Both state and local laws thus were designed to establish requirements which had to be satisfied before the Topanga Canyon Investment Company should have been granted its variance. Although the cases have held that substantial evidence must support the award of a variance in order to insure that such legislative requirements have been satisfied [FN8] (see, e.g., *Siller v. Board of Supervisors* (1962) 58 Cal.2d 479, 482 [25 Cal.Rptr. 73, 375 P.2d 41]; *Bradbeer v. England* (1951) 104 Cal.App.2d 704, 707 [232 P.2d 308]), they have failed to clarify whether the administrative agency must always set forth findings and have not illuminated the proper relationship between the evidence, findings, and ultimate agency action. [FN9]

FN8 The rule stated finds its source in authorities holding that all adjudicatory determinations of local agencies are entitled to no more than substantial evidence review. As indicated above (fn. 1, *ante*) those authorities no longer state the law with respect to adjudicatory determinations of such agencies which affect fundamental vested rights. Since no such right is involved in this case, however, the substantial evidence standard remains applicable. We note by way of caution, however, that merely because a case is said to involve a "variance" does not necessarily dictate a conclusion that no funda-

mental vested right is involved. The term "variance" is sometimes used, for example, to refer to permits for nonconforming uses which predate a zoning scheme. (See Hagman, Larson, & Martin, Cal. Zoning Practice (Cont. Ed. Bar) pp. 383-384.)

FN9 For descriptions of the history of judicial action in this state with respect to zoning variance grants, see Bowden, *Article XVIII - Opening the Door to Open Space Control* (1970) 1 Pacific L.J. 461, 507-509; 1 Appendix to Journal of the Senate (1970 Reg. Sess.) Final Report of the Joint Committee on Open Space Land (1970) pages 95-98; Hagman, Larson,& Martin, Cal. Zoning Practice, *supra*, pages 287-291.

One of the first decisions to emphasize the importance of judicial scrutiny of the record in order to determine whether substantial evidence supported administrative findings that the property in question met the legislative variance requirements was that penned by Justice Molinari in ***513** *Cow Hollow Improvement Club v. Board of Permit Appeals* (1966) 245 Cal. App.2d 160 [53 Cal.Rptr. 610]. Less than one year later, we followed the approach of that case in *Broadway, Laguna etc. Assn.* v. *Board of Permit Appeals* (1967) 66 Cal.2d 767 [59 Cal.Rptr. 146, 427 P.2d 810], and ordered that a zoning board's grant of a variance be set aside because the party seeking the variance had failed to adduce sufficient evidence to support administrative findings that the evidence satisfied the requisites for a variance set forth in the same San Francisco ordinance.

Understandably, however, the impact of these opinions remained uncertain. The San Francisco ordinance applicable in *Cow Hollow* and *Broadway* explicitly required the zoning board to specify its subsidiary findings and ultimate conclusions; this circumstance raised the question whether a court should require findings and examine their sufficiency in a case in which the applicable local legislation did not explicitly command the administrative body to set forth findings. Indeed language in *Broadway* intimated that such a case was distinguishable. (*Broadway, Laguna etc. Assn.* v. *Board of Permit Appeals, supra*, at pp. 772-773. See also *Stoddard v. Edelman* (1970) 4 Cal.App.3d 544, 549 [84 Cal.Rptr. 443]. Cf. *Friends of Mammoth v. Board of Supervisors* (1972) 8 Cal.3d 247, 270 [104 Cal.Rptr. 761, 502 P.2d 1049].) Further, neither *Cow Hollow* nor *Broadway* confronted Government Code section 65906, since both cases concerned a chartered city. [FN10] There thus also remained uncertainty with respect to cases involving zoning jurisdictions other than chartered cities.

FN10 See page 511, *ante*.

Nevertheless, in an opinion subsequent to *Broadway; Hamilton* v. *Board of Supervisors* (1969) 269 Cal.App.2d 64 [75 Cal.Rptr. 106], a Court of Appeal set aside the grant of a variance by a planning commission under circumstances different from those in *Broadway* and *Cow Hollow*. The zoning jurisdiction involved in that controversy was a county, not a chartered city, and the court's opinion did not suggest that any applicable ordinance required administrative findings. Deeming Government Code section 65906 "concededly controlling," (*Hamilton v. Board of Supervisors, supra*, at p. 67), the court undertook the task of squaring the findings announced by the commission with the commission's grant of the variance and concluded that the findings were insufficient to sustain the variance.

(1) Consistent with the reasoning underlying these cases, we hold that ***514** regardless of whether the local ordinance commands that the variance board set forth findings, [FN11] that body must render findings sufficient both to enable the parties to determine whether and on what basis they should seek review and, in the event of review, to apprise a reviewing court of the basis for the board's action. (2) We hold further that a reviewing court, before sustaining the grant of a variance, must scrutinize the record and determine whether substantial evidence supports the administrative agency's findings and whether these findings support the agency's decision. In making these determinations, the reviewing court must resolve reasonable doubts in favor of the administrative findings and decision.

FN11 We note the apparent applicability of section 639 of the Los Angeles County Zoning Ordinance which was in effect at the time respondent granted the variance. That section provided: "After a hearing by a zoning board the said zoning board shall report to the commission its findings and recom-

mend the action which it concludes the commission should take." As explained in text, however, we rest our ruling upon Code of Civil Procedure section 1094.5.

Our analysis begins with consideration of Code of Civil Procedure section 1094.5, the state's administrative mandamus provision which structures the procedure for judicial review of adjudicatory decisions rendered by administrative agencies. (3) Without doubt, this provision applies to the review of variances awarded by bodies such as the Los Angeles County zoning agencies that participated in the present case. [FN12] (4) Section 1094.5 clearly contemplates that at minimum, the reviewing court must determine both whether substantial evidence supports the administrative ***515** agency's findings and whether the findings support the agency's decision. Subdivision (b) of section 1094.5 prescribes that when petitioned for a writ of mandamus, a court's inquiry should extend, among other issues, to whether "there was any prejudicial abuse of discretion." Subdivision (b) then defines "abuse of discretion" to include instances in which the administrative order or decision "is not supported by the findings, *or* the findings are not supported by the evidence." (Italics added.) Subdivision (c) declares that "*in all ... cases*" (italics added) other than those in which the reviewing court is authorized by law to judge the evidence independently, [FN13] "abuse of discretion is established if the court determines that the findings are not supported by substantial evidence in the light of the whole record." (See *Zakessian v. City of Sausalito* (1972) 28 Cal.App.3d 794, 798 [105 Cal.Rptr. 105].)

FN12 *Allen v. Humboldt County Board of Supervisors* (1963) 220 Cal.App.2d 877, 882 [34 Cal.Rptr. 232]. See also *Siller* v. *Board of Supervisors* (1962) 58 Cal.2d 479, 481 [25 Cal.Rptr. 73, 375 P.2d 41]. The California Judicial Council's report reflects a clear desire that section 1094.5 apply to all agencies, regardless of whether they are subject to the Administrative Procedure Act and regardless of their state or local character. (See Judicial Council of Cal., 10th Biennial Rep. (1944) pp. 26, 45. See also *Temescal Water Co. v. Dept. Public Works* (1955) 44 Cal.2d 90, 101 [280 P.2d 1]; Deering, Cal. Administrative Mandamus (1966) p. 7.) "In the absence of compelling language in [a] statute to the contrary, it will be assumed that the Legislature adopted the proposed legislation with the intent and meaning expressed by the council in its report." (*Hohreiter* v. *Garrison* (1947) 81 Cal.App.2d 384, 397 [184 P.2d 323].)

Section 1094.5 makes administrative mandamus available for review of "any final administrative order or decision made as the result of a proceeding in which *by law* a hearing is required to be given, evidence is required to be taken and discretion in the determination of facts is vested in the inferior tribunal, corporation, board or officer." (Italics added.) Government Code section 65901 satisfies these requisites with respect to variances granted by jurisdictions other than chartered cities such as Los Angeles County's zoning agencies. Section 65901 provides, in part: "The board of zoning adjustment or zoning administrator shall hear and decide applications for conditional uses or other permits when the zoning ordinance provides therefor and establishes criteria for determining such matters, and applications for variances from the terms of the zoning ordinance."

FN13 See footnote 1, *supra*.

(5) We further conclude that implicit in section 1094.5 is a requirement that the agency which renders the challenged decision must set forth findings to bridge the analytic gap between the raw evidence and ultimate decision or order. If the Legislature had desired otherwise, it could have declared as a possible basis for issuing mandamus the absence of substantial evidence to support the administrative agency's action. By focusing, instead, upon the relationships between evidence and findings and between findings and ultimate action, the Legislature sought to direct the reviewing court's attention to the analytic route the administrative agency traveled from evidence to action. In so doing, we believe that the Legislature must have contemplated that the agency would reveal this route. Reference, in section 1094.5, to the reviewing court's duty to compare the evidence and ultimate decision to "*the* findings" (italics added) we believe leaves no room for the conclusion that the Legislature would have been content to have a reviewing court

speculate as to the administrative agency's basis for decision.

Our ruling in this regard finds support in persuasive policy considerations. (See generally 2 Davis, Administrative Law Treatise (1958) § 16.05, pp. 444-449; Forkosch, A Treatise on Administrative Law (1956) § 253, pp. 458-464.) According to Professor Kenneth Culp Davis, the requirement that administrative agencies set forth findings to support their adjudicatory decisions stems primarily from judge-made law (see, e.g., *Zieky v. Town Plan and Zon. Com'n of Town of Bloomfield* (1963) 151 Conn. 265 [196 A.2d 758]; *Stoll v. Gulf Oil Corp.* (1958) 79 Ohio L.Abs. 145 [155 N.E.2d 83]), and is "remarkably uniform in both federal and state ***516** courts." As stated by the United States Supreme Court, the "accepted ideal ... is that 'the orderly functioning of the process of review requires that the grounds upon which the administrative agency acted be clearly disclosed and adequately sustained.' (*S.E.C. v. Chenery Corp.* (1943) 318 U.S. 80, 94.)" (2 Davis, *supra*, § 16.01, pp. 435-436. See also *Saginaw Broadcasting Co. v. Federal C. Com'n* (1938) 96 F.2d 554, 559 [68 App.D.C. 282].)

Among other functions, a findings requirement serves to conduce the administrative body to draw legally relevant sub-conclusions supportive of its ultimate decision; the intended effect is to facilitate orderly analysis and minimize the likelihood that the agency will randomly leap from evidence to conclusions. (See 2 Cooper, State Administrative Law (1965) pp. 467-468; Feller, *Prospectus for the Further Study of Federal Administrative Law* (1938) 47 Yale L.J. 647, 666. Cf. Comment, *Judicial Control Over Zoning Boards of Appeal: Suggestions for Reform* (1965) 12 U.C.L.A. L.Rev. 937, 952.) [FN14] In addition, findings enable the reviewing court to trace and examine the agency's mode of analysis. (See *California Motor Transport Co. v. Public Utilities Com.* (1963) 59 Cal.2d 270, 274 [28 Cal.Rptr. 868, 379 P.2d 324]; *Swars v. Council of City of Vallejo* (1949) 33 Cal.2d 867, 871 [206 P.2d 355].)

FN14 Although at first blush, judicial enforcement of a findings requirement would appear to constrict the role of administrative agencies, in reality, the effect could be to the contrary. Because, notes Judge Bazelon, it provides a framework for principled decision-making, a findings requirement serves to "diminish the importance of judicial review by enhancing the integrity of the administrative process." (*Environmental Defense Fund, Inc. v. Ruckelshaus* (D.C.Cir. 1971) 439 F.2d 584, 598.) By exposing the administrative agency's mode of analysis, findings help to constrict and define the scope of the judicial function. "We must know what [an administrative] decision means," observed Mr. Justice Cardozo, "before the duty becomes ours to say whether it is right or wrong." (*United States v. Chicago, Milwaukee, St. Paul & Pacific Railroad Co.* (1935) 294 U.S. 499, 511 [79 L.Ed. 1023, 1032, 55 S.Ct. 462].)

Absent such roadsigns, a reviewing court would be forced into unguided and resource-consuming explorations; it would have to grope through the record to determine whether some combination of credible evidentiary items which supported some line of factual and legal conclusions supported the ultimate order or decision of the agency. [FN15] (6)**(See fn. 16.)** [FN16] Moreover, ***517** properly constituted findings enable the parties to the agency proceeding to determine whether and on what basis they should seek review. (See *In re Sturm* (1974) *ante*, pp. 258, 267 [113 Cal.Rptr. 361, 521 P.2d 97]; *Swars v. Council of City of Vallejo, supra,* at p. 871.) They also serve a public relations function by helping to persuade the parties that administrative decision-making is careful, reasoned, and equitable.

FN15 "Given express findings, the court can determine whether the findings are supported by substantial evidence, and whether the findings warrant the decision of the board. If no findings are made, and if the court elects not to remand, its clumsy alternative is to read the record, speculate upon the portions which probably were believed by the board, guess at the conclusions drawn from credited portions, construct a basis for decision, and try to determine whether a decision thus arrived at should be sustained. In the process, the court is required to do much that is assigned to the board. ..." (3 Anderson, American Law of Zoning (1968) § 16.41, p. 242.)

FN16 Although a variance board's findings

"need not be stated with the formality required in judicial proceedings" (*Swars v. Council of City of Vallejo, supra*, at p. 872), they nevertheless must expose the board's mode of analysis to an extent sufficient to serve the purposes stated herein. We do not approve of the language in *Kappadahl v. Alcan Pacific Co.* (1963) 222 Cal.App.2d 626, 639 [35 Cal.Rptr. 354], and *Ames v. City of Pasadena* (1959) 167 Cal.App.2d 510, 516 [334 P.2d 653], which endorses the practice of setting forth findings solely in the language of the applicable legislation.

By setting forth a reasonable requirement for findings and clarifying the standard of judicial review, we believe we promote the achievement of the intended scheme of land use control. Vigorous and meaningful judicial review facilitates, among other factors, the intended division of decision-making labor. (7) Whereas the adoption of zoning regulations is a legislative function (Gov. Code, § 65850), the granting of variances is a quasi-judicial, administrative one. (See *Johnston v. Board of Supervisors* (1947) 31 Cal.2d 66, 74 [187 P.2d 686]; *Kappadahl v. Alcan Pacific Co.* (1963) 222 Cal.App.2d 626, 634 [35 Cal.Rptr. 354].) If the judiciary were to review grants of variances superficially, administrative boards could subvert this intended decision-making structure. (See 1 Appendix to Sen. J. (1970 Reg. Sess.) Final Rep. of the Joint Committee on Open Space Land (1970) pp. 102-103.) They could "[amend] ... the zoning code in the guise of a variance" (*Cow Hollow Improvement Club v. Board of Permit Appeals, supra*, at p. 181), and render meaningless, applicable state and local legislation prescribing variance requirements.

Moreover, courts must meaningfully review grants of variances in order to protect the interests of those who hold rights in property nearby the parcel for which a variance is sought. (8) A zoning scheme, after all, is similar in some respects to a contract; each party foregoes rights to use its land as it wishes in return for the assurance that the use of neighboring property will be similarly restricted, the rationale being that such mutual restriction can enhance total community welfare. (See, e.g., 1 Appendix to Sen. J. (1970 Reg. Sess.) Final Rep. of the Joint Committee on Open Space Land (1970) p. 91; Bowden, *Article XXVIII - Opening the Door to Open Space Control* (1970) 1 Pacific L.J. 461, 501.) If the interest of ***518** these parties in preventing unjustified variance awards for neighboring land is not sufficiently protected, the consequence will be subversion of the critical reciprocity upon which zoning regulation rests.

Abdication by the judiciary of its responsibility to examine variance board decision-making when called upon to do so could very well lead to such subversion. [FN17] Significantly, many zoning boards employ adjudicatory procedures that may be characterized as casual. (See Comment, *Judicial Control over Zoning Boards of Appeal: Suggestions for Reform* (1965) 12 U.C.L.A. L.Rev. 937, 950. Cf. *Bradbeer v. England* (1951) 104 Cal.App.2d 704, 710 [232 P.2d 308].) The availability of careful judicial review may help conduce these boards to insure that all parties have an opportunity fully to present their evidence and arguments. Further, although we emphasize that we have no reason to believe that such a circumstance exists in the case at bar, the membership of some zoning boards may be inadequately insulated from the interests whose advocates most frequently seek variances. (See e.g., 1 Appendix to Sen. J. (1970 Reg. Sess.) Final Rep. of the Joint Committee on Open Space Land (1970) p. 100.) Vigorous judicial review thus can serve to mitigate the effects of insufficiently independent decision-making.

FN17 See generally Comment, *Zoning: Variance Administration in Alameda County* (1962) 50 Cal.L.Rev. 101, 107 and footnote 42. See also Note, *Administrative Discretion in Zoning* (1969) 82 Harv.L.Rev. 668, 672 and sources cited therein.

2. *The planning commission's summary of "factual data" - its apparent "findings" - does not include facts sufficient to satisfy the variance requirements of Government Code section 65906.*

As we have mentioned, at least two sets of legislative criteria appear applicable to the variance awarded: Government Code section 65906 and Los Angeles County Zoning Ordinance No. 1494, section 522. (9) The variance can be sustained only if *all* applicable legislative requirements have been satisfied. Since we conclude that the requirements of section 65906 have not been met, the question whether the variance conforms with the criteria set forth in Los Angeles County Zoning Ordinance No. 1494, section 522 becomes immaterial. [FN18] ***519**

FN18 We focus on the statewide requirements because they are of more general application. If we were to decide that the criteria of section 65906 had been satisfied, we would then be called upon to determine whether the requirements set forth in the county ordinance are consistent with those in section 65906 and, if so, whether these local criteria also had been satisfied.

The local criteria need be squared with the state criteria since the section 65906 requirements prevail over any inconsistent requirements in the county ordinance. The stated purpose of title 7, chapter 4, of the Government Code, which includes section 65906, is to provide limitations - albeit minimal ones - on the adoption and administration of zoning laws, ordinances, and regulations by counties and nonchartered cities. (See fn. 6, *ante*.) Section 65802 of the code declares that "[n]o provisions of [the Government Code], other than the provisions of [chapter 4], and no provisions of any other code or statute shall restrict or limit the procedures provided in [chapter 4] by which the legislative body of any county or city enacts, amends, administers, or provides for the administration of any zoning law, ordinance, rule or regulation." The clear implication is that chapter 4 does restrict or limit these procedures. (See also Cal. Const., art. XI, § 11.)

If local ordinances were allowed to set a lesser standard for the grant of variances than those provided in section 65906, a county or city could escape the prohibition against granting use variances added to section 65906 in 1970 (see fn. 5, *ante*) merely by enacting an ordinance which would permit the grant of use variances. Clearly the Legislature did not intend that cities and counties to which the provisions of chapter 4 apply should have such unfettered discretion.

We summarize the principal factual data contained in the Los Angeles County Regional Planning Commission's report, which data the commission apparently relied on to award the variance. [FN19] The acreage upon which the original real party in interest [FN20] sought to establish a mobile home park consists of 28 acres; it is a hilly and in places steep parcel of land. At the time the variance was granted, the property contained one single-family residence. Except for a contiguous area immediately to the southeast which included an old and flood-damaged subdivision and a few commercial structures, the surrounding properties were devoted exclusively to scattered single-family residences.

FN19 We confine our analysis to the relationship between the commission's fact summary and its ultimate decision; we do not consider the testimonial evidence directly. To sustain the grant of the variance of course would require that we conclude that substantial evidence supports the findings and that the findings support the variance award. Since we decide below, however, that the commission's fact summary does not include sufficient data to satisfy the section 65906 requirements, we need not take the further step of comparing the transcript to the fact summary. Our basis for so proceeding lies in Code of Civil Procedure section 1094.5, which defines "abuse of discretion," one of several possible grounds for issuance of a writ of mandamus, to include instances in which "the order or decision [of the administrative agency] is not supported by the findings, *or* the findings are not supported by the evidence." (Italics added.)

FN20 See footnote 3, *ante*.

The proposed mobile home park would leave 30 percent of the acreage in its natural state. An additional 25 percent would be landscaped and terraced to blend in with the natural surroundings. Save in places where a wall would be incompatible with the terrain, the plan contemplated enclosure of the park with a wall; it further called for rechanneling a portion of Topanga Canyon Creek and anticipated that the developers would be required to dedicate an 80-foot-wide strip of the property for a proposed realignment of Topanga Creek Boulevard. ***520**

The development apparently would partially satisfy a growing demand for new, low cost housing in the area. Additionally, the project might serve to attract further investment to the region and could pro-

vide a much needed fire break. Several data indicate that construction on the property of single-family residences in conformance with the zoning classification would generate significantly smaller profits than would development of the mobile home park. Single-family structures apparently would necessitate costly grading, and the proposed highway realignment would require a fill 78 feet high, thereby rendering the property unattractive for conventional residential development. Moreover, the acreage is said not to be considered attractive to parties interested in single-family residences due, in the words of the report's summary of the testimony, to "the nature of the inhabitants" in the vicinity and also because of local flood problems.

These data, we conclude, do not constitute a sufficient showing to satisfy the section 65906 variance requirements. That section permits variances "*only* when, because of *special* circumstances applicable to the property, ... the strict application of the zoning ordinance deprives such property of privileges enjoyed by other property in the vicinity and under identical zoning classification." (Italics added.) (10) This language emphasizes *disparities* between properties, not treatment of the subject property's characteristics in the abstract. (See *Minney v. City of Azusa* (1958) 164 Cal.App.2d 12, 31 [330 P.2d 255]; cf. *In re Michener's Appeal* (1955) 382 Pa. 401 [115 A.2d 367, 371]; *Beirn* v. *Morris* (1954) 14 N.J. 529 [103 A.2d 361, 364]; Note, *Administrative Discretion in Zoning* (1969) 82 Harv. L.Rev. 668, 671-672.) It also contemplates that at best, only a small fraction of any one zone can qualify for a variance. (See generally 3 Anderson, American Law of Zoning (1968) § 14.69, pp. 62-65.)

The data contained in the planning commission's report focus almost exclusively on the qualities of the property for which the variance was sought. In the absence of comparative information about surrounding properties, these data lack legal significance. Thus knowledge that the property has rugged features tells us nothing about whether the original real party in interest faced difficulties different from those confronted on neighboring land. [FN21] Its assurances that it would landscape and terrace parts of the property and leave others in their natural state are all well and good, but they bear not at all on the critical issue whether a variance ***521** was necessary to bring the original real party in interest into substantial parity with other parties holding property interests in the zone. (See *Hamilton v. Board of Supervisors, supra*, at p. 66.)

> FN21 Indeed, the General Plan for Topanga Canyon suggests that the subject property is not uniquely surfaced; it states that the entire area is characterized by "mountainous terrain, steep slopes and deep canyons interspersed with limited areas of relatively flat or rolling land."

The claim that the development would probably serve various community needs may be highly desirable, but it too does not bear on the issue at hand. Likewise, without more, the data suggesting that development of the property in conformance with the general zoning classification could require substantial expenditures are not relevant to the issue whether the variance was properly granted. Even assuming for the sake of argument that if confined to the subject parcel and no more than a few others in the zone, such a burden could support a variance under section 65906, for all we know from the record, conforming development of other property in the area would entail a similar burden. Were that the case, a frontal attack on the present ordinance or a legislative proceeding to determine whether the area should be rezoned might be proper, but a variance would not. (1 Appendix to Sen. J. (1970 Reg. Sess.) Final Rep. of the Joint Committee on Open Space Land (1970) p. 95; Bowden, *Article XVIII - Opening the Door to Open Space Control* (1970) 1 Pacific L.J. 461, 506.)

Although they dispute that section 65906 requires a showing that the characteristics of the subject property are exceptional, the current real parties in interest would nevertheless have us speculate that the property is unlike neighboring parcels. They point out that the plot has rugged terrain and three stream beds [FN22] and that the Topanga Creek Boulevard realignment would bisect the property. (11) Speculation about neighboring land, however, will not support the award of a variance. The party seeking the variance must shoulder the burden of demonstrating before the zoning agency that the subject property satisfies the requirements therefor. (*Tustin Heights Association v. Board of Supervisors* (1959) 170 Cal.App.2d 619, 627 [339 P.2d 914].) Thus neither an administrative agency nor a reviewing court may assume without evidentiary basis that the character of neighboring

property is different from that of the land for which the variance is sought. [FN23] ***522**

FN22 Interestingly, since the witnesses who testified in favor of the variance never mentioned the stream beds, the original real party in interest apparently did not regard the beds as disadvantageous. Rather, a witness who opposed the variance offhandedly mentioned the beds as illustrative of the scenic beauty of the area. The trial court seized upon this testimony and used it in justifying the variance award.

FN23 In fact, other parcels in the zone may well have the features that the successoral real parties in interest speculate are confined to the subject property. Rugged terrain apparently is ubiquitous in the area (see fn. 21, *ante*), and because the stream beds and highway must enter and exit the subject property somewhere, they may all traverse one or more neighboring parcels. Further, for all we know from the commission's findings, stream beds may traverse most parcels in the canyon.

(12) Moreover, the grant of a variance for nonconforming development of a 28-acre parcel in the instant case is suspect. Although we do not categorically preclude a tract of that size from eligibility for a variance, we note that in the absence of unusual circumstances, so large a parcel may not be sufficiently unrepresentative of the realty in a zone to merit special treatment. By granting variances for tracts of this size, a variance board begins radically to alter the nature of the entire zone. Such change is a proper subject for legislation, not piecemeal administrative adjudication. (See *Sinclair Pipe Line Co.* v. *Village of Richton Park* (1960) 19 Ill.2d 370 [167 N.E.2d 406]; *Appeal of the Catholic Cemeteries Association* (1954) 379 Pa. 516 [109 A.2d 537]; *Civil City of Indianapolis v. Ostrom R. & Construction Co.* (1931) 95 Ind.App. 376 [176 N.E. 246].) (13) Since there has been no affirmative showing that the subject property differs substantially and in relevant aspects from other parcels in the zone, we conclude that the variance granted amounts to the kind of "special privilege" explicitly prohibited by Government Code section 65906.

We submit, in summary, that this case illumines two important legal principles. First, by requiring that administrative findings must support a variance, we emphasize the need for orderly legal process and the desirability of forcing administrative agencies to express their grounds for decision so that reviewing courts can intelligently examine the validity of administrative action. Second, by abrogating an unsupported exception to a zoning plan, we conduce orderly and planned utilization of the environment.

We reverse the judgment and remand the cause to the superior court with directions to issue a writ of mandamus requiring the Los Angeles Board of Supervisors to vacate its order awarding a variance. We also direct the superior court to grant any further relief that should prove appropriate.

Wright, C. J., McComb, J., Mosk, J., Burke, J., Sullivan, J., and Clark, J., concurred. ***523**

DAWN ZUCKERNICK et al., Petitioners,
v.
THE MUNICIPAL COURT FOR THE CENTRAL ORANGE JUDICIAL DISTRICT OF ORANGE COUNTY, Respondent; THE PEOPLE, Real Party in Interest.

No. S038530.

Supreme Court of California
Apr 24, 1995.

SUMMARY

Homeless persons and taxpayers petitioned the superior court for a writ of mandate, seeking to bar enforcement of a city ordinance banning "camping" and storage of personal property, including camping equipment, in designated public areas. The superior court struck some language from the ordinance but otherwise denied the petition. (Superior Court of Orange County, No. 696000, James L. Smith, Judge.) In a related action, persons who had been charged in municipal court with violating the ordinance demurred unsuccessfully to the complaints and thereafter sought a writ of mandate to compel the municipal court to sustain their demur rers. (Municipal Court for the Central Orange Judicial District of Orange County, Nos. 93CM02392, 93CM02393, 93CM02361, 93CM02519, 93CM02525, 93CM02358, 93CM02513, 93CM02354, 93CM02516, 93CM02530, 93CM02386 and 93CM02520, Gregory Lewis, Judge.) The Court of Appeal, Fourth Dist., Div. Three, Nos. G014257 and G014536, consolidated the appeal with the writ petition, and, ruling that the ordinance was unconstitutional, reversed the judgment of the superior court and ordered that a writ of mandate be issued directing the municipal court to sustain the demurrers to the counts pleading violations of the ordinance.

The Supreme Court reversed the judgment of the Court of Appeal. The court held that both writ petitions stated only facial and not as applied challenges to the ordinance. The court also held that the three persons who sought to bar enforcement of the ordinance had a sufficient beneficial interest to bring the action, even though two had never been cited under the ordinance and the third was not a homeless person, since, as taxpayers, they had standing under Code Civ. Proc., § 526a, to restrain illegal expenditure or waste of city funds on future enforcement of an unconstitutional ordinance or an impermissible means of enforcement of a facially valid ordinance. However, the court held that, absent a basis for believing that the ordinance would not have been adopted if the public areas of the city had been appropriated for living accommodation by any group other than the homeless, or that it was the intent of the city council the ordinance be enforced only against homeless persons, the ordinance was not subject to attack on the basis that the city council may have hoped its impact would be to discourage homeless persons from moving to the city. Nor could it be assumed that the purpose of the ordinance was simply to drive the homeless out of the city. Further, the Court of Appeal erred in holding that the ordinance impermissibly infringed on the right of the homeless to travel; in holding that the ordinance was invalid because it permitted punishment for the status of being indigent or homeless, and thus permitted cruel and unusual punishment; and in holding that the ordinance was unconstitutionally vague and overbroad. (Opinion by Baxter, J., with Lucas, C. J., Kennard, Arabian and George, JJ., concurring. Separate concurring opinions by Kennard and Werdegar, JJ. Separate dissenting opinion by Mosk, J.)

HEADNOTES

Classified to California Digest of Official Reports

(1a, 1b) Constitutional Law § 19--Constitutionality of Legislation-- Raising Question of Constitutionality--Challenge as "Facial" or "As Applied"-- Ordinance Banning "Camping" in Public Areas--Petition by Homeless Persons and Taxpayers for Writ of Mandate to Bar Enforcement of Ordinance.

A petition for a writ of mandate brought by homeless persons and taxpayers, seeking to bar enforcement of a city ordinance banning "camping" and storage of personal property in designated public areas, stated only a facial and not an as applied challenge to the ordinance, and the trial court did not err in

failing to rule on an as applied challenge, since plaintiffs did not perfect a basis for such a ruling. Although the petition alleged in conclusory language that a pattern of constitutionally impermissible enforcement of the ordinance had existed, plaintiffs never identified the particular applications of the law to be enjoined. The only relief sought in the petition was a writ of mandate enjoining any enforcement of the ordinance by defendants, which is the kind of relief sought in a facial attack. Also, since no evidentiary hearing was held, plaintiffs did not create a factual record on which an injunction limited to improper applications of the ordinance could have been fashioned. Even assuming that plaintiffs attempted to challenge the ordinance on the basis that homeless persons whose violation thereof was involuntary could offer a due-process-based necessity defense, declarations submitted by plaintiffs did not demonstrate that the ordinance had been enforced in a constitutionally impermissible manner against such persons.

[See 7 **Witkin,** Summary of Cal. Law (9th ed. 1988) Constitutional Law, § 56 et seq.]

(2a, 2b, 2c, 2d) Constitutional Law § 19--Constitutionality of Legislation--Raising Question of Constitutionality--Challenge as "Facial" or "As Applied"--Ordinance Banning "Camping" in Public Areas--Petition for Writ of Mandate to Compel Dismissal of Charges for Violation of Ordinance.

A petition for a writ of mandate by persons who had been charged with violation of a city ordinance banning "camping" and storage of personal property in designated public areas, to compel the trial court to sustain their demurrers to the complaints and to dismiss the charges, stated only a facial and not an as applied challenge to the ordinance. None of the complaints included any allegations identifying the charged individuals as involuntarily homeless persons whose violation of the ordinance was involuntary and/or occurred at a time when shelter beds were unavailable. Although the petition for a writ of mandate included allegations regarding the city's past efforts to rid the city of its homeless population, those allegations, even if true, were irrelevant to the legal sufficiency of the complaints. The demurrers and petition for a writ of mandate necessarily constituted only a facial attack on the ordinance since the defendants could not, on a demurrer to the accusatory pleading, offer evidence that the ordinance was invalid as applied to their individual circumstances. Moreover, the People had no opportunity to present evidence regarding the circumstances in which charged individuals had been arrested, as the only issue before the trial court in ruling on the demurrer was the sufficiency of the complaints.

(3) Constitutional Law § 19--Constitutionality of Legislation--Raising Question of Constitutionality--"Facial" and "As Applied" Challenges Compared.

A facial challenge to the constitutional validity of a statute or ordinance considers only the text of the measure itself, not its application to the particular circumstances of an individual. To support a determination of facial unconstitutionality, voiding the statute as a whole, the party challenging the provision cannot prevail by suggesting that, in some future hypothetical situation, constitutional problems may possibly arise as to the particular application of the statute. Rather, the challenger must demonstrate that the act's provisions inevitably pose a present total and fatal conflict with applicable constitutional prohibitions. An as applied challenge may seek (1) relief from a specific application of a facially valid statute or ordinance to an individual or class of individuals who are under allegedly impermissible present restraint or disability as a result of the manner or circumstances in which the statute or ordinance has been applied, or (2) an injunction against future application of the statute or ordinance in the allegedly impermissible manner it is shown to have been applied in the past. It contemplates analysis of the facts of a particular case or cases to determine the circumstances in which the statute or ordinance has been applied and to consider whether, in those particular circumstances, the application deprived the individual to whom it was applied of a protected right.

(4a, 4b) Constitutional Law § 19--Constitutionality of Legislation-- Raising Question of Constitutionality--By Criminal Defendant.

When a criminal defendant claims that a facially valid statute or ordinance has been applied in a constitutionally impermissible manner to the defendant, the court evaluates the propriety of the application on a case-by-case basis to determine whether to relieve the defendant of the sanction. However, when a criminal defendant seeks relief from a present application of a criminal statute or ordinance on constitutional grounds, it is not the administrative agency's "application" of the statute that is determinative. Whether the particular application of a statute declaring conduct criminal is constitutionally permissible can be determined only after the circumstances of its application have been established by conviction or

otherwise. Only then is an "as applied" challenge ripe. To obtain mandate or other relief from penalties imposed under a past application of the law, the defendant must presently be suffering some adverse impact of the law which the court has the power to redress.

(5a, 5b) Constitutional Law § 23--Constitutionality of Legislation-- Raising Question of Constitutionality--Burden of Proof--"As Applied" Challenge.

If a plaintiff seeks to enjoin future, allegedly impermissible, applications of a facially valid statute or ordinance, the plaintiff must demonstrate that such application is occurring or has occurred in the past. If instead it is contended that an otherwise valid statute has been applied in a constitutionally impermissible manner in the past and the plaintiff seeks an injunction against future application of the statute in that manner, the plaintiff must show a pattern of impermissible enforcement.

(6) Constitutional Law § 21--Constitutionality of Legislation--Raising Question of Constitutionality--Standing Essential to Raise Question.

In most cases, a plaintiff seeking relief from the constitutionally impermissible application of an otherwise valid statute or ordinance, either by a petition for a writ of mandamus or a complaint for declaratory and injunctive relief, must have a sufficient beneficial interest to have standing to prosecute the action, and there must be a present impermissible application of the challenged statute or ordinance which the court can remedy.

(7) Mandamus and Prohibition § 3--Mandamus--Standing to Obtain Writ.

Under Code Civ. Proc., § 1086, which expresses the controlling statutory requirements for standing to petition for a writ of mandate, the requirement that a petitioner be "beneficially interested" means that one may obtain the writ only if the person has some special interest to be served or some particular right to be preserved or protected over and above the interest held in common with the public at large.

(8) Constitutional Law § 21--Constitutionality of Legislation--Raising Question of Constitutionality--Standing Essential to Raise Question--Homeless Persons Challenging Ordinance Banning "Camping" in Public Areas.

Three plaintiffs had a sufficient beneficial interest to bring an action challenging the constitutionality of a city ordinance banning "camping" and storage of personal property in designated public areas, even though two had never been cited under the ordinance and the third was not a homeless person, since, as taxpayers, they had standing under Code Civ. Proc., § 526a, to restrain the illegal expenditure or waste of city funds on future enforcement of an unconstitutional ordinance or an impermissible means of enforcement of a facially valid ordinance.

(9) Indictment and Information § 39--Defects and Objections--Demurrer--Use.

A demurrer to a criminal complaint lies only to challenge the sufficiency of the pleading and raises only issues of law.

(10) Appellate Review § 126--Scope of Review--As Dependent on Procedural Posture of Case.

The procedural posture of a case is not simply a "technicality," but is crucial to determining the proper scope of appellate review. The procedural posture of a case also determines the ability of the parties to exercise their rights to present relevant evidence and to the creation of a full record adequate to enable the reviewing court to make a reasoned decision on the questions before it. When an appellate court fails to limit the scope of review to issues properly presented in the trial court, it denies litigants their right to have appellate questions decided on the basis of a full record which exposes all of the relevant facts and circumstances.

(11) Constitutional Law § 27--Constitutionality of Legislation--Rules of Interpretation--Motives of Legislature--Ordinance Banning "Camping" in Public Areas.

While the intent or purpose of the legislative body must be considered in construing an ambiguous statute or ordinance, the motive of the legislative body is generally irrelevant to the validity of the statute or ordinance. Thus, absent a basis for believing that a city ordinance banning "camping" and storage of personal property in designated public areas would not have been adopted if the public areas of the city had been appropriated for living accommodation by any group other than the homeless, or that it was the intent of the city council that the ordinance be enforced only against homeless persons, the ordinance was not subject to attack on the basis that the city council may have hoped that its impact would be to discourage

homeless persons from moving to the city. Nor could it be assumed that the purpose of the ordinance was simply to drive the homeless out of the city. The ordinance banned use of public property in the city for purposes for which it was not designed. At the time it was adopted, the city had agreed not to engage in discriminatory law enforcement, and the declared purpose of the ordinance did not suggest that it was to be enforced solely against the homeless.

(12) Constitutional Law § 21--Constitutionality of Legislation--Raising Question of Constitutionality--Standing Essential to Raise Question-- Consideration of Hypothetical Situations--Challenge on Basis of Prohibition of Constitutionally Protected Conduct.

One will not be heard to attack a statute on grounds that are not shown to be applicable to himself or herself and a court will not consider every conceivable situation which might arise under the language of the statute and will not consider the question of constitutionality with reference to hypothetical situations. If the statute clearly applies to a criminal defendant's conduct, the defendant may not challenge it on grounds of vagueness. However, in some cases, a defendant may make a facial challenge to the statute if he or she argues that the statute improperly prohibits a substantial amount of constitutionally protected conduct, whether or not its application to his or her own conduct may be constitutional.

(13) Constitutional Law § 52--First Amendment and Other Fundamental Rights of Citizens--Right to Travel.

Although no provision of the federal Constitution expressly recognizes a right to travel among and between the states, that right is recognized as a fundamental aspect of the federal union of states. For all the great purposes for which the federal government was formed, we are one people, with one common country. We are all citizens of the United States, and, as members of the same community, we must have the right to pass and repass through every part of it without interruption, as freely as in our own states. The right to travel, or right of migration, is an aspect of personal liberty which, when united with the right to travel, requires that all citizens be free to travel throughout the length and breadth of our land uninhibited by statutes, rules, or regulations that unreasonably burden or restrict this movement.
[See 7 **Witkin,** Summary of Cal. Law (9th ed. 1988) Constitutional Law, §§ 287, 288.]

(14) Constitutional Law § 52--First Amendment and Other Fundamental Rights of Citizens--Right to Travel--Intrastate Travel--What Constitutes Violation of Right.

The right of intrastate travel, which includes intramunicipal travel, is a basic human right protected by Cal. Const., art. I, §§ 7 and 24. Such a right is implicit in the concept of a democratic society and is one of the attributes of personal liberty under common law. However, a violation of the right of intrastate travel occurs only when there is a direct restriction of the right to travel. Indirect or incidental burdens on travel resulting from otherwise lawful governmental action are not impermissible infringements of the right to travel, and, when legislation creating a burden on the right to travel is subjected to an equal protection analysis, strict scrutiny is not required, nor must a compelling need be demonstrated in order to sustain the legislation. If there is any rational relationship between the purpose of the statute or ordinance and a legitimate government objective, the law must be upheld.

(15a, 15b, 15c) Constitutional Law § 52--First Amendment and Other Fundamental Rights of Citizens--Right of Homeless to Travel--As Violated by Ordinance Banning "Camping" in Public Areas:Parks, Squares, and Playgrounds § 6--Use.

The Court of Appeal erred in holding that a city ordinance banning "camping" and storage of personal property in designated public areas impermissibly infringed on the right of the homeless to travel. The ordinance was nondiscriminatory; it forbade use of the public streets, parks, and property by residents and nonresidents alike for purposes other than those for which the property was designed. The provisions of the ordinance did not inevitably conflict with the right to travel, and it was capable of constitutional application. The ordinance had no impact, incidental or otherwise, on the right to travel except insofar as a person, homeless or not, might have been discouraged from traveling to the city because camping on public property was banned. An ordinance that bans camping and storing personal possessions on public property does not directly impede the right to travel. Even assuming that the ordinance may have constituted an incidental impediment to some individuals' ability to travel to the city, it was capable of applications that did not offend the constitution, and thus it had to be upheld. Further, there is no constitutional mandate that sites on public property be made available for camping to facilitate a homeless person's right to travel, just as

there is no right to use public property for camping or storing personal belongings.

(16) Constitutional Law § 25--Constitutionality of Legislation--Rules of Interpretation--Presumption of Constitutionality.

All presumptions favor the validity of a statute. The court may not declare it invalid unless it is clearly so.

(17) Constitutional Law § 52--First Amendment and Other Fundamental Rights of Citizens--Right to Travel--As Including Right to Live or Stay Where One Will.

The right to travel does not endow citizens with a right to live or stay where they will. While an individual may travel where he or she will and remain in a chosen location, that constitutional guaranty does not confer immunity against local trespass laws and does not create a right to remain without regard to the ownership of the property on which the person chooses to live or stay, be it public or privately owned property.

(18) Constitutional Law § 1--Creation or Recognition of Constitutional Right as Imposing Obligation on Local Government to Provide Means to Enjoy Right.

With few exceptions, such as the right to counsel guaranteed by U.S. Const., 6th Amend., the creation or recognition of a constitutional right does not impose on a state or governmental subdivision the obligation to provide its citizens with the means to enjoy that right.

(19) Criminal Law § 519.2--Punishment--Cruel and Unusual--Ordinance Banning "Camping" in Public Areas--As Unconstitutional Punishment for Status as Indigent or Homeless:Parks, Squares, and Playgrounds § 6--Use.

The Court of Appeal erred in concluding that a city ordinance banning "camping" and storage of personal property in designated public areas was invalid because it permitted punishment for the status of being indigent or homeless, and thus permitted a punishment which violated the prohibition of cruel and unusual punishment under U.S. Const., 8th Amend., and the ban on cruel or unusual punishment of Cal. Const., art. I, § 17. The ordinance permitted punishment for proscribed conduct, not punishment for status. Neither the language of the ordinance nor the evidence submitted by the persons who had been cited under it supported a conclusion that a person could be convicted and punished under the ordinance solely on the basis that he or she had no fixed place of abode. The United States Supreme Court has not held that the Eighth Amendment prohibits punishment of acts derivative of a person's status. Further, homelessness is not readily classified as a "status." Rather, there is a substantial definitional distinction between a "status" and a "condition." Even assuming the accuracy of the declarations submitted by the persons who had been cited under the ordinance with respect to their descriptions of the circumstances in which they had been cited, it was not clear that none had alternatives to either the condition of being homeless or the conduct that led to homelessness and to the citations.
[See 3 **Witkin & Epstein,** Cal. Criminal Law (2d ed. 1989) § 1344.]

(20a, 20b, 20c) Constitutional Law § 115--Substantive Due Process-- Statutory Vagueness--Ordinance Banning "Camping" in Public Areas:Parks, Squares, and Playgrounds § 6--Use.

The Court of Appeal erred in holding that a city ordinance banning "camping" and storage of personal property in designated public areas was unconstitutionally vague. The stated purpose of the ordinance was to make public streets and other areas readily accessible to the public and to prevent use of public property "for camping purposes or storage of personal property" which "interferes with the rights of others to use the areas for which they were intended." The terms which the Court of Appeal considered vague were not so when the purpose clause of the ordinance was considered and the terms were read in that context as they should have been. Thus, there was no possibility that any law enforcement agent would have believed that picnicking in a public park constituted "camping" within the meaning of the ordinance or would have believed that leaving a towel on a beach or an umbrella in a library constituted storage of property in violation of the ordinance. Further, the ordinance gave adequate notice of the conduct it prohibited and did not invite arbitrary or capricious enforcement.
[Vagueness as invalidating statutes or ordinances dealing with disorderly persons or conduct, note, 12 **A.L.R.3d** 1448.]

(21) Constitutional Law § 113--Substantive Due Process--Statutory Vagueness.

A penal statute must define the offense with sufficient precision that ordinary people can understand what conduct is prohibited and in a manner that does not encourage arbitrary and discriminatory enforcement. The constitutional interest implicated in ques-

tions of statutory vagueness is that no person be deprived of life, liberty, or property without due process of law, as assured by both the federal Constitution (U.S. Const., 5th and 14th Amends.) and the California Constitution (Cal. Const., art. I, § 7). To satisfy the constitutional command, a statute must be sufficiently definite to provide adequate notice of the conduct proscribed and provide sufficiently definite guidelines for the police in order to prevent arbitrary and discriminatory enforcement. Only a reasonable degree of certainty is required, however. The analysis begins with the strong presumption that legislative enactments must be upheld unless their unconstitutionality clearly, positively, and unmistakably appears. A statute should be sufficiently certain so that a person may know what is prohibited thereby and what may be done without violating its provisions, but it cannot be held void for uncertainty if any reasonable and practical construction can be given to its language.

(22) Words, Phrases, and Maxims--Camp.

"Camp" means to pitch or occupy a camp, to live temporarily in a camp or outdoors.

(23a, 23b) Constitutional Law § 115--Substantive Due Process--Statutory Overbreadth--Ordinance Banning "Camping" in Public Areas:Parks, Squares, and Playgrounds § 6--Use.

A city ordinance banning "camping" and storage of personal property in designated public areas was not unconstitutionally overbroad, was not facially invalid in that respect, and was capable of constitutional application. The ordinance did not exceed the police power of the city, since there is no fundamental right to camp on public property, persons who do so are not a suspect classification, and the persons challenging the validity of the ordinance did not claim that it was invidiously discriminatory on its face. A city has the power to regulate conduct on a street, sidewalk, or other public place or on or in a place open to the public (Pen. Code, § 647c) and local ordinances governing the use of municipal parks are specifically authorized (Pub. Resources Code, § 5193). Further, a city may make and enforce within its limits all local, police, sanitary, and other ordinances and regulations not in conflict with general laws (Cal. Const., art. XI, § 7). A city not only has the power to keep its streets and other public property open and available for the purposes to which they are dedicated, it has a duty to do so. Also, none of the persons challenging the validity of the ordinance had identified a constitutionally protected right that was impermissibly restricted by application or threatened application of the ordinance. [See 8 **Witkin,** Summary of Cal. Law (9th ed. 1988) Constitutional Law, § 792 et seq.]

(24) Constitutional Law § 113--Substantive Due Process--Effect of Challenge to Law on Grounds of Vagueness or Overbreadth.

A facial challenge to a law on grounds that it is overbroad and vague is an assertion that the law is invalid in all respects and cannot have any valid application, or a claim that the law sweeps in a substantial amount of constitutionally protected conduct. The concepts of vagueness and overbreadth are related, in the sense that if a law threatens the exercise of a constitutionally protected right a more stringent vagueness test applies.

BAXTER, J.

The Court of Appeal invalidated, on constitutional grounds, an ordinance of the City of Santa Ana (Santa Ana) which banned "camping" and storage of personal property, including camping equipment, in designated public areas. We granted the petitions for review of Santa Ana and the People to consider whether the ordinance is valid on its face and whether either of the actions involved in the consolidated appeal stated an "as applied" challenge to the ordinance.

We conclude only a facial challenge was perfected in the lower courts and that the Santa Ana ordinance is valid on its face. It does not impermissibly restrict the right to travel, does not permit punishment for status, and is not unconstitutionally vague or overbroad, the only constitutional claims pursued by plaintiffs. [FN1]

> FN1 The Tobe petition for writ of mandate stated a cause of action based on an alleged violation of equal protection. The petition alleged in support of the equal protection claim only that the respondents had not and would not arrest nonhomeless persons who engaged in the same conduct for which the plaintiffs had been arrested. They offered no evidence to support that equal protection theory and did not argue an equal protection claim in the Court of Appeal or in this court. We deem that claim to have been abandoned. The Zuckernick petition did not make an equal protection claim.

We shall, therefore, reverse the judgment of the Court of Appeal.

I. Background

In October 1992, Santa Ana added article VIII, section 10-400 et seq. (the ordinance) to its municipal code. The declared purpose of the ordinance was ***1081** to maintain public streets and other public areas in the city in a clean and accessible condition. Camping and storage of personal property in those areas, the ordinance recited, interfered with the rights of others to use those areas for the purposes for which they were intended.

The ordinance provides:

"Sec. 10-402. Unlawful Camping.

"It shall be unlawful for any person to camp, occupy camp facilities or use camp paraphernalia in the following areas, except as otherwise provided:

"(a) any street;

"(b) any public parking lot or public area, improved or unimproved.

"Sec. 10-403. Storage of Personal Property in Public Places.

"It shall be unlawful for any person to store personal property, including camp facilities and camp paraphernalia, in the following areas, except as otherwise provided by resolution of the City Council:

"(a) any park;

"(b) any street;

"(c) any public parking lot or public area, improved or unimproved." [FN2]

> FN2 Section 10-401 of the ordinance defines the terms:
>
> "(a) *Camp* means to pitch or occupy camp

facilities; to use camp paraphernalia.

"(b) *Camp facilities* include, but are not limited to, tents, huts, or temporary shelters.

"(c) *Camp paraphernalia* includes, but is not limited to, tarpaulins, cots, beds, sleeping bags, hammocks or non-city designated cooking facilities and similar equipment.

"(d) *Park* means the same as defined in section 31-1 of this Code.

"(e) *Store* means to put aside or accumulate for use when needed, to put for safekeeping, to place or leave in a location.

"(f) *Street* means the same as defined in section 1-2 of this Code."

Plaintiffs in these consolidated actions [FN3] are: (1) homeless persons and taxpayers who appealed from a superior court order which struck "to live ***1082** temporarily in a camp facility or outdoors" from the ordinance, [FN4] but otherwise denied their petition for writ of mandate by which they sought to bar enforcement of the ordinance (Tobe), [FN5] and (2) persons who, having been charged with violating the ordinance, demurred unsuccessfully to the complaints and thereafter sought mandate to compel the respondent municipal court to sustain their demurrers (Zuckernick).

FN3 The Court of Appeal opinion recites that the appeal and the mandate petition had been consolidated. We find no order in the record consolidating the appeal of the Tobe parties and the mandate petition of the Zuckernick parties in that court, however. We deem the recital in the Court of Appeal opinion to be such an order.

FN4 The ordinance has been amended accordingly. That action is not disputed by the parties.

FN5 Although the Tobe petition is denominated a petition for writ of "Mandate/Prohibition," prohibition lies only to restrain "the proceedings of any tribunal, corporation, board, or person exercising judicial functions, when such proceedings are without or in excess of the jurisdiction of such tribunal, corporation, board, or person." (Code Civ. Proc., § 1102.) None of the named respondents exercises judicial functions in the enforcement of the ordinance. We consider the petition one for mandamus alone therefore. (*Neal v. State of California* (1960) 55 Cal.2d 11, 16 [9 Cal.Rptr. 607, 357 P.2d 839].)

Plaintiffs offered evidence to demonstrate that the ordinance was the culmination of a four-year effort by Santa Ana to expel homeless persons. There was evidence that in 1988 a policy was developed to show "vagrants" that they were not welcome in the city. To force them out, they were to be continually moved from locations they frequented by a task force from the city's police and recreation and parks departments; early park closing times were to be posted and strictly enforced; sleeping bags and accessories were to be disposed of; and abandoned shopping carts were to be confiscated. Providers of free food were to be monitored; sprinklers in the Center Park were to be turned on often; and violations of the city code by businesses and social service agencies in that area were to be strictly enforced. This effort led to a lawsuit which the city settled in April 1990.

Santa Ana then launched an August 15, 1990, sweep of the civic center area arresting and holding violators for offenses which included blocking passageways, drinking in public, urinating in public, jaywalking, destroying vegetation, riding bicycles on the sidewalk, glue sniffing, removing trash from a bin, and violating the fire code. Some conduct involved nothing more than dropping a match, leaf, or piece of paper, or jaywalking. The arrestees were handcuffed and taken to an athletic field where they were booked, chained to benches, marked with numbers, and held for up to six hours, after which they were released at a different location. Homeless persons among the arrestees claimed they were the victims of discriminatory enforcement. The municipal court found that they had been singled out for arrest for offenses that rarely, if ever, were the basis for even a citation.

In October 1990, Santa Ana settled a civil action for injunctive relief, agreeing to refrain from discriminating on the basis of homelessness, from taking

action to drive the homeless out of the city, and from conducting ***1083** future sweeps and mass arrests. That case, which was to be dismissed in 1995, was still pending when the camping ordinance was passed in 1992.

Evidence in the form of declarations regarding the number of homeless and facilities for them was also offered. In 1993 there were from 10,000 to 12,000 homeless persons in Orange County and 975 permanent beds available to them. When National Guard armories opened in cold weather, there were 125 additional beds in Santa Ana and another 125 in Fullerton. On any given night, however, the number of shelter beds available was more than 2,500 less than the need.

The Court of Appeal majority, relying in part on this evidence, concluded that the purpose of the ordinance-to displace the homeless-was apparent. On that basis, it held that the ordinance infringed on the right to travel, authorized cruel and unusual punishment by criminalizing status, and was vague and overbroad. The city contends that the ordinance is constitutional on its face. We agree. We also conclude that, if the Tobe petition sought to mount an as applied challenge to the ordinance, it failed to perfect that type of challenge.

II. Preliminary Considerations

A. *Facial or As Applied Challenge.*

(1a),(2a) Plaintiffs argue that they have mounted an as applied challenge to the ordinance as well as a facial challenge. While they may have intended both, we conclude that no as applied challenge to the ordinance was perfected. The procedural posture of the Zuckernick action precludes an as applied challenge, which may not be made on demurrer to a complaint which does not describe the allegedly unlawful conduct or the circumstances in which it occurred. The Tobe plaintiffs did not clearly allege such a challenge or seek relief from specific allegedly impermissible applications of the ordinance. Moreover, assuming that an as applied attack on the ordinance was stated, the plaintiffs did not establish that the ordinance has been applied in a constitutionally impermissible manner either to themselves or to others in the past.

Because the Court of Appeal appears to have based its decision in part on reasoning that would be appropriate to a constitutional challenge based on a claim that, as applied to particular defendants, the Santa Ana ordinance was invalid, we must first consider the nature of the challenge made by these petitioners. ***1084**

(3) A facial challenge to the constitutional validity of a statute or ordinance considers only the text of the measure itself, not its application to the particular circumstances of an individual. (*Dillon v. Municipal Court* (1971) 4 Cal.3d 860, 865 [94 Cal.Rptr. 777, 484 P.2d 945].) " 'To support a determination of facial unconstitutionality, voiding the statute as a whole, petitioners cannot prevail by suggesting that in some future hypothetical situation constitutional problems may possibly arise as to the particular *application* of the statute .... Rather, petitioners must demonstrate that the act's provisions inevitably pose a present total and fatal conflict with applicable constitutional prohibitions.' " (*Arcadia Unified School Dist. v. State Dept. of Education* (1992) 2 Cal.4th 251, 267 [5 Cal.Rptr.2d 545, 825 P.2d 438], quoting *Pacific Legal Foundation v. Brown* (1981) 29 Cal.3d 168, 180-181 [172 Cal.Rptr. 487, 624 P.2d 1215].)

An as applied challenge may seek (1) relief from a specific application of a facially valid statute or ordinance to an individual or class of individuals who are under allegedly impermissible present restraint or disability as a result of the manner or circumstances in which the statute or ordinance has been applied, or (2) an injunction against future application of the statute or ordinance in the allegedly impermissible manner it is shown to have been applied in the past. It contemplates analysis of the facts of a particular case or cases to determine the circumstances in which the statute or ordinance has been applied and to consider whether in those particular circumstances the application deprived the individual to whom it was applied of a protected right. (See, e.g., *Broadrick v. Oklahoma* (1973) 413 U.S. 601, 615-616 [37 L.Ed.2d 830, 841-843, 93 S.Ct. 2908]; *County of Nevada v. MacMillen* (1974) 11 Cal.3d 662, 672 [114 Cal.Rptr. 345, 522 P.2d 1345]; *In re Marriage of Siller* (1986) 187 Cal.App.3d 36, 49 [231 Cal.Rptr. 757].) (4a) When a criminal defendant claims that a facially valid statute or ordinance has been applied in a constitutionally impermissible manner to the defendant, the court evaluates the propriety of the application on a case-by-case basis to determine whether to relieve the defendant of the sanction. (*Hale v. Morgan* (1978) 22 Cal.3d 388, 404 [149 Cal.Rptr. 375, 584 P.2d 512].)

(5a) If a plaintiff seeks to enjoin future, allegedly impermissible, types of applications of a facially valid statute or ordinance, the plaintiff must demonstrate that such application is occurring or has occurred in the past. In *Bowen v. Kendrick* (1988) 487 U.S. 589 [101 L.Ed.2d 520, 108 S.Ct. 2562], for instance, the court first distinguished the nature of facial and as applied challenges to a statute which authorized federal grants to organizations for services related to premarital adolescent sexual relations and pregnancy. The plaintiffs had standing as taxpayers to raise an establishment clause challenge to the statute and to its application. The Supreme Court held that the as ***1085** applied challenge could be resolved only by considering how the statute was being administered. Plaintiffs had to show that specific grants were impermissible because the grants went to " 'pervasively sectarian' religious institutions" or had been used to fund " 'specifically religious activit[ies].' " (487 U.S. at p. 621 [101 L.Ed.2d at pp. 548-549].) The matter was remanded because the district court had not identified the particular grantees or the particular aspects of their programs for which constitutionally improper expenditures had been made. Finally, the court held, a remedy should be fashioned to withdraw federal agency approval of such grants.

(4b) When a criminal defendant seeks relief from a present application of a criminal statute or ordinance on constitutional grounds, it is not the administrative agency's "application" of the statute that is determinative, however. Whether the particular application of a statute declaring conduct criminal is constitutionally permissible can be determined only after the circumstances of its application have been established by conviction or otherwise. (See, e.g., *Murgia v. Municipal Court* (1975) 15 Cal.3d 286 [124 Cal.Rptr. 204, 540 P.2d 44].) Only then is an as applied challenge ripe. To obtain mandate or other relief from penalties imposed under a past application of the law, the defendant must presently be suffering some adverse impact of the law which the court has the power to redress.

(5b) If instead it is contended that an otherwise valid statute has been applied in a constitutionally impermissible manner in the past and the plaintiff seeks an injunction against future application of the statute in that manner, the plaintiff must show a pattern of impermissible enforcement. (See, e.g., *Van Atta v. Scott* (1980) 27 Cal.3d 424 [166 Cal.Rptr. 149, 613 P.2d 210]; *White v. Davis* (1975) 13 Cal.3d 757 [120 Cal.Rptr. 94, 533 P.2d 222]; *Wirin v. Horrall* (1948) 85 Cal.App.2d 497 [193 P.2d 470]; cf. *Sundance v. Municipal Court* (1986) 42 Cal.3d 1101 [232 Cal.Rptr. 814, 729 P.2d 80].)

(6) In most cases a plaintiff seeking this relief, either by a petition for writ of mandamus or complaint for declaratory and injunctive relief, must have a sufficient beneficial interest to have standing to prosecute the action, and there must be a present impermissible application of the challenged statute or ordinance which the court can remedy. (7) "[Code of Civil Procedure] [s]ection 1086 expresses the controlling statutory requirements for standing for mandate: 'The writ must be issued in all cases where there is not a plain, speedy, and adequate remedy, in the ordinary course of law. It must be issued upon the verified petition of the party beneficially interested.' The requirement that a petitioner be 'beneficially interested' has been generally interpreted to mean that one may obtain the writ only if the person has ***1086** some special interest to be served or some particular right to be preserved or protected over and above the interest held in common with the public at large." (*Carsten v. Psychology Examining Com.* (1980) 27 Cal.3d 793, 796 [166 Cal.Rptr. 844, 614 P.2d 276].)

(8) We need not decide if the Tobe plaintiffs have such a beneficial interest even though two have never been cited under the ordinance and one is not a homeless person, because as taxpayers they have standing under Code of Civil Procedure section 526a to restrain illegal expenditure or waste of city funds on *future* enforcement of an unconstitutional ordinance or an impermissible means of enforcement of a facially valid ordinance. (*White v. Davis, supra*, 13 Cal.3d 757, 764.) We must determine, therefore, whether the petitions at issue in this case stated and have perfected an as applied challenge to the Santa Ana ordinance.

1. *The Tobe petition.*

(1b) The first of these actions (Tobe) has been prosecuted as a petition for writ of mandate by two homeless residents of Santa Ana, each of whom intends to remain in the city, and neither of whom can find affordable housing. The third plaintiff is a resident of Santa Ana. All are taxpayers. Respondents are Santa Ana, its mayor, its city manager, and its police chief.

Plaintiffs allege that they have been convicted in the past for violating the ordinance and expect to be arrested in the future for sleeping in public and conducting other ordinary and necessary daily activities in public areas. The allegations of the petition do not describe the circumstances of the past arrests and the petition does not allege or describe either the arrests or convictions of other persons that are claimed to have been unconstitutional applications of the ordinance.

The petition alleges that respondents' "pattern of arresting, detaining, harassing and incarcerating involuntarily homeless persons such as petitioners, for sleeping and engaging in other ordinary and essential activities of daily life" violates the rights of homeless persons. The only allegations that describe the pattern of enforcement that is claimed to be constitutionally impermissible are ones which state that respondents have caused plaintiffs and other homeless persons to risk arrest and/or detention without probable cause and other "abuses, indignities and punishment" for their homeless status and presence in Santa Ana. Although the petition alleges in conclusory language that a pattern of constitutionally impermissible enforcement of the ordinance existed, plaintiffs never identified the particular applications of the law to be enjoined. The only relief sought in the petition is a writ of ***1087** mandate enjoining *any* enforcement of the ordinance by respondents. That relief is the kind of relief sought in a facial attack.

Moreover, no alternative writ was issued and no evidentiary hearing was held. Plaintiffs did not create a factual record on which an injunction limited to improper applications of the ordinance could have been fashioned.

Thus, notwithstanding the contrary conclusion of the dissent, the allegations of the petition did not clearly state an as applied challenge to the ordinance and the petition did not seek relief from constitutionally impermissible applications or methods of enforcing the ordinance. The petition sought to enjoin *any* application of the ordinance to *any* person in *any* circumstance. And, contrary to the view of the dissent, which relies on "concessions" of the parties and the reporter's transcript, rather than the actual judgment of the court, the superior court did not rule on the petition as one encompassing an as applied challenge. The order of that court which directed issuance of a peremptory writ invalidating one sentence of the ordinance as vague, did not identify or dispose of any such challenge. Instead, the court found only that "enforcement of Santa Ana Ordinance NS-2160 ... does not violate the rights of homeless persons to freedom of movement" and that "petitioners' challenges to the constitutionality of the remaining portions of Santa Ana Ordinance NS-2160 are without merit."

The petition sought to enjoin enforcement of the ordinance on the ground that it was invalid because it violated the rights of the homeless. The court ruled that enforcement did not violate those rights. The court made no findings related to a pattern of enforcement of the ordinance and the judgment makes no mention of the manner in which the ordinance has been applied.

Moreover, even assuming that plaintiffs attempted to allege and prosecute an as applied challenge, and that the superior court did entertain plaintiffs' argument that they had mounted an as applied challenge to the ordinance, the superior court did not err in failing to rule on an as applied challenge as plaintiffs did not perfect a basis for ruling on such a challenge.

The only documents in the record that describe the manner in which the ordinance has been applied are declarations submitted six months after the petition was filed in conjunction with the superior court's hearing on plaintiffs' motion for issuance of a peremptory writ. Some of the declarations were by persons other than plaintiffs who stated that they had been arrested or cited for violation of the ordinance. None of those declared that he or she had ever been convicted and had a sentence imposed for violation of the ***1088** ordinance. None stated facts to support a conclusion that citations were given solely for the purpose of harassment and were not prosecuted thereafter, and none stated facts to support either the claim that the ordinance had been enforced discriminatorily against the homeless or the claim that a pattern of constitutionally impermissible enforcement existed. The declarations, which were the only evidence offered in the case, [FN6] reflected only that persons who were homeless engaged in conduct that violated the ordinance and were arrested or cited for so doing. [FN7] The declarations described the conduct which led to citations only from the perspective of the person cited. They left unclear whether it may have appeared to the of-

ficer who issued the citation that the individual was using or storing camp paraphernalia, or living temporarily, on public property.

> FN6 Santa Ana did not offer evidence to rebut the declarants' description of the circumstances in which they were cited for violating the ordinance, believing the declarations to be irrelevant to the issues raised by the petition.

> FN7 We do not understand plaintiffs to be arguing that a person who chooses voluntarily to camp on public property has a constitutionally protected right to do so, or that it would be improper to cite and convict such persons for violating the ordinance.

Moreover, assuming that persons whose violation of the ordinance is involuntary may offer a due-process-based necessity defense, the declarations did not demonstrate an impermissible pattern of enforcement against such persons. [FN8]

> FN8 Unlike the dissent, we cannot conclude that the city intends to enforce the ordinance against persons who have no alternative to "camping" or placing "camp paraphernalia" on public property. (Dis. opn., *post*, p. 1123, fn. 14.) A senior deputy district attorney expressed his opinion at oral argument before this court that a necessity defense might be available to "truly homeless" persons and said that prosecutorial discretion would be exercised.

Two of the declarants were plaintiffs. One was not homeless. The other conceded, contrary to the allegations of the petition, that he had never been cited under the ordinance.

Only one of the remaining seven declarants explained why he had not been able to find lawful shelter on the night he was cited for violation of the ordinance. That declarant was unable to get on the bus to the armory shelter on the night he was cited. His declaration, like those of most of the other declarants, did not indicate that he had applied for public assistance that might have made it possible to find housing. Among the reasons given by the other declarants for "camping" on public property at the time they were cited were that the civic center area was "safer," that the declarant had been turned away from a shelter a few weeks earlier and had not returned, that the civic center was convenient to food and there was safety in numbers, that the declarant had missed the bus to the armory, that shelters were so noisy and overcrowded that the declarant could not sleep there, and that the declarant ***1089** did not like the armory because there was too much noise and he liked to be by himself.

While one of the declarants claimed to be schizophrenic, and stated that she had applied for and was awaiting Social Security assistance, she did not state whether she had sought public assistance from the county or that she had been turned away by a homeless shelter on the night she was cited.

Assuming that plaintiffs attempted to mount an as applied challenge to the ordinance on this basis, therefore, they simply did not demonstrate that the ordinance had been enforced in a constitutionally impermissible manner against homeless persons who had no alternative but to "camp" on public property in Santa Ana.

As discussed above, an as applied challenge assumes that the statute or ordinance violated is valid and asserts that the manner of enforcement against a particular individual or individuals or the circumstances in which the statute or ordinance is applied is unconstitutional. All of the declarants who had been cited under the ordinance described conduct in which they had engaged and that conduct appears to have violated the ordinance. None describes an impermissible means of enforcement of the ordinance or enforcement in circumstances that violated the constitutional rights the petition claimed had been violated. None demonstrated that the circumstances in which he or she was cited affected the declarant's right to travel. None states facts to support a conclusion that any punishment, let alone cruel and unusual punishment proscribed by the Eighth Amendment, had been imposed. Since no constitutionally impermissible pattern, or even single instance, of constitutionally impermissible enforcement was shown, no injunction against such enforcement could be issued and none was sought by plaintiffs.

Because the Tobe plaintiffs sought only to enjoin *any* enforcement of the ordinance and did not demonstrate a pattern of unconstitutional enforce-

ment, the petition must be considered as one which presented only a facial challenge to the ordinance.

2. *The Zuckernick petition.*

(2b) The second action (Zuckernick) has been prosecuted as a petition for writ of mandate to compel the municipal court in which petitioners are charged with violation of the ordinance to sustain their demurrers to the complaints and to dismiss the charges. The petition was filed in the Court of Appeal after the municipal court overruled the demurrers. ***1090**

The Zuckernick petition arises out of an order overruling a demurrer to a criminal complaint. (9) A demurrer to a criminal complaint lies only to challenge the sufficiency of the pleading and raises only issues of law. (*People v. McConnell* (1890) 82 Cal. 620 [23 P. 40]; *Ratner v. Municipal Court for the Los Angeles Judicial District* (1967) 256 Cal.App.2d 925, 929 [64 Cal.Rptr. 500]; see also, 4 Witkin, Cal. Criminal Law (2d ed. 1989) § 2127, p. 2498.) Penal Code section 1004 expressly limits demurrers to defects appearing on the face of the accusatory pleading:

"The defendant may demur to the accusatory pleading at any time prior to the entry of a plea, *when it appears upon the face thereof* either:

"1. If an indictment, that the grand jury by which it was found had no legal authority to inquire into the offense charged, or, if an information or complaint that the court has no jurisdiction of the offense charged therein;

"2. That it does not substantially conform to the provisions of Sections 950 and 952, and also Section 951 in case of an indictment or information;

"3. That more than one offense is charged, except as provided in Section 954;

"4. That the facts stated do not constitute a public offense;

"5. That it contains matter which, if true, would constitute a legal justification or excuse of the offense charged, or other legal bar to the prosecution." (Italics added.)

(2c) The Zuckernick petitioners demurred to the complaints on the ground that they did not conform to the provisions of Penal Code sections 950 and 952; [FN9] that the facts alleged did not constitute a public offense; that the complaints contained matters constituting a legal justification or excuse ***1091** or other legal bar to the prosecution; and that the offense charged was unconstitutionally vague and overbroad, and violated the right to travel. The demurrer recited in addition that it was "based upon the fact that the ordinances and penal statutes allegedly violated are unconstitutionally overbroad and vague in violation of the Fourteenth Amendment to the United States Constitution and article I, section 7 of the California Constitution; unconstitutionally infringe on the defendant's right to travel and freedom of travel [*sic*]." Elsewhere the demurrer also asserted that the ordinance violates the Eighth Amendment prohibition against cruel and unusual punishment and the state constitutional prohibition against cruel or unusual punishment. (Cal. Const., art. I, § 17.) [FN10]

FN9 Penal Code section 950:

"The accusatory pleading must contain:

"1. The title of the action, specifying the name of the court to which the same is presented, and the names of the parties;

"2. A statement of the public offense or offenses charged therein."

Penal Code section 952: "In charging an offense, each count shall contain, and shall be sufficient if it contains in substance, a statement that the accused has committed some public offense therein specified. Such statement may be made in ordinary and concise language without any technical averments or any allegations of matter not essential to be proved. It may be in the words of the enactment describing the offense or declaring the matter to be a public offense, or in any words sufficient to give the accused notice of the offense of which he is accused. In charging theft it shall be sufficient to allege that the defendant unlawfully took the labor or property of another."

FN10 We assume, and respondents do not contend otherwise, that if a statute under

which a defendant is charged with a crime is invalid, the complaint is subject to demurrer under subdivisions 1, 4 and 5 of Penal Code section 1004 on the ground that the court lacks jurisdiction because the statute is invalid, the facts stated do not constitute a public offense, and the complaint contains matter which constitutes a legal bar to the prosecution. (See *Dillon v. Municipal Court*, *supra*, 4 Cal.3d 860, 865; *In re Cregler* (1961) 56 Cal.2d 308, 310 [14 Cal.Rptr. 289, 363 P.2d 305]; *Mandel v. Municipal Court* (1969) 276 Cal.App.2d 649, 652 [81 Cal.Rptr. 173].)

We do not agree with the Court of Appeal in *People v. Jackson* (1985) 171 Cal.App.3d 609, 615 [217 Cal.Rptr. 540], that grounds other than those specified in Penal Code section 1004 may be urged in support of a "common law demurrer" raising "constitutional and other attacks on the sufficiency of an accusatory pleading." Penal Code section 1002 specifies: "The only pleading on the part of the defendant is either a demurrer or a plea." Penal Code section 1004 specifies the grounds on which a demurrer may be made, and we have recognized that if a constitutional challenge is based on matters not appearing on the face of the accusatory pleading a demurrer will not lie. (*In re Berry* (1968) 68 Cal.2d 137, 146 [65 Cal.Rptr. 273, 436 P.2d 273].)

None of the complaints in the Zuckernick proceedings included any allegations identifying the defendant as an involuntarily homeless person whose violation of the ordinance was involuntary and/or occurred at a time when shelter beds were unavailable. [FN11] Although the petition for writ of mandate included allegations regarding Santa Ana's past efforts to rid the city of its homeless population, those allegations, even if true, were irrelevant to the legal sufficiency of the complaints. (*Harman v. City and County of San Francisco* (1972) 7 Cal.3d 150, 166 [101 Cal.Rptr. 880, 496 P.2d 1248]; *People v. Williams* (1979) 97 Cal.App.3d 382, 391 [158 Cal.Rptr. 778].)

FN11 The allegations charging violation of the ordinance recited only that: "On or about [date] said defendant, in violation of Section 10-402 of the Santa Ana Municipal Code, a Misdemeanor, did willfully and unlawfully, camp, use camp facilities, or camp paraphernalia in a public street or a public parking lot or other public area."

The Zuckernick demurrers and petition for writ of mandate necessarily constituted only a facial attack on the ordinance since the defendants could not, on a demurrer to the accusatory pleading, offer evidence that as applied ***1092** to their individual circumstances the ordinance was invalid. (See *Dillon v. Municipal Court*, *supra*, 4 Cal.3d 860, 865.) Those allegations are also irrelevant in determining the facial validity of the ordinance insofar as petitioners alleged that it violated their right to travel and constituted cruel and unusual punishment for status, since they do not establish that there were no circumstances in which the ordinance could be constitutionally applied.

Therefore, while we are not insensitive to the importance of the larger issues petitioners and amici curiae [FN12] seek to raise in these actions, or to the disturbing nature of the evidence which persuaded the Court of Appeal to base its decision on what it believed to be the impact of the ordinance on homeless persons, the only question properly before the municipal and superior courts and the Court of Appeal for decision was the facial validity of the ordinance.

FN12 Many of those issues are the result of legislative policy decisions. The arguments of many amici curiae regarding the apparently intractable problem of homelessness and the impact of the Santa Ana ordinance on various groups of homeless persons (e.g., teenagers, families with children, and the mentally ill) should be addressed to the Legislature and the Orange County Board of Supervisors, not the judiciary. Neither the criminal justice system nor the judiciary is equipped to resolve chronic social problems, but criminalizing conduct that is a product of those problems is not for that reason constitutionally impermissible. (See *Sundance v. Municipal Court*, *supra*, 42 Cal.3d 1101, and conc. opn. of Grodin, J., *id.* at p. 1139.)

(10) We emphasize that the procedural posture of a case is not simply a "technicality." The procedural posture of a case is crucial to determining the proper

scope of appellate review. (See, e.g., *Sebago, Inc. v. City of Alameda* (1989) 211 Cal.App.3d 1372, 1379 [259 Cal.Rptr. 918].) The procedural posture of a case also determines the ability of the parties to exercise their right to present relevant evidence and to the creation of a full record adequate to enable the reviewing court to make a reasoned decision on the questions before it. When an appellate court fails to limit the scope of review to issues properly presented in the trial court, it denies litigants their right to have appellate questions decided on the basis of a full record which exposes all of the relevant facts and circumstances.

(2d) The importance of these considerations is most clearly demonstrated in the Zuckernick matter. There the People had no opportunity to present evidence regarding the circumstances in which the petitioners had been arrested, as the only issue before the municipal court in ruling on the demurrer was the sufficiency of the complaints. That court properly ruled that the complaints were sufficient. How then can a reviewing court find error in that ruling on the basis of evidence unrelated to the sufficiency of the complaint which the People had no opportunity to rebut in the municipal court? ***1093**

In the Tobe matter, notwithstanding the declarations that were submitted by the plaintiffs, there was no evidence that the ordinance had been applied to any person in a constitutionally impermissible manner.

This court's consideration will, therefore, be limited to the facial validity of the ordinance.

B. *Motive of Legislators.*

The Court of Appeal also considered the evidence of Santa Ana's past attempts to remove homeless persons from the city significant evidence of the purpose for which the ordinance was adopted. It then considered that purpose in assessing the validity of the ordinance. (11) While the intent or purpose of the legislative body must be considered in construing an ambiguous statute or ordinance (Code Civ. Proc., § 1859; *People v. Pieters* (1991) 52 Cal.3d 894, 898-899 [276 Cal.Rptr. 918, 802 P.2d 420]), the motive of the legislative body is generally irrelevant to the validity of the statute or ordinance. (*Birkenfeld v. City of Berkeley* (1976) 17 Cal.3d 129, 145 [130 Cal.Rptr. 465, 550 P.2d 1001]; *City and County of San Francisco v. Cooper* (1975) 13 Cal.3d 898, 913 [120 Cal.Rptr. 707, 534 P.2d 403]; *County of Los Angeles v. Superior Court* (1975) 13 Cal.3d 721, 726-727 [119 Cal.Rptr. 631, 532 P.2d 495]; *Sunny Slope Water Co. v. City of Pasadena* (1934) 1 Cal.2d 87, 99 [33 P.2d 672]; *In re Sumida* (1918) 177 Cal. 388, 390 [170 P. 823]; *Hadacheck v. Alexander* (1915) 169 Cal. 616, 617 [147 P. 259]; *Odd Fellows' Cem. Assn. v. City and County of San Francisco* (1903) 140 Cal. 226, 235-236 [73 P. 987]; *Dobbins v. City of Los Angeles* (1903) 139 Cal. 179, 184 [72 P. 970], revd. on other grounds (1904) 195 U.S. 223 [49 L.Ed. 169, 25 S.Ct. 18]; *People v. County of Glenn* (1893) 100 Cal. 419, 423 [35 P. 302].) [FN13]

FN13 While the Court of Appeal considered Santa Ana's past actions and the documents suggesting that the city had mounted a concerted effort to remove homeless persons, it did not acknowledge that, as part of the settlement of a lawsuit seeking to enjoin further unlawful attempts to remove homeless persons, Santa Ana had agreed to take no further action to drive the homeless from the city. The Court of Appeal nonetheless assumed that the adoption of a facially neutral ordinance prohibiting camping and storing personal possessions on public property was a renewed effort to do so and a violation of the settlement agreement. Had it been a violation of the settlement agreement, however, the Tobe plaintiffs' appropriate recourse would have been through an action to enforce the settlement.

The Court of Appeal relied in part on *Pottinger v. City of Miami* (S.D. Fla. 1992) 810 F.Supp. 1551, 1581, for its assumption that consideration of the motives of the Santa Ana City Council may be considered in assessing the validity of the ordinance. That is not the rule in this state, but even were it so, *Pottinger* was not a challenge to the facial validity of the Miami ***1094** ordinance in question there. Moreover, the district court's conclusion that the ordinance was invalid as applied was not based on the motives of the legislators in enacting the ordinance. The court considered internal memoranda and evidence of arrest records as evidence of the purpose underlying *enforcement* of the ordinance against homeless persons.

Absent a basis for believing that the ordinance would not have been adopted if the public areas of

Santa Ana had been appropriated for living accommodation by any group other than the homeless, or that it was the intent of that body that the ordinance be enforced only against homeless persons (see, e.g., *Parr v. Municipal Court* (1971) 3 Cal.3d 861 [92 Cal.Rptr. 153, 479 P.2d 353]), the ordinance is not subject to attack on the basis that the city council may have hoped that its impact would be to discourage homeless persons from moving to Santa Ana.

We cannot assume, as does the dissent, that the sole purpose of the Santa Ana ordinance was to force the homeless out of the city. The city had agreed to discontinue such attempts when it settled the prior litigation. The record confirms that the city faced a problem common to many urban areas, the occupation of public parks and other public facilities by homeless persons. Were we to adopt the approach suggested by the dissent, any facially valid ordinance enacted by a city that had once acted in a legally impermissible manner to achieve a permissible objective could be found invalid on the basis that its past conduct established that the ordinance was not enacted for a permissible purpose. Absent evidence other than the enactment of a facially valid ordinance, we cannot make that assumption here.

The dissent relies on *Parr v. Municipal Court, supra*, 3 Cal.3d 861, as supporting invalidation of a facially valid ordinance on the ground that it is motivated by impermissible legislative intent. The Santa Ana ordinance and the circumstances of its adoption are distinguishable from the Carmel ordinance at issue in *Parr*, however. There, the city had not entered into a court-approved settlement in which it stipulated that it would not engage in discriminatory enforcement of the law against "undesirables," and, unlike the Santa Ana ordinance, the Carmel ordinance banned a customary use of the city park-sitting or lying on the lawn. A "Declaration of Urgency" which accompanied the Carmel ordinance stated that its purpose was to regulate the use of public property, parks, and beaches by transient visitors.

The Carmel ordinance was challenged as facially invalid on grounds that it discriminated against undesirable and unsanitary persons, referring to them as "hippies" and "transients." In *Parr v. Municipal Court, supra*, 3 Cal.3d 861, we rejected the People's argument that only the operative language of ***1095** the ordinance should be considered because the declaration of purpose suggested that the operative sections were intended to be limited in their application to the group it described. On that basis we concluded that the Carmel ordinance had a discriminatory purpose.

The ordinance, by contrast, bans use of public property in the city for purposes for which it was not designed. At the time it was adopted the city had agreed not to engage in discriminatory law enforcement. And no declaration of purpose comparable to that which accompanied the Carmel ordinance was made. The declared purpose of the ordinance did not suggest that it was to be enforced solely against the homeless. We cannot, for those reasons, join the assumption of the dissent that the purpose of the ordinance is simply to drive the homeless out of Santa Ana. [FN14]

FN14 We also decline to join the conclusion of the dissent that enactment of an ordinance like that adopted by Santa Ana, whose purpose is to preserve public property for its intended use, is constitutionally impermissible because it may lead to the adoption of similar ordinances in other cities with the result that the homeless are everywhere excluded from living on public property.

C. *Facial Challenges on Vagueness Grounds.*

The Court of Appeal granted relief to the Zuckernick petitioners without regard to either the limitations on a demurrer to a criminal complaint or vagueness challenges by criminal defendants.

(12) "The rule is well established ... that one will not be heard to attack a statute on grounds that are not shown to be applicable to himself and that a court will not consider every conceivable situation which might arise under the language of the statute and will not consider the question of constitutionality with reference to hypothetical situations." (*In re Cregler, supra*, 56 Cal.2d 308, 313.) If the statute clearly applies to a criminal defendant's conduct, the defendant may not challenge it on grounds of vagueness. (*Parker v. Levy* (1974) 417 U.S. 733, 756 [41 L.Ed.2d 439, 457-458, 94 S.Ct. 2547]; *People v. Green* (1991) 227 Cal.App.3d 692, 696 [278 Cal.Rptr. 140].) However, in some cases, a defendant may make a facial challenge to the statute, if he argues that the statute improperly prohibits a " 'substantial amount of constitutionally protected conduct,' " whether or not its ap-

plication to his own conduct may be constitutional. (*Kolender v. Lawson* (1983) 461 U.S. 352, 358-359, fn. 8 [75 L.Ed.2d 903, 909-910, 103 S.Ct. 1855].) [FN15]

FN15 Because we conclude that the ordinance is not overbroad, we need not decide whether the overbreadth doctrine is applicable outside the area of freedoms protected by the First Amendment. The Supreme Court has stated that overbreadth challenges will be entertained only if a First Amendment violation is alleged. "[O]utside the limited First Amendment context, a criminal statute may not be attacked as overbroad." (*Schall v. Martin* (1984) 467 U.S. 253, 268, fn. 18 [81 L.Ed.2d 207, 220, 104 S.Ct. 2403].)

Other decisions of the United States Supreme Court suggest that this limitation is not invariably observed. (See *Kolender v. Lawson, supra*, 461 U.S. 352, 358-359, fn. 8 [75 L.Ed.2d 903, 909-910.) We will assume arguendo that the overbreadth doctrine may be applied outside the First Amendment context.

The Zuckernick petitioners argued in support of their demurrers that the ordinance failed to give fair and adequate notice of prohibited conduct, had ***1096** vague enforcement standards which encourage arbitrary and discriminatory arrests and convictions, and reached constitutionally protected conduct. The vagueness aspect of their challenge to the ordinance is governed by the rule stated in *In re Cregler, supra*, 56 Cal.2d 308, 313. The last ground, an overbreadth, not a vagueness, argument, is governed by *Kolender v. Lawson, supra*, 461 U.S. 352, 358-359, fn. 8 [75 L.Ed.2d 903, 909-910].)

The Zuckernick petitioners' vagueness challenge was addressed to the terms "camp," "camp facilities," and "camp paraphernalia," as defined in the ordinance, and the term "temporary shelter," which is not defined. The definitions in the ordinance include terms which those petitioners do not claim are vague and which may apply to petitioner's conduct. Thus the People may seek to establish violation of the ordinance on the basis that one or more of the petitioners pitched or used a tent on a public street or parking lot. Because the Zuckernick challenge to the ordinance was brought by demurrer and the nature of their conduct has not been determined, those petitioners cannot show at this stage of the proceedings that the ordinance did not clearly apply to their conduct. To that extent, therefore, the vagueness challenge of the Zuckernick petitioners is premature.

The Tobe plaintiffs are not persons presently charged with violating the ordinance, however. Their actions do not seek to avoid prosecution for criminal acts. They are suing as taxpayers to restrain expenditure of public funds on the enforcement of an allegedly unconstitutional ordinance. (Code Civ. Proc., § 526a.) The restrictions applicable to vagueness challenges by criminal defendants do not apply to their action.

With these considerations in mind, we now turn to the constitutional bases for the decision of the Court of Appeal.

III. Facial Validity of the Santa Ana Ordinance

A. *Right to Travel.*

(13) Although no provision of the federal Constitution expressly recognizes a right to travel among and between the states, that right is recognized ***1097** as a fundamental aspect of the federal union of states. "For all the great purposes for which the Federal government was formed, we are one people, with one common country. We are all citizens of the United States; and, as members of the same community, must have the right to pass and repass through every part of it without interruption, as freely as in our own States." (*Passenger Cases* (1849) 48 U.S. (7 How.) 283, 492 [12 L.Ed. 702, 791] (dis. opn. of Taney, C. J.).)

In the *Passenger Cases, supra*, 48 U.S. 283, the court struck down taxes imposed by the States of New York and Massachusetts on aliens who entered the state from other states and countries by ship. The basis for the decision, as found in the opinions of the individual justices, was that the tax invaded the power of Congress over foreign and interstate commerce. The opinion of Chief Justice Taney, in which he disagreed with the majority on the commerce clause issue, also addressed the tax as applied to citizens of the United States arriving from other states. That tax he believed to be impermissible. Some later decisions of the court trace recognition of the constitutional right of unburdened interstate travel to that opinion. (See, e.g., *Shapiro v. Thompson* (1969) 394 U.S. 618, 630 [22 L.Ed.2d 600, 612-613, 89 S.Ct. 1322].) And, relying on the dissenting opinion of the Chief Justice in

the *Passenger Cases*, the court struck down a tax on egress from the State of Nevada in *Crandall v. Nevada* (1867) 73 U.S. (6 Wall.) 35 [18 L.Ed. 745], holding that the right of interstate travel was a right of national citizenship which was essential if a citizen were to be able to pass freely through another state to reach the national or a regional seat of the federal government.

Other cases find the source of the right in the privileges and immunities clause. In *Paul v. Virginia* (1868) 75 U.S. (8 Wall.) 168 [19 L.Ed. 357], the court rejected a challenge predicated on the privileges and immunities clause made by a corporation to a tax imposed by the State of Virginia on out-of-state insurance companies. In so doing, it recognized interstate travel as a right guaranteed to citizens. "It was undoubtedly the object of the clause in question to place the citizens of each State upon the same footing with citizens of other States, so far as the advantages resulting from citizenship in those States are concerned. It relieves them from the disabilities of alienage in other States; it inhibits discriminating legislation against them by other States; *it gives them the right of free ingress into other States, and egress from them*; it insures to them in other States the same freedom possessed by the citizens of those States in the acquisition and enjoyment of property and in the pursuit of happiness; and it secures to them in other States the equal protection of their laws." (*Id.* at p. 180 [19 L.Ed at p. 360], italics added.)

In the *Slaughter-House Cases* (1872) 83 U.S. (16 Wall.) 36 [21 L.Ed. 394], the court equated the rights protected by the privileges and immunities ***1098** clause to those in the corresponding provision of the Articles of Confederation which provided that the inhabitants of each state were to have " 'the privileges and immunities of free citizens in the several States; and the people of each State shall have free ingress and regress to and from any other State ....' " (83 U.S. at p. 75 [21 L.Ed. at p. 408].)

The privileges and immunities clause was also the source of the right of interstate travel as an incident of national citizenship recognized by the court in *Twining v. New Jersey* (1908) 211 U.S. 78, 97 [53 L.Ed. 97, 105, 29 S.Ct. 14] and *United States v. Wheeler* (1920) 254 U.S. 281, 293 [65 L.Ed. 270, 273, 41 S.Ct. 133]. In *Williams v. Fears* (1900) 179 U.S. 270, 274 [45 L.Ed. 186, 188-189, 21 S.Ct. 128], the right was held to be one protected by the Fourteenth Amendment as well as other provisions of the Constitution. "Undoubtedly the right of locomotion, the right to remove from one place to another according to inclination, is an attribute of personal liberty, and the right, ordinarily, of free transit from or through the territory of any State is a right secured by the Fourteenth Amendment and by other provisions of the Constitution." (*Ibid.*) Again, in *Kent v. Dulles* (1958) 357 U.S. 116, 127 [2 L.Ed.2d 1204, 1211, 78 S.Ct. 1113], freedom to travel was recognized as "an important aspect of the citizen's 'liberty.' " (See also *Edwards v. California* (1941) 314 U.S. 160, 177, 183 [86 L.Ed. 119, 127, 62 S.Ct. 164] (conc. opns. of Douglas, J. and Jackson, J.).)

The right to travel, or right of migration, now is seen as an aspect of personal liberty which, when united with the right to travel, requires "that all citizens be free to travel throughout the length and breadth of our land uninhibited by statutes, rules, or regulations which unreasonably burden or restrict this movement." (*Shapiro v. Thompson*, *supra*, 394 U.S. 618, 629 [22 L.Ed.2d 600, 612]; see also *United States v. Guest* (1966) 383 U.S. 745, 757-758 [16 L.Ed.2d 239, 248-250, 86 S.Ct. 1170].)

In a line of cases originating with *Shapiro v. Thompson*, *supra*, 394 U.S. 618, the court has considered the right to travel in the context of equal protection challenges to state laws creating durational residency requirements as a condition to the exercise of a fundamental right or receipt of a state benefit. In those cases the court has held that a law which *directly* burdens the fundamental right of migration or interstate travel is constitutionally impermissible. Therefore a state may not create classifications which, by imposing burdens or restrictions on newer residents which do not apply to all residents, deter or penalize migration of persons who exercise their right to travel to the state.

In *Shapiro*, where public assistance was denied residents who had lived in the state for less than one year, the court held that durational residence as a ***1099** condition of receiving public assistance constituted invidious discrimination between residents, and that if a law had no other purpose than chilling the exercise of a constitutional right such as that of migration of needy persons into the state the law was impermissible. (*Shapiro v. Thompson*, *supra*, 394 U.S. 618, 627, 631 [22 L.Ed.2d 600, 613].) Further, "any

classification which serves to penalize the exercise of [the right of migration], unless shown to be necessary to promote a *compelling* governmental interest, is unconstitutional." (*Id.* at p. 634 [22 L.Ed.2d at p. 615].)

Next, durational residence requirements for voting were struck down by the court in *Dunn v. Blumstein* (1972) 405 U.S. 330 [31 L.Ed.2d 274, 92 S.Ct. 995]. Again the question arose as an equal protection issue. The court held that the state must have a compelling reason for the requirement because it denied residents the right to vote, a fundamental political right, and because the law "classif[ies] ... residents on the basis of recent travel, penalizing those persons ... who have gone from one jurisdiction to another during the qualifying period. Thus, the durational residence requirement directly impinges on the exercise of a second fundamental personal right, the right to travel." (*Id.* at p. 338 [31 L.Ed.2d at pp. 281-282].) The court emphasized the imposition of a "direct" burden on travel: "Obviously, durational residence laws single out the class of bona fide state and county residents who have recently exercised this constitutionally protected right, and penalize such travelers directly." (*Ibid.*) It also took care to point out, as it had in *Shapiro v. Thompson*, *supra*, 394 U.S. 618, 638, fn. 21 [22 L.Ed.2d 600, 617]), that a law which did not penalize residents on the basis of recent travel would not be vulnerable to a similar challenge. The court explained: "Where, for example, an interstate migrant loses his driver's license because the new State has a higher age requirement, a different constitutional question is presented. For in such a case, the new State's age requirement is not a *penalty* imposed solely because the newcomer is a new resident; instead, all residents, old and new, must be of a prescribed age to drive." (405 U.S. at p. 342, fn. 12 [31 L.Ed.2d at p. 284].)

The court's focus on whether the law directly burdened, by penalizing, interstate travel continued in *Memorial Hospital v. Maricopa County* (1974) 415 U.S. 250 [39 L.Ed.2d 306, 94 S.Ct. 1076], in which a durational residence requirement for indigent, nonemergency medical care at county expense was challenged. The court held that the restriction denied newcomers equal protection, impinged on the right to travel by denying basic necessities of life, and penalized interstate migration. (*Id.* at pp. 261-262 [39 L.Ed.2d at pp. 316-317]; see also *Benson v. Arizona State Bd. of Dental Examiners* (9th Cir. 1982) 673 F.2d 272, 277 [licensing requirement that did not disadvantage newcomers vis-a-vis previous residents did not penalize exercise of right to travel].) ***1100**

In each of these cases the court had before it a law which denied residents a fundamental constitutional right (voting) or a governmental benefit (public assistance, medical care) on the basis of the duration of their residence. The law created two classes of residents. In *Zobel v. Williams* (1982) 457 U.S. 55 [72 L.Ed.2d 672, 102 S.Ct. 2309], where the right to share in oil revenues was based on the duration of residence in Alaska, the court noted that the right to travel analysis in those cases, which did not create an actual barrier to travel, was simply a type of equal protection analysis. "In addition to protecting persons against the erection of actual barriers to interstate movement, the right to travel, when applied to residency requirements, protects new residents of a state from being disadvantaged because of their recent migration or from otherwise being treated differently from longer term residents. In reality, right to travel analysis refers to little more than a particular application of equal protection analysis. Right to travel cases have examined, in equal protection terms, state distinctions between newcomers and longer term residents." (*Id.* at p. 60, fn. 6 [72 L.Ed.2d at pp. 677-678].)

(14) The right of intrastate travel has been recognized as a basic human right protected by article I, sections 7 and 24 of the California Constitution. (*In re White* (1979) 97 Cal.App.3d 141 [158 Cal.Rptr. 562].) There the court concluded that a condition of probation which barred a defendant convicted of prostitution from designated areas in the City of Fresno should be modified to avoid an overly restrictive impact on the defendant's right to travel. The court held that "the right to intrastate travel (which includes intramunicipal travel) is a basic human right protected by the United States and California Constitutions as a whole. Such a right is implicit in the concept of a democratic society and is one of the attributes of personal liberty under common law. (See 1 Blackstone, Commentaries 134; U.S. Const., art. IV, § 2 and the 5th, 9th and 14th Amends.; Cal. Const., art. I, § 7, subd. (a) and art. I, § 24 ....)" (*Id.* at p. 148.) In *White*, as in the early United States Supreme Court cases, the court addressed a direct burden on travel.

Neither the United States Supreme Court nor this

court has ever held, however, that the incidental impact on travel of a law having a purpose other than restriction of the right to travel, and which does not discriminate among classes of persons by penalizing the exercise by some of the right to travel, is constitutionally impermissible.

By contrast, in a decision clearly relevant here, a zoning law which restricted occupancy to family units or nonfamily units of no more than two persons was upheld by the Supreme Court, notwithstanding any incidental impact on a person's preference to move to that area, because the law was ***1101** not aimed at transients and involved no fundamental right. (*Village of Belle Terre v. Boraas* (1974) 416 U.S. 1, 7 [39 L.Ed.2d 797, 803, 94 S.Ct. 1536].)

Courts of this state have taken a broader view of the right of intrastate travel, but have found violations only when a direct restriction of the right to travel occurred. (*Adams v. Superior Court* (1974) 12 Cal.3d 55, 61-62 [115 Cal.Rptr. 247, 524 P.2d 375].) In *In re White*, *supra*, the petitioner had been barred directly from traveling to specified areas. In *In re Marriage of Fingert* (1990) 221 Cal.App.3d 1575 [271 Cal.Rptr. 389], a parent had been ordered to move to another county as a condition of continued custody of a child. Indirect or incidental burdens on travel resulting from otherwise lawful governmental action have not been recognized as impermissible infringements of the right to travel and, when subjected to an equal protection analysis, strict scrutiny is not required. If there is any rational relationship between the purpose of the statute or ordinance and a legitimate government objective, the law must be upheld. (*Adams v. Superior Court*, *supra*, 12 Cal.3d 55, 61-62.)

This court has also rejected an argument that any legislation that burdens the right to travel must be subjected to strict scrutiny and sustained only if a compelling need is demonstrated. In *Associated Home Builders etc., Inc. v. City of Livermore* (1976) 18 Cal.3d 582 [135 Cal.Rptr. 41, 557 P.2d 473, 92 A.L.R.3d 1038], an initiative ordinance which banned issuance of new building permits until support facilities were available was challenged as an impermissible burden on the right to travel. We rejected the argument because the impact of the ordinance was only an indirect burden on the right to travel. The ordinance did not penalize travel and resettlement, although an incidental impact was to make it more difficult to establish residence in the place of one's choosing. (*Id.* at pp. 602-603; see also *R.H. Macy & Co. v. Contra Costa County* (1990) 226 Cal.App.3d 352, 367-369 [276 Cal.Rptr. 530].)

We do not question the conclusion of the Court of Appeal that a local ordinance which forbids sleeping on public streets or in public parks and other public places may have the effect of deterring travel by persons who are unable to afford or obtain other accommodations in the location to which they travel. (15a) Assuming that there may be some state actions short of imposing a direct barrier to migration or denying benefits to a newly arrived resident which violate the right to travel, the ordinance does not do so. It is a nondiscriminatory ordinance which forbids use of the public streets, parks, and property by residents and nonresidents alike for purposes other than those for which the property was designed. It is not constitutionally invalid because it may have an incidental impact on the right of some persons to interstate or intrastate travel. ***1102**

As we have pointed out above, to succeed in a facial challenge to the validity of a statute or ordinance the plaintiff must establish that " 'the act's provisions inevitably pose a present total and fatal conflict with applicable constitutional provisions.' " (*Arcadia Unified School Dist. v. State Dept. of Education*, *supra*, 2 Cal.4th 251, 267, quoting *Pacific Legal Foundation v. Brown*, *supra*, 29 Cal.3d 168, 180-181.) (16) All presumptions favor the validity of a statute. The court may not declare it invalid unless it is clearly so. (*Calfarm Ins. Co.* v. *Deukmejian* (1989) 48 Cal.3d 805, 814-815 [258 Cal.Rptr. 161, 771 P.2d 1247].)

(15b) Since the Santa Ana ordinance does not on its face reflect a discriminatory purpose, and is one which the city has the power to enact, its validity must be sustained unless it cannot be applied without trenching upon constitutionally protected rights. The provisions of the Santa Ana ordinance do not inevitably conflict with the right to travel. The ordinance is capable of constitutional application. The ordinance prohibits "any person" from camping and/or storing personal possessions on public streets and other public property. It has no impact, incidental or otherwise, on the right to travel except insofar as a person, homeless or not, might be discouraged from traveling to Santa Ana because camping on public property is banned. An ordinance that bans camping and storing personal

possessions on public property does not directly impede the right to travel. (*People v. Scott* (1993) 20 Cal.App.4th Supp. 5, 13 [26 Cal.Rptr.2d 179].) Even assuming that the ordinance may constitute an incidental impediment to some individuals' ability to travel to Santa Ana, since it is manifest that the ordinance is capable of applications which do not offend the Constitution in the manner suggested by petitioners and the Court of Appeal, the ordinance must be upheld.

Our conclusion that the Santa Ana ordinance does not impermissibly infringe on the right of the homeless, or others, to travel, finds support in the decision of the United States District Court in *Joyce v. City and County of San Francisco* (N.D.Cal. 1994) 846 F.Supp. 843. The plaintiffs, on behalf of a class of homeless individuals, sought a preliminary injunction to prevent implementation of a program of enforcement (the Matrix Program) of state and municipal laws which were commonly violated by the homeless residents of the city. Among the laws to be enforced were those banning "camping" or "lodging" in public parks and obstructing sidewalks. It was claimed, inter alia, that the Matrix Program infringed on the right to travel. The court rejected that argument and refused to require the city to show a compelling state interest to justify any impact the program might have on the right of the class members to travel. It noted that the program was not facially discriminatory as it did not distinguish between persons who were ***1103** residents of the city and those who were not. In so doing, the court suggested that the opinion of the Court of Appeal in this case was among those which constituted extensions of the right to travel that appeared to be "unwarranted under the governing Supreme Court precedent." (*Id.* at p. 860.) We agree.

(17) The right to travel does not, as the Court of Appeal reasoned in this case, endow citizens with a "right to live or stay where one will." While an individual may travel where he will and remain in a chosen location, that constitutional guaranty does not confer immunity against local trespass laws and does not create a right to remain without regard to the ownership of the property on which he chooses to live or stay, be it public or privately owned property.

(18) Moreover, lest we be understood to imply that an as applied challenge to the ordinance might succeed on the right to travel ground alone, we caution that, with few exceptions, [FN16] the creation or recognition of a constitutional right does not impose on a state or governmental subdivision the obligation to provide its citizens with the means to enjoy that right. (*Harris v. McRae* (1980) 448 U.S. 297, 317-318 [65 L.Ed.2d 784, 804-806, 100 S.Ct. 2671]; *Maher v. Roe* (1977) 432 U.S. 464, 471-474 [53 L.Ed.2d 484, 492-495, 97 S.Ct. 2376].) (15c) Santa Ana has no constitutional obligation to make accommodations on or in public property available to the transient homeless to facilitate their exercise of the right to travel. (*Lindsey v. Normet (*1972) 405 U.S. 56, 74 [31 L.Ed.2d 36, 50-51, 92 S.Ct. 862].) Petitioners' reliance on *Clark v. Community for Creative Non-Violence* (1984) 468 U.S. 288 [82 L.Ed.2d 221, 104 S.Ct. 3065], for the proposition that Santa Ana is obliged to provide areas in which camping is permitted on public property is misplaced. The issue in *Clark* was whether the refusal of the National Park Service to permit demonstrators who wished to call attention to the plight of the homeless to sleep in Lafayette Park and on the Mall in the nation's capital violated the First Amendment rights of the demonstrators. The court held that it did not, as other areas were available for the purpose. *Clark* dealt with an affirmative right-that of free speech -which could be restricted in public fora only by reasonable, content-neutral time, place and manner restrictions. (*Id.* at p. 293 [82 L.Ed.2d at p. 293-294].) The court expressly recognized the authority of the National Park Service "to promulgate rules and regulations for the use of the parks in ***1104** accordance with the purposes for which they were established." [FN17] (468 U.S. at p. 289 [82 L.Ed.2d at p. 224].) Petitioners in this case make no claim that the right they seek, to camp on public property in Santa Ana, is expressive conduct protected by the First Amendment. There is no comparable constitutional mandate that sites on public property be made available for camping to facilitate a homeless person's right to travel, just as there is no right to use public property for camping or storing personal belongings. [FN18]

FN16 E.g., the right to counsel guaranteed by the Sixth Amendment to the United States Constitution.

FN17 The ordinance mirrors the National Park Service rules and regulations governing camping in several respects. Those rules prohibit camping by using park lands as living accommodations and storing personal

belongings on them. (36 C.F.R. §§ 2.22, 2.61 (1994).)

FN18 Petitioners' argument that Santa Ana may not deny homeless persons the right to live on public property anywhere in the city unless it provides alternative accommodations also overlooks the Legislature's allocation of responsibility to assist destitute persons to counties. (Welf. & Inst. Code, §§ 17000-17001.5.) If the inability of petitioners and other homeless persons in Santa Ana to afford housing accounts for their need to "camp" on public property, their recourse lies not with the city, but with the county under those statutory provisions.

The Court of Appeal erred in holding that the Santa Ana ordinance impermissibly infringes on the right of the homeless to travel.

B. *Punishment for Status.*

(19) The Court of Appeal invalidated the ordinance for the additional reason that it imposed punishment for the "involuntary status of being homeless." [FN19] On that basis the court held the ordinance was invalid because such punishment violates the Eighth Amendment prohibition of cruel and unusual punishment, and the ban on cruel or unusual punishment of article I, section 17 of the California Constitution. We disagree with that construction of the ordinance and of the activity for which punishment is authorized. The ordinance permits punishment for proscribed conduct, not punishment for status.

FN19 In reaching that decision, the Court of Appeal did not distinguish between involuntarily being homeless, and involuntarily engaging in conduct that violated the ordinance. The court assumed that an involuntarily homeless person who involuntarily camps on public property may be convicted or punished under the ordinance. That question, which the Court of Appeal and the dissent address, and which might be raised in an as applied challenge to the ordinance, is not before us because plaintiffs offered no evidence that the ordinance was being applied in that manner. We express no opinion on the proper construction of the ordinance, in particular on whether the conduct it prohibits must be "willful," or on whether or in what circumstances a necessity defense is available.

The holding of the Court of Appeal is not limited to the face of the ordinance, and goes beyond even the evidence submitted by petitioners. Neither the language of the ordinance nor that evidence supports a conclusion that a person may be convicted and punished under the ordinance solely ***1105** on the basis that he or she has no fixed place of abode. No authority is cited for the proposition that an ordinance which prohibits camping on public property punishes the involuntary status of being homeless or, as the Court of Appeal also concluded, is punishment for poverty. *Robinson v. California* (1962) 370 U.S. 660 [8 L.Ed.2d 758, 82 S.Ct. 1417], on which the court relied, dealt with a statute which criminalized the status of being addicted to narcotics. The court made it clear, however, that punishing the conduct of using or possessing narcotics, even by an addict, is not impermissible punishment for status. (370 U.S. at pp. 664, 666 [8 L.Ed.2d at pp. 761-763].)

A plurality of the high court reaffirmed the *Robinson* holding in *Powell v. Texas* (1968) 392 U.S. 514 [20 L.Ed.2d 1254, 88 S.Ct. 2145], where it rejected a claim that punishment of an alcoholic for being drunk in public was constitutionally impermissible. "The entire thrust of *Robinson's* interpretation of the Cruel and Unusual Punishment Clause is that criminal penalties may be inflicted only if the accused has committed some act, has engaged in some behavior, which society has an interest in preventing, or perhaps in historical common law terms, has committed some *actus reus*. It thus does not deal with the question of whether certain conduct cannot constitutionally be punished because it is, in some sense, 'involuntary' or 'occasioned by a compulsion.' " (*Id.* at p. 533 [20 L.Ed.2d at p. 1268].)

As the district court observed in *Joyce v. City and County of San Francisco*, *supra*, 846 F.Supp. 843, 857, the Supreme Court has not held that the Eighth Amendment prohibits punishment of acts derivative of a person's status. Indeed, the district court questioned whether "homelessness" is a status at all within the meaning of the high court's decisions. "As an analytical matter, more fundamentally, homelessness is not readily classified as a 'status.' Rather, as expressed for the plurality in *Powell* by Justice Marshall, there is a

'substantial definitional distinction between a "status " ... and a " condition" ....' 392 U.S. at 533, 88 S.Ct. at 2155. While the concept of status might elude perfect definition, certain factors assist in its determination, such as the involuntariness of the acquisition of that quality (including the presence or not of that characteristic at birth), *see Robinson*, 370 U.S. at 665-69 & [fn.] 9, 82 S.Ct. at 1420-21 & [fn.] 9, and the degree to which an individual has control over that characteristic." (846 F.Supp. at p. 857.)

The declarations submitted by petitioners in this action demonstrate the analytical difficulty to which the *Joyce* court referred. Assuming arguendo the accuracy of the declarants' descriptions of the circumstances in which they were cited under the ordinance, it is far from clear that none had alternatives to either the condition of being homeless or the conduct that led to homelessness and to the citations. ***1106**

The Court of Appeal erred, therefore, in concluding that the ordinance is invalid because it permits punishment for the status of being indigent or homeless.

C. *Vagueness and Overbreadth.*

The Court of Appeal concluded that the ordinance was vague and overbroad. It based its vagueness conclusion on the nonexclusive list of examples of camping "paraphernalia" and "facilities" in the definitions of those terms. Those definitions were so unspecific, the court reasoned, that they invited arbitrary enforcement of the ordinance in the unfettered discretion of the police. The overbreadth conclusion was based on reasoning that the ordinance could be applied to constitutionally protected conduct. In that respect the court held that the verb "store" was overbroad as it could be applied to innocent conduct such as leaving beach towels unattended at public pools and wet umbrellas in library foyers.

1. *Vagueness.*

(20a) The Tobe respondents and the People, real party in interest in the Zuckernick matter, argue that the Court of Appeal failed to apply the tests enunciated by the United States Supreme Court and this court in applying the vagueness doctrine. It has isolated particular terms rather than considering them in context. We agree.

(21) A penal statute must define the offense with sufficient precision that "ordinary people can understand what conduct is prohibited and in a manner that does not encourage arbitrary and discriminatory enforcement." (*Kolender v. Lawson*, *supra*, 461 U.S. 352, 357 [75 L.Ed.2d 903, 909]; see also *Papachristou v. City of Jacksonville* (1972) 405 U.S. 156, 162 [31 L.Ed.2d 110, 115-116, 92 S.Ct. 839]; *United States v. Harriss* (1954) 347 U.S. 612, 617 [98 L.Ed. 989, 996, 74 S.Ct. 808]; *Thornhill v. Alabama* (1940) 310 U.S. 88, 97-98 [84 L.Ed. 1093, 1099-1100, 60 S.Ct. 736].) "The constitutional interest implicated in questions of statutory vagueness is that no person be deprived of 'life, liberty, or property without due process of law,' as assured by both the federal Constitution (U.S. Const., Amends. V, XIV) and the California Constitution (Cal. Const., art. I, § 7)." (*Williams v. Garcetti* (1993) 5 Cal.4th 561, 567 [20 Cal.Rptr.2d 341, 853 P.2d 507].)

To satisfy the constitutional command, a statute must meet two basic requirements: (1) The statute must be sufficiently definite to provide adequate notice of the conduct proscribed; and (2) the statute must provide sufficiently definite guidelines for the police in order to prevent arbitrary and ***1107** discriminatory enforcement. (*Williams v. Garcetti*, *supra*, 5 Cal.4th 561, 567; *Walker v. Superior Court* (1988) 47 Cal.3d 112, 141 [253 Cal.Rptr. 1, 763 P.2d 852]; *People v. Superior Court (Caswell)* (1988) 46 Cal.3d 381, 389-390 [250 Cal.Rptr. 515, 758 P.2d 1046].) Only a reasonable degree of certainty is required, however. (46 Cal.3d at p. 391.) The analysis begins with "the strong presumption that legislative enactments 'must be upheld unless their unconstitutionality clearly, positively, and unmistakably appears. [Citations.] A statute should be sufficiently certain so that a person may know what is prohibited thereby and what may be done without violating its provisions, but it cannot be held void for uncertainty if any reasonable and practical construction can be given to its language.' " (*Walker v. Superior Court*, *supra*, 47 Cal.3d at p. 143.)

(20b) The Court of Appeal erred in holding that the ordinance is unconstitutionally vague. The terms which the Court of Appeal considered vague are not so when the purpose clause of the ordinance is considered and the terms are read in that context as they should be. (*Williams v. Garcetti*, *supra*, 5 Cal.4th 561, 569; see also *Clark v. Community for Creative Non-Violence*, *supra*, 468 U.S. 288, 290-291 [82

L.Ed.2d 221, 224-226]; *United States v. Musser* (D.C. Cir. 1989) 873 F.2d 1513 [277 App.D.C. 256]; *United States v. Thomas* (D.C. Cir. 1988) 864 F.2d 188, 197-198 [274 App.D.C. 385]; *ACORN v. City of Tulsa, Okl.* (10th Cir. 1987) 835 F.2d 735, 744-745.) Contrary to the suggestion of the Court of Appeal, we see no possibility that any law enforcement agent would believe that a picnic in a public park constituted "camping" within the meaning of the ordinance or would believe that leaving a towel on a beach or an umbrella in a library constituted storage of property in violation of the ordinance.

The stated purpose of the ordinance is to make public streets and other areas readily accessible to the public and to prevent use of public property "for camping purposes or storage of personal property" which "interferes with the rights of others to use the areas for which they were intended." No reasonable person would believe that a picnic in an area designated for picnics would constitute camping in violation of the ordinance. The ordinance defines camping as occupation of camp facilities, living temporarily in a camp facility or outdoors, or using camp paraphernalia. The Court of Appeal's strained interpretation of "living," reasoning that we all use public facilities for "living" since all of our activities are part of living, ignores the context of the ordinance which prohibits living not in the sense of existing, but dwelling or residing on public property. Picnicking is not living on public property. It does not involve occupation of "tents, huts, or temporary shelters" "pitched" on public property or residing on public property.

Nor is the term "store" vague. Accumulating or putting aside items, placing them for safekeeping, or leaving them in public parks, on public ***1108** streets, or in a public parking lot or other public area is prohibited by the ordinance. When read in light of the express purpose of the ordinance - to avoid interfering with use of those areas for the purposes for which they are intended - it is clear that leaving a towel on a beach, an umbrella in the public library, or a student backpack in a school, or using picnic supplies in a park in which picnics are permitted is not a violation of the ordinance.

Unlike the Court of Appeal, we do not believe that *People v. Mannon* (1989) 217 Cal.App.3d Supp. 1 [265 Cal.Rptr. 616], and *People v. Davenport* (1985) 176 Cal.App.3d Supp. 10 [222 Cal.Rptr. 736], which upheld application of similar ordinances, were wrongly decided.

(22) In *Mannon* the appellate department rejected a claim that the defendants were not "camping" within the definition of a Santa Barbara city ordinance. The court reasoned: "There is nothing ambiguous about the meaning of the word 'camp.' The definition is 'to pitch or occupy a camp ... to live temporarily in a camp or outdoors.' (Webster's Third New Intern. Dict. (1965) p. 322.) The illustrations of the word 'camp' utilized in the municipal code do not vary the traditional meaning of that word, they merely supplement it. The illustrations are consistent with the ordinary meaning of the word, i.e., living temporarily in the outdoors.... [A] reasonable person would understand 'camp' to mean to temporarily live or occupy an area in the outdoors, and would not be deceived or mislead by the undertaking of further explanation in the municipal code." (217 Cal.App.3d at pp. Supp. 4-5.)

(20c) The ordinance is not vague. It gives adequate notice of the conduct it prohibits. It does not invite arbitrary or capricious enforcement. The superior court properly rejected that basis of the Tobe plaintiffs' challenge to the ordinance. The Court of Appeal erred in reversing that judgment on that ground.

2. *Overbreadth.*

(23a) The Court of Appeal reasoned that the ordinance was broader than necessary since it banned camping on all public property. There is no such limitation on the exercise of the police power, however, unless an ordinance is vulnerable on equal protection grounds or directly impinges on a fundamental constitutional right.

If the overbreadth argument is a claim that the ordinance exceeds the police power of that city, it must also fail. There is no fundamental right to camp on public property; persons who do so are not a suspect classification; ***1109** and neither of the petitions claims that the ordinance is invidiously discriminatory on its face. The Legislature has expressly recognized the power of a city "to regulate conduct upon a street, sidewalk, or other public place or on or in a place open to the public" (Pen. Code, § 647c) and has specifically authorized local ordinances governing the use of municipal parks. (Pub. Resources Code, § 5193.) Adoption of the ordinance was clearly within the police

power of the city, which may "make and enforce within its limits all local, police, sanitary, and other ordinances and regulations not in conflict with general laws." (Cal. Const., art. XI, § 7; *Fisher v. City of Berkeley* (1984) 37 Cal.3d 644, 676 [209 Cal.Rptr. 682, 693 P.2d 261]; *Birkenfeld v. City of Berkeley, supra*, 17 Cal.3d 129, 159-160.) As the more than 90 cities and the California State Association of Counties that have filed an amicus curiae brief in this court have observed, a city not only has the power to keep its streets and other public property open and available for the purpose to which they are dedicated, it has a duty to do so. (*San Francisco Street Artists Guild v. Scott* (1974) 37 Cal.App.3d 667, 674 [112 Cal.Rptr. 502].)

(24) The Court of Appeal also failed to recognize that a facial challenge to a law on grounds that it is overbroad and vague is an assertion that the law is invalid in all respects and cannot have *any* valid application (*Hoffman Estates v. Flipside, Hoffman Estates* (1982) 455 U.S. 489, 494, fn. 5 [71 L.Ed.2d 362, 369, 102 S.Ct. 1186]), or a claim that the law sweeps in a substantial amount of constitutionally protected conduct. The concepts of vagueness and overbreadth are related, in the sense that if a law threatens the exercise of a constitutionally protected right a more stringent vagueness test applies. (*Id.* at p. 499 [71 L.Ed.2d at p. 372]; *Kolender v. Lawson, supra*, 461 U.S. 352, 358-359, fn. 8 [75 L.Ed.2d 903, 909-910].)

(23b) Neither the Tobe plaintiffs nor the Zuckernick petitioners have identified a constitutionally protected right that is impermissibly restricted by application or threatened application of the ordinance. There is no impermissible restriction on the right to travel. There is no right to use of public property for living accommodations or for storage of personal possessions except insofar as the government permits such use by ordinance or regulation. Therefore, the ordinance is not overbroad, and is not facially invalid in that respect. It is capable of constitutional application.

Since the ordinance is not unconstitutionally overbroad, and the facial vagueness challenge must fail, the Court of Appeal erred in ordering dismissal of the complaints in the Zuckernick prosecution and enjoining enforcement of the ordinance. ***1110**

IV. Disposition

The judgment of the Court of Appeal is reversed.

Lucas, C. J., Kennard, J., Arabian, J., and George, J., concurred.

KENNARD, J.,

Concurring.-I join in the majority opinion. I write separately to clarify a point.

The concurring opinion of Justice Werdegar states that the majority "evidently reject[s] on its merits, the claim that a homeless person may not constitutionally be punished for publicly engaging in harmless activities necessary to life, such as sleeping." (Conc. opn. of Werdegar, J., *post*, at p. 1111.) Because that issue is not properly before us in this facial challenge to the ordinance, the majority does not address it, and it expressly says so: "[T]he Court of Appeal did not distinguish between involuntarily being homeless, and involuntarily engaging in conduct that violated the ordinance. The court assumed that an involuntarily homeless person who involuntarily camps on public property may be convicted or punished under the ordinance. That question, which the Court of Appeal and the dissent address, and which might be raised in an 'as applied' challenge to the ordinance, is not before us because plaintiffs offered no evidence that the ordinance was being applied in that manner. We express no opinion on the proper construction of the ordinance, in particular on whether the conduct it prohibits must be 'willful,' or on whether or in what circumstances a necessity defense is available." (Maj. opn., *ante*, at p. 1104, fn. 19.)

Thus, the majority does *not* decide whether a person who by reason of necessity falls asleep in a public park may constitutionally be successfully prosecuted. Moreover, the majority does not address, much less reject on its merits, a claim that there are no constitutional limits on punishing conduct regardless of the circumstances. Nor does it determine whether or not homelessness is a "status" as that term is described in *Robinson v. California* (1962) 370 U.S. 660 [8 L.Ed.2d 758, 82 S.Ct. 1417], and in *Powell v. Texas* (1968) 392 U.S. 514 [20 L.Ed.2d 1254, 88 S.Ct. 2145]. What the majority does decide is the issue before it: that the challenged *camping* ordinance does not on its face constitute prohibited punishment based on status. (Maj. opn., *ante*, at pp. 1104-1106.)

WERDEGAR, J.,

Concurring.-I concur in the result and much of the reasoning of the majority. Specifically, I agree the procedural history of both ***1111** cases (Tobe and Zuckernick) dictates they be treated as purely facial challenges to the ordinance, and that the ordinance survives such a challenge. I write separately because in the process of rejecting plaintiffs' attack on the ordinance as cruel or unusual punishment, the majority enters into the merits of an as applied attack, an issue not properly before us. I would leave the question to another day, when we are presented with a case that requires its resolution.

To succeed, a *facial* attack on the anticamping ordinance as cruel and unusual punishment (U.S. Const., 8th Amend.) or as cruel or unusual punishment (Cal. Const., art. I, § 17) would require showing punishment under the ordinance, in *all its possible applications*, is cruel, unusual or both. Plaintiffs have not seriously advanced that proposition, and it could be rejected in few words. Clearly, *some* acts of camping in public places-pitching a tent in the middle of a street, for example-may constitutionally be punished.

The majority unnecessarily goes far beyond that reasoning, however, to consider, and evidently reject on its merits, the claim a homeless person may not constitutionally be punished for publicly engaging in harmless activities necessary to life, such as sleeping. Apparently the majority would reject this claim for two reasons: first, because, in its view, *conduct* may always be constitutionally punished no matter how inseparable it is, causally or logically, from a person's status or condition (maj. opn., *ante*, at pp. 1104-1105); and second, because it questions whether homelessness is a "status" at all within the meaning of the United States Supreme Court's decision in *Robinson v. California* (1962) 370 U.S. 660 [8 L.Ed.2d 758, 82 S.Ct. 1417] (maj. opn., *ante*, at p. 1105.)

Not surprisingly, since it has disavowed the intent to consider the merits of an as applied challenge, the majority treats these issues cursorily. In so doing, it fails to consider the legal arguments actually made, or the authorities cited, by petitioners and their allied amici curiae. This portion of the majority opinion is pure dictum and should be read as such.

MOSK, J.

I dissent.

By addressing only the facial challenges to the Santa Ana ordinance now before us and looking only to its neutral language, the majority sidestep the pressing and difficult issues raised in this case. In the process, they erect new procedural barriers that will make future as applied challenges to the ordinance costly and protracted, while shielding the ordinance from meaningful review. Unlike the majority, I decline to ignore the purpose and effect of the ordinance, whether it is assessed on its face or as applied. ***1112**

The City of Santa Ana (hereafter the City or Santa Ana) enacted the challenged ordinance as the latest offensive in its five-year campaign to banish the homeless. Under its broad provisions, a person who "camps" in any public area or "stores" any personal property in any public area is subject to citation and arrest for a criminal offense punishable by six months in jail. (Santa Ana Ord. No. NS-2160, adding art. VIII, § 10-400 et seq. to Santa Ana Mun. Code (hereafter the ordinance), §§ 10-402, 10-403.) It has been enforced against homeless persons whose sole "crime" was to cover themselves with a blanket and rest in a public area. Homeless persons with no alternative but to temporarily leave their personal belongings in public places are also subject to repeated citation and arrest for violation of the ordinance's prohibition against "storing" property.

The City has conceded that the purpose of the ordinance is to address the "problem" of the homeless living in its parks and other public areas. The ordinance has, moreover, been enforced in a manner that specifically targets the homeless.

For those reasons, I conclude that the ordinance is unconstitutional both on its face and as applied to the homeless residents of Santa Ana. Although a city may reasonably control the use of its parks and other public areas, it cannot constitutionally enact and enforce an ordinance so sweeping that it literally prevents indigent homeless citizens from residing within its boundaries if they are unable to afford housing and unable to find a space in the limited shelters made available to them. The City cannot solve its "homeless problem" simply by exiling large numbers of its homeless citizens to neighboring localities.

Although not unconstitutionally vague, the ordinance fails under our decision in *Parr v. Municipal Court* (1971) 3 Cal.3d 861 [92 Cal.Rptr. 153, 479

P.2d 353] (hereafter *Parr*), because it violates the guaranty of equal protection under both the United States Constitution (14th Amend.) and the California Constitution (art. I, § 7, subd. (a)). It also impermissibly impairs the fundamental right of the homeless, under both the United States and California Constitutions, to travel freely within the state. [FN1]

> FN1 Because I believe the ordinance is invalid on these grounds, I find it unnecessary to reach the issue whether the ordinance also punishes the homeless on the basis of their status in violation of the Eighth Amendment or article I, section 17, of the California Constitution. (But see *Robinson v. California* (1962) 370 U.S. 660, 665-667 [8 L.Ed.2d 758, 762-763, 82 S.Ct. 1417]; *Powell v. Texas* (1968) 392 U.S. 514, 551 [20 L.Ed.2d 1254, 1278, 88 S.Ct. 2145] (conc. opn. of White, J.); *id.* at pp. 567, 570 [20 L.Ed.2d at pp. 1286-1287, 1288] (dis. opn. of Fortas, J.); *Pottinger v. City of Miami* (S.D.Fla. 1992) 810 F.Supp. 1551, 1561-1565 [city's practice of arresting homeless persons for such activities as sleeping, standing, and congregating in public places violated the Eighth Amendment].)

I. *Facial and As Applied Claims*

The majority conclude that this action raises only facial claims. I disagree. ***1113**

a. *Pleadings and Proceedings Below*

The Tobe plaintiffs expressly pleaded both facial and as applied claims in their petition for writ of mandate. [FN2] They also submitted factual evidence to support both the as applied and facial claims, including expert declarations and declarations by individual plaintiffs and others.

> FN2 Thus the petition alleged that the City had a "custom, practice, and policy of harassing, arresting, and otherwise interfering with petitioners and other homeless individuals for engaging in ordinary and essential activities of daily life in the public areas where petitioners are forced to live." Plaintiffs specifically pleaded, inter alia, that respondents "abused their discretion in enacting and *selectively enforcing Ordinance NS-2160 against homeless persons* in violation of their right to equal protection in that the ordinance abridges the fundamental right of the homeless to travel and to freedom of movement." (Italics added.) The petition expressly challenged particular applications of the ordinance, including the practice of arresting homeless persons for sleeping and possessing property in public areas. In their prayer for relief plaintiffs requested issuance of a peremptory writ of mandate compelling the City to refrain from enforcing the ordinance, i.e., the equivalent of an injunction against *future application* of the ordinance.

In opposing the writ, the City expressly acknowledged and addressed the Tobe plaintiffs' as applied claims. Thus, it conceded in its memorandum in opposition to the petition that "the present case involves a constitutional attack on a municipal ordinance, *both as applied and as written,* which, inter alia, prohibits camping on public property." (Italics added.) The City also conceded that "petitioners contend that the ordinance, *as applied to them*, abridges their right to travel" and that "petitioners contend that the Ordinance, *as applied* to homeless persons, punishes the status and condition of homelessness." (Italics added.)

At the hearing on their petition in the trial court, plaintiffs again expressly argued that the ordinance violated the Eighth Amendment and abridged the right to travel both on its face *and as applied*. [FN3] The trial court repeatedly acknowledged that the claims included both facial and as applied challenges. Thus it stressed that the "thrust of this case" was the contention that the ordinance "is designed and enacted *and implemented* as an effort to address a perceived problem by the authorities of the City of Santa Ana that regards the people who have been classified generically as, quote, 'homeless,' end quote." (Italics added.) The court expressly observed that the claims based on the right to travel and on the Eighth Amendment involved the "*application* of the statute," and it expressly considered how the ordinance "*in* ****1114*** *application* ... has a tendency to impact certain classes of people more than others." (Italics added.)

> FN3 Thus counsel for plaintiffs argued: "If the court were to conclude that the Ordinance on its face does not abridge the right to travel then I would submit to the court by way of

> our declarations and exhibits ... that in fact *as applied* this ordinance abridges the right to travel of petitioners and homeless residents of the City of Santa Ana." (Italics added.)

The trial court properly addressed the vagueness and overbreadth claims solely as facial challenges; they were brought as such. By contrast, however, in rejecting the right to travel and Eighth Amendment claims the court did not indicate that it was limiting itself to a facial analysis or that it was precluded from considering the factual evidence submitted by plaintiffs. Indeed, as the City has repeatedly conceded, the court expressly considered and rejected plaintiffs' as applied arguments, together with the portions of the evidence that plaintiffs brought to its attention in support of those arguments. [FN4]

> FN4 Again, during oral argument before this court the City was pressed on the question whether plaintiffs raised as applied claims; it candidly admitted that plaintiffs challenged the ordinance both facially and as applied and that the Court of Appeal properly addressed the as applied claims. In supplemental briefing, the City once more conceded that plaintiffs raised both facial and as applied claims in the writ petition, that both parties addressed facial and as applied claims in their memoranda, and that they "argued *both aspects* of the right to travel/equal protection issue" at the hearing in the trial court. (Italics added.) As the City also conceded: "It is clear from a review of the reporter's transcript of the April 8, 1993 hearing that Judge Smith upheld the constitutionality of the ordinance, *both as written and as applied*. In rejecting appellants' 'as applied' attack, Judge Smith rejected appellants' supporting evidence." (Italics added.) These frank concessions by the City, which it documented with specific citations to the record, squarely refute the majority's conclusions that the allegations of the petition did not clearly state an as applied challenge and that the trial court did not rule on the petition as one encompassing an as applied challenge. (See maj. opn., *ante*, p. 1087.)

The City did not submit evidence or attempt to dispute or rebut the evidence submitted by plaintiffs, much of it derived from the City's own records. At oral argument before this court the City conceded that it was not precluded in the trial court from presenting evidence or disputing the declarations submitted by plaintiffs; it had the opportunity to present and rebut evidence but chose not to do so. As the record clearly shows, the City's strategy was to argue that the ordinance, both facially and as applied, was a valid exercise of its police power. It therefore regarded the evidence submitted by plaintiffs as essentially irrelevant. I have no trouble concluding that the City's strategy in this regard resulted in a waiver.

In its order directing issuance of a peremptory writ of mandate, the trial court ruled that "*enforcement* of Santa Ana Ordinance NS-2160 ... does not violate the rights of *homeless persons* to freedom of movement.... The Court further finds that petitioners' challenges to the constitutionality of the remaining portions of Santa Ana Ordinance NS-2160 are without merit. The Court finds that with the exception of the second clause of Santa Ana ***1115** Municipal Code § 10-401(a), Santa Ana Ordinance NS-2160 is constitutionally valid." (Italics added.)

Nothing quoted in the order demonstrates that the trial court intended to, or did, address only the facial claims. [FN5] On the contrary, the order appears on its face to reject both facial *and* as applied claims: the court expressly and specifically refers to "enforcement" of the ordinance and to its constitutionality vis-a-vis the "rights of homeless persons."

> FN5 The majority purport to rely only on the "actual judgment of the court" and not on the concessions of parties and the reporter's transcript of the hearing on the writ. (Maj. opn., *ante*, p. 1087.) The judgment, however, does not refer to the grounds of the ruling. It provides in its entirety: "It Is Hereby Ordered, Adjudged and Decreed that: [¶] 1. Judgment is entered for petitioners granting the Peremptory Writ of Mandate. [¶] 2. The Court reserves jurisdiction over the issues of attorney's fees and costs. Any motion for attorney's fees and costs shall be filed in this Department."

The majority nonetheless conclude-despite the order, the transcript of the hearing, and the concessions of the parties-that no as applied challenge to the

ordinance was "perfected." But they point to no deficiency in the pleadings. Instead, they merely note that "plaintiffs never identified the particular applications of the law to be enjoined," and the "only relief sought in the petition is a writ of mandate enjoining *any* enforcement of the ordinance by respondents." (Maj. opn., *ante*, pp. 1086-1087.) [FN6] The City made no objection on that ground, nor is there any indication in the record that the trial court declined to address the as applied claims on that basis. Certainly, had the trial court found merit in the as applied claims, it could readily have fashioned appropriate relief. [FN7] ***1116**

FN6 Although the majority observe that "the petition alleges in conclusory language that a pattern of unconstitutionally impermissible enforcement of the ordinance existed" (maj. opn., *ante*, p. 1086), there can be no doubt that under California's liberal pleading rules the petition was adequately pleaded: it gave notice of the claims and clearly alleged a pattern of constitutionally impermissible enforcement. The undisputed declarations in support of the petition show with specificity that the ordinance was repeatedly enforced against persons who were homeless. The prayer seeks relief as follows: "That a peremptory writ of mandate issue pursuant to Code of Civil Procedure Section 1085 compelling respondents to refrain from enforcement of Santa Ana Municipal Code Section NS02160 ... [S]uch other and further relief as the Court may deem just and proper." The majority fail to identify any requirement of the Code of Civil Procedure or local rules that plaintiffs further delineate the relief sought on their as applied claims. Indeed, it is a rule of long standing that when an answer is filed a court may grant any relief consistent with the issues raised. (See, e.g., *Wright v. Rogers* (1959) 172 Cal.App.2d 349, 367-368 [342 P.2d 447].)

FN7 For example, the court could have required that the City enforce the provisions of the ordinance prohibiting sleeping or storing personal property only against those persons who are *not* homeless. An ordinance that prevented only those *with* homes from "camping" in public areas might be constitutional; it would, of course, be of limited practical utility.

b. *Justiciability and Standing*

Plaintiffs include persons who have been cited under the ordinance and who, because they are homeless, are likely to be cited again. They thus have a direct personal stake in the outcome of this action. [FN8]

FN8 The majority question whether plaintiffs are "truly"-or even sufficiently-homeless, concluding that the declarations they submitted did not establish that the conduct for which they were cited was "involuntary." I am satisfied that the undisputed sworn statements of plaintiffs and others cited under the ordinance that they lack the present means to house themselves are sufficient to establish standing and to demonstrate a pattern of enforcement of the ordinance against homeless persons. We need not inquire into the "voluntariness" of all the acts or decisions that might have led to their current plight. As many of the briefs and expert submissions point out, the question whether the homeless, particularly the large proportion of homeless who are mentally ill or addicted to drugs or alcohol, are "voluntarily" living in the streets is complex. Even when services or welfare benefits are available, it may be beyond the resources of many homeless persons to avail themselves of such assistance.

In any event, in light of the shortage of services and beds for the homeless, including the mentally ill and unaccompanied children, the question of "voluntariness" is almost academic. The undisputed fact is that Santa Ana has only 332 beds for a population of approximately 3,000 homeless. The vast majority of homeless in Santa Ana do not have the alternative of sleeping in a bed, off the streets. (See also Vernez et al., Review of California's Program for the Homeless Mentally Disabled (1988) pp. 1, 13, 15 [RAND study prepared for California Department of Mental Health, reporting, inter alia, that about 30 percent of Orange County homeless suffer from severe mental disorders]; Stats. 1988, ch. 1517, § 1, p. 5382

> [legislative finding that the extreme shortage of mental health services in California has led to redirection of long-term psychiatric patients "into a state of homelessness"]; Stats. 1985, ch. 1286, § 1.5, p. 4415 [legislative finding that "large numbers of mentally disordered adults are homeless"]; State of Cal., Department of Youth Authority, Policy Review and Update: Statewide Needs Assessment of Youth Shelters and Youth Centers (1993) pp. 1, II.2-3 [indicating that Orange County has only 31 beds for unaccompanied children, although there are an estimated 3,000 to 4,000 unaccompanied children in the county]; United States Conference of Mayors, A Status Report on Hunger and Homelessness in America's Cities: 1993-A 26 City Survey (Dec. 1993) p. 29 [children, including unaccompanied children or "runaways," account for an estimated 30 percent of the homeless population].)

In addition, plaintiffs address their as applied claims broadly to the unlawful implementation of the ordinance against *all* homeless persons. Plaintiffs thus have sufficient interest as citizens of Santa Ana, under our "public right/public duty" doctrine, to bring claims on behalf of other homeless persons who have, as a group, been targeted by the ordinance. (See *Green v. Obledo* (1981) 29 Cal.3d 126, 144-145 [172 Cal.Rptr. 206, 624 P.2d 256]; *Common Cause v. Board of Supervisors* (1989) 49 Cal.3d 432, 439 [261 Cal.Rptr. 574, 777 P.2d 610].) The case "poses a question which is of broad public interest, is likely to recur, and should receive uniform resolution throughout the state." (*Ramirez v. Brown* (1973) 9 Cal.3d 199, 203 [107 Cal.Rptr. 137, 507 P.2d 1345].)

Our courts have repeatedly applied the "public right/public duty" exception to the general rule that ordinarily a writ of mandate will issue only to ***1117** persons who are "beneficially interested." (Code Civ. Proc., § 1086.) Thus in *Green v. Obledo*, *supra*, 29 Cal.3d 126, recipients of welfare benefits petitioned for writ of mandate challenging the compliance of a regulation with the Social Security Act. We held that " ' "where the question is one of public right and the object of the mandamus is to procure the enforcement of a public duty, the relator need not show that he has any legal or special interest in the result, since it is sufficient that he is interested as a citizen in having the laws executed and the duty in question enforced .... " ' " (*Id.* at p. 144; accord, *Common Cause v. Board of Supervisors*, *supra*, 49 Cal.3d at p. 439.) [FN9]

> FN9 (See also *Parr*, *supra*, 3 Cal.3d 359 [plaintiff had standing to challenge an anti-"hippie" ordinance although she was herself manifestly not a "hippie" but a resident and merchant in the city]; *Timmons v. McMahon* (1991) 235 Cal.App.3d 512, 518 [286 Cal.Rptr. 620] [applying public interest exception in case involving eligibility rights for welfare benefits]; *Driving Sch. Assn. of Cal. v. San Mateo Union High Sch. Dist.* (1992) 11 Cal.App.4th 1513 [14 Cal.Rptr.2d 908] [applying public interest exception in case seeking to prevent school district from charging high school students tuition for a drivers' training class].)

Furthermore, plaintiffs show a sufficient beneficial interest as citizens who seek to restrain the illegal expenditure or waste of city funds to implement an ordinance in an unconstitutional manner. (See Code Civ. Proc., § 526a; *Blair v. Pitchess* (1971) 5 Cal.3d 258, 267-269 [96 Cal.Rptr. 42, 486 P.2d 1242, 45 A.L.R.3d 1206] [an action to restrain county or city officials from continuing to enforce provisions of an unconstitutional law presents a true case or controversy, regardless of whether the plaintiff and the defendant each have a special, personal interest in the outcome of the action]; *Van Atta v. Scott* (1980) 27 Cal.3d 424, 450, fn. 28 [166 Cal.Rptr. 149, 613 P.2d 210] [an action that "meets the criteria of section 526a satisfies case or controversy requirements"]; *Ames v. City of Hermosa Beach* (1971) 16 Cal.App.3d 146, 150 [93 Cal.Rptr. 786].) As we have emphasized, "it has never been the rule in this state that parties in [taxpayer suits] must have a personal interest in the litigation.... '[N]o showing of special damage to the particular taxpayer has been held necessary.' " (*Blair v. Pitchess*, *supra*, 5 Cal.3d at pp. 269-270.)

Because the City has used, and continues to use, taxpayer funds to cite and prosecute persons who store belongings or sleep in public places in violation of an ordinance challenged as unconstitutional, these citizen-plaintiffs have a sufficient interest to confer standing. Consequently, plaintiffs' as applied claims challenging the implementation of the ordinance against homeless persons present "a true case or con-

troversy." (*Blair v. Pitchess*, *supra*, 5 Cal.3d at p. 269.)

The majority also conclude that an as applied claim challenging a criminal statute is justiciable only after "the circumstances of its application have ***1118** been established by conviction or otherwise." (Maj. opn., *ante*, p. 1085.) But in analogous cases we have not required conviction as a prerequisite to standing. Thus in *Murgia v. Municipal Court* (1975) 15 Cal.3d 286 [124 Cal.Rptr. 204, 540 P.2d 44], we concluded that the defendants, members of a particular union, could obtain discovery to determine whether various penal statutes were being discriminatorily enforced against them in violation of equal protection. The defendants had been charged with, but not yet convicted of, violations of the statutes. (*Id.* at p. 291, fn. 2.) Indeed, we implicitly acknowledged that the defense of discriminatory enforcement did not reach the question of guilt or innocence: "Because the particular defendant, unlike similarly situated individuals, suffers prosecution simply as the subject of invidious discrimination, such defendant is very much the direct victim of the discriminatory enforcement practice. Under these circumstances, discriminatory prosecution becomes a compelling ground for dismissal of the criminal charge, since prosecution would not have been pursued except for the discriminatory design of the prosecuting authorities." (*Id.* at p. 298, fn. omitted.) [FN10]

FN10 Similarly, under the Eighth Amendment it is not essential to have a formal adjudication of guilt to challenge a provision that makes status a criminal offense. In *Joyce v. City and County of San Francisco* (N.D.Cal. 1994) 846 F.Supp. 843, 853, the district court expressly rejected the defendants' contention that a claim under the Eighth Amendment could be made only by a party convicted of a criminal offense. As *Joyce* emphasized, that proposition was refuted by the United States Supreme Court in *Ingraham v. Wright* (1977) 430 U.S. 651, 666-668 [51 L.Ed.2d 711, 726-728, 97 S.Ct. 1401], which expressly provided that in addition to proscribing certain types of punishments to those convicted of crimes, the amendment "imposes substantive limits on what can be made criminal." Like *Joyce*, this case alleges discrimination on the basis of the status of homelessness-i.e., it challenges the ordinance under the substantive provisions of the Eighth Amendment. Moreover, "fines ... traditionally have been associated with the criminal process" and subjected to the limitations imposed by the Eighth ment. (*Ingraham v. Wright*, *supra*, 430 U.S. at p. 664 [51 L.Ed.2d at pp. 725-726].)

The majority also plainly imply that an as applied challenge must necessarily be restricted to a case-by-case showing by each individual who is convicted under the ordinance that he or she was "truly homeless" and that the ordinance was improperly applied in each case. Such a requirement-which is tantamount to requiring an individual trial of a "necessity" defense for each person cited under the ordinance-is unwarranted. (See, e.g., *Ramirez v. Brown*, *supra*, 9 Cal.3d 199 [holding that challenged provisions were unconstitutional as applied to all ex-felons]; *Van Atta v. Scott*, *supra*, 27 Cal.3d at pp. 433, 452-453 [holding that San Francisco's manner of applying statutes for pretrial release of criminal defendants violated due process].) It would needlessly subject large numbers of homeless persons to the criminal justice system for wholly innocuous conduct and overwhelm ***1119** our already strained judicial resources, while effectively insulating the ordinance from meaningful review. [FN11]

FN11 We have recognized that mandamus review is appropriate where, as here, important issues would be effectively removed from judicial review if standing is not conferred. (See *Driving Sch. Assn. of Cal. v. San Mateo Union High Sch. Dist.*, *supra*, 11 Cal.App.4th at p. 1519 ["High school students who take this brief 24-hour class are unlikely to have the financial resources or the economic interest necessary to maintain the protracted litigation necessary to test the School District's authority to charge tuition for the class."].) In this case, similarly, the targets of the ordinance are unlikely to have the financial resources to test the City's authority on a case-by-case basis. Because the City may cite, arrest, and detain homeless residents repeatedly without "actually convicting" them in a full-blown judicial proceeding, even under the majority's construction it would be justiciable as an issue

"evading review."

Significantly, federal courts recently addressing similar challenges to "anti-camping" measures have consistently done so by examining ordinances as applied to the homeless in general, *not* on a case-by-case basis, and have not required conviction to establish standing. (See *Pottinger v. City of Miami, supra*, 810 F.Supp. at p. 1554 [challenging manner in which city "applies these laws to homeless individuals"]; *Joyce v. City and County of San Francisco, supra*, 846 F.Supp. at p. 846 [challenging ordinance "only insofar as it specifically penalizes certain 'life sustaining activities' engaged in by the homeless"]; *Johnson v. City of Dallas* (N.D.Tex. 1994) 860 F.Supp. 344, 346 [addressing constitutionality of city ordinances "enacted, enforced, or both, allegedly to remove homeless persons from public view"].)

In sum, there is ample authority to conclude that these plaintiffs have standing and state justiciable claims, both facial and as applied. Most of the plaintiffs have been cited and fined for violations of the ordinance, and most are taxpayers. Moreover, because Santa Ana has effectively criminalized sleeping and storing personal property in any public places, plaintiffs and other homeless persons in Santa Ana-who have no legal alternative but to sleep and store personal property in public short of leaving the city altogether-will necessarily be subject to future citation and/or arrest. The as applied claims are therefore properly before us.

II. *Equal Protection*

In my view the ordinance violates equal protection under the rule of our decision in *Parr, supra*, 3 Cal.3d 861, because it intentionally discriminates against homeless persons who have no alternative but to sleep and store their property in public areas of the City. [FN12] ***1120**

FN12 The majority incorrectly assert that plaintiffs did not pursue an equal protection theory. The writ petition expressly pleaded equal protection claims, including violations of the right to travel. *Parr, supra*, 3 Cal.3d 861, a case devoted to equal protection analysis, was extensively briefed by the parties and amici curiae. Moreover, as discussed below, the right to travel is properly analyzed under an equal protection test.

a. *Scope of Analysis*

As amici curiae for the City concede, "Neither we nor the Court can or should avoid that [*sic*] this case involves questions about the homeless, although the text of the Ordinance is neutral and does not single out the homeless in any manner." Although I believe we can construe the ordinance both facially and as applied, in either case we must look beyond the neutral face of the measure to its underlying purpose and its impact on particular groups.

There is ample precedent for doing so. In *Shapiro v. Thompson* (1969) 394 U.S. 618, 628 [22 L.Ed.2d 600, 611-612, 89 S.Ct. 1322], the Supreme Court examined the legislative history of the statutes there challenged and found "weighty evidence that exclusion from the jurisdiction of the poor who need or may need relief was the specific object of these provisions." [FN13]

FN13 (See also *Arlington Heights v. Metropolitan Housing Corp.* (1977) 429 U.S. 252, 265-266 [50 L.Ed.2d 450, 464-465, 97 S.Ct. 555] [recognizing the relevance of discriminatory purpose in assessing the validity of a rezoning decision]; *Parr, supra*, 3 Cal.3d 861; *Serrano v. Priest* (1976) 18 Cal.3d 728, 740-741, 747 [135 Cal.Rptr. 345, 557 P.2d 929] [invalidating California's facially neutral school financing scheme in its entirety on the basis of evidence showing it had a discriminatory effect]; see generally, *California Mfrs. Assn. v. Public Utilities Com.* (1979) 24 Cal.3d 836, 844 [157 Cal.Rptr. 676, 598 P.2d 836] ["both the legislative history of the statute and the wider historical circumstances of its enactment are legitimate and valuable aids in divining the statutory purpose"].)

In *Parr, supra*, 3 Cal.3d 861, we addressed a challenge to a facially neutral ordinance enacted by the City of Carmel-by-the-Sea that was similarly aimed at "an extraordinary influx of undesirable and unsanitary visitors to the City, sometimes known as 'hippies.' " (*Id.* at p. 863.) We determined that despite the neutral terms of the ordinance, we were required to look beyond its literal language to determine its purpose. We stressed that " '[a] state enactment cannot be construed for purposes of constitutional analysis without concern for its immediate objective [citations]

and for its ultimate effect [citations].' " (*Id.* at p. 864.)

Among other precedents, we cited Justice Stephen J. Field's perceptive opinion in *Ho Ah Kow v. Nunan* (D.Cal. 1879) 12 F. Cas. 252 (No. 6,546), which invalidated a facially neutral San Francisco ordinance requiring every male entering the county jail to have his hair cut to a uniform length of one inch. Under the ordinance a Chinese man convicted of a misdemeanor violation was subjected to loss of his traditional queue.

