [Cal. Code Regs., tit. 5, [§] 15371, *et seq.*[; Ed.] Code [§] 42238 et seq.) [¶] Because the student population is so diverse, the Legislature had to supplement the base revenue limit with specific augmentations targeted for categories of children with needs that require special attention. These supplements are designated as 'categorical' aid. . . ."

[12]Article IX, section 5 provides: "The Legislature shall provide for a system of common schools by which a free school shall be kept up and supported in each district at least six months in every year, after the first year in which a school has been established."

not grounded in district wealth, nor does it involve a "suspect classification" such as race. Thus, "strict scrutiny" of the disparity is not required, and the State's refusal to intervene must be upheld as rationally related to its policy of local control and accountability. Even if strict scrutiny is appropriate, the local-control policy is "compelling" enough to justify the State's inaction.

Under the unprecedented circumstances of this case, we cannot accept the State's contentions. We set forth our reasons in detail.

Since its admission to the Union, California has assumed specific responsibility for a statewide public education system open on equal terms to all. The Constitution of 1849 directed the Legislature to "provide for a system of common schools, by which a school shall be kept up and supported in each district . . . ." (Cal. Const. of 1849, art. IX, § 3.) That constitutional command, with the additional proviso that the school maintained by each district be "free," has persisted to the present day. (Cal. Const., art. IX, § 5.)

In furtherance of the State system of free public education, the Constitution also creates State and county educational offices, including a Superintendent of Public Instruction and a State Board of Education. (Cal. Const., art. IX, §§ 2-3.3, 7.) It authorizes the formation of local school districts (*id.*, §§ 6½, 14), requires that all public elementary and secondary schools be administered within the Public School System (*id.*, § 6), establishes a State School Fund (Fund) (*id.*, § 4), reserves a minimum portion of State revenues for allocation to the Fund (*id.*, art. XVI, §§ 8, 8.5), guarantees minimum allocations from the Fund for each public school (*id.*, art. IX, § 6), specifies minimum salaries for public school teachers (*ibid.*), authorizes the State Board of Education to approve public school textbooks (*id.*, § 7.5), and permits the Legislature to grant local districts such authority over their affairs as does not "conflict with the laws and purposes for which school districts are established" (*id.*, § 14).

(4) Accordingly, California courts have adhered to the following principles: Public education is an obligation which the State assumed by the adoption of the Constitution. (*San Francisco Unified School Dist.* v. *Johnson* (1971) 3 Cal.3d 937, 951-952 [92 Cal.Rptr. 309, 479 P.2d 669]; *Piper* v. *Big Pine School Dist.* (1924) 193 Cal. 664, 669 [226 P. 926].) The system of public schools, although administered through local districts created by the Legislature, is "*one* system . . . applicable to all the common schools . . . ." (*Kennedy* v. *Miller* (1893) 97 Cal. 429, 432 [32 P. 558], italics in original.) ". . . In view of the importance of education to society and to the individual child, the opportunity to receive the schooling furnished by the state must be made available to all on an equal basis. . . ." (*Jackson* v.

Pasadena City School Dist. (1963) 59 Cal.2d 876, 880 [31 Cal.Rptr. 606, 382 P.2d 878].) "[M]anagement and control of the public schools [is] a matter of state[, not local,] care and supervision. . . ." (*Kennedy* v. *Miller*, *supra*, 97 Cal. at p. 431; see also *Hall* v. *City of Taft* (1956) 47 Cal.2d 177, 181 [302 P.2d 574]; *California Teachers Assn.* v. *Huff* (1992) 5 Cal.App.4th 1513, 1523-1524 [7 Cal.Rptr.2d 699].) The Legislature's "plenary" power over public education is subject only to constitutional restrictions. (*Hall* v. *City of Taft*, *supra*, at pp. 180-181 [302 P.2d 574]; *Tinsley* v. *Palo Alto Unified School Dist.* (1979) 91 Cal.App.3d 871, 903-904 [154 Cal.Rptr. 591].) Local districts are the State's agents for local operation of the common school system (*Hall* v. *City of Taft*, *supra*, at p. 181; *San Francisco Unified School Dist.* v. *Johnson*, *supra*, 3 Cal.3d at p. 952; *California Teachers Assn.*, *supra*), and the State's ultimate responsibility for public education cannot be delegated to any other entity (*Hall* v. *City of Taft*, *supra*; *Piper* v. *Big Pine School Dist.*, *supra*, 193 Cal. at p. 669).

(3b) It is true that the Legislature has assigned much of the governance of the public schools to the local districts (e.g., §§ 14000, 35160 et seq., 35160.1), which operate under officials who are locally elected and appointed (§§ 35020, 35100 et seq.). The districts are separate political entities for some purposes. (E.g., *Johnson* v. *San Diego Unified School Dist.* (1990) 217 Cal.App.3d 692, 698-700 [266 Cal.Rptr. 187] [general theory of respondeat superior does not make State liable for torts of local district or its employees]; *Gonzales* v. *State of California* (1972) 29 Cal.App.3d 585, 590-592 [105 Cal.Rptr. 804] [same]; *First Interstate Bank* v. *State of California* (1987) 197 Cal.App.3d 627, 633-634 [243 Cal.Rptr. 8] [State not vicariously liable for district's breach of contract]; *Board of Education* v. *Calderon* (1973) 35 Cal.App.3d 490, 496 [110 Cal.Rptr. 916] [local district is not the "state" or the "People," so as to be civilly bound in dismissal proceedings by teacher's acquittal of criminal sex offense under principles of res judicata].)

Yet the existence of this local-district system has not prevented recognition that the State itself has broad responsibility to ensure basic educational equality under the California Constitution. Because access to a public education is a uniquely fundamental personal interest in California, our courts have consistently found that the State charter accords broader rights against State-maintained educational discrimination than does federal law. Despite contrary federal authority, California constitutional principles require State assistance to correct basic "interdistrict" disparities in the system of common schools, even when the discriminatory effect was not produced by the purposeful conduct of the State or its agents.

In *Serrano* v. *Priest* (1971) 5 Cal.3d 584 [96 Cal.Rptr. 601, 487 P.2d 1241, 41 A.L.R.3d 1187] (*Serrano I*), this court struck down the existing State

public school financing scheme, which caused the amount of basic revenues per pupil to vary substantially among the respective districts depending on their taxable property values. *Serrano I* concluded at length that such a scheme violated both state and federal equal protection guaranties because it discriminated against a fundamental interest—education—on the basis of a suspect classification—district wealth—and could not be justified by a compelling state interest under the strict scrutiny test thus applicable. (Pp. 596-619.) As the court concluded, "where fundamental rights *or* suspect classifications are at stake, a state's general freedom to discriminate on a geographical basis will be significantly curtailed by the equal protection clause. [Citation.]" (P. 612, italics added.)

Among other things, *Serrano I* rejected a claim that the wealth-based financing scheme was immune from challenge because the interdistrict revenue disparities it produced were not de jure, but merely de facto. Our opinion detailed the purposeful state legislative action which had produced the geographically based wealth classifications. It also made clear, however, that under California principles developed in cases involving school racial segregation, the absence of purposeful conduct by the State would not prevent a finding that the State system for funding public education had produced unconstitutional results. (*Serrano I*, *supra*, 5 Cal.3d at pp. 603-604, citing *Jackson* v. *Pasadena City School Dist.*, *supra*, 59 Cal.2d 876, 881.)

Serrano I also discussed two groups of federal cases suggesting that place of residence was an impermissible basis for State discrimination in the quality of education. *Serrano I* cited with approval *Hall* v. *St. Helena Parish School Board* (E.D.La. 1961) 197 F.Supp. 649. This federal decision struck down a Louisiana statute permitting local parishes to close their schools rather than integrate them. As *Serrano I* noted, *Hall* v. *St. Helena Parish* found an equal protection violation not only because of the statute's racial consequences, but also " 'because its application in one parish, while the state provides public schools elsewhere, would unfairly discriminate against the residents of that parish, irrespective of race. . . . [A]bsent a reasonable basis for so classifying, a state cannot close the public schools in one area while, at the same time, it maintains schools elsewhere with public funds.' " (*Serrano I*, *supra*, 5 Cal.3d at p. 612, quoting *Hall* v. *St. Helena Parish*, *supra*, 197 F. Supp. at pp. 651, 656.)

Serrano I further noted a "second group of cases, dealing with apportionment [of votes], [in which] the high court has held that accidents of geography and arbitrary boundary lines of local government can afford no ground for discrimination among a state's citizens. [Citation.] . . . If a voter's address may not determine the weight to which his ballot is entitled,

surely it should not determine the quality of his child's education. [Fn.]" (*Serrano I, supra*, 5 Cal.3d at p. 613.)

Finally, *Serrano I* rejected the State's claim that plaintiffs' wealth-discrimination theory would apply equally, and with disastrous effect, to all public services dependent in part on local property taxes. "[W]e are satisfied," the majority concluded, that whatever the status of other public services, "its uniqueness among public activities clearly demonstrates that *education* must respond to the command of the equal protection clause." (*Serrano I, supra*, 5 Cal.3d at p. 614, italics in original.)

In *San Antonio School District* v. *Rodriguez* (1973) 411 U.S. 1 [36 L.Ed.2d 16, 93 S.Ct. 1278], decided after *Serrano I*, the United States Supreme Court declined to subject Texas's similar local-property-tax based school financing scheme to heightened scrutiny under the Fourteenth Amendment. The *Rodriguez* majority concluded that a school finance scheme dependent on district tax values does not discriminate against the poor as a distinct class; in any event, the majority observed, wealth alone had never been deemed a suspect classification for federal purposes. Moreover, the majority reasoned, education is not a fundamental interest protected by the federal Constitution. Therefore finding the strict scrutiny standard of review inapplicable, the majority upheld Texas's system as rationally related to that state's policy of local control of schools. (411 U.S. at pp. 18-55.)

Nonetheless, in *Serrano* v. *Priest* (1976) 18 Cal.3d 728 [135 Cal.Rptr. 345, 557 P.2d 929] (*Serrano II*), this court reaffirmed the reasoning and result of *Serrano I* as required by the separate equal protection guaranties of the California Constitution. (*Serrano II, supra*, 18 Cal.3d at pp. 760-768.) Among other things, *Serrano II* reiterated that for California purposes, education remains a fundamental interest "which [lies] at the core of our free and representative form of government [fn.] . . . ." (*Id.*, at pp. 767-768.)