Justice Field based his ruling on a conclusion that the purpose and effect of the ordinance-although not expressed on the face of the provision-was ***1121** to punish the then racially unpopular Chinese: "The class character of this legislation is none the less manifest because of the general terms in which it is expressed." (*Ho Ah Kow v. Nunan, supra*, 12 F. Cas. at p. 255.) He referred to statements of supervisors in debate on the passage of the ordinance for the purpose of ascertaining the "general object of the legislation proposed, and the mischiefs sought to be remedied." (*Ibid.*) He added, "When we take our seats on the bench we are not struck with blindness, and forbidden to know as judges what we see as men; and where an ordinance, though general in its terms, only operates upon a special race, sect or class, it being universally understood that it is to be enforced only against that race, sect or class, we may justly conclude that it was the intention of the body adopting it that it should only have such operation, and treat it accordingly." (*Ibid.*)

Guided by Justice Field, we declined in *Parr* to "blind ourselves to official pronouncements of hostile and discriminatory purpose solely because the ordinance employs facially neutral language." (3 Cal.3d at p. 865.) We examined the purpose expressed by the Carmel City Council in enacting the measure and concluded that "[t]he irrefragable implication is that the Carmel City Council sought, through Municipal Code section 697.02, to rid the city of the blight it perceived to be created by the presence of the hippies." (*Ibid.*)

In construing the Carmel ordinance we also examined its probable impact: "Those officials responsible for the enforcement of the law are put on notice that the public property in the city is in imminent danger because of the influx of a particular class against which the ordinance is unmistakably directed. The inevitable effect must be discriminatory enforcement consistent with the discriminatory purpose expressed by the council ...." (*Parr, supra*, 3 Cal.3d at p. 868.) On these grounds we held that the ordinance violated equal protection by stigmatizing a particular group. In the present case as well, we are obligated to look behind the neutral facade of the ordinance.

b. *Purpose and Effect of the Ordinance*

As in *Parr, supra*, 3 Cal.3d 861, although the ordinance is neutral on its face we need not go far afield to determine the purpose that the City sought to achieve. Over the past four years, Santa Ana has engaged in what the Court of Appeal aptly called a "crusade against the homeless."

In a memorandum titled "Vagrants," dated June 16, 1988, the City's executive director of the recreation and community services agency informed the City Park Superintendent: "A task force has been formed in an ***1122** effort to deal with the vagrants. The City Council has developed a policy that the vagrants are no longer welcome in the City of Santa Ana.... In essence, the mission of this program will be to move all vagrants and their paraphernalia out of Santa Ana by continually removing them from the places that they are frequenting in the City."

The City's vagrancy task force developed and implemented a plan that included discouraging food providers-such as the Orange County Rescue Mission and the Salvation Army-from feeding the homeless, turning on sprinklers in public parks, and confiscating and destroying the personal property of homeless residents. After a legal challenge to that plan the City agreed to a settlement in April 1990 that included posting maintenance hours, ceasing to conduct maintenance "sweeps" in public areas, and providing for storage and retrieval of confiscated property.

Only a few months later, however, in August 1990, the Santa Ana police mounted "Operation Civic Center," described in an internal memorandum as follows: "Eddie West Field [an open-air football stadium adjacent to the Civic Center] was used as the command post because it supplied a secured area where we could house multiple arrestees. In addition, it also allowed access to restroom facilities and water for the persons arrested. Four Police Service Officers were assigned to the command post to process all arrestees. This included photographing, fingerprint-

ing, documentation and running record and warrant checks. Two officers were also assigned to the command post for care and custody of the arrestees. Five 2-man observer teams were assigned throughout the plaza area looking for criminal activity. Each of the five 2-man teams was completely concealed and was able to observe the violations from a safe and secure location. Five 2-man arrest teams were called into the plaza area by the observers and the arrest teams took the violators into custody. The violators were then transported to the command post at Eddie West Field where they were processed."

There were 28 arrests for littering, 2 for drinking in public, 7 for urinating in public, 18 for jaywalking, 2 for destroying vegetation, 2 for riding bicycles on a sidewalk, 1 for glue sniffing, 1 for removing trash from a bin, and 2 for an obscure violation of the City's fire code. Two persons who proved they had homes were released. The homeless arrestees were handcuffed, transported to an athletic field for booking, chained to benches for up to six hours, and identified with numbers written on their arms with markers. At the conclusion of the detention, the police loaded the homeless into vans, drove them to the edge of the Central Command Area of the Santa Ana Police Department, and dropped them off.

The homeless brought a further civil action against the City for injunctive relief, asserting they were victims of discriminatory law enforcement. The ***1123** trial court agreed, ruling that the homeless were a cognizable class who had been singled out for arrest for offenses that rarely, if ever, even drew citations in Santa Ana. The trial court concluded: "In short, this Court finds that the Santa Ana Police Department deliberately and intentionally implemented a program which targeted those persons living in the Civic Center, the homeless."

In October 1990 the City apparently settled the action. It agreed that "it shall be [] the policy of [the City of Santa Ana] to refrain from discriminating against individuals on the basis of their homelessness" and it shall not "take individual or concerted action to drive homeless individuals from Santa Ana." The stipulation was made an order of the court, but no judgment has been entered. The case is to be dismissed during this year.

The ordinance before us reflects the same purpose as Santa Ana's previous official policies: to drive "vagrants" out of Santa Ana. There can be no doubt that it was enacted to resolve what the City refers to in its brief as "the homeless problem." As that brief explains: "The City is directly impacted by the homeless problem because homeless persons attempt to live on property it owns or controls, thereby causing the myriad of public health and police related concerns which the City must combat in the face of constantly diminishing financial resources." The City again expressly conceded at oral argument that the purpose of the ordinance was to address the problem of homeless persons "camping" in public areas, including the parking lot across from city hall. [FN14]

> FN14 The majority expressly venture no opinion on whether and in what circumstances a necessity defense might be available. (Maj. opn., *ante*, p. 1104, fn. 19.) They nonetheless note that a deputy district attorney "expressed his opinion at oral argument" that a necessity defense "might" be available to "truly homeless" persons. (Maj. opn., *ante*, p. 1088 fn. 8.) Because of that "opinion" the majority refuse to conclude that the City intends to enforce the ordinance against persons who have no alternative to "camping" or storing "camp paraphernalia" on public property. Nothing in the ordinance provides an exception for homeless persons, however, and the district attorney's "opinion" does not purport to bind the City or even to express the *City's* intent in implementing the ordinance. Moreover, even if a necessity defense were available, it would not prevent the City from repeatedly citing and arresting homeless persons and subjecting them to an endless round of costly and complex judicial proceedings. Thus the effect of the ordinance would continue to be to drive the homeless from Santa Ana, as it is clearly intended to do.

Even if the City had not so candidly admitted its purpose, however, the inevitable effect of the ordinance is to target the homeless. Because there are beds in local shelters for only about one in ten homeless persons in Santa Ana, an ordinance outlawing "camping" in all public areas effectively accomplishes the purpose of driving out the homeless, despite its neutral wording. Although the City and amici curiae

observe that the ordinance ***1124** would also apply to the mayor and the Girl Scouts, it is unlikely that any significant number of Santa Ana residents or visitors other than the homeless would choose to sleep, protected only by a blanket, in a public parking lot or to store personal property in the open. [FN15]

> FN15 (See Waldron, *Homelessness & the Issue of Freedom* (1991) 39 UCLA L.Rev. 295, 313 [Anticamping ordinances "have and are known and even intended to have a specific effect on the homeless which is different from the effect they have on the rest of us.... [E]veryone is perfectly well aware of the point of passing these ordinances, and any attempt to defend them on the basis of their generality is quite disingenuous."].)

We concluded in *Parr, supra*, 3 Cal.3d at page 870, that "we cannot be oblivious to the transparent, indeed the avowed, purpose and the inevitable effect of the ordinance in question: to discriminate against an ill-defined social caste whose members are deemed pariahs by the city fathers. This court has been consistently vigilant to protect racial groups from the effects of official prejudice, and we can be no less concerned because the human beings currently in disfavor are identifiable by dress and attitudes rather than by color." That vigilance is even more important now. Today's pariahs are no longer the relatively carefree "hippies," many of whom chose that lifestyle, but persons who are homeless largely by necessity and who face far greater restrictions under this ordinance than merely keeping off the grass. [FN16]

> FN16 The majority attempt to distinguish *Parr* on its facts, arguing that the Carmel ordinance "banned a customary use of the city park." (Maj. opn., *ante*, p. 1094.) But their discussion of *Parr* is merely dictum, because they decline to acknowledge or address the equal protection claims on the merits. It is also unpersuasive. The Carmel ordinance made it unlawful to "[c]limb any tree; or walk, stand or sit upon monuments, vases, fountains, railings, fences, planted areas, or upon any other property *not designed or customarily used for such purposes*, or to sit on any sidewalks or steps, or to lie or sit on any lawns." (*Parr, supra*, 3 Cal.3d at p. 862, italics added.) Thus, *Parr* did not turn on the issue of the "customary" use of the public areas in Carmel, but, as here, on whether a city could prohibit innocuous behavior for the constitutionally impermissible purpose of driving a disfavored group from its bounds. The majority also argue unpersuasively that we must ignore the obvious purpose of the Santa Ana ordinance because, two years previously, Santa Ana had agreed to discontinue attempts to force the homeless to leave. Their approach permits the City to continue to discriminate against the homeless so long as it does not expressly articulate an impermissible purpose. We have explicitly rejected the notion that the mere appearance of neutrality can be used to shield discriminatory legislation. (*Parr, supra*, 3 Cal.3d at p. 870; see also *Mulkey v. Reitman* (1966) 64 Cal.2d 529 [50 Cal.Rptr. 881, 413 P.2d 825], affd. *sub nom. Reitman v. Mulkey* (1967) 387 U.S. 369 [18 L.Ed.2d 830, 87 S.Ct. 1627].)

A century ago Anatole France exposed the cruel hypocrisy of such "neutral" laws against the indigent: "The law, in its majestic equality, forbids the rich as well as the poor to sleep under bridges, to beg in the streets, and to steal bread." (France, Le Lys Rouge (1894) ch. 7.) Even under a facial analysis we cannot blind ourselves to the evident intent of the Santa Ana ordinance. Recognizing that intent, I would hold that the ordinance ***1125** impermissibly discriminates against the homeless and thereby violates equal protection. [FN17]

> FN17 We need not hold, therefore, that homeless persons are members of a "suspect class" in order to invalidate the ordinance on equal protection grounds. As in *Parr, supra*, 3 Cal.3d 861, the purpose of the ordinance-to banish a disfavored group-is plainly not a legitimate state interest. (See also *U. S. Dept. of Agriculture v. Moreno* (1973) 413 U.S. 528, 534 [37 L.Ed.2d 782, 787-789, 93 S.Ct. 2821] [invalidating a federal statute that discriminated against "hippies" and "hippie" communes: "if the constitutional conception of 'equal protection of the laws' means anything, it must at the very least mean that a bare congressional desire to harm a politically unpopular group cannot constitute a *legitimate* governmental

est."]; *Cleburne v. Cleburne Living Center, Inc.* (1985) 473 U.S. 432, 448 [87 L.Ed.2d 313, 325-326, 105 S.Ct. 3249] [holding city's denial of building permit invalid because the decision discriminated against the "mentally retarded"].)

III. *Right to Travel*

The ordinance also impermissibly penalizes the fundamental right of indigent homeless persons to travel to or remain in Santa Ana, by denying them the basic necessities of sleeping and storing personal belongings in any public areas.

a. *Constitutional Freedom to Travel and Abide*

Both the United States Supreme Court and the courts of California have expressly recognized a fundamental constitutional right to travel, "a basic human right protected by the United States and California Constitutions as a whole." (*In re White* (1979) 97 Cal.App.3d 141, 148 [158 Cal.Rptr. 562]; see, e.g., *Shapiro v. Thompson, supra*, 394 U.S. at p. 629 [22 L.Ed.2d at p. 612].) [FN18] A law implicates the right to travel when it either penalizes travel or is intended to impede travel. (*Attorney General of N.Y. v. Soto-Lopez, supra*, 476 U.S. at p. 903 [90 L.Ed.2d pp. 905-906] ["A state law implicates the right to travel when it actually deters such travel [citations], when impeding travel is its primary objective [citations], or when it ' "uses any classification which serves to penalize the exercise of that right." ' "].)

FN18 Although the Supreme Court has never reached a consensus concerning the specific constitutional source of the right to travel, it has often either relied upon or recognized the equal protection clause as a potential source of the right. (See, e.g., *Shapiro v. Thompson, supra*, 394 U.S. at pp. 630, 634 [22 L.Ed.2d at pp. 612-613, 614-615]; *Zobel v. Williams* (1982) 457 U.S. 55, 66-67 [72 L.Ed.2d 672, 681-682, 102 S.Ct. 2309] (conc. opn. of Brennan, J.); *Memorial Hospital v. Maricopa County* (1974) 415 U.S. 250, 253-270 [39 L.Ed.2d 306, 312-322, 94 S.Ct. 1076]).) " '[T]he right to travel receives its most forceful expression in the context of equal protection analysis.' " (*Attorney General of N.Y. v. Soto-Lopez* (1986) 476 U.S. 898, 902, fn. 2 [90 L.Ed.2d 899, 905, 106 S.Ct. 2317], (plur. opn. of Brennan, J.).)

The United States Supreme Court has repeatedly rejected statutes designed to exclude the indigent. Thus in *Edwards v. California* (1941) 314 U.S. 160, 174 [86 L.Ed. 119, 125-126, 62 S.Ct. 164], the court struck down ***1126** a California statute that prohibited the transportation of indigent nonresidents into California. The court explained that a community may not "gain a momentary respite from the pressure of events by the simple expedient of shutting its gates to the outside world." (*Id.* at p. 173 [86 L.Ed. at p. 125].) Similarly, in *Shapiro v. Thompson, supra*, 394 U.S. at page 629 [22 L.Ed.2d at p. 612], the court held that the right to travel was triggered by any attempt to "fence out" indigents. (See also *Memorial Hospital v. Maricopa County, supra*, 415 U.S. 250 [indigents' right to travel and settle in Arizona was impermissibly penalized by durational residency requirements for nonemergency medical care for indigents at county expense].)

The right to travel includes the right to *stay* as well as the right to go. (See, e.g., *Kent v. Dulles* (1958) 357 U.S. 116, 126 [2 L.Ed.2d 1204, 1210, 78 S.Ct. 1113] ["Freedom of movement is basic in our scheme of values."]; *Dunn v. Blumstein* (1972) 405 U.S. 330, 338 [31 L.Ed.2d 274, 281-282, 92 S.Ct. 995] [right to travel ensures "freedom to enter *and abide*"], italics added; *Attorney General of N.Y. v. Soto-Lopez, supra*, 476 U.S. at p. 903 [90 L.Ed.2d at pp. 905-906] [right encompasses burdens on freedom to enter and abide in states]; *Papachristou v. City of Jacksonville* (1972) 405 U.S. 156 [31 L.Ed.2d 110, 92 S.Ct. 839] [vagrancy ordinance offends freedom of movement].) Our courts, too, have recognized that the right to travel includes the "concomitant right *not* to travel." (*In re Marriage of McGinnis* (1992) 7 Cal.App.4th 473, 480 [9 Cal.Rptr.2d 182], italics added; see also *In re White, supra*, 97 Cal.App.3d at pp. 148-149 [banishment violates constitutional right to freedom of travel]; *In re Barbak S.* (1993) 18 Cal.App.4th 1077, 1084-1086 [22 Cal.Rptr.2d 893] [same]; *People v. Bauer* (1989) 211 Cal.App.3d 937, 944 [260 Cal.Rptr. 62] [same].)

b. *Intrastate Travel*

This case involves *intra*state travel. In California we have expressly recognized that the constitutional right to freedom of movement necessarily embraces intrastate travel. "[T]he right to intrastate travel (which includes intramunicipal travel) is a basic hu-

man right protected by the United States and California Constitutions." (*In re White, supra*, 97 Cal.App.3d at p. 148; see also *In re Marriage of Fingert* (1990) 221 Cal.App.3d 1575, 1581 [271 Cal.Rptr. 389] [court order requiring parent to relocate or lose custody violates right to intrastate travel]; *People v. Bauer, supra*, 211 Cal.App.3d at p. 944 [requiring defendant to obtain official approval of choice of residence as a condition of probation impinges on right to intrastate travel].)

The right to intrastate travel in this state is protected without regard to federal decisions on the issue, because the rights guaranteed by the California Constitution " 'are not dependent upon those guaranteed by the United ***1127** States Constitution.' " (*In re White, supra*, 97 Cal.App.3d at p. 148.) Nonetheless, I would approve the holding in *White*, concluding that the United States Constitution ensures the right to intrastate, as well as interstate, travel.

Although the United States Supreme Court has not expressly addressed the right to intrastate travel, it has strongly suggested that such a broad reading of the right to travel is appropriate. Thus in *Kolender v. Lawson* (1983) 461 U.S. 352, 358 [75 L.Ed.2d 903, 909-910, 103 S.Ct. 1855], the court emphasized that a law prohibiting wandering the streets at night without identification implicated "consideration of the constitutional right to freedom of movement." (See also *Papachristou v. City of Jacksonville, supra*, 405 U.S. at p. 164 [31 L.Ed.2d at pp. 116-117] [" 'wandering or strolling' " are "historically part of the amenities of life as we have known them"].)

The Circuit Courts of Appeal have repeatedly concluded that the right encompasses intrastate travel. (See, e.g., *Spencer v. Casavilla* (2d Cir. 1990) 903 F.2d 171, 174; *Lutz v. City of York, PA.* (3d Cir. 1990) 899 F.2d 255, 268 ["the right to move freely about one's neighborhood or town ... is indeed 'implicit in the concept of ordered liberty' and 'deeply rooted in the Nation's history' "]; *King v. New Rochelle Municipal Housing Authority* (2d Cir. 1971) 442 F.2d 646, 648-649 [right to travel includes intrastate travel].) As the Second Circuit recognized in *King*, "It would be meaningless to describe the right to travel *between* states as a fundamental precept of personal liberty and not acknowledge a correlative constitutional right to travel *within* a state." (442 F.2d at p. 648, fn. omitted, italics added.)

c. *Impact of the Ordinance*

The majority conclude that the ordinance does not inevitably conflict with the right to travel because it "has no impact, incidental or otherwise, on the right to travel *except* insofar as a person, homeless or not, might be discouraged from traveling to Santa Ana because camping on public property is banned." (Maj. opn., *ante*, p. 1102, italics added.) But homeless persons are not simply "discouraged" from traveling to Santa Ana. They are effectively *prevented* from doing so, because the ordinance forbids them to sleep or store their personal belongings in any public area in the City. By criminalizing their unavoidable but innocuous conduct of sleeping and storing their personal effects, the ordinance has an immediate impact on the right of the homeless to enter or remain in Santa Ana. [FN19]

FN19 Even a provision that penalized travel "indirectly" would not be immune from strict constitutional scrutiny. As the Supreme Court stressed in *Dunn v. Blumstein, supra*, 405 U.S. at page 341 [31 L.Ed.2d at pp. 283-284]: " ' "Constitutional rights would be of little value if they could be ... indirectly denied." ' " In *Dunn*, the court invalidated a one-year residential requirement for voting in Tennessee, although there was no evidence that it in fact deterred-or was intended to deter-travel.

I therefore disagree with the majority's assertion that the effect of the ordinance on the homeless is merely "incidental." Criminalizing the harmless act of sleeping in a public place-when the vast majority of homeless ***1128** persons in Santa Ana have no legal alternative other than to "get out of town by sundown"-forbids a "necessity of life" and thereby effectively penalizes migration. (See *Memorial Hospital v. Maricopa County, supra*, 415 U.S. at pp. 258-259 [39 L.Ed.2d at pp. 314-316] [laws penalize travel when they deny a person a "necessity of life" such as nonemergency medical care for indigents at the county's expense].) Arresting or citing the homeless for sleeping in public also burdens their freedom of movement, because they must either forgo sleep or leave the City altogether to avoid criminal penalty. Moreover, as discussed above, the primary purpose for enforcing the ordinance against the homeless was to drive them out of public areas. [FN20]

FN20 The majority's reliance on cases involving only incidental and nondiscriminatory zoning and taxing provisions is therefore misplaced. (See maj. opn., *ante*, p. 1101; *R.H. Macy & Co. v. Contra Costa County* (1990) 226 Cal.App.3d 352, 367-369 [276 Cal.Rptr. 530] [unequal taxation under Proposition 13 had an "inconsequential" effect on interstate mobility and did not result in invidious discrimination, either directly or indirectly]; *Associated Home Builders etc., Inc. v. City of Livermore* (1976) 18 Cal.3d 582, 602-603 [135 Cal.Rptr. 41, 557 P.2d 473] [zoning ordinance barring residential construction only incidentally burdened right to travel]; but see *id.* at p. 623 (dis. opn. of Mosk, J.) ["total exclusion of people from a community is both immoral and illegal"].)

The indirect effects of the ordinance may prove even more invidious. As one amicus curiae, a former mayor, points out, ordinances like Santa Ana's encourage an unhealthy and ultimately futile competition among cities to impose comparable restrictions in order to avoid becoming a refuge for homeless persons driven out by other cities. The case at bar provides a striking example of this domino effect: in response to the Santa Ana ordinance, surrounding communities quickly enacted similar measures to protect themselves from an influx of Santa Ana's homeless. [FN21] To carry this effect to its logical conclusion, if all communities followed suit the homeless could effectively be excluded from the entire State of California.

FN21 Fullerton, Long Beach, and Orange, for example, have passed anticamping ordinances. The City Attorney of Fullerton explained: "We're trying to protect ourselves so that when Santa Ana throws out their 1,300, they don't all come over here." (Schaffer, *Tent Cities: Laws Aim to Break Camp*, Orange County Register (June 7, 1992) pp. 1, 8.) Another amicus curiae, a former mayor of Laguna Beach, similarly observed in a letter to this court: "To the extent that Santa Ana officials 'succeed' [in excluding the homeless], the homeless poor migrate to other nearby cities in search of streets and other public places where they can sleep. Laguna Beach, already 'home' to many poor and homeless individuals, may have to take on yet more of a social support burden."

In striking down a California law that aimed to exclude the indigent of an earlier era, the Supreme Court observed: "in the words of Mr. Justice Cardozo: 'The Constitution was framed under the dominion of a political philosophy less parochial in range. It was framed upon the theory that the ***1129** peoples of the several states must sink or swim together, and that in the long run prosperity and salvation are in union and not division.' [Citation.] [¶] ... [¶] ... [I]n not inconsiderable measure the relief of the needy has become the common responsibility and concern of the whole nation." (*Edwards v. State of California*, *supra*, 314 U.S. at pp. 173-174 [86 L.Ed.2d 124].) The same principle requires us to invalidate the Santa Ana ordinance.

d. *Strict Scrutiny*

Because the ordinance impairs the right to travel of plaintiffs and other homeless persons, it is subject to strict scrutiny. (See *Dunn v. Blumstein*, *supra*, 405 U.S. at pp. 339-342 [31 L.Ed.2d at pp. 282-284]; *Shapiro v. Thompson*, *supra*, 394 U.S. at p. 634 [22 L.Ed.2d at p. 615]; *Serrano v. Priest*, *supra*, 18 Cal.3d at p. 761; *Committee to Defend Reproductive Rights v. Myers* (1981) 29 Cal.3d 252, 276, fn. 22 [172 Cal.Rptr. 866, 625 P.2d 779, 20 A.L.R.4th 1118].) The applicable test, therefore, is whether the ordinance is narrowly tailored to meet a compelling governmental interest. (See *Plyler v. Doe* (1982) 457 U.S. 202, 216-217 [72 L.Ed.2d 786, 798-799, 102 S.Ct. 2382].)

The ordinance does not survive under that standard. As stated above, its true underlying purpose-to drive the homeless out of Santa Ana-is not a legitimate governmental interest. But even the more benign, if euphemistic, purpose expressed on the face of the ordinance fails under strict scrutiny.

The ordinance provides: "The public streets and areas within the City [of Santa Ana] should be readily accessible and available to residents and the public at large. The use of these areas for camping purposes or storage of personal property interferes with the rights of others to use the areas for which they were intended [*sic*]. The purpose of this article is to maintain public streets and areas within the city [of Santa Ana] in a clean and accessible condition." (Ord., § 10-400.)

The interests advanced by the City are, in essence, improving the aesthetic appearance of its public areas and maintaining facilities for general public use. These concerns are legitimate and, indeed, "substantial." (See *Clark v. Community for Creative Non-Violence* (1984) 468 U.S. 288, 296 [82 L.Ed.2d 221, 228-229, 104 S.Ct. 3065] [governmental interest in maintaining park was "substantial"].) But they are certainly not compelling.

Even if the City's asserted purposes were deemed compelling, moreover, the ordinance would nonetheless fail because it is not narrowly tailored to accomplish its objectives. Santa Ana could certainly maintain public areas in ***1130** "a clean and accessible condition" through less restrictive means than citing and arresting homeless persons-under a provision that includes a penalty of six months in jail-for sleeping or storing their personal belongings in public.

As a federal court explained in holding a similar ordinance unconstitutional: "Provision of alternative shelter and services would be the ideal means of accomplishing the same goals. However, in the absence of available shelter space or funds for services, the parks and streets could be cleaned and maintained without arresting the homeless. For example, the City could ask homeless individuals to relocate temporarily to another public area while maintenance crews work on a particular site. It could also establish regular times for each park to be cleaned so that homeless individuals would know not to be in a certain park on a particular day. Instead of arresting homeless individuals for being in the park after hours, the City could allow them to stay in a designated area in exchange for maintaining that area. Similarly, promotion of tourism and business and the development of the downtown area could be accomplished without arresting the homeless for inoffensive conduct." (*Pottinger v. City of Miami, supra*, 810 F.Supp. at p. 1582; see also *Clark v. Community for Creative Non-Violence, supra*, 468 U.S. 288 [ban on sleeping in Lafayette Park, across the street from the White House, was a reasonable time, place, and manner restriction on expression]; *Joyce v. City and County of San Francisco, supra*, 846 F.Supp. 843 [prohibition against sleeping in certain public places at certain times].)

The majority urge that the City has no affirmative constitutional obligation to provide accommodations for the "transient homeless" on or in public property. [FN22] That does not mean, however, that if the City declines to provide shelters for the homeless it may effectively banish them from all public areas. As long as the homeless have no other place where they may legally sleep and store their personal property in Santa Ana, the City cannot constitutionally prevent them from doing so in public places.

FN22 In referring generically to the "transient homeless," the majority overlook the fact that plaintiffs include long-term residents of Santa Ana who have lost their residences and jobs. In any event, as discussed above, the right to travel applies both to homeless residents of the City who wish to remain and to "transient" homeless persons who wish to enter and abide in the City.

The majority cite with approval a recent district court decision denying preliminary injunctive relief against implementation of the Matrix Program, a San Francisco ordinance addressing the "homeless problem." (*Joyce v. City and County of San Francisco, supra*, 846 F.Supp. 843.) Their reliance on *Joyce* is misplaced because the ordinances are crucially dissimilar. ***1131**

Unlike Santa Ana's ordinance, the Matrix Program did not involve a total ban on sleeping or storing property in public areas. Indeed, San Francisco police officers were instructed that " '[t]he mere lying or sleeping on or in a bedroll in and of itself does not constitute a violation' ...." (*Joyce v. City and County of San Francisco, supra*, 846 F.Supp. at p. 861.) Nor did San Francisco attempt to drive the homeless from the city; instead, it provided counseling and referral to local social service programs and attempted to provide temporary housing for the homeless. (*Id.* at pp. 847-848.) [FN23] The history of Santa Ana's efforts in dealing with the homeless, in sharp contrast, included an official policy of actively *discouraging* existing charitable services for the homeless, including the Salvation Army food program, and a task force directed to drive "vagrants" out of town. In enforcing the ordinance, Santa Ana police officers applied an official policy of citing individuals who were sleeping under blankets. [FN24]

FN23 Thus under the Matrix Program social workers were dispersed throughout the city

in order to contact homeless persons and a "Night Shelter Referral Program ... [was] designed to offer the option of shelter accommodations to those homeless individuals in violation of code sections pertaining to lodging, camping in public parks and sleeping in public parks during prohibited hours." (*Joyce v. City and County of San Francisco*, *supra*, 846 F.Supp. at p. 848.) San Francisco also estimated that in 1993-1994 it would spend $46.4 million for services to the homeless, of which over $8 million was specifically earmarked to provide housing. (*Ibid.*)

FN24 The majority also approve *People v. Scott* (1993) 20 Cal.App.4th Supp. 5, 13 [26 Cal.Rptr.2d 179], in which the Appellate Department of the Los Angeles Superior Court upheld a West Hollywood anticamping ordinance against a claim that it violated the right to travel of homeless residents. *Scott* offered no case authority to support its conclusory analysis. In any event it is factually distinguishable: there was no claim that the ordinance prohibited sleeping in any public area in West Hollywood and "no evidence [was] presented in this case to support the inference that West Hollywood has used this ordinance to interfere with a person's right to travel or even that it is being enforced in such a way as to drive homeless people out of its community." (*Ibid.*) Nonetheless, I would disapprove *Scott* to the extent that it could be construed to suggest that an ordinance like Santa Ana's, which *is* intended to "drive homeless people out of its community," does not impair the right to travel.

The City is not required, of course, to open *all* its public spaces at *all* hours to the homeless or to tolerate dangerous or unhealthful conduct. For example, it may enforce existing ordinances against such "camping" behavior as the erection of semipermanent structures, outdoor cooking, and public defecation and urination. It may also enforce existing laws against public drunkenness, drug use, vandalism, assault, theft, and similar misconduct. It may not, however, penalize individuals who have committed only the offense of being without shelter. Sleeping outdoors under a blanket is neither dangerous nor unhealthful to anyone other than the homeless persons who do so as a matter of necessity. Similarly, if the City does not choose to provide storage places for the personal property of the homeless, it may not criminalize their discreet "storage" of personal belongings in public areas. ***1132**

As the Court of Appeal aptly concluded, "The camping ordinance is a butcher knife where a scalpel is required.... The city may preclude the erection of structures in public places and it might ban 'camping' in select locations with a properly drafted ordinance, but it may not preclude people who have no place to go from simply living in Santa Ana. And that is what this ordinance is all about."

For all these reasons I would affirm the judgment of the Court of Appeal. ***1133**

Cal. 1995.
Tobe v. City of Santa Ana
9 Cal.4th 1069, 892 P.2d 1145, 40 Cal.Rptr.2d 402, 63 USLW 2676

END OF DOCUMENT

RENEE J., Petitioner,
v.
THE SUPERIOR COURT OF ORANGE COUNTY, Respondent; ORANGE COUNTY SOCIAL SERVICES AGENCY et al., Real Parties in Interest.

No. S090730.

Supreme Court of California
Aug. 16, 2001.

SUMMARY

In child dependency proceedings, the trial court denied a mother reunification services, relying in part on Welf. & Inst. Code, § 361.5, subd. (b)(10), which states reunification services need not be provided where past efforts at reunification proved unsuccessful after removal of another child from the parent's custody. (Superior Court of Orange County, No. DP002263, Kim Garlin Dunning, Judge.) The Court of Appeal, Fourth Dist., Div. Three, No. G026981, granted the mother's petition for extraordinary relief.

The Supreme Court reversed the judgment of the Court of Appeal. The court held that the Court of Appeal erred in its interpretation of Welf. & Inst. Code, § 361.5, subd. (b)(10), which states that reunification services need not be provided where past efforts at reunification proved unsuccessful after removal of another child, and where parental rights to another child have been severed. A clause at the end of § 361.5, subd. (b)(10) states that reunification services must nonetheless be afforded if the parent has made a "reasonable effort" to treat the problems that led to the other child's removal. Contrary to the Court of Appeal's construction, that clause applies only to the situation where parental ties to another child were severed, and not to the mother's situation, where prior reunification efforts for another child were unsuccessful. Although the statute was ambiguous and the canons of construction were of little assistance, recent legislative trends toward restricting the circumstances in which reunification services must be provided indicate a legislative intent to deny reunification services to a parent who previously has failed at reunification. This interpretation did not violate the mother's procedural or substantive due process rights. (Opinion by Werdegar, J., with George, C. J., Baxter, Chin, and Brown, JJ., concurring. Dissenting opinion by Kennard, J. (see p. 751).)

HEADNOTES

Classified to California Digest of Official Reports

(1a, 1b) Delinquent, Dependent, and Neglected Children § 56--Dependent Children--Denial of Reunification Services--Past Failure to Reunify with Other Child--Application of Exception.

The Court of Appeal erred in granting a mother extraordinary relief from the trial court's order denying her reunification services and in its interpretation of Welf. & Inst. Code, § 361.5, subd. (b)(10), which states that reunification services need not be provided where past efforts at reunification proved unsuccessful after removal of another child, and where parental rights to another child have been severed. A clause at the end of § 361.5, subd. (b)(10) states that reunification services must nonetheless be afforded if the parent has made a "reasonable effort" to treat the problems that led to the other child's removal. Contrary to the Court of Appeal's construction, that clause applies only to the situation where parental ties to another child were severed, and not to the mother's situation, where prior reunification efforts for another child were unsuccessful. Although the statute was ambiguous and the canons of construction were of little assistance, recent legislative trends toward restricting the circumstances in which reunification services must be provided indicate a legislative intent to deny reunification services to a parent who previously has failed at reunification. This interpretation did not violate the mother's procedural or substantive due process rights. (Disapproving *Shawn S. v. Superior Court* (1998) 67 Cal.App.4th 1424 [80 Cal.Rptr.2d 80] and *In re Diamond H.* (2000) 82 Cal.App.4th 1127 [98 Cal.Rptr.2d 715] to the extent they are inconsistent with the court's decision.)

[See 10 Witkin, Summary of Cal. Law (9th ed. 1989) Parent and Child, § 703A; West's Key Number Digest, Infants k. 155.]

(2a, 2b) Statutes § 29--Construction--Language--Legislative Intent.

A fundamental rule of statutory construction is that a court should ascertain the intent of the Legislature so as to effectuate the purpose of the law. In

construing a statute, the first task is to look to the language of the statute itself. When the language is clear and there is no uncertainty as to the legislative intent, courts look no further and simply enforce the statute according to its terms. Additionally, however, courts must consider the statutory language in the context of the entire statute and the statutory scheme of which it is a part. Courts are required to give effect to statutes according to the usual, ordinary import of the language employed in framing them. If possible, significance should be given to every word, phrase, sentence and part of an act in pursuance of the legislative purpose. When used in a statute, words must be construed in context, keeping in mind the nature and obvious purpose of the statute in which they appear. Moreover, the various parts of a statutory enactment must be harmonized by considering the particular clause or section in the context of the statutory framework as a whole. Where a statute is theoretically capable of more than one construction a court must choose that which most comports with the intent of the Legislature. Principles of statutory construction are not rules of independent force, but merely tools to assist courts in discerning legislative intent.

(3) Statutes § 31--Construction--Language--Words and Phrases--Last Antecedent Rule.

A long-standing rule of statutory construction-the last antecedent rule-provides that qualifying words, phrases, and clauses are to be applied to the words or phrases immediately preceding them and are not to be construed as extending to or including others more remote. Exceptions to the rule, however, have been identified. One provides that when several words are followed by a clause that applies as much to the first and other words as to the last, the natural construction of the language demands that the clause be read as applicable to all. Another provides that when the sense of the entire act requires that a qualifying word or phrase apply to several preceding words, its application will not be restricted to the last.

(4) Statutes § 22--Construction--Reasonableness.

Courts must give a statute a reasonable and commonsense interpretation consistent with the apparent purpose and intention of the lawmakers, practical rather than technical in nature, which upon application will result in wise policy rather than mischief or absurdity. Significance, if possible, should be attributed to every word, phrase, sentence, and part of an act in pursuance of the legislative purpose, as the various parts of a statutory enactment must be harmonized by considering the particular clause or section in the context of the statutory framework as a whole. The court should take into account matters such as context, the object in view, the evils to be remedied, the history of the times and of legislation upon the same subject, public policy, and contemporaneous construction.

(5) Delinquent, Dependent, and Neglected Children § 56--Dependent Children--Denial of Reunification Services--Past Failure to Reunify with Other Child--Application of Exception.

As a general rule, reunification services are offered to parents whose children are removed from their custody in an effort to eliminate the conditions leading to loss of custody and facilitate reunification of parent and child. This furthers the goal of preservation of family, whenever possible. Nevertheless, as evidenced by Welf. & Inst. Code, § 361.5, subd. (b), the Legislature recognizes that it may be fruitless to provide reunification services under certain circumstances. Once it is determined that one of the situations outlined in § 361.5, subd. (b) applies, the general rule favoring reunification is replaced by a legislative assumption that offering services would be an unwise use of governmental resources.

(6) Delinquent, Dependent, and Neglected Children § 56--Dependent Children--Reunification Services--Restriction--Past Failure to Reunify with Other Child

The Legislature intended to restrict provision of reunification services in the case of a parent who previously has failed to reunify (Welf. & Inst. Code, § 361.5, subd. (b)(10)). Before this subdivision applies, the parent must have had at least one chance to reunify with a different child through the aid of governmental resources and must have failed to do so. Experience has shown that with certain parents the risk of recidivism is a very real concern. Therefore, when another child of that same parent is adjudged a dependent child, it is not unreasonable to assume that reunification efforts will be unsuccessful. Further, the court may still order reunification services if the court finds, by clear and convincing evidence, that reunification is in the best interests of the child (Welf. & Inst. Code, § 361.5, subd. (c)).

WERDEGAR, J.

This case calls upon us to construe Welfare and Institutions Code section 361.5, [FN1] which governs orders for reunification services in child dependency proceedings. Pursuant to subdivision (a) of that statute, whenever a child is removed from a parent's or guardian's custody, with certain exceptions not applicable here, the juvenile court shall order the social worker to provide services to the child and the child's parent or guardian. Subdivision (b) of the statute, however, provides that reunification services need not be offered when the court finds, by clear and convincing evidence, that any of a number of conditions exists. Subdivision (b)(10) of section 361.5 provides that services may be denied on a finding "[t]hat (A) the court ordered termination of reunification services for any siblings or half-siblings of the child because the parent or guardian failed to reunify with the sibling or half-sibling after the sibling or half-sibling had been removed from that parent or guardian pursuant to Section 361 and that parent or guardian is the same parent or guardian described in subdivision (a), or (B) the parental rights of a parent or guardian over any sibling or half-sibling of the child had been permanently severed, *and that, according to the findings of the court, this parent or guardian has not subsequently made a reasonable effort to treat the problems that led to removal of the sibling or half-sibling of that child from that parent or guardian.*" (Italics added.)

FN1 Unless otherwise specified, all further statutory references are to the Welfare and Institutions Code.

(1a) Mother Renee J. was denied reunification services under subdivision (b)(10) of section 361.5. On the facts of this case, the correctness of that ruling hinges on whether the italicized language in the immediately preceding paragraph applies to both subparts (A) and (B), or only the latter. The Courts of Appeal are divided on the question, and the present Court of Appeal joined the court in *Shawn S. v. Superior Court* (1998) 67 Cal.App.4th 1424 [80 Cal.Rptr.2d 80], holding that the language applies to both subparts. (Accord, *In re Diamond H.* (2000) 82 Cal.App.4th 1127 [98 Cal.Rptr.2d 715]; but see *Marshall M. v. Superior Court* (1999) 75 Cal.App.4th 48 [88 Cal.Rptr.2d 891] (*Marshall M.*) [holding "reasonable effort" language applies only to subpart (B)]; *In re Jasmine C.* (1999) 70 Cal.App.4th 71, 76 [82 Cal.Rptr.2d 493] [same]; *In re Baby Boy H.* (1998) 63 Cal.App.4th 470, 475 [73 Cal.Rptr.2d 793] [same]; see also *Marlene M. v. Superior Court* (2000) 80 Cal.App.4th 1139 [96 Cal.Rptr.2d 104] [implicitly concluding same].) Thus, in the absence of the requisite finding, the court granted Renee J.'s petition for extraordinary relief, ordering the juvenile court to vacate its order denying services and directing a new dispositional hearing be held at which services would be offered. ***740**

We find the statute ambiguous in the relevant respect and the canons of construction of little assistance in resolving the question before us. From recent legislative trends toward restricting the circumstances in which reunification services must be provided, however, we discern a legislative intent to deny reunification services to a parent who previously has failed at reunification. We conclude the Court of Appeal erred in its reading of the statute and therefore reverse.

Facts and Procedure

Sayrah R. was born to Renee J. in October 1998. Several of Renee's older children previously had been the subject of dependency proceedings: Anthony R., born in September 1996, Christopher R., born in September 1995, and Dylan J., born in December 1990, had been declared dependents of the Orange County Juvenile Court under section 300, subdivisions (b) and (j) in November 1996, after Anthony was born with a positive toxicology screen for methamphetamine.

Both Renee J. and Robert R., the father of Anthony, Christopher and Sayrah, had long-standing substance abuse problems and an extensive history of domestic violence. In January 1998, after Renee and Robert had received reunification services in the earlier dependency proceeding for 14 months without completing successfully any of the drug programs, testing regimens, parenting classes, housing procurements, domestic violence programs, or visitation schedules that had been prescribed for them by the trial court, the Orange County Juvenile Court terminated reunification services. Later, the court terminated Renee's and Robert's parental rights to Anthony and Christopher, who were in the process of being adopted. Renee's parental rights to Dylan J. were also terminated, and Dylan was in the process of being adopted by Renee's father and stepmother. [FN2]

FN2 Another sibling, Jesse K., born in July 1993, was living with his father, Brian K.

According to Renee, when she learned she was pregnant with Sayrah, she began to abstain from drugs and thereafter remained abstinent, although she completed no treatment programs. She acknowledged needing help, such as counseling or a program, in the area of substance abuse. Renee obtained prenatal care throughout the pregnancy, and Sayrah was healthy at birth.

From the time Sayrah was two months to four months old, Renee J. lived with Robert R. At that point, however, she stopped living with Robert and ended the relationship because he became emotionally abusive toward her and she feared he would physically abuse her again, as he had in the past. Thereafter, Renee lived with a friend for a short while and then began living ***741** with her friend Leticia Velez, a former schoolteacher. In lieu of rent, Renee provided child care services for Velez's children. Velez told the social worker she had not been very trusting of Renee at first because she had heard Renee had lost custody of her other children, but Velez began to trust her completely after seeing her consistency in disciplining the children. Velez also said she saw no sign of drug use in Renee during the time she lived with her.

In April 1999, Renee was arrested for burglary and forgery. She was convicted of possessing deceptive government identification, possessing a driver's license to commit forgery, receiving stolen property, second degree burglary and two counts of felony possession of bad checks or money orders. Renee was sentenced to 60 days in jail and 36 months' probation. She did not, however, turn herself in to serve her sentence. [FN3]

FN3 Previously, on February 26, 1998, Renee had been sentenced to 30 days in jail for forgery.

At the jurisdictional hearing in this case, Renee acknowledged she had committed the crimes that led to her arrest, explaining she was trying to get money to get herself and Sayrah away from Robert R. She admitted she was aware of the requirement that she turn herself in to serve 60 days, and of the warrant subsequently issued for her arrest. She testified she had planned to turn herself in, but "was trying to get things together to have a secure, safe place for Sayrah to stay."

On January 6, 2000, police officers on patrol recognized Renee as a person with outstanding warrants and arrested her. The officers found Sayrah in an improperly secured car seat. In a diaper bag in the car, police found a wallet, personal checks and credit cards that had previously been reported stolen. Renee's picture with an unknown male subject was found inside the wallet, along with the owner's identification. Renee asserted she had found the wallet and notified the owner, but had not had time to return it to her. Police confirmed that the owner of the wallet had received a call from a "Renee," who said she would bring the wallet to the owner's workplace but had never showed up. Renee was eventually sentenced to 150 days in jail on old warrants and probation violations. No new charges were filed in connection with Renee's possession of the reportedly stolen wallet. No drugs or paraphernalia were found in Renee's car.

When Sayrah was taken into protective custody, she was dirty and her diaper had not been changed for several hours, but she appeared healthy and developmentally normal. Because Renee could not provide the name of a relative to take custody of Sayrah, Sayrah was initially placed in a series of temporary homes. Later, Sayrah was moved to the home of her maternal grandfather and stepgrandmother, who, as noted, were in the process of adopting Sayrah's half brother, Dylan. The juvenile court established juris-

diction over the case on February 23, 2000, after finding Sayrah was a ***742** person described in section 300, subdivisions (b) (failure to protect due to substance abuse), (g) (no provision for support), and (j) (sibling abuse).

At the dispositional hearing on March 14, 2000, the juvenile court found, by clear and convincing evidence, that the reunification services offered to Renee in the cases of Sayrah's two siblings, Anthony and Christopher, and half sibling Dylan had been terminated because both Renee J. and Robert R. had failed to reunify. The juvenile court further found that Renee's parental rights to those children had been terminated and that neither Renee J. nor Robert R. had made a reasonable effort to treat the problems that had led to the removal of Renee's three other children. The court found that, under both subparts (A) and (B) of section 361.5, subdivision (b)(10), reunification services were not appropriate in this case. Although the Orange County Social Services Agency (SSA) specifically eschewed reliance on subdivision (b)(12) of section 361.5, the court nevertheless concluded that subdivision applied, in that Renee had a history of substance abuse. The court further found, by clear and convincing evidence, that the provisions of subdivision (c)(1) and (5) of section 361 applied and that to vest custody of Sayrah with her parents would be detrimental to her. The court then set the matter for a permanency planning hearing pursuant to section 366.26.

Renee petitioned for extraordinary relief pursuant to California Rules of Court, rule 39.1B. The Court of Appeal agreed with her that the juvenile court had erred in resting its decision on subdivision (b)(12) of section 361.5 because SSA had waived reliance on that provision and Renee had relied on the waiver. With respect to section 361.5, subdivision (b)(10), the Court of Appeal likewise found merit in Renee's arguments and, following *Shawn S. v. Superior Court, supra*, 67 Cal.App.4th 1424, read the "reasonable efforts" clause as applicable to both subparts (A) and (B). The Court of Appeal reasoned that abstinence from drugs, regardless of actual completion of a rehabilitation program, would constitute "the most important evidence that a drug problem is being addressed" and concluded that, in the absence of any evidence Renee was still using drugs or had exposed Sayrah to domestic violence, the juvenile court could not simply assume those conditions continued to exist. Having thus rejected both of the juvenile court's stated bases for denying reunification services to Renee, the Court of Appeal granted relief, ordering the juvenile court to vacate its order denying reunification services and setting the matter for a permanency planning hearing, and directing that court instead to hold a new dispositional hearing at which reunification services would be offered.

We granted SSA's petition for review in order to construe section 361.5, subdivision (b)(10). Renee's answer to the petition for review raised, as an ***743** additional issue for our review, the question whether interpreting section 361.5, subdivision (b)(10) to deny her reunification services would deprive her of due process.

Analysis

(2a) " 'A fundamental rule of statutory construction is that a court should ascertain the intent of the Legislature so as to effectuate the purpose of the law. [Citations.] In construing a statute, our first task is to look to the language of the statute itself. [Citation.] When the language is clear and there is no uncertainty as to the legislative intent, we look no further and simply enforce the statute according to its terms. [Citations.] [¶] Additionally, however, we must consider the [statutory language] in the context of the entire statute [citation] and the statutory scheme of which it is a part. "We are required to give effect to statutes 'according to the usual, ordinary import of the language employed in framing them.' [Citations.] " [Citations.] " 'If possible, significance should be given to every word, phrase, sentence and part of an act in pursuance of the legislative purpose.' [Citation.] ... 'When used in a statute [words] must be construed in context, keeping in mind the nature and obvious purpose of the statute where they appear.' [Citations.] Moreover, the various parts of a statutory enactment must be harmonized by considering the particular clause or section in the context of the statutory framework as a whole. [Citations.]" ' " (*Phelps v. Stostad* (1997) 16 Cal.4th 23, 32 [65 Cal.Rptr.2d 360, 939 P.2d 760].)

We are directed to no legislative history expressly answering the question before us and, as a matter of English usage, nothing in section 361.5, subdivision (b)(10) clearly compels one reading over the other. To resolve the ambiguity, the parties cite various principles of statutory interpretation. (3) "A longstanding

rule of statutory construction-the 'last antecedent rule'-provides that 'qualifying words, phrases and clauses are to be applied to the words or phrases immediately preceding and are not to be construed as extending to or including others more remote.' " (*White v. County of Sacramento* (1982) 31 Cal.3d 676, 680 [183 Cal.Rptr. 520, 646 P.2d 191].) Exceptions to the rule, however, have been identified. One provides that when several words are followed by a clause that applies as much to the first and other words as to the last, " ' "the natural construction of the language demands that the clause be read as applicable to all." ' " (*Wholesale T. Dealers v. National etc. Co.* (1938) 11 Cal.2d 634, 659 [82 P.2d 3, 118 A.L.R. 486].) Another provides that when the sense of the entire act requires that a qualifying word or phrase apply to several preceding words, its application will not be restricted to the last. (*White v. County of Sacramento*, ***744** *supra*, at p. 681.) "This is, of course, but another way of stating the fundamental rule that a court is to construe a statute ' "so as to effectuate the purpose of the law." ' (2b) [Citation.] 'Where a statute is theoretically capable of more than one construction [a court must] choose that which most comports with the intent of the Legislature.' [Citation.]" (*Ibid.*, second bracketed insertion in original.) Principles of statutory construction are not rules of independent force, but merely tools to assist courts in discerning legislative intent.

(4) As the court in *Marshall M., supra*, 75 Cal.App.4th at pages 55-56, observed: "We must ... give the provision a reasonable and commonsense interpretation consistent with the apparent purpose and intention of the lawmakers, practical rather than technical in nature, which upon application will result in wise policy rather than mischief or absurdity. [Citation.] Significance, if possible, should be attributed to every word, phrase, sentence and part of an act in pursuance of the legislative purpose, as 'the various parts of a statutory enactment must be harmonized by considering the particular clause or section in the context of the statutory framework as a whole.' [Citation.] ' "The court should take into account matters such as context, the object in view, the evils to be remedied, the history of the times and of legislation upon the same subject, public policy, and contemporaneous construction." ' [Citation.]"

(5) The purpose of section 361.5 was explained in *In re Baby Boy H., supra*, 63 Cal.App.4th at page 478. "As a general rule, reunification services are offered to parents whose children are removed from their custody in an effort to eliminate the conditions leading to loss of custody and facilitate reunification of parent and child. This furthers the goal of preservation of family, whenever possible. [Citation.] Nevertheless, as evidenced by section 361.5, subdivision (b), the Legislature recognizes that it may be fruitless to provide reunification services under certain circumstances. [Citation.] Once it is determined one of the situations outlined in subdivision (b) applies, the general rule favoring reunification is replaced by a legislative assumption that offering services would be an unwise use of governmental resources. [Citation.]"

(6) As pertinent, the *In re Baby Boy H.* court went on to infer that the Legislature intended to restrict provision of reunification services in the case of a parent who previously had failed to reunify. "The exception at issue here, section 361.5, subdivision (b)(10), recognizes the problem of recidivism by the parent despite reunification efforts. Before this subdivision applies, the parent must have had at least one chance to reunify with a different child through the aid of governmental resources and fail to do so. ***745** Experience has shown that with certain parents, as is the case here, the risk of recidivism is a very real concern. Therefore, when another child of that same parent is adjudged a dependent child, it is not unreasonable to assume reunification efforts will be unsuccessful. Further, the court may still order reunification services be provided if the court finds, by clear and convincing evidence, that reunification is in the best interests of the child. (§ 361.5, subd. (c).)" (*In re Baby Boy H., supra*, 63 Cal.App.4th at p. 478.)

(1b) We agree with *In re Baby Boy H.*'s understanding of the legislative purpose in enacting section 361.5, subdivision (b)(10) and with its interpretation of the statute. Renee cites factual differences between that case and this one, but any such differences are irrelevant to the pure question of statutory interpretation confronting us here. At the same time that it enacted subdivision (b)(10), moreover, the Legislature shortened from 12 months to six the period for provision of reunification services in the case of a child who was under age three at the time of removal from the physical custody of the parent. (§ 361.5, subd. (a)(2), added by Stats. 1996, ch. 1083, § 2.7.) One might thus characterize both of these amendments as aimed at expediting the dependency process in order to facili-

tate the placement of minors in stable, permanent homes, particularly in the cases of the youngest children and those least likely to benefit from reunification services. Consistent with this aim, we find it probable that the Legislature did not intend, in the case of a minor whose parent in connection with a prior dependency proceeding has already demonstrated an inability to benefit from services, to impose for denial of services an additional and arguably redundant requirement that the parent has made no reasonable effort to treat the underlying problem.

As the *Marshall M.* Court of Appeal reasoned (*supra*, 75 Cal.App.4th at p. 55), our reading of the statute accords significance to all its parts. Had the Legislature intended to require the finding of no reasonable effort in the case both of the parent whose service plan had been ordered terminated and of the parent whose rights over the child had been severed, there would have been no need to affix separate (A) and (B) labels to the two clauses. (Cf. *Briggs v. Eden Council for Hope & Opportunity* (1999) 19 Cal.4th 1106, 1117 [81 Cal.Rptr.2d 471, 969 P.2d 564] [separately numbered paragraphing as emphasizing grammatical and analytical independence of clauses within Code Civ. Proc., § 425.16, subd. (e)].) Likewise, had the Legislature meant to require the no-reasonable-effort finding in both cases, it might have set forth that requirement as a preface to the two different scenarios. The Legislature, however, did neither.

Moreover, when viewed in the context of the different ways in which a child is removed from his or her parents, the distinction between subparts ***746** (A) and (B) of section 361.5, subdivision (b)(10) is a reasonable one. As the court in *Marshall M., supra*, 75 Cal.App.4th at page 56, observed, "Subparts (A) and (B) ... are similar in that each involve[s] a court's prior removal of another child of the parent ...." But, as the court explained, "there is also a key distinction between the two subparts. This distinction relates to whether the parent has previously failed when given a chance at reunification services." (*Ibid.*) Thus, under subpart (A), "the parent had an opportunity to reunify and failed. Therefore, the court selected a permanent plan for the sibling. In other words, in the case of subdivision (b)(10)(A), the parent did not make a reasonable effort to treat the problems that led to the sibling's removal because that parent necessarily failed to reunify. [¶] Section 361.5, subdivision (b)(10)(B) anticipates a discrete scenario. Subpart (B) requires a termination of rights but does not condition the termination upon a parent's failure to reunify. Indeed, the fact that the parent's rights over any sibling have been permanently severed ... does not inescapably establish that the parent failed to make a reasonable effort to treat the problems that led to the sibling's removal.... [¶] ... [I]n a case described by ... subpart (A), the court knows as a matter of law that the parent did not make reasonable efforts to treat the problems that led to the sibling's removal. The same cannot be said solely because a parent's rights over another child have been permanently severed." [FN4] (*Marshall M.*, *supra*, at pp. 56-57.)

FN4 SSA offers specific examples illuminating the difference between subparts (A) and (B) of Welfare and Institutions Code section 361.5, subdivision (b)(10). Whereas subpart (A) addresses dependent children whose parents have received reunification services, SSA posits, subpart (B) embraces children whose parents may not have received services. SSA observes that parental rights may be terminated outside the dependency system without provision of services, pursuant to the Family Code, by one parent against another in order to free a child from the burden of an absent or ineffective parent's custody rights, or to free a child for adoption. Thus, under Family Code section 7820, a parent or even a third party could bring an action to sever a parent's rights in the case of abandonment (Fam. Code, § 7822), neglect (*id.*, § 7823), the respondent parent's disability due to substance abuse (*id.*, § 7824), the respondent parent's conviction of a felony (*id.*, § 7825), the respondent parent's developmental disability or mental illness (*id.*, § 7826), or the child's being in an out-of-home placement for a one-year period (*id.*, § 7828). Parental rights also would be severed without provision of services in the case of a parent who voluntarily relinquishes his or her child to a public or private adoption agency pursuant to Family Code section 8700. Thus, for example, a mother who, as a young girl, had relinquished a child for adoption due to her inability to support the child and, years later, becomes involved in the dependency system with a subsequent child, might, under Welfare and Institutions

> Code section 361.5, subdivision (b)(10), subpart (B), argue that she had made a reasonable effort to improve her financial circumstances (i.e., she had treated the problem that led to the removal of the first child) and would benefit from reunification services. We agree with SSA that the Legislature reasonably could conclude that under these scenarios reunification services should be provided, in contrast to the case of a parent who previously had failed to reunify despite the provision of services.

As SSA observes, the legislative history of section 361.5, subdivision (b)(10) reveals that subparts (A) and (B) were originally drafted as ***747** separately numbered paragraphs and were only combined in the shaping of the final form of the amendment to section 361.5. (See Legis. Counsel's Dig., Assem. Bill No. 2679 (1995-1996 Reg. Sess.) as amended Feb. 22, 1996; Assem. Com. on Judiciary, Analysis of Assem. Bill No. 2679 (1995-1996 Reg. Sess.) as amended Apr. 18, 1996; Sen. Rules Com., Office of Sen. Floor Analyses, 3d reading analysis of Assem. Bill No. 2679 (1995-1996 Reg. Sess.) as amended Aug. 22, 1996.) Of the two, only the provision that is now subpart (B) ever included the requirement of the no-reasonable-effort finding. Although the significance of this sequence of events is not free from doubt, we find it reasonable to infer that, in combining into one subdivision the two provisions that are now subparts (A) and (B), respectively, the Legislature meant to group together two thematically related scenarios (i.e., two distinct kinds of court-ordered removal of a child from a parent), while still applying different requirements to each.

The parties devote much of their remaining argument to an examination of technical aspects of the wording and punctuation of the statute, matters that we find less significant than its legislative history and evident purpose, as discussed above.

First, Renee argues that because both subpart (A) and subpart (B) of section 361.5, subdivision (b)(10) refer to a "sibling or half-sibling," and the "reasonable effort" clause also refers to a "sibling or half-sibling," the principle in *Wholesale T. Dealers v. National etc. Co., supra*, 11 Cal.2d at page 659, dictates that the latter clause refers to both subparts. Undercutting this argument, however, is the fact that-as Renee acknowledges-both subpart (A) and the "reasonable effort" clause, but not subpart (B), refer to a "removed" sibling. Obviously, the "reasonable effort" clause must apply, at a minimum, to subpart (B). The repetition (or absence) of certain words or phrases within the various parts of section 361.5, subdivision (b)(10), therefore, does not dictate the interpretation Renee urges.

Citing *Board of Trustees v. Judge* (1975) 50 Cal.App.3d 920, 927-928, footnote 4 [123 Cal.Rptr. 830], Renee further argues that the Legislature's use of a comma to separate the "reasonable effort" phrase from the antecedent phrases signifies it intended the phrase to apply to all antecedents rather than only the last. She also observes that the Legislature, after the enactment of section 361.5, subdivision (b)(10) but before its effective date, amended the statute to add that comma (Stats. 1997, ch. 793, § 18), the initial version of the statute not having included it (Stats. 1996, ch. 1083, § 2.7). We agree generally that the presence or absence of commas is a factor to be considered in interpreting a statute (see *Board of Trustees v. Judge*, *supra*, at p. 928, fn. ***748** 4), but find this principle not to be dispositive in the present case. Inasmuch as a comma properly joins the independent clauses of subpart (B) regardless of the existence of subpart (A), the inference that, by so amending the statute, the Legislature meant the "reasonable effort" clause to apply to both subparts arises only weakly, if at all, and the history of the provision, as discussed above, tends to refute it. [FN5]

> FN5 Of somewhat greater force, as a matter of grammatical interpretation, is the fact the "reasonable effort" clause refers to "*this* parent or guardian" (italics added); as SSA observes, the demonstrative pronoun "this" ordinarily is understood to refer to the nearer of two or more things or persons, hence in this context it arguably would relate to the parent or guardian described in subpart (B) of section 361.5, subdivision (b)(10).

Pointing out that courts are to avoid interpretations that render some words surplusage (*Moyer v. Workmen's Comp. Appeals Bd.* (1973) 10 Cal.3d 222, 230 [110 Cal.Rptr. 144, 514 P.2d 1224]), Renee contends SSA's interpretation of section 361.5, subdivision (b)(10) runs afoul of this principle. She reasons that SSA justifies its discrepant treatment of the parent

who previously has failed at reunification with other siblings (i.e., facts triggering the application of subpart (A)), vis-a-vis the parent whose rights over another sibling had been permanently severed (i.e., facts triggering the application of subpart (B)), by equating the parental failure to complete a prior service plan, leading to a court-ordered termination of services (subpart (A)), with the failure to make a reasonable effort to treat the problems that led to the removal of the sibling. But the statute, according to Renee, contemplates that such effort be made "subsequently" to the court order, an impossibility under SSA's reading, inasmuch as the failure to complete the reunification plan necessarily *precedes* the court's order terminating services. Renee's argument, however, commits the fallacy of assuming its conclusion, i.e., only if one accepts the premise that the reasonable effort clause applies to subpart (A) does the referent for "subsequently" become an issue. But even were we to accept that premise, we disagree that the efforts must be made subsequent to the *termination* order. Rather, the statute by its terms refers to efforts subsequently made to treat the problem that led to *removal* of the child from the parents, which removal, in the case of subpart (A) cases, occurs before services are provided or terminated. (See *Marshall M., supra*, 75 Cal.App.4th at p. 57.)

In sum, we interpret the no-reasonable-effort clause as applicable only to subpart (B) of section 361.5, subdivision (b)(10). [FN6] If we have failed to ***749** discern correctly the Legislature's intent in enacting the statute, that body may clarify the statute accordingly. [FN7]

FN6 *Shawn S. v. Superior Court*, *supra*, 67 Cal.App.4th 1424, and *In re Diamond H.*, *supra*, 82 Cal.App.4th 1127, are disapproved to the extent they are inconsistent with our decision in this case.

FN7 California Rules of Court, rule 1456(f)(5), we note, is inconsistent with the interpretation of section 361.5, subdivision (b)(10) endorsed here. As relevant, the rule provides: "Reunification services need not be provided to a mother, statutorily presumed father, or guardian, if the court finds, by clear and convincing evidence, any of the following: [¶] ... [¶] (J) The court: [¶] (i) has terminated reunification services for a sibling or half-sibling of the child because the parent failed to reunify with the sibling or half-sibling, or finds that the parental rights of the parent over any sibling or half-sibling have been terminated; and [¶] (ii) finds that the parent or guardian has not made a reasonable effort to treat the problems that led to the removal of the sibling or half-sibling from that parent or guardian." The rule, as is evident, "does not track the language of section 361.5, subdivision (b)(10)." (*Marshall M., supra*, 75 Cal.App.4th at p. 59.)

Renee contends the interpretation of section 361.5, subdivision (b)(10) that we embrace in this case violates due process. Her argument is twofold: Procedural due process is denied by the statute's failure to place the burden on SSA to demonstrate the parent's unworthiness to receive reunification services, and substantive due process is violated by its exclusive reliance on the parent's problematic history and corresponding failure to require proof of the parent's *current* unfitness. We address each contention in turn.

For her procedural due process claim, Renee relies on *Santosky v. Kramer* (1982) 455 U.S. 745 [102 S.Ct. 1388, 71 L.Ed.2d 599] (*Santosky*), in which the United States Supreme Court held unconstitutional a New York statute permitting termination of parental rights based on a finding of permanent neglect made by a mere preponderance of the evidence. Because of the fundamental nature of the rights at stake and the irreparable harm an erroneous decision to terminate them would cause, as compared with the lesser societal costs of an erroneous decision to postpone their termination, the high court determined that the federal Constitution imposes a heightened standard, that of clear and convincing evidence. (*Santosky*, *supra*, at p. 769 [102 S.Ct. at p. 1403].)

Renee also distinguishes *Cynthia D. v. Superior Court* (1993) 5 Cal.4th 242 [19 Cal.Rptr.2d 698, 851 P.2d 1307] (*Cynthia D.*), in which this court rejected a parent's argument that California's child dependency scheme violates due process by allowing termination of parental rights based on a finding by a mere preponderance of the evidence that return of the child to parental custody would create a substantial risk of detriment to the child. In *Cynthia D.*, we held that, in the context of the entire process for terminating pa-

rental rights under the dependency statutes, the proof requirements at the selection and implementation hearing held pursuant to section 366.26 comport with due process "because the precise and demanding substantive and procedural requirements the petitioning agency must have satisfied before it ***750** can propose termination are carefully calculated to constrain judicial discretion, diminish the risk of erroneous findings of parental inadequacy and detriment to the child, and otherwise protect the legitimate interests of the parents. At this late stage in the process the evidence of detriment is already so clear and convincing that more cannot be required without prejudice to the interests of the adoptable child, with which the state must now align itself." (*Cynthia D.*, *supra*, at p. 256.)

At issue in both *Santosky* and *Cynthia D.* was the quantum of proof required for termination of parental rights, which indisputably are fundamental in nature. (*Santosky*, *supra*, 455 U.S. at pp. 758-759, 769 [102 S.Ct. at pp. 1397-1398, 1403].) Here, in contrast, Renee's parental rights have not been terminated. Renee assumes, but fails to establish, the foundational premise that she possesses a constitutionally protected liberty interest in the state's providing her with reunification services. The Courts of Appeal that have addressed this question have held to the contrary. (*In re Baby Boy H.*, *supra*, 63 Cal.App.4th at p. 475; *In re Christina A.* (1989) 213 Cal.App.3d 1073, 1078-1079 [261 Cal.Rptr. 903].) Although Renee may be understood to argue that reunification services constitute her only opportunity to reunify with Sayrah, and thus that a denial of services is tantamount to a slow termination of her rights, in our view the present state of the record does not enable this court to draw such a conclusion. For example, a petition pursuant to section 388 remains an available mechanism by which to modify the juvenile court's previous orders, given some sufficiently compelling new evidence or change of circumstances.

In any event, as SSA points out, even in the face of a finding under section 361.5, subdivision (b)(10), the juvenile court may still order reunification services if it finds, by clear and convincing evidence, that reunification is in the best interest of the child. (§ 361.5, subd. (c).) Thus, contrary to Renee's and amicus curiae California Public Defenders Association's substantive due process argument, evidence of a parent's current fitness may, in appropriate circumstances, persuade the juvenile court to order reunification services despite his or her problematic history. [FN8]

FN8 Amicus curiae contends the existence of subdivision (c)'s "bailout" provision cannot save section 361.5 from a due process challenge because, unlike the parental rights termination at issue in *Cynthia D.*, *supra*, 5 Cal.4th 242, the determination to withhold reunification services comes near the inception of the dependency case, before the state has borne the burden of repeatedly demonstrating parental unfitness at the various hearings required at specified stages of the proceedings. Our analysis of the *Santosky* factors, however, leads us to clude section 361.5, subdivision (b)(10) is constitutionally valid as we have interpreted it. First, considering the private interest affected (*Santosky*, *supra*, 455 U.S. at p. 759 [102 S.Ct. at pp. 1397-1398]; *Cynthia D.*, *supra*, at p. 254), we observe again that at the stage of the proceedings with which we are concerned, the juvenile court has already found jurisdiction over the child (see § 300), but has not yet reached the point at which a decision to terminate parental rights is to be made. The parent's interest, therefore, while significant, is of a somewhat lesser order than in the decisions on which Renee and amicus curiae rely. Second, the risk of erroneous factfinding (*Santosky*, *supra*, at p. 762 [102 S.Ct. at p. 1399]; *Cynthia D.*, *supra*, at pp. 254-255) is mitigated by the parent's right to counsel (§ 317, subd. (d)) and access to relevant records maintained by state or local public agencies, hospitals, medical or nonmedical practitioners, and child care custodians (§ 317, subd. (f)). Third, the governmental interest supporting the statutory procedure (*Santosky*, *supra*, at p. 766 [102 S.Ct. at pp. 1401-1402]; *Cynthia D.*, *supra*, at pp. 255-256)-"the state's *parens patriae* interest in preserving and promoting the welfare of the child, and the state's fiscal and administrative interest in reducing the cost and burden of such proceedings" (*Cynthia D.*, *supra*, at p. 255)-is substantial.

We are satisfied that, given the weighty interests of the state in assuring the proper care and safety of

children in the dependency system, and those of ***751** the children themselves, this provision sufficiently diminishes the risk of erroneous deprivations of services as to satisfy the requirements of due process. (See *Cynthia D., supra*, 5 Cal.4th at pp. 250-256.)

Disposition

The judgment of the Court of Appeal is reversed.

George, C. J., Baxter, J., Chin, J., and Brown, J., concurred.

KENNARD, J., Dissenting.

When a child is removed from a parent's custody as part of a dependency proceeding (Welf. & Inst. Code, § 300), [FN1] the juvenile court must normally order the social services agency to provide reunification services to the child and the parent. Without such services, a parent whose child has been removed has little hope of ever regaining custody of the child.

FN1 Unless otherwise stated, all statutory references are to the Welfare and Institutions Code.

But reunification services need not be provided in certain instances specified by statute. Subdivision (b)(10) of section 361.5 (section 361.5(b)(10)) describes two such instances: When past efforts at reunification proved unsuccessful after removal of another child, and when parental rights to another child have been severed. A clause at the end of section 361.5(b)(10) states that reunification services must nonetheless be afforded if the parent has made a "reasonable effort" to treat the problems that led to the other child's removal. At issue here is whether this clause (the reasonable effort clause) applies only when parental rights to the other child were severed, or whether it also applies when reunification services were unsuccessfully provided after removal of the other child.

The majority concludes that the reasonable effort clause applies only when parental rights were severed. I disagree. ***752**

I. Facts

Petitioner Renee J. and her boyfriend Robert R. had a long history of drug use and domestic violence. As a result, the Orange County Social Services Agency (SSA) removed their children, Anthony and Christopher, and Renee's daughter Dylan. After reunification services proved unsuccessful, the superior court terminated the parental rights of Renee and Robert as to those three children.

Thereafter Renee and Robert had Sayrah R., the subject of this proceeding, who was born in October 1998. According to Renee, she stopped using drugs when she was pregnant with Sayrah; when Sayrah was four months old, Renee broke up with Robert, taking Sayrah with her. Two months later she was charged and convicted of burglary and forgery. Sentenced to 60 days in jail, she failed to turn herself in to serve her sentence, and a bench warrant was issued for her arrest. When arrested on that warrant in January 2000, she was driving a car. Sayrah was in a child safety seat that lacked the required base and was not properly attached. Renee told police she was a transient, and she could not name a responsible adult who would care for Sayrah during incarceration.

SSA filed a petition asking the superior court to declare Sayrah a dependent child. The petition alleged that Renee's negligence in the matter of the safety seat showed a lack of concern for Sayrah's safety; that Renee was unable to care for Sayrah because of her history of drug abuse, her criminal history, her incarceration on the bench warrant, and her lack of a permanent residence; and that Renee had abused or neglected Sayrah's siblings and there was a substantial risk she would abuse or neglect Sayrah. The superior court found the allegations of the petition true.

At the time of the dispositional hearing, Renee was separated from Robert (who had apparently left the state), and there was no evidence that she had resumed using drugs. SSA argued that under section 361.5(b)(10), it need not provide reunification services to Renee because it had afforded them without success after removal of Renee's other children. The superior court construed section 361.5(b)(10) as entitling Renee to reunification services if she had made a reasonable effort to treat the problems that led to the removal of her other children, but it ruled that she had not made such an effort. It therefore refused to order reunification services.

Renee filed a petition for writ of mandate in the Court of Appeal to challenge the superior court's ruling. The Court of Appeal agreed with the superior

court that Renee was entitled to reunification services if she had ***753** made a reasonable effort to treat her problems, but it held that the superior court had abused its discretion when it ruled that Renee had not made such an effort. We granted review, limited to the question of whether a parent who made a reasonable effort to treat the problems that led to the previous removal of a child or children may obtain reunification services when another child is later removed in a dependency proceeding.

II. The Statutory Scheme

Subdivision (a) of section 361.5 sets forth the general rule that a parent whose child has been removed in a dependency proceeding must be afforded reunification services. Subdivision (b) of that section lists the relatively extreme or unusual circumstances in which reunification services are not required. These circumstances include death of a sibling from abuse or neglect, severe sexual abuse or physical harm, repeated physical or sexual abuse, parental conviction of a violent felony, and willful abduction of the child from placement by the parent.

At issue here are the circumstances described in section 361.5(b)(10). That provision states that reunification services need not be afforded if the superior court finds: "That (A) the court ordered termination of reunification services for any siblings or half-siblings of the child because the parent or guardian failed to reunify with the sibling or half-sibling after the sibling or half-sibling had been removed from that parent or guardian pursuant to Section 361 and that parent or guardian is the same parent or guardian described in subdivision (a), or (B) the parental rights of a parent or guardian over any sibling or half-sibling of the child had been permanently severed*, and that, according to the findings of the court, this parent or guardian has not subsequently made a reasonable effort to treat the problems that led to removal of the sibling or half-sibling of that child from that parent or guardian.*" (Italics added.) The superior court and the Court of Appeal here concluded that the reasonable effort clause, italicized above, applies to both subparts of section 361.5(b)(10). SSA argues that it applies only to subpart (B).

Ordinarily, the removal of a child in the course of dependency proceedings would require reunification services. Thus, subpart (A) of section 361.5(b)(10) applies to *most* parents whose children were removed in dependency proceedings. Subpart (B), however, applies if reunification services for the sibling in a dependency proceeding were denied because of circumstances described in subdivision (b) of section 361.5, which we described earlier. Subpart (B) also applies when parental rights are severed outside of the dependency system. This occurs when a child has been abandoned or ***754** voluntarily relinquished for adoption, or when a third party brings an action to sever parental rights after the parent has been convicted of a felony or is seriously mentally ill. (Fam. Code, § 7800 et seq.)

III. Discussion

At issue here is how to construe section 361.5(b)(10). In performing that task, we are guided by these principles: "The aim of statutory construction is to discern and give effect to the legislative intent. (*Phelps v. Stostad* (1997) 16 Cal.4th 23, 32 [65 Cal.Rptr.2d 360, 939 P.2d 760].) The first step is to examine the statute's words because they are generally the most reliable indicator of legislative intent." (*Summers v. Newman* (1999) 20 Cal.4th 1021, 1026 [86 Cal.Rptr.2d 303, 978 P.2d 1225].) I therefore begin with the language of section 361.5(b)(10).

The majority insists that, "as a matter of English usage," nothing in the words of section 361.5(b)(10) indicates whether the Legislature intended the section's reasonable effort clause to apply only to subpart (B) of that section, or to subparts (A) *and* (B). (Maj. opn., *ante*, at p. 743.) I disagree. As I shall explain, when the words of section 361.5(b)(10) are given their "usual and ordinary meaning" (*DaFonte v. Up-Right, Inc.* (1992) 2 Cal.4th 593, 601 [7 Cal.Rptr.2d 238, 828 P.2d 140]), the reasonable effort clause at issue here logically applies to both subparts of that section.

Section 361.5(b)(10), as discussed earlier, does not require reunification services if the superior court finds: "*That* (A) the court ordered termination of reunification services for any siblings or half-siblings of the child because the parent ... failed to reunify ... after the sibling or half-sibling had been removed ... or (B) the parental rights of a parent ... over any sibling or half-sibling of the child had been permanently severed*, and that,* according to the findings of the court, this parent ... has not subsequently made a reasonable effort to treat the problems that led to removal of the sibling or half-sibling of that child from that parent

...." (Italics added.) As a matter of syntax, the second italicized "that" in that passage, which prefaces the reasonable effort clause, logically pairs with the first italicized "that" at the beginning of the section. Therefore, the reasonable effort clause after the second "that" necessarily applies to the entire section, not merely to subpart (B). Had the Legislature intended the reasonable effort clause to apply only to subpart (B), it could easily have omitted the second italicized "that."

Furthermore, in the reasonable effort clause the Legislature uses the phrase "the problems that led to *removal* ..." (italics added), which suggests that the clause applies to both subparts (A) and (B). As previously ***755** explained (see pt. II, *ante*), some parents fall under the provisions of subpart (B) (termination of parental rights to a sibling of the child without reunification services) not because the sibling was *removed*, but because the parents abandoned the sibling or voluntarily gave the sibling up for adoption. If anything, the word "removal" appears to refer to subpart (A), which uses the word "removed." Had the Legislature intended the reasonable effort clause to refer only to subpart (B), it would most likely have said "the problems that led to *termination of parental rights*," rather than "the problems that led to *removal*," as currently stated in the statute.

Aside from the statutory language, an examination of the policy concerns underlying the Legislature's decision to include the reasonable effort clause in section 361.5(b)(10) shows that it intended the clause to apply to both subparts of that provision. The purpose of the clause is to give a parent who has made a reasonable effort to deal with the problems that led to removal of one child a chance at reunification when a second child is removed. For example, if one child is removed because the parent is addicted to drugs, and the parent later gives up drugs but another child is thereafter removed because the parent has an abusive partner, the parent should, in the Legislature's view, be given a chance to reunify with the second removed child.

This policy applies equally to parents in subpart (A) (parents for whom previous reunification services were unsuccessful) as it does to parents in subpart (B) (parents whose parental rights were severed). As I have explained (see pt. II, *ante*), included in subpart (B) are parents who never received reunification services before losing custody of a child in an earlier proceeding because their treatment of that child was so bad that it fell within one of the statutorily described circumstances in which the court could deny reunification services. (See § 361.5, subd. (b).) I can think of no reason why the Legislature would have chosen to give such parents a chance at reunification when a second child became a dependent of the juvenile court, while denying that opportunity to parents who were unsuccessful in reunifying with a previously removed child. Yet that is the effect of the majority's holding today.

One more point. This court generally construes laws in a manner that avoids doubts about their constitutionality. (See, e.g., *People v. Superior Court (Romero)* (1996) 13 Cal.4th 497, 509 [53 Cal.Rptr.2d 789, 917 P.2d 628].) This rule also applies when one of two possible constructions of a statute raises doubts about the constitutionality of another part of the statutory scheme. That is the case here. The majority's construction of the reasonable effort clause raises doubts about the constitutionality of another part of the Legislature's statutory scheme for the severance of parental rights to dependent children, as I explain below. ***756**

Under California's statutory scheme, parental rights may be permanently severed when a superior court finds by a *preponderance of the evidence* that returning the child to the parent's custody would create a substantial risk of detriment to the child. (See §§ 366.21, subd. (e), 366.22, subd. (a), 366.26, subd. (c)(1).) In *Cynthia D. v. Superior Court* (1993) 5 Cal.4th 242 [19 Cal.Rptr.2d 698, 851 P.2d 1307], a majority of this court rejected a due process challenge to that standard. As part of the basis for its decision, the majority noted that before a final determination by the superior court whether to sever a parental relationship, "there have been a *series of hearings involving ongoing reunification efforts* and, at each hearing, there was a statutory presumption that the child should be returned to the custody of the parent." (*Id.* at p. 253, italics added.) I dissented in *Cynthia D.*, reasoning that "the basic requirements of procedural due process do not allow the state to terminate parental rights in such a proceeding without clear and convincing evidence of a substantial risk of detriment to the child." (*Id.* at p. 257 (dis. opn. of Kennard, J.).)

Under the majority's decision today, a parent who, after failing to reunify with one removed child, makes a reasonable effort to treat the problems that caused that child's removal but then suffers the removal of a second child, may not, as to the second child, receive the "series of hearings involving ongoing reunification efforts" that the majority in *Cynthia D. v. Superior Court*, *supra*, 5 Cal.4th at page 253, relied on in upholding the constitutionality of the "preponderance of evidence" standard established by the statutory scheme. Thus, the majority's holding here weakens the underpinnings of *Cynthia D.*, and it raises doubts about the constitutionality of the preponderance of evidence standard that the *Cynthia D.* majority upheld. To avoid those constitutional issues, I would construe the reasonable effort clause broadly, applying it to all parents in section 361.5(b)(10).

Here, the Court of Appeal agreed with the superior court that the reasonable effort clause applied to Renee, but it disagreed with the superior court's finding that she was not entitled to reunification services with Sayrah because she had not made a reasonable effort to treat the problems that had led to the removal of her other children. Were the issue properly before this court, I might well find that the evidence supports the superior court's ruling that Renee did not make a reasonable effort to deal with her problems. But that issue is not before us. In its petition for review, SSA did not challenge the Court of Appeal's conclusion that Renee had made reasonable efforts to treat her problems; instead, it asserted that the reasonable effort clause was inapplicable. Therefore, I would affirm the judgment of the Court of Appeal, ***757** which applied the reasonable effort clause in reversing the superior court's ruling that Renee was not entitled to reunification services with reference to Sayrah. ***758**

EARL W. PORTER, Plaintiff and Respondent,
v.
CITY OF RIVERSIDE et al., Defendants and Appellants.

Civ. No. 8676.

Court of Appeal, Fourth District, Division 2, California.
May 6, 1968.

HEADNOTES

(1) Municipal Corporations § 232(6)--Ordinances--Validity--Harmony With Charter Provisions.

An ordinance stands in the same relationship to a city charter as a statute does to the Constitution of the state; thus, charter provisions constitute the organic law or local constitution of the city and the same presumptions that favor the constitutionality of state legislative enactments apply also to ordinances.

(2) Municipal Corporations § 242--Ordinances--Validity--Presumptions.

Every presumption is in favor of the constitutionality of an ordinance and the invalidity of such legislative act must be clear before it can be declared unconstitutional.

See **Cal.Jur.2d,** Municipal Corporations, § 416; **Am.Jur.,** Municipal Corporations (1st ed §§ 178, 179).

(3) Municipal Corporations § 234--Ordinances--Validity--Province of Courts.

The legislative action of a city council will be upheld by the courts unless beyond its powers, or unless its judgment or discretion is being fraudulently or corruptly exercised.

(4) Municipal Corporations § 242--Ordinances--Validity--Presumptions.

When the right to enact a law or ordinance depends on the existence of a fact, the passage of the act implies, and the conclusive presumption is, that the legislative body performed its duty and ascertained the existence of the fact before enacting and approving the law, a decision which the courts have no right to question or review.

(5) Municipal Corporations § 234, 242--Ordinances--Validity--Province of CourtsPresumptions.

Not only must a legislative act of a city be reviewed by a court in the light of every presumption favorable to its constitutionality, but the court must limit itself to a consideration of such matters as appear on the face of the enactment together with those facts which are matters of judicial cognizance.

(6) Municipal Corporations § 234--Ordinances--Validity--Province of Courts.

Where a statute or ordinance is valid on its face, and there are no other considerations of which the court can take judicial notice tending to establish unconstitutionality, the court will not go behind the statute or ordinance and receive evidence *aliunde* to establish facts that would tend to impeach and overturn the law.

(7a, 7b) Municipal Corporations § 232(6)--Ordinances--Validity--Harmony With Charter Provisions.

In an action to restrain a city from paying a fixed monthly expense allowance to each city councilman without presentation of a claim therefor, the trial court erred in determining that the ordinance authorizing such payment was invalid on the ground that the allowance was in excess of actual expenses and therefore included compensation for services, where the city charter provided that councilmen should be paid no salary but should receive, in addition to council-authorized travel expenses and other expenses when on official duty, an amount to be fixed by ordinance as reimbursement for other out of pocket expenditures and costs imposed on them in serving as councilmen, where the charter was silent as to presentation of claims for such allowance, where, in passing the ordinance, the council found that the councilmen's out of pocket expenditures and costs were and would continue to be at least equal to the sum fixed, and where such legislative finding was entirely reasonable and possible.

(8) Municipal Corporations § 234--Ordinances--Validity--Province of Courts.

261 Cal.App.2d 832, 68 Cal.Rptr. 313
(Cite as: 261 Cal.App.2d 832)

In an action to restrain a city from paying a fixed monthly expense allowance to city councilmen, the trial court exceeded its powers and also went beyond the issues generated by the complaint in admitting evidence *aliunde* for the purpose of contravening the express finding of the city council that each councilman's monthly out of pocket expenditures and costs did and would continue to exceed the amount fixed, where the court, if it did not regard such finding as creating a conclusive presumption of the validity of the enactment, should have confined its review to a consideration of those facts which appeared on the face of the ordinance, together with those facts within its judicial knowledge.

See **Cal.Jur.2d,** Municipal Corporations, § 406; **Am.Jur.,** Municipal Corporations (1st ed § 183).

SUMMARY

APPEAL from a judgment of the Superior Court of Riverside County. Russell S. Waite, Judge. Reversed.

Action by a taxpayer to restrain the City of Riverside from paying an expense allowance to city councilmen. Judgment for plaintiff reversed.

COUNSEL

John Woodhead, City Attorney, O'Melveny & Myers, and Howard J. Deards for Defendants and Appellants.

Henry W. Coil, Sr., as Amicus Curiae on behalf of Defendants and Appellants. ***834**

Thompson & Colegate and Michael R. Raftery for Plaintiff and Respondent.

KERRIGAN, Acting P. J.

The Charter of the City of Riverside was prepared by a Board of Freeholders, adopted by the electors, approved by the Legislature, and became effective in April 1953. The charter provision relating to councilmen's expenses reads as follows:

"Sec. 402. Compensation; reimbursement for expenses. The members of the city council shall receive *no compensation* for their services *as such,* but shall receive reimbursement on order of the city council for council-authorized traveling and other expenses when on official duty. *In addition, each member shall receive such amount as may be fixed by ordinance, which amount shall be deemed to be reimbursement of other out-of- pocket expenditures and costs imposed upon him in serving as a city councilman."* [Italics supplied.]

In May 1953, the council held its inaugural meeting and adopted an ordinance fixing each councilman's expense allowance in the sum of $200 per month. Thereafter, in July 1955, the council adopted Ordinance No. 2226, which increased the councilmen's expense allowance to $250 monthly. Ten years later, in August 1965, the council passed Ordinance No. 3300, which recited that the councilmen's original expense allowance was $200; that it was thereafter increased to $250 monthly; that inflation and greater demands on councilmen had resulted in an increase in out-of-pocket expenses; that the sum of $350 per month represented reasonable costs expenditures incurred by councilmen; that the expense allowance be increased to $350 monthly; and that the $350 "be paid monthly without presentation of any claim."

In September 1965 the plaintiff filed this acton, and the allegations of the complaint may be briefly summarized in the following manner: that Ordinance No. 3300 requires the payment to each councilman of $350 monthly "as purported reimbursement of out-of-pocket expenses without presentation of any claim, voucher, proof of payment or proof of authorization of such expenses by the council"; that such payment "as reimbursement for out-of-pocket expenses not shown to be expended, is, in fact, payment of compensation, as prohibited by the Riverside City Charter"; that such payment "will increase the burden of taxation in an unlawful manner, to wit, the payment of compensation to each City Councilman in direct violation of the Charter provisions of the City of Riverside." ***835** No allegations were contained in the complaint attacking the council's finding that the amount of out-of-pocket expenditures were at least $350 as being so unreasonable as to constitute arbitrary action or constructive fraud. Nor was there an allegation that the council acted in bad faith with improper motives in that $350 per month was in excess of actual expenses. Thus, the attack on the ordinance was based on the premise that section 402 of the charter was violated in the event the $350 additional allowance authorized by Ordinance No. 3300 was paid without requiring the presentation of itemized claims and vouchers showing actual expenditures. The complaint prayed that the city be restrained from paying

the $350 per month to the councilmen "as reimbursement of out-of-pocket expenses, without requiring proof of the nature of said ... expenses, the amount thereof, and that they are actually incurred. ..."

Defendants filed a general and special demurrer to the complaint. The demurrer was overruled and defendants answered.

During trial, the court permitted the introduction of evidence at plaintiff's counsel's request as to the actual monthly expenses incurred by members of the city council. The seven councilmen's expenses ranged from $150 to $555. From the evidence thus presented, the trial court determined that the $350 allowance fixed in Ordinance No. 3300 was "in excess of the actual and allowable out-of-pocket expenses and costs ..." incurred "and does ... include compensation for services rendered by the City Councilmen. ..." Judgment was therefore rendered in favor of the plaintiff wherein its was decreed: (1) Riverside City Ordinance No. 3300 was invalid in its entirety as violative of section 402 of the Riverside City Charter; (2) Ordinance No. 2226 [the prior ordinance authorizing $250 per month allowance] was valid and binding; and (3) defendants be restrained from paying the members of the City Council $350 per month pursuant to Ordinance No. 3300, "but that said injunction shall not, and does not, restrain or enjoin defendants from paying to the members of said City Council the sums provided by said Ordinance No. 2226 or any other sum provided to be paid by any subsequent amendment of said Ordinance No. 2226 or any subsequent ordinance of the City of Riverside. ..."

Defendants' assault on the judgment is stated in varying forms, which may be categorized in the following manner: (1) The complaint fails to state a cause of action; (2) the findings ***836** went beyond the issues framed by the pleadings; (3) the trial court erred in permitting the introduction of evidence relating to the councilmen's actual expenses; (4) insufficiency of the evidence to support the findings; and (5) the action is barred by reason of plaintiff's laches, unclean hands, and political motives.

Stated simply, the sole, crucial issue on appeal is whether Ordinance No. 3300 is valid under section 402 of the charter.

(1) An ordinance stands in the same relationship to a city charter as does a statute to the constitution of the state. Thus, charter provisions constitute the organic law or local constitution of the city. (*In re Pfahler,* 150 Cal. 71, 82 [88 P. 270, 11 Ann.Cas. 911, 11 L.R.A. N.S. 1092]; *Dalton v. Lelande,* 22 Cal.App. 481, 487 [135 P. 54].) The same presumptions that favor the constitutionality of state legislative enactments apply also to ordinances. (11 Cal.Jur.2d, Const. Law, § 74, pp. 407-408.) (2) Every presumption is in favor of constitutionality and the invalidity of a legislative act must be clear before it can be declared unconstitutional. (35 Cal.Jur.2d, Municipal Corporations, § 416, p. 223.) (3) The action of the Legislature will be upheld by the courts unless beyond its powers, "or its judgment or discretion is being fraudulently or corruptly exercised." (*Nickerson v. County of San Bernardino,* 179 Cal. 518, 522-523 [177 P. 465]; *Wine v. Boyar,* 220 Cal.App.2d 375, 381-382 [33 Cal.Rptr. 787].)

(4) When the right to enact a law depends upon the existence of a fact, the passage of the act implies, and the conclusive presumption is, that the Legislature performed its duty and ascertained the existence of the fact before enacting and approving the law-a decision which the courts have no right to question or review. (*Robins v. County of Los Angeles,* 248 Cal.App.2d 1, 6 [56 Cal.Rptr. 853]; *Taylor v. Cole,* 201 Cal. 327, 336-337 [257 P. 40]; *Smith v. Mathews,* 155 Cal. 752, 756 [103 P. 199].) (5) Not only must the legislative act be reviewed in the light of every presumption favorable to its constitutionality, but the court must limit itself to a consideration of such matters as appear on the face of the enactment (*Alameda etc. Water Dist. v. Stanley,* 121 Cal.App.2d 308, 315 [263 P.2d 632]; *People v. Sacramento Drainage Dist.,* 155 Cal. 373, 386 [103 P. 207]), together with those facts which are matters of judicial cognizance. (*Los Angeles County Flood Control Dist. v. Hamilton,* 177 Cal. 119, 125 [169 P. 1028]; *City of Ojai v. Chaffee,* 60 Cal.App.2d 54, 61 [140 P.2d 116]; *Whitcomb v. Emerson,* 46 Cal.App.2d 263, 276 [***837**115 P.2d 892].) (6) Stated in basic terms, where a statute is valid on its face, and there are no other considerations of which the court can take judicial notice tending to establish unconstitutionality, the courts will not go behind the statute or ordinance and receive evidence *aliunde* to establish facts that would tend to impeach and overturn the law. (*Taylor v. Cole, supra,* p. 337; *Stevenson v. Colgan,* 91 Cal. 649, 652 [27 P. 1089, 25 Am.St.Rep. 230, 14 L.R.A. 459].)

(7a) Whether we view the presumption in support of the validity of enactments as a conclusive presumption which the courts have no right to question or review (*Robins v. County of Los Angeles, supra,* 248 Cal.App.2d 1, 6; *Smith v. Mathews, supra,* 155 Cal. 752, 756), or follow the more limited rules to the effect that the enactment is presumed to be constitutional and must be deemed to have been enacted on the basis of any state of facts supporting it that "reasonably can be conceived" (*Higgins v. City of Santa Monica,* 62 Cal.2d 24, 30 [41 Cal.Rptr. 9, 396 P.2d 41]), or "reasonably could be assumed" (*Redevelopment Agency v. Hayes,* 122 Cal.App.2d 777, 806 [266 P.2d 105]), or are "possible" (*Galeener v. Honeycutt,* 173 Cal. 100, 103-104 [159 P. 595]), it inevitably follows that the trial court's determination holding the expense allowance invalid was erroneous.

Section 1 of Ordinance No. 3300 provides that each councilman's out-of- pocket expenditures and costs are "and will continue to be at least $350 per month."

(8) The foregoing finding by the council may be regarded as giving rise to a conclusive presumption sustaining the validity of the enactment (see *Robins v. County of Los Angeles, supra,* 248 Cal.App.2d 1, 6). However in the event the trial court determined that it was acting within its prereogative in questioning the council's determination that $350 monthly was required as an expense allowance, its review should have been confined to a consideration of those facts which appeared on the face of the ordinance, together with those facts within its judicial knowledge. (*Alameda etc. Water Dist. v. Stanley, supra,* 121 Cal.App.2d 308, 315; *Los Angeles County Flood Control Dist. v. Hamilton, supra,* 177 Cal. 119, 125.) Succinctly stated, it was certainly reasonable and possible that the councilmen's expenditures and costs amounted to $350 monthly, and inasmuch as the city's legislative body made such a determination, the court exceeded its powers in admitting evidence *aliunde* for the purposes of contravening such finding. ***838**

Galeener v. Honeycutt, supra, 173 Cal. 100, is a case involving a change of compensation; plaintiff was elected to the officer of supervisor of Madera County at a time when the statute fixing the compensation of supervisors provided that the compensation was $1,200 per year and 25c per mile for all distances traveled by the supervisors in the discharge of their duties as road commissioners, which mileage allowance was not to exceed $600 annually; a subsequent 1915 act changed the compensation to $1,800 per year for services as board members and as road commissioners; the act "found" that the change did not work an increase in compensation and declared that it was intended that it apply to the present incumbents; the enactment was attacked on the ground that it was violative of section 9 of article XI [since repealed] of the California Constitution, which prohibited the increase of compensation to incumbents during their term of office; the Supreme Court held that the Madera County statute was constitutional and explicitly stated: "There is absolutely nothing on the face of the law to show that each supervisor of Madera County is not actually required to travel two thousand four hundred miles per year in the discharge of his duties as road commissioner, and that such was the condition in both the years 1914 and 1915. If such a condition was possible, we must assume in favor of the legislative enactment that it existed, for, as was said ... in *Smith v. Mathews,* 155 Cal. 752, 756 [103 P. 199, 201], the doctrine of *Stevenson v. Colgan,* 91 Cal. 649 [27 P. 1089, 25 Am.St.Rep. 230, 14 L.R.A. 459] ... is that 'when the right to enact a law depends upon the existence of a fact, the passage of the act implies, and the conclusive presumption is, that the Governor and the Legislature have performed their duty and ascertained the existence of the fact before enacting and approving the law. ...' "

The trial court's finding that the councilmen's "actual" out-of-pocket expenses were less than $350 monthly went beyond the issues generated in the complaint, was based upon inadmissible evidence, and was therefore void. (*Simmons v. Simmons,* 166 Cal. 438, 441 [137 P. 20].)

(7b) Finally, under any reasonable interpretation of section 402 of the charter, it manifestly appears that while a councilman is not entitled to receive compensation "as such," he is expressly entitled to receive reimbursement on "order of the City Council for council-authorized travel and other expenses when on official duty." Furthermore, he is ***839** entitled to an additional allowance unconnected with travel and other official-duty expenses by reason of the following proviso: "In addition, each member shall receive such amount as may be fixed by ordinance, which amount shall be deemed to be reimbursement of other

out-of-pocket expenditures and costs imposed upon him in serving as a city councilman." Consequently, by the express provisions of the charter, each councilman is entitled to receive a sum fixed by ordinance as an additional expense allowance. Moreover, councilmen are not required to submit itemized claims or vouchers showing actual expenditures under the last-quoted section of the charter. While the charter precludes a councilman from receiving a salary for his governmental services, and while it has been judicially determined that when a city charter is silent on the subject of compensation of members of the council, an ordinance authorizing the payment of a salary to councilmen is invalid as being violative of the charter (*Woods v. Potter,* 8 Cal.App. 41, 45 [95 P. 1125]), the Riverside Charter unequivocally sanctions the payment of the expense allowance involved in the case under review.

The judgment is reversed.

END OF DOCUMENT

JEROME C. CORNELL, Appellant,
v.
GEORGE R. REILLY et al., as Members of STATE BOARD OF EQUALIZATION, Respondents.

Civ. No. 16165.

District Court of Appeal, First District, Division 1, California.
Aug. 18, 1954.

HEADNOTES

(1a, 1b) Intoxicating Liquors § 82--Offenses--Evidence.
Finding that liquor licensee hired girls to solicit sales of alcoholic beverages, in violation of Pen. Code, § 303, is sustained by evidence that, among other things, when customer entered barroom a female employee asked him to buy her a drink and that bartender kept record of her drinks.

(2) Administrative Law § 6--Administrative Proceedings--Nature of Proceedings.
Although in disciplinary administrative proceedings burden of proof is on party asserting affirmative and guilt must be established to reasonable certainty and not based on surmise, conjecture, suspicion, theoretical conclusions or uncorroborated hearsay, the proceedings are not criminal in nature and not governed by law applicable to criminal cases.
See **Cal.Jur.2d,** Administrative Law and Procedure, §§ 86, 87; **Am.Jur.,** Public Administrative Law, § 107.

(3) Licenses § 55--Revocation--Proceedings--Purpose.
Administrative proceedings aimed at revoking license are not conducted for primary purpose of punishing an individual but to keep regulated business clean and wholesome and to protect public by determining whether licensee exercised his privilege in derogation of public interest.

(4) Intoxicating Liquors § 9.9--Licenses--Revocation.
Standards to be applied in proceeding for revocation of liquor license are not those applicable to criminal trials, the proceeding being a disciplinary function of Board of Equalization.
See **Cal.Jur.2d,** Alcoholic Beverages, § 33 et seq.

(5) Intoxicating Liquors § 9.9--Licenses--Revocation.
Board of Equalization need not define by law or rule all of things that will put liquor license in jeopardy. (Const. art. XX, § 22.)

(6) Intoxicating Liquors § 9.9--Licenses--Revocation.
Board of Equalization can revoke liquor license irrespective of violation of specific Penal Code section, if evidence shows situation contrary to public welfare or morals.

(7) Criminal Law § 369--Evidence--Intent.
Intent may be proved by circumstantial evidence. (Pen. Code, § 21.)

(8) Intoxicating Liquors § 9.9--Licenses--Revocation.
The asserted fact that liquor licensee had no specific intent to violate Pen. Code, § 303, would not prevent revocation of license because of acts of bartender-manager in hiring female employees to solicit drinks, since licensee who elects to operate business through employee is responsible to licensing authority for employee's conduct in exercise of license.

(9) Criminal Law § 1018--Judgment--Conclusiveness.
Acquittal of liquor licensee's bartender-manager of criminal charge of violation of Pen. Code, § 303, is not res judicata in proceedings before Board of Equalization aimed at revoking license.

SUMMARY

APPEAL from a judgment of the Superior Court of the City and County of San Francisco. Herbert C. Kaufman, Judge. Affirmed.

Proceeding in mandamus to review validity of order of State Board of Equalization revoking a liquor license. Judgment denying writ, affirmed.

COUNSEL

Donovan, Stuhr & Martin and Charles Stuhr for Appellant.

Edmund G. Brown, Attorney General, and William M.

Bennett, Deputy Attorney General, for Respondents.

PETERS, P. J.

The State Board of Equalization, after hearings before a hearing officer and the board, found that Jerome Cornell, the owner of an on-sale general liquor license and the operator of a restaurant-bar in San Francisco, had employed two girls to encourage customers to buy them drinks in violation of the law. Because of such violation, Cornell's liquor license was ordered revoked. Cornell, under the provisions of section 1094.5 of the Code of Civil Procedure, applied to the superior court for a writ of mandate to review the ***180** validity of the revocation order. That court found that the findings of the board were supported "by substantial evidence and by the weight of the evidence," that the findings constituted good cause for revocation, and denied the petition for a writ of mandate. Cornell appeals from the judgment based on those findings.

The accusation before the board contained two counts. The first charged Cornell with employing, on certain dates, two named girls for the purpose of procuring or encouraging the purchase or sale of alcoholic beverages, and with paying these girls a commission for such services. The second count is not here involved. [FN1] The first count charges, without mentioning, the commission of acts declared unlawful by section 303 of the Penal Code. That section makes it a misdemeanor for a liquor seller "to employ upon the premises where the alcoholic beverages are sold any person for the purpose of procuring or encouraging the purchase or sale of such beverages, or to pay any person a percentage or commission on the sale of such beverages for procuring or encouraging such purchase or sale." Section 24200 of the Business and Professions Code [FN2] provides that it is grounds for the suspension or revocation of a license "(a) When the continuance of a license would be contrary to public welfare or morals ... (b) ... the violation or the causing or the permitting of a violation by a licensee of ... any rules of the board ... or any other penal provisions of law of this State prohibiting or regulating the sale ... of alcoholic beverages. ..."

FN1 This second count charged Cornell with possession on the licensed premises on a certain date of 11 empty distilled spirits bottles, which, under the law, should have been destroyed. Cornell was found to have violated the law in this respect, and his license was suspended for 15 days for such violation. The validity of that suspension is not challenged in these mandate proceedings.

FN2 This section was added to the Business and Professions Code in 1953. Before that, its provisions, in substance, were to be found in 2 Deering's General Laws, Act No. 3796, section 40.

A hearing on the accusation was had, as provided by law, before a hearing officer, whose proposed decision, findings and conclusions, recommending revocation, were adopted by the board. Thereafter, Cornell, under the provisions of section 11521 of the Government Code, petitioned for a reconsideration, which was granted, and a second hearing was then had before the board. The board reaffirmed its original decision. It found that Cornell, on the dates in question, did employ the two girls named in the accusation "for the purpose of procuring ***181** or encouraging the purchase or sale of alcoholic beverages," in violation of section 303 of the Penal Code, but that it was not true that Cornell paid the girls a percentage or commission for procuring or encouraging such purchases or sales in violation of that section. Revocation of Cornell's license was ordered. The superior court, in the mandate proceedings, found these findings were supported and refused to grant the writ.

(1a) The basic facts as presented to the hearing officer and to the board, and as accepted by the board and the reviewing court, are not in serious dispute. Cornell, the owner of the bar and liquor license, was not present on the premises during the times the alleged offenses occurred, nor did he testify at the hearing before the hearing officer. During all times here relevant Cornell had delegated the operation of the bar to William Andrews, the bartender-manager. Just before midnight on March 24, 1953, several liquor control officers entered the bar. One of them, by the name of Wright, testified that he sat at the bar; that a woman, who later identified herself as Dottie Shannon, one of the entertainers, sat down beside him; that after some conversation he ordered a drink for himself and she asked "Am I in?"; that he replied that she was, whereupon the bartender Andrews, without further orders, served her a "champagne cocktail" taken from a Champale [FN3] bottle; that the bartender charged him eighty- five cents for the highball ordered

by him, and $1.50 for the cocktail served to the girl; that during the next hour he and Miss Shannon had three drinks each; that on each occasion he was charged $2.35 for the two drinks; that after the serving of the drinks the bartender made a notation on a pad lying beside the cash register.

> FN3 Champale is a malt beverage of low alcoholic content and much cheaper than champagne. It costs but 40 cents a bottle. The drinks here involved were 2 or 3 ounces each.

Officer Wright returned to the bar at about 10:50 p. m. on the night of March 27, 1953. He testified that on that occasion he observed Andrews serving drinks to Dottie Shannon and another identified liquor officer, and that each time a drink was served to the girl a notation was made by the bartender on the pad. Wright testified that he observed that the type of drink, price and procedure of notation were identical to his own prior experienced solicitation. Two other officers testified that on these occasions they had substantially similar ***182** experiences with Miss Shannon or Miss Lee, another entertainer. They corroborated Wright in all substantial respects.

The officers decided to and did make the arrest in the early morning hours of March 28, 1953. They confiscated the remainder of one of the girl's drinks, which, upon analysis, was discovered to have an alcoholic content of 5.1 per cent. They also confiscated the pad upon which the notations had been made, and 11 empty, but unbroken, distilled spirits bottles found under the bar. The pad contained the names of all of the entertainers and some other employees, and after each name were tally marks, and dollars and cents figures.

Andrews was then arrested. Vickie Lee, one of the entertainers for whom the officers had purchased drinks, told the officers at the time of Andrews' arrest that she was paid fifty cents by her employer for each "champagne cocktail" purchased for her. At the hearing before the hearing officer Miss Lee denied making any such statement, denied that she received any commission for the solicitation of drinks, and testified that she paid for all drinks consumed by herself when she cashed her paycheck each week. Andrews admitted keeping the pad with the tally marks after each entertainer's name, but testified that this was done to keep a record of the number of drinks each girl consumed and for which they were charged at the end of each week. This, according to him, was the reason for the tally marks and the dollars and cents figures after each girl's name on the pad. It will be noted that the officers had testified that they had paid $1.50 each for the drinks consumed by the entertainers, and that marks were made on the pad after the purchase of each drink for an entertainer. Thus, if Andrews' and Miss Lee's testimony had been believed, which it was not, the bar received double payment for the drinks consumed by the entertainers. Otherwise, there would have been no reason for keeping a record of drinks already paid for.

It was stipulated that if Cornell were present he would testify that Andrews had told him that the bar was being conducted lawfully and according to the rules and regulations of the board, and that, although female entertainers were employed, they were never paid any sums except the contract wages for their dancing and singing; in other words, were not employed to solicit drinks. The written contracts of the entertainers providing a salary for singing and dancing only were introduced into evidence, as well as certain paychecks issued to the entertainers. It also appears in evidence that ***183** Andrews had been charged with a violation of section 303 of the Penal Code and with keeping empty unbroken alcoholic beverage bottles on the premises, that he had been tried before a jury in the municipal court, and that he had been acquitted of both charges.

The basic argument of appellant is that administrative proceedings looking toward the revocation of a liquor license are criminal in nature insofar as the *quantum* of proof is concerned, and that the evidence here does not meet that test. The principal California case relied upon to establish this premise is *Messner v. Board of Dental Examiners,* 87 Cal.App. 199, where, at page 205 [262 P. 58], it is stated in reference to a proceeding resulting in the suspension of a dental license: "The statute [the Dental Act] is highly penal, and a proceeding thereunder for the revocation of a license to practice dentistry is in the nature of a criminal trial in which all intendments are in favor of the accused." Based on this argument, the appellant contends that all of the elements of the offense or offenses defined in section 303 of the Penal Code were not proved. Appellant admits that the evidence shows that he hired entertainers, but correctly points out that such is perfectly legal. He also admits that the evi-

dence shows that these entertainers solicited drinks from patrons of the bar, but correctly points out that mere solicitation by employees of drinks, under the law as it then existed, constituted no offense against the liquor laws so far as the licensee was concerned. He argues that to constitute an offense under section 303 of the Penal Code the employees must be hired "for the purpose" of soliciting drinks, [FN4] and that this requires evidence of a specific intent or *"mens rea"* on his part to so hire the employees. Appellant urges that there is no evidence at all of his specific intent to hire personnel to solicit drinks. Appellant further argues that, since the record shows that he personally was out of the city when the challenged acts took place, he cannot be held responsible for the acts of Andrews in the absence of any evidence that he authorized those acts, because the statute requires proof of his specific intent.

> FN4 The section prohibits the hiring of persons for the purpose of soliciting drinks or from paying any person a commission for soliciting drinks. So far as the "pay" provision of the statute is concerned, the board found the charge unfounded. The validity of the revocation, therefore, must be upheld, if at all, upon the charge of hiring employees for the purpose of soliciting drinks.

(2) It may be conceded that in disciplinary administrative ***184** proceedings the burden of proof is upon the party asserting the affirmative (*Bley v. Board of Dental Examiners,* 87 Cal.App. 193 [261 P. 1036]), and that guilt must be established to a reasonable certainty (*Furman v. State Bar,* 12 Cal.2d 212 [83 P.2d 12]; *Coffman v. Board of Architectural Examiners,* 130 Cal.App. 343 [19 P.2d 1002]) and cannot be based on surmise or conjecture, suspicion or theoretical conclusions, or uncorroborated hearsay. (See cases collected 2 Cal.Jur.2d 248, § 145.) But it is now well settled that such proceedings are not criminal in nature, and are not governed by the law applicable to criminal cases. (See many cases collected 2 Cal.Jur.2d 169, § 87.) The contrary language found in the Messner case (87 Cal.App. 199, 205) above quoted has been classified as a mere "dictum," and expressly disapproved. (*Webster v. Board of Dental Examiners,* 17 Cal.2d 534, 539 [110 P.2d 992].) (3) The object of an administrative proceeding aimed at revoking a license is to protect the public, that is, to determine whether a licensee has exercised his privilege in derogation of the public interest, and to keep the regulated business clean and wholesome. Such proceedings are not conducted for the primary purpose of punishing an individual. (See cases collected 2 Cal.Jur.2d 169, § 87, at p. 170.) Hence, such proceedings are not criminal in nature.

These principles are now well settled in this state, although admittedly there was language in several early cases to the contrary. The problem was thoroughly discussed and settled in *Webster v. Board of Dental Examiners,* 17 Cal.2d 534 [110 P.2d 992]. In that case, at page 537, it is stated:

"Appellant first challenges the order of suspension on the theory that administrative proceedings to revoke a professional license are quasi- criminal in nature. It is suggested that the rules governing burden of proof, and *quantum* of proof must be those which apply in criminal trials, and that in consequence the board used an improper standard in weighing the evidence. This analogy between a proceeding to revoke a license and a criminal trial is found in a number of the earlier cases. ...

"Where, on the other hand, the legislature has created a professional board and has conferred upon it power to administer the provisions of a general regulatory plan governing the members of the profession, [FN5] the overwhelming weight of authority has rejected any analogy which would require ***185** such a board to conduct its proceedings for the revocation of a license in accordance with theories developed in the field of criminal law. [Citing many cases.] Many California cases have expressly rejected the contention that administrative proceedings for the revocation of a professional license are to be governed by criminal law theories on matters of evidence. [Citing many cases.] ...

> FN5 In the instant case the State Board of Equalization was created by and receives its powers directly from the Constitution. (Art. XX, § 22.)

"Some of the cases relied upon by appellant are clearly distinguishable. ... The statement in *Messner v. Board of Dental Examiners,* 87 Cal.App. 199, 205 [262 P. 58] ... that the proceedings were *quasi*-criminal in nature is *dictum* which is contradicted so far as it relates to matters of evidence by the long line

of cases cited above. ... The few remaining decisions which contain language tending to support petitioner's view are contrary to the great weight of authority in California and elsewhere, as pointed out above."

In *Kendall v. Board of Osteopathic Examiners,* 105 Cal.App.2d 239, 248 [233 P.2d 107], this court quoted, with approval, the following statement from *Murphy v. Board of Medical Examiners,* 75 Cal.App.2d 161, 166 [170 P.2d 510]: " 'The proceeding here involved is an administrative, disciplinary proceeding, and is not criminal in its nature, nor is it to be judged by the legal standards applicable to criminal prosecutions.' "

(4) Thus, it follows that this proceeding for the revocation of a liquor license is a disciplinary function of the State Board of Equalization, and that the standards to be applied are not those applicable to criminal trials. Furthermore, in the instant case, it was not necessary for the board to find that there had been a criminal violation of section 303 of the Penal Code in order to revoke the license. (5) Article XX, section 22, of the Constitution, confers on the board "the exclusive power to license ... sale of intoxicating liquors in this State, ... and shall have the power, in its discretion, to deny or revoke any specific liquor license if it shall determine for good cause that the granting or continuance of such license would be contrary to public welfare or morals." This means that since a liquor license is a permit to do what would, without such license, be unlawful, the board need not define by law or rule all of the things that will put that license in jeopardy. (*Moore v. State Board of Equalization,* 76 Cal.App.2d 758, 764 [174 P.2d 323]; see also Bus. & Prof. Code, § 24200; *Covert v. State Board of Equalization,* 29 Cal.2d 125, 131 [173 P.2d 545].) ***186** (6) Thus, although it is not indispensable to a holding in the instant case that the evidence supports the findings, because the evidence does show a violation of section 303 of the Penal Code, it is the law that appellant's license could have been revoked irrespective of a violation of a specific Penal Code section, if the evidence shows a situation contrary to public welfare or morals.

(1b) Tested by the standards applicable to administrative proceedings, or even by the standards applicable to criminal trials, the evidence here is sufficient to support the finding of a hiring for the purpose of solicitation. The fact that the girls were employed by appellant is conceded. The fact that they, on numerous occasions, solicited drinks from patrons of the bar was established by substantial evidence, and is not denied. The fact that the bartender-manager Andrews knew of such solicitation was established by the record kept by the bar of all drinks consumed by the entertainers, even though paid for by a patron. Under such a state of facts the inference that such solicitation was an integral part of the employment of the entertainers is not only reasonable, but almost inevitable. Thus, even if it was necessary to establish that appellant had a specific intent to hire the employees for solicitation purposes, such fact was established by clear evidence and the reasonable inferences therefrom. (7) Intent can, of course, be proved by circumstantial evidence. (Pen. Code, § 21; *People v. Von Mullendorf,* 110 Cal.App.2d 286 [242 P.2d 403].)

(8) The contention of appellant that even if a hiring of girls for the purpose of soliciting drinks was proved, the evidence shows such hiring was by Andrews, his manager and agent, and cannot be charged to him in the absence of evidence that he knew of or directed such acts, because the Penal Code section requires a specific intent on the part of the person charged, requires but brief consideration. The question is not whether appellant is criminally liable for the acts of Andrews, but whether the board can revoke a license because of the acts of the manager of the establishment in violating the provisions of section 303 of the Penal Code. Obviously, as was said in *Mantzoros v. State Board of Equalization,* 87 Cal.App.2d 140, 144 [196 P.2d 657]: "The licensee, if he elects to operate his business through employees must be responsible to the licensing authority for their conduct in the exercise of his license, else we would have the absurd result that liquor could be sold by employees at forbidden ***187** hours in licensed premises and the licensees would be immune to disciplinary action by the board. Such a result cannot have been contemplated by the Legislature. Even in the case of criminal statutes vicarious liability for the acts of employees is not unknown." By virtue of the ownership of a liquor license such owner has a responsibility to see to it that the license is not used in violation of law. Obviously, the economic benefits of the solicitation of drinks by the entertainers with Andrews' knowledge and participation redounded to the benefit of appellant. The responsibility for Andrews' acts in the operation of the license can and should be imputed to appellant.

(9) The somewhat related argument that Andrews' acquittal in the criminal action constitutes a conclusive determination, binding in this proceeding, that such offenses had not been committed is equally without merit. Even if appellant had been charged criminally and acquitted, such acquittal would be no bar in a disciplinary action based on the same facts looking towards the revocation of a license. (*Traxler v. Board of Medical Examiners,* 135 Cal.App. 37 [26 P.2d 710]; *Bold v. Board of Medical Examiners,* 135 Cal.App. 29 [26 P.2d 707]; *Saxton v. State Board of Education,* 137 Cal.App. 167 [29 P.2d 873].) Quite clearly, if the principle of res judicata is rejected where the defending party is identical in the two actions, it necessarily follows that it is not res judicata when the prior acquittal is of a different party.

The judgment appealed from is affirmed.

END OF DOCUMENT

DESERT TURF CLUB (a Corporation), Appellant,
v.
THE BOARD OF SUPERVISORS OF RIVERSIDE COUNTY et al., Respondents.

Civ. No. 5262.

District Court of Appeal, Fourth District, California.
May 11, 1956.

HEADNOTES

(1) Constitutional Law § 107--Police Power--Legislative Discretion.

When the state sees fit to regulate a matter which is within its police power, its authority over the subject is plenary.

See **Cal.Jur.2d,** Constitutional Law, §§ 178, 179; **Am.Jur.,** Constitutional Law, § 305 et seq.

(2) Theaters and Exhibitions § 3--Regulation--Racing.

The state has taken over in its entirety the subject of horse racing.

See **Cal.Jur.,** Theaters, Shows, Exhibitions and Public Resorts, § 4 et seq.; **Am.Jur.,** Theaters, Shows, Exhibitions and Public Resorts, § 13 et seq.

(3) Theaters and Exhibitions § 3--Regulation--Racing.

A board of supervisors cannot overrule the act of the people of the state in adopting a constitutional amendment and the Legislature of the state in passing a full and comprehensive plan for licensing and control of horse racing by forbidding on moral grounds what the state expressly permits.

(4) Theaters and Exhibitions § 3--Regulation--Racing.

A board of supervisors, acting in good faith, may by properly adopting zoning restrictions exclude on soundly-based grounds the installation of a horse racing track or any other type of activity from those portions of the county as to which such exclusion is reasonable.

(5) Counties § 55--Boards--Powers.

A board of supervisors cannot, under the guise of doing one thing, accomplish a wholly disparate end.

(6) Administrative Law § 8, 9--Proceedings--Hearing--Evidence.

In an administrative hearing the evidence must be produced by witnesses personally present or by authenticated documents, maps or photographs; ordinarily hearsay evidence standing alone can have no weight, and this applies to hearsay evidence concerning someone else's opinion; cross- examination within reasonable limits must be allowed and statements in letters and arguments in petitions should not be considered.

(7) Counties § 176--Mandamus.

Where a board of supervisors, in denying a permit to use land subject to a zoning ordinance as a racetrack, based the denial on moral grounds of opposition to racing and betting under an erroneous conclusion as to the board's rights and duties, and, on the record legitimately before the board, abused its discretion, a writ of mandate will issue requiring the board to cancel the denial and, in the operation of its discretion in enforcement of the ordinance, to reconsider the application, giving no consideration to the alleged immorality of racing and betting.

(8) Courts § 75--Sessions.

The sessions of the superior court of a given county must be held in that county. (Gov. Code, §§ 68099, 69741.)

See **Cal.Jur.2d,** Courts, § 41; **Am.Jur.,** Courts, §§ 25, 26, 37 et seq.

SUMMARY

APPEAL from a judgment of the Superior Court of Riverside County. R. Bruce Findlay, Judge. [FN*] Reversed with directions.

FN* Assigned by Chairman of Judicial Council.

Proceeding in mandamus to compel a county board of supervisors to cancel its order denying a permit to conduct horse racing. Judgment denying writ reversed with directions.

COUNSEL

Thompson & Colegate and John E. Glover for Appellant.

Ray T. Sullivan, Jr., County Counsel, Leo A. Deegan, Deputy County Counsel, and James H. Angell, Assistant County Counsel, for Respondents.

CONLEY, J. pro tem. [FN*]

FN* Assigned by Chairman of Judicial Council.

This case involves the proper definition and delimitation of authority as between the state and the county of Riverside in their respective control and administration of horse racing and zoning.

The appellant, Desert Turf Club, a corporation, after securing a permit from the California Horse Racing Board to conduct quarter-horse racing at the site hereafter described, made written application to the Riverside County Planning Commission for a land use permit to establish, operate and maintain a race track on Zone M-3 land in the Northwest Quarter and the North Half of the Southwest Quarter of Section 6, Township 5 South, Range 6 East, S.B. B. & M., comprising 240 acres, situated on the east side of Del Sol Road, between Tamarisk Road and Avenue 40. The California Horse Racing Board by a decision and order of July 19, 1954, had determined: ***448**

"1. That the applicant, Desert Turf Club, has shown and established that the conducting of quarter-horse racing meetings of the proposed Palm Springs track would be in the public interest and would subserve the purposes of the California Horse Racing Act;

"2. That the conducting of quarter-horse racing meetings at the proposed Palm Springs track will be in the public interest and will subserve the purpose of the California Horse Racing Act."

After a public hearing pursuant to proper notice, the Riverside Planning Commission made its order and decision on February 23, 1955, recommending to the board of supervisors that the application be granted upon certain specified terms and conditions, all of which were afterwards accepted and agreed to by the applicant. In accordance with the requirements of article III of Ordinance 348 of Riverside County, the planning commission filed with the board of supervisors on March 2, 1955, in connection with its recommendation that the application be granted, a summary of the testimony presented at the public hearing and all reports and exhibits which had been introduced in evidence. Thereafter, the board of supervisors regularly noticed and held a public hearing on the question on March 28, 1955; besides the entire files and records of the planning commission on its hearing, the board received evidence from several witnesses respectively for and against the granting of the permit and also accepted as evidence various petitions and letters in opposition thereto. At the close of the hearing, the board, by unanimous vote, denied the application for the permit.

No findings of fact of any kind were made by the supervisors, but the record of the proceedings makes it abundantly clear that the board members took into consideration "every type of evidence that anybody cared to bring to us" and that they assumed that it was "up to the Board to look at all angles, the moral aspects or any other point."

On April 22, 1955, Desert Turf Club filed its petition for a writ of mandate praying that the board of supervisors be required to cancel its order denying the permit, and to make an order granting it and further praying that Charles Bixel, as Chief Building Inspector of Riverside County be required to issue the permit. The respondents below filed a general and special demurrer; at the hearing, which according to the reporter's transcript was held "Before Hon. R. Bruce Findlay, Superior Court Judge (of San Bernardino County), ***449** presiding as Superior Court Judge of Riverside County but actually sitting in San Bernardino County, California, May 24 and 25, 1955," it was stipulated that the special demurrer be deemed withdrawn, and that if the general demurrer should be overruled the cause would be submitted for decision substantially on the record of the hearing before the board of supervisors. The court overruled the general demurrer, denied the peremptory writ of mandate and discharged the alternative writ.

The trial court determined in its conclusions of law that the order of the board of supervisors denying the application for a permit was sufficiently supported by competent substantial evidence, that the board did not act arbitrarily, capriciously or unlawfully, and that

petitioner was not denied a fair trial and

"5. That, although the licensing throughout the State of California of horse racing tracks where pari-mutuel wagering is conducted is a matter of general and statewide concern, the same is, nevertheless, a municipal affair and is subject to local regulation as embodied by the provisions of Ordinance 348 of the County of Riverside, Section 3.1 of Article III thereof."

It is our opinion that the trial court erred in these views.

By the provisions of section 65300 of the Government Code each county in the state is required to create a planning commission; each of said latter bodies is directed to adopt a comprehensive long-term master plan for the development of the county (Gov. Code, § 65460). Zoning regulations by boards of supervisors are specifically authorized by law, it being provided that a county may by ordinance "regulate the use of buildings, structures, and land as between agriculture, industry, business, residence and other purposes." (Gov. Code, § 65800.) The Riverside County Zoning Ordinance Number 348, is a part of the master plan of land used in Riverside County, it having been adopted as recited in article I thereof "in order to classify, restrict, regulate and encourage the orderly use of land in the County of Riverside and to conserve and promote public health, peace, safety, comfort, convenience, and general welfare." Article III of the zoning ordinance provides that:

"All the unincorporated territory of the County which is not included under the terms of this ordinance in any other zone is hereby designated and classified as M-3 Zone. ***450**

"The restrictions pertaining to other zone classifications shall not be deemed or construed to apply to land or property in Zone M-3. The restrictions applicable to land use in M-3 Zone shall be only as hereinafter in this Article specifically set forth."

Article III, section 3.1 forbids a person to use any premises or erect any building in Zone M-3 for any of some 39 uses without first securing a permit; among these enumerated uses is "23. Race track, except for contests between human beings only."

By the adoption of section 25a of article IV of the Constitution, the people of the State of California enacted the controlling principle that the Legislature could provide for the regulation of horse races and horse race meetings throughout the state and wagering on the results thereof. (1) As is said in *Sandstrom v. California Horse Racing Board,* 31 Cal.2d 401, 407 [189 P.2d 17, 3 A.L.R.2d 90]:

"When the state sees fit to regulate upon a matter which is within its police power, its authority over the subject is plenary. ..."

Chapter 4 of division 8 (§§ 19400 to 19663) of the Business and Professions Code contains a full and comprehensive legislative treatment of legalized horse racing in this state which is a clear and complete plan for the state-wide control of the subject ter. Section 19480.5 of the Business and Professions Code provides that the board shall not issue any new license unless it shall determine that conducting horse racing meetings at such place will be in the public interest and will subserve the purposes of the provisions of state law relative to horse racing.

(2) There can be no legitimate doubt that the state has taken over in its entirety the whole subject of horse racing. There is also no room for doubt that many thousands of citizens (who were in a minority at the time the constitutional amendment was adopted) are uncompromisingly opposed to race tracks and any form of betting on horses, not only on abstract moral grounds, but because of their observations as to the practical effect on the community. They oppose, so they say, any improvement in the breed of horses that debases the breed of men.

It is not our province to pass on the moral question but only on the question of power. (3) The query to be answered is: can a board of supervisors overrule the act of the people of the state in adopting a constitutional amendment ***451** and the Legislature of the state in passing a full and comprehensive plan for the licensing and control of horse racing by forbidding on moral grounds what the state expressly permits? There is no escape, in our opinion, from a negative answer.

In *Shean v. Edmonds,* 89 Cal.App.2d 315, 325 [200 P.2d 879], it is said:

"Horse racing was recognized in this state in 1933 (Stats. 1933, p. 2046.) Section 25a of article IV of the Constitution gave certain powers regulating horse racing to the Legislature. 'The continuance of the grant of power' as expressed in certain sections of the Business and Professions Code 'did not affect its status as previously ratified and confirmed.' (*Sandstrom v. California Horse Racing Board,* 31 Cal.2d 401, 413 [189 P.2d 17, 3 A.L.R.2d 90].)

The opinion in *Cunningham v. Hart,* 80 Cal.App.2d 902, 906 [183 P.2d 75], thus enumerates various instances in which the adoption by the state of general laws covering the field deprives a local legislative body of any right to act relative to the subject matter involved:

"The following cases are examples of matters which have been determined to be of state-wide concern and in which general laws have prevailed over conflicting laws in municipalities adopting the 'home rule' afforded by section 6, article XI of the Constitution: *Ex parte Daniels,* 183 Cal. 636 [192 P. 442, 21 A.L.R. 1172], regulation of traffic on city streets. To the same effect, *Atlas Mixed Mortar Co. v. City of Burbank,* 202 Cal. 660 [262 P. 334]; *Mann v. Scott,* 180 Cal. 550 [182 P. 281]; *In re Murphy,* 190 Cal. 286 [212 P. 30]; *Pipoly v. Benson,* 20 Cal.2d 366 [125 P.2d 482, 147 A.L.R. 515]. Regulation of the character and standards of taxicab service to be performed on city streets, *In re Martinez,* 56 Cal.App.2d 473 [132 P.2d 901]. Appointment of a probation officer and the fixing of his salary payable out of the city and county treasury, pursuant to the Juvenile Court Law, *Nicholl v. Koster,* 157 Cal. 416 [108 P. 302]. Sustaining the Metropolitan Water District Act which permits individual municipalities to initiate proceedings in the formation of a water district, *City of Pasadena v. Chamberlain,* 204 Cal. 653 [269 P. 630]. Sustaining the City Boundary Line Act, *Gadd v. McGuire,* 69 Cal.App. 347 [231 P. 754]. Adoption of a pension system by a municipality does not take the place of the Workmen's Compensation Law in its application to city employees, *Sacramento v. Industrial Acc. Com.,* 74 Cal.App. 386 [240 P. 792]. General ***452** laws prohibiting the licensing by a city of a house of prostitution, *Farmer v. Behmer,* 9 Cal.App. 773 [100 P. 901]. General laws prohibiting the organization and control of a school district by a county, *Scott v. County of San Mateo,* 27 Cal.App. 708 [151 P. 33]. A statute claiming a city street to be a secondary state highway prevails over right of municipality to improve that street, *Southern California Roads Co. v. McGuire,* 2 Cal.2d 115 [39 P.2d 412]. Exclusive control in the state of liquor licensing, *Los Angeles Brewing Co.* v. [*City of*] *Los Angeles,* 8 Cal.App.2d 391 [48 P.2d 71]. Issuance and revocation of motor bus licenses within a city, *People v. Willert,* 37 Cal.App.2d Supp. 729 [93 P.2d 872]. Drunken driving provision in Motor Vehicle Act prevails over city ordinance, *Helmer v. Superior Court,* 48 Cal.App. 140 [191 P. 1001]. Liability of a municipality for tortious acts or omissions of its servants, *Douglass v. City of Los Angeles,* 5 Cal.2d 123 [53 P.2d 353]. Liability of a municipality for defective highways within its limits, *Wilkes v. City etc. of San Francisco,* 44 Cal.App.2d 393 [112 P.2d 759]."

This rule has also been applied by this court to a city ordinance requiring an electrical contractor, licensed by the state, to procure a local business license (*Horwith v. City of Fresno,* 74 Cal.App.2d 443 [168 P.2d 767]). (See *Agnew v. City of Los Angeles,* 110 Cal.App.2d 612 [243 P.2d 73].) And this court has pointed out that this principle gives the State of California the sole right to regulate and license the liquor business. (*City of San Diego v. State Board of Equalization,* 82 Cal.App.2d 453, 464 [186 P.2d 166].)

What does this holding do to the zoning ordinance? Nothing at all. The right to zone is by express provision of law a local matter. (4) A board of supervisors, acting of course in good faith, may by properly adopting zoning restrictions exclude on soundly-based grounds the installation of a horse racing track or any other type of activity from those portions of the county as to which such exclusion is reasonable, just as manufacturing establishments or business houses may be legitimately prohibited in residential districts. (5) But the board cannot under guise of doing one thing, accomplish a wholly disparate end. The board here, on moral grounds, contrary to the legislative fiat of the people, has in effect excluded all horse racing from all parts of the county-or, to borrow an analogy from the field of liquor regulation, has exercised a *local option* with respect to horse racing. There ***453** is no such thing as local option on this question under the present law.

If the opinion evidence of those persons opposed to the granting of the permit on the ground that horse

racing and its attendant betting are immoral be eliminated, there is insufficient evidence in the present record to uphold the decision of the board of supervisors, or the findings of the trial court. The testimony adduced on behalf of petitioner was: that the plans and specifications for the construction of the track and buildings in all respects conformed with state and county building codes and regulations; that access roads for ingress and egress were adequate to handle traffic; that the use and development of the land as proposed conformed with good and established planning and zoning regulations; that there would be no flood problem or water drainage problem; that the owners of all property within a distance of 500 feet from the exterior boundaries of the premises favored the granting of the application; that the nearest subdivided area is approximately one-half mile from the site; that government land and vineyards adjoin the proposed track; that no objections of any kind have been interposed by the Riverside County Flood Control and Water Conservation District or the Riverside County Agricultural Commissioner.

The opposing evidence of a number of citizens was that the nature of the general area as one of homes and farms would be violated by the building of a race track; that police problems, in the opinion of the witness based on hearsay, would be increased by the attraction to the course of undesirable types; that many petitioners opposed the coming of a race track believing that "gambling is a social evil." The Coachella Valley Ministerial Association filed a protest containing numerous names of citizens who opposed "the establishment of any race track where parimutuel betting is permitted"; attached to the signed document is a writing signed by Harvey W. Harper, Chairman, stating as further grounds of opposition "... it would not be within the public interest to bring such a questionable industry into this area" and asserting that it would be an economic burden, in that money would be taken away from the community by parimutuel betting, law enforcement problems would arise, county roads would be overtaxed and fire protection problems would arise; further it was said that "... It has been clearly demonstrated in other cases that credit ratings drop during racing seasons"; next the document states that a race track would ***454** be a social and cultural detriment through the attraction of "undesirable elements" and finally that the moral tone of the community would be lowered.

Supervisor Varner made the following observation at the close of the hearing:

"Out of 100 telephone calls received approximately ninety were in opposition to granting permission for the race track. I have received here and admitted in evidence some 20 letters, almost all-there were two in favor of it. There have been petitions submitted here today of between some four and five hundred names in opposition to granting this permit. In view of this fact it indicates to me that it is not in the public interest to grant this M-3 Permit to establish this quarter-horse race track. I move that the M-3 Permit be denied."

The motion having been seconded, all supervisors voted "Aye" and the permit was denied.

Some of the reasons advanced by the witnesses opposing the granting of the permit should weigh powerfully with the voters of California in determining whether race tracks and parimutuel betting should be allowed anywhere, but in view of the preemption by the state of the whole field of legislation and the passage of complete general laws on the subject such arguments are not available in the present situation. Counsel for respondents ably attempt a scholastic distinction between the abstract immorality of race tracks and parimutuel gambling which they concede is not available to respondents because the state has taken over that total legislative field, and the alleged objective social demoralization resulting from racing and gambling, which, they argue, may still be considered by the board of supervisors in judging whether a permit should be issued under the zoning ordinance. But, to use an old western expression, the hair goes with the hide. Those who believe strongly that gambling is immoral base their opinion largely, if not wholly, on its observed effect on people and the community. Similarly, the opposition to alcoholic drinks does not arise from any abstract hatred for alcohol as such, but from a dislike for what it does to drinkers, as individuals and social groups. The onus of the people's authorization of race tracks and parimutuel machines must be borne by the grouped voters of the whole state; they have, for the time being at least, decided the question, and whatever advantages or disadvantages go with the decision cannot be barred by local legislative action from the entire territory of any county, as has been done in this case. ***455**

Appellants also complain concerning the nature of the evidence accepted by the board of supervisors at the hearing. (6) While administrative bodies are not expected to observe meticulously all of the rules of evidence applicable to a court trial, common sense and fair play dictate certain basic requirements for the conduct of any hearing at which facts are to be determined. Among these are the following: the evidence must be produced at the hearing by witnesses personally present, or by authenticated documents, maps or photographs; ordinarily, hearsay evidence standing alone can have no weight (*Walker v. City of San Gabriel,* 20 Cal.2d 879, 881 [129 P.2d 349, 142 A.L.R. 1383]; *Englebretson v. Industrial Acc. Com.,* 170 Cal. 793, 797 [151 P. 421]; *Employers A. Corp. v. Industrial Acc. Com.,* 170 Cal. 800, 801 [151 P. 423]; *Dyment v. Board of Medical Examiners,* 93 Cal.App. 65 [268 P. 1073]; *Thrasher v. Board of Medical Examiners,* 44 Cal.App. 26 [185 P. 1006]), and this would apply to hearsay evidence concerning someone else's opinion; furthermore, cross-examination within reasonable limits must be allowed. Telephone calls to one of the officials sitting in the case, statements made in letters and arguments made in petitions should not be considered as evidence.

(7) As it appears to us that the board of supervisors based its action on an erroneous conclusion as to its legal rights and duties, and that upon the record legitimately before it the board acted in abuse of its discretion, a writ of mandate should issue. (*Tilden v. Blood,* 14 Cal.App.2d 407, 413-414 [58 P.2d 381]; *Martin v. Board of Supervisors,* 135 Cal.App. 96, 103 [26 P.2d 843]; *Walker v. City of San Gabriel, supra,* 20 Cal.2d 879; *Bleuel v. City of Oakland,* 87 Cal.App. 594, 597-598 [262 P. 477].)

But, as the board of supervisors has a proper field for the operation of its discretion in the enforcement of its zoning ordinance, after eliminating the moral ground of opposition to racing, this court cannot agree with the contentions of the appellant that the board of supervisors is wholly without jurisdiction to pass on the application, and that the permit of the State Racing Board is all that is required. (*Dormax Oil Co. v. Bush,* 42 Cal.App.2d 243 [108 P.2d 710].) The same observation applies to the contention that the board should be by-passed and a writ directed to the respondent building inspector, requiring him to issue a permit forthwith. The writ should be directed to the board of supervisors and its members requiring them to cancel and annul the order denying ***456** appellant's application, and to reopen the hearing with leave to hold a supplemental hearing upon due notice if they be so advised, and to reconsider the petition of appellants as to land use, wholly excluding any consideration as to the alleged immorality of horse racing and betting as authorized by state law, and wholly excluding from such consideration all testimony not received in open hearing, and all statements of alleged fact and arguments in petitions and letters on file, except the bare fact that the petitioners or letter writers approve or oppose the granting of the petition; also wholly excluding each and every instance of hearsay testimony unless supported by properly admissible testimony, it being further required that the attorneys representing any party in interest be granted a reasonable opportunity to examine or cross-examine every new witness produced.

Attention has already been called to the statement in the reporter's transcript that the case was tried before a superior court judge of San Bernardino County, "presiding as Superior Court Judge of Riverside County but actually sitting in San Bernardino County." The first page of the transcript begins:

"San Bernardino, California, May 24, 1955,

Afternoon Session

"Mr. Deegan: Your Honor, for the purpose of this case you are sitting as Superior Court Judge of Riverside County?

"The Court: Yes, I appreciate you gentlemen coming over here, otherwise we would be in the position of having to exchange judges, get started on a case here, never could seem to finish up at the same time."

We assume from the foregoing that the judge who tried the case had secured the essential assignment from the Chairman of the Judicial Council to sit and act in Riverside County, but that for convenience the case was actually tried in the San Bernardino County courthouse, with the tacit or express consent of the attorneys. Appellant does not raise any point as to jurisdiction or error in this respect. But this court cannot let pass unnoticed the impropriety involved in this irregular procedure. (8) The sessions of the superior court of a given county, under the law, must be

held in that county (Gov. Code, §§ 69741, 68099; 13 Cal.Jur.2d, "Courts," § 41).

The judgment is reversed, with instructions upon the going down of the remittitur to amend the findings of fact and conclusions ***457** of law in accordance with the views expressed in this opinion, and to enter a judgment granting a peremptory writ of mandate directed to the board of supervisors of Riverside County and the members thereof requiring them forthwith to cancel and annul their order denying appellant's petition and to proceed without delay to carry on and complete a hearing in the manner indicated and set forth in this opinion.

Barnard, P. J., and Griffin, J., concurred.

BOARD OF TRUSTEES OF THE WOODLAND UNION HIGH SCHOOL DISTRICT OF YOLO COUNTY, Respondent,
v.
RUSSELL S. MUNRO, as Director of the Department of Alcoholic Beverage Control, et al., Defendants and Appellants; THOMAS P. RALEY, Intervener and Appellant.

Civ. No. 9372.

District Court of Appeal, Third District, California.
Sept. 11, 1958.

HEADNOTES

(1a, 1b) Administrative Law § 22--Judicial Review--Trial De Novo.

In reviewing the decision of an administrative body, given quasi-judicial powers by the Constitution, the reviewing court is limited to a determination of whether or not the decision is supported by substantial evidence and the court may not substitute its view for that of the administrative body, nor reweigh conflicting evidence. There can be nothing in the nature of a trial *de novo* in the reviewing court.

(2) Administrative Law § 22--Judicial Review--Hearing.

The reviewing court, in its consideration of the evidence in support of the decision of an
See **Cal.Jur.2d,** Administrative Law, § 219 et seq.; **Am.Jur.,** Public Administrative Law, § 206 et seq.
administrative body, must resolve conflicts, and indulge legitimate and reasonable inferences, in favor of that decision.

(3) Intoxicating Liquors § 9.4--Licenses--Issuance--Evidence.

A decision of the Department of Alcoholic Beverage Control to issue a general off-sale liquor license to a supermarket located in close proximity to a high school, a church, a public swimming pool, a proposed children's playground and a location on which a Y.M.C.A. building was to be erected, and that such action was not contrary to public welfare and morals, was supported by substantial evidence, despite conflicting testimony by witnesses for the school, church and Y.M.C.A., since the ultimate question was peculiarly a question for departmental resolution and there was no abuse of discretion in its determination.

(4a, 4b) Intoxicating Liquors § 9.4--Licenses--Issuance--Effect of Restrictive Covenant.

In granting an off-sale liquor license to a supermarket located on a tract subject to a restrictive covenant against the sale of intoxicating liquors, the Department of Alcoholic Beverage Control properly determined that the existence of the covenant did not justify the board in a holding that its violation would be a matter affecting public welfare and morals and left the parties to the covenant to resort to the courts if so advised, since the only legislative enactment restricting the licensing power of the department forbids the issuance of a license to premises located in territory where the exercise of rights thereunder would be contrary to a valid zoning ordinance (Bus. & Prof. Code, § 23790).

(5) Covenants § 1--Definitions.

Restrictive covenants are private contracts as opposed to public zoning ordinances.

SUMMARY

APPEALS from a judgment of the Superior Court of Yolo County. Ben R. Ragain, Judge. [FN*] Reversed.

FN* Assigned by Chairman of Judicial Council.

Proceeding in mandamus to review a decision of the Department of Alcoholic Beverage Control issuing a liquor license. Judgment granting writ directing reversal of department's decision, reversed.

COUNSEL

Edmund G. Brown, Attorney General, E. G. Funke, Assistant Attorney General, William T. Chidlaw and Robert W. Baker, Deputy Attorneys General, for Defendants and Appellants.

Downey, Brand, Seymour & Rohwer for Intervener and Appellant.

Anthony B. Avilla, District Attorney (Yolo), and Harry A. Ackley, Deputy District Attorney, for Respondent. ***442**

VAN DYKE, P. J.

This is an appeal from a judgment of the Superior Court for Yolo County, decreeing that a writ of mandate should issue against the appellant department and the appellant board, directing them to reverse their determination that a general off-sale liquor license should issue to Thomas P. Raley, the real party in interest. The basic question presented on this appeal is whether or not the Department of Alcoholic Beverage Control prejudicially abused its administrative discretion in granting the license.

The department made the following findings of fact: The proposed premises consist of a supermarket located in a neighborhood shopping center at the southeast corner of College Street and Granada Drive in the South Land Park area near the southerly outskirts of Woodland. The premises in question constitute one of a chain of eight Raley food markets, seven of which are located in Sacramento County, and all, or most of them, are licensed for off-sale general alcoholic beverages. There are presently no alcoholic beverage licenses in force in the vicinity of the premises. The applicant's store building is situated in the southerly part of the shopping center, and there is an adjacent main parking area immediately to the north of the applicant's building which is shared with patrons of a drive-in restaurant located at the corner of College Street and Granada Drive and with patrons of other retail stores in the shopping center. Immediately to the south of, and adjacent to, the proposed premises is another parking area reserved for the exclusive use of the applicant's customers. The main entrance to the applicant's store faces College Street, while a secondary entrance faces the general parking area to the north of the building. The nearest school to the proposed premises is the Woodland Union High School, located to the north of the premises and occupying land on both sides of College Street. The distance from the nearest point of the premises and the nearest point of the school property is approximately 365 feet. The evidence shows that the school board has under consideration the enlargement of the high school campus, which, although it occupies large areas of land on both sides of College Street lying to the north of the proposed premises, appears to be too small for present or proposed enlarged school activities. The distance from the proposed premises to the nearest point on school property could, by the additional school facilities proposed, be reduced to approximately 300 feet. Present enrollment of Woodland Union High School is approximately 1,000 students, which include age ***443** groups ranging from 13 to 19. The 19-year-old group would constitute but a small fraction of the enrollment. A considerable number of students frequent the area near the proposed premises by reason of their patronage of the drive-in restaurant and their purchases of ice cream and candy bars at applicant's store. Complaints of the neighboring residents have been directed toward the practice of these students discarding papers such as candy wrappers and other debris around the shopping center during the noon lunch period, after school hours and during evening when sports events are held at the school. There is insufficient evidence to show that the package sale of alcoholic beverages by applicant would aggravate this litter problem or that consumption in public of alcoholic beverages in the vicinity is, or would be of such proportions as to add appreciably to the litter. The evidence shows that by far the greatest number of sales of alcoholic beverages sold at other markets of similar type, operated by applicant, are made in conjunction with purchase of grocery items for consumption at the purchasers' homes. The applicant does not propose to sell alcoholic beverages from open shelves or refrigerators accessible to patrons on a self-service basis as is usual in his other and in most food stores of this kind, but he has submitted a revised floor plan whereby refrigerated beer, wines and so-called hard liquors will be sold only at a separate department located at the front of the store in the southwest corner and outside the check stands. Persons desiring to purchase alcoholic beverages will only be able to procure them at this portion of the store, which will be in charge of a clerk at all times that the liquor department is open for business. The proposed arrangement should effectively minimize the possibility of theft of alcoholic beverages by high school students or others, and will safeguard against inadvertent sale of alcoholic beverages to minors by clerks at the food-checking stands at times when they are busy with customers purchasing large lots of groceries. A children's public playground will, at some time in the future, occupy a park area proposed to be constructed across College Street and opposite the proposed premises. The evidence does not show what portion of this proposed public park will be used for playground purposes such as swings and other play

equipment. The width of College Street intervening between the proposed premises and the proposed park area is approximately 60 feet from curb to curb. A municipal swimming pool, which is patronized by increasing numbers of adults, ***444** students and other children to the extent of a total of 43,548 persons in 1955, is located to the northwest and across College Street from the premises in question, at a distance of about 400 feet airline measured from the nearest portion of the applicant's store building to the nearest point of the swimming pool enclosure. This pool is surrounded by a high wall and, with the exception of the upper portions of bleacher seats located against the south wall of the pool enclosure, the view of the proposed premises from the pool area is effectively blocked. The American Lutheran Church, with a total membership of about 530 persons, and holding the usual services on Sundays and meetings on most week nights is located on the west side of College Street and across the street from the proposed premises at a distance of about 171 feet from the nearest point of the applicant's building to the nearest corner of the church property. An additional distance of about 25 feet to the nearest church entrance makes the distance about 196 feet. It is proposed to construct a Y.M.C.A. building in about two to three years on the lot adjacent to and south of the church across the street from the proposed premises, at a distance of about 150 feet from the premises, measured by direct line between the respective buildings. There is no substantial evidence to show that the granting of a license for the off-sale of packaged alcoholic beverages would, under the method of operation proposed, constitute an undue moral hazard to the students of the high school, the church activities of the persons attending the church, or juveniles using the facilities of the proposed playground or the proposed Y.M.C.A. The premises in question are located on Lot 16 of Block 4 in the tract known as South Land Park. By a "Declaration of Restrictions" signed by Anton Paulsen, his wife, and others, the then owners of the South Land Park Tract executed August 31, 1946, and which was recorded on September 7, 1946, certain restrictions were imposed on this tract, providing that all lots, with the exception of Lot 16 of Block 4 on which the shopping center and the proposed premises are located shall be restricted to residential use. As to Lot 16 of Block 4 it is provided that said lot is "restricted to retail commercial purposes provided that no liquor or beverages shall be sold on said premises containing more than one-half of one per cent alcohol by volume." There is no evidence to show that issuance of the license in question would violate any valid zoning ordinance. It is stipulated, and it is found to be true, that the proposed premises are located in a shopping center, which, in turn, is located in a ***445** general residential area. A search of the record discloses substantial support for the findings of fact.

The conclusions of the department from the foregoing findings were as follows: Issuance of the license would not be contrary to public welfare and morals for the reason that although the proposed premises are located within the immediate vicinity of (1) a portion of the high school grounds, (2) a proposed children's public playground, (3) a church and (4) a proposed Y.M.C.A., an off-sale license would not expose the persons or juveniles involved to any undue moral hazard. Issuance of the license would violate a deed restriction, which appears to be valid and enforceable as to all parties in privity therewith, but public welfare and morals would not, in view of the findings on all other issues herein, be adversely affected by the issuance of an off-sale general license to this applicant and premises. The proposed premises are located in a residential area, but issuance of the license would not be contrary to public welfare and morals.

The scope of review of a decision of the Department of Alcoholic Beverage Control, like that of the review of a decision of any administrative body given quasi-judicial powers by the Constitution, is well established. The Constitution declares that the department "shall have the exclusive power ... to license the manufacture, importation and sale of alcoholic beverages in this State, ... The department shall have the power, in its discretion, to deny, suspend or revoke any specific alcoholic beverages license if it shall determine for good cause that the granting or continuance of such license would be contrary to public welfare or morals. ..." (1a) In reviewing the decision of such an administrative body, the reviewing court is limited to the determination of whether or not the decision is supported by substantial evidence and the court may not substitute its view for that of the administrative body, nor reweigh conflicting evidence. (*Dethlefsen v. Board of Equalization,* 145 Cal.App.2d 561, 563 [303 P.2d 7]; *Molina v. Munro,* 145 Cal.App.2d 601 [302 P.2d 818].) (2) The reviewing court, in its consideration of the evidence in support of the decision, must resolve conflicts, and indulge legitimate and reasonable inferences, in favor

of that decision. (*Thompson v. City of Long Beach,* 41 Cal.2d 235, 241 [259 P.2d 649]; *Oxman v. Department of Alcoholic Beverage Control,* 153 Cal.App.2d 740, 744 [315 P.2d 484]; *Marcucci v. Board of Equalization,* 138 Cal.App.2d 605 [292 P.2d 264].) (1b) There ***446** can be nothing in the nature of a trial de novo in the reviewing court.

(3) Tested by the foregoing rules, there is substantial evidence in the record which supports the decision of the department and, therefore, its decision must be upheld and the judgment appealed from must be reversed.

Witnesses for the protestants testified that if liquors were sold in Raley's market, minors would find a way of getting it, either by pilfering it from the store or inducing adults to purchase it, take it out of the store and give it to the minors; that this would happen generally when students were attending various athletic games and contests during evenings such as football and basketball games; that the pilfering and illegal obtaining through intervention of adults would be increased by the propinquity of the market to the school grounds; that handy access to the liquor supply would increase use of intoxicants by adult attendants at the games; that minors would obtain liquor more readily at that market than they would at other markets through misrepresentation of their ages and having obtained it would permit its use by themselves and other students. Representatives of the nearby church testified that they opposed granting the license on the same grounds urged by the school authorities, but admitted that so far as the church congregation was concerned they did not expect any bad effects upon their membership. Representatives of the Y.M.C.A., which proposed to build in the future a building in the general vicinity of the market, testified that their membership would be more apt to indulge in the use of alcoholic beverages than if the same were not so handy to their headquarters. Many of these witnesses claiming to be well versed with juvenile problems, particularly those encouraged by the use of alcoholic beverages, gave it as their opinion that transfer of the license would adversely affect public welfare and morals, thus testifying directly to the very issue to be passed on by the board.

Assuming the admissibility of such opinion evidence, we think it apparent that the evidence given by protestants' witnesses did not, as a matter of law, prove that the granting of the transfer of the license by the board would be contrary to public welfare or morals.

The ultimate question whether or not under all the circumstances the granting of the off-sale license would adversely affect public welfare and morals was on this record peculiarly an issue for departmental resolution. It is lawful to sell, ***447** possess and use intoxicating liquor in this state. Surely the board, which passes on the issuance of thousands of licenses under all conceivable conditions, can better determine the effect upon public welfare and morals of the granting of a license than can those who are not constantly so engaged. Undoubtedly, the protestants were completely and conscientiously serious in their objections and their witnesses were honestly apprehensive, as they said they were, that public welfare and morals would be adversely affected if Raley's application were granted, but the question was for resolution by the board and it cannot be said from this record that the board in anywise abused its discretion in granting the license.

(4a) With respect to the contentions of respondent that the license could not be validly issued during the existence of a valid covenant against the sale of intoxicating liquors, the research of counsel and of the court has disclosed little authority, and apparently the question is novel in California. The Constitution, which vests in the department the exclusive power to license the sale of intoxicating liquor, makes the power subordinate to laws enacted by the Legislature. The Legislature, by section 23790 of the Alcoholic Beverage Control Act, has provided that retail licenses shall not be issued for any premises located in territory where the exercise of the rights conferred would be contrary to a valid zoning ordinance of any county or city unless the premises had been used in the exercise of such rights at a time prior to the effective date of the zoning ordinance. We find no other legislative enactment restricting the licensing power of the board. (5) Restrictive covenants are private contracts as opposed to public zoning ordinances. In *Barnegat City Beach Assn. v. Busby,* 44 N.J. Law 627, the court said:

"... The question of jurisdiction is not affected by the existence of covenants and conditions against open bars for the sale of intoxicating drinks, contained in the deeds for lands in this locality. However binding this may be upon the parties to such instruments, they are in no wise obligatory upon the court in the exercise

of its statutory discretion to grant licenses for the public convenience, nor can such provisions render licenses granted invalid."

Apparently a contrary position has been taken by the courts in Pennsylvania. (See *Appeal of Cheris,* 127 Pa. Super. 355 [193 A. 162].)

(4b) In this case the board received in evidence a certified copy of a deed imposing the restriction. From the record it ***448** appears that the board considered the covenant to be valid and, further considering the covenant as one of the facts before it, specifically determined that its existence did not justify the board in a holding that its violation would be a matter affecting public welfare and morals. We think this conclusion of the board to have been warranted by the record before it. Apparently the board concluded that the covenant presented no insurmountable barrier to the granting of the license and left the parties to the covenant to resort to the courts if so advised. On this record this was a justifiable and proper disposition of the issue.

For the reasons given, the judgment appealed from is reversed.

Peek, J., and Schottky, J., concurred.

Respondent's petition for a hearing by the Supreme Court was denied November 5, 1958.

v.
THOMAS W. HAYES, as Director of the Department of Finance, etc., Defendant and Respondent, BILL HONIG, as Superintendent of Public Instruction, etc., Defendant and Appellant; CALIFORNIA CHILDREN'S LOBBY et al., Real Parties in Interest and Appellants.

No. C009444.

Court of Appeal, Third District, California.
Apr 30, 1992.

FN* Reporter's Note: This case was previously entitled "California Teachers Association v. Huff."

SUMMARY

A teacher's association and three of its officers filed a petition for a writ of mandate against the Superintendent of Public Instruction and other state officials to prohibit the inclusion of funding for the Child Care and Development Services Act (Ed. Code, § 8200 et seq.) within the education funding guarantee of Prop. 98 (Classroom Instructional Improvement and Accountability Act). The trial court concluded that Prop. 98 was not intrinsically ambiguous, and that its plain meaning required that only appropriations allocated to, and administered by, school districts satisfied its minimum funding requirement. Accordingly, the trial court issued a writ of mandate prohibiting defendants from including any funds allocated to or administered by any entity or agency, other than a school district as defined in Ed. Code, § 41302.5, within the Prop. 98 education funding guaranties. The trial court also declared that Ed. Code, §§ 8203.5, subd. (c), 41202, subd. (f), which include funding for the Child Care and Development Services Act within the Prop. 98 guaranties, were unconstitutional. (Superior Court of Sacramento County, No. 363630, Michael T. Garcia, Judge.)

The Court of Appeal reversed. The court held that education and operation of the public schools are matters of statewide rather than local or municipal concern. Likewise, the court held that school moneys belong to the state, and the apportionment of funds to a school district does not give that district a proprietary right therein. Although the inclusion of funding for the act deprived school districts of absolute control over the funds the state is required to devote to education under Prop. 98, the court held that the measure did not expressly restrict the Legislature's plenary authority for education in the state, nor did it grant to school districts exclusive control over education funds. Accordingly, it held that the Legislature's inclusion of funding for the Child Care and Development Services Act within the Prop. 98 education funding guaranty was not facially unconstitutional. (Opinion by Sparks, Acting P. J., with Marler and Nicholson, JJ., concurring.)

HEADNOTES

Classified to California Digest of Official Reports

(1) Universities and Colleges § 2--Organization and Affiliation--University of California.

The University of California is a public trust that finds its roots in the Constitution of 1849. The University of California has full powers of organization and government, subject only to limited legislative control. As such, it is not part of the public school system, and is subject to entirely different legal standards.

(2) Schools § 4--School Districts--Control and Operation--State Interest.

Although it is the legislative policy to strengthen and encourage local responsibility for control of public education through local school districts (Ed. Code, § 14000), education and operation of the public schools remain matters of statewide rather than local or municipal concern. Thus, local school districts are deemed agencies of the state for the administration of the school system, they are not a distinct and independent body politic, and they are not free and independent of legislative control.

(3) Schools § 4--School Districts--Control and Operation--Legislature's Powers.

The Legislature's power over the public school system has been variously described as exclusive, plenary, absolute, entire, and comprehensive, subject

only to constitutional constraints. Consequently, regulation of the education system by the Legislature is controlling over any inconsistent local attempts at regulation or administration of the schools. No one may obtain rights vested against state control by virtue of local provisions, ordinances or regulations. The Legislature has the power to create, abolish, divide, merge, or alter the boundaries of school districts. Indeed, the state is the beneficial owner of school property and local districts hold title as trustee for the state. School moneys belong to the state, and the apportionment of funds to a school district does not give that district a proprietary right therein. Thus, the Legislature can transfer property and apportion debts between school districts as it sees fit.

(4) Schools § 11--School Funds--Determination of Educational Purpose-- Legislative Discretion.

In including the Child Care and Development Services Act (Ed. Code, § 8200 et seq.) within the funding guarantee of Prop. 98 (Classroom Instructional Improvement and Accountability Act), the Legislature was not arbitrary and unreasonable in its determination that the act advanced the purposes of public education. Although the Legislature is given broad authority over education, it cannot divert education funds for other purposes. However, education is a broad and comprehensive matter, and the state Constitution places a broad meaning upon education. Moreover, the Legislature is given broad discretion in determining the types of programs and services which further the purposes of education.

(5) Constitutional Law § 23--Constitutionality of Legislation--Raising Question of Constitutionality--Burden of Proof--Facial Challenge to Statute.

When a challenge is made to the facial validity of a statute, a reviewing court's task is to determine whether the statute can constitutionally be applied. To support a determination of facial unconstitutionality, voiding the statute as a whole, petitioners cannot prevail by suggesting that in some future hypothetical situation constitutional problems may possibly arise as to the particular application of the statute. Rather, petitioners must demonstrate that the act's provisions inevitably pose a present total and fatal conflict with applicable constitutional prohibitions.
[See 7 **Witkin,** Summary of Cal. Law (9th ed. 1988) Constitutional Law, § 58.]

(6) Constitutional Law § 27--Constitutionality of Legislation--Rules of Interpretation--Purpose, Wisdom, and Motives of Legislature.

The authority to make policy is vested in the Legislature, and neither arguments as to the wisdom of an enactment, nor questions as to the motivation of the Legislature, can serve to invalidate particular legislation. Where a petitioner makes a facial challenge to an enactment, a reviewing court's role is limited to determining whether the Legislature's choice is constitutionally prohibited.

(7a, 7b) Schools § 11--School Funds--Proposition 98 Funding Guarantee-- Legislative Control.

The Legislature's inclusion of funding for the Child Care and Development Services Act (Ed. Code, § 8200 et seq.) within the Prop. 98 (Classroom Instructional Improvement and Accountability Act) education funding guarantee was not facially unconstitutional. Although the inclusion of funding for the act deprived school districts of absolute control over the funds the state is required to devote to education under Prop. 98, the measure did not expressly restrict the Legislature's plenary authority for education in the state, nor did it grant to school districts exclusive control over education funds. The Constitution makes education and the operation of the public schools a matter of statewide rather than local or municipal concern. School districts do not have a proprietary interest in moneys which are apportioned to them. Accordingly, even though child care and development programs are not included within the definition of school districts, legislative programs which advance the educational mission of school districts and community college districts may constitutionally be included within the funding guaranty of Prop. 98.

(8) Constitutional Law § 39--Distribution of Governmental Powers--Between Branches of Government--Legislative Power.

Unlike the federal Constitution, which is a grant of power to Congress, the California Constitution is a limitation or restriction on the powers of the Legislature. Accordingly, the entire lawmaking authority of the state, except the people's right of initiative and referendum, is vested in the Legislature, and that body may exercise any and all legislative powers which are not expressly or by necessary implication denied to it by the Constitution. In addition, all intendments favor the exercise of the Legislature's plenary authority. If there is any doubt as to the Legislature's power to act in any given case, the doubt should be resolved in favor of the Legislature's action. Such restrictions and

limitations imposed by the Constitution are to be construed strictly, and are not to be extended to include matters not covered by the language used.

(9) Constitutional Law § 10--Construction of Constitutions--Initiative Amendments--Conformation of Parts.

In an action challenging the propriety of including the Child Care and Development Services Act (Ed. Code, § 8200 et seq.) within the funding guarantee of Prop. 98 (Classroom Instructional Improvement and Accountability Act), construction of the constitutional provisions added by Prop. 98 had to be considered in light of all other relevant provisions of the Constitution. These provisions include those that contain, define, and limit the status of school districts and their relationship to the state. An initiative amendment to the Constitution must be interpreted in harmony with the other provisions of the organic law of this state of which it has become a part. To construe it otherwise would be to break down and destroy the barriers and limitations that the Constitution, read as a whole, has cast about legislation, both state and local.

Kronick, Moskovitz, Tiedemann & Girard and Rochelle B. Schermer as Amici Curiae on behalf of Plaintiffs and Respondents.

Daniel E. Lungren, Attorney General, N. Eugene Hill, Assistant Attorney General, Cathy Christian and Marsha A. Bedwell, Deputy Attorneys General, for Defendant and Respondent.

SPARKS, Acting P. J.

At the November 1988 General Election, the electorate adopted Proposition 98, an initiative measure entitled "The Classroom Instructional Improvement and Accountability Act" [FN1] In general, Proposition 98 seeks to improve public education in California by establishing a minimum funding guarantee for public schools and by changing the way our state government treats its excess revenues. As the Legislative Analyst noted in her analysis of the initiative, Proposition 98 establishes a minimum level of funding for public schools and community colleges; requires the state to spend any excess revenues, up to a specified maximum, for public schools and community colleges; requires the Legislature to establish a state reserve fund; and requires the school districts to prepare and distribute "School ***1518** Accountability Report Cards" each year. (Ballot Pamp. analysis of Prop. 98 by Legislative Analyst as presented to the voters, Gen. Elec. (Nov. 8, 1988), p. 78, some capitalization and all paragraphing omitted.)

> FN1 Proposition 98 (Stats. 1988, p. A-264 et seq.) added two sections to the California Constitution, amended two other constitutional provisions and added six sections to the Education Code. It added section 5.5 to article XIII B of the California Constitution, amended section 2 of article XIII B, amended section 8 of article XVI, added section 8.5 to article XVI, and added sections 33126, 35256, 41300.1, 14020.1, 14022 and 41302.5 to the Education Code.
>
> The full text of Proposition 98 is set out in the appendix to this opinion.

To these ends, Proposition 98 sets a minimum funding level for "the monies to be applied by the state for the support of school districts and community college districts. ..." (Cal. Const., art. XVI, § 8, subd. (b).) It is around this phrase that the present controversy swirls. At issue in this case is the validity of the Legislature's decision to include funding for the Child Care and Development Services Act (Ed. Code, § 8200 et seq.) within the educational funding guarantees of Proposition 98. This decision was implemented by the enactment of Education Code section 41202,

subdivision (f), which declares that " 'monies to be applied by the state for the support of school districts and community college districts,' as used in Section 8 of Article XVI of the California Constitution, shall include funds appropriated for the Child Care and Development Services Act ...."

The California Teachers Association and three of its officers filed a petition for writ of mandate against the Director of Finance, the state Treasurer and the state Superintendent of Public Instruction to prohibit the inclusion of funding for the Child Care and Development Services Act within the Proposition 98 education funding guarantee. By stipulation, the California Children's Lobby, the Professional Association of Childhood Educators, the California Assocation for the Education of Young Children, and the Child Development Administrators Assocation, intervened in the action as real parties in interest. The trial court issued a writ of mandate prohibiting defendants from including any funds allocated to or administered by any entity or agency other than a school district as defined in Education Code section 41302.5, within the Proposition 98 educational funding guarantees, and declaring that Education Code sections 8203.5, subdivision (c), and 41202, subdivision (f), which include funding for the Child Care and Development Services Act within the Proposition 98 guarantees, are unconstitutional. Bill Honig, the State Superintendent of Public Instruction, and the real parties in interest appeal. We shall reverse.

I Procedural Background

Proposition 98 provides for the improvement of public education in two basic ways. The first, which is not implicated in this appeal, involves the allocation of state revenues in excess of the state appropriations limitation to elementary, high school and community college districts on a per-enrollment ***1519** basis for use solely for the purposes of instructional improvement and accountability. (Cal. Const., art. XIII B, § 2; art. XVI, § 8.5.) The second way, and the one involved here, establishes a minimum guaranteed state education funding level for "the moneys to be applied by the State for the support of school districts and community college districts ...." (Cal. Const., art. XVI, § 8, subd. (b).) [FN2]

FN2 Under Proposition 98 the minimum funding level is set as the greater of (1) the same percentage of general fund revenues as was set aside for school districts and community colleges in the 1986-1987 school year, or (2) the amount necessary to ensure that total state and local allocations be equal to the prior year's allocations, adjusted for cost of living and enrollment changes. (Cal. Const., art. XVI, § 8, subd. (b).) A third test was added at the June 1990 Primary Election by the passage of Proposition III. That measure is not involved here.

After its passage, the Legislature acted to implement Proposition 98. (Ed. Code, § 41200 et seq. [unless otherwise specified, all further statutory references will be to the Education Code].) One aspect of the Legislature's implementation is at issue in this appeal. As we have noted, in section 41202, subdivision (f), the Legislature provided, among other things: " 'State General Fund revenues appropriated for school districts and community college districts, respectively' and 'monies to be applied by the state for the support of school districts and community college districts,' as used in Section 8 of Article XVI of the California Constitution, shall include funds appropriated for the Child Care and Development Services Act pursuant to Chapter 2 (commencing with Section 8200) of Part 6 ...."

In order to ensure that the Child Care and Development Services Act serves the purposes of public education, the Legislature enacted section 8203.5, which provides: "(a) The Superintendent of Public Instruction shall ensure that each contract entered into under this chapter to provide child care and development services, or to facilitate the provision of those services, provides support to the public school system of this state through the delivery of appropriate educational services to the children served pursuant to the contract. [¶] (b) The Superintendent of Public Instruction shall ensure that all contracts for child care and development programs include a requirement that each public or private provider maintain a developmental profile to appropriately identify the emotional, social, physical, and cognitive growth of each child served in order to promote the child's success in the public schools. To the extent possible, the State Department of Education shall provide a developmental profile to all public and private providers using existing profile instruments that are most cost efficient. The provider of any program operated pursuant to a contract under Section 8262 shall be responsible for

maintaining developmental profiles upon entry through exit from a child developmental program. [¶] Notwithstanding any other provision of law, 'moneys to be applied by the [s]tate,' as used in subdivision (b) of ***1520** Section 8 of Article XVI of the California Constitution, includes funds appropriated for the Child Care and Development Services Act pursuant to Chapter 2 (commencing with Section 8200) of Part 6, whether or not those funds are allocated to school districts, as defined in Section 41302.5, or community college districts. [¶] (d) This section is not subject to Part 34 (commencing with Section 62000)." [FN3] ***1521**

FN3 In an uncodified provision the Legislature explained its purpose for including child care and development funds in the Proposition 98 funding guarantee: "The Legislature finds and declares as follows: [¶] (a) Since 1932, early childhood education and child development programs have been operated as part of the school programs that are conducted under the authority of the Superintendent of Public Instruction. In the 1988-89 fiscal year, 110,000 children in California were served in the state program of early childhood education and child development administered by the Superintendent of Public Instruction, as set forth in Chapter 2 (commencing with section 8200) of Part 6 of the Education Code. [¶] (b) Participation and enrollment in an early childhood education or child development program provides an opportunity for many children to hear their first English words (one in three speaks another language), to be introduced to the idea of numbers, to develop basic language concepts, to learn how to get along with other children and adults, and to begin to develop a positive self-image. [¶] (c) The Legislature has stated its intent that early childhood education and child development programs be a 'concomitant part of the educational system' by providing young children an equal opportunity for later school success. Those programs are considered by the general public to be an integral and essential part of the state's public education system. [¶] (d) Early childhood education programs for chldren of low-income families have been shown to increase high school graduation rates and college entry rates, to reduce the need for special education and grade level retention, and to reduce high school dropout rates. [¶] (e) In the state's early childhood education and development programs, each child is to receive an education program which is appropriate to his or her developmental, cultural, and linguistic needs. Each child is to receive a developmental profile, updated at regular intervals, which will be passed on to his or her elementary school. [¶] (f) In view of the unique function of early childhood education and child development programs, in supporting school districts by directly preparing children for participation in the public schools and by assisting those children in resolving special school-related problems, these programs constitute an essential and integral component of the overall system to carry out the mission of the public schools. Accordingly, in order to fully implement subdivision (b) of Section 8 of Article XVI of the California Constitution, which requires, in its introductory paragraph, a minimum level of funding 'for the support of' school districts, as defined, and community college districts, it is necessary to include, within the calculation of that funding, the funding provided by the Legislature for all early childhood education and development programs. Moreover, in accordance with the educational role of those programs, it is the responsibility of the Superintendent of Public Instruction to continue to ensure that all contracts for early childhood education and child develpment programs provide support to the public school system of this state through the delivery of appropriate educational services to the children served by the program. In addition, Section 8262.1 of the Education Code, as added by this act [in fact there is no section 8262.1], constitutes a necessary statutory implementation of that determination, which is consistent with the legislative history of the statutes that provide for the operation of early childhood education and child development programs. [¶] (g) For the period from the 1986-87 fiscal year to the present, the state's early childhood education and development programs have received funding adjustments for cost-of-living and enrollment increases that have been lower, overall, than the comparable adjustments for base revenue limits for school dis-

> tricts. [¶] However, it is the intent of the Legislature that the inclusion of early childhood education and child development programs within the calculation of the state's education funding obligation pursuant to Proposition 98 is not to result in requiring in that calculation the use of the lower level of funding received by these programs in the 1986- 87 fiscal year." (Stats. 1989, ch. 1394, § 1.)

The Child Care and Development Services Act is contained in sections 8200 through 8498. It is a comprehensive statewide master plan for child care and development services for children to age 14 and their parents. (§ 8201, subd. (a).) Among other things it includes such items as resource and referral programs (§§ 8210-8215), campus child care and development programs (§ 8225), migrant child care and development programs (§§ 8230-8233), preschool programs (§ 8235), general child care and development programs (§§ 8240-8242), and programs for children with special needs (§§ 8250-8252). Services under this statutory scheme may be provided directly by school districts or local education agencies or by contracts through such agencies, or services may be provided by private parties contracting with the state Department of Education. (See rep., Child Development, Program Facts, prepared by the Dept. of Ed., Child Development Div., Field Services Branch (1989) pp. 12-13.) Programs under the Child Care and Development Services Act are under the general supervision of the Superintendent of Public Instruction. (§ 8203.) In some instances federal funding is available and the Legislature has declared that federal reimbursement shall be claimed where available and that the Department of Education is designated as "the single state agency" responsible for the programs under federal requirements. (§§ 8205-8207.)

Plaintiffs filed this action to prohibit the inclusion of funding for the Child Care and Development Services Act within the Proposition 98 education funding guarantee. [FN4] They maintain that funds which are not allocated directly to and administered by school districts cannot be included within the provisions of Proposition 98. [FN5] The trial court agreed with plaintiffs. It concluded that Proposition 98 is not intrinsically ambiguous and that its ***1522** plain meaning requires that only appropriations allocated to, and administered by, school districts satisfy its minimum funding requirement. As the trial court saw it, "[t]he phrase 'monies to be applied by the state for the support of school districts,' taken as a whole, clearly refers to financial allocations for the financial support of school districts, and not the financial support of private child care and development programs which incidentallly benefit school districts." Judgment was entered accordingly and this appeal followed.

> FN4 Plaintiffs also contested the inclusion of funding for certain other types of programs within the Proposition 98 guarantee. In his answer defendant Bill Honig, as Superintendent of Public Instruction, conceded that plaintiffs are correct with respect to these other programs and no other party contests this concession. This appeal concerns only funding for the Child Care and Development Services Act.

> FN5 The Director of the Department of Finance, filed an answer in which he agreed with plaintiffs and he is a respondent in this appeal. The former state Treasurer successfully demurred on the ground that his function in this regard is purely ministerial and the Treasurer is not a party on appeal. Defendant Honig contested the petition with respect to child care and development programs and he is an appellant herein. As we have noted, the parties stipulated that the Children's Lobby et alia be permitted to intervene as real parties in interest and they are also appellants in this appeal. Amici curiae briefs in support of appellants have been filed by the state Legislature, the California Congress of Parents, Teachers and Students, Inc., and certain child advocacy and care provider organizations.

II Historical Background

There can be no doubt that education has historically been accorded an ascendant position in this state. Indeed, at the very start, article IX of our 1849 Constitution created the office of Superintendent of Public Instruction; required the Legislature to encourage by all suitable means the promotion of intellectual, scientific, moral and agricultural improvement; required the Legislature to establish a system of common schools; and established a fund for the support of the common schools. (See Stats. 1849, p. 32.)

As this recitation will demonstrate, the preeminent position of education in California has been a constant in a world of governmental flux. Section 1 of article IX of the Constitution now provides, as it has since 1879: "A general diffusion of knowledge and intelligence being essential to the preservation of the rights and liberties of the people, the Legislature shall encourage by all suitable means the promotion of intellectual, scientific, moral, and agricultural improvement." Section 5 of article IX presently mandates, as it has since 1879: "The Legislature shall provide for a system of common schools by which a free school shall be kept up and supported in each district at least six months in every year, after the first year in which a school has been established." Since 1933, our Constitution has provided that from state revenues there shall first be set apart the moneys to be applied by the state for the support of the public school system and institutions of higher education. (Cal. Const., art. XVI, § 8, subd. (a); see former art. XIII, § 15, Stats. 1935, p. IXIX.)

Section 6 of article IX of our Constitution establishes a State School Fund. That section provides, in relevant part: "The Legislature shall add to the State School Fund such other means from the revenues of the State as shall provide in said fund for apportionment in each fiscal year, an amount not less than one hundred eighty dollars ($180) per pupil in average daily attendance in the kindergarten schools, elementary schools, secondary schools, and technical schools in the Public School System during the next ***1523** preceding fiscal year. [¶] The entire State School Fund shall be apportioned in each fiscal year in such manner as the Legislature may provide, through the school districts and other agencies maintaining such schools, for the support of, and aid to, kindergarten schools, elementary schools, secondary schools, and technical schools except that there shall be apportioned to each school district in each fiscal year not less than one hundred twenty dollars ($120) per pupil in average daily attendance in the district during the next preceding fiscal year and except that the amount apportioned to each school district in each fiscal year shall be not less than twenty-four hundred dollars ($2,400)."

Article IX, section 6, of the Constitution also provides in part: "The Public School System shall include all kindergarten schools, elementary schools, secondary schools, technical schools, and State colleges, established in accordance with law and, in addition, the school districts and other agencies authorized to maintain them. (1)**(See fn. 6.)** No school or college or any other part of the Public School System shall be, directly or indirectly, transferred from the Public School System or placed under the jurisdiction of any authority other than one included within the Public School System." [FN6]

> FN6 The University of California is a public trust which finds its roots in the Constitution of 1849. (See Stats. 1849, p. 32; and see Cal. Const., art. IX, § 9.) The University of California has "full powers of organization and government" subject only to limited legislative control. (*Ibid.*) As such, it is not part of the Public School System and is subject to entirely different legal standards. The University of California is beyond the scope of the issues presented in this appeal.

For the administration of this public school system, the Constitution creates the office of Superintendent of Public Education and establishes a State Board of Education. (Cal. Const., art. IX, §§ 2, 2.1.) It provides for county boards of education and superintendents of schools. (Cal. Const., art. IX, §§ 3-3.3.) It permits city charters to provide for the election or appointment of boards of education. (Cal. Const., art. IX, § 16.) Section 14 of article IX provides: "The Legislature shall have power, by general law, to provide for the incorporation and organization of school districts, high school districts, and community college districts, of every kind and class, and may classify such districts. [¶] The Legislature may authorize the governing boards of all school districts to initiate and carry on any programs, activities, or to otherwise act in any manner which is not in conflict with the laws and purposes for which school districts are established."

(2) It has been and continues to be the legislative policy of this state to strengthen and encourage local responsibility for control of public education ***1524** through local school districts. (§ 14000.) [FN7] Nevertheless, education and the operation of the public schools remain matters of statewide rather than local or municipal concern. (*Hall v. City of Taft* (1956) 47 Cal.2d 177, 179 [302 P.2d 574]; *Esberg v. Badaracco* (1927) 202 Cal. 110, 115- 116 [259 P. 730]; *Kennedy v. Miller* (1893) 97 Cal. 429, 431 [32 P.

558]; *Whisman v. San Francisco Unified Sch. Dist.* (1978) 86 Cal.App.3d 782, 789 [150 Cal.Rptr. 548].) Hence, local school districts are deemed to be agencies of the state for the administration of the school system and have been described as quasi-municipal corporations. (*Hall v. City of Taft, supra,* 47 Cal.2d at p. 181; *Pass School Dist. v. Hollywood Dist.* (1909) 156 Cal. 416, 418 [105 P. 122]; *Hughes v. Ewing* (1892) 93 Cal. 414, 417; *Town of Atherton v. Superior Court* (1958) 159 Cal.App.2d 417, 421 [324 P.2d 328].) Thus, a school district is not a distinct and independent body politic and is not free and independent of legislative control. (*Allen v. Board of Trustees* (1910) 157 Cal. 720, 725-726 [109 P. 486].)

FN7 Although state funding for education is designed to enhance local responsibility for education, the Legislature has found it undesirable to yield total monetary authority to school districts. In the Statutes of 1981, chapter 100, section 1, at page 653, it is said: "The Legislature finds and declares that as a matter of policy the setting aside of categorical support for school districts is necessary to ensure the adequate funding for programs such as the provision of textbooks, pupil transportation, teacher retirement, special education for individuals with exceptional needs, and for educationally disadvantaged youths. The Legislature supports this policy of appropriating separately funds for special purposes because it provides funds for the intended purposes of the programs and because the substantial variation from district to district in terms of financial need for the programs cannot be accommodated adequately in general school support formulas. Although this act does not appropriate funds for inflation for categorical programs, it is the intent of the Legislature that, because categorical programs provide essential educational services, these programs should receive general inflation funds as provided in the Budget Act for other state programs." Our Supreme Court has determined that under our Constitution education is uniquely important and cannot be left totally under local monetary control. (*Serrano v. Priest* (1971) 5 Cal.3d 584, 614 [96 Cal.Rptr. 601, 487 P.2d 1241].)

(3) The Legislature's power over the public school system has been variously described as exclusive, plenary, absolute, entire, and comprehensive, subject only to constitutional constraints. (*Hall v. City of Taft, supra,* 47 Cal.2d at p. 181; *Pass School Dist. v. Hollywood Dist., supra,* 156 Cal. at p. 419; *San Carlos Sch. Dist. v. State Bd. of Education* (1968) 258 Cal.App.2d 317, 324 [65 Cal.Rptr. 711]; *Town of Atherton v. Superior Court, supra,* 159 Cal.App.2d 417, 421.) Indeed, it is said that the Legislature cannot delegate ultimate responsibility over education to other public or private entities. (*Hall v. City of Taft, supra,* 47 Cal.2d at p. 181; *Piper v. Big Pine School* Dist. (1924) 193 Cal. 664, 669 [226 P. 926].) Consequently, regulation of the education system by the Legislature will be held to be controlling over any inconsistent local attempts at regulation or administration of the schools. (*Hall v. City of Taft, supra,* 47 Cal.2d at p. 181; ***1525***Esberg v. Badaracco, supra,* 202 Cal. at pp. 115- 116; *Whisman v. San Francisco Unified Sch. Dist., supra,* 86 Cal.App.3d at p. 789.) And no one may obtain rights vested against state control by virtue of local provisions, ordinances or regulations. (*Whisman v. San Francisco Unified Sch. Dist., supra,* 86 Cal.App.3d at p. 789.)

The Legislature, in the exercise of its sweeping authority over education and the school system, has the power to create, abolish, divide, merge, or alter the boundaries of school districts. (*Allen v. Board of Trustees, supra,* 157 Cal. at pp. 725-726; *Pass School Dist. v. Hollywood Dist., supra,* 156 Cal. at p. 418; *Hughes v. Ewing, supra,* 93 Cal. at p. 417.) Indeed, the state is the beneficial owner of school property and local districts hold title as trustee for the state. (*Hall v. City of Taft, supra,* 47 Cal.2d at pp. 181-182; *Chico Unified Sch. Dist. v. Board of Supervisors* (1970) 3 Cal.App.3d 852, 855 [84 Cal.Rptr. 198]; *Town of Atherton v. Superior Court, supra,* 159 Cal.App.2d at p. 421.) "School moneys belong to the state, and the apportionment of funds to a school district does not give that district a proprietary right therein." (*Butler v. Compton Junior College Dist.* (1947) 77 Cal.App.2d 719, 729 [176 P.2d 417]; see also *Gridley School District v. Stout* (1901) 134 Cal. 592, 593 [66 P. 785].) It follows that the Legislature can transfer property and apportion debts between school districts as it sees fit. (*Pass School Dist. v. Hollywood Dist., supra,* 156 Cal. at pp. 418-419; *Hughes v. Ewing, supra,* 93 Cal. at p. 417; *San Carlos Sch. Dist. v. State Bd. of Education, supra,* 258 Cal.App.2d at p. 324.)

While few will deny the critical importance of education, the needs of the public education system often conflict with other desires of the electorate, especially that of minimizing the tax burden imposed upon the populace. Fewer still would deny that financing the public educational system in this state is Byzantine in its intricacy and complexity. Public education financing involves two basic, broad, and interrelated problems: public school resource production (how the funds are raised), and public school resource deployment (how the funds are spent). (See Andrews, *Serrano II: Equal Access to School Resources and Fiscal Neutrality-A View From Washington State* (1977) 4 Hast. Const.L.Q. 425, 429, fn. 18 [hereafter *Equal Access to School Resources*].) Public school financing is complicated by such matters as whether revenue should be raised through state or local taxation or some combination of both (see *Serrano v. Priest* (1976) 18 Cal.3d 728, 747 [135 Cal.Rptr. 345, 557 P.2d 929] [hereafter *Serrano II*]; and see *Equal Access to School Resources, supra,* 4 Hast. Const.L.Q. at pp. 445-446); disparate tax base to units of average daily attendance (ADA) ratios among various districts (see *Serrano v. Priest, supra,* 5 Cal.3d at p. 592 [hereafter *Serrano I*]); the willingness (or ability) of local voters to authorize increased taxes or expenditures for education (see *Serrano II, supra,* 18 Cal.3d at p. 769); the ***1526** availability of federal funding for educational programs and the sometimes inflexible qualification criteria for such funding (see Stats. 1981, ch. 100, § 1.3, pp. 653-654); the differing needs of schools and their students (see Stats. 1981, ch. 100, § 1, p. 653); and the difficulty of determining what types of services or programs should or should not be included within the educational budget (see *Equal Access to School Resources, supra,* 4 Hast. Const.L.Q. at pp. 441-442.) Although these matters are by no means exhaustive, they do illustrate the inherent complexity involved in developing an adequate formula for school support.

In the past 20 years state funding for education has been significantly influenced by several legal and political events. The changes began in 1971, a time when the major source of school revenue was derived from local real property taxes. (*Serrano I, supra,* 5 Cal.3d at p. 592.) The state then contributed aid to school districts in two forms: "basic state aid," which was a flat financial grant per pupil per year; and "equalization aid," which was based upon the assessed valuation of property per pupil within the district. (*Id.* at p. 593.) This educational status quo was challenged in *Serrano I,* a class action in which the plaintiffs maintained that the public school financing system created disparate educational opportunities based upon wealth. It was asserted that due to a substantial dependence upon local property taxes children from wealthy districts received greater educational opportunities than children from poorer districts. [FN8] In 1971, the California Supreme Court held that wealth is a suspect classification and that education constitutes a fundamental interest and thus the state plan should be subjected to strict scrutiny under equal protection principles. (*Id.* at pp. 614-615.) The high court concluded that an educational system which produces disparities of opportunity based upon district wealth would fail to meet constitutional requirements and the action was remanded for trial of the factual allegations of the complaint. (*Id.* at p. 619.)

> FN8 It has been pointed out that the wealth of a school district will not necessarily reflect the wealth of families it serves. For example, a district might have a high assessed valuation to ADA ratio because it includes areas which are heavily developed for commercial or industrial purposes, yet serve families who live near such areas because they cannot afford to move to more affluent areas. Conversely, a suburban or rural district may serve relatively affluent students yet lack a high assessed valuation to ADA ratio because it lacks any commercially developed areas within its boundaries. In *Serrano I* the Court disregarded this possibility because it was reviewing a demurrer to a complaint which alleged that there was a correlation between the wealth of a district and its residents and for the more basic reason that it did not believe that disparities in educational opportunities could be permitted simply because they reflected the wealth of the district rather than the individual. (*Id.* at pp. 600-601.)

After *Serrano I,* the Legislature modified the formula for state education aid in an effort to eliminate its objectionable features. The parties stipulated that the modified formula should be considered at trial. (***1527***Serrano II, supra,* 18 Cal.3d at pp. 736-737.) Also during the pendency of the trial court proceedings, the United States Supreme Court rendered its

opinion in *San Antonio School District v. Rodriguez* (1973) 411 U.S. 1 [36 L.Ed.2d 16, 93 S.Ct. 1278]. There, the Texas public school financing system, which was substantially similar to ours, was upheld by the federal high court. The court concluded that the Texas system did not result in a suspect classification based upon wealth and did not affect a fundamental interest and thus needed only to meet the "rational relationship" test under equal protection principles. (*Id.* at pp. 33-34, 48-55, 61-62 [36 L.Ed.2d at pp. 42-43, 51-56, 59-60].) Thereafter the *Serrano* trial court held that California's public education financing scheme violated independent state equal protection guarantees. In *Serrano II,* the California Supreme Court affirmed the judgment of the trial court which gave the state six years for bringing the public school financing system into constitutional compliance. (18 Cal.3d at pp. 749, 777.)

Meanwhile, at the June 1978 Primary Election the voters enacted Proposition 13, which added article XIII A to the California Constitution. That measure changed California's real property tax system from a current value system to an acquisition value system and limited the tax rates which could be imposed upon real property. (See *Amador Valley Joint Union High Sch. Dist. v. State Bd. of Equalization* (1978) 22 Cal.3d 208, 220, 238 [149 Cal.Rptr. 239, 583 P.2d 1281].) In an effort to mitigate the effects of article XIII A upon local governments and schools, the Legislature enacted a bailout bill to distribute surplus state funds to local agencies. (See *Sonoma County Organization of Public Employees v. County of Sonoma* (1979) 23 Cal.3d 296, 297 [152 Cal.Rptr. 903, 591 P.2d 1].) Article XIII A also forced the state to assume a greater responsibility for financing the public school system. (§ 41060.)

In the November 1979 Special Statewide Election the voters enacted Proposition 4 to add article XIII B to the California Constitution. Article XIII B imposes limitations upon the power of all California governmental entities to appropriate funds for expenditures. (Cal. Const., art. XIII B, §§ 1, 8, subds. (a), (b).) Revenues received by any governmental entity in excess of its appropriations limit must be returned by a revision of tax rates or fee schedules within the next two fiscal years. (Cal. Const., art. XIII B, § 2.) The measure also provides that whenever the state mandates a new program or higher level of service upon local governments, it must provide a subvention of funds to reimburse local government for the added costs. (Cal. Const., art. XIII B, § 6.)

It can be seen that as a result of the events of the 1970's the already difficult task of financing public education was made even more formidable. ***1528** As a result of article XIII A, the state was forced to assume a greater share of the responsibility for funding education. Any formula for funding education would be required to meet equal protection principles as set forth in the *Serrano* decisions. And as a result of article XIII B, there was certain to be greater competition for the state revenues within the appropriations limit. It was against this background that the voters enacted Proposition 98 at the November 1988 General Election.

III Matters Not in Issue

The question presented in this appeal can best be addressed when it is narrowed to its appropriate scope by elimination of what is not involved. We are not here concerned with whether the Child Care and Development Services Act in fact completely entails an educationally related program. (4) While the Legislature is given broad authority over education, it cannot divert education funds for other purposes. (*Crosby v. Lyon* (1869) 37 Cal. 242, 245.) But plaintiffs did not and cannot reasonably contend that the child care program under attack does not at least in part serve an educational purpose. Education is a broad and comprehensive matter. (*Board of Trustees v. County of Santa Clara* (1978) 86 Cal.App.3d 79, 84 [150 Cal.Rptr. 109].) It "[c]omprehends not merely the instruction received at school or college, but the whole course of training; moral, religious, vocational, intellectual, and physical. Education may be particularly directed to either the mental, moral, or physical powers and faculties, but in its broadest and best sense it relates to them all. [It includes the] [a]cquisition of all knowledge tending to train and develop the individual." (Black's Law Dict. (5th ed. 1979) p. 461, col. 2.) Our Constitution places a similarly broad meaning upon education when it requires the Legislature to "encourage by all suitable means the promotion of intellectual, scientific, moral, and agricultural improvement." (Cal. Const., art. IX, § 1.) [FN9] Moreover, under our Constitution the Legislature is given broad discretion in determining the types of programs and services which further the purposes of education. (*Veterans' Welfare Board v. Riley* (1922) 189 Cal. 159, 164-166 [208 P. 678, 22 A.L.R.

1531]; *University of So. California v. Robbins* (1934) 1 Cal.App.2d 523, 528 [37 P.2d 163].) It cannot be said that the Legislature has been arbitrary and unreasonable in its determination that the Child Care and Development Services Act furthers the purposes of public education.

> FN9 While "education" is sufficiently broad to include religious training, specific provisions of the state and federal Constitutions exclude religious training from governmental education programs. (U.S. Const., Amend. I; Cal. Const., art. I, § 4, art. IX, § 8.)

We are not here concerned with the question whether the Legislature's implementation of Proposition 98 is partially invalid or invalid as applied. ***1529** Plaintiffs claim that the inclusion of funding for the Child Care and Development Services Act within the Proposition 98 funding requirement is invalid in toto and on its face. They argue that Proposition 98 funds must be transferred to school districts which then have total discretion to determine how those funds should be spent. They did not present evidence or argument to establish that portions of the Child Care and Development Act lack a sufficient nexus to education to be included in education funding or that the manner in which it is carried out by the Superintendent of Public Instruction does not support and further the purpose of education. (5) "Because this is a challenge to the facial validity of the [the statute], our task is to determine whether the statute can constitutionally be applied. 'To support a determination of facial unconstitutionality, voiding the statute as a whole, petitioners cannot prevail by suggesting that in some future hypothetical situation constitutional problems may possibly arise as to the particular *application* of the statute. ... Rather, petitioners must demonstrate that the act's provisions inevitably pose a present total and fatal conflict with applicable constitutional prohibitions.' " (*Arcadia Unified School Dist. v. State Dept. of Education* (1992) 2 Cal.4th 251, 267 [5 Cal.Rptr.2d 545, 825 P.2d 438], italics in original.)

We are not here concerned with the advisability or wisdom of the Legislature's decision. [FN10] (6) Under our form of government, policymaking authority is vested in the Legislature and neither arguments as to the wisdom of an enactment nor questions as to the motivation of the Legislature can serve to invalidate particular legislation. (*City and County of San Francisco v. Cooper* (1975) 13 Cal.3d 898, 913 [120 Cal.Rptr. 707, 534 P.2d 403]; *County of Los Angeles v. Superior Court* (1975) 13 Cal.3d 721, 727 [119 Cal.Rptr. 631, 532 P.2d 495]; *Galvan v. Superior Court* (1969) 70 Cal.2d 851, 869 [76 Cal.Rptr. 642, 452 P.2d 930]; *Wilke & Holzheiser, Inc. v. Dept. of Alcoholic Bev. Control* (1966) 65 Cal.2d 349, 359 [55 Cal.Rptr. 23, 420 P.2d 735].) As a court of review our role is limited to determining whether the Legislature's choice is constitutionally prohibited. (*Ibid.*)

> FN10 For this reason we deny the request of amici curiae that we take judicial notice of certain legislative materials. The submitted documents tend to establish the value of, and the need for, funding for child care and development programs. Those are matters within the Legislature's prerogative and we may not superintend its determination.

Furthermore, we are not concerned here with statutory inconsistency. Instead, the issue relates solely to the construction of constitutional provisions. Proposition 98 added certain statutory provisions to the Education Code, Section 13 of Proposition 98 provides: "No provision of this Act may be changed except to further its purposes by a bill passed by a vote of two-thirds of the membership of both houses of the Legislature and signed ***1530** by the Governor." The legislation challenged by plaintiffs was enacted by the requisite two-thirds majorities and signed by the Governor. Accordingly, it is the constitutional provisions of Proposition 98 which are at issue in this case.

Finally, we are not here concerned with article XVI, section 8.5 of the Constitution, also added by Proposition 98. In that provision the voters determined that, within certain limits, state revenues in excess of the state appropriations limit should be used to improve education in the elementary and secondary schools and community colleges rather than be returned to the populace. The measure is self-executing; it requires no legislative action. Each year the Controller must transfer and allocate such excess revenues to the state school fund restricted for school districts and community colleges, and then must allocate those funds to the districts and community colleges on a per-enrollment basis. (Cal. Const., art. XVI, § 8.5, subds. (a), (c).) Those sums may be expended solely for purposes of instructional improvement and accountability. (Cal. Const., art. XVI, § 8.5, subd. (d).)

Article XVI, section 8.5 is an entirely different matter than article XVI, section 8. Section 8.5 deals with revenues which are constitutionally beyond the Legislature's spending prerogatives under article XIII B. Section 8.5 does not extend the Legislature's spending power to excess revenues; rather it imposes a self-executing, ministerial duty upon the Controller to transfer such excess revenues to a restricted portion of the school fund and thence to allocate such revenues to school districts and community college districts on a per-enrollment basis. Section 8.5 specifically restricts the purposes for which those funds may be expended. The specific provisions of section 8.5 would prohibit the Legislature from retaining and utilizing those funds for purposes of the Child Care and Development Services Act.

IV Issue on Appeal

In this case we are concerned with whether funding for the Child Care and Development Services Act is on its face beyond the educational funding requirements of article XVI, section 8, of the Constitution as enacted by Proposition 98.

Defendant Honig contends that the Legislature has plenary power to define how California's public school system operates as well as what entities constitute that system. Given that absolute authority, which remains undiminished by the enactment of Proposition 98, the Legislature was empowered to include funds for early childhood education and child development within the minimum funding guarantee established by that initiative. ***1531** He argues that the trial court, contrary to the settled and fundamental principles of constitutional adjudication, misconstrued the critical phrase "moneys to be applied by the State for the support of school districts" to be limited to funds directly allocated to school districts. In his view, "the definition of 'school districts' set forth in Proposition 98 is far from precise. Its uncertainty in fact made it necessary for the Legislature to refine and clarify which entities in the public school system were to be counted as falling within its minimum funding guarantee. This the Legislature did, three times. [¶] More importantly, nothing in Proposition 98 or any other provision of law either expressly or implicitly restricted the Legislature from including [the California Department of Education's] direct provision of child development services through contracts with private agencies within that guarantee. Since 1972, the Legislature has determined that private agencies, as well as public agencies, have been integral to the statewide provision of such services under the Child Development Act, and thereby to California's public school system. Accordingly, the Legislature's implementation of Proposition 98 in Sections 41202(f) and 8203.5(c) was not only possible and reasonable, it was consistent with its prior acts which made private agency child development services a recognized part of the public school system."

(7a) Plaintiffs counter that the plain language of Proposition 98 demonstrates that the funds must go directly to school districts and not to private entities contracting with the Department of Education. As they read the key phrase of the initiative, "monies to be applied by the State for the support of school districts" means funds "allocated to" or "appropriated for" school districts. Consequently, so their argument goes, the inclusion of non-school-district programs within the initiative's guarantee nullifies the central purpose of Proposition 98.

Real parties in interest argue alternatively that child development programs funded directly by the Department of Education are included within the phrase "school districts" but even if they are not, the Legislature has the power to amend the statutory definition of "school districts" contained in Proposition 98.

In analyzing these constitutional contentions we are bound by several fundamental principles of constitutional adjudication. (8) " 'Unlike the federal Constitution, which is a grant of power to Congress, the California Constitution is a limitation or restriction on the powers of the Legislature. Two important consequences flow from this fact. First, the entire lawmaking authority of the state, except the people's right of initiative and referendum, is vested in the Legislature, and that body may exercise any and all legislative powers *which are not expressly, or by necessary implication* ***1532** *denied to it by the Constitution. ...* [¶] Secondly, all intendments favor the exercise of the Legislature's plenary authority: "If there is any doubt as to the Legislature's power to act in any given case, the doubt should be resolved in favor of the Legislature's action. *Such restrictions and limitations* [*imposed by the Constitution*] *are to be construed strictly, and are not to be extended to include matters not covered by the language used.*" ' (Italics added.)"

(*Pacific Legal Foundation v. Brown* (1981) 29 Cal.3d 168, 180 [172 Cal.Rptr. 487, 624 P.2d 1215], citing *Methodist Hosp. of Sacramento v. Saylor* (1971) 5 Cal.3d 685, 691 [97 Cal.Rptr. 1, 488 P.2d 161], citations omitted.)

(9) Another principle of constitutional adjudication requires that the constitutional provisions added by Proposition 98 be considered in light of all other relevant provisions of the Constitution, including those that contain, define, and limit the status of school districts and their relationship to the state. "The initiative amendment to the [C]onstitution itself must be interpreted in harmony with the other provisions of the organic law of this state of which it has become a part. To construe it otherwise would be to break down and destroy the barriers and limitations which the [C]onstitution, read as a whole, has cast about legislation, both state and local." (*Galvin v. Board of Supervisors* (1925) 195 Cal. 686, 692 [235 P. 450]. See also *Edler v. Hollopeter* (1931) 214 Cal. 427, 430 [6 P.2d 245].) In *Galvin v. Board of Supervisors, supra,* 195 Cal. 686, the petitioners sought to compel a county board of supervisors to submit an initiative ordinance to the local voters. The Supreme Court held that the provisions of the Constitution which reserve the initiative power to local voters must be construed in light of other provisions which contain, define, and limit the scope of permissible local legislation. (*Id.* at p. 692.) This precluded local voters from accomplishing by initiative that which was beyond the powers of the local board of supervisors. (*Id.* at p. 693. See also *Giddings v. Board of Trustees* (1913) 165 Cal. 695, 698 [133 P. 479].) That principle of construction applies here.

(7b) When we consider Proposition 98 in light of other provisions of our Constitution, ly article IX, which is devoted to education, and the long, unbroken line of authorities interpreting such provisions, we must reject an underlying premise of plaintiffs' argument. According to plaintiffs, the challenged legislation is invalid because it divests school districts of complete and total control over the funds the state is required to devote to education under Proposition 98. As plaintiffs put it: "Of course, if a school district decides to use part of its funding for child care and development programs, it is entitled to do so. It is also entitled to ignore child care and development altogether, and use its funding for other programs that it considers to be a higher priority." Nothing in Proposition 98 states or implies ***1533** that school districts are to have the autonomy claimed by plaintiffs. Article IX, section 5, of our Constitution still provides for one system of common schools, which implies a "unity of purpose as well as an entirety of operation, and the direction to the [L]egislature to provide 'a' system of common schools means *one* system which shall be applicable to all the common schools within the state." (*Kennedy v. Miller* (1893) 97 Cal. 429, 432 [32 P. 558], italics original; see also *Serrano I, supra,* 5 Cal.3d at p. 595.)

Since Proposition 98 did not alter the state's role in education, the Constitution continues to make education and the operation of the public schools a matter of statewide rather than local or municipal concern. (*Hall v. City of Taft, supra,* 47 Cal.2d at p. 179; *Esberg v. Badaracco, supra,* 202 Cal. at pp. 115-116; *Kennedy v. Miller, supra,* 97 Cal. at p. 431; *Whisman v. San Francisco Unified School Dist., supra,* 86 Cal.App.3d at p. 789.) Local school districts remain agencies of the state rather than independent, autonomous political bodies. (*Allen v. Board of Trustees, supra,* 157 Cal. at pp. 725-726.) The Legislature's control over the public education system is still plenary. (*Hall v. City of Taft, supra,* 47 Cal.2d at pp. 180-181; *Pass School Dist. v. Hollywood Dist., supra,* 156 Cal. at p. 419; *San Carlos Sch. Dist. v. State Bd. of Education, supra,* 258 Cal.App.2d at p. 324; *Town of Atherton v. Superior Court, supra,* 159 Cal.App.2d at p. 421.) The Legislature still has ultimate and nondelegable responsibility for education in this state. (*Hall v. City of Taft, supra,* 47 Cal.2d at p. 181; *Piper v. Big Pine School Dist., supra,* 193 Cal. at p. 669.) All school properties are still held in trust with the state as the beneficial owner. (*Hall v. City of Taft, supra,* 47 Cal.2d at p. 182; *Chico Unified Sch. Dist. v. Board of Supervisors, supra,* 3 Cal.App.3d at p. 855; *Town of Atherton v. Superior Court, supra,* 159 Cal.App.2d at p. 421.) And school districts still do not have a proprietary interest in moneys which are apportioned to them. (*Gridley School District v. Stout, supra,* 134 Cal. at p. 593; *Butler v. Compton Junior College Dist., supra,* 77 Cal.App.2d at p. 729.) Of course, if the electorate chose to alter our constitutional scheme for education it could do so. Education could be made a matter of local concern and school districts could be given greater autonomy. But we cannot conclude that such a major governmental restructuring was accomplished by implication in a measure dealing with public finance which spoke not at all on such matters.

5 Cal.App.4th 1513, 7 Cal.Rptr.2d 699, 74 Ed. Law Rep. 165
(Cite as: 5 Cal.App.4th 1513)

In light of the Legislature's plenary authority over education and its legal relationship with school districts, we do not find Proposition 98 to be clear and unambiguous as asserted by plaintiffs. The measure establishes a minimum sum for "the monies to be applied by the state for the support of school districts and community college districts ...." Rather than expressly divesting the state of its traditional authority over education funds, ***1534** this provision would appear to retain state control since the moneys are to be "applied by the state." The measure does not expressly restrict the Legislature's plenary authority nor does it grant to school districts exclusive control over education funds. Had such a result been intended there are any number of linguistic formulations which could have so specified with adequate clarity. As a court, we cannot impose limitations or restrictions upon the Legislature's prerogatives in the absence of language reasonably calculated to require such a result when subjected to strict construction. (*Pacific Legal Foundation v. Brown, supra,* 29 Cal.3d at p. 180.)

Given plaintiffs' facial attack, it is enough to hold, as we do, that legislative programs which advance, and hence support, the educational mission of school districts and community college districts may constitutionally be included within the funding guarantee of Proposition 98. It cannot be said that the Child Care and Development Services Act totally and on its face fails to meet this test. [FN11] This is as far as we need go in this case. The plaintiffs asserted, and the judgment holds, that only funds allocated to and administered by school districts satisfy the requirements of Proposition 98. Such a conclusion improperly grants school districts a proprietary interest in school funds and gives them a degree of political autonomy in contravention to the Legislature's long-standing and well-established plenary authority over education in this state. Since we do not find such a fundamental governmental restructuring in Proposition 98, we must reject the reasoning of the trial court and reverse its judgment.

FN11 In reaching this conclusion we reject real parties' contention that the Legislature has impliedly defined programs under the Child Care and Development Services Act as being within the definition of "school districts." Section 41302.5 defines the agencies which are included within the phrase "school district" as used in Proposition 98. In implementing Proposition 98 the Legislature referred to that section but did not see fit to amend it to include child care and development programs. (§ 41202, subd. (f).) And in section 8203.5, subdivision (c), the Legislature included Child Care and Development Services Act funding within the Proposition 98 guarantee "whether or not those funds are allocated to school districts ...." By so providing the Legislature clearly chose not to include child care and development programs within the definition of school districts.

Summary and Conclusion

In this state, education is a matter of statewide rather than local or municipal concern. Local school districts are agencies of the state subject to the Legislature's plenary authority over education. Local school districts do not have political autonomy and have no proprietary interest in the properties or moneys they hold in trust for the state. Proposition 98 set forth minimum sums to be applied by the state for the support of school districts and community colleges. This measure does not deprive the Legislature of ***1535** its plenary authority over education and does not grant school districts political autonomy or a proprietary interest in the minimum funding to be applied by the state for support of school districts and community colleges. Accordingly, we reject the assertion that all funds within the minimum funding requirements of Proposition 98 must be allocated to, and administered by, school districts. Our opinion goes no further. While the Legislature's authority over education and education funding is broad, it is not unlimited. Our conclusion that Proposition 98 did not divest the Legislature of its traditional authority over education should not be construed to foreclose specific challenges to the Legislature's decisions based upon appropriate factual and legal showings. We hold only that the decision to include funding for the Child Care and Development Services Act within the Proposition 98 minimum funding guarantees is not in toto and on its face beyond the Legislature's constitutional authority.

Disposition

The judgment is reversed. Appellant Honig shall recover his costs on appeal.

Marler, J., and Nicholson, J., concurred.

5 Cal.App.4th 1513, 7 Cal.Rptr.2d 699, 74 Ed. Law Rep. 165
(Cite as: 5 Cal.App.4th 1513)

A petition for a rehearing was denied May 27, 1992, and the petition of plaintiffs and respondents for review by the Supreme Court was denied July 30, 1992. Mosk, J., was of the opinion that the petition should be granted. ***1536**

Appendix

Proposition 98 provides in full:

Section 1. This Act shall be known as "The Classroom Instructional and Accountability Act."

Section 2. Purpose and Intent. The People of the State of California find and declare that:

(a) California schools are the fastest growing in the nation. Our schools must make room for an additional 130,000 students every year.

(b) Classes in California's schools have become so seriously overcrowded that California now has the largest classes of any state in the nation.

(c) This act will enable Californians to once again have one of the best public school systems in the nation.

(d) This act will not raise taxes.

(e) It is the intent of the People of California to ensure that our schools spend money where it is most needed. Therefore, this Act will require every local school board to prepare a School Accountability Report Card to guarantee accountability for the dollars spent.

(f) This Act will require that excess state funds be used directly for classroom instructional improvement by providing for additional instructional materials and reducing class sizes.

(g) This Act will establish a prudent state reserve to enable California to set aside funds when the economy is strong and prevent cutbacks or tax increases in times of severe need or emergency.

Section 3. Section 5.5 is hereby added to Article XIIIB as follows:

Section 5.5 Prudent State Reserve. The Legislature shall establish a prudent state reserve fund in such amount as it shall deem reasonable and necessary. Contributions to, and withdrawals from, the fund shall be subject to the provisions of Section 5 of this Article.

Section 4. Section 2 of Article XIIIB is hereby amended to read as follows:

Section 2. Revenues in Excess of Limitation. ***1537**

(a) All revenues received by the state in excess of that amount which is appropriated by the state in compliance with this Article, and which would otherwise by required, pursuant to subdivision (b) of this Section, to be returned by a revision of tax rates or fee schedules within the next two subsequent fiscal years, shall be transferred and allocated pursuant to Section 8.5 of Article XVI up to the maximum amount permitted by that section.

(b) Except as provided in subdivision (a) of this Section, revenues received by any entity of government in excess of that amount which is appropriated by such entity in compliance with this Article during the fiscal year shall be returned by a revision of tax rates or fee schedules within the next two subsequent fiscal years.

Section 5. Section 8 of Article XVI is hereby amended to read as follows:

Section 8. School Funding Priority

(a) From all state revenues there shall first be set apart the monies to be applied by the state for support of the public school system and public institutions of higher education.

(b) Commencing with the 1988-89 fiscal year, the monies to be applied by the state for the support of school districts and community college districts shall not be less than the greater of:

(1) The amount which, as a percentage of the State General Fund revenues which may be appropriated pursuant to Article XIIIB, equals the percentage of such State General Fund revenues appropriated for school districts and community college districts, re-

spectively, in fiscal year 1986-87; or

(2) The amount required to ensure that the total allocations to school districts and community college districts from the State General Fund proceeds of taxes appropriated pursuant to Article XIIIB and allocated local proceeds of taxes shall not be less than the total amount from these sources in the prior year, adjusted for increases in enrollment, and adjusted for changes in the cost of living pursuant to the provisions of Article XIIIB.

(c) The provisions of subdivision (b) of this Section may be suspended for one year by the enactment of an urgency statute pursuant to Section 8 of Article IV, provided that no urgency statute enacted under this subdivision may be made part of or included within any bill enacted pursuant to Section 12 of Article IV. ***1538**

Section 6. Section 8.5 of Article XVI is hereby added as follows:

Section 8.5. Allocations to State School Fund

(a) In addition to the amount required to be applied for the support of school districts and community colleges pursuant to Section 8(b), the Controller shall during each fiscal year transfer and allocate all revenues available pursuant to subdivision (a) of Section 2 of Article XIIIB, up to a maximum of four percent (4%) of the total amount required pursuant to Section 8(b) of this Article, to that portion of the State School Fund restricted for elementary and high school purposes, and to that portion of the State School Fund restricted for community college purposes, respectively, in proportion to the enrollment in school districts and community college districts respectively.

(1) With respect to funds allocated to that portion of the State School Fund restricted for elementary and high school purposes, no transfer or allocation of funds pursuant to this section shall be required at any time that the Director of Finance and the Superintendent of Public Instruction mutually determine that current annual expenditures per student equal or exceed the average annual expenditure per student of the ten states with the highest annual expenditures per student for elementary and high schools, and that average clas [*sic*] size equals or is less than the average class size of the ten states with the lowest clas [*sic*] size for elementary and high schools.

(2) With respect to funds allocated to that portion of the State School Fund restricted for community college purposes, no transfer or allocation of funds pursuant to this section shall be required at any time that the Director of Finance and the Chancellor of Community Colleges mutually determine that current annual expenditures per student for community colleges in this state equal or exceed the average annual expenditure per student of the ten states with the highest annual expenditures per student for community colleges.

(b) Notwithstanding the provisions of Article XIIIB, funds allocated pursuant to this section shall not constitute appropriations subject to limitation, but appropriation limits established in Article XIIIB shall be annually increased for any such allocations made in the prior year.

(c) From any funds transferred to the State School Fund pursuant to paragraph (a) of this Section, the Controller shall each year allocate to each school district and community college district an equal amount per enrollment in school districts from the amount in that portion of the State ***1539** School Fund restricted for elementary and high school purposes and an equal amount per enrollment in community college districts from that portion of the State School Fund restricted for community college purposes.

(d) All revenues allocated pursuant to subdivision (a) of this section, together with an amount equal to the total amount of revenues allocated pursuant to subdivision (a) of this section in all prior years, as adjusted if required by Section 8(b)(2) of Article XVI, shall be expended solely for the purposes of instructional improvement and accountability as required by law.

(e) Any school district maintaining an elementary or secondary school shall develop and cause to be prepared an annual audit accounting for such funds and shall adopt a School Accountability Report Card for each school.

Section 7. Section 33126 is hereby added to Article 2 of Chapter 2 of Part 20 of Division 2 of Title 2 of the Education Code to read as follows:

5 Cal.App.4th 1513, 7 Cal.Rptr.2d 699, 74 Ed. Law Rep. 165
(Cite as: 5 Cal.App.4th 1513)

33126. School Accountability Report Card

In order to promote a model statewide standard of instructional accountability and conditions for teaching and learning, the Superintendent of Public Instruction shall by March 1, 1989, develop and present to the Board of Education for adoption a statewide model School Accountability Report Card.

(a) The model School Accountability Report Card shall include, but is not limited to, assessment of the following school conditions:

(1) Student achievement in and progress toward meeting reading, writing, arithmetic and other academic goals.

(2) Progress toward reducing drop-out rates.

(3) Estimated expenditures per student, and types of services funded.

(4) Progress toward reducing class sizes and teaching loads.

(5) Any assignment of teachers outside their subject areas of competence.

(6) Quality and currency of textbooks and other instructional materials.

(7) The availability of qualified personnel to provide counseling and other student support services. ***1540**

(8) Availability of qualified substitute teachers.

(9) Safety, cleanliness, and adequacy of school facilities.

(10) Adequacy of teacher evaluations and opportunities for professional improvement.

(11) Classroom discipline and climate for learning.

(12) Teacher and staff training, and curriculum improvement programs.

(13) Quality of school instruction and leadership.

(b) in developing the statewide model School Accountability Report, the Superintendent of Public Instruction shall consult with a Task Force on Instructional Improvement, to be appointed by the Superintendent, composed of practicing classroom teachers, school administrators, parents, school board members, classified employees, and educational research specialists, provided that the majority of the task force shall consist of practicing classroom teachers.

Section 8. Section 35256 is hereby added to Article 8 of Chapter 2 of Part 20 of Division 3 of Title 2 of the Education Code to read as follows:

35256. School Accountability Report Card

The governing board of each school district maintaining an elementary or secondary school shall by September 30, 1989, or the beginning of the school year develop and cause to be implemented for each school in the school district a School Accountability Report Card.

(a) The School Accountability Report Card shall include, but is not limited to, the conditions listed in Education Code Section 33126.

(b) Not less than triennially, the governing board of each school district shall compare the content of the school district's School Accountability Report Card to the model School Accountability Report Card adopted by the State Board of Education. Variances among school districts shall be permitted where necessary to account for local needs.

(c) The Governing Board of each school district shall annually issue a School Accountability Report Card for each school in the school district, publicize such reports, and notify parents or guardians of students that a copy will be provided upon request. ***1541**

Section 9. Section 41300.1 is hereby added to Article 1 of Chapter 3 of Part 24 of Division 3 of Title 2 of the Education Code to read as follows:

41300.1 Instructional Improvement and Ac-

countability.

The amount transferred to Section A of the State School Fund pursuant to Section 8.5 of Article XVI of the State Constitution shall to the maximum extent feasible be expended or encumbered during the fiscal year received and solely for the purpose of instructional improvement and accountability.

(a) For the purpose of this section, "instructional improvement and accountability" shall mean expenditures for instructional activities for school sites which directly benefit the instruction of students, and shall be limited to expenditures for the following:

(1) Lower pupil-teacher ratios until a ratio is attained of not more than 20 students per teacher providing direct instruction in any class, and until a goal is attained of total teacher loads of less than 100 total students per teacher in all secondary school classes in academic subjects as defined by the Superintendent of Public Instruction.

(2) Instructional supplies, instructional equipment, instructional materials and support services necessary to improve school conditions.

(3) Direct student services needed to ensure that each student makes academic progress necessary to be promoted to the next appropriate grade level.

(4) Staff development which improves services to students or increases the quality and effectiveness of instructional staff, designed and implemented by classroom teachers and other participating school district personnel, including the school principal, with the aid of outside personnel as necessary. Classroom teachers shall comprise the majority of any group designated to design such staff development programs for instructional personnel.

(5) Compensation of teachers.

(b) Funds transferred to each school district, pursuant to this section shall be deposited in a separate account and shall be maintained and appropriated separately from funds from all other sources. Funds appropriated pursuant to this section shall supplement other resources of each school district and shall not supplant any other funds. ***1542**

Section 10. Section 14020.1 is hereby added to Article 1 Chapter 1 of Part 9 of Division 1 of Title 1 of the Education Code to read as follows:

14020.1. Instructional Improvement and Accountability.

The amount transferred to Section B of the State School Fund pursuant to Section 8.5 of Article XVI of the State Constitution shall to the maximum extent feasible be expended or encumbered during the year received solely for the purposes of instructional improvement and accountability.

(a) For the purposes of this section, "instructional improvement and accountability" shall mean expenditures for instructional activities for college sites which directly benefit the instruction of students and shall be limited to expenditures for the following:

(1) Programs which require individual assessment and counseling of students for the purpose of designing a curriculum for each student and establishing a period of time within which to achieve the goals of that curriculum and the support services needed to achieve these goals, provided that any such program shall first have been approved by the Board of Governors of Community Colleges.

(2) Instructional supplies, instructional equipment, and instructional materials and support services necessary to improve campus conditions.

(3) Faculty development which improves instruction and increases the quality and effectiveness of instructional staff, as mutually determined by faculty and the community college district governing board.

(4) Compensation of faculty.

(b) Funds transferred to each community college district pursuant to this section shall be deposited in a separate account and shall be maintained and appropriated separately from funds from all other sources. Funds appropriated pursuant to this section shall supplement other resources of each community college district and shall not supplant funds appropriated from any other source.

Section 11. Section 14022 is added to the Education Code to read as follows:

14022. (a) For the purposes of Section 8 and Section 8.5 of Article XVI of the California Constitution, "enrollment" shall mean: ***1543**

(1) In community college districts, full-time equivalent students receiving services, and

(2) In school districts, average daily attendance when students are counted as average daily attendance and average daily attendance equivalents for services not counted in average daily attendance.

(b) Determination of enrollment shall be based upon actual data from prior years and for the next succeeding year such enrollments shall be estimated enrollments adjusted for actual data as actual data becomes available.

Section 12. Section 41302.5 is added to the Education Code to read as follows:

41302.5. For the purposes of Section 8 and Section 8.5 of Article XVI of the California Constitution, "school districts" shall include county boards of education, county superintendents of schools and direct elementary and secondary level instructional services provided by the State of California.

Section 13. No provision of this Act may be changed except to further its purposes by a bill passed by a vote of two-thirds of the membership of both houses of the Legislature and signed by the Governor.

Section 14. Severability

If any provision of this Act, or the application of any provision of this Act to any person or circumstance, shall be held invalid, the remainder of this Act, to the extent that it can be given effect, shall not be affected thereby, and to this end the provisions of this Act are severable.

Court of Appeal, Third District, California.
KAUFMAN & BROAD COMMUNITIES, INC. et al., Cross–Complainants and Respondents,
v.
PERFORMANCE PLASTERING, INC., Cross–Defendant and Appellant.

No. C049391.
Oct. 3, 2005.

Background: On appeal from decision of the Superior Court, No. 03AS03133, appellant moved for the Court of Appeal to take judicial notice of legislative history of amendment to ambiguous statute.

Holdings: The Court of Appeal, Sims, J., held that:
(1) Court would deny judicial notice of personal view of member of assembly;
(2) Court would grant judicial notice of Assembly Judiciary Committee Report and Senate Judiciary Committee Report; and
(3) Court would grant judicial notice of three enrolled bill reports.

Motion granted in part, denied in part.

Opinion, 33 Cal. Rptr.3d 362, vacated.

OPINION ON REHEARING OF RULING ON MOTION FOR JUDICIAL NOTICE OF LEGISLATIVE HISTORY DOCUMENTS

SIMS, J.

***29** Pursuant to rule 22(a) of the California Rules of Court, appellant Performance Plastering, Inc., has moved this court to take judicial notice of various documents that, in the view of appellant, constitute cognizable legislative history of a 1998 amendment to Revenue and Taxation Code section 19719 (Assembly Bill 1950 (AB 1950)). (Stats.1998, ch. 856, § 2.)

I

133 Cal.App.4th 26, 34 Cal.Rptr.3d 520, 05 Cal. Daily Op. Serv. 8754, 2005 Daily Journal D.A.R. 11,938
(Cite as: 133 Cal.App.4th 26, 34 Cal.Rptr.3d 520)

Legislative History Generally

Before turning to the specifics of appellant's request for judicial notice, we have some general comments about requests for judicial notice of legislative history received by this court.

Many attorneys apparently believe that every scrap of paper that is generated in the legislative process constitutes the proper subject of judicial notice. They are aided in this view by some professional legislative intent services. Consequently, it is not uncommon for this court to receive motions for judicial notice of documents that are tendered to the court in a form resembling a telephone book.[FN1] The various documents are not segregated and no attempt is made in a memorandum of points and authorities to justify each request for judicial notice. This must stop. And the purpose of this opinion is to help attorneys to better understand the role of legislative history and to encourage them to request judicial notice only of documents that constitute cognizable legislative history.

FN1. Appellant's motion was not one of these; rather, each document was separately tabbed.

[1] Preliminarily, we note that resort to legislative history is appropriate only where statutory language is ambiguous. As the California Supreme Court has said, "Our role in construing a statute is to ascertain the Legislature's intent so as to effectuate the purpose of the law. [Citation.] In determining intent, we look first to the words of the statute, giving the language its usual, ordinary meaning. If there is no ambiguity in the language, we presume the Legislature meant what it said, and the plain meaning of the statute governs. [Citation.]" (*Hunt v. Superior Court* (1999) 21 Cal.4th 984, 1000, 90 Cal.Rptr.2d 236, 987 P.2d 705, followed in *Curle v. Superior Court* (2001) 24 Cal.4th 1057, 1063, 103 Cal.Rptr.2d 751, 16 P.3d 166; accord: *Hoechst Celanese Corp. v. Franchise Tax Bd.* (2001) 25 Cal.4th 508, 519, 106 Cal.Rptr.2d 548, 22 P.3d 324.) Thus, "[o]nly when the language of a statute is susceptible to more than one reasonable construction ***30** is it appropriate to turn to extrinsic aids, including the legislative history of the measure, to ascertain its meaning." (*Diamond Multimedia Systems, Inc. v. Superior Court* (1999) 19 Cal.4th 1036, 1055, 80 Cal.Rptr.2d 828, 968 P.2d 539; followed in *People v. Eden Council for Hope & Opportunity* (1999) 19 Cal.4th 1106, 1119–1120, 81 Cal.Rptr.2d 471, 969 P.2d 564, and authorities cited therein; *Professional Engineers in Cal. Government v. State Personnel Bd.* (2001) 90 Cal.App.4th 678, 688–689, 109 Cal.Rptr.2d 375, but see *Kulshrestha v. First Union Commercial Corp.* (2004) 33 Cal.4th 601, 613, fn. 7, 15 Cal.Rptr.3d 793, 93 P.3d 386.)

Nonetheless, we will not require a party moving for judicial notice of legislative history materials to demonstrate the ambiguity of the subject statute at this juncture. This is so for two reasons. First, the ambiguity *vel non* of a statute will often be the central issue in a case, and parties would incur needless expense briefing the issue twice—once in a motion for judicial notice and again in a party's brief on the merits. Second, motions for judicial notice of legislative history materials are decided by writ panels of three justices who may not be the justices later adjudicating the case on the merits. The panel adjudicating the case on the merits should not be stuck with an earlier determination, by a different panel, as to the ambiguity *vel non* of a statute.

Even though we will grant motions for judicial notice of legislative history materials without a showing of statutory ambiguity, we do so with the understanding that the panel ultimately adjudicating the case may determine that the subject statute is unambiguous, so that resort to legislative history is inappropriate.

[2] Even where statutory language is ambiguous, and resort to legislative history is appropriate, as a general rule in order to be cognizable, legislative history must shed light on the collegial view of the Legislature *as a whole.* (See *California Teachers Assn. v. San Diego Community College Dist.* (1981) 28 Cal.3d 692, 701, 170 Cal.Rptr. 817, 621 P.2d 856.) Thus, to pick but one example, our Supreme Court has said, "We have frequently stated ... that the statements of an individual legislator, including the author of a bill, are generally not considered in construing a statute, as the court's task is to ascertain the intent of the Legislature as a whole in adopting a piece of legislation. [Citations.]" (*Quintano v. Mercury Casualty Co.* (1995) 11 Cal.4th 1049, 1062, 48 Cal.Rptr.2d 1, 906

P.2d 1057.)

[3] ***31** In order to help this court determine what constitutes properly cognizable legislative history, and what does not, in the future motions for judicial notice of legislative history materials in this court should be in the following form: FN2

> FN2. The correct way to request judicial notice of a document is by motion. (Cal. Rules of Court, rule 22(a).)

1. The motion shall identify each separate document for which judicial notice is sought as a separate exhibit;

2. The moving party shall submit a memorandum of points and authorities citing authority why each such exhibit constitutes cognizable legislative history.

To aid counsel in this respect, we shall now set forth a list of legislative history documents that have been recognized by the California Supreme Court or this court as constituting cognizable legislative history together with a second list of documents that do *not* constitute cognizable legislative history in this court.

DOCUMENTS CONSTITUTING COGNIZABLE LEGISLATIVE HISTORY IN THE COURT OF APPEAL FOR THE THIRD APPELLATE DISTRICT

II

Appellant's Specific Requests

We now turn to the documents for which judicial notice is sought.

[4] A. The first document is entitled "AB 1950 (Torlakson) Construction Defect Litigation Reform [¶] Fact Sheet." Nothing in appellant's motion suggests this document was made available to the Legislature as a whole. Rather, it appears to reflect the personal view of Assemblymember Tom Torlakson. Appellant argues that judicial notice is appropriate because the document was located in the file of a legislative committee. We acknowledge that in *James v. St. Elizabeth Community Hospital* (1994) 30 Cal.App.4th 73 at page 81, 35 Cal.Rptr.2d 372, this court considered the contents of a document simply because it was found in the files of a committee. But, upon reflection, we now conclude that this practice should not be further condoned. Many pieces of paper that are never seen by members of the committee, let alone by the Legislature as a whole, find their way into committee files. Unlike committee reports, which are routinely available to the Legislature as a whole, these random documents are not reliable indicia of legislative intent. Because there is no showing that Assemblymember Torlakson's "Fact Sheet" was communicated to the Legislature as a whole, it does not constitute cognizable legislative history, and the request for judicial notice of this document is denied. (See *Quintano v. Mercury Casualty Co., supra,* 11 Cal.4th at p. 1062, 48 Cal.Rptr.2d 1, 906 P.2d 1057; *People v. Patterson, supra,* 72 Cal.App.4th at p.

444, 84 Cal.Rptr.2d 870.)

[5] B. Next is the Assembly Judiciary Committee Report dated April 21, 1998, pertaining to AB 1950. The request for judicial notice is granted with respect to this document. (*Guillemin v. Stein, supra,* 104 Cal.App.4th at p. 166, 128 Cal.Rptr.2d 65, and authorities cited at p. 525, *ante.*)

[6] C. Next is the Senate Judiciary Committee Report pertaining to AB 1950. The request for judicial notice is granted with respect to this ment. (*Martin v. Szeto, supra,* 32 Cal.4th at p. 450, 9 Cal.Rptr.3d 687, 84 P.3d 374, and authorities cited at p. 526, *ante.*)

[7] ***40** D. Next, and finally, are three enrolled bill reports on AB 1950, prepared respectively by the Office of Insurance Advisor, the Department of Real Estate, and the Franchise Tax Board.

****530** Generally, "enrolled bill" refers to a bill that has passed both houses of the Legislature and that has been signed by the presiding officers of the two houses. (1 Sutherland, Statutes and Statutory Construction (6th ed.2002) § 15:1, p. 814.) In some states, enrollment also includes signature by the Governor (*ibid.*), but not in California.

California law provides that bills ordered enrolled by the Senate or Assembly are delivered to the clerk of the house ordering the enrollment. (Gov.Code, § 9502.) [FN3] The clerk delivers the bills to the State Printer. (§ 9503.) The State Printer shall "engross [FN4] or enroll (print) them" and return them to the clerk. (§§ 9504–9505.) "If the enrolled copy of a bill or other document is found to be correct, [it shall be presented] to the proper officers for their signatures. When the officers sign their names thereon, as required by law, *it is enrolled.*" (§ 9507, italics added.) Enrolled bills are then transmitted to the Governor for his approval. (§ 9508.) If the Governor approves it and deposits it with the Secretary of State, it becomes the official record and is given a chapter number. (§ 9510.)

FN3. Further statutory references are to the Government Code.

FN4. Traditionally, engrossing meant the process of final authentication in a single house. (Sutherland, *supra,* § 15:1, p. 814.)

Thus, an enrolled bill is one that has been passed by the Senate and Assembly but has not yet been signed by the Governor.

An "enrolled bill report" is prepared by a department or agency in the executive branch that would be affected by the legislation. Enrolled bill reports are typically forwarded to the Governor's office before the Governor decides whether to sign the enrolled bill.

In *McDowell v. Watson* (1997) 59 Cal.App.4th 1155 at pages 1161 through 1162, footnote 3 [69 Cal.Rptr.2d 692] (*McDowell*), the Fourth Appellate District opined that enrolled bill reports should not be considered for legislative intent: "[I]t is not reasonable to infer that enrolled bill reports prepared by the executive branch for the Governor were ever read by the Legislature.

"We recognize that courts have sometimes cited the latter materials as indicia of legislative intent. [Numerous citations.] However, none of those opinions address[es] the propriety of doing so. Accordingly, we decline to follow their example. 'Such a departure from past rules of statutory construction, we ***41** believe, should be effected only after full discussion and exposure of the issue.' (*California Teachers Assn. v. San Diego Community College Dist.* [(1981)] 28 Cal.3d [692] 701 [170 Cal.Rptr. 817, 621 P.2d 856].)

"We also note that *Commodore Home Systems, Inc. v. Superior Court* (1982) 32 Cal.3d 211 at pages 218 through 219 [185 Cal.Rptr. 270, 649 P.2d 912], has been relied upon as authority for considering enrolled bill reports to determine legislative intent. [Citations.] However, that reliance is misplaced, because the Supreme Court in *Commodore* specifically noted that it had been requested to take notice of those reports and that the opposing party had not objected. [Citation.] Moreover, while *Commodore* cites authority for taking judicial notice of such executive acts, it does not address the relevance of that evidence to determining legislative intent." (*McDowell, supra,* 59 Cal.App.4th at p. 1162, fn. 3, 69 Cal.Rptr.2d 692; see also ****531***Whaley v. Sony Computer Entertainment America, Inc.* (2004) 121 Cal.App.4th 479, 487, fn. 4, 17 Cal.Rptr.3d 88 [following *McDowell*].)

This court has twice followed *McDowell, supra,* 59 Cal.App.4th 1155, 69 Cal.Rptr.2d 692, in declining judicial notice of enrolled bill reports. (See *Lewis v. County of Sacramento* (2001) 93 Cal.App.4th 107, 121, fn. 4, 113 Cal.Rptr.2d 90; *People v. Patterson, supra,* 72 Cal.App.4th at p. 444, 84 Cal.Rptr.2d 870.)

On the other hand, in *People v. Allen* (2001) 88 Cal.App.4th 986, 106 Cal.Rptr.2d 253, this court said, "While enrolled bill reports prepared by the executive branch for the Governor do not necessarily demonstrate the Legislature's intent [citation], they can *corroborate* the Legislature's intent, as reflected in legislative reports, by reflecting a contemporaneous common understanding shared by participants in the legislative process from both the executive and legislative branches." (*Id.* at p. 995, fn. 19, 106 Cal.Rptr.2d 253.)

And in *People v. Carmony* (2005) 127 Cal.App.4th 1066, 26 Cal.Rptr.3d 365, this court recently took judicial notice of an enrolled bill report without discussion. (*Id.* at p. 1078, 26 Cal.Rptr.3d 365.)

[8] For practical purposes, these inconsistencies have been resolved by a 2004 decision of our Supreme Court in *Elsner v. Uveges, supra,* 34 Cal.4th 915, 22 Cal.Rptr.3d 530, 102 P.3d 915. There, the court took judicial notice of an enrolled bill report prepared by the Department of Industrial Relations. (*Id.* at p. 934, 22 Cal.Rptr.3d 530, 102 P.3d 915.) The court said, "Uveges challenges Elsner's reliance on the enrolled bill report, arguing that it is irrelevant because it was prepared after passage. However, we have routinely found enrolled bill reports, prepared by a responsible agency contemporaneous with passage and before signing, instructive on matters of legislative intent. [Citations.]" (*Id.* at p. 934, fn. 19, 22 Cal.Rptr.3d 530, 102 P.3d 915.)

We are obligated to follow *Elsner.* (*Auto Equity Sales, Inc. v. Superior Court* (1962) 57 Cal.2d 450, 455, 20 Cal.Rptr. 321, 369 P.2d 937.) We ***42** hereby grant appellant's motion for judicial notice of the enrolled bill reports, and we leave it to the panel deciding this case to determine the extent to which these reports may be "instructive."

[9] Nonetheless, we respectfully add that we continue to find the logic of *McDowell, supra,* 59 Cal.App.4th 1155, 69 Cal.Rptr.2d 692, unassailable. In fact, enrolled bill reports cannot reflect the intent of the Legislature because they are prepared by the executive branch, and then not until after the bill has passed the Legislature and has become "enrolled." Moreover, to permit consideration of enrolled bill reports as cognizable legislative history gives the executive branch an unwarranted opportunity to determine the meaning of statutes. That is the proper and exclusive duty of the judicial branch of government. " '[T]he determination of the meaning of statutes is a judicial function....' [Citation.]" (*People v. Franklin* (1999) 20 Cal.4th 249, 256, 84 Cal.Rptr.2d 241, 975 P.2d 30.)

But we do not write on a clean slate.

We concur: SCOTLAND, P.J., and DAVIS, J.

Court of Appeal, Second District, Division 4, California.
WRI OPPORTUNITY LOANS II LLC, Plaintiff and Respondent,
v.
Ronald COOPER et al., Defendants and Appellants.

No. B191590.
Aug. 23, 2007.

Background: Secured lender on condominium development project brought breach-of-contract action against the loan's guarantors, seeking payment of the principal and interest owed under the loan. The Superior Court, Los Angeles County, No. BC330218,Andria K. Richey, J., granted summary judgment in favor of lender. Guarantors appealed.

Holdings: The Court of Appeal, Manella, J., held that:
(1) the loan did not entitle lender to "contingent deferred interest" and, thus, was not a "shared appreciation loan" exempt from usury law, and
(2) as a matter of first impression, guarantors' written waiver of defenses was ineffective regarding their usury defense.

Reversed.

(Cite as: 154 Cal.App.4th 525, 65 Cal.Rptr.3d 205)

Interpretation of loan's provisions and its status as a shared appreciation loan exempt from usury law were questions of law that the Court of Appeal would resolve de novo, on appeal from summary judgment granted to secured lender in its breach-of-contract action against the loan's guarantors seeking payment of the loan, where neither party submitted extrinsic evidence bearing on the meaning of the loan documents, and the pertinent historical facts regarding the loan were undisputed. West's Ann.Cal. Const. Art. 15, § 1; West's Ann.Cal.Civ. Code § 1917 et seq.

Whether loan on condominium project was a shared appreciation loan exempt from the usury law was a legal question that was not subject to expert opinion, in lender's breach-of-contract action against the loan's guarantors to recover payment of the loan, and thus experts' summary judgment declarations that offered opinions on the undisputed facts as to whether the loan was a shared appreciation loan did not raise triable issues as to the proper characterization of the loan. West's Ann.Cal. Const. Art. 15, § 1; West's Ann.Cal.Evid.Code § 805.

(Cite as: 154 Cal.App.4th 525, 65 Cal.Rptr.3d 205)

Under the "interest contingency rule," interest that exceeds the legal maximum is not usurious when its payment is subject to a contingency so that the lender's profit is wholly or partially put in hazard, provided the parties are contracting in good faith and without the intent to avoid the statute against usury; the hazard in question must be something over and above the risk which exists with all loans that the borrower will be unable to pay. West's Ann.Cal. Const. Art. 15, § 1.

[17] Usury 398 41

398 Usury
398I Usurious Contracts and Transactions
398I(A) Nature and Validity
398k36 Contracts and Transactions Involving Hazard or Contingency
398k41 k. Interest subject to condition. Most Cited Cases

Under the interest contingency rule, under which interest that exceeds the legal maximum is not usurious when its payment is subject to a contingency so that the lender's profit is wholly or partially put in hazard, courts look to the substance rather than to the form of the transaction to determine whether the lender's profits are exposed to the requisite risk.

[18] Usury 398 41

398 Usury
398I Usurious Contracts and Transactions
398I(A) Nature and Validity
398k36 Contracts and Transactions Involving Hazard or Contingency
398k41 k. Interest subject to condition. Most Cited Cases

Loan on condominium development project did not entitle the secured lender to "contingent deferred interest" and, thus, was not a "shared appreciation loan" exempt from usury law, though loan's interest schedule awarded additional interest based on the actual gross sales price of condominium units, where loan's interest schedule guaranteed lender additional interest regardless of whether the underlying property appreciated in value, or whether the project generated rents or profits. West's Ann.Cal. Const. Art. 15, § 1; West's Ann.Cal.Civ. Code §§ 1917, 1917.005.

[19] Usury 398 41

398 Usury
398I Usurious Contracts and Transactions
398I(A) Nature and Validity
398k36 Contracts and Transactions Involving Hazard or Contingency
398k41 k. Interest subject to condition. Most Cited Cases

The statutory definition of a "shared appreciation loan," which is exempt from usury law, must be understood to permit a lender to obtain guaranteed interest payments up to the maximum rate permitted under the usury law, and additionally, payments of contingent deferred interest that are subject to risk. West's Ann.Cal. Const. Art. 15, § 1; West's Ann.Cal.Civ. Code §§ 1917, 1917.005.

[20] Usury 398 41

398 Usury
398I Usurious Contracts and Transactions
398I(A) Nature and Validity
398k36 Contracts and Transactions Involving Hazard or Contingency
398k41 k. Interest subject to condition. Most Cited Cases

Under the "interest contingency rule," a lender may obtain payments on a loan that exceed the maximum interest rate set by the usury law, provided that these payments are subject to risk. West's Ann.Cal. Const. Art. 15, § 1.

[21] Usury 398 41

398 Usury
398I Usurious Contracts and Transactions
398I(A) Nature and Validity
398k36 Contracts and Transactions Involving Hazard or Contingency
398k41 k. Interest subject to condition. Most Cited Cases

Legislature's intent in enacting the "shared appreciation loan" exemption from the usury law was to establish that if (1) a loan permits the lender to obtain

payments over and above the maximum permitted by the usury law, and (2) the loan documents disclose on their face that these payments constitute a share of appreciation, rents, or profits in a secured property, the statutory exemption will apply. West's Ann.Cal. Const. Art. 15, § 1; West's Ann.Cal.Civ. Code §§ 1917, 1917.005.

[22] Statutes 361 228

361 Statutes
361VI Construction and Operation
361VI(A) General Rules of Construction
361k228 k. Provisos, exceptions, and saving clauses. Most Cited Cases

Generally, exceptions to a statute are construed narrowly to cover only situations that are within the words and reason of the exception.

Provision of statute governing waiver of suretyship rights and defenses, stating that any guarantor may waive "any other rights and defenses that are or may become available" to the guarantor by reasons of statutory sections concerning suretyship, does not authorize guarantors to waive a usury defense to a loan; the statute is not intended to abrogate or modify the rule against the enforcement of unlawful transactions. West's Ann.Cal.Civ. Code § 2856(a)(1).

****209** Robert A. Lisnow, Los Angeles, and Randi R. Geffner for Defendants and Appellants.

Blue & Schoor and Charles D. Schoor, Los Angeles, for Plaintiff and Respondent.

MANELLA, J.

***530** Appellants Ronald I. Cooper and Ellen M. Cooper challenge summary judgment in favor of respondent WRI Opportunity Loans II, LLC. (WRIO) in its action for payment of a loan guaranteed by appellants. We reverse.

FACTUAL AND PROCEDURAL BACKGROUND

There are no material disputes about the following facts: In 1999, the Coopers were the sole principals in Cooper Commons, LLC. (CC), which planned to build residential townhouses and condominiums on a property in West Hollywood. [FN1] According to the budget for the project, the property was purchased for $5,979,066, and CC expected that the units, when completed, would sell for a total of $25,762,005. The senior and junior secured lenders on the project were, respectively, Comerica Bank—California (Comerica) and WRIO.

FN1. CC initially intended to build 63 units, but later decided to build 62 units.

In November 1999, WRIO loaned $2,490,000 to CC. Under the loan documents, the loan matured in March 2002, and interest on the principal balance accrued at a rate equal to 2.0 percent above a reference rate set by the Bank of America (reference rate). The loan documents also contained provisions that accorded WRIO "additional interest." These provisions entitled WRIO to 4.0 percent of the gross sales price of each unit when it was sold to third parties not affiliated with CC; in addition, they awarded WRIO sums calculated according to a fixed schedule if other contingencies were to occur. By a written agreement, the Coopers personally guaranteed the performance of CC's obligations under the loan documents.

In June and December 2001, WRIO and CC amended the loan documents. The amendments increased the principal loan amount to $3,178,000, raised the interest rate to the greater of (i) 2.0 percent

above the reference rate or (ii) 10.0 percent, and set the maturity date of the loan as June 12, 2002. In addition, the amendments increased the additional interest owed to WRIO upon sale of the units to nonaffiliated parties: WRIO's share of the gross sales price of the first 15 units to be sold was raised to 5.0 percent, and its share of the gross sales price of the remaining units was raised to 4.5 percent. The Coopers expressly approved these amendments, ****210** and agreed to guarantee CC's obligations, as amended.

On February 22, 2002, CC filed for bankruptcy under Chapter 11, and subsequently stated in that proceeding that WRIO held a secured claim for ***531** $3,178,000. No payment on WRIO's loan was made after the maturity date of June 12, 2002. In September 2002, the bankruptcy court authorized CC to obtain additional funding from Comerica to complete the construction of the project. The units in the project were completed and sold for a total of approximately $31.8 million. On March 2, 2005, WRIO demanded that the Coopers, as CC's guarantors, pay the amounts owed under the loan, but they did not respond.

On March 14, 2005, WRIO filed a complaint for breach of a written guaranty against the Coopers, and subsequently sought summary judgment, asserting that the Coopers were obliged to pay the principal and interest—including the so-called additional interest—that CC owed under the loan. When the Coopers opposed summary judgment on the ground that the loan was usurious, WRIO contended in its reply that the Coopers had waived a usury defense, and that the loan otherwise fell within an exemption to California usury law for shared appreciation loans (Civ.Code, § 1917 et seq.).[FN2] After the parties submitted additional briefing on the issues raised in WRIO's reply, the trial court granted summary judgment. On March 29, 2006, a judgment was entered awarding WRIO $6,634,300.82 plus additional accrued interest and costs.

FN2. All further statutory citations are to the Civil Code, unless otherwise indicated.

DISCUSSION

The Coopers contend the trial court erred in granting summary judgment. We agree.

A. *Standard of Review*

[1][2] "On appeal after a motion for summary judgment has been granted, we review the record de novo, considering all the evidence set forth in the moving and opposition papers except that to which objections have been made and sustained. [Citation.]" (*Guz v. Bechtel National, Inc.* (2000) 24 Cal.4th 317, 334, 100 Cal.Rptr.2d 352, 8 P.3d 1089.) We thus apply " 'the same three-step process required of the trial court. [Citation.]' " (*Bostrom v. County of San Bernardino* (1995) 35 Cal.App.4th 1654, 1662, 42 Cal.Rptr.2d 669.) The three steps are (1) identifying the issues framed by the complaint, (2) determining whether the moving party has made an adequate showing that negates the opponent's claim, and (3) determining whether the opposing party has raised a triable issue of fact. (*Ibid.*)

[3] "[S]ummary judgment law in this state no longer requires a plaintiff moving for summary judgment to disprove any defense asserted by the ***532** defendant as well as prove each element of his own cause of action.... All that the plaintiff need do is to 'prove[ ] each element of the cause of action.' [Citation.]" (*Aguilar v. Atlantic Richfield Co.* (2001) 25 Cal.4th 826, 853, 107 Cal.Rptr.2d 841, 24 P.3d 493.) Once the plaintiff makes an adequate initial showing, the burden shifts to the defendant to show a triable issue of fact "as to that cause of action or a defense thereto." (Code.Civ.Proc., § 437c, subd. (p)(1).)

Aside from challenging one item of interest valued at $19,014.45, the Coopers do not contend on appeal that WRIO failed to carry its initial burden on summary judgment. Their central contention is that there are triable issues as to their usury defense. Before the trial court, they pointed to WRIO's investment analysis for ****211** the loan, as originally made, which projected that the loan would earn $1,441,418 over its 23–month term—including $1,032,080 in so-called "additional interest"—resulting in an interest rate of 38 percent, which exceeds the rate permitted by California usury law. In this connection, they submitted evidence that the maximum interest rate allowable under the usury law during the applicable period was 11.5 percent. WRIO did not dispute the Coopers' factual showing regarding the loan's interest rate, but asserted that the provisions for additional interest in the loan rendered it a shared appreciation loan exempt from the usury law. The trial court agreed with WRIO.

[4][5][6][7] In view of the Coopers' factual showing regarding usury, we conclude they raised

triable issues regarding the existence of a usury defense unless—as the trial court determined—the defense fails as a matter of law. Because neither party submitted extrinsic evidence bearing on the meaning of the loan documents and the pertinent historical facts regarding the loan are undisputed, the interpretation of the loan's provisions and its status as a shared appreciation loan are questions of law that we resolve de novo. (*Parsons v. Bristol Development Co.* (1965) 62 Cal.2d 861, 865–866, 44 Cal.Rptr. 767, 402 P.2d 839 [contract interpretation]; *Ghirardo v. Antonioli* (1994) 8 Cal.4th 791, 800–801, 35 Cal.Rptr.2d 418, 883 P.2d 960 [application of usury law to undisputed facts].) [FN3] We therefore begin our inquiry by examining the applicable legal principles.

FN3. In response to the trial court's request for supplemental briefing, the Coopers and WRIO submitted declarations from experts who offered conflicting opinions on the undisputed facts as to whether the loan is a shared appreciation loan. These declarations do not raise triable issues as to the proper characterization of the loan. ly, Evidence Code section 805 permits expert testimony on the ultimate issue to be decided by the factfinder. However, this rule "does not ... authorize ... an 'expert' to testify to legal conclusions in the guise of expert opinion. Such legal conclusions do not constitute substantial evidence. tion.]" (*Downer v. Bramet* (1984) 152 Cal.App.3d 837, 841, 199 Cal.Rptr. 830; see also *Elder v. Pacific Tel. & Tel. Co.* (1977) 66 Cal.App.3d 650, 664, 136 Cal.Rptr. 203.) Thus, even lawyers may not testify as to legal conclusions, or " 'state interpretations of the law, whether it be of a statute, ordinance or safety regulation promulgated pursuant to a statute [citations].' " (See *California Shoppers, Inc. v. Royal Globe Ins. Co.* (1985) 175 Cal.App.3d 1, 67, 221 Cal.Rptr. 171; *Downer v. Bramet, supra,* 152 Cal.App.3d at p. 842, 199 Cal.Rptr. 830.) As the court explained in *Downer v. Bramet,* at pages 841–842, 199 Cal.Rptr. 830: " 'The manner in which the law should apply to particular facts is a legal question and is not subject to expert opinion. [Citations.]' "

***533** B. *Usury*

1. *Elements*

[8][9] Generally, "[t]he California Constitution sets a maximum annual interest rate of seven percent on loans and forbearances, but allows parties by written contract to set the interest rate at up to 10 percent, or at the level of the Federal Reserve's discount rate plus 5 percent, on loans or forebearances involving real property. (Cal. Const., art. XV, § 1, subds. (1)-(2).)" [FN4] (*Jones v. Wells Fargo Bank* (2003) 112 Cal.App.4th 1527, 1534–1535, 5 Cal.Rptr.3d 835 (*Jones*).) To be usurious, a contract "must in its inception require a payment of usury"; subsequent events do not render a legal contract usurious. (*Sharp v. Mortgage Security Corp.* (1932) 215 Cal. 287, 290, 9 P.2d 819; ****212***Strike v. Trans–West Discount Corp.* (1979) 92 Cal.App.3d 735, 745, 155 Cal.Rptr. 132.) The essential elements of a claim of usury are: "(1) The transaction must be a loan or forbearance; (2) the interest to be paid must exceed the statutory maximum; (3) the loan and interest must be absolutely repayable by the borrower; and (4) the lender must have a willful intent to enter into a usurious transaction. [Citations.]" (*Ghirardo v. Antonioli, supra,* 8 Cal.4th at p. 798, 35 Cal.Rptr.2d 418, 883 P.2d 960.)

FN4. California's prohibition on usury is also set forth in an uncodified statute added by an initiative. (Stats. 1919, p. lxxxiii, reprinted at Deering's Ann. Uncod. Initiative Measures 1919–1 (1973 ed.) p. 35.)

[10][11][12][13] As our Supreme Court has explained, "[t]he element of intent is narrow. '[T]he intent sufficient to support the judgment [of usury] does not require a conscious attempt, with knowledge of the law, to evade it. The conscious and voluntary taking of more than the legal rate of interest constitutes usury and the only intent necessary on the part of the lender is to take the amount of interest which he receives; if that amount is more than the law allows, the offense is complete.' [Citation.] Intent is relevant, however, in determining the true purpose of the transaction in question because '... the trier of fact must look to the substance of the transaction rather than to its form.... "[I]t is for the trier of the fact to determine whether the intent of the contracting parties was that disclosed by the form adopted, or whether such form was a mere sham and subterfuge to cover up

a usurious transaction." ' [Citations.]" (*Ghirardo v. Antonioli, supra,* 8 Cal.4th at p. 798, 35 Cal.Rptr.2d 418, 883 P.2d 960.)

2. *Interest Contingency Rule*

[14] The usury law is subject to numerous exceptions and statutory exemptions. ***534**(*Southwest Concrete Products v. Gosh Construction Corp.* (1990) 51 Cal.3d 701, 705–706, 274 Cal.Rptr. 404, 798 P.2d 1247; *Jones, supra,* 112 Cal.App.4th at pp. 1534–1535, 5 Cal.Rptr.3d 835.) Because interest is usurious only when it is "absolutely repayable by the borrower" (*Ghirardo v. Antonioli, supra,* 8 Cal.4th at p. 798, 35 Cal.Rptr.2d 418, 883 P.2d 960), California courts have long accepted a common law doctrine known as the "interest contingency rule." (*D–Beam Limited Partnership v. Roller Derby Skates, Inc.* (9th Cir.2004) 366 F.3d 972, 975; *Thomassen v. Carr* (1967) 250 Cal.App.2d 341, 346–349, 58 Cal.Rptr. 297 (*Thomassen*).)

[15][16] According to this rule, a loan that will "give the creditor a greater profit than the highest permissible rate of interest upon the occurrence of a condition [ ]is not usurious if the repayment promised on failure of the condition to occur is materially less than the amount of the loan ... with the highest permissible interest, unless a transaction is given this form as a colorable device to obtain a greater profit than is permissible." (*Thomassen, supra,* 250 Cal.App.2d at p. 346, 58 Cal.Rptr. 297, quoting the Restatement of Contracts, section 527.) Thus, interest that exceeds the legal maximum is not usurious when its payment is "subject to a contingency so that the lender's profit is wholly or partially put in hazard," provided "the parties are contracting in good faith and without the intent to avoid the statute against usury." (*Lamb v. Herndon* (1929) 97 Cal.App. 193, 201, 275 P. 503.) Under the rule, the hazard in question must be "something over and above the risk which exists with all loans ... that the borrower will be unable to pay." (*Thomassen, supra,* 250 Cal.App.2d at p. 347, 58 Cal.Rptr. 297.)

Instructive applications of the rule are found in *Schiff v. Pruitt* (1956) 144 Cal.App.2d 493, 301 P.2d 446 (*Schiff*) and *Thomassen, supra,* 250 Cal.App.2d 341, 58 Cal.Rptr. 297. In *Schiff,* a lender loaned $20,000 to a developer to enable the developer to build homes on lots in a tract. (*Id.* at p. 496, 301 P.2d 446.) The loan agreement obliged the developer to repay the ****213** principal with only nominal interest, but gave the lender the option to share the appreciation arising from the homes built and sold in the tract. (*Id.* at p. 498, 301 P.2d 446.) Under the agreement, the lender was entitled to purchase the sales contracts for the homes from the developer—up to a maximum based on the face value of the contracts—by paying a sum equal to the costs that the developer had incurred in buying the underlying property and building the homes. (*Id.* at p. 496, 301 P.2d 446.) Because nothing ensured that the sales prices of the homes would exceed the price for the sales contracts fixed in the loan agreement, the court in *Schiff* concluded that the loan agreement was not usurious, reasoning that the lender's profit from the loan was contingent and "wholly at hazard." (*Id.* at pp. 498–499, 301 P.2d 446.)

In *Thomassen,* the lender agreed to loan $18,500 for an 18–month period to a developer to enable him to build an office building. (*Thomassen, supra,* 250 Cal.App.2d at pp. 343–344, 58 Cal.Rptr. 297.) In lieu of a fixed rate of interest on the principal, the developer agreed to pay the lender 30 percent of the net profit from the ***535** sale of the building and 30 percent of the building's gross income from rentals prior to its sale. (*Id.* at p. 344, 58 Cal.Rptr. 297.) The Court of Appeal concluded that the loan was not usurious, pointing to the risks undertaken by the lender in connection with its profits under the loan. (*Id.* at pp. 346–349, 58 Cal.Rptr. 297.)

[17] Under the interest contingency rule, courts "look to the substance rather than to the form" of the transaction to determine whether the lender's profits are exposed to the requisite risk. (*Thomassen, supra,* 250 Cal.App.2d at p. 347, 58 Cal.Rptr. 297.) In some cases, the absence of risk may be apparent on the face of the agreement. Thus, in *Maze v. Sycamore Homes, Inc.* (1964) 230 Cal.App.2d 746, 747–748, 41 Cal.Rptr. 338, the lenders loaned a developer $24,000 for a one-year period. Under the agreement, the developer was to repay the principal plus the sum of $4,800; these obligations were ostensibly secured by an assignment that granted the lenders the sum of $2,400 for each of 12 houses to be built by the developer, payable when the houses were sold. (*Ibid.*) Because the developer was unconditionally obliged to pay the sum of $28,800 notwithstanding the assignment, the lenders were guaranteed their profit "regardless of any profit or loss resulting from the [de-

veloper's] business or from the sale of the particular houses involved." (*Id.* at pp. 752–754, 41 Cal.Rptr. 338.) Accordingly, the court in *Maze* concluded the interest contingency rule was inapplicable, and the loan was usurious. (*Id.* at pp. 753–754, 41 Cal.Rptr. 338.)

Moreover, courts have looked beyond the face of the agreement to assess whether the lender's profits are subject to risk. In *Teichner v. Klassman* (1966) 240 Cal.App.2d 514, 516–518, 49 Cal.Rptr. 742, the lender entered into three agreements with a nightclub owner. Under the first agreement, the lender loaned $6,500, and was to receive the principal plus an option to buy an ownership share in the club; under the remaining agreements, the lender loaned $6,500, and was to receive monthly payments of $130 as long as the club was in existence. (*Ibid.*) Although there was a possibility that the club would be permanently closed due to changes in the law, the trial court declined to apply the interest contingency rule. (*Id.* at pp. 518–519, 522–523, 49 Cal.Rptr. 742.) The Court of Appeal affirmed, reasoning that the lender's risk was not great enough to support the application of the rule. (*Id.* at pp. 522–523, 49 Cal.Rptr. 742.)

****214** 3. *Shared Appreciation Loans*

Closely related to the interest contingency rule is the statutory exemption to the usury law for shared appreciation loans. (See *Jones, supra,* 112 Cal.App.4th at p. 1539, 5 Cal.Rptr.3d 835.) Absent qualifications not relevant here, a shared appreciation loan within the scope of this exemption is "any loan made upon the security of an interest in real property which additionally obligates the borrower to pay contingent deferred interest pursuant to the loan documentation," where "[c]ontingent deferred interest" is "the sum a ***536** borrower is obligated to pay ... as a share of (1) the appreciation in the value of the security property, (2) rents and profits attributable to the subject property, or (3) both." (§ 1917.) In addition, the exemption requires any deed of trust that acts as security for the loan to "indicate on the document that [it] secures a shared appreciation loan." (§ 1917.004.) Section 1917.005 states: "Lenders shall be exempt from the usury provisions of Article XV of the California Constitution with respect to shared appreciation loan transactions. This section is declaratory of existing law."

In *Jones,* this court discussed the relationship between the exemption for shared appreciation loans and the interest contingency rule. There, a partnership obtained a loan for $1.7 million to purchase real property. (*Jones, supra,* 112 Cal.App.4th at p. 1532, 5 Cal.Rptr.3d 835.) Under the terms of the loan, the partnership was obliged to repay the principal, together with 10 percent annual interest and "Excess Value Contingent Interest," that is, 50 percent of the appreciation in the value of the property upon resale or refinancing, within defined limits. (*Ibid.*) When a limited partner in the partnership brought an action against the bank, asserting the loan was usurious, the trial court sustained a demurrer to the partner's complaint without leave to amend. (*Id.* at pp. 1532–1533, 5 Cal.Rptr.3d 835.) We affirmed on the ground that the loan fell within an exemption to the usury law for specified bank loans (Fin.Code, § 1504).

In so concluding, we rejected the partner's contention that the transaction constituted a " 'sham' " shared appreciation loan because the property's rapid appreciation ensured that "the lender's profits were never at risk." (*Jones, supra,* 112 Cal.App.4th at p. 1538, 5 Cal.Rptr.3d 835.) Noting that the transaction "involve[d] a classic shared appreciation loan arrangement," we concluded that the lender's contingent interest was at risk because the lender could not force a sale or "lock in" its profits. (*Id.* at pp. 1534, 1538–1539, 5 Cal.Rptr.3d 835.) Moreover, in discussing case authority on the interest contingency rule, we explained that when a loan meets the requirements for a statutory exemption to the usury law, courts will not look beyond those requirements to determine whether the underlying transaction exposes the lender's profits to significant risk or betrays an intent to evade the usury law. We stated: "The question of whether loaned money or interest [was] at risk figured into the determination of intent to evade the usury law, and the good faith shared appreciation loan was an early common law exception to the usury law. [Citation.] These cases do not apply to loans ... covered by modern statutory exemptions that remove the need for evasion." (*Id.* at p. 1539, 5 Cal.Rptr.3d 835.)

C. *Additional Interest Provisions*

[18] In view of *Jones,* the focus of our inquiry is whether WRIO's loan meets the statutory requirements for a shared appreciation loan. We therefore ***537** examine its terms to determine the circumstances under which they accorded additional interest****215** to WRIO. Because there is no extrinsic ev-

idence bearing on these terms, we look at the plain language of the agreement, viewed as a whole. (*Eltinge & Graziadio Dev. Co. v. Childs* (1975) 49 Cal.App.3d 294, 297, 122 Cal.Rptr. 369.)

The loan agreement obliged CC to pay additional interest in connection with each proposed unit, payable upon the sale of the unit, "or in any event upon the Maturity Date." [FN5] The additional interest for each unit was calculated according to a schedule that contained provisions covering various contingencies. The schedule (as amended by the parties) assigned each unit a "Budgeted Gross Sales Price" falling in a range from $420,000 to $555,895, and addressed three key contingencies: (1) the unit, whether completed or under construction, was sold to a third party not affiliated with CC; (2) the unit, whether completed or under construction, was sold to an affiliate of CC or released due to payment of the loan; and (3) no construction of the unit had been undertaken when the loan matured or the underlying property was sold. [FN6]

FN5. Paragraph 1.6.4 of the loan agreement provides: "In addition to interest at the applicable rate, Borrower shall pay Lender additional interest (the 'Additional Interest') in connection with the release of Lender's security interest in each Unit comprising the Project. Borrower shall not take any action or make any omission that will result in a reduction of the number of Units to be constructed. The Additional Interest payable with respect to each Unit shall become due upon and shall be paid from the escrow established for the closing of the sale of such Unit, or in any event upon the Maturity Date, a full prepayment of the Loan, or a partial prepayment with respect to which a release of such Unit from the Deed of Trust is requested. Such Additional Interest shall be calculated in accordance with the Unit Schedule...."

FN6. The schedule also contains a provision concerning additional interest in connection with the sale of parking stalls and garage units.

In the case of the first contingency, WRIO was entitled to 5.0 percent of the gross sales price if the unit was among the first fifteen sold, and 4.5 percent of the gross sales price otherwise. In the case of the second contingency, WRIO was entitled to the greater of (i) 4.5 percent of the actual gross sales price or (ii) 4.5 percent of the unit's budgeted gross sales price.[FN7] Finally, in ***538** the case of the third contingency, WRIO was entitled to the difference between $1,376,290 and the sum of the additional interest WRIO received under the provisions for the other contingencies.[FN8] In effect, the provision regarding ****216** the third contingency is a "saving clause" that guaranteed WRIO additional interest even if no construction was undertaken on some or all of the units.

FN7. Regarding the first two contingencies, the schedule provides: "A.1 Units Completed or Under Construction. In the case of individual Units with respect to which construction has been commenced (whether or not the improvements are complete), Borrower shall pay Additional Interest in the following amounts: [¶] (a) For the first 15 Units being released in connection with the closing of a sale of such Units to bona fide third parties who are not an Affiliate of Borrower, 5.0 % of the gross sales price of each Unit, including any and all lot premiums and buyer-choice options and upgrades; and [¶] (b) For the remaining Units, after 15 Units have closed, being released in connection with the closing of a sale of such Unit to a bona fide third party who is not an Affiliate of Borrower, 4.5 % of the gross sales price of the Unit, including any and all lot premiums and buyer-choice options and upgrades; and [¶] (c) For any Unit being released in connection with a Loan prepayment, payment of the Loan at maturity or upon acceleration, or sale to an Affiliate of Borrower with Lender's consent, the greater of (i) 4.5 % of the gross sales price of the Unit if such Unit is subject to a 'Qualifying Sales Contract' ... on the date of such prepayment, maturity, or acceleration, or (ii) 4.5 % of the 'Budgeted Gross Sales Price' for such Unit based upon the plan type of the Unit as identified in the Plans, as follows:...."

FN8. Regarding the third contingency, the schedule provides: "Property other than Condominium or Townhouse Units or Parking Units. Additional interest shall be due

154 Cal.App.4th 525, 65 Cal.Rptr.3d 205, 07 Cal. Daily Op. Serv. 10,009, 2007 Daily Journal D.A.R. 12,930
(Cite as: 154 Cal.App.4th 525, 65 Cal.Rptr.3d 205)

> with respect to any portion of the Land that is not constructed as a condominium or townhouse Unit upon the sale of such Land or upon the Maturity Date in an amount equal to the difference between $1,376,290 and the sum of (i) the cumulative amount of Additional Interest that Lender has received prior to such time under [the other provisions for Additional Interest], plus (ii) the further amount of the Additional Interest that Lender expects to receive from closings of completed condominium or townhouse Units based on the budgeted sales prices shown in Section A.1 above."

The schedule thus ensured WRIO a significant amount of additional interest in a wide range of circumstances, regardless of the success of the project. If CC undertook *no* construction on the project, the provision for the third contingency entitled WRIO to $1,376,290 in additional interest upon the loan's maturity date; if CC began construction but failed to complete the project, the provisions for the first and second contingencies entitled WRIO to at least 4.5 percent of the actual or budgeted gross sales price, depending upon whether the buyers of the partially completed units were affiliated with CC; finally, if CC completed the project as planned, the provision for the first contingency entitled WRIO to at least 4.5 percent of the total gross income from the sales of the units. It appears that the schedule denied additional interest to WRIO in only one circumstance of any consequence, namely, that CC began construction on the units and thereafter failed to sell them to anyone.

The remaining question is whether the schedule accords WRIO "contingent deferred interest" within the meaning of the statutory scheme governing shared appreciation loans. In resolving this issue of statutory interpretation, our objective "is to ascertain and effectuate legislative intent. To accomplish that objective, courts must look first to the words of the statute, giving effect to their plain meaning. If those words are clear, we may not alter them to accomplish a purpose that does not appear on the face of the statute or from its legislative history. [Citation.]" (*In re Jerry R.* (1994) 29 Cal.App.4th 1432, 1437, 35 Cal.Rptr.2d 155.)

In our view, the schedule cannot be construed as entitling WRIO to "Contingent Deferred Interest," that is, "a share of (1) the appreciation in the ***539** value of the security property, (2) rents and profits attributable to the subject property, or (3) both." (§ 1917.) The provisions in the schedule, on their face, guaranteed WRIO additional interest regardless of whether the underlying property appreciated in value, or whether the project generated rents or profits. If the property did not appreciate in value from its original purchase price of approximately $6,000,000—for example, because the project collapsed during a downturn in the real estate market, or resulted in defective or otherwise unmarketable units that required demolition—the schedule accorded WRIO additional interest ranging from 4.5 percent of the gross sales price of the property to $1,376,290. For the same reasons, if the property's appreciation was modest, the additional interest to which WRIO was entitled under the schedule could exceed the appreciation. Moreover, the schedule awarded WRIO $1,376,290 in additional interest even if *no* construction was undertaken on the project.

WRIO contends that additional interest pursuant to the schedule constitutes contingent deferred interest under the statutory scheme, even though the schedule ****217** ensures payments of additional interest in the absence of appreciation. WRIO argues that "a loan provision that requires a payment not based on appreciation or that requires payment even if there is no appreciation, does not preclude [the loan] from satisfying the statutory definition of a[s]hared [a]ppreciation [l]oan, as long as the borrower is obligated to pay the lender a share of the appreciation, if there is any appreciation, as it is in the present case." WRIO thus contends that the loan in question is a shared appreciation loan because the provisions awarding additional interest based on the actual gross sales price of the units effectively provided for the sharing of appreciation. For the reasons explained below, WRIO is mistaken.

As interpreted by WRIO, the statutory definition of a shared appreciation loan encompasses *any* loan secured by real property—including a loan that *guarantees* the lender an otherwise usurious rate of interest—as long as the loan *also* contains a provision entitling the lender to a share of appreciation arising from the property. WRIO's interpretation would effectively abrogate the usury law with respect to loans secured by real property by sanctioning usurious rates of interest that were guaranteed, even in the absence of

appreciation or risk.

[19][20] WRIO's construction cannot be reconciled with the language of the statutory scheme and the Legislature's evident purpose in enacting it. The provision exempting shared appreciation loans from the usury law states that the exemption "is declaratory of existing law." (§ 1917.005.) In view of this statement, the Legislature's apparent intent in creating the exemption was to clarify the application of the interest contingency rule in a defined set of ***540** circumstances, rather than to abrogate the rule.[FN9] Under the rule, a lender may obtain payments on a loan that exceed the maximum interest rate set by the usury law, provided that these payments are subject to risk. (*Thomassen, supra,* 250 Cal.App.2d at pp. 346–349, 58 Cal.Rptr. 297.) Accordingly, the statutory definition of a shared appreciation loan must be understood to permit a lender to obtain guaranteed interest payments up to the maximum rate permitted under the usury law, and *additionally,* payments of contingent deferred interest that are *subject to risk.*

> FN9. The provision containing this statement (§ 1917.005) is derived, in part, from an earlier statutory exemption for a narrowly defined class of shared appreciation loans (see former section 1917.167, added by Stats. 1982, ch. 466, § 12, pp. 1998–2006, repealed by Stats. 1987, ch. 652, § 1, pp. 2061–2062). The prior statutory scheme concerned loans to supply funds for the construction of "owner-occupied dwelling units," and permitted lenders to obtain up to 50 percent of the "Net appreciate[ion] value" of the units (that is, their "fair market value less the sum of the borrower's cost of the property and the value of capital improvements"). (Former §§ 1917.120, subds. (c), (f), (j), 1917.130, added by Stats. 1982, ch. 466, § 12, pp. 1998–2006, repealed by Stats. 1987, ch. 652, § 1, pp. 2061–2062). In view of the broad reach of the current exemption, we conclude the Legislature's statement that it "is declaratory of existing law" manifests an intent to refer beyond the prior statutory exemption to the common law interest contingency rule.

[21] As indicated above (see pt. B.2, *ante*), the interest contingency rule permits courts to look beyond the face of a transaction to determine whether the underlying transaction exposed the lender's ostensibly contingent profits to genuine risk; as we explained in *Jones,* the function of statutory exemptions generally is to curtail this kind of inquiry into the underlying transaction (*Jones, supra,* 112 Cal.App.4th at p. 1539, 5 Cal.Rptr.3d 835). We therefore conclude that the Legislature's intent in enacting the exemption was to establish that if (1) a loan permits the ****218** lender to obtain payments over and above the maximum permitted by the usury law, and (2) the loan documents disclose on their face that these payments constitute a share of appreciation, rents, or profits in a secured property, the statutory exemption will apply.[FN10] Accordingly, we reject WRIO's contrary construction of the statutory scheme.

> FN10. We recognize that to the extent the statutory exemption obviates the need to look beyond the face of the transaction, it may be in tension with the Legislature's statement that the exemption "is declaratory of existing law" (§ 1917.005). However, such statements by the Legislature are properly assessed in light of other evidence bearing on the statute's meaning. (*Western Security Bank v. Superior Court* (1997) 15 Cal.4th 232, 244–245, 62 Cal.Rptr.2d 243, 933 P.2d 507.) Viewed in context, the statement manifests the Legislature's intent to preserve the central principles of the interest contingency rule.

We also reject WRIO's contention that the loan terms awarding additional interest based up the actual gross sales price of the units are provisions for the sharing of appreciation under the statutory scheme. WRIO argues that the project, realistically viewed, was likely to cause substantial appreciation in the property's value, and the appreciation was likely to exceed the payments ***541** to WRIO under the terms in question. WRIO thus contends that the terms effectively allocated WRIO a share of the appreciation.

[22] We find this argument to be at odds with the legislative intent underlying the exemption. As we have explained, the statutory scheme authorizes an exception to the usury law founded on the interest contingency rule. Generally, exceptions to a statute are construed narrowly to cover only situations that are "within the words and reason of the exception." (*Hayter Trucking, Inc. v. Shell Western E & P,*

Inc. (1993) 18 Cal.App.4th 1, 20, 22 Cal.Rptr.2d 229.) Under WRIO's proposal, loan terms that facially entitle the lender to a payment of interest above the legal rate not based on appreciation, rents, or profits, and which otherwise manifest an intent to avoid risks to such payment, constitute provisions for sharing appreciation under the statutory definition of contingent deferred interest. Because this proposal conflicts with the language of the statutory definition and the principles governing the interest contingency rule, we decline to adopt it. In sum, WRIO's loan does not meet the statutory requirements for a shared appreciation loan, and thus the trial court erred in concluding the loan was exempt from the usury law on this basis.[FN11]

FN11. In view of this conclusion, it is unnecessary to address the Coopers' contention that the trust deed provided insufficient notice that it secured a shared appreciation loan.

D. *Waiver*

[23][24] WRIO contends that summary judgment in its favor is properly affirmed on an alternative ground, namely, that the Coopers expressly waived their entitlement to assert a usury defense.[FN12] Pertinent to this contention are sections 2809 and 2810, which fall within Title XIII of the Civil Code (§§ 2787–2856), which abolishes the distinction between sureties and guarantors (§ 2787), and otherwise defines ****219** their obligations and liabilities. Section 2809 states that a guarantor's obligation "must be neither larger in amount nor in other respects more burdensome than that of the principal." [FN13] Section 2810 further provides that a guarantor "is not liable if ... there is no liability ***542** upon the part of the principal at the time of the execution of the contract ... unless the [guarantor] has assumed liability with knowledge of the existence of the defense." [FN14]

FN12. Although WRIO raised this contention in its reply to the Coopers' opposition to summary judgment and the parties addressed it in their supplementary briefing, the trial court did not rule on it in granting summary judgment. Nonetheless, absent a triable issue of material fact, we may affirm the grant of summary judgment "if it is correct on any theory of law applicable to the case, including but not limited to the theory adopted by the trial court. [Citations.]" *(Western Mutual Ins. Co. v. Yamamoto* (1994) 29 Cal.App.4th 1474, 1481, 35 Cal.Rptr.2d 698.)

FN13. Section 2809 provides in full: "The obligation of a surety must be neither larger in amount nor in other respects more burdensome than that of the principal; and if in its terms it exceeds it, it is reducible in proportion to the principal obligation."

FN14. Section 2810 provides in full: "A surety is liable, notwithstanding any mere personal disability of the principal, though the disability be such as to make the contract void against the principal; but he is not liable if for any other reason there is no liability upon the part of the principal at the time of the execution of the contract, or the liability of the principal thereafter ceases, unless the surety has assumed liability with knowledge of the existence of the defense. Where the principal is not liable because of mere personal disability, recovery back by the creditor of any res which formed all or part of the consideration for the contract shall have the effect upon the liability of the surety which is attributed to the recovery back of such a res under the law of sales generally."

Here, the written guaranty executed by the Coopers states: "Guarantor ... waives any rights, claims, defense, abatements, or rights of setoff or recoupment based on or arising based on or arising out of: (1) any legal disability, discharge, or limitation of the liability of Borrower to Lender, whether consensual or arising by operation of law or any proceeding...." Moreover, it states: "Guarantor affirms its intention to waive all benefits that might otherwise be available to Guarantor or Borrower under ... Civil Code Sections 2809, 2810, ..., among others." The Coopers do not dispute that the guaranty contains these provisions.

The issue thus presented is whether the Coopers' waiver encompassed their usury defense. In *Rochester Capital Leasing Corp. v. K & L Litho Corp.* (1970) 13 Cal.App.3d 697, 700–705, 91 Cal.Rptr. 827, the court concluded that an obligation to pay usurious interest undertaken by a corporation was unenforceable against the loan's guarantors, who were the corporation's principals. (See also *Martin v. Ajax Construction Co.* (1954) 124 Cal.App.2d 425, 431, 269 P.2d

132.) However, no published case has addressed whether the guarantors of a loan may expressly waive a usury defense. We therefore examine the legal authority applicable to this question.

[25][26][27] The usurious provisions of a loan are void on the grounds of illegality or unlawfulness because they violate express provisions of law. (*Martin v. Ajax Construction Co., supra,* 124 Cal.App.2d at p. 431, 269 P.2d 132; see Civ.Code, § 1667; 1 Witkin, Summary of Cal. Law (10th ed. 2005) Contracts, § 455, pp. 497–498.) As Witkin explains, as a general rule, "[b]ecause an illegal contract is void, it cannot be ratified by any subsequent act, and no person can be estopped to deny its validity. [Citations.] [¶] Similarly, the defense of illegality cannot be waived by stipulation in the contract. [Citations.]" (1 Witkin, *supra,* Contracts, § 432, at pp. 473–474, italics omitted.)

***543** Thus, in *Hollywood State Bk. v. Wilde* (1945) 70 Cal.App.2d 103, 111–114, 160 P.2d 846, the court rejected the defendants' contention that a provision in their contracts to sell investments barred the plaintiff from introducing evidence that the contracts constituted illegal securities transactions. In so concluding, it relied on the rule that "[w]hen ... the relations of ****220** the parties to a transaction are illegal and against public policy the court will deny relief based upon their contract," and remarked that under this rule, "a party may not 'by stipulation at the time of the execution thereof or afterward, waive his right to urge the illegality in any action thereon instituted by the other party thereto.' " (*Id.* at p. 112, 160 P.2d 846, quoting *American National Bank v. A.G. Sommerville* (1923) 191 Cal. 364, 371, 216 P. 376.) The court further stated: "The contracts being void by virtue of having been executed and assigned contrary to public policy and statute, all attempts to validate and vitalize them by inserting a waiver of such defense are likewise voidable for the same reason." (*Id.* at p. 114, 160 P.2d 846.)

In *Wells v. Comstock* (1956) 46 Cal.2d 528, 297 P.2d 961, our Supreme Court applied the rule barring the enforcement of illegal contracts to a transaction involving a guarantor. There, the plaintiffs had entered into an unlawful contract to sell corporate stock; the defendants were the buyer of the stock and a party who had agreed to guarantee the buyer's performance. (*Id.* at pp. 529–530, 297 P.2d 961.) In concluding that the defendant buyer was not estopped to assert that the contract was illegal due to his knowing participation in the illegal transaction, the court stated: " '[T]he rule of public policy that forbids an action for damages for breach of [an unlawful] agreement is not based on the impropriety of compelling the defendant to pay the damages. That in itself would generally be a desirable thing. When relief is denied it is because the plaintiff is a wrongdoer, and to such a person the law denies relief.' " (Quoting the Restatement of Contracts, section 598, com. a, p. 1110.)

The court in *Wells* further held that "[s]ince the principal obligation of the contract is unenforceable because of illegality, the guaranty too is unenforceable." (*Wells v. Comstock, supra,* 46 Cal.2d at p. 533, 297 P.2d 961.) As support for this conclusion, the court relied on section 2810 and section 117 of the Restatement of Security, which addresses the availability of the defense of illegality to a surety. The comment to section 117 states: "Where the principal's promise is itself illegal in its inception, and the performance of the surety's contract is subject to the laws of the same jurisdiction as that of the principal, it is against public policy to give legal effect to the surety's obligation." (Rest., Security, § 117, com. d, p. 313.)

[28] ***544** In view of *Wells* and the other authority regarding rule against the enforcement of unlawful transactions, we conclude that the Coopers' waiver of their defenses arising under sections 2809 and 2810 or "by operation of law" was ineffective regarding their usury defense. WRIO nonetheless contends that the Legislature has authorized guarantors to waive a usury defense by enacting subdivision (a)(1) of section 2856 (subdivision (a)(1)), which provides: "(a) Any guarantor or other surety, including a guarantor of a note or other obligation secured by real property or an estate for years, may waive any or all of the following: [¶] (1) The guarantor or other surety's rights of subrogation, reimbursement, indemnification, and contribution and *any other rights and defenses that are or may become available to the guarantor or other surety by reason of Sections 2787 to 2855, inclusive.*" [FN15] (Italics added.)

FN15. Subdivision (a) of section 2856 provides in full: "(a) Any guarantor or other surety, including a guarantor of a note or other obligation secured by real property or an estate for years, may waive any or all of the following: [¶] (1) The guarantor or other

> surety's rights of subrogation, reimbursement, indemnification, and contribution and any other rights and defenses that are or may become available to the guarantor or other surety by reason of Sections 2787 to 2855, inclusive. [¶] (2) Any rights or defenses the guarantor or other surety may have in respect of his or her obligations as a guarantor or other surety by reason of any election of remedies by the creditor. [¶] (3) Any rights or defenses the guarantor or other surety may have because the principal's note or other obligation is secured by real property or an estate for years. These rights or defenses include, but are not limited to, any rights or defenses that are based upon, directly or indirectly, the application of Section 580a, 580b, 580d, or 726 of the Code of Civil Procedure to the principal's note or other obligation."

****221** Pointing to the italicized portion of subdivision (a)(1), WRIO argues that the Coopers' usury defense is "available to [them] by reason of" sections 2809 and 2810, and thus their waiver was effective regarding this defense. We disagree. As we have explained, the usury defense rests on the rule against the enforcement of illegal transactions, which is founded on considerations of public policy that are independent of sections 2809 and 2810. Furthermore, an examination of the history of section 2856 discloses that the Legislature did not intend subdivision (a)(1) to displace or modify this rule, insofar as it applies to the waiver of defenses by guarantors.

As originally enacted in 1995, Civil Code section 2856 was the Legislature's response to *Cathay Bank v. Lee* (1993) 14 Cal.App.4th 1533, 18 Cal.Rptr.2d 420 (*Cathay Bank*), which imposed stringent requirements on a guarantor's waiver of a defense arising from the principal's rights under the antideficiency statutes (Code Civ. Proc., §§ 580a, 580b, 580d, 726). (*River Bank America v. Diller* (1995) 38 Cal.App.4th 1400, 1417–1419, 45 Cal.Rptr.2d 790.) Generally, such defenses are not predicated on a contention that the principal's contract is unlawful. (See *ibid.*; *Cathay, supra,* 14 Cal.App.4th at pp. 1535–1542, 18 Cal.Rptr.2d 420.)

***545** Subdivision (a) of the 1995 statute provided in pertinent part: "Any guarantor, including a guarantor of an obligation secured by real property or any interest therein, may waive the guarantor's rights of subrogation and reimbursement and *any other rights and defenses available to the guarantor by reason of Sections 2787 to 2855, inclusive,....*" mer Civ.Code, § 2856, added by Stats. 1994, ch. 1204, § 1, p. 1422, repealed by Stats. 1996, ch. 1013, § 2, pp. 5985–5987, italics added.) The remainder of the 1995 statute addressed the requirements for waivers, including waivers of rights and defenses arising from the antideficiency statutes. (*Ibid.*) In enacting the 1995 statute, the Legislature stated that subdivision (a) was "merely declarative of [ ] existing law." (*Ibid.*) In 1996, the Legislature enacted the current version of section 2856, which amended the 1995 statute, but preserved the italicized language upon which WRIO relies. (Stats. 1996, ch. 1013, § 2, pp. 5985–5987.)

As the court explained in *River Bank America v. Diller, supra,* 38 Cal.App.4th at page 1419, 45 Cal.Rptr.2d 790, the Legislature's declaration regarding subdivision (a) of the 1995 statute, viewed in context, manifested its intent to restore the law regarding waivers to its state prior to *Cathay Bank.* Because the portion of subdivision (a)(1) upon which WRIO relies is found in subdivision (a) of the 1995 statute, we conclude that it is not intended to abrogate or modify the rule against the enforcement of unlawful transactions, which antedates *Cathay Bank* and is not addressed in that case.[FN16] WRIO failed to ****222** establish a valid waiver of the Coopers' usury defense, and thus summary judgment cannot be affirmed on this ground.

> FN16. We recognize that in enacting the current version of section 2856, the Legislature stated: "It is the intent of the Legislature that the types of waivers described in Section 2856 ... do not violate the public policy of this state." (Stats. 1996, ch. 1013, § 3, p. 5987.) Because section 2856 does not describe the waiver of defenses based on the rule against the enforcement of unlawful transactions, and the history of the section manifests the Legislature's intent to preserve pre- *Cathay Bank* law, this statement cannot reasonably be viewed as evidence that the Legislature intended to abolish or limit the rule.

E. *Conclusion*

154 Cal.App.4th 525, 65 Cal.Rptr.3d 205, 07 Cal. Daily Op. Serv. 10,009, 2007 Daily Journal D.A.R. 12,930
(Cite as: 154 Cal.App.4th 525, 65 Cal.Rptr.3d 205)

Because WRIO's challenges to the Coopers' usury defense fail as a matter of law on the facts that were undisputed for the purpose of WRIO's motion for summary judgment, we cannot say there are no triable issues regarding that defense. Accordingly, summary judgment was improper.[FN17]

> FN17. In so concluding, we do not address the Coopers' contention that there are triable issues of fact regarding the item of interest valued at $19,014.45.

***546 DISPOSITION**

The judgment is reversed. Appellants are awarded their costs.

We concur: EPSTEIN, P.J., and WILLHITE, J.

H

Court of Appeal, Fourth District, Division 1, California.
CALIFORNIA SCHOOL BOARDS ASSOCIATION et al., Plaintiffs and Appellants,
v.
STATE of California et al., Defendants and Appellants.

No. D055659.
Feb. 9, 2011.
Rehearing Denied Mar. 8, 2011.
Review Denied May 18, 2011.

Background: School districts brought action against state for declaratory, injunctive, and writ relief challenging mandates imposed on districts by California Legislature with only nominal funding, and requested reimbursement. The Superior Court, San Diego County, No. 37-2007-00082249-CU-WM-CTL,Charles R. Hayes, J., granted the requested relief, except that it refused to order reimbursement or to permit further discovery on that issue. Districts and state appealed.

Holdings: The Court of Appeal, Haller, J., held that:
(1) state's practice of only nominally funding mandates imposed on school districts did not satisfy state constitution; but
(2) adequate remedy at law precluded mandamus relief for state's failure to satisfy constitution;
(3) Legislature's funding of mandates imposed upon local agencies is discretionary;
(4) writ of mandate directing Legislature to fund mandates violated separation of powers doctrine; and
(5) denying districts' request to compel state to reimburse funds was proper.

Affirmed in part and reversed in part.

****701** Edmund G. Brown, Jr., and Kamala D. Harris, Attorneys General, Jonathan K. Renner, Assistant Attorney General, Zackery P. Morazzini and Ross C. Moody, Deputy Attorneys General, for Defendants and Appellants State of California, Department of Finance and State Controller's Office.

Olson, Hagel & Fishburn, Deborah B. Caplan, N. Eugene Hill and Matthew R. Cody for Plaintiffs and Appellants.

HALLER, J.

***778** When the Legislature enacts a law requiring a local school district to implement a new program or a higher level of service, the California Constitution requires the State of California (State) to pay the cost of the mandate and prohibits the State from transferring the cost to the school district. During the past decade, the Legislature has enacted numerous statutes requiring school districts to implement many ****702** new programs and services. ***779** However, because of budget difficulties, the State has not paid the full cost of these programs and services. Instead, it has sought to satisfy the constitutional requirement by paying a nominal amount for each mandate and deferring the remaining costs to an indefinite time.

In 2007, the California School Boards Association and several school districts (collectively School Districts) brought a lawsuit against the State and two of its officers, challenging this practice of deferring, rather than paying in full, the cost of the state-imposed mandates.[FN1] The School Districts sought several forms of relief, including: (1) declaratory relief that this practice was unconstitutional; (2) injunctive relief prohibiting the State from engaging in this practice in the future; and (3) an order requiring the State to reimburse the School Districts for more than $900 million in unpaid costs incurred in complying with prior mandates. The State countered that its practice was authorized under the California Constitution and implementing statutes, and the court was barred by the separation of powers doctrine and equitable principles from ordering the requested relief.

FN1. The plaintiffs are: California School Boards Association, Education Legal Alliance, San Diego County Office of Education, San Diego Unified School District, Clovis Unified School District, Riverside Unified School District, and San Jose Unified School District. The individual defendants are: Michael Genest, in his capacity as director of the California Department of Finance, and John Chiang in his capacity as State Controller. We refer to defendants collectively as State.

After reviewing the parties' documentary evidence and conducting a hearing, the trial court found the State's deferral practice violated the California Constitution and several applicable statutes. (See Cal.

Const., art. XIII B, § 6; Gov.Code, §§ 17500 et seq.) [FN2] The court further found the School Districts were entitled to declaratory and injunctive relief and issued a writ commanding the State in the future to fully fund School District mandated programs (as found by the Commission on State Mandates) or to affirmatively excuse the School Districts from these mandates under section 17581.5. However, the court declined to order the State to reimburse the School Districts for costs previously incurred to comply with prior mandates, concluding this order would violate separation of powers principles. Both sets of parties appeal.

FN2. Undesignated statutory references are to the Government Code. All article references are to the California Constitution.

On the State's appeal, we conclude the court properly granted declaratory relief interpreting the applicable constitutional and statutory provisions to mean that the State's payment of a nominal amount for a mandate imposed on a local school district, with an intention to pay the remaining cost at an unspecified time, does not comply with article XIII B, section 6 and the implementing statutes. However, we determine the court erred in ordering ***780** injunctive relief because: (1) the ordered relief was inconsistent with the statutory scheme; (2) the writ required the performance of a discretionary, rather than a ministerial, duty; and (3) equitable relief was unwarranted because the School Districts have an adequate legal remedy for future violations under section 17612, subdivision (c).

With respect to the School Districts' cross-appeal, we determine the court did not abuse its discretion in refusing to order the State to pay the almost $1 billion in previously deferred costs or to permit the School Districts to conduct further discovery on the reimbursement issue.

****703** SUMMARY OF LAW GOVERNING SCHOOL DISTRICT STATE MANDATES

Before 1978, local governments received a substantial portion of their financing through property taxes. In 1978, the voters adopted Proposition 13, adding article XIII A to the California Constitution, which imposed strict limits on the government's power to impose property taxes. The next year, the voters adopted Proposition 4, adding article XIII B, which imposed corresponding limits on governmental power to spend for public purposes. (See *County of San Diego v. State of California* (1997) 15 Cal.4th 68, 80–81, 61 Cal.Rptr.2d 134, 931 P.2d 312; *County of Los Angeles v. Commission on State Mandates* (2007) 150 Cal.App.4th 898, 905, 58 Cal.Rptr.3d 762.)

One key component of article XIII B's spending limitations is contained in section 6, which states: "Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the state shall provide a subvention of funds to reimburse such local government for the costs of such program or increased level of service...." (Art. XIII B, § 6, subd. (a).) The intent underlying this section was to "preclude the state from shifting financial responsibility for carrying out governmental functions to local agencies, which are 'ill equipped' to assume increased financial responsibilities because of the taxing and spending limitations that articles XIII A and XIII B impose. [Citations.]" (*County of San Diego v. State of California, supra,* 15 Cal.4th at p. 81, 61 Cal.Rptr.2d 134, 931 P.2d 312.)

In 1984, the Legislature enacted a comprehensive statutory and administrative scheme for implementing article XIII B, section 6. (§ 17500 et seq.; *Kinlaw v. State of California* (1991) 54 Cal.3d 326, 331–333, 285 Cal.Rptr. 66, 814 P.2d 1308; *County of San Diego v. State of California* (2008) 164 Cal.App.4th 580, 588, 79 Cal.Rptr.3d 489 (*County of San Diego*).) In so doing, the Legislature created the Commission on State Mandates (Commission) to resolve questions as to whether a statute imposes "state-mandated costs on a local agency within the meaning of section 6." ***781** (*County of San Diego v. State of California, supra,* 15 Cal.4th at p. 81, 61 Cal.Rptr.2d 134, 931 P.2d 312; §§ 17525, 17533 et seq.) Under this regulatory scheme, when the Legislature enacts a statute imposing obligations on a local agency or a school district without providing additional funding, the local entity may file a test claim with the Commission, which, after a public hearing, must determine whether the statute requires a new program or increased level of service. (*County of San Diego v. State of California, supra,* 15 Cal.4th at p. 81, 61 Cal.Rptr.2d 134, 931 P.2d 312; §§ 17551, 17555.) If the Commission determines the statute meets this criteria, the Commission must determine the cost of the mandated program or service and then notify specified legislative entities and executive officers of this decision. (§§ 17557, 17555.) A local agency or school district may chal-

lenge the Commission's findings by administrative mandate proceedings. (§ 17559; Code Civ. Proc., § 1094.5.)

Once this administrative/judicial process is exhausted and a statute is determined to impose state-mandated costs, the Legislature is required to appropriate funds to reimburse the local entity for these costs. (§§ 17561, subd. (a), 17612, subd. (a).) "If the Legislature refuses to appropriate money for [the] reimbursable mandate, the local agency [or school district] may file 'an action in declaratory relief to declare the mandate unenforceable and enjoin its enforcement' " under ****704**section 17612, subdivision (c). (*County of San Diego v. State of California, supra,* 15 Cal.4th at p. 82, 61 Cal.Rptr.2d 134, 931 P.2d 312.)

Section 17612, subdivision (c) (formerly subdivision (b)) initially provided the exclusive method for a local entity to seek relief from an unfunded mandate. However, in 1990, the Legislature added section 17581, which provides an alternative to the judicial proceeding under section 17612. It provides that a local agency is relieved of the obligation to implement an unfunded mandate if the Legislature specifically identifies the mandate and declines to fund it in the annual Budget Act. (§ 17581, subd. (a); see *Tri–County Special Educ. Local Plan Area v. County of Tuolumne* (2004) 123 Cal.App.4th 563, 571–572, 19 Cal.Rptr.3d 884 (*Tri–County*).) The Legislature later added section 17581.5, which creates similar (but more limited) relief for certain unfunded mandates imposed on school districts.

Section 17552 declares that these statutory provisions "provide the sole and exclusive procedure by which a local agency or school district may claim reimbursement for costs mandated by the state as required by Section 6 of Article XIII B...."

FACTUAL AND PROCEDURAL BACKGROUND

In November 2007, the School Districts filed a lawsuit in San Diego County Superior Court alleging the State has refused to comply with its ***782** obligation to provide reimbursement under article XIII B, section 6 for costs "mandated by the State" after the Commission has determined the existence and costs of the mandates. The State filed an answer denying these claims. The court set a briefing schedule and a hearing date in May 2008.

In their moving papers, the School Districts presented evidence showing that since 2002, the Legislature has engaged in a routine practice of appropriating $1,000 for each mandate imposed on the School Districts, rather than appropriating the full amount of the program costs. Specifically, for the 2007–2008 fiscal year, the Commission found 38 separate programs or services require reimbursement as unfunded mandates under article XIII B, section 6. In each case, the State did not appeal or the appeal was decided adversely to the State. The State then appropriated $1,000 for each of the 38 programs. These mandates included items such as: annual parent notification, pupil health screening, criminal background checks, AIDS prevention instruction, immunization records, teacher incentive program, and pupil promotion and retention. The School Districts presented evidence that as compared with this $38,000 appropriated funding, the total statewide cost estimates for the programs in the 2007–2008 fiscal year exceeded $160 million. Further, the $1,000 appropriation per program equates to about $1 for each California school district for the entire fiscal year.

The School Districts also presented evidence showing the State refers to this funding method as " 'deferred' " mandate payments or an "Education Credit Card," which the Legislative Analyst's Office states "means that [full] funding will be provided at some unspecified future time." Although the State acknowledges it does not provide full funding for state-mandated programs on an annual basis, the State maintains the deferral practice complied with Article XIII B, section 6, and thus the School Districts are "required to perform the mandated activities." A Legislative Analyst Office report states that the "credit card [method] represents a way the state has maintained [mandated] program[s] while cutting expenditures during slow economic times," and "represents ****705** amounts the state owes to K–14 education for costs that were not fully funded during the fiscal year in which services were provided."

The evidence showed the total amount of unpaid school mandate funding is estimated to reach $435 million (without interest) by the end of the 2007–2008 fiscal year. For example, the accumulated deficiency for the "Standardized Testing and Reporting" mandate was more than $200 million. The approximate amount of costs for incurred unreimbursed programs and services include: $30 million for the San Diego Unified

School District; $14 million for the Clovis Unified School District, and $12 million for the San Jose Unified School District. The Governor's proposed budget for the ***783** 2008–2009 fiscal year continued the deferral practice, allocating only $1,000 for each of 38 mandates instead of the estimated $180 million required to fund these mandates.

The School Districts argued the deferred funding method violates article XIII B, section 6, and the implementing statutory scheme. They requested the court to issue a writ: (1) ordering the State to comply with its statutory obligations to identify each mandate in the annual budget bill "and to either appropriate funds to cover the costs of [the] mandate or to suspend the obligation to provide the mandated service or program"; (2) ordering the State to reimburse the School Districts for all costs previously incurred in providing state-mandated programs and services from existing state accounts; and (3) declaring certain mandate statutes unconstitutional to the extent they do not require the State to pay the full cost of the State's mandated programs and services or impose an undue restriction on the enforcement of the constitutional right to reimbursement.

In opposition, the State acknowledged the existence of its deferral practice, but argued the $1,000 funding was proper because neither the California Constitution nor the applicable statutes require the mandates be paid "immediately," particularly because the State has agreed to pay interest on any delayed payments. According to the State, "[school] districts that have performed under the mandates are guaranteed to receive payment for properly submitted claims." The State additionally argued that writ relief was not appropriate because the allegations do not show the State has failed to perform a ministerial duty and the School Districts have a statutory remedy in section 17612, subdivision (c). The State also argued the separation of powers doctrine prohibited the court from entering a judgment against the State for mandate amounts owed from previous years.

After briefing and the submission of evidence was completed, this court filed its decision in *County of San Diego, supra*, 164 Cal.App.4th 580, 79 Cal.Rptr.3d 489, in which we reversed a superior court judgment requiring the State to appropriate funds over a 15–year period to pay San Diego and Orange Counties for amounts owed for their previously incurred mandate costs. (*Id.* at pp. 592, 593–597, 79 Cal.Rptr.3d 489.) We held the court's order compelling the appropriation violated the separation of powers doctrine, and the order was unnecessary because the Legislature had enacted a specific statute pertaining to outstanding mandate debt owed to counties. (*Id.* at pp. 594, 595–596, 79 Cal.Rptr.3d 489.) We additionally held the court did not abuse its discretion in refusing to order the State to pay this debt from existing fund accounts. (*Id.* at pp. 597–603, 79 Cal.Rptr.3d 489.)

The trial court then permitted the parties to file supplemental briefs on the impact****706** of *County of San Diego* on the issues before the court. After the ***784** additional briefing and a hearing, the trial court issued a written decision, finding the State's practice of deferring payment to the School Districts violated the language and intent of Article XIII B, section 6, and the statutory scheme enacted to implement the constitutional provision. The trial court found the evidence showed "virtually all" school districts had suffered "adverse effects" from the State's failure to timely provide mandate funding, and quoted from a 2006–2007 Governor's Budget Analysis showing the State estimated it owes the school districts " 'approximately $1.2 billion for unpaid mandate costs through 2005–2006.' "

The trial court additionally concluded the legal remedy contained in section 17612, subdivision (c) was not available to the School Districts to challenge the nominal funding practice because this statutory remedy applies only if the Legislature completely "deletes" the mandate funding from the Budget Act. The court found that by providing a nominal amount for each mandate, "the Legislature has effectively circumvented [School Districts] from exercising their statutory remedy" under section 17612, subdivision (c), and thus the School Districts "have no adequate available legal remedy but for this writ of mandate."

However, relying on *County of San Diego, supra*, 164 Cal.App.4th 580, 79 Cal.Rptr.3d 489, the trial court refused to order the State to pay amounts owed to the School Districts for prior mandates. As detailed below, the court found it was barred by the separation of powers doctrine from issuing this order, and that the exception for ordering payment from existing funds was inapplicable. The court also denied the School Districts' request to conduct further discovery on this

issue.

The court then issued a lengthy judgment and a writ of mandate. With respect to the ordered declaratory relief, Paragraph 7 of the judgment reads: "The Court finds that an actual controversy exists between petitioners and respondents as to the nature of the requirement imposed upon the State by article XIII B, section 6 of the California Constitution and the statutory scheme set forth at Gov.Code §§ 17500 et seq. that makes declaratory relief under Code of Civil Procedure § 1060 appropriate. The Court hereby finds and declares that the State's failure to include the full costs of all mandates as determined by the [Commission] in the Budget Act, and its practice of appropriating $1,000 and deferring the balance of the costs of those mandates, constitutes a failure to provide a subvention of funds for the mandates as required by article XIII B, section 6 and violates the constitutional rights conferred by that provision and the specific procedures set forth at Gov.Code §§ 17500 et seq."

The writ of mandate states in relevant part: "[T]he [State and its officers] *are commanded to:* [¶] 1. Ensure that the costs of each mandate determined to ***785** be reimbursable by the Commission on State Mandates, including interest, shall be included in the Governor's proposed budget as required by Government Code sections 17500 et seq. and in particular sections 17561 and 17612 unless specifically identified and suspended pursuant to Government Code [section] 17581.5. [¶] 2. [The State and its officers] are enjoined from appropriating an amount for any mandate to [the School Districts] less than the amount determined to be reimbursable by the Commission on State Mandates. Said [parties] shall not defer any balance of any mandated program and shall include the full amount determined to be reimbursable in the Governor's proposed budget unless ****707** suspended pursuant to Government Code section 17581.5." (Italics added.) The court ordered the State to file a return in the superior court certifying its compliance with the writ.