Hence, *Serrano II* declared, "[i]n applying our state constitutional provisions guaranteeing equal protection of the laws we shall continue to apply strict and searching judicial scrutiny" to claims of discriminatory educational classifications. (*Serrano II, supra*, at p. 767.) More recent cases confirm that education is a fundamental interest under the California equal protection guaranties (e.g., *Steffes* v. *California Interscholastic Federation* (1986) 176 Cal.App.3d 739, 746 [222 Cal.Rptr. 355]) and that the unique importance of public education in California's constitutional scheme requires careful scrutiny of state interference with basic educational rights (see, e.g., *Hartzell* v. *Connell* (1984) 35 Cal.3d 899, 906-909 [201 Cal.Rptr. 601, 679 P.2d 35] [scope of free school guarantee]).

In *Tinsley* v. *Palo Alto Unified School Dist.*, *supra*, 91 Cal.App.3d 871, parents sought mandate requiring several neighboring San Mateo and Santa Clara County school districts, the State, and certain State school officials, to submit a plan for the redress of interdistrict racial segregation in the affected locality. The petitioners declined to allege any specific acts committed by State or local parties as the cause of the interdistrict imbalance.

The State respondents answered the petition, but the districts successfully demurred, and the petition was dismissed as to them. The Court of Appeal reversed, holding that the California Constitution, unlike its federal counterpart as construed in *Milliken* v. *Bradley* (1974) 418 U.S. 717 [41 L.Ed.2d 1069, 94 S.Ct. 3112], contemplates interdistrict relief to remedy mere de facto racial imbalance which extends across district lines. (*Tinsley*, *supra*, 91 Cal.App.3d at pp. 899-907.) Several aspects of the *Tinsley* decision emphasize the State's ultimate responsibility for maintaining a nondiscriminatory common school system.

At the outset, the districts asserted that an appeal was premature under the "one final judgment" rule, because as mere agencies of the State, which had not demurred, they had no separate legal interests which an appeal from their dismissal could finally resolve. The Court of Appeal observed that if the districts' claim of mere agency was correct, any relief ordered against the State would necessarily affect them, and the judgment dismissing them from the action should therefore be reversed. In any event, the court concluded, the premise of identical interests did not bear scrutiny, because while "[t]he local districts, as agents, may have limited powers in interdistrict affairs, . . . the state . . . has plenary powers in all school district affairs. . . ." (*Tinsley*, *supra*, 91 Cal.App.3d at pp. 880-881.)

Turning to the merits, *Tinsley* dismissed the majority reasoning in *Milliken* insofar as based on the federal rule, long rejected in California (see *Crawford* v. *Board of Education* (1976) 17 Cal.3d 280 [130 Cal.Rptr. 724, 551 P.2d 28]; *Jackson* v. *Pasadena City School Dist.*, *supra*, 59 Cal.2d 876), that only de jure racial segregation is a constitutional violation. (*Tinsley*, *supra*, 91 Cal.App.3d at p. 903.) *Tinsley* also distinguished the *Milliken* majority's concern that it "would disrupt and alter" Michigan's entrenched system of local control of schools to impose an interdistrict remedy for Detroit city school segregation without proof that the state or affected suburban districts had engaged in intentional segregative conduct. The *Tinsley* court noted, among other things, that in California, the State shares responsibility with "the local entities it has created" to provide "equal educational opportunity

to the youth of the state" and "has a duty to intervene to prevent unconstitutional discrimination" in its schools. (*Id.*, at pp. 903-904.)[13]

It therefore appears well settled that the California Constitution makes public education uniquely a fundamental concern of the State and prohibits maintenance and operation of the common public school system in a way which denies basic educational equality to the students of particular districts. The State itself bears the ultimate authority and responsibility to ensure that its district-based system of common schools provides basic equality of educational opportunity.

The State claims it need only ensure the six-month minimum term guaranteed by the free school clause (Cal. Const., art. IX, § 5). This contention, however, misconstrues the basis of the trial court's decision. Whatever the requirements of the free school guaranty, the equal protection clause precludes the State from maintaining its common school system in a manner that denies the students of one district an education basically equivalent to that provided elsewhere throughout the State.

The State argues that even if the District's fiscal problems threatened its students' basic educational equality, any State duty to redress the discrimination must be judged under the most lenient standard of equal protection review. The State reasons as follows: Plaintiffs do not claim discrimination on the suspect basis of race. Nor is wealth-based discrimination at issue; as all parties concede, the District received the full benefit of the equalized funding system mandated by our *Serrano* decisions. At most, plaintiffs assert that a misuse of equalized funds by the District's officials caused a geographical disparity in service. Because residence and geography are not suspect classifications, the State's failure to prevent educational discrimination on those grounds is not subject to strict scrutiny. Rather, State inaction must be accepted as rationally related to the legitimate State policy of local control of schools.

(5) However, both federal and California decisions make clear that heightened scrutiny applies to State-maintained discrimination whenever the

[13]In November 1979, the voters adopted a Senate amendment to the California Constitution's equal protection clause, article I, section 7, subdivision (a). The amendment declares that nothing in the California Constitution imposes upon the State, or any local district or official, any obligations beyond those imposed by the Fourteenth Amendment of the United States Constitution "with respect to the use of pupil school assignment or pupil transportation." The amendment further forbids California courts from imposing any school-assignment or pupil-transportation obligation except when a violation of the Fourteenth Amendment has occurred, and unless a federal court could impose such a remedy for the violation. Whatever effect this amendment may have on *Tinsley*'s result, it does not affect consistent interpretations of the California equal protection guaranty where, as here, assignment or transportation of students is not at issue.

disfavored class is suspect *or* the disparate treatment has a real and appreciable impact on a fundamental right or interest. (*Plyler* v. *Doe* (1982) 457 U.S. 202, 216-217 [72 L.Ed.2d 786, 102 S.Ct. 2382]; *Shapiro* v. *Thompson* (1969) 394 U.S. 618, 634 [22 L.Ed.2d 600, 614-615, 89 S.Ct. 1322]; *Darces* v. *Woods* (1984) 35 Cal.3d 871, 885, 888 [201 Cal.Rptr. 807, 679 P.2d 458]; *Fair Political Practices Com.* v. *Superior Court* (1979) 25 Cal.3d 33, 47 [157 Cal.Rptr. 855, 599 P.2d 46]; *Serrano II*, *supra*, 18 Cal.3d 728, 761, 767-768; *Weber* v. *City Council* (1973) 9 Cal.3d 950, 959 [109 Cal.Rptr. 553, 513 P.2d 601]; *Serrano I*, *supra*, 5 Cal.3d 584, 597; *Westbrook* v. *Mihaly* (1970) 2 Cal.3d 765, 784-785 [87 Cal.Rptr. 839, 471 P.2d 487].) As we have seen, education is such a fundamental interest for purposes of equal protection analysis under the California Constitution.

(3c) The State suggests there was no showing that the impact of the threatened closure on District students' fundamental right to basic educational equality was real and appreciable. Of course, the Constitution does not prohibit all disparities in educational quality or service. Despite extensive State regulation and standardization (see discussion, *post*), the experience offered by our vast and diverse public school system undoubtedly differs to a considerable degree among districts, schools, and individual students. These distinctions arise from inevitable variances in local programs, philosophies, and conditions. "[A] requirement that [the State] provide [strictly] 'equal' educational opportunities would thus seem to present an entirely unworkable standard requiring impossible measurements and comparisons. . . ." (*Hendrick Hudson Dist. Bd. of Ed.* v. *Rowley* (1982) 458 U.S. 176, 198 [73 L.Ed.2d 690, 707, 102 S.Ct. 3034].) Moreover, principles of equal protection have never required the State to remedy all ills or eliminate all variances in service.

Accordingly, the California Constitution does not guarantee uniformity of term length for its own sake. While the current statutory system for allocating State educational funds strongly encourages a term of at least 175 days (see fn. 14, *post*, at p. 687), that system is not constitutionally based and is subject to change. In an uncertain future, local districts, faced with mounting fiscal pressures, may be forced to seek creative ways to gain maximum educational benefit from limited resources. In such circumstances, a planned reduction of overall term length might be compensated by other means, such as extended daily hours, more intensive lesson plans, summer sessions, volunteer programs, and the like. An individual district's efforts in this regard are entitled to considerable deference.

Even unplanned truncation of the intended school term will not necessarily constitute a denial of "basic" educational equality. A finding of constitutional disparity depends on the individual facts. Unless the actual quality

of the district's program, viewed as a whole, falls fundamentally below prevailing statewide standards, no constitutional violation occurs.

Here, however, plaintiffs' preliminary showing suggested that closure of the District's schools on May 1, 1991, would cause an extreme and unprecedented disparity in educational service and progress. District students faced the sudden loss of the final six weeks, or almost one-fifth, of the standard school term originally intended by the District and provided everywhere else in California.[14] The record indicates that the decision to close early was a desperate, unplanned response to the District's impending insolvency and the impasse in negotiations for further emergency State aid.[15] Several District teachers declared that they were operating on standard-term lesson schedules made at the beginning of the school year. These declarants outlined in detail how the proposed early closure would prevent them from completing instruction and grading essential for academic promotion, high school graduation, and college entrance.[16] Faced with evidence of such extensive educational disruption, the trial court did not abuse its discretion

[14]The trial court record contains no evidence of the prevailing term length in California, but the parties assumed below that a minimum term of 175 days prevails, and no dispute has arisen on the issue here. The statutes provide that an established local district may not receive any part of its annual apportionment from the State School Fund if it failed to remain in session at least 175 days during the most recent fiscal year, unless specified circumstances excusing the failure are established to the satisfaction of the SPI. (§§ 41420, subd. (a), 41422.) In an appendix to his brief, the SPI provides copies of local district certifications, submitted to the SPI as a condition of funding under section 41420, which indicate that virtually every established school district in California operated for at least 175 days during the 1990-1991 school year. The SPI asks us to take judicial notice of this information. Having received no objection, we do so. (Evid. Code, §§ 452, subds. (c), (h), 455, 459.)