Both sets of parties appeal.

DISCUSSION

I. *Deferred Mandate Payment Is Not Equivalent to a Funded Mandate*

[1] Before addressing the parties' specific contentions raised on appeal and cross-appeal, it is necessary to resolve the fundamental legal dispute underlying each of the parties' contentions: whether the State complies with its constitutional and statutory obligations to fund a mandate imposed on the School Districts by appropriating a nominal ($1,000) amount for the mandated program, with the intention to pay the remainder with interest at an unspecified time. As explained below, we agree with the trial court's determination that a deferred appropriation is not a funded mandate within the meaning of article XIII B, section 6, and the implementing statutory provisions.

Article XIII B, section 6 provides: "Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government [defined to include school districts], the State shall provide a subvention of funds to reimburse that local government for the costs of the program or increased level of service [with exceptions not applicable here]...." (Art. XIII B, § 6, subd. (a).) Subvention means " 'a grant of financial aid or assistance, or a subsidy.' " (*County of San Diego, supra,* 164 Cal.App.4th at p. 588, fn. 4, 79 Cal.Rptr.3d 489.)

[2] This reimbursement obligation was "enshrined in the Constitution ... to provide local entities with the assurance that state mandates would not place additional burdens on their increasingly limited revenue resources." ***786**(*Lucia Mar Unified School Dist. v. Honig* (1988) 44 Cal.3d 830, 836, fn. 6, 244 Cal.Rptr. 677, 750 P.2d 318; *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal.App.4th 1264, 1282, 101 Cal.Rptr.2d 784.) "Section 6 recognizes that articles XIII A and XIII B severely restrict the taxing and spending powers of local governments. [Citation.] Its purpose is to preclude the state from shifting financial responsibility for carrying out governmental functions to local agencies, *which are 'ill equipped' to assume increased financial responsibilities because of the taxing and spending limitations that articles XIII A and XIII B impose.* [Citations.] With certain exceptions, section 6 '[e]ssentially' requires the state 'to pay for any new government programs, or for higher levels of service under existing programs, that it imposes upon local governmental agencies. [Citation.]' " (*County of San Diego v. State of California, supra,* 15 Cal.4th at p. 81, 61 Cal.Rptr.2d 134, 931 P.2d 312; accord *County of Los Angeles v. Commission on State Mandates* (2003) 110 Cal.App.4th 1176, 1188–1189, 2 Cal.Rptr.3d

419; *County of Sonoma v. Commission on State Mandates, supra,* 84 Cal.App.4th at p. 1282, 101 Cal.Rptr.2d 784; *Redevelopment Agency v. Commission on State Mandates* (1997) 55 Cal.App.4th 976, 985, 64 Cal.Rptr.2d 270.)

The implementing statutes are consistent with this intent. Section 17561 is the primary code section that sets forth the State's duties once a mandate is determined by the Commission. Section 17561, subdivision (a) states: "The state *shall* reimburse each local agency and school district for *all* 'costs mandated by the ****708** state,' as defined in Section 17514 [[[[FN3] and for legislatively determined mandates in accordance with Section 17573 [FN4]." (Italics added.) Section 17561, subdivision (b)(1)(A) states: "For the initial fiscal year during which costs are incurred ... [¶] ... [a]ny statute mandating these costs *shall* provide an appropriation therefor." (Italics added.) Section 17561, subdivision (b)(2) states: "In subsequent fiscal years appropriations for these costs *shall* be included in the annual Governor's Budget and in the accompanying Budget bill...." (Italics added.) Section 17561, subdivision (c) provides: "The amount appropriated to reimburse local agencies and school districts for costs mandated by the state *shall* be appropriated to the Controller for disbursement." (Italics added.)

> FN3. Section 17514 defines " 'costs mandated by the state' " to "mean [ ] any increased costs which a local agency or school district is required to incur after July 1, 1980, as a result of any statute enacted on or after January 1, 1975, or any [specified] executive order ..., which mandates a new program or higher level of service of an existing program within the meaning of Section 6 of Article XIII B of the California Constitution."

> FN4. Section 17573 provides for a legislative settlement process as an alternative to the more lengthy Commission process for mandate determinations.

In this case, the Commission found 38 separate school district programs or services require reimbursement as unfunded mandates under article XIII B, section 6, and in each case, the State did not appeal or the appeal was decided adversely to the State. Many of these programs were found to cost more than ***787** $1 million. However, instead of appropriating the full amount determined by the Commission to be the total cost of each program, the State appropriated $1,000 for each program, approximately $1 per school district for each mandated program.

[3] This practice violates the language and intent of the constitutional and statutory provisions. By attempting to pay for the new programs with a "credit card" with no fixed date for full payment, the State is shifting the actual costs of these mandates to the local school districts. The fact that the State takes the position (without any specific legislation to this effect) that it intends to pay the full cost with interest does not eliminate the cost burden. Unless it is excused from implementing the program, each school district will have a *current* cost for the program or increased level of service. Under article XIII B, section 6, if the State wants to require the local school districts to provide new programs or services, it is free to do so, but not by requiring the local entities to use their own revenues to pay for the programs.

[4] The State concedes the intent underlying the constitutional and statutory provisions was to prevent cost-shifting to the local governments, but argues that payment at some later, undefined time, is consistent with this intent, as long as interest is eventually paid to the School Districts. However, this argument is inconsistent with the fundamental purpose of article XIII B, section 6, which was to require each branch of government to live within its means, and to prohibit the entity having superior authority (the State) from circumventing this restriction by forcing local agencies such as School Districts to bear the State's costs, even for a limited time period. By imposing on local school districts the financial obligation to provide state-mandated programs on an indeterminate and open-ended basis, the State is requiring school districts to use their own revenues to fund programs or services imposed by the state. Under this deferral ****709** practice, the State has exercised its authority to order many new programs and services, but has declined to pay for them until some indefinite time in the future. This essentially is a compelled loan and directly contradicts the language and the intent of article XIII B, section 6, and the implementing statutes.

We reject the State's arguments in support of a contrary conclusion.

First, the State notes that article XIII B, section 6,

192 Cal.App.4th 770, 121 Cal.Rptr.3d 696, 265 Ed. Law Rep. 347, 11 Cal. Daily Op. Serv. 1923, 2011 Daily Journal D.A.R. 2308

as originally enacted, did not contain an express temporal requirement for mandate payments, but in 2004 voters (through Proposition 1A) adopted amendments requiring appropriations in "the full payable amount." [FN5] These amendments expressly applied ***788** only to "a city, county, city and county, or special district," and not to school districts. (Art. XIII B, § 6, subd. (b), par. (4).) The State claims that Proposition 1A was placed on the ballot as a result of a political compromise between local governments and the State arising from local government budget difficulties caused by the State's practice of deferring mandate payments to these entities. The State thus contends the "very fact that cities and counties had to go to the ballot and obtain specific limits on the timing of payments for mandates confirms that section 6 had no temporal requirement at all prior to Proposition 1A." The State further asserts that if the School Districts want the same benefits, they will need to negotiate a similar political compromise with the State.

> FN5. Under the amendments, beginning in the 2005–2006 fiscal year, the Legislature must generally appropriate the "full" amount of the mandate or suspend the operation of the mandate for the fiscal year. (Art. XIII B, § 6, subd. (b), par. (1).) The amendment further provided that for a mandate incurred prior to the 2004–2005 fiscal year, the amounts "may be paid over a term of years, as prescribed by law." (Art. XIII B, § 6, subd. (b), par. (2).) This "prescribed by law" term for repayment of amounts owed by the cities and counties is now a 15–year period, as set forth in section 17617.

These arguments are unpersuasive. There is nothing in the language of Proposition 1A, or in the ballot materials presented to the voters, showing the State did not already have the obligation to fully fund the mandates when they were imposed. The Proposition 1A compromise added several new features to the local-state mandate relationship, including a specific constitutional provision making clear that the deferral practice (with respect to cities and counties) would no longer be tolerated and adding a requirement that the Legislature provide a specific time period for the State to reimburse these local entities for the prior mandate debt. (Art. XIII B, § 6, subd. (b), pars. (1), (2).) This compromise does not mean the deferral practice was authorized under the prior law, and did not involve any type of concession that the practice was previously legally authorized.

[5][6] Moreover, even assuming there was an indication that the parties to the compromise, or the voters in adopting Proposition 1A, believed the prior law allowed the State to defer payments, this belief is not binding on a court. (See *Carter v. California Dept. of Veterans Affairs* (2006) 38 Cal.4th 914, 922–923, 44 Cal.Rptr.3d 223, 135 P.3d 637.) A court should not accept later expressed legislative intent if the intent is inconsistent with the plain meaning of the prior act or its legislative history. (*Id.* at p. 922, 44 Cal.Rptr.3d 223, 135 P.3d 637.) The interpretation of a statute or a constitutional provision " 'is an exercise of the judicial power the Constitution assigns to the courts.' [Citation.]" (*Ibid.*; see *Murray v. Oceanside Unified School Dist.* (2000) 79 Cal.App.4th 1338, 1348, 95 Cal.Rptr.2d 28.)

****710** [7] The State also contends the court erred in determining the deferral method was improper because the constitutional and statutory provisions do not specifically "say that the reimbursement must be made in full in a single payment, or within one year." However, the fact that a "payment in full" ***789** phrase was not used does not mean the Legislature intended to permit a deferral of funds. As discussed, article XIII B, section 6's language and underlying intent impose the timeliness requirement for the reimbursement obligation without the need to use these precise words. Likewise, section 17561, subdivision (a)'s statement that "all" costs must be reimbursed by the State is a clear statutory directive requiring full payment once a mandate is determined by the Commission (and any appeals process has been completed). An interpretation of section 17561 that would allow partial payments would render the word "all" superfluous.

[8] The State next contends that section 17561, subdivision (d)(2)(C), which allows the State Controller to adjust the mandate payments to correct for any prior underpayments, "expressly contemplates that the initial payment may not be payment in full." [FN6] However, section 17561, subdivision (d)(2)(C) pertains to the Controller's audit function, allowing the Controller to correct inaccurate fund disbursements after auditing the local entity's supporting records. This administrative power to adjust payments is not equivalent to stating that the Legislature has the authority to provide a nominal payment

for a mandate.

> FN6. Section 17561, subdivision (d)(2)(C) states: "The Controller shall adjust the payment to correct for any underpayments or overpayments that occurred in previous fiscal years."

The State also relies on the Controller's statutory authority to issue " 'prorated' " payments. Section 17567 states that the Controller must "prorate claims" if "the amount appropriated for reimbursement purposes pursuant to Section 17561 is not sufficient to pay all of the claims approved by the Controller." This code section does not provide the Legislature with the legal authority to provide insufficient funding for mandates. To the contrary, section 17567 specifically states that "[i]n the event that the Controller finds it necessary to prorate claims as provided by this section, the Controller shall *immediately* report this action to [specified executive and legislative entities and officers] *in order to assure appropriations of these funds in the Budget Act.*" (§ 17567, italics added.)

[9] We similarly reject the State's reliance on section 17561.5, which provides that an initial reimbursement claim "shall include accrued interest ... if the payment is being made more than 365 days after adoption of the statewide cost estimate for an initial claim...." This required interest payment does not provide the Legislature with the authority to implement a policy under which it pays only a nominal amount of a mandated claim. Rather it provides for interest payments where the actual costs are less than those estimated as costs during the Commission process.

We also find unconvincing the State's discussion of the fact that in the 2006–2007 fiscal year it made payments on the outstanding mandate debt and ***790** that these "payments demonstrate that the Constitutional right to reimbursement is being honored through the practice of deferred payments." As the Legislative Analyst Office noted, the State repaid *some* outstanding claims while at the same time deferring more claims in the subsequent year. A single reimbursement payment does not show the mandates are being timely funded.

****711** We thus conclude the Legislature's practice of nominal funding of state mandates with the intention to pay the mandate in full with interest at an unspecified time does not constitute a funded mandate under the applicable constitutional and statutory provisions.

II. *Parties' Appellate Challenges to Judgment and Writ*

Having determined the deferral practice is improper, we now consider the parties' specific appellate challenges to the trial court's determinations regarding the relief requested by the School Districts.

A. *Court's Grant of Declaratory Relief*

[10][11][12][13][14] "Declaratory relief is an equitable remedy, which is available to an interested person in a case 'of actual controversy relating to the legal rights and duties of the respective parties....' (Code Civ. Proc., § 1060....)" (*In re Claudia E.* (2008) 163 Cal.App.4th 627, 633, 77 Cal.Rptr.3d 722.) " 'The purpose of a declaratory judgment is to "serve some practical end in quieting or stabilizing an uncertain or disputed jural relation." ' [Citation.] 'Another purpose is to liquidate doubts with respect to uncertainties or controversies which might otherwise result in subsequent litigation [citation].' [Citation.] The proper interpretation of a statute is a particularly appropriate subject for judicial resolution. [Citations.] Additionally, judicial economy strongly supports the use of declaratory relief to avoid duplicative actions to challenge an agency's statutory interpretation or alleged policies. [Citation.] [¶] The remedy of declarative relief is cumulative and does not restrict any other remedy...." (*Ibid.*) Thus, the fact that "another remedy is available is an insufficient ground for refusing declaratory relief." (*Filarsky v. Superior Court* (2002) 28 Cal.4th 419, 433, 121 Cal.Rptr.2d 844, 49 P.3d 194.) Moreover, declaratory relief is generally available to settle the parties' rights with respect to future actions, and not to correct conduct that occurred in the past.

[15] In Paragraph 7 of the judgment, the court declared that the State's practice of paying only a nominal amount for a mandated program while deferring the balance of the cost "constitutes a failure to provide a subvention of funds for the mandates as required by article XIII B, section 6 and violates the constitutional rights conferred by that provision and the specific procedures ***791** set forth at [sections] 17500 et seq." This form of declaratory relief was proper, as there was an actual controversy between the

parties regarding the interpretation of article XIII B, section 6 and section 17561, pertaining to the use of deferred mandate payments. The declaration will prevent further issues arising from the conflicting interpretations, and was an effective remedy to settle the parties' rights in the future regarding the meaning of the provisions. The State has not challenged these conclusions.

Although on appeal the State focuses primarily (if not exclusively) on challenging the injunctive relief ordered by the court, it indirectly challenges the portion of the judgment granting declaratory relief based on the State's assertions that a deferred mandate is a funded mandate that must be implemented by the School Districts. For the reasons explained above, we have rejected this argument. The State does not proffer any other basis for finding the court's granting declaratory relief (as set forth in Paragraph 7) was improper. We thus affirm the portion of the judgment providing this declaratory relief.

B. *Court's Grant of Injunctive Relief*

1. *Overview*

In the writ of mandate, the court "commanded" the State and its officers to engage****712** in several affirmative tasks relating to the budget process and prohibited these defendants from deferring any mandates unless it "identified and suspended" the mandate under section 17581.5. Specifically, the court ordered the State to "[e]nsure that the costs of each mandate determined to be reimbursable by the Commission ... *shall* be included in the Governor's proposed budget as required by ... sections 17561 and 17612 *unless specifically identified and suspended pursuant to [section] 17581.5*." (Italics added.) The court additionally "enjoined" the State "from appropriating an amount for any mandate to [the School Districts] less than the amount determined to be reimbursable by the Commission" and stated the State "shall not defer any balance of any mandated program and shall include the full amount determined to be reimbursable in the Governor's proposed budget *unless suspended pursuant to [section] 17581.5*." (Italics added.)

The State contends the court had no authority to order these forms of mandamus relief because: (1) the School Districts have an adequate remedy at law; (2) the court's order concerned discretionary, rather than ministerial, duties; and (3) the court's actions violate separation of powers principles. We agree with these arguments. Given the specific statutory procedures for addressing an unfunded mandate, the court erred in issuing the writ because the School Districts have an adequate remedy at law; the writ improperly ***792** restricts the State's discretionary authority; and the writ improperly interferes with budgetary powers committed exclusively to the legislative and executive branches.

To explain these conclusions, we first detail the existing statutory remedies applicable when the Legislature has failed or refused to fund an administratively-determined state mandate. We then describe the basis for our legal determinations that the writ was an unauthorized use of the court's mandamus powers.

2. *Statutory Remedies for Failure to Fund Determined Mandates*

Under the statutory scheme, the Commission must promptly notify specified legislative and executive bodies of its determination on a test claim (§ 17555), and must submit a biannual report to the Legislature identifying the mandates found and the cost of the mandates (§ 17600). "Upon receipt of the report submitted by the [C]ommission ..., funding *shall* be provided in the subsequent Budget Act for costs incurred in prior years." (§ 17612, subd. (a), italics added.) If the Legislature does not comply with this duty, the statutes provide two potential remedial procedures. (§§ 17612, subd. (a), 17581, 17581.5.) These remedies are directed at excusing a local school district from performing the mandate, rather than affirmatively compelling the Legislature to appropriate funds for the mandate.

[16] First, under section 17581.5, the Legislature can avoid paying the mandate costs if it identifies the statutory program in the Budget Act as a mandate for which no funding is provided in that fiscal year and specifically relieves the school district of the requirement that it implement the program. [FN7] (See also § 17581 [similar remedy applicable to local agencies].) With respect to school districts, this action is ****713** permitted only pertaining to certain categories of mandates. (§ 17581.5, subd. (c).) If this procedure is properly invoked with respect to a statutory mandate, the remedy is self-executing in the sense that it does not require any affirmative action by the school district, i.e., if the Legislature makes this specific "nonfunding" designation, each school district ***793** is "permitted to make its own determination not to im-

plement the mandate." (*Tri–County, supra,* 123 Cal.App.4th at p. 572, 19 Cal.Rptr.3d 884 [interpreting § 17581].)

> FN7. Section 17581.5, subdivision (a) provides: "A school district shall not be required to implement or give effect to the statutes, or a portion of the statutes ... during any fiscal year and for the period immediately following that fiscal year for which the Budget Act has not been enacted ... if all of the following apply: [¶] (1) The statute ... has been determined by the Legislature, the commission, or any court to mandate a new program or higher level of service requiring reimbursement of school districts pursuant to Section 6 of Article XIII B.... [¶] (2) The statute ... specifically has been identified by the Legislature in the Budget Act for the fiscal year as being one for which reimbursement is not provided for that fiscal year...."

[17] Second, if the Legislature does not fund a determined mandate and does not specifically designate the mandate as one for which no funding will be provided under sections 17581 or 17851.5, the local agency or school district *must* perform the mandate, unless it *affirmatively obtains relief under section 17612, subdivision (c).* (See *Tri–County, supra,* 123 Cal.App.4th at pp. 573–574, 19 Cal.Rptr.3d 884.) Section 17612, subdivision (c) states: "If the Legislature deletes from the annual Budget Act funding for a mandate, the local agency or school district may file in the Superior Court of the County of Sacramento an action in declaratory relief to declare the mandate unenforceable and enjoin its enforcement for that fiscal year."

[18][19] Unlike the remedy in sections 17581 and 17581.5, the remedy under section 17612, subdivision (c) is not self-executing and requires the local entity to affirmatively seek judicial relief to be excused from the mandate. (*Tri–County, supra,* 123 Cal.App.4th at p. 573, 19 Cal.Rptr.3d 884; see *Kinlaw v. State of California, supra,* 54 Cal.3d at p. 333, 285 Cal.Rptr. 66, 814 P.2d 1308; *Berkeley Unified School Dist. v. State of California* (1995) 33 Cal.App.4th 350, 358–359, 39 Cal.Rptr.2d 326.) This remedy affords relief prospectively, and not as to funds previously paid out by a local agency to satisfy a state mandate. (See *Lucia Mar Unified School Dist. v. Honig, supra,* 44 Cal.3d at p. 833, fn. 3, 244 Cal.Rptr. 677, 750 P.2d 318.)

Thus, "[a] Commission determination that a cost results from an unfunded state mandate does not necessarily mean the Legislature will pay for it. If the Legislature does not pay [or excuse the school district under section 17581.5], with a favorable Commission determination in hand, an entity may seek a court order [under section 17612, subdivision (c)] that it no longer has to obey the mandate...." (*Grossmont Union High School Dist. v. State Dept. of Education* (2008) 169 Cal.App.4th 869, 877, 86 Cal.Rptr.3d 890 (*Grossmont Union*).) "The intent of the Legislature ... could not be more clear: until and unless a court or the Legislature itself has relieved a local government of a statutory mandate, the local government must perform the duties imposed by the mandate [even if the mandate is not funded]." (*Tri–County, supra,* 123 Cal.App.4th at p. 573, 19 Cal.Rptr.3d 884.) In establishing this procedure by which local governments may seek relief from an unfunded program, "the Legislature has ensured an orderly procedure for resolving these issues, eschewing the local government anarchy that would result from recognizing a county's ability sua sponte to declare itself relieved of the statutory mandate." (*Ibid.*)

***794** 3. *Writ Was Improper Because School Districts Have an Adequate Remedy at Law*

[20] To warrant relief in the form of a writ of mandate requiring a party to take ****714** (or not to take) certain actions in the future, the petitioner must demonstrate there is no adequate legal remedy. (See *Transdyn/Cresci JV v. City and County of San Francisco* (1999) 72 Cal.App.4th 746, 752, 85 Cal.Rptr.2d 512.) We determine the School Districts had an adequate remedy at law under section 17612, subdivision (c) for any future attempts by the State to defer mandate payments.

The trial court found the School Districts did not have an adequate legal remedy with respect to future nominally funded mandates because section 17612, subdivision (c) applies only when the Legislature completely removes a particular mandate from a budget bill, and this judicial procedure cannot be used if the Legislature provides some (although nominal) funding. Based on this interpretation, the trial court found the State had essentially created a "Catch–22" situation for the School Districts—they could not

refuse to comply with the mandate and they could not seek to be relieved of the obligation to implement the mandate under the established statutory procedures.

On appeal, the State argues the court's statutory interpretation was erroneous. The State asserts that if the Legislature provides only nominal funding for a reimbursable mandate, the School Districts are "free to seek a declaration of that fact under section 17612, subdivision (c) and receive a judicial declaration that it need not comply with that mandate for a year." In support, the State cites to our recent *County of San Diego* decision in which we stated in footnote 28 that although "the Counties are denied the judicial remedy they seek in this case, it is important to note that the statutory scheme implementing article XIII B, section 6, does not leave local agencies remediless for the Legislature's failure to fund state mandates.... When the Legislature provides only nominal funding for a mandate, as was the case with many of the mandates at issue here, the local agency's remedy is to file an action under section 17612, subdivision (c), to declare the mandate unenforceable and to enjoin its enforcement for that fiscal year." (*County of San Diego, supra,* 164 Cal.App.4th at p. 613, fn. 28, 79 Cal.Rptr.3d 489.)

In response, the School Districts argue that these statements were "*dicta* " and urge this court to reach a different conclusion in this case. However, they do not present any evidence that a school district (or any other entity) has ever been precluded from obtaining section 17612, subdivision (c) relief from ***795** a deferred and nominally funded mandate. They also acknowledge there are no reported decisions holding that such relief is unavailable. [FN8]

> FN8. They cite only to language in *Berkeley Unified School Dist. v. State of California, supra,* 33 Cal.App.4th at page 360, 39 Cal.Rptr.2d 326, in which the court observed that the Legislature's deletion of funding from a claims bill triggers the statutory period for filing an action under section 17612, subdivision (c). Because the *Berkeley Unified* court was not addressing the issue presented here, we find the court's observations to be unhelpful to our analysis.

[21] After reexamining the statutory language, we adhere to our prior interpretation of this statute. Section 17612, subdivision (c) states: "*If* the Legislature *deletes* from the annual Budget Act funding for a mandate, the local agency or school district may file in the Superior Court of the County of Sacramento an action in declaratory relief to declare the mandate unenforceable and enjoin its enforcement for that fiscal year." (Italics added.) In interpreting this code section, "our primary task is to determine the intent of the Legislature so as to effectuate the purpose ****715** of the law. [Citation.] In determining legislative intent, we look first to the statutory language itself. [Citation]." (*Los Angeles Unified School District v. County of Los Angeles* (2010) 181 Cal.App.4th 414, 423, 104 Cal.Rptr.3d 590.) " ' "The words of the statute must be construed in context, keeping in mind the statutory purpose, and statutes or statutory sections relating to the same subject must be harmonized, both internally and with each other, to the extent possible." [Citation.]' " (*Ibid.*; see *Lungren v. Deukmejian* (1988) 45 Cal.3d 727, 735, 248 Cal.Rptr. 115, 755 P.2d 299; *Woodland Park Management, LLC v. City of East Palo Alto Rent Stabilization Bd.* (2010) 181 Cal.App.4th 915, 923, 104 Cal.Rptr.3d 673.) Moreover, a court must presume the Legislature acts consistent with the Constitution when enacting legislation, and we must adopt an interpretation that upholds the statute's constitutionality, if the interpretation is consistent with the statutory language and purpose. (See *In re Kay* (1970) 1 Cal.3d 930, 942, 83 Cal.Rptr. 686, 464 P.2d 142; *Wilson v. State Bd. of Education* (1999) 75 Cal.App.4th 1125, 1145, 89 Cal.Rptr.2d 745.)

[22][23] Under these principles, the proper interpretation of section 17612, subdivision (c) is that a party is permitted to seek relief for nominal funding as well as a complete lack of funding for a determined state mandate. Although section 17612, subdivision (c) contains the word "deletes," when viewed in context, this term does not refer to the physical act of entirely deleting an item from a budget bill, but refers more generally to the deletion of all or part of the administratively-determined cost from the amount required to be appropriated to the local entity. After the adoption of article XIII B, the Legislature enacted comprehensive procedures for resolution of claims arising out of section 6. "The Legislature did so because the absence of a uniform procedure had resulted in inconsistent ***796** rulings on the existence of state mandates, unnecessary litigation, reimbursement delays, and, apparently, resultant uncertainties in accommodating reimbursement requirements in the

budgetary process." (*Kinlaw v. State of California, supra,* 54 Cal.3d at p. 331, 285 Cal.Rptr. 66, 814 P.2d 1308.) As part of this legislative scheme, the Legislature created an administrative process for resolving issues regarding the existence and costs of mandates, *and* a judicial process for obtaining relief from unfunded mandates. This judicial process involved a method for local entities to challenge unfunded mandates (after a determination by the Commission) by filing an action seeking a declaration in Sacramento County Superior Court that the entity was excused from implementing the mandate. The essence of this new procedure was to consolidate all such actions in one venue and place the burden on local entities to seek judicial relief if the State failed to abide by its obligations to fund a particular mandate.

It would be inconsistent with this judicial remedy and the state Constitution to interpret section 17612, subdivision (c) as providing a right to seek relief only if there is "no" funding for a mandate, as opposed to nominal funding. As noted, the $1,000 funding required the School Districts to use their own funds to provide programs mandated by the State. This is virtually the same harm as providing no funding for a particular program, and is directly contrary to the constitutional mandate contained in article XIII B, section 6. If we were to interpret the remedial provision in section 17612, subdivision (c) as limited to legislative decisions to provide zero funding, we would be concluding that the statutory scheme does not provide a remedy for a school district to avoid an ****716** unfunded mandate. This result could not have been contemplated by the drafters of the statutory scheme, who were seeking to effectuate (and not defeat) the voters' intent underlying the constitutional provision.

[24] We thus reaffirm our conclusion in *County of San Diego* that where an appropriation is the functional equivalent of deleting funding, a local entity (including a school district) has a right to seek a declaration of that fact under section 17612, subdivision (c) and receive a judicial declaration that it need not comply with the mandate for one year.[FN9] Because the School Districts have this legal remedy, it was improper for the court to issue an injunction controlling the State's future actions in these matters.

FN9. In the proceedings below, School Districts argued the requirement that an entity bring an action *every year* to seek relief under section 17612, subdivision (c) for an unfunded mandate was an unreasonable restriction on its constitutional rights der article XIII B, section 6. The court rejected this facial challenge, but stated its ruling was without prejudice to the petitioners bringing an " 'as-applied' " challenge to the annual requirement. School Districts did not cross-appeal from this portion of the order. Thus, the issue is not before us on this appeal. Although they mention the issue in passing in a footnote of their appellate brief, this footnote was insufficient to present the issue on appeal.

[25] ***797** In reaching this conclusion, we recognize that the State's prior position that it was permitted to require the School Districts to implement the State-mandated programs despite the nominal funding appears inconsistent with the State's current interpretation of section 17612, subdivision (c) that the School Districts have a right to seek a court order declaring the mandate to be unenforceable. However, this inconsistency has now been resolved. We have affirmed the trial court's grant of declaratory relief that the State violates article XIII B, section 6 and the implementing statutes by requiring a school district to implement a program under a deferred payment practice. And we have held (consistent with the State's current position) that if the State violates these provisions in the future, the School Districts will have a right to obtain relief from a required implementation of the program under section 17612, subdivision (c).[FN10]

FN10. We note the State would be precluded from arguing that the School Districts waived claims for *prior* unpaid mandates by previously failing to seek relief under section 17612, subdivision (c). The State's prior agreement to pay for these costs, and its prior position that these mandates were required, is inconsistent with a claim that the School Districts previously waived their right to reimbursement for those costs by not invoking the statutory remedy. However, in the future, if the School Districts wish to be relieved of an obligation when there is only nominal funding, they will be required to seek relief under section 17612, subdivision (c) in the Sacramento County Superior Court.

4. *Writ Interferes with Discretionary Functions and Separation of Powers Doctrine*

[26] We additionally conclude the writ was improperly issued because it compels a discretionary, not a ministerial, act.

[27][28][29] To obtain writ relief, the petitioner must show the respondent has "a clear, present, and ministerial duty to act in a particular way." (*County of San Diego, supra,* 164 Cal.App.4th at p. 593, 79 Cal.Rptr.3d 489.) "A ministerial duty is one that is required to be performed in a prescribed manner under the mandate of legal authority without the exercise of discretion or judgment." (*Ibid.*) Thus, a writ of mandate should not compel action by the Legislature unless " 'the duty to do the thing asked for is plain and *unmixed with discretionary power or the exercise of* *****717** *judgment.*' " (*Id.* at p. 596, 79 Cal.Rptr.3d 489.) On its face, the issued writ interferes directly with the Legislature's discretionary functions by requiring the Legislature to appropriate funds for certain local school district programs and services. The determination as to how and whether to spend public funds is within the Legislature's broad discretion.

The School Districts argue that the writ implicates only ministerial powers because it does not "tell[ ] the Legislature which programs it must retain or forego, nor does it order the Legislature to fund any program" and instead ***798** merely compels the state to comply with existing law and to make the choice given to it by the existing statutory scheme.

However, the writ expressly orders the Legislature to include School District mandate items in the annual Budget Bill, and then to fully fund each mandate *or* to "suspend" the mandate pursuant to section 17581.5. This choice is not mandated by the statutes or the Constitution. Under the statutory scheme, the Legislature has the discretion to choose not to fund a mandate. If this occurs, the Legislature may specifically identify the program in a Budget Act and suspend the requirement for one year. (§ 17581.5; see fn. 7, *ante.*) But the Legislature is not required to provide this relief. If the Legislature does not do so, it is then a school district's obligation to seek affirmative relief in the Sacramento County Superior Court to excuse compliance with the mandate for one year. (§ 17612, subd. (c); see *Tri–County, supra,* 123 Cal.App.4th at p. 572, 19 Cal.Rptr.3d 884.) This process is consistent with article XIII B, section 6, which prohibits the State from requiring local entities to perform unfunded state mandates, but does not compel the State to provide funding if it does not wish to require a particular program.

In issuing the writ, the court disregarded this fundamental structure of the judicial mandate relief procedures, and specifically ordered the Legislature to perform one of two acts: fully fund a mandate or affirmatively excuse compliance under section 17581.5. Because the Legislature has the statutory discretion to make other choices (not fund and require the local entity to seek affirmative relief from the mandate), the court's order pertained to a discretionary duty and thus was beyond the court's mandamus authority.

[30] The School Districts alternatively argue that we should, at a minimum, uphold the portion of the writ requiring the Legislature to place the cost of a determined mandate in the annual Budget Bill because this is expressly required by the statutes. (See § 17561, subd. (b).) The School Districts claim the identification of the mandates and their costs is essentially a ministerial task designed to provide public notice and information about mandate determinations made by the Commission.

[31][32] This argument is unavailing. There is nothing ministerial about placing items in a budget bill. The formulation of a budget bill, including the items to be placed in the bill, is inherently a discretionary and a legislative power. (See *In re Madera Irrigation District* (1891) 92 Cal. 296, 310, 28 P. 272.) The budget determination "is limited by [the Legislature's] own discretion, and beyond the interference of courts." (*Ibid.*; see *City of Sacramento v. California State Legislature* (1986) 187 Cal.App.3d 393, 398, 231 Cal.Rptr. 686.)

[33][34][35] ***799** For similar reasons, we conclude the writ also violates California's separation of powers doctrine. A court has no authority to issue a writ of mandate that interferes with powers exclusively committed to the other branches of government.*****718** (*County of San Diego, supra,* 164 Cal.App.4th at pp. 593–594, 79 Cal.Rptr.3d 489.) The enactment of a budget bill is fundamentally a legislative act, entrusted to the Legislature and the Governor and not the judiciary. (See *Grossmont Union, supra,* 169 Cal.App.4th at p. 886, 86 Cal.Rptr.3d

890; *Schabarum v. California Legislature* (1998) 60 Cal.App.4th 1205, 1214, 70 Cal.Rptr.2d 745.) The California Constitution's separation of powers doctrine forbids the judiciary from issuing writs that direct the Legislature to take specific action, including to appropriate funds and pass legislation. (*County of San Diego, supra,* 164 Cal.App.4th at pp. 593–594, 79 Cal.Rptr.3d 489; see *City of Sacramento v. California State Legislature, supra,* 187 Cal.App.3d at pp. 396–398, 231 Cal.Rptr. 686.)

[36][37] Under these principles, a court is prohibited from using its writ power to require an appropriation even if the Legislature is statutorily required to appropriate certain funds. (See *City of Sacramento v. California State Legislature, supra,* 187 Cal.App.3d at pp. 397–398, 231 Cal.Rptr. 686.) The "matter is ... one in which political power to accomplish that end is vested in the Legislature. 'Under our form of government the judicial department has no power to revise even the most arbitrary and unfair action of the legislative department, or of either house thereof, taken in pursuance of the power committed exclusively to that department by the constitution.' " (*Id.* at p. 398, 231 Cal.Rptr. 686.) Limitations on the use of judicial writ authority to control legislative action is a core purpose of the separation of powers doctrine.

C. *Cross-appeal: Court's Refusal to Order Relief for Past Unpaid Mandate Debt*

In addition to seeking an order directing the State to prospectively take certain actions, the School Districts also sought an order requiring the State to pay more than $900 million in unpaid mandate debt (including interest) for programs and services previously provided and unreimbursed by the State. The court declined to order this relief, noting the "magnitude of the funds" and the "separation of powers" principles embodied in the California Constitution. The court relied on our recent decision in *County of San Diego, supra,* 164 Cal.App.4th 580, 79 Cal.Rptr.3d 489, in which we upheld the trial court's discretion to deny monetary relief for prior mandate debt on similar grounds.

On appeal, the School Districts contend the trial court erred in reaching its conclusions without permitting them to conduct discovery on the availability of funding sources for the unpaid debt. We conclude the court acted within its discretion.

***800** 1. *Factual and Procedural Background*

In their complaint, the School Districts requested that the court enter an order compelling the State to reimburse them for $900 million in "outstanding unreimbursed costs from generally related State accounts which have been appropriated and are otherwise available for payment of the State's obligation...." This request was based on a line of cases in which the courts have recognized a narrow exception to the rule that a court has no power to compel the Legislature to appropriate funds. (See *Butt v. State of California* (1992) 4 Cal.4th 668, 697–703, 15 Cal.Rptr.2d 480, 842 P.2d 1240 (*Butt*); *Mandel v. Myers* (1981) 29 Cal.3d 531, 539–545, 174 Cal.Rptr. 841, 629 P.2d 935; *Long Beach Unified School Dist. v. State of California* (1990) 225 Cal.App.3d 155, 181, 275 Cal.Rptr. 449.) As explained in more detail below, this exception applies when funds have already been appropriated and ****719** the existing funds are related to the subject matter of the unpaid debt.

However, in their moving papers, the School Districts identified only one potential funding source for the payment of the outstanding $900 million debt: the "Proposition 98 reversion fund." (See Ed.Code, § 41207.5.) The School Districts argued that because the Legislature had previously used this account to reimburse districts for deferred mandates, it would be available to pay for some or all of the outstanding mandate debt. The State responded that the Proposition 98 reversion account does not contain funds available for this purpose, and would conflict with specific state law funding requirements.

This court then filed *County of San Diego,* in which we upheld the trial court's discretion to deny the counties' claims for reimbursement of mandate costs owed from prior budget years. (*County of San Diego, supra,* 164 Cal.App.4th at pp. 597–603, 79 Cal.Rptr.3d 489.) In supplemental briefing, the School Districts requested the court to bifurcate the matter and provide them an opportunity to conduct discovery and present evidence on the issue of the availability of existing State funds to pay the outstanding mandate debt. The State opposed this request, noting the request was untimely and that the nature and magnitude of the relief sought were inconsistent with the judiciary's role in the budgetary process and can only lead to "chaos" in the state budget.

192 Cal.App.4th 770, 121 Cal.Rptr.3d 696, 265 Ed. Law Rep. 347, 11 Cal. Daily Op. Serv. 1923, 2011 Daily Journal D.A.R. 2308
(Cite as: 192 Cal.App.4th 770, 121 Cal.Rptr.3d 696)

After a hearing, the court declined to order affirmative relief on the prior debt claim, stating: "[T]he magnitude of the funds previously deferred and owed to [School Districts], coupled with the separation of powers clause set forth in article III, section 3 ... and the appropriation powers afforded to the Legislature under article IV, section 10 and 12, and article XVI, section 7 ... preclude the Court from ordering the Legislature to reimburse petitioners from undesignated existing appropriations...." The court also ***801** denied School Districts' request to conduct discovery "[i]n light of the Court's conclusion that [the requested] relief is precluded as a matter of law...."

The School Districts appeal from this ruling.

2. *Analysis*

[38][39] Under the California Constitution, the separation of powers doctrine prohibits a court from compelling the Legislature "to appropriate funds or to pay funds not yet appropriated." (*County of San Diego, supra,* 164 Cal.App.4th at p. 598, 79 Cal.Rptr.3d 489.) A narrow exception to this rule exists "when a court orders appropriate expenditures from already existing funds" and the funds " 'are "reasonably available for the expenditures in question," ' " which means that " 'the purposes for which those funds were appropriated are "generally related to the nature of costs incurred...." [Citation.]' " (*Ibid.;* see *Butt, supra,* 4 Cal.4th at pp. 698–703, 15 Cal.Rptr.2d 480, 842 P.2d 1240.)

[40] This exception must be strictly construed and is inapplicable if the existing funds have been appropriated for other purposes. (*Butt, supra,* 4 Cal.4th at pp. 698–703, 15 Cal.Rptr.2d 480, 842 P.2d 1240; see *County of San Diego, supra,* 164 Cal.App.4th at pp. 598–599, 79 Cal.Rptr.3d 489.) Moreover, a trial court has broad discretion to determine whether a mandamus remedy requiring a particular payment from an existing fund is warranted under the totality of the circumstances. " ' " '[C]ases may ... arise where the applicant for relief has an undoubted legal right, for which *mandamus* is the appropriate remedy, but where the court may, in ****720** the exercise of a wise discretion, still refuse the relief.' " ' " (*County of San Diego, supra,* at p. 599, 79 Cal.Rptr.3d 489.)

In *County of San Diego,* the parties stipulated that the State owed San Diego County $41 million and Orange County $72 million for prior unfunded mandates, and the counties asked the court to order this debt to be repaid from budgets of more than 20 state agencies. (*County of San Diego, supra,* 164 Cal.App.4th at pp. 599–600, 606, 79 Cal.Rptr.3d 489.) During a bench trial, the parties called numerous witnesses from the various state agencies on the issue of the existence of funds to pay for the costs of the State's prior mandate debt. (*Id.* at p. 591, 79 Cal.Rptr.3d 489.) After trial, the court found the counties had not met their burden to show the availability of the funds sought or the required relationship between many of the mandates and the funds sought. (*Ibid.*)

We concluded the evidence supported the trial court's factual findings. (See *County of San Diego, supra,* 164 Cal.App.4th at pp. 597–603, 79 Cal.Rptr.3d 489.) We additionally held the court's conclusion was proper even if there was a relationship with respect to some available funds and the unpaid mandates. (*Ibid.*) We ***802** explained that under "the unique circumstances surrounding the Counties' petition for writ of mandate in this case, ... the court acted well within the bounds of judicial discretion in denying the relief the Counties sought." (*Id.* at p. 599, 79 Cal.Rptr.3d 489.) We reasoned that "the existence of a *clear, present,* ministerial duty to fully pay the Counties' subject reimbursement claims from the state budget of the single fiscal year in question was negated by the enormity of the relief the Counties sought. Given the magnitude of the Counties' reimbursement claims, the large number of mandates at issue, the large number of agencies from which the Counties sought reimbursement, and, most important, the insufficiency of the Counties' evidence to show that the purposes of the subject mandates were generally related to the various appropriations from which the Counties sought reimbursement, or that the targeted funds were reasonably available, the court acted well within its discretion in denying the Counties' request for a writ of mandate compelling prompt payment of their reimbursement claims from the state's 2005–2006 fiscal year budget." (*Id.* at p. 603, 79 Cal.Rptr.3d 489.)

[41] We reach a similar conclusion in this case. The School Districts were seeking almost $1 billion in funds from the State, but cited only a single account ("the Proposition 98 reversion fund") that could possibly contain funds to meet the reasonably related test. However, the School Districts did not present any

192 Cal.App.4th 770, 121 Cal.Rptr.3d 696, 265 Ed. Law Rep. 347, 11 Cal. Daily Op. Serv. 1923, 2011 Daily Journal D.A.R. 2308
(Cite as: 192 Cal.App.4th 770, 121 Cal.Rptr.3d 696)

specific evidence regarding the availability of funds in this account to satisfy the State's debt. Although the School Districts sought to conduct additional discovery to support their claim, they did not come forward with any predicate facts showing a reasonable basis to believe sufficient funds exist and that the funds would meet the criteria of the exception (a relationship between available funds and the subject matter of the debt). (See *Butt, supra,* 4 Cal.4th at pp. 698–702, 15 Cal.Rptr.2d 480, 842 P.2d 1240.) Because appropriations for the budget year at issue were placed in a chartered bill following the Governor's signature on the Budget Act, this evidence was available without a discovery order. In seeking to make this showing, the School Districts asserted only that the Legislature had used funds in the Proposition 98 reversion fund in the past. This claimed fact is insufficient to show that funds currently exist to pay the mandate debt.

****721** Moreover, we decline the School Districts' invitation to construe our prior *County of San Diego* holding as limited only to its unique facts or to reconsider our holding. In *County of San Diego,* we affirmed a trial court's broad discretion to refuse to compel repayment of millions of dollars from a state budget where the magnitude of the reimbursement sought, as well as the large number of specific outstanding mandates and the potential funds from which such mandates would be paid, would place the court in a situation where it was essentially acting in a budgetary and legislative, rather than a ***803** judicial, role. (See *County of San Diego, supra,* 164 Cal.App.4th at pp. 602–603, 79 Cal.Rptr.3d 489.) This same principle supports the court's refusal to apply the exception in this case.

[42] Further, the court did not abuse its discretion in declining to permit petitioners to engage in a wide-ranging discovery investigation in an attempt to identify funds to pay prior mandate costs. Currently our state is experiencing an extreme budget crisis with a budget deficit estimated to be more than $20 billion. Any money a court would direct to the School Districts would reduce funds available for other obligations and implicate funding priorities and policy making decisions. These decisions are for the Legislature. Under the particular circumstances of the case, an order requiring the State to pay its claimed $900 million mandate debt from existing funds would improperly "elevate the judiciary above its coequal brethren, upset the delicate system of checks and balances, and stand the separation of powers clause on its head." (*Butt, supra,* 4 Cal.4th at p. 703, 15 Cal.Rptr.2d 480, 842 P.2d 1240.)

III. *Request for Judicial Notice*

[43][44] School Districts request that we take judicial notice of five sets of documents, identified as Exhibits A through E. Exhibits A, B, and C contain recently enacted statutes, which apparently reflect additional deferred mandates. Exhibits D and E are reports by the Legislature Analyst's Office prepared in February 2010 and April 2010, after the judgment was entered in this case. None of these exhibits were presented to the trial court.

[45] We deny this request. Generally, " 'when reviewing the correctness of a trial court's judgment, an appellate court will consider only matters which were part of the record at the time the judgment was entered.' [Citation.]" (*Vons Companies, Inc. v. Seabest Foods, Inc.* (1996) 14 Cal.4th 434, 444, fn. 3, 58 Cal.Rptr.2d 899, 926 P.2d 1085; accord, *In re Marriage of Forrest & Eaddy* (2006) 144 Cal.App.4th 1202, 1209, 51 Cal.Rptr.3d 172.) It is a fundamental principle of appellate law that our review of the trial court's decision must be based on the evidence before the court at the time it rendered its decision. (See *Vons Companies, Inc. v. Seabest Foods, Inc., supra,* 14 Cal.4th at p. 444, fn. 3, 58 Cal.Rptr.2d 899, 926 P.2d 1085; *Kumar v. National Medical Enterprises, Inc.* (1990) 218 Cal.App.3d 1050, 1057, fn. 1, 267 Cal.Rptr. 452.) School Districts have not cited any exceptional circumstances that would justify a deviation from this rule in this appeal.

Moreover, the proffered materials would not affect our analysis in this case. The fact the State has continued the practice of mandate deferral is already part of the record on appeal. Further, the opinions expressed by the Legislative Analyst Office after the judgment was entered are not relevant to our legal determinations.

***804** DISPOSITION

We reverse the judgment insofar as it grants injunctive relief in favor of School ****722** Districts, and affirm the judgment in all other respects. We remand for the court to vacate the writ of mandate and to issue a new judgment consistent with the determinations in this opinion. Each party to bear its own costs.

Re: Department of Finance v. Commission on State Mandates
Sacramento County Superior Court Case No. 03CS01432 (BIPS)

Dear Mr. Acquisto:

Enclosed please find the fully executed settlement and release agreement in the above matter. As we discussed, I dated the document January 26, 2009, the date of my signature, and have attached original signature pages from each of my clients and myself. We retained the original signature page signed by Mr. Genest and you, but enclosed a copy.

Thank you very much for your cooperation. Please contact me if you have any questions.

Sincerely,

FAGEN FRIEDMAN & FULFROST, LLP

SETTLEMENT AND RELEASE AGREEMENT
BEHAVIORAL INTERVENTION PLANS [HUGHES BILL] MANDATED COST CLAIM

This settlement and release agreement ("Agreement") is entered into this 26th day of January, 2009 DKM by and between the State of California ("the STATE") on the one hand, and San Diego Unified School District, Butte County Office of Education, and San Joaquin County Office of Education (collectively "CLAIMANTS") on the other, who, in consideration of the promises made herein, agree as follows:

I. Nature and Status of the Dispute

Effective January 1, 1991, Education Code section 56523 was added to the Education Code. That section required the development and adoption of regulations governing positive behavioral interventions for special education students by the State Board of Education ("the SBE"). In 1993, the SBE promulgated California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 to implement Education Code section 56523. The Education Code section and its implementing regulations are referred to cumulatively as "the Hughes Bill."

The Behavioral Intervention Plans Mandated Cost Claim was initiated on September 28, 1994, when San Diego Unified School District, Butte County Office of Education, and San Joaquin County Office of Education filed test claim CSM-4464 with the Commission on State Mandates ("the Commission"). The Behavioral Intervention Plans Mandated Cost Claim asked the STATE to reimburse local educational agencies ("LEAs"), including school districts, county offices of education, special education local plan areas ("SELPAs"), and joint agencies composed of such organizations for the costs of implementing the Hughes Bill.

On September 28, 2000, the Commission adopted a Statement of Decision on CSM-4464 finding that the Hughes Bill imposed a reimbursable state mandate on school districts by requiring the following seven activities: SELPA plan requirements, development and implementation of behavioral intervention plans, functional analysis assessments, modifications and contingent behavioral intervention plans, development and implementation of emergency interventions, prohibited behavioral intervention plans, and due process hearings. The settlement of the Special Education Mandated Cost Claim in 2000-2001 explicitly omitted the Behavioral Intervention Plans Mandated Cost Claim (Ed. Code § 56836.156(g)).

Subsequently CLAIMANTS proposed parameters and guidelines for the CSM-4464 claiming process but various disputes arose with the STATE and a final draft was never adopted by the Commission. The parties attempted settlement without success and the matter reached a stalemate.

On September 26, 2003, the STATE's Department of Finance filed a Petition for Administrative Mandamus in the Sacramento Superior Court challenging the Commission's decision in CSM-4464. It named the Commission as Respondent, and CLAIMANTS as Real Parties in Interest (*Department of Finance v. Commission on State Mandates*, Sacramento Superior Court Case No. 03CS01432). The Petition maintained that the Hughes Bill was not a reimbursable state mandate because 1) it was required by federal law, 2) it merely implemented federal requirements, and

3) it did not exceed those requirements. The matter is still pending. CLAIMANTS have filed no responsive pleadings as yet.

On October 4, 2007, the Deputy Attorney General representing the STATE's Department of Finance in the above case wrote to CLAIMANTS stating that pending reforms in the mandate process could present a timely opportunity to continue negotiations. The Deputy Attorney General noted that the mandate reform legislation, AB 1222, included the option of the joint development of a reasonable reimbursement methodology and cost estimate. The Deputy Attorney General suggested a meeting if CLAIMANTS were interested in resolving the matter and noted that, absent successful settlement, she planned to schedule a hearing in Sacramento Superior Court in April 2008. In response, CLAIMANTS contacted the Deputy Attorney General and the parties began meeting to work on a mutually agreeable resolution.

A chief task in the settlement process was developing a statewide cost estimate for the claim. Ultimately CLAIMANTS completed surveys of more than 20 SELPAs representing more than 10% of public school students statewide. The STATE's Department of Finance staff reviewed copies of all survey returns and verified that the cumulative cost totals accurately reflected the SELPA data.

In May 2008, the Sacramento Superior Court notified the STATE that it must bring its case to trial by September 26, 2008, or be subject to dismissal under the state law which requires all matters to be brought to trial within five years ("the five-year rule"). Ultimately, the parties filed a stipulation with the court agreeing to extend the five-year period to March 27, 2009, in the hopes that agreement could be reached.

The STATE's Department of Finance continues to dispute the Commission's decision in CSM-4464 that the Hughes Bill is a reimbursable mandate. CLAIMANTS believe the Commission's decision was correct and that the Hughes Bill imposes requirements on school districts that are not mandated by federal law.

To avoid the costs and uncertainty of further litigation, to alleviate the uncertainty regarding the Hughes Bill funding, and to expedite the resolution of this long-pending mandate claim in the spirit of AB 1222, the parties have determined to compromise and settle the claims raised in Sacramento Superior Court Case No. 03CS01432 and the underlying administrative decision of the Commission on State Mandates in CSM-4464 on the terms and conditions set forth below.

II. Actions to Resolve Dispute

A. The mutual obligations and duties of the parties set forth herein are contingent upon all of the following events occurring:

1. On or before February 28, 2009, no less than 85% of all K-12 school districts, county offices of education, and SELPAs shall sign the Waiver, attached hereto as Exhibit A. In addition, the school districts and county offices signing Exhibit A must have served student populations accounting

for no less than 92% of the second principal apportionment (P-2) average daily attendance in the 2007-08 fiscal year.

2. The parties shall seek a superior court ruling that the settlement is final and binding on all LEAs, assuming implementing legislation is enacted. In the absence of such a ruling, the parties shall seek an alternative, mutually agreeable final and formal resolution of the dispute.

3. Prior to or concurrent with the enactment of the Budget Act for the 2009-10 fiscal year, legislation is enacted that contains provisions identical to or substantially similar to the language contained in Exhibit B. It is the intent of the parties that, on or before January 10, 2009, the Legislature shall be requested to enact such legislation on an urgency basis. Any modifications to the proposed legislation shall be made only with agreement of all the signatories to this settlement document.

   a. The proposed legislation shall appropriate the amount of ten million dollars ($10,000,000) payable upon enactment and allocated in accord with Section II.B. of this Agreement.

   b. The proposed legislation shall require additional funding of five-hundred and ten million dollars ($510,000,000) in total payable over a six-year period, or lesser period at the STATE's discretion, commencing July 1, 2011, and allocated in accord with Section II.B. of this Agreement.

   c. The proposed legislation shall include statutory language to revise the existing special education funding model established by Assembly Bill 602 (Chapter 854, Statutes of 1997) to provide an ongoing increase of sixty-five million dollars ($65,000,000) annually to special education programs. The proposed legislation shall appropriate the first year of funding.

   d. The combination of the above appropriations is to be considered in full satisfaction of, and is in lieu of, any reimbursable mandate claims that would have been filed as a result of CSM-4464. By providing this funding for CSM-4464, the STATE in no way concedes the existence of an unfunded reimbursable mandate for that claim.

B. For the purposes of this settlement only, to resolve any and all retrospective mandated cost claims from 1993-94 to 2008-09 arising from CSM-4464 and the Statement of Decision adopted by the Commission on State Mandates on September 28, 2000, the STATE agrees that:

1. Upon enactment of legislation prior to or concurrent with the 2009-10 Budget Act, payment in the amount of ten million dollars ($10,000,000) will be allocated to LEAs as follows:

   a. One million five hundred thousand dollars ($1,500,000) shall be allocated to county offices of education on an equal per-pupil basis. The amount of each agency's allocation shall be determined by dividing one million five hundred thousand dollars ($1,500,000) by the total statewide county special education pupil count only, as reported by county offices of education as of December 2007. The allotment for each county office of education shall be the per-pupil amount times the county's special education pupil count reported as of December 2007. The State Superintendent of Public Instruction ("the Superintendent") shall adjust the computations in such a manner as to ensure that the allotment to each county office of education is at least five thousand dollars ($5,000).

   b. Six million dollars ($6,000,000) shall be allocated to SELPAs that existed for the 2007-08 fiscal year. The amount of each agency's allocation shall be determined by dividing six million dollars ($6,000,000) by the total statewide special education pupil count as of December 2007. The allotment for each agency shall be the statewide per-pupil amount times the SELPA's special education pupil count reported as of December 2007. The State Superintendent of Public Instruction ("the Superintendent") shall adjust the computations in such a manner as to ensure that the allotment to each SELPA is at least ten thousand dollars ($10,000).

   c. Two million five hundred thousand dollars ($2,500,000) shall be paid to San Joaquin County Office of Education.

2. In accord with legislation enacted prior to or concurrent with the 2009-10 Budget Act, the State will pay an additional five hundred and ten million dollars ($510,000,000) to school districts. This amount shall be allocated in installment payments of eighty-five million dollars ($85,000,000) commencing July 1, 2011, and annually thereafter for a period of six years unless the STATE in its discretion enlarges the installment amount from time to time, thereby discharging the obligation in advance of the six year period. These payments shall be allocated to school districts on a per-pupil basis as follows:

   a. The appropriation shall be divided by the total average daily attendance, excluding attendance for regional occupation centers and programs, adult education, and programs operated by the county superintendents of schools, for all pupils in kindergarten through grade twelve in all school districts as used by the Superintendent for the second principal apportionment for the

2007-08 fiscal year. Each school district shall receive an allocation equal to the per-pupil amount times the district's reported average daily attendance for the second principal apportionment for the 2007-08 fiscal year, excluding attendance for regional occupation centers and programs, adult education, and programs operated by the county superintendents of schools. The amount allocated to each school district shall be the same in all subsequent fiscal years as it is in the first fiscal year unless the State enlarges the appropriation as specified in II.B.2. above.

b. In any fiscal year after 2011-12 in which the provisions of paragraph (b)(3) of Section 8 of Article XVI of the California Constitution are operative, the annual appropriation shall not be required to be made. If an appropriation is not made for a specific fiscal year or years, it shall instead be made in the fiscal year or years immediately succeeding the final payment pursuant to Section II.B.2 of this Agreement.

C. To effectuate a stay of the five-year rule and to seek court approval of the settlement which makes it final and binding on LEAs, the parties agree to the following:

1. Within ten court days after execution of this Agreement, CLAIMANTS will file a response to the Petition for Administrative Mandamus, Sacramento Superior Court Case No. 03CS01432. Concurrently or as soon thereafter as the parties deem appropriate, the STATE and CLAIMANTS shall jointly stipulate to a stay of the five-year rule, and shall file such stipulation with the court. The stipulation shall provide for and ask the court to order the following:

a. A stay of the five-year rule for the purposes of this settlement, with the understanding that the five-year rule shall be in effect within ninety (90) days if the settlement terms cannot be effectuated.

b. Notice of the stay and of the settlement terms to all LEAs.

c. A court hearing, if necessary, to consider any objections to the settlement made by LEAs or other parties of standing.

d. Entry of judgment that the settlement is the final resolution of CSM-4464 assuming implementing legislation is enacted, and that after appropriate consideration of objections, if any, it is final and binding on all LEAs.

D. In the absence of any entry of judgment as specified in Section II.C.1.d. of this Agreement, the parties shall seek an alternative mutually agreeable final and formal resolution of the dispute.

E. If the events listed in Section II.A. as preconditions to the parties' obligations do not take place, the STATE or the CLAIMANTS may request the Superior Court to lift the stay issued pursuant to Section II.C.1.a., above, and to order that the five-year rule shall take effect in ninety (90) days.

III. Known Claims

With respect to section 56523 of the California Education Code and California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections read on or before July 1, 2008, ("the Hughes Bill Statute and Regulations"), CLAIMANTS hereby knowingly and voluntarily waive the rights set forth under article XIIIB, section 6, of the California Constitution, sections 17500 through 17630 of the California Government Code, and sections 1181 through 1189.11 of Title 2 of the California Code of Regulations. By signing this Agreement, CLAIMANTS hereby acknowledge that CLAIMANTS forever relinquish their right to file any mandated cost claim regarding the Hughes Bill Statute and Regulations, and further forever relinquish their right to receive any benefit(s) from any claim(s) so filed. CLAIMANTS may file mandated cost claims concerning such statutes and regulations only to the extent that state or federal statutes or regulations are amended or added or changed in any other way after July 1, 2008. CLAIMANTS further acknowledge and concede that the amount that is required to be appropriated for the purpose of satisfying the STATE's minimum funding obligation to school districts pursuant to article XVI, section 8, of the California Constitution shall not be required to be increased, to any extent, by payment of the amounts set forth in Sections II.B.1 and II.B.2 of this agreement.

IV. Unknown Claims

A. CLAIMANTS expressly waive the application of California Civil Code section 1542 regarding mandated cost claims based on Education Code section 56523 and California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections read on or before July 1, 2008.

B. CLAIMANTS certify that they have read the following provisions of California Civil Code section 1542:

"A general release does not extend to claims which the creditor does not know or suspect to exist in his favor at the time of executing the release, which if known by him must have materially affected his settlement with the debtor."

C. CLAIMANTS understand and acknowledge that the significance and consequence of the waiver of California Civil Code section 1542 is that:

1. They may have additional claims arising or occurring up to the date of this Agreement of which they are not now aware;

2. They may not make a further demand for any such claims;

3. They may not receive any benefit(s) from any such claims; and

4. They extend their waiver to include now unknown or later discovered claims.

V. Advice of Attorney

CLAIMANTS warrant and represent that they have been advised to seek legal advice from the attorney of their choice regarding the risks, complications, and costs of the Agreement. CLAIMANTS acknowledge and represent either that they relied upon legal advice from their attorney in executing this Agreement or that they chose not to rely upon legal advice from their attorney in executing this Agreement. They further acknowledge and represent that, in executing this Agreement, they have not relied on any inducements, promises, or representations other than those stated in this Agreement.

VI. Conditions of Execution

Each party acknowledges and warrants that the party's execution of this Agreement is free and voluntary.

VII. Execution of Other Documents

Each party to this Agreement shall cooperate fully in the execution of any and all other documents and the completion of any additional actions that may be necessary or appropriate to give full force and effect to the terms and intent of this Agreement.

VIII. Nonadmission

Nothing contained in the Agreement constitutes an admission or concession, by any party, as to any matter of fact or law at issue in Sacramento Superior Court Case No. 03CS01432 and/or CSM-4464, and no party hereto shall deem or construe this Agreement, or any part thereof, to be any such admission or concession. Further, nothing in this Agreement may be deemed or construed to be, by any entity or person not a party hereto, as against any party hereto, or any agency thereof, any admission or concession as to any matter of fact or law at issue in Sacramento Superior Court Case No. 03CS01432 and/or CSM-4464.

IX. Entire Agreement

This Agreement and Exhibits A and B attached hereto contain the entire Agreement between the parties. A breach of any portion of this Agreement shall be considered a breach of the whole Agreement.

X. Effective Date

This Agreement shall be effective immediately upon execution by the parties. This Agreement has retroactive effect to the extent specified herein.

XII. Governing Law

This Agreement is entered into, and shall be construed and interpreted, in accordance with the laws of the State of California and the United States.

Exhibit A to Settlement Agreement
Behavioral Intervention Plans Mandated Cost Claim

WAIVER

This Waiver is entered into on _____[DATE] by _____[NAME OF LEA], hereinafter "LEA," to fulfill one of the terms of the Settlement and Release Agreement for the Behavioral Intervention Plans Mandated Cost Claim ("Agreement").

A. Known Claims

With respect to section 56523 of the California Education Code and the California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and section 3052 as those sections read on or before July 1, 2008, (collectively "the Hughes Bill Statute and Regulations"), LEA hereby knowingly and voluntarily waives the rights set forth under article XIIIB, section 6, of the California Constitution, sections 17500 through 17630 of the California Government Code, and sections 1181 through 1189.11 of Title 2 of the California Code of Regulations. By signing this Waiver, LEA hereby acknowledges that LEA forever gives up its right to file any mandated cost claim regarding the Hughes Bill Statute and Regulations, and/or to pursue any filed claim regarding that statute and regulations, and/or to benefit from such a claim, including any claim regarding the following programs and services:

1. Special education local plan area plan requirements pursuant to California Code of Regulations, title 2, sections 3001, subdivision (c), and 3052, subdivision (j), as these sections read on July 1, 2008;

2. Development and implementation of behavioral intervention plans pursuant to California Code of Regulations, title 2, sections 3001, subdivisions (c), (d), (e), and (f), and 3052, subdivisions (a), (c), (d), (e), and (f), as these sections read on July 1, 2008;

3. Functional analysis assessments pursuant to California Code of Regulations, title 2, sections 3001, subdivisions (d) and (f), and 3052, subdivisions (b), (c), and (f), as these sections read on July 1, 2008;

4. Modifications and contingent behavioral intervention plans pursuant to California Code of Regulations, title 2, section 3052, subdivisions (g) and (h), as these sections read on July 1, 2008;

5. Development and implementation of emergency interventions pursuant to California Code of Regulations, title 2, sections 3001, subdivisions (c) and (d), and 3052, subdivision (i), as these sections read on July 1, 2008;

6. Prohibited behavioral intervention plans pursuant to California Code of Regulations, title 2, sections 3001, subdivision (d), and 3052, subdivision (l), as these sections read on July 1, 2008; and

7. Due process hearings pursuant to California Code of Regulations, title 2, section 3052, subdivision (m), as this section read on July 1, 2008.

LEA further acknowledges and concedes that the amount that is required to be appropriated for the purpose of satisfying the STATE's minimum funding obligation to LEAs pursuant to article XVI, section 8, of the California Constitution shall not be required to be increased, to any extent, by payment of the retrospective amounts described in Paragraph II.B. of the Agreement, and by signing this Waiver LEA forever gives up its right to contend otherwise.

B. Unknown Claims

1. LEA expressly waives the application of California Civil Code section 1542 regarding mandated cost claims under California Education Code section 56523 and California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections read on or before July 1, 2008.

2. LEA certifies that it has read the following provisions of California Civil Code Section 1542:

> "A general release does not extend to claims which the creditor does not know or suspect to exist in his favor at the time of executing the release, which if known by him must have materially affected his settlement with the debtor."

3. LEA understands that it is agreeing that California Civil Code section 1542 does not apply to this Waiver. LEA understands and acknowledges that the significance and consequence of this waiver of California Civil Code section 1542 is:

   a. LEA may have additional claims arising or occurring up to the date of this Waiver of which it is not now aware;

   b. LEA may not make a further demand for any such claims;

   c. LEA may not receive any benefit(s) from any such claims that may be filed by other claimants; and

   d. LEA extends its waiver to include now unknown and/or later discovered claims.

C. Exemptions

LEA signs this Waiver with the understanding that it does not prohibit LEAs from filing mandated cost claims to the extent that the Hughes Bill Statute and Regulations are amended or added or changed in any way after July 1, 2008.

D. Advice of Attorney

LEA warrants and represents that it has reviewed and understands the Notice to LEAs Re: Pending Settlement of the Behavioral Intervention Plans Mandated Cost Claim ("the Notice") and this Waiver, and that it has been advised to seek legal advice from the attorney of its choice regarding the Notice and this Waiver. LEA acknowledges and represents either that it relied upon legal advice from its attorney in executing this Waiver or that it chose not to rely upon legal advice from its attorney in executing this Waiver. LEA further acknowledges and represents that, in executing this Waiver, it has not relied on any inducements, promises, or representations other than those stated in the Notice and Waiver.

E. Contingency of Waiver

LEA understands that this Waiver is binding only if the preconditions to the full implementation of the Settlement Agreement are satisfied. Those preconditions are set out in Section C of the Notice and Section II.A. of the Agreement, and are, in brief: (1) at least 85% of all LEAs sign this Waiver, including school districts and county offices of education who served student populations accounting for 92% of the P-2 2007-08 ADA; (2) the parties seek a superior court ruling that the settlement is final and binding on all LEAs; and (3) legislation is enacted appropriating the necessary funding and placing ongoing funding in statute.

Exhibit B to Settlement Agreement
Behavioral Intervention Plans Mandated Cost Claim

DRAFT LEGISLATION

THE PEOPLE OF THE STATE OF CALIFORNIA DO ENACT AS FOLLOWS:

SECTION 1. The Legislature finds and declares that it is in the State's interest that legislation be enacted immediately to provide funding for positive behavioral intervention plans for special education students (Hughes Bill) and resolve a contested state mandate issue of fourteen-year standing. The Legislature anticipates that the Governor will request the enactment of the legislation prior to the enactment of the 2009-10 Budget Act.

SECTION 2. Section _____ is added to the Education Code to read:

[section number]

(a) The Superintendent of Public Instruction shall determine the statewide total average daily attendance used for the purposes of section 56836.08 for the 2008-09 fiscal year. For the purposes of this calculation, the 2008-09 second principal average daily attendance for the court, community school, and special education programs served by the Los Angeles County Juvenile Court and Community School/Division of Alternative Education Special Education Local Plan Area shall be used in lieu of the average daily attendance used for that agency for the purposes of section 56836.08.

(b) The Superintendent shall divide sixty-five million dollars ($65,000,000), by the amount determined pursuant to subdivision (a).

(c) For each special education local plan area, the Superintendent shall permanently increase the amount per unit of average daily attendance determined pursuant to subdivision (b) of section 56836.08 for the 2009-10 fiscal year by the quotient determined pursuant to subdivision (b). This increase shall be effective, beginning in the 2009-10 fiscal year.

(d) Notwithstanding subdivision (c), for the Los Angeles County Juvenile Court and Community School/Division of Alternative Education Special Education Local Plan Area, the superintendent shall permanently increase the amount per unit of average daily attendance determined pursuant to subdivision (b) of section 56836.08 by the ratio of the amount determined pursuant to subdivision (b) to the statewide target per unit of average daily attendance determined pursuant to section 56836.11 for the 2008-09 fiscal year. This increase shall be effective beginning in the 2009-10 fiscal year.

(e) The Superintendent shall increase the statewide target per unit of average daily attendance determined pursuant to section 56836.11 for the 2009-10 fiscal year by the amount determined pursuant to subdivision (b).

(f) The funds provided in subdivisions (a)-(e) above are to be considered in full satisfaction of, and are in lieu of, any reimbursable mandate claims for the Behavioral Intervention Plans Mandated Cost Claim. By providing this funding, the State in no way concedes the existence of any unfunded reimbursable mandate with regard to Section 56523 and its regulations in California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections and subdivisions read on July 1, 2008. These funds shall be used exclusively for programs operated under this part and, as a first priority, for the programs and services required under Section 56523 and its regulations, California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections and subdivisions read on July 1, 2008. By virtue of these funds, Section 56523 and its regulations, California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections and subdivisions read on July 1, 2008 shall be deemed to be fully funded within the meaning of Government Code Section 17556(e).

(g) Within the meaning of Government Code section 17556(e), the funds appropriated for purposes of this section are not specifically intended to fund any state-mandated special education programs and services resulting from amendments enacted after July 1, 2008, to any of the following statutes and regulations:

(1) The Individuals with Disabilities Education Act (20 U.S.C. Sec. 1400 et seq.), if such amendments result in circumstances where state law exceeds federal law;

(2) Federal regulations implementing the Individuals with Disabilities Education Act (34 C.F.R. Parts 300 and 303), if such amendments result in circumstances where state law exceeds federal law;

(3) Part 30 (commencing with section 56000); and

(4) Sections 3000 through 4671, inclusive, of Title 5 of the California Code of Regulations.

(h) State funds otherwise allocated to each special education local plan area pursuant to Chapter 7.2 (commencing with section 56836) of Part 30 and appropriated through the annual Budget Act shall supplement and not supplant these funds. These funds shall be in addition to the level of COLA provided for this program in the annual Budget Act.

SECTION 3. Section XXXXX is added to the Education Code, to read:

(a) Commencing with the 2011-12 fiscal year and each fiscal year through the 2016-17 fiscal year, the amount of eighty-five million dollars ($85,000,000), shall be appropriated, on a one-time basis each fiscal year, from the General Fund for allocation to school districts on a per-pupil basis. The Superintendent of Public Instruction shall compute the amount per pupil by dividing eighty-five million dollars ($85,000,000), by the total average daily attendance, excluding attendance for regional occupation centers and programs, adult education, and programs operated by the county superintendents of schools, for all pupils in kindergarten through grade twelve in all school districts as used by the Superintendent of Public Instruction for the second principal apportionment for the 2007-08 fiscal year. Each school district's allocation shall equal the per-pupil amount times the district's average daily attendance as reported to the Superintendent of Public Instruction for the second principal apportionment for the 2007-08 fiscal year. The amount allocated to each school district shall be the same in all subsequent fiscal years as it is in the first fiscal year.

(1) Notwithstanding the provisions of subdivision (a) above, the State, in its discretion, may cause to be appropriated and allocated amounts in excess of eighty-five million dollars ($85,000,000) annually in the period 2011-12 through 2016-17 for the purpose of discharging the obligation in advance of the six year period, so long as the total amount appropriated and allocated under this section is five hundred ten million dollars ($510,000,000).

(2) In any fiscal year after 2011-12 in which the provisions of Article XVI, section 8, paragraph (b)(3), of the California constitution are operative, the annual appropriation shall not be required to be made.

(3) The Director of Finance shall notify, in writing, the fiscal committees of both Houses of the Legislature, the Controller, and the Superintendent of Public Instruction no later than May 14, that the appropriation for the following fiscal year is not required, pursuant to paragraph (c). If any appropriation is not made for a specific fiscal year, or years, it shall instead be made in the fiscal year, or years, immediately succeeding the final payment pursuant to paragraph (a).

(4) These funds shall be in addition to the level of COLA provided to school districts in the annual Budget Act.

(b) From the funds appropriated for purposes of this section in subdivision (b) of Section 4 of the act adding this section, the Superintendent of Public Instruction shall allocate the following:

(1) From the appropriation provided by subdivision (b) of Section 4 of the act adding this section, the amount of one million five hundred thousand dollars ($1,500,000) shall be allocated by the Superintendent to county offices of education on an equal per-pupil amount. The Superintendent shall determine the per-pupil amount by dividing one million five hundred thousand dollars ($1,500,000) by the total statewide county special education pupil count only, reported by county offices of education as of December 2007. The allotment for each county office of education shall be the per-pupil amount times the county's special education pupil count reported as of December 2007. The Superintendent shall adjust the computations in such a manner as to ensure that the minimum allotment to each county office of education is at least five thousand dollars ($5,000).

(2) From the appropriation provided by subdivision (b) of Section 4 of the act adding this section, the amount of six million dollars ($6,000,000) shall be allocated by the Superintendent to SELPAs that existed for the 2007-08 fiscal year. The Superintendent shall determine the amount of each agency's allotment by dividing the six million dollars ($6,000,000) by the statewide special education pupil count reported as of December 2007. The allotment for each agency shall be the statewide per-pupil amount times the SELPA's special education pupil count reported as of December 2007. The Superintendent shall adjust the computations in such a manner as to ensure that the minimum allotment to each SELPA is at least ten thousand dollars ($10,000).

(3) From the appropriation provided by subdivision (b) of Section 4 of the act adding this section, the amount of two million five hundred thousand dollars ($2,500,000) shall be allocated by the Superintendent to the San Joaquin County Office of Education.

(c) The amounts appropriated by subdivisions (a), (b), and (c) of Section 4 of the act adding this section are in full satisfaction and in lieu of mandate claims resulting from the Commission on State Mandates' Statement of Decision CSM 4464, "Behavioral Intervention Plans."

SECTION 4.

(a) The amount of sixty-five million dollars ($65,000,000), is hereby appropriated from the General Fund in augmentation of Item 6110-161-0001 of 2009-10 Budget Act to the Superintendent of Public Instruction

for the purposes of Section 56836.08 of the Education Code. It is the intent of the Legislature that such funding be included in the annual budget act in subsequent fiscal years.

(b)

(1) The amount of ten million dollars ($10,000,000), is hereby appropriated from the General Fund to the Superintendent of Public Instruction for allocation on a one-time basis to county offices of education, and special education local plan areas (SELPAs), as specified in subdivision (b) of section _____ of the Education Code. These funds shall be in addition to the level of COLA provided for county offices of education and special education local plan areas in the annual Budget Act.

(2) For the purposes of making the computations required by article XVI, section 8, of the California Constitution, this appropriation shall be deemed to be "General Fund revenues appropriated for school districts," as defined in subdivision (a) of section 41202 of the Education Code, for the 2007-08 fiscal year, and included within the "total allocations to school districts and community college districts from General Fund proceeds of taxes appropriated pursuant to Article XIII B," as defined in subdivision (e) of section 41202 of the Education Code, for the 2007-08 fiscal year.

SECTION 5. This Act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety with the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting this necessity are: In order to alleviate the fiscal hardship to local educational agencies caused by the persistent shortfalls in federal funding for special education; to increase state funding for the special education program, thereby reducing encroachment; to facilitate the settlement of current litigation regarding those programs and the funding thereof; to obviate new litigation; and to resolve related school finance issues, it is necessary for this Act to take effect immediately.

Re: Department of Finance, Petitioner vs. Commission on State Mandates, Respondent;
San Diego Unified School District, San Joaquin County Office of Education, and Butte County Office of Education; Real Parties in Interest
Case No. 03CS01432
Hearing: March 27, 2009

Dear Judge Kenny:

I am writing to inform you that the parties have reached a settlement in the above-entitled matter. Because of the pending agreement, the parties do not plan to go forward with a hearing on the merits on March 27. However, as we have discussed with your clerk, the parties jointly would like to have a brief hearing on the settlement terms with you. Counsel for the Commission on State Mandates is unable to be present, but has endorsed the settlement.

We have filed a Joint Stipulation For Entry of Judgment and a Proposed Judgment, a copy of which is enclosed for your review. The Joint Stipulation includes a copy of the settlement agreement as Exhibit A. Our proposal is that the judgment be signed but not entered unless and until the final step in the process is completed, the enactment of legislation. Because we are seeking court endorsement of the settlement and because we recognize signing the judgment without entering it might be novel, we believe a settlement conference would be beneficial.

Thank you for your consideration of this matter.

Sincerely,

FAGEN FRIEDMAN & FULFROST, LLP

Diana McDonough

SUPERIOR COURT OF THE STATE OF CALIFORNIA

COUNTY OF SACRAMENTO

DEPARTMENT OF FINANCE, Petitioner, vs. COMMISSION ON STATE MANDATES, Respondent.	CASE NO. 03CS01432 **[PROPOSED] JUDGMENT** (No. CSM-4464) Dept: 31 Judge: Honorable Michael P. Kenny Trial Date: March 27, 2009 Action Filed: September 26, 2003
SAN DIEGO UNIFIED SCHOOL DISTRICT; SAN JOAQUIN COUNTY OFFICE OF EDUCATION; and, BUTTE COUNTY OFFICE OF EDUCATION, Real Parties in Interest.	

1. The Court has read and considered the documents filed in this case, including the stipulation for entry of judgment.

2. The Court notes the history of litigation in this matter, and that the proposed settlement has the support of 95% of all LEAs. The Court finds that the stated terms of the settlement are a just resolution of this disputed matter. The Court further agrees that the public interest is well served by the settlement agreement, which avoids the expense and uncertainty of continued litigation while providing additional funding for behavioral intervention plans and related programs/activities.

Therefore, IT IS HEREBY ORDERED AND ADJUDGED that:

1. By this judgment the Court hereby adopts and incorporates the terms of the settlement agreement which the Court finds is the full and final resolution of this matter and is binding upon each and every LEA in the State.

2. The Commission on State Mandates is permanently enjoined from taking further action regarding the Behavioral Intervention Plans Test Claim, CSM No. 4464.

3. This judgment shall be entered and filed only after the enactment of legislation into law satisfying the terms of the settlement agreement.

4. The parties shall bear their own costs and fees respecting this action.

Date: March ____, 2009

SUPERIOR COURT OF THE STATE OF CALIFORNIA

COUNTY OF SACRAMENTO

DEPARTMENT OF FINANCE, Petitioner, vs. COMMISSION ON STATE MANDATES, Respondent.	CASE NO. 03CS01432 **JOINT STIPULATION FOR ENTRY OF JUDGMENT; JUDGMENT** (No. CSM-4464)
SAN DIEGO UNIFIED SCHOOL DISTRICT; SAN JOAQUIN COUNTY OFFICE OF EDUCATION; and, BUTTE COUNTY OFFICE OF EDUCATION, Real Parties in Interest.	Dept: 31 Judge: Honorable Michael P. Kenny Trial Date: March 27, 2009 Action Filed: September 26, 2003

It is hereby stipulated and requested by and between Petitioner Department of Finance of the State of California; Respondent Commission on State Mandates of the State of California ("Commission"); and Real Parties in Interest San Diego Unified School District, San Joaquin County Office of Education, and Butte County Office of Education, individually and through their respective counsel, that judgment be entered as set forth below upon enactment into law of legislation satisfying the requirements of the settlement agreement, more fully described herein, said judgment being based upon the facts set forth herein.

1. This is an action commenced by the Department of Finance to obtain a writ of administrative mandate directing the Commission on State Mandates to vacate and annul its Statement of Decision in the Behavioral Intervention Plans Test Claim, CSM No. 4464, and to issue a new decision denying the claim in its entirety.

2. The Behavioral Intervention Plans Test Claim, CSM No. 4464, which was initiated by Real Parties in Interest on September 28, 1994, seeks reimbursement for costs associated with behavioral intervention plans, as set forth principally in California Education Code section 56523 and California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections read on or before July 1, 2008 ("the Hughes Bill Statute and Regulations"). On September 28, 2000, the Commission issued its decision finding that the Hughes Bill Statute and Regulations imposed a reimbursable state mandated program upon school districts. Because the test claim process is similar to a class action, eligible claimants under the Commission's decision consist of all school districts, county offices of education ("COEs"), special education local plan areas ("SELPAs"), and any joint agency comprised of such organizations, a total of 1,147 local educational agencies ("LEAs"). The claim at issue involves costs related to the following activities/programs required by the Hughes Bill Statute and Regulations: SELPA plan requirements, development and implementation of behavioral intervention plans, functional analysis assessments, modifications and contingent behavioral intervention plans, development and implementation of emergency interventions, prohibited behavioral intervention plans, and due process hearings. The estimated potential value of past claims is $ 1 billion, and for ongoing claims is $70 million annually.

Fagen Friedman & Fulfrost, LLP
70 Washington Street, Suite 205
Oakland, California 94607
Main: 510-550-8200 • Fax: 510-550-8211

3. On September 26, 2003, the Department of Finance filed this action, seeking to overturn the Commission's decision. On May 19, 2008, based on the parties' stipulation, this Court postponed the proceedings and extended the five year limit for bringing the matter to trial to allow the parties to attempt to negotiate a settlement. Currently the matter is set for hearing on March 27, 2009 by agreement of the parties and order of this Court.

4. Because the Real Parties in Interest hoped for settlement, they did not pursue other administrative processes with the Commission necessary to finalize the claiming procedures, and accordingly, school districts filed no claims. The Real Parties in Interest advised the Commission that settlement was pending. The Commission, however, continues to have statutory duties outstanding with respect to the claim.

5. This matter has now been settled by Petitioner Department of Finance and Real Parties in Interest San Diego Unified School District, San Joaquin County Office of Education, and Butte County Office of Education, with the support of Respondent Commission. Under the terms of that settlement, the State will pay retroactive reimbursement to: (1) school districts in the amount of $510 million, to be paid in $85 million annual installments over six years starting in 2011-12 and ending in 2016-17, (2) COEs in the amount of $1.5 million in 2009-10, and (3) SELPAs in the amount of $6.0 million in 2009-2010. The State will also permanently increase the ongoing special education statutory funding formula by $65 million annually, beginning in 2009-10. In exchange, the LEAs will waive their rights to file Hughes Bill Statute and Regulations reimbursement claims. A summary of the settlement and a full copy of the settlement agreement are attached to this document as Exhibit A.

6. The settlement is contingent on the following: (1) by February 28, 2009, formal waivers being submitted by at least 85% of LEAs representing at least 92% of student average daily attendance statewide; (2) the parties seeking a superior court ruling that the settlement is final and binding on all LEAs; and (3) legislation providing the necessary funds being enacted prior to or as part of the 2009-2010 budget process.

7. As of February 28, 2009, 95% of all LEAs, representing 99% of student average daily attendance statewide, had signed the required waiver. Further, Assembly Member Tom

Fagen Friedman & Fulfrost, LLP
70 Washington Street, Suite 205
Oakland, California 94607
Main: 510-550-8200 • Fax: 510-550-8211

Torlakson has agreed to sponsor the necessary funding legislation, and the Legislative Counsel has released its initial draft of the bill (AB 661) to the settling parties. (See Declaration of Richard L. Hamilton, attached to this document as Exhibit B).

8. In light of the circumstances set forth in paragraph 1 through 7 of this document; to avoid the costs, delay, and uncertainty of further litigation; to avoid the necessity of resolving disputed issues of fact and law; and to alleviate the uncertainty regarding state funding of behavioral intervention programs and services in California's public schools, the parties have agreed to compromise and settle this matter in accord with the settlement document attached hereto as Exhibit A.

9. The parties now turn to this Court and by this stipulation seek a judgment that the settlement is the final resolution of this lawsuit as well as CSM No. 4464 and that all LEAs in the state are bound thereby, thus fulfilling the second condition specified in the settlement agreement, said judgment not to be entered or filed until legislation has been enacted into law satisfying the terms of the settlement agreement.

JUDGMENT PRAYED FOR

10. Therefore, the parties pray that judgment be entered in accord with the terms of the settlement agreement and respectfully request that the Court find that the settlement is the full and final resolution of this matter and that its terms, conditions, and restrictions are binding upon all LEAs in the State. Further, the parties request that the Commission on State Mandates be permanently enjoined from taking further action regarding the Behavioral Intervention Plans Test Claim, CSM No. 4464. Judgment shall be entered and filed only upon legislation being enacted into law satisfying the terms of the settlement agreement.

Respectfully submitted,

March 19, 2009

JUDGMENT

1. The Court has read and considered the documents filed in this case, including the stipulation for entry of judgment above.

2. The Court notes the history of litigation in this matter, and that the proposed settlement has the support of 95% of all LEAs. The Court finds that the stated terms of the settlement are a just resolution of this disputed matter. The Court further agrees that the public interest is well served by the settlement agreement, which avoids the expense and uncertainty of continued litigation while providing additional funding for behavioral intervention plans and related programs/activities.

Therefore, IT IS HEREBY ORDERED AND ADJUDGED that:

1. By this judgment the Court hereby adopts and incorporates the terms of the settlement agreement which the Court finds is the full and final resolution of this matter and is binding upon each and every LEA in the State.

2. The Commission on State Mandates is permanently enjoined from taking further action regarding the Behavioral Intervention Plans Test Claim, CSM No. 4464.

3. This judgment shall be entered and filed only after the enactment of legislation into law satisfying the terms of the settlement agreement.

4. The parties shall bear their own costs and fees respecting this action.

Date: March ____, 2009

SUMMARY

Settlement and Release Agreement
Behavioral Intervention Plan (Hughes Bill) Mandated Cost Claim

The State and school test claimants San Diego Unified School District, Butte County Office of Education, and San Joaquin County Office of Education have reached a settlement in the Behavioral Intervention Plans ("BIP") (Hughes Bill) Mandated Cost Claim and lawsuit, a claim dating from 1994. The settlement provides for an ongoing increase to special education funding and retroactive reimbursement to school districts, county offices of education, and special education local plan areas ("SELPAs") (collectively "LEAs") for general fund use, contingent on LEA approval.

In addition to test claimants San Diego USD, Butte COE, and San Joaquin COE who pursued this matter for 14 years, thanks go to many hard-working SELPAs for providing essential cost information, and to the California School Boards Association's ("CSBA") Education Legal Alliance for encouraging this settlement, ultimately funding the services of Fagen Friedman & Fulfrost, Diana McDonough, Of Counsel, to reach this agreement.

The settlement provides for the following funding:

> $510 million payable to school districts as general fund reimbursement, in $85 million installments over 6 years, from 2011-12 through 2016-17, based on 2007-08 P2 ADA.
>
> $10 million payable as general fund reimbursement in 2009-10 as follows:
> --- $ 1.5 million to county offices based on Dec. 2007 county special education pupil count
> ---- $ 6.0 million to SELPAs based on Dec. 2007 special education pupil count
> --- $ 2.5 million to claimants and others for administrative costs incurred in pursuing the claim.
>
> $65 million added in 2009-10 as a **permanent increase** to the AB 602 special education funding base. Commencing in 2010-11, this amount will be subject to COLA and growth to the extent it is added to AB 602 generally.

The settlement is contingent on the following:

1. By February 28, 2009, 85% of all LEAs (school districts, county offices, and SELPAs) must sign a waiver document; the signatory school districts and county offices must represent at least 92% of statewide ADA. In the document, LEAs waive their rights to contest the settlement and to file any BIP/Hughes Bill mandated cost claims.

2. The parties will seek a superior court ruling that the settlement is final and binding on all LEAs in March 2009.

3. Legislation must be enacted appropriating the necessary funds and placing the ongoing funding in statute. This will be requested early in 2009.

While none of the above triggers is assumed, the first one is most critical. Without immediate school district, county, and SELPA support, this settlement will not take place. If any of the above does not happen, the matter will revert to Sacramento Superior Court.

December 1, 2008

SETTLEMENT AND RELEASE AGREEMENT
BEHAVIORAL INTERVENTION PLANS [HUGHES BILL] MANDATED COST CLAIM

This settlement and release agreement ("Agreement") is entered into this 26th day of ~~2008~~ January, 2009 by DKM and between the State of California ("the STATE") on the one hand, and San Diego Unified School District, Butte County Office of Education, and San Joaquin County Office of Education (collectively "CLAIMANTS") on the other, who, in consideration of the promises made herein, agree as follows:

I. Nature and Status of the Dispute

Effective January 1, 1991, Education Code section 56523 was added to the Education Code. That section required the development and adoption of regulations governing positive behavioral interventions for special education students by the State Board of Education ("the SBE"). In 1993, the SBE promulgated California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 to implement Education Code section 56523. The Education Code section and its implementing regulations are referred to cumulatively as "the Hughes Bill."

The Behavioral Intervention Plans Mandated Cost Claim was initiated on September 28, 1994, when San Diego Unified School District, Butte County Office of Education, and San Joaquin County Office of Education filed test claim CSM-4464 with the Commission on State Mandates ("the Commission"). The Behavioral Intervention Plans Mandated Cost Claim asked the STATE to reimburse local educational agencies ("LEAs"), including school districts, county offices of education, special education local plan areas ("SELPAs"), and joint agencies composed of such organizations for the costs of implementing the Hughes Bill.

On September 28, 2000, the Commission adopted a Statement of Decision on CSM-4464 finding that the Hughes Bill imposed a reimbursable state mandate on school districts by requiring the following seven activities: SELPA plan requirements, development and implementation of behavioral intervention plans, functional analysis assessments, modifications and contingent behavioral intervention plans, development and implementation of emergency interventions, prohibited behavioral intervention plans, and due process hearings. The settlement of the Special Education Mandated Cost Claim in 2000-2001 explicitly omitted the Behavioral Intervention Plans Mandated Cost Claim (Ed. Code § 56836.156(g)).

Subsequently CLAIMANTS proposed parameters and guidelines for the CSM-4464 claiming process but various disputes arose with the STATE and a final draft was never adopted by the Commission. The parties attempted settlement without success and the matter reached a stalemate.

On September 26, 2003, the STATE's Department of Finance filed a Petition for Administrative Mandamus in the Sacramento Superior Court challenging the Commission's decision in CSM-4464. It named the Commission as Respondent, and CLAIMANTS as Real Parties in Interest (*Department of Finance v. Commission on State Mandates*, Sacramento Superior Court Case No. 03CS01432). The Petition maintained that the Hughes Bill was not a reimbursable state mandate because 1) it was required by federal law, 2) it merely implemented federal requirements, and

3) it did not exceed those requirements. The matter is still pending. CLAIMANTS have filed no responsive pleadings as yet.

On October 4, 2007, the Deputy Attorney General representing the STATE's Department of Finance in the above case wrote to CLAIMANTS stating that pending reforms in the mandate process could present a timely opportunity to continue negotiations. The Deputy Attorney General noted that the mandate reform legislation, AB 1222, included the option of the joint development of a reasonable reimbursement methodology and cost estimate. The Deputy Attorney General suggested a meeting if CLAIMANTS were interested in resolving the matter and noted that, absent successful settlement, she planned to schedule a hearing in Sacramento Superior Court in April 2008. In response, CLAIMANTS contacted the Deputy Attorney General and the parties began meeting to work on a mutually agreeable resolution.

A chief task in the settlement process was developing a statewide cost estimate for the claim. Ultimately CLAIMANTS completed surveys of more than 20 SELPAs representing more than 10% of public school students statewide. The STATE's Department of Finance staff reviewed copies of all survey returns and verified that the cumulative cost totals accurately reflected the SELPA data.

In May 2008, the Sacramento Superior Court notified the STATE that it must bring its case to trial by September 26, 2008, or be subject to dismissal under the state law which requires all matters to be brought to trial within five years ("the five-year rule"). Ultimately, the parties filed a stipulation with the court agreeing to extend the five-year period to March 27, 2009, in the hopes that agreement could be reached.

The STATE's Department of Finance continues to dispute the Commission's decision in CSM-4464 that the Hughes Bill is a reimbursable mandate. CLAIMANTS believe the Commission's decision was correct and that the Hughes Bill imposes requirements on school districts that are not mandated by federal law.

To avoid the costs and uncertainty of further litigation, to alleviate the uncertainty regarding the Hughes Bill funding, and to expedite the resolution of this long-pending mandate claim in the spirit of AB 1222, the parties have determined to compromise and settle the claims raised in Sacramento Superior Court Case No. 03CS01432 and the underlying administrative decision of the Commission on State Mandates in CSM-4464 on the terms and conditions set forth below.

II. Actions to Resolve Dispute

A. The mutual obligations and duties of the parties set forth herein are contingent upon all of the following events occurring:

1. On or before February 28, 2009, no less than 85% of all K-12 school districts, county offices of education, and SELPAs shall sign the Waiver, attached hereto as Exhibit A. In addition, the school districts and county offices signing Exhibit A must have served student populations accounting

for no less than 92% of the second principal apportionment (P-2) average daily attendance in the 2007-08 fiscal year.

2. The parties shall seek a superior court ruling that the settlement is final and binding on all LEAs, assuming implementing legislation is enacted. In the absence of such a ruling, the parties shall seek an alternative, mutually agreeable final and formal resolution of the dispute.

3. Prior to or concurrent with the enactment of the Budget Act for the 2009-10 fiscal year, legislation is enacted that contains provisions identical to or substantially similar to the language contained in Exhibit B. It is the intent of the parties that, on or before January 10, 2009, the Legislature shall be requested to enact such legislation on an urgency basis. Any modifications to the proposed legislation shall be made only with agreement of all the signatories to this settlement document.

   a. The proposed legislation shall appropriate the amount of ten million dollars ($10,000,000) payable upon enactment and allocated in accord with Section II.B. of this Agreement.

   b. The proposed legislation shall require additional funding of five-hundred and ten million dollars ($510,000,000) in total payable over a six-year period, or lesser period at the STATE's discretion, commencing July 1, 2011, and allocated in accord with Section II.B. of this Agreement.

   c. The proposed legislation shall include statutory language to revise the existing special education funding model established by Assembly Bill 602 (Chapter 854, Statutes of 1997) to provide an ongoing increase of sixty-five million dollars ($65,000,000) annually to special education programs. The proposed legislation shall appropriate the first year of funding.

   d. The combination of the above appropriations is to be considered in full satisfaction of, and is in lieu of, any reimbursable mandate claims that would have been filed as a result of CSM-4464. By providing this funding for CSM-4464, the STATE in no way concedes the existence of an unfunded reimbursable mandate for that claim.

B. For the purposes of this settlement only, to resolve any and all retrospective mandated cost claims from 1993-94 to 2008-09 arising from CSM-4464 and the Statement of Decision adopted by the Commission on State Mandates on September 28, 2000, the STATE agrees that:

1. Upon enactment of legislation prior to or concurrent with the 2009-10 Budget Act, payment in the amount of ten million dollars ($10,000,000) will be allocated to LEAs as follows:

   a. One million five hundred thousand dollars ($1,500,000) shall be allocated to county offices of education on an equal per-pupil basis. The amount of each agency's allocation shall be determined by dividing one million five hundred thousand dollars ($1,500,000) by the total statewide county special education pupil count only, as reported by county offices of education as of December 2007. The allotment for each county office of education shall be the per-pupil amount times the county's special education pupil count reported as of December 2007. The State Superintendent of Public Instruction ("the Superintendent") shall adjust the computations in such a manner as to ensure that the allotment to each county office of education is at least five thousand dollars ($5,000).

   b. Six million dollars ($6,000,000) shall be allocated to SELPAs that existed for the 2007-08 fiscal year. The amount of each agency's allocation shall be determined by dividing six million dollars ($6,000,000) by the total statewide special education pupil count as of December 2007. The allotment for each agency shall be the statewide per-pupil amount times the SELPA's special education pupil count reported as of December 2007. The State Superintendent of Public Instruction ("the Superintendent") shall adjust the computations in such a manner as to ensure that the allotment to each SELPA is at least ten thousand dollars ($10,000).

   c. Two million five hundred thousand dollars ($2,500,000) shall be paid to San Joaquin County Office of Education.

2. In accord with legislation enacted prior to or concurrent with the 2009-10 Budget Act, the State will pay an additional five hundred and ten million dollars ($510,000,000) to school districts. This amount shall be allocated in installment payments of eighty-five million dollars ($85,000,000) commencing July 1, 2011, and annually thereafter for a period of six years unless the STATE in its discretion enlarges the installment amount from time to time, thereby discharging the obligation in advance of the six year period. These payments shall be allocated to school districts on a per-pupil basis as follows:

   a. The appropriation shall be divided by the total average daily attendance, excluding attendance for regional occupation centers and programs, adult education, and programs operated by the county superintendents of schools, for all pupils in kindergarten through grade twelve in all school districts as used by the Superintendent for the second principal apportionment for the

2007-08 fiscal year. Each school district shall receive an allocation equal to the per-pupil amount times the district's reported average daily attendance for the second principal apportionment for the 2007-08 fiscal year, excluding attendance for regional occupation centers and programs, adult education, and programs operated by the county superintendents of schools. The amount allocated to each school district shall be the same in all subsequent fiscal years as it is in the first fiscal year unless the State enlarges the appropriation as specified in II.B.2. above.

b. In any fiscal year after 2011-12 in which the provisions of paragraph (b)(3) of Section 8 of Article XVI of the California Constitution are operative, the annual appropriation shall not be required to be made. If an appropriation is not made for a specific fiscal year or years, it shall instead be made in the fiscal year or years immediately succeeding the final payment pursuant to Section II.B.2 of this Agreement.

C. To effectuate a stay of the five-year rule and to seek court approval of the settlement which makes it final and binding on LEAs, the parties agree to the following:

1. Within ten court days after execution of this Agreement, CLAIMANTS will file a response to the Petition for Administrative Mandamus, Sacramento Superior Court Case No. 03CS01432. Concurrently or as soon thereafter as the parties deem appropriate, the STATE and CLAIMANTS shall jointly stipulate to a stay of the five-year rule, and shall file such stipulation with the court. The stipulation shall provide for and ask the court to order the following:

a. A stay of the five-year rule for the purposes of this settlement, with the understanding that the five-year rule shall be in effect within ninety (90) days if the settlement terms cannot be effectuated.

b. Notice of the stay and of the settlement terms to all LEAs.

c. A court hearing, if necessary, to consider any objections to the settlement made by LEAs or other parties of standing.

d. Entry of judgment that the settlement is the final resolution of CSM-4464 assuming implementing legislation is enacted, and that after appropriate consideration of objections, if any, it is final and binding on all LEAs.

D. In the absence of any entry of judgment as specified in Section II.C.1.d. of this Agreement, the parties shall seek an alternative mutually agreeable final and formal resolution of the dispute.

E. If the events listed in Section II.A. as preconditions to the parties' obligations do not take place, the STATE or the CLAIMANTS may request the Superior Court to lift the stay issued pursuant to Section II.C.1.a., above, and to order that the five-year rule shall take effect in ninety (90) days.

III. Known Claims

With respect to section 56523 of the California Education Code and California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections read on or before July 1, 2008, ("the Hughes Bill Statute and Regulations"), CLAIMANTS hereby knowingly and voluntarily waive the rights set forth under article XIIIB, section 6, of the California Constitution, sections 17500 through 17630 of the California Government Code, and sections 1181 through 1189.11 of Title 2 of the California Code of Regulations. By signing this Agreement, CLAIMANTS hereby acknowledge that CLAIMANTS forever relinquish their right to file any mandated cost claim regarding the Hughes Bill Statute and Regulations, and further forever relinquish their right to receive any benefit(s) from any claim(s) so filed. CLAIMANTS may file mandated cost claims concerning such statutes and regulations only to the extent that state or federal statutes or regulations are amended or added or changed in any other way after July 1, 2008. CLAIMANTS further acknowledge and concede that the amount that is required to be appropriated for the purpose of satisfying the STATE's minimum funding obligation to school districts pursuant to article XVI, section 8, of the California Constitution shall not be required to be increased, to any extent, by payment of the amounts set forth in Sections II.B.1 and II.B.2 of this agreement.

IV. Unknown Claims

A. CLAIMANTS expressly waive the application of California Civil Code section 1542 regarding mandated cost claims based on Education Code section 56523 and California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections read on or before July 1, 2008.

B. CLAIMANTS certify that they have read the following provisions of California Civil Code section 1542:

"A general release does not extend to claims which the creditor does not know or suspect to exist in his favor at the time of executing the release, which if known by him must have materially affected his settlement with the debtor."

C. CLAIMANTS understand and acknowledge that the significance and consequence of the waiver of California Civil Code section 1542 is that:

1. They may have additional claims arising or occurring up to the date of this Agreement of which they are not now aware;

2. They may not make a further demand for any such claims;

3. They may not receive any benefit(s) from any such claims; and

4. They extend their waiver to include now unknown or later discovered claims.

V. Advice of Attorney

CLAIMANTS warrant and represent that they have been advised to seek legal advice from the attorney of their choice regarding the risks, complications, and costs of the Agreement. CLAIMANTS acknowledge and represent either that they relied upon legal advice from their attorney in executing this Agreement or that they chose not to rely upon legal advice from their attorney in executing this Agreement. They further acknowledge and represent that, in executing this Agreement, they have not relied on any inducements, promises, or representations other than those stated in this Agreement.

VI. Conditions of Execution

Each party acknowledges and warrants that the party's execution of this Agreement is free and voluntary.

VII. Execution of Other Documents

Each party to this Agreement shall cooperate fully in the execution of any and all other documents and the completion of any additional actions that may be necessary or appropriate to give full force and effect to the terms and intent of this Agreement.

VIII. Nonadmission

Nothing contained in the Agreement constitutes an admission or concession, by any party, as to any matter of fact or law at issue in Sacramento Superior Court Case No. 03CS01432 and/or CSM-4464, and no party hereto shall deem or construe this Agreement, or any part thereof, to be any such admission or concession. Further, nothing in this Agreement may be deemed or construed to be, by any entity or person not a party hereto, as against any party hereto, or any agency thereof, any admission or concession as to any matter of fact or law at issue in Sacramento Superior Court Case No. 03CS01432 and/or CSM-4464.

IX. Entire Agreement

This Agreement and Exhibits A and B attached hereto contain the entire Agreement between the parties. A breach of any portion of this Agreement shall be considered a breach of the whole Agreement.

X. Effective Date

This Agreement shall be effective immediately upon execution by the parties. This Agreement has retroactive effect to the extent specified herein.

XII. Governing Law

This Agreement is entered into, and shall be construed and interpreted, in accordance with the laws of the State of California and the United States.
00334.00100/105941.1

XIII. Counterparts

This Agreement may be signed in counterparts, such that signatures appear on separate pages. A copy or original of this document with all signature pages appended together shall be deemed a fully executed Agreement.

Exhibit A to Settlement Agreement
Behavioral Intervention Plans Mandated Cost Claim

WAIVER

This Waiver is entered into on _____[DATE] by _____[NAME OF LEA], hereinafter "LEA," to fulfill one of the terms of the Settlement and Release Agreement for the Behavioral Intervention Plans Mandated Cost Claim ("Agreement").

A. Known Claims

With respect to section 56523 of the California Education Code and the California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and section 3052 as those sections read on or before July 1, 2008, (collectively "the Hughes Bill Statute and Regulations"), LEA hereby knowingly and voluntarily waives the rights set forth under article XIIIB, section 6, of the California Constitution, sections 17500 through 17630 of the California Government Code, and sections 1181 through 1189.11 of Title 2 of the California Code of Regulations. By signing this Waiver, LEA hereby acknowledges that LEA forever gives up its right to file any mandated cost claim regarding the Hughes Bill Statute and Regulations, and/or to pursue any filed claim regarding that statute and regulations, and/or to benefit from such a claim, including any claim regarding the following programs and services:

1. Special education local plan area plan requirements pursuant to California Code of Regulations, title 2, sections 3001, subdivision (c), and 3052, subdivision (j), as these sections read on July 1, 2008;

2. Development and implementation of behavioral intervention plans pursuant to California Code of Regulations, title 2, sections 3001, subdivisions (c), (d), (e), and (f), and 3052, subdivisions (a), (c), (d), (e), and (f), as these sections read on July 1, 2008;

3. Functional analysis assessments pursuant to California Code of Regulations, title 2, sections 3001, subdivisions (d) and (f), and 3052, subdivisions (b), (c), and (f), as these sections read on July 1, 2008;

4. Modifications and contingent behavioral intervention plans pursuant to California Code of Regulations, title 2, section 3052, subdivisions (g) and (h), as these sections read on July 1, 2008;

5. Development and implementation of emergency interventions pursuant to California Code of Regulations, title 2, sections 3001, subdivisions (c) and (d), and 3052, subdivision (i), as these sections read on July 1, 2008;

6. Prohibited behavioral intervention plans pursuant to California Code of Regulations, title 2, sections 3001, subdivision (d), and 3052, subdivision (l), as these sections read on July 1, 2008; and

7. Due process hearings pursuant to California Code of Regulations, title 2, section 3052, subdivision (m), as this section read on July 1, 2008.

LEA further acknowledges and concedes that the amount that is required to be appropriated for the purpose of satisfying the STATE's minimum funding obligation to LEAs pursuant to article XVI, section 8, of the California Constitution shall not be required to be increased, to any extent, by payment of the retrospective amounts described in Paragraph II.B. of the Agreement, and by signing this Waiver LEA forever gives up its right to contend otherwise.

B. Unknown Claims

1. LEA expressly waives the application of California Civil Code section 1542 regarding mandated cost claims under California Education Code section 56523 and California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections read on or before July 1, 2008.

2. LEA certifies that it has read the following provisions of California Civil Code Section 1542:

> "A general release does not extend to claims which the creditor does not know or suspect to exist in his favor at the time of executing the release, which if known by him must have materially affected his settlement with the debtor."

3. LEA understands that it is agreeing that California Civil Code section 1542 does not apply to this Waiver. LEA understands and acknowledges that the significance and consequence of this waiver of California Civil Code section 1542 is:

   a. LEA may have additional claims arising or occurring up to the date of this Waiver of which it is not now aware;

   b. LEA may not make a further demand for any such claims;

   c. LEA may not receive any benefit(s) from any such claims that may be filed by other claimants; and

   d. LEA extends its waiver to include now unknown and/or later discovered claims.

C. Exemptions

LEA signs this Waiver with the understanding that it does not prohibit LEAs from filing mandated cost claims to the extent that the Hughes Bill Statute and Regulations are amended or added or changed in any way after July 1, 2008.

D. Advice of Attorney

LEA warrants and represents that it has reviewed and understands the Notice to LEAs Re: Pending Settlement of the Behavioral Intervention Plans Mandated Cost Claim ("the Notice") and this Waiver, and that it has been advised to seek legal advice from the attorney of its choice regarding the Notice and this Waiver. LEA acknowledges and represents either that it relied upon legal advice from its attorney in executing this Waiver or that it chose not to rely upon legal advice from its attorney in executing this Waiver. LEA further acknowledges and represents that, in executing this Waiver, it has not relied on any inducements, promises, or representations other than those stated in the Notice and Waiver.

E. Contingency of Waiver

LEA understands that this Waiver is binding only if the preconditions to the full implementation of the Settlement Agreement are satisfied. Those preconditions are set out in Section C of the Notice and Section II.A. of the Agreement, and are, in brief: (1) at least 85% of all LEAs sign this Waiver, including school districts and county offices of education who served student populations accounting for 92% of the P-2 2007-08 ADA; (2) the parties seek a superior court ruling that the settlement is final and binding on all LEAs; and (3) legislation is enacted appropriating the necessary funding and placing ongoing funding in statute.

Behavioral Intervention Plans Mandated Cost Claim

DRAFT LEGISLATION

THE PEOPLE OF THE STATE OF CALIFORNIA DO ENACT AS FOLLOWS:

SECTION 1. The Legislature finds and declares that it is in the State's interest that legislation be enacted immediately to provide funding for positive behavioral intervention plans for special education students (Hughes Bill) and resolve a contested state mandate issue of fourteen-year standing. The Legislature anticipates that the Governor will request the enactment of the legislation prior to the enactment of the 2009-10 Budget Act.

SECTION 2. Section _____ is added to the Education Code to read:

[section number]

(a) The Superintendent of Public Instruction shall determine the statewide total average daily attendance used for the purposes of section 56836.08 for the 2008-09 fiscal year. For the purposes of this calculation, the 2008-09 second principal average daily attendance for the court, community school, and special education programs served by the Los Angeles County Juvenile Court and Community School/Division of Alternative Education Special Education Local Plan Area shall be used in lieu of the average daily attendance used for that agency for the purposes of section 56836.08.

(b) The Superintendent shall divide sixty-five million dollars ($65,000,000), by the amount determined pursuant to subdivision (a).

(c) For each special education local plan area, the Superintendent shall permanently increase the amount per unit of average daily attendance determined pursuant to subdivision (b) of section 56836.08 for the 2009-10 fiscal year by the quotient determined pursuant to subdivision (b). This increase shall be effective, beginning in the 2009-10 fiscal year.

(d) Notwithstanding subdivision (c), for the Los Angeles County Juvenile Court and Community School/Division of Alternative Education Special Education Local Plan Area, the superintendent shall permanently increase the amount per unit of average daily attendance determined pursuant to subdivision (b) of section 56836.08 by the ratio of the amount determined pursuant to subdivision (b) to the statewide target per unit of average daily attendance determined pursuant to section 56836.11 for the 2008-09 fiscal year. This increase shall be effective beginning in the 2009-10 fiscal year.

(e) The Superintendent shall increase the statewide target per unit of average daily attendance determined pursuant to section 56836.11 for the 2009-10 fiscal year by the amount determined pursuant to subdivision (b).

(f) The funds provided in subdivisions (a)-(e) above are to be considered in full satisfaction of, and are in lieu of, any reimbursable mandate claims for the Behavioral Intervention Plans Mandated Cost Claim. By providing this funding, the State in no way concedes the existence of any unfunded reimbursable mandate with regard to Section 56523 and its regulations in California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections and subdivisions read on July 1, 2008. These funds shall be used exclusively for programs operated under this part and, as a first priority, for the programs and services required under Section 56523 and its regulations, California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections and subdivisions read on July 1, 2008. By virtue of these funds, Section 56523 and its regulations, California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections and subdivisions read on July 1, 2008 shall be deemed to be fully funded within the meaning of Government Code Section 17556(e).

(g) Within the meaning of Government Code section 17556(e), the funds appropriated for purposes of this section are not specifically intended to fund any state-mandated special education programs and services resulting from amendments enacted after July 1, 2008, to any of the following statutes and regulations:

(1) The Individuals with Disabilities Education Act (20 U.S.C. Sec. 1400 et seq.), if such amendments result in circumstances where state law exceeds federal law;

(2) Federal regulations implementing the Individuals with Disabilities Education Act (34 C.F.R. Parts 300 and 303), if such amendments result in circumstances where state law exceeds federal law;

(3) Part 30 (commencing with section 56000); and

(4) Sections 3000 through 4671, inclusive, of Title 5 of the California Code of Regulations.

(h) State funds otherwise allocated to each special education local plan area pursuant to Chapter 7.2 (commencing with section 56836) of Part 30 and appropriated through the annual Budget Act shall supplement and not supplant these funds. These funds shall be in addition to the level of COLA provided for this program in the annual Budget Act.

SECTION 3. Section XXXXX is added to the Education Code, to read:

(a) Commencing with the 2011-12 fiscal year and each fiscal year through the 2016-17 fiscal year, the amount of eighty-five million dollars ($85,000,000), shall be appropriated, on a one-time basis each fiscal year, from the General Fund for allocation to school districts on a per-pupil basis. The Superintendent of Public Instruction shall compute the amount per pupil by dividing eighty-five million dollars ($85,000,000), by the total average daily attendance, excluding attendance for regional occupation centers and programs, adult education, and programs operated by the county superintendents of schools, for all pupils in kindergarten through grade twelve in all school districts as used by the Superintendent of Public Instruction for the second principal apportionment for the 2007-08 fiscal year. Each school district's allocation shall equal the per-pupil amount times the district's average daily attendance as reported to the Superintendent of Public Instruction for the second principal apportionment for the 2007-08 fiscal year. The amount allocated to each school district shall be the same in all subsequent fiscal years as it is in the first fiscal year.

(1) Notwithstanding the provisions of subdivision (a) above, the State, in its discretion, may cause to be appropriated and allocated amounts in excess of eighty-five million dollars ($85,000,000) annually in the period 2011-12 through 2016-17 for the purpose of discharging the obligation in advance of the six year period, so long as the total amount appropriated and allocated under this section is five hundred ten million dollars ($510,000,000).

(2) In any fiscal year after 2011-12 in which the provisions of Article XVI, section 8, paragraph (b)(3), of the California constitution are operative, the annual appropriation shall not be required to be made.

(3) The Director of Finance shall notify, in writing, the fiscal committees of both Houses of the Legislature, the Controller, and the Superintendent of Public Instruction no later than May 14, that the appropriation for the following fiscal year is not required, pursuant to paragraph (c). If any appropriation is not made for a specific fiscal year, or years, it shall instead be made in the fiscal year, or years, immediately succeeding the final payment pursuant to paragraph (a).

(4) These funds shall be in addition to the level of COLA provided to school districts in the annual Budget Act.

(b) From the funds appropriated for purposes of this section in subdivision (b) of Section 4 of the act adding this section, the Superintendent of Public Instruction shall allocate the following:

(1) From the appropriation provided by subdivision (b) of Section 4 of the act adding this section, the amount of one million five hundred thousand dollars ($1,500,000) shall be allocated by the Superintendent to county offices of education on an equal per-pupil amount. The Superintendent shall determine the per-pupil amount by dividing one million five hundred thousand dollars ($1,500,000) by the total statewide county special education pupil count only, reported by county offices of education as of December 2007. The allotment for each county office of education shall be the per-pupil amount times the county's special education pupil count reported as of December 2007. The Superintendent shall adjust the computations in such a manner as to ensure that the minimum allotment to each county office of education is at least five thousand dollars ($5,000).

(2) From the appropriation provided by subdivision (b) of Section 4 of the act adding this section, the amount of six million dollars ($6,000,000) shall be allocated by the Superintendent to SELPAs that existed for the 2007-08 fiscal year. The Superintendent shall determine the amount of each agency's allotment by dividing the six million dollars ($6,000,000) by the statewide special education pupil count reported as of December 2007. The allotment for each agency shall be the statewide per-pupil amount times the SELPA's special education pupil count reported as of December 2007. The Superintendent shall adjust the computations in such a manner as to ensure that the minimum allotment to each SELPA is at least ten thousand dollars ($10,000).

(3) From the appropriation provided by subdivision (b) of Section 4 of the act adding this section, the amount of two million five hundred thousand dollars ($2,500,000) shall be allocated by the Superintendent to the San Joaquin County Office of Education.

(c) The amounts appropriated by subdivisions (a), (b), and (c) of Section 4 of the act adding this section are in full satisfaction and in lieu of mandate claims resulting from the Commission on State Mandates' Statement of Decision CSM 4464, "Behavioral Intervention Plans."

SECTION 4.

(a) The amount of sixty-five million dollars ($65,000,000), is hereby appropriated from the General Fund in augmentation of Item 6110-161-0001 of 2009-10 Budget Act to the Superintendent of Public Instruction

for the purposes of Section 56836.08 of the Education Code. It is the intent of the Legislature that such funding be included in the annual budget act in subsequent fiscal years.

(b)

(1) The amount of ten million dollars ($10,000,000), is hereby appropriated from the General Fund to the Superintendent of Public Instruction for allocation on a one-time basis to county offices of education, and special education local plan areas (SELPAs), as specified in subdivision (b) of section _____ of the Education Code. These funds shall be in addition to the level of COLA provided for county offices of education and special education local plan areas in the annual Budget Act.

(2) For the purposes of making the computations required by article XVI, section 8, of the California Constitution, this appropriation shall be deemed to be "General Fund revenues appropriated for school districts," as defined in subdivision (a) of section 41202 of the Education Code, for the 2007-08 fiscal year, and included within the "total allocations to school districts and community college districts from General Fund proceeds of taxes appropriated pursuant to Article XIII B," as defined in subdivision (e) of section 41202 of the Education Code, for the 2007-08 fiscal year.

SECTION 5. This Act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety with the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting this necessity are: In order to alleviate the fiscal hardship to local educational agencies caused by the persistent shortfalls in federal funding for special education; to increase state funding for the special education program, thereby reducing encroachment; to facilitate the settlement of current litigation regarding those programs and the funding thereof; to obviate new litigation; and to resolve related school finance issues, it is necessary for this Act to take effect immediately.

CASE NO. 03CS01432

DECLARATION OF RICHARD L. HAMILTON IN SUPPORT OF JOINT STIPULATION FOR ENTRY OF JUDGMENT

(No. CSM-4464)

I, Richard L. Hamilton, make the following declaration and statement:

1. I have personal knowledge of the facts stated in this declaration and, if called as a witness, I would and could competently testify to them under oath.

2. Since 1998 I have worked for the California School Boards Association ("CSBA") as Associate General Counsel and Director of the Education Legal Alliance. For the twenty years prior to joining CSBA, I was an attorney in private practice representing school districts. I became a member of the California Bar in January, 1966 and I am still in active status. My State

Fagen Friedman & Fulfrost, LLP
70 Washington Street, Suite 205
Oakland, California 94607
Main: 510-550-8200 • Fax: 510-550-8211

Bar number is 037495.

3. CSBA is composed of nearly 1000 K-12 school districts, county offices of education, and regional occupation centers/programs. CSBA's Education Legal Alliance is an arm of CSBA supported by the dues of just under 800 CSBA members. It initiates and supports litigation in cases of statewide importance to California schools. As Director of the Education Legal Alliance, I oversee the implementation of the legal strategy of CSBA and its Education Legal Alliance in the statewide cases and issues in which we are involved. I follow matters before the Commission on State Mandates which concern schools. I was involved with the settlement of the special education mandated cost lawsuit in 2000, which was confirmed by Judge John Ford of this court in 2001.

4. Shortly after the Commission on State Mandates issued its decision CSM No. 4464 on Behavioral Intervention Plans on September 28, 2000, I worked with the test claimants San Diego Unified School District, San Joaquin County Office of Education and Butte County Office of Education to see if we could reach a settlement with the Department of Finance. We were unable to reach agreement and ultimately the Department filed this Petition. In October 2007, the Department contacted me and the test claimants regarding whether we would like to reenter settlement negotiations. I worked with the test claimants, now Real Parties in Interest in this matter, to retain Fagen Friedman and Fulfrost, Diana McDonough, Of Counsel, to represent them in further negotiations and I was part of the settlement negotiation process.

5. When we reached agreement, I offered CSBA's assistance in mailing the settlement packet and waiver to all local education agencies ("LEAs"). The packet included all the settlement documents, as well as a cover letter and a Notice to LEAs describing the rights they were waiving if they signed the waiver. Under my direction, CSBA staff sent this settlement packet to all 1,147 K-12 LEAs in the state of California, consisting of 971 school districts, 58 county offices of education, and 118 special education local plan areas ("SELPAs").

Fagen Friedman & Fulfrost, LLP
70 Washington Street, Suite 205
Oakland, California 94607
Main: 510-550-8200 • Fax: 510-550-8211

6. I have received waivers signed on or before February 28, 2009 from 95% of the LEAs (1099 of 1147), representing 99% of the statewide average daily attendance ("ADA") according to the 2007-08 second reporting period (2007-08 P2 ADA). As of March 20, 2009, I had received waivers signed after February 28, 2009 from an additional 7 school districts. As a result, as of March 20, 2009, 96% of all LEAs (1106 of 1147) representing 99% of the 2007-08 P2 ADA had submitted waivers.

7. Assembly Member Tom Torlakson has agreed to carry the proposed legislation and Legislative Counsel has received a copy of the bill and provided its initial redraft to the parties for review, numbered AB 661.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed on March 23, 2009 in Sacramento California.

CASE NO. 03CS01432

JOINT STIPULATION FOR ENTRY OF JUDGMENT; JUDGMENT

(No. CSM-4464)

Dept: 31
Judge: Honorable Michael P. Kenny

Trial Date: March 27, 2009
Action Filed: September 26, 2003

It is hereby stipulated and requested by and between Petitioner Department of Finance of the State of California; Respondent Commission on State Mandates of the State of California ("Commission"); and Real Parties in Interest San Diego Unified School District, San Joaquin County Office of Education, and Butte County Office of Education, individually and through their respective counsel, that judgment be entered as set forth below upon enactment into law of legislation satisfying the requirements of the settlement agreement, more fully described herein, said judgment being based upon the facts set forth herein.

1. This is an action commenced by the Department of Finance to obtain a writ of administrative mandate directing the Commission on State Mandates to vacate and annul its Statement of Decision in the Behavioral Intervention Plans Test Claim, CSM No. 4464, and to issue a new decision denying the claim in its entirety.

2. The Behavioral Intervention Plans Test Claim, CSM No. 4464, which was initiated by Real Parties in Interest on September 28, 1994, seeks reimbursement for costs associated with behavioral intervention plans, as set forth principally in California Education Code section 56523 and California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections read on or before July 1, 2008 ("the Hughes Bill Statute and Regulations"). On September 28, 2000, the Commission issued its decision finding that the Hughes Bill Statute and Regulations imposed a reimbursable state mandated program upon school districts. Because the test claim process is similar to a class action, eligible claimants under the Commission's decision consist of all school districts, county offices of education ("COEs"), special education local plan areas ("SELPAs"), and any joint agency comprised of such organizations, a total of 1,147 local educational agencies ("LEAs"). The claim at issue involves costs related to the following activities/programs required by the Hughes Bill Statute and Regulations: SELPA plan requirements, development and implementation of behavioral intervention plans, functional analysis assessments, modifications and contingent behavioral intervention plans, development and implementation of emergency interventions, prohibited behavioral intervention plans, and due process hearings. The estimated potential value of past claims is $ 1 billion, and for ongoing claims is $70 million annually.

Fagen Friedman & Fulfrost, LLP
70 Washington Street, Suite 205
Oakland, California 94607
Main: 510-550-8200 • Fax: 510-550-8211

3. On September 26, 2003, the Department of Finance filed this action, seeking to overturn the Commission's decision. On May 19, 2008, based on the parties' stipulation, this Court postponed the proceedings and extended the five year limit for bringing the matter to trial to allow the parties to attempt to negotiate a settlement. Currently the matter is set for hearing on March 27, 2009 by agreement of the parties and order of this Court.

4. Because the Real Parties in Interest hoped for settlement, they did not pursue other administrative processes with the Commission necessary to finalize the claiming procedures, and accordingly, school districts filed no claims. The Real Parties in Interest advised the Commission that settlement was pending. The Commission, however, continues to have statutory duties outstanding with respect to the claim.

5. This matter has now been settled by Petitioner Department of Finance and Real Parties in Interest San Diego Unified School District, San Joaquin County Office of Education, and Butte County Office of Education, with the support of Respondent Commission. Under the terms of that settlement, the State will pay retroactive reimbursement to: (1) school districts in the amount of $510 million, to be paid in $85 million annual installments over six years starting in 2011-12 and ending in 2016-17, (2) COEs in the amount of $1.5 million in 2009-10, and (3) SELPAs in the amount of $6.0 million in 2009-2010. The State will also permanently increase the ongoing special education statutory funding formula by $65 million annually, beginning in 2009-10. In exchange, the LEAs will waive their rights to file Hughes Bill Statute and Regulations reimbursement claims. A summary of the settlement and a full copy of the settlement agreement are attached to this document as Exhibit A.

6. The settlement is contingent on the following: (1) by February 28, 2009, formal waivers being submitted by at least 85% of LEAs representing at least 92% of student average daily attendance statewide; (2) the parties seeking a superior court ruling that the settlement is final and binding on all LEAs; and (3) legislation providing the necessary funds being enacted prior to or as part of the 2009-2010 budget process.

7. As of February 28, 2009, 95% of all LEAs, representing 99% of student average daily attendance statewide, had signed the required waiver. Further, Assembly Member Tom

Fagen Friedman & Fulfrost, LLP
70 Washington Street, Suite 205
Oakland, California 94607
Main: 510-550-8200 • Fax: 510-550-8211

Torlakson has agreed to sponsor the necessary funding legislation, and the Legislative Counsel has released its initial draft of the bill (AB 661) to the settling parties. (See Declaration of Richard L. Hamilton, attached to this document as Exhibit B).

8. In light of the circumstances set forth in paragraph 1 through 7 of this document; to avoid the costs, delay, and uncertainty of further litigation; to avoid the necessity of resolving disputed issues of fact and law; and to alleviate the uncertainty regarding state funding of behavioral intervention programs and services in California's public schools, the parties have agreed to compromise and settle this matter in accord with the settlement document attached hereto as Exhibit A.

9. The parties now turn to this Court and by this stipulation seek a judgment that the settlement is the final resolution of this lawsuit as well as CSM No. 4464 and that all LEAs in the state are bound thereby, thus fulfilling the second condition specified in the settlement agreement, said judgment not to be entered or filed until legislation has been enacted into law satisfying the terms of the settlement agreement.

JUDGMENT PRAYED FOR

10. Therefore, the parties pray that judgment be entered in accord with the terms of the settlement agreement and respectfully request that the Court find that the settlement is the full and final resolution of this matter and that its terms, conditions, and restrictions are binding upon all LEAs in the State. Further, the parties request that the Commission on State Mandates be permanently enjoined from taking further action regarding the Behavioral Intervention Plans Test Claim, CSM No. 4464. Judgment shall be entered and filed only upon legislation being enacted into law satisfying the terms of the settlement agreement.

Respectfully submitted,

March 19, 2009

JUDGMENT

1. The Court has read and considered the documents filed in this case, including the stipulation for entry of judgment above.

2. The Court notes the history of litigation in this matter, and that the proposed settlement has the support of 95% of all LEAs. The Court finds that the stated terms of the settlement are a just resolution of this disputed matter. The Court further agrees that the public interest is well served by the settlement agreement, which avoids the expense and uncertainty of continued litigation while providing additional funding for behavioral intervention plans and related programs/activities.

Therefore, IT IS HEREBY ORDERED AND ADJUDGED that:

1. By this judgment the Court hereby adopts and incorporates the terms of the settlement agreement which the Court finds is the full and final resolution of this matter and is binding upon each and every LEA in the State.

2. The Commission on State Mandates is permanently enjoined from taking further action regarding the Behavioral Intervention Plans Test Claim, CSM No. 4464.

3. This judgment shall be entered and filed only after the enactment of legislation into law satisfying the terms of the settlement agreement.

4. The parties shall bear their own costs and fees respecting this action.

Date: March ____, 2009

The Honorable Michael P. Kenny
Sacramento County Superior Court
Department 31
720 9th Street
Sacramento, CA 95814

Re: Department of Finance, Petitioner vs. Commission on State Mandates, Respondent;
San Diego Unified School District, San Joaquin County Office of Education, and Butte County Office of Education; Real Parties in Interest
Case No. 03CS01432
Hearing: March 27, 2009

Dear Judge Kenny:

I am writing to inform you that the parties have reached a settlement in the above-entitled matter. Because of the pending agreement, the parties do not plan to go forward with a hearing on the merits on March 27. However, as we have discussed with your clerk, the parties jointly would like to have a brief hearing on the settlement terms with you. Counsel for the Commission on State Mandates is unable to be present, but has endorsed the settlement.

We have filed a Joint Stipulation For Entry of Judgment and a Proposed Judgment, a copy of which is enclosed for your review. The Joint Stipulation includes a copy of the settlement agreement as Exhibit A. Our proposal is that the judgment be signed but not entered unless and until the final step in the process is completed, the enactment of legislation. Because we are seeking court endorsement of the settlement and because we recognize signing the judgment without entering it might be novel, we believe a settlement conference would be beneficial.

Thank you for your consideration of this matter.

Sincerely,

FAGEN FRIEDMAN & FULFROST, LLP

Diana McDonough

Attorneys for Real Parties in Interest

SUPERIOR COURT OF THE STATE OF CALIFORNIA

COUNTY OF SACRAMENTO

DEPARTMENT OF FINANCE, Petitioner, vs. COMMISSION ON STATE MANDATES, Respondent.	CASE NO. 03CS01432 **DECLARATION OF RICHARD L. HAMILTON IN SUPPORT OF JOINT STIPULATION FOR ENTRY OF JUDGMENT** (No. CSM-4464)
SAN DIEGO UNIFIED SCHOOL DISTRICT; SAN JOAQUIN COUNTY OFFICE OF EDUCATION; and, BUTTE COUNTY OFFICE OF EDUCATION, Real Parties in Interest.	

I, Richard L. Hamilton, make the following declaration and statement:

1. I have personal knowledge of the facts stated in this declaration and, if called as a witness, I would and could competently testify to them under oath.

2. Since 1998 I have worked for the California School Boards Association ("CSBA") as Associate General Counsel and Director of the Education Legal Alliance. For the twenty years prior to joining CSBA, I was an attorney in private practice representing school districts. I became a member of the California Bar in January, 1966 and I am still in active status. My State

Fagen Friedman & Fulfrost, LLP
70 Washington Street, Suite 205
Oakland, California 94607
Main: 510-550-8200 • Fax: 510-550-8211

Bar number is 037495.

3. CSBA is composed of nearly 1000 K-12 school districts, county offices of education, and regional occupation centers/programs. CSBA's Education Legal Alliance is an arm of CSBA supported by the dues of just under 800 CSBA members. It initiates and supports litigation in cases of statewide importance to California schools. As Director of the Education Legal Alliance, I oversee the implementation of the legal strategy of CSBA and its Education Legal Alliance in the statewide cases and issues in which we are involved. I follow matters before the Commission on State Mandates which concern schools. I was involved with the settlement of the special education mandated cost lawsuit in 2000, which was confirmed by Judge John Ford of this court in 2001.

4. Shortly after the Commission on State Mandates issued its decision CSM No. 4464 on Behavioral Intervention Plans on September 28, 2000, I worked with the test claimants San Diego Unified School District, San Joaquin County Office of Education and Butte County Office of Education to see if we could reach a settlement with the Department of Finance. We were unable to reach agreement and ultimately the Department filed this Petition. In October 2007, the Department contacted me and the test claimants regarding whether we would like to reenter settlement negotiations. I worked with the test claimants, now Real Parties in Interest in this matter, to retain Fagen Friedman and Fulfrost, Diana McDonough, Of Counsel, to represent them in further negotiations and I was part of the settlement negotiation process.

5. When we reached agreement, I offered CSBA's assistance in mailing the settlement packet and waiver to all local education agencies ("LEAs"). The packet included all the settlement documents, as well as a cover letter and a Notice to LEAs describing the rights they were waiving if they signed the waiver. Under my direction, CSBA staff sent this settlement packet to all 1,147 K-12 LEAs in the state of California, consisting of 971 school districts, 58 county offices of education, and 118 special education local plan areas ("SELPAs").

Fagen Friedman & Fulfrost, LLP
70 Washington Street, Suite 205
Oakland, California 94607
Main: 510-550-8200 • Fax: 510-550-8211

6. I have received waivers signed on or before February 28, 2009 from 95% of the LEAs (1096 of 1147), representing 99% of the statewide average daily attendance ("ADA") according to the 2007-08 second reporting period (2007-08 P2 ADA). As of March 18, 2009, I had received waivers signed after February 28, 2009 from an additional 7 school districts. As a result, as of March 18, 2009, 96% of all LEAs (1103 of 1147) representing 99% of the 2007-08 P2 ADA had submitted waivers.

7. Assembly Member Tom Torlakson has agreed to carry the proposed legislation and Legislative Counsel has received a copy of the bill and provided its initial redraft to the parties for review, numbered AB 661.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed on March ___, 2009 in Sacramento, California.

RICHARD L. HAMILTON

SUMMARY

Settlement and Release Agreement
Behavioral Intervention Plan (Hughes Bill) Mandated Cost Claim

The State and school test claimants San Diego Unified School District, Butte County Office of Education, and San Joaquin County Office of Education have reached a settlement in the Behavioral Intervention Plans ("BIP") (Hughes Bill) Mandated Cost Claim and lawsuit, a claim dating from 1994. The settlement provides for an ongoing increase to special education funding and retroactive reimbursement to school districts, county offices of education, and special education local plan areas ("SELPAs") (collectively "LEAs") for general fund use, contingent on LEA approval.

In addition to test claimants San Diego USD, Butte COE, and San Joaquin COE who pursued this matter for 14 years, thanks go to many hard-working SELPAs for providing essential cost information, and to the California School Boards Association's ("CSBA") Education Legal Alliance for encouraging this settlement, ultimately funding the services of Fagen Friedman & Fulfrost, Diana McDonough, Of Counsel, to reach this agreement.

The settlement provides for the following funding:

> $510 million payable to school districts as general fund reimbursement, in $85 million installments over 6 years, from 2011-12 through 2016-17, based on 2007-08 P2 ADA.
>
> $10 million payable as general fund reimbursement in 2009-10 as follows:
> --- $ 1.5 million to county offices based on Dec. 2007 county special education pupil count
> ---- $ 6.0 million to SELPAs based on Dec. 2007 special education pupil count
> --- $ 2.5 million to claimants and others for administrative costs incurred in pursuing the claim.
>
> $65 million added in 2009-10 as a **permanent increase** to the AB 602 special education funding base. Commencing in 2010-11, this amount will be subject to COLA and growth to the extent it is added to AB 602 generally.

The settlement is contingent on the following:

1. By February 28, 2009, 85% of all LEAs (school districts, county offices, and SELPAs) must sign a waiver document; the signatory school districts and county offices must represent at least 92% of statewide ADA. In the document, LEAs waive their rights to contest the settlement and to file any BIP/Hughes Bill mandated cost claims.

2. The parties will seek a superior court ruling that the settlement is final and binding on all LEAs in March 2009.

3. Legislation must be enacted appropriating the necessary funds and placing the ongoing funding in statute. This will be requested early in 2009.

While none of the above triggers is assumed, the first one is most critical. Without immediate school district, county, and SELPA support, this settlement will not take place. If any of the above does not happen, the matter will revert to Sacramento Superior Court.

December 1, 2008

SETTLEMENT AND RELEASE AGREEMENT
BEHAVIORAL INTERVENTION PLANS [HUGHES BILL] MANDATED COST CLAIM

This settlement and release agreement ("Agreement") is entered into this 26th day of ~~2008~~ January, 2009 by and between the State of California ("the STATE") on the one hand, and San Diego Unified School District, Butte County Office of Education, and San Joaquin County Office of Education (collectively "CLAIMANTS") on the other, who, in consideration of the promises made herein, agree as follows: DKM

I. Nature and Status of the Dispute

Effective January 1, 1991, Education Code section 56523 was added to the Education Code. That section required the development and adoption of regulations governing positive behavioral interventions for special education students by the State Board of Education ("the SBE"). In 1993, the SBE promulgated California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 to implement Education Code section 56523. The Education Code section and its implementing regulations are referred to cumulatively as "the Hughes Bill."

The Behavioral Intervention Plans Mandated Cost Claim was initiated on September 28, 1994, when San Diego Unified School District, Butte County Office of Education, and San Joaquin County Office of Education filed test claim CSM-4464 with the Commission on State Mandates ("the Commission"). The Behavioral Intervention Plans Mandated Cost Claim asked the STATE to reimburse local educational agencies ("LEAs"), including school districts, county offices of education, special education local plan areas ("SELPAs"), and joint agencies composed of such organizations for the costs of implementing the Hughes Bill.

On September 28, 2000, the Commission adopted a Statement of Decision on CSM-4464 finding that the Hughes Bill imposed a reimbursable state mandate on school districts by requiring the following seven activities: SELPA plan requirements, development and implementation of behavioral intervention plans, functional analysis assessments, modifications and contingent behavioral intervention plans, development and implementation of emergency interventions, prohibited behavioral intervention plans, and due process hearings. The settlement of the Special Education Mandated Cost Claim in 2000-2001 explicitly omitted the Behavioral Intervention Plans Mandated Cost Claim (Ed. Code § 56836.156(g)).

Subsequently CLAIMANTS proposed parameters and guidelines for the CSM-4464 claiming process but various disputes arose with the STATE and a final draft was never adopted by the Commission. The parties attempted settlement without success and the matter reached a stalemate.

On September 26, 2003, the STATE's Department of Finance filed a Petition for Administrative Mandamus in the Sacramento Superior Court challenging the Commission's decision in CSM-4464. It named the Commission as Respondent, and CLAIMANTS as Real Parties in Interest (*Department of Finance v. Commission on State Mandates*, Sacramento Superior Court Case No. 03CS01432). The Petition maintained that the Hughes Bill was not a reimbursable state mandate because 1) it was required by federal law, 2) it merely implemented federal requirements, and

3) it did not exceed those requirements. The matter is still pending. CLAIMANTS have filed no responsive pleadings as yet.

On October 4, 2007, the Deputy Attorney General representing the STATE's Department of Finance in the above case wrote to CLAIMANTS stating that pending reforms in the mandate process could present a timely opportunity to continue negotiations. The Deputy Attorney General noted that the mandate reform legislation, AB 1222, included the option of the joint development of a reasonable reimbursement methodology and cost estimate. The Deputy Attorney General suggested a meeting if CLAIMANTS were interested in resolving the matter and noted that, absent successful settlement, she planned to schedule a hearing in Sacramento Superior Court in April 2008. In response, CLAIMANTS contacted the Deputy Attorney General and the parties began meeting to work on a mutually agreeable resolution.

A chief task in the settlement process was developing a statewide cost estimate for the claim. Ultimately CLAIMANTS completed surveys of more than 20 SELPAs representing more than 10% of public school students statewide. The STATE's Department of Finance staff reviewed copies of all survey returns and verified that the cumulative cost totals accurately reflected the SELPA data.

In May 2008, the Sacramento Superior Court notified the STATE that it must bring its case to trial by September 26, 2008, or be subject to dismissal under the state law which requires all matters to be brought to trial within five years ("the five-year rule"). Ultimately, the parties filed a stipulation with the court agreeing to extend the five-year period to March 27, 2009, in the hopes that agreement could be reached.

The STATE's Department of Finance continues to dispute the Commission's decision in CSM-4464 that the Hughes Bill is a reimbursable mandate. CLAIMANTS believe the Commission's decision was correct and that the Hughes Bill imposes requirements on school districts that are not mandated by federal law.

To avoid the costs and uncertainty of further litigation, to alleviate the uncertainty regarding the Hughes Bill funding, and to expedite the resolution of this long-pending mandate claim in the spirit of AB 1222, the parties have determined to compromise and settle the claims raised in Sacramento Superior Court Case No. 03CS01432 and the underlying administrative decision of the Commission on State Mandates in CSM-4464 on the terms and conditions set forth below.

II. Actions to Resolve Dispute

A. The mutual obligations and duties of the parties set forth herein are contingent upon all of the following events occurring:

1. On or before February 28, 2009, no less than 85% of all K-12 school districts, county offices of education, and SELPAs shall sign the Waiver, attached hereto as Exhibit A. In addition, the school districts and county offices signing Exhibit A must have served student populations accounting

for no less than 92% of the second principal apportionment (P-2) average daily attendance in the 2007-08 fiscal year.

2. The parties shall seek a superior court ruling that the settlement is final and binding on all LEAs, assuming implementing legislation is enacted. In the absence of such a ruling, the parties shall seek an alternative, mutually agreeable final and formal resolution of the dispute.

3. Prior to or concurrent with the enactment of the Budget Act for the 2009-10 fiscal year, legislation is enacted that contains provisions identical to or substantially similar to the language contained in Exhibit B. It is the intent of the parties that, on or before January 10, 2009, the Legislature shall be requested to enact such legislation on an urgency basis. Any modifications to the proposed legislation shall be made only with agreement of all the signatories to this settlement document.

   a. The proposed legislation shall appropriate the amount of ten million dollars ($10,000,000) payable upon enactment and allocated in accord with Section II.B. of this Agreement.

   b. The proposed legislation shall require additional funding of five-hundred and ten million dollars ($510,000,000) in total payable over a six-year period, or lesser period at the STATE's discretion, commencing July 1, 2011, and allocated in accord with Section II.B. of this Agreement.

   c. The proposed legislation shall include statutory language to revise the existing special education funding model established by Assembly Bill 602 (Chapter 854, Statutes of 1997) to provide an ongoing increase of sixty-five million dollars ($65,000,000) annually to special education programs. The proposed legislation shall appropriate the first year of funding.

   d. The combination of the above appropriations is to be considered in full satisfaction of, and is in lieu of, any reimbursable mandate claims that would have been filed as a result of CSM-4464. By providing this funding for CSM-4464, the STATE in no way concedes the existence of an unfunded reimbursable mandate for that claim.

B. For the purposes of this settlement only, to resolve any and all retrospective mandated cost claims from 1993-94 to 2008-09 arising from CSM-4464 and the Statement of Decision adopted by the Commission on State Mandates on September 28, 2000, the STATE agrees that:

1. Upon enactment of legislation prior to or concurrent with the 2009-10 Budget Act, payment in the amount of ten million dollars ($10,000,000) will be allocated to LEAs as follows:

   a. One million five hundred thousand dollars ($1,500,000) shall be allocated to county offices of education on an equal per-pupil basis. The amount of each agency's allocation shall be determined by dividing one million five hundred thousand dollars ($1,500,000) by the total statewide county special education pupil count only, as reported by county offices of education as of December 2007. The allotment for each county office of education shall be the per-pupil amount times the county's special education pupil count reported as of December 2007. The State Superintendent of Public Instruction ("the Superintendent") shall adjust the computations in such a manner as to ensure that the allotment to each county office of education is at least five thousand dollars ($5,000).

   b. Six million dollars ($6,000,000) shall be allocated to SELPAs that existed for the 2007-08 fiscal year. The amount of each agency's allocation shall be determined by dividing six million dollars ($6,000,000) by the total statewide special education pupil count as of December 2007. The allotment for each agency shall be the statewide per-pupil amount times the SELPA's special education pupil count reported as of December 2007. The State Superintendent of Public Instruction ("the Superintendent") shall adjust the computations in such a manner as to ensure that the allotment to each SELPA is at least ten thousand dollars ($10,000).

   c. Two million five hundred thousand dollars ($2,500,000) shall be paid to San Joaquin County Office of Education.

2. In accord with legislation enacted prior to or concurrent with the 2009-10 Budget Act, the State will pay an additional five hundred and ten million dollars ($510,000,000) to school districts. This amount shall be allocated in installment payments of eighty-five million dollars ($85,000,000) commencing July 1, 2011, and annually thereafter for a period of six years unless the STATE in its discretion enlarges the installment amount from time to time, thereby discharging the obligation in advance of the six year period. These payments shall be allocated to school districts on a per-pupil basis as follows:

   a. The appropriation shall be divided by the total average daily attendance, excluding attendance for regional occupation centers and programs, adult education, and programs operated by the county superintendents of schools, for all pupils in kindergarten through grade twelve in all school districts as used by the Superintendent for the second principal apportionment for the

2007-08 fiscal year. Each school district shall receive an allocation equal to the per-pupil amount times the district's reported average daily attendance for the second principal apportionment for the 2007-08 fiscal year, excluding attendance for regional occupation centers and programs, adult education, and programs operated by the county superintendents of schools. The amount allocated to each school district shall be the same in all subsequent fiscal years as it is in the first fiscal year unless the State enlarges the appropriation as specified in II.B.2. above.

b. In any fiscal year after 2011-12 in which the provisions of paragraph (b)(3) of Section 8 of Article XVI of the California Constitution are operative, the annual appropriation shall not be required to be made. If an appropriation is not made for a specific fiscal year or years, it shall instead be made in the fiscal year or years immediately succeeding the final payment pursuant to Section II.B.2 of this Agreement.

C. To effectuate a stay of the five-year rule and to seek court approval of the settlement which makes it final and binding on LEAs, the parties agree to the following:

1. Within ten court days after execution of this Agreement, CLAIMANTS will file a response to the Petition for Administrative Mandamus, Sacramento Superior Court Case No. 03CS01432. Concurrently or as soon thereafter as the parties deem appropriate, the STATE and CLAIMANTS shall jointly stipulate to a stay of the five-year rule, and shall file such stipulation with the court. The stipulation shall provide for and ask the court to order the following:

a. A stay of the five-year rule for the purposes of this settlement, with the understanding that the five-year rule shall be in effect within ninety (90) days if the settlement terms cannot be effectuated.

b. Notice of the stay and of the settlement terms to all LEAs.

c. A court hearing, if necessary, to consider any objections to the settlement made by LEAs or other parties of standing.

d. Entry of judgment that the settlement is the final resolution of CSM-4464 assuming implementing legislation is enacted, and that after appropriate consideration of objections, if any, it is final and binding on all LEAs.

D. In the absence of any entry of judgment as specified in Section II.C.1.d. of this Agreement, the parties shall seek an alternative mutually agreeable final and formal resolution of the dispute.

E. If the events listed in Section II.A. as preconditions to the parties' obligations do not take place, the STATE or the CLAIMANTS may request the Superior Court to lift the stay issued pursuant to Section II.C.1.a., above, and to order that the five-year rule shall take effect in ninety (90) days.

III. Known Claims

With respect to section 56523 of the California Education Code and California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections read on or before July 1, 2008, ("the Hughes Bill Statute and Regulations"), CLAIMANTS hereby knowingly and voluntarily waive the rights set forth under article XIIIB, section 6, of the California Constitution, sections 17500 through 17630 of the California Government Code, and sections 1181 through 1189.11 of Title 2 of the California Code of Regulations. By signing this Agreement, CLAIMANTS hereby acknowledge that CLAIMANTS forever relinquish their right to file any mandated cost claim regarding the Hughes Bill Statute and Regulations, and further forever relinquish their right to receive any benefit(s) from any claim(s) so filed. CLAIMANTS may file mandated cost claims concerning such statutes and regulations only to the extent that state or federal statutes or regulations are amended or added or changed in any other way after July 1, 2008. CLAIMANTS further acknowledge and concede that the amount that is required to be appropriated for the purpose of satisfying the STATE's minimum funding obligation to school districts pursuant to article XVI, section 8, of the California Constitution shall not be required to be increased, to any extent, by payment of the amounts set forth in Sections II.B.1 and II.B.2 of this agreement.

IV. Unknown Claims

A. CLAIMANTS expressly waive the application of California Civil Code section 1542 regarding mandated cost claims based on Education Code section 56523 and California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections read on or before July 1, 2008.

B. CLAIMANTS certify that they have read the following provisions of California Civil Code section 1542:

"A general release does not extend to claims which the creditor does not know or suspect to exist in his favor at the time of executing the release, which if known by him must have materially affected his settlement with the debtor."

C. CLAIMANTS understand and acknowledge that the significance and consequence of the waiver of California Civil Code section 1542 is that:

1. They may have additional claims arising or occurring up to the date of this Agreement of which they are not now aware;

2. They may not make a further demand for any such claims;

3. They may not receive any benefit(s) from any such claims; and

4. They extend their waiver to include now unknown or later discovered claims.

V. Advice of Attorney

CLAIMANTS warrant and represent that they have been advised to seek legal advice from the attorney of their choice regarding the risks, complications, and costs of the Agreement. CLAIMANTS acknowledge and represent either that they relied upon legal advice from their attorney in executing this Agreement or that they chose not to rely upon legal advice from their attorney in executing this Agreement. They further acknowledge and represent that, in executing this Agreement, they have not relied on any inducements, promises, or representations other than those stated in this Agreement.

VI. Conditions of Execution

Each party acknowledges and warrants that the party's execution of this Agreement is free and voluntary.

VII. Execution of Other Documents

Each party to this Agreement shall cooperate fully in the execution of any and all other documents and the completion of any additional actions that may be necessary or appropriate to give full force and effect to the terms and intent of this Agreement.

VIII. Nonadmission

Nothing contained in the Agreement constitutes an admission or concession, by any party, as to any matter of fact or law at issue in Sacramento Superior Court Case No. 03CS01432 and/or CSM-4464, and no party hereto shall deem or construe this Agreement, or any part thereof, to be any such admission or concession. Further, nothing in this Agreement may be deemed or construed to be, by any entity or person not a party hereto, as against any party hereto, or any agency thereof, any admission or concession as to any matter of fact or law at issue in Sacramento Superior Court Case No. 03CS01432 and/or CSM-4464.

IX. Entire Agreement

This Agreement and Exhibits A and B attached hereto contain the entire Agreement between the parties. A breach of any portion of this Agreement shall be considered a breach of the whole Agreement.

X. Effective Date

This Agreement shall be effective immediately upon execution by the parties. This Agreement has retroactive effect to the extent specified herein.

XII. Governing Law

This Agreement is entered into, and shall be construed and interpreted, in accordance with the laws of the State of California and the United States.
00334.00100/105941.1

XIII. Counterparts

This Agreement may be signed in counterparts, such that signatures appear on separate pages. A copy or original of this document with all signature pages appended together shall be deemed a fully executed Agreement.

Behavioral Intervention Plans Mandated Cost Claim

WAIVER

This Waiver is entered into on _____[DATE] by _____[NAME OF LEA], hereinafter "LEA," to fulfill one of the terms of the Settlement and Release Agreement for the Behavioral Intervention Plans Mandated Cost Claim ("Agreement").

A. Known Claims

With respect to section 56523 of the California Education Code and the California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and section 3052 as those sections read on or before July 1, 2008, (collectively "the Hughes Bill Statute and Regulations"), LEA hereby knowingly and voluntarily waives the rights set forth under article XIIIB, section 6, of the California Constitution, sections 17500 through 17630 of the California Government Code, and sections 1181 through 1189.11 of Title 2 of the California Code of Regulations. By signing this Waiver, LEA hereby acknowledges that LEA forever gives up its right to file any mandated cost claim regarding the Hughes Bill Statute and Regulations, and/or to pursue any filed claim regarding that statute and regulations, and/or to benefit from such a claim, including any claim regarding the following programs and services:

1. Special education local plan area plan requirements pursuant to California Code of Regulations, title 2, sections 3001, subdivision (c), and 3052, subdivision (j), as these sections read on July 1, 2008;

2. Development and implementation of behavioral intervention plans pursuant to California Code of Regulations, title 2, sections 3001, subdivisions (c), (d), (e), and (f), and 3052, subdivisions (a), (c), (d), (e), and (f), as these sections read on July 1, 2008;

3. Functional analysis assessments pursuant to California Code of Regulations, title 2, sections 3001, subdivisions (d) and (f), and 3052, subdivisions (b), (c), and (f), as these sections read on July 1, 2008;

4. Modifications and contingent behavioral intervention plans pursuant to California Code of Regulations, title 2, section 3052, subdivisions (g) and (h), as these sections read on July 1, 2008;

5. Development and implementation of emergency interventions pursuant to California Code of Regulations, title 2, sections 3001, subdivisions (c) and (d), and 3052, subdivision (i), as these sections read on July 1, 2008;

6. Prohibited behavioral intervention plans pursuant to California Code of Regulations, title 2, sections 3001, subdivision (d), and 3052, subdivision (l), as these sections read on July 1, 2008; and

7. Due process hearings pursuant to California Code of Regulations, title 2, section 3052, subdivision (m), as this section read on July 1, 2008.

LEA further acknowledges and concedes that the amount that is required to be appropriated for the purpose of satisfying the STATE's minimum funding obligation to LEAs pursuant to article XVI, section 8, of the California Constitution shall not be required to be increased, to any extent, by payment of the retrospective amounts described in Paragraph II.B. of the Agreement, and by signing this Waiver LEA forever gives up its right to contend otherwise.

B. Unknown Claims

1. LEA expressly waives the application of California Civil Code section 1542 regarding mandated cost claims under California Education Code section 56523 and California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections read on or before July 1, 2008.

2. LEA certifies that it has read the following provisions of California Civil Code Section 1542:

> "A general release does not extend to claims which the creditor does not know or suspect to exist in his favor at the time of executing the release, which if known by him must have materially affected his settlement with the debtor."

3. LEA understands that it is agreeing that California Civil Code section 1542 does not apply to this Waiver. LEA understands and acknowledges that the significance and consequence of this waiver of California Civil Code section 1542 is:

   a. LEA may have additional claims arising or occurring up to the date of this Waiver of which it is not now aware;

   b. LEA may not make a further demand for any such claims;

   c. LEA may not receive any benefit(s) from any such claims that may be filed by other claimants; and

   d. LEA extends its waiver to include now unknown and/or later discovered claims.

C. Exemptions

LEA signs this Waiver with the understanding that it does not prohibit LEAs from filing mandated cost claims to the extent that the Hughes Bill Statute and Regulations are amended or added or changed in any way after July 1, 2008.

D. Advice of Attorney

LEA warrants and represents that it has reviewed and understands the Notice to LEAs Re: Pending Settlement of the Behavioral Intervention Plans Mandated Cost Claim ("the Notice") and this Waiver, and that it has been advised to seek legal advice from the attorney of its choice regarding the Notice and this Waiver. LEA acknowledges and represents either that it relied upon legal advice from its attorney in executing this Waiver or that it chose not to rely upon legal advice from its attorney in executing this Waiver. LEA further acknowledges and represents that, in executing this Waiver, it has not relied on any inducements, promises, or representations other than those stated in the Notice and Waiver.

E. Contingency of Waiver

LEA understands that this Waiver is binding only if the preconditions to the full implementation of the Settlement Agreement are satisfied. Those preconditions are set out in Section C of the Notice and Section II.A. of the Agreement, and are, in brief: (1) at least 85% of all LEAs sign this Waiver, including school districts and county offices of education who served student populations accounting for 92% of the P-2 2007-08 ADA; (2) the parties seek a superior court ruling that the settlement is final and binding on all LEAs; and (3) legislation is enacted appropriating the necessary funding and placing ongoing funding in statute.

Exhibit B to Settlement Agreement
Behavioral Intervention Plans Mandated Cost Claim

DRAFT LEGISLATION

THE PEOPLE OF THE STATE OF CALIFORNIA DO ENACT AS FOLLOWS:

SECTION 1. The Legislature finds and declares that it is in the State's interest that legislation be enacted immediately to provide funding for positive behavioral intervention plans for special education students (Hughes Bill) and resolve a contested state mandate issue of fourteen-year standing. The Legislature anticipates that the Governor will request the enactment of the legislation prior to the enactment of the 2009-10 Budget Act.

SECTION 2. Section _____ is added to the Education Code to read:

[section number]

(a) The Superintendent of Public Instruction shall determine the statewide total average daily attendance used for the purposes of section 56836.08 for the 2008-09 fiscal year. For the purposes of this calculation, the 2008-09 second principal average daily attendance for the court, community school, and special education programs served by the Los Angeles County Juvenile Court and Community School/Division of Alternative Education Special Education Local Plan Area shall be used in lieu of the average daily attendance used for that agency for the purposes of section 56836.08.

(b) The Superintendent shall divide sixty-five million dollars ($65,000,000), by the amount determined pursuant to subdivision (a).

(c) For each special education local plan area, the Superintendent shall permanently increase the amount per unit of average daily attendance determined pursuant to subdivision (b) of section 56836.08 for the 2009-10 fiscal year by the quotient determined pursuant to subdivision (b). This increase shall be effective, beginning in the 2009-10 fiscal year.

(d) Notwithstanding subdivision (c), for the Los Angeles County Juvenile Court and Community School/Division of Alternative Education Special Education Local Plan Area, the superintendent shall permanently increase the amount per unit of average daily attendance determined pursuant to subdivision (b) of section 56836.08 by the ratio of the amount determined pursuant to subdivision (b) to the statewide target per unit of average daily attendance determined pursuant to section 56836.11 for the 2008-09 fiscal year. This increase shall be effective beginning in the 2009-10 fiscal year.

(e) The Superintendent shall increase the statewide target per unit of average daily attendance determined pursuant to section 56836.11 for the 2009-10 fiscal year by the amount determined pursuant to subdivision (b).

(f) The funds provided in subdivisions (a)-(e) above are to be considered in full satisfaction of, and are in lieu of, any reimbursable mandate claims for the Behavioral Intervention Plans Mandated Cost Claim. By providing this funding, the State in no way concedes the existence of any unfunded reimbursable mandate with regard to Section 56523 and its regulations in California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections and subdivisions read on July 1, 2008. These funds shall be used exclusively for programs operated under this part and, as a first priority, for the programs and services required under Section 56523 and its regulations, California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections and subdivisions read on July 1, 2008. By virtue of these funds, Section 56523 and its regulations, California Code of Regulations, title 5, sections 3001, subdivisions (c), (d), (e), (f), and (aa), and 3052 as those sections and subdivisions read on July 1, 2008 shall be deemed to be fully funded within the meaning of Government Code Section 17556(e).

(g) Within the meaning of Government Code section 17556(e), the funds appropriated for purposes of this section are not specifically intended to fund any state-mandated special education programs and services resulting from amendments enacted after July 1, 2008, to any of the following statutes and regulations:

(1) The Individuals with Disabilities Education Act (20 U.S.C. Sec. 1400 et seq.), if such amendments result in circumstances where state law exceeds federal law;

(2) Federal regulations implementing the Individuals with Disabilities Education Act (34 C.F.R. Parts 300 and 303), if such amendments result in circumstances where state law exceeds federal law;

(3) Part 30 (commencing with section 56000); and

(4) Sections 3000 through 4671, inclusive, of Title 5 of the California Code of Regulations.

(h) State funds otherwise allocated to each special education local plan area pursuant to Chapter 7.2 (commencing with section 56836) of Part 30 and appropriated through the annual Budget Act shall supplement and not supplant these funds. These funds shall be in addition to the level of COLA provided for this program in the annual Budget Act.

SECTION 3. Section XXXXX is added to the Education Code, to read:

(a) Commencing with the 2011-12 fiscal year and each fiscal year through the 2016-17 fiscal year, the amount of eighty-five million dollars ($85,000,000), shall be appropriated, on a one-time basis each fiscal year, from the General Fund for allocation to school districts on a per-pupil basis. The Superintendent of Public Instruction shall compute the amount per pupil by dividing eighty-five million dollars ($85,000,000), by the total average daily attendance, excluding attendance for regional occupation centers and programs, adult education, and programs operated by the county superintendents of schools, for all pupils in kindergarten through grade twelve in all school districts as used by the Superintendent of Public Instruction for the second principal apportionment for the 2007-08 fiscal year. Each school district's allocation shall equal the per-pupil amount times the district's average daily attendance as reported to the Superintendent of Public Instruction for the second principal apportionment for the 2007-08 fiscal year. The amount allocated to each school district shall be the same in all subsequent fiscal years as it is in the first fiscal year.

(1) Notwithstanding the provisions of subdivision (a) above, the State, in its discretion, may cause to be appropriated and allocated amounts in excess of eighty-five million dollars ($85,000,000) annually in the period 2011-12 through 2016-17 for the purpose of discharging the obligation in advance of the six year period, so long as the total amount appropriated and allocated under this section is five hundred ten million dollars ($510,000,000).

(2) In any fiscal year after 2011-12 in which the provisions of Article XVI, section 8, paragraph (b)(3), of the California constitution are operative, the annual appropriation shall not be required to be made.

(3) The Director of Finance shall notify, in writing, the fiscal committees of both Houses of the Legislature, the Controller, and the Superintendent of Public Instruction no later than May 14, that the appropriation for the following fiscal year is not required, pursuant to paragraph (c). If any appropriation is not made for a specific fiscal year, or years, it shall instead be made in the fiscal year, or years, immediately succeeding the final payment pursuant to paragraph (a).

(4) These funds shall be in addition to the level of COLA provided to school districts in the annual Budget Act.

(b) From the funds appropriated for purposes of this section in subdivision (b) of Section 4 of the act adding this section, the Superintendent of Public Instruction shall allocate the following:

(1) From the appropriation provided by subdivision (b) of Section 4 of the act adding this section, the amount of one million five hundred thousand dollars ($1,500,000) shall be allocated by the Superintendent to county offices of education on an equal per-pupil amount. The Superintendent shall determine the per-pupil amount by dividing one million five hundred thousand dollars ($1,500,000) by the total statewide county special education pupil count only, reported by county offices of education as of December 2007. The allotment for each county office of education shall be the per-pupil amount times the county's special education pupil count reported as of December 2007. The Superintendent shall adjust the computations in such a manner as to ensure that the minimum allotment to each county office of education is at least five thousand dollars ($5,000).

(2) From the appropriation provided by subdivision (b) of Section 4 of the act adding this section, the amount of six million dollars ($6,000,000) shall be allocated by the Superintendent to SELPAs that existed for the 2007-08 fiscal year. The Superintendent shall determine the amount of each agency's allotment by dividing the six million dollars ($6,000,000) by the statewide special education pupil count reported as of December 2007. The allotment for each agency shall be the statewide per-pupil amount times the SELPA's special education pupil count reported as of December 2007. The Superintendent shall adjust the computations in such a manner as to ensure that the minimum allotment to each SELPA is at least ten thousand dollars ($10,000).

(3) From the appropriation provided by subdivision (b) of Section 4 of the act adding this section, the amount of two million five hundred thousand dollars ($2,500,000) shall be allocated by the Superintendent to the San Joaquin County Office of Education.

(c) The amounts appropriated by subdivisions (a), (b), and (c) of Section 4 of the act adding this section are in full satisfaction and in lieu of mandate claims resulting from the Commission on State Mandates' Statement of Decision CSM 4464, "Behavioral Intervention Plans."

SECTION 4.

(a) The amount of sixty-five million dollars ($65,000,000), is hereby appropriated from the General Fund in augmentation of Item 6110-161-0001 of 2009-10 Budget Act to the Superintendent of Public Instruction

for the purposes of Section 56836.08 of the Education Code. It is the intent of the Legislature that such funding be included in the annual budget act in subsequent fiscal years.

(b)

(1) The amount of ten million dollars ($10,000,000), is hereby appropriated from the General Fund to the Superintendent of Public Instruction for allocation on a one-time basis to county offices of education, and special education local plan areas (SELPAs), as specified in subdivision (b) of section _____ of the Education Code. These funds shall be in addition to the level of COLA provided for county offices of education and special education local plan areas in the annual Budget Act.

(2) For the purposes of making the computations required by article XVI, section 8, of the California Constitution, this appropriation shall be deemed to be "General Fund revenues appropriated for school districts," as defined in subdivision (a) of section 41202 of the Education Code, for the 2007-08 fiscal year, and included within the "total allocations to school districts and community college districts from General Fund proceeds of taxes appropriated pursuant to Article XIII B," as defined in subdivision (e) of section 41202 of the Education Code, for the 2007-08 fiscal year.

SECTION 5. This Act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety with the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting this necessity are: In order to alleviate the fiscal hardship to local educational agencies caused by the persistent shortfalls in federal funding for special education; to increase state funding for the special education program, thereby reducing encroachment; to facilitate the settlement of current litigation regarding those programs and the funding thereof; to obviate new litigation; and to resolve related school finance issues, it is necessary for this Act to take effect immediately.

State-Local Working Group Proposal to Improve the Mandate Process

LEGISLATIVE ANALYST'S OFFICE

4077

LAO
65 YEARS OF SERVICE

Concerns With Mandate Process

☑ Process takes a long time, posing difficulties for state and local governments.

- Currently takes over five years from local government "test claim" filing to final action by Commission on State Mandates.
- During this time, local governments do not receive reimbursements and state liabilities mount.
- Length of process also complicates state policy review because the Legislature receives a mandate's cost information years after the debate regarding its imposition has concluded.

☑ Claiming reimbursement is exceedingly complicated.

- Most mandates are not complete programs, but impose increased
requirements on ongoing local programs. Measuring the cost to carry out these marginal changes is complex.
- Instead of relying on unit costs or other approximations of local costs, reimbursement methodologies (or "parameters and guidelines") typically require local governments to document their actual costs to carry out each element of the mandate.
- The documentation required makes it difficult for local governments to file claims and leads to disputes with the State Controller's Office.
- Because the commission bases its estimate of a mandate's costs on initial claims submitted by local governments, the commission's estimates typically are inaccurate. Over time, local governments increase their ability to comply with the reimbursement methodology and claims increase substantially.

LAO
65 YEARS OF SERVICE

Working Group Proposal Overview

☑ Goals and focus:

- Simplify and expedite the mandate determination process.
- Procedural reform, focusing on period between imposition of a mandate and the report of the mandate to the Legislature.
- Avoid "tilting the scales" to favor state or local interests, or giving greater authority to the administration, Legislature, or local governments.

☑ Includes three alternatives—use of any alternative would require the consent of the local government claimant and Department of Finance.

☑ Proposal is in the form of amendments to AB 1222 (Laird).

LAO
65 YEARS OF SERVICE

First Change: Amend the Reasonable Reimbursement Methodology Statute

☑ Expand the use of unit-based and other simple claiming methodologies by clarifying the type of easy-to-administer methodologies that the Legislature envisioned when it enacted this statute.

☑ Greater reliance on simple claiming methodologies would reduce:

- Local costs to file claims.
- State costs to process and audit claims.
- Disputes regarding mandate claims and appeals to the commission regarding State Controller claim reductions. Reducing commission work to hear appeals would give it more time to focus on mandate determinations.

LAO
65 YEARS OF SERVICE

Second Change: Allow Reimbursement Methodologies to Be Developed Through Negotiations

☑ Create a process whereby local governments and the department jointly develop a mandate's reimbursement methodology and estimate its costs.

☑ Department of Finance and claimant responsibilities:

- Propose a negotiations work plan. Plan must ensure that costs from a representative sample of local claimants are considered.
- Jointly review local cost data.
- Develop a reasonable reimbursement methodology. Assess local support. Modify methodology to secure local support. Specify a date when the department and test claimant will reconsider methodology to ensure that it remains useful over time.
- Use the methodology to provide the Legislature an estimate of its statewide costs.

☑ Commission on State Mandates responsibilities.

- Review methodology to ensure that parties considered costs from a representative sample of local governments and that the methodology is supported by a wide range of local governments.
- Review the methodology for general consistency with the underlying Statement of Decision.
- Adopt the methodology and report statewide costs.

☑ Advantages of negotiated process.

- Realizes all of the benefits of the reasonable reimbursement methodology approach previously described.
- Trims at least a year from the current five-year mandate process.

LAO
65 YEARS OF SERVICE

Third Change: Authorize Fast Track Legislative Mandate Determinations

☑ Create a process whereby local governments and the department may jointly propose that a state requirement be declared a "legislatively determined mandate" and propose a reimbursement methodology. The commission would not play a role in this alternative.

☑ Joint Department of Finance and claimant responsibilities:

- Identify state requirements to propose for legislatively determined mandate.
- Propose a reimbursement methodology and estimate of statewide costs.
- Provide Legislature evidence of local support for reimbursement methodology.

☑ Legislature's alternatives:

- May adopt proposal, or amend and adopt proposal. Enact a statute declaring the state requirement to be a legislatively determined mandate and specifying the reimbursement methodology. Appropriate required funding.
- May reject proposal.
- May repeal, suspend, or modify the mandate.

LAO
65 YEARS OF SERVICE

Third Change: Authorize Fast Track Legislative Mandate Determinations *(Continued)*

☑ Local government options:

- May accept funding provided for mandate. Such an action signifies that the local government accepts the methodology as reimbursement for the funding period (say, five years). During this time, the local government may not file a test claim or accept other reimbursement for this mandate, unless the state does not provide the funding specified in statute. At the end of the funding period, works with the department to update the reimbursement methodology.
- May reject funding and file a test claim with the commission.

☑ Advantages of process.

- Realizes all of the benefits of the reasonable reimbursement methodology approach previously described.
- Resolves mandate claims in about a year, four years less than current process.
- Reduces the commission's caseload, freeing up time for it to focus on other claims.

XII. Opinion Testimony
A. In General

Topic Summary Correlation Table References

§ 613. Opinion rule

West's Key Number Digest

West's Key Number Digest, Witnesses k250

As a general rule, witnesses must testify to facts and not to their opinions. Inferences or deductions from particular facts may be drawn only by the jury or by the court acting without a jury and not by witnesses. When the inquiry relates to a subject the nature of which is not such as to require any peculiar knowledge in order to qualify one to understand it or when the facts on which an opinion is founded can be ascertained and made intelligible to court or jury, then under what is sometimes termed the "opinion rule," the opinion of a witness may not be received in evidence.[1] In other words, if the relation between the facts and their probable results can be determined on the basis of common experience, without any special skill or training, and may be understood by the jury, the facts themselves must be given in evidence, and the conclusions or inferences must be drawn by the jury and not by the witness.[2] The opinion rule requires that witnesses express themselves at the lowest possible level of abstraction and, whenever feasible, "concluding" should be left to the jury.[3] For example, the ultimate fact of negligence is an inference to be drawn by the jury and is not to be established by the opinions of witnesses.[4] Likewise, a witness may not express an opinion as to the probative effect of a fact.[5] Neither may the witness, except in an action for libel or slander,[6] state his or her understanding of what another person meant in making an obscure statement[7] or in employing a commonly used expression.[8]

The rule excluding opinion evidence is applicable to testimony given by affidavit as well as to oral testimony. In addition, an affiant's general expression of an opinion or belief, without the facts on which it is founded, is in no sense legal evidence.[9]

While opinion evidence is thus, as a general rule, inadmissible, the testimony of a witness is not always to be excluded merely because it is a statement of such opinion or conclusion. The Evidence Code permits the admission of opinion evidence if given by experts within certain limits relating to subject matter and basis of the opinion.[10] In addition, the Code permits a lay witness to give testimony in the form of an opinion but limits this form of testimony to such an opinion as is permitted by law, including but not limited to an opinion that is both rationally based on the perception of the witness and helpful to a clear understanding of his or her testimony.[11] Thus, for example, a defendant may introduce opinion evidence of his or her character to show a nondisposition to commit an offense.[12]

The Code provisions thus give expression to the judicially established exceptions to the general rule excluding opinion evidence.[13]

A trial judge has wide discretion to admit or reject opinion evidence pursuant to these exceptions, and an appellate court has no power to interfere with the ruling unless there is an obvious and pronounced abuse of discretion.[14]

Observation:

An appellate court may not disturb the trial court's ruling on the admissibility of opinion evidence absent an abuse of discretion.[15]

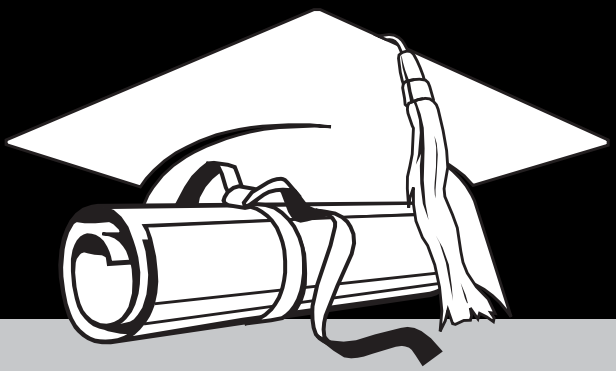
EDUCATION



LAO

60 YEARS OF SERVICE

2005-06 Analysis

4090

MAJOR ISSUES

Education

☑ **Proposition 98—Governor Proposes $2.9 Billion Increase**

- The budget proposes to leave 2004-05 Proposition 98 appropriations at roughly the level provided in the *2004-05 Budget Act*. This proposal would create $2.3 billion in General Fund savings over the two years. While the Governor's 2005-06 spending plan for K-14 grows by $2.9 billion, it does not include funding to cover all K-14 operating expenses that districts would incur under the budget proposal.
- We recommend the Legislature build a base budget for 2005-06 that fully funds the current K-14 education program (see page E-13).

☑ **State Teachers' Retirement System (STRS) Proposal Lacks Benefits**

- The Governor proposes to shift financial responsibility from the state to K-14 education for $469 million in annual contributions to STRS. The proposal, however, may not achieve the intended short-term goal of budgetary savings and does not resolve the longer-term issues with the current plan (see page E-28).

☑ **Some School Districts Face Difficult Fiscal Conditions**

- Some school districts face huge fiscal liabilities to pay for retiree health benefits. It will be difficult for districts to deal with these obligations without a long-term strategy. We recommend the Legislature take various actions to start addressing this problem (see page E-47).

- Around 40 percent of school districts face declining enrollment. The state continues to have inequities in revenue limit (general purpose) funding across school districts. We recommend an approach to address both of the problems, allowing declining enrollment districts to increase their per pupil revenue limit until they reach the equalization target (see page E-53).

☑ **Legislature Should Reject "Autopilot" Budgeting in Higher Education**

- The Governor's budget for the University of California (UC) and the California State University (CSU) follows his "compact" that establishes annual funding targets for the segments through 2010-11. By mapping out these funding choices six years ahead of time, the Governor's compact would put these budgets on autopilot.

- We recommend the Legislature disregard the compact, and instead consider its various funding choices annually based on what is needed to achieve the state's higher education goals as expressed in the Master Plan (see page E-149).

- The Governor's budget does not account for anticipated revenue from planned fee increases at UC and CSU. We recommend the Legislature include this revenue in its budget plan. This approach would allow for budgets that fully fund anticipated growth and inflation-driven cost increases while freeing up some General Fund monies relative to the Governor's proposal (see page E-178).

☑ **Set Community College Fees to Maximize Federal Funding**

- We also recommend the Legislature increase community college fees from $26 per unit to $33 per unit. This would raise about $100 million in new fee revenue that could fund legislative priorities. It would also leverage about $50 million in federal funds to reimburse middle-income families for the higher fees. Financially needy students are exempt from paying fees at community colleges (see page E-195).

TABLE OF CONTENTS

Education

OVERVIEW

Education

The Governor's budget includes a total of $58 billion in operational funding from state, local, and federal sources for K-12 schools for 2005-06. This is an increase of $1.6 billion, or 2.9 percent, from estimated appropriations in the current year. The budget also includes a total of $34.6 billion in state, local, and federal sources for higher education. This is an increase of $1.3 billion, or 4 percent, from estimated expenditures in the current year.

Figure 1 shows support for K-12 and higher education for three years. It shows that spending on education will reach almost $93 billion in 2005-06 from all sources (not including capital outlay-related spending).

Figure 1

K-12 and Higher Education Funding

(Dollars in Millions)

	Actual 2003-04	Estimated 2004-05	Proposed 2005-06	Change From 2004-05	
				Amount	Percent
K-12[a]	$54,673	$56,470	$58,123	$1,653	2.9%
Higher education[b]	32,016	33,232	34,567	1,335	4.0
Totals	**$86,688**	**$89,701**	**$92,689**	**$2,988**	**3.3%**

[a] Includes state, local, and federal funds. Excludes debt service for general obligation bonds and local debt service.

[b] Includes state, local, and federal funds and student fee revenue. Excludes debt service for general obligation bonds.

FUNDING PER STUDENT

The Proposition 98 request for K-12 in 2005-06 represents $7,377 per student, as measured by average daily attendance (ADA). Proposed spending from all funding sources (excluding capital outlay and debt service) totals about $9,586 per ADA.

The Proposition 98 budget request for California Community Colleges (CCC) represents about $4,370 per full-time equivalent (FTE) student. When other state funds and student fee revenue are also considered, CCC will receive about $5,000 per FTE student. This compares to proposed total funding (General Fund and student fees) of $23,000 for each FTE student at the University of California (UC) and $11,500 for each FTE student at the California State University (CSU).

PROPOSITION 98

California voters enacted Proposition 98 in 1988 as an amendment to the State Constitution. The measure, which was later amended by Proposition 111, establishes a minimum funding level for K-12 schools and CCC. A small amount of annual Proposition 98 funding provides support for direct educational services provided by other agencies, such as the state's schools for deaf and blind individuals and the California Youth Authority. Proposition 98 funding constitutes over 70 percent of total K-12 funding and about two-thirds of total CCC funding.

The minimum funding levels are determined by one of three specific formulas. Figure 2 briefly explains the workings of Proposition 98, its "tests," and other major funding provisions. The five major factors involved in the calculation of each of the Proposition 98 tests are: (1) General Fund revenues, (2) state population, (3) personal income, (4) local property taxes, and (5) K-12 ADA.

Proposition 98 Allocations

Figure 3 (see page E-10) displays the budget's proposed allocations of Proposition 98 funding for K-12 schools and CCC. The budget proposes only technical adjustments to the current-year spending level of $47.1 billion, and increases funding to $50 billion for Proposition 98 in 2005-06 (an increase of $2.9 billion). The Governor does not provide the additional $1.1 billion in 2004-05 and $1.2 billion in 2005-06 that would have been needed to meet the funding target established in Chapter 213, Statutes of 2004 (SB 1101, Budget and Fiscal Review Committee). Under the Governor's budget, the General Fund cost of Proposition 98 is $2.4 billion more than

the current year, but a portion of this higher cost ($675 million) is to backfill local property tax revenues that the state transferred to local government. Proposition 98 funding issues are discussed in more detail in the "Proposition 98 Budget Priorities" section of this chapter.

Figure 2

Proposition 98 Basics

✓ ***Over time, K-14 funding increases to account for growth in K-12 attendance and growth in the economy.***

✓ ***There Are Three Formulas ("Tests") That Determine K-14 Funding.*** The test used to determine overall funding in a given budget year depends on how the economy and General Fund revenues grow from year to year.

- ***Test 1—Share of General Fund.*** Provides 39 percent of General Fund revenues. This test has not been used since 1988-89.
- ***Test 2—Growth in Per Capita Personal Income.*** Increases prior-year funding by growth in attendance and *per capita personal income*. Generally, this test is operative in years with normal to strong General Fund revenue growth.
- ***Test 3—Growth in General Fund Revenues.*** Increases prior-year funding by growth in attendance and *per capita General Fund revenues*. Generally, this test is operative when General Fund revenues fall or grow slowly.

✓ ***Legislature Can Suspend Proposition 98.*** With a two-thirds vote, the Legislature can suspend the guarantee for one year and provide any level of K-14 funding.

ENROLLMENT FUNDING

The Governor's budget makes changes to enrollment funding levels for K-12 and higher education. The budget fully funds a 0.79 percent increase in K-12 enrollment, a level which is considerably lower than annual enrollment growth during the 1990s. The K-12 enrollment is expected to grow even more slowly in coming years, as the children of the baby boomers move out of their K-12 years. Community college enrollment is funded for 3 percent growth in 2005-06, which is about one and one-half times the expected rate of growth in the adult population. Consistent with the Governor's "compacts" with the public universities, the Governor's budget funds enrollment increases of 2.5 percent at UC and CSU.

Figure 3

Governor's Proposed Proposition 98 Funding

(Dollars in Millions)

	2004-05		2005-06	Change From 2004-05 Revised	
	Budget Act	Revised[a]	Proposed	Amount	Percent
K-12 Proposition 98					
General Fund	$30,874	$30,992	$33,117	$2,125	6.9%
Local property tax revenue	11,214	11,192	11,593	401	3.6
Subtotals[b]	($42,087)	($42,183)	($44,710)	($2,527)	(6.0%)
CCC Proposition 98					
General Fund	$3,035	$3,036	$3,321	$285	9.4%
Local property tax revenue	1,772	1,750	1,827	77	4.2
Subtotals[b]	($4,807)	($4,787)	($5,148)	($361)	(7.5%)
Total Proposition 98[c]					
General Fund	$34,003	$34,124	$36,532	$2,410	7.1%
Local property tax revenue	12,986	12,941	13,420	479	3.7
Totals[b]	**$46,989**	**$47,065**	**$49,953**	**$2,888**	**6.1%**

a These dollar amounts reflect appropriations made to date or proposed by the Governor in the current year. The revised spending level reflects a $3.1 billion suspension of the minimum guarantee.

b May not add due to rounding.

c Total Proposition 98 also includes around $95 million in funding that goes to other state agencies for educational purposes.

SETTING EDUCATION PRIORITIES FOR 2005-06

In this chapter, we evaluate the proposed budget for K-12 and higher education, including proposed funding increases and reductions, budget/policy reforms, fund shifts and fee increases, and projected enrollment levels. The difficult fiscal environment that the state faces in 2005-06 makes it all the more important for the Legislature to reassess the effectiveness of current education policies and finance mechanisms. In both K-12 and higher education, we provide the Legislature with alternative approaches to the budget's proposal.

K-14 Priorities. An overriding issue for the Legislature in crafting the 2005-06 budget for K-12 education and CCC (both funded largely through Proposition 98 funds) is whether to maintain current-year spending at the level appropriated in the *2004-05 Budget Act*, augment current-year appropriations to the Chapter 213 target level ($2.3 billion more over the two years), or provide some funding level in between. In developing its 2005-06 Proposition 98 budget, we recommend the Legislature use a "current services" budget approach that fully funds the existing K-14 program. We identify some key areas of the K-14 budget where we recommend a different approach than that taken in the Governor's budget. These include State Teachers' Retirement System funding, mental health costs for special education students, and several of the Governor's other reform proposals. We also raise concerns about the current fiscal condition of school districts and the impact on districts of declining student enrollment.

Higher Education Priorities. For UC and CSU, the Governor's budget proposal largely follows the compacts he developed with the segments in spring 2004. Notwithstanding the compacts, the Governor's proposal offers little rationale for the proposed fee increases and growth funding for UC and CSU. We offer our own analysis of UC and CSU's funding needs, including recommendations with regard to student fees and enrollment growth.

For CCC, the Governor proposes a substantial increase for enrollment growth, but no new funding to advance the effort, begun in 2004-05, to equalize per student funding among community college districts. In the "California Community Colleges" section of this chapter, we assess the Governor's enrollment growth funding and accountability proposals. We also recommend increasing student fees at CCC to $33 per unit, which could increase total state funding on education by about $100 million, while leveraging about $50 million in federal financial aid. At the same time, it would add almost no new net costs for students with family incomes up to about $100,000.

CROSSCUTTING ISSUES

Education

PROPOSITION 98 BUDGET PRIORITIES

The Governor's budget proposes to leave 2004-05 Proposition 98 appropriations at roughly the level provided in the* 2004-05 Budget Act.** ***The proposal would create $2.3 billion in General Fund savings over two years. While the Governor's 2005-06 spending plan for K-14 grows by $2.9 billion, it does not include funding to cover all K-14 operating expenses that districts would incur under the budget proposal.

GOVERNOR'S MAJOR PROPOSALS

The Governor's budget proposes an increase in the Proposition 98 guarantee of $2.9 billion in 2005-06 compared to the revised 2004-05 spending level. This increase is sufficient to provide adjustments for K-14 growth in the student populations and the cost of living, a $329 million increase to K-12 school district revenue limits that partially restores reductions made during 2003-04, and $51 million for additional community college growth above the level suggested by demographic growth.

Budget Creates Costs Without Identifying Funding

The Governor's budget for K-14 education also includes several major policy issues that affect schools and community colleges. The budget, however, does not reflect the financial impact of these policy initiatives. Most importantly, the 2005-06 budget proposes to shift from the state to school districts and community colleges $469 million in annual State Teachers'

Retirement System (STRS) costs. The state has contributed this amount of non-Proposition 98 funds each year to pay for a portion of the system's costs. Beginning in 2005-06, the Governor's budget proposes that school and community college districts assume responsibility for these costs. No additional funds are proposed in the budget to help school districts pay for these new retirement costs.

The Governor also proposes to shift to school districts fiscal responsibility for mental health services needed by special education students. Under current law, these services are provided by county mental health agencies under a reimbursable state-mandated local program. Based on the most recent county claims, costs of this program totaled $143 million (non-Proposition 98 funds). By shifting responsibility for these services to school districts, the budget would also shift the cost of these mental health services to local education agencies. The special education budget includes $100 million that could be used to pay for these costs. No additional funds are proposed to cover the remaining $43 million of services.

Two other important proposals follow this same pattern. First, the budget includes a major vocational education initiative, requesting $20 million in one-time funds for the community colleges in support of the proposed reforms. Given the Governor's goal—to bring a "renewed emphasis" on vocational education in high school—it seems probable that the long-term cost of the plan would be much larger than the $20 million included in the proposal. Second, a pilot program is proposed to assess the impact of greater school-level control over the use of funding. No support, however, is requested for additional district costs associated with schoolsite budgeting or for the costs of an evaluation to determine whether the reforms increase student achievement.

Proposed Constitutional Amendments Affect K-14

The Governor also called a special session of the Legislature to address four major changes to the State Constitution that would affect school districts or community colleges. Specifically, the proposals:

- ***Proposition 98.*** Revamp the constitutional spending requirements of Proposition 98 as part of a larger reform of the state budget process. The measure would eliminate options for the state to reduce Proposition 98 funding levels during difficult budgetary times (Test 3 and suspension). Funding for K-14, however, would be subject to "across-the-board" reductions to the state budget that could occur under certain circumstances.
- ***Retirement.*** Prohibit all public agencies in California, including K-12 and community college districts, from enrolling new em-

ployees in a retirement plan that guarantees a specific benefit level upon retirement (known as a "defined benefit" plan). Instead, public agencies could only offer new employees (beginning July 1, 2007) "defined contribution" plans. These plans do not guarantee specific retirement benefits, but offer employers and employees certain other advantages.

- ***Merit Pay and Tenure.*** Alter existing regulation of local school district employee practices. The proposal would require districts to base employment decisions only on employee performance and the needs of the district and its students. The proposal also would extend from two years to ten years the amount of time teachers must perform satisfactorily before receiving employment protections known as "tenure."
- ***School Budget Reports.*** Require school districts to annually report to the public each school's revenues and expenditures.

CURRENT-YEAR GUARANTEE LEVEL IS PIVOTAL

A central issue facing the Legislature in developing the 2005-06 budget is the amount of Proposition 98 spending that ultimately is approved for 2004-05. As part of the *2004-05 Budget Act*, the state suspended the minimum Proposition 98 guarantee and set a target appropriation level that was $2 billion lower than the amount called for by the guarantee. The legislation authorizing the suspension—Chapter 213, Statutes of 2004 (SB 1101, Committee on Budget and Fiscal Review)—establishes a target funding level for K-14 education. The target suggests that higher General Fund revenues in 2004-05 would result in an increased funding level and lower revenues would reduce it.

The Governor's budget assumes that General Fund revenues in 2004-05 will be $2.2 billion higher than previously assumed. This would translate into an increase in the minimum guarantee of $1.1 billion in 2004-05. This higher current-year base also results in an increase in the guarantee of $1.2 billion in 2005-06. The budget, however, does not propose to appropriate these funds to schools and community colleges, only making technical adjustments to the current-year funding level. By leaving the level of Proposition 98 spending at roughly the level included in the *2004-05 Budget Act*, the Governor's budget frees about $2.3 billion over the two years to help address the state's budget problem.

What Level of Appropriation Is Required in 2004-05? Under the State Constitution, a suspension overrides all other Proposition 98 formulas (or tests) and establishes a new minimum guarantee based on the *amount*

appropriated for K-14 education in that year. Suspension means that any changes to the economy or student population have no impact on the required level of spending. Instead, the guarantee for that year is defined by the amount actually appropriated for schools and community colleges. Because the requirements of Proposition 98 are suspended in 2004-05, the $2.2 billion increase in General Fund revenues has no direct impact on the amount the state must spend.

While Chapter 213 signals the intent of the Legislature to appropriate additional Proposition 98 funding if revenues increased, the statute does not contain appropriation authority. Because the statute does not provide this authority, we believe the Legislature would have to take positive action in the future to do so. Absent such action, the minimum guarantee would "default" to the current level of appropriations. Thus, in our view the Legislature could achieve the $2.3 billion savings simply by not making additional Proposition 98 appropriations in the current year. For transparency, however, we would suggest that the Legislature amend Chapter 213 to clarify that the suspension level for 2004-05 should depend on the amount appropriated, and not a specified amount below the Proposition 98 minimum guarantee. This would eliminate any ambiguity.

LAO Forecast—Higher Revenues, Lower Guarantee

Our updated economic and revenue forecasts indicate that General Fund revenues will be significantly higher in 2004-05 and modestly higher in 2005-06 compared to the administration's revenue forecast. While this is good news for the state's overall fiscal picture, our projected increases would actually result in a lower estimate of the minimum guarantee under Proposition 98 in 2005-06.

Cost of Reaching Chapter 213 Target Would Increase to $4 Billion. Specifically, our forecast projects General Fund revenues will be $1.4 billion higher in 2004-05 and $765 million higher in 2005-06 compared to the amounts assumed in the Governor's budget. Figure 1 shows the impact that these revenues would have on the Proposition 98 obligations relative to the Governor's proposal. First, in the current year, the higher revenues would have no impact on Proposition 98 obligations if the Legislature concurs with the Governor's plan to remain at the current-year funding level ($47.1 billion). If however, the Legislature wanted to meet the target of Chapter 213, the Legislature would need to provide an additional $1.9 billion in the current year (using our revenue estimates). This would lead to an increase in budget-year obligations of $2.1 billion, for a two-year impact of $4 billion in additional costs.

Figure 1

Proposition 98 Spending Under Different Revenue Scenarios

(In Billions)

	2004-05	2005-06	Change
Governor's Budget Revenues			
Chapter 213 target	$48.2	$51.2	$3.0
Revised 2004-05 budget	47.1	50.0	2.9
Additional cost to reach Chapter 213 target	$1.1	$1.2	$0.1
Two-Year Totals		**$2.3**	
LAO Revenues			
Chapter 213 target	$49.0	$51.7	$2.7
Revised 2004-05 budget	47.1	49.6	2.5
Additional cost to reach Chapter 213 target	$1.9	$2.1	$0.2
Two-Year Totals		**$4.0**	

More Revenues But Lower 2005-06 Guarantee? Our Proposition 98 forecast provides an unintuitive outcome. While we forecast *higher* revenues in both years, the growth rate in revenues between years actually generates a *lower* guarantee level in 2005-06 than assumed in the Governor's budget. As stated above, we project $1.4 billion higher revenues in 2004-05 and only $765 million in additional revenues in 2005-06. Thus, approximately one-half of the higher revenues are one-time in nature. Since Proposition 98 drives off of year-to-year growth in General Fund revenues, the one-time revenues in 2004-05 actually decrease the year-to-year growth in General Fund revenues between 2004-05 and 2005-06. As a result, the year-to-year growth in Proposition 98 is actually less under our revenue forecast compared to the Governor. Under our forecast, Proposition 98 would grow by $2.5 billion in 2005-06, roughly $420 million less than the Governor.

BALANCE STATE AND LOCAL FISCAL NEEDS

We recommend the Legislature base the 2005-06 Proposition 98 spending level on the amount schools and community colleges need to continue current programs.

Our recommendation on the appropriate level of Proposition 98 spending in both the current and budget years reflects our view that the state needs to resolve its structural budget problem by bringing revenues and expenditures into alignment. The Governor's proposal to leave the 2004-05 appropriation level essentially unchanged is a critical component of the budget's plan for closing the budget gap over the next two years. As a result, moderating increases in the minimum guarantee will greatly assist the Legislature in addressing the state's structural budget problem.

We are reluctant, however, to recommend that the Legislature reduce 2005-06 Proposition 98 spending consistent with our revenue forecast (that is, $420 million below the Governor's proposed level). Our lower estimate is an artifact of the Proposition 98 formulas and not caused by a worsening in the state's revenue situation. The May Revision will provide updated information on the overall General Fund condition and amount required under the minimum guarantee for the budget year. That will give the Legislature another opportunity to balance its spending priorities—including K-14 education—with the need to address the state's budget problem as it completes work on the 2005-06 budget.

To develop its Proposition 98 spending plan, we recommend the Legislature develop a budget for schools and community colleges that provides for adjustments in workload and other anticipated costs for 2005-06. This approach has a couple of advantages for the Legislature. First, it helps the Legislature create a funding base that would allow schools and community colleges to continue current programs under most circumstances. Second, developing a workload budget helps ensure that the spending plan adequately funds the workload and costs the budget would impose on schools and colleges.

A workload budget also would provide a base the Legislature could build on if it decides to appropriate a higher level of funds for Proposition 98. If the Legislature wants to follow this path, we recommend using any additional funds to begin reducing the education "credit card" debt—state obligations to schools and community colleges the state has failed to pay in past years. We discuss the credit card debt later in this section.

Building a Base Budget for 2005-06

Figure 2 displays the elements of a current services budget for K-14 in 2005-06. We made the following workload adjustments:

- ***Growth and Cost-of-Living Adjustments (COLAs).*** Updating the 2004-05 base for changes in K-14 enrollment and the cost of living adds $2.4 billion. Our estimate of the COLA is slightly higher than the figure used in the Governor's budget—4.1 percent com-

pared to 3.93 percent—and adds $80 million in additional costs to the K-14 budget. Our higher estimate is based on data that were not available at the time the Governor's budget was developed.

- ***Ongoing Mandate Costs.*** We added $315 million to our workload budget for the ongoing cost of school district and community college mandates. The last time the state budget included ongoing funding for this constitutional obligation was 2001-02. The Governor's budget would continue the recent practice of deferring all Proposition 98 mandate costs in 2005-06—in effect, borrowing the funds from school districts. We recommend instead the Legislature include ongoing funding for this important state obligation.
- ***One-Time Funds.*** Another $185 million was added to restore to the ongoing budget program funding that was supported with one-time funds in 2004-05.

Figure 2

A Proposition 98 K-14 "Current Services" Budget

2005-06
(In Billions)

2004-05 base	$47.1
Growth	0.5
Cost of living	1.9
Restore base (one-time funds)	0.2
Ongoing cost of mandates	0.3
Total	**$50.0**
Amount above Governor's budget	—[a]
Amount above LAO guarantee	$0.5

[a] Less than $50 million.

Our current services budget exceeds slightly the amount of the minimum guarantee projected in the Governor's budget and in our alternate estimate of the minimum spending level. Specifically, the current services budget is $43 million higher than the level proposed in the Governor's

budget for 2005-06 and $463 million higher than our estimate of the guarantee under our revenue assumptions.

Align Budget With Workload Priorities

We recommend the Legislature delete $382 million for revenue limit deficit reduction and higher community college growth because the proposals represent increases that are not needed to maintain existing programs. In addition, we recommend the Legislature add $315 million for K-14 mandates.

Our current services budget highlights the fact that the proposed budget provides approximately the amount of funds needed to fund a current services budget. The budget contains two main proposals that exceed a current services level of funding—$329 million to restore cuts in K-12 revenue limits and $51 million for "excess growth" in community colleges (that is, above growth in adult population). The savings our budget achieves by excluding these discretionary increases are more than offset by increases for mandate costs and our higher COLA.

Our workload budget also shows that the proposed budget does not fully fund all K-14 costs it would create. Most significantly, the Governor's budget does not fund the ongoing costs of K-14 mandates. In our view, providing a funding source for ongoing K-14 mandates in the base budget constitutes a higher priority than discretionary increases for revenue limits or community college growth.

Therefore, we recommend the Legislature align the budget bill with the spending priorities of our K-14 workload budget. This would require the following specific changes:

- Delete $381 million in discretionary increases—$329 million for deficit factor reduction and $51 million for excess growth in community colleges.
- Restore annual ongoing funding for K-14 mandates ($315 million).

STRS Proposal Lacks Benefits

The Governor's budget also proposes to shift financial responsibility from the state to K-14 education for $469 million in annual contributions to STRS. Later in this section, we discuss this proposal and conclude that the Governor's plan fails to create short- or long-term benefits for the state. In the short run, the proposed shift is intended to save $469 million by requiring K-14 education to absorb these retirement costs. In our view, the proposal may not save the state any funds because we believe the Legislature could have to "rebench" the Proposition 98 guarantee and

appropriate the $469 million to schools and community colleges to pay for the increased local retirement contributions.

In the long run, the Governor's proposal does not offer the state, districts, or local employees any significant advantages. For the state, the proposal misses an opportunity to clarify the state's responsibility for long-term retirement fund liabilities. For districts and local employees, the proposal fails to offer additional flexibility over retirement benefits. For these reasons, we conclude that there is no strong rationale to support the STRS proposal. (Please see our discussion of the proposal in the "Crosscutting Issues" section of this chapter.)

K-14 Priorities Under a Higher Guarantee

If the Legislature chooses to provide a higher level of funding than suggested by our workload budget, additional funds would help the Legislature address a number of borrowing issues that have resulted from the lingering budget crisis. We have referred to this as the education credit card to reflect the amounts the state has borrowed from schools and community colleges. Figure 3 displays the "charges" on the education credit card.

Figure 3
Status of the Education Credit Card Debt

(In Millions)

One-time (Through 2004-05)		Ongoing (2005-06)	
Unpaid K-12 mandate payments	$1,400[a]	Ongoing K-14 mandate payments to budget	$315[a]
CCC and K-12 deferrals	1,271	Revenue limit reductions made in 2003-04	646
Total	**$2,667**	**Total**	**$961**
Grand Total		**$3,628**	

[a] Includes funding for the Standardized Testing and Reporting mandate, which is under review by the Commission on State Mandates.

The figure shows that our estimate of the credit card debt totals $3.6 billion. The largest charge results from unpaid school district claims for the cost of state-mandated local programs. Funding for mandates in the annual budget act ceased after 2001-02. We estimate that the ongoing cost of

mandated programs totals $315 million in 2005-06. The backlog in payments through 2004-05 totals $1.4 billion.

The second largest major contributor to the credit card is $1.3 billion in program deferrals. The deferrals created one-time savings by shifting costs from one fiscal year to the next. For instance, the budget shifts the June payment for school district general purpose funds (revenue limits) to July 1, thereby paying this obligation with funds from the succeeding year's Proposition 98 funds. Until the state pays the $1.3 billion one-time cost to retire this "loan," the state will need to extend this deferral each year if it does not want to negatively impact education programs.

The third element of the credit card is $646 million in revenue limit "deficit factor"—funds saved each year by the state resulting from past reductions in general purpose funding. While past-year savings from these cuts do not have to be repaid, restoring them would build these additional costs into the K-12 base budget. Repaying deficit factor, therefore, requires the Legislature to use ongoing funds. The 2005-06 budget proposes to spend $329 million to partially restore school district and county office revenue limits. If the Legislature wants to provide additional funding to K-14 education in either the current or budget years, we would suggest that it dedicate funds to reduce the outstanding obligations on the education credit card.

GOVERNOR'S VOCATIONAL EDUCATION REFORM

The 2005-06 budget proposes $20 million in support of a broad-based reform of vocational education in K-12 education. We believe the Governor's proposal addresses a significant problem, but lacks the level of detail necessary for the Legislature to fully evaluate it. We therefore recommend the Legislature direct the Department of Finance to provide to the budget subcommittees prior to budget hearings (1) the details of the proposed plan and (2) responses to our initial concerns about the proposal.

The *2005-06 Governor's Budget* proposes to strengthen vocational education in high schools to ensure "that all students have educational opportunities that lead to successful employment." According to the administration, the proposal builds on successful programs that are currently in place to create a "renewed emphasis" on vocational education in high schools.

The administration's reform package has two key elements. First, the proposal would dedicate $20 million in one-time Proposition 98 Reversion Account funds to encourage high schools to work with local California Community Colleges (CCC) to expand and improve vocational courses available to high school students. The plan seeks to build on successful "2+2" programs, in which students take two years of high school vocational courses that lead into a two-year CCC vocational credential or diploma program. Funds could be used for a wide variety of local activities, including curriculum development and equipment purchases.

Second, the plan calls for all middle school students to take a new vocational awareness class. The administration proposes to mandate middle school introductory vocational courses to (1) help students consider their long-term career goals and (2) provide information about available vocational options. According to the administration, the new course would replace an existing elective course.

The reform plan includes several other supporting changes, including:

- ***Increasing K-12 Accountability.*** The proposal would add to the existing School Accountability Report Card (SARC) new indicators that measure the success of schools in offering vocational courses and in helping students who take vocational education courses.
- ***Supporting Local Efforts to Expand Options.*** The reform proposal also would (1) revise K-12 and teacher credential requirements to help schools and colleges hire teachers who are familiar with the current skill needs of business and (2) allow CCC to increase the proportion of part-time faculty (above the existing 25 percent target) as needed to meet demand for vocational education courses.

Proposal Addresses an Important Problem

We think the Governor's budget has identified an important problem. In a forthcoming report (expected later this year), we discuss how a strong secondary vocational education system can mitigate several major problems in high schools.

May Help Reduce Dropouts. By giving students a greater range of choices in high school, improving vocational education could help address the state's high dropout rates. About 30 percent of students who begin ninth grade drop out before finishing high school. Low academic achievement is a major factor in dropping out. Convinced that academic success is unlikely, many low-performing students see little reason to stay in school. A range of academic and vocational choices could help keep students in school by giving them greater control over what they study and help them use high school to achieve their postgraduation goals.

Increase Financial Returns to Students. Successfully restructuring vocational programs into sequences of high-level courses would increase the value of these courses to students. Research suggests that most existing high school vocational courses deliver students few benefits (such as higher wages or higher rates of employment). This is because the courses taken by students do not build on each other. Research shows that sequences of high-level secondary or community college courses lead to higher-level occupational skills, which in turn can generate significant payoffs for students.

Create Better Alternatives to a College Diploma. Vocational sequences that prepare students for high-level jobs may encourage students to pursue more realistic postgraduation goals. Perhaps because high school vocational programs have low returns, high school students see college as virtually the only road to success. Surveys show that 56 percent of California's tenth graders want to attend a four-year university and 22 percent plan on

attending a two-year college after graduating from high school. Only about 10 percent of students plan on going directly into the workforce.

Data show a disconnect between these aspirations and actual experience. Less than one-half of those tenth graders attend university or college in the two years after graduating, and fewer than one in five earn a university or college degree. Most students who go to CCC drop out before receiving a diploma or transferring to a four-year institution.

When students fail to complete a rigorous academic or vocational program in high school or college, they enter the labor market with fewer saleable occupational skills. Strong secondary vocational programs expand the number of attractive options available to high school students. This can help students enter the labor market as adults with skills that improve their long-term job prospects.

Proposal Not Fully Developed

At the time this analysis was prepared, few details on the proposed changes were available. From the information that was available, the plan appears to address many of the critical areas that we see as problems for vocational education in high schools. The proposal, for instance, promotes an early focus on careers and the options available to high school students who are interested in specific occupation areas. The eighth grade "exploratory" class would help students (and their parents) develop a plan for taking the courses needed to achieve the students' postgraduation goals. We also think increasing the number of students involved in CCC vocational programs is a worthy goal—research shows very high wage returns to students who graduate from community college vocational programs. Finally, by adding data on the quality of school vocational programs into SARC, the proposal addresses the need to increase local accountability.

In concept, therefore, we think the proposed plan is headed in the right direction. We have several areas of concern with the reform plan, however, that warrant further legislative discussion.

The Eighth Grade Career Exploratory Course Would Create a Reimbursable State-Mandated Local Program. The Governor's plan would require districts to provide a middle school vocational course, which likely would result in a new state-mandated local program. In general, we advise against creating new programs through state mandates for two reasons. First, under the state mandate reimbursement process, it takes several years before the state begins to reimburse district costs. Second, the state has little control over the cost of new mandates, and our review of district mandate claims shows that local per pupil costs vary tremendously.

In addition, the Governor's proposal does not include an estimate of the likely costs of the new middle school course. An existing mandate that accomplished a similar goal—altering the courses needed to graduate from high school—costs about $13.5 million annually. There also may be additional one-time district costs to create a syllabus for the new exploratory course, obtain needed materials or textbooks, and train teachers.

We think the Legislature needs additional information on why the administration proposes to implement the middle school exploratory course through a state-mandated local program. In addition, the Legislature needs better information on the projected costs—one-time and ongoing—of the new course requirement.

Uses for CCC Funding Should Be Specified. As noted earlier, the Governor's proposal would provide $20 million to CCC for aligning vocational curricula between K-12 schools and community colleges' economic development programs. While we recognize the need for better alignment between vocational offerings in these two systems, we cannot determine the extent to which this funding would advance that goal. The administration could not provide us with many specifics about what kinds of activities would be funded with this money, on what basis it would be distributed, and what accountability provisions, if any, would be implemented. As a result, the administration could not explain why $20 million is the correct amount of funding to provide at this time.

The administration also proposes budget bill language that would make the allocation of the $20 million by CCC dependent on the submission of an expenditure plan that would be approved by the Department of Finance (DOF). In other the words, the Governor is asking the Legislature to approve the $20 million without knowing how the money will be spent. From our perspective, the budget process should allow the Legislature to review the administration's expenditure plan and include its own priorities for the use of the state's money. We believe a sufficiently detailed expenditure plan can be developed and reviewed within normal budget process timeframes.

The Legislature needs the details of how the $20 million fits into the overall reform plan. Without an expenditure plan that includes details on the proposed uses of the new funds, we would recommend the Legislature delete the $20 million appropriation.

Regional Occupational Programs and Centers (ROC/Ps) Have No Explicit Role in the Reform Program. About 40 percent of vocational courses taken by high school students are provided through ROC/Ps. These agencies provide regional support for vocational education. Most ROC/Ps are operated by county offices of education.

The Governor's proposal makes no mention of the role of ROC/Ps. From our perspective, ROC/Ps would contribute significantly to a strengthened system of secondary vocational education. Several changes to the mission of these agencies may be necessary, however. Switching the focus of ROC/Ps from administering individual low-level training classes to participating in sequences that result in two- and four-year skill certificates would align the goals of these regional agencies with the proposed reforms.

Reducing the number of adults served by ROC/Ps also would increase the amount of vocational resources available to high schools. In 2002-03, about one-third of ROC/P students were adults. Bringing all ROC/P resources to support vocational options for high school students would strengthen the proposed reform plan significantly. For these reasons, we think the Legislature needs more information on the role of ROC/Ps in the Governor's reform plan.

Students Need Better Information About the Likelihood of Success in College. As noted above, most high school students see college as virtually the only road to success in life. Research shows many high school graduates enroll in CCC without the academic skills needed to do college-level work. These students assume they are ready for college because they received reasonably good grades in high school. When they arrive at college, however, many students are required to retake courses they took in high school. Not surprisingly, perhaps, these students are less likely to earn a CCC degree or transfer to a four-year institution.

These findings indicate that students need early and ongoing information about whether they are "on track" for gaining the academic skills needed for college. Students and parents need data *other than grades* (which follow no statewide standard) with which to evaluate a student's likelihood of success in an academic college or university program. In addition, the information would help students and parents assess the academic requirements of the different vocational choices available at a high school.

Legislature Needs Details

While we think the broad outlines of the proposal hold promise, key details of the plan are unavailable. Therefore, we recommend the Legislature direct DOF to provide prior to budget hearings the specifics of the proposals contained in the proposed reform package, including responses to the specific concerns raised in this analysis.

STATE TEACHERS' RETIREMENT SYSTEM (1920)

The Governor's budget proposes shifting the state's contribution for basic teacher retirement to schools. (This includes K-12 school districts, county offices of education, and community colleges.) The budget assumes $469 million in General Fund savings from this reduction in state contributions to the State Teachers' Retirement System (STRS).

In this piece, we:

- Describe the retirement plan for teachers, its funding, and its unfunded liability.
- Lay out criteria for increasing local control, flexibility, and responsibility for a teacher retirement system.
- Describe and evaluate the Governor's proposal to shift contributions to school districts in the context of these goals.

BACKGROUND

The Basics of the STRS Plan

Defined Benefit Pays 2 Percent at 60. All K-12 and community college teachers in public schools who work at least half-time are required to participate in the state-sponsored retirement plan administered by STRS. This is a "defined benefit" program, which guarantees a certain lifetime monthly pension benefit based on salary, age, and years of service at retirement. The basic defined benefit pension for retired teachers pays 2 percent of salary for each year of service at age 60.

Recent Benefit Enhancements. Beginning in the late 1990s, when STRS investment returns had resulted in full plan funding, the state approved a series of benefit enhancements. Effective in 1999, the state approved higher

percent-of-salary formulas to calculate pension benefits for teachers who are above 60 years of age and/or have 30 years of service.

Effective in 2001, the state again enhanced benefits as investments continued to surge. These changes instituted the following:

- Highest one-year salary (rather than the standard three-year period) to calculate pensions for teachers with 25 or more years of service.
- Additional dollar amounts per month for teachers who retire by the end of 2010 with 30 or more years of service.
- Diversion of 25 percent of teacher contributions—2 percent of the total 8 percent—to a new defined benefit supplement (DBS) program. This program includes individual accounts designed to provide extra retirement income above the defined benefit pension. This diversion is in effect through 2010.
- The STRS payment of Medicare Part A (hospitalization insurance) premiums for retiring teachers who did not pay Medicare taxes (hired before April 1986) and must, therefore, pay the full Part A premium to participate in the federal program.

In addition, the state also approved:

- Allowing retirement credit for accumulated sick leave.
- Increasing the inflation protection benefit from 75 percent up to 80 percent. This benefit increases retirees' pensions when inflation erodes their initial allowances to below 80 percent of their original purchasing power.

Three Contribution Sources Finance Benefits. Contributions to STRS are fixed in statute. Teachers contribute 8 percent of salary to STRS, while school districts contribute 8.25 percent. Figure 1 (see next page) compares employee and employer contribution rates for STRS and related or comparable Public Employees' Retirement System (PERS) plans.

In addition to the teacher and school contributions, the state contributes 4.517 percent of teacher payroll to STRS (calculated on payroll data from two fiscal years ago). The state contribution includes:

- 2.017 percent for the enhanced defined benefit program. This payment would be $469 million in 2005-06, if not for the Governor's proposal to shift the payment to school districts.
- 2.5 percent to finance purchasing power protection at 80 percent. This payment will contribute $581 million in 2005-06.

Figure 1

STRS Retirement Contributions Less Than Average PERS Contributions

	STRS	PERS Miscellaneous Tier 1	PERS School Employees
Employees			
Pension	8.0%	5.0%[a]	7.0%
Social Security	—	6.2	6.2
Totals	**8.0%**	**11.2%**	**13.2%**
Employers			
Pension	8.25%	12.4%[b]	7.6%[b]
Social Security	—	6.2	6.2
Totals	**8.25%**	**18.6%**	**13.8%**

[a] On amount of monthly salary in excess of $513.

[b] Varies annually for State Miscellaneous Tier 1 and noncertificated school employees. Amount shown is the 25-year average contribution rate.

Unlike typical defined benefit programs such as those administered by PERS, neither the STRS employer nor the state contribution rate varies annually to make up funding shortfalls or assess credits for actuarial surpluses.

Surcharge Triggered for First Time. The state also pays a surcharge when the teacher and school district contributions noted above are not sufficient to fully fund the pre-enhancement benefits within a 30-year period. Because of the downturn in the stock market, an actuarial valuation as of June 30, 2003 showed a $118 million shortfall in these baseline benefits—one-tenth of 1 percent of accrued liability. Consequently, this surcharge kicked in for the first time in the current year at 0.524 percent for three quarterly payments. This amounts to an additional $92 million from the General Fund in 2004-05.

The Governor's budget assumes this surcharge is discontinued in 2005-06 based on greater-than-assumed investment returns for 2003-04. It will not be known, however, whether the surcharge will continue until a new valuation becomes available in the spring. If it does continue, the 2005-06 General Fund cost for a full year would be between an estimated $120 million and $170 million.

Actuarial Valuation Finds Funding Shortfall

In addition to the small shortfall in pre-enhancement benefits (triggering the current-year surcharge), the recent valuation also showed a substantial $23 billion unfunded liability for the entire system, including enhanced benefits. That is, existing contributions from teachers, school districts, and the state are not sufficient to fully fund retirement benefits. As a result, STRS has just 82 percent of the assets necessary to pay accrued benefits.

As noted above, the pre-enhancement benefit structure has just a fractional shortfall. Consequently, the large systemwide unfunded liability results from the recent benefit enhancements. As described in the nearby box, STRS is currently reviewing options to address this shortfall.

Local Program Has No Local Control or Responsibility

System Problems

We believe there are three main problems with the current method of providing teacher retirement benefits.

Passive State Role in Teacher Compensation, Except for Retirement. As described above, the state is extensively involved in providing teacher retirement benefits and designating funding for this local program. This active role is contrary to the state's passive role in other forms of teacher compensation. The most significant form of compensation—teacher salaries—is left to local school districts and their employees to determine through collective bargaining. Moreover, because the state contributes to the retirement system, local districts do not bear the full costs of retirement plans, unlike teacher salaries.

No Plan Flexibility. In addition, the state-run system limits the choices of both school districts and teachers. With a single benefit structure and required contributions spelled out in statute, districts and teachers have no choices about how best to meet their pension needs. For example, some districts might prefer to use retirement contributions to finance other pension plans that better meet their overall funding needs. Similarly, teacher retirement needs may vary dramatically. Some teachers may prefer to weight their compensation toward present needs. Other teachers may want to forego some current salary for an even more generous retirement allowance than that provided through the STRS program.

State Viewed as Funder of Last Resort. As noted above, all contributing parties—teachers, school districts, and the state—have fixed contributions in statute. Thus, there is no designated responsibility for long-term fund-

ing shortfalls, such as the current $23 billion gap. In fact, because the state requires school district participation and designates the rates paid by teachers and school districts, the Legislature may feel compelled to pick up some or all of the unfunded liability despite the local nature of the program. In this way, the current system prevents funding decisions from being viewed as a local responsibility.

Long-Term Solutions

In our view, the long-term solution to these issues is to put decision making and responsibility for school retirement (including nonteaching or noncertificated employees) at the local level with employers (school districts) and employees (teachers). In other words, treat teacher retirement the same as other local government retirement programs. This would include:

- Having all costs borne by school districts and/or teachers, rather than the state being responsible for some share of costs.

Larger State Teachers' Retirement System (STRS) Funding Issue Looms

Shortfall Amounts to an Extra $1 Billion in Annual Contributions. The Governor's cost-shift proposal comes at a time when STRS faces another significant funding issue—the $23 billion unfunded liability noted in the main text. The STRS estimates that the retirement fund needs the equivalent of an additional 4.438 percent of salary over a 30-year period to retire the unfunded liability. This amounts to additional contributions exceeding $1 billion annually.

Options for Closing the Gap. The STRS has developed a dozen options for the board to consider to address the identified shortfall. Most of these options would require legislative action. The options can be grouped into three categories:

- ***Rescinding Recent Benefit Increases.*** The majority of the options would roll back benefits provided to teachers in recent years. In most cases, these changes could only be implemented for teachers who begin working after the new changes take effect. (Courts have considered pension plans to be part of the employment contract. Once a teacher begins working, therefore, the pension is not changeable without some offsetting benefit.)

Continued

- Allowing local flexibility for schools to choose different retirement plans—for teachers and noncertificated staff—that best meet local needs. This could be through STRS, PERS, or other venues such as joint powers authorities.
- Assuring fiscal soundness in that all potential costs are designated to be covered by employers and employees without the necessity of future statutory changes.

It is these criteria that we use to evaluate the long-term impact of the Governor's proposal for teacher retirement. In addition, there are short-term issues the proposal raises as a 2005-06 budget balancing solution.

GOVERNOR PROPOSES COST SHIFT TO SCHOOL DISTRICTS

Proposal

The budget proposes shifting the state's benefits contribution to school districts. (The state would continue annually paying 2.5 percent of payroll

- ***Additional Contributions.*** The state could increase contributions for teachers, school districts, and/or the state to cover the liability. As with reductions in benefits, the state generally would not be able to increase current teachers' contribution rates.
- ***Refinancing the Unfunded Liability.*** The STRS typically amortizes unfunded liabilities over a 30-year period. One refinancing option developed by STRS would stretch these payments over 40 years. (This time period would exceed the bounds of what is allowed for private pensions and is outside the norm for the state's practice.) Another option would be the issuance of a pension obligation bond. By issuing a bond at a lower interest rate than STRS' assumed rate of return (currently 8 percent), the state could reduce its interest payments over time. The Legislature would have to determine who is responsible for providing the resources to pay off the bond.

STRS Board Will Weigh Options This Spring. The STRS board has asked constituent groups for their comments, preferences, and recommendations on these options. The board has also requested an updated actuarial valuation as of June 30, 2004, which will be available in the spring. After this process, the board plans to bring proposals to the Legislature to address the unfunded liability.

to the inflation protection account.) The proposal would increase districts' contributions by 2 percent of payroll, resulting in a total district payment of 10.25 percent. (The state's contribution of 2.017 percent of payroll from two years ago is equivalent to a district payment of 2 percent at current payroll.) This amounts to roughly $500 million in additional contributions. The Governor's proposal would allow school districts to pass through to employees this additional contribution through collective bargaining. Consequently, teachers could contribute as much as 10 percent of their wages toward retirement.

To maintain take-home pay, however, teachers would also have the option of ending the equivalent diversion—2 percent—of the employee contribution to DBS (described previously). This component of the Governor's proposal is not contingent on school districts passing through the shifted responsibility for the 2 percent benefits contribution. Teachers could elect to stop contributing to DBS and receive that compensation in take-home pay regardless of whether districts or teachers pay the benefits contribution.

The administration proposal to shift the state's benefits contribution to school districts also includes eliminating the statutory provision for the surcharge when there is an unfunded liability in the pre-enhancement benefits.

Administration Asserts State Commitment Fulfilled. The administration asserts that the state fulfilled its 1971 promise—included in Chapter 1305, Statutes of 1971 (AB 543, Barnes)—to contribute a fixed dollar amount to the system for 30 years. This period would have ended in 2001-02, four years after the STRS program reached 100 percent funding.

Short Term: Does the Governor's Proposal Work As a 2005-06 Budget Solution?

We find that the Governor's proposal to shift the state benefits contribution to school districts likely would not achieve the intended savings under current law.

The Governor's proposed budget solution assumes the shift of STRS costs would provide ongoing General Fund relief. As we discuss below, however, these savings may not be achievable.

Shift Could Require Proposition 98 "Rebenching." Retirement contributions for school teachers and administrators are an operating cost schools face, like salaries and other benefits. When the state was implementing Proposition 98, however, it decided which programs to include within the minimum guarantee. At that time, the state decided to keep its STRS contri-

butions outside of the guarantee. While the state can move a funding responsibility from outside of Proposition 98 into the guarantee, state law requires that the minimum guarantee be rebenched to reflect this added responsibility. Thus, the Governor's proposal would likely require a $469 million upward rebenching of the minimum guarantee. If so, the proposal would not result in any General Fund savings.

Long Term: Does the Proposal Move Toward the Goals of Local Control and Responsibility?

The Governor's proposal would not fundamentally reform the State Teachers' Retirement System. To move towards a retirement system that emphasizes local control and responsibility, the Legislature would need to focus on a new approach for new teachers.

Shortcomings in System Would Remain. On a long-term basis, the Governor's proposal would not bring the state significantly closer to a teachers' retirement system which reflects local control and responsibility.

- ***Local Control.*** The Governor's proposal would shift the costs of a local program to the local level. Yet, the proposal would not fundamentally change the state's role with regard to STRS. First, the state would continue to have an active role in the costs of the program—by contributing to the purchasing protection program. Second, the state would remain actively involved in determining future benefit changes.
- ***Local Flexibility.*** The Governor's proposal also would not increase flexibility for school districts or teachers. Every school district would continue to offer the same retirement plan for teachers, regardless of local circumstances.
- ***Designated Funding Responsibility.*** Finally, the proposal would not designate which entity would be responsible for any financial shortfalls. Consequently, the state could continue to be viewed as the funder of last resort, reducing local responsibility for the program.

Limitations on Changing System for Existing Teachers. For these reasons, the Governor's proposed cost shift would not fundamentally reform the existing STRS system. For existing teachers, the Legislature may find it difficult to reach the long-term goals of local control, flexibility, and designated funding responsibility with any proposal. Once in place, retirement systems are difficult to alter. By viewing a retirement program as part of the employer-employee contract, the courts have placed significant limits on the types of changes that can be made to a current employee's retirement

program. Additionally, the state will be required to designate a source of funding to pay off the current STRS unfunded liability.

Proposals Regarding New Teachers. For new teachers, however, the Legislature would have significantly more flexibility in designing a system that focused on local control and responsibility. The Governor, for example, has proposed requiring all new state, local government, and school employees in California to participate in defined contribution retirement plans. We discuss his proposal in detail—as well as alternatives—in "Part V" of *The 2005-06 Budget: Perspectives and Issues*.

INTRODUCTION

K-12 Education

The budget proposes to provide a $2.5 billion (6 percent) increase in K-12 Proposition 98 funding from the 2004-05 level. Most of the new funding is used to fully fund attendance growth, and provide a cost-of-living adjustment (COLA) plus an additional $329 million to restore part of a prior-year COLA. Adjusting for deferrals funding, schools would receive $7,377 per pupil, or 5.2 percent, more than revised per pupil expenditures in the current year. The Governor proposes not to fund a $1.1 billion increase in funding in the current year that would be needed to meet the targeted funding level in the bill suspending Proposition 98 for 2004-05. The two-year savings from this proposal is $2.3 billion. The Governor proposes to transfer from the state to school districts and community colleges a $469 million State Teachers' Retirement System cost obligation (the K-12 share is $433 million).

Overview of K-12 Education Spending

Figure 1(see next page) displays all significant sources for K-12 education for the budget year and two previous years. As the figure shows, Proposition 98 funding constitutes over 70 percent of overall K-12 funding. Proposition 98 funding for K-12 increases $2.5 billion (6 percent) from the 2004-05 level. However, other funding for K-12 falls by a combined $723 million (see Figure 1).

Local Government Deals Require Higher General Fund Support for Proposition 98. The $2.5 billion increase in K-12 Proposition 98 funding is supported mainly by the General Fund ($2.1 billion). Since 2003-04 the K-12 share of Proposition 98 supported by the General Fund has increased from 67 percent in 2003-04 to 74 percent in the proposed budget. The main cause of the increased General Fund share of Proposition 98 is transfers of local property tax revenues from schools to local government to meet the requirements of the vehicle license fee (VLF) "swap" and the "triple flip" payment mechanism for the deficit reduction bond passed by the voters in March 2004. The Department of Finance (DOF) forecasted that underlying local property tax revenues would grow by 9 percent, which would have provided almost $1.1 billion in year-to-year growth. However, technical

adjustments to the VLF swap and triple flip amounts require an additional $675 million to be transferred from schools to local government. Thus, the growth in local property tax revenues in 2005-06 is only $401 million (3.6 percent).

Figure 1

K-12 Education Budget Summary

(Dollars in Millions)

	Actual 2003-04	Revised 2004-05	Proposed 2005-06	Change From 2004-05 Amount	Change From 2004-05 Percent
K-12 Proposition 98

Budgeted amount per ADA	$7,017	$7,012	$7,374	$362	5.2

Totals may not add due to rounding.

Proposed Reductions in Non-Proposition 98 Spending. The budget proposes to decrease non-Proposition 98 funding for K-12 by a net of $723 million in 2005-06. The key changes include:

- ***Shifting the Responsibility for the State Teachers' Retirement System (STRS) Contributions From State to School Districts—Decrease of $433 Million.*** The state's General Fund currently contributes roughly 2 percent of teacher payroll annually for the STRS base

program. The budget proposes to shift this payment to school districts and/or teachers. This would result in 2005-06 General Fund savings of $469 million ($433 million of this is costs shifted to school districts and the remainder is shifted to the community colleges).

- ***One-Time STRS Surcharge Triggers Off—Decrease of $94 Million.*** In the current year, a funding shortfall in the STRS base program triggered a 0.524 percent General Fund surcharge for three-quarters of the year. This amounts to $94 million. The administration assumes that this surcharge will not continue in 2005-06 (at a full year cost of at least $122 million) because greater-than-assumed investment returns in 2003-04 may have erased the small shortfall that triggered the surcharge. It is our understanding that the statutory provision for a surcharge would be eliminated as part of the administration's proposed benefits funding shift.

- ***School Bond Debt Service—Increase of $151 Million.*** The budget's increase in debt service on school bonds reflects recent investments the state has made in school construction and renovation through Proposition 1A (1998) and Proposition 47 (2002).

- ***Proposition 98 Reversion Account Reductions—Decrease of $203 Million.*** Most of the decrease in "General Fund—Other programs" in Figure 1 results from a $203 million reduction in funds available in the Proposition 98 Reversion Account. The Reversion Account reappropriates funds that were appropriated to Proposition 98 in the past, but were not used. The Reversion Account balances are projected to be less for 2005-06 largely because the state has reduced funding for many of the programs that have historically generated reversion funding. Starting in 2005-06, one-half of the funds in the Reversion Account are transferred to an emergency fund for facilities as part of the *Williams v. California* lawsuit settlement.

- ***Federal Funding Reductions Reflect Conservative Estimate—Decrease of $51 Million.*** The Governor's budget makes conservative assumptions about the availability of federal funding in 2005-06 because the federal budget was passed too late to incorporate into the budget. We now have early estimates of the year-to-year change in federal funding. The federal Department of Education estimates that federal funding for California education will increase around $75 million in 2005-06. Thus, the Governor has underbudgeted federal funds by around $125 million. The DOF informs us that they will reflect additional federal funds in the May Revision.

Per Pupil Spending Grows by $362 in 2005-06

The Governor's budget provides an additional $362 per pupil, a 5.2 percent increase from the current year. Figure 2 shows per pupil spending in actual dollars over the last decade. The figure shows two distinct trends—a fast growth period in the late 1990s, and a slow growth period between 2000-01 and 2004-05. Spending per pupil increased in each year of this period. However, these spending levels do not take into account the effects of inflation. Figure 3 adjusts per pupil spending for inflation. K-12 spending since 2000-01 has not kept pace with rising costs, declining 1.3 percent per year, on average, between 2000-01 and 2004-05. Looking at changes over the last decade, spending (in inflation-adjusted terms) has increased by approximately $930 per pupil (14 percent). The Governor's proposal would end the recent trend of reduction, growing per pupil spending 2.3 percent after adjusting for the effect of inflation.

Figure 2

K-12 Per Pupil Spending

(Nominal Dollars)

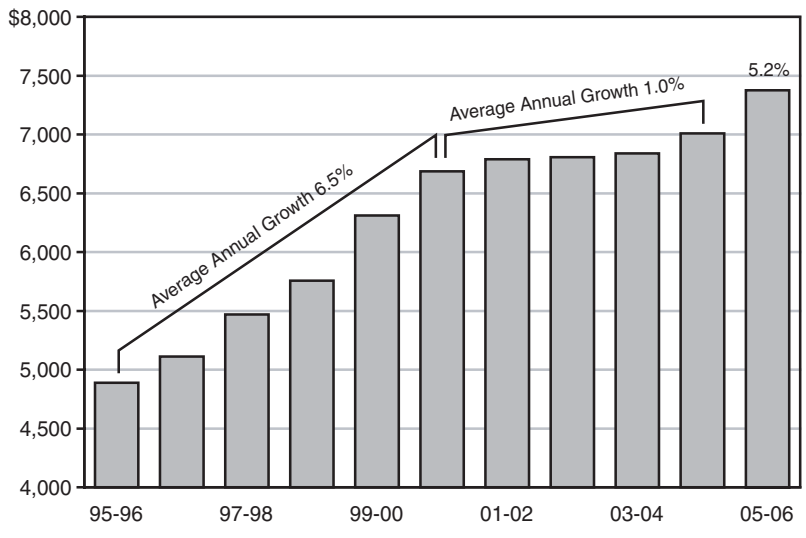

Figure 3

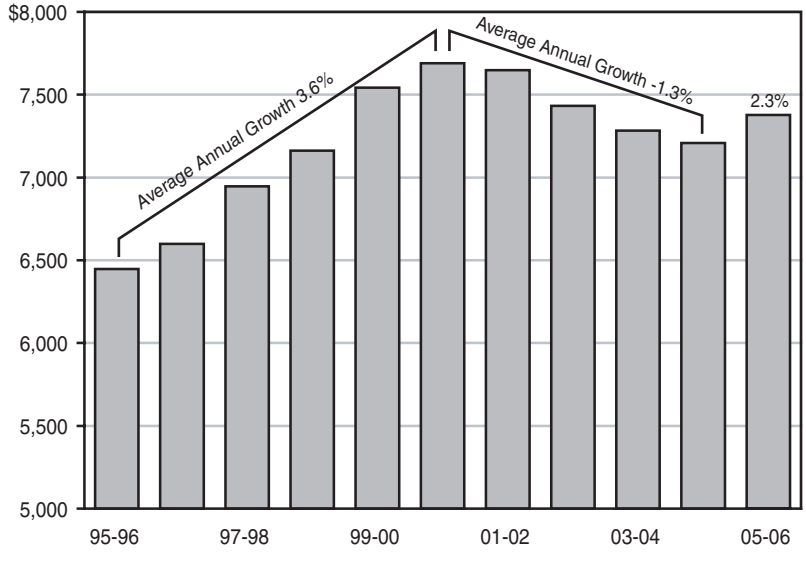
K-12 Per Pupil Spending Adusted for Inflation



Major K-12 Funding Changes

Figure 4 (see next page) displays the major K-12 funding changes from the *2004-05 Budget Act*. In the current year, the Governor's budget reflects a net $89 million increase resulting mainly from higher-than-expected attendance. In 2005-06, the Governor's budget proposes about $2.5 billion in new K-12 expenditures for the following purposes.

- ***Revenue Limit Growth and COLAs—$1.5 Billion.*** The Governor fully funds 0.79 percent growth in revenue limits ($234.7 million), and a 3.93 percent COLA ($1.2 billion).
- ***Deficit Factor Reduction—$329 Million.*** In 2003-04, the state did not provide a COLA (1.8 percent), and reduced revenue limits by 1.2 percent. At that time, the state created an obligation to restore the reductions at some point in the future. That obligation is referred to as the "deficit factor." The budget provides $329 million to reduce the deficit factor from around 2.1 percent to 1.1 percent.
- ***Categorical Growth and COLAs—$588 Million.*** The Governor fully funds growth and COLAs for categorical programs including $427.6 million for COLAs and $160 million for growth.

- ***Restoration of Categorical Funding.*** To help balance the 2004-05 budget, the state used one-time funds to support ongoing education programs. The Governor provides ongoing funding for these programs starting in 2005-06.

Deferrals and other adjustments	-111.2	-19.3	91.9	-82.6
Subtotals	($11,810.7)	($12,551.9)	($741.2)	(6.3%)
Totals	**$42,183.0**	**$44,710.1**	**$2,527.0**	**6.0%**

a Amounts adjusted for deferrals. We count funds toward the fiscal year in which school districts programmatically commit the resources. The deferrals mean, however, that the districts technically do not receive the funds until the beginning of the next fiscal year.

b Special education includes both General Fund and local property tax revenues.

c Chapter 871, Statutes of 2004 (AB 825, Firebaugh), created these new categorical block grants. The 2004-05 amounts include funding provided for the predecessor programs.

Enrollment Trends

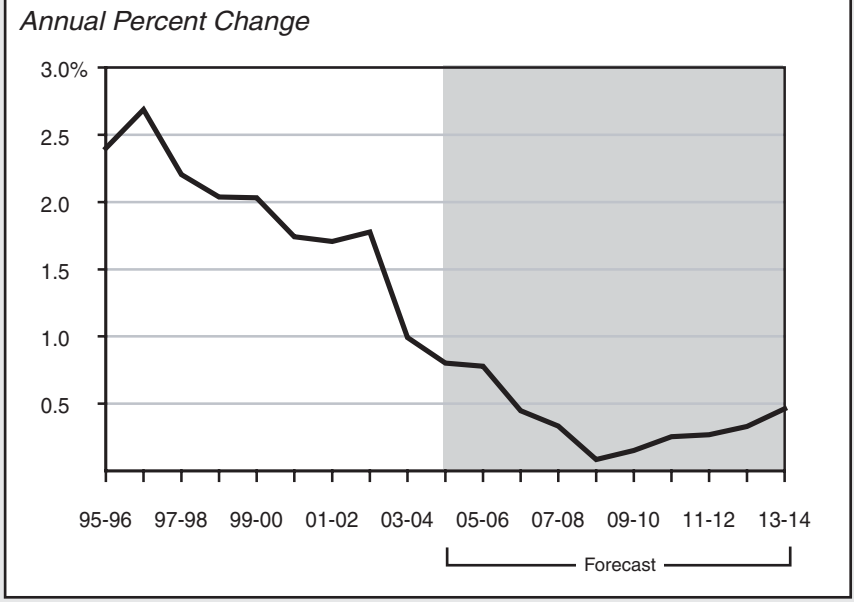
Enrollment growth significantly shapes the Legislature's annual K-12 budget and policy decisions. When enrollment grows slowly, for example, fewer resources are needed to meet statutory funding obligations for revenue limits and K-12 education categorical programs. This leaves more General Fund resources available for other budget priorities both within K-12 education and outside it. Conversely, when enrollment grows rapidly (as it did in the 1990s), the state must dedicate a larger share of the budget to education. In light of the important implications of enrollment growth, we describe below two major trends in the K-12 student population.

The enrollment numbers used in this section are from DOF's Demographic Research Unit and reflect aggregate, statewide enrollment. While the enrollment trends described here will likely differ from those in any given school district, they reflect the overall patterns the state is likely to see in the near future.

K-12 Enrollment Growth to Slow Significantly. K-12 enrollment is projected to increase by about 0.8 percent in 2005-06, bringing total enrollment to about 6.3 million students. Figure 6 shows how enrollment growth has steadily slowed since the mid-1990s. The figure also indicates that K-12 enrollment growth will continue to slow until 2008-09, when it will turn upward.

Figure 6

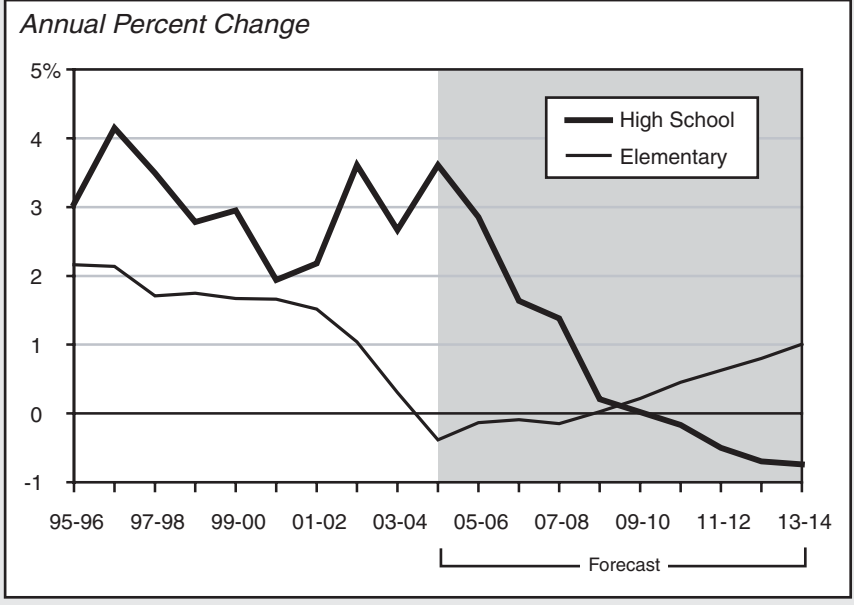
K-12 Enrollment Growth



Divergent Trends in Elementary and High School Enrollment. Figure 7 shows that the steady decline in K-12 enrollment growth masks two distinct trends in elementary (grades K-8) and high school (grades 9 through 12) enrollment. Elementary school enrollment growth has gradually slowed since 1995-96. This enrollment is expected to decline annually between 2004-05 and 2008-09. In contrast, high school enrollment growth has been growing rapidly, with a 3.6 percent increase in 2004-05. Beginning in the budget year, growth is expected to slow sharply, becoming negative in 2010-11. Expected growth from the current year to 2007-08 is approximately 115,000 pupils (6 percent). Between 2007-08 and 2013-14, however, enrollment will fall by almost 40,000 students.

Figure 7

Elementary and High School Enrollment Growth



Budget and Policy Implications. These enrollment trends have significant budgetary and policy implications for issues such as CSR, teacher demand, and facilities investment. A few of the major implications include:

- A 1 percent increase in K-12 enrollment requires an increase of approximately $450 million to maintain annual K-12 expenditures per pupil.

- As enrollment growth slows, a smaller share of the state's new revenues will be consumed by costs associated with funding additional pupils. The Legislature will then have the option of devoting these revenues to increasing per pupil spending or to other budget priorities.
- In the near term, programs aimed at elementary grades (such as K-3 CSR) will face reduced cost pressures related to enrollment. Programs aimed at high school grades will face increased cost pressures. This could present cost challenges for many unified school districts because per pupil costs of educating high school students tend to be higher than for elementary school students.
- Because of declining enrollment provisions in state law, more school districts—especially elementary school districts—will benefit from the one-year hold harmless provision in current law, increasing state costs per pupil.
- Despite the general downward trend in enrollment growth, significant variation is expected to occur across counties. For example, between 2004-05 and 2013-14, Los Angeles' enrollment is expected to decline almost 120,000 students (a 7 percent decline), whereas Riverside's enrollment is expected to increase by over 90,000 students (a 25 percent increase).
- The percent of Hispanic students will continue to increase. In 1995-96, 39 percent of students were Hispanic. By 2013-14, 54 percent will be Hispanic. The state will need to increase its focus on the language development skills of the state's English learner population.

BUDGET ISSUES

K-12 Education

SCHOOL DISTRICT FINANCIAL CONDITION

School districts face a number of difficult financial challenges in 2005-06 and beyond, including falling revenues due to declining enrollment and long-term costs for retiree benefits.

School districts have not been immune to budget cuts during this current fiscal crisis. Midyear cuts reduced funding for categorical programs and mandates in 2002-03. In 2003-04, no cost-of-living adjustments (COLAs) were provided and the state actually reduced district general purpose funding by a small amount. In 2004-05, schools received a COLA and a partial repayment of the cut in general purpose funds. The 2005-06 proposed budget promises another COLA and partial general purpose funding restoration.

During this time, a significant number of districts also began losing students due to demographic changes in the K-12 population. As enrollment fell several years in a row, so did state funding for these districts. Recent data suggest that 40 percent of districts statewide experienced declining enrollment for both 2002-03 and 2003-04. The decline in district enrollments combined with modest increases in state funding over this period translated into flat or declining revenues for many districts.

Looking to 2005-06, school districts face a number of revenue and cost pressures (see Figure 1, next page). Declining enrollment will continue to affect many districts. In fact, our projection of K-12 enrollments shows very little growth during the next five years. These losses reduce district revenues, requiring budget cuts at the local level.

The figure also lists three other types of financial pressures facing districts. Districts must restore, beginning in 2005-06, unrestricted reserves and maintenance spending to levels required by the state. As part of the 2003-04 budget plan, the state allowed districts to reduce general purpose reserve levels, cut spending on maintenance, and transfer available categorical fund balances at the end of 2002-03 into the districts' general fund. In 2005-06, districts must restore reserve levels and maintenance spending to the state-required levels. For districts that used the full flexibility afforded by the state, the cost of restoring reserves and maintenance spending equals about 2.5 percent of local budgets.

Figure 1

Financial Pressures Facing School Districts

2005-06

✓ **Adjust to Lower Revenues From Declining Enrollment**

✓ **Restore State-Required Funding Levels**
- Unrestricted reserves.
- Long-term maintenance.

✓ **Restore Operating Budget Balance**
- Borrowing from self-insurance reserves.
- Using one-time funds for ongoing expenses.

✓ **Absorb Higher Costs**
- Liability for retiree health benefits.
- Health insurance premiums.
- Employee wage increases.

Based on our discussions with district and county fiscal officers, districts also are under pressure to get their operating budgets back in balance. In many cases, they have taken one-time actions to help finance spending that is above ongoing revenues. The figure shows some of the more common practices, including borrowing from other district funds (such as self-insurance funds) and using one-time funds for ongoing expenses. All of these practices can be justified as reasonable short-term actions if they are accompanied by a plan for ending the practice. Failure to end them—

that is, by aligning ongoing revenues and expenditures and repaying internal borrowing—often results in a bigger problem as time goes on.

Districts also face several significant cost increases in the budget year. Health insurance costs have been increasing at annual rates above 10 percent over the past several years, affecting the cost of current employees and retirees whose health benefits are covered by districts. Salary costs are also a concern; since employee salaries comprise the largest component of local budgets, any increase in wages has a major impact on district finances.

Districts With Financial Problems Increasing. Preliminary information for 2004-05 suggests an increasing number of districts need to take steps to remain financially healthy. The state maintains a fiscal oversight process (known as the AB 1200 process) that makes county offices of education (COEs) responsible for reviewing school district budgets and assisting districts that are experiencing financial difficulties. Twice each year, COEs certify the fiscal condition of districts—that is, they report the likelihood that each district will be able to meet its financial obligations over the next three fiscal years. The first 2004-05 reports were due to the State Department of Education (SDE) on December 15, 2004.

While these first 2004-05 reports were not available at the time this analysis was written, the Fiscal Crisis and Management Assistance Team (FCMAT) projects an increase in the number of districts given a "qualified" or "negative" certification. This team is established in state law to provide fiscal and management assistance to school districts and COEs. A qualified rating means the district may not be able to meet its financial obligations. A negative certification means the district will not be able to meet its obligations in the current or subsequent fiscal year. A negative or qualified certification initiates the development of a plan for addressing the causes of the district's financial instability.

The FCMAT projects the number of negative or qualified districts will increase in 2004-05. It expects 11 districts to receive a negative certification, up from 9 last spring. In addition, it expects 44 districts to receive a qualified certification, an increase from 36 in spring 2004. In addition to these districts, we know of several districts that made midyear reductions in order to avoid a negative or qualified certification. While the number of districts with a negative or qualified certification is still relatively small, the increase reflects the fiscal pressures districts face. We think the pressure is likely to mount in spring 2005, when districts begin their budget planning for next year in earnest.

In the following sections, we recommend the Legislature address two financial pressures faced by districts. The first is the problem of long-term retiree health benefits. Many districts face large liabilities for future retiree health care costs. We think the state needs to begin a process for recogniz-

ing these costs and requiring districts to develop plans for addressing long-term liabilities for these benefits.

The second issue is declining enrollment. Because statewide growth in the K-12 population is likely to be stagnant for the next five years, declining enrollment is likely to affect the majority of districts in the state. We suggest the Legislature consider an alternate declining enrollment funding formula that would give districts more time to adjust to the financial impact of fewer students.

RETIREE BENEFITS POSE LONG-TERM CHALLENGE

We recommend the Legislature require county offices of education and school districts to take steps addressing districts' long-term retiree health benefit liabilities.

In 2004, the Governmental Accounting Standards Board (GASB) issued a new policy describing how state and local governments (including schools and community colleges) must account for nonpension retirement benefits such as health insurance. For K-12 and community college districts, the GASB policy requires each district to include its long-term liabilities for post-retirement benefits in its annual financial statement. One component of this new liability statement is an identification of the amount that, if paid on an ongoing basis, would provide sufficient funds to pay for benefits as they come due.

In other words, GASB requires districts to account for health and other retirement benefits similarly to the way they account for pension costs. For retirement, an amount is contributed to a fund each year for each employee. Over the years, these payments are set at a level sufficient to pay for the full cost of retirement benefits for the average employee. In effect, the retirement benefits are "prefunded"—that is, their costs are provided for over the working life of the employee. (Also, contributions are set aside in a special "trust" fund so they cannot be used for any other purpose.) The new GASB policy encourages districts to pay for retiree health benefits in the same way, thereby avoiding the accumulation of large unfunded liabilities for future benefits. The GASB policy, however, does not require such annual payments or public agencies to act on any past liabilities—it only requires the reporting of such liabilities. We are not aware of any school district that has prefunded its retiree health benefits. Instead, these costs are paid out of districts' operating budgets as they are incurred by retirees.

Some District Liabilities Are Huge

The liabilities some districts face are very large—so large they potentially threaten the district's ability to operate in the future. For instance, Los Angeles Unified School District (LAUSD) estimates its current "actuarial liability" for retiree health benefits at $5 billion. This figure is the amount the district would need to place in an interest-bearing account in 2005 to pay for these benefits over time. To provide a sense of the size of this liability, the $5 billion estimate for LAUSD is the equivalent of about 80 percent of the district's general purpose annual operating budget. Other districts face a similar problem. Fresno Unified estimates its liability at $1.1 billion—almost twice its annual budget. The cost for both districts is very high because each provides lifetime health benefits to retirees.

While these costs are not yet at a stage that will seriously erode the district's ability to function, both districts are experiencing rapidly increasing annual costs for these benefits. In Los Angeles, for instance, the district budget includes about $170 million for retiree health benefits in 2004-05. The district estimates the annual cost of these benefits will grow to about $265 million by 2010 and $360 million by 2015. The district would have to add $500 million to the budget—about 8 percent of its overall budget—starting next year and continuing for the next 30 years to pay off its unfunded liabilities and prefund future retiree health benefits.

Weak District Incentives to Face Liabilities. Districts do not have much incentive to address this problem. In the short run, the need to set aside funds for this obligation would only complicate budgeting as it would reduce funding available for other local priorities. Furthermore, any financial crisis resulting from these liabilities may be years or decades away. For these reasons—and especially given the number of financial pressures districts currently face—districts will be reluctant to take the needed steps to address this problem. There is one way, however, that the new GASB policy may prod districts to address these liabilities. Large liabilities could affect a district's bond rating and increase the costs of borrowing. Pressure from credit agencies, therefore, represents one of the few short-term incentives for addressing retiree costs that will result from the new policy.

Liabilities Could Be Even Larger. Districts may also have an incentive to understate their actual liabilities. The GASB policy left many details of the actuarial calculation of liabilities to local agencies. While this makes sense given the range of state and local agencies affected by this policy, it also allows local agencies the ability to make assumptions that minimize their apparent liability. Small changes in the underlying assumptions used in these studies have a major impact on the results. For instance, the LAUSD's actuarial study determined a $5 billion actuarial liability using "best estimate" assumptions. This figure increased to $7 billion if all cur-

rent and retired employees were included in the calculation instead of retirees plus those employees whose health retirement benefits are vested. Moreover, the figure grew to $11 billion if the long-term interest rate the district would earn on its annual contributions was reduced from 6 percent to 4 percent. Thus, we think it is in the state's interest to ensure districts use reasonable assumptions in their actuarial studies.

Require District Plans for Addressing Liabilities

The size of retiree health benefit liabilities is so large that unless steps are soon taken to address the issue, it seems likely that districts will eventually seek financial assistance from the state. As a first step, we think the Legislature needs to establish a process for ensuring that districts identify and address the liabilities created by post-retirement benefits. Currently, there is no state or local process for collecting information on the financial liabilities districts presently face or whether districts have a plan for addressing these liabilities. In addition, the long-term liabilities of retiree benefits are not part of the AB 1200 district fiscal review process. As a result, COEs are not always aware of which districts provide retiree benefits or the magnitude of the costs for those benefits.

About 150 districts present the most serious problem. Of these, 70 districts provide lifetime health benefits to retirees and represent the districts that probably have the most serious fiscal problem. Another 80 districts provide health benefits from the time an employee retirees to a specific age—most commonly age 70. These districts also may face significant fiscal challenges.

To address this problem we recommend the Legislature enact legislation to achieve the following:

Require districts to provide COEs by October 1, 2005, with a copy of any actuarial study of its retiree benefits liability. Until the GASB issued its new policy, the state required districts to assess their outstanding liabilities for certain post-retirement benefits every three years. The COEs should receive a copy of these studies so they are informed of the size of any existing liabilities.

Require districts to provide COEs by June 30, 2006, with a plan for addressing retiree benefits liabilities. The GASB policy requires large local agencies to make public data on retiree benefit liabilities beginning in 2007. Because of the prior state requirement and the new GASB policy, most districts with significant liabilities are aware of the problem. We think encouraging districts to develop a plan for addressing these long-term liabilities as soon as possible is in the districts' and state's interest. These plans could address district liabilities in several ways including prefunding

benefits, restructuring or eliminating benefits for new employees, and partial prefunding that protects districts during years when benefit costs are high.

Modify AB 1200 to require COEs to review whether districts' funding of long-term liabilities adequately cover likely costs. This change would have two elements. First, COEs would assess whether districts are following their plan for addressing the long-term liabilities for retiree benefits. This review would occur each time districts revise their actuarial estimate of liability. Second, SDE would add to existing AB 1200 regulations new guidelines for the development of future actuarial studies of retiree benefits. This would ensure that district studies used reasonable assumptions in their assessment of local liability.

Require SDE to report to the fiscal committees by December 15, 2005 on the size of retiree health liabilities in the 150 districts that provide the most extensive benefits. This would inform the Legislature's discussion about any future steps that may be needed to deal with this problem.

CREATE A NEW DECLINING ENROLLMENT OPTION

We recommend the Legislature adopt legislation to establish an alternate declining enrollment formula that would give districts more time to adjust to the financial impact of fewer students. Our recommendation would create no additional state costs in 2005-06 but would probably result in a 2006-07 cost of $80 million to $100 million. This cost would grow modestly over time until districts reach their equalization targets.

Each district is assigned a unique revenue limit, or per-pupil funding rate. Revenue limits are comprised of two main parts. First, each district receives a *base* revenue limit, which accounts for 95 percent of the amount of revenue limit funds provided to districts. Base revenue limits are determined largely by historical factors, including a district's spending levels at the time Proposition 13 was approved by voters in 1978. Since then, the Legislature has added "equalization" funding to revenue limits several times to reduce differences among districts in base revenue limits.

Second, the other 5 percent of revenue limit funding is for ten "add-on" programs. These add-ons, for instance, include funding for minimum teacher salary incentive programs, the Unemployment Insurance program, and longer school day and year incentives. Since districts receive significantly different amounts from these adjustments, the add-on programs introduce a second factor contributing to differences in district revenue limits among districts.

In our past reports on K-12 finance, we have recommended the Legislature address these two problems. In our view, most of the differences in

revenue limit funding levels among districts have no analytical basis. Instead, most of the variation stems from decisions made during the 1970s and 1980s that have little policy relevance today. To correct these problems, we have recommended the Legislature make progress in equalizing revenue limits. We have also recommended consolidating most of the add-on funding into base revenue limits so that the Legislature could equalize the amount of general purpose funds districts actually receive, not just the amounts represented by base revenue limits.

Recently, the Legislature made revenue limit equalization a funding priority. The *2004-05 Budget Act* provides $110 million for this purpose, setting the goal of equalization at the 90th percentile of all districts within each size and type. The 2005-06 budget proposal does not include any new funds to continue progress towards more uniform base funding levels.

Declining Enrollment Affects Many Districts

Another feature of the revenue limit system is known as the "declining enrollment adjustment." This adjustment gives districts a one-year reprieve from funding reductions caused by declining attendance. Technically, the adjustment allows districts to claim the higher of the current or prior year's average daily attendance (ADA). Since, in declining enrollment districts, the prior-year total exceeds the current-year ADA, the adjustment maintains a district's previous year's funding level (increased by a COLA).

A fall in the number of elementary school age students in California is creating declining enrollment in many school districts. In 2003-04, elementary and unified districts reported that 13,800 fewer students were enrolled in grades K-6 than in the previous year. This *net* decline is relatively small—only a 0.4 percent reduction in enrollment. However, the net figure masks the fact that the losses are not uniform across the state.

Forty Percent of Districts Are Declining. The most recent data available show that 412 districts (or 42 percent) experienced declining enrollments in 2003-04. The data suggest that attendance in most of these districts fell in both 2002-03 and 2003-04. The declining enrollment adjustment cost the state about $130 million in 2003-04.

The typical declining enrollment district lost 1.7 percent of its previous year's ADA. About one-fifth of districts reporting declines, however, lost more than 5 percent of their students. Districts of all sizes are experiencing falling enrollment. Most are small—about half enroll fewer than 1,000 students. Thirty-nine of the declining districts, however, are large, enrolling more than 10,000 students.

Declining revenues associated with falling enrollments create difficult fiscal issues for districts. Falling enrollments mean that districts need fewer

teachers. As districts stop hiring new teachers, the average teacher salary grows (simply because districts have more experienced, higher wage staff whose salaries are not offset by newer, lower-wage staff), which requires additional cost reductions. If the decline is large or continues over an extended period of time, districts typically need to close schools.

School fiscal experts advise that districts should accommodate declining enrollment by making cost adjustments *before* the decline actually occurs. Often, enrollment trends are known in advance. In some cases, however, falling enrollments can occur relatively quickly. Enrollment increases in one year may be followed by sharp declines in the next—with no transition year in between. In these instances, or when districts fail to adequately plan for sustained reductions in enrollment, the financial consequences can be severe.

Our fall 2004 estimate of future K-12 attendance growth projected a continuing decline in the growth rate of the student population. By 2008-09, we estimate no growth in ADA statewide. As a result, we expect declining enrollment will play an important role in district finance for several years. Many districts that are currently declining will continue to lose students. A portion of districts that are still growing will become declining enrollment districts in the near future.

Option: Permanently Increase Revenue Limits

For districts that face significant long-term reductions in ADA, the existing declining enrollment adjustment may not provide a sufficient amount of time for districts to adjust to the fiscal consequences of falling enrollments. In the first year of decline, the adjustment maintains the prior-year funding level (plus a COLA). Beginning in the second year of ADA reductions, however, districts lose revenue limit funding commensurate with the size of the ADA decline in the previous year. While the declining enrollment adjustment actually provides a series of one-time financial benefits to districts in this situation, the current formula still requires districts to ratchet down their annual spending as enrollment falls.

There are two basic ways the Legislature could help districts facing multiyear enrollment declines. First, it could expand the existing temporary protection, such as extending the funding adjustment to two years. This would provide districts with an additional year of constant funding before the impact of falling attendance reduced total revenue limit funding.

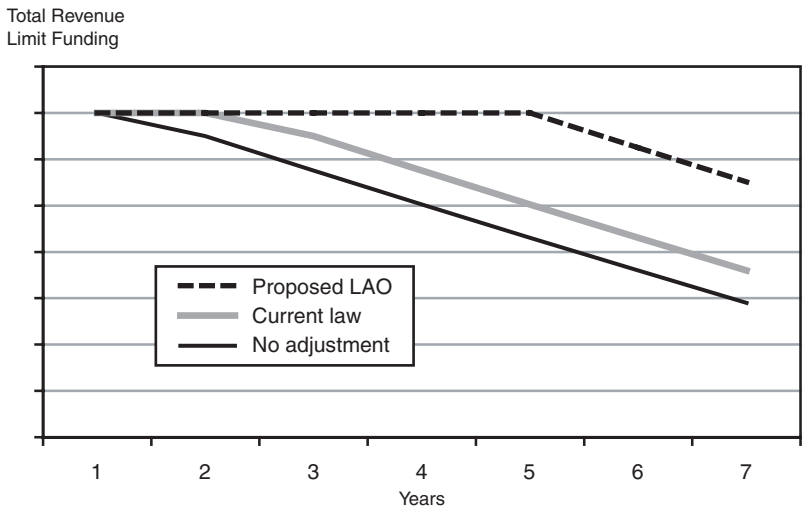
The second way is to provide a more lasting adjustment. We propose an option that increases revenue limits by an amount sufficient to offset the enrollment decline. This option would allow a district to maintain its prior-year level of funding over time. By allowing this option to be used only by

districts which are *below* the state's equalization target, it would have the dual benefit of helping the state make progress toward its equalization goal.

How Would This Option Work? Figure 2 illustrates the difference in the impact of the current adjustment and our alternative adjustment in a hypothetical district that experiences falling attendance over many years. The dark line shows how total revenue limit funding would decline without *any* funding adjustment; revenues would fall with enrollment. The existing declining enrollment adjustment is shown as a parallel line to the "no adjustment" scenario. The current adjustment delays the revenue reduction of falling attendance by one year. As a result, after one year of holding the district harmless from the effect of falling enrollment, the district experiences annual cuts in revenues equal to the previous year's reduction in attendance.

Figure 2

Funding Options for Districts With Declining Enrollment[a]



[a]Assumes district experiences declining enrollment each year, beginning in year 2.

Our proposed declining enrollment adjustment would operate quite differently. As the figure illustrates, total revenues for the hypothetical district would stay constant for several years. During this time, the district's per-pupil revenue limit would be increased annually to offset the fall in attendance and keep total funding constant. In year five, however, the revenue limit increases cause the district to reach the state's equalization tar-

get. After that point, the district no longer qualifies for our proposed adjustment, and further enrollment declines reduce district revenues.

Proposal Helps Districts, Makes Progress Towards Equal Funding. Our proposed revenue limit increase has two main advantages over the current declining enrollment formula. First, it provides a higher level of funding protection for most districts that are losing students. This increase in a district's per-pupil revenue limit would be permanent—it would not revert back to its previous level the next year as the current ADA adjustment does. Per-pupil revenue limit adjustments would continue only until the district reaches the state's equalization target. Since almost all districts are within about 10 percent of the state's equalization target, districts experiencing significant, sustained, declines would reach the 90th percentile funding level relatively quickly.

The second advantage of our proposal is that increasing district revenue limits to the state's equalization target makes progress on another state priority—a system of uniform revenue limits. Currently, districts are required to reduce spending due to declining enrollment regardless of whether they receive less per pupil than other similar districts. By holding total funding constant from year to year, the state can make progress towards its goal of reducing these differences.

Another advantage of our proposal is that the revenue limit adjustment would occur automatically. Like the existing adjustment, our proposal would automatically increase district revenue limits to compensate for declining enrollments. The Legislature would not be required to make a specific appropriation in the budget. Funds would flow to districts as part of the existing statutory appropriation. In this way, the state would make annual progress towards a more equal system of revenue limits.

It is important to recognize our alternate adjustment has a long-term cost. Since our proposal would generate the same amount of revenue limit funding to districts in the first year as the existing adjustment, our formula would not create any additional cost in 2005-06. Beginning in 2006-07, however, our formula would provide these districts a higher level of funding. Data are not available to allow us to make a precise estimate of the cost of this formula. Depending on the number of districts in decline and the size of the declines, the cost could total between $80 million and $100 million in 2006-07. This cost probably would increase modestly each year until districts reach their equalization targets. The total possible cost of the formula, however, cannot exceed the amount of funds needed to equalize revenue limits to the 90th percentile for all districts. We calculate this amount to be about $300 million.

Add a Declining Enrollment Revenue Limit Adjustment

We recommend the Legislature adopt legislation to create a new declining enrollment revenue limit adjustment that would begin in 2005-06. As discussed earlier in this section, we are concerned by the size and number of financial pressures districts currently face. We also see enrollment declines as a statewide problem that probably will continue for some time. Based on our K-12 enrollment projections, the financial pressures associated with declining enrollment will continue for at least the next five years. Our proposal is not intended to prevent declining districts from making cost reductions warranted by a long-term fall in ADA. Instead, our formula would give districts a longer period for adjusting to the financial pressures created by falling attendance.

Our analysis also suggests another way the Legislature could help declining enrollment districts and make progress towards a more uniform funding system—providing additional equalization funding for all districts. Equalization funding would help both declining and growing districts with revenue limits below the state's equalization targets.

We also recommend two additional steps that we think should accompany this new formula, as follows.

Limit Increases to 5 Percent. As discussed above, about one-fifth of the current declining enrollment districts experienced reductions of more than 5 percent in 2002-03. Districts that sustain such large declines in student attendance need to make immediate efforts to bring costs into line with revenues. Therefore, we recommend the Legislature limit annual revenue limit increases to 5 percent. Under our proposal, a district that lost 10 percent of its ADA would be able to choose between our formula (which would provide an ongoing 5 percent increase) and the existing adjustment (which would provide a one-time 10 percent increase).

Consolidate "Add-On" Funding Into Revenue Limits. The state's equalization targets focus on differences in district base revenue limits. As noted above, however, the revenue limit add-on funds alter the distribution of revenue limit funding. As a consequence, successfully bringing all district base revenue limits to the state's equalization targets would not eliminate funding disparities introduced by the add-ons. As part of our alternate declining enrollment formula, therefore, we recommend the Legislature merge most of the add-on funds into base revenue limits and reset the equalization targets based on the consolidated amounts.

CATEGORICAL REFORM

Recent categorical reform enacted through Chapter 871, Statutes of 2004 (AB 825, Firebaugh), consolidates 26 existing programs into six block grants to take effect in 2005-06. It requires that districts and county offices of education (COEs) use the consolidated funding for the purpose of the programs subsumed in each block grant. Figure 1 (see next page) shows the programs included in the six block grants.

Chapter 871 contains several provisions pertaining to flexibility over the use of the block grant monies. The law, for instance, allows districts and COEs to transfer annually up to 15 percent of funding from four of the block grants into the other block grants or into other categorical programs. No funds, however, may be transferred out of the Pupil Retention and Teacher Credentialing block grants. The total funding a district or COE may expend for a program to which funds are transferred may not exceed 120 percent of the amount apportioned for that program in that fiscal year.

We have particular concerns about the Pupil Retention Block Grant (PRBG) and the two teacher training block grants. In the sections that follow, we discuss these concerns.

CATEGORICAL REFORM AND SUPPLEMENTAL INSTRUCTION

We recommend the Legislature adopt trailer bill language adding two supplemental instruction programs to the new Pupil Retention Block Grant along with a requirement specifying that "first call" on funds in the block grant must be for these supplemental instruction program costs.

The PRBG, one of the six block grants created by Chapter 871, consolidates 11 programs that support supplementary instruction and services for students at risk of academic failure. The budget includes $173 million for this block grant and will provide an additional $26.7 million of deferred amounts in a trailer bill.

Figure 1

Six New Block Grants

Pupil Retention Block Grant—$172.9 Million

- "Core" programs supplemental instruction.

- Drop Out Prevention and Recovery.
- Reading, writing, math supplemental instruction.
- Tenth Grade Counseling.
- High-Risk Youth Education and Public Safety.
- Opportunity Programs.
- Los Angeles Unified At-Risk Youth Program.
- Intensive reading supplemental instruction.[a]
- Algebra academies supplemental instruction.[a]
- Early Intervention for School Success.[a]

School Safety Consolidated Competitive Grant—$16.3 Million

- Safe school planning and partnership mini-grants.
- School community policing.
- Gang Risk Intervention Program.
- Safety plans for new schools.
- School community violence prevention.
- Conflict resolution.

Teacher Credentialing Block Grant—$83.9 Million

- Beginning Teacher Support and Assessment program.

Professional Development Block Grant—$248.6 Million

- Staff Development Buyout Days.
- Comprehensive Teacher Education Institutes.
- College Readiness Program.
- Teaching as a Priority Block Grant.[b]

Targeted Instructional Improvement Block Grant—$874.5 Million

- Targeted Instructional Improvement Grant Program.
- Supplemental Grants.

School and Library Improvement Block Grant—$421.6—Million

- School library materials.
- School Improvement Program.

[a] These programs were not funded in 2004-05, but school districts are allowed to use new block grant monies for their purposes.

[b] Program defunded as of 2003-04, but school districts are allowed to use new block grant monies for its purposes (teacher recruitment and retention).

Figure 2 shows the programs that are consolidated in the block grant. More than one-half of the funding comes from the "core" supplemental instruction program. Other programs included in the block grant support various other supplemental instruction programs and interventions for at-risk youth. Three programs, intensive reading supplemental instruction, algebra academies supplemental instruction, and Early Intervention for School Success, were not funded in 2004-05 and therefore do not add to the total amount in the block grant for 2005-06.

a Amount added to block grant based on prior-year funding.

b Not funded in 2004-05.

c Deferred amounts will be provided in a separate trailer bill.

Complex "Holdback" for At-Risk Instructional Programs

Chapter 871 also creates a unique funding interaction between the PRBG and two programs for supplemental instruction that are *not* included in the block grant. These two programs provide extra help to students in grades 7 through 12 who are at risk of failing the California High School Exit Exam and students in grades 2 through 9 who have been recommended for retention. The 2005-06 budget proposes $165 million for the grades 7 through 12 program and $40 million for the grades 2 through 9 program. State law, however, entitles districts to full reimbursement for the number of instructional hours provided for at-risk students through the two supplemental instruction programs.

Chapter 871 establishes the following process to create a funding set aside for any unfunded costs of the two supplemental instruction programs:

- The act directs the State Department of Education (SDE) to allocate 75 percent of the block grant to districts.
- The other 25 percent will be held back until the required supplemental instruction has been fully funded.
- If the 25 percent holdback proves insufficient to cover the remaining costs of the additional supplemental instruction programs, the State Controller will transfer any amounts necessary from the current budget or subsequent budgets for the PRBG to cover the deficits.
- Any remaining block grant funds left from the 25 percent holdback will be distributed to districts.

Mandate Ruling Creates Another Cost Pressure

Recent action by the Commission on State Mandates (CSM) will increase the cost of the supplemental instruction program for students in grades 2 through 9. Current law requires districts to develop policies for retaining low-achieving students in grade. Students who are identified for retention under this policy must be offered supplemental instruction. The CSM found this state law to constitute a reimbursable state-mandated program.

The commission's findings are likely to substantially increase the cost of the grades 2 through 9 supplemental instruction program. In adopting the reimbursement methodology for the mandate (through the "parameters and guidelines"), CSM provided districts substantial latitude in determining the level of activities and services to comply with the state's mandate for the program. For example, the parameters and guidelines do not stipulate the allowed teacher-pupil ratios, number of hours of supplemental instruction, length of intervention, or proportions of the districts' students eligible to receive these services. While CSM's current estimate of the

mandate's cost is low, districts are likely to adapt their service models to provide more costly instruction to take advantage of the uncapped funding. As a result, we think the cost is likely to grow substantially in the future—possibly into the tens of millions of dollars annually.

Block Grant Faces Implementation Problems

While the intent behind the holdback—to contain the statewide costs of the two supplemental instruction programs—has merit, it renders the PRBG unworkable from a district perspective. In addition, the holdback does nothing to alter district incentives that could significantly increase the cost of the required supplemental instruction. We describe these potential problems below.

Block Grant Robs Peter to Pay Paul. As currently structured, the holdback provision of the block grant does not encourage districts to contain the costs of the two supplemental instruction programs. Instead, Chapter 871 would pay for increased district costs for supplemental instruction by redirecting block grant funds away from other districts. As a result, districts have little incentive to contain the costs of the supplemental instruction programs.

Timing Problems Create Budget Uncertainties for Districts. Districts' efforts to plan and implement programs using the new block grant will be constrained by the timing of the 25 percent holdback provision. Current apportionment practices at SDE suggest that the department will not allocate the 25 percent holdback for at least two years after the close of the fiscal year in order to tally the final cost of the two instructional programs. As a result, districts will either have to fund programs before they know whether state dollars will be provided or reduce services to students.

Funding Inequities Among Districts May Result. Claims for the supplemental instruction programs are currently concentrated in relatively few districts. Our review shows that only 92 districts have filed any claims for the two instructional programs. As a result, these districts would likely receive funding for supplemental instruction through the holdback provision of Chapter 871. Districts that do not submit claims for the two programs may be disadvantaged, as their 25 percent holdbacks are used to fund the other districts' mandate claims. As a result, the holdback provision may increase funding inequities among districts.

Add the Required Supplemental Instruction Programs To the Block Grant

As described above, the holdback provision results in many problems. To address these concerns, we recommend the Legislature revise the struc-

ture of the PRBG to take advantage of the strengths of a block grant in encouraging districts to control the cost of the supplemental instruction programs. The current structure creates the wrong incentives for districts and makes administration of the fund problematic. Instead, we recommend the Legislature give districts freedom over the use of a fixed level of funding for *all* pupil retention and promotion programs. With this change, the state would create strong local incentives to promote the efficient and locally appropriate use of those funds.

Specifically, we recommend the Legislature:

- Adopt trailer bill language to eliminate the holdback provisions from the PRBG.
- Consolidate the two supplemental instruction programs into the new block grant. This would increase the amount in the block grant by $205 million in 2005-06 (plus $63 million in deferred payments).
- Add language in the budget bill and trailer bill to require that first call on the PRBG funds must be for all costs—including any mandated costs—of the two instructional programs. We also recommend the Legislature add trailer bill language that limits the hourly reimbursement rate under the grades 2 through 9 instructional program to the amount provided in the annual budget act. Together, these two changes would significantly reduce the likelihood of any additional district claims for the two programs.

By including the required programs in the block grant, our recommendation would require districts to determine how best to use funds in the PRBG. Consequently, districts would allocate the block grant resources among the various intervention programs. We think this would greatly strengthen local incentives for cost containment because any "excess" costs for the two programs would reduce the amount of block grant funds available for other programs funded from the grant. It also would eliminate the problem of the two-year delay in knowing the amount of block grant funds available to each districts.

LINKING TEACHING WITH LEARNING

For the last several years, we have expressed concern with the state's approach toward K-12 professional development—funding dozens of different programs that ostensibly serve the same general purpose, though they are not well coordinated and entail considerable state and local administrative burden. We also have had an overriding concern with the state's incapacity to determine the value of its various professional development investments. This incapacity is due largely to the lack of a

state-level database that tracks program outcomes. Thus, we continue to recommend that the state build a teacher database that can be linked with its student database.

Below, we review recent developments relating to the state's teacher training programs. We then describe the Governor's budget-year teacher training block grant proposal and recommend specific changes to it. Most importantly, as a condition of receiving block grant monies, we recommend participating districts be required to supply the state with the data needed to do meaningful program evaluations.

Recent Developments Enhance Flexibility, Ignore Accountability

Chapter 871 established six block grants, including two teacher training block grants—the Teacher Credentialing Block Grant and the Professional Development Block Grant—that would take effect in 2005-06 (see Figure 3 next page). The Governor's budget proposal would add three programs to the Professional Development Block Grant. The 2005-06 budget also includes trailer bill language that would nominally merge the two block grants into a new "Professional Development and Teacher Credentialing Block Grant," though the teacher credentialing component, for all practical purposes, would be preserved as a distinct program—having a separate appropriation, funding mechanism, and expenditure requirements.

Chapter 871 Provides Small Increase in Flexibility. As established by Chapter 871, the Professional Development Block Grant consolidates funding for the sizeable Staff Development Buyout Day program and two small intersegmental programs. The Professional Development Block Grant provides some additional flexibility by allowing districts to use block grant monies for teacher recruitment and retention (such as offering signing bonuses and housing subsidies) as well as professional development. It somewhat reduces this flexibility, however, by requiring districts to provide all K-6 teachers with professional development in reading language arts. The credentialing block grant is itself a misnomer. It contains only one existing program (Beginning Teacher Support and Assessment [BTSA]) and makes no changes to the associated spending requirements, thereby offering no additional flexibility.

Governor's Budget Proposal Would Provide Another Small Increase in Flexibility. As shown in Figure 1, the administration proposes to add three programs to the newly created Professional Development Block Grant—the most notable being the Peer Assistance and Review program. It also would slightly increase local flexibility by allowing block grant monies to be used for teacher training relating to the Advancement Via Individual Determination program. The block grant would not include the Mathemat-

Figure 3

Summary of Teacher Training Block Grants

Grand Total, Teacher Training Block Grants	**$361.8**

[a] The Governor's budget includes $43,000 for this program.

ics and Reading Professional Development (MRPD) program—despite it being the state's largest existing professional development program.

Neither Chapter 871 Nor Governor's Proposal Enhances Accountability. Chapter 871 is clear in its intent to: (1) "refocus attention . . . on pupil learning rather than on state spending and compliance with operational rules for categorical programs" and (2) "provide schools increased flexibility in the use of available funds in exchange for accountability." The teacher training block grants, however, neither focus directly on student learning nor enhance accountability. Similarly, the Governor's proposal contains no link between teacher training and student learning, no data requirements, and no accountability provisions. It would provide $362 million for teacher training without any meaningful mechanism for assessing whether the state investment was worthwhile and cost-effective compared to other education programs.

Enhance Flexibility and Strengthen Accountability

We recommend the Legislature approve the Governor's proposed additions to the Professional Development Block Grant with three modifications. Unlike the Governor's budget proposal, we recommend including the Mathematics and Reading Professional Development program in the block grant and excluding Teacher Dismissal Apportionments. Additionally, we recommend the Legislature require school districts, as a condition of receiving block grant monies, to provide the State Department of Education with specific teacher-level data that can be linked with student-level Standardized Testing and Reporting data.

In general, we recommend approval of the Governor's proposal to merge additional teacher training programs into the Professional Development Block Grant. We think, however, that increased local flexibility should be accompanied by enhanced accountability—particularly by strengthening the state's capacity to conduct comparative program evaluations. Below, we discuss our specific recommendations for changes to the Governor's budget proposal.

Include the MRPD Program. Established in 2001, the MRPD program provides teachers with 120 hours of highly structured, standards-aligned training—including 40 hours of initial intensive training and 80 hours of onsite follow-up support and coaching. School districts receive $2,500 per participating teacher and are required to use state-approved professional development providers. The Governor's proposal excludes this program because it "provide[s] specific training to teachers . . . during a limited time period." All professional development programs presumably provide some type of training to teachers, so it is unclear why this would be a criterion for exclusion from a teacher training block grant. Moreover, the MRPD program is to sunset on January 1, 2007, but it has been funded with ongoing Proposition 98 monies ever since its inception—indicating an intent to use the funds for an ongoing education purpose, such as professional development. Furthermore, the MRPD program is the state's largest remaining professional development program; excluding it would undermine one of the major advantages of block granting—increased flexibility. Finally, the Governor's proposal includes new budget bill language that would require *all* professional development activities to be aligned with the state's academic content standards and curriculum frameworks—what some believed to be the unique advantage of the MRPD program. For these reasons, we recommend including it in the Professional Development Block Grant.

Exclude Teacher Dismissal Monies. The administration proposes to include Teacher Dismissal Apportionments—a tiny budget item ($43,000) unrelated to professional development. As its name suggests, the program relates to teacher dismissal and suspension. If a governing school board

seeks to dismiss or suspend a permanent employee of the district, the employee may request a hearing. The board and employee each select an individual to sit on a review panel (accompanied by an administrative law judge). If the panel members need to conduct the employee review during the summer or vacation period and they determine the employee should be dismissed or suspended, then the state (rather than the school district) reimburses them for their time (at their regular rate). It is unclear why the state would fold this item into a virtually unrelated block grant. Therefore, we recommend it be excluded.

Integrated Data System Essential for Meaningful State-Level Program Evaluations and Local-Level Accountability. If the state is setting aside monies specifically for a teacher training block grant to improve teacher quality, then it needs data on teachers' professional development activities and the effect of these activities on student learning. Under the current system (with a few exceptions), school districts fill out applications, the state gives them money, and the cycle begins anew. The state, however, does not know if programs meet their objective, if teaching and learning actually are improved, if any particular program achieves better results at a lower cost, or if certain program components are especially effective in helping schools with disadvantaged students. Without this type of information, the state will not be able to determine what types of professional development enhance student learning. With this information, professional development programs can be compared, their cost-effectiveness assessed, and budget decisions refined. This is why, for the last two years, we have recommended the state establish an integrated teacher-student data system. (Please see "Enhance State's Teacher Information System," *2003-04 Analysis of the Budget Bill* [pages E-158 to E-161], and "Enhance Accountability for Improving Teacher Quality, *2004-05 Analysis of the Budget Bill* [pages E-62 to E-64].) We would also note that many education groups have expressed interest in such systems (see nearby box).

To help the state collect the data needed for program evaluation, we recommend the Legislature require school districts, as a condition of receiving Teacher Credentialing or Professional Development Block Grant monies, to provide SDE with specific teacher-level data linked with students' Standardized Testing and Reporting (STAR) scores. Specifically, participating school districts should be required to:

- Identify the type of professional development undertaken and completed by each teacher, using a unique teacher identifier.
- Complete the currently optional STAR item identifying a student's teacher, using the same unique teacher identifier that is used to track professional development activities.

As a condition of receiving Teacher Credentialing Block Grant monies, we recommend participating BTSA programs be required to:

- Share with SDE teacher-level demographic, retention, and assessment information that it already collects, using the same unique teacher identifier. (The BTSA program currently uses a consent form to collect participating teachers' social security numbers, demographic information, teaching assignments, and education backgrounds.)

In conclusion, we recommend the Legislature establish an integrated teacher-student data system that would both promote meaningful state-level program evaluations and help hold districts accountable for using block grant monies in ways that actually improve teacher quality. Importantly, this state-level system would not be intended to replace existing processes for local teacher evaluations (some of which, however, already use locally integrated teacher-student systems). It would be intended to maximize the benefits of any potential categorical reform of K-12 professional development programs.

Nine Groups Come Together to Support Statewide Teacher Data System

In September 2004, nine groups in California came together to express their interest in developing a reliable, comprehensive teacher data system. The Teacher Information System Working Group includes representatives from teacher groups (California Federation of Teachers and California Teachers Association), school administrators (Association of California School Administrators and California County Superintendents Educational Services Association), various state agencies (State Department of Education, Commission on Teacher Credentialing, California State University, and California School Information Services), and a research center (Center for the Future of Teaching and Learning). The group believes that "gaps in the collection, use, and availability of data seriously compromise efforts to plan and monitor the teacher workforce at both the state and local level." The group already has compiled a master list of teacher data currently collected by state agencies. It continues to seek opportunities and funding for making system improvements that would maximize the usefulness and reliability of teacher data.

Assure Block Grant Monies Are Tied to Need

We recommend the Legislature adopt trailer bill language to change the funding mechanism for both the Teacher Credentialing and Professional Development block grants to ensure they remain responsive to changes in districts' needs. Specifically, we recommend Teacher Credentialing block grant allocations be determined annually based on the number of first-year and second-year teachers in the district. We recommend Professional Development Block Grant allocations be determined annually based on the number of teachers in the district with three or more years of experience.

In developing the new teacher training block grants, Chapter 871 changed the existing funding mechanisms from being dynamic and need-based to locking in the current funding distribution into perpetuity. Prior to Chapter 871, BTSA monies were allocated based on the number of participating first- and second-year teachers. Thus, it targeted funds to hard-to-staff schools with high teacher turnover as well as to growing schools with large numbers of first- and second-year teachers. Moreover, it annually adjusted districts' allocations in response to changes in staffing needs. Although less need-based, the Staff Development Buyout Day program was linked to the number of teachers attending professional development workshops. It too adjusted districts' allocations annually based on changes in the number of teachers receiving training.

Chapter 871 Severs Link to Need. By comparison, both of the new block grants lock in place the 2005-06 funding distributions and thereafter adjust them for inflation and growth in average daily attendance. Funding, therefore, will no longer be responsive to districts' staffing needs. Instead, they will create new funding inequities. Those areas most needing additional funding—those serving additional beginning teachers and those fastest growing—virtually are assured of *not* receiving it.

Re-Establish Link Between Funding and Need. We recommend re-establishing the link between districts' funding allocations and their staffing needs. Specifically, we recommend that districts' allocations for the credential and professional development block grants be made annually based on the number of beginning and veteran teachers, respectively. This will ensure that funding allocations remain dynamic and responsive to changing needs—providing more funding to those districts that most need it.

SPECIAL EDUCATION

In 2003-04, 682,000 students age 22 and under were enrolled in special education programs in California, accounting for about 11 percent of all K-12 students. Special education is administered through a regional planning system consisting of Special Education Local Plan Areas (SELPAs). In 2003-04, there were 116 SELPAs.

Figure 1 displays the amounts proposed for special education in 2004-05 and 2005-06. The Governor's budget proposes total expenditures of $4.4 billion for special education in 2005-06, an increase of $215 million, or 5.1 percent. Under this proposal, General Fund support for special education would increase by $135 million or 4.9 percent. The budget proposes sufficient funding to accommodate a projected 0.79 percent increase in the number of students in the state, a 3.93 percent cost-of-living adjustment (COLA), and an augmentation of $25 million to base SELPA funding levels.

Figure 1

Special Education Funding

(Dollars in Millions)

			Change	
	2004-05	2005-06	Amount	Percent
General Fund	$2,756.7	$2,891.3	$134.6	4.9%
Local property taxes	332.6	347.9	15.3	4.6
Federal funds	1,046.2	1,110.9	64.7	6.2
Totals	**$4,135.5**	**$4,350.1**	**$214.6**	**5.1%**

Our review of the 2005-06 proposed budget identifies several major issues:

- ***Technical Budgeting Issues.*** There are two significant technical issues with the proposed special education budget. Addressing these

issues would increase the Legislature's fiscal flexibility in the budget year.

- ***Mental Health Services.*** The Governor's proposal does not provide a long-term solution regarding the provision of mental health services for special education students.
- ***Incidence Adjustment.*** The budget includes no proposal for updating the special education incidence adjustment, despite the fact the adjustments are based on data that is now eight years old.

We discuss these issues in detail below.

TECHNICAL ISSUES OFFER SAVINGS

The state's special education budget is supported from three sources: local property tax collections, federal special education funds, and the state General Fund. Together, the state uses these three sources to maintain a system of relatively uniform per-pupil SELPA funding levels.

The Department of Finance (DOF) developed the 2005-06 special education budget by adding funding for the anticipated level of growth in the student population in 2005-06, a COLA, and other adjustments to the 2004-05 special education budget. As part of that process, DOF revised the 2003-04 and 2004-05 figures to reflect more recent estimates of program expenditures and growth in the student population. These base adjustments are important, as they can have a significant effect on the 2005-06 budget proposal.

We have identified two major technical budgeting issues with the 2005-06 special education budget that could reduce program costs by $61 million. First, we propose an alternative method for calculating the amount of federal funds that can be counted as an offset to the General Fund. Second, we identify technical problems in the special education budget that would, if corrected, generate significant General Fund savings.

Revise Federal Supplanting Calculation

We recommend the Legislature adopt an alternative calculation for complying with new federal supplanting rules. This recommendation would reduce General Fund special education costs in 2005-06 by $9.9 million.

Congress reauthorized the federal special education law in 2004. One new provision in the act prohibits states from using federal funds to pay for "state-law mandated funding obligations to local educational agencies, including funding based on student attendance or enrollment, or in-

flation." It appears the new language is designed to prohibit states from using federal funds to supplant state funds for normal budget increases such as growth and COLA.

California has used federal special education funds in ways that the new federal law appears to prohibit. The *2004-05 Budget Act,* for instance, used $124 million in new federal funds to pay for growth and COLA for the entire special education budget—including the state's share. Using federal funds in this way reduced the state's cost of special education. It appears, however, that the new federal law prohibits this from occurring in the future.

The budget proposes to comply with the new federal restriction, proposing to use $38.1 million of the increase in federal funds to offset growth and COLA and $24.8 million to augment the base program. We think the budget's new supplanting calculation would not work, for two reasons. First, despite the administration's intent to comply with the new federal law, the proposal uses a portion of the federal funds to pay for state growth adjustments—something specifically prohibited by the new federal rule. Of the $38.1 million in new federal funds the budget would use to pay for prior-year adjustments, we identified $5 million in budget increases that fall into the category of "state-law mandated funding obligations." Second, we think the calculation would disadvantage the state in 2006-07 and beyond. The budget's proposed new supplanting formula works for only one year—in future years the state likely would have to pass through to SELPAs all new federal funds in the form of program augmentations.

We think there are simpler options for complying with the new federal supplanting rules that would continue to allow the state to satisfy the new law but also not disadvantage the state over the longer run. Our proposal accomplishes this goal by separating the state and federal funding for budgeting purposes. The state would be responsible for providing growth and COLA adjustments on the portion of special education funds supported by state and property tax funds. The federal government would provide funding for growth and COLA increases on the portion support by federal funds. Any increase in federal funds above the level needed for growth and COLA would be used for statewide program augmentations. Any federal increase below that level would mean that SELPAs would not be fully compensated for the effects of growth and inflation. Under this proposal, only $14.9 million must be passed through to increase special education funding—$9.9 million less than proposed in the Governor's budget.

In sum, we recommend the Legislature adopt our alternative methodology for budgeting special education federal funds at the state level. Our proposal provides a simpler, more straightforward way to comply with the intent of the new federal law than the calculation proposed in the budget.

In addition, our methodology would generate $10 million in General Fund savings. The purpose of our proposal, however, is to comply with the new federal law while protecting the state's system of local grants—not to generate short-term savings. Below, we discuss our proposal for the use of the $9.9 million and the $14.9 million in "pass-through" funds.

Significant Technical Problems With Budget Proposal

We recommend the Legislature make two technical corrections in the proposed special education budget that will free more than $36 million in funds for other special education and Proposition 98 programs.

As noted above, the DOF revised the 2003-04 and 2004-05 estimates of special education spending in the development of the 2005-06 proposed budget. Our review found two major technical problems with the adjustments to the 2003-04 and 2004-05 budgets:

- ***Lower Estimated 2003-04 Growth.*** The Governor's budget fails to recognize $16.1 million in savings resulting from the revised estimate of student growth in 2003-04, which is significantly lower than assumed in the *2003-04 Budget Act*. Because of federal "maintenance of effort" rules, these funds must be spent on special education.
- ***Overbudgeting the New Licensed Children's Institution (LCI) Formula.*** The 2005-06 budget inadvertently assumes a $19.2 million increase in 2004-05 special education costs of students residing in LCIs compared to the level included in the *2004-05 Budget Act*. This technical error results in overbudgeting the LCI formula by $20.2 million in the 2005-06 budget.

We recommend the Legislature correct these technical errors, for a total savings of $36.3 million.

Use Funds to Meet Special Education and Other Priorities

We recommend the Legislature spend $61 million resulting from our recommendations for various special education programs in 2004-05 and 2005-06.

Figure 2 summarizes the impact of the technical budgeting recommendations made above. The figure includes the $24.8 million in funds discussed in our recommendation for an alternative supplanting calculation. It also contains the $36.3 million in savings from our recommendation to correct two technical errors in the special education budget. This brings total funds available from our recommendations to $61.1 million.

Figure 2

LAO Savings and Spending Recommendations Special Education

2005-06
(In Millions)

Sources	Total
Augmentation to the LCI[a] formula	$20.2
Lower 2003-04 growth in K-12 ADA[b]	16.1
LAO supplanting proposal	24.8
Total	**$61.1**
Uses	
Mental health shift	$42.8
LCI[a] formula correction	4.4
One-time block grant	13.9
Total	**$61.1**

[a] Licensed children's institutions.
[b] Average daily attendance.

Figure 2 also shows our suggested uses of the $61 million. The 2003-04 savings are one-time in nature and, therefore, should be spent on one-time activities. The remaining funds represent 2005-06 funds that may be used for any special education purpose. Our proposal also is shaped by issues raised by the Governor's proposed special education budget for 2005-06. Specifically, we recommend the Legislature use the savings as follows:

- $42.8 million to increase support for mental health services for special education students. This would use most of the ongoing funding that is available from our savings recommendations. We discuss this issue further below.
- $4.4 million ($2.2 million in 2004-05 and $2.2 million in 2005-06) to add to the LCI formula a class of group homes that was inadvertently excluded by the enabling legislation. We discuss this issue further below.
- $13.9 million in 2003-04 funds would be distributed to SELPAs in a per-pupil block grant that could be used for any local purpose. Federal MOE rules require the state to spend these funds for spe-

cial education. By using the funds as a one-time block grant, the Legislature would honor the federal rules but not permanently increase special education funding.

MAKE MENTAL HEALTH SHIFT PERMANENT

We recommend the Legislature eliminate two county mental health mandates. We further recommend the Legislature provide a total of $143 million in state and federal funds to support Special Education Local Plan Areas costs of providing mental health services to special education students.

Federal law requires schools to provide mental health services to help special education students benefit from educational services. In practice, mental health services for this population range from short-term counseling on an outpatient basis to long-term psychiatric therapy for students in residential care facilities.

In the early 1980s, the state shifted responsibility for providing more intensive mental health services from school districts to county mental health agencies. This shift created a reimbursable state-mandated program that, by 2002-03, resulted in annual county claims of $123 million. This mandated program is often referred to as the "AB 3632" program, in reference to its enabling legislation. In 1996, the state also shifted responsibility for mental health services of students placed in out-of-state residential facilities to county mental health agencies. Claims for these out-of-state students totaled $22 million in 2002-03, resulting in total claims for the two mandates of $145 million.

As with most other education mandates, the state deferred payment of the two mandates in the *2004-05 Budget Act*—that is, the mandate was kept in place but no direct county reimbursement was provided in the Department of Mental Health's budget. To help pay for these mental health services, however, the special education budget included $69 million in federal funds for distribution to county mental health agencies. These funds provide partial state reimbursement for county AB 3632 costs. An additional $31 million from the General Fund was appropriated to support mental health services provided by SELPAs.

Budget Would Suspend Mandates

The Governor's budget proposes to suspend the two mandates in 2005-06. The passage of Proposition 1A in fall 2004 requires the state to either fund or suspend local government mandates each year. Suspending the mandate frees local government from the service requirement for 2005-06.

The budget proposes no county funding for AB 3632 or out-of-state students. Because state law would not require county mental health agencies to provide services to special education students in 2005-06, responsibility for services would fall to SELPAs and school districts. (This is because federal law requires these services to be provided to special education students.) The special education budget proposes to continue the 2004-05 funding set-asides for mental health services ($69 million in federal funds for counties and $31 million from the General Fund for SELPAs). The administration has not stated its long-term intent for funding the two mental health mandates.

We recommend the Legislature permanently assign this program responsibility to SELPAs, for several reasons. A one-year suspension, as proposed in the Governor's budget, would place SELPAs in a form of limbo: Does the proposal represent a permanent shift of responsibilities to education or would the mandates be funded in the future (thereby shifting program responsibility back to county mental health agencies)? A one-year suspension, therefore, would inhibit SELPAs from making the significant local administrative changes they would need to make if the shift in responsibilities is intended to be permanent.

In addition, the proposal muddies what have been clear lines of local responsibility. By continuing to funnel $69 million in special education funding to county mental health agencies, for instance, the budget proposal gives SELPAs financial responsibility for services, but does not give them administrative or policy control related to the services provided.

Finally, we recommend the Legislature make the shift of responsibility permanent because we are convinced that, by assigning full responsibility for these services to education, the state would foster a more efficient and effective service delivery system of mental health services to students. We discuss these issues further below.

Education Would Have Incentives to Provide Services Efficiently. In our view, the shift in responsibilities would result in a more efficient system primarily because educators would have strong incentives to be a "prudent purchaser" of services. Under the existing reimbursement system, educators and county mental health agencies have incentives to *increase* the state's mandated costs. Educators have the incentive to shift all mental health costs to the county agencies—including the cost of services that remained education's responsibility after the passage of AB 3632. County mental health agencies have the incentive to include all mental health services needed by students under the mandate—even if they are not required under federal law. In addition, by reimbursing 100 percent of a county's program costs, the system also reduces pressure on county agencies to limit the unit cost of services.

Recent audits by the State Controller's Office (SCO) confirms our view that the mandate reimbursement system encourages counties to inflate the actual cost of providing required mental health services to special education students. For instance, an audit of Los Angeles County's AB 3632 claim for services provided from 1998 through 2001 disallowed 21 percent, or $8.8 million, of the county's charges. These costs were disallowed because the county charged the state for (1) services that were not covered by the mandate, (2) services that were funded by other programs, (3) offsetting funding that was not identified, and (4) costs associated with overbilling and data entry errors. The county concurred with the SCO findings. Audits of other county AB 3632 claims show similar problems.

Placing SELPAs in charge of mental health services would strengthen local incentives for the efficient use of state mental health funds. By adding funding for these services into base special education grants, SELPAs would have the resources needed to provide mental health services directly or through county mental health agencies or other contracting entities. The SELPAs, however, would have the incentive to keep these costs to a minimum—any funds not needed for mental health services could be used to pay for other special education services. As a result, by giving SELPAs a reasonable amount of funds to pay for mental health services, we think the state would establish the incentives needed for a more efficient program structure.

Shift Could Improve Effectiveness of Services to Students. Returning responsibility for mental health services to SELPAs also would result in a more effective delivery system if it encouraged educators to increase the use of less-intensive preventive mental health services. As noted above, one consequence of AB 3632 is that the program creates an incentive for educators to shift as many mental health costs to county agencies as possible. In legislative discussions on AB 3632 last spring, county mental health agency staff expressed the belief that many schools fail to provide the early intervention services that remained the responsibility of education even after AB 3632 was enacted. To address this concern, the Legislature included $31 million in the 2004-05 special education budget to *require* SELPAs to provide more early intervention services.

Placing SELPAs in charge of mental health services, however, would encourage schools to recreate the capacity to provide these intervention services. Early intervention often is more cost effective. The proposal to shift responsibility back to education, therefore, may encourage educators to intervene earlier when behavioral problems can be treated with less intensive services. This would be good for students (avoiding the need for more intensive services) and it would represent another way that changing the local incentives for mental health services would benefit the state.

For the above reasons, we recommend that the Legislature eliminate the existing mental health mandates on counties. Federal law requires school districts provide these services. By eliminating the state mandate on counties, our recommendation has the effect of returning these responsibilities to school districts.

We also recommend the Legislature revise the proposed Budget Bill language and add the full $100 million earmarked for mental health services into the base special education funding formula. In addition, we recommend the Legislature redirect $42.8 million more in funding to SELPAs for mental health services (we discussed the source of these funds earlier in this section). This would provide a total of $142.8 million to SELPAs for mental health services in 2005-06. Based on past claims (and the magnitude of disallowed county costs), we believe our proposal provides a reasonable amount to allow SELPAs to pay for the needed mental health services.

OTHER ISSUES

Cleanup Needed on New Formula

We recommend the Legislature adopt trailer bill language to recognize the special education costs for residents of a class of licensed children's institutions that was inadvertently excluded from last year's trailer legislation. Fixing this error would cost $2.2 million in both 2004-05 and 2005-06.

As part of the *2004-05 Budget Act*, the Legislature revamped the funding formula for the support of special education students who reside in an LCI. In 2002-03, more than 50,000 K-12 students lived in an LCI (including foster family homes or group homes) because the youth's family was unable to provide needed care. The Department of Social Services licenses group homes based on the services needed by youth living in each home.

Since the enactment of the new formula, however, the State Department of Education (SDE) discovered that the trailer legislation inadvertently omitted a class of group homes from the formula. Specifically, the formula failed to include 129 community care facilities that serve disabled youth who are referred by regional centers for the disabled. Adding these group homes to the new LCI model increases costs by $2.2 million in both 2004-05 and 2005-06.

To correct for this oversight, we recommend the Legislature adopt trailer bill language that adds the community care facilities to the list of group homes used to distribute special education funds. We also recommend the Legislature add $4.4 million ($2.2 million in one-time funds that must be spent on special education programs for the 2004-05 costs and $2.2 mil-

lion in ongoing 2005-06 funds) to the special education budget to pay for costs associated with the additional facilities.

Incidence Factor Remains Outdated

We recommend the State Department of Education report to the budget subcommittees before March 1 on the feasibility of assuming responsibility for calculating the special education "incidence" adjustment.

The 2005-06 budget proposes $84 million to pay for the special education "incidence" adjustment in 2005-06. State law calls for these supplements to local apportionments as a way of acknowledging that, for a variety of factors, some SELPAs experience higher costs than the typical SELPA. The current adjustments were calculated in 1998 using 1996-97 cost data. Since the factors underlying local cost profiles change over time, the existing adjustments likely no longer reflect actual SELPA costs.

To update the adjustments, the Legislature required SDE to contract for a study in 2002-03. This study was completed in the fall of 2003. Despite significant data problems, the study recommended a new set of incidence adjustments. The data problems, however, were so severe that they clouded the legitimacy of these new adjustments in the eyes of many SELPA administrators. The credibility of the incidence adjustments is very important, as the adjustments are designed to increase the fairness of the state's system of uniform base special education grants.

The study identified data quality as a prime concern. The SDE maintains a comprehensive special education database that provided the data for the 1998 and 2003 incidence factor studies. According to SDE, changes to the database made in 2001-02 resulted in local coding errors that reduced the accuracy of the data. The department believes these problems have been corrected with the 2002-03 data.

The study also suggested that the state update the incidence adjustments annually in order to avoid "radical changes in funding for some SELPAs" that may occur if the adjustments are reassessed only every five years. Indeed, changes to the adjustments identified in the 2003 study were so large that the study recommended a phased approach to implementing the new adjustments. The study suggests that a more frequent calculation of the adjustments would ease transition problems.

In our view, the problems with the 2001-02 data require updating the incidence adjustments. This would be no small task, however. The study presents a series of technical and policy issues that have to be resolved each time the adjustment is recalculated. In our discussion on this issue, we asked SDE to assess the feasibility and cost of assuming responsibility

for this task. At the time this analysis was written, the department was in the process of determining what resources would be needed to replicate the study.

In our view, the long-term viability of the incidence factor rides on the department's capacity to update the adjustment. The current reliance on the 1998 adjustments can no longer be defended given the many changes to SELPA costs that have occurred over the past eight years. In addition, the use of outside contractors to recalculate the adjustment is expensive and time-consuming—particularly if the Legislature would like to update the adjustment more often than every five years. If the department does not believe it can reasonably develop the capacity to assume this responsibility, the Legislature will need to either (1) consider eliminating the adjustment or (2) spend about $150,000 each year or two to update the adjustment.

To assist the Legislature in assessing its options for the long-term viability of the incidence adjustment, we recommend SDE report to the budget subcommittees on the costs and feasibility of the department assuming responsibility for calculating the special education incidence adjustment.

CHARTER SCHOOLS

Ever since it was first implemented in 1999-00, we have had concerns with the calculation of the charter school categorical block grant funding level. The basic area of disagreement has revolved around which programs are in and out of the block grant. The Governor's budget addresses these existing disagreements in one way by "delinking" the charter school categorical block grant from any set of underlying categorical programs. This delinking approach, however, undermines the purpose of the block grant and is very likely to be unworkable. We recommend the Legislature pursue an alternative reform strategy based upon a new control section in the annual budget act that would provide charter schools a share of categorical funding that is equivalent to the proportion of K-12 students they serve. This alternative approach would be simple, workable, and consistent with the original intent of the block grant.

Below, we identify the basic problems with the existing charter school block grant funding model. These problems became so significant in 2004-05 that the budget act essentially suspended the existing model and authorized a working group to try to improve it. We summarize the progress the working group made toward developing a new model. We then describe the Governor's budget proposal to reform the model, discuss our concerns with the proposal, and recommend an alternative reform approach. We conclude this section with a brief discussion of a related budget proposal that would allow colleges and universities to authorize charter schools. As we recommended last year, we think a system of multiple charter authorizers, with certain accompanying safeguards, could enhance charter school oversight and accountability.