[15]The declaration of Board member Calton, dated April 12, 1991, detailed the District's growing financial woes and stated the following: ". . . The District has only enough money to pay its employees through April 1991 [even under the most favorable accounting assumptions]. . . . Unless (a) additional funds are received, or (b) employees are willing to work for registered warrants, not redeemable checks, the District will have no alternative but to close all of its public schools at the end of April 1991. [¶] . . . The District has applied to the State of California for a loan, but that request has not been approved. It is my understanding that [collective bargaining concessions demanded by the State] have not been made, although negotiations are continuing. The District has retained bankruptcy counsel, . . . and is preparing to file for bankruptcy prior to April 30, 1991, if necessary."

[16]For example, John Enos, a high school government/economics teacher, stated that early termination of his required senior government class would eliminate intended lessons covering the State's executive and judicial branches, and county and local government. Geoffrey Cantrell, a high school mathematics teacher, stated that if the District closed early, Algebra I students would miss essential instruction in quadratic equations; Algebra II students would miss essential instruction in trigonometry; and geometry students would miss lessons in coordinate systems, logical proof, and trigonometric ratios. Craig Brammer, another high school mathematics teacher who also teaches a preparatory course for the Scholastic Aptitude Test (SAT), opined that loss of six weeks' instruction would severely impair his students' chances on the mathematics portion of the SAT. Betty Jean Crenshaw, a teacher of first-year languages, declared that early closure would prevent students from learning vocabulary and

by concluding that the proposed closure would have a real and appreciable impact on the affected students' fundamental California right to basic educational equality.

The State asserts that its financial obligation to equal education is limited to the equalized system of interdistrict funding required by our *Serrano* decisions. Once revenues are fairly apportioned at the beginning of each school year, the State insists, it cannot be constitutionally liable for how local officials manage the funds.

Nothing in the *Serrano* cases themselves, or in other California decisions, supports the State's argument. On the contrary, the cases suggest that the State's responsibility for basic equality in its system of common schools extends beyond the detached role of fair funder or fair legislator. In extreme circumstances at least, the State "has a duty to intervene to prevent unconstitutional discrimination" at the local level. (*Tinsley*, *supra*, 91 Cal.App.3d at p. 904.)

The State's most vigorous contention is that its nonintervention should have been upheld even under the strict scrutiny standard of equal protection analysis. Allowing the District's students to absorb the consequences of District mismanagement, the State urges, was necessary to preserve the State's compelling educational policy of local autonomy and accountability. However, the State fails to demonstrate a policy of local control so compelling as to justify State tolerance of the extreme local educational deprivation at issue here.

In the first place, the local-district system of school administration, though recognized by the Constitution and deeply rooted in tradition, is not a constitutional mandate, but a legislative choice. (See Cal. Const., art. IX, §§ 6½, 14.) The Constitution has always vested "plenary" power over education not in the districts, but in the State, through its Legislature, which may create, dissolve, combine, modify, and regulate local districts at pleasure. (See *Tinsley*, *supra*, 91 Cal.App.3d at p. 904.) The legislative decision

grammar necessary for advancement to second-year courses. Amy Shinsako, a first grade teacher, stated that early closure would prevent instruction in phonics, reading comprehension, creative writing, handwriting skills, two-digit addition and subtraction, and addition with three addends, all necessary for advancement to the second grade. Several declarants noted that failure to complete the term would prevent the scheduling of final examinations and other term-end projects crucial to the assignment of final grades. Other declarants detailed the difficulties District students would face if forced to transfer to other districts to complete the year's studies. They also noted that unless graduating seniors completed required courses and received final grades, the District might not be able to award high school diplomas, any diplomas awarded would be "stigmatized," and the ability of departing seniors to qualify for college admission might be seriously compromised.

to emphasize local administration does not end the State's constitutional responsibility for basic equality in the operation of its common school system. Nor does disagreement with the fiscal practices of a local district outweigh the rights of its blameless students to basic educational equality.

Moreover, though the Constitution and statutes encourage maximum local program and spending authority consistent with State law (Cal. Const., art. IX, § 14; Ed. Code, §§ 14000, 35160, 35160.1), the degree of supervision voluntarily retained by the State over the common school system is high indeed. The volume and scope of State regulation indicate the pervasive role the State itself has chosen to assume in order to ensure a fair, high quality public education for all California students.

School finance aside, the statutes address at length such matters as county and district organization, elections, and governance (§§ 4000-5450, 35000-35780); educational programs, instructional materials, and proficiency testing (§§ 51000-62008); sex discrimination and affirmative action (§§ 40-41, 200-263, 44100-44105); admission standards (§§ 48000-48053); compulsory attendance (§§ 48200-48416); school facilities (§§ 39000-40048); rights and responsibilities of students and parents (§§ 48900-49079); holidays (§§ 37220-37223); school health, safety, and nutrition (§§ 32000-32254, 49300-49570); teacher credentialing and certification (§§ 44200-44481); rights and duties of public school employees (§§ 44000-44104, 44800-45460; see also Gov. Code §§ 3540-3549.3 [organizational and bargaining rights]); and the pension system for public school teachers (§§ 22000-24924). The statutory scheme has spawned further voluminous regulations administered by the State's Department of Education and the SPI. (Cal. Code Regs., tit. 5, §§ 1-23005.) This long-established level of State involvement in the public education system undermines any claim that local control is a paramount and compelling State policy for all purposes.

Nor is there any indication that the State has had a compelling policy of absolute budgetary freedom and responsibility for local districts. On the contrary, during the years in which the District's deficit developed, districts were required to adopt budgets meeting State standards, and to submit them for oversight and approval by county and State authorities. (§§ 33127, former §§ 42120-42129.) Failure to adopt a conforming budget precluded State or county funding of the district (former § 42128), and a district was required to operate under its most recent approved budget (former § 42127.4).

The State argues that by saddling the District with long-term debt to cover short-term operations, the trial court's orders undermine the District's future

financial health and compromise its ability to provide basic educational equivalency in years to come. The State also urges that other districts will feel free to overspend if encouraged to believe in the availability of State relief.

These are indeed troubling concerns, but we cannot accept the implication that the State deems them compelling. In fact, the State itself has endorsed a policy of emergency conditional loan assistance to districts in financial difficulty.

Under statutes in effect since 1977, distressed districts may, through the SPI, seek specific legislative apportionments for emergency loans. (§§ 41310, 41310.5, 41320 et seq.) As a condition of such aid, a district must prepare a financial recovery plan and obtain approval of the plan from the county superintendent and the SPI. (§ 41320.) The district must also accept a temporary SPI-appointed trustee with veto power over financially significant actions of the local governing board. (§ 41320.1.)

The District itself had received a $9,525,000 conditional State loan under this program in spring 1990 (Stats. 1990, ch. 171, § 3), and its operations were already being monitored by a State trustee at the time closure of District schools was threatened in April 1991. The 1989 Legislature had also appropriated $10 million for a similar emergency loan-with-trustee to the OUSD. (Stats. 1989, ch. 1438, §§ 1-11.) Under these circumstances, the State cannot claim it follows a compelling policy of local control by declining to intervene when financial adversity threatens a district's operations.

Shortly before this lawsuit began, the District faced the prospect of further legislative intervention in its crisis. Assembly Bill No. 128, 1991-1992 Regular Session (A.B. 128), as introduced in December 1990 and thereafter amended, would have appropriated an additional $29 million for emergency loans to the District. Acceptance of the proposed loan would have subjected the District to unprecedented restrictions on self-government. These included a temporary takeover of all District affairs by an SPI-appointed administrator pending approval and implementation of a plan for financial recovery and loan repayment. The administrator would have had broad power, among others, to unilaterally determine wages and benefits for all District employees who, as of April 29, 1991, were not covered by ratified collective bargaining agreements meeting the requirements of an approved recovery plan. (A.B. 128, Sen. Amend. of Jan. 18, 1991, §§ 2, 5.)

A.B. 128 failed passage, but that fact does not suggest a compelling policy against emergency State financial assistance to a local district. On the

contrary, the State has forged into the realm of emergency assistance and control, using the "specific appropriation" requirement (§ 41320) to decide on a case-by-case basis whether, and on what terms, it will intervene.

The State claims that emergency assistance to mismanaged districts contravenes the compelling principle of equalized funding established in our *Serrano* decisions. As we have seen, however, nothing in the *Serrano* cases, which addressed wealth-based disparities in district revenues, prohibits emergency State assistance to a particular district which is experiencing financial difficulties despite its receipt of equalized funding.[17]

Finally, nothing in our analysis is intended to immunize local school officials from accountability for mismanagement, or to suggest that they may indulge in fiscal irresponsibility without penalty. The State is constitutionally free to legislate against any recurrence of the Richmond crisis. It may further tighten budgetary oversight, impose prudent, nondiscriminatory conditions on emergency State aid, and authorize intervention by State education officials to stabilize the management of local districts whose imprudent policies have threatened their fiscal integrity. To the extent such conditions compromise local autonomy and mortgage a district's future, they are not calculated to persuade local officials or their constituents that mismanagement and profligacy will be rewarded.

Indeed, in response to this case, the Legislature and the Governor have already agreed to tighter county and State control of local district budgets and spending.[18] Under certain circumstances, this new legislation *requires* the SPI's complete takeover of an insolvent district as a precondition of an

[17]The *Serrano* decisions themselves, as well as the subsequent adoption of Proposition 13, have exacerbated the need for occasional emergency State intervention by restricting one aspect of local control—the power of local districts to tax themselves out of financial crises. Our *Serrano* opinions condemned the former dependence of school finance on local ad valorem property taxes, because, as a practical matter, however willing a local district might be to increase taxes for education, "districts with small [real property] tax bases simply cannot levy taxes at a rate sufficient to produce the revenue that more affluent districts reap with minimal tax efforts. . . ." (*Serrano I*, *supra*, 5 Cal.3d 584, 598.) In obedience to *Serrano* principles, the current system of public school finance largely eliminates the ability of local districts, rich or poor, to increase local ad valorem property taxes to fund current operations at a level exceeding their State-equalized revenue per average daily attendance. (§ 42238 et seq.) Moreover, Proposition 13 places a general ceiling on the ad valorem property taxes which may be levied on behalf of local governments and school districts. (Cal. Const., art. XIII A, § 1.)