Existing Block Grant Funding Model Has Become Virtually Unworkable

The charter school block grant was established in 1999 to provide charter schools with categorical program funding similar to public schools serving similar student populations. The block grant currently suffers from two basic problems. The primary problem is a lack of consensus regarding

which programs are in and out of the block grant. A secondary problem is the funding formula used to calculate the block grant funding level is overly complex.

Categorical Confusion. Since its inception, our office and the Department of Education (SDE) have interpreted statute to include several programs in the charter school block grant that the Department of Finance (DOF) has excluded when determining the block grant funding level. Several of the programs at the center of contention are large programs with large fiscal implications for charter schools—Targeted Instructional Improvement, Regional Occupation Centers and Programs, Teaching as a Priority, Library Materials, Deferred Maintenance, and Mandates. In addition, statute is ambiguous as to whether county-administered programs, such as the California Technology Assistance Project, County Office Fiscal Oversight, California Student Information System, and the K-12 High Speed Network, are to be in or out of the block grant. A new area of ambiguity involves the block grants created by Chapter 871, Statutes of 2004 (AB 825, Firebaugh). Four of the six new block grants consolidate programs that are in the charter school block grant with programs that charter schools formerly had to apply for separately. It is unclear whether these block grants are to be subsumed into the charter school block grant, whether charter schools now have to apply separately for all six block grants, or whether all the pre-existing programs need to be tracked separately just for charter school funding purposes.

Methodological Madness. A secondary problem with the block grant is its overly complex funding formula. The formula uses 1998-99 as a base year and measures all changes from this year. Locking in 1998-99 as a base year has led to accidental funding errors (when the base year was not correctly updated to reflect budget-year adjustments). The base year also has become increasingly obsolete, with few of the categorical programs in the original block grant still remaining and many new categorical programs since created. These changes have made the formula increasingly difficult to use and have called into question the validity of the formula to account accurately for current categorical funding. In addition, the formula is sensitive to changes in revenue limits—changes that occur throughout the year and for which information is not generally available.

Working Group Makes Some Progress Toward New Model

As of a result of these problems, the *2004-05 Budget Act* contained language directing the Legislative Analyst's Office and DOF to coordinate a working group to "develop a simpler and clearer method for calculating the charter school block grant appropriation in future years." The working group, which held three meetings during fall 2004, included representa-

tives from SDE, the Office of the Secretary for Education, the California Charter School Association, the Charter School Development Center, EdVoice, the Association of California School Administrators, the California School Boards Association, the California Teachers Association, the California County Superintendents Educational Services Association, and legislative staff. Although the group did not ultimately agree as to exactly which programs should be in and out of the block grant or on all aspects of a new block grant method, it did achieve notable consensus in important areas.

Agreed on Purpose of Block Grant. The group generally agreed that existing statute provided sufficient guidance as to the basic intent of the charter school funding system. Existing statute states, "It is the intent of the Legislature that each charter school be provided with operational funding that is equal to the total funding that would be available to a similar school district serving a similar pupil population." Moreover, the group generally agreed that the specific purpose of the block grant was to provide charter schools with funding in lieu of categorical programs.

Agreed on Principles to Guide Development of New Block Grant Model. The group generally agreed that the following principles should guide development of a new model.

- The block grant calculation should be simple.
- The calculation and its outcome should be transparent.
- The calculation should entail as little administrative burden as practicable at the local level as well as the state level.
- The calculation should result in comparable funding rates for similarly situated charter schools and other public schools.
- The calculation should not require the state to overappropriate the Proposition 98 minimum guarantee.
- Charter schools should retain existing flexibility to use block grant funds for general education purposes.

Agreed on Some Methodological Changes. The group agreed the model should no longer rely on a base year. It also preferred having one budget section govern the block grant appropriation rather than having charter provisions embedded within the budget items for every associated categorical program. It also agreed changes should be made to clarify which programs did not apply to charter schools as well as which programs charter schools were to apply for separately. However, the working group did not achieve consensus on all aspects of a new block grant model.

Governor's Proposal Is Not Viable Reform Option

The Governor's budget contains a charter finance reform proposal that attempts to address the difficulties with the current system. The Governor's funding proposal provides $68 million for the charter school block grant—a $10 million augmentation over the current year. As Figure 1 shows, this augmentation funds anticipated growth in charter average daily attendance (ADA), a cost-of-living adjustment, and a $2.9 million base augmentation. The DOF states the base augmentation is provided in recognition of charter schools' low participation in certain categorical programs and inability to access funding for other categorical programs.

Figure 1

Governor's Budget Proposal
Charter School Categorical Block Grant

(In Millions)

2004-05 Funding Level	**$58.1[a]**
Change From Current Year	
Average daily attendance growth (8 percent)	$4.6
Cost-of-living adjustment (3.93 percent)	2.5
Base augmentation	2.9
Total augmentation	$10.0
2005-06 Funding Level	**$68.1[b]**

a Of this amount, $5.3 million is deferred until 2005-06.

b Of this amount, $5.9 million is deferred until 2006-07.

The funding proposal is associated with accompanying trailer bill language that would significantly change the charter school categorical block grant by delinking it from any underlying set of categorical programs. That is, the block grant funding level would no longer represent in-lieu funding for a set of specified categorical programs. Under the proposal, once the 2005-06 funding level has been set, the block grant funding level would be adjusted in future years for growth in ADA and inflation. The block grant funding level would be reviewed every three years, beginning in 2008-09, to determine how its growth compared with growth in K-12 categorical funding generally, less a small set of special categorical programs.

Proposal Undermines Purpose of Charter School Block Grant. Despite controversy regarding exactly which programs are in and out of the block grant, the general purpose of the block grant, as indicated above, has rarely been questioned and remains quite clear—the block grant is to provide charter schools with in-lieu categorical funding. When originally established, the block grant provided charter schools with in-lieu funding for 33 categorical programs. By disconnecting it from categorical programs, the Governor's proposal undermines the policy basis of the block grant.

Proposal Very Likely to Be Unworkable. Under the Governor's proposal, it is unclear how charter schools, the Legislature, and state agencies would know which programs charter schools could apply for separately. The DOF suggests charter schools could apply separately only for those programs for which they currently can apply separately. Given the existing disagreement over which programs charter schools can apply for separately, this new statutory ambiguity is likely to generate even greater confusion over which programs are in and out of the block grant. Moreover, despite DOF's intention, the proposed language would seem to allow charter schools to apply separately for all categorical programs except Economic Impact Act. Having to apply separately for virtually every categorical program undermines one of the primary legislative purposes of charter schools, which was to offer schools greater fiscal autonomy in exchange for performance-based accountability. Nonetheless, if charter schools actually did apply separately for all categorical programs, then their categorical block grant appropriation would represent a windfall—providing charter schools with almost $300 more per ADA than noncharter schools.

Alternative Approach Could Achieve Simplicity, Clarity, and Comparability

We recommend the Legislature repeal the existing block grant model, reject the Governor's reform proposal, and adopt an alternative reform approach. The alternative approach we recommend would link charter schools' share of categorical funding with the share of K-12 students they serve. The resulting block grant amount then would be distributed among charter schools using a simple conversation factor to ensure more per pupil funding was provided for disadvantaged students. This approach is simple to understand, yields comparable charter and noncharter categorical funding rates, protects against an unintentional Proposition 98 overappropriation, remains dynamic such that it can respond to a changing array of categorical programs, and might become so automated and uncontroversial that the Legislature would not need to address the charter school finance system every year.

As with the Governor's reform proposal, we recommend the Legislature repeal the existing code sections that detail the charter school categorical block grant and its funding formula (Education Code Section 47634 and Section 47634.5). In its place, we recommend the Legislature create a new in-lieu categorical funding system for charter schools. Below, we describe each component of this alternative reform approach.

Clarifies Programs for Which Charter Schools Are Not Eligible. To address existing statutory ambiguity regarding certain types of county-run programs, we recommend the Legislature adopt a new code section that would list the categorical programs for which charter schools are *not* eligible. For these programs, charter schools neither could apply nor receive direct or in-lieu funding. We recommend this list contain programs funded and administered directly by a select group of county offices for nonclassroom-based county-level activities. Figure 2 lists the programs we recommend including in this category.

Figure 2

Programs for Which Charter Schools Would Not Be Eligible[a]

2005-06
(In Millions)

Program	Proposed Funding Level
K-12 High Speed Network	$21.0
California Technology Assistance Project	16.0
County Offices of Education Fiscal Oversight	10.5
American Indian Education Centers	4.7
Center for Civic Education	0.3
California Association of Student Councils	—[b]
Total	**$52.8**

a As recommended by the Legislative Analyst's Office.

b The Governor's budget includes $33,000 for this program.

Clarifies Programs for Which Charter Schools Must Apply Separately. We also recommend a new code section to clarify exactly which categorical programs charter schools must apply for separately. This section would be intended to reduce potential controversy regarding which programs are

out of the block grant. Figure 3 lists the Proposition 98 programs for which we recommend charter schools be required to apply. As the figure shows, we recommend charter schools continue to apply separately for testing and student-information monies (to ensure their performance can be tracked), special education, and programs intended for non-K-12 populations (adult education and child development). This list is almost identical with existing statute governing the block grant funding formula and is largely consistent with the Governor's proposed trailer bill language for reviewing the block grant funding level. It also tries to be as consistent as possible with statutory directives that the charter school funding model be simple and allow for fiscal autonomy. (Nonetheless, this list still includes ten programs representing almost $5 billion in categorical funding, or approximately 40 percent of all Proposition 98 categorical funding.)

Figure 3

Programs Charter Schools Would Have to Apply for Separately[a]

2005-06
(In Millions)

Program	Proposed Funding Level
Special Education	$2,891.3
Child Development	1,177.9
Adult Education	600.3
After School Education and Safety[b]	121.6
Pupil Testing	85.9
Adults in Correctional Facilities	15.3
California School Information Services	4.5
Pupil Residency Verification	0.2
Teacher Dismissal Apportionments	—[c]
Mandates	—[d]
Total	**$4,897.0**

a As recommended by the Legislative Analyst's Office.

b Proposition 49 requires charter schools to apply separately for this program.

c The Governor's budget includes $43,000 for this program.

d The Governor's budget includes $36,000 for mandates.

Automates Funding While Ensuring Parity and Protecting Against Overappropriations. Third, we recommend the Legislature adopt a new system for providing charter schools with in-lieu categorical funding. The system would be described in statute but implemented through an annual budget control section. For all remaining Proposition 98 categorical programs (those that do not fall into the two above categories), we recommend control language that would provide charter schools a share of funding equal to the share of K-12 students they serve. Specifically, as part of the annual May Revision, SDE would project charter school's share of ADA in the budget year. This estimate would be included in the control section, accompanied with language providing the same share of funding from these remaining categorical programs to charter schools. This approach would allow SDE to distribute categorical funds immediately following enactment of the budget.

This approach eliminates the need for a base year, is not sensitive to changes in revenue limits, contains all relevant funding information in a single place, is dynamic such that it can reflect ongoing changes to the categorical landscape, and establishes a funding process that automatically produces parity. Thus, if any midyear adjustments, year-end pro-rata adjustments, or deferrals are made to any of these categorical programs, charter schools are automatically affected to the same degree as noncharter schools. Moreover, these adjustments are made without affecting overall Proposition 98 spending.

Simplifies Process, Strengthens Incentives to Serve Disadvantaged Students. Once charter schools' overall categorical funding level has been determined, we recommend a simple conversion factor be used to ensure charter schools receive more per pupil funding for the disadvantaged students they serve. Serving disadvantaged students is one of the legislative objectives of charter schools, and a supplemental disadvantaged-student funding rate is a core aspect of the existing charter school funding model. A conversion factor (for example, providing 25 percent more for every student eligible for free and reduced price meals) would be a simple means to generate incentives to serve disadvantaged students while ensuring the aggregate charter funding allocation is not exceeded.

Equalizes Funding Without Major Disruption. The model described above would provide charter schools with just over $200 million of in-lieu categorical funding in 2005-06. (This is based on DOF and SDE's assumption that charter schools will serve approximately 3 percent of all K-12 ADA in 2005-06 and on the Governor's proposed funding levels for categorical programs.) It is difficult to calculate how this compares to the amount charter schools currently are receiving. In a 2003 report, RAND found that, in California, charter schools received less categorical funding compared to noncharter public schools. If this is so, then our proposal,

which provides similar funding for charter and noncharter schools, would likely result in charter schools receiving an increase in funding and noncharter public schools experiencing a slight decrease. Since the decrease would be spread over approximately 40 categorical programs, the impact on any district for any program would be minimal.

The reason that we are not able to quantify the exact impact on charter and noncharter schools is because we do not know precisely what share of categorical funding charter schools currently receive. For example, charter schools currently do apply separately for some programs (such as K-3 Class Size Reduction and English Language Learner Assistance) for which, under our alternative approach, they would receive direct in-lieu funding. To derive a precise estimate of "new" funding would require a comprehensive accounting of charter schools' existing categorical participation. Nonetheless, it is likely that charter schools with very high categorical participation and very few disadvantaged students would experience a slight reduction in funding. Similarly, noncharter schools with very high categorical participation rates would experience a slight reduction in categorical funding. In contrast, charter schools with low categorical participation and many disadvantaged students would experience an increase in funding. Noncharter schools with low categorical participation would be virtually unaffected by the new model. In short, the new system would involve some equalization and benefit charter schools with low categorical participation and many disadvantaged students.

Alternative Approach Creates Reform Structure. This alternative approach is not dependent upon any particular view of categorical programs. In other words, the Legislature might adopt the basic reform structure even if it decided to modify the list of programs for which charter schools would not be eligible or would have to apply for separately. Regardless of the treatment of specific categorical programs, we think the basic reform structure would simplify and clarify charter school finance.

In sum, we recommend the Legislature repeal the existing charter school block grant model, which has become virtually unworkable. We also recommend the Legislature reject the Governor's reform proposal, which too is very likely to be unworkable. Instead, we recommend the Legislature establish a simpler, more transparent model that results in more comparable charter and noncharter funding rates. A major advantage of the new model we describe is that it would be able to respond to an ever-changing categorical landscape—perhaps the greatest challenge confronting the existing system. The model would be directly linked to underlying categorical programs and automatically adjusted as funding for these programs changed. Indeed, it could operate so automatically that the Legislature would not need to review the charter school finance system every year. This would allow the Legislature to turn attention from the relatively tech-

nical issue of a funding formula to more meaningful issues of oversight and quality.

Alternative Authorizers Could Improve Quality

We recommend the Legislature adopt in concept the Governor's proposal to allow colleges and universities to authorize and oversee charter schools. We think a system of alternative authorizers has the potential to notably improve charter school development, oversight, and accountability. In establishing an alternative authorizer system, we recommend further attention be given both to the criteria an entity should meet prior to chartering schools and the conditions under which the state would revoke an entity's chartering authority.

The *Governor's Budget Summary* includes a proposal to allow alternative authorizers to charter K-12 schools. The proposal currently is not associated with a funding request. At the time of this writing, bill language had not yet been released, but the intent apparently is to allow colleges and universities, upon approval by the State Board of Education, to charter schools. In our January 2004 report, *Assessing California's Charter Schools*, we recommended a multiple authorizer system as one strategy for enhancing charter school development, oversight, and accountability. Below, we discuss our concerns with the existing authorizer system, explain how a multiple authorizer system might address these concerns, and highlight components of the Governor's proposal that require additional development.

Poor Incentives Embedded Within Existing System. Under the existing authorizer system, school districts are required to initially approve charter petitions that are adequately developed—even if the school districts are unlikely later to be able to conduct the oversight needed to ensure schools are honoring their charters. We have concerns with three particular types of school districts.

- ***Those Authorizing Few Charter Schools.*** RAND's 2002 charter authorizer survey found that slightly more than two-thirds of charter authorizers had authorized only one charter school. School districts authorizing only one charter school are likely to be unfamiliar and inexperienced with the petition review, oversight, evaluation, and renewal process.
- ***Those Experiencing Fiscal Difficulties.*** Some school districts are facing serious fiscal problems but nonetheless are required to authorize charter schools. We question whether these types of school districts can devote sufficient attention and resources to conducting rigorous charter oversight.

- ***Those Likely to Be Overly Receptive or Unreceptive to Charter Schools.*** School districts face various incentives stemming from their local environments that might contribute to lax or inappropriate oversight. For example, school districts experiencing facility problems or rapid growth might view charter schools as expedient solutions and be less likely to revoke charters. Conversely, school districts experiencing declining or shifting enrollment might be unreceptive to charter schools and conduct inappropriate oversight. In either case, the charter school accountability system is weakened.

Multiple Authorizers Could Improve Incentives and Constrain Costs. Allowing charter groups choice among potential authorizers might notably enhance the quality of charter development, oversight, and accountability. Charter groups might connect with authorizers who are familiar, experienced, and reputable at conducting high quality oversight and providing meaningful local assistance. They might bypass school districts that are distracted with serious fiscal problems or otherwise likely to be unable to provide adequate oversight and service. A multiple authorizer system also could have the ancillary benefit of constraining oversight costs, as schools might act as savvy consumers, selecting authorizers who provide the best service for the lowest price.

Certain Safeguards Likely to Be Needed. Although we think allowing colleges and universities to charter schools could potentially improve the charter school system, two components of the Governor's proposal require further development—the criteria entities must meet to be allowed initial chartering authority and the conditions under which this authority would be revoked. The state can provide some safeguard against errant authorizing by setting clear expectations as to the minimum qualifications expected of new authorizers. Minnesota, for example, recently began requiring initial training for new authorizers. (Minnesota has a relatively broad array of charter authorizers. Currently, the state department, 29 school districts, 20 postsecondary institutions, and 14 nonprofit organizations charter schools.) The state can provide further safeguard by setting clear expectations as to the conditions under which authorizing power would be revoked. For example, the state would want to retain power to revoke chartering authority from agencies that were negligent, mismanaged, or corrupt.

In sum, we think the Governor's proposal to allow colleges and universities to charter schools has the potential to notably improve charter schools generally, but we think some of the proposal's details require further development.

MANDATES

The Governor's budget recognizes 36 state-mandated local programs for K-12 education in 2005-06. These mandates require districts and county offices of education (COEs) to conduct a wide range of instructional, fiscal, and safety activities, and require districts to administer local processes designed to protect parent and student rights.

The State Constitution requires the state to reimburse local governments for the costs of complying with mandated local programs. The Commission on State Mandates (CSM) determines whether state laws or regulations create a mandated local program and whether the mandate requires reimbursing local governments for the costs of following the mandate. The CSM also develops claiming guidelines for the specific mandated activities that are eligible for reimbursement.

For several years, the state has not provided reimbursements to K-12 school districts for mandated programs. The *2001-02 Budget Act* was the last time the state made major appropriations for K-12 mandates. The state has instead "deferred" payments, which means that funds will be provided at some unspecified future time. Even though payments have been deferred, school districts are still required to perform the mandated services.

The budget again proposes basically no funding for K-12 mandates in 2005-06. The budget would defer payment for district and COE claims to future budgets due to the fiscal condition of the state. With this new proposed deferral (estimated at roughly $315 million), we estimate the state will owe about $1.7 billion in unpaid K-12 mandate claims by the end of the budget year. Proposition 1A, which requires the state to pay for mandates or relieve local government of the service requirements, does not apply to local education agencies. As a result, the state may continue deferring K-12 mandate costs. These deferred costs would be paid from future Proposition 98 funds.

Chapter 895, Statutes of 2004 (AB 2855, Laird), eliminated six state mandates affecting K-12 education beginning in 2005-06. Two other mandates that affected both K-12 education and other local government agen-

cies also were eliminated. Based on 2002-03 final claims from districts and COEs, we estimate savings from eliminating the eight mandates totals more than $6 million annually. In addition, Chapter 895 directs CSM to review its decisions on the Standardized Testing and Reporting (STAR) program and the School Accountability Report Card mandates "in light of federal statutes enacted and state court decisions rendered since these statutes were enacted."

From our review of K-12 mandates, we have identified four issues:

- The budget should identify new mandates that have been approved by the Legislature.
- The State Department of Education (SDE) and the State Controller's Office (SCO) need to establish a process for sharing information on "offsetting revenues."
- The mandated cost of the new Comprehensive School Safety Plan mandate could be reduced by recognizing available revenues as offsets.
- Costs associated with the mandate to provide supplemental instruction to students in grades 2 through 9 could be reduced by limiting per pupil costs to the amount provided by the state for supplemental instruction programs.

We discuss the first three issues below. The fourth issue is discussed in the "Categorical Reform" section earlier in this chapter.

Newly Identified Mandate Review

We recommend the Legislature add eight new mandates to the budget bill in order to signal its recognition of the state's mandate liabilities.

Chapter 1124, Statutes of 2002 (AB 3000, Committee on Budget), requires the Legislative Analyst's Office to review each mandate included in CSM's annual report of newly identified mandates. In compliance with this requirement, this analysis reviews eight new education mandates. Figure 1 displays the new mandates and the costs associated with each one. The CSM estimates total district costs of $77 million for the eight mandates through 2004-05. This estimate is based on actual district claims through 2002-03. In 2005-06, we estimate the new mandates will cost the state about $11.3 million.

Before the current budget crisis, the state maintained a process for including new mandates in the budget. Specifically, once CSM had completed its determination of a mandate's costs, an appropriation for the approved costs would be included in an annual "mandate claims bill."

The claims bill allowed the Legislature to review and approve the cost of new mandates—or direct CSM to reassess its approved costs based on specific issues identified during the deliberations on the bill.

Figure 1

New Mandates Approved by The Commission on State Mandates in 2004

(In Millions)

Mandate	Requirement	Accrued Costs Through 2004-05	Estimated Cost In 2005-06
Comprehensive School Safety Plan	Develop and annually update a comprehensive school safety plan.	$37.1	$5.5
Immunization Records: Hepatitis B	Ensure students have needed immunizations before entering school.	29.6	4.3
Pupil Promotion and Retention	Provide supplemental instruction to students at risk of academic failure.	9.0	1.4
Standards-Based Accountability	Provide specific accountability information (one-time).	0.6	—
Charter Schools II	Requires districts and counties to review charter petitions.	0.3	0.1
Criminal Background Check II	Requires background checks on employees and contractors.	0.3	0.1
School District Reorganization	Provide specific information on school district reorganization petitions.	—a	—
Attendance Accounting	Provide information for state change in attendance accounting (one-time).	—a	—
Totals		**$76.9**	**$11.3**

a Less than $50,000.

Because the state has ceased all education mandate payments, there has been no K-12 claims bill. This leaves the budget process as the primary vehicle for the Legislature's review of new mandates. The 2005-06 Governor's budget recognizes only one of the new K-12 mandates—the Comprehensive School Safety Plan. According to the Department of Finance, the commission's actions on the other K-12 mandates are still under review and may be included in an April budget revision letter or in the May Revision.

Our review of the CSM decisions on the new mandates did not identify any issues with the commission's determination of mandated costs. By adding the new mandates to the budget bill, the Legislature would signal its recognition of the state's mandate liabilities. For this reason, we recommend the Legislature amend the budget bill to include the eight mandates approved by CSM during 2004.

Offsetting Revenues Process Is Needed

We recommend the Legislature direct the State Department of Education and the State Controller's Office submit a joint plan to the budget subcommittees by April 1, 2005, outlining a process for sharing information needed to reduce the state cost of state-mandated local programs.

In past recommendations on state-mandated programs, we have discussed the problem that districts sometimes fail to recognize state funds that districts should have used as an offsetting revenue in their claims for reimbursement of mandated costs. For instance in our *Analysis of the 2004-05 Budget Bill* (please see page E-104), we noted that several district claims we reviewed for the STAR program did not recognize the annual apportionment for local program costs that is included in the budget each year. Statute directs local governments to recognize any such revenues as an offset that reduces their total claim for reimbursement.

The SCO processes school district claims for mandate reimbursement. While SCO reviews the claims for completeness and accuracy, it does not have access to data on the amount of state funds districts receive in programs that have been identified as offsetting revenues to specific mandates. Without that information, the SCO review cannot assess whether a district claim appropriately identified the availability of such revenues.

The state would benefit from ongoing exchange of information on state mandates between SCO and SDE. The SDE maintains data on the amount provided to each district in K-12 categorical program funding. If SDE supplied SCO with district allocations for specific programs, the Controller would be able to double check that districts were identifying offsetting revenues for specific mandates. Because district claims appear to be weak in this area, giving the Controller apportionment data could save the state a significant amount of funds.

The SCO also has information that would be useful to SDE. Specifically, SCO could provide feedback to SDE on current issues with specific mandates. For instance, SCO could inform the department when claims for specific mandates increase significantly. Since SCO also audits district mandate claims, it could discuss problems with specific mandates that are discovered through the audit process, such as offsetting revenues, that sig-

nificantly increase state costs. With this information, SDE could advise the Legislature about statutory or budget changes to address these issues.

While sharing information seems like a simple task with significant benefits, it does not routinely occur. Therefore, we recommend the budget subcommittees direct SDE and SCO to jointly develop a plan for sharing data needed by both agencies. To give the subcommittees time to review the plan, we recommend the subcommittees require the agencies to submit the report by April 1, 2005.

Strengthen Language on Offsetting Revenues

We recommend the Legislature add budget bill and trailer bill language to ensure that districts use available funds to pay for local costs of the new Comprehensive School Safety Plan mandate.

The Comprehensive School Safety Plan mandate requires each K-12 school to develop and annually update a school safety plan. The plan must identify "strategies and programs that will provide or maintain a high level of school safety." The planning requirements are quite specific. For instance, the law requires schools to consult with local law enforcement in the writing of the school plan. The plan also requires schools to include in the plan (1) procedures for child abuse reporting; (2) the definition of "gang-related apparel;" and (3) other existing policies on sexual harassment, emergency disasters, and school discipline. We estimate the costs of the mandated planning process in 2005-06 at about $5.5 million. Since only about one-third of districts submitted a claim for this mandate, the long-term cost could be considerably higher.

The statute requiring the safety plans expresses the Legislature's intent that districts use existing funds to pay for the costs of developing the plans. The language, however, does not specifically identify any existing program that the Legislature intended districts to use for the planning process. The commission identified at least two possible funding programs that could support the mandated activities. Without an explicit requirement in law, however, CSM could not identify these programs as a required offsetting revenue. In this case, unless *districts* identify the funding sources as an offset, the state cannot require districts to use the funds to pay for the mandated planning process.

The two programs identified by CSM include a grant program for new school safety plans and the Carl Washington School Safety and Violence Prevention Act. In 2004-05, the budget act contains $1 million for the new school safety planning grants program. The program was merged into the School Safety Consolidated Competitive Grant program by Chapter 871, Statutes of 2004 (AB 825, Firebaugh), beginning in 2005-06. The Carl Wash-

ington program supports local activities to improve middle and high school safety programs. The budget proposes $91 million for this program in 2005-06.

Budget Proposes New Provisional Language. The proposed budget bill contains provisional language placing "first call" on funds in these two programs for any local costs of the Comprehensive School Safety Plan mandate. This language would require districts to first use funds to pay for the costs of the planning mandate. This language is appropriate because it would induce districts to use these school safety funds as offsets to any subsequent district claim for costs associated with this mandate. We think, however, a couple of other changes are necessary. First, we suggest adding a *statutory* first call provision to both programs, which would reinforce the priority of the programs' funds for mandated planning costs. Second, we have identified several technical issues that need to be corrected with the new language.

We also have identified an appropriate fund source for the cost of planning in elementary schools—the School Improvement Program (SIP). The SIP supports a wide range of school site activities, guided by a parent-teacher school site council. Since the Comprehensive School Safety Plan mandate directs site councils to develop the safety plan, we think the Legislature should require districts to use SIP funds to pay for the mandated school plans. Virtually all elementary schools receive significant annual funding under SIP.

As part of Chapter 871, the Legislature consolidated SIP into a new School and Library Improvement Block Grant. The budget proposes $419 million for the block grant in 2005-06—virtually all of these funds are currently part of the 2004-05 SIP appropriation. Thus, adding both budget and statutory direction for districts to use funds in the School and Library Improvement Block Grant would recognize that, in creating the Comprehensive School Safety Plan mandate, the Legislature added another duty to school site councils that should be paid from funds provided to the council.

AFTER SCHOOL PROGRAMS AND PROPOSITION 49

21ST CENTURY COMMUNITY LEARNING CENTERS NOT SPENDING FEDERAL GRANTS

The state has had problems in taking full advantage of federal funds for the 21st Century Community Learning Centers Program (21st Century program). By the end of 2004-05, the state could have up to $100 million in carryover funds. We suggest various steps the Legislature could take to reduce the carryover problems over the next several years.

Below, we first describe the purpose and structure of the 21st Century program and compare it to the state's After School Education and Safety (ASES) Program. In the following section, we describe the problems with unspent funds and discuss possible causes. We then provide several recommendations to begin reducing the level of unspent funds.

Background

The 21st Century program is a federally funded before and after school program that provides disadvantaged K-12 students with academic enrichment opportunities and supportive services to help the students meet state and local standards in core academic content areas. In the past, the federal Department of Education (DOE) awarded three-year competitive grants for these centers directly to school districts. In 2001, the reauthorized Elementary and Secondary Education Act converted the 21st Century program to a state formula program. Starting in 2002, DOE began phasing out the direct federal grants and began transitioning the program to a state-administered one.

The federal grant to California, which was $41.3 million in 2002-03, has steadily increased since then. In 2005-06 the federal grant amount is $136 million. The state has 27 months from the date the state appropriates funding in the annual budget act to spend these 21st Century program funds. Unspent funds are returned to DOE.

State Law Restricts 21st Century Program. The state implemented the 21st Century program at the elementary and middle school levels generally to parallel the state ASES program:

- ***Maximum Grants.*** Grant levels are capped at $75,000 for elementary schools with 600 or fewer students, $100,000 for middle schools with 900 or fewer students, and $250,000 for high schools. For larger schools, a per pupil funding formula allows higher maximum grant amounts.
- ***Per Pupil Reimbursement Rates.*** The elementary and middle school programs are reimbursed at a rate of $5 per student per day. (The state program, however, requires a 50 percent local match, increasing the total spending level to $7.50 per student per day. Federal law prohibits a local match on the 21st Century program.)

Small portions of the federal funds are used for high school grants, "equitable access," and support of family literacy programs.

Funds Are Consistently Underutilized

Since the inception of the state-administered 21st Century program, the State Department of Education (SDE) has experienced problems using these funds to serve eligible schools and students. Each year, SDE has carried over a substantial portion of appropriated funds into the following budget year. Figure 1 shows the state appropriations for the three years of the state-administered program and the amounts and proportions of funds that are expected to be spent by specified dates. For example, only 42 percent of the 2002-03 appropriation and 55 percent of the 2003-04 appropriation has been spent to date. The SDE has estimated that $119 million of the current year's appropriation (74 percent) will be spent. We think that this estimate is overly optimistic, given past experience, and would expect that much less will actually be spent.

Figure 1
21st Century Program Spending Lags Appropriations

(Dollars in Millions)

	2002-03	2003-04	2004-05
State appropriation	$40.9	$75.5	$162.8
Spending (estimate)	17.1	41.3	119.8
Percent spent	42%	55%	74%

Spending Roadblocks. The SDE and school districts are both responsible for these funds not being used to serve more students. Most of the problems are concentrated with the elementary and middle school grantees. Two primary issues appear to account for this:

- ***SDE Slow in Awarding Grants.*** First, SDE has not provided grant funds to grantees until the fiscal year is well underway in most years. For example, in 2002-03, grant award letters were not sent until April 2003, and in 2003-04, award letters for new grantees were not sent until July 2004—after the close of the fiscal year. For 2004-05, award letters were mailed in the late fall; however because of the paperwork requirements, funds were not disbursed until January 2005. When grantees do not know whether or when they will receive their grants, their efforts at program planning can be significantly hampered. For example, the new cohort of schools funded in 2003-04 only spent 15 percent of their funds in the fiscal year.

- ***Schools Do Not Fill All of Their Slots.*** The SDE grants a maximum dollar amount to a school—for example, $75,000 for an elementary school. The elementary and middle schools then must earn the grant at a rate of $5 per student per day (except for in the first year of the grant, when up to 15 percent can be used for start-up costs). Most schools are not able to earn their grant and must return funds to the state at the end of the fiscal year. Based on the short history of the program, schools on average have only earned about one-half of their grants, returning funds to the state at the end of the year.

Reversions of Federal Dollars a Threat by End of the Budget Year. The state avoided returning any 2002-03 federal monies (which had to be fully spent by September 2004) and it may spend enough by September 2005 to avoid reverting 2003-04 federal funds. However, available data from SDE suggest that $100 million of the 2004-05 federal funds will not be spent in the current year. As a result, these unspent funds could revert to DOE in September 2006 unless the Legislature takes action to change key aspects of the state's approach to disbursing 21st Century program funds.

One-Time Grants a Bad Strategy. Late in spring 2004, SDE notified the Legislature of the large carryover balances in this program, leaving the Legislature little time to develop a longer-term strategy. So, the state gave providers one-time grants totaling $25 million on a statewide basis from these carryover funds. Because these funds must be used for one-time purposes, it is not likely that they were used to serve additional students—the goal of the program. A better approach for taking full advantage of these funds is to restructure the program. We discuss such an approach to serve more kids below.

Restructure Program and Serve More Kids

We recommend the Legislature pass legislation creating a new group of grantees to begin in late summer 2005. In addition, we recommend the Legislature increase reimbursement rates, annual grant caps, and start-up funding for the elementary and middle school programs in their first year.

We believe that the Legislature needs to take action immediately to restructure this program. We recommend a series of measures aimed at increasing the possibility that grantees will be able to earn their grants within the budget year. Our recommendations will establish funding rate parity between the 21st Century program and ASES, provide grantees with the ability to establish program infrastructure prior to enrolling students, and enable grantees to start programs at the beginning of the fiscal year.

Create New Cohort. We recommend the Legislature pass urgency legislation this spring to appropriate funding for a new cohort of schools. This accelerated timeline would allow SDE to issue grants in summer 2005, and provide an opportunity for new grant recipients to earn a larger share of their grants in the first year by beginning the program with the school year.

Increase Elementary and Middle School Daily Reimbursement Rate and Increase Grant Caps. We recommend increasing the reimbursement rate for elementary and middle schools to $7.50 per student per day and increasing the statutory spending caps for the elementary and middle school programs. The current reimbursement rate for the elementary and middle school programs of $5 per pupil per day is less than the state rate of $7.50 per pupil per day (including the state required local match). Since the federal government prohibits a local match, the rate increase is a way to equalize funding between the state and federal programs.

If the Legislature acts to increase the reimbursement rate, we recommend it also increase the statutory schoolwide spending caps. The combination of the current $75,000 cap for an elementary school with 600 or fewer students and a $7.50 reimbursement rate would mean that elementary schools could serve a maximum of only 55 students per year. In a school with 600 students, 55 students would represent only 9 percent of the student body. We recommend the Legislature increase the school grant caps to $150,000 for elementary schools and $200,000 for middle schools.

Provide Larger Start-Up Grants for Elementary and Middle Schools. Currently, the elementary and middle school grantees must earn their grants by documenting student attendance. However, any program has start-up costs and fixed operating expenses that are required for any level of service. Currently, SDE provides 15 percent of the first-year grant amount that grantees do not have to "earn" with student attendance. Given the significant start-up investments that programs must make in order to attract and

enroll students, 15 percent may be inadequate. We propose the Legislature amend state law to increase the first-year start-up amount that does not need to be earned with attendance to 25 percent of the total grant amount. This would allow schools to address some of the facility, staff, equipment, and materials costs that are part of starting up a new program. From the state level, it would also help to ensure that a larger portion of first-year grants are actually used.

We believe that this three-pronged approach of a new cohort, higher reimbursement rates, and larger start-up grants would help the state to begin reducing the level of unspent funds and serve more children.

PROPOSITION 49: AFTER SCHOOL EDUCATION AND SAFETY PROGRAM

We recommend the Legislature enact legislation placing before the voters a repeal of Proposition 49 because (1) it triggers an autopilot augmentation even though the state is facing a structural budget gap of billions of dollars, (2) the additional spending on after school programs is a lower budget priority than protecting districts' base education program, and (3) existing state and federal after school funds are going unused.

As approved by voters in 2002, Proposition 49 requires the state to provide substantially more funding for the ASES program beginning some time between 2005-06 and 2007-08. When certain conditions are met (please see nearby box next page), the proposition triggers an automatic increase in state funding for the program—from the $122 million provided in 2003-04 to $550 million (a $428 million increase). Importantly, when these additional funds are provided for the program, they will be "on top of" the state's Proposition 98 minimum funding guarantee (referred to as an "overappropriation"). Proposition 49 also converted after school funding to a "continuous appropriation" (that is, no annual legislative action is needed to appropriate funds).

We have serious concerns with the proposition, which we discuss in detail below.

Autopilot Spending Badly Timed. Proposition 49's intent was to give after school programs the first call on additional General Fund revenues. Since its passage, the fiscal environment has changed significantly—with the state struggling through several consecutive years of budget difficulties. Whether Proposition 49 triggers in the budget year or as late as 2007-08, the state is likely still to be facing a significant budget problem. Moreover, the autopilot formula that triggers Proposition 49 creates additional spending obligations without the Legislature and Governor being able to assess

Disagreements Linger Over Proposition 49 "Trigger"

Proposition 49 requires the state to provide additional funding for after school programs when General Fund spending reaches a certain level. Specifically, the Proposition 49 trigger is calculated by (1) determining, for 2000-01 through 2003-04, when the level of "nonguaranteed" General Fund appropriations was at its highest level and (2) adding $1.5 billion to that base-year funding level. Two technical issues complicate the calculation of the trigger.

- ***What Are Nonguaranteed Appropriations?*** The definition of this term is open to interpretation. We think the term refers to non-Proposition 98 General Fund appropriations plus any overappropriations of the Proposition 98 minimum guarantee. Others believe Proposition 98 overappropriations are guaranteed. Under the latter view, Proposition 49 triggers sooner.
- ***Treatment of Vehicle License Fee (VLF) "Swap."*** The state's actions in the current year to meet local government VLF obligations with property tax revenues instead of General Fund payments (the VLF swap) essentially converted $4.8 billion of General Fund monies from nonguaranteed to guaranteed appropriations. The statutory language in Proposition 49 is unclear as to whether the base-year General Fund nonguaranteed spending should be adjusted (or rebenched) downward to account for this type of action. If rebenched, Proposition 49 would trigger sooner.

The figure below shows the uncertainty these two technical issues cause for determining when the Proposition 49 funding requirement is triggered. Depending upon how overappropriations and the VLF swap are treated, the trigger could be as soon as the budget year or as late as 2007-08. Since the trigger would likely require the entire $428 million augmentation be provided all at once, this uncertainty is a significant budget risk.

When Does Proposition 49 Trigger? Assumptions Matter

	Rebench for VLF[a] Swap	
Proposition 98 Overappropriations	**Yes**	**No**
Treat as nonguaranteed	2006-07	2007-08
Treat as guaranteed	2005-06	2007-08

[a] Vehicle license fee.

the merits of the augmentation. The additional spending also likely would require the state either to raise additional General Fund revenues and/or make program cuts in other areas.

Lower K-12 Education Priority. In previous sections, we have discussed the fiscal problems that school districts will face over the near future to maintain their base education programs. From our perspective, maintaining the base program is a higher priority than expanding after school funding. We think this is particularly the case given that some school districts are struggling with basic solvency issues. If the state were planning to overappropriate Proposition 98, we think providing the funding to address the $3.6 billion on the education credit card (discussed in the "Proposition 98 Budget Priorities" write-up in the "Crosscutting Issues" section of this chapter) would be a better strategy for helping districts address some of their current fiscal challenges.

Proposition 49 Funding Not Likely to Be Spent in a Timely Manner. As discussed above, the state is having a difficult time spending its relatively small increases in federal after school funding in a timely fashion. Since 2002-03, federal after school funding has grown to an annual level of $136 million, yet the state has been spending only about one-half its federal allotment and is now at risk of reverting federal monies. Since the late 1990s, the state also has had difficulty expending its state-funded ASES program. The program continues to revert funding annually, spending around 80 percent of the grant annually.

Given that the trigger mechanism likely would provide a $428 million augmentation all in one year, schools also are not likely to be able to spend much of the new funding in the near term. As with any new grant program, the state typically has a difficult time spending the allotted funds in the first couple of years. Given the size of the augmentation, as well as the poor track record of getting additional after school funding to schools, the state is likely to have hundreds of millions of dollars revert annually in the initial years of implementation.

In summary, because of the autopilot nature of the trigger, the impact that this appropriation could have on the budget problem, the relatively lower priority of after school programs compared to schools' base education program, and the small likelihood funding actually would be spent in the near term, we recommend the Legislature enact legislation placing before the voters a repeal of Proposition 49.

CHILD CARE

California's subsidized child care system is primarily administered through the State Department of Education (SDE) and the Department of Social Services (DSS). A limited amount of child care is also provided through the California Community Colleges. Figure 1 summarizes the funding levels and estimated enrollment for each of the state's various child care programs as proposed by the Governor's 2005-06 budget.

As the figure shows, the budget proposes about $2.6 billion ($1.3 billion General Fund) for the state's child care programs. This is an increase of about $33 million from the estimated current-year level of funding for these programs. About $1.2 billion (46 percent) of total child care funding is estimated to be spent on child care for current or former California Work Opportunity and Responsibility to Kids (CalWORKs) recipients. Virtually all of the remainder is spent on child care for non-CalWORKs low-income families. The total proposed spending level will fund child care for approximately 488,700 children statewide in the budget year.

Families receive subsidized child care in one of two ways: either by (1) receiving vouchers from county welfare departments or Alternative Payment (AP) program providers, or (2) being assigned space in child care or preschool centers under contract with SDE.

Eligibility Depends Upon Family Income and CalWORKs Participation

CalWORKs and non-CalWORKs families have differential access to child care in the current system. While CalWORKs families are guaranteed access to child care, eligible non-CalWORKs families are not guaranteed access, are often subject to waiting lists, and many never receive subsidized care, depending on their income.

CalWORKs Guarantees Families Child Care. State law requires that adequate child care be available to CalWORKs recipients receiving cash aid in order to meet their program participation requirements (a combination of work and/or training activities). If child care is not available, then

Figure 1

b California Work Opportunity and Responsibility to Kids.

c Includes holdback of reserve funding which will be allocated during 2005-06 based on actual need.

d Significantly reduced due to Governor's reform proposal to move current Stage 3 recipients to general child care.

e Does not include after school care, which has a budget of $250 million and is estimated to provide care for 249,500 school-aged children.

the recipient does not have to participate in CalWORKs activities for the required number of hours until child care becomes available. The CalWORKs child care is delivered in three stages:

- ***Stage 1.*** Stage 1 is administered by county welfare departments (CWDs) and begins when a participant enters the CalWORKs program. While some CWDs oversee Stage 1 themselves, 32 contract with AP providers to administer Stage 1. In this stage, CWDs or APs refer families to resource and referral agencies to assist them with finding child care providers. The CWDs or APs then pay providers directly for child care services.

- ***Stage 2.*** The CWDs transfer families to Stage 2 when the county determines that participants' situations become "stable." In some counties, this means that a recipient has a welfare-to-work plan or employment, and has a child care arrangement that allows the recipient to fulfill his or her CalWORKs obligations. In other counties, stable means that the recipient is off aid altogether. Stage 2 is administered by SDE through a voucher-based program. Participants can stay in Stage 2 while they are in CalWORKs and for two years after the family stops receiving a CalWORKs grant.
- ***Stage 3.*** In order to provide continuing child care for former CalWORKs recipients who reach the end of their two-year time limit in Stage 2, the Legislature created Stage 3 in 1997. Recipients timing out of Stage 2 are eligible for Stage 3 if they have been unable to find other subsidized child care. Assuming funding is available, former CalWORKs recipients may receive Stage 3 child care as long as their income remains below 75 percent of the state median income level and their children are below age 13.

Non-CalWORKs Families Receive Child Care If Space Is Available. Non-CalWORKs child care programs (primarily administered by SDE) are open to all low-income families at little or no cost to the family. Access to these programs is based on space availability and income eligibility. Because there are more eligible low-income families than available child care slots, waiting lists are common. As a result, many non-CalWORKs families are unable to access child care.

GOVERNOR'S CHILD CARE REFORM PROPOSALS

Figure 2 shows the child care reforms proposed by the Governor and their fiscal impact. The Governor's reforms fall into two broad categories: (1) eligibility for child care services and (2) provider reimbursement rates. The changes to eligibility feature a redistribution of child care slots to promote greater equity in child care access between CalWORKs recipients and the working poor. At the center of the rate reforms is a quality-driven tiered reimbursement rate structure. Most of the reforms would only affect the voucher program, leaving the SDE contracted programs basically unaltered.

Figure 2

Administration's Child Care Proposals

2005-06
(In Millions)

Reform	Cost/ Savings
Eligibility	
Moving Stage 3 Child Care Permanently expand the general Alternative Payment (AP) program by shifting all current CalWORKs Stage 3 child care recipients, and the associated funding, to the AP program, limiting guaranteed child care to a maximum of eight years and limiting Stage 3 to one year.	—
Creating Centralized Waiting Lists Require counties to create a two-tiered waiting list for all subsidized child care: the first tier for families below 138 percent of the federal poverty level (FPL) and the second tier for families above that level.	$7.9
Rebenching Child Care Eligibility Shift eligibility determination to FPL measures rather than the current State Department of Education state median income calculations.	—
After School Care for 11- and 12-Year-Olds Designate after school care as the default placement and require parents to submit a reason in writing that they cannot use the available after school program.	-$23.8
Reimbursement Rates	
Tiered Reimbursement Rates Reduce the amount the state is willing to pay license-exempt providers. Further, create fiscal incentives for all providers to raise the quality of the care they provide and encouraging additional training.	-$140.1
Equitable Provider Rates Adopt regulations establishing an alternative rate setting mechanism for providers that only serve subsidized families. These regulations have been suspended for the last two years.	-$8.2

ELIGIBILITY REFORMS

Shifting CalWORKs Families to AP Programs

The Governor proposes to shift Stage 3 California Work Opportunity and Responsibility to Kids (CalWORKs) child care to the State Department of Education's Alternative Payment (AP) program, in addition to creating centralized county waiting lists for subsidized child care. Timing problems under the Governor's proposal may disadvantage current CalWORKs recipients' attempts to receive long-term subsidized child care. To address this issue, we recommend delaying the shift of the Stage 3 program to the AP program until counties have created centralized waiting lists. We also recommend placing current CalWORKs participants on the waiting lists based upon the date that they first had earned income in the program.

Eliminating the Long-Term CalWORKs Child Care Guarantee

Under current law, current and former CalWORKs families are guaranteed child care as long as they meet eligibility requirements and have a need for child care. The Governor proposes shifting all current CalWORKs Stage 3 families (former CalWORKs recipients) into the AP program along with the associated funding and ending the child care guarantee for CalWORKs families. In other words, all families who are receiving Stage 3 child care as of June 30, 2005 would in the future be served by the non-CalWORKs AP voucher program. (Local AP providers assist families in locating child care and distribute vouchers to those families.) This shift would permanently expand the AP program. There would be no impact on families currently receiving service as their child care guarantee would not change. However, any families coming into Stage 3 CalWORKs after this point would be limited to one or two years.

Under this proposal, families who leave CalWORKs after June 30, 2005 would be allowed two years of transitional child care in Stages 1 and 2, and one year in Stage 3. In other words, they would be guaranteed child care for three years after leaving aid. If a family is currently off aid and in Stage 1 or Stage 2, the family would receive two years of Stage 3 child care while they are on the waiting list for a child care slot in the AP child care program. These families' child care guarantee would be for a maximum of four years after leaving aid, depending on the time they have left in Stage 2. Figure 3 shows the guaranteed time in child care for current and former CalWORKs families under current law and under the Governor's proposed reform.

Figure 3

CalWORKs[a] Child Care Current Law and Governor's Proposal

	CalWORKs Child Care Guarantee		
Family Status	**Current Law[b]**	**Governor's Proposal**	**Centralized Waiting List**
Aided family with earnings	Until family's income exceeds 75 percent of SMI[c] or children age out.	Remaining time in CalWORKs plus three years. Same age/income limits.	As soon as list is created.
Aided family without earnings	Same as above.	Same as above.	When parents become employed.
Formerly aided family in Stage 2	Same as above.	Up to two years in Stage 2 and two years in Stage 3.	As soon as list is created.
Formerly aided family in Stage 3	Same as above.	Until family's income exceeds 75 percent of SMI[c] or children age out.	Child care guaranteed. No waiting list.

a California Work Opportunity and Responsibility to Kids.

b Current practice has been to fully fund Stage 3 child care, which allows all former CalWORKs families to be served. However, Stage 3 is not an entitlement and is therefore subject to the appropriation of adequate funding.

c State median income.

This proposal allows all CalWORKs families to place their names on the waiting list as soon as they have earned income. Therefore, CalWORKs families would not have to wait until leaving aid before they can compete for SDE's subsidized child care. However, they would need to wait until they have earned income, which would be problematic for the families nearing their CalWORKs time limits who have been participating in welfare-to-work activities other than employment (such as community service or vocational education). Adults in CalWORKs have a five-year time limit.

We note that in contrast to last year, this proposal preserves the child care guarantee for families already in Stage 3 and allows aided families to place their names on centralized waiting lists as soon as they have earned income. These changes address the major concerns we raised in the *Analysis of the 2004-05 Budget Bill*.

Two-Tiered Waiting Lists

In addition to the changes in Stage 3, the Governor has proposed creating centralized county waiting lists for SDE subsidized child care.

Current Waiting Lists for Subsidized Child Care. There is not enough funding available to serve all of the working poor non-CalWORKs families who qualify for subsidized child care. Therefore, providers create waiting lists for those families seeking subsidized child care. Families place their names on waiting lists in the hopes of receiving assistance with the cost of child care. While there is currently no information on the number of families on waiting lists or the amount of duplication among the lists, it is commonly believed that families place their names on multiple lists in order to increase their chances of receiving subsidized child care. When a provider has a space for a subsidized family, that provider is required to serve the family on their list with the lowest income first, unless the family is referred by child protective services, in which case they receive priority.

Centralized List. The Governor proposes eliminating provider waiting lists and requiring each county to develop a centralized waiting list for all subsidized non-CalWORKs child care. The budget includes $7.9 million (General Fund) for this purpose. County waiting lists would be split into two different tiers, while maintaining the existing priority for families referred by child protective services. Families earning less than $2,168 per month (for a family of four) would be placed in the first tier of the waiting list and would be provided with child care on a first-come, first-served basis. This would include all CalWORKs families with earned income because under current law, a family of four is no longer eligible for CalWORKs once they have an income of $1,951 per month.

The second tier would be for families who have a monthly income above 138 percent of the federal poverty level (FPL), approximately $2,168 per month for a family of four. These families would be served only after all first-tier families have been served. From this list, families would be served based on income, with the lowest-income family served first.

Advantages to Governor's Proposal

Dismantling Stage 3 Helps Create Parity Among All Working Poor Families. Under the current system, families that receive child care through the CalWORKs system have traditionally been guaranteed subsidized child care until their incomes exceed eligibility limits or their children age out of the child care system. Conversely, working poor families that have not participated in the CalWORKs program must compete for the limited subsidized child care slots in their communities. The Governor's proposal permanently expands non-CalWORKs subsidized child care and effectively limits Stage 3 CalWORKs child care to one year. While the total number of child care slots would not change, this would provide greater access to child care for working poor non-CalWORKs families. Some of these work-

ing poor families may have family income significantly below many of the Stage 3 CalWORKs families.

Centralized Waiting Lists Would Provide Critical Information for Policymakers. As mentioned previously, there are virtually no centralized waiting lists in counties and those counties with centralized waiting lists cannot require providers to participate. Consequently, the Legislature and the administration have no way of knowing how many families need subsidized child care and are not receiving it, or the length of time families remain on waiting lists without being served. Centralizing the waiting lists would allow counties to establish an accurate count of families in their communities that are eligible and waiting for subsidized child care, and would allow them to clean up waiting lists by removing duplicate names or families that are no longer eligible for child care. They would also be able to determine the average length of time a family remains on the waiting lists. Having data provides the Legislature with the information it needs to determine the adequacy of California's subsidized child care system.

Implementation Concerns

Centralized Waiting Lists Should Be Created First. The Governor's proposal moves all of the current Stage 3 child care cases as of June 30, 2005 to general AP child care upon passage of the budget. This shift would not impact the current families in Stage 3. However, families in Stage 2 that would be moving to Stage 3 within the next year or so could be adversely affected during the transition period. This is because it will take time for counties to collect and merge all of the existing provider waiting lists in each county and then to sort through duplicate entries and determine whether a family should be placed on the first tier or second tier of the waiting list and in what order. Until this process is completed, there will not be a centralized waiting list for CalWORKs families on which to place their names. Moreover, to the extent that families leave the general AP program before the lists are created, those child care slots may remain unused or will only be available to working poor families on current waiting lists. In order to avoid this confusion and the delay in families receiving subsidized child care, the centralized waiting lists should be created before Stage 3 child care is dismantled.

CalWORKs Recipients May Be Located at the Bottom of the Waiting Lists. According to the administration, the centralized waiting lists in each county will be established by merging all of the existing lists that subsidized child care providers now maintain. As these lists are merged, families will be placed in the higher second tier (above 138 percent of the FPL) in lowest-income-first order. The remaining families (at or below 138 per-

cent of the FPL) will be placed in first-come, first-served order based upon the length of time they have been on their existing lists.

For the most part, the existing waiting lists do not contain the names of current and former CalWORKs families because those families have been served under the CalWORKs child care program. This means that all current or former CalWORKs families with earned income who need child care and are not currently in Stage 3 will have to place their names on the centralized county waiting lists. Most of them will be eligible for the lower first tier (below 138 percent of the FPL) of the waiting lists. Because the waiting lists would be created by merging existing lists that do not include these families, virtually all of the CalWORKs families will be placed at the bottom of the lists. Depending on the availability of subsidized child care and the length of the waiting lists in each county, CalWORKs families that have exhausted much of their five-year CalWORKs time limit will be at a disadvantage and are less likely to receive subsidized child care once their time in the CalWORKs child care program comes to an end.

In order to address this problem, during the initial development of the lists, CalWORKs families with earned income could be placed on the waiting list according to the date that they began working. Theoretically, non-CalWORKs working poor families placed their names on waiting lists when they had their first child and/or began working. Placing CalWORKs families in a similar position on the waiting lists by their work dates creates parity between the two groups. There may be some slight CalWORKs administrative costs associated with determining the appropriate dates for families. However, those costs should be minimal.

Funding May Grow Slightly Faster Under Governor's Proposal. We would note that funding for these former Stage 3 child care slots may grow faster under the Governor's proposal than under the current program. This is because the cost-of-living adjustments (COLAs) and growth adjustments used for subsidized child care are projected to increase at a greater rate than the caseload and COLAs used for CalWORKs child care.

LAO Recommendation

We believe there is considerable merit to the Governor's proposed changes to subsidized child care for CalWORKs families. Shifting CalWORKs Stage 3 child care to AP child care and creating centralized two-tiered waiting lists will allow more equitable access to subsidized child care for all families with very low incomes, whether they have participated in the CalWORKs program or not. However, in transitioning to this new system and essentially dismantling Stage 3 child care, it is important that current CalWORKs families not be disadvantaged. Accordingly, we recommend delaying the shift from Stage 3 to AP child care by

six months, thereby allowing enough time for counties to develop centralized waiting lists that include CalWORKs families within that six-month period. Once a county has a functioning waiting list, it can then shift its child care program.

In order to avoid placing existing CalWORKs families at the bottom of the waiting lists, we recommend placing CalWORKs families on the waiting list based upon the date they first had earned income in the program. However, CalWORKs families will still be expected to take the initiative of signing up for AP child care. To avoid lingering administrative problems, we recommend that CalWORKs families only be given 120 days once the list is functioning to ask to be placed, based upon their employment date. Once the 120-day period is up, CalWORKs families would be placed on the centralized waiting lists on a first-come, first-served basis.

Making these two adjustments to the Governor's proposal will ensure that existing CalWORKs families will be given a level playing field to compete with other working poor families for subsidized child care.

Governor Proposes Further Reforms for 11- and 12-Year-Olds

The Legislature was concerned about the Governor's 2004-05 budget proposal to shift 11- and 12-year-old children to after school programs. Many working poor families, whether CalWORKs or non-CalWORKs, are employed in nontraditional jobs that require working evenings, nights, and weekends. For these families, after school care usually is not a realistic option for their children. Therefore, the Legislature modified the Governor's proposal to encourage, rather than mandate, after school placement. Specifically, families were not required to shift their children to after school care and the Legislature established a reserve to continue to fund child care for these families.

To further strengthen the after school reform from the prior year while recognizing the difficulties faced by some families, the Governor has proposed making after school care the default placement for 11- and 12-year-olds. However, to the extent that this type of care is not acceptable or practical for families, they may submit their reason in writing and receive an alternate form of child care for their children. The budget assumes that 25 percent of families with 11- and 12-year-olds will shift them from child care to after school care.

We believe this modification allows families to continue to have flexibility in their child care decisions and addresses the concerns expressed by the Legislature in the previous budget.

REIMBURSEMENT RATE REFORMS

The Governor's proposal includes two reforms related to provider rates. The first would create a new system of tiered provider reimbursement. The second would revise regulations for determining rates for providers who do not have private pay clients.

Two Types of Service Models—Vouchers and Direct State Contracts

Currently, the state provides child care through two main mechanisms: vouchers and direct contracts with child care centers.

Most Families Receive Child Care Through a Voucher System. The CalWORKs families in any of the three stages of child care receive a voucher from CWD or AP. In addition, the state provides vouchers to working poor families through APs. The combined programs provide about 272,900 children with child care vouchers. The AP or CWD assists families in finding available child care in the family's community, typically placing families in one of three settings—licensed centers, licensed family child care homes (FCCHs), and license-exempt care. The licensed programs must adhere to requirements of Title 22 of the California Code of Regulations, which are developed by DSS' Community Care Licensing Division. These programs are often referred to as Title 22 programs. Currently, Title 22 centers and FCCH providers are reimbursed up to a maximum rate or ceiling of the 85th percentile of the rates charged by private market providers in the area offering the same type of child care. The 85th percentile is determined by the Regional Market Rate's (RMR) survey of public and private child care providers that determines the cost of child care in specific regions of the state. License-exempt care providers are reimbursed up to 90 percent of the FCCHs maximum rate (85th percentile). The relatively high reimbursement level of the vouchers for subsidized care reflects an attempt to ensure that low-income families can receive similar levels of child care service as wealthier families in the same region.

SDE Contracts Directly With Child Care and Preschool Centers. For child care and preschool, SDE contracts directly with 850 different agencies through approximately 2,100 different contracts. These providers are reimbursed with the Standard Reimbursement Rate, $28.82 per full day of enrollment. These providers must adhere to the requirements of Title 5 of the California Code of Regulations and are generally referred to as Title 5 providers.

In the nearby box, we provide a list of the child care terms and corresponding definitions used throughout the remainder of this section.

CHILD CARE TERMINOLOGY

Types of Providers

Voucher Providers. Providers who serve the California Work Opportunity and Responsibility to Kids (CalWORKs) and non-CalWORKS families who receive vouchers for child care.

- ***License-Exempt.*** Relatives or friends without a license for providing childcare.
- ***Title 22 Family Child Care Homes (FCCHs).*** Licensed providers caring for a small number of children typically in their own homes.
- ***Title 22 Centers.*** Licensed centers.

State Department of Education (SDE) Contractors/Title 5 Providers. Providers who contract directly with SDE to provide child care and preschool for primarily non-CalWORKs working poor families.

- ***Title 5 FCCHs.*** Licensed providers caring for a small number of children typically in their own homes. These FCCHs have not only obtained a license, but also meet SDE standards.
- ***Title 5 Centers, Including Preschool.*** Licensed centers that also meet SDE standards.

Other Terms

- ***Alternative Payment (AP) Program.*** The SDE-administered voucher program for non-CalWORKS working poor families.
- ***Standard Reimbursement Rate (SRR).*** The per child rate paid to Title 5 providers that contract with SDE.
- ***Regional Market Rate (RMR).*** Regionally-based market rates used to determine reimbursements to voucher providers.
- ***Maximum Rate.*** The rate ceiling for voucher providers. If they serve private pay clients, providers receive reimbursements equal to their private pay rates, up to the maximum rate. If they do not serve private pay clients, providers are reimbursed at the maximum rate.
- ***FCCH Maximum Rate.*** The 85th percentile of the maximum rate paid to Title 22 FCCHs. Serves as the basis for the license-exempt care rates.

Figure 4 shows the major care types and associated regulations offered through voucher providers and SDE contractors for preschool-aged children. Moving from the left-hand side of Figure 4 to the right, the requirements to provide the specific type of child care become more difficult to meet and suggest a higher level of quality.

Figure 4

Subsidized Child Care Providers Safety and Educational Requirements

Current Law for Preschool-Aged Children

	Voucher Providers			SDE Contractors
	License-Exempt Providers	Title 22 FCCHs	Title 22 Centers	Title 5 Providers Including Preschool
Provider/teacher education and training	None.	None.	Child Development Associate Credential or 12 units in ECE/CD.	Child Development Teacher Permit (24 units of ECE/CD plus 16 general education units).
Provider health and safety training	Criminal background check required (except relatives). Self-certification of health and safety standards.	15 hours of health and safety training. Staff and volunteers are fingerprinted.	Staff and volunteers fingerprinted and subject to health and safety standards.	Staff and volunteers fingerprinted and subject to health and safety standards.
Required ratios	None.	1:6 adult-child ratio.	1:12 teacher-child ratio or 1 teacher and 1 aide for 15 children.	1:24 teacher child ratio and 1:8 adult-child ratio.
Accountability, monitoring, and oversight	None.	Unannounced visits every five years or more frequently under special circumstances.	Unannounced visits every five years or more frequently under special circumstances.	Onsite reviews every three years. Annual outcome reports, audits, and program information.

FCCHs = family child care homes; SDE = State Department of Education; and ECE/CD = Early Childhood Education/Child Development.

The minimum standards for child care offered through the voucher, especially those for license-exempt providers, are generally lower than the standards for Title 5 providers contracted with SDE. For example, license-exempt providers, who are typically relatives, friends, or neighbors of the family needing child care, are *not* required to have any training or to adhere

to adult-to-child ratios. The Title 22 FCCH providers are required to meet minimal health and safety standards, adhere to an adult-to-child ratio, and require a site visit every five years for licensure. Title 22 centers require providers to have some college-level education. The Title 5 providers require a Child Development Teacher Permit, which is issued by the California Commission on Teacher Credentialing. In addition, they have annual program outcome reports and are required to have onsite reviews every three years.

Proposal Creates a Tiered Reimbursement Rate Structure for AP Providers

The Governor proposes to implement a tiered reimbursement rate structure for the voucher child care programs. Tiered reimbursement for child care provides differential reimbursement rates that encourage providers to improve program quality by obtaining additional training and education and improving outcomes as measured by independent standards of quality. We believe that the Legislature should first consider whether tiered reimbursement is desirable, and then decide upon specific levels of reimbursement.

Below, we (1) describe the Governor's proposal, (2) examine the merits of tiered reimbursement, and (3) discuss the appropriate levels for the rates in tiered reimbursement.

Governor's Tiered Reimbursement Proposal

The Governor's proposal creates a five-tiered child care reimbursement rate structure that reimburses voucher providers from 55 percent to 100 percent of the current maximum rates, depending on independent quality ratings, licensing, accreditation, education, and health and safety training. The proposal is summarized in Figures 5 and 6 (see next page). The intent of the proposal is to provide higher reimbursement rates to providers that exhibit higher quality. Figures 5 and 6 show the reimbursement rates for three categories of care—license-exempt, family home care, and center-based care. The figures also show the education and training requirements for the various levels of rates under the Governor's proposal. For license-exempt care, there are two levels: license-exempt and license-exempt plus. The FCCHs and centers are rated according to a three-star system whereby the highest quality providers receive three stars and the lowest one star. Please note that Figure 6 uses the term "environmental rating scale," which is explained below.

Figure 5

Governor's Tiered Reimbursement Proposal For License-Exempt Providers

	Percent of FCCH[a] Maximum	Additional Requirements
License-exempt	55 percent	None.
License-exempt plus	60 percent	License-exempt training, assistant teacher permit, or heath and safety training.

[a] Family child care homes.

Figure 6

Governor's Tiered Reimbursement Proposal For Licensed Providers

Star Rating	Maximum Rate	Additional Requirements	
		FCCHs[a]	Centers
*	75 percent of the 85th percentile RMR.[b]	None.	None.
**	85 percent of the 85th percentile RMR.[b]	Environmental rating scale average of 4 or associate teacher permit.	Environmental rating scale average of 4 or all teachers have teacher permit.
***	85th percentile RMR.[b]	Environmental rating scale average of 5.5, teacher permit, associates degree, or accreditation.	Environmental rating scale average of 5.5, all teachers have bachelor's degree, or accreditation.

[a] Family child care homes.

[b] Regional Market Rate (RMR) survey of providers in the area offering the same type of child care. The RMR will vary by care type.

License-Exempt Rate Reduction of $140 Million. The Governor's entire 2005-06 savings estimate for the tiered reimbursement proposal is based on reductions to license-exempt care rates for the voucher program (CalWORKs Stages 1, 2, and 3 and AP). Under the proposal, the rates of license-exempt care providers with no training would be cut to 60 percent

of the 85th percentile. This reduction would take effect on July 1, 2005. These providers would then have 90 days to obtain the specified training for the second reimbursement tier, license-exempt plus, or their rates will be further cut to 55 percent of the 85th percentile. Figure 7 shows how the changes would affect license-exempt provider rates in a sample of counties in various geographic regions throughout the state. In these counties, license-exempt providers' rates would be reduced by between $182 and $303 per child per month.

Figure 7

Monthly Child Care Maximum Reimbursement Rates

License-Exempt Providers

Percent of FCCH[a] Maximum	Sacramento	San Francisco	Los Angeles	Contra Costa	Fresno	Shasta
90 percent[b]	$526	$780	$585	$624	$488	$468
60 percent[c]	351	520	390	416	325	312
55 percent[d]	321	476	357	381	298	286
Potential Reduction	**-$205**	**-$303**	**-$227**	**-$242**	**-$190**	**-$182**

a Family child care homes.

b Current license-exempt rate limits are based on 90 percent of the FCCH rate maximum (85th percentile) for full-time monthly care for a child age two through five.

c Reflects the maximum reimbursement rates if exempts are limited to 60 percent of the 85th percentile of the FCCH rate maximum.

d Reflects the maximum reimbursement rates if exempts are limited to 55 percent of the 85th percentile of the FCCH rate maximum.

License-exempt providers also would have the option to become licensed as FCCHs. If current license-exempt providers obtain the 15-hour health and safety training in order to meet the license-exempt plus rating, they will have completed the educational and training component of the FCCH licensing requirements. If licensed, providers would have their rates increased significantly, as shown in Figure 6.

Reimbursement Reforms for FCCH and Center-Based Providers Would Not Affect Rates for Two Years. Currently, FCCHs and centers are reimbursed up to the 85th percentile of the RMR. Under the Governor's proposal, providers' rates would be reduced starting in 2007-08 unless the providers demonstrated high program quality through (1) educational attainment, (2) program quality review, or (3) accreditation. Available data

suggest that most providers would need to make significant investments to attain either a two-star or three-star rating.

Educational Attainment Options for Providers. The FCCH providers could achieve a three-star rating (highest rating) by completing 24 units in Early Childhood Education or Child Development, or obtaining a child care teacher permit (which requires 24 units). A two-star rating would require an associate teacher permit. For centers, the education requirements are more stringent. Teachers must have permits (24 units) for a two-star rating center or bachelor's degrees for a three-star rating.

Program Quality Review Options. The FCCH and center providers could agree to an independent assessment of their program through an environmental rating scale system. (See nearby box for a description of environmental rating scales.) Providers would need to score an average of 4 out of 7 on all the subscales for two stars or an average of 5.5 for three stars. The feasibility of meeting rating scale standards is difficult to assess since currently there is no system for independent assessments using environmental rating scales in California.

Program Accreditation. To receive three stars, the FCCHs also could become accredited through the National Association for Family Child Care, and centers could become accredited through either the National Association for the Education of Young Children or the National After School Association. Accreditation can be an arduous and costly process. Currently,

Environmental Rating Scales

Environmental rating scales are used to assess the quality of child care programs. There are numerous such assessments specific to the different ages of children served and the type of care provided. The Early Childhood Environmental Rating Scale (ECERS) has been designed for use in preschool, kindergarten, and child care classrooms which serve children ages two and one-half through five. The ECERS evaluates 43 specific items in seven main categories related to the quality of care: physical environment, basic care, schedule structure, program structure, curriculum, interaction, parenting classes, and staff education. For each of the 43 items, centers are rated on a 7-point scale ranging from inadequate (1) to excellent (7).

Assessment of a single classroom by an experienced rater requires approximately three hours. Generally, anyone can receive training to become a rater. Raters typically are evaluated on a regular basis to calibrate their scoring against standard benchmarks and against scores given by other raters.

less than 1 percent of the FCCH and less than 5 percent of the center-based programs in California are accredited.

The Governor's proposal does not include any savings estimates for the proposed changes to FCCH and center reimbursement maximum rates because they will not take effect for two years. At that point, savings could reach tens of millions of dollars annually.

Proposal to Create Incentives for Quality Makes Sense

We recommend the Legislature consider the Governor's tiered reimbursement proposal in two parts. First, the Legislature should determine if a tiered reimbursement rate structure that provides incentives for quality makes sense. Then the Legislature should determine the appropriate rates for the tiers.

The policy of tying reimbursement rates to a provider's level of training, education, and other factors has merit in that it (1) attempts to promote what research suggests are the characteristics of high quality care; (2) better reflects the cost of providing care; and (3) creates a rating system that is transparent, allowing parents and other stakeholders to easily identify quality options.

Reform Could Promote Child Development

The number of families utilizing nonparental child care has increased significantly in part due to enactment of the 1996 federal welfare reforms and the expansion of federal child care vouchers for low-income families. One federal study in 2000 suggested that the number of families receiving public child care support has increased by over one million nationwide since the 1996 reforms. The voucher system that has emerged in this context reflects an attempt to respond to increasing demand by offering parents choice and flexibility so that they can transition off cash aid and/or maintain employment.

The effort to provide parents with a variety of child care options, however, can result in tension with efforts to provide age-appropriate development and early learning to children served through child care. For example, some families may choose license-exempt care for reasons of convenience and availability. (Many centers and FCCHs have shortages of infant care slots and/or do not operate during nontraditional work hours.) Also, certain regions, especially rural areas, tend to have limited center-based and FCCH providers. At the same time, as we discuss below, placing children in exempt care may result in the children not receiving the learning and development opportunities to which their peers in center-based care and,

to some extent, FCCHs have access. While the child care system should strive to meet the needs of poor and working parents, it should also take into consideration the important early learning and development needs of their children.

Research Suggests Quality Differences by Care Type. Several small demonstration programs, such as the Perry Preschool Project and the Chicago Parent-Child Centers, have established a positive relationship between enrollment in the center-based preschool programs and children's cognitive development. While these studies provide preliminary evidence of the benefits of high quality preschool programs, it is difficult to generalize their findings to the larger child care and preschool market because of their unique qualities as demonstration programs. However, recent academic studies investigating the relative benefits of different child care types in existing settings have provided evidence that center-based programs offer a higher quality of care relative to FCCHs and license-exempt care. Exposure to the higher quality care appears to have significant positive cognitive effects on young children. Particularly important factors in the quality of care are (1) provider education and training, and (2) the stability of the environment (including provider turnover). Stability of care is often problematic when parents must rely on license-exempt providers. Data from Alameda County showing a two-thirds turnover rate among exempt providers in the span of one year suggest that lack of stability may be a significant problem in license-exempt care.

One-Half of Children in Lowest Quality Care. As shown in Figure 8, in California's voucher programs, close to one-half (48 percent) of the children are cared for by license-exempt providers. While the percentage of children enrolled in license-exempt care is highest in Stage 1 (60 percent), the percentage in license-exempt care remains close to 50 percent through Stages 2 and 3. Data from SDE for Stages 2 and 3 and AP show that among the children cared for by licensed providers, less than one-third are enrolled in center-based care. (Data showing the Stage 1 distribution by care type of children in licensed care were not available from DSS.)

Incentives Weighted Toward Lowest Quality Care. As discussed above, Title 5 providers have the highest standards. Yet, in some counties, providers with the lowest standards (license-exempt) are paid at a higher reimbursement rate than the Title 5 providers. Figure 9 compares child care reimbursement rates for the voucher system with the state contracted system. While statewide average rates are similar across care types, in some high-cost counties voucher providers can receive significantly higher reimbursements than the Title 5 contract providers.

Figure 8

Proportion of Children Served in Each Care Type by Program

Care Type	CalWORKs[a] Stage 1	CalWORKs Stage 2	CalWORKs Stage 3	Alternative Payment	Totals
License-exempt	60%	50%	47%	28%	48%

a California Work Opportunity and Responsibility to Kids.

b Family child care homes. The Stage 1 distribution between centers and FCCHs was not available from the Department of Social Services.

Figure 9

Regional Reimbursement Rates for Voucher and Title 5 Providers

Dollars Per Month for Full Day Care

	Vouchers			
	License-Exempt Rate	Family Care Maximum Rate	Center Maximum Rate	Title 5 Providers
High-cost county	$780	$866	$988	$586
Low-cost county	384	427	355	586
Average statewide	505	561	556	586

In fact, in eight Bay Area counties, the current reimbursement rate for license-exempt care providers is greater than the rate for the Title 5 providers. In 21 counties, the rate maximum for Title 22 centers is higher than the rate for Title 5 providers.

These rate differentials are particularly prevalent in some of the most populous regions in the state, thus affecting a disproportionately large number of children. Fifteen percent of children in license-exempt care are cared for by providers who are reimbursed at rates higher than

Title 5 providers. Similarly, more than one-half of the children cared for in Title 22 centers and FCCHs have rate maximums that are higher than the Title 5 reimbursement rate. Under current law, most FCCHs only serve subsidized children, and are thus reimbursed at the maximum rate (please see discussion on the "Pick-Five" regulations below). Data are not available showing the actual rates that Title 22 centers receive, only that the rate maximum exceeds the Title 5 rate for two-thirds of the kids. Given the higher program requirements of Title 5 providers (as discussed in Figure 4), it seems counterintuitive that their reimbursement rates would be lower than the voucher programs.

Tiered System Would Reflect Real Cost of Service Differences

Tiered reimbursement would reflect the differences in the costs associated with providing care and the providers' differential investments of time and money for required training and education. As noted, license-exempt providers' investments and costs, particularly in terms of education and training, are minimal. In contrast, Title 22 centers have to maintain a facility and materials as well as a qualified staff. Title 5 providers not only have significant overhead and operating costs but also have the additional responsibility for student learning and development outcomes through SDE's Desired Results System. The Desired Results System is an evaluation and accountability system to measure the achievement of identified results for children and families.

A Star Rating System Would Make Quality Differences Transparent

The APs and Resource and Referral Networks (R&Rs)—local agencies that help parents place their children in child care settings—currently do not have the authority to recommend one provider over another because of the subjective assessment that such recommendations would involve. A rating system similar to that proposed by the Governor would create a set of transparent and objective criteria that APs and R&Rs could provide to parents attempting to find the best settings for their children. The simplicity of the star-rating system would enhance parents' ability to distinguish between different child care options and give the public at large access to information about the quality of child care offerings.

A Tiered Reimbursement Could Address Significant Problems in the Current System

The current system of reimbursements creates the wrong incentives for providers. Not only is lower quality care often reimbursed at higher rates than higher quality care, these rate differentials can reach in excess of

$200 per child per month. Moreover, the current system only creates a limited impetus for child care providers to seek the higher levels of training and education that research suggests can promote cognitive development in young children. Also, the state does not differentiate the reimbursement rate provided to those with higher educational/quality attainment, and therefore the nonsubsidized public may have a difficult time measuring the quality of a program.

Rate tiers would create a way to address these problems by providing reimbursements that better reflect differences in the cost of care and provide incentives for providers to seek higher levels of education and training. In doing so, tiered reimbursement would also create transparency in the child care system by giving stakeholders an objective basis for making child care placements and holding providers accountable for the quality of the care they offer. Finally, if California adopts a tiered system, it would be following in the footsteps of many other states that have adopted such reforms. According to a national clearinghouse for child care information, 34 states had implemented a tiered rating system for improving child care quality as of 2002. Almost all of them provide financial incentives for higher levels of quality. For these reasons, we recommend that the Legislature transform the current reimbursement rate structure into a tiered reimbursement structure.

Transition Title 5 Provider Reimbursement to RMRs

We recommend the Legislature transition reimbursement rates for Title 5 providers to be based on the rate provided to voucher providers.

As discussed above, Title 5 providers have the highest expectations of the state's subsidized child care programs. However, in some counties the Title 5 reimbursement rates are substantially lower than the market rates. This makes it difficult for Title 5 providers in these areas to compete for qualified teachers and to maintain the quality care that is expected of them. In many counties, these centers would be better off if they became Title 22 centers with lower quality expectations and potentially higher reimbursement rates. In other counties (primarily rural ones), Title 5 providers are reimbursed at rates that are substantially above local market rates. To address this differential treatment of Title 5 providers, we recommend the Legislature transition Title 5 providers to the RMR structure and that they receive the maximum RMR for their region. These changes to the Title 5 provider rates would promote parity with the voucher providers' rates and would help ensure that Title 5 provider rates better reflect regional cost variations. Under this system, many Title 5 providers' rates would increase, while some may decrease.

Reimbursement Rates Should Reflect a Systematic Approach to Improving Quality in Child Care

We recommend the Legislature consider an approach to reimbursement rates that promotes quality and child development while preserving family choice.

As the Legislature considers child care reimbursement rate options, we recommend weighing the Governor's rate reductions and corresponding savings against the potential benefits of alternative approaches to reimbursement rates. We suggest a structure that adheres to the following guiding principles:

- ***Promote Quality and Child Development.*** Reimbursement rate structures should promote quality child care through a system of tiered reimbursements that rewards providers with more advanced training and education, accreditation, and/or higher independent ratings of quality within and across care types. This approach should specifically incorporate SDE contracted Title 5 providers.
- ***Maintain Choice.*** Any modifications to current rates should aim to preserve families' ability to choose from a variety of child care options. Families opt for different child care settings for a variety of reasons and rates should be sufficient to preserve the current range of options, including exempt care.

The first principle appears to generally undergird the Governor's proposal. However, as noted above, the proposal does not address inequities between the Title 5 and the voucher providers.

With regard to the second guiding principle, it is unclear how the Governor's proposal would affect families' choices. Specifically, we are unable to predict how the Governor's proposal would influence child care supply because we do not know how the proposed license-exempt rate reductions would affect license-exempt providers' decisions to leave the child care market, continue providing care at lower rates, or seek licensure as a means to access higher rates. However, we suggest that the Legislature devote attention to these issues as it balances any reductions in child care spending against other K-12 priorities.

There are many different possibilities for rate reforms that could incorporate these guiding principles and also meet other objectives—such as generating savings or maintaining current child care funding levels. If the Legislature wants to implement a reform that is cost neutral, it could pursue a strategy that would implement the proposed five-tiered system while

modifying the proposed rates. Such an approach could preserve current reimbursement rates for FCCH and center-based providers who meet two-star standards and enhance funding for those that attain three-star quality. Reductions in the current license-exempt care rates and one-star providers could offset the increased costs of funding enhancements for the three-star providers. This approach would ensure that centers and FCCHs are able to maintain current levels of service and at the same time offer incentives for improving quality. Under this rate structure, license-exempt care providers could choose to pursue advanced training to enhance their rates as exempt providers or obtain FCCH licensure.

The practices of other states suggest that lowering the license-exempt care reimbursement maximum rate is a reasonable mechanism for generating savings to offset increased rates for higher quality providers. Several other large states reimburse license-exempt care providers at lower rates than California does currently. Most reimburse license-exempt providers between 50 percent and 80 percent of the licensed FCCH rate.

"Pick-Five" Regulations Would Enhance Rate Equity

We recommend the Legislature adopt the Governor's proposal to implement regulations for an alternative rate setting methodology for subsidized child care provider reimbursements when they serve no private pay customers.

Statute requires the state to provide reimbursement rates for voucher programs that do not exceed the local market rates for a provider's community. Also, providers cannot charge the state more than they charge a private paying customer. For providers that serve no private pay customers, it is difficult for the state to determine an appropriate reimbursement rate level. Under current practice, the state reimburses providers without private pay customers at the RMR's maximum rate. This approach likely overpays many providers, especially FCCH providers, and creates negative incentives to serve private pay customers.

Because of these factors, statute directed SDE to develop regulations to determine an alternative reimbursement approach. The State Board of Education adopted regulations for the 2003-04 fiscal year. These regulations, commonly referred to as the Pick-Five regulations, determine the rate for a provider with no private pay customers based on the rates charged by five randomly selected providers in the same or comparable zip codes that have private pay customers. Nevertheless, the Legislature enacted legislation to suspend implementation of these regulations. We believe, however, that the regulations have merit in creating rates for providers without private pay clients. Below, we explain the rationale for the regulations.

There are some communities where it would be difficult for providers to find private paying customers. At the same time, there are many communities where providers could enroll private pay customers, but choose not to because the state will reimburse them at higher-than-market rates if they do not serve private pay customers. This practice appears common in the FCCH environment. Under these circumstances, the state is providing a reimbursement rate that exceeds local market rates. While the Pick-Five regulations do not provide a perfect estimate of the local market costs, they do provide a reasonable proxy. We believe that the Pick-Five system is an improvement on current practice because it does not overpay providers and eliminates the incentive to discourage private pay customers. Accordingly, we recommend that the Legislature permit the existing suspension to expire on June 30, 2005, thus allowing the Pick-Five regulations to be implemented in the budget year. The Department of Finance (DOF) estimates that these regulations would save $8.2 million annually.

New RMR Survey Methodology Shows Promise

We recommend the Legislature require the State Department of Education to report at hearings on the new Regional Market Rate methodology, including how the new survey may improve the accuracy of the Pick-Five regulations.

The SDE has contracted with an independent research firm for a new RMR survey methodology. The new methodology would address problems in the current RMR survey. By reducing nonresponse rates and using a sophisticated new method of grouping providers based on demographic variables, the approach is expected to increase the accuracy of the estimates of market costs of child care in particular communities. The SDE is currently in the process of final reviews and adjustments to the methodology and aims to secure the required approval for adoption from DSS and DOF during the current tear. The SDE is planning to implement the new RMR survey in 2005-06.

In setting reimbursement rates for child care, the Legislature should strive to use the most accurate data possible. It appears that the new methodology may offer some distinct advantages over the previous survey approach. We recommend that the Legislature request a complete report on the new RMR survey methodology at hearings. While we support the new methodology in concept, we believe it requires substantial review because it is likely to significantly affect reimbursement rates providers receive in the budget year. We also think that this new methodology may improve the quality of the information used to meet the Pick-Five regulations, especially in communities with limited numbers of providers serving private

pay customers. For these communities, the new methodology may be able to use information on provider rates in demographically similar communities in other parts of the state.

COMMISSION ON TEACHER CREDENTIALING (6360)

The Commission on Teacher Credentialing (CTC) was created in 1970 to establish and maintain high standards for the preparation and licensing of public school teachers and administrators. The CTC issues permits and credentials to classroom teachers, student services specialists, school administrators, and child care instructors and administrators. In total, it issues almost 200 different types of documents. In addition to setting teaching standards and processing credentials, the commission (1) performs accreditation reviews of teacher preparation programs; (2) develops, monitors, and administers licensure exams; and (3) investigates allegations of wrongdoing made against credential holders. The CTC also administers two local assistance activities—the Internship and Paraprofessional Teacher Training programs.

The CTC receives revenue from two primary sources—credential application fees and teacher examination fees. Application fee revenue is deposited into the Teacher Credential Fund (TCF) and examination fee revenue is deposited into a subaccount within the TCF, the Test Development and Administration Account (TDAA). These revenues support CTC's operations. The General Fund supports CTC's two local assistance programs.

Below, we discuss concerns we have with CTC's TCF and TDAA fund conditions for 2004-05 and 2005-06. We first discuss discrepancies in the current-year TDAA fund condition. We then discuss the Governor's budget proposal, under which both the TCF and TDAA would end 2005-06 without a prudent reserve.

Revised TDAA Fund Condition Requires Additional Explanation

We recommend the Legislature direct the Commission on Teacher Credentialing to explain during budget hearings why its 2004-05 beginning balance and revenue assumptions have changed so significantly within such a short amount of time.

Figure 1 compares the 2004-05 TDAA fund condition as estimated in January 2004 and November 2004. The January fund statement is critical because it was presented to the Legislature as part of the 2004-05 proposed budget, and its revenue and expenditure estimates form the basis of the *2004-05 Budget Act*. The November fund statement revises the 2004-05 budget and establishes a base for the Governor's 2005-06 budget proposal.

As Figure 1 shows, there are large differences between the original and revised TDAA fund condition for 2004-05. In every respect, the revised fund condition is troubling. The CTC now expects to have a 2004-05 beginning balance only one-half of what it had originally estimated. In addition, its revenue estimate is down by $4.1 million. This represents a substantial decline (41 percent) even though the TDAA revenue stream tends to be rather stable. Whereas revenues are now expected to be much lower than originally anticipated, expenditures have increased slightly. The result of all these revisions is that CTC now expects to end the current year with a reserve of $2.3 million rather than the $9.3 million assumed in the *2004-05 Budget Act*.

Figure 1

Large Current-Year Fund Changes Require Additional Explanation

Test Development and Administration Account (In Millions)

	2004-05	
	January 2004	November 2004
Revenues		
Beginning balances	$5.1	$2.5
Revenues	13.9	9.8
Subtotals	($19.0)	($12.3)
Expenditures/ Transfers		
Expenditures	$9.7	$9.7[a]
Transfers to TCF[b]	—	0.3
Subtotals	($9.7)	($10.0)
Ending Balances	**$9.3**	**$2.3**

[a] Expenditures have increased by $56,000.

[b] Teacher Credential Fund.

In response to our inquiries, CTC was not able to provide clear answers as to why its current-year budget had experienced such unforeseen changes. It asserts that the changes are due to a transition it currently is undergoing with its test contractors. Rather than test fees being funneled through CTC, test fees are now to flow directly from test takers to test contractors. Changing its relationship with its test contractors in this way would reduce the amount of test revenue it reflects in its fund condition, but it also would reduce, dollar-for-dollar, its expenditures. Thus, it seems very unlikely that this transition is explaining the large discrepancies noted above in the TDAA fund balance.

The Legislature needs an accurate current-year fund statement both to ensure CTC has proper fiscal management and to make well-informed budget-year decisions. One of the reasons the Legislature did not raise the credential application fee in 2004-05 was because the TDAA was projected to end the year with a substantial reserve. Without confidence in the fund statements, the Legislature is likely to have difficulty deciding how to proceed in the budget year, and it might be placed in the awkward position of increasing the credential application fee unnecessarily or having CTC run a deficit without a reserve to cover it. For these reasons, we recommend the Legislature direct CTC to explain (1) why such large changes to its TDAA fund statement have occurred in such a short amount of time and (2) if other revisions are expected.

If Fund Statements Reliable, Action Should Be Taken to Keep CTC Solvent

If the Commission on Teacher Credentialing (CTC) can show that it will not have a prudent reserve at the end of 2005-06, then we recommend the Legislature consider various options for maintaining CTC's solvency.

One of the reasons the current-year TDAA fund balance is so critical is because, under the Governor's budget proposal, both the TCF and TDAA would end 2005-06 with no reserve. Figure 2 shows the TCF and TDAA fund balances for the prior year, current year, and budget year.

If CTC can provide clear and accurate fund statements that show it would end 2005-06 without a prudent reserve, then we recommend the Legislature consider the following options for maintaining CTC's solvency.

Increase the Credential Application Fee. Every $5 increase in the application fee generates an estimated $1.1 million. This amount equates to a TCF reserve of 7 percent, which typically would be deemed a modest reserve for a small state agency. (Given the TDAA also is to end the budget year without a prudent reserve, the Legislature might want to consider a slightly larger fee increase in 2005-06 or 2006-07.)

Figure 2

If Fund Statements Reliable, CTC Would End 2005-06 With No Reserve

(Dollars in Millions)

Automate or Devolve Credentialing Authority. The Governor's budget includes a proposal that would entrust accredited university-run teacher preparation programs with essentially preapproving the credential applications they submit to CTC, and CTC in turn would grant the official credential without further review. As CTC currently evaluates more than 50,000 applications submitted from universities, this would notably re-

duce CTC's workload. Given it represents a reasonable and feasible option for achieving greater efficiencies, the Legislature may want to approve this proposal.

The Legislature also may want to consider related options that might achieve even more substantial efficiencies. It could consider authorizing a similar preapproval process for district-run teacher preparation programs and community college child development programs. (In addition to the credential applications noted above, CTC currently reviews approximately 10,000 child development permits.)

Alternatively, the Legislature could consider establishing a pilot program that would devolve issuance authority to teacher preparation and child development programs. These programs already hire their own credential/permit analysts, already review their students' applications, and already recommend approved candidates to the CTC. A pilot program would entrust these campuses with actually issuing the credential/permit to the applicants, thereby eliminating CTC's cursory review process altogether. Participating campuses could be required to issue their credentials/permits prior to the beginning of the school year. This in turn would reduce county workload because county offices of education must issue temporary county certificates to credential applicants who, prior to the beginning of the school year, have not yet received their official CTC document.

Pursue Additional Efficiencies. The *2004-05 Budget Act* included budget bill language requiring CTC to submit a report to the Legislature and the Department of Finance that identified "at least three feasible options to further reduce processing time that could be implemented in 2005-06." The CTC submitted its report, which contains five efficiency options. (The commission is in the process of implementing some of these options.) Among the options is a proposal to conduct a public relations campaign to encourage more teachers to renew their credentials online and two proposals to eliminate hard copies of documents and instead provide only online access. Several of these proposals hold promise. The public relations campaign, for instance, could yield considerable long-term pay-off (as only 36 percent of eligible applicants currently renew online). The two online proposals also would reduce workload and postage costs. The Legislature may want CTC to provide periodic updates on its implementation of these efficiency initiatives.

In sum, the Legislature has a number of options for addressing a funding shortfall. Unless CTC can provide more reliable fund statements, it will however have difficulty knowing whether CTC is actually likely to experience a shortfall. If CTC can provide clear and accurate fund statements that show a likely budget-year shortfall, then it should offer the Legislature viable alternatives for addressing it. Ideally, CTC would submit a proposal

that contains revenue options (for example, an increase in the credential application fee) and expenditure options (for example, an estimate of personnel savings under various efficiency options). We recommend the Legislature direct CTC both to provide more reliable fund statements and present various options for addressing a potential shortfall.

OTHER ISSUES

Few Details on Other Proposals

We recommend the Legislature reject several new initiatives proposed in the budget unless the administration makes available complete proposals including a narrative that explains their rationale.

The Governor's budget for K-12 education contains a number of other proposals for which few details were available at the time this analysis was prepared. A complete budget proposal generally includes a narrative explaining the need for the program and the rationale for the approach proposed, a detailed description of the fiscal structure of the new program, and proposed budget or statutory language needed to implement the proposal. The budget provides none of this supporting material for the proposals discussed below. In several cases, the budget proposal also fails to identify how the new activities would be funded in the budget year.

The Legislature's budget process is designed to ensure that the state's fiscal plan targets funds to the state's highest priorities. Without a thorough understanding of the recommended changes, the Legislature is unable to evaluate the costs and benefits of the Governor's proposals. Therefore, unless the administration provides the Legislature with a complete package of supporting material for these proposals, we recommend the Legislature reject them.

This would be unfortunate because, in most cases, the concepts forwarded in the Governor's budget for K-12 appear to have merit. Below, we describe each proposal for which we received no supporting material and discuss our initial reaction to it.

Accelerated English Language Acquisition Program (ELAP). The budget would redirect $57.6 million in funds for ELAP and use the funds to provide staff development in teaching instruction to English learner (EL) students. Currently, ELAP funds are distributed to districts for services to EL students in grades 4 through 8. The new staff development program would serve teachers in these grades with services modeled on the existing Reading First staff development program. Reading First is a federally funded

program that provides districts with a minimum of $6,500 per K-3 teacher for reading professional development.

The most recent evaluation of ELAP suggests the current program has little impact on student learning. For this reason, we would support proposals that use these funds more effectively. In addition, we also believe that helping EL students learn English quickly is a critical task for the state's education system. The proposal raises several issues, however. Dedicating $50 million for a yet-unproven staff development program appears to be going too far, too fast. Moreover, no justification has been given why the Reading First model would be an effective approach for helping teachers meet the needs of EL students. Finally, given that English language development for most EL students in California begins in kindergarten, it is not evident why focusing on teachers in grades 4 through 8 is the most effective approach to helping this group of students.

Intervention in Low-Performing Schools. The budget proposes to convert failing schools into charter schools or assume management of the schools through a School Recovery Team. The budget proposal would place an unknown number of schools that are failing to meet state or federal performance goals into this intervention program.

Most critically, the budget does not identify how the administration proposes to support the new program. The budget is silent on the cost of the intervention, the length of time state teams would manage the schools, and what happens to the schools after the state leaves. We also note the budget proposal continues the past focus of intervention on individual schools. We think the state should concentrate most of its efforts on improving low-performing *districts* rather than schools. Since districts affect so many elements of school success—including teacher assignment, curriculum and instructional development, and resource decisions—we think a focus on improving districts has more promise than a state takeover of schools.

Delegating Budget Decisions to the School Site. The Governor's budget proposes a pilot program for determining the costs and benefits of school site budgeting and decision making. The pilot would test the concept in a small number of districts that volunteer for the program. As part of the pilot, schools would be given more flexibility over the use of state categorical program funds in order to help the sites use funds most effectively to meet student needs.

Districts in California and in other states currently are devolving a greater amount of budget discretion to school sites. Decentralization appears sufficiently promising that a study of the costs and benefits of the approach has merit. Details of the proposal, however, were not available at the time this analysis was prepared. How the proposal would extend greater

flexibility over categorical program resources to participating schools constitutes a critical detail. The proposal also failed to clearly specify the goals of the pilot and the criteria that would be used to measure its success. In addition, the Governor's proposal does not provide any resources to districts for planning or for the evaluation of the pilot.

Fitness and Nutrition Initiative. The budget proposes an initiative to prevent child obesity. According to the budget document, the initiative includes several school-based efforts such as improving the nutritional quality of food and beverages, increasing opportunities for physical activities, and making fresh fruit and vegetables more available. The budget includes $6 million in the Department of Health Services (DHS) budget for a series of obesity reforms, but provides no funding in the K-12 portion of the budget.

Data provided in the budget document indicate that the number of overweight children has grown significantly over the last two decades. The proposal, however, provides no specific details about how the school-based initiatives would be funded or implemented. Funding proposed in the DHS budget could support some of the proposed activities in schools. For example, the proposal provides $3 million for grants to community organizations to implement projects involving schools and other local agencies. No information was available on whether the DHS program was intended to support the K-12 activities or whether the administration expects to identify another funding source for the education component of the program. (Please see our analysis of the DHS proposal in the "Health and Social Services" chapter.)

INTRODUCTION

Higher Education

The Governor's budget proposes a $663 million augmentation in General Fund expenditures for higher education in 2005-06. This represents a 7.5 percent increase from the revised 2004-05 amount. The Governor's proposal also assumes the enactment of student fee increases which, when coupled with changes in all other revenue sources, would increase total higher education funding by $1.3 billion, or 4 percent. The budget funds cost-of-living adjustments and enrollment growth at the three public higher education segments, as well as increased costs of the Cal Grant program.

Total Higher Education Budget Proposal

As Figure 1 (see next page) shows, the 2005-06 budget proposal provides a total of $34.6 billion from all sources for higher education. This amount is $1.3 billion, or 4 percent, more than the Governor's revised current-year proposal. The total includes funding for the University of California (UC), the California State University (CSU), California Community Colleges (CCC), Hastings College of the Law, the Student Aid Commission (SAC), and the California Postsecondary Education Commission. Funded activities include instruction, research, and related functions, as well as other activities, such as providing medical care at UC hospitals and managing three major U.S. Department of Energy laboratories. The Governor's current-year estimates include a variety of technical adjustments.

Major Funding Sources

The 2005-06 budget proposal provides $9.5 billion in General Fund appropriations for higher education. This amount is $663 million, or 7.5 percent, more than proposed current-year funding. The budget also projects that local property taxes will contribute $1.8 billion for CCC in 2005-06, which reflects an increase of $77 million, or 4.4 percent, from the revised current-year amount.

[a] Excludes payments on general obligation bonds.

In addition, student fee revenue at all the public higher education segments account for $3.6 billion of proposed expenditures. This is $263 million, or 8 percent, greater than student fee revenue in the current year. This increase is primarily due to planned fee increases at UC and CSU. (The Governor does not propose any fee increase for CCC.) The budget also includes $968 million in other state funds (such as lottery and tobacco funds), reflecting a decrease of $143 million, or 12.9 percent.

Finally, the budget includes $18.7 billion in nonstate revenue—including federal funding, private contributions to the universities, and other revenue. This amount is $475 million, or 2.6 percent, more than the revised current-year level. The amounts in Figure 1 do not include capital outlay expenditures or the General Fund costs associated with paying off general obligation bonds. These costs are discussed in the "Capital Outlay" chapter of this *Analysis*.

Funding by Segment

For UC, the budget proposal provides General Fund appropriations of $2.8 billion, which is a net $97.5 million, or 3.6 percent, more than the proposed current-year estimate. The Governor's budget also anticipates that, largely as a result of planned fee increases, student fee revenue will increase by $150 million. When General Fund and fee revenue are combined, UC's budget would increase by 5.5 percent.

For CSU, the budget proposes $2.6 billion in General Fund support, which is a net increase of $111 million, or 4.4 percent, from the revised current-year level. With proposed fee increases, student fee revenue would increase by $101 million. Total General Fund and fee revenue combined would increase by 5.9 percent.

For CCC, the Governor's budget proposes $3.4 billion in General Fund support, which is $299 million, or 9.8 percent, above the current-year amount. Local property tax revenue (the second largest source of CCC funding) would increase by 4.4 percent, to $1.8 billion. The Governor's budget does not propose an increase in student fee levels at CCC. Combined, these three sources of district apportionments (General Fund support, property taxes, and fee revenue) would amount to $5.5 billion, which reflects an increase of $387 million, or 7.5 percent.

Major Cost Drivers for Higher Education

Year-to-year changes in higher education costs are influenced by three main factors: (1) enrollment, (2) inflation, and (3) student fee levels.

Enrollment Growth. For UC and CSU, the state uses a "marginal cost" formula that estimates the added cost imposed by enrolling one additional full-time equivalent student. This estimate includes instructional costs (such as faculty salaries and teaching assistants), related educational costs (such as instructional materials and libraries), administrative costs, and student services. Because faculty (particularly at UC) spend part of their time performing noninstructional activities such as research, the marginal cost formula "buys" part of these other activities with each additional student enrolled. A similar approach is used for funding enrollment growth at CCC, although there are technical differences in how funding is calculated. (We discuss marginal cost funding in some detail in an intersegmental issue later in this chapter.)

Inflation. Higher education costs rise with general price increases. For example, inflation increases the costs of supplies, utilities, and services that are purchased by campuses. In addition, price inflation creates pressure to provide cost-of-living adjustments to maintain the buying power of faculty and staff salaries.

Student Fees. Student fees and General Fund support are the two primary funding sources for the segments' instructional programs. The Legislature generally considers fee increases either to (1) *maintain the share* of costs supported by fees as the segments' budgets increase yearly, or (2) *increase the share* of total costs supported by fees.

Major Budget Changes

The Governor's higher education budget proposal results primarily from base increases (essentially to compensate for inflation), enrollment increases, and increased financial aid costs. Figure 2 shows the major General Fund budget changes proposed by the Governor for the three segments.

Enrollment Growth. The Governor proposes enrollment increases of 2.5 percent at UC and CSU, and 3 percent at CCC. Figure 3 (see page E-146) shows enrollment changes at the three segments. We discuss proposed enrollment levels in more detail later in this chapter.

Student Fees. For UC and CSU, the Governor proposes fee increases of 8 percent for undergraduate students and teacher credential students, and 10 percent for graduate students. The Governor's budget does not account for the continued phase-in of higher fees for students taking "excess" course units. That fee phase-in was proposed by the Governor in the 2004-05 budget, and accepted by the Legislature. For 2005-06, the excess course unit policy is to generate $25.5 million in General Fund savings. Once fully implemented over five years, the excess course unit policy would raise student fees to the full marginal cost of education for students taking more than 110 percent of the credit units required for graduation.

Figure 2

Higher Education
Proposed Major General Fund Changes

University of California	**Requested:**	**$2.8 billion**	
	Increase:	**$97.5 million**	**(+3.6%)**

Base Augmentation: Provides $76.1 million for a 3 percent base funding increase.

Enrollment Growth: Provides $37.9 million for 2.5 percent enrollment growth, which is sufficient to fund 5,000 additional full-time equivalent (FTE) students.

Budget Reductions: Eliminates $3.8 million for Labor Institutes, and makes a $17.3 million reduction to enrollment and/or outreach. (The university would decide how to allocate this reduction between these two activities.)

California State University	**Requested:**	**$2.6 billion**	
	Increase:	**$111 million**	**(+4.4%)**

Base Augmentations: Provides $71.1 million for a 3 percent base funding increase, and $44.4 million for increased retirement costs.

Enrollment Growth: Provides $50.8 million for 2.5 percent enrollment growth, which is sufficient to fund 8,100 additional FTE students.

Budget Reduction: Includes a $7 million reduction to enrollment and/or outreach. (The university would decide how to allocate this reduction between these two activities.)

California Community Colleges	**Requested:**	**$3.3 billion**	
	Increase:	**$299 million**	**(+9.8%)**

Cost-of-Living Adjustments (COLAs): Provides $196 million for a COLA of 3.93 percent for apportionments and selected categorical programs.

Enrollment Growth: Provides $142 million for 3 percent enrollment growth (to fund about 34,000 additional FTE students).

Other Augmentations: Includes $20 million one-time funding to create new vocational curricula that link K-12 and community college classroom work. Also, sets aside an additional $31.4 million that would be added to general apportionments, contingent on the Board of Governors' adequately responding to legislation requiring the development of a district-level accountability proposal.

Technical Reductions: Reduction of $90.1 million which adjusts for increased fee and property tax estimates.

Figure 3

Higher Education Enrollment

Full-Time Equivalent Students

	Actual 2003-04	Budgeted 2004-05	Proposed 2005-06	Change	
				Amount	Percent
University of California					
Undergraduate	155,754	155,647	159,730	4,083	2.6%
Graduate	32,874	32,963	33,860	897	2.7
Health sciences	13,268	12,366	12,386	20	0.2
UC Totals	**201,896**	**200,976**	**205,976**	**5,000**	**2.5%**
California State University					
Undergraduate	278,774	272,419	279,207	6,788	2.5%
Graduate/postbacalaurate	52,931	51,701	53,016	1,315	2.5
CSU Totals	**331,705**	**324,120**	**332,223**	**8,103**	**2.5%**
California Community Colleges	1,108,348	1,142,987	1,177,276	34,289	3.0%
Hastings College of the Law	1,261	1,250	1,250	—	—
Grand Totals	**1,643,210**	**1,669,333**	**1,716,725**	**47,392**	**2.8%**

For CCC, the Governor proposes no increase in student fees. Resident students at CCC would continue to pay $26 per unit—the lowest fee in the country. Proposed student fees are shown in Figure 4, and are discussed in more detail later in this chapter.

Student Financial Aid. The Governor's budget provides $746 million in General Fund support for SAC, primarily for the Cal Grant programs. This reflects an increase of $156 million from the revised current-year level. About two-thirds of this increase would be used to backfill a reduction in funding from the Student Loan Operating Fund (SLOF). About $147 million in surplus funding in the SLOF was used on a one-time basis in the current year to achieve General Fund savings. For 2005-06, the Governor proposes a smaller one-time shift of $35 million from the SLOF. The remaining increase in General Fund support for SAC is largely due to higher fees at UC and CSU (which are covered by Cal Grants) and a projected increase in the number of Cal Grant awards.

Figure 4

Annual Education Fees for Full-Time Resident Students[a]

	Actual 2003-04	Actual 2004-05	Proposed 2005-06	Change From 2004-05	
				Amount	Percent
University of California					
Undergraduate	$4,984	$5,684	$6,141	$457	8%
Graduate	5,219	6,269	6,897	628	10

Teacher education	2,256	2,706	2,922	216	8
Graduate	2,256	2,820	3,102	282	10
California Community Colleges	$540	$780	$780	—	—

a Fees shown do not include campus-based fees.

b The University of California currently charges special fee rates for nine professional programs—including the four shown. The Governor's budget proposes to charge a special rate ($10,897) for three additional programs—Public Health, Public Policy, and International Relations and Pacific Studies.

BUDGET ISSUES

Higher Education

INTERSEGMENTAL: HIGHER EDUCATION "COMPACT"

The Governor's 2005-06 budget proposal generally follows a "compact" between the Governor and the University of California (UC) and the California State University (CSU), agreed to in spring 2004. In return for specific funding commitments over the next six years, UC and CSU have agreed to meet various performance expectations negotiated with the Governor. Below, we explain our concerns with the Governor's compact and advise the Legislature to disregard it for budgeting purposes. Instead, we recommend the Legislature continue to use the annual budget process as a mechanism to fund its priorities and to hold the segments accountable for fulfilling the mission assigned to them by the **Master Plan for Higher Education.**

Background

In 1960, the state adopted a fiscal and programmatic roadmap for higher education in the form of the *Master Plan for Higher Education*. This document defines California's higher education goals and outlines strategies for achieving them. The guiding principle expressed in the Master Plan is that all qualified Californians should have the opportunity to enroll in high quality, affordable institutions of higher education. To achieve this goal, the Master Plan addresses various overarching matters, including governance structures and mission differentiation. It also establishes guidelines for eligibility pools, transfer policies, enrollment planning, facility utilization, financial aid, and other policy areas. The Master Plan has proven

to be a remarkably enduring planning document, enjoying bipartisan support since its adoption. Starting in the mid-1990s, the state's public universities have entered into a series of nonbinding funding compacts to try to gain greater fiscal and programmatic stability.

Previous Higher Education Funding Agreements. In 1995, UC and CSU entered a four-year compact with the Wilson Administration following several years of fiscal uncertainty caused in large part by the state's economic recession. Under the agreement, the Governor committed to request at least a specified level of General Fund revenue in his annual budget proposals to support base budget increases, enrollment growth, and other priorities. In return, UC and CSU agreed to meet certain program objectives. Desiring to extend this arrangement, UC and CSU negotiated a new agreement with the Davis Administration in 1999. This agreement, known as the "Partnership," contained many of the same provisions of the previous compact. The Partnership agreement lasted from 1999 through 2003.

Previous Agreements Did Not Deliver Expected Funding. The Partnership agreement included provisions for a 5 percent annual base increase for UC and CSU. However, the state experienced a pronounced fiscal deterioration, caused by significantly lower-than-expected revenues. As a result, the Governor proposed in the May Revision to his 2001-02 budget to provide UC and CSU with a 2 percent base increase instead of the 5 percent called for under the Partnership. The following year he proposed a 1.5 percent base increase—again, less than outlined in the agreement. As shown by these and other experiences, the provisions of the segments' funding agreements are primarily expressions of intent at a point in time. They have not and cannot guarantee budgetary predictability to the public universities.

Development of the Current Agreement. In developing his budget proposal for 2004-05, the Schwarzenegger Administration confronted an estimated $17 billion General Fund shortfall. The Governor proposed to make up for some of this with General Fund reductions for UC and CSU, much of which was "backfilled" with revenue from student fee increases. While this budget proposal was being deliberated in the Legislature, the Governor developed a new compact with UC and CSU to provide annual budget increases beginning in 2005-06. The 2004-05 budget adopted by the Legislature approved some of the Governor's proposals for reductions at UC and CSU and significantly modified a few of them. The enacted budget made no reference to the compact.

Major Terms of the Current Agreement. The current compact would guide the Governor's budget proposals for the public universities through 2010-11. As Figure 1 shows, the compact establishes annual funding targets, including base increases of 3 percent (increasing to 4 percent in 2007-08

and 5 percent in 2008-09), 2.5 percent annual increases in enrollment funding, and annual fee increases that would generate additional funding to be used at the segments' discretion. As part of the compact, the segments agree to meet various programmatic expectations and to provide annual reports with specified information. (These are outlined in Figure 2 (see next page) and discussed in further detail later in this section.)

Figure 1

Major Funding Provisions of the Governor's Compact With UC and CSU

	2005-06	2006-07	2007-08	2008-09	2009-10	2010-11
General Fund Augmentations						
Base increase	3.0%	3.0%	4.0%	5.0%	5.0%	5.0%
Enrollment growth	2.5	2.5	2.5	2.5	2.5	2.5
Student Fee Increases						
Undergraduate fees	8.0%	8.0%	—[a]	—[a]	—[a]	—[a]
Graduate fees (minimum increase)	10.0	10.0	—[b]	—[b]	—[b]	—[b]

Other Provisions

Phase in excess course unit fee (over five-year period ending in 2008-09).

Full funding of lease-revenue debt service, annuitant health benefits, and other expenses.

General obligation bond support of $345 million per segment, per year, for capital outlay.

a Starting in 2007-08, undergraduate fees are to change at the same rate as per capita personal income. The compact permits fees to increase further—up to 10 percent—if required by "fiscal circumstances."

b Graduate student fees are dependent on the development of a fee policy in which graduate fees gradually increase to 150 percent of undergraduate fees.

CONCERNS WITH THE COMPACT

The Governor's budget proposal for higher education largely is guided by his compact. Below, we identify several concerns with it.

Compact's Funding Targets Are Disconnected From Master Plan

The compact's funding expectations for enrollment growth, base increases, and student fees have no direct link to funding needs derived from the Master Plan.

No Link Between Master Plan and Compact's Enrollment Targets. The Master Plan provides guidance on eligibility criteria for each of the higher

education segments. Specifically, UC is directed to accept students from the top one-eighth (12.5 percent) of high school graduates, CSU from the top one-third (33.3 percent) of high school graduates, and community colleges are to accept all applicants 18 years of age and older who can benefit from attendance. A recent report by the California Postsecondary Education Commission (CPEC) showed that in 2003, UC and CSU's eligibility criteria were not aligned with the eligibility targets outlined in the Master Plan. According to CPEC's analysis, UC drew its students from the top 14.4 percent of high school graduates (exceeding its 12.5 percent target by about one-seventh) and CSU drew its students from the top 28.8 percent of high school graduates (falling short of its 33.3 percent target by a similar proportion).

Figure 2

Major Accountability Provisions of the Governor's Compact With UC and CSU

- ✓ Meet Master Plan eligibility targets.
- ✓ Complete lower division major preparation agreements by the end of 2005-06.
- ✓ Provide summer instruction to at least 40 percent of the average fall/winter/spring enrollment by 2010-11.
- ✓ Improve student persistence and graduation rates.
- ✓ Improve supply of science and mathematics teachers.
- ✓ Approve college preparatory courses that integrate academics with technical content.
- ✓ Strengthen community service programs.
- ✓ Provide accountability report on various performance measures annually to the Legislature and Governor.

The annual increases in enrollment called for in the compact show no obvious link to the Master Plan's eligibility targets. They appear neither to address the mismatch between the Master Plan eligibility targets and current practice nor to mesh with projected growth in the college-age population over the next few years. Instead, the compact would provide UC and CSU identical fixed levels of annual enrollment growth for the term of the

agreement. In contrast, we believe the Legislature should make enrollment funding decisions annually to provide the segments with the resources necessary to meet their Master Plan eligibility targets.

No Link Between Master Plan and Compact's Base Increases. The state's public universities, like other institutions, experience increases in their program costs due to inflation. In order to maintain the Master Plan's commitment to support quality academic programs, therefore, the Legislature periodically increases the segments' base budgets. To maintain the same purchasing power, these base increases would generally track an inflationary index such as the state and local deflator. The Governor's agreement with the segments, however, prescribes specific base increases through 2010-11, irrespective of the rates of inflation the segments will actually experience. Under the Governor's agreement with UC and CSU, the proposed base increases might match, exceed, or fall behind the annual rate of inflation.

We believe the Legislature should consider increasing the public universities' base budgets to adjust for the effects of inflation during annual budget hearings. Such consideration should weigh providing these increases against competing budget priorities. In this way, the Legislature maintains flexibility in the allocation of budget resources.

Compact's Fee Targets Are Arbitrary. The State Constitution confers on the Board of Regents the power to set student fee levels for UC, and the Legislature statutorily confers on the Board of Trustees the power to set fee levels for CSU. Both universities in recent years have determined fee levels as a response to the state's fiscal situation. For example, in the late 1990s, the public universities reduced fees—despite a strong economy and burgeoning financial aid opportunities—because state General Fund revenue was available to substitute for some fee revenue. Over the last couple of years, UC and CSU have raised student fees significantly to compensate for General Fund reductions. The Governor's agreement with the segments prescribes annual fee increases through 2010-11. Specifically, the compact proposes 8 percent fee increases in undergraduate fees in 2005-06 and 2006-07, with subsequent increases based on the change in per capita personal income. Graduate fees would increase by at least 10 percent in 2005-06 and 2006-07, with the segments committing to "make progress" in subsequent years toward the goal of raising graduate fees to 150 percent of undergraduate fees. This policy would ensure that fee increases are relatively moderate and predictable, but it does not provide an underlying policy rationale for the actual fee levels.

We believe the Legislature should instead adopt a long-term fee policy that results in students paying a fixed percentage of their total education costs each year. The size of the students' share would be a policy choice for the Legislature to make. This policy would provide an underlying ratio-

nale for fee levels, ensure moderate and gradual fee increases, and reflect underlying costs.

Compact Would Place Higher Education Funding on "Autopilot"

Compact Seeks Routine Increases. Rather than allowing for an annual review to reassess budget assumptions, the Governor's compact seeks automatic spending increases for UC and CSU. By prescribing specific targets for enrollment growth and base budget increases, the compact attempts to lock into place specific funding levels, thereby putting higher education on autopilot. As shown in Figure 3, by the final year of the compact, UC and CSU's General Fund support is projected to increase by about $2 billion from the 2004-05 level. When combined with student fee revenue, total resources for UC and CSU would increase by more than more $3.2 billion. In contrast, our projections of population growth and inflation suggest that UC and CSU would require an additional $1.8 billion in 2010-11, or about 60 percent of the increase called for by the compact. (Note: These figures do not include other increases that would be provided under the compact—such as funding for annuitant health benefits and capital outlay-related expenses.)

Figure 3

Funding Expectations Under Governor's Compact[a]

Additional Funding Above 2004-05 Level (In Millions)

	2005-06	2006-07	2007-08	2008-09	2009-10	2010-11
Additional General Fund support	$208	$439	$739	$1,119	$1,551	$2,013
Additional student fee revenue	251	504	658	829	1,005	1,205
Totals	**$459**	**$943**	**$1,397**	**$1,948**	**$2,556**	**$3,218**

[a] Base increases, fee increases, and enrollment growth only. The compact calls for undefined levels of additional General Fund support to cover other cost increases.

Budget Process Should Be Followed. The Legislature makes budget decisions within a context of changing fiscal, economic, and policy conditions. Unanticipated challenges, including natural disasters and economic downturns, require annual reassessments of funding needs as part of the budget process. To better accommodate these unexpected situations, as well as any policy changes the Legislature may want to implement, we

believe the Legislature should reject the compact's autopilot approach and continue to use the annual budgetary process to allocate resources to the segments.

Compact's Accountability Provisions Are Inadequate

While we agree that accountability is an important issue directly connected with budgeting, we believe the accountability provisions referenced in the Governor's compact are inadequate for several reasons.

Compact's Accountability Lacks Explicit Goals and Measures. The Governor's agreement with the public universities includes performance measures as a means to monitor UC and CSU's progress toward meeting certain goals. Program goals and performance measures are important components of any successful accountability system. However, to be effective, goals should describe the desired outcomes or impact. Similarly, measures should directly relate to a specific goal, be quantifiable, and focus on results.

Although the compact makes an effort to measure various activities and outputs, it does not provide enough detail in the goals it hopes to achieve or in the measures it suggests to determine performance. For example, the compact lists a goal of "utilization of systemwide resources." Proposed measures of this goal include "faculty honors and awards," "information on technology transfer," and "instructional activities per faculty member." Using the criteria mentioned above, the proposed goal of utilization of systemwide services does not provide enough clarity about expected results. The lack of clarity, in turn, precludes the development of measures that accurately gauge progress toward the goal.

Compact's Accountability Not Focused on Outcomes. The Governor's agreement with the public universities includes *output* measures, which are concerned with the number of goods produced, rather than *outcome* measures, which focus on program results and impact on society. For example, the segments are expected to report the number of degrees awarded and instructional activities per faculty member. Although *outputs* are important, ultimately it is *outcomes* that provide insight into how well a program meets its mission.

Conclusion

The *Master Plan for Higher Education* serves as the state's framework for higher education. Since 1960, the Legislature, Governor, and public education segments have looked to the Master Plan for guidance on the operation and support of the state's public institutions of higher education. The Governor's budget proposal is based on an agreement he made with UC and CSU. The funding targets of this compact have no explicit link to the

objectives outlined in the Master Plan. We recommend the Legislature continue to use the annual budget process as a mechanism to fund its priorities and to hold the segments accountable for fulfilling the mission assigned to them by the *Master Plan for Higher Education*.

INTERSEGMENTAL: HIGHER EDUCATION ENROLLMENT GROWTH AND FUNDING

The Governor's budget proposes $88.7 million to fund 2.5 percent enrollment growth at the University of California (UC) and the California State University (CSU). This amount would provide $7,588 in General Fund support for each additional student at UC and $6,270 for each additional student at CSU. The proposed budget also provides $142 million for a 3 percent increase of enrollment at California Community Colleges. In this section, we (1) review current-year enrollment levels at UC and CSU, (2) analyze the Governor's proposed enrollment growth and funding rates for 2005-06, and (3) recommend alternatives to those funding rates.

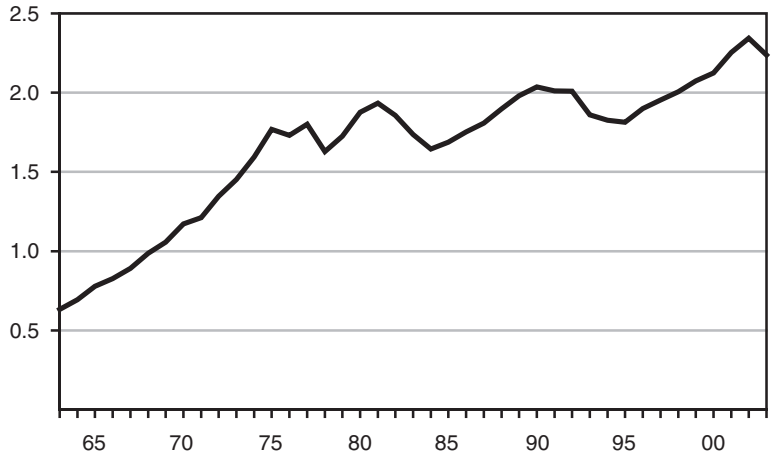
HIGHER EDUCATION ENROLLMENT TRENDS

In 2003, approximately 2.2 million students (headcount) were enrolled either full-time or part-time at the University of California (UC), the California State University (CSU), and California Community Colleges (CCC). This is equal to roughly 1.7 million full-time equivalent (FTE) students. (We describe the differences between *headcount* and *FTE* in the accompanying text box.) Figure 1 (see next page) displays actual headcount enrollment for the state's public colleges and universities for the past 40 years. The figure shows that enrollment grew rapidly through 1975 and then fluctuated over the next two decades. Since 1995, enrollment grew steadily until a slight decline in 2003. As we discuss in the "California Community Colleges" section of this chapter, this decline was largely made up of part-time community college students who were taking relatively few courses. Despite this drop in *headcount*, there was a much smaller decline in community college *FTE* enrollment from 2002 to 2003.

Figure 1

California Public Higher Education Enrollment[a]

Headcount (In Millions)



[a] Includes the University of California, the California State University, and the California Community Colleges.

Full-Time Equivalent (FTE) Versus Headcount Enrollment

In this analysis, we generally refer to FTE students, rather than headcount enrollment. Headcount refers to the number of individual students attending college, whether they attend on a part-time or full-time basis. In contrast, the FTE measure converts part-time student attendance into the equivalent full-time basis. For example, two half-time students would be represented as one FTE student. In 2003-04, on average, one headcount enrollment equaled 0.88 FTE at the University of California, 0.75 FTE at the California State University, and 0.68 FTE at California Community Colleges.

Headcount measures are typically used to reflect the number of individuals participating in higher education. On the other hand, FTE measures better reflect the costs of serving students (that is, the number of course units taken) and is the preferred measure for state budgeting purposes.

Enrollment Down in 2004-05, But Master Plan Intact

As a reference point to guide legislative and executive decisions, the *Master Plan for Higher Education* (adopted by the Legislature in 1960 and periodically reassessed) established admission guidelines that remain the state's official policy today. Each year, UC and CSU typically accommodate all eligible freshman applicants. In enacting the 2004-05 budget, the Legislature rejected the Governor's proposal *not* to admit some eligible freshmen, and instead required that UC and CSU accommodate all eligible students as called for in the Master Plan. (See accompanying box for further information about this proposal.)

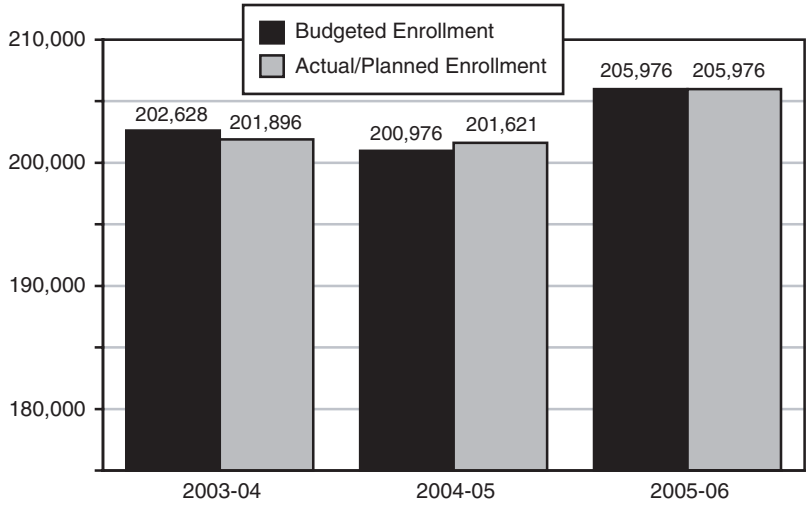
The *2004-05 Budget Act* nevertheless included reductions to budgeted enrollment levels at both UC and CSU.

- For UC, the budget established a total enrollment target of 200,976 FTE students. However, as indicated in Figure 2, this amount is about 900 students *fewer* than the number of students actually served in the prior year.

Figure 2

UC Enrollment Trends

Full-Time Equivalent Students



Redirection of UC Freshmen to Community Colleges

In his January budget proposal for 2004-05, the Governor proposed to reduce new freshman enrollment at the University of California (UC) and the California State University (CSU) in order to achieve General Fund savings. Under this proposal, these freshmen would have been redirected to the lower-cost community colleges, with those students being promised eventual admission to a UC or CSU campus after completing a transfer program. In recognition of the Governor's proposal, UC redirected about 5,700 eligible freshman applicants to the community colleges in the spring of 2004. In contrast to UC, CSU did not at any time redirect eligible freshman applicants to the community colleges.

In enacting the 2004-05 budget, the Legislature rejected the Governor's proposal to require the redirection of freshman enrollment, insisting instead that UC and CSU accommodate all eligible students. Accordingly, UC subsequently offered freshman admission to the 5,700 (formerly) redirected students. Students were admitted to one of UC's campuses (which might not be a campus to which a student had applied). All these students were still provided the option to first attend a community college as part of a *voluntary* redirection program established by Chapter 213, Statutes of 2004 (SB 1108, Committee on Budget and Fiscal Review). Of the 5,700 redirected students, about 1,500 decided to enroll at UC as freshmen, and about 500 students chose to participate in the voluntary redirection program. All students participating in the program in 2004-05 will have their fees waived during their first two years at a community college. After 2004-05, only financially needy students will have their community college fees waived.

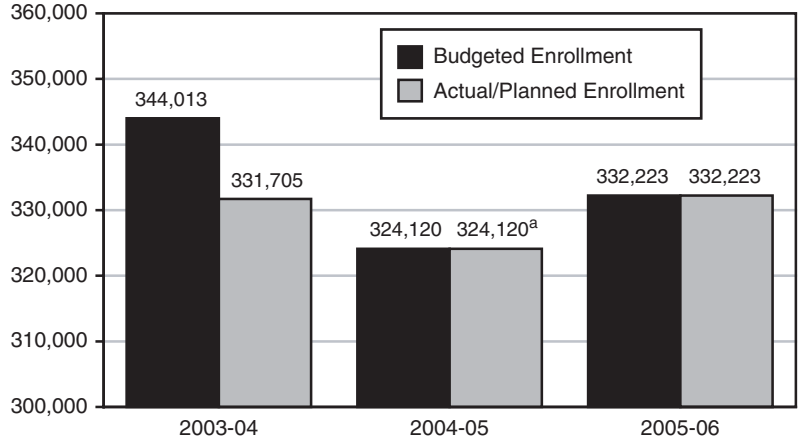
- For CSU, the budget established a total enrollment target of 324,120 FTE students. However, as indicated in Figure 3, this amount is about 7,600 FTE students *fewer* than the number of students actually served in the prior year.

Despite the above reductions to budgeted enrollment levels at UC and CSU, the state has been able to maintain the Master Plan's commitment to college access. Specifically, the segments indicate that no eligible applicants were denied admission to the universities as a whole in 2004-05. (We recognize, however, that some eligible applicants were not admitted to their preferred campus as happens every year.)

Figure 3

CSU Enrollment Trends

2003-04 Through 2005-06
Full-Time Equivalent Students



[a]This represents the number of students CSU plans to enroll in the current year. Unlike UC, CSU could not provide an estimate on the number of students actually enrolled at this point in time.

Disconnect Between Enrollment Funding and Actual Enrollment

The budgeted enrollment levels funded in each year's budget are targets for which funding is provided. Because the number of eligible students enrolling at the segments cannot be predicted with complete accuracy, in any given year UC and CSU typically serve slightly more or less FTE students than budgeted. Recently, however, actual enrollment has deviated more significantly from funded levels. As we discussed in our *Analysis of the 2004-05 Budget Bill* (page E-182), for example, CSU enrolled significantly *fewer* students than it was funded for in 2003-04. This was because the university redirected a significant amount of enrollment funding to essentially "backfill" budget reductions in other program areas. Although not in the same magnitude, UC also redirected some enrollment funding to other purposes in 2003-04.

In recognition of the above disconnect between the number of students funded at each segment and the number of students actually enrolled, the Legislature adopted provisional language as part of the *2004-05 Budget Act* to ensure that UC and CSU use enrollment funding for enrollment. Specifically, the 2004-05 budget required that UC and CSU report to the Legislature by March 15, 2005, on whether they met their current-year enrollment targets (200,976 FTE students for UC and 324,120 FTE student for CSU). If

the segments do not meet these goals, the Director of the Department of Finance (DOF) is to revert to the General Fund the total amount of enrollment funding associated with the share of the enrollment goal that was not met.

At the time of this writing, UC is projected to exceed its budgeted enrollment target by roughly 600 FTE students, for a total of 201,621 FTE students. The CSU was unable to provide an estimate of the actual number of students currently enrolled at the university. However, the university tells us it expects to meet its current-year enrollment target.

GOVERNOR'S BUDGET PROPOSAL

The budget requests a total of $225.4 million in General Fund support to increase enrollment at UC , CSU, and CCC. The $225.4 million total consists of:

- $37.9 million to UC for 2.5 percent enrollment growth (or 5,000 FTE students) above current-year budgeted enrollment, which is based on a marginal General Fund cost of $7,588 per additional student. (This amount includes funding for 1,000 new FTE students at the Merced campus, which will open in fall 2005.)
- $50.8 million to CSU for 2.5 percent enrollment growth (or 8,103 FTE students) above current-year budgeted enrollment, which is based on a marginal General Fund cost of $6,270 per additional student.
- $142 million (Proposition 98) to CCC for 3 percent enrollment growth (or 34,000 FTE students) above current-year budgeted enrollment, which is considerably higher than the statutory growth rate of 1.89 percent. (We further discuss enrollment at CCC in the "California Community Colleges" section of this chapter.)

DETERMINING ENROLLMENT GROWTH FUNDING FOR 2005-06

One of the principal factors influencing the state's higher education costs is the number of students enrolled at the three public higher education segments. Typically, the Legislature and Governor provide funding in the annual budget act to support a specific level of enrollment growth at the state's public higher education segments. The total amount of enrollment growth funding provided each year is based upon a per-student funding rate multiplied by the number of additional FTE students. For example, the Governor's budget proposes a per-student funding rate of $6,270 for 8,103 additional students at CSU, for a total of $50.8 million.

As earlier noted, the proposed budget includes a total of $88.7 million for 2.5 percent enrollment growth at UC and CSU. In reviewing the Governor's enrollment growth funding proposal, the Legislature must determine the following:

- How much enrollment growth (or additional students) to fund at UC and CSU for 2005-06?
- How much General Fund support to provide the segments for each additional student (commonly known as the "marginal cost")?

Below, we examine each of these issues and make recommendations concerning the Governor's enrollment funding proposals.

HOW MUCH ENROLLMENT GROWTH SHOULD BE FUNDED?

Determining the amount of additional enrollment to fund each year can be difficult. Unlike enrollment in compulsory programs such as elementary and secondary school, which corresponds almost exclusively with changes in the school-age population, enrollment in higher education responds to a variety of factors. Some of these factors, such as population growth, are beyond the control of the state. Others, such as higher education funding levels and fees, stem directly from state policy choices. Although the Master Plan sets eligibility targets, it is often difficult to accurately predict factors that affect the level of demand for higher education. As a result, most enrollment projections have had limited success as predictors of actual enrollment demand.

In general, there are two main factors influencing enrollment growth in higher education:

- ***Population Growth.*** Other things being equal, an increase in the state's college-age population causes a proportionate increase in those who are eligible to attend each segment. Population growth, therefore, is a major factor driving increases in college enrollment. Most enrollment projections begin with estimates of growth in the student "pool," which for the rest of this decade is expected to range from a little more than 1 percent to about 2.5 percent annually.
- ***Participation Rates.*** For any subgroup of the general population, the percentage of individuals who enroll in college is that subgroup's college participate rate. California's participation rates are among the highest in the nation. Specifically, California currently ranks fourth (tied with four other states) in college enrollment among 18- to 24-year-olds, and first among 25- to 49-year-olds. However, predicting future changes to participation rates is

difficult because students' interest in attending college is influenced by a number factors (including student fee levels, availability of financial aid, and the availability and attractiveness of other postsecondary options).

Provide 2 Percent Enrollment Growth

Based on our demographic projections, we recommend the Legislature reduce the Governor's proposal for budgeted enrollment growth for the University of California and the California State University from 2.5 percent to 2 percent. Our proposal should easily allow the segments to accommodate enrollment growth next year due to increases in population, as well as modest increases in college participation.

If college participation rates remain constant for all categories of students next year, we project that enrollment at UC and CSU will grow roughly 1.5 percent from 2004-05 to 2005-06. (See accompanying text box for a description of the demographics-based methodology we developed to estimate future higher education enrollment levels.) Since this projection is driven solely by projected population growth, it should serve as a starting point for considering how much enrollment to fund in 2005-06. In other words, the Legislature can evaluate how various related budget and policy choices could change enrollment compared to this baseline. We note that over the years the Legislature has taken deliberate policy actions (such as funding student outreach programs and expanding the availability of financial aid) to increase college participation rates. Consistent with these actions, the state has provided funding for enrollment growth in some of those years that significantly exceeded changes in the college-age population.

In view of the Legislature's interest in increasing college participation, we recommend funding 2 percent enrollment growth at UC and CSU for the budget year. This is about one-third higher than our estimate of population-driven enrollment growth, and therefore should easily allow the segments to accommodate enrollment growth next year due to increases in population, as well as modest increases in college participation. More importantly, our recommended 2 percent growth rate helps preserve the Legislature's priority that UC and CSU accommodate all eligible students (as called for in the Master Plan).

Accordingly, we recommend that the Legislature reduce the Governor's proposed enrollment growth for UC and CSU from 2.5 percent to 2 percent. (In the next section on per-student funding rates, we discuss the General Fund savings associated with reducing the Governor's proposed growth rate.)

LAO Higher Education Enrollment Projections

In our demographically driven model, we calculate the ethnic, gender, and age makeup of each segment's student population, and then project separate growth rates for each group based on statewide demographic data. For example, we estimated a distinct growth rate for Asian females between 18 and 24 years of age, and calculated the resulting additional higher education enrollment this group would contribute assuming constant participation rates. When all student groups' projected growth rates are aggregated together, we project that demographically driven enrollment at the University of California and the California State University will grow annually between 1.4 percent and 2 percent from 2005-06 through 2009-10. In terms of the budget year (2005-06), we project enrollment growth of roughly 1.5 percent at the two university segments.

In addition to underlying demographics, enrollment growth is affected by participation rates—that is, the proportion of eligible students who *actually* attend the segments. Participation rates are difficult to project because they can be affected by a variety of factors—state enrollment policies, the job market, and changes in students and their families' financial situations. We have assumed that California's participation rates will remain constant. This is because the state's rates have been relatively flat over recent years, and we are not aware of any evidence supporting alternative assumptions. We do acknowledge that participation rates could change to the extent that the Legislature makes various policy choices affecting higher education. Our projections merely provide a baseline reflecting underlying population trends. We believe that our enrollment projections are valuable not as a prediction of what will happen, but as a starting point for considering higher education funding.

Ensuring That Enrollment Targets Are Met

We recommend the Legislature adopt budget bill language specifying enrollment targets for both the University of California and the California State University, in order to protect its priority to increase higher education enrollment.

Although the Governor's budget would increase funded enrollment by 2.5 percent at UC and CSU, the total number of students the segments in fact would serve in 2005-06 is not clear. This is because the proposed budget bill departs from recent practice and does not hold the segments accountable for meeting a specific budgeted enrollment target.

We believe that the Legislature, the Governor, and the public should have a clear understanding of how many students are funded at UC and CSU in the annual budget act. Additionally, the segments should be expected to use enrollment funding provided by the state for that purpose and be held accountable for meeting their annual enrollment targets as adopted by the Legislature. If UC or CSU does not meet its goal, the amount of enrollment funding associated with the enrollment shortfall should return to the state's General Fund. However, under the Governor's proposal, the segments would have the flexibility to reduce enrollments at their discretion regardless of the Legislature's priority to increase enrollment. As previously discussed, there has been a disconnect in recent years between funded and actual enrollment. This is because the segments have redirected enrollment funding away from serving additional students essentially to maintain services in other program areas.

For the above reasons, we recommend the Legislature establish specific enrollment targets (based on our recommended 2 percent enrollment growth) and accountability provisions for UC and CSU. We propose language for 2005-06 that is similar to what was adopted in 2004-05. First, we propose the Legislature add the following provision to Item 6440-001-0001:

> The amount appropriated in Schedule (1) includes funding for the University of California to enroll 204,996 full-time equivalent (FTE) students. The Legislature expects the university to enroll this number of FTE students during the 2005-06 academic year. The university shall report to the Legislature by March 15, 2006, on whether it has met the 2005-06 enrollment goal. If the university does not meet this goal, the Director of the Department of Finance shall revert to the General Fund the total amount of enrollment funding associated with the share of the enrollment goal that was not met.

Similarly, we also recommend adding the following provision to Item 6610-001-0001:

> The amount appropriated in Schedule (1) includes funding for the California State University to enroll 330,602 full-time equivalent (FTE) students. The Legislature expects the university to enroll this number of FTE students during the 2005-06 academic year. The university shall report to the Legislature by March 15, 2006, on whether it has met the 2005-06 enrollment goal. If the university does not meet this goal, the Director of the Department of Finance shall revert to the General Fund the total amount of enrollment funding associated with the share of the enrollment goal that was not met.

HOW MUCH GENERAL FUND SUPPORT SHOULD BE PROVIDED FOR EACH ADDITIONAL STUDENT?

In addition to deciding the number of additional FTE students to fund in 2005-06, the Legislature must also determine the *amount* of funding to provide for each additional FTE student at UC and CSU. Given recent practice, this funding level would be based on the marginal cost imposed by each additional student for additional faculty, teaching assistants (TAs), equipment, and various support services. The marginal cost is less than the average cost because it reflects what are called "economies of scale"—that is, certain fixed costs (such as for central administration) which may change very little as new students are added to an existing campus. The marginal costs of a UC and CSU education are funded from the state General Fund and student fee revenue. (A similar, but distinct, approach is used for funding enrollment growth at community colleges.)

The current practice has been for the state to provide a separate funding rate for each higher education segment. In other words, the state uses a model of differential funding—providing separate funding rates for distinct categories of students—based on which higher education segment the student attends. (As we discuss below, the state in the past has provided separate funding rates based on education level and type of instruction.) As discussed above, the Governor's budget for 2005-06 proposes to provide $7,588 in General Fund support for each additional student at UC and $6,270 for each additional student at CSU.

Background on the Development of the Marginal Cost Methodology

For many years, the state has funded enrollment growth at UC and CSU based on the marginal cost of instruction. However, the formula used to calculate the marginal cost has evolved over the years. In general, the state has sought to simplify the way it funds enrollment growth. As we discuss below, the state has moved from utilizing a large number of complex funding formulas for each segment to a more simplified approach for calculating enrollment funding that is more consistent across the two university systems.

UC and CSU Used Different Methodologies Before 1992

From 1960 through 1992, CSU's enrollment growth funding was determined by using a separate marginal cost rate for each type of enrollment category (for example, lower division lecture courses). In other words, the

different marginal cost formulas took into account education levels—lower division, upper division, and graduate school—and "instructional modes" (including lecture, seminar, laboratories, and independent study). Each year, CSU determined the number of additional academic-related positions needed in the budget year (based on specific student-faculty ratios) to meet its enrollment target. These data were used to derive the separate marginal cost rates. Unlike the current methodology, the marginal cost formulas before 1992 did not account for costs related to student services and institutional support. The state made funding adjustments to these budget areas independent of enrollment funding decisions.

Similar to CSU, annual enrollment growth funding provided to UC before 1992 was based on the particular mix of new students, with different groups of students funded at different rates. However, UC's methodology for determining the marginal cost of each student was much less complex than CSU's methodology and did not require different rates based on modes of instruction. The university only calculated separate funding rates for undergraduate students, graduate students, and for each program in the health sciences based on an associated student-faculty ratio. For example, the marginal cost of hiring faculty for new undergraduate students was estimated by dividing the average faculty salary and benefits by 17.48 FTE students (the undergraduate student-faculty ratio at the time). Each marginal cost formula also estimated the increased costs of library support due to enrolling additional students. As was the practice for CSU, however, UC's marginal cost formulas did not account for costs related to student services and institutional support.

Legislature Called for New Methodology in 1990s

Beginning in 1992-93, the Legislature and Governor suspended the above marginal cost funding practices for UC and CSU. While the state did provide base budget increases to the universities, it did not provide funding specifically for enrollment growth during that time. In the *Supplemental Report of the 1994 Budget Act*, the Legislature stated its intent that, beginning in the 1996-97 budget, the state would return to the use of marginal cost as the basis for funding enrollment. Specifically, the language required representatives from UC, CSU, DOF, and our office to review the 1991-92 marginal cost formulas and propose improvements that could be used in developing the 1996-97 budget. The working group had two primary goals: (1) updating the calculations to more accurately reflect actual costs and (2) establishing more consistency between segments in the methods used to fund enrollment growth. This work coincided with CSU's efforts to simplify the university's budget development process, streamline budget formulas, and increase the system's budget discretion.

After a series of negotiations in 1995, the four agencies developed a new methodology for estimating the amount of funding needed to support each additional FTE student. The new methodology was first implemented in 1996-97 and has generally been used to calculate enrollment funding ever since. Some of the key features of this methodology include:

- ***Single Marginal Cost Formula for Each Segment.*** Enrollment growth funding is no longer based on differential funding formulas by education level and academic program. Instead, each university segment uses one formula to calculate a single marginal cost that reflects the costs of all the system's education levels and academic programs. For instance, a fixed student-faculty ratio (as adopted in the budget act) helps determine the faculty costs associated with each additional student (regardless of education level). Thus, the state currently provides a different per-student funding rate depending only on which higher education segment that student attends. (See nearby text box for a review of the different types of differential funding and their potential benefits and drawbacks.)

- ***Marginal Cost for Additional Program Areas.*** The working group concluded that the marginal cost formula should include additional cost components beyond salaries for faculty, teaching assistants, and other academic support personnel. As a result, the current formula takes into account the marginal costs for eight program areas—faculty salary, faculty benefits, TAs, academic support, instructional support, student services, institutional support, and instructional equipment. These program costs are based on current-year funding and enrollment levels, and then discounted to adjust for fixed costs that typically are not affected by year-to-year changes in enrollment.

- ***Student Fee Revenue Adjustments.*** In addition, the working group suggested that both the General Fund and student fee revenue should contribute toward the total marginal cost. This is because fee revenue is unrestricted, and is thus used for general purposes the same as General Fund revenue. It also reflects the state's policy that students and the state should share in the cost of education. Therefore, under the methodology, a portion of the student fee revenue that UC and CSU anticipate from the additional students is subtracted from the total marginal cost in order to determine how much General Fund support is needed from the state for each additional FTE student.

Instituting a More Differential Funding System

Our office recently examined various options to modify California's existing higher education funding practices in a way that differentiates funding in other ways than just by segment. (Currently, the state also provides different funding rates for credit and noncredit courses at the community colleges.) The most common factors other states use to differentiate among enrollments are as follows:

- ***Differential Funding by Education Level.*** The most common practice among states is to provide a different funding rate for lower division students, upper division students, and graduate students. Funding rates generally increase as students advance to higher education levels, reflecting the higher costs typically incurred at those levels.

- ***Differential Funding by Academic Program.*** Another common method is to distinguish funding based upon a program's cost. This means providing higher funding rates for more costly programs (such as nursing).

- ***Differential Funding by Mode of Instructional Delivery.*** Some states provide different funding rates for lecture and laboratory courses. Because they often require expensive equipment and materials, as well as a lower student-faculty ratio, laboratory courses typically are much more costly than lecture courses and therefore are associated with higher funding rates.

The different forms of differential funding are not mutually exclusive. That is, California could redesign its enrollment funding system around any combination of the above factors. For example, it might retain its existing distinctions and incorporate new funding rates for undergraduate and graduate students enrolled in lecture and laboratory courses. A myriad of other combinations are possible.

Potential Advantages and Disadvantages. Differentiated funding systems more accurately account for specific differences in education costs. They can also increase transparency, strengthen accountability, and ensure comparable funding for comparable services. Despite these benefits, more differentiated funding systems can also have potential drawbacks. Depending upon how they are designed, some systems may create more complexity without improving the budget process. In particular, too many enrollment categories can limit flexibility and increase administrative burden.

Recent Departure From the 1995 Marginal Cost Methodology

After the above marginal cost methodology was developed in 1995, UC and CSU used it every fall to estimate the amount of funding they would require for each additional FTE student enrolled in the coming year. (If necessary, the estimate is later updated to reflect revised current-year expenditures.) From 1996-97 through 2003-04, these amounts were in turn used in the annual budget act to fund enrollment growth at UC and CSU. However, the budgets adopted for the current year (2004-05) and proposed for the budget year (2005-06) depart from this practice and rely on a slightly different methodology used by DOF.

Different Methodology Used for CSU in 2004-05 Budget. The *2004-05 Budget Act* included new enrollment funding for CSU based on DOF's calculation of a marginal General Fund cost of $5,662 per additional FTE student. According to CSU, however, the 1995 methodology would have called for $5,773 in General Fund support per student. (This is the rate approved by the CSU Board of Trustees as part of its budget request to the Governor.) The DOF's calculation departs from the 1995 methodology in that it is based on funding and enrollment levels proposed for 2004-05, rather than as budgeted in 2003-04.

Unexplainable Methodology Proposed for UC in Governor's 2005-06 Budget. For 2005-06, the Governor proposes to provide $7,588 in General Fund support for each additional student at UC. However, it is unclear how the administration calculated this per-student funding rate. At the time of this analysis, DOF staff could neither substantiate nor explain the methodology it used to derive the $7,588 proposed marginal cost. In a departure from past practices, DOF staff declined to provide the specific formulas and data supporting its proposal. Thus, we are unable to conclude whether the administration is proposing an entirely new methodology for UC in the budget year. As we discuss below, UC calculated a different marginal cost rate as part of its 2005-06 budget request.

LAO Recommendations Based on 1995 Methodology

Using our marginal cost estimates for enrollment growth based on the agreed-upon 1995 methodology and our proposed 2 percent enrollment growth, we recommend deleting $21.3 million from the combined $88.7 million requested in the budget for enrollment growth. Our proposal would leave sufficient funding to provide $7,180 for each additional University of California student and $5,999 for each additional California State University student. (Reduce Item 6440-001-0001 by $9.4 million and Item 6610-001-0001 by $11.9 million.)

Until the Legislature approves a new marginal cost methodology, we believe that it should fund enrollment growth at UC and CSU in the 2005-06 budget that is aligned with the 1995 methodology. Using our marginal cost estimates for enrollment growth based on the agreed-upon 1995 methodology, we recommend alternatives to the Governor's proposed funding rates.

Provide $7,108 in General Fund Support for Each Additional UC Student. As discussed above, it is unclear how the administration calculated its proposed marginal General Fund cost of $7,588 for each additional student at UC. More importantly, as we discuss below, this rate is considerably different from our estimate of what would be called for under the marginal cost methodology developed in 1995. As part of its 2005-06 budget request to the Governor this past fall, the UC Board of Regents approved a marginal General Fund cost of $7,528 per FTE student that is based on the 1995 marginal cost methodology (see Figure 4).

Figure 4

University of California (UC) 2005-06 Marginal Cost Calculation

(As Requested by UC[a])

Basic Cost Components (Based on Initial 2004-05 Costs)	Average Cost Per FTE[b]	Discount Factor	Marginal Cost Per FTE[b]
Faculty salary	$2,876[c]	—	$2,876
Faculty benefits	619	—	619
Teaching assistants salary	653	—	653
Instructional equipment	266	—	266
Instructional support	3,903	10%	3,512
Academic support	1,102	35	716
Student services	1,079	20	863
Institutional support	1,896	50	948
Totals	**$9,425**	—	**$10,454**
Less student fee revenue	—	—	-$2,926[d]
State Funding Per Student	—	—	**$7,528**

a The Governor's budget proposes a different marginal General Fund cost for UC ($7,588). At the time of this analysis, the administration was unable to explain its cost calculations.

b Full-time equivalent.

c Based on an annual salary of $53,780 (Assistant Professor, Step 3) and a student-faculty ratio of 18.7:1.

d Based on a percentage of the total marginal cost per FTE student that equals the percentage of UC's operating budget that is funded from student fee revenue.

However, since UC calculated this rate several months ago, it does not reflect current legislative policies and expenditure data. For example, as part of the 2004-05 budget package, the Legislature approved the Governor's proposal to increase the student-faculty ratio at UC from 19.7:1 to 20.7:1 in order to achieve ongoing General Fund savings. As noted in Figure 4, however, the faculty salary and benefits included in the university's own marginal cost calculation is based on a student-faculty ratio of 18.7:1. In addition, the average cost per FTE student for instructional support, academic support, and institutional support reflect initial planning estimates for the current year. (The Governor's budget for 2005-06 displays revised funding data for 2004-05.) After making the above adjustments, we calculate a marginal General Fund cost at UC of $7,108 based on the 1995 methodology.

Provide $5,999 in General Fund Support for Each Additional CSU Student. Figure 5 displays a simplified version of the marginal cost calculations used by CSU to estimate the $6,270 per FTE student funding rate proposed in the Governor's budget for 2005-06. As noted in the figure, the

Figure 5

California State University (CSU)
2005-06 Marginal Cost Calculation

(As Requested by CSU and Funded in Governor's Budget)

Basic Cost Components (Based on 2004-05 Costs)	Average Cost Per FTE[a]	Discount Factor	Marginal Cost Per FTE[a]
Faculty salary	$3,079[b]	—	$3,079
Faculty benefits	1,114	—	1,114
Teaching assistants salary	358	—	358
Instructional equipment	142	—	142
Instructional support	799	10%	719
Academic support	1,360	15	1,156
Student services	1,066	20	853
Institutional support	1,507	35	980
Totals	**$9,425**	—	**$8,401**
Less student fee revenue	—	—	-$2,131[c]
State Funding Per Student	—	—	**$6,270**

a Full-time equivalent.

b Based on an annual salary of $58,196 (Associate Professor, between Steps 7 and 8) and a student-faculty ratio of 18.9:1.

c Based on a percentage of the total marginal cost per FTE student that equals the percentage of CSU's operating budget that is funded from student fee revenue.

identified costs associated with faculty salary and benefits assume a student-faculty ratio of 18.9:1. However, as was done for UC, the Legislature in the last two budget acts increased the student-faculty ratio at CSU as a cost-cutting measure. Specifically, the *2004-05 Budget Act* assumed $53.5 million in General Fund savings from increasing the student-faculty ratio by 5 percent (from 19.9:1 to 20.9:1). In effect, this higher ratio means that fewer new faculty positions are necessary to teach a cohort of additional students than otherwise would be needed with a lower ratio. Thus, an increase in the student-faculty ratio effectively reduces the marginal cost per additional FTE student. We estimate that a student-faculty ratio of 20.9:1 results in a marginal General Fund cost of $5,999 for CSU.

In view of the above technical adjustments, we recommend the Legislature provide $7,180 in General Fund support for each additional student at UC and $5,999 for each additional student at CSU. (See Figure 6 for a detailed description of our marginal cost calculations.) Given our earlier proposal to fund enrollment growth at a rate of 2 percent at both UC and CSU,

Figure 6

LAO Marginal Cost Recommendations

(Based on 1995 Marginal Cost Methodology)

	Marginal Cost Per FTE[a]	
Basic Cost Components	**UC**	**CSU**
Faculty salary[b]	$2,598	$2,784
Faculty benefits[b]	559	1,008
Teaching assistants salary	653	358
Instructional equipment	266	142

Institutional support	758	980
Totals	**$9,871**	**$7,999**
Less student fee revenue	-$2,763	-$2,000
State Funding Per Student	**$7,108**	**$5,999**

a Full-time equivalent.

b Based on a student-faculty ratio of 20.7:1 at the University of California (UC) and 20.9:1 at the California State University (CSU). Also based on costs for an Assistant Professor (Step 3) at UC and an Associate Professor (between Steps 7 and 8) at CSU, as called for in the 1995 methodology.

we therefore recommend reducing the proposed General Fund augmentation for enrollment growth by a total of $21.3 million, including $9.4 million from UC and $11.9 million from CSU. Under our proposal, the segments would still receive sufficient funding to cover the estimated costs of enrollment growth due to increases in population and college participation.

Legislative Review of Marginal Cost Methodology Needed

We believe the Legislature should revisit and reassess the marginal cost methodology. Specifically, we recommend the Legislature direct our office, in consultation with representatives from the Department of Finance, the University of California, and the California State University, to review the current system of funding new enrollment and propose modifications for use in the development of future budgets.

The Legislature's most recent review of the Master Plan (in 2002) called for an assessment of the existing marginal cost formula. According to the 2002 Joint Committee to Develop a Master Plan for Education, "The State should analyze the appropriateness of modifying the current marginal cost approach for funding all additional enrollments in public colleges and universities, to account for contemporary costs of operations, differing missions and functions, and differential student characteristics that affect costs in each sector." Such a review is particularly important at this time because the Governor in his budget proposal is already deviating from the 1995 marginal cost methodology for UC. We also note that the segments themselves have expressed concern in the past about the adequacy of the existing marginal cost methodology.

Obviously, there are many ways to calculate the marginal General Fund cost for each additional student at UC and CSU. Based on our assessment of the current marginal cost methodology (as developed in 1995), we have developed a series of principles to guide the Legislature in determining how to more effectively fund the increased costs associated with enrollment growth. Figure 7 (see next page) outlines the principles, which we discuss in further detail below.

Comparable Formulas for UC and CSU. We recognize that there are instances where it is reasonable to have different formulas for the segments, particularly in recognition of their differing missions and costs. However, under the current methodology, there is an unexplainable difference between the segments regarding the formulas used to adjust for fixed costs in two program areas (academic support and institutional support). For example, CSU's methodology includes a higher percentage of institutional support costs. (Institutional support primarily includes funding for the central administration offices of university presidents and chancel-

lors.) Based on our conversations with the segments, we find no analytic reason why cost increases for institutional support would be different at the two segments.

Include Only Program Costs Linked to Enrollment Growth. The marginal cost formula should include only program costs that tie directly to enrollment growth. For example, the marginal cost should include funding to purchase instructional equipment for the additional students, but not to replace or upgrade existing equipment for use by existing students. Legislative decisions regarding funding for such nonenrollment-growth-related costs should be made independent of marginal cost funding. Moreover, there also may be some costs not included in the current marginal cost formula which increase when a university enrolls an additional student. Such costs (for instance, related to operation and maintenance services) might appropriately be added to the marginal cost methodology.

Figure 7

Guiding Principles for Marginal Cost Funding

- ✓ ***Comparable Formulas for the University of California (UC) and the California State University (CSU).*** To the extent possible, the calculation of the different variable costs (such as for institutional support) should be consistent across the two university systems.
- ✓ ***Include Only Program Costs Linked to Enrollment Growth.*** Since marginal cost funding is intended to support the various costs that UC and CSU will incur in enrolling one additional full-time equivalent (FTE) student, the marginal cost formula should include only program costs that increase with enrollment growth.
- ✓ ***Input Data Should Reflect Actual Costs.*** In order to appropriately budget for enrollment growth, the expenditure and enrollment data used to calculate the marginal cost for UC and CSU should reflect actual costs.
- ✓ ***Accurately Account for Available Student Fee Revenue.*** In order to determine how much General Fund support is needed from the state for each additional FTE student, the marginal cost formula should "back out" the fee revenue that UC and CSU anticipate collecting from each student.

Input Data Should Reflect Actual Costs. The expenditure and enrollment data used to calculate the marginal cost at UC and CSU should appropriately reflect actual costs. For example, the costs for additional faculty and TAs should be determined based on current data regarding the salaries and benefits of existing personnel. We note that a key component of the current marginal cost methodology is an underlying assumption

that the annual salary of a TA at CSU is roughly 50 percent of an entering faculty member's annual salary. For 2005-06, this translates to an estimated annual TA salary of about $38,000. According to the CSU Chancellor's Office, however, the average annual salary for a TA is currently only $7,180 (about 12 percent of an entering faculty member's salary). This means that the state is currently overbudgeting the marginal cost of hiring additional TAs. Conversely, there may be certain program costs that are not fully funded under the existing marginal cost formula.

Accurately Account for Available Student Fee Revenue. In order to determine how much General Fund support is needed from the state for each additional FTE student at UC and CSU, the marginal cost formula must "back out" the fee revenue that the segments anticipate collecting from each student. Under the current methodology, this is based on the percentage of the university's entire operating budget that is supported by student fee revenue. For example, if fee revenue makes up 40 percent of UC's budget for 2004-05, then fee revenue would be deemed to support 40 percent of the total marginal cost for 2005-06. The remaining 60 percent would be funded by the state's General Fund. A different approach could simply be to adjust the marginal cost based on the fee revenue collected for each FTE student (regardless of education level).

Moreover, the total amount of fee revenue collected by the segments is not always accounted for in the current methodology. For example, UC does not include the revenue collected from nonresident tuition when adjusting for fee revenues. Since the different program costs are based on expenditures from all fund sources (including nonresident tuition), then the marginal cost formula should include the supplemental fee paid by nonresident students in order to accurately determine the state's share of the total marginal cost. (An alternative approach would be to exclude nonresident tuition altogether from the marginal cost calculations.)

In conclusion, we recommend the Legislature direct our office, in consultation with DOF, UC, and CSU to review the current process of determining the amount of funding to provide for each additional FTE student and propose any modifications for use in the development of future budgets.

INTERSEGMENTAL: STUDENT FEES

Currently, the state has no student fee policy. Instead of making fee decisions based upon an explicit agreement as to share of cost or an assessment of other specified factors (such as fee levels at similar institutions), the state has made fee decisions based almost entirely on the state's fiscal situation—raising fees in bad fiscal times and lowering them in good fiscal times. Given the recent volatility in fee levels and disparity in cost burden among student groups over time, both the Governor and Legislature worked in 2004-05 to develop a state fee policy. Despite these efforts, fee legislation was not enacted. We continue to recommend the state adopt a fee policy that designates explicit share-of-cost targets. This policy then could be used to guide annual fee decisions.

Below, we describe the Governor's fee agreements with the University of California (UC) and the California State University (CSU), identify our concerns with them, and list the Governor's specific budget-year fee proposals. We then describe a share-of-cost fee policy and illustrate how the Legislature could use this policy to make its budget-year fee decisions. Next, we discuss the Governor's treatment of new fee revenue—treatment that is inconsistent with general budgeting standards—and highlight a technical budgeting error related to excess-unit fee revenue. We conclude with a discussion of community college fees.

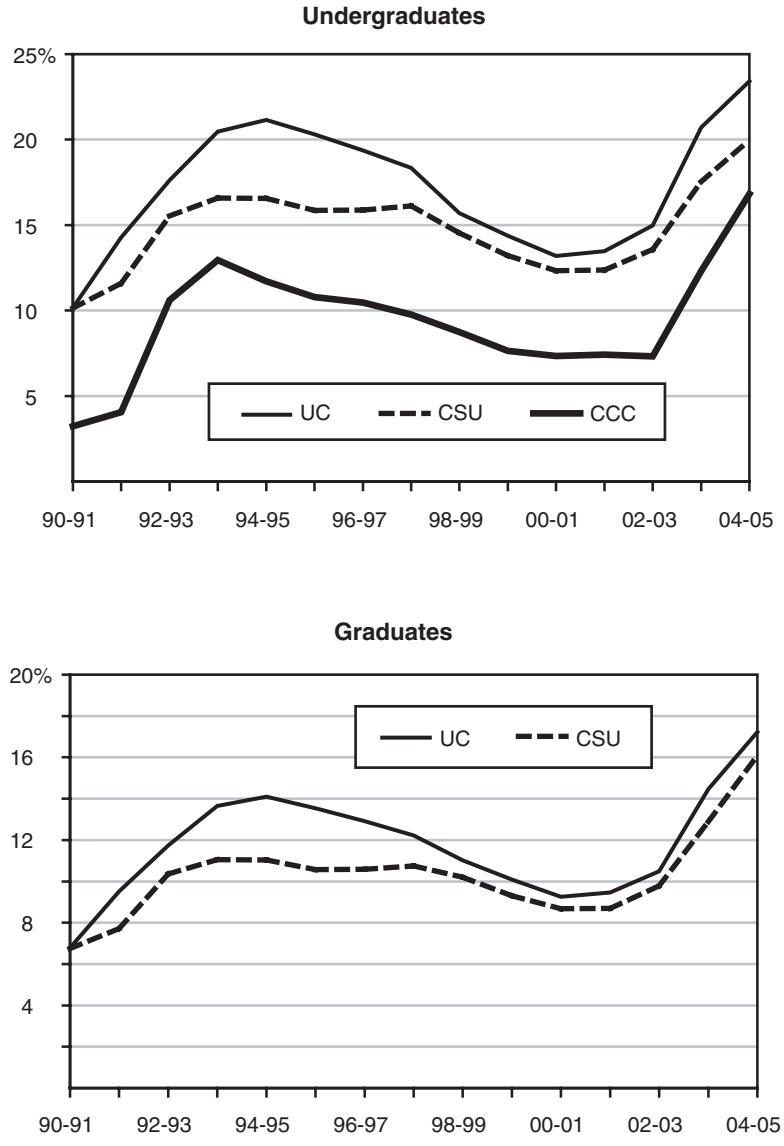
Lack of Fee Policy Has Resulted in Volatility and Disparity

Figure 1 shows, in inflation-adjusted dollars, student fees as a share of total education support costs. During the early 1990s recession, students' average share of cost increased notably—peaking between 1993 and 1995. Undergraduates at UC, for example, were paying 21 percent of their total education costs in 1994-95 compared to 10 percent in 1990-91. Similarly, California Community College (CCC) students were paying 13 percent of their total education costs in 1993-94 compared to 3 percent three years earlier.

Figure 1

Lack of Fee Policy Has Resulted in Volatility and Disparity

2004-05 Inflation-Adjusted Dollars



Students' average share of cost declined for the next six to seven years. For example, CSU undergraduates' share of cost fell from 17 percent in 1994-95 to 12 percent in 2001-02. Students' share of cost, as well as fee levels themselves, declined despite increases in education costs, burgeoning financial aid opportunities, a strong economy, and a nationwide trend toward higher fees. Fees declined despite California's public institutions charging much less than similar public institutions. At the same time, California was the only state in the country that was not maximizing its receipt of federal Pell Grant monies and one of few states not maximizing federal tax credit benefits.

Since 2001-02, students' share of cost for both undergraduates and graduate students has increased at all three segments. Despite these increases, students' share of cost remains small, fee levels still are low compared to similar institutions, and California continues not to maximize its receipt of federal financial aid funding.

Partly because of this recent volatility in fees, the Legislature passed a major fee bill in 2004 (AB 2710, Liu). Though the bill was vetoed, it represented a significant step toward developing a state fee policy. (Please see the nearby gray box for a summary of the bill.)

Governor Makes Agreement With UC and CSU on Student Fees

The Governor's compact with UC and CSU, which is not binding on the Legislature but which he nonetheless uses for budgeting purposes, contains the following components.

- ***Undergraduate Fees to Increase on Annual Basis.*** After increasing 14 percent in the current year, undergraduate fees would increase by 8 percent in 2005-06 and 8 percent in 2006-07. Annually thereafter, undergraduate fees would increase consistent with the change in California per capita income. Use of this index, however, could be suspended during difficult fiscal times and fees allowed to increase by as much as 10 percent.
- ***Graduate and Professional School Fees to Increase Annually Based Upon Multiple Factors.*** Graduate fee decisions would be determined annually after considering the average fee charged at comparison institutions, students' share of cost, the total cost of attendance, the need to preserve or enhance the quality of certain graduate programs, and the state's need for additional workers in particular occupations. Overlaying these factors is a target that graduate academic fees be 50 percent more than undergraduate fees. This differential, developed with the segments' input, is to account for the higher costs of providing graduate education.

- ***Segments to Determine Institutional Aid Set Aside.*** For undergraduates, the budget would assume between 20 percent and 33 percent of new fee revenue is set aside for financial aid. For graduate students, the segments apparently would have complete discretion to set aside for financial aid any amount of their choosing.
- ***New Fee Revenue Not Accounted for in Budget.*** New fee revenue essentially would be unbudgeted. That is, the segments would be allowed full discretion in deciding how to spend additional fee revenue. They would not be required to use any new fee monies for state-identified priorities.

Legislature Tried to Enact Fee Policy During Last Session

In the 2004 session, the Legislature passed a fee policy, AB 2710 (Liu), which the Governor vetoed. Assembly Bill 2710 included three primary policy guidelines, which, in many respects, echoed former state fee policies.

- ***Cost to Be Shared.*** The bill declared that the total cost of education should be a shared responsibility of students and the state, with the state bearing the preponderance of the cost.
- ***Changes to Be Gradual, Moderate, and Predictable.*** The bill emphasized that fee increases should take place gradually, be moderate in magnitude, and clearly anticipated, with students given sufficient advance notice.
- ***Fee Levels to Be Based on Share of Cost and Related Factors.*** The bill also specified that the total cost of education, students' share of cost, and families' ability to pay should be considered when setting fee levels.

Assembly Bill 2710 was distinct from earlier state fee policies in that it suggested share-of-cost targets. Undergraduate fees were not to exceed 40 percent of overall education costs at the University of California (UC) and 30 percent of overall costs at the California State University (CSU). To this end, students' share of cost was to be calculated annually and presumably incorporated into fee-setting discussions. The Governor vetoed the bill because he felt it was "inconsistent" with the provisions of his compact with UC and CSU.

Governor's Agreement Has Serious Shortcomings

We have three major concerns with the Governors' fee agreements with UC and CSU.

No Rational Basis for Determining UC and CSU Undergraduate Fees. The Governor's agreement assumes the 2003-04 fee was the "right" fee for UC and CSU and hereafter merely needs to be adjusted annually consistent with families' ability to pay. Given UC and CSU's 2003-04 undergraduate fee levels were (1) the lowest of all their public comparison institutions, (2) substantially beneath the comparison-institution average (20 percent lower at UC and 51 percent lower at CSU), and (3) represented a small share of total education cost (26 percent of total education costs at UC and 21 percent at CSU), it is unclear why the state would want to essentially lock them in place.

No Rational Institutional Aid Policy. The Governor's agreement allows the segments broad discretion to budget for institutional aid without any associated expectation that they justify their decisions. That is, the Governor's agreement does not require the segments to document their need and identify the amount required to cover it—seemingly disregarding even the most basic budgeting standards. Moreover, the segments are effectively granted authority to augment their institutional aid programs without the typical state-level discussion of competing priorities (whether it be the Cal Grant program, other higher education priorities, or other state priorities). Please see the nearby box for a more detailed discussion of our concerns with the segments' institutional aid set aside.

Treatment of New Fee Revenue Translates Into Autopilot Budgeting. Perhaps the most significant problem with the Governor's compact is its treatment of new fee revenue. In contrast to past practice, the Governor's budget proposal does not consider new fee revenue as available to meet needs identified in the state budget. Instead, the Governor's compact would fund all identified budgetary needs entirely with General Fund support, allowing the segments to use all their new fee revenue for whatever additional purposes they deemed worthwhile. This approach allows the segments routinely to receive significantly more total revenue than is needed to cover the normal cost increases resulting from enrollment growth and inflation.

Fee Agreement Used to Justify All Budget-Year Fee Proposals

The Governor's budget contains several fee proposals. The justification given for these proposals is that they are consistent with his compact with UC and CSU. The major fee proposals are to increase:

- Resident undergraduate fees at UC and CSU by 8 percent.

- Resident graduate fees at UC and CSU by 10 percent.
- Resident professional schools at UC and Hastings College of the Law from 5 percent to 9 percent, depending on the program. Addi-

Institutional Aid Decisions Need Better Justification

As we have discussed in previous years, we do not think the state (or the segments) should budget for institutional financial aid by setting aside an arbitrary percentage of new fee revenue. This set-aside approach has no rational policy basis and has resulted in funding levels that are disconnected from identified needs. For example, between 2002-03 and 2003-04, the state augmented the Cal Grant Entitlement program by $88 million (or 37 percent) to cover enrollment growth and undergraduate fee increases at the University of California (UC) and the California State University (CSU). Despite providing financial aid increases sufficient to offset costs through the Cal Grant program, UC and CSU's own undergraduate institutional aid budgets increased $130 million (or 54 percent) due to set asides from fee increases. It is unclear what financial aid purposes were served by the set-aside funds that were not explicitly addressed by the Legislature through its Cal Grant funding decisions.

The fee set-aside approach also disregards basic budgeting standards for accountability and hinders legislative oversight. For example, when asked for information about the institutional aid set aside, the segments could estimate neither the number of need-based institutional aid recipients nor the average institutional aid award for the prior, current, or budget years. In lieu of this approach, we continue to recommend the elimination of fixed percentage fee set asides. Instead, the segments should be required to provide the Legislature with evidence of their student aid needs and justification for any requested augmentation. In the absence of better information or more sophisticated forecasting tools, we recommend the Legislature address any shortfalls in undergraduate financial aid by augmenting the Cal Grant program (sufficient to cover enrollment growth and fee increases, as is longstanding practice). Since the Cal Grant program does not address *graduate* financial need, it would be appropriate for the Legislature to consider providing additional resources to the segments in this area, given growth in graduate students and proposed graduate fee increases. (For additional detail about the segments' institutional aid programs and the set-aside approach, please see "The Institutional Aid Set Aside," *2004-05 Analysis of the Budget Bill*, pages E-228 to E-233.)

tionally, three programs—Public Health, Public Policy, and International Relations and Pacific Studies—would begin charging supplemental professional school fees for the first time, resulting in much higher year-to-year percent increases (61 percent) for these programs.

Total nonresident charges at UC and CSU would increase due to these proposed increases in resident fees, which essentially represent base charges for nonresident students. In addition, for UC undergraduates, the budget assumes nonresident tuition (which essentially represents a supplemental charge) would increase by 5 percent. Figure 2 compares 2004-05 undergraduate and graduate fee levels with the proposed 2005-06 levels, and Figure 3 (see page E-186) provides comparable information for professional school fees.

Adopt Share-of-Cost Fee Policy

We recommend the state adopt a fee policy for the University of California, California State University, and California Community Colleges that sets certain targets for the share of education cost to be paid by students.

To address the problems with the state's existing fee-setting practices and the Governor's fee agreements with the segments, we recommend the state adopt a share-of-cost fee policy. Most importantly, a share-of-cost fee policy would provide both an underlying rationale for fee levels and a mechanism for annually assessing these levels. In doing so, it would promote clear expectations about fee levels and consistent treatment of student cohorts over time. It also would create incentives for students to hold the segments accountable for keeping costs low and quality high, and it would formally recognize the private as well as public benefits of higher education.

Promotes Clear Expectations and Consistent Treatment. A share-of-cost fee policy would make explicit the share of total education costs that nonfinancially needy students would be expected to bear. (Financially needy students meeting certain academic and age criteria would continue to receive aid sufficient to cover education fees.) Once the share-of-cost target was achieved, it would be maintained over time. For example, if nonneedy UC undergraduates were expected to pay 40 percent of their total education costs, fees would be adjusted annually such that students continued to pay 40 percent of total costs (without the need to rely upon any specific inflationary index). The central advantages of this approach are that nonneedy students would have clear expectations about the share of cost they would be expected to bear and student cohorts would be treated consistently over time.

Figure 2

Summary of Governor's Undergraduate and Graduate Fee Proposals

(Systemwide Charges for Full-Time Students[a])

	2004-05 Actual	2005-06 Proposed	Change	
			Amount	Percent
University of California				
Resident Charge				
Undergraduates	$5,684	$6,141	$457	8%
Graduates	6,269	6,897	628	10
Nonresident Charge				
Undergraduates	$22,640	$23,961	$1,321	6%
Graduates	21,208	21,858	650	3
California State University				
Resident Charge				
Undergraduates	$2,334	$2,520	$186	8%
Teacher education students	2,706	2,922	216	8
Graduates	2,820	3,102	282	10
Nonresident Charge				
Undergraduates	$12,504	$12,690	$186	1%
Graduates	12,990	13,272	282	2
California Community Colleges				
Resident charge[b]	$780	$780	—	—
Nonresident charge[c]	4,470	4,530	$60	1%

a Reflects only systemwide charges. Does not include campus-based fees.

b Reflects $26 per unit charge.

c Nonresident students are charged on a per-unit basis (as are resident students). In 2004-05, the nonresident per-unit rate was $149. This rate is projected to increase to $151 in 2005-06.

Strengthens Accountability. A share-of-cost fee policy would link fee levels to total education costs. As costs increased, fees would increase along with them. In other words, a portion of any increase in the cost of education would be automatically passed on to nonneedy students in the form of higher fees. Students and their families, therefore, would have a much greater incentive to hold their campuses accountable for keeping costs low and quality high.

Figure 3

Summary of Governor's Professional School Fee Proposals

(Systemwide Charges for Full-Time Students[a])

	2004-05 Budget Act	2005-06 Proposed	Change	
			Amount	Percent
University of California				
Resident Charge				
Business/management	$19,324	$20,368	$1,044	5%
Law	19,113	20,150	1,037	5

Hastings College of the Law				
Resident charge	$18,750	$19,725	$975	5%
Nonresident charge	30,950	30,950	—	—

[a] Reflects only systemwide charges. Does not include campus-based fees. In 2004-05, average campus-based fees ranged from $1,199 in public health programs to $4,101 in the veterinary medicine program.

[b] Public health, public policy, and international relations and pacific studies.

Formally Recognizes That Higher Education Is Shared Responsibility With Shared Benefits. The fee policies the state adopted in 1985 and 1990 both indicated that higher education should be a shared responsibility among students and the state. A share-of-cost fee policy explicitly recognizes the private returns of higher education by asking nonneedy students to contribute some portion toward their education costs. Clearly, individuals receive significant private benefits from higher education. Although establishing causality is difficult, a high correlation exists between level of education and personal earnings. For example, compared to those with only a high school education, the median earnings for adults with an associate degree is 22 percent higher. The median earnings for adults with a baccalaureate degree is 62 percent higher, and the median earnings of professional degree-holders is more than 200 percent greater. Unsurprisingly, higher education institutions across the country commonly use potential earnings (one key measure of private benefits) to determine appropriate cost-sharing arrangements.

Other Factors Might Be Considered to Provide Fuller Context. Although we think an explicit share-of-cost target would be the simplest, most consistent, and most defensible factor to use in setting and adjusting fees, the Legislature might want periodically to consider fee levels in the context of other factors—including fees at comparison institutions, the quality of specific education programs, the need for additional workers in particular occupations, and federal financial aid policies. This periodic review would help the Legislature better assess how well the share-of-cost fee policy was meeting various policy objectives.

Use Share-of-Cost Approach to Assess Budget-Year Fee Levels

We recommend the Legislature assess the Governor's budget-year fee proposals in light of their effect on students' share of cost. In most cases, the proposals would make at least some progress toward the share-of-cost targets specified in AB 2710 (Liu).

Below, we assess each of the Governor's fee proposals.

Increasing Resident Undergraduate Fees by 8 Percent Progresses Toward AB 2710 Share-of-Cost Targets. Figure 4 (see next page) shows resident fees as a percent of total operating costs for each of the three segments. As the figure shows, UC and CSU's proposed fee increases for resident undergraduates would increase students' share of total cost slightly. While the share of cost at UC and CSU would remain below the targets specified in AB 2710, some progress would be made toward eventually reaching them.

Figure 4

Resident Fees as a Share of Total Education Costs At California's Public Colleges and Universities

	2003-04 Actual	2004-05 Budgeted	2005-06 Proposed
Undergraduates			
University of California (UC)			
Cost of education	$19,144	$19,859	$20,087
Resident fees	4,984	5,684	6,141
Fee as a percent of cost	26.0%	29.0%	31.0%
California State University (CSU)			
Cost of education	$9,699	$10,312	$10,601
Resident fees	2,046	2,334	2,520
Fee as a percent of cost	21.0%	23.0%	24.0%
California Community Colleges			
Cost of education	$4,343	$4,698	$4,883
Resident fees	540	780	780
Fee as a percent of cost	12.4%	16.6%	16.0%
Graduates			
UC			
Cost of education	$28,716	$29,788	$30,130
Resident fees	5,219	6,269	6,897
Fee as a percent of cost	18.0%	21.0%	23.0%
CSU			
Cost of education	$14,549	$15,468	$15,902
Resident fees	2,256	2,820	3,102
Fee as a percent of cost	16.0%	18.0%	20.0%

Undergraduate Fees Would Remain Low Relative to Comparison Institutions. The proposed resident undergraduate fee increases likely would not affect UC and CSU's ranking compared to similar institutions. As Figure 5 shows, of UC's four public comparison institutions, only the State University of New York, Buffalo campus had a lower fee level in 2004-05. The UC undergraduate rate was more than $1,000 below the average of its public comparison institutions. Assuming fees at the comparison institutions increase in 2005-06 at the same average rate they increased last year, the UC undergraduate rate would remain more than $1,000 below the comparison-institution average. At CSU, even with the proposed 8 percent fee

increase, its fee would very likely remain the lowest of all its public comparison institutions and only about one-half of the average of these comparison institutions.

Figure 5

UC and CSU's Resident Undergraduate Fees Low Relative to Comparison Institutions

	2004-05 Actual	2005-06 Proposed/ Projected[a]
UC and Its Public Comparison Institutions		
University of Michigan	$8,722	$9,323
University of Illinois	7,944	8,491
Average	*7,341*	*7,846*
University of Virginia	6,790	7,258
UC	**6,312**	**6,769**
State University of New York	5,907	6,314
CSU and Its Public Comparison Institutions		
Rutgers University	$8,869	$9,652
University of Maryland, Baltimore	8,020	8,728
University of Connecticut	7,490	8,151
Cleveland State University	6,618	7,202
State University of New York, Albany	6,383	6,946
University of Wisconsin, Milwaukee	5,835	6,350
Wayne State University	5,819	6,333
Average	*5,656*	*6,155*
Illinois State University	5,588	6,081
George Mason University	5,448	5,929
University of Texas, Arlington	5,093	5,543
North Carolina State University	4,260	4,636
University of Colorado, Denver	4,160	4,527
Georgia State University	4,154	4,521
Arizona State University	4,066	4,425
University of Nevada, Reno	3,034	3,302
CSU	**2,916**	**3,102**

[a] Reflects Governor's budget proposals for UC and CSU. For comparison institutions, adjusts 2004-05 fee levels by the average prior-year growth rate (6.9 percent for UC's comparison institutions and 8.8 percent for CSU's comparison institutions).

Increasing Graduate Fees by 10 Percent Makes Slight Progress Toward Target Differential. As shown in Figure 4, the graduate fee proposal would result in slight increases in graduate students' share of cost. These shares, however, would remain quite low. For example, even with a 10 percent fee increase, nonneedy graduate students at CSU would be bearing only one-fifth of their total support costs. Moreover, graduate students' share of cost would remain below that of undergraduates. It is unclear why the state would ask nonneedy undergraduates to bear a larger share of their education cost than nonneedy graduate students.

Graduate Fees Likely to Remain Lowest of Comparison Institutions. In addition, UC and CSU's graduate fees are even further below their comparison institutions (in both dollar and percentage terms) than undergraduate fees. The CSU 2004-05 rate, for example, is approximately $600 lower than the next lowest comparison institution and $4,300 less than the average of the comparison institutions. As Figure 6 shows, UC and CSU's graduate fees currently are the lowest of all their comparison institutions, and, even with the proposed 2005-06 fee increases, would very likely remain the lowest.

Over Next Several Years, Slightly Larger Graduate Fee Increases Would Help Address Existing Disparities. In short, graduate fees represent an even smaller share of cost than undergraduate fees, and, relative to undergraduate fees, are even further below their comparison institutions. Moreover, graduate fees are not yet 50 percent higher than undergraduate fees, a target agreed upon by the segments. To address these existing disparities, the Legislature may want to institute slightly higher graduate fee increases over the next several years.

Inconsistent Treatment of Nonresident Students. Figure 7 (see page E-192) summarizes the fees paid by nonresident students at the three segments. As the figure shows, nonresident undergraduates at UC and CSU currently are paying substantially more than full cost, and nonresident students at CCC (largely because of statutory requirements) are paying just about full cost. By comparison, nonresident graduate students at UC and CSU are paying considerably less than full cost.

Over Next Several Years, Larger Nonresident Graduate Fee Increases Would Help Align With Full Cost. It is unclear why the state currently is providing a substantial subsidy to nonresident graduate students. A share-of-cost fee policy might have all nonresident students pay full cost. If this were to be the state's policy, then the Legislature would want to increase nonresident graduate tuition more quickly over the next several years while holding nonresident undergraduate tuition steady. Both actions would help align nonresident charges with full cost.

Figure 6

Legislature Should Budget New Fee Revenue

We recommend the Legislature reject the Governor's proposal to let the segments decide how to spend fee increase revenues. We recommend instead the Legislature follow standard budget practices and assess the segments' needs, decide what to fund, and then apply the segment's new fee revenue toward the identified costs.

As described earlier, one of the primary problems with the Governor's budget proposal is that it treats new fee revenue as unavailable to meet legislatively determined needs of the segments. Instead, the segments could use new fee revenue for whatever they deemed worthwhile. This

translates into a highly unusual form of budgeting, whereby the segments raise and spend revenue outside of the regular legislative review process. It also is a departure from longstanding policy that fee revenues are an important funding source for the segments' basic instructional programs.

Focus on Needs, Apply Fee Revenue to Them. We recommend the Legislature follow common budgeting practices and begin by identifying the segments' needs and debating the advantages and disadvantages of specific funding requests. For example, the Legislature might choose to fund enrollment growth and a cost-of-living adjustment for each segment. It also might choose to provide the segments additional support for graduate financial aid. Each action obviously would entail related costs. As a result of the Governor's proposed fee increases, UC and CSU have $114 million and $76 million, respectively, in new revenue from the fee increases that can be used to cover all or a portion of these costs. If fee revenue is inadequate to meet all identified needs, then, as is typically the case, the General Fund would be applied toward the remaining costs.

In sum, rather than following the Governor's approach, which would result in inadequate oversight of the segments' budgets, we recommend the Legislature carefully consider each of the segments' requests and determine which ones should be funded. In doing so, the Legislature should consider new fee revenue as available to help meet identified needs.

Score Fee Revenue From Second-Year Phase In Of Excess-Unit Fee Initiative

We recommend the Legislature score $25.5 million in additional fee revenue associated with the second-year phase in of the excess-unit fee policy and capture a like amount of General Fund savings ($1.1 million for the University of California and $24.4 million for the California State University).

Adopted in the current year, the excess-unit fee policy is to charge undergraduate students full cost for units taken in excess of 110 percent of the units needed to obtain their degree. The policy is to be phased in over a five-year period—capturing only one-fifth of the potential excess-unit fee revenue in 2004-05, two-fifths of potential excess-unit fee revenue in 2005-06, and, so forth, until all excess-unit fee revenue is scored in 2008-09. This extended implementation period was designed to give the segments considerable flexibility in implementing the new policy and determining who should be assessed the higher fee.

UC and CSU Have Been Developing Segmental Policies. The UC Board of Regents plans to adopt a detailed policy at its upcoming March meeting. It tentatively has decided to define "full" cost as the full marginal

cost (which is used for the state's enrollment growth funding practices), and it is likely to provide special treatment for students with a double major or high-unit major. The CSU indicates it is making progress on developing its policy, but, at the time of this writing, could provide no detail.

Second-Year Phase In to Yield $25.5 Million in Additional Fee Revenue. Despite being the second-year phase in of the excess-unit fee policy adopted by the Legislature and reflected in the Governor's higher education compact, the 2005-06 budget proposal does not reflect any associated fee revenue. The second-year phase in is to yield $25.5 million in additional fee revenue consistent with the savings scored in 2004-05. We recommend the Legislature score these revenues in 2005-06, resulting in a comparable amount of General Fund savings.

State Lacks CCC Fee Policy

The state currently does not have a policy for setting CCC fees. The Governor's fee agreements do not encompass CCC fees, nor did AB 2710 address CCC fees. Yet, without a fee policy, students have no clear expectation as to what they will need to pay for a CCC education, and the public has no clear understanding of its expected contribution. Currently, the CCC fee is the lowest of any state in the country. In 2004-05, annual community college fees for a full-time student were $780. The national average was about three times this amount ($2,324).

Existing Fee Level Has Unintended Consequence—State Loses Federal Funds, CCC Loses Revenue. Although keeping fees low might seem like a reasonable strategy for maintaining access, it has an unintended effect—the state loses substantial revenue from middle-income and wealthy students—many of whom would receive substantial, if not full, fee refunds from the federal government. California is one of the few states that does not take full advantage of these federal funds (that come back to fee-paying students in the form of tax credits and tax deductions). Moreover, if California's fee waiver program works as intended, a fee increase would have no effect on financially needy students' access to community colleges—as all students with any financial need would receive full fee coverage. Thus, a low fee policy actually works to the disadvantage of the state.

Federal Tax Benefits Result in Fee Refunds for Middle- and Upper Middle-Income Students. Figure 8 provides basic information about the federal Hope tax credit, Lifetime Learning tax credit, and tuition and fee tax deduction. As the figure indicates, the Hope tax credit is designed for middle-income students with family incomes up to $105,000. Through the Hope tax credit, the federal government reimburses these middle-income students for the first $1,000 they pay in education fees. For students with family incomes

between $105,000 and $160,000, the federal government provides a tax deduction on the first $2,000 they pay in education fees.

Almost Every Other State in the Nation Maximizes Federal Aid. Currently, only California and some community colleges in New Mexico charge less than $1,000. Only 16 states charge less than $2,000. California, therefore, is one of few states currently not maximizing Hope tax credits for higher education. Put another way, CCC is not collecting from middle- and upper middle-income students fee revenue that, if collected, would be significantly offset with federal tax credits back to these same students. In effect, the state is paying for costs that the federal government would otherwise pay.

Figure 8

Federal Tax Benefits Applied Toward Higher Education Fees

Hope Credit	Lifetime Learning Credit	Tuition and Fee Deduction
• Directly reduces tax bill.	• Directly reduces tax bill.	• Reduces taxable income.
• Covers 100 percent of first $1,000 in fee payments. Covers 50 percent of second $1,000 (for maximum tax credit of $1,500).	• Covers 20 percent of first $10,000 in fee payments.	• Deducts up to $2,000 in fee payments.
• Designed for middle-income students who are: —In first or second year of college. —Attend at least half time.	• Designed for any middle-income student beyond first two years of college.	• Designed for any upper middle-income student not qualifying for a tax credit.
• Phases out entirely at adjusted income of $52,000 for single filers and $105,000 for married filers.	• Phases out entirely at adjusted income of $52,000 for single filers and $105,000 for married filers.	• Capped at adjusted income of $65,000 for single filers and $160,000 for married filers.

Increasing CCC Fee Shifts Costs to Federal Government Without Hurting Students

We recommend the Legislature increase the per unit fee at California Community Colleges (CCC) from $26 to $33. This higher fee, to be charged only to middle-income and wealthy students, would generate about $100 million in additional revenue for CCC. The federal government, in turn, would fully reimburse those fee-paying students with family incomes up to $105,000 (unless they do not have sufficient tax liability) and partially reimburse those fee-paying students with family incomes up to

$160,000. Financially needy students, on the other hand, are entitled to have their fees entirely waived (through a state aid program) and thus should pay nothing even with fees being increased. Given the Governor's budget continues to provide CCC with $37 million for financial aid outreach and counseling, CCC has resources to ensure that all eligible students receive available aid.

The existing $26 per unit fee, which only nonnneedy students are required to pay, represents 17 percent of total education costs. If raised to $33 per unit, nonneedy students' share of cost would increase to 20 percent. We believe it is reasonable for the state to ask nonneedy students (those who demonstrate no financial need using the standard federal means-tested methodology) to pay one-fifth of their total education costs. Raising the fee also would have substantial benefits—increasing CCC revenue and federal aid without restricting access for financially needy students.

Generates More Than $100 Million in State Revenue. Charging nonneedy students an additional $7 per unit would generate about $100 million in additional fee revenue for the community colleges. Of the nonneedy students paying the higher fee, those with family incomes up to $105,000 would qualify for a full fee refund in the form of a Hope tax credit. (This assumes that the family had a tax liability at least equal to the fee payment, which would usually be the case.) Others with family incomes up to $160,000 would qualify for a partial fee refund in the form of a Lifetime Learning tax credit or tax deduction. Based on data in the 2003 Student Expenses and Resource Survey, more than 90 percent of CCC students having to pay the higher fee would receive some offsetting federal tax benefit. In total, we estimate about one-half of the higher fees paid would be offset by these federal tax benefits.

Raising the fee also might result in a small additional Pell benefit (of several million dollars) to the financially neediest students attending some community colleges. That is, raising the fee to $33 per unit would ensure that the financially neediest students at all community colleges, even those with low average full-time workloads, would be able to obtain the maximum federal Pell Grant.

Fee Waiver Designed to Insulate Financially Needy Students From Effect of Any Fee Increase. The fee increase should not affect financially needy students. This is because the Board of Governors' fee waiver program waives fees for all students who demonstrate financial need. The program, which functions as an entitlement, is a generous needs-based program—requiring students to demonstrate only $1 of need to receive full fee coverage. Moreover, it helps financially needy students of all kinds—young and old; entering college for the first time or returning as an adult; seeking an

associate degree, vocational degree, certificate, or license; seeking to transfer; already possessing a baccalaureate degree; seeking to prepare for a new career or advance in an existing career; and taking any number of classes.

The program also has relatively high income cut-offs. For example, a community college student living at home, with a younger sibling and married parents, could have a family income up to roughly $62,000 and still qualify for a fee waiver. The income cut-off would increase to roughly $75,000 if this same student was living away from home and would increase to $110,000 if two children were attending community college simultaneously. An older, independent student living alone could have an income up to roughly $40,000 and a student with a one child could have an income up to roughly $76,000 and still qualify for fee waivers.

Outreach Funding Helps Educate About Federal Aid Opportunities. In 2003-04 and 2004-05, in conjunction with the enacted CCC fee increases, the state provided CCC with significant new outreach funding to help educate students about federal and state financial aid opportunities. The Governor's 2005-06 budget proposal maintains this outreach funding at its current-year level of $37 million. These funds are to be used explicitly for individual financial aid counseling and a statewide media campaign that focuses on educating students about state and federal financial aid opportunities. This funding is in addition to the approximately $18 million the Student Aid Commission spends annually on financial aid outreach and counseling. (Even if fees are unchanged, the Governor's budget assumes both CCC and the commission will continue these outreach efforts.)

For all these reasons, we recommend raising the CCC fee, which only nonneedy students are required to pay, from $26 to $33 per unit. This would generate about $100 million in additional fee revenue for community colleges. Significantly, the state could realize these revenues without any effect on financially needy students (who are eligible for full fee waivers) and very little impact on middle-income students (whose fees would be offset by comparable increases in federal tax benefits).

UNIVERSITY OF CALIFORNIA (6440)

The University of California (UC) consists of eight general campuses and one health science campus. The university is developing a tenth campus in Merced, which is scheduled to open in fall 2005. The Governor's budget proposal includes about $19.4 billion for UC from all fund sources—including state General Fund, student fee revenue, federal funds, and other funds. This is an increase of $722 million, or 3.9 percent, from the revised current-year amount. The budget proposes General Fund spending of $2.8 billion for the segment in 2005-06. This is an increase of $97.5 million, or 3.6 percent, from the proposed revision of the 2004-05 budget.

For the current year, the Governor proposes a net General Fund reduction of $12.2 million to account for (1) Public Employees' Retirement System rate adjustments and (2) an unexpended balance from lease-revenue bond proceeds. For the budget year, the Governor proposes $128.1 million in General Fund augmentations, $21.1 million in General Fund reductions, and a $9.5 million net decrease for baseline and technical adjustments. Figure 1 summarizes the Governor's proposed General Fund changes for the current year and the budget year.

Proposed Augmentations. The budget provides UC with a 3 percent General Fund base increase of $76.1 million that is not restricted for specific purposes. The UC indicates that it would apply most of these funds towards various salary increases. The Governor's budget also includes a $37.9 million General Fund augmentation for enrollment growth at UC. This would increase the university's budgeted enrollment by 5,000 full-time equivalent (FTE) students, or 2.5 percent, above the current-year level. In addition, the budget proposes a $14 million one-time augmentation for the UC campus in Merced, which is scheduled to open this fall.

Proposed Reductions. While the Governor's budget proposes a total of $128.1 million in General Fund augmentations, it also proposes $21.1 million in General Fund reductions. Specifically, the budget includes a $17.3 million reduction to outreach programs (also known as academic

preparation programs) and enrollment. Proposed budget bill language directs UC to apply this reduction to any combination of outreach programs and student enrollment that it chooses. The Governor's budget also eliminates all General Fund support for the labor research institute, for savings of $3.8 million. Both of the above proposals would reduce specific augmentations approved by the Legislature last year in its adoption of the 2004-05 budget.

Student Fee Increases

The Governor's budget assumes that the university will receive $144.6 million in new student fee revenue—$30.6 million associated with 2.5 percent enrollment growth and $114 million from fee increases recently

approved by the UC Board of Regents for undergraduate, graduate, professional school, and nonresident students. Below, we review the proposed fee levels. (For a detailed discussion about the need for a long-term fee policy and how fees interact with General Fund revenue, please see the "Student Fees" write-up earlier in this chapter.)

Undergraduate and Graduate Systemwide Fees. Figure 2 summarizes the planned increases in undergraduate and graduate systemwide fees. As the figure shows, the budget assumes a planned increase of 8 percent in the systemwide fee for undergraduate students. The budget also assumes a 10 percent increase in the systemwide fee for graduate students. When combined with campus-based fees, the total student fee for a resident full-time student in 2005-06 would be $6,769 for undergraduates and $8,556 for graduates. In addition to paying the systemwide and campus-based fees, professional school students and nonresident students also pay special supplementary fees, as we discuss below.

Figure 2

UC Systemwide Fees[a]
Resident Full-Time Students

			Change From 2004-05	
	2004-05	2005-06	Amount	Percent
Undergraduates	$5,684	$6,141	$457	8%
Graduates	6,269	6,897	628	10

[a] Amounts do not include campus-based fees.

Professional School Fees. The Governor's budget assumes $7.3 million in additional revenue from a planned 3 percent average increase in professional school fees. The budget also proposes extending a supplementary fee to professional programs in public health, public policy, and pacific international affairs. Currently, professional school fees vary by program. For 2005-06, the professional school fee is planned to range from a low of $3,013 for students in nursing programs to a high of $14,276 for business/management school students.

Nonresident Tuition. The proposed budget also assumes a planned 5 percent increase in the tuition surcharge imposed on nonresident students. Specifically, this surcharge would increase from $16,476 to $17,304. The increase in nonresident tuition is expected to provide about $6 million in additional fee revenue in the budget year.

Intersegmental Issues Involving UC

In intersegmental write-ups earlier in this chapter, we address several issues relating to UC. For each of these issues, we offer an alternative to the Governor's proposal. We summarize our main findings and recommendations below.

Evaluate Higher Education Funding Needs Based on Master Plan, Not Governor's "Compact." The General Fund support and student fee increases proposed for 2005-06 are consistent with the compact that the Governor developed with UC and the California State University last spring. This compact specifies targets for the Governor's budget requests through 2010-11. Notwithstanding the Governor's compact, we advise the Legislature to enact a budget for higher education as it normally does, by examining each of the Governor's proposals on its own merits. Specifically, the Legislature should evaluate funding for higher education based on its *Master Plan for Higher Education* and not the Governor's compact.

Fund Enrollment Growth Consistent With Demographic Projections and Agreed-Upon Funding Practices. The Governor's budget provides $37.9 million to fund 2.5 percent enrollment growth at a marginal General Fund cost of $7,588 per additional FTE student. We recommend the Legislature instead provide funding for enrollment growth at a rate of 2 percent, which better matches anticipated need under the Master Plan. We also recommend adopting budget bill language specifying an enrollment target of 204,996 FTE students for UC. Moreover, using our marginal cost estimate based on the agreed-upon 1995 methodology, we recommend reducing the Governor's proposed per student funding rate for UC from $7,588 to $7,108. Accordingly, we recommend a General Fund reduction of $9.4 million for UC. In the "Enrollment Growth and Funding" write-up in this chapter, we also propose that the Legislature revisit and assess how the state determines the amount of funding to provide UC for each additional FTE student in future budget years.

Align Student Fee Increases to Share of Education Costs. The proposed budget assumes an additional $114 million in student fee revenue from various fee increases recently approved by the UC Regents. However, the Governor's budget does not account for this revenue, ceding to UC full discretion in deciding how to spend the additional revenue. We recommend that the Legislature consider this revenue as part of the base support for UC's programs, as it always has. In the "Student Fees" section, we also propose the Legislature adopt a long-term fee policy that sets fees at a fixed percentage of students' total education costs. Moreover, we recommend the Legislature reduce UC's General Fund appropriation to reflect $1.1 million in new revenue and savings associated with the second-year phase-in of the excess-unit fee policy that was adopted as part of the 2004-05 budget.

Impact of LAO Recommendations

Adopting all the above recommendations would result in a much different approach to UC's budget than that taken by the administration. In our view, the Legislature should approach UC's budget as it traditionally has: (1) assessing the cost of funding the programmatic objectives the Legislature has identified and (2) directing available funding—including both General Fund support and student fee revenue—to cover those costs. Figure 3 shows how UC's budget would be affected if the Legislature adopted our recommendations under this approach. Specifically, it shows the additional expenditures and resources above 2004-05 levels.

Figure 3

LAO Alternative 2005-06 Budget Plan for UC

Increases Over 2004-05

	In Millions
Expenditures	
Base budget increase (3 percent)[a]	$122.2
Enrollment growth (2 percent)	28.5
Adjustments for Merced and annuitant health and dental benefits[b]	4.5
Total	**$155.2**
Resources	
Additional revenue from student fee increase[c]	$113.4
Additional revenue from excess course unit charge	1.1
Governor's proposed General Fund increase	97.5
Total	**$212.0**
Freed Up General Fund Resources	**$56.8**

a Based on total state General Fund and student fee revenue.

b As proposed in the Governor's budget.

c Assumes 2 percent enrollment growth.

Expenditures. Figure 3 first shows new spending components:

- ***Base Increase.*** As discussed earlier, the Governor proposes a 3 percent base increase for UC. Given that we project inflation in 2005-06 will roughly match this percentage, we do not take issue with it.

However, the Governor applies the 3 percent increase only to the portion of UC's budget funded from the General Fund. We believe that a base increase should be applied to all of UC's base budget, including that portion which is funded with student fee revenue. As a result, under our approach, a 3 percent base increase would cost $122.2 million.

- ***Enrollment Growth.*** As discussed earlier, we recommend the Legislature fund a 2 percent increase in enrollment for UC. This would cost $28.5 million.
- ***Other Adjustments.*** The Governor proposes a net increase of $4.5 million to accommodate the costs of opening UC Merced in fall 2005 and various health and benefits costs. We have included these costs in Figure 3. We have not, however, included the Governor's proposed $17.3 million reduction to outreach and enrollment funding, which grants to UC the authority to decide where the cuts would be made. We believe the Legislature should specifically designate any areas for reduction so that it knows what it is buying in the budget.

Resources. Figure 3 displays two sources of new revenue:

- ***Fee Revenue.*** We estimate that the planned fee increases for the budget year will provide UC with $114.5 million in new student fee revenue. This amount assumes additional revenue from the university's excess course unit policy and our proposed 2 percent enrollment growth.
- ***General Fund Support.*** As discussed earlier in this analysis, the Governor's budget proposes to increase General Fund support for UC by $97.5 million from the revised 2004-05 budget (see Figure 1). As a starting point, therefore, these funds are available to fund the additional costs identified above.

Uncommitted Resources. As shown in Figure 3, the Legislature could (1) fully fund enrollment growth and a cost-of-living adjustment for UC and (2) reject the Governor's proposed $17.3 million reduction to UC's outreach programs and enrollment funding, all at a lower General Fund cost than proposed by the Governor. In fact, under our proposal the Legislature would free up almost $57 million in General Fund support (from the level in the Governor's budget proposal) to address other priorities.

As discussed earlier, the Legislature may wish to use some of this amount to provide increased financial aid for UC graduate students, given that these students, unlike needy UC undergraduates, are not protected

from fee increases by the Cal Grant entitlement program. Our identified General Fund savings could also be used to fund legislative priorities in other areas, including addressing the state's budget problem.

CALIFORNIA STATE UNIVERSITY (6610)

The California State University (CSU) consists of 23 campuses. The Governor's budget includes about $6 billion for CSU from all fund sources—including General Fund, student fee revenue, federal funds, and other funds. This is an increase of $187 million, or 3.2 percent, from the revised current-year amount. Of that increase, $101 million will be generated from student fees. The budget proposes General Fund spending of $2.6 billion for the system in 2005-06. This is an increase of $111 million, or 4.4 percent, from the revised 2004-05 budget. Figure 1 (see next page) summarizes changes from the enacted 2004-05 budget to the Governor's 2005-06 proposal.

Proposed Augmentations. The proposed budget provides CSU with $122.5 million in General Fund augmentations to fulfill an agreement the Governor made with CSU. Specifically, the budget provides $71.7 million for a 3 percent base budget increase and $50.8 million to accommodate a 2.5 percent enrollment increase (to serve an additional 8,100 full-time equivalent [FTE] students).

Proposed Reductions. The budget also proposes $12 million in General Fund reductions. These changes include a $7 million reduction to enrollment growth and outreach, which would be allocated between the two areas at CSU's discretion.

Student Fee Increases

For 2005-06, the Governor's budget assumes increases in the systemwide fee for undergraduate and graduate students and nonresident tuition. These increases have already been approved by the Board of Trustees. The fee increases are expected to provide an additional $76 million in new student fee revenue. The Governor's proposal assumes the additional student fee revenue will *not* be offset by a reduction in CSU's General Fund support. (For a detailed description about the need for a long-term fee policy and how fees represent another source of funding for the university's operations, please see the "Student Fees" write-up earlier in this chapter.)

Undergraduate and Graduate Systemwide Fees. As Figure 2 shows, the Governor's budget assumes an increase from 2004-05 of 8 percent, or $186, in the systemwide fee for undergraduate students. The proposed budget also assumes a 10 percent increase, or $282, in the graduate student systemwide fee.

Nonresident Fees. At CSU, nonresident students also pay a supplementary fee in the form of nonresident tuition. The budget assumes this supplementary fee will remain at the current level of $10,170.

Intersegmental Issues Involving CSU

In intersegmental write-ups earlier in this chapter, we address several issues relating to CSU. For each of these issues, we offer an alternative to the Governor's proposal. We summarize our main findings and recommendations below.

Evaluate Higher Education Funding Needs Based on Master Plan, Not Governor's "Compact." The General Fund support and student fee increases proposed for 2005-06 are consistent with the compact that the Governor developed with CSU and the University of California (UC) last spring. This compact specifies targets for the Governor's budget requests through 2010-11. Notwithstanding the Governor's compact, we advise the Legislature to enact a budget for higher education as it normally does, by examining each of the Governor's proposals on its own merits. Specifically, the Legislature should evaluate funding for higher education based on its *Master Plan for Higher Education* and not the Governor's compact.

Fund Enrollment Growth Consistent With Demographic Projections and Agreed-Upon Funding Practices. The Governor's budget provides $50.8 million to fund 2.5 percent enrollment growth at a marginal General Fund cost of $6,270 per additional FTE student. We recommend the Legislature instead provide funding for enrollment growth at a rate of 2 percent, which better matches anticipated need under the Master Plan. We also recommend adopting budget bill language specifying an enrollment target of 330,602 FTE students for CSU. Moreover, using our marginal cost estimate based on the agreed-upon 1995 methodology, we recommend reducing the Governor's proposed per student funding rate for CSU from $6,270 to $5,999. Accordingly, we recommend a General Fund reduction of $11.9 million for CSU. In the "Enrollment Growth and Funding" write-up of this chapter, we also propose that the Legislature revisit and assess how

the state determines the amount of funding to provide CSU for each additional FTE student in future budget years.

Align Student Fee Increases to Share of Education Costs. The proposed budget assumes an additional $101 million in student fee revenue largely due to various fee increases recently approved by the CSU Board of Trustees. However, the Governor's budget does not account for this revenue, ceding to CSU full discretion in deciding how to spend the additional funds. We recommend that the Legislature consider this revenue as part of the base support for CSU's programs, as it always has. In the "Student Fees" write-up, we also propose the Legislature adopt a long-term fee policy that sets fees at a fixed percentage of students' total education costs. Moreover, we recommend the Legislature reduce CSU's General Fund appropriation to reflect $24.4 million in new revenue and savings associated with the second-year phase in of the excess unit fee policy that was adopted as part of the 2004-05 budget.

Impact of LAO Recommendations

Adopting all the above recommendations would result in a much different approach to CSU's budget than that taken by the administration. In our view, the Legislature should approach CSU's budget as it traditionally has: (1) assessing the cost of funding the programmatic objectives the Legislature has identified and (2) directing available funding—including both General Fund support and student fee revenue—to cover those costs. Figure 3 shows how CSU's budget would be affected if the Legislature adopted our recommendations under this approach. Specifically, it shows the additional expenditures and resources above 2004-05 levels.

Expenditures. Figure 3 first shows new spending components:

- ***Base Increase.*** As discussed earlier, the Governor proposes a 3 percent base increase for CSU. Given that we project inflation in 2005-06 will roughly match this percentage, we do not take issue with it. However, the Governor applies the 3 percent increase only to the portion of CSU's budget funded from the General Fund. We believe that a base increase should be applied to all of CSU's base budget, including that portion which is funded with student fee revenue. As a result, under our approach, a 3 percent base increase would cost $105 million.
- ***Enrollment Growth.*** As discussed earlier, we recommend the Legislature fund a 2 percent increase in enrollment for CSU. This would cost $38.9 million.

Figure 3

LAO Alternative Budget Plan for CSU

Increases Over 2004-05

	In Millions
Expenditures	
Base budget increase (3 percent)[a]	$105.0
Enrollment growth (2 percent)	38.9
Technical adjustments[b]	-5.0
Total	**$138.9**
Resources	
Governor's proposed General Fund increase	$110.5
Additional revenue from student fee increases[c]	75.5
Additional revenue from excess course unit charge	24.4
Total	**$210.4**
Freed Up General Fund Resources	**$71.5**

a Based on total state General Fund and student fee revenue.

b As proposed by Governor.

c Assumes 2 percent enrollment growth.

- ***Other Adjustments.*** The Governor's budget includes a net $5 million reduction to CSU's base budget. This includes accounting for the one-time effect of a carryover appropriation and other technical adjustments.

Resources. Figure 3 displays two sources of new revenue:

- ***Fee Revenue.*** We estimate that the planned fee increases for the budget year will provide CSU with $75.5 million in new student fee revenue. This amount assumes additional revenue from the university's excess course unit policy and our proposed 2 percent enrollment growth.
- ***General Fund Support.*** As discussed earlier in this analysis, the Governor's budget proposes to increase General Fund support for CSU by $110.5 million from the revised 2004-05 budget (see Figure 1). As a starting point, therefore, these funds are available to fund the additional costs identified above.

Uncommitted Resources. As shown in Figure 3, the Legislature could (1) fully fund enrollment growth and a cost-of-living adjustment for CSU and (2) reject the Governor's proposed $7 million reduction to CSU's outreach programs and enrollment funding, all at a lower General Fund cost than proposed by the Governor. In fact, under our proposal the Legislature would free up over $71 million in General Fund support (from the level in the Governor's budget proposal) to address other priorities.

As discussed earlier, the Legislature may wish to use some of this amount to provide increased financial aid for CSU graduate students, given that these students, unlike needy UC undergraduates, are not protected from fee increases by the Cal Grant entitlement program. Our identified General Fund savings could also be used to fund legislative priorities in other areas, including addressing the state's budget problem.

CALIFORNIA COMMUNITY COLLEGES (6870)

California Community Colleges (CCC) provide instruction to about 1.6 million students at 109 campuses operated by 72 locally governed districts throughout the state. The system offers academic, occupational, and recreational programs at the lower division (freshman and sophomore) level. Based on agreements with local school districts, some college districts offer a variety of adult education programs. In addition, pursuant to state law, many colleges have established programs intended to promote regional economic development.

Funding Increases Proposed. The Governor's budget includes significant funding increases for CCC. As shown in Figure 1 (see next page), the Governor's proposal would increase total Proposition 98 funding for CCC by $361 million, or 7.5 percent. This increase funds a cost-of-living adjustment (COLA) of 3.93 percent, and enrollment growth of 3 percent. When all fund sources—including student fee revenue and federal and local funds—are considered, CCC's budget would total almost $8 billion.

CCC's Share of Proposition 98 Funding. As shown in Figure 1, the Governor's budget includes $5.1 billion in Proposition 98 funding for CCC in 2005-06. This is about two-thirds of total community college funding. Overall, Proposition 98 provides funding of approximately $50 billion in support of K-12 education, CCC, and several other state agencies. As proposed by the Governor, CCC would receive about 10.3 percent of total Proposition 98 funding.

State law calls for CCC to receive approximately 10.9 percent of total Proposition 98 appropriations. However, in recent years, this provision has been suspended in the annual budget act and CCC's share of Proposition 98 funding has been lower than 10.9 percent. The Governor's budget proposal would again suspend this provision.

Major Budget Changes

Figure 2 shows the changes proposed for community college Proposition 98 spending in the current and budget years. Major base increases include $142 million for enrollment growth of 3 percent and $196 million for a COLA of 3.93 percent. (This is based on an estimate of inflation that will not be finalized until April.) The Governor also "sets aside" $31.4 million for a potential restoration of funding he vetoed in 2004-05. (We describe this set-aside later in this piece.) In addition to the new Proposition 98 spending shown in Figure 2, the Governor proposes $20 million in one-time Proposition 98 Reversion Account funds for aligning K-12 and CCC vocational curricula. (We discuss this proposal in the "Crosscutting Issues" section of this chapter.)

Proposition 98 Spending by Major Program

Figure 3 (see next page) shows Proposition 98 expenditures for various community college programs. As shown in the figure, apportionment funding (available to districts to spend on general purposes) accounts for $4.6 billion in 2005-06, an increase of about $312 million, or 7.3 percent, from the current year. Apportionment funding in the budget year accounts for about 89 percent of CCC's total Proposition 98 expenditures.

a California Work Opportunity and Responsibility to Kids.

b For 2005-06, the Governor's budget also includes $20 million from the Proposition 98 Reversion Account to align career-technical education curricula between K-12 and California Community Colleges.

c Replaces $3 million previously provided by the Foster Children and Parents Training Fund.

Categorical programs (whose funding is earmarked for specified purposes) are also shown in Figure 3. These programs support a wide range of activities—from services to disabled students to part-time faculty health insurance. The Governor's budget proposes increases of 5.9 percent for the

three largest categorical programs (to fund a COLA and enrollment growth), but for most other programs he proposes no changes. In addition, the Foster Parent Training Program would be funded entirely from Proposition 98 General Fund support, replacing $3 million previously provided by the Foster Children and Parents Training Fund.

Student Fees

The Governor proposes no change to the existing student fee level of $26 per unit. Under the Governor's budget, student fee revenue would account for 4.6 percent of total CCC funding. (In the "Student Fees" intersegmental piece earlier in this chapter, we recommend raising the CCC fee to $33 per unit. This would increase total revenue available to the state, and maximize federal reimbursements for students paying the fee.)

ENROLLMENT GROWTH

Enrollment Changes Over Time

The CCC is the nation's largest system of higher education, enrolling about 1.6 million students in fall 2004. As shown in Figure 4, enrollment has gradually increased over the past two decades by about 420,000 students, although it has fluctuated on a year-to-year basis.

Figure 4

CCC Enrollment

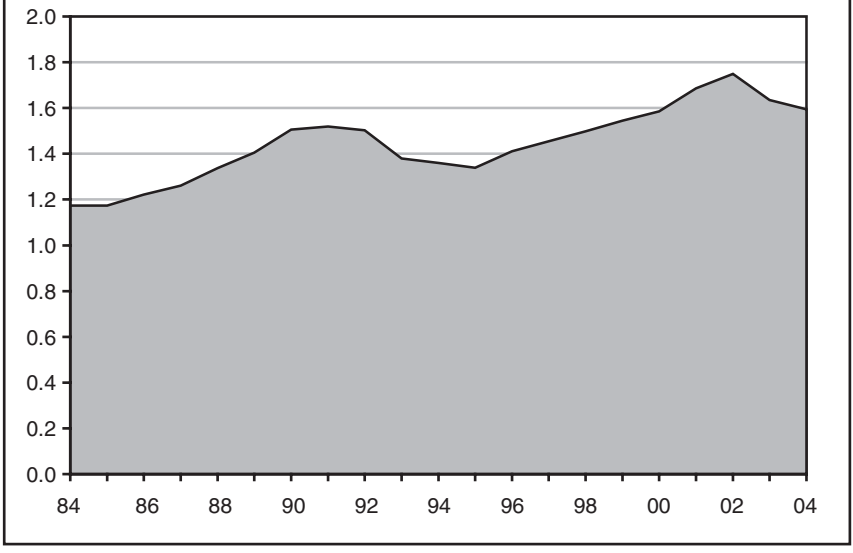

Figure 5 compares the cumulative change in enrollment over the past two decades with the cumulative change in the adult population, as well as the cumulative change in the traditional college-age population (18- to 24-year-olds). As the figure shows, CCC's enrollment has far outpaced the college-age population, and has generally matched growth in the adult population.

Figure 5

CCC Enrollment Versus State Population Growth

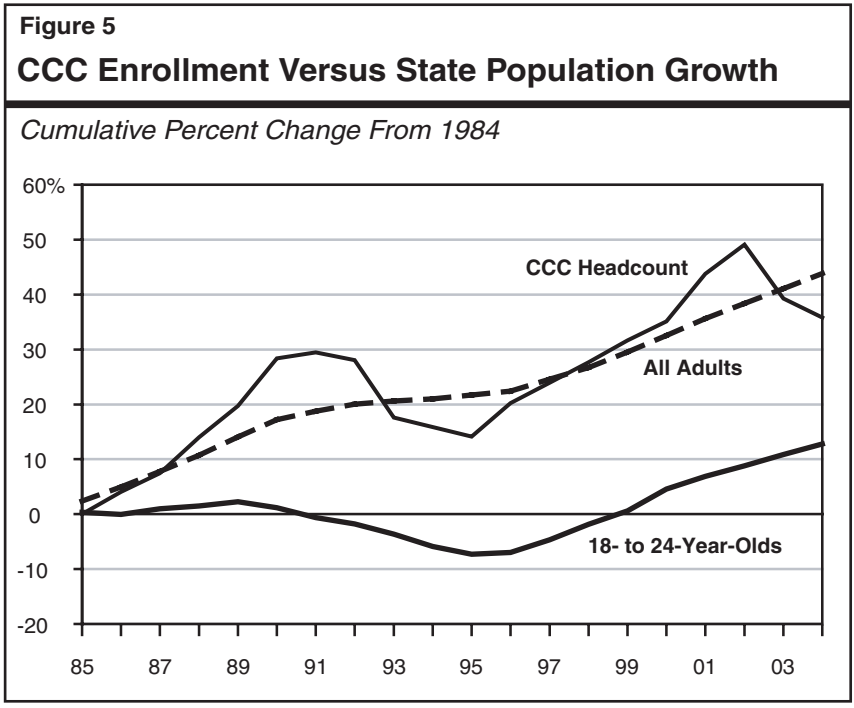

Figure 5 suggests that CCC's adult participation rate has generally remained constant, with temporary ups and downs, over the past two decades. Although participation rates can provide a rough sense of whether "access" to CCC is increasing or decreasing, it does not provide any obvious guidance as to what the participation rate "should" be. Based on comparisons with other states, however, California's college participation levels stand out. For example, the National Center for Public Policy and Higher Education recently found that California has some of the highest participation rates in the nation. Specifically, the National Center determined that California ranks fourth (tied with four other states) in college enrollment among 18- to 24-year olds, and that it ranks first in college enrollment among 25- to 49-year-olds.

Recent Slight Decline in CCC Enrollment—The Story Behind the Numbers

Over time, CCC's enrollment has fluctuated. These fluctuations respond to changes in a variety of factors, including the size and age distribution of the underlying population, cost factors (such as fees and the availability of financial aid), convenience of course schedules, and so on. As observed in Figure 4, CCC's enrollment increased through the late 1980s, declined in the early 1990s, and then rose significantly through the second half of the 1990s until 2003. In that year, CCC's enrollment dropped by about 115,000 students, or about 6.6 percent. What accounts for this enrollment decline?

Some Enrollment Decline Explained by Concurrent Enrollment Change. Some of the decline in enrollment was an intended result of statutory and budget changes to address a problem. Beginning in 2002, the Legislature and Governor both became concerned that a number of districts were inappropriately, and in some cases illegally, claiming state funding for a rapidly increasing number of high school students who were "concurrently enrolled" in CCC. While statute does make provision for some such enrollment, it was generally found that this provision was being abused. In response, the Chancellor called on districts to rein in these practices, and for 2003-04 the Legislature reduced funding for concurrent enrollment by $25 million and tightened related statutory provisions. As a result, high school students concurrently enrolled in community college courses dropped from a peak of about 94,000 in fall 2001 to about 80,000 in fall 2002 and 49,000 in fall 2003. Thus, more than one-quarter of the system's overall headcount drop between fall 2002 and fall 2003 can be explained by the drop in these high school students.

Cause of Remainder of Decline Unclear. The *2003-04 Budget Act* required the Chancellor's Office to report on changes in CCC enrollment for the 2003-04 academic year. Although a final report was due September 1, 2004, at the time this analysis was prepared (early February 2005), CCC could only provide preliminary data and draft reports. Available information suggests two main causes for the remaining enrollment decline (that is, not explained by the tightening of concurrent enrollment regulations):

- ***Reduced Course Offerings.*** The CCC suggests that districts reduced course offerings in spring 2003 in anticipation of possible budget reductions that had been included in the Governor's budget proposal for 2003-04. Although these proposed reductions were largely excluded from the enacted budget, the Chancellor's Office suggests that districts had already prepared for the reductions by hiring fewer part-time faculty and taking other steps to reduce costs. With fewer course offerings, some potential students found there was no space in courses they needed and thus did not enroll.

- ***Increased Fees.*** The Legislature raised student fees at CCC from $11 per unit to $18 per unit starting in fall 2003. Some students likely chose not to enroll at CCC at this higher cost. As noted in the nearby box, available data appear to indicate that the fee increase had no disproportionate impact on student racial and gender groups between fall 2002 and fall 2003.

Little Enrollment Decline Using Full-Time Equivalent (FTE) Measure. While headcount is a useful indicator of "access" in that it measures the number of individuals receiving instruction, it does not accurately reflect the amount of instruction being provided. This is because headcount measures do not distinguish between a full-time student taking 30 units per year and a part-time student taking, say, 6 units per year. For instance, although student headcount dropped about 6.6 percent between fall 2002

Fee Increase Had No Disproportionate Impact on Students

Budget bill language in the 2003-04 and 2004-05 budget acts requires the Chancellor's Office to provide data and analysis on the effect of recent fee increases upon student enrollment. The Chancellor's Office had only been able to provide preliminary information at the time this analysis was prepared. Based on this information, we offer the following conclusions about the changes to the makeup of the student population.

No Disproportionate Effect on Racial and Gender Groups. As shown in the figure, based on available information the recent small decline in enrollment in 2003-04 had no disproportionate effect on racial groups over the one-year period. Similarly, there was no change in the proportion of female and male students.

Small Effects on Age and Income Groups. The only significant change in the makeup of the student population in 2003-04 compared to the prior year relates to age. As shown in the figure, the percentage of CCC students under 18-years-old declined by more than one-quarter (largely reflecting the intended decline in concurrently enrolled students). Students between ages 18 and 29 somewhat increased their share of the student population, while those age 30 and above declined slightly.

The CCC's data show no evidence of disproportionate impact on income groups *as a result of the fee increase*. This likely reflects the fact that needy students are not required to pay fees. (The CCC's preliminary information does suggest there was a "modest" correlation between students' income and their likelihood to be affected by the reduction in course sections in spring 2003.)

(Continued)

and fall 2003, the number of total course "slots" that were taught declined by less than 2 percent. This suggests that, on average, the individual students making up the 6.6 percent headcount decline had been part-time students taking fewer than the average number of units. Indeed, anecdotal evidence suggests that many of these students were taking only one or two courses per semester.

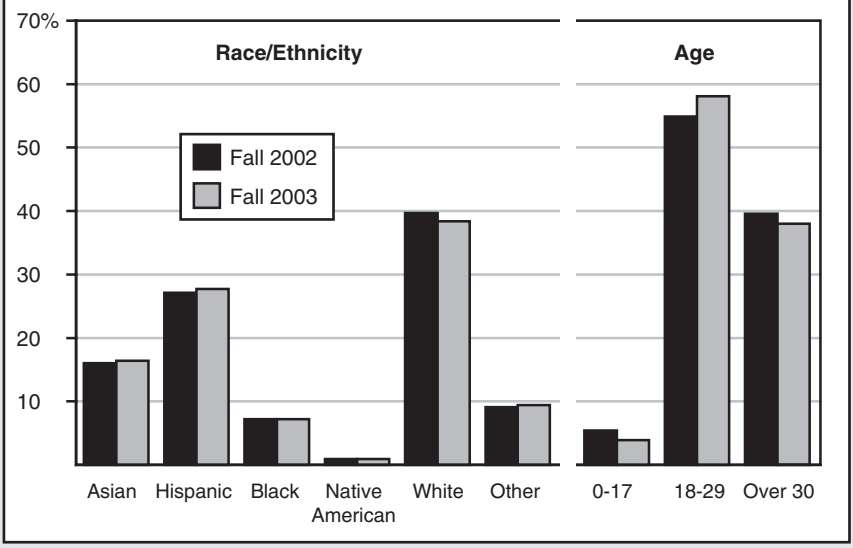
Enrollment Funding

The Governor's budget proposes an augmentation of $141.9 million to fund 3 percent enrollment growth at California Community Colleges. This is about one and one-half times the projected amount of enrollment growth due to underlying population increases. We recommend the Legislature fund this projected level of enrollment (1.9 percent), and redirect the remaining proposed growth funding to other K-14 priorities.

Report Overdue on Student Enrollment in 2004-05. For 2004-05, student fees increased again, from $18 per unit to $26 per unit. The *2004-05 Budget Act* required CCC to provide a report assessing the effect of this fee increase on enrollment by November 15, 2004. As of mid-February 2005, CCC had not yet provided that report.

Student Demographic Change

Percent of Total Headcount Enrollment



State law calls for CCC's annual budget request to include funding for enrollment growth that is at least the rate of increase in the adult population, as determined by the Department of Finance (DOF). For 2005-06, DOF projects that California's adult population will increase by 1.9 percent. This growth rate would translate into about 22,000 additional (FTE) students, at a cost of $91.3 million. The Governor's budget proposes to fund enrollment of about one and one-half times this amount: a 3 percent increase in FTE enrollment, which would fund 34,000 additional students at a cost of $141.9 million.

Recommend 1.9 Percent Enrollment Growth Funding. For 2005-06, we recommend the Legislature provide funding for 1.9 percent enrollment growth. The Master Plan calls on CCC to be open to all adults who can benefit from instruction, and DOF estimates that this eligibility pool will grow by 1.9 percent. Other things being equal, an increase in the eligibility pool should translate into a proportionate increase in enrollment. (We independently estimated the increase in CCC's enrollment based on various demographic factors, and arrived at a similar growth projection of 1.8 percent.)

As noted earlier, enrollment growth at the community colleges has been slowing in recent years, and California's college participation rates are among the highest in the country. In fact, preliminary data and anecdotal evidence suggest that many community college districts will serve fewer FTE students than they are funded to serve in 2004-05. For these reasons, we believe aligning enrollment growth funding with population growth for 2005-06 is a reasonable approach.

Funding Growth at 1.9 Percent Would Free Up Proposition 98 Resources for Other Priorities. The Governor's budget for CCC dedicates new Proposition 98 funding for two main purposes: enrollment growth and a COLA. If the amount of funding for growth were reduced to our recommended level of $91.3 million (to fund an enrollment increase of 1.9 percent), $50.6 million would be freed up for other K-14 priorities.

Reduce Enrollment Funding by $50.6 Million. We therefore recommend the Legislature reduce enrollment funding by $50.6 million, leaving $91.3 million to fund enrollment growth of 1.9 percent. We believe that this amount would be sufficient to fund increased enrollment demand at the community colleges.

STATE'S EFFORT TO EQUALIZE DISTRICT FUNDING SHOULD REMAIN A HIGH PRIORITY

We recommend the Legislature continue to support equalization of community college funding. The Legislature and Governor have already

established that this is an important goal, towards which they committed about one-third of necessary funding in the current year.

As a result of tax base differences that predate Proposition 13 in 1978, coupled with somewhat complex district allocation formulas, community college districts receive different amounts of funding for their students. In 2003-04, average funding per FTE student ranged from about $3,500 to about $8,200, although most districts have levels within a few hundred dollars of the state median of about $4,000. Small funding differences may be acceptable or even desirable (if they reflect real cost differences encountered by different districts). However, the funding differences currently experienced by community college districts have little correlation to underlying costs.

Numerous reports and hearings in recent years have recognized this disparity and have called for efforts to "equalize" funding among districts. In general, equalization can foster:

- ***Increased Fairness.*** Providing all districts with similar levels of funding per FTE student helps to ensure that students in different parts of the state have access to similar levels of educational support, which can translate into similar levels of educational quality and student services.

- ***Accountability.*** The *Master Plan for Higher Education* and state law assign to community colleges a number of educational missions. The state has also called on the community colleges to meet performance expectations in a number of areas, including preparing students to transfer to a four-year institution, awarding degrees and certificates, and improving course completion rates. It is difficult to hold all districts accountable for these standards when the amount of funding provided per student varies from district to district.

2004-05 Budget Act *Initiated Multiyear Equalization Effort.* The *2004-05 Budget Act* included $80 million toward the goal of equalizing community college district funding over three years. The Legislature also enacted Chapter 216, Statutes of 2004 (AB 1108, Committee on Budget and Fiscal Review), which describes the goal of having at least 90 percent of statewide CCC enrollment eventually receive the same level of funding per FTE student, and specifies how the $80 million should be allocated toward that goal. We estimate that the $80 million moves the state about one-third of the way towards its equalization goal.

The Governor proposed the 90th percentile goal for equalization in his budget proposal last year, and called equalizing CCC and K-12 funding "foremost" among various education provisions enacted with the 2004-05 budget. He does not, however, propose that the state continue to move

forward on its CCC equalization goal as part of the 2005-06 budget. We believe it is important to continue the state's commitment toward equalizing community college funding for the reasons mentioned above. It is especially important in light of the state's concern with CCC accountability. (We discuss recently enacted legislation concerning CCC accountability below.)

Consider Additional Funds for Equalization. We recommend, therefore, the Legislature consider allocating additional Proposition 98 funding to equalization, to be allocated in a manner consistent with Chapter 216. While we advise first funding workload increases (such as enrollment growth and cost-of-living increases), we recommend the next priority for additional ongoing Proposition 98 funding go to equalization. We think a target of $80 million—matching the current-year commitment—would make sense, to the extent that funding is available.

GREATER ACCOUNTABILITY NEEDED

With over a million and a half students spread across 109 campuses, the CCC system is large and decentralized. It also has a budget of almost $8 billion in public funds. For these reasons, oversight and accountability measures are critical for ensuring that public resources are being effectively used toward the various missions assigned to CCC by the Master Plan and by statute. The Chancellor's Office is generally charged with some oversight responsibilities. At the same time, the Legislature and Governor also have sought more formalized oversight and accountability provisions in statute. In recent years, evidence of fiscal mismanagement, inappropriately claimed reimbursements for nonexistent courses, and other improprieties by some districts have heightened the state's concern with CCC accountability.

"Partnership for Excellence" Has Expired

In 1998, the Legislature and Governor established the Partnership for Excellence (PFE) program through Chapter 330 (SB 1564, Schiff). In general, the PFE provided additional funding to community colleges in exchange for the commitment to improve their performance in five specified areas, such as the percentage of students who complete courses. A key accountability provision of the PFE called for district- and system-level performance in these specified areas to be reported annually. This information would be available to inform state-level budgeting, and could be used (if the CCC's Board of Governors [BOG] so chose) to influence the allocation of funding among districts. The BOG chose not to pursue this linking of funding to performance. The system made some very modest gains in some of the specified areas, such as workforce development, although to-

wards the end of the program, performance again declined and most of those gains were lost. With the PFE sunsetting in December 2004, the Legislature moved the program's funding ($225 million) into districts' base apportionments. This funding thus remains in district budgets beyond the expiration of the program. (The Governor vetoed $31.4 million of this funding when he signed the *2004-05 Budget Act*, although as we explain below, he has set aside this amount for a possible restoration in the 2005-06 budget.)

District-Level Accountability to Be Developed

CCC Required to Develop New Accountability Measures. The PFE sunsetted on January 1, 2005. As imperfect as the PFE was as an accountability mechanism, the state now has no comprehensive mechanism for monitoring CCC's performance in various critical areas. Recognizing this, the Legislature and Governor enacted Chapter 581 (AB 1417, Pacheco) as part of the 2004-05 budget package. Among other things, Chapter 581 requires the BOG to develop "a workable structure for the annual evaluation of district-level performance in meeting statewide educational outcome priorities," including transfer, basic skills, and vocational education. The BOG is to provide its recommended evaluation structure to the Legislature and Governor by March 25, 2005.

Consistent with Chapter 581, the BOG has consulted with our office, DOF, and various other higher education experts and interested parties as it has been developing its district-level accountability structure. We will advise the Legislature on the BOG's final proposal once it is completed and made public. In general, the Legislature should determine if the accountability mechanism:

- Uses meaningful indicators which measure both CCC's success in meeting minimum standards, and the degree of improvement achieved (or "value added") when students take CCC courses.
- Measures how well both the overall CCC system, and the individual districts, are fulfilling the missions assigned to them by the state.
- Recognizes the differing local needs that are encountered by districts.
- Is useful to the Chancellor's Office for the purpose of ensuring adequate district performance, and to the state for the purpose of monitoring the system's fulfillment of the mission assigned to it by the Master Plan.

Governor's Budget Proposal Makes Restoration of Vetoed Funds Contingent on CCC's Accountability Mechanism. The Governor vetoed $31.4 million of CCC's apportionment funding when he signed the *2004-05 Budget Act*. In his veto message, the Governor indicated that he was willing

to restore this funding, which originally had been used to fund PFE-related improvements, if "district-level goals and performance evaluations are incorporated into the accountability structure" called for in the *2004-05 Budget Act* and Chapter 581. Accordingly, in his budget proposal for 2005-06, the Governor sets aside $31.4 million in new Proposition 98 support for possible appropriation through separate legislation "pending the outcome" of the BOG's proposed accountability mechanism.

We think it is reasonable to link a portion of the funding originally provided for one accountability-related program (the PFE) to a successor accountability program (the district-level accountability system called for in Chapter 581). However, we are concerned that provisional language in the Governor's proposal purports to express the *Legislature's* intent that DOF solely judge the adequacy CCC's proposed accountability program and, by extension, decide whether to restore the $31.4 million. We recommend this language be deleted, as outlined below:

> 4. As a condition of receiving funds appropriated in Schedule (1), the Board of Governors shall continue to assess and report to the Legislature, on or before April 15, data measures required by the current Partnership for Excellence program, scheduled to sunset January 1, 2005. It is the intent of the Legislature that these measures be replaced for reporting and assessment purposes, by district-specific outcome measures being developed by an accountability workgroup established by Chapter 581, Statutes of 2004. ~~It is also the intent of the Legislature that the final accountability measures produced by the workgroup, as approved by Department of Finance, result in the restoration of $31,409,000 to community college apportionments.~~

We plan to advise the Legislature on the bulk of the $31.4 million potential restoration once the BOG provides its proposal. Later in this section we recommend a small amount (about $1.25 million) of this funding setaside be appropriated for expanding a performance-measurement data-sharing system that promises to be useful in helping districts make improvements in the areas of state concern expressed by Chapter 581.

Local Autonomy in Course Offerings Should Be Balanced With State Oversight

Course Offerings Should Emphasize State Priorities. Community college districts (which are governed by locally elected boards of trustees) have considerable autonomy in choosing which courses to offer in any given term. In fact, state regulations empower local districts to undertake any activity or initiate any program that is not in conflict with other laws and not inconsistent with CCC's broad mission. For example, a district could emphasize courses that are transferable to public universities and offer relatively few remedial courses. Another district could offer a much

larger share of its courses in vocational fields and offer relatively few physical education courses.

At the same time, the Legislature has established various priorities for community colleges. Recognizing that existing statutes and regulations do not clearly prioritize the various components of CCC's mission, the Legislature and Governor in recent years have emphasized three state priority areas for CCC course offerings: student transfer to four-year colleges and universities, basic skills, and vocational/workforce training. Toward that end, the 2003-04 and 2004-05 budget acts have included provisions to help ensure that CCC districts in fact observe these priorities.

Criteria for Allocating Apportionment Funding. The *2003-04 Budget Act* included a provision requiring the BOG to adopt criteria for allocating apportionment funding to ensure that courses related to the three state priorities "are provided to the maximum extent possible within budgeted funds." In response, the Chancellor's Office developed a "cap" of 2 percent on the amount of funded credit FTE students that a district could provide outside of the three priority areas. Under the policy, the Chancellor's Office would monitor compliance and work with districts that exceeded the cap to either (1) identify an acceptable reason for exceeding the cap or (2) develop a plan to redirect the district's activity into compliance.

Methodology for Identifying Priority Courses. Concerns were expressed during budget hearings in 2004-05 about how CCC's policy defined and measured (and thus promoted) priority courses. For example, if the criteria for defining a course as meeting the state's priorities were vague or overbroad, the 2 percent cap could become meaningless. To address this concern, the *2004-05 Budget Act* included a provision requiring the BOG to adopt a clear methodology for determining which courses address any of the three priority areas. In response, the BOG defined as meeting state priorities all credit courses that are classified into any of five categories:

- "Transferable" to the University of California and/or the California State University.
- "Basic skills."
- "Occupational."
- Applicable towards any degree.
- English as a Second Language.

While the names of some of these categories appear to correspond to state priority areas, we remain concerned that, as a classification scheme, they are very broadly drawn. Indeed, it is unclear which types of credit courses, if any, are *not* included somewhere in these five categories.

Of greater concern, CCC's methodology excludes all noncredit courses, which make up about 9 percent of funded FTE students. Regulations require only that noncredit courses "meet the needs of" the students who take them. With such vague standards, the Legislature can have no assurance that noncredit courses focus on the state's stated priorities.

Recommend Clearer, More Inclusive Methodology. The CCC's limit on nonpriority courses provides little assurance that transfer, basic skills, and vocational education will in fact be accorded highest priority by districts. This is because the methodology for classifying courses as meeting the state's priorities is so expansive. We believe that the methodology should be refined to better identify courses that reasonably can be considered to address the state's three priority areas. At a minimum, noncredit courses as well as credit courses should be evaluated in determining the extent to which districts are advancing state priorities. We therefore recommend the Legislature amend budget bill language concerning these priorities so as to direct CCC to make these improvements.

> Item 6870-101-0001, Provision 9. Notwithstanding any other provision of law, funds appropriated in Schedule (3) of this item shall only be allocated for growth in full-time equivalent students (FTES) , on a district-by-district basis, as determined by the Chancellor of the California Community Colleges. The chancellor shall not include any FTES from concurrent enrollment in physical education, dance, recreation, study skills, and personal development courses and other courses in conflict with existing law for the purpose of calculating a district's three-year overcap adjustment. The board of governors shall implement ~~the~~ criteria required by provision 5(a) of the Budget Act of 2003 for the allocation of funds appropriated in Schedules (1) and (3), so as to assure that courses related to student needs for transfer, basic skills and vocational/workforce training are accorded the highest priority and are provided to the maximum extent possible within budgeted funds. <u>These criteria shall apply to both credit and noncredit courses. The Chancellor shall report to the Governor and Legislature by December 1, 2005, on the implementation of this provision.</u>

Cal-PASS Helps Districts to Improve Outcomes, Fosters Accountability

We recommend the Legislature allocate to the California Partnership for Achieving Student Success $1 million of the $31.4 million that is set aside for potential restoration. This funding would permit California Community Colleges to continue and expand a program that has been proven to promote better student outcomes and accountability.

In February 2003, the California Partnership for Achieving Student Success (Cal-PASS) was launched by Grossmont-Cuyamaca community

college district using a grant from the Chancellor's Office. The Cal-PASS is a data-sharing system aimed at improving the movement of students from high schools to community colleges to universities.

Student transitions are critical to the success of the educational system. For community colleges they are especially critical. The success of students at community colleges depends in part on how well the K-12 curriculum is aligned with community college courses. In addition, the success of community college students wishing to eventually earn a four-year degree depends to a large extent on how well CCC's curriculum is aligned with that of the universities and colleges to which students transfer. The Cal-PASS collects information on students throughout the state regarding their performance and movement through these various segments. These data are used by faculty consortia, institutions, and researchers to identify potential obstacles to the successful and efficient movement of students between segments. For example, high remediation rates of students who take English at a particular high school and enroll at a particular college could point to a need to better align the English curriculum or standards between these two institutions. Similarly, data concerning course standards and content can help reduce the incidence of students taking unnecessary or inappropriate courses for transfer.

Participation in Cal-PASS by individual institutions is voluntary. Since its inception, the Cal-PASS network has grown from several colleges, universities, and high schools in the San Diego area to more than 700 institutions statewide. Our review has found numerous examples of improved outcomes, increased efficiencies, and cost savings as a result of the Cal-PASS program. Moreover, in 2003 Cal-PASS was endorsed by the Assembly higher education committee, the Senate subcommittee on higher education, and the Joint Committee to Develop an Education Master Plan.

Cal-PASS Can Help Address State's Accountability Concerns. We believe Cal-PASS promotes district-level and system accountability in two ways.

- ***Identifies Problems.*** The Cal-PASS helps districts identify problems in areas of particular concern to the state, including transfer and remediation. Identifying these problems is a first step toward improving performance. The Cal-PASS already has shown its value in this regard in community college districts across the state and across disciplines.

- ***Monitors Progress.*** The Cal-PASS can measure changes in performance over time, thereby providing policymakers with information on how well districts and the system as a whole are responding to state concerns. We note that some of the data elements available through Cal-PASS are directly related to elements in CCC's draft district accountability measures.

Recommend $1.5 Million Base Funding for Cal-PASS. Although Cal-PASS has expanded far beyond its original inception as a pilot program, its grant funding (from the state Chancellor's Office) has not increased and in fact will expire at the end of 2005-06. Based on our review of equipment, staffing, and other costs, we believe that a base budget of $1.5 million per year would ensure the continuation and further expansion of Cal-PASS.

Given that Cal-PASS still has access to about $500,000 in grant funds for 2005-06, we recommend an additional $1 million be directed to Cal-PASS. We recommend this funding be redirected from the $31.4 million that the Governor's budget has set aside pending CCC's response to the accountability requirements of Chapter 581. This would leave almost $30.4 million of the set-aside funds potentially to be restored to district base budgets. In effect, redirecting the $1 million to Cal-PASS would spread the cost of running the Cal-PASS system across all districts at an average cost of less than $1 per FTE student. We believe this is a reasonable cost for the benefits of Cal-PASS.

STUDENT AID COMMISSION (7980)

The Student Aid Commission provides financial aid to students through a variety of grant and loan programs. The proposed 2005-06 budget for the commission includes state and federal funds totaling $1.4 billion. Of this amount, $746 million is General Fund support—all of which is used for direct student aid for higher education. A special fund covers the commission's operating costs.

Below, we first summarize the Governor's budget proposals for the Cal Grant program and the Assumption Program of Loans for Education (APLE). We have concerns with three of these proposals—the reduction to the private university Cal Grant, the "set aside" for the National Guard APLE program, and the size of EdFund's operating surplus (which partly supports the Cal Grant program). We discuss these issues later in this section.

Major Budget Proposals

Figure 1 (see next page) compares the commission's revised 2004-05 budget with the proposed 2005-06 budget. As the figure shows, financial aid expenditures would increase $44.6 million, or 6 percent, from the current year. Virtually all of this increase is due to additional Cal Grant costs ($37.3 million) and APLE costs ($6.9 million). As the figure also shows, in the budget year, General Fund support would increase considerably, in part to backfill a major reduction in support from the Student Loan Operating Fund (SLOF). Whereas $146.5 million in SLOF monies were used to support the Cal Grant program in 2004-05, the Governor's budget proposes to use $35 million in SLOF monies in 2005-06.

Cal Grant Program. Figure 2 (see page E-231) provides a more detailed breakdown of the four major budget proposals relating to the Cal Grant program. The Governor's budget assumes the commission will issue 3,345 additional Cal Grant awards. This represents a 1.3 percent increase from the current year in the total number of Cal Grant awards issued. The

Governor's budget also proposes to increase the value of Cal Grants for University of California (UC) and California State University (CSU) students (to compensate for the proposed undergraduate fee increases), but it would decrease Cal Grants for financially needy students attending private institutions by $873, or 10 percent. (Please see below for a more detailed discussion of the private university Cal Grant issue.)

Figure 1

Student Aid Commission Budget Summary[a]

(Dollars in Millions)

	2004-05 Revised	2005-06 Proposed	Change	
			Amount	Percent
Expenditures				
Cal Grant programs				
Entitlement	$551.0	$608.9	$57.9	11%
Competitive	116.2	124.9	8.7	7
Pre-Entitlement	37.2	7.4	-29.8	-80
Cal Grant C	9.7	10.3	0.6	6
Subtotals—Cal Grant[b]	($714.1)	($751.4)	($37.3)	(5%)
APLE[c]	$34.0	$40.9	$6.9	20%
Graduate APLE	0.2	0.4	0.2	75
National Guard APLE	—	0.2	0.2	—
Law enforcement scholarships	0.1	0.1	—	1
Totals	**$748.5**	**$793.1**	**$44.6**	**6%**
Funding Sources				
General Fund	$589.4	$745.5	$156.1	26%
Student Loan Operating Fund[d]	146.5	35.0	-111.5	-76
Federal Trust Fund[d]	12.6	12.6	—	—
Totals	**$748.5**	**$793.1**	**$44.6**	**6%**

a In addition to the programs listed, the commission administers the Byrd Scholarship and Child Development Teacher and Supervisor programs—both of which are supported entirely with federal funds. It also administers the Student Opportunity and Access program, an outreach program supported entirely with Student Loan Operating Fund monies.

b Includes $46,000 for the Cal Grant T program in 2004-05. The program has been phased out as of 2005-06.

c Assumption Program of Loans for Education.

d These monies pay for Cal Grant costs as well as support and administrative costs.

Figure 2

Major Cal Grant Budget Proposals

Governor's Budget Proposal	Cost (In Millions)
Increase in number of Cal Grant awards (3,345)	$21.6
Increase University of California Cal Grant by 8 percent (raising maximum award from $5,684 to $6,141)	15.3
Increase California State University Cal Grant by 8 percent (raising maximum award from $2,334 to $2,520)	7.9
Decrease private university Cal Grant by 10 percent (lowering maximum award from $8,322 to $7,449)	-7.5
Total	**$37.3**

Figure 3 (see next page) shows growth in the number of Cal Grant awards from 2003-04 (actual) to 2005-06 (projected). The budget assumes the commission will issue almost 260,000 Cal Grants in 2005-06. It assumes a modest increase (2.3 percent) in the number of new High School Entitlement awards, and no increase in the number of new Transfer Entitlement awards (though the commission indicates it currently is analyzing transfer patterns and might revise this estimate in the spring). Per statute, the budget assumes the commission will award 22,500 new Competitive Cal Grant awards and 7,761 new Cal Grant C awards. (The Competitive Cal Grant program is designed for older students whereas the Cal Grant C program is designed for students enrolled in short-term vocational programs.) The commission is in the midst of studying renewal patterns in the competitive program to determine if its associated budget-year projections need to be revised. The budget assumes only 1,660 pre-entitlement renewal awards—indicating that almost all pre-entitlement recipients already have completed college. In a couple of years, the program will be entirely phased out.

APLE Program. The Governor's budget includes a $6.9 million General Fund augmentation to cover loan-forgiveness costs associated with APLE warrants issued in previous years. The Governor's budget proposes to issue 7,700 new APLE warrants—the same level as in the current year. The Governor's budget also includes $200,000 to fund a maximum of 100 new National Guard APLE warrants. (Please see below for a more detailed discussion of this proposal.)

Figure 3

Growth in Cal Grant Participation

	2003-04 Actual	2004-05 Revised	2005-06 Projected	Change From 2004-05	
				Number	Percent

Private University Cal Grant

The Governor's budget proposes to reduce the maximum Cal Grant for students attending private colleges and universities by $873, or 10 percent—lowering the award from its current-year level of $8,322 to $7,449. This would be the second consecutive reduction. Between 2003-04 and 2004-05, the award was reduced by $1,386, or 14 percent. Approximately 12,100 financially needy students attending private universities likely would be affected by the proposal, which would be imposed only on new Cal Grant recipients. Of these students, approximately 8,500 would expe-

rience the reduction in the budget year whereas approximately 3,600 others would experience the reduction in 2006-07. (This delayed impact is due to a state policy that does not provide fee assistance to most first-year Cal Grant B recipients, even though they represent the financially neediest students served by the Cal Grant program.) Continuing students would retain the higher award rates they are receiving in the current year. The Governor's budget assumes the proposal would generate $7.5 million in General Fund savings. Below, we discuss our concerns with this proposal.

Create Parity for Financially Needy Students Attending Public and Private Universities

We recommend the Legislature establish in statute a policy and an associated award formula that would link the Cal Grant for financially needy students attending private universities to the General Fund subsidy the state provides for financially needy students attending public universities. Under our recommended formula, the private university Cal Grant would be $10,568 in 2005-06. Providing this higher award amount to new 2005-06 recipients would cost $26.6 million relative to the Governor's budget. We recommend the Legislature use additional Student Loan Operating Fund surplus monies to cover this cost (please see final write-up of this section).

Since 2001-02, the state has had neither an explicit nor an implicit policy for determining the private university Cal Grant. Without a policy, Cal Grant decisions can appear arbitrary, the program can become disconnected from its primary objective, and the program can be more difficult to oversee and evaluate. For these reasons, we recommend the Legislature establish a statutory private university Cal Grant policy that is linked with an associated award formula that can be used for budgeting purposes. We recommend a policy and related formula that would provide a simple means by which the state could ensure that it contributes about the same amount of support for all financially needy students.

Since 2000, State Has Not Had Private University Cal Grant Policy. When Chapter 403, Statutes of 2000 (SB 1644, Ortiz), created the new Cal Grant Entitlement program, the state's existing private university award policy was replaced with a new provision that linked the private university Cal Grant to whatever amount was specified in the annual budget act. For the next three consecutive years, the private university award was maintained at its 2000 level before being reduced in the current year.

Without a Policy, Funding Decisions Can Appear Arbitrary. Without an award policy, private university Cal Grant decisions can appear arbitrary. For example, in the current year, college costs (including fees and tuition)

increased for public and private students alike. However, the Cal Grant award increased for public university students while the private university Cal Grant declined.

Without a Policy, Program Can Become Disconnected From Its Purpose. Without a policy to guide annual private university award decisions, the Cal Grant program can quickly become disconnected from its primary purpose. Although maintaining access and choice for all financially needy students is the primary goal of the Cal Grant program, the state's current-year action appeared to promote access to public institutions while dampening the potential for some financially needy students to attend private institutions. This is of particular concern because some private institutions are very specialized and essentially have no public university equivalent, yet they may best meet a financially needy student's educational objective. Access also is of particular concern because a significant proportion of financially needy, baccalaureate-seeking students attend *local* four-year private universities—living at home to substantially reduce overall college costs. For example, more than one-third of the financially neediest students (with family incomes less than $30,000) attending private four-year colleges live at home. Moreover, of the 25 private schools that enroll the greatest number of Cal Grant recipients (please see nearby box), all but a handful are relatively small regional universities with relatively small endowments. These institutions would not be as likely to backfill the proposed reduction in the state's award.

Without a Policy, Program Is Difficult to Evaluate. One of the primary benefits of any statutory policy is that it can clarify the objective of a program, thereby allowing the Legislature to monitor and track its performance. Without a policy, the Legislature cannot determine whether the private university award is fulfilling its objective. A statutory policy could establish criteria upon which to evaluate the private university award's success in promoting access, choice, and persistence among financially needy students as well as its success in expanding general higher education enrollment capacity.

State's Former Statutory Policy Sought Parity. Prior to 2000, the state had a longstanding statutory policy that guided private university Cal Grant decisions. Statute then specified, "The maximum award for students attending nonpublic institutions shall be set and maintained at the estimated average General Fund cost of educating a student at the public four-year institutions of higher education." Toward this end, statute included a formula that set the private university Cal Grant at 75 percent of the average General Fund cost per student at CSU plus the average of UC and CSU's student fees (both systemwide and campus-based).

Our Modified Formula Promotes Greater Parity. Our recommendation is consistent with the intent of the state's former statutory policy to provide comparable General Fund support for financially needy students attending public and private schools. We recommend modifying the previous formula to better meet this intent. The earlier formula was somewhat arbitrary in linking the award to "75 percent of the average General Fund cost per student at CSU." Our modified formula is based on the enrollment-weighted General Fund subsidy provided for students attending UC and CSU. We think this is a more accurate reflection of how much the state provides for an additional public university student. Second, our modified formula is based on the marginal cost rather than the average cost, as this too is a better reflection of the amount the state pays for each additional (rather than existing) student. Third, the earlier formula accounted for both systemwide and campus-based fees to reflect former Cal Grant policies. Our modified formula reflects current Cal Grant policies, which link awards only to systemwide fees. All three modifications establish a simple, ongoing means for equalizing what the state provides for financially needy students at public and private universities.

Figure 4 compares the support the state provides for different groups of financially needy students. As reflected in the figure, the Governor's proposed private university Cal Grant award would be 15 percent less

Figure 4

Comparing State Support for Financially Needy Students

	2005-06
University of California	
General subsidy	$7,588
Cal Grant	6,141
Total subsidy	$13,729
California State University	
General subsidy	$6,270
Cal Grant	2,520
Total subsidy	$8,790
Private University Cal Grant	
Proposed rate	$7,449
LAO-formula rate	10,568
Former statutory rate	10,694

than the level of General Fund support provided for financially needy students at CSU and 46 percent less than the level of General Fund support provided for financially needy students at UC. Also reflected in the figure, the budget-year private university rate generated by our recommended formula would be just slightly less than what the award would have been using the state's former statutory formula.

Fiscal Implication of New Parity Policy. Increasing the private university Cal Grant to $10,568 for new 2005-06 recipients would cost $26.6 million relative to the Governor's budget. (By comparison, the Governor's budget proposal includes a $23 million augmentation for UC and CSU Cal Grants in the budget year.) We recommend the Legislature use surplus SLOF monies to cover this budget-year cost. In 2006-07, the cost of the higher private university grant would increase by approximately $8.3 million as second-year Cal Grant B recipients began receiving a fee award (rather than only a subsistence award). The Legislature also may want to consider increasing the award for new Cal Grant recipients in the current year, who were subject to the 14 percent award reduction. We estimate providing the higher award of $10,568 for these students would cost an additional $25.5 million in 2005-06.

In sum, we recommend the Legislature adopt a policy that would seek parity between state support provided for financially needy students attending public and private universities. This policy could help guide annual private university Cal Grant decisions, thereby making them seem less arbitrary. It also would support the primary objective of the Cal Grant program—to promote access and choice for all financially needy students. Finally, having an explicit policy could enhance the Legislature's ability, on an ongoing basis, to assess the public benefit of the private university Cal Grant.

NATIONAL GUARD APLE PROGRAM

As established in 2003 and amended in 2004, the National Guard APLE program offers loan forgiveness as an incentive for more individuals to enlist or re-enlist in the National Guard, State Military Reserve, and Naval Militia. Specifically, qualifying members have a portion of their education loans forgiven after each year of military service—$2,000 after their first year of service and $3,000 after their second, third, and fourth years of service—for total loan forgiveness of $11,000. The annual budget act has not yet authorized the commission to issue any National Guard warrants.

Private University Cal Grant Helps Financially Needy Students Attending Diverse Set of Institutions

To help answer some private university Cal Grant questions that often arise, we list below the 25 private schools that enrolled the greatest number of Cal Grant recipients in 2004-05. Of the 25 schools, 23 are four-year institutions whereas 2 are two-year institutions. Seventeen are nonprofit institutions whereas eight are for-profit institutions. Two schools (Stanford and the University of Southern California) have endowments that exceed $1 billion, six schools have endowments that exceed $100 million, and the remaining nonprofit schools have relatively small endowments. These 25 schools enroll just about one-half of all private university Cal Grant recipients. In total, new Cal Grant recipients in 2004-05 are enrolled at 191 private institutions.

Private Institutions Enrolling the Greatest Number of Cal Grant Recipients

(2004-05)

Private Institution	Cal Grant Recipients	Private Institution	Cal Grant Recipients
University of Southern California	838	University of San Diego	231
University of Phoenix[a]	572	Saint Mary's College of California	215

New Warrants Have No Budget-Year Cost

Because no National Guard warrants have been issued to date, and individuals must complete one year of military service prior to receiving loan forgiveness, the commission will incur no associated program costs in 2005-06. Thus, the Governor's budget prematurely funds the program. We therefore recommend the Legislature capture the associated $200,000 as General Fund savings.

The Governor's budget proposes to authorize up to 100 new National Guard APLE warrants. It also includes $200,000 for the program, with accompanying budget bill language that "these funds shall remain available through 2006-07." Because warrant-holders must complete one year of military service before receiving loan forgiveness, the state would not begin incurring a cost for a new National Guard APLE warrant (as is the case with all APLE warrants) until at least one year after it is originally issued. Thus, no funding would be needed in the budget year. Moreover, the Governor's proposal to set aside 2005-06 monies that will not be needed until 2006-07 is inconsistent with existing APLE funding practices. Specifically, the state has a long history of funding APLE warrants only as payment on them becomes due. This helps ensure funds are provided when needed. We recommend the Legislature continue to adhere to its existing budget practice and pay for any new warrants when payment becomes due. Thus, we recommend the Legislature capture the unneeded $200,000 as General Fund savings.

EDFUND OPERATING SURPLUS

Chapter 961, Statutes of 1996 (AB 3133, Firestone), gave the commission the authority to establish an auxiliary organization for purposes of administrating the Federal Family Education Loan (FFEL) program. Toward this end, the commission created EdFund, which, consistent with statute, functions as a nonprofit public benefit corporation. Colleges and universities that are interested in participating in the FFEL program may choose to work with EdFund or one of several other independent guaranty agencies. Alternatively, colleges and universities may participate in the Federal Direct Student Loan program, in which case their student loans are guaranteed and administered directly by the federal government.

After Six Years of Increasingly Large Annual Surpluses, EdFund Had $267 Million Cumulative Surplus. From federal fiscal year (FFY) 1997-98 through FFY 2002-03, EdFund experienced increasingly large annual operating surpluses. In 2002-03, EdFund's annual surplus reached $108 million. EdFund's annual operating expenses that year were $118 million, so it was generating about twice as much revenue as it needed to cover its

operating costs. By the close of 2002-03, EdFund was carrying a cumulative surplus of $267 million. EdFund attributes these surpluses to three primary factors—an increase in its loan volume as well as its success in default prevention and loan collections.

Current-Year "Swap" Works as Intended. In 2004-05, the state decided to use $146.5 million in SLOF monies to cover a portion of Cal Grant costs. The swap worked as intended—helping to maintain existing Cal Grant benefits for most students, reducing EdFund's surplus without threatening the viability of the agency, and relieving the General Fund. Even after accounting for this swap, EdFund has a cumulative surplus of $160 million (as of September 2004).

Use Larger Budget-Year Swap to Restore Cal Grant Benefits

We recommend the Legislature use an additional $26.6 million in Student Loan Operating Fund surplus monies to restore Cal Grant benefits for financially needy students attending private universities (thereby reducing the cumulative surplus to a more moderate level).

The Governor's budget proposes to use $35 million in SLOF surplus monies to support the Cal Grant program. In essence, it swaps $35 million in SLOF surplus monies for General Fund monies. We recommend the Legislature increase the swap by $26.6 million—for a total of $61.6 million—to restore the current-year and proposed reductions to the private university Cal Grant. If EdFund generated no additional operating surplus in FFY 2004-05, our recommendation would reduce EdFund's cumulative surplus from $160 million to $98 million. This equates to roughly a nine-month reserve. We think, for a nonprofit public agency, this is still a substantial reserve level—one that would not reduce EdFund's viability as a guaranty agency.

Student Fees

Analysis Page

E-193 ■ **Score $25.5 Million in Fee Revenue From Second-Year Phase In of Excess-Unit Fee Initiative ($1.1 Million for UC and $24.4 Million for CSU).** The excess-unit fee policy, initiated in the current year and being phased in over a five-year period, requires students (with certain exceptions) to pay full cost for excess units (more than 110 percent of that needed to obtain their degree). Despite being the second-year phase in of the excess-unit fee policy, the 2005-06 budget proposal does not reflect any associated increase in fee revenue. We recommend the Legislature score the revenue that is to be generated from the surcharge policy in the budget year ($25.5 million).

E-195 ■ **Increase California Community Colleges (CCC) Fee to $33 Per Unit. Score $101 Million in Additional CCC Fee Revenue**. This higher fee, to be charged only to middle-income and wealthy students, would generate about $100 million in additional revenue for CCC. The federal government, in turn, would fully reimburse those fee-paying students with family incomes up to $105,000 (if they had sufficient tax liability). It would partially reimburse those fee-paying students with family incomes up to $160,000. In total, these middle- and upper middle-income students would receive approximately $50 million in federal aid. Financially needy students, on the other hand, are entitled to have their fees waived (through a state aid program) and thus should pay nothing even with fees being increased.

University of California (UC)

E-202 ■ **Alternative Budget Proposal for UC.** Based on our review of the UC's funding needs for 2005-06, we recommend an alternative to the Governor's budget for the university. Our alternative would increase funding in the budget year to maintain the Master Plan's commitment to student access, while avoiding the programmatic reductions proposed by the Governor. At the same time, our proposal would free up $57 million in General Fund support to address other priorities.

California State University (CSU)

E-208 ■ **Adopt the Legislative Analyst's Office Alternative Budget for CSU.** Based on our review of CSU's funding needs for 2005-06, we recommend an alternative to the Governor's budget for the university. Our alternative would increase funding in the budget year to maintain the Master Plan's commitment to student access, while avoiding the programmatic reductions proposed by the Governor. At the same time, our proposal would free up $71.5 million in the General Fund to address other priorities.

Analysis Page

California Community Colleges (CCC)

E-219 ■ **Fund Enrollment Growth of 1.9 Percent.** The Governor proposes to fund enrollment growth of 3 percent. We recommend funding enrollment growth of 1.9 percent, which is the same rate as adult population is projected to grow. We recommend the associated savings ($50.6 million) be redirected to other K-14 priorities.

E-220 ■ **Continue to Advance Equalization Effort.** Recommend the Legislature continue the effort, begun in the current year, to equalize per-student funding among community college districts. We recommend equalization be made a funding priority for new Proposition 98 funding that is not needed to fund workload increases.

E-222 ■ **Clarify Accountability Expectations.** We recommend two changes to provisional language in the Governor's budget proposal in order to clarify the state's expectations about CCC's recent accountability efforts.

E-226 ■ **Fund the California Partnership for Achieving Student Success. Increase Item 6870-101-0001 by $1 Million.** Recommend the Legislature fund the continuation and expansion of an important and proven program that improves district performance and can assist in accountability efforts.

Student Aid Commission

E-233 ■ **Create Parity for Financially Needy Students Attending Public and Private Universities. Increase Item 7980-101-0001 by $26.6 Million.** Recommend the Legislature provide the same amount of support for financially needy students at public and private universities. This would help ensure that the Cal Grant program continued to promote access and choice for all financially needy students.

E-238 ■ **New National Guard Assumption Program of Loans for Education Warrants Have No Budget-Year Cost. Reduce Item 7980-101-001 by $200,000.** Given no National Guard warrants have been issued to date, and individuals must complete one year of military service prior to receiving state benefits, the state would incur no associated program cost until at least 2006-07. Rather than setting aside funds even though they would not be needed, recommend the Legislature capture $200,000 as General Fund savings.

E-239 ■ **Use Larger Budget-Year Swap to Restore Cal Grant Benefits. Increase Reimbursements to Item 7980-101-0001 by $26.6 Million.** Recommend the Legislature designate $61.6 million (or $26.6 million more than proposed in the Governor's budget) in Student Loan Operating Fund surplus monies to restore Cal Grant benefits for all financially needy students. This larger swap would reduce EdFund's cumulative surplus from $160 million to about $98 million. This equates to roughly a nine-month operating reserve—still a healthy reserve for the agency.

Governor's Budget Summary

To the California Legislature
Regular Session 2012-13

Edmund G. Brown Jr. Governor
State of California

This page intentionally blank to facilitate double-sided printing.

GOVERNOR

Edmund G. Brown Jr.

January 10, 2013

To the Members of the Senate and the Assembly of the California Legislature:

California today is poised to achieve something that has eluded us for more than a decade — a budget that lives within its means, now and for many years to come.

We are in this favorable position both because of the huge budget reductions that you have made in the last two years, and because the people voted for Proposition 30.

Under this budget, K-12 school districts will see an increase in funds. School districts serving those students who have the greatest challenges will receive more generous increases — so that all students in California have the opportunity to succeed. This budget also focuses more responsibility and accountability on those who are closest to our students.

This budget proposes annual funding increases for public higher education. The goal is to provide our students with a solid and affordable education. It challenges the leaders of our higher education system to do better by our students by deploying their teaching resources more effectively.

This budget takes the next step to implement federal health care reform. Given the complexity and financial risk, I urge you to expand our health care system in ways that are both affordable and sustainable.

This budget finally puts California on a path to long-term fiscal stability. What must be avoided at all costs is the boom and bust, borrow and spend, of the last decade. Fiscal discipline is not the enemy of democratic governance, but rather its fundamental predicate. That is the spirit that I trust will characterize our work together in the coming year.

With respect,

s/ Edmund G. Brown Jr.

Edmund G. Brown Jr.

2013-14 Budget Summary

Table of Contents

This page intentionally blank to facilitate double-sided printing.

Introduction

In 2011, the state faced $20 billion in expected annual gaps between its revenues and spending. Just two years later, California is on its most stable fiscal footing in well over a decade. With the tough spending cuts enacted over the past two years and new temporary revenues provided by the passage of Proposition 30, the state's budget is projected to remain balanced for the foreseeable future.

The Budget invests in both K-12 and higher education. These investments are critical to provide Californians, regardless of their financial circumstance, access to high-quality academic and career education, improve educational attainment, and support critical thinking and civic engagement—thereby strengthening the foundation for sustainable growth. The Budget also expands health care coverage as the state implements federal health care reform. It also preserves the state's safety net and pays down debt.

Despite the dramatic budgetary changes of the past two years, there remain a number of major risks and pressures that threaten the state's new-found fiscal stability, including the overhang of billions of dollars in debt accumulated in prior years.

Achieving Fiscal Balance

When Governor Brown took office, the state faced a $26.6 billion short-term budget problem and estimated annual gaps between spending and revenues of roughly $20 billion. The 2011-12 and 2012-13 budgets rejected the past reliance on gimmicks,

borrowing, and deferrals. These two budgets addressed the $20 billion annual deficit through spending cuts, primarily in corrections, health and human services, and education. In total, these budgets provided three dollars of spending cuts for every dollar in temporary tax revenues approved by the voters.

The two budgets achieved the following goals:

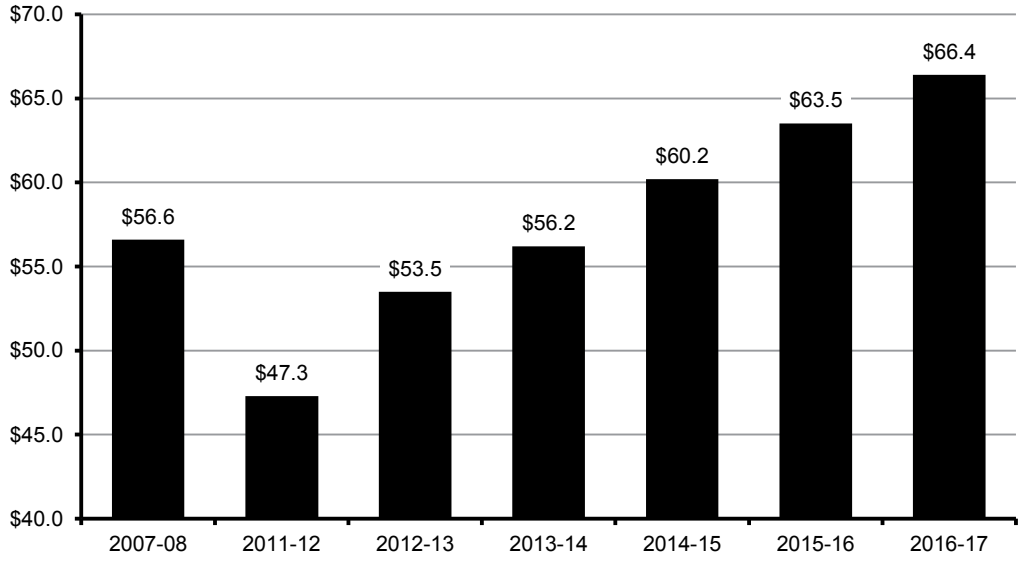
- Realigning public safety programs to bring government closer to the people.
- Implementing a downsizing plan for the California Department of Corrections and Rehabilitation. The plan is intended to satisfy the U.S. Supreme Court's order requiring reduced crowding and end federal court oversight of our prison system. It will reverse the trend of prison spending that has consumed a growing percentage of the General Fund budget. Over time, spending will decline from 11 percent to 7.5 percent of the General Fund.
- Eliminating redevelopment agencies to increase funding for schools, police, fire, and other core local services.
- Refocusing the state's welfare program on getting people back to work. The total number of months an adult can receive a monthly cash benefit has been reduced from 60 months to 48 months. Furthermore, the benefit is only provided to the adult for up to 24 months unless the individual is meeting federal work requirements. The Budget provides specific funding to implement these reforms.
- Making tough cuts across state government to align spending with available tax dollars. Grants to low-income seniors and persons with disabilities (State Supplementary Payment) have been reduced to 1982 levels. CalWORKs grants have been reduced to below 1987 levels. The Williamson Act subventions, child care and dependent tax credit refunds, and the Healthy Families Program were eliminated.
- Reducing the state workforce by more than 30,000 positions. The state workforce is at its lowest level as a share of the state's population in almost a decade—and California already had one of the nation's lowest levels of government employment.
- Overall General Fund spending is down from its peak of $103 billion in 2007-08 to $93 billion in 2012-13, a decrease of $10 billion, or 10 percent. As a share of the economy, General Fund spending in 2011-12 and 2012-13 remains at its lowest level since 1972-73.

While the state has made very difficult programmatic reductions over the past two years, California has maintained its safety net for the state's neediest and most vulnerable residents. Compared to other states, it continues to provide broader health care coverage to a greater percentage of the population, including in-home care; guarantees access to services for persons with developmental disabilities; makes available higher cash assistance to families and continues that assistance to children after their parents lose eligibility; and provides very generous financial aid to those seeking higher education in California.

Reinvesting in Education

Proposition 30, the Governor's Initiative, was premised on the need to reinvest in education. For the first time since the recession began in 2008, with the passage of the Initiative, the Governor's Budget reinvests in, rather than cuts, education funding. As shown in Figure INT-01, the minimum guarantee of funding for K-14 schools was $56.6 billion in 2007-08 and sank to $47.3 billion in 2011-12. From this recent low, funding is expected to grow to $66.4 billion in 2016-17, an increase of $19 billion (40 percent).

Figure INT-01
Budget Reinvests in Education
(Dollars in Billions)



K-12 Education

For K-12 schools, funding levels will increase by almost $2,700 per student through 2016-17, including an increase of more than $1,100 per student in 2013-14 over 2011-12 levels. This reinvestment also provides the opportunity to correct historical inequities in school district funding. By allocating new funding to districts on the basis of the number of students they serve, all California school districts can improve. By committing the most new funding to districts serving English language learners and low-income students, the Budget ensures that our educational system supports equal opportunity for all Californians. This new funding will be coupled with new, but simplified, accountability measures. The goal is to ensure sufficient flexibility at the local level so that those closest to the students can make the decisions.

Higher Education

The budget plan also invests in the state's higher education system to maintain the quality and affordability of one of California's greatest strengths. Since 2007-08, systemwide tuition and fees have increased by $5,556 (84 percent) at the University of California and by $2,700 (97 percent) at the California State University. The Budget provides stable funding growth over multiple years and should eliminate the need for further tuition increases—if the universities rise to the challenge by deploying their teaching resources more effectively. By focusing on reducing the time it takes a student to successfully complete a degree, the state can ensure a system that is financially sustainable over the long term. For the state's universities and community colleges, the Budget provides 5 percent growth to each system. A similar level of funding is proposed to be provided in future years.

Expanding Health Care

Medi-Cal, the state's Medicaid health care program for low-income families, currently serves one out of every five Californians (more than 8 million individuals). The program currently receives 20 percent of the General Fund budget. As the state implements its commitment to federal health care reform, these numbers will increase. The Budget includes $350 million General Fund to begin to pay for this federally required expansion of coverage.

In addition to the required expansion of coverage, states have the option under federal health care reform to expand coverage to include medically indigent adults. The federal

government promises to provide 100 percent funding in the short term for much, but not all, of the costs associated with the expansion. States will bear a portion of expansion costs on a permanent basis. The Budget outlines two possible approaches to the optional expansion—a state-based approach or a county-based approach. Each approach has its own set of strengths, challenges, risks, and benefits.

Expansion of health care under either approach will have a significant effect on both state and county finances. Under the current system, counties provide health care to medically indigent adults using a combination of their own and state 1991 realignment funds. The implementation of health care reform provides a unique opportunity to focus on the future of the state-county relationship. The goal is to fairly allocate risk, strengthen local flexibility, and clearly delineate the respective responsibilities of the state and the counties.

A Balanced Budget Plan for the Coming Years

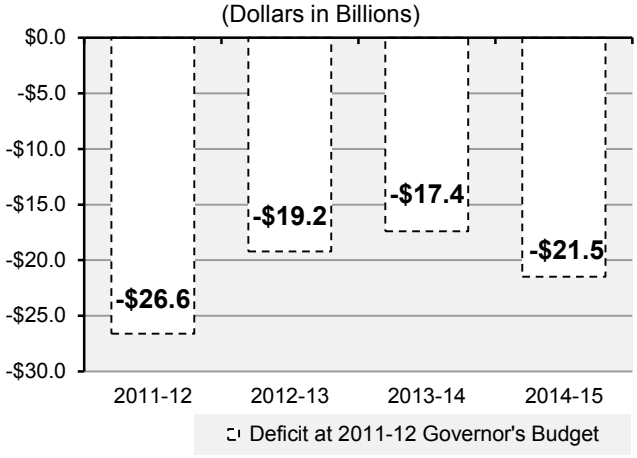
The Budget proposes a multiyear plan that is balanced, maintains a $1 billion reserve, and pays down budgetary debt from past years. Overall General Fund spending is projected to grow by 5 percent, from $93 billion in 2012-13 to $97.7 billion in 2013-14. The vast majority of the spending growth is in education and health care.

Absent changes, the 2013-14 budget is projected to be balanced—but without an adequate reserve. To create a $1 billion reserve, the Budget proposes:

- Suspending four newly identified mandates. ($104 million)
- Using 2012-13 funds appropriated above the Proposition 98 minimum guarantee to prepay obligations to schools under the *CTA v. Schwarzenegger* settlement. ($172 million)
- Continuing the use of miscellaneous state highway account revenues to pay for transportation bond debt service. ($67 million)
- Extending the hospital quality assurance fee. ($310 million)
- Extending the gross premiums tax on Medi-Cal managed care plans. ($364 million)

Under current projections, the Budget is expected to remain in balance in future years. This represents the first time in over a decade that future spending is expected to stay within available resources. Figure INT-02 shows the roughly $20 billion annual shortfalls projected just two years ago that have been eliminated.

Figure INT-02
Last Two Budgets Have Eliminated $20 Billion Annual Shortfalls*
(Dollars in Billions)



*Under current projections, the state would have operating surpluses of $851 million in 2013-14, $47 million in 2014-15, $414 million in 2015-16, and $994 million in 2016-17.

The state's budget remains balanced only by a narrow margin. The 2012 Budget Act assumed and spent the revenue provided by Proposition 30. In addition, this revenue is temporary, with the sales tax expiring at the end of 2016 and the income tax expiring at the end of 2018. The state must begin to plan now to ensure that the budget will remain balanced after the revenue expires.

A number of risks could quickly return the state to fiscal deficits:

- In addressing its own fiscal challenges, the federal government could shift costs to the state.
- While the Budget projects modest economic growth, the pace of the nation's and state's economic recovery remains uncertain.

- The federal government and the courts have hindered the state's past efforts to reduce spending and could again interfere with the successful implementation of budget actions authorized in 2011-12 and 2012-13.
- Rising health care costs will continue to strain the state budget.

The state's budget challenges have been exacerbated by the Wall of Debt—an unprecedented level of debts, deferrals, and budgetary obligations accumulated over the prior decade. In 2013-14 alone, the state will dedicate $4.2 billion to repay this budgetary borrowing—paying for the expenses of the past, instead of meeting current needs. Moving forward, continuing to pay down the Wall of Debt is key to increasing the state's fiscal capacity. In 2011, the level of outstanding budgetary borrowing totaled $35 billion.

Figure INT-03

Budget Plan Would Reduce Wall of Debt to Less than $5 Billion

(Dollars in Billions)

	End of 2010-11 [1/]	End of 2012-13 [2/]	End of 2016-17 [2/]
Deferred payments to schools and community colleges	$10.4	$8.2	$0.0
Economic Recovery Bonds	7.1	5.2	0.0
Loans from Special Funds	5.1	4.1	0.0
Unpaid costs to local governments, schools and community colleges for state mandates	4.3	4.9	2.5
Underfunding of Proposition 98	3.0	2.4	0.0
Borrowing from local government (Proposition 1A)	1.9	0.0	0.0
Deferred Medi-Cal Costs	1.2	1.7	1.1
Deferral of state payroll costs from June to July	0.8	0.7	0.7
Deferred payments to CalPERS	0.5	0.4	0.0
Borrowing from transportation funds (Proposition 42)	0.4	0.2	0.0
Total	**$34.7**	**$27.8**	**$4.3**

[1/] As of 2011-12 May Revision

[2/] As of 2013-14 Governor's Budget

As shown in Figure INT-03, the debt has already been reduced to less than $28 billion. Under current projections, it will be reduced to less than $5 billion by the end of 2016-17.

Figure INT-04

Unfunded Retirement Liabilities

	($ in Billions)
State Retiree Health	$62.1
State Employee Pensions	38.5
Teacher Pensions	64.5
University of California Employee Pensions	12.8
Judges' Pensions	3.3
Total	**$181.2**

California will still need to address other looming liabilities, such as the deficit in the state's Unemployment Insurance Fund and the more than $100 billion in unfunded liabilities in retiree health and pension systems. In addition, as Figure INT-04 also shows, the retirement systems for University of California employees and teachers have accumulated $77 billion in liabilities which will need to be addressed.

The state has $37.6 billion in authorized infrastructure bonds that have yet to be sold. Nevertheless, this sum is relatively small when compared to the money California must spend to maintain and modernize its infrastructure in the coming years.

The boom and bust in our state's budget over the last decade is something we should not repeat. Instead, the state must live within its means, pay down debt, and build up a "rainy day" fund — all to ensure a stable government that earns the respect of the citizens that pay for it.

(Dollars in Millions)

K thru 12 Education

California provides compulsory instruction and support services to roughly six million students in grades kindergarten through twelve in more than 10,000 schools throughout the state. Through a system of 58 county offices of education and more than 1,000 local school districts and charter schools, students are provided with instruction in English, mathematics, history, science, and other core competencies to provide them with the skills they will need upon graduation for either entry into the workforce or higher education.

Investing in Education

The Budget includes Proposition 98 funding of $56.2 billion for 2013-14, an increase of $2.7 billion over revised funding levels for the 2012-13 year. With the passage of Proposition 30, the Schools and Local Public Safety Protection Act of 2012, schools have been spared billions of dollars of mid-year trigger reductions. Building off the stabilized funding base for 2012-13, the Budget proposes investments for 2013-14 that will significantly reduce late payments to schools and target substantial additional funding to schools and students in most need of these resources.

During the economic downturn, the state deferred payments to schools, therefore, schools received approximately 20 percent of their funds a year after they spent them. Some school districts were able to borrow to manage these deferrals, while others had to implement deferrals as cuts. Districts that were able to borrow incurred substantial interest costs, which led to dollars taken out of the classroom. The Budget proposes repayment of approximately $1.8 billion in deferred payments to fund programs and

increase budget transparency. This investment will provide additional certainty of funding for expected levels of programs and services, while also reducing the substantial borrowing costs borne by schools as result of the deferrals.

In addition to revenues provided by Proposition 30, schools and community colleges also benefit from the passage of Proposition 39, the California Clean Energy Jobs Act. For 2013-14, Proposition 39 will result in a $526 million increase in the Proposition 98 guarantee level. The Budget proposes to transfer $450 million of the revenues generated in 2013-14 into a special fund for energy efficiency projects in schools and community colleges, consistent with the provisions of Proposition 39. The expenditures from this special fund for energy efficiency projects will also count towards meeting funding obligations for schools and community colleges under Proposition 98.

Since reaching an all-time high of $56.6 billion in 2007-08, Proposition 98 funding for K-14 education slipped to $47.3 billion for the 2011-12 year. In recognition of the key role schools play in promoting equal opportunity for Californians, supporting civic engagement and critical thinking, the Budget reverses this almost half-decade decline in funding for education programs. It gives schools resources to fund base programs and services, stabilize and expand their teaching and support personnel, and renew investments in facilities, instructional materials and other education infrastructure. While increasing funding for districts, it makes targeted investments in districts serving students with the greatest level of needs—recognizing that this approach will help the state reduce disparities, maximize student achievement, and strengthening the foundation for sustainable growth.

Restoring Local Control and Making Needs-Based Investments

California's school finance system, which provides funding for school districts, county offices of education, and charter schools, has become overly complex, administratively costly, and inequitably distributed. In many ways, the current system of school finance is a relic of the past, where program allocations have been frozen and are no longer reflective of changing student needs. There are many different funding streams, each with their own allocation formula and spending restrictions. It is state-driven and interferes with local officials deciding how best to meet the needs of students. Further, scholarly research and practical experience indicate that low-income students and English language learners come to school with unique challenges and often require supplemental

instruction and other support services to be successful in school. Additionally, the current school finance system provides few incentives for school districts to offer innovative educational programs that increase student success.

The Budget proposes new funding formulas for both schools and county offices of education. The proposal will increase local control, reduce state bureaucracy, and ensure that student needs drive the allocation of resources. The new funding formulas will also greatly increase transparency in school funding, empowering parents and local communities to access information in a more user-friendly manner and enhance their ability to engage in local school financial matters. The goal is to ensure sufficient flexibility and accountability at the local level so those closest to the students can make the decisions.

School District and County Office of Education Finance

The Budget proposes a new Local Control Funding Formula that distributes combined resources to schools through a base revenue limit funding grant (base grant) per unit of average daily attendance (ADA) with additional supplemental funding allocated to local educational agencies based on their proportion of English language learner and free and reduced-price meal eligible students. The proposed formula entitles every school district to a base grant adjusted for grade span cost differentials, multiplied by ADA. The average base grant when fully implemented will be equal to the current average undeficited school district revenue limit. A K-3 grade span adjustment is provided to ensure that current K-3 Class Size Reduction program funding is targeted to students in those grades. Base funding will be used by each locality at their discretion to fulfill local educational priorities. Under the new formula, basic aid districts would be defined as districts whose local property taxes equal or exceed their district's formula allocation. Those districts would continue to retain local property taxes in excess of their new formula allocation.

The proposed formula provides supplemental funding to districts based on the proportion of English language learners and free and reduced-price meal eligible students they serve. Supplemental funding is equal to 35 percent of the base grant. When the proportion of English language learners and economically disadvantaged students exceeds 50 percent of its total student population, the school district will receive an additional concentration grant equal to 35 percent of the base grant for each English language learner and economically disadvantaged student above the 50-percent threshold. Under the formula, charter schools are essentially treated the same as a district, except they cannot receive a higher concentration grant than the school district in which it resides. The supplemental

and concentration grants are available for any purpose that benefits the students generating the funding.

While most categorical program funding is redistributed through the new funding formula, the Targeted Instructional Improvement Grant program and Home-to-School Transportation program funding allocations will be distributed as permanent add-on programs to the new funding formula allocations for each district. Schools will be provided with discretion to use these funds for any purpose.

This proposal builds on last year's budget proposal and reflects input from stakeholder groups and the Legislature. The Department of Finance, in collaboration with the State Board of Education and the Department of Education, convened three stakeholder meetings to discuss the concept of a new funding formula and obtain feedback from various education stakeholders. These discussions were guided by six key principles, which are: (1) creating a funding mechanism that is equitable, easy to understand, and focused on the needs of students, (2) implementing the formula in concert with funding increases for K-12 education, (3) phasing in the formula over several years, (4) paying schools back for deferrals and forgone cost-of-living adjustments through restoration of the deficit factor, and funding annual cost-of-living adjustments going forward, (5) allowing schools maximum flexibility in allocating resources to meet local needs, and (6) holding schools accountable for academic and fiscal outcomes. The key changes to last year's proposal include the following:

- Allocating half of the available Proposition 98 growth funding to move local educational agencies towards their respective formula allocation.
- Increasing the supplemental grant and reducing the concentration grant weights.
- Folding current career technical education funding into a 9-12 grade span adjustment.
- Authorizing local educational agencies to receive supplemental and concentration grant funding for an English language learner student for no more than five years.
- Linking funding in the K-3 grade span adjustment to maximum class sizes. A student-to-teacher ratio of 24 to 1 is established as the maximum standard in grades K-3 upon full implementation of the new formula. This ratio may be exceeded if agreed to at the local level according to local priorities.

The Budget proposes a new two-part funding formula for county offices of education that will provide (1) per-ADA funding to support instruction of students who attend community

schools and juvenile court schools, and (2) unrestricted funding for general county office operations, distributed based on the total number of school districts in the county and the total ADA of all students in the county. Under the new formula, county offices of education will receive a base grant per-ADA for students served in alternative schools that acknowledges the higher cost of education in these settings, while also providing the same targeted supplemental grants for English language learner and low income students as proposed in the school district formula.

Accountability

The Budget proposes to focus accountability on the core requirements and outcomes expected of schools and to better integrate accountability with the local school district budget process. The new system moves away from expenditure requirements and other input-based measures. The Budget requires that all school districts produce and adopt a District Plan for Student Achievement concurrent and aligned with each district's annual budget and spending plan. While school districts have some discretion regarding the content of the plan, all plans are required to address how districts will use state funding received through the new funding formula toward improvement in the following categories:

- Basic conditions for student achievement (having qualified teachers at each school site, sufficient instructional materials available for students, and school facilities in good repair).
- Programs or instruction that benefit low-income students and English language learners.
- Implementation of Common Core content standards and progress toward college and career readiness (as measured by the Academic Performance Index, graduation rates, and completion of college-preparatory and career technical education courses).

The Budget eliminates most programmatic and compliance requirements that school districts, county offices of education, and charter schools are currently subject to under the existing system of school finance. Important requirements that remain in place include federal accountability requirements, as well as fiscal and budgetary controls and academic performance requirements.

Flexibility

A variety of temporary program and funding flexibility options, which have been provided to local schools since 2008-09, are set to expire over the next two fiscal years.

Consistent with the Administration's policy of having those closest to the students make the decisions, the Budget proposes the following permanent changes:

- Routine Maintenance Contributions—Eliminate the minimum contribution requirement for routine maintenance.
- Deferred Maintenance Program Matching Requirement—Eliminate the required local district set-aside for deferred maintenance contributions.
- Surplus Property—Allow districts to use the proceeds from the sale of any real and personal surplus property for any one-time general fund purposes.

As schools transition to a new funding formula and as funding grows, it is important to consider other flexibilities currently granted to schools. These include the ability of schools to reduce the school year by up to five days or the equivalent number of minutes without incurring penalties, and the ability of schools to reduce their budget reserves to significantly lower levels. The Administration will engage local school officials and education stakeholders in a discussion of the need for additional flexibility until funding returns to the 2007-08 level.

Other Program Reforms and Investments

In addition to proposing reforms of school district and county office of education funding, the Administration proposes additional changes and investments in the areas of charter schools, special education, K-12 mandates, technology-based instruction, and adult education.

Charter Schools

Charter schools emerged in the early 1990's as an alternative to traditional public schools, providing opportunities for both parents and teachers to establish public schools that are free from most of the requirements of the Education Code. This freedom is intended to provide charter schools maximum flexibility to foster innovation and allow alternative approaches to education in local public schools. Instead of being governed by state law, charter schools are required to comply with the provisions of their local charter petition, as approved by their local school district, county office of education, or the State Board of Education.

Although the number of charter schools has grown to almost 1,000 statewide, there are a number of financial and operational challenges facing charter schools that limit

their potential effectiveness as alternatives to traditional public schools. In financial terms, charter schools receive significantly less funding on a per-student basis than traditional schools. They also face challenges in being able to secure necessary facilities for instruction. Compounding these problems is a labyrinth of control agencies that charter schools must deal with to secure funding for a variety of different programs. To remedy these issues, the Budget proposes the following:

- Shifting the Charter School Facility Grant Program and the Charter School Revolving Loan Program from the Department of Education to the California School Finance Authority to improve the efficiency of charter school program administration and disbursement of funds to local charter schools. The Authority already administers similar programs.
- Modifying the funding determination process for non-classroom based charter schools by limiting it to the first and third years of operation in most instances. Charter schools that are found to be out of compliance with minimum standards and applicable laws will be required to comply with annual funding determinations.
- Expanding the Charter Schools Facility Grant Program to include eligibility for non-classroom based charter schools, as these schools still have facility needs for instructional support.
- Extending for five additional years the 2012-13 requirement that school districts with identified surplus property and facilities first offer to sell those resources to charter schools before selling them to other entities or disposing of those assets.

Special Education Finance

The special education funding formula, created in Chapter 854, Statutes of 1997 (AB 602), has become unnecessarily complicated over time with certain formula components creating funding inequities among special education local plan areas. Also, a number of program add-ons created over the years have resulted in both inefficiencies and a lack of flexibility at the local level. To address these issues, the Budget proposes the following:

- Eliminating the integration of federal funds in the state's AB 602 calculation and treating both funding streams separately to remove unnecessary complications in the formula and help equalize funding among special education local plan areas.

- Consolidating funding for several special education program add-ons into the base AB 602 formula calculation, while collapsing another 15 special education add-on programs into 10 based on similar activities.

The changes proposed for special education finance will not affect funding set aside for the realignment of mental health services for special education students implemented last year—$357 million in Proposition 98 General Fund and an additional $69 million in federal funds will be dedicated for this purpose.

K-12 Mandates Block Grant

The Budget Act of 2012 created an alternative method for school and community college districts to receive compensation for performing state-mandated activities by appropriating $200 million for two new block grants—one for school districts, county offices of education, and charter schools; and one for community college districts. To date, almost 77 percent of school districts and charter schools have opted for block grant funding, while 93 percent of community college districts have selected this option. The block grant statutes specify which mandates are funded through the block grants, and schools are provided with a per-student funding allocation to support the performance of those activities. Schools that choose to receive block grant funding may not submit reimbursement claims. However, two K-12 mandated programs were not included in the K-12 block grant last year; the Graduation Requirements and Behavioral Intervention Plan programs. The Administration proposes to restructure requirements for the Behavioral Intervention Plan program, which will eliminate almost all reimbursable costs for this mandate. There are no changes proposed for the Graduation Requirements program, and the Administration continues to believe that any costs associated with this activity have run their course in the almost 30 years since the inception of this requirement. Nonetheless, the Budget proposes adding an additional $100 million to the K-12 block grant to fund costs for these two additional programs.

Technology-Based Instruction

School districts are limited in their ability to offer instruction in venues other than traditional classroom-based settings. The primary alternative instructional methods available to school districts are through the use of non-classroom based independent study and synchronous online education courses. Independent study programs, while providing freedom from the traditional classroom-based setting, still mandate the same pupil-to-teacher ratios as regular classroom instruction and focus heavily on process compliance with independent study agreements, which are contracts with students that govern the goals and expectations for this type of instruction. Synchronous online

courses are internet-based instructional courses, which provide an additional level of flexibility, but are limited by the requirement that these classes can only be offered under the immediate online supervision of a teacher.

To remove impediments to greater instructional flexibility, the Budget proposes statutory changes that will enable school districts to offer asynchronous online courses through a streamlined and outcome-focused independent study agreement. Asynchronous instruction does not require the simultaneous participation of all students and instructors, thereby increasing flexibility in the delivery of instruction. To hold these types of courses accountable, a refined independent study contract focused on specific measurable student outcomes, and teacher validation of those outcomes, will be used as the basis for whether schools receive funding for offering these courses. Under such a revised contract, schools will be held accountable for student achievement, rather than process requirements.

Adult Education and Apprenticeship Realignment

Currently, K-12 school districts and community colleges are authorized to provide adult education instruction. However, there is no statewide requirement or mechanism to coordinate the efforts of these two systems. As a result, the state has an inefficient and redundant system that is not always structured in the best interest of adult learners. Further, funding for the K-12 adult education program is currently flexible, available for any educational purpose, and many districts are eliminating their programs and redirecting this funding to support their core instructional programs.

To create a more accountable and centralized adult education learning structure, the Budget proposes $315.7 million Proposition 98 General Fund to fund a comparable K-12 adult education service delivery system. It proposes an increase of $300 million to support the program within the community colleges. It also shifts $15.7 million for the Apprenticeship Program. The proposal eliminates the current bifurcated system and places the community colleges in a position to improve coordination at the regional and statewide levels. Community colleges are better positioned than K-12 schools to address the needs of adult learners because that is their core function. Funding will be allocated from a new adult education block grant based on the number of students served, and the colleges will be encouraged to leverage the capacity and expertise currently available at the K-12 district adult schools. Additional detail on this proposal is discussed in the Higher Education Chapter.

Energy Efficiency Investments

K-12 school facilities represent the single largest capital outlay investment made by the state since the mid-1990's. From 1998 to present, the state has invested more than $30 billion in school bond funding to modernize and construct school facilities. School districts and community colleges are well positioned to undertake projects that reduce their current utility requirements and expand the use of renewable energy resources. As a result, to make a substantial energy efficiency imprint throughout the state, the Budget proposes to allocate all Proposition 39 funding to schools and community colleges. Proposition 39 will provide $450 million in 2013-14 to support these investments in schools and community colleges, and $550 million in each of the next four years. The reduction in utility costs will in turn assist schools and community colleges in recovering from budgetary reductions implemented over the past five years.

The Department of Education and the Chancellor's Office for the California Community Colleges will be responsible for distributing funding, and may consult with both the California Energy Commission and the Public Utilities Commission to develop guidelines for prioritizing the use of the funds. These guidelines will reflect the state's energy "loading order", which guides the state's energy policies and decisions according to the following order of priority: (1) decreasing electricity demand by increasing energy efficiency, (2) responding to energy demand by reducing energy usage during peak hours, (3) meeting new energy generation needs with renewable resources, and (4) meeting new energy generation needs with clean fossil-fueled generation. Schools and community colleges will be able to use Proposition 39 funding consistent with the state's loading order policies and guidance to undertake energy efficiency measures including, but not limited to, the construction or modernization of buildings in a manner that uses less energy, purchasing energy efficient equipment, as well as undertaking renewable energy projects like installation of solar panels and geothermal heat pumps.

Local schools and community colleges may use Proposition 39 funds for technical assistance to help identify, evaluate, and implement appropriate projects. Schools and community colleges will also be encouraged to partner on their energy efficiency projects with the California Conservation Corps' Energy Corps program and participating community conservation corps programs, which provide career technical education and on-the-job work experience in the energy efficiency and renewable energy industry sectors. Upon project completion, schools and community colleges will report their project expenditure information to the Department of Education and the Chancellor's Office, respectively. The Administration will work with the Department of Education,

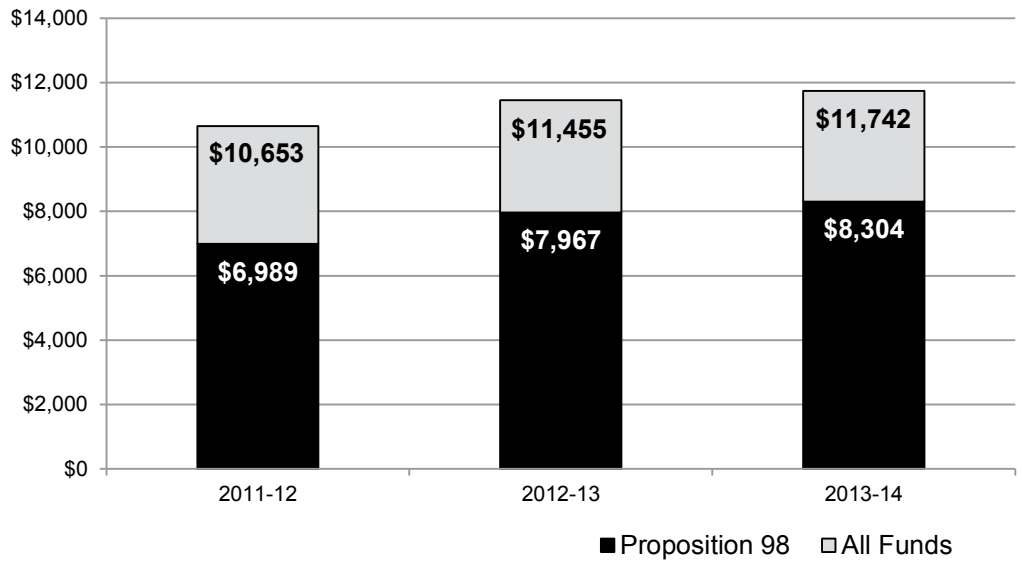
the Chancellor's Office and the Citizens Oversight Board to ensure these funds are used by schools and community colleges in a manner that is consistent with Proposition 39.

K-12 School Spending and Attendance

Per-Pupil Spending

Total per-pupil expenditures from all sources are projected to be $11,455 in 2012-13 and $11,742 in 2013-14, including funds provided for prior year settle-up obligations. Ongoing K-12 Proposition 98 per-pupil expenditures in the Budget are $8,304 in 2013-14, up significantly from the $7,967 per-pupil provided in 2012-13. (See Figure K12-01). Figure K12-02 displays the revenue sources for schools.

Figure K12-01
K-12 Education Spending Per Pupil



How Schools Spend Their Money

Figure K12-03 displays 2010-11 expenditures reported by schools from their general funds, the various categories of expenditure and the share of total funding for each category.

Attendance

After a period of declining attendance from 2005 to 2010, attendance in public schools began increasing gradually in

Figure K12-02
Sources of Revenue for California's K-12 Schools
(As a Percent of Total)

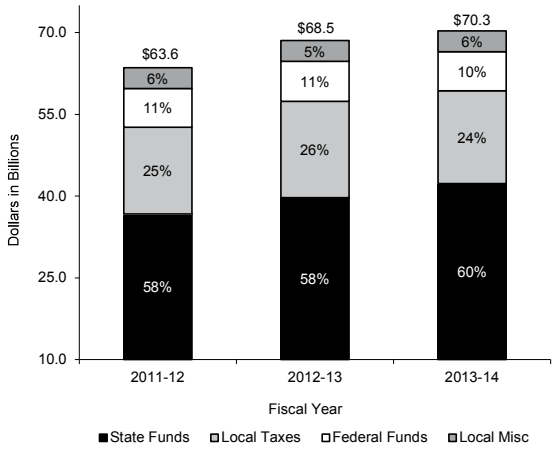


Figure K12-03
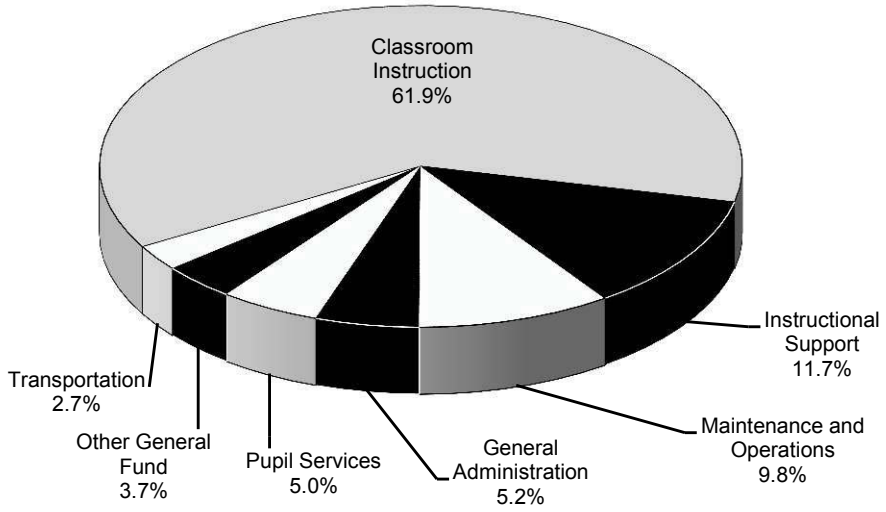
Where Schools Spend Their Money[1]



Classroom Instruction includes general education, special education, teacher compensation, and special projects.
General Administration includes superintendent and board, district and other administration and centralized electronic data processing.
Instructional Support includes research, curriculum development and staff development that benefits and supports student instruction.
Maintenance and Operations includes utilities, janitorial and groundskeeping staff, and routine repair and maintenance.
Pupil Services includes counselors, school psychologists, nurses, child welfare, and attendance staff.
Other General Fund includes spending for ancillary services, contracts with other agencies, and transfers to and from other district funds.