[18]Legislation adopted in 1991 provides, among other things, that if a local district's proposed budget fails to win final county and State approval, the county superintendent of schools shall adopt a governing budget for the district which permits the district to meet current and "multiyear" commitments. The county superintendent may rescind any district action or payment which is inconsistent with the county superintendent's budget, except those

emergency State appropriation.[19] Thus, the State has already made vast inroads on the principle that local control is paramount to State intervention in an insolvent district's affairs. The State's plenary power over education includes ample means to discourage future mismanagement in the day-to-day operations of local districts.

In sum, the California Constitution guarantees "basic" equality in public education, regardless of district residence. Because education is a fundamental interest in California, denials of basic educational equality on the basis of district residence are subject to strict scrutiny. The State is the entity with ultimate responsibility for equal operation of the common school system. Accordingly, the State is obliged to intervene when a local district's fiscal problems would otherwise deny its students basic educational equality, unless the State can demonstrate a compelling reason for failing to do so.

The preliminary facts before the trial court support the inference that the District's impending failure to complete the final six weeks of its scheduled school term would cause educational disruption sufficient to deprive District students of basic educational equality. The State has identified no compelling interest which negated its duty to intervene. We therefore find no abuse of discretion in the trial court's conclusion that plaintiffs' constitutional claims had potential merit.[20]

3. *Interim harm.*

The trial court also expressly concluded that plaintiffs, District students and their parents, would suffer "substantial and irreparable harm" if a preliminary injunction were denied. This harm, the court further found,

in performance of a previously effective collective bargaining agreement. (§ 42127.3, subd. (b)(1), as amended by Stats. 1991, ch. 1213, § 18.) The county superintendent must also monitor all local budgets continuously to ensure that each district can meet its financial obligations for the current and ensuing fiscal years. A county superintendent's determination that a district will be unable to meet its obligations triggers a process which may culminate in forced revisions to the district's budget and rescission of actions, other than collective bargaining obligations, which are inconsistent with the revisions. (§ 42127.6, added by Stats. 1991, ch. 1213, § 20.)

[19]New sections 41325 through 41327 provide that when a local district accepts an emergency appropriation more than twice the size of its State-recommended reserve, the SPI must take control of the district for at least two fiscal years, assume all duties and powers of the local governing board, fire district officials who took no action to avert insolvency, impose a recovery plan including a ten-year repayment schedule, and remain in control until satisfied that local compliance with recovery requirements is probable.

[20]Our conclusion that the trial court's finding of probable merit is supported by the equal protection clauses of the California Constitution makes it unnecessary to address claims that a State duty of intervention may also have arisen under the "free school" clause or the Fourteenth Amendment.

would be "greater . . . than defendants will suffer if the injunction is granted."

These determinations were based upon the uncontradicted declarations of District teachers, local and regional public school officials, and academic specialists in the field of public education. Besides detailing the severe and immediate academic disruption which would arise from the pending closure (see discussion, *ante*, fn. 16, at p. 687), these declarations set forth at length the "ripple" effect on District parents and students. For example, the declarations recounted, working parents, including the high percentage of needy families in the District, would be faced with expensive child care for the lost school hours; difficult efforts would be required to obtain other placement of the students for the remainder of the year; and special-need students would lose carefully nurtured progress.

The State submitted no evidence that it would suffer comparable or greater harm by offering emergency loan assistance necessary to ensure completion of the District's academic program for 1990-1991. Instead, the State simply argued that court-ordered State aid would damage the State's public school policies of local control and accountability.

(6) The State nonetheless claims plaintiffs' "interim harm" showing was inadequate as a matter of law. In the State's view, plaintiffs' declarations failed to establish that the early closure was unforeseeable, or to explain persuasively why any adverse effects on student progress could not be ameliorated.

We find the trial court's interim-harm findings amply supported. As previously noted, plaintiffs' preliminary showing suggested that the District's inability to complete its school year arose from its ever-worsening fiscal condition and from the deterioration of its negotiations for emergency aid. The declarations of District teachers uniformly indicated that their lesson plans did not provide for the contingency of early closure. Other declarations detailed the difficulties of alternate arrangements to maintain the educational progress of over 31,000 suddenly displaced District students, who included high school seniors poised for graduation. The court could reasonably infer that orderly planning to minimize the resulting educational disruption had not taken place and was not realistically possible.

In any event, the court was not obliged to deny a preliminary injunction simply because plaintiffs failed to demonstrate that "irreparable" harm to students was unavoidable by other means. The preliminary record properly convinced the court *both* that plaintiffs had a reasonable probability of

success on the merits, *and* that they would suffer more harm in the meantime if an injunction were denied than the State would suffer if it were granted. This "mix" of the "interrelated" relevant factors fully justified the court's decision to grant the injunction. (See *Common Cause* v. *Board of Supervisors*, *supra*, 49 Cal.3d at pp. 441-442; *King* v. *Meese*, *supra*, 43 Cal.3d at p. 1227.) No error appears.

4. *Scope of remedial order.*

In orders dated April 29, 1991, and May 2, 1991, the trial court directed the State, the SPI, and the Controller to ensure "by whatever means they deem appropriate" that District students would receive their educational rights; both orders made clear that "[h]ow these defendants accomplish this is up to the discretion of defendants. . . ." When no other State official proposed a solution, the SPI and the Controller, on May 2, 1991, offered a conditional loan plan for approval by the court.

After a hearing on that day, the court found that $19 million in aid funds proposed by the SPI and the Controller were presently available, and the court authorized the Controller to apportion such funds as an emergency loan to the District. The court further determined that, given the State's obligation to provide an equal education, the SPI's statutory authority to "[s]uperintend the schools of this state" (§ 33112, subd. (a)), and the "unique" emergency circumstances, "the [SPI] . . . has authority to relieve the [Board] of its legal duties and powers, appoint a trustee, develop a recovery plan and, subject to the approval of the Controller, [develop] a repayment plan on the [D]istrict's behalf as necessary to ensure the operation of the schools through June 14, 1991, the financial recovery of the [D]istrict, and the protection of State funds loaned to the [D]istrict."

(7a) The State and several amici curiae contend that even if the trial court could require State intervention to prevent violation of the District students' constitutional rights, there was no legal or equitable basis for the court's order authorizing the SPI to displace the Board, operate the District through his own administrator, and impose a plan for the District's permanent financial recovery. Under the circumstances presented by this case, however, we conclude that this portion of the court's order did not exceed its powers.

We agree that the statutes themselves provided no direct authority for the approach taken by the trial court. In general, though they act as regulated State agents, local governing boards are vested by statute with immediate jurisdiction over day-to-day district affairs. (§§ 14000, 35000 et seq.) The

SPI has important statutory responsibilities for allocating school funds (§§ 33118, 14000 et seq.), monitoring local budgets (§§ 42120 et seq., 41450), and administering the conditions of emergency loans *appropriated by the Legislature* (§§ 41310, 41320 et seq.; see also § 41325 et seq.), but no statute grants him emergency powers to operate a local district under other circumstances.[21]

The court relied in part on section 33112, subdivision (a), which provides that the SPI shall "[s]uperintend the schools of this state." But no case has interpreted this statute to vest the SPI with nonexpress powers, and an older decision construed similar language narrowly against a county superintendent. (*McKenzie* v. *Board of Education* (1905) 1 Cal.App. 406, 409 [82 P. 392].) Indeed, counsel for the SPI conceded in the trial court that the SPI had no statutory authority to take over the District's government.

The trial court also believed its takeover order was within its inherent equitable power to enforce the State's constitutional obligations in light of the "unique emergency financial conditions" presented by the case. In the court's view, ratification of all loan conditions proposed by the SPI was necessary to ensure the District's continued operation through June 14, 1991, promote its permanent financial recovery, and protect the loan itself. We agree.

(8) In general, courts have equitable authority to enforce their constitutional judgments. (E.g., *Crawford* v. *Board of Education*, *supra*, 17 Cal.3d 280, 308.) Of course, principles of comity and separation of powers place significant restraints on courts' authority to order or ratify acts normally committed to the discretion of other branches or officials. (*Common Cause* v. *Board of Supervisors*, *supra*, 49 Cal.3d 432, 445-446; *Mandel* v. *Myers* (1981) 29 Cal.3d 531, 540 [174 Cal.Rptr. 841, 629 P.2d 935]; *Serrano II*, *supra*, 18 Cal.3d 728, 751; *Crawford* v. *Board of Education*, *supra*, 17 Cal.3d at pp. 305-306; cf. *Missouri* v. *Jenkins* (1990) 495 U.S. 33, 50-58 [109 L.Ed.2d 31, 53-59, 110 S.Ct. 1651].) In particular, the separation of powers doctrine (Cal. Const., art. III, § 3) obliges the judiciary to respect the separate constitutional roles of the Executive and the Legislature.

Moreover, a judicial remedy must be tailored to the harm at issue. (E.g., *Sheet Metal Workers* v. *EEOC* (1986) 478 U.S. 421, 476 [92 L.Ed.2d 344, 388, 106 S.Ct. 3019]; *Dayton Board of Education* v. *Brinkman* (1977) 433

[21]A.B. 128 would have granted the SPI powers of this magnitude over the District, but the bill failed passage. (See discussion, *ante*, at p. 690.) 1991 statutory amendments call for the SPI's takeover of districts that accept large emergency insolvency *appropriations* (§ 41325 et seq.; see discussion, *ante*, fn. 18 at p. 691), but even after 1991, the SPI has no such statutory authority *independent* of a specific insolvency appropriation by the Legislature.

U.S. 406, 420 [53 L.Ed.2d 851, 863-864, 97 S.Ct. 2766].) A court should always strive for the least disruptive remedy adequate to its legitimate task.

(7b) The trial court's remedial order in this case fell within proper boundaries. Having correctly held the State constitutionally responsible for the students' rights, the court could not deny the State and its officials effective means of fulfilling its obligation. Under the circumstances, the court was warranted in authorizing temporary transfer to the SPI of the Board's statutory powers over District affairs.

The emergency the court confronted on May 2, 1991, demanded a prompt State-assisted solution to prevent immediate closure of the District's schools. The State was justified in satisfying its constitutional duty of aid by extending a loan that would impose the ultimate consequences of the District's self-created predicament upon the District, rather than upon the State, its taxpayers, and the students of other districts. The State was also entitled to conditions on the loan that would ensure its appropriate use for the intended constitutional purpose, and would minimize the risk of the District's default in repayment.

The District's ability to administer the new loan under its existing systems and managers was uniquely suspect. As a matter of public record, the District's worsening financial situation had recently led the Legislature to provide a loan in excess of $9 million. A limited-powers State trustee appointed to monitor the District's fiscal affairs in connection with that loan had not been able to stem a growing District deficit estimated by one declarant, a member of the Board, to exceed $23 million for the 1990-1991 school year alone. In response to these difficulties, the Board had caused the District to seek bankruptcy protection against its existing creditors.

As counsel for the SPI explained on April 29, 1991, the District's unprecedented financial collapse indicated systemic management problems. Hence, counsel reported, the SPI considered it foolhardy to extend further substantial State credit to the District unless its management was placed in competent hands, its administrative practices were reformed and restructured from the outside, and a long-term plan for its financial recovery was imposed.[22] On behalf of the State, the Attorney General contested the legality of vesting such extraordinary powers in the SPI, but no party disputed the logic of the SPI's position.

[22]The following colloquy occurred between the court and counsel for the SPI: "[¶] MR. HERSHER [SPI's counsel]: . . . [The SPI] does not want to make . . . 20 to 30 million dollars in state funds available to a district that has already demonstrated substantial financial irresponsibility. It's pouring state money into a hole and it's never going to come back out. [¶] THE COURT: Would he want to do that if the State was given the responsibility for running the district as you suggested? [¶] MR. HERSHER: I believe so. I think what Bill Honig sees is that

Nor can we. Given the emergency circumstances, and under the extreme and aggravated conditions disclosed by the evidence, the court below could properly conclude that orderly completion of the District's 1990-1991 school term, and the sound financing essential to achieve that end, required temporary displacement of the sitting Board and the operation of the District by the SPI's designee for the purpose of stabilizing its financial affairs.[23] We conclude that the order approving temporary takeover of the District by the SPI was within the court's inherent equitable power to remedy the constitutional crisis.[24]

5. *Source of loan funds.*

In order to obtain the necessary $19 million in emergency loan funds, the trial court authorized the Controller to disburse (1) $9 million of unspent funds from a special contingency appropriation to the Department of Education for the GAIN program, and (2) the unused $10 million appropriated as an emergency loan to the OUSD. (9) The State and amicus curiae Pacific argue that because the Legislature had not earmarked either of these sums

the District has to be reorganized. The financial management of the District needs to be completely restructured, and there needs to be a long-term recovery plan . . . . [I]t has always been [the SPI's] position that somebody needs to . . . take over the District, come up with a long-term plan in which all the creditors of the District suffer equally or equitably."

[23]Amici curiae Diaz and Bezemek ask us to receive additional evidence and make findings about the SPI's record as administrator of the District after May 2, 1991. Among other things, Diaz and Bezemek allege that the SPI's administrator has withdrawn the District's bankruptcy petition, dismantled essential programs, failed to reappoint a citizens' advisory committee, restructured the District's administration, dismissed faculty and counselors, obstructed reorganization of the District's existing debt, imposed an unconscionable interest rate on the court-approved loan, and diverted educational funds to debt repayment. Diaz and Bezemek claim this evidence supports their contention that the SPI's governance of the District presents an inherent conflict between his role as protector of State-loaned funds and his duty to restore the District to financial and educational health.

Appellate courts have limited powers to take evidence and find facts in nonjury civil cases. (Cal. Const., art. VI, § 11; Code Civ. Proc., § 909; Cal. Rules of Court, rule 23(b).) However, the matters Diaz and Bezemek seek to present are beyond the scope of this lawsuit and unnecessary to our analysis. Moreover, Diaz and Bezemek concede the proffered evidence is disputed; appellate courts will not resolve such factual conflicts. (E.g., *In re Marriage of Davis* (1983) 141 Cal.App.3d 71, 75-76 [190 Cal.Rptr. 104]; see *McCracken* v. *Teets* (1953) 41 Cal.2d 648, 653 [262 P.2d 561].) We therefore deny the motion.

[24]The State argues that even if extraordinary judicial interference in the District's affairs was necessary to guarantee the constitutional rights of District students, the court erred by granting the SPI extralegal "discretion" to act rather than assuming control over the District itself, with the SPI as the court's appointed agent. The State cites no authority for its proposition that the court's remedial options were so narrowly confined. The remedial order of May 2, 1991, makes clear that the authority therein accorded the SPI flows from a direct and critical exercise of the court's equitable power and jurisdiction over the constitutional dispute. The order laudably minimizes direct judicial involvement in matters best left to officials with specific responsibilities and expertise in education, but its effect is no different than if it had expressly made the SPI a court functionary. We find no error.

for purposes "reasonably related" to resolving the District's financial crisis, the court improperly invaded the nonjudicial power of appropriation.

We agree. In a valid exercise of its constitutional powers, the Legislature had directed each of these sums to specific agencies and narrow purposes which did not include the District and its financial emergency. Hence, the Legislature had not made these funds reasonably available for disbursement to the District. By diverting the funds from their earmarked destinations and purposes, the court invaded the Legislature's constitutional authority.

Article III, section 3 of the Califonia Constitution provides that "[t]he powers of state government are legislative, executive, and judicial. Persons charged with the exercise of one power may not exercise either of the others except as permitted by this Constitution." Article XVI, section 7 provides that "[m]oney may be drawn from the Treasury only through an appropriation made by law and upon a Controller's duly drawn warrant." Article IV, sections 10 and 12 set forth the respective powers of the Legislature and Governor over the enactment of appropriations. It has long been clear that these separation-of-powers principles limit judicial authority over appropriations. (*Myers* v. *English* (1858) 9 Cal. 341, 349; see *Westinghouse Electric Co.* v. *Chambers* (1915) 169 Cal. 131, 135 [145 P. 1025]; *California State Employees' Assn.* v. *Flournoy* (1973) 32 Cal.App.3d 219, 234 [108 Cal.Rptr. 251]; see also *Payne* v. *Superior Court* (1976) 17 Cal.3d 908, 920, fn. 6 [132 Cal.Rptr. 405, 553 P.2d 565].)

In certain narrow circumstances, California courts have concluded that judicial orders for the disbursement of appropriated funds do not invade valid legislative functions. *Mandel* v. *Myers*, *supra*, 29 Cal.3d 531, is the only decision by this court which found judicial power to "commandeer" appropriated funds. The facts and analysis of that case demonstrate the strict limits on the judicial authority it recognized.

The plaintiff in *Mandel*, a Department of Health Services (DHS) worker, had prevailed in litigation challenging DHS's practice of allowing paid employee leave on Good Friday. The judgment against the State included an award of attorney fees. However, the Legislature removed appropriations for payment from successive claims and budget bills, including the 1978-1979 Budget Act (Act). The Act included the usual appropriation to DHS for "general operating expenses and equipment," which expressly included expenses for "services" and "all other proper purposes." Such "catchall" budget categories for State agencies had traditionally been used to pay agency legal expenses. However, the Act expressly precluded use of any appropriation therein "to achieve any purpose which has been denied by any formal action of the Legislature."

We upheld the trial court's order that the Controller pay the fee award from the general operating budget of DHS. We noted first that the "catchall" appropriation was "reasonably" or "generally" available for payment of legal expenses incurred by DHS, because the broad terms of the appropriation, as well as its historical uses, indicated such a legislative intent. In effect, we concluded that the Legislature had voluntarily made an appropriation for payments of this general kind. (*Mandel* v. *Myers*, *supra*, 29 Cal.3d at pp. 539-545.)

We further explained that, once having made an appropriation generally available, the Legislature may not impose specific restrictions which are unconstitutionally discriminatory, or which constitute an impermissible legislative attempt to readjudicate the merits of a final court judgment. Hence, we reasoned, the Legislature's attempt to avoid payment of the *Mandel* award in particular must be struck down. The DHS "catchall" appropriation thus remained "available" under its general terms for payment of the judgment. (*Mandel* v. *Myers*, *supra*, 29 Cal.3d at pp. 545-551.)

Subsequent Court of Appeal decisions adhered to these principles of *Mandel*. In *Serrano* v. *Priest* (1982) 131 Cal.App.3d 188 [182 Cal.Rptr. 387], attorneys who had won the school-finance class action sought judicial help after the State rebuffed their informal efforts to collect a court-ordered fee award. After *Mandel* was decided, the State conceded that the trial court had properly ordered payment from a "catchall" appropriation to the Department of Education, the SPI, and the State Board of Education for "operating expenses and equipment." (Pp. 197-198.) In *Committee to Defend Reproductive Rights* v. *Cory* (1982) 132 Cal.App.3d 852 [183 Cal.Rptr. 475], the court concluded, after disregarding an unconstitutional budget act provision against use of Medi-Cal funds for abortions (see *Committee to Defend Reproductive Rights* v. *Myers* (1981) 29 Cal.3d 252 [172 Cal.Rptr. 866, 625 P.2d 779, 20 A.L.R.4th 1118]), that abortion funding could be ordered from monies appropriated for other Medi-Cal pregnancy services. (132 Cal.App.3d at pp. 857-858.)

Plaintiffs and the SPI suggest that two more recent Court of Appeal decisions, *Long Beach Unified Sch. Dist.* v. *State of California* (1990) 225 Cal.App.3d 155 [275 Cal.Rptr. 449] and *Carmel Valley Fire Protection Dist.* v. *State of California* (1987) 190 Cal.App.3d 521 [234 Cal.Rptr. 795], have expanded *Mandel*'s concept of "reasonable [or] general availability." The trial court in the instant case apparently relied on these decisions to conclude that it could divert the GAIN and OUSD appropriations to the District because they were "generally related" to education.

Long Beach and *Carmel Valley* do make occasional use of the term "generally related" to describe *Mandel*'s principle of reasonable or general

"availability." (See *Long Beach*, *supra*, 225 Cal.App.3d at p. 181; *Carmel Valley*, *supra*, 190 Cal.App.3d at p. 541.) But nothing in those cases supports the trial court's apparent view that funds appropriated for one specific educational purpose may be judicially diverted to another. So far as the face of the opinions discloses, the stated intent of the target appropriation in each case, or its historical uses, indicated that the court's application of the funds was plausibly within purposes the Legislature might have contemplated.[25] No court has suggested that *Mandel* principles permit court-ordered diversion of an appropriation away from a clear, narrow, and valid purpose specified by the Legislature. We affirm that the words "generally related," as used in *Long Beach* and *Carmel Valley*, do not countenance such judicial incursions into the legislative power over appropriations.[26]

The instant trial court misapplied *Mandel* when it authorized the diversion of appropriated funds from the specific purposes and programs for which the Legislature had validly earmarked them. Nine million dollars was taken from an appropriation in the 1989-1990 Budget Act for the GAIN program. (Stats. 1989, ch. 93, § 22.00.) GAIN's purpose is to provide employment, adult

[25]In *Carmel Valley*, the Court of Appeal struck down budgetary language which had been inserted to foreclose the constitutionally required reimbursement of local agencies for expenses incurred in upgrading firefighter protective clothing as mandated by the State. (See Cal. Const., art. XIII B, § 6.) After disregarding these unconstitutional restrictions, the Court of Appeal quite logically determined that funds appropriated to the Department of Industrial Relations for Program 40, the Prevention of Industrial Injuries and Deaths of California Workers, were available for this expense. (*Carmel Valley*, *supra*, 190 Cal.App.3d at p. 541.) In *Long Beach*, a local school district sought reimbursement for the State-mandated expenses of developing desegregation programs. After the Legislature deleted an appropriation for this purpose from the 1985-1986 budget bill, the district obtained a trial court order for reimbursement from specified line-item accounts related to education, and from the general operating budget of the Department of Education, which had mandated the programs. The Court of Appeal affirmed on grounds that the record substantially supported the trial court's order. As the Court of Appeal explained, these and similar accounts had historically been used to support programs such as the one for which reimbursement was sought, and were logical sources of funding for this specific purpose. (*Long Beach*, *supra*, 225 Cal.App.3d at pp. 181-182; see also p. 185.)

[26]We are aware that in *Missouri* v. *Jenkins*, *supra*, 495 U.S. 33, the United States Supreme Court upheld the power of federal courts to order local tax levies to enforce judicial remedies for unconstitutional school segregation. However, even if the federal Constitution permits federal courts to impose far-reaching remedies for State government violations of federal constitutional rights, it does not follow that California courts are exempt from the constraints imposed by the California Constitution upon their power to invade the functions of a coequal branch of State government.

Indeed, the California Constitution's separation of powers clause precludes any branch from usurping or improperly interfering with the essential operations of either of the other two branches. (See Cal. Const., art. IV, § 1 [legislative power]; Cal. Const., art. V, § 1 [executive power]; Cal. Const., art. VI, § 1 [judicial power].) Nothing in this opinion should be interpreted as sanctioning or immunizing such unconstitutional interference, or as addressing the question of the appropriate remedies that may be invoked in the event one branch improperly impinges on the essential operations of a coequal branch.

education, and job training to recipients of public assistance. (Welf. & Inst. Code, § 11320 et seq.) Local school districts can receive GAIN funds for adult education and training classes (*id.*, §§ 11320.8, 11322, 11323), and the Legislature intended that the 1989-1990 GAIN appropriation might include such funding subject to strict conditions (see Stats. 1989, ch. 93, § 22.00, subd. (b)). However, this appropriation was expressly designated for that program alone and was not intended to fund the needs of non-GAIN students. Nothing in the trial court's order restricted use of the GAIN-derived funds to uses contemplated by the appropriation.

Similar considerations govern the remaining $10 million of the emergency loan, which was derived from the 1989 Legislature's special appropriation for the OUSD. This appropriation, by its express terms, was "for the purpose of an emergency loan *to* [*that*] [*d*]*istrict* in compliance with Article 2 (commencing with Section 41320) of Chapter 3 of Part 24 of the Education Code." (Stats. 1989, ch. 1438, § 1, italics added.)

Section 41310 expresses the intent that emergency loans to distressed districts under section 41320 et seq. not occur "unless funds have been *specifically* appropriated *therefor* by the Legislature." (Italics added.) The statutory scheme imposes detailed conditions on emergency loans granted under its auspices (§§ 41320.1-41323), and the Legislature further refined the conditions on the OUSD appropriation to address the particular circumstances of that case (Stats. 1989, ch. 1438, §§ 2-9).

When it makes an appropriation to a specific district, under specific conditions addressed to the problems of that district, the Legislature clearly intends and contemplates that the appropriation will only be used for that purpose, and under those conditions. Hence, the appropriation is not reasonably available for court-ordered diversion to another district under different conditions.

The trial court, understandably anxious to resolve the crisis, concluded that it could fund its order from any monies previously appropriated "for a purpose that is reasonably related to educational purposes." The court found that the GAIN and OUSD appropriations were "reasonably related to the State's obligation to keep the Richmond schools open through June 14, 1991 . . . ."

As we have seen, however, the test of reasonable availability under *Mandel* does not extend to uses clearly outside the particular purpose for which an appropriation was reserved. The GAIN and OUSD appropriations were earmarked for purposes entirely distinct from the subject matter of this

lawsuit.[27] They were not reasonably available for court diversion to finance the remainder of the District's school term.

In her concurring and dissenting opinion, Justice Kennard claims that by flatly disclaiming judicial power to divert appropriations from the purposes specified by the Legislature, we adopt a "formalistic" and outmoded view of the separation of powers. Citing language from two United States Supreme Court decisions (*Mistretta* v. *United States* (1989) 488 U.S. 361 [102 L.Ed.2d 714, 109 S.Ct. 647]; *Nixon* v. *Administrator of General Services* (1977) 433 U.S. 425 [53 L.Ed.2d 867, 97 S.Ct. 2777]), she proposes that interbranch conflicts of this kind be resolved under a "pragmatic" and "flexible" case-by-case balancing test, in which the derogation of one branch's powers by another may be warranted to promote overriding objectives within the "constitutional authority" of the latter. Because both the OUSD and GAIN appropriations were "generally related" to elementary and secondary education, she reasons, diversion of these funds to the District was not a "great" or "extreme" intrusion upon the appropriations power, and the court's action was justified by its constitutional responsibility to District students.

We cannot accept these contentions. Our adherence to *Mandel* can hardly be deemed rigid or formalistic; our decision in that case strained to find a practical, sensitive, and principled balance between legislative and judicial power over appropriations. In effect, Justice Kennard urges abandonment of *Mandel*'s careful analysis in favor of a rule giving the judiciary unchecked power to override the valid budgetary acts of coequal branches.

However, nothing in the California or federal cases on which Justice Kennard relies even hints that a court may *nullify* a *specific and valid exercise* by the Legislature and the Executive of fundamental budgetary powers explicitly entrusted to those branches, simply for the purpose of

[27]No party or amicus curiae suggests that the purposes specified by the Legislature for these two appropriations were "improper or invalid . . . restriction[s]" on their use which may be disregarded by the courts. (*Mandel* v. *Myers*, *supra*, 29 Cal.3d at p. 542.) This is not a case where the Legislature, in defiance of the Constitution or the judicial branch, had prohibited use of appropriations for particular purposes to which they would otherwise logically extend.

We recognize that, at the May 2 hearing, counsel for the OUSD indicated his client had "no objection" to diversion of its loan appropriation for the court's purposes. The OUSD's position may not have been entirely altruistic; on April 29, counsel had committed the OUSD to accepting an influx of displaced District students but expressed concern about the disruption such a solution would cause. Even if the OUSD believed that diversion of its appropriation was in its own best interests, however, the OUSD could not unilaterally alter the terms and conditions the Legislature had imposed on the appropriation. Moreover, the OUSD's waiver was conditional; counsel made clear that the OUSD reserved its right to demand refunding of the OUSD appropriation "if and when [the OUSD] chooses to exercise its rights to request a loan from the state of [$]10 million at any time up until June 30, 1993."

satisfying a judgment or order that is *unrelated* to the appropriation. (Compare, e.g., *Mistretta* v. *United States*, *supra*, 488 U.S. 361, 380-384 [102 L.Ed.2d 714, 735-738] [Congress's creation of United States Sentencing Commission, a judicial-branch agency charged with establishing mandatory federal sentencing guidelines, did not usurp authority of individual judicial officers or grant forbidden legislative power to judicial branch]; *Nixon* v. *Administrator of General Services*, *supra*, 433 U.S. 425, 441-446 [53 L.Ed.2d 867, 889-893] [legislation vesting Administrator of General Services with limited control over presidential papers of resigned chief executive did not undermine authority of executive branch]; *Wilson* v. *Eu* (1991) 54 Cal.3d 471, 473 [286 Cal.Rptr. 280, 816 P.2d 1306] [Legislature's failure to reapportion justifies judicial adoption of reapportionment plan]; *Davis* v. *Municipal Court* (1988) 46 Cal.3d 64, 72-87 [249 Cal.Rptr. 300, 757 P.2d 11] [District attorney's statutory power to disapprove local misdemeanor-diversion program was not improper delegation of legislative authority; prosecutor's absolute discretion to prevent diversion by charging "wobbler" as felony did not constitute forbidden judicial power]; *Younger* v. *Superior Court* (1978) 21 Cal.3d 102, 115-118 [145 Cal.Rptr. 674, 577 P.2d 1014] [statute requiring Department of Justice to destroy individual's marijuana arrest and conviction records upon application after sentence is complete did not create impermissible conflict with executive clemency powers].)

The balance proposed by Justice Kennard in this case would elevate the judiciary above its coequal brethren, upset the delicate system of checks and balances, and stand the separation of powers clause on its head. Applying *Mandel*'s well-settled principles, we remain satisfied that the trial court acted in excess of its authority when it funded the District's loan with appropriations specifically earmarked by the Legislature for other purposes.[28]

CONCLUSION AND DISPOSITION

The District's financial inability to complete the final six weeks of its 1990-1991 school term threatened to deprive District students of their

[28]Although the instant record is silent on the point, Justice Kennard worries that there *may* have been no unearmarked educational appropriations available to enforce this trial court's order. She suggests further that such funds *may* also not be available under current laws and budgetary constraints to permit judicial enforcement of students' constitutional rights in similar future cases. These concerns have no practical effect in the instant lawsuit, because the State does not seek rescission of the District's loan, and the educational rights of the District's students are secure. In any event, we cannot overlook the fact that the urgency of the District's crisis denied the Legislature any opportunity to respond to the trial court's injunctive order. Once alerted by the trial court's constitutional ruling, however, the Legislature and the Governor have taken significant steps to prevent or remedy recurrences of the District's crisis. We may not assume they will fail or refuse to respond as necessary to our final determination of the State's constitutional responsibilities.

California constitutional right to basic educational equality with other public school students in this State. As the court further concluded, discrimination of this nature against education, a fundamental interest, could only be justified as necessary to serve a compelling interest. The State itself, as the entity with plenary constitutional responsibility for operation of the common school system, had a duty to protect District students against loss of their right to basic educational equality. Local control of public schools was not a compelling interest which would justify the State's failure to intervene.

The trial court thus properly ordered the State and its officials to protect the students' rights. The court also acted within its remedial powers by authorizing the SPI to assume control of the District's affairs, relieve the Board of its duties, and supervise the District's financial recovery. However, the court invaded the exclusive legislative power of appropriation by approving the diversion of appropriations for GAIN and the OUSD to an emergency loan for the District.

Accordingly, we reverse the trial court's remedial order of May 2, 1991, insofar as it approves funding of an emergency loan to the District from appropriations for the Oakland Unified School District and the Greater Avenues for Independence program. In all other respects, the court's orders of April 29 and May 2, 1991, are affirmed. The Court of Appeal is directed to remand the cause to the trial court for such further proceedings as may be appropriate under the views expressed in this opinion.

Panelli, J., Arabian, J., and George, J., concurred.

LUCAS, C. J., Concurring and Dissenting.—I concur with the majority's conclusions regarding the constitutional obligations of the State of California (State) to assure educational equality. I would not, however, address the propriety of the sources approved by the trial court to provide an emergency loan.

In my view, we need not consider questions regarding the use of the Oakland Unified School District (OUSD) emergency appropriation or the unused appropriation for the Greater Avenues for Independence (GAIN) program because the issues are moot and their resolution will have no impact on the status quo in this case. As the majority notes, at the May 2, 1991, proceeding, the State continued to object to the trial court's order arising out of the April 29, 1991, hearing. That order required the State, Superintendent of Public Instruction (SPI) and Controller, at their discretion and "by whatever means they deem appropriate," to ensure Richmond students were not deprived of six weeks of education provided to other students within California. In addition to renewing its basic position on the merits of the

constitutional arguments, the State also objected to use of the specific funds proposed by the SPI and Controller. It offered no alternative sources of funding and appealed from both orders.

Before us, however, the State does not demand rescission of the court-approved loan or any change in the status of that funding. The funding was granted as a loan and a loan repayment agreement has been worked out by the parties. The State, acknowledging those facts, expressly asserts "We do not argue that the Controller must be compelled immediately to recover the money." In other words, it seeks no relief from the trial court's order granting payment from the challenged sources and compelling repayment of the funds under a prescribed repayment schedule.

Accordingly, as the SPI observes, the matter is moot. The State's response, found in its reply brief, is only that "the trial court in the next case will still be guided by, unless this court disapproves the test, the 'generally related' test set forth in *Carmel Valley [Fire Protection Dist.* v. *State of California* (1987) 190 Cal.App.3d 521, 540-541 (234 Cal.Rptr. 795)] and *Long Beach [Unified Sch. Dist.* v. *State of California* (1990) 225 Cal.App.3d 155, 181-182 (275 Cal.Rptr. 449)]." It does not assert that this issue is capable of evading review because of timing or that a present controversy over the use of these particular funds still exists. Instead, it seeks guidance only for the future. I would decline to render what would essentially be an advisory opinion here. (See *People* ex rel. *Lynch* v. *Superior Court* (1970) 1 Cal.3d 910, 912 [83 Cal.Rptr. 670, 464 P.2d 126] ["The rendering of advisory opinions falls within neither the functions nor the jurisdiction of this court"].)

MOSK, J., Concurring and Dissenting.—I am in general agreement with the views expressed in Justice Kennard's concurring and dissenting opinion.

However, I cannot embrace the ill-advised concession that the trial court's order "did pose a potential for disruption of a function of the legislative branch" although the degree of potential disruption "is not great" and the purported infringement on the legislative function is "not substantial." (Kennard, J., *post*, conc. and dis. opn. at pp. 710, 711.)

The theory of potential interference with legislative functions to any extent is inconsistent with the ultimate conclusion that the funds used for the emergency loan were "reasonably related" to the educational purposes of the legislation, and, indeed, "the trial court's order furthered, rather than defeated, that valid legislative purpose." As persuasively observed in footnote 2, the "funds were appropriated for purposes reasonably and closely related

to the purpose for which the trial court ordered them to be used." (Kennard, J., *post*, conc. and dis. opn. at p. 711.)

Under the foregoing circumstances—with which I agree—there cannot be some conceptual interference, even though "not great," with the functions of the legislative branch.

With that caveat, I join the concurring and dissenting opinion.

KENNARD, J., Concurring and Dissenting.—I agree with the majority that the threatened closure of the schools of the Richmond Unified School District (District) was such an extreme departure from prevailing educational standards as to infringe on the students' state constitutional rights to basic educational equality, requiring the State of California (State) to intervene to protect those rights.

I do not agree, however, that the trial court violated the separation of powers doctrine by ordering that emergency loan funds be made available from an unused special appropriation to the Department of Education and an unused emergency appropriation to the Oakland Unified School District (OUSD). The majority has, in effect, declared that although the students' right to education is fundamental, no means may exist by which our judicial system can enforce that right. In my view, the trial court's order was an appropriate and pragmatic resolution of a difficult case under extreme pressure. Because the Legislature had already appropriated the funds in question for educational purposes reasonably related to the District's needs, I discern no constitutional violation, and would affirm the trial court's orders in their entirety.

I.

On April 17, 1991, the District, facing a $23 million budgetary shortfall, announced its schools would close on May 1, 1991, rather than as scheduled on June 14, 1991. Parents of students in the District's schools then filed a class action against the State and the District's board of education, alleging the closure would deprive children of their fundamental right to education and would violate equal protection guarantees. The trial court granted plaintiffs' motion for a preliminary injunction, finding that "education is a fundamental right in California [and] unless injunctive relief is granted children in the District will be denied six weeks of instruction that will be provided to every other child in the State." The trial court ordered the State, the Superintendent of Public Instruction (Superintendent), and the State Controller "to ensure that the students in the District are not deprived of six

weeks of public education while others within the state are not so deprived." The trial court added that "how these defendants accomplish this is up to the discretion of the defendants."

Thereafter, the Superintendent and the Controller proposed a plan to keep the schools open. They proposed that $19 million in unspent funds from two educational programs—from the Greater Avenues for Independence (GAIN) program and from an appropriation to the OUSD—be loaned to the District. After an evidentiary hearing, the trial court ordered the State Controller to disburse an emergency loan to the District from these funds. This court denied the State's motion to stay the order pending appeal, but transferred the case here.

II

The majority holds that the trial court's remedial order violated the doctrine of separation of powers. Essentially, the majority reasons that by ordering that the unused funds be loaned to the District, the trial court impermissibly engaged in the appropriation of funds, an area of exclusive legislative concern.

The majority's conclusion originates from a fundamental misunderstanding of the separation of powers doctrine. Implicit in the majority's discussion is the assumption that under our tripartite scheme of government, particular powers can be definitively categorized as belonging to one of the three branches, and that these powers can never be exercised by a branch other than the designated branch. Thus, under the majority's approach, appropriation is exclusively a legislative function, and unless the Legislature has either appropriated funds for a specific purpose, or made a "catchall" appropriation under which a specific use of funds may fall, funds are simply not available for any purpose, no matter what rights are at stake.

This formalistic interpretation of the separation of powers concept is, however, contrary to modern understanding. The opinions of the United States Supreme Court, although not binding on this court in interpreting the separation of powers principles of the California Constitution, supply a persuasive body of case authority. Just as our state Constitution provides for the separation of the powers of government into three branches (Cal. Const., art. III, § 3), so does the federal Constitution segregate the branches of government (U.S. Const., art. I, § 1, art. II, § 1, & art. III, § 1).

The United States Supreme Court has "squarely rejected the argument that the Constitution contemplates a complete division of authority between the

three branches." (*Nixon* v. *Administrator of General Services* (1977) 433 U.S. 425, 443 [53 L.Ed.2d 867, 891, 97 S.Ct. 2777].) Rather than reading the federal Constitution as " 'requiring three airtight departments of government,' " the high court has adopted a "pragmatic, flexible approach." (*Id.* at pp. 443, 442 [53 L.Ed.2d at pp. 891, 890-891.) This approach, the court has explained, is supported by historical understanding. James Madison, one of the principal architects of the United States Constitution, wrote that the concept of separation of powers " 'd[oes] not mean that these departments ought to have no *partial agency* in, or no *control* over the acts of each other,' " but instead that " 'where the *whole* power of one department is exercised by the same hands which possess the *whole* power of another department, the fundamental principles of a free constitution are subverted.' " (J. Madison, The Federalist No. 47, pp. 325-326 (J. Cooke ed. 1961) (original italics), quoted in *Mistretta* v. *United States* (1989) 488 U.S. 361, 380-381 [102 L.Ed.2d 714, 735-736, 109 S.Ct. 647].) Thus, the basic purpose of the separation of powers is to guard against the concentration of power in the hands of one branch, but it is important to distinguish "partial agency" from those aggrandizements of power that pose genuine threats to the constitutional scheme.

The pragmatic and flexible approach favored by the nation's highest court is also appropriate because, in a society growing ever more complex, the practical requirements of efficient government action by each of the three branches must be considered. " 'While the Constitution diffuses power the better to secure liberty, it also contemplates that practice will integrate the dispersed powers into a workable government.' " (*Mistretta* v. *United States*, *supra*, 488 U.S. at p. 381 [102 L.Ed.2d at p. 736], quoting *Youngstown Sheet & Tube Co.* v. *Sawyer* (1952) 343 U.S. 579, 635 [96 L.Ed. 1153, 1199, 72 S.Ct. 863, 26 A.L.R.2d 1378] (conc. opn. of Jackson, J.).) In contemporary society, concerns about the workability of government are especially weighty.

Thus, the high court has not evolved a rigid classification of governmental powers as belonging exclusively to one branch or another. Instead, the court has stated that "the proper inquiry focuses on the extent to which [the act complained of] prevents [one of the three branches] from accomplishing its constitutionally assigned functions." (*Nixon* v. *Administrator of General Services*, *supra*, 433 U.S. at p. 443 [53 L.Ed.2d at p. 891]; *Mistretta* v. *United States*, *supra*, 488 U.S. at p. 383 [102 L.Ed.2d at pp. 737-738].) If the "potential for disruption is present," the court must then "determine whether that impact is justified by an overriding need to promote objectives within the constitutional authority" of the branch whose action is challenged. (*Nixon* v. *Administrator of General Services*, *supra*, 433 U.S. at p. 443 [53

L.Ed.2d at p. 891]; *Mistretta* v. *United States*, *supra*, 488 U.S. at p. 383, fn. 13 [102 L.Ed.2d at p. 737].)

This court has expressed a similar understanding. We have recognized that the purpose of the doctrine of separation of powers "is to prevent one branch of government from exercising the *complete* power constitutionally vested in another [citation]; it is not intended to prohibit one branch from taking action properly within its sphere that has the *incidental* effect of duplicating a function or procedure delegated to another branch. [Citation.]" (*Younger* v. *Superior Court* (1978) 21 Cal.3d 102, 117 [145 Cal.Rptr. 674, 577 P.2d 1014] [original italics].)

More recently, this court reiterated that the separation of powers doctrine " 'has not been interpreted as requiring the rigid classification of all the incidental activities of government, with the result that once a technique or method of procedure is associated with a particular branch of the government, it can never be used thereafter by another.' . . . 'From the beginning, each branch has exercised all three kinds of powers.' " (*Davis* v. *Municipal Court* (1988) 46 Cal.3d 64, 76 [249 Cal.Rptr. 300, 757 P.2d 11] [citations and italics omitted].)

III

A line of cases from California courts has established the principle that a court does not violate the separation of powers doctrine when it orders appropriate expenditures from already existing funds, if such funds are reasonably available for the expenditures in question. (*Mandel* v. *Myers* (1981) 29 Cal.3d 531, 540 [174 Cal.Rptr. 841, 629 P.2d 935]; *Long Beach Unified Sch. Dist.* v. *State of California* (1990) 225 Cal.App.3d 155, 180-181 [275 Cal.Rptr. 449]; *Carmel Valley Fire Protection Dist.* v. *State of California* (1987) 190 Cal.App.3d 521, 538-539 [234 Cal.Rptr. 795]; *Committee to Defend Reproductive Rights* v. *Cory* (1982) 132 Cal.App.3d 852, 856 [183 Cal.Rptr. 475].) The precise question in this case is whether funds can be considered "reasonably available" when they are not made part of a "catchall" appropriation under which the specific use of the funds may fall. The majority concludes that unless the funds are part of a "catchall" appropriation, they are not reasonably available.[1]

I would announce no such categorical rule. In my view, the proper inquiry is that set forth by the United States Supreme Court in *Nixon* v. *Administrator of General Services*, *supra*, 433 U.S. 425 and *Mistretta* v. *United States*,

[1]The majority purports to reaffirm the rule of these cases, but in fact undermines it. The "catchall" appropriation exception to the majority's rule could easily be eliminated if the Legislature took the time to label more specifically the purpose of each appropriation in a particular area. If the Legislature did so, there would be no possible remedy for the failure to fund any program, no matter how essential.

supra, 488 U.S. 361: To what extent does the challenged act of one branch interfere with another branch's performance of its constitutionally assigned functions? If there is some potential disruption, the court must then determine whether the challenged act is "justified by an overriding need to promote objectives within the constitutional authority" of the branch whose action is challenged. (*Nixon* v. *Administrator of General Services*, *supra*, at p. 443 [53 L.Ed.2d at p. 891]; *Mistretta* v. *United States*, *supra*, at p. 383, fn. 13 [102 L.Ed.2d at p. 737].)

Applying the principles followed by the high court in *Nixon* v. *Administrator of General Services*, *supra*, 433 U.S. 425 and *Mistretta* v. *United States*, *supra*, 488 U.S. 361, and by this court in cases such as *Younger* v. *Superior Court*, *supra*, 21 Cal.3d 102 and *Davis* v. *Municipal Court*, *supra*, 46 Cal.3d 64, I conclude that the trial court's order authorizing the Controller to disburse funds from the GAIN and OUSD accounts as an emergency loan to the District to assure the District's schools remained open did pose a potential for disruption of a function of the legislative branch.

The degree of potential disruption, however, is not great. As the trial court concluded, the funds that were the source of the emergency loan were appropriated for purposes reasonably related to the educational purposes served by the District.

The OUSD loan funds were appropriated by the Legislature for the precise purpose for which they were employed here—to alleviate a fiscal crisis in a local school district and prevent disruption of an ongoing educational program. (See Stats. 1989, ch. 1438, § 1.) Moreover, the trial court had before it an application for leave to intervene from the OUSD itself, in which the OUSD stated that the threatened closure of the nearby District "would place substantial and difficult burdens on OUSD as displaced Richmond students seek admission to Oakland Schools," that would be "extremely costly and disruptive" to the operation of the Oakland schools. The emergency loan fund for the OUSD was intended by the Legislature to avoid disruption of the educational program at the Oakland schools, and the trial court's order furthered, rather than defeated, that valid legislative purpose.

The GAIN program was enacted to address the problem of teenage parenting, basic educational deficiencies, and long-term welfare dependency. Specifically, GAIN was intended to "[p]rovide the education and training services needed by teenage parents to help them earn a high school diploma or its equivalent," and to "[l]ink teenagers to other needed health and social services." (Welf. & Inst. Code, § 11330, subd. (c).) The purpose of the particular appropriation to the Department of Education at issue in this case

was solely to meet educational needs, and not to provide health and social services. (Stats. 1989, ch. 93, § 22.00.) This goal is served by keeping the District's schools open. The trial court had before it uncontradicted evidence that a large number of the students in the District came from low-income families, many of whom were welfare-dependent. The court could rationally conclude that the otherwise unused GAIN funds were reasonably available to meet the basic educational needs of the District's students, a significant portion of whom were in the welfare-dependent population the GAIN program was targeted to assist. Under the circumstances, the funds were ordered to be used for a purpose reasonably congruent with the statutory purpose.[2]

Thus, because the trial court authorized the OUSD and GAIN funds to be used for a purpose that was reasonably related to the purposes for which the funds were appropriated, any infringement on the legislative function is not substantial. By contrast, we are not faced with a situation in which a trial court has ordered that funds appropriated for one purpose be used for some entirely unrelated purpose; nor are we confronted with a trial court order that funds actually in use for one program be diverted to another. It is vital that

[2]The majority asserts that this opinion "urges abandonment" of the rule of *Mandel* v. *Myers*, *supra*, 29 Cal.3d 531 (*Mandel*). This is incorrect.

In *Mandel*, *supra*, 29 Cal.3d 531, this court held that the separation of powers doctrine does not prevent the courts from ordering appropriate expenditures from already existing funds when such funds are "reasonably available for the expenditures in question . . . ." (*Id.* at p. 542.) There, the court found that certain "catchall" funds were reasonably available for the expenditures in question, the payment of attorney fees in a case enforcing constitutional rights. But nothing in *Mandel* indicated that the only funds that might ever be reasonably available in any case were "catchall" funds. And, as later cases made clear, *Mandel*'s test of "reasonable availability" encompasses unused funds that have been appropriated for purposes closely related to the purposes for which they are sought to be expended. (*Long Beach Unified Sch. Dist.* v. *State of California*, *supra*, 225 Cal.App.3d at p. 181; *Carmel Valley Fire Protection Dist.* v. *State of California*, *supra*, 190 Cal.App.3d at p. 541.)

In this case, as my analysis has demonstrated, the OUSD and GAIN funds were appropriated for purposes reasonably and closely related to the purpose for which the trial court ordered them to be used. Thus, *Mandel* and its progeny were not violated. The analysis in this opinion is entirely consistent with both the *Mandel* line of cases, and the cases from the United States Supreme Court and this court that more fully and generally articulate the doctrine of separation of powers. *Mandel* and its progeny represent an area of specific application of general separation of powers principles; properly understood, there is no disjunction between the *Mandel* line of cases and cases such as *Nixon* v. *Administrator of General Services*, *supra*, 433 U.S. 425, and *Mistretta* v. *United States*, *supra*, 488 U.S. 361, that set forth a principled and coherent view of the separation of powers doctrine.

Thus, the majority's accusation that the approach to separation of powers questions set forth in this opinion, which is the same approach employed by our nation's highest court, would "stand the separation of powers clause on its head," is meritless.

trial courts take care to minimize any impingement on legislative prerogatives. But the trial court in this case did use the least intrusive means available to it to ensure the students' rights.[3]

As discussed earlier, if there is some cognizable interference with the functions of another branch, the reviewing court must then determine whether the act is "justified by an overriding need to promote objectives within the constitutional authority" of the branch whose action is challenged. (*Nixon* v. *Administrator of General Services*, *supra*, 433 U.S. at p. 443 [53 L.Ed.2d at p. 891]; *Mistretta* v. *United States*, *supra*, 488 U.S. at p. 383, fn. 13 [102 L.Ed.2d at p. 737].) In my view, here the trial court's order was so justified.

The objective that the trial court sought to achieve by its orders in this case—to assure the protection of the fundamental rights of the District's students—was unquestionably within its constitutional authority. As this court has made clear on previous occasions, and as the majority reaffirms today, education is a fundamental right under the California Constitution. (*Serrano* v. *Priest* (1971) 5 Cal.3d 584, 608-609 [96 Cal.Rptr. 601, 487 P.2d 1241, 41 A.L.R.3d 1187]; *Serrano* v. *Priest* (1976) 18 Cal.3d 728, 766 [135 Cal.Rptr. 345, 557 P.2d 929].)

Moreover, the court, in acting to protect the students' rights to education, had no practical alternative to the remedial order it issued. It was the court's

[3]At the hearing on the preliminary injunction, an official of the Department of Education testified without contradiction that there were two sources from which department funds were available that could be employed to assist the District—the OUSD fund and the GAIN fund. No other funds were identified as available.

The funds appropriated to the Department of Education for the general support of elementary and secondary schools are not placed in a "catchall" fund subject to the discretion of Department of Education officials. Instead, under the Education Code, virtually all sums transferred from the state's general fund to the Department of Education for the general support of elementary and secondary education are transferred subject to a strict formula under which each local district is entitled to an amount computed on the basis of average daily student attendance. (Ed. Code, § 14000 et seq., § 46000 et seq.) No state official appears to have any discretion to vary the legislatively mandated allocation of funds.