[1] Based on 2010-11 expenditure data reported by schools for their general purpose funding.

the 2010-11 fiscal year. Public school attendance is projected to continue increasing during the 2012-13 and 2013-14 fiscal years. For 2012-13, K-12 ADA is estimated to be 5,982,430, an increase of 16,090 from the 2011-12 fiscal year. For 2013-14, the Budget estimates that K-12 ADA will increase by an additional 5,967 to 5,988,397.

Proposition 98 Guarantee

A voter-approved constitutional amendment, Proposition 98 guarantees minimum funding levels for K-12 schools and community colleges. The guarantee, which went into effect in the 1988-89 fiscal year, determines funding levels according to multiple factors including the level of funding in 1986-87, General Fund revenues, per capita personal income, and school attendance growth or decline.

Proposition 98 originally mandated funding at the greater of two calculations or Tests (Test 1 or Test 2). In 1990, Proposition 111 (SCA 1) was adopted to allow for a third funding test in low revenue years. As a result, three calculations or tests determine funding for school districts and community colleges (K-14). The calculation or test that is used depends on how the economy and General Fund revenues grow from year to year.

Proposition 98 Test Calculations

Test 1 — Percent of General Fund Revenues: Test 1 is based on a percentage or share of General Fund tax revenues. The base year for the Test 1 percentage is 1986-87, a year in which school districts and community colleges (K-14) received approximately 40 percent of General Fund tax revenues. As a result of shifts in property taxes between K-14 schools and other local government entities, as well as a shift in the number of programs funded within Proposition 98, the current rate is approximately 39 percent.

Test 2—Adjustments Based on Statewide Income: Test 2 is operative in years with normal to strong General Fund revenue growth. This calculation requires that school districts and community colleges receive at least the same amount of combined state aid and local property tax dollars as they received in the prior year, adjusted for enrollment growth and growth in per capita personal income.

Test 3—Adjustment Based on Available Revenues: Test 3 is used in low revenue years when General Fund revenues decline or grow slowly. During such years, the funding guarantee is adjusted according to available resources. A "low revenue year" is defined as one in which General Fund revenue growth per capita lags behind per capita personal income growth by more than one-half percentage point. Test 3 was designed so that education is treated no worse in low revenue years than other segments of the

state budget. In years following a Test 3 funding level, the state is required to provide funding to restore what was not allocated the previous year. This is often referred to as a "maintenance factor".

K-12 School Facilities

Since 1998, voters have approved approximately $35 billion in statewide general obligation bonds to construct or renovate public school classrooms used by the state's roughly six million elementary, middle and high school students. In addition to general obligation bonds, school districts may use developer fees, local bonds, certificates of participation and Mello-Roos bonds to construct additional classrooms or renovate existing classrooms.

Currently, there is no bond authority remaining in the core school facilities new construction and modernization programs. As a result, now is an appropriate time to engage in a dialogue on the future of school facilities funding. Central to this discussion must be a consideration of what role, if any, the state should play in the future of facilities funding. It is also appropriate to engage in a deeper examination of the acceleration in state bond issuances for school facilities over the course of the last 15 to 20 years. Further, there are problems inherent in the current program that must be examined. School facility funding and related debt service costs have been supported outside of operational funding provided to schools, as such, facility needs are not balanced with the operational needs of schools. The current School Facilities Program is overly complex and administered by multiple control agencies with fragmented responsibilities. The current program is also largely state-driven, restricting local flexibility and control.

The Administration suggests the following guiding principles:

- From a state perspective, future K-12 facilities funding needs must be considered in the context of other competing education and non-education priorities and needs.
- The school facilities construction process should be easy to understand and efficient.
- School districts and their respective localities should have appropriate control of the school facilities construction process and priorities.

- School districts and community college districts should have incentives to balance their facility costs against operational needs within the total amount of funding available from state and local sources for education.

K-12 Budget Adjustments

Significant adjustments:

- K-12 Deferrals—An increase of approximately $1.8 billion Proposition 98 General Fund to reduce inter-year budgetary deferrals. Combined with the $2.2 billion provided in 2012-13 to retire inter-year deferrals, the total outstanding deferral debt for K-12 will be reduced to $5.6 billion at the end of the 2013-14 fiscal year, and all remaining deferrals will be paid off by the end of the 2016-17 fiscal year. Inter-year deferrals for K-12 had reached a high of $9.5 billion in the 2011-12 fiscal year.
- New School District Funding Formula—Additional growth of approximately $1.6 billion in Proposition 98 General Fund for school districts and charter schools in 2013-14, an increase of 4.5 percent.
- New County Office of Education Funding Formula—An increase of $28.2 million Proposition 98 General Fund to support first year implementation of a new funding formula for county offices of education in 2013-14.
- Energy Efficiency Investments—An increase of $400.5 million Proposition 98 General Fund to support energy efficiency projects in schools consistent with Proposition 39.
- Charter Schools—An increase of $48.5 million Proposition 98 General Fund to support projected charter school ADA growth.
- Special Education—An increase of $3.6 million Proposition 98 General Fund for Special Education ADA growth.
- K-12 Mandates Funding—An increase of $100 million to the K-12 portion of the mandates block grant to support costs associated with the Graduation Requirements and Behavioral Intervention Plans mandates.
- Cost-of-Living Adjustment Increases—The Budget provides $62.8 million to support a 1.65-percent cost-of-living adjustment for a select group of categorical programs that will remain outside of the new student funding formula, including Special

Education, Child Nutrition, American Indian Education Centers, and the American Indian Early Childhood Education Program. Cost-of-living adjustments for school district and county office of education revenue limits will be provided in the form of new funding allocated for the implementation of the new funding formulas.

- Emergency Repair Program—An increase of $9.7 million one-time Proposition 98 General Fund Reversion Account for the Emergency Repair Program.
- Local Property Tax Adjustments—An increase of $526.6 million Proposition 98 General Fund for school district and county office of education revenue limits in 2012-13 as a result of lower offsetting property tax revenues. An increase of $608.6 million in Proposition 98 General Fund for school districts and county offices of education in 2013-14 as a result of reduced offsetting local property tax revenues.
- Average Daily Attendance (ADA)—An increase of $304.4 million in 2012-13 for school district and county office of education revenue limits as a result of an increase in projected ADA from the 2012 Budget Act. An increase of $2.8 million in 2013-14 for school districts and county offices of education as a result of projected growth in ADA for 2013-14.
- Child Nutrition Program—An increase of $77 million for 2013-14 in federal local assistance funds to reflect growth of nutrition programs at schools and other participating agencies.
- The revised 2012-13 Proposition 98 guarantee will be $162.8 million below the level of General Fund appropriated in 2012-13. The Budget proposes that this amount be used to retire future funding obligations under the terms of the *CTA v. Schwarzenegger* settlement agreement.

Child Care

Subsidized Child Care includes a variety of programs designed to support the gainful employment of low-income families. These programs are primarily administered by the Department of Education through non-Proposition 98 funding and the annual federal Child Care and Development Fund grant. All programs are means-tested and require that families receiving subsidies have a need for child care, which means all adults in the family must be working or seeking employment, or are in training that leads to employment. Most programs are capped, drawing eligible families from waiting lists, while those specifically limited to CalWORKs families or former CalWORKs families have been funded for all eligible recipients.

The major capped programs include General Child Care, Alternative Payment Program, and Migrant Child Care. CalWORKs programs include: Stage 1, administered by the Department of Social Services, is for families on cash assistance whose work activities have not stabilized; Stage 2, administered by the Department of Education, is for those CalWORKs families with stable work activities and for families who are transitioning off aid, for up to two years; and Stage 3, also administered by the Department of Education, is reserved for families who have successfully transitioned off aid for more than two years and still have a child care need.

The current subsidized child care system is fragmented by design. As discussed in the Health and Human Services Chapter, the Department of Social Services will convene a stakeholder group to assess the current structure of opportunities for streamlining and other improvements.

Significant adjustments:

- Child Care and Development Programs—The significant workload adjustments for these programs are as follows:
    - Stage 2—A decrease of $21 million non-Proposition 98 General Fund in 2013-14, primarily to reflect a decline in the number of eligible CalWORKs Stage 2 beneficiaries. In 2010-11, approximately 6,000 children were determined eligible for diversion services in Stage 2. Currently, these children and their eligible families are re-entering Stage 3 in 2012-13, and this population trend will persist into 2013-14. Total base cost for Stage 2 is $398.3 million.
    - Stage 3—An increase of $24.2 million non-Proposition 98 General Fund in 2013-14 primarily to reflect the transfer of approximately 6,000 children from Stage 2 to Stage 3. Total base cost for Stage 3 is $172.6 million.
    - Child Care and Development Funds—A net decrease of $9.8 million federal funds in 2013-14 to reflect removal of one-time carryover funds available in 2012-13 ($20.7 million), an increase of $16.8 million in one-time carryover funds, and a decrease of $5.9 million in available base grant funds.

Higher Education

Each year, millions of Californians pursue degrees and certificates and enroll in courses to improve their knowledge and skills at the state's higher education institutions. More are connected to the system as employees, contractors, patients, and community members. California's system of higher education consists of three segments. Drawing from the top 12.5 percent of the state's high school graduates, the University of California (UC) educates approximately 239,500 undergraduate and graduate students and is the primary institution authorized to independently award doctoral degrees and professional degrees. Drawing students from the top one-third of the state's high school graduates, the California State University (CSU) provides undergraduate and graduate instruction to approximately 410,300 students. The California Community Colleges are publicly supported local educational agencies that provide open-access educational and vocational programs to approximately 2.4 million students. The state also provides financial aid to students attending all institutions of public and private postsecondary education through the Cal Grant program. Over 99,000 students received new Cal Grant awards, and over 150,000 students received renewal awards, in 2011-12.

Beginning with the Master Plan in 1960, California's approach to higher education has been to heavily subsidize the public segments and keep costs low for university students (and even lower for community college students). California's higher education system is relatively affordable to students because of California taxpayers' investment in that system. California institutions have some of the lowest published tuition and fee levels in the country. In addition to providing direct support to the higher education

system, California fully reimburses all UC, CSU and community college tuition and fee costs for students with family incomes below $96,000 through the Cal Grant and the California Community Colleges Board of Governors Fee Waiver programs. In total, California taxpayers provide approximately $13 billion of annual General Fund support to California's higher education system through a combination of general-purpose, categorical program, and Cal Grant Program funding.

As a result of the taxpayers' investment in higher education, California public college and university graduates carry some of the lowest student loan debt burdens when compared to graduates from other states. California students in public and non-profit colleges rank 46th in student debt levels—half of California undergraduates have student debt, averaging $18,800, compared to two-thirds of graduates nationally, averaging $26,600.

The recent economic downturn and resulting shortfalls in state revenues required reductions in the state's subsidies of public higher education. During this period of fiscal constraints, state and local public agencies throughout California reexamined their cost structures and refocused limited resources on the most essential functions. UC and CSU pursued administrative efficiencies that have yielded from the low-to-mid hundreds of millions of dollars of savings for each segment. However, from 2007-08 to 2012-13, when other public agencies were retrenching, UC expenditures increased by 15 percent and CSU expenditures increased by 3 percent. These expenditure increases were funded by approximately $1.4 billion in tuition revenue increases at UC and $1 billion at CSU, a near doubling of tuition and fees from 2007-08 to the present. Specifically, UC's tuition and fees increased by $5,556 over that period. CSU's tuition and fees increased by $2,700 over that same period (see Figure HED-01). These rapid tuition increases have been a significant hardship for students and their families, particularly middle-income families who do not qualify for Cal Grants.

The rising cost of higher education not only threatens affordability, it also threatens the quality of California's system of higher education as it relies on a model that is not sustainable. Historically, California's public higher education institutions have led the world in terms of quality, innovation, and affordability for students. However, California is beginning to lose its lead in these areas in large part because of a higher education cost structure that continually increases without necessarily adding productivity or value. While this is a problem nationwide, California's higher education system is more expensive than other states' systems because (1) spending is very high in UC compared to other public research universities, and (2) completion and transfer rates are very low in CSU and the community colleges, resulting in great inefficiencies.

Figure HED-01
UC and CSU Expenditures and Undergraduate Tuition and Fees
(Dollars in Millions)

	2007-08	2008-09	2009-10	2010-11	2011-12	2012-13	2013-14 [4/]	Change from 2007-08 Dollars	Change from 2007-08 Percent

[1] The second round allocations of American Recovery and Reinvestment Act (ARRA) funding from the State Fiscal Stabilization Fund are shown in 2008-09 to more accurately reflect segmental expenditures between the two fiscal years and intent of federal law to backfill 2008-09 reductions.

[2] Total funds for UC and CSU include offsetting general purpose income, but exclude self-supporting functions such as auxiliary enterprises and extramural programs among others.

[3] Beginning in 2012-13, health benefits provided for CSU retired annuitants are included in CSU's main General Fund and Total Funds budget, rather than in the main statewide item for retired annuitant benefits, as reflected in Figure HED-02. However, for purposes of this figure, to compare 2007-08 to 2013-14 funding, these expenditures are not reflected in CSU's funding levels in 2012-13 or 2013-14.

[4] Beginning in 2013-14, the general obligation bond debt service payments are included in UC and CSU's main General Fund and Total Funds budgets. However, for purposes of this figure, to compare 2007-08 to 2013-14 funding, the GO bond debt service amounts are not reflected in the segments' 2013-14 expenditures.

UC and CSU have proposed budgets that call for increases in state funding of about 12 percent and 18 percent, respectively, from the preceding year. By comparison, over the past three years, personal income growth in California has averaged slightly less than 4 percent per year. California taxpayers cannot sustain institutions whose cost growth greatly outpaces the state's income growth. Furthermore, the rapidly growing numbers of college graduates who are unable to repay their student loans is an indication that these costs cannot be forever pushed onto students through tuition and fee increases.

Even while the California higher education system demands more funding, it produces transfer and completion rates that need improvement. Less than 30 percent of degree

seeking students at community colleges complete a degree, earn a certificate, or transfer within six years. For CSU, only 16 percent of students complete their degree within four years, and just 60 percent of students earn a degree in four years at UC. A significant obstacle to timely completion is the unavailability of courses. When students are turned away from courses, time to completion increases and students enroll in courses they do not need for their degree, generating excess costs to the student and the state, and crowding out other students in the process.

Until recently, the state has funded higher education based on enrollment targets. However, enrollment-based funding does not promote innovation and efficiency or improve graduation rates. It does not focus on critical outcomes—affordability, timely completion rates, and quality programs. Instead, it builds the existing institutional infrastructure, allowing public universities and colleges to continue to deliver education in the high-cost, traditional model.

Investing in Higher Education

The state must begin to reinvest to improve the quality and affordability of California's system of higher education. This investment is critical to provide all Californians—regardless of their financial circumstance—access to high-quality post-secondary instruction, improve educational attainment, and support civic engagement and critical thinking—thereby strengthening the foundation for sustainable growth. While continued state support of the Cal Grant program will maintain access for low-income families, additional state support for UC, CSU and community colleges alone will not be sufficient to stabilize tuition and fee costs for middle-income students or maintain the quality of these institutions. The UC, CSU and community colleges need to move aggressively to implement reforms to provide high-quality instruction at lower cost, decrease the time it takes to earn a degree, and increase graduation rates, by deploying their teaching resources more effectively.

There are many immediate demands for state funding. The Budget chooses to invest new, discretionary General Fund resources in higher education because the Administration believes that maintaining a quality, affordable system is critical to the future of the state. The Budget aims to enhance the quality of California's higher education institutions by making them more affordable, decreasing time to completion, improving overall completion rates in all higher education segments, and improving the transfer rate of community college students to four-year colleges and universities.

The Budget proposes total funding of $25.8 billion, reflecting an increase of $1.3 billion, or 5.3 percent, above 2012-13. The Budget proposes funding of $13.2 billion in General Fund and Proposition 98 related-sources reflecting an increase of $1.2 billion above 2012-13.

See Figure HED-02 for a summary comparison of individual institution funding totals reflecting the budget proposal and prior year appropriations.

Figure HED-02
Higher Education Expenditures
(Dollars in Millions)

General Fund	**$11,824.9**	**$11,970.1**	**$13,168.2**	**$1,198.1**	**10.0%**

[1/] UC, CSU, and CCC General Fund and Total Funds include general obligation bond debt service.

[2/] For purposes of this table, expenditures for the UC and CSU have been adjusted to include the offsetting general purpose income, but exclude self-supporting functions such as auxiliary enterprises and extramural programs among others. This provides consistency in comparing magnitudes and growth among the various segments of education.

[3/] Beginning in 2012-13, the health benefits provided for CSU retired annuitants are reflected in CSU's budget, rather than in the statewide total.

[4/] For purposes of comparing with UC and CSU General Fund, CCC includes property tax revenue as a component of the state's obligation under Proposition 98.

[5/] The Other Higher Education amount includes Hastings College of the Law, including Hastings' GO bond debt service, and the California Postsecondary Education Commission.

Multi-Year Stable Funding Plan

The state's General Fund contribution to UC, CSU, and Hastings will increase by 5 percent per year in 2013-14 and 2014-15 and by 4 percent in each of the subsequent two years. Community colleges funding will also increase by 5 percent in 2013-14. It is expected that community colleges funding will grow significantly over the next several years. All institutions will be expected to use these increases to implement reforms that will make available the courses students need and help them progress through college efficiently, using technology to deliver quality education to greater numbers of students in high-demand courses, improving course management and planning, using faculty more effectively, and increasing use of summer sessions. With savings achieved in this way, in combination with the General Fund increases and realizing the savings of current efficiency efforts (e.g. UC's Working Smarter Initiative and CSU's Systemwide Administrative Efficiencies), the Administration expects the colleges and universities to maintain current tuition and fee levels over the next four years. The Administration will continue to engage UC, CSU, and community colleges administration, faculty, staff, and students in this effort to maintain the quality of education at these institutions while, at the same time, controlling costs and preventing further increases in tuition and student fees for motivated and focused students.

Expand the Delivery of Courses through Technology

The Budget provides $16.9 million to the community colleges to increase the number of courses available to matriculated undergraduates through the use of technology. The focus should be on the courses that have the highest demand, fill quickly, and are prerequisites for many different degrees. Priority will be given to development of courses that can serve greater numbers of students while providing equal or better learning experiences, but only if those courses are aimed at advanced students who are likely to succeed in these types of courses. This initiative will include three key elements: (1) the creation of a "virtual campus" to increase statewide student access to 250 new courses delivered through technology, (2) the creation of a single, common, and centralized delivery and support infrastructure for all courses delivered through technology and for all colleges, and (3) the expansion of options for students to access instruction in other environments and earn college credit for demonstrated knowledge and skills through credit by exam.

In addition, the Budget provides UC and CSU $10 million each to increase the number of courses available to matriculated undergraduates through the use of technology,

specifically those courses that have the highest demand, fill quickly, and are prerequisites for many different degrees. Priority will be given to the development of courses that can serve greater numbers of students while providing equal or better learning experiences.

Student Success

The plan provides annual General Fund augmentations and expects each institution to direct those funds to the achievement of the following priorities: improvements in time-to-completion, improvements in graduation and completion rates in all segments, increases in transfer students enrolled at CSU and UC, and successful credit and basic skills course completion. Not all students matriculating in higher education have the common goal to earn a degree in four years. Both CSU and community colleges have significant populations of students who are earning their degrees or certificates on a part-time basis (e.g. full-time employment and family commitments). Higher education systems should provide all students the opportunity to access the courses needed to complete their degrees or certificates within the students' intended timelines. This applies to students whether they complete their undergraduate coursework in a traditional four-year period or over a longer timeframe.

Student Incentives

To shorten students' time-to-degree, reduce costs for students and the state, and increase access to more courses for other students, the number of units students can take while receiving a state General Fund subsidy at any of the segments will be capped.

- For UC and CSU, in the first two years of the proposal, students will be allowed to accrue no more than 150 percent of the standard units needed to complete most degrees (270 quarterly units at UC and 180 semester units at CSU); in later years, students will be allowed to accrue units equivalent to no more than about one additional year of coursework (225 units at UC and 150 units at CSU). If students enroll in courses that exceed these unit caps, students will be required to pay the full cost of instruction. However, the universities may grant case-by-case waivers to students who exceed the cap due to factors beyond their control, allowing them to continue to pay the subsidized tuition level. The universities would not receive any additional state funding for these students.

- For community colleges, students will be allowed to take no more than 90 semester credit units (150 percent of the standard 60 semester credit units required to earn an associate's degree or credits for transfer) starting in 2013-14. If students enroll in credit courses that exceed these unit caps, students will be required to pay the full cost of instruction. Community colleges may grant case-by-case waivers to students who exceed the cap due to factors beyond their control, allowing them to continue to pay the subsidized tuition level. However, the community colleges will not receive any state funding for these students.

This policy will encourage students to identify an educational goal and reach it in a timely and efficient way, focusing on the courses necessary to complete their educational goals, while still allowing for some exploration of other subject areas.

University of California

Drawing from the top 12.5 percent of the state's high school graduates, the University of California (UC) educates approximately 239,500 undergraduate and graduate students at its ten campuses and is the primary institution authorized to independently award doctoral degrees and professional degrees in law, medicine, business, dentistry, veterinary medicine, and other programs. UC manages one U.S. Department of Energy national laboratory, partners with private industry to manage two others, and operates five medical centers that support the clinical teaching programs of UC's medical and health sciences schools that handle more than 3.9 million patient visits each year.

Significant Adjustments:

- General Fund Increase—As discussed above, an ongoing increase of $125.1 million General Fund for core instructional costs. This includes the $10 million to increase the number of courses available to matriculated undergraduates through the use of technology. This funding should obviate the need for UC to increase student tuition and fees and can be used by the university to meet its most pressing needs. This increase is in addition to the $125 million General Fund that UC will receive in 2013-14 for not increasing tuition and fees in 2012-13, as required by the 2012 Budget Act.
- Debt Service Costs—Currently, the state separately funds general obligation and lease revenue debt service for UC capital improvement projects. The Budget proposes to shift these appropriations into UC's budget, which will require UC to factor these costs into the university's overall fiscal outlook and

decision-making process. Any new UC capital expenditures will be subject to approval by the Administration to ensure the funds are used for academic facilities to address seismic and life safety needs, enrollment growth, modernization, or for cogeneration and energy conservation projects. Further, there will be limits on the amount of the budget that can be spent on capital expenditures. If UC elects to restructure its debt as a result of this proposal, it is expected that it will make resources available for instruction.

California State University

Drawing students from the top one-third of the state's high school graduates, the California State University (CSU) provides undergraduate and graduate instruction through master's degrees and independently awards doctoral degrees in education, nursing practice, and physical therapy, or jointly with UC or private institutions in other fields of study. With 23 campuses and approximately 410,300 students, CSU is the largest and most diverse university system in the country. CSU plays a critical role in preparing the workforce of California; it grants more than one-half of the state's bachelor's degrees and one-third of the state's master's degrees. CSU prepares more graduates in business, engineering, agriculture, communications, health, and public administration than any other California institution of higher education. It also produces over 50 percent of California's teachers.

Significant Adjustments:

- General Fund Increase—As discussed above, an ongoing increase of $125.1 million General Fund for core instructional costs. This includes the $10 million to increase the number of courses available to matriculated undergraduates through the use of technology. This funding should obviate the need for CSU to increase student tuition and fees and can be used by the university to meet its most pressing needs. This increase is in addition to the $125 million General Fund that CSU will receive in 2013-14 for not increasing tuition and fees in 2012-13, as required by the 2012 Budget Act.
- Debt Service and Retirement Contribution Costs—Currently, the state separately funds general obligation and lease revenue debt service for CSU capital improvement projects. The state also annually adjusts funding for CSU's retirement obligations. The Budget proposes to fold debt service appropriations into CSU's budget. Any new CSU capital expenditures will be subject to approval by

the Administration to ensure the funds are used for academic facilities to address seismic and life safety needs, enrollment growth, or modernization. Further, there will be limits on the amount of the budget that can be spent on capital expenditures. The Budget also proposes that the state continue to fund retirement contributions for CSU employees, based on the number of 2012-13 employees. If CSU chooses to add employees or increase wages beyond 2012-13 levels, CSU will be responsible for the associated costs. These two changes will require CSU to factor these costs into the university's overall fiscal outlook and decision-making process.

- Provide CSU the Authority to Negotiate and Set Employee Health Benefit Rates with Represented and Non-Represented Employees—CSU will be provided the same statutory authority to negotiate or set employee health care benefit rates that is provided to the California Department of Human Resources for other state employees. Currently, CSU pays 100 percent of the health care premiums for its employees and 90 percent for employees' family members. However, for most other state employees, the state pays either 80 or 85 percent of employees' health care premiums and 80 percent for family members. This proposal will provide CSU a tool to better manage and negotiate the entirety of its personnel costs.

California Community Colleges

The California Community Colleges are publicly supported local educational agencies that provide educational, vocational, and transfer programs to approximately 2.4 million students. The California Community College system is the largest system of higher education in the world, with 72 districts, 112 campuses, and 70 educational centers. In addition to providing education, training, and services, the community colleges contribute to continuous workforce improvement. The community colleges also provide remedial instruction for hundreds of thousands of adults across the state through basic skills courses and adult non-credit instruction.

Significant Adjustments:

- Expand the Delivery of Courses through Technology—As discussed above, an augmentation of $16.9 million to increase the number of courses available to matriculated undergraduates through the use of technology.
- Reforms to Census Accounting Practices—Currently, community colleges are provided state funding based on the number of students enrolled at the 20-percent mark of the term. Under this construct, the fiscal incentives for

community colleges are to enroll students and not to ensure that students complete the term. When students withdraw after the 20-percent mark, the state is unnecessarily paying community colleges for students who are no longer in class. Enrollment-based funding lacks incentives for the colleges to focus on critical outcomes—affordability, timely completion rates, and quality programs. This proposal will more appropriately apportion funding by focusing on completion at the end of the term, as opposed to counting attendance at the early weeks of the term. It will be phased in over several years to help colleges adjust their policies and practices in a way that encourages appropriate student placement and good course management. This proposal will reinvest savings into higher apportionment rates for students that complete their courses and for student support services in those communities with higher non-completion rates.

- Board of Governor's Fee Waiver Program Reform—The Board of Governor Fee Waiver program provides hundreds of millions of state financial aid dollars annually to community colleges and their students. Approximately 60 percent of all credit course fees are waived annually by the community colleges, and the state backfills this lost community college revenue source with state funds. The fee system is designed to charge fees to those who can afford to pay them and provide waivers to students who need them. The current fee waiver program provides financial aid to students with limited verification of financial need. To ensure that only financially needy students are determined eligible for the fee waiver program and to ensure program integrity, students seeking financial aid will be required to fill out a Free Application for Federal Student Aid and include both parent and student income when determining fee waiver eligibility. Any savings that result will be reinvested to further increase course offerings and student services and allow students to move through the system more quickly. Additionally, this proposal will generate additional federal financial aid resources for students and colleges.

- Adult Education Realignment—As referenced in the K Thru 12 Education Chapter, K-12 school districts and community colleges are both currently authorized to provide adult education instruction. However, there is no statewide requirement or mechanism to coordinate the efforts of these two systems. As a result, the state has an inefficient and redundant system that is not always structured in the best interest of adult learners. Further, funding for the K-12 adult education program is currently flexible and available for any educational purpose. Many districts are eliminating their programs and redirecting this funding to support their core instructional programs.

- To create a more accountable and centralized adult education learning structure, the Budget proposes $315.7 million Proposition 98 General Fund to fund a comparable K-12 adult education service delivery system. It proposes an increase of $300 million to support the program within the community colleges. It also shifts $15.7 million and the responsibility for the Apprenticeship Program from school districts to the community colleges. The proposal eliminates the current bifurcated system and places community colleges in a position to improve coordination at the regional and statewide levels. Community colleges are better positioned to address the needs of adult learners because that is their core function. However, the colleges will be encouraged to leverage the capacity and expertise currently available at the K-12 district adult schools.
- Funding for adult education will be allocated from a new block grant based on the number of students served and only for core instructional areas such as vocational education, English as a Second Language, elementary and secondary education, and citizenship. This proposal will refocus apportionments away from non-mission areas and reinvest savings for additional courses in mission areas such as basic skills and workforce training. If community colleges offer non-mission courses, students will be required to pay the full cost of instruction. The funding level will be reassessed in the future based on program participation and effectiveness.

- Clean Energy Efficiency Projects—An increase of $49.5 million Proposition 98 General Fund for community colleges to undertake clean energy efficiency projects. Like school districts, community colleges are well positioned to undertake projects that reduce their current utility requirements and expand the use of renewable energy resources. Moreover, community colleges are in the unique position to make a substantial energy efficiency imprint throughout the state in terms of their scope (112 colleges and their related facilities) and emphasis on employment training. As a result, the Budget proposes to allocate all Proposition 39, the California Clean Energy Jobs Act, funding to schools and community colleges (see the K Thru 12 Education Chapter for further details on Proposition 39). Community colleges can use the funds to expand career technical educational training and on-the-job work experience training in partnership with the California Conservation Corps and participating community conservation corps programs.
- Deferrals—At the beginning of 2011-12, the state had accumulated $961 million of deferral debt owed to community colleges. The state successfully reduced the deferral balance to $801 million in 2012-13 and the Budget will reduce that balance

to $622 million through an increase of $179 million Proposition 98 General Fund in 2013-14. This funding is consistent with, and proportional to, the payment of deferred funding in K-12 education. The increase will reduce the substantial borrowing costs borne by the community colleges as a result of funding deferrals. Every dollar that colleges must now spend on borrowing is a dollar taken out of the classroom.

- Apportionments—An increase of $196.9 million Proposition 98 General Fund to base apportionments. This represents a 3.6-percent increase to general purpose community college funding.
- Property Tax Adjustment—An increase of $133.2 million Proposition 98 General Fund in 2013-14 to reflect reduced property tax estimates. Current law intends that property taxes offset Proposition 98 General Fund costs for community college apportionments. Because property taxes are estimated to decline, General Fund costs are increased by a like amount. Additionally, the Budget includes an increase of $47.8 million Proposition 98 General Fund for 2012-13 to offset lower-than-anticipated property tax revenues from the elimination of redevelopment agencies.
- Student Fee Adjustment—A decrease of $12.6 million Proposition 98 General Fund to reflect revised estimates of student fee revenue, primarily resulting from lower-than-anticipated Board of Governors' fee waivers. Similar to property taxes, student fees are intended to offset the costs of apportionments.

Hastings College of the Law

Affiliated with the University of California, the Hastings College of the Law is the oldest and one of the largest public law schools in the West, providing instruction annually to approximately 1,100 students.

Significant Adjustments:

- General Fund Increase—An ongoing increase of $392,000 General Fund for core instructional costs. This funding will mitigate the need for Hastings to increase student tuition and fees and can be used by the college to meet its most pressing needs.
- Debt Service Costs—Currently, the state separately funds general obligation debt service for Hastings. The Budget proposes to shift these appropriations into

Hastings' budget, which will require the college to factor these costs into its overall fiscal outlook and decision-making process.

California Student Aid Commission

The California Student Aid Commission administers state financial aid to students attending all institutions of public and private postsecondary education through a variety of programs including the Cal Grant High School and Community College Transfer Entitlement programs, the Competitive Cal Grant program, and the Assumption Program of Loans for Education. Over 99,000 students received new Cal Grant awards, and over 150,000 students received renewal awards in 2011-12. These programs are a key way in which the state supports the public higher education infrastructure and does so to make college more affordable to the state's lower-income students.

Prior to 2001, the program offered a capped number of awards to students and award amounts were specified in the Budget. The program is now an entitlement and has been one of the fastest growing programs in the Budget. Costs for the program have increased dramatically due to an increased number of students participating in the program and UC and CSU tuition and fee increases in recent years. Over an eight-year period, participation in the program and costs have increased by 79,000 students and $915 million, from 177,000 students and $688 million in 2004-05 to an estimated 288,000 students and $1.7 billion in 2013-14. Absent tuition and fee increases at UC and CSU, the rate of growth in the program is expected to slow somewhat in future years.

The Cal Grant program is one of the most generous entitlement financial aid programs in the country. Only New York, Pennsylvania, Illinois, and Texas have need-based student financial aid programs comparable in size to California.

Significant Adjustments:

- Offset Cal Grant Costs with Federal Temporary Assistance for Needy Families (TANF) Reimbursements—A decrease of $139.2 million General Fund in 2013-14 to reflect increased TANF funds available through an interagency agreement with the Department of Social Services. This adjustment will bring the total TANF funds expended on the Cal Grant program to $942.9 million in 2013-14.
- Cal Grant Program Growth—An increase of $61 million General Fund in 2012-13 and $161.1 million General Fund in 2013-14 to reflect increased participation in the

Cal Grant program. Of the 2013-14 amount, $19.5 million is attributable to the first year of implementation of the California Dream Act.

- Offset of Cal Grant Program Costs with Student Loan Operating Fund—An increase of $60 million Student Loan Operating Fund and an offsetting decrease of $60 million General Fund to support Cal Grant program costs.

Health Care Reform

Background

Enacted on March 23, 2010, the Affordable Care Act (ACA) increases access to private and public health care coverage through various programmatic, regulatory, and tax incentive mechanisms. Effective January 1, 2014, the ACA requires that health plans and insurers cover individuals regardless of their health status, cover a minimum set of services known as the Essential Health Benefits, and that generally all individuals obtain health care coverage or pay a penalty.

To expand coverage, the ACA provides for: (1) the health insurance exchange, a new marketplace in which individuals who do not have access to public coverage or affordable employer coverage can purchase insurance and access federal tax credits, and (2) two expansions of Medicaid—a mandatory expansion by simplifying rules affecting eligibility, enrollment, and retention; and an optional expansion to adults with incomes up to 138 percent of the federal poverty level (FPL).

Medi-Cal (California's Medicaid program) provides comprehensive health care services at no or low cost to approximately eight million low-income individuals including families with children, seniors, persons with disabilities, children in foster care, and pregnant women. The Medi-Cal caseload represents 21.7 percent of the state's total population. Eligibility for Medi-Cal varies depending on the coverage group, but most adults with incomes at or below 100 percent FPL are covered. Single, childless adults currently are not eligible for Medi-Cal unless they are disabled or aged. Today, many of

these adults not eligible for Medi-Cal receive services through county indigent health services programs.

Total spending from all sources on Medi-Cal is approximately $60 billion, about 27 percent of California's spending. The federal medical assistance percentage (FMAP) is the level of federal financial participation in the Medicaid program and varies by state. California's FMAP is 50 percent, below the national average of 57 percent. Despite the federal government funding only 50 percent of Medi-Cal costs, California covers a relatively greater share of its population through Medi-Cal than other large states or the national average.

The Medi-Cal program cost per case is lower than the national average. Total Medi-Cal costs have grown rapidly, generally between 7 and 11 percent annually during the last decade, due to a combination of health care inflation and caseload growth. Because costs are a function of the number of enrolled individuals, the level of benefits provided, and the rates paid to providers, efforts to control program costs have focused in these areas. While some cost control measures have been allowed, adverse court rulings have prevented the state from fully implementing various provider payment reductions or from providing services only to beneficiaries with the greatest need.

Under the ACA, the federal government promises to initially pay for 100 percent of the costs for newly eligible individuals with funding gradually decreasing to 90 percent by 2020. Other costs will be shared 50-50. California is awaiting guidance on the methodology for claiming federal funding for the expansion. This guidance is a critical factor in determining current and future General Fund obligations.

Private Insurance Market Reforms to Increase Access

Under the ACA, health plans and insurers offering products in the individual and small group markets cannot deny coverage for reasons like health status. This is known as "guaranteed issue". Individuals, with some exceptions, are required to obtain health care coverage—referred to as the "individual mandate". Health plans and insurers also cannot charge higher premiums based on health status or gender.

Health plans and insurers will be required to offer products in the individual and small group markets that provide coverage for ten Essential Health Benefits, similar to those of a typical employer plan. There will be multiple mechanisms to balance risk and protect plans against sick people being concentrated in particular plans (risk adjustment and reinsurance programs). Plans and insurers will be required to continue to spend a

majority of their resources on health care (known as the "medical loss ratio"); standardize coverage to facilitate comparisons of insurance products; standardize rating regions throughout the state; and narrow the range of premiums charged at different ages.

California has already adopted several private insurance market reforms contained in the ACA, including establishing Essential Health Benefits, allowing children up to age 26 to remain on their parents' insurance coverage, instituting guaranteed issue for children with pre-existing conditions, implementing rate review, and imposing medical loss ratio requirements on plans and insurers.

While every effort will be made to promote affordability, large rate increases in the individual insurance market are likely at the outset, due to the requirement to offer coverage to all individuals, provide a higher level of benefits, and due to a significant increase in enrollment which will increase demand for services.

California Health Benefit Exchange (Covered California)

Covered California is a new insurance marketplace that will offer an opportunity to purchase affordable health insurance using federally funded tax subsidies for millions of Californians with incomes up to 400 percent FPL. The open enrollment period will begin October 1, 2013 and coverage begins January 1, 2014. Covered California has many program elements focused on ensuring its premiums are as affordable as possible.

Under the ACA, there will be low-income individuals who will transition back and forth between Medi-Cal and private insurance. To allow these individuals to remain with the same insurance plan and provider network, and to maximize the opportunity for affordable coverage, the Administration, in partnership with Covered California, is proposing to establish a Medicaid Bridge Program. Covered California will negotiate contracts with Medi-Cal Managed Care Plans that have robust local safety net provider networks to offer a plan option with a very low or zero premium for those earning between 138 percent and 200 percent FPL.

Mandatory Medicaid Expansion

The ACA requires a Medicaid expansion to currently eligible populations through eligibility and enrollment simplifications. Currently, Medicaid eligibility is based on several factors, including linkage to a specific coverage group, income eligibility (including allowable deductions), assets, residency status, and citizenship status. Major changes include the following:

- Establishing a new standard for determining income eligibility, based on Modified Adjusted Gross Income (MAGI), consistent with the standard used to determine eligibility for premium tax credits.
- Eliminating the asset test for individuals whose eligibility determination is based on MAGI.
- Conducting an "ex parte" review when making a redetermination of eligibility. Redeterminations must be made based on available information with a primary reliance on electronic data. The number of individuals who currently lose eligibility at the time of renewal is estimated to be in the range of 20 percent to 35 percent. While many of these individuals re-enroll in the program, under these changes, they would remain in the program for a longer period of time.

Due to a number of factors, including the requirement that most individuals obtain coverage, enrollment and eligibility simplifications, and marketing and outreach activities, Medi-Cal enrollment will increase.

The Budget includes $350 million General Fund as a placeholder for the costs of the mandatory expansion until a more refined estimate can be developed. Given the outstanding federal guidance, the sheer number of changes, and the interactions between the various policies, developing a more refined estimate will take additional time. As a point of comparison, the state has experienced a significant increase in General Fund costs related to similar eligibility and enrollment simplifications, such as de-linking Medi-Cal eligibility from CalWORKs, allowing individuals who work more than 100 hours to qualify for Medi-Cal services, and eliminating reporting requirements.

Medi-Cal "Bridge to Reform" Waiver

The state initiated an early "Bridge to Reform" Medi-Cal expansion by enacting the Low Income Health Program (LIHP) under a federal waiver in 2010. The waiver permits counties to provide a Medicaid-like expansion to individuals with incomes up to 138 percent FPL through 2013. The purpose of the LIHP is to expand health care coverage to low-income adults prior to the effective date of the ACA. The LIHP is a voluntary, county-run program that is financed with 50 percent county and 50 percent federal funds. Currently, 17 LIHPs are operational and provide coverage to approximately 500,000 individuals in 51 counties. Of the remaining counties, four intend to start programs. Three have opted to not run LIHPs—Fresno, Merced, and San Luis Obispo. This early expansion has resulted in substantial savings for

participating counties by providing new federal funding for costs that were previously borne exclusively by counties.

The LIHPs structure and administer their programs differently—through a consortium of counties or through county health departments. The LIHP expansion contained waivers of several Medicaid requirements, allowing enrollment caps, limited networks mainly based on county-operated providers, and other requirements to limit county obligations.

Implementing the Optional Expansion

California has been and will continue to be a leader in the implementation of federal health care reform, building on the early establishment of the Exchange and the early expansion to adults through the Bridge to Reform waiver. As described below, the Budget outlines two alternatives to the optional expansion—a state-based approach or a county-based approach. Each approach has its own set of strengths, challenges, risks, and benefits. Expansion of health care under either approach will have a substantive effect on both state and county finances for the foreseeable future.

Increased coverage will generate substantial savings for the counties which pay for care for adults who are not currently eligible for Medi-Cal through their local indigent health care services programs. Counties currently meet this responsibility by operating facilities—hospitals and clinics—and/or by contracting with private providers. The state provides funding from the 1991 health realignment to partially fund these costs. To receive these funds, counties also have a required maintenance of effort to spend their own county funding. Currently, counties are spending between $3 billion and $4 billion annually on health care costs, though spending varies significantly by county. Counties that own and operate hospitals also use local funds to fund the non-federal share of the Medi-Cal program for inpatient Medi-Cal services provided in their facilities.

Implementing federal health care reform will require an assessment of how much funding currently spent by counties should be redirected to pay for the shift in health care costs to the state. The state will also need to consider how these changes would impact remaining county obligations to provide care to those individuals who remain uninsured, as well as public health programs. As such, the implementation of health care reform will require a broader discussion about the future of the state-county relationship with the goal to strengthen local flexibility, fairly allocate risk, and clearly delineate the respective responsibilities of the state and the counties.

State-Based Expansion

A state-based Medicaid expansion would build upon the existing state-administered Medicaid program and managed care delivery system. The state would offer a standardized, statewide benefit package comparable to that available today in Medi-Cal, but would exclude long-term care coverage.

This option would require a discussion with the counties around the appropriate state and local relationship in the funding and delivery of health care, and what additional programs the counties should be responsible for if the state assumes the majority of health care costs. To finance the expansion, the state would need to capture county savings and continue to use those funds to pay for health care coverage for this previously medically indigent population. The counties would assume programmatic and fiscal responsibility for various human services programs, including subsidized child care.

County-Based Expansion

A county-based expansion of Medicaid would build upon the existing Low Income Health Program. Counties would maintain their current responsibilities for indigent health care services. Under this option, counties would meet statewide eligibility requirements, and a statewide minimum in health benefits consistent with benefits offered through Covered California. Counties could offer additional benefits, except for long-term care.

Under a county-operated Medicaid expansion, the counties would act as the fiscal and operational entity responsible for the expansion. Counties would build upon their existing LIHP and/or county indigent health care services programs as the basis for operating the Medicaid expansion.

The key operational and fiscal responsibilities of the counties in designing and running such a Medicaid expansion would include developing provider networks, setting rates, and processing claims. As was the case when implementing LIHP, implementation of this option would require approval of waivers of specified federal requirements.

Outstanding Issues

There are several key aspects of ACA implementation for which federal guidance has not yet been issued. The most significant is the methodology for claiming enhanced federal funding. Guidance is also required with respect to the scope of benefits that

will be required for individuals covered under the optional expansion. In addition, while Medicaid was exempted from the federal Budget Control Act sequester, it is possible that federal funding for Medicaid could be affected by comprehensive budget deficit reduction in the future.

This page intentionally blank to facilitate double-sided printing.

Health and Human Services

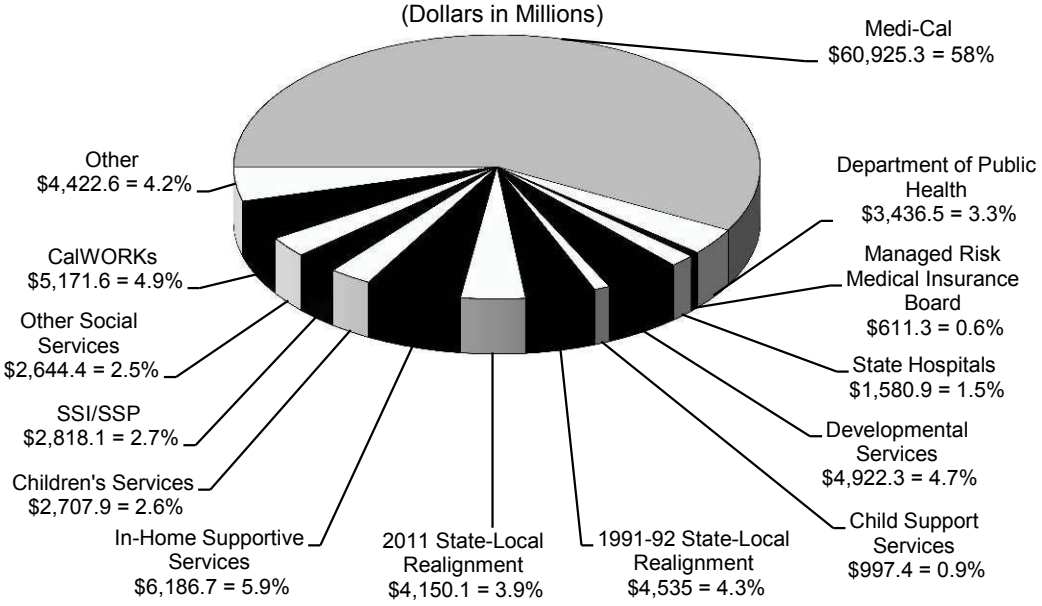
The Health and Human Services Agency oversees departments and other state entities such as boards, commissions, councils, and offices that provide health and social services to California's vulnerable and at-risk residents. The Budget includes $105.1 billion ($28.4 billion General Fund and $76.7 billion other funds) for these programs. Figure HHS-01 displays expenditures for each major program area and Figure HHS-02 displays program caseload.

Information on California's implementation of the Affordable Care Act is included in the Health Care Reform Chapter.

Agency Reorganization

The Budget transfers all substance use disorder programs from the Department of Alcohol and Drug Programs (DADP) to the Department of Health Care Services (DHCS) to better coordinate the licensing, certification, and program management of substance use disorders services statewide. Among other benefits, this reorganization maintains programmatic expertise, enhances oversight, and promotes opportunities for health care delivery improvement. DADP's Office of Problem Gambling will be transferred to the Department of Public Health. The Budget also transfers mental health licensing and quality improvement functions from the Department of Social Services to DHCS to further consolidate and streamline licensing and certification functions for these programs within a single department.

Figure HHS-01
Health and Human Services Proposed 2013-14 Funding[/1]
All Funds
(Dollars in Millions)



[/1] Totals $105,110.1 million for support, local assistance, and capital outlay. This figure includes reimbursements of $9,898.4 million and excludes $5.6 million in Proposition 98 funding in the Department of Developmental Services budget and county funds that do not flow through the state budget.

DEPARTMENT OF HEALTH CARE SERVICES

Medi-Cal, California's Medicaid program, is administered by DHCS. Medi-Cal is a public health insurance program that provides comprehensive health care services at no or low cost for low-income individuals including families with children, seniors, persons with disabilities, children in foster care, and pregnant women. The federal government mandates basic services including physician services, family nurse practitioner services, nursing facility services, hospital inpatient and outpatient services, laboratory and radiology services, family planning, and early and periodic screening, diagnosis, and treatment services for children. In addition to these mandatory services, the state provides optional benefits such as outpatient drugs, home and community-based services, and medical equipment. DHCS also operates the California Children's Services program, the Primary and Rural Health program, and oversees county operated community mental health programs.

Since 2006-07, total Medi-Cal benefit costs grew 10.6 percent annually (approximately $3.8 billion per year) to $55.9 billion in 2012-13 because of a combination of health care

Figure HHS-02

Major Health and Human Services Program Caseloads

	2012-13 Revised	2013-14 Estimate	Change
Medi-Cal enrollees	8,195,000	8,678,300	483,300
Healthy Families Program [a]	200,464	4,002	-196,462
California Children's Services (CCS) [b]	35,801	19,643	-16,158
CalWORKs	563,505	572,133	8,628
Non cash-assistance CalFresh households	1,603,911	1,829,310	225,399
SSI/SSP (support for aged, blind, and disabled)	1,291,022	1,308,026	17,004
Child Welfare Services [c]	138,590	136,973	-1,617
Foster Care	43,522	40,030	-3,492
Adoption Assistance	85,580	86,494	914

Vocational Rehabilitation	28,318	28,318	0

[a] Current year represents the year-end population. Budget year represents the remaining average monthly caseload not included in Medi-Cal.

[b] Represents unduplicated quarterly caseload in the CCS Program. Does not include Medi-Cal CCS clients.

[c] Represents Emergency Response, Family Maintenance, Family Reunification, and Permanent Placement service areas on a monthly basis. Due to transfers between each service area, cases may be reflected in more than one services area.

[d] Represents average in-center population.

[e] Represents the year-end population. Includes population at Vacaville and Salinas Valley Psychiatric Programs, and the California Health Care Facility - Stockton.

[f] Represents Drug Medi-Cal Clients.

cost inflation, rate increases, and caseload growth. Medi-Cal General Fund spending is projected to increase 3.9 percent from $15 billion General Fund in 2012-13 to $15.6 billion General Fund in 2013-14 because of enacted and proposed program changes. Absent these changes, costs would grow by 8.3 percent to $16.3 billion General Fund. Growth in Medi-Cal General Fund expenditures has been reduced through cost shifting to other funding sources, including the Gross Premium Tax (first authorized in 2009-10), Hospital Quality Assurance Fee (first authorized in 2011-12), and Medicaid waivers that allow claiming of federal funds for state-only health care costs.

The Budget assumes caseload will increase approximately 5.9 percent from 2012-13 to 2013-14 (from 8.2 million to 8.7 million), largely because of the shift of children from Healthy Families to Medi-Cal. Caseload would increase by 1.2 percent absent

the shift. Base caseload growth is slightly higher than the 1-percent growth rate of the total California population over the same period. The Medi-Cal caseload represents approximately 21.7 percent of the state's total population. The implementation of federal health care reform will further increase Medi-Cal program caseload.

The Federal Medical Assistance Percentage (FMAP) determines the level of federal financial support for the Medi-Cal program. With the exception of temporary increases, California has had a federal medical assistance percentage of 50 percent (the minimum percentage authorized under federal law) since the inception of the Medicaid program in 1965. California's percentage is lower than the national average and is lower than those of neighboring states. Oregon, Nevada, and Arizona currently have percentages of 62 percent, 60 percent, and 66 percent, respectively. The state's percentage is also substantially lower than Mississippi's 73 percent federal medical assistance percentage, currently the highest in the country.

The Medi-Cal program cost per case is lower than the national average. California's cost per case of $4,539 in 2012-13 is substantially lower than other low FMAP states, such as Massachusetts ($7,579) and New York ($8,960), according to data from federal fiscal year 2009.

California is relatively generous in its eligibility rules compared with other states. Parents are typically eligible for full scope benefits at 100 percent of the federal poverty level (FPL) which is 15th highest in the nation, 185 percent of FPL for pregnant women which is 8th highest in the nation, and 100 percent of FPL for non-working disabled beneficiaries, which is 7th highest in the nation.

Significant program developments have affected both costs and caseload in recent years including:

- Expansion of Medi-Cal Managed Care into counties formerly operating under the fee-for-service model, including the expansion of managed care into rural counties.
- Shifting Children from Healthy Families to Medi-Cal. Approximately 860,000 children began transitioning to the Medi-Cal program January 1, 2013. The state will continue to utilize the Children's Health Insurance Program federal match of 65 percent for the Healthy Families caseload within the Medi-Cal program.
- Expansion of Medi-Cal Managed Care to seniors and persons with disabilities formerly covered under the fee-for-service model. Approximately 380,000 beneficiaries have transitioned.

- Provider rate reductions enacted through Chapter 3, Statutes of 2011 (AB 97). These reductions will result in General Fund savings of $488.4 million in 2013-14.
- The Coordinated Care Initiative (CCI) was authorized by Chapter 33, Statutes of 2012 (SB 1008) and Chapter 45, Statutes of 2012 (SB 1036). CCI will better coordinate the care of 560,000 Medi-Cal and Medicare dual eligible beneficiaries from fee-for-service to managed care beginning in 2013-14. Please see below for additional information on the CCI.

Significant Adjustments:

- Hospital Quality Assurance Fee Extension—A savings of $310 million General Fund in 2013-14 as a result of extending the hospital fee, which will sunset on December 31, 2013. The fee provides funds for supplemental payments to hospitals and also provides some funding to offset the costs of health care coverage for children.
- Gross Premiums Tax—The Budget proposes to reauthorize the Gross Premiums Tax on Medi-Cal managed care plans permanently. Continuing the tax will generate General Fund savings of $85.9 million in 2012-13 (included in the Managed Risk Medical Insurance Board budget) and $217.3 million in 2013-14.
- Managed Care Efficiencies—A decrease of $135 million General Fund in 2013-14 as a result of implementing additional efficiencies in managed care. DHCS is looking for new ways to improve the quality and efficiency of the health care delivery system and develop payment systems that promote quality, not quantity, of care and improve health outcomes.
- Annual Open Enrollment—A decrease of $1 million General Fund in 2013-14 and ongoing as a result of having beneficiaries select their Medi-Cal health plan each year and receive care through that health plan for the entire year. This open enrollment process will align Medi-Cal with the industry best practice of other third-party health benefit payers.
- Coordinated Care Initiative—Under the CCI, persons eligible for both Medicare and Medi-Cal (dual eligibles) will receive medical, behavioral health, long-term supports and services, and home and community-based services coordinated through a single health plan. The CCI will also enroll all dual eligibles in managed care plans for their Medi-Cal benefits. Dual eligibles will enroll in the CCI in specified counties participating in the demonstration.

The following changes have occurred to the structure of the CCI since enactment of the 2012 Budget Act:

- The Budget has been revised to reflect the size and scope of the demonstration as enacted. The Budget reflects the population participating in the demonstration and accounts for individuals excluded from the program by statute including beneficiaries enrolled in the Developmentally Disabled waiver, beneficiaries enrolled in a Kaiser Plan, and beneficiaries with other health coverage.
- The Budget changes the scheduled phasing for beneficiaries enrolling in the CCI. Beneficiaries in participating counties will enroll for their Medi-Cal benefits beginning in September 2013. Los Angeles County will phase-in beneficiaries over 18 months. San Mateo County will enroll all beneficiaries at once. Orange, San Diego, San Bernardino, Riverside, Alameda, and Santa Clara counties will phase-in over 12 months. The 2012 Budget Act assumed beneficiaries in all counties would phase into the CCI over a 12-month period beginning in March 2013.
- The Budget projects revised General Fund savings for the CCI of $170.7 million in 2013-14. Savings are projected to grow to $523.3 million General Fund annually. DHCS is working to reach agreement with the federal government on a shared savings methodology to achieve the budgeted savings. Statutory changes will be needed to reflect the aforementioned changes and the agreement with the federal government.

Managed Risk Medical Insurance Board

The Managed Risk Medical Insurance Board (MRMIB) currently administers five programs that provide health coverage through commercial health plans, local initiatives, and county organized health systems to eligible individuals who do not have health insurance. Two of those programs will continue to be administered by MRMIB: the Access for Infants and Mothers Program, which provides comprehensive health care to pregnant women, and the County Health Initiative Matching Fund Program, which provides comprehensive health benefits through county-sponsored insurance programs.

Of the three remaining programs, the Healthy Families Program (HFP), which provides comprehensive health benefits to children, began transitioning beneficiaries to Medi-Cal on January 1, 2013. The Managed Risk Medical Insurance Program and the Pre-Existing Condition Insurance Program, health coverage programs for individuals with pre-existing

conditions, will phase-out with the implementation of the federal Affordable Care Act in 2014.

The Budget includes $611.3 million ($21.7 million General Fund) for MRMIB, a decrease of $143.9 million General Fund from the Budget Act of 2012. This significant decrease is primarily due to the transition of HFP beneficiaries to Medi-Cal.

Department of Public Health

The Department of Public Health (DPH) is charged with protecting and promoting the health status of Californians through programs and policies that use population-wide interventions. Funding for 2012-13 is $3.5 billion ($130.6 million General Fund), and proposed funding for 2013-14 is $3.4 billion ($114.5 million General Fund).

Significant Adjustments:

- Zero-Base Budget Review—Executive Order B-13-11 directs the Department of Finance to modify the state budget process to increase efficiency and focus on accomplishing program goals. Pursuant to this Executive Order, DPH has begun the process of implementing zero-base budgeting for its contracting activities, the Baby BIG program, and the Women, Infants and Children program. Initial findings from these efforts will be provided in the spring of 2013. This represents the first phase of implementing zero-base budgeting throughout the Department.
- AIDS Drug Assistance Program (ADAP)—The ADAP provides uninsured and under-insured people living with HIV and AIDS access to medication. Californians over 18 years of age whose income does not exceed $50,000 annually are eligible for the program. In January 2012, the program began screening and transitioning eligible ADAP clients to county Low-Income Health Programs (LIHPs). Caseload is projected to decrease by 8 percent and expenditures by $61.9 million compared to fiscal year 2011-12 primarily due to the transition of clients to county LIHPs. The program reflects a net decrease of $12.7 million in 2013-14 ($16.9 million General Fund decrease and $4.2 million other fund increase) to reflect updated caseload estimates.

Department of Developmental Services

The Department of Developmental Services (DDS) provides consumers with developmental disabilities a variety of services and supports that allow them to live and work independently, or in supported environments. Recent changes in the delivery of services and eligibility for additional federal funds have reduced the growth in regional center General Fund costs. These costs had been increasing significantly as consumers moved from developmental centers into the community, utilization of services increased, and more consumers were diagnosed with autism spectrum disorders.

California is the only state providing developmental services as an entitlement. DDS serves approximately 260,000 individuals with developmental disabilities in the community and 1,550 individuals in state-operated facilities. The Budget includes $4.9 billion ($2.8 billion General Fund) for support of the Department. Services are provided through developmental centers, one community facility, and the regional center system.

In December 2012, federal decertification and state license revocation actions were initiated for the Intermediate Care Facility (ICF) at the Sonoma Developmental Center (SDC), which provides services for approximately 290 individuals. The Nursing Facility and General Acute Care services at SDC were not impacted by these actions. DDS has filed appeals and will work with DPH and the federal Centers for Medicare and Medicaid Services to quickly resolve licensing issues and minimize any loss of federal funds. The ICF will continue to operate during the appeal process. No adjustment for the potential loss of federal funding has been included in the Budget pending the outcome of the appeal.

Significant Adjustments:

- Regional Center Caseload Adjustment—An increase of $36.1 million (a decrease of $3 million General Fund) in 2012-13 and an increase of $177.5 million ($89.2 million General Fund) in 2013-14 to reflect increases in caseload and utilization of services.
- Sunset Operations and Provider Payment Reduction—An increase of $46.7 million ($32 million General Fund) in 2013-14 to reflect the sunset of the 1.25-percent regional center operations and provider payment reduction.
- Proposition 10 Funding—An increase of $40 million General Fund to backfill the one-time support provided by the First 5 California Children and Families Commission for programs serving children birth through five in the 2012 Budget Act.

- Annual Family Program Fee—The Budget permanently continues the Annual Family Program Fee, scheduled to sunset June 30, 2013, which assesses a fee of $150 or $200 per family. The fee is based on family size and additional criteria and assessed to families whose adjusted gross family income is at, or above, 400 percent of the federal poverty level. This fee offsets developmental services General Fund costs by $7.2 million.

Department of State Hospitals

The Department of State Hospitals (DSH) was established in July 2012 to administer the state mental health hospital system, the Forensic Conditional Release Program, the Sex Offender Commitment Program, and the evaluation and treatment of judicially and civilly committed and voluntary patients. DSH continues to evaluate operations to improve treatment, safety and security of staff and patients, and fiscal accountability and transparency. The Budget includes $1.6 billion ($1.5 billion General Fund) in 2013-14 for support of DSH. The patient population is projected to reach a total of 6,560 in 2013-14.

Significant Adjustments:

- Stockton Activation and Bed Migration—An increase of $100.9 million General Fund in 2013-14 to activate 514 beds at the California Health Care Facility (CHCF). This includes $67.5 million General Fund for additional staff to complete the activation of CHCF and $33.4 million General Fund for the full year costs of positions approved in the Budget Act of 2012. The Budget does not include an adjustment for the transfer of inmate-patients from existing Psychiatric Programs at Salinas Valley State Prison and the California Medical Facility at Vacaville to the CHCF. DSH will continue to evaluate inmate-patients for transfer to the CHCF and develop a transition plan to reduce the number of DSH-operated beds at Salinas and Vacaville.
- Safety and Security—Upon the successful implementation of the personal duress alarm system (PDAS) upgrade at Napa State Hospital in November 2012, the PDAS project schedule was updated for Metropolitan and Patton State Hospitals. The revised schedule resulted in a reduction of $5.6 million General Fund in 2013-14. The Budget maintains funding to continue the PDAS upgrade at Atascadero and Coalinga State Hospitals.
- Emerging Population Trends—The Budget includes $20.1 million Reimbursements for the estimated increase in civil commitments. No adjustment is included in the

Budget for pending commitments. DSH maintains wait lists of patients awaiting admission to its five hospitals and two psychiatric programs. Since June 30, 2012, the DSH has seen a steady increase in its wait list numbers for Incompetent to Stand Trial and Mentally Disordered Offender commitments. DSH will continue to monitor the pending commitments and, if necessary, develop options to address these wait lists.

Department of Social Services

The Department of Social Services (DSS) serves, aids, and protects needy and vulnerable children and adults in ways that strengthen and preserve families, encourage personal responsibility, and foster independence.

The Budget includes $19.5 billion ($7.6 billion General Fund) for DSS, an increase of $577.4 million General Fund from the revised 2012-13 budget, and an increase of $623.9 million General Fund from the Budget Act of 2012.

State funds for Foster Care, the Adoption Assistance Program, Child Welfare Services, Child Abuse Prevention, and Agency Adoptions were realigned to counties as part of 2011 Realignment. Funding for those programs can be found in the 2011 Realignment Estimate display in Item 5196 in the Governor's Budget.

The Budget includes $1 million ($482,000 General Fund) and 9 positions in 2013-14 for DSS to support and oversee the Child Welfare System-New System project through the procurement phase. This approach is consistent with the Child Welfare Services Automation Study released in April 2012.

California Work Opportunity and Responsibility to Kids

The CalWORKs program, California's version of the federal Temporary Assistance for Needy Families (TANF) program, provides temporary cash assistance to low-income families with children to meet basic needs. It also provides welfare-to-work services so that families may become self-sufficient. Eligibility requirements and benefit levels are established by the state. Counties have flexibility in program design, services, and funding to meet local needs.

Total CalWORKs expenditures of $7.1 billion (state, local, and federal funds) are proposed for 2013-14, including TANF Block Grant and maintenance-of-effort countable expenditures. The amount budgeted includes $5.4 billion for CalWORKs

program expenditures and $1.7 billion in other programs. Other programs primarily include expenditures for Cal Grants, Department of Education child care, Child Welfare Services, Foster Care, DDS programs, the Statewide Automated Welfare System, California Community Colleges child care and education services, and the Department of Child Support Services.

Average monthly CalWORKs caseload is estimated to be 572,000 families in 2013-14, a 0.7-percent increase over the 2012 Budget Act projection.

Background

In 1994-95, California's welfare caseload reached its highest point with 921,000 families receiving aid. The Personal Responsibility and Work Opportunity Reconciliation Act of 1996 fundamentally reformed the nation's welfare system and created a block grant program with work requirements and lifetime time limits. Consistent with this federal welfare reform law, CalWORKs contains time limits on the receipt of aid and linked eligibility for aided adults to work participation requirements. California is also one of only nine states that included a safety net program to provide monthly assistance payments to children whose parents are not eligible for aid. In 2005, federal welfare reform was modified to further restrict countable work activities and to require states to have 50 percent of the program's caseload meeting federal work participation levels.

In the early years of CalWORKs, the program was successful in getting many of the most readily employable parents to enter the labor market, with caseload reaching an all-time low of 460,000 in cases in 2006-07. Since then, and coinciding with the severe economic downturn, the program experienced significant growth, increasing to nearly 586,000 cases in 2010-11. Over this same period, budgetary constraints required expenditure reductions. Major reductions to the program in recent years have consisted of the following:

- Funding for work support services—From 2009-10 through 2011-12, annual funding for welfare-to-work and child care services was reduced by over $375 million. To allow counties to absorb this substantial reduction, additional exemptions from work participation requirements were authorized for families with very young children.
- Time limits—Since the program's inception, work-eligible adults were generally limited to 60 months of eligibility for cash assistance. Effective July 2011, eligibility for adult recipients is limited to 48 months.

- Monthly grant levels—Maximum Aid Payment (MAP) levels were reduced by 4 percent in July 2009, followed by an additional 8 percent reduction in July 2011. For a family of three living in a high-cost county, this equates to an $85 per month reduction in cash assistance from 2008 MAP levels. Current grant levels are only slightly above 1987-88 levels. Compared to other states, California's grant levels are eighth highest in the nation and second highest among the ten largest states.
- Income disregard—Beginning in July 2011, the amount of monthly earnings disregarded for purposes of determining a family's grant level was reduced from disregarding the first $225 of income and 50 percent of the remainder to $112 and 50 percent.

During unprecedented levels of unemployment and resulting caseload growth, resources for CalWORKs families were reduced and the work focus of the program was substantially eroded. Additionally, the TANF program modifications enacted by Congress in 2005 exposed the state to potentially significant fiscal penalties due to the low work participation levels. Continuing the program under the existing structure severely undermined the program's primary goal—helping families achieve self-sufficiency.

Redesigning CalWORKs

To refocus CalWORKs on the primary goal of moving families to self-sufficiency, major programmatic changes were enacted in 2012. Chapter 47, Statutes of 2012 (SB 1041) restores the program's focus on work through the following changes:

- Creates a prospective 24-month time limit on cash assistance and employment services for adults. After two years, adults must meet federal work participation requirements to remain eligible for cash aid for up to 24 additional months.
- Provides counties some flexibility by allowing up to 20 percent of the adults to extend their time beyond 24 months to complete their educational goals or find a job.
- Provides up to two years for clients to transition to the new program and be provided the skills necessary to find employment as the economy continues to recover.
- Restores the earned income disregard to the pre-July 2011 level effective October 1, 2013, which increases the incentive to find and maintain employment by allowing families to keep more of their income without a reduction in their monthly grant.

Because SB 1041 requires significant changes to CalWORKs, stakeholder involvement and input are critical components for ensuring the redesigned program leads to

better outcomes for families. As such, DSS convened a stakeholder workgroup shortly after SB 1041 was signed into law to develop protocols for implementation. The workgroup includes representatives of advocacy groups, counties, the Legislature, and the Administration.

Significant Adjustment:

- CalWORKs Employment Services—An increase of $142.8 million General Fund in 2013-14 to support the CalWORKs refocusing measures enacted by SB 1041. The additional resources are necessary to maximize successful outcomes under the new program structure. Counties will need to enhance and expand their array of employment services and job development activities for program participants, and intensify case management efforts for individuals not currently participating in activities that will eventually lead to self-sufficiency.

Other highlights:

- Child Care—CalWORKs subsidized child care is provided in three stages. County welfare departments administer CalWORKs Stage One child care while the Department of Education administers Stages Two and Three. The three-stage structure was created to ensure recipients of aid are able to participate in work activities, and continue to participate as they transition off cash aid. Additionally, the Department of Education administers all other subsidized child care programs to support low-income families so they may remain gainfully employed. The current subsidized child care system is fragmented by design. The various programs operate under different rules and administrative structures that suggest potential efficiencies can be gained through a closer of examination of the current system. DSS will convene a stakeholder group to assess the current child care structure and opportunities for streamlining and other improvements.

Supplemental Security Income/State Supplementary Payment

The federal Supplemental Security Income (SSI) program provides a monthly cash benefit to eligible aged, blind, and disabled persons who meet the program's income and resource requirements. In California, the SSI payment is augmented with a State Supplementary Payment (SSP) grant. These cash grants assist recipients with basic needs and living expenses. The federal Social Security Administration (SSA) administers the SSI/SSP program, making eligibility determinations, grant computations, and issuing combined monthly checks to recipients. The state-only Cash Assistance Program for

Immigrants (CAPI) provides monthly cash benefits to aged, blind, and disabled legal non-citizens who are ineligible for SSI/SSP due solely to their immigration status.

Effective January 2012, maximum SSI/SSP grant levels are $854 per month for individuals and $1,444 per month for couples. SSA applies an annual cost-of-living adjustment to the SSI portion of the grant equivalent to the year-over-year increase in the Consumer Price Index (CPI). The current projected CPI growth factors are 1.7 percent for 2013 and 1.1 percent for 2014. Maximum SSI/SSP monthly grant levels would increase by $20 and $30 for individuals and couples, respectively. CAPI benefits are equivalent to SSI/SSP benefits, less $10 per month for individuals and $20 per month for couples.

The Budget includes $2.8 billion General Fund for the SSI/SSP program in 2013-14. This represents a 1.9-percent increase from the revised 2012-13 budget. The caseload in this program is estimated to be 1.3 million recipients in 2013-14, a 1.3-percent increase over the 2012-13 projected level. The SSI/SSP caseload consists of 27 percent aged, 2 percent blind, and 71 percent disabled persons.

In-Home Supportive Services

The In-Home Supportive Services (IHSS) program provides domestic services such as housework, transportation, and personal care services to eligible low-income aged, blind, and disabled persons. These services are provided to assist individuals to remain safely in their homes and prevent institutionalization.

The Budget includes $1.8 billion General Fund for the IHSS program in 2013-14, a 4.9-percent increase over the revised 2012-13 budget and 6.5-percent increase from the 2012 Budget Act. Average monthly caseload in this program is estimated to be 419,000 recipients in 2013-14, a 1-percent decrease from the 2012-13 projected level.

Significant Adjustments:

- An increase of $92.1 million associated with more restrictive federal requirements to draw down enhanced federal matching funds for the IHSS program under the federal Community First Choice Option. Beginning July 2013, only recipients who meet the standards for nursing home level of care will be eligible for the enhanced federal match.
- An increase of $59.1 million to reflect restoration of the 3.6-percent across-the-board reduction to recipient hours, which is scheduled to sunset on June 30, 2013.

- An increase of $47.1 million related to the recently enacted county maintenance-of-effort (MOE) requirement. Effective July 1, 2012, counties' share of the non-federal portion of IHSS costs is based on actual expenditures by counties in fiscal year 2011-12. The counties' MOE requirement will increase by 3.5 percent annually, beginning in 2014-15, except for years in which 1991-92 realignment revenues decrease from the immediate prior year.
- A decrease of $30.2 million associated with the health care certification requirement enacted in 2011-12.
- A decrease of $113.2 million to reflect implementation of the 20-percent across-the-board reduction to recipient hours on November 1, 2013. A court injunction prevented the state from implementing this reduction, which was originally required to become effective in January 2012. The Budget assumes successful resolution and implementation in 2013-14. The savings amount identified reflects fully restoring hours for severely impaired recipients, who would otherwise be placed in nursing homes.

The IHSS program is also a key component of the Coordinated Care Initiative (CCI). Beginning in September of 2013, certain Medi-Cal beneficiaries residing in a county authorized to participate in the CCI demonstration will begin transitioning from the traditional fee-for-service model to a managed care model for receiving health care services, including IHSS recipients. Under CCI, the fundamental structure of the IHSS program will remain as it is today, with eligibility determination, assessment of hours, and program administration conducted by county social workers and administrative staff. For additional information on CCI, refer to the Department of Health Care Services section.

Corrections and Rehabilitation

The California Department of Corrections and Rehabilitation (CDCR) incarcerates the most serious and violent felons, supervises them when they are released on parole, and provides rehabilitation programs to help them reintegrate into the community. CDCR provides safe and secure detention facilities and necessary support services to inmates, including food, clothing, academic and vocational training, as well as health care services.

The Budget proposes total funding of $9 billion ($8.7 billion General Fund and $252 million other funds) for CDCR in 2013-14.

Continued Commitment to Implementation of Realignment

The Budget reflects the continued implementation of 2011 Public Safety Realignment, which, through Chapter 15, Statutes of 2011 (AB 109), created a community-based correctional program where lower-level offenders remain under local jurisdictions. Funding for those programs can be found in the 2011 Realignment Estimate display in Item 5196 of the Governor's Budget. The Administration continues to work collaboratively with counties and other stakeholders to address implementation issues associated with Realignment.

In April 2012, the Administration released its plan for the future of California's prison system (known as the Blueprint) to achieve significant General Fund savings, satisfy

court orders to relieve prison overcrowding, and provide a constitutionally required level of health care to inmates. The Administration continues to implement the Blueprint as approved by the Legislature, which includes key components such as reclassifying inmates based on the updated inmate classification system, improving access to rehabilitative programs, returning inmates housed in out-of-state contract facilities to California, standardizing staffing, and maintaining health care services.

- Health Care Continues to Improve—Inmates continue to receive mental health, medical and dental care that is consistent with the standards and scope of services appropriate within a custodial environment. At the request of the court appointed federal Receiver that oversees California's prison medical care program, the Office of the Inspector General (OIG) evaluates and monitors the progress of medical care delivery to inmates in the institutions. Based on these inspections, the OIG issues a score rating each institution's compliance with the various components of medical delivery. The OIG has reported significant improvements since it began its inspections in 2008, with the most recent round of monitoring resulting in an average score of 85 percent across the 20 institutions that have gone through the third round of monitoring, up from an average score of 79 percent from the second round of monitoring for all 33 institutions that was completed in December 2011. The federal court stated that it would remove the Receiver and return control to the state once the system is stable and provides for constitutionally adequate medical care. The improvements cited by OIG are an indication that the state is meeting federal court requirements and will assist the state in extricating itself from the class-action lawsuits that govern prison health care.

- Monitoring Implementation of Plan—The Blueprint also outlined a plan to improve transparency, and increase program oversight and fiscal accountability. The Department of Finance's Office of State Audits and Evaluations and the OIG are monitoring CDCR's implementation of the plan, including an assessment of inmate programs, position control, fiscal management, and overall adherence to the Blueprint. Annual reports will be submitted to the Legislature, with the first report being released in the spring of 2013.

While the adult inmate population continues to decline as a result of Realignment, new admissions are currently trending higher than the 2012 Budget Act projections. The Budget Act projected an adult inmate average daily population of 129,961 in the current year. The current year adult inmate population is projected to exceed Budget Act projections by 2,262 inmates, a 1.7-percent increase, for a total population of 132,223. The budget year adult inmate population is projected to be 128,605, a 2.7-percent

decrease of 3,618 inmates. The current projections also reflect a decrease in the parolee population of 4,052 in 2012-13 compared to Budget Act projections, for a total average daily population of 57,640. The parolee population is projected to be 42,958 in 2013-14, a decrease of 14,682.

Three-Judge Panel

In November 2006, plaintiffs filed a motion to convene a three-judge panel in the *Plata* lawsuit under the 1996 Prison Litigation Reform Act, claiming that overcrowded conditions in California's prisons resulted in unconstitutional medical care. The second lawsuit joined in the three-judge panel, *Coleman*, involves mental health services for inmates. Both lawsuits claim that care for inmates violates the Eighth Amendment of the U.S. Constitution, which prohibits cruel and unusual punishment of the incarcerated.

In 2007, a three-judge panel was convened to address claims that overcrowding in state prisons results in unconstitutional medical care. In 2009, the panel ordered the state to reduce its adult institution population to 137.5 percent of design capacity within two years, equivalent to a reduction of about 40,000 inmates. The state appealed this decision, but in 2011, the U.S. Supreme Court upheld the panel's finding.

Since 2007, California has taken numerous actions to reduce overcrowding. The most significant ongoing actions are realigning lower-level offenders and parole violators to local jurisdictions, and increasing prison health care bed and treatment capacity. These actions have been effective in reducing the prison population while maintaining public safety, eliminating the use of all non-traditional beds, and allowing CDCR to focus on providing rehabilitation programs to reduce recidivism.

The three-judge panel issued another order in October 2012 requiring the state to develop two plans to reduce the prison population to 137.5 percent of design capacity by June 27, 2013 and December 27, 2013. The plans were submitted to the Court on January 7, 2013, as ordered.

The Administration believes that implementation of the Blueprint will enable the state to deliver health care to inmates at a level that meets or exceeds constitutional standards and ultimately lead to the end of federal court oversight. As noted above, recent OIG reviews indicate that the medical delivery system is improving. In addition, 12 of the 20 institutions that have been inspected by the OIG in the third round of monitoring have population densities higher than 137.5 percent. These 12 institutions received an

average score of 84 percent, and half of them received a score of 85 percent or higher. An institution with a score of 85 percent or higher is designated by the OIG as having high adherence to policies and procedures.

Division of Juvenile Justice

The Division of Juvenile Justice's (DJJ) average daily ward population is decreasing when compared to the 2012 Budget Act projections. Specifically, the ward population is projected to decrease by 120 in 2012-13, for a total population of 871 in 2012-13 and 913 in 2013-14. The ward population has decreased significantly in recent years, due primarily to fewer parole violators being housed by DJJ as a result of Chapter 729, Statutes of 2010 (AB 1628), which shifted supervision responsibility for wards released from DJJ to the counties beginning in January 2011.

Pursuant to Chapter 41, Statutes of 2012 (SB 1021), juvenile parole ended on January 1, 2013 and all juveniles remaining on parole as of December 31, 2012 were discharged. Savings resulting from the elimination of juvenile parole will be realized in the Division of Adult Parole Operations, which assumed responsibility for juvenile parolees in 2011-12.

Tax Relief and Local Government

This part of the Budget contains state and federal funds used for tax relief provided to local governments. The main component is the Homeowers' Property Tax Relief Program, which is budgeted at $425 million in 2013-14. This part of the Budget also includes information related to state mandates and the dissolution of redevelopment agencies.

Redevelopment Agencies

Chapter 5, Statutes of 2011 (ABx1 26) eliminated the state's approximately 400 redevelopment agencies (RDAs). Given the current economic environment, it no longer made sense to continue diverting $5 billion in local property tax revenue to RDAs. The elimination of RDAs allows local governments to protect core public services by returning property tax money to the cities, counties, special districts, and K-14 schools. This funding can now be used by local governments to fund police, fire, or other critical public services that may have been significantly cut back due to difficult economic conditions. In those areas that contained RDAs, it is estimated that over the current year and budget year, approximately $1.6 billion will be distributed back to counties, $1.2 billion will be distributed back to cities, and $400 million will be distributed back to special districts. This will be a steady source of funding in the future for these entities and will provide significant relief to stretched budgets at the local level.

Each RDA was replaced with a locally organized successor agency that is tasked with retiring the RDA's debts and other legal obligations. Each successor agency was

then provided an oversight board to supervise its work. Chapter 26, Statutes of 2012 (AB 1484) provided additional tools for successor agencies, oversight boards, and the Department of Finance to facilitate the orderly wind down of RDA activities. AB 1484 creates a process to transfer former RDA housing assets to housing successor entities, requires audits of various RDA funds and accounts to identify unencumbered funds that should be remitted to local taxing entities, and requires the completion of a long-range property management plan to facilitate the disposition of RDA properties. Much of this workload is one-time in nature and should be completed no later than the summer of 2013.

Ongoing workload related to the winding down of RDAs involves the generation, submittal, and review of Recognized Obligation Payment Schedules (ROPS). Every six months, successor agencies submit to Finance their ROPS, which delineates their proposed payments for the upcoming payment cycle. Finance reviews each ROPS to determine whether the identified payments are enforceable obligations, as defined by law. Once Finance has completed its review, the successor agencies are provided property tax allocations to pay the approved enforceable obligations. Any property tax revenue remaining after the enforceable obligations are paid is distributed to the affected taxing entities based on their property tax share. The additional property tax revenue received by K-14 schools generally offsets the state's Proposition 98 General Fund costs on a dollar-for-dollar basis.

Accurately estimating the property tax revenue available for the affected taxing entities after the payment of enforceable obligations has been a challenge. This is mainly because comprehensive information concerning the amount of property tax expended by RDAs for purposes that qualify as enforceable obligations was not available prior to the enactment of ABx1 26. Now that three payment cycles worth of information is available, Finance can more accurately estimate the future Proposition 98 General Fund savings stemming from the RDA dissolution process. As such, the Budget includes Proposition 98 General Fund savings totaling $2.1 billion in 2012-13 and $1.1 billion in 2013-14. This is revised downward from the 2012 Budget Act estimate of $3.2 billion in 2012-13 and $1.6 billion in 2013-14. A portion of the savings generated is one-time and is generated from the distribution of unencumbered funds being held in various RDA funds and accounts.

As each ROPS cycle passes, the obligations of the former RDAs will continue to decline as debts are paid off. As a result, ongoing savings to the state will grow over time. It is estimated that by 2016-17 approximately $1 billion in ongoing savings could be achieved. Additionally, over the next several years, the workload related to the dissolution of

the former RDAs will become more routine for successor agencies, oversight boards, and Finance. No final payment date related to the RDA dissolution process can be determined at this time, but a point will be reached in the next several years where the only obligations remaining for biannual payment will be debt service.

Commission on State Mandates

Frequently, statutes are enacted to codify requirements on local government that are best practices. Given constitutional requirements, the effect is often that the state incurs costs to reimburse local governments for activities that were already occurring without state funds. The Commission on State Mandates is the quasi-judicial agency that hears test claims to decide whether local agencies and school districts are entitled to reimbursement for increased costs mandated by such statutes.

Another problem with the mandates process is that determinations about activities eligible for reimbursement and funding levels are not made until years after the activities have been performed and local governments have incurred costs. During this intervening time, the state incurs millions of dollars of costs and local entities face uncertainty about the extent to which they will be reimbursed for undertaking activities mandated at the state level.

State mandates should be minimized and local flexibility should be maximized. Local decision makers should determine whether activities are implemented within their communities. Consistent with the success in utilizing the block grant incentive program to improve the K-12 mandate process, the Administration will be exploring ways to improve the mandate process. In the near term, however, the Administration will pursue a course similar to previous Budget Acts—suspend all mandates except certain ones related to law enforcement and property tax collection.

The Constitution requires the Legislature to either fund or suspend specified mandates in the annual Budget Act. The 2012 Budget Act continued the suspension of numerous mandates. Many of the activities required by these mandates have become common practice and should not be mandated by the state. The 2012 Budget Act also deferred the 2012-13 payment for mandate costs incurred prior to 2004-05 and provided that the payment deferral would be continued through 2014-15. Accordingly, the Budget reflects the previous actions to suspend certain mandates and defer the pre-2004 mandate costs.

Additionally, the Budget proposes to suspend four mandates for a General Fund savings of $103.8 million in 2013-14. The Commission recently adopted Statewide Cost Estimates for these mandated activities which reflect functions that local entities have inherent reasons to preserve without reimbursement from the General Fund. The Budget also proposes to suspend five mandates recently determined by the Commission on State Mandates to be reimbursable activities. These activities are best practices that local agencies should be providing their citizens as a matter of course. Savings will result from suspending the five mandates, but since the State Controller has yet to collect local agency claims necessary to develop statewide cost estimates, the amount is unknown.

The Budget provides $48.4 million for mandates that remain in effect.

Environmental Protection

The California Environmental Protection Agency works to restore, protect, and enhance environmental quality. The agency coordinates state environmental regulatory programs and ensures fair and consistent enforcement of the law.

The Budget proposes total funding of $2.9 billion ($42.2 million General Fund and $2.89 billion other funds) for all programs included in this Agency.

Air Resources Board

The Air Resources Board has primary responsibility for protecting air quality in California as well as implementation of the California Global Warming Solutions Act of 2006 (AB 32). The Budget includes $437.6 million and 1,278.2 positions for the Board.

Reducing Greenhouse Gas Emissions through the Investment of Cap and Trade Auction Proceeds

AB 32 established California as a global leader in reducing greenhouse gas emissions (GHGs). To meet the goals of AB 32, the state has adopted a three-pronged approach to reducing greenhouse gas emissions, including adopting standards and regulations, providing emission reduction incentives via grant programs, and establishing a market-based compliance mechanism known as Cap and Trade. The Cap and Trade program, as one component of the state's comprehensive approach, provides assurance that state goals will be achieved by setting a statewide limit on the GHG sources responsible for 85 percent of California GHG emissions. It establishes a financial incentive

for industries subject to the statewide limit or cap to make long-term investments in cleaner fuels, more efficient energy use, and transformational technological and scientific innovations. The Cap and Trade program provides GHG emitters the flexibility to implement the most efficient options to reduce GHG emissions. Based on the latest estimate in 2010, the Cap and Trade program is responsible for approximately 23 percent of the required GHG emission reductions to meet the AB 32 2020 goal.

The Air Resources Board (ARB) held the first of three 2012-13 auctions on November 14, 2012, resulting in $55.8 million in proceeds to the state. The auction of allowances directly allocated to independently operated electric utilities resulted in proceeds of $233.3 million, which will be credited to customers. The other two auctions will occur on February 19, 2013 and May 16, 2013.

In recognition of the state's initial experience with the first auction, the Budget only addresses the expenditure of auction proceeds of $200 million in 2012-13 and $400 million in 2013-14. Total revenues from the auctions may exceed these amounts.

Chapter 807, Statutes of 2012 (AB 1532) requires Finance to provide three-year investment plans for auction proceeds, beginning with the 2013-14 May Revision, while Chapter 830, Statutes of 2012 (SB 535) requires that at least 10 percent of the proceeds received by the state be devoted to the most impacted and disadvantaged communities to ensure the provision of economic and health benefits.

The first plan, when completed, will prioritize programs that significantly advance the goals of AB 32. While the specific details will be developed by the Administration after receiving input through the stakeholder process, the following areas are best suited for investment. Transportation is the single largest contributor to GHGs in California (38 percent), and reducing transportation emissions should be a top priority (including mass transit, high speed rail, electrification of heavy duty and light duty vehicles, sustainable communities, and electrification and energy projects that complement high speed rail). The electricity and commercial/residential energy is the second largest contributor of GHG emissions (30 percent), and the water sector is one of the largest users of electricity in the state. Encouraging energy efficiency projects with financing incentives such as the Property-Assessed Clean Energy (PACE) program will help individuals and families who need longer timeframes and simpler terms than traditional financing to pay for home energy improvements. Programs that reduce the energy used in the supply, conveyance and treatment of water throughout the state can significantly reduce GHGs while also saving water. Other areas to be examined

during the planning process include sustainable agriculture practices (including the development of bioenergy), forest management and urban forestry, and the diversion of organic waste to bioenergy and composting. The investment plan will assure benefits to disadvantaged communities.

State Water Resources Control Board

The State Water Resources Control Board and the nine Regional Water Quality Control Boards preserve and enhance the quality of California water resources and ensure proper allocation and effective use of state water. The Budget includes $674.8 million ($14.7 million General Fund) and 1,503.9 positions for the Department.

Safer Drinking Water

The Administration is reviewing the State's activities related to the provision of safe drinking water and to recommend efficiencies and alignments to maximize the state's ability to ensure that all members of the public have access to safer water. In addition, the State Water Resources Control Board will recommend potential funding mechanisms to provide disadvantaged communities with safe, affordable, and reliable water. Stakeholders will be consulted in the development of a proposal to improve the administration of the water programs and to implement sustainable funding mechanisms.

Department of Toxic Substances Control

The Department of Toxic Substances Control protects California residents and the environment from the harmful effects of toxic substances through restoring contaminated resources, enforcement, regulation, and pollution prevention. The Budget includes $189.1 million ($21.1 million General Fund) and 941.1 positions for the Department.

Hazardous Waste Control Account Reform

The Department of Toxic Substances Control's hazardous waste fee system is complex and difficult to administer. It has also yielded inconsistent revenues, which has resulted in expenditures exceeding revenues for a number of years, requiring program reductions and significantly reducing the available fund balance. Later this spring, the Administration will propose to streamline the hazardous waste fee system, modify the fees to ensure long-term stability of the Hazardous Waste Control Account, and align the fees with program objectives.

Department of Resources Recycling and Recovery

The Department of Resources Recycling and Recovery (CalRecycle) protects public health, safety, and the environment by regulating solid waste facilities and promoting recycling. The Budget includes $1.5 billion and 686.6 positions for the Department.

Beverage Container Recycling Fund Reform

Expenditures from the Beverage Container Recycling Fund exceed revenues by approximately $100 million as a result of a combination of historically high recycling rates and mandated program payments. All General Fund loans are planned to be repaid to the fund by 2014-15.

The Administration anticipates introducing budget-related reform measures in the spring. In anticipation of that proposal, the Department has been meeting with stakeholders since July 2012. Important topics discussed with the group include addressing fraud, reviewing program operations, and ensuring cash flow and revenues support the long-term viability of the recycling program.

Natural Resources

The Natural Resources Agency consists of 26 departments, boards, commissions, and conservancies responsible for administering programs to conserve, protect, restore, and enhance the natural, historical, and cultural resources of California.

The Budget proposes total funding of $7.7 billion ($2.1 billion General Fund) and 19,125 positions for all programs included in this Agency.

Timber Harvest Plans

Existing law requires an interdisciplinary review of timber harvest plans by various departments. These plans serve as the equivalent of preparing an environmental impact report under the California Environmental Quality Act. Chapter 289, Statutes of 2012 (AB 1492) established a 1 percent assessment on lumber and other building wood products sold in California, with the assessment revenue used to fund specified activities, including existing and additional timber harvest plan reviews. The legislation allowed the elimination of fees that had been assessed on in-state timber producers (which had given an advantage to out-of-state producers) and made possible an expansion of the number of plans reviewed annually.

The Budget includes an increase of $6.6 million Timber Regulation and Forest Restoration Fund and 49.3 positions in the California Natural Resources Agency, the Department of Conservation, the Department of Forestry and Fire Protection, the Department of Fish and Wildlife, and the State Water Resources Control Board to increase review of timber harvest plans.

The new resources will increase the state's capacity to review and process timber harvest plans in a coordinated and timely manner, while ensuring that all applicable environmental regulations are closely enforced and followed.

Delta Stewardship Council

The Delta Stewardship Council furthers the state's coequal goals in the Sacramento-San Joaquin Delta of providing a more reliable water supply for California and protecting, restoring, and enhancing the Delta ecosystem. The Council is required to develop and periodically update a legally enforceable Delta Plan to guide state and local agency activities related to the Delta. Under state law, agencies are required to coordinate their actions pursuant to the Delta Plan with the Council and the other relevant agencies. The Budget includes $11.6 million ($5.6 million General Fund) and 55.5 positions for the Council.

The Council released a final draft of the Delta Plan and a corresponding draft Programmatic Environmental Impact Report in the fall of 2012. After the Council receives and considers written comments on the draft Report, and holds public hearings regarding proposed regulations to implement the Delta Plan, the Plan will be adopted formally in the spring of 2013. The resources necessary to oversee and implement the Plan will be evaluated during the spring budget process.

Department of Forestry and Fire Protection

The Department provides resources management and wildland fire protection services covering over 31 million acres. It operates 228 fire stations and, on average, responds to over 5,600 wildfires annually. The Department also staffs local fire departments through reimbursement agreements with local governments. In six counties, the Department contracts with county agencies to provide fire protection and prevention services on the Department's behalf. Among other responsibilities, the Department develops and enforces fire safety standards through the Office of the State Fire Marshal and regulates and enforces timber harvesting operations. The Budget includes $1.3 billion ($678.7 million General Fund) and 6,885.7 positions for the Department.

Significant Adjustment:

- State Responsibility Area Fire Prevention Fees—An increase of $11.7 million and 65.1 positions in 2013-14 to implement the provisions of Chapter 311, Statutes of

2012 (SB 1241) and engage in other fire prevention activities. The Department will assist in the review and updating of safety elements pertaining to fire hazards in local general plans required by SB 1241. In addition, funding is proposed to meet the demand for fuel treatment through the Vegetation Management Program, and educate homeowners on ways to prevent the ignition and spread of fires by hiring seasonal defensible space inspectors.

Department of Fish and Wildlife

The Department manages California's diverse fish, wildlife, and plant resources, and the habitats upon which they depend, for their ecological values and for their use and enjoyment by the public. This includes the management of recreational, commercial, scientific, and educational programs. The Budget includes $366.3 million ($62.7 million General Fund) and 2,527.2 positions for the Department.

Significant Adjustment:

- Salton Sea Restoration—An increase of $12.1 million from Proposition 84 funds dedicated to Salton Sea Restoration for the restoration of between 800 and 1,200 acres of habitat. The proposal will implement a pilot project to create habitat through the construction of ponds at sites where the sea bed is exposed because of evaporation. Because other sources of water for the Sea are being phased out, the pilot project is designed to demonstrate the feasibility of having the ponds permanently sustained solely with agricultural runoff. The Natural Resources Agency will spearhead an effort to develop additional restoration measures at the Salton Sea.

Department of Parks and Recreation

The Department operates the state park system to preserve and protect the state's most valued natural, cultural, and historical resources. The park system includes 280 parks, beaches, trails, wildlife areas, open spaces, off-highway vehicle areas, and historic sites. It consists of approximately 1.56 million acres, including over 315 miles of coastline, 974 miles of lake, reservoir and river frontage, approximately 15,000 campsites and alternative camping facilities, and 4,249 miles of non-motorized trails. The Budget includes $576.3 million ($114.6 million General Fund) and 3,877.5 positions for the Department.

Reforming Parks

In July 2012, the California Natural Resources Agency announced that the Department had not reported $20.5 million in the State Parks and Recreation Fund and $34 million in the Off-Highway Vehicle Trust Fund to the Department of Finance. In September, Chapter 530, Statutes of 2012 (AB 1478) appropriated $20.5 million from the State Parks and Recreation Fund to the Department to improve the park system and to keep parks open.

A Department of Finance audit made the following findings: 1) the governance structure over budgeting functions needs improvement; 2) risks over the State Park Contingent Fund exist; and 3) key controls over procurement activities need improvement. The Department concurred with each of these findings and has already reformed or begun systematic changes to its policies, procedures, communication, and training in each area. The Governor has appointed a new Director to oversee implementation of the necessary changes and lead the Department in carrying out its important mission.

Although the Department intentionally concealed the existence of the funding in the State Parks and Recreation Fund, the difference in the Off-Highway Vehicle Trust Fund between the State Controller's Office's records and the Governor's Budget was due to timing of when the balances were reported. The Department of Finance has conducted reconciliation for the Off-Highway Vehicle Trust Fund and estimated a $59 million balance at the end of the current fiscal year. The Budget includes a $5 million augmentation in local assistance grants, which will bring grants up to $26 million, the level before budget reductions in recent years. A larger augmentation is not sustainable due to a declining fund balance.

The Administration has been working with stakeholders to develop a sustainable funding model for the parks system. The 2012 Budget Act proposed the creation of an Enterprise Fund, designed to foster and reward entrepreneurial and revenue-generating activities in the park system. Additional efforts to develop new revenues and balance available resources with expenditures are continuing.

Significant Adjustments:

Boating-Parks Merger—Pursuant to Governor's Reorganization Plan No. 2, the Budget reflects the merger of the Department of Boating and Waterways into the Department of Parks and Recreation. Effective July 1, 2013, Boating and Waterways will become a new

division within Parks. The merger will result in permanent savings of $1.1 million and a reduction of seven positions.

Americans with Disabilities Act—An increase of $3.7 million from Proposition 12 and Proposition 84 funds to fund additional projects to meet the requirements of the federal consent decree resulting from *Tucker v. California Department of Parks and Recreation*. The decree requires Parks to remove physical and programmatic barriers to provide equal access to people with disabilities in accordance with the ADA.

Department of Water Resources

The Department of Water Resources protects, conserves, develops, and manages California's water. The Department evaluates existing water resources, forecasts water needs, and explores potential solutions to meet growing needs for personal use, irrigation, industry, recreation, power generation, and fish and wildlife. The Department also works to prevent and minimize flood damage, ensure the safety of dams, and educate the public about the importance of water and its efficient use.

The Budget includes $3.6 billion ($97.4 million General Fund) and 3,495.7 positions for support of the Department.

Significant Adjustment:

- Lake Perris Dam—An increase of $11.3 million Proposition 84 funds for the Perris Dam rehabilitation project. Proposition 84 provides $54 million for recreation, fish and wildlife enhancement costs associated with the State Water Project.

Energy Resources Conservation and Development Commission

The Energy Resources Conservation and Development Commission is responsible for ensuring a reliable supply of energy to meet state needs while protecting public health, safety, and the environment.

The Budget includes $485.7 million and 662.1 positions for support of the Commission.

Significant Adjustment:

- Electricity Program Investment Charge Program—The Budget includes an increase of $192.2 million Electric Program Investment Charge funds and 58.5 positions to implement the program. The program is intended to support cost-effective energy efficiency and conservation activities, renewable energy resources, and public interest research and development within the operating area of the investor-owned utilities.

Statewide Expenditures

This Chapter describes items in the Budget related to statewide expenditures.

Infrastructure

Debt Service

General Obligation (GO) and lease revenue bonds, approved by the voters and the Legislature, are used to fund major infrastructure improvements. Since 2000, voters have approved over $100 billion of new GO bonds. The state has issued nearly $28 billion of new GO bonds since 2009 to fund major projects and programs, such as new road construction, flood control levees, new schools, and other public infrastructure. As the state issues the remaining voter-authorized bonds, debt service costs will continue to grow.

General Fund debt service expenditures, after various other funding offsets, will increase by $872.4 million (17.6 percent), to a total of $5.8 billion, over the current year expenditures. This increase is comprised of $779.7 million for GO debt service ($5.1 billion total) and $92.7 million for lease revenue bonds ($766.2 million total). The greater than normal year-over-year increase in GO debt service is the result of lower than normal current year debt service because the State Treasurer's Office was able to structure prior bond sales to accommodate the $1.9 billion Proposition 1A financing obligation that is due June 2013.

The Administration has taken actions to better manage this growing area of the Budget, such as requiring GO bond programs to demonstrate they have an immediate need for the additional bond proceeds prior to the issuance of new bonds. These efforts have helped reduce the amount of unspent bond proceeds in the state treasury from approximately $13.9 billion, as of December 2010, to just over $5 billion by the end of November 2012, excluding the fall 2012 GO bond sale. In addition, only the most critical new lease revenue bond funded projects have been approved. The Budget continues this approach.

The Budget proposes to lower the debt-service cost of transportation-related GO bonds by implementing a new weight fee revenue bond program that will authorize the direct payment of GO bond debt service from weight fees. Weight fees are supplemental vehicle registration charges applied to trucks. Currently, weight fees reimburse the General Fund for transportation GO bond debt service. This proposal will result in a higher-rated credit and thereby reduced debt service costs for transportation bonds. Finally, the Budget proposes extending the current use of miscellaneous State Highway Account revenues to offset qualified General Fund debt service costs for transportation projects (see the Transportation Chapter).

California Five-Year Infrastructure Plan

The Administration will release the 2013 Five-Year Infrastructure Plan later this year. The Plan will outline the Administration's infrastructure priorities for the next five years for the major state infrastructure programs, including high-speed rail and other transportation, resource programs, higher education, and K-12 education. Given the state's increased debt burden and General Fund constraints, the Plan will examine agencies' reported needs assessments, the use of General Fund-backed debt, and place less of a reliance on future voter-authorized GO bonds.

Employee Compensation

State Workforce

The 2013-14 state workforce is estimated at 348,045.8 positions, of which 215,972.9 are in the Executive Branch, 750 are in the Legislative Branch, 2,001.9 are in the Judicial Branch, and 129,321 are in Higher Education. Between 2010-11 and 2012-13, state government shrank by more than 30,000 positions. The Budget reflects the growth of 6,279.9 positions, primarily in higher education.

From February 2009 through June 2013, most state employees within the Executive Branch have been subject to unpaid leave days through furloughs and/or Personal Leave Programs, ranging from one to three days per month, totaling between 70 and 94 unpaid leave days. The unpaid days equate to a pay reduction of approximately 5 to 14 percent per month. In addition, state employees are contributing an additional amount toward retirement costs equal to 2 to 5 percent of their salary. These changes have provided savings of approximately $6 billion ($3.1 billion General Fund) to date.

In 2013-14, state employee salaries within the Executive Branch are projected to cost $15.7 billion ($7.4 billion General Fund), including the top step adjustment identified below. The state also provides pensions and contributions to health care benefits to its retired employees. Pay and benefits for rank-and-file employees are negotiated through the collective bargaining process. The state will begin engaging employee organizations in early 2013 to negotiate successor contracts. Contracts for 19 of the state's 21 bargaining units expire during the June 30-July 2, 2013 period.

Significant Adjustment:

- Current Labor Contracts and Excluded Employees—An increase of $502.1 million ($247 million General Fund) in 2013-14 for previously negotiated top step adjustments and health care benefit contribution increases for active employees. For most employees, the adjustment offsets the ongoing higher contribution for retirement costs previously implemented.

Pensions

Chapter 296, Statutes of 2012 (AB 340) established the Public Employees' Pension Reform Act of 2013 (PEPRA). PEPRA provides lower pension benefits and requires higher retirement ages for new employees in state and local government and schools hired after January 1, 2013. Additionally, state employees in designated bargaining units and associated excluded employees will make additional payroll contributions to their pension plans beginning July 1, 2013. Among other reforms, PEPRA eliminates pension spiking, limits post-retirement employment, and prohibits the purchase of non-qualified service credit (airtime).

Significant Adjustment:

- Pension Contributions—An increase of $95.2 million ($48.7 million General Fund) in 2013-14 for pension contributions. The 2013-14 total includes an additional $63.2 million ($42.2 million General Fund) directed toward the state's

unfunded pension liability to reflect the savings resulting from increased employee contributions under PEPRA. This additional payment comes on top of significant savings already achieved due to prior-year increases in employee pension contributions. The state also makes separate pension contributions on behalf of school teachers and judges.

Figure SWE-01 below provides an historic overview of contributions to the California Public Employees' Retirement System (CalPERS), the California State Teachers' Retirement System (CalSTRS), the Judges' Retirement System (JRS), and the Judges' Retirement System II (JRS II) for pensions and retiree health care benefits.

Figure SWE-01

State Retirement Contributions

(dollars in millions)

	CalPERS Total	CalPERS GF	Retiree Health & Dental Total	Retiree Health & Dental GF	CalSTRS Total	CalSTRS GF	JRS Total	JRS GF	JRS II Total	JRS II GF

1/ Includes repayment of $500 million from 2003-04 Supplemental Benefit Maintenance Account withholding/lawsuit loss (interest payments not included).

2/ Beginning in 2012-13, California State University pension and health care costs are only included in the Higher Education section and not in this table.

3/ Estimated as of the 2013-14 Governor's Budget.

Improving the Budget Process Through Zero-Basing and Other Tools

Executive Order B-13-11 directed the Department of Finance to modify the state budget process to increase efficiency and focus on accomplishing program goals. The Administration completed several zero-base reviews—for the state hospitals and the state prisons—which led to significant changes being included in the 2012 Budget. The Budget reflects continued implementation of the Executive Order, including:

- The Department of Consumer Affairs is requiring each of its boards, bureaus, and divisions to determine appropriate enforcement and licensing performance measures, with updated data to be provided in each year's budget.
- The California Department of Human Resources is implementing streamlined services for departments. The Department has also expanded the use of consortium examinations, accelerated the approval process for routine personnel issues, streamlined the selection process for career executive assignments, and modernized the training classes and resources available online.
- Both the Department of Transportation (Caltrans) and the Department of Public Health (DPH) are undertaking a multiyear process to zero-base their budgets. The Budget reflects changes to the Local Assistance and Planning Programs within Caltrans, including the consolidation of five programs into a single Active Transportation Program which will simplify and enhance funding for pedestrian and bicycle projects. The results of the first year of the DPH review will be provided this spring.

Additional departments will be undertaking reviews in the coming months, including the Department of Veterans Affairs, the Department of Resources Recycling and Recovery, and the Department of Toxic Substances Control.

This page intentionally blank to facilitate double-sided printing.

Transportation

The Transportation Agency is responsible for addressing mobility, safety, and air quality issues as they relate to transportation. Key priorities include developing and integrating the high-speed rail project into California's existing transportation system and supporting regional agencies in achieving the greenhouse gas emission reductions and environmental sustainability objectives required by state law.

The Agency consists of the following six state entities responsible for administering programs that support the state's transportation system:

- Department of Transportation
- California Transportation Commission
- High-Speed Rail Authority
- Department of Motor Vehicles
- California Highway Patrol
- Board of Pilot Commissioners

The Office of Traffic Safety operates within the Office of the Secretary for Transportation.

The Budget includes total funding of $21.1 billion ($0.2 billion General Fund and $20.9 billion other funds) for all programs administered within the Agency.

The Agency, established as part of the Governor's 2012 Reorganization Plan, becomes operational on July 1, 2013.

Statewide Transportation Infrastructure Needs Assessment

The California Transportation Commission recently published the "2011 Statewide Transportation System Needs Assessment" to identify all transportation funding needs over the next decade. The report identified $538.1 billion in total infrastructure needs, including $172.3 billion in highway and intercity rail needs.

This Needs Assessment identified approximately $24 billion of annual revenues dedicated to transportation infrastructure statewide. Over $10 billion in state and federal funds flow through the annual state budget. Of this budgeted amount, approximately 37 percent supports local transportation needs, including local streets and roads and public mass transit systems. The remaining 63 percent is used for state transportation purposes, primarily the operation, maintenance, and construction of the state highway system. In addition to the amounts provided in the state budget, local agencies receive a $1.4 billion share of state sales tax revenue for transportation purposes, another $1.4 billion in federal support for local transit systems, and 19 counties have exercised the option of passing local sales tax measures which generate another $3.6 billion in revenue for transportation purposes. Local agencies may choose to use some of these local funds for state highway improvements within their jurisdictions. The remaining revenues are from local transit fares and other local sources, such as property taxes, developer fees and local bond proceeds.

Over the past decade, the voters have approved almost $30 billion of general obligation bonds for transportation purposes, including $19.9 billion for Proposition 1B, the Highway Safety, Traffic Reduction, Air Quality, and Port Security Bond Act of 2006, and $9.9 billion for Proposition 1A, the Safe, Reliable High-Speed Passenger Train Bond Act for the 21st Century. As a result, approximately 13 percent of annual state transportation revenues will continue to be dedicated to offsetting debt service costs. These debt service costs are expected to total over $1 billion in 2013-14 and are projected to grow in future years, significantly exceeding the amount of existing transportation funds legally available to offset these costs and therefore creating General Fund expenses.

Beginning in the spring of 2013, the Agency will convene a workgroup consisting of state and local transportation stakeholders to refine the transportation infrastructure needs

assessment, explore long-term, pay-as-you-go funding options, and evaluate the most appropriate level of government to deliver high-priority investments to meet the state's infrastructure needs.

Department of Transportation

The Department of Transportation (Caltrans) has almost 20,000 employees and a budget of $12.8 billion. Caltrans designs and oversees the construction of state highways, operates and maintains the highway system, funds three intercity passenger rail routes, and provides funding for local transportation projects. The Department also maintains 50,000 road and highway lane miles and 12,559 state bridges, and inspects 402 public-use and special-use airports and heliports. The largest sources of funding for transportation projects are excise taxes paid on fuel consumption, federal funds also derived from fuel taxes, and weight fees on trucks.

In the summer of 2012, the new federal Surface Transportation Act (Moving Ahead for Progress in the 21st Century, or MAP-21) was enacted. MAP-21 consolidates several existing transportation programs and provides additional flexibility to allocate federal funds based on state priorities. The Budget maintains the existing federal funding split between state and local transportation agencies. Maintaining the status quo will ensure that existing projects already scheduled for construction will continue.

Significant Adjustments:

- Zero-Base Budget Review—Executive Order B-13-11 directs the Department of Finance to modify the state budget process to increase efficiency and focus on accomplishing program goals. Pursuant to this Executive Order, Finance and Caltrans developed a four-year plan to conduct a zero-base analysis of all Caltrans' programs. The Local Assistance and Planning Programs were reviewed in the fall of 2012. The Budget includes the following proposals that reflect the outcome of the zero-base review:
    - Active Transportation Program—A shift of $134.2 million in state and federal resources and a reduction of five positions in 2014-15 to consolidate five existing programs into a single Active Transportation Program. Active transportation refers to any method of travel that is human-powered, such as walking and bicycling. Currently, there are five separate programs that fund bicycle, pedestrian, and mitigation projects, including the federal Transportation Alternatives Program (which also includes the Recreational Trails Program),

federal and state Safe Routes to Schools Programs, state Environmental Enhancement and Mitigation Program, and the state Bicycle Transportation Account program. Currently, some projects are eligible for grants under several programs, and project sponsors often find it necessary to submit multiple applications for the same project. The new consolidated Active Transportation Program will streamline this process and fund high-priority projects that reduce greenhouse gas emissions consistent with the objectives of Chapter 728, Statutes of 2008 (SB 375), as well as provide safety benefits.

- Local Assistance Program—A reduction of $1.5 million and 20 positions associated with the implementation of various efficiency measures. The Budget proposes to establish staffing levels that are consistent across 12 district offices, shift $13.4 million from state funds to local federal funds for state costs that support local transportation projects, and conduct an audit by the California Department of Human Resources to ensure position classifications are appropriate for the work being performed. In addition, the California Transportation Commission intends to revise performance measures in the 2014 State Transportation Improvement Program guidelines to improve the effectiveness of the state's transportation investments for mobility and greenhouse gas emission goals, as well as align with the federal performance measures currently being developed by the U.S. Department of Transportation.

- Planning Program—An increase of $8.4 million and ten positions to address additional workload and implement various efficiency measures. The Budget proposes to streamline and standardize Caltrans planning documents, reduce administrative costs for existing grant programs, conduct a position classification audit by the Department of Human Resources, and add additional positions to complete necessary project initiation documents. Beginning July 1, 2013, the Planning Program will implement a task-based timesheet to ensure that workload tasks are fully captured and charging practices are appropriately tracked and maintained. As more accurate workload information becomes available and efficiency measures are implemented, Finance and Caltrans will reevaluate the resources needed to support the Planning Program.

- Continue Miscellaneous State Highway Account Revenues for Transportation Debt Service—A transfer of $67 million in special fund revenue to partially offset General Fund transportation debt service costs. The State Highway Account generates a portion of its revenue from sources other than excise taxes on gasoline, such as rental income and the sale of surplus property. Since 2010-11, this revenue

source has been used to offset General Fund debt service costs on specified general obligation transportation bonds. The use of non-excise tax revenue is statutorily authorized for this purpose through 2012-13. The Budget proposes to continue to offset transportation debt service costs with this revenue source on a permanent basis.

High-Speed Rail

The High-Speed Rail Authority is responsible for the development and construction of a high-speed passenger train service between San Francisco and Los Angeles/Anaheim (Phase I), with extensions to San Diego and Sacramento and points in-between (Phase II). Proposition 1A, enacted in November 2008, authorizes $9 billion in bond proceeds for the rail lines and equipment, and an additional $950 million for state and local feeder lines. The federal government has also awarded the Authority nearly $3.5 billion, most of which has been designated to fund portions of the project in the Central Valley.

The 2012 Budget Act appropriated approximately $8 billion for the high-speed rail project for the following purposes:

- $5.8 billion for the first phase of the Initial Operating Section from Madera to Bakersfield.
- $1.1 billion for early improvement projects to upgrade existing rail lines in Northern and Southern California, which will lay the foundation for future high-speed rail service as it expands into these areas.
- $819.3 million for connectivity projects to enhance local transit and intercity rail systems that will ultimately link to the future high speed rail system.

Since the enactment of the Budget Act, significant progress on the project has been made:

- In September, the Federal Railroad Administration approved the necessary environmental impact assessments for the Merced to Fresno alignment.
- The public comment period for the draft environmental assessments for the Fresno to Bakersfield alignment concluded in October.
- The Authority has started to solicit bids from private contractors to begin the right-of-way land acquisition phase of the project.

- The Authority is continuing to identify early "bookend" investments that will generate immediate benefits and, through blended service, enhance future high-speed rail ridership. Projects currently being evaluated include the electrification of the Caltrain corridor in Northern California and regional rail improvement projects, such as grade separations, in Southern California. Final selection of specific projects and lead agencies will be completed by the end of the current fiscal year.
- Initial construction work is scheduled to begin in the Central Valley during the summer of 2013.

As noted in the Authority's revised 2012 Business Plan, additional funding will be necessary to complete the Initial Operating Section from Merced to the San Fernando Valley. Cap and Trade funds will be available as a fiscal backstop. For more discussion on the Administration's Cap and Trade investment plan, see the Cap and Trade section in the Environmental Protection Chapter.

Department of Motor Vehicles

The Department of Motor Vehicles (DMV) promotes driver safety by licensing drivers, and protects consumers and ownership security by issuing vehicle titles and regulating vehicle sales. The Budget proposes $991.5 million, all from non-General Fund sources, and 8,209 positions for support of DMV.

Significant Adjustment:

- The Budget proposes $980,000 and two positions for start-up costs related to the implementation of Chapter 570, Statutes of 2012 (SB 1298), which authorizes the operation of autonomous vehicles on public roads. SB 1298 requires DMV to adopt regulations for approval of applications to operate an autonomous vehicle by 2015. These regulations will include any testing, equipment, and performance standards the Department concludes are necessary to ensure the safe operation of autonomous vehicles with or without the presence of a driver inside the vehicle. This proposal includes a $750,000 contract with the University of California, Berkeley to assist in the development of the regulations.

Legislative, Judicial, and Executive

Governmental entities classified under the Legislative, Judicial, and Executive section are either established as independent entities under the California Constitution or are departments that operate outside the agency structure. Constitutionally established bodies include the Legislature, the Judicial Branch, Governor's Office, and Constitutional Officers.

The Budget includes total funding of $7.6 billion ($2.5 billion General Fund and $5.1 billion other funds) in 2013-14 for all programs included in this area.

Judicial Branch

The Judicial Branch consists of the Supreme Court, courts of appeal, trial courts, and the Judicial Council. The state-level judiciary receives most of its funding from the General Fund. The trial courts are funded with a combination of funding from the General Fund, county maintenance-of-effort requirements, fines, fees, and other charges.

Since 2007-08, ongoing state General Fund support for the Judicial Branch has been reduced. However, the Administration, the Legislature, and the Judicial Council have mitigated these reductions through a mix of permanent and one-time offsets, including transfers from special funds, fee increases, and use of trial court reserves. Further, 2011 Realignment removed a fast growing program from the trial court budget—trial court security. Expenditures for the trial courts have remained relatively flat as illustrated in Figure LJE-01.

Figure LJE-01
Judicial Branch Expenditures, State Funds
Since 2007-08
(Dollars in Thousands)

Judicial Branch Expenditures by Program	2007-08 Actual	2010-11 Actual	2011-12 Actual	2012-13 Estimated	2013-14 Governor's Budget	2007-08 vs. 2013-14

[1] Due to availability of data, all offsets may not be displayed.

[2] For comparison purposes, court security costs for 2007-08 through 2010-11 are removed from trial court expenditure totals due to the realignment of court security costs in 2011-12 and ongoing.

The 2012 Budget Act limited trial courts to a 1 percent reserve by the end of fiscal year 2013-14. The Trial Court Funding Workgroup, called for in the May Revision to examine the state's progress in achieving the goals outlined in the Trial Court Funding Act of 1997, has begun its evaluation.

The Budget continues the practice of mitigating General Fund reductions through offsets and redirections of available resources. However, beginning in 2014-15, reserves and fund balances will mostly be exhausted, which will require trial courts to make permanent changes to achieve roughly $200 million in savings needed to achieve structural balance.

Significant Adjustments:

- The 2012 Budget Act limited trial court reserves to 1 percent beginning on July 1, 2014. The spending down of court reserves offsets General Fund spending on a dollar-for-dollar basis. The state's fiscal condition necessitates continued

prudence; therefore, the Budget uses a $200 million transfer from the Immediate and Critical Needs Account to support trial court operations as the courts adapt to the new reserve policy. This transfer will delay additional courthouse construction projects up to one year, but will allow some of the most critical projects to continue, as determined by the Judicial Council.

- Long Beach Courthouse—An increase of $34.8 million Immediate and Critical Needs Account in 2013-14 to fund the new Long Beach Courthouse service fee payment.
- Trial Court Efficiencies—The Budget includes a range of statutory changes that will reduce workload through administrative efficiencies, increase user fees to support ongoing workload at the trial courts, and assist the Judicial Branch in effectively managing monthly trial court cash flow issues.

California School Finance Authority

The California School Finance Authority provides facilities and working capital financing to school districts, community college districts, county offices of education, and charter schools.

Significant Adjustment:

- Charter Schools—An increase of $92 million Proposition 98 General Fund local assistance, $12.4 million Charter School Revolving Loan Fund, and $175,000 non-Proposition 98 General Fund to reflect the realignment of the Charter School Facility Grant Program and the Charter School Revolving Loan Program from the Department of Education to the Authority. Since the Authority successfully administers similar programs, this consolidation will create efficiencies by taking advantage of the Authority's expertise and proven effectiveness in administering these types of programs.

This page intentionally blank to facilitate double-sided printing.

Business, Consumer Services, and Housing

The Business, Consumer Services, and Housing Agency's mission is to assist, educate, and protect consumers, as well as regulate businesses. Among its many responsibilities, the Agency oversees the following departments that license more than 3.3 million Californians in more than 250 different professions:

- Department of Consumer Affairs
- Housing and Community Development
- Department of Fair Employment and Housing
- Department of Business Oversight
- Department of Alcoholic Beverage Control
- Alcoholic Beverage Control Appeals Board
- California Horse Racing Board
- Alfred E. Alquist Seismic Safety Commission

The Budget includes total funding of $1.1 billion ($20 million General Fund and $1.1 billion various funds) for the Agency.

The Agency, established as part of the Governor's 2012 Reorganization Plan, becomes operational on July 1, 2013.

Department of Consumer Affairs

The Department of Consumer Affairs (DCA) oversees a wide variety of Boards and Bureaus that certify, register, and license individuals and entities that provide goods and/or services in the state. The overall purpose of DCA is to promote a fair and competitive marketplace in which consumers are protected. DCA provides exams and licensing as well as mediation and enforcement of consumer complaints. When appropriate, cases are referred to the Attorney General's office or other law enforcement authorities for administrative action, civil and/or criminal prosecution.

There are currently 26 boards, 9 bureaus, 2 committees, a certification program, and a commission under the broad authority of DCA.

Performance-Based Budgeting

Executive Order B-13-11 directs the Department of Finance to modify the state budget process to increase efficiency and focus on accomplishing program goals. Pursuant to this Executive Order, Finance and DCA developed a multi-year plan to evaluate the performance of DCA's programs. As part of the plan, DCA will:

- Require that all of its boards, bureaus, and divisions undergo a program evaluation to determine appropriate enforcement and licensing performance measures. DCA has already begun a pilot program to conduct such evaluations of two of its programs—the Bureau of Security and Investigative Services and the Dental Board of California.
- Require that all of its boards, bureaus, and divisions have well-developed and up-to-date strategic plans.
- Include additional information in the 2013-14 Governor's Budget which highlights DCA's enforcement targets and provides two years of actual enforcement performance data. This will track the amount of time it takes between a complaint being received by a board or bureau and its resolution. Once DCA's licensing and enforcement information technology program, BreEZe, begins implementation in March 2013, DCA will be able to uniformly track the licensing data of its boards and bureaus. DCA plans to include the licensing performance categories and targets in the 2014-15 Governor's Budget and will begin displaying licensing data in the 2015-16 Governor's Budget.
- Focus on those programs that are unable to reach their performance targets and identify processes that can be streamlined and improved.

Labor and Workforce Development

The Labor and Workforce Development Agency addresses issues relating to California workers and their employers. The Agency is responsible for labor law enforcement, workforce development, and benefit payment and adjudication. The Agency works to combat the underground economy and to help legitimate businesses and workers in California.

The Budget includes total funding of $17.5 billion ($329 million General Fund and $17.2 billion various other funds) for the Agency.

Employment Development Department

The Employment Development Department (EDD) administers the Unemployment Insurance (UI), Disability Insurance (DI), and Paid Family Leave programs and collects payroll taxes from employers, including the Personal Income Tax. EDD connects job seekers with employers through job services programs and one-stop service centers and provides employment training programs through the Employment Training Panel and the Workforce Investment Act of 1998. To support the Department, the Budget includes $16.9 billion ($313.3 million General Fund), which reflects a net decrease of $1.5 billion as compared to the 2012 Budget Act. This change is due primarily to a $1.6 billion reduction in UI benefits as a result of the end of the federal UI extensions in December 2013 and a reduction in the unemployment rate, as well as $42.4 million in other adjustments, including an increase in Disability Insurance benefit payments.

Unemployment Insurance Program

The UI program is a federal-state program that provides weekly payments to eligible workers who lose their jobs through no fault of their own. Benefits range from $40 to $450 per week for up to 26 weeks depending on earnings during a 12-month base period. To be eligible, an applicant must have received enough wages during the base period to establish a claim, be totally or partially unemployed, be unemployed through no fault of his or her own, be physically able to work, be seeking work, be immediately available to accept work, and meet eligibility requirements for each week of benefits claimed.

As a result of the recession, the federal government authorized the Emergency Unemployment Compensation Program, which provided payments to unemployed individuals who had exhausted their regular unemployment benefits. When the first tier of federally funded extension benefits became available in California in July 2008, a person could qualify for up 99 weeks of benefits when combining the federal extensions with the state's regular 26 weeks of benefits. As of November 2012, more than 900,000 unemployed workers in the state had already exhausted their available unemployment benefits. The U.S. Congress and the President have agreed to extend the Emergency Unemployment Compensation Program through 2013, benefiting approximately 400,000 jobless Californians.

The UI program's financing structure was designed to build sufficient reserves during times of economic expansion so that the fund balance could be drawn against during periods of economic contraction. However, as benefit levels were increased starting in the early 2000s with no changes to the underlying revenue structure, the financing structure has not been robust enough to build sufficient reserves. As of January 2009, the state's UI Fund was exhausted due to this imbalance between benefit payments and annual employer contributions. To continue to make UI benefit payments without interruption, EDD began borrowing funds from the Federal Unemployment Account. The UI Fund deficit was $9.9 billion at the end of 2011 and is projected to be $10.2 billion at the end of 2013.

While annual interest payments were waived under the American Recovery and Reinvestment Act for 2010, interest payments of $303.5 million and $308.2 million were paid in 2011 and 2012, respectively. The interest payment must come from state funds. Given the General Fund condition in those years, loans were authorized from the Unemployment Compensation Disability Fund to the General Fund to pay for the UI expense. The interest payment for September 2013 is estimated to be $291.2 million.

Interest will continue to accrue and be payable annually until the principal on the UI loan is repaid.

The UI program's financing structure has not been modified since 1984. Since then, the state's taxable wage ceiling has remained at the federal minimum of $7,000 while the average weekly wage and minimum wage have more than doubled. At $7,000, California is among the lowest in the nation, well below the median taxable wage ceiling of $12,000. When the state's maximum tax rate of 6.2 percent is applied to its taxable wage ceiling of $7,000, its maximum tax liability per employee of $434 is the second lowest in the nation. The state's maximum weekly benefit was increased from $230 to its current level of $450 in 2005, and is in the top one-third of the nation. California's average weekly benefit amount of $294 remains at the national median. With the high rate of employment, more unemployed workers are getting higher benefits while employer contributions have remained static, creating the UI Fund imbalance.

Pursuant to federal law, a reduction in the employer tax credit was triggered in 2012 as a mechanism to begin repaying the federal loan. The federal employer tax credit was reduced from 5.4 percent to 5.1 percent because of the UI Fund deficit and will continue to decrease by 0.3 percent each year that the state maintains an outstanding federal loan balance. To address this deficit, the Secretary for Labor and Workforce Development will begin a series of meetings to bring together key stakeholders, including business and labor by February 1, 2013. This effort will identify preferred alternatives to meet annual federal interest obligations, repay the federal loan, and return the state's UI Fund to solvency.

Significant Adjustments:

- Revised UI Benefit Payments—Total benefit payments will be $12.9 billion in 2012-13 and $9.5 billion in 2013-14, which reflect the recent extension of federal benefits through December 2013 and a reduction in the unemployment rate.
- Revised DI Benefit Payments—The Budget includes an increase of $66.7 million in 2012-13 and $225.9 million in 2013-14 for DI benefit payments.
- Enhanced Data Sharing—As part of a review of revenue collection functions of the Franchise Tax Board and EDD, additional data-sharing opportunities have been identified in the near term that will increase revenues. The Budget includes an increase totaling $2 million in various payroll taxes, including increased penalty assessments and interest of $649,000 as a result of these data sharing efforts.

Department of Industrial Relations

The Department works to improve working conditions, enforces laws relating to wages, hours, conditions of employment, and workers' compensation, and adjudicates workers' compensation claims. The Budget includes $586.1 million ($2.5 million General Fund) to support the Department, which reflects an increase of $153.6 million compared to the 2012 Budget, primarily attributed to workers' compensation reform efforts, including a $120 million increase for permanent disability payments as part of the return-to-work program.

Significant Adjustments:

- Workers' Compensation Reform Implementation—An increase of $152.9 million in the Workers' Compensation Administration Revolving Fund and 82 positions to implement the reforms prescribed in Chapter 363, Statutes of 2012 (SB 863). This includes a $120 million increase for permanent disability payments as part of the Special Earnings Loss Supplement program, also known as the return-to-work program. These resources will support the reforms to medical provider networks, workers' compensation liens, fee schedules, medical care administrative procedures, permanent disability benefits, the Special Earnings Loss Supplement program, and independent medical and bill review processes.
- Workers' Safety and Labor Standards Enforcement—The Budget proposes the elimination of the July 1, 2013 sunset date for the employer surcharge for the Occupational Safety and Health Fund and the Labor Enforcement and Compliance Fund to permanently fund these programs. These programs, which include investigations, inspections, and audits, protect lawful employers from unfair competition while ensuring employees are not required or permitted to work under unlawful conditions.
- Elimination of the Targeted High Hazard Assessment—This proposal replaces the $9.1 million in revenues from this assessment with a $9.1 million increase in the Occupational Safety and Health Fund assessment. This will result in all safety, workplace injury prevention, and enforcement efforts being funded through this single assessment.
- Compliance Monitoring Unit—The unit was created in 2009 to ensure prevailing wages are paid by contractors on public works projects. The monitoring costs were to be paid from specified bond funds that support projects. These revenues have not been sufficient to meet program requirements. The Budget includes various

strategies to stabilize the unit, including (1) a redirection of $2.5 million General Fund to the unit from worker's safety and labor standards enforcement activities, with a corresponding backfill to those programs from the employer surcharge, (2) a $5 million loan from the Targeted Inspection and Consultation Fund, and (3) cost recovery from other sources that support these public works projects.

This page intentionally blank to facilitate double-sided printing.

Government Operations

The Government Operations Agency's mission is to improve management and accountability of government programs, increase efficiency, and promote better and more coordinated operational decisions.

The Agency oversees the following nine entities:

- Department of General Services
- Department of Human Resources
- Department of Technology
- Office of Administrative Law
- Franchise Tax Board
- State Personnel Board
- Victim Compensation and Government Claims Board
- California Public Employees' Retirement System
- California State Teachers' Retirement System

The Budget proposes total funding of $36 billion ($741.7 million General Fund) and 14,810.7 positions for all programs included in this Agency.

The Agency, established as part of the Governor's 2012 Reorganization Plan, becomes operational on July 1, 2013.

Franchise Tax Board

The Franchise Tax Board (FTB) is tasked with administration of the state's personal income tax and corporations tax. Activities include tax return processing, filing enforcement, audit, and collection of delinquent amounts owed.

Significant Adjustments:

- Enterprise Data to Revenue (EDR) Project—An increase of $152.2 million General Fund and 184 positions in 2013-14 and $88 million and 220 positions in 2014-15 to continue implementation of the EDR project. EDR is entering the third year of a six year benefits-based IT project with projected total fixed costs of $479 million. FTB has expended approximately $61 million to date. The project generated revenues of $115.7 million in 2011-12, nearly double the initial estimate of $63 million. FTB estimates the project will generate additional General Fund revenues of $4.9 billion through 2017. Ongoing revenues are estimated to be in excess of $1 billion annually when the project is fully implemented.
- Enhanced Data Sharing—As part of a review of the revenue collection functions of FTB and the Employment Development Department (EDD), additional data-sharing opportunities have been identified in the near term that will increase revenues. The Budget includes an increase in Personal Income Tax collections of $3 million General Fund by FTB and $800,000 General Fund by EDD as a result of these efforts.

Department of General Services

The Department of General Services (DGS) provides centralized services and oversight activities to state agencies over a broad spectrum of areas, including: management of state-owned and leased real estate, maintenance of state-owned buildings, approval of architectural designs for local schools and other state-owned buildings, a quasi-judicial court that hears administrative disputes, publishing services, management of the state's fleet, and procurement of commodities, services, and equipment. These activities are largely funded through fees that are charged to the client departments.

In 2012-13, DGS implemented better business practices and efficiencies that resulted in either cost avoidance or savings for client departments. In 2013-14, DGS continues these efforts by making further significant adjustments to various programs to maximize the state's resources and promote budgetary savings. As part of these efforts, DGS has taken steps to reduce rental costs for state departments in leased space by renegotiating building leases. Since 2009, DGS has executed 333 leases that result in over $152 million of reduced rent. DGS also led the Governor's effort to reduce the state's fleet by over 7,000 vehicles and is working to build a more sustainable state government fleet by utilizing zero-emission vehicles and providing electric vehicle charging stations.

Significant Adjustments:

- Program Reductions—A decrease of $5.6 million and 22.5 positions to reflect operational efficiencies and the elimination of non-mission critical services.
- Office of Public School Construction (OPSC) Reduction—A decrease of $1.6 million state bond funds and 20 positions to align administrative resources with expected workload for the School Facilities Program. State bond fund authority in the core new construction and modernization School Facilities Programs will be fully exhausted in 2012-13. Additionally, the OPSC has been directed by the State Allocation Board to no longer fully process school district applications for the new construction and modernization of school facilities. However, there is still workload for OPSC moving forward associated with active project closeouts, processing project appeals, reporting for subcommittees, processing fund releases, and project expenditure reviews.
- Special Repairs—An increase of $11 million for various deferred maintenance projects in state-owned buildings to enable DGS to consolidate agencies and departments into state-owned facilities instead of leased facilities and to comply with the Americans with Disabilities Act.

This page intentionally blank to facilitate double-sided printing.

General Government

The General Government Section includes multiple departments, commissions, and offices responsible for the operation of various government programs. The Budget includes total funding of $4 billion ($470.2 million General Fund and $3.5 billion various funds) for these entities.

California Department of Veterans Affairs

The California Department of Veterans Affairs promotes and delivers services for California veterans and their families. Specifically, the Department provides aid and assistance to veterans and their families for presenting claims for federal veterans' benefits, provides California veterans with direct low-cost loans to acquire farms and homes, and provides the state's aged and disabled veterans with rehabilitative, residential, and medical care services in the California Veterans Homes. California owns and operates eight veterans homes located in Yountville, Chula Vista, Barstow, Lancaster, Ventura, West Los Angeles, Redding, and Fresno. These homes provide residential and medical care services to honorably discharged California veterans who served on active duty and are over the age of 55 or disabled. The recently completed homes in Redding and Fresno will begin admitting residents in the fall of 2013. The Budget includes 2,428.9 positions and total funding of $406 million ($316 million General Fund and $90 million various funds) for the Department.

Significant Adjustment:

- Continuing Activation of Redding and Fresno—The Budget includes $27 million for the continuing activation of the veterans homes in Redding and Fresno, both of which will begin admitting residents in the fall of 2013. This proposal will be refined in the spring to reflect the detailed operational requirements for the homes.

Public Utilities Commission

The Public Utilities Commission (PUC) regulates critical and essential services such as privately owned telecommunications, electric, natural gas, and water companies, in addition to overseeing railroad/rail transit and moving and transportation companies. The Budget includes $1.4 billion and 1,052.9 positions for the PUC.

Audit of PUC

As a result of the statewide review of special funds, the Department of Finance conducted an audit of PUC budgeting practices and procedures. Some of the observations in the audit include:

- Policies and procedures are not adequate.
- Lines of authority, reporting, and responsibility are unclear.
- Forecasting methodologies need improvement.
- The budget office is insufficiently staffed.
- Staff performing budget functions are not properly trained.

A corrective action plan needs to be developed to remedy variances between the PUC's, the Governor's Budget's, and the State Controller's Office's records. The Department of Finance will be working closely with the PUC to address the observations in the audit and ensure the PUC's financial records are accurate and reliable. The Budget includes the addition of three positions and $210,000 from various special funds to develop and implement improvements to PUC budget administration.

Demographic Information

California has long been a destination state for both domestic and international migrants. Growth due to migration, combined with natural increases (more births than deaths), has historically resulted in substantial population gains. California added more residents than any other state in every decade between 1920 and 2000. The phenomenal growth that occurred in California between 1980 and 1990 was the largest for any state in the history of the United States, both in additional residents (6.1 million) and in terms of the state's share of US growth for a single decade; California accounted for 27.5 percent of total US population growth that decade. California also had the second largest numerical growth in a decade for any state in the country, when the state added 5.1 million people during the 1950's. Between 2000 and 2010, California's population growth slowed somewhat, but still added the second largest number of people, 3.4 million, behind Texas, which added 4.3 million.

The population growth in the United States also slowed between 2000 and 2010 compared to the previous decade, as demographic and economic issues contributed to slower growth rates. Although interstate migration does not affect the total US population, a national decline in interstate migration contributes to less growth in some states, including California. The reduction in interstate migration is especially noticeable among young adults between 18 and 34 years of age, who are traditionally the largest segment of interstate migrants. The decline in housing-related employment also had a ripple effect on domestic and international migration, affecting California and other states where reduced construction was most severe. The influence of some of these recent factors contributing to slower growth may already be waning, but other issues may be

more structural and long-term. The economic downturn has reversed, unemployment is gradually shrinking and employment is growing. These factors will reduce out-migration and increase net in-migration; however, declines in the "total fertility rate" (average births per woman) have led to fewer total births each year in California since 2007. Given the lower rates and the aging population structure in the United States and California, any future periods of rapid growth will likely depend on increases in migration. Nevertheless, California continues to experience overall population growth and maintains its potential for more growth relative to most other states in the coming years.

Part of California's population growth is connected to its location. The state not only has a common border with Mexico, but shares space on the Pacific Rim with several countries which have been key in California's historical development and continue as a source of immigration. Immigration contributes to California's racial and cultural diversity and will help infuse the labor force as baby-boomers retire.

Population Forecast

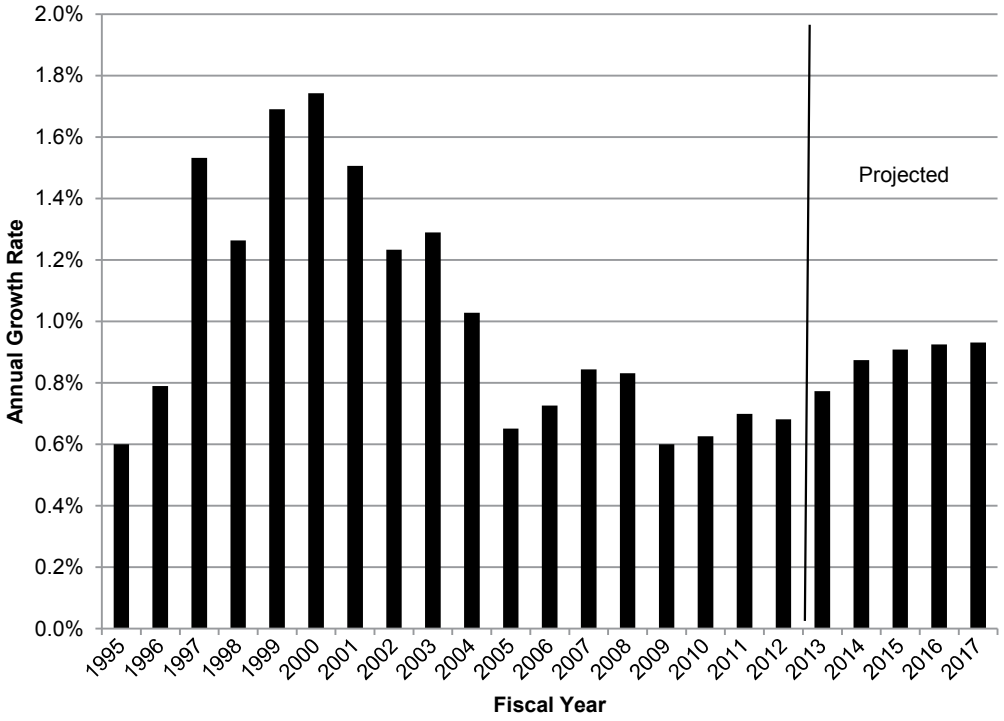
There were an estimated 37.8 million people residing in California as of mid-2012. California continues to experience a moderate growth rate, adding 0.7 percent in the last fiscal year. During the year, the United States also added 0.7 percent to the population. Half of all states grew 0.6 percent or less, with nine either losing population or growing by less than 0.2 percent. Although the rate of growth was not large in comparison with California's historical rates, the state experienced the second largest total population increase of any state in the nation:

- The estimate of the population on July 1, 2012 is 37,826,000.
- The population is projected to be 38,118,000 by July 2013 and 38,452,000 by July 2014, reflecting short-term growth rates of 0.8 percent in 2013 and 0.9 percent in 2014.

The forecast assumes that through the next five years, the state will grow at a slightly higher rate than over the last few years, averaging 340,000 residents annually through 2017. Natural increase will account for most of the growth during this time. Net migration (people moving to California from other states and countries, less those moving out) is projected to gradually increase as economic conditions continue to improve. By July 2017, California will have added 1.7 million people and have a population of over 39.5 million, a five-year growth rate of 4.5 percent.

Figure DEM-01 displays the projected annual growth rates through 2017.

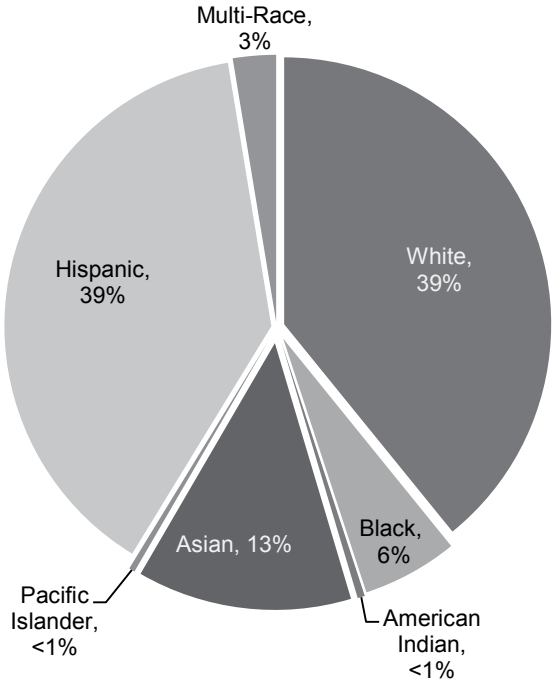
Figure DEM-01
California's Annual Population Growth Rate



As the state's growth patterns change, the age and race distribution of California's population continue to transform. It is projected that in July 2013, the non-Hispanic White and the Hispanic population will each represent 39 percent of California's population. Later in the fiscal year, for the first time since California became a state, the Hispanic population will become the largest group in California. This shift is due primarily to variations in demographic patterns, including fertility, age structure, and migration. In July 2013, of the non-Hispanic White population, 43 percent will be at least 50 years of age, while 19 percent of Hispanics will be 50 or older.

Figure DEM-02 shows the racial/ethnic composition in California in 2013.

Figure DEM-02
Race & Ethnicity Distribution, July 2013



Population growth rates vary significantly by age group. The state's projected total five-year growth rate of 4.5 percent is lower than the anticipated 6.2 percent growth in the preschool-age group. The school-age group will decline by 0.9 percent, and the college-age group will increase by 0.2 percent. The working-age population will grow by 700,000 or 3.6 percent. The population of the retirement-age group, those 65 and older, will expand rapidly (19.3 percent). The retirement-age growth will be concentrated in the 65 through 74 year olds, with a growth rate of 27 percent.

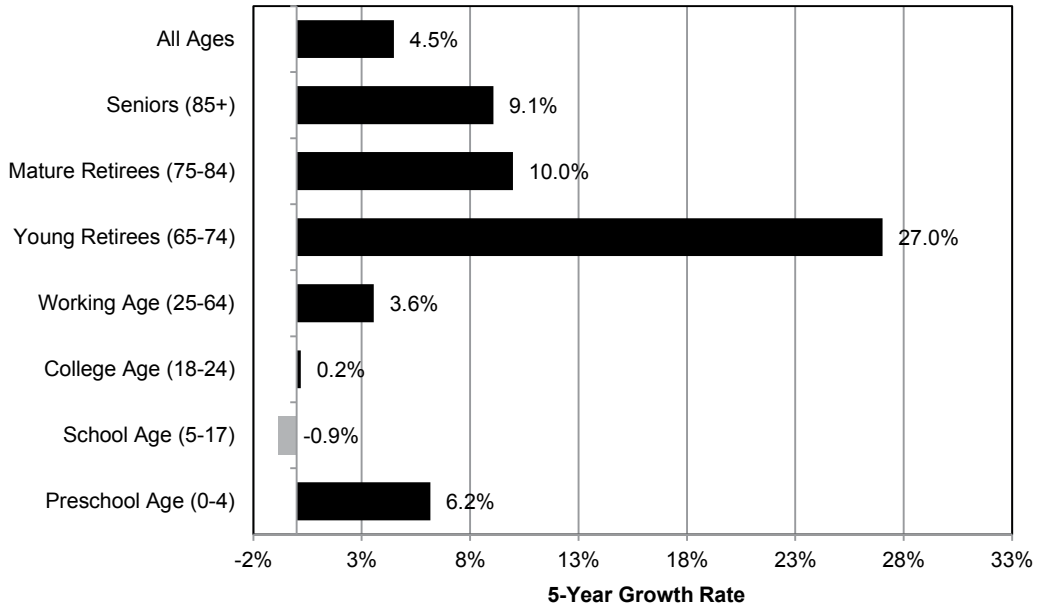
Figure DEM-03 shows the projected cumulative growth by age group through 2017.

California's Demographic and Economic Futures Are Linked

The United States is beginning to undergo some of the most dramatic demographic changes since the nation was founded. Increasing life expectancies and declining birth rates are changing the age structure of the population. Growth patterns and aging will vary by race and ethnicity. Immigration and the somewhat higher birth rates of

Figure DEM-03

Projected California Population Growth Rate by Age Group (2012-2017)



immigrants will prevent a declining population, but will not stop the effect of the aging of the baby-boomers. As baby-boomers entered schools and then the workforce, society adapted to their requirements and boomers helped frame the current workforce and culture. Further adaptations will be necessary to accommodate an increasingly large number of retirees.

The demographic shifts California is experiencing are significant and part of the demographic evolution of the United States. As the primary gateway to the United States, California enjoys a younger population than most states. In 2010, only five states had a lower percentage of the population who were at least 65 years old. Despite this relative youth, California's first baby-boomers turned 65 in 2011 and the state is growing older. The age structure of the workforce has aged along with the baby-boomers.

California is still the agricultural capital of the United States, but agricultural employment is a smaller part of California's occupational picture than 50 years ago. Manufacturing is a vital part of California, but many manufacturing jobs require far more training because of technological innovations. The economy and demography in California are linked and sustaining economic progress will require that all components of the workforce be prepared for the jobs that will drive California's economic future.

As a substantial proportion of Californians enter their retirement years, baby-boomers will benefit from medical research and training of the younger population. The future age distribution will not be evenly split between races or those of Hispanic origin. One of the positive attributes of California's cultural diversity is that not everyone gets old at once. That also means the workplace will change, as many in the non-Hispanic White population retire, they will be replaced by a more diverse workforce. For California to continue its role as the gateway to America and to continue to attract migrants seeking a better future, California policies must maintain leadership in developing employment and educational opportunities.

Economic Outlook

While the current economic recovery is slower than previous recoveries, many sectors of the economy are improving. Home values are rising, credit conditions are improving, and household spending—typically the principal driver of economic recovery—is strengthening. Job creation, while still modest, also continues to improve.

However, as 2012 came to a close, uncertainty was building over domestic fiscal policies and global economic developments that tempered business investment. The effects of Hurricane Sandy also softened economic growth at the end of 2012.

This outlook assumes the economy will not incur sharp across-the-board federal tax increases or spending cuts in 2013 and that income tax rates rise only for higher income households.

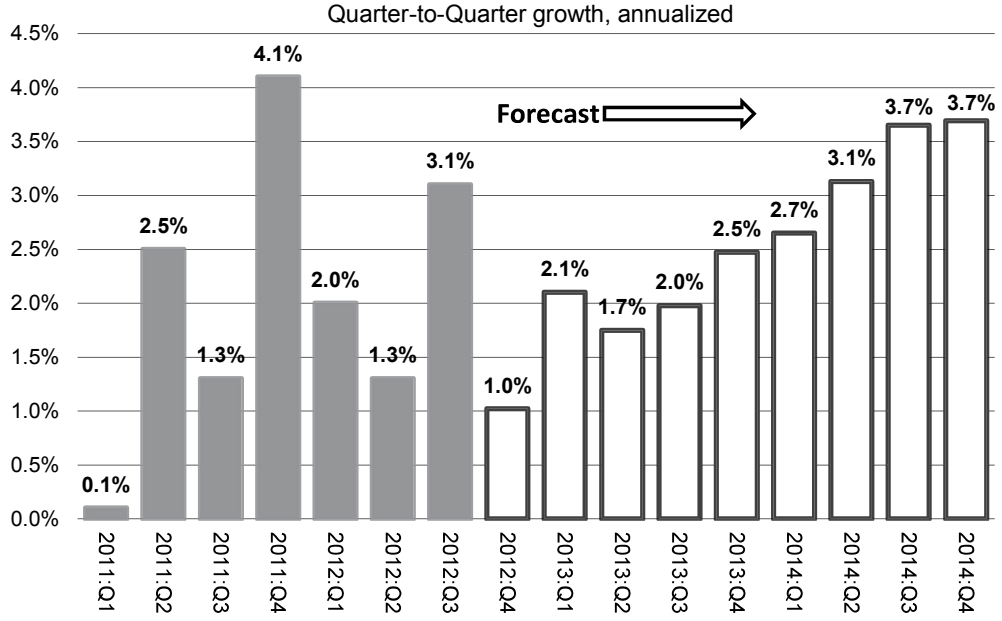
The Nation—Improving Amid Considerable Uncertainty

The nation continues to recover at a slow but steady pace. In addition to real estate, improvements are evident in such sectors as business services, leisure and hospitality, and natural resource extraction. Household formation is recovering in spite of modest employment growth. The demand for housing has spread from rental housing to owner-occupied homes. Home prices have improved in nearly all of the nation's major metropolitan areas. This improvement has improved consumer attitudes.

Job growth accelerated after a mid-year slowdown. The nation added nearly 158,000 jobs each month on average from July through November of 2012, compared to adding 153,000 jobs per month on average during 2011. In light of this modest improvement, the nation's unemployment rate fell toward the end of the year.

Consumer confidence improved steadily in the latter months of 2012. In November, consumer confidence was lifted to its highest level since February 2008.
This improvement translated into stronger consumer spending. In the third quarter of 2012, consumer spending rose by 1.6 percent and contributed 1.1 percentage points to overall Gross Domestic Product growth (Figure ECO-01). In November, retail sales were 3.7 percent above the level a year ago.

Figure ECO-01
U.S. Real Gross Domestic Product
Quarter-to-Quarter growth, annualized



Source: U.S. Bureau of Economic Analysis; CA Department of Finance Governor's Budget Forecast

In contrast to these positive developments, the outlook of many businesses became more cautious in the latter half of the year due to a weaker global economy and rising uncertainty about federal fiscal policy changes. Capital equipment spending is expected to remain an important driver of economic growth, but its momentum weakened toward the end of 2012. For example, spending on equipment and software fell slightly in the

third quarter. The growth of industrial output slowed throughout 2012 and by the year's end was only growing modestly. After rebounding from the effects of Hurricane Sandy, industrial production in November rose 2.5 percent from a year earlier—a much weaker gain than occurred in 2011. Facing a slowing global economy and a strengthening dollar, export growth slowed in 2012. Near the end of the year, there were declines in exports of industrial supplies and materials, computers, motor vehicles and parts, and consumer durable goods.

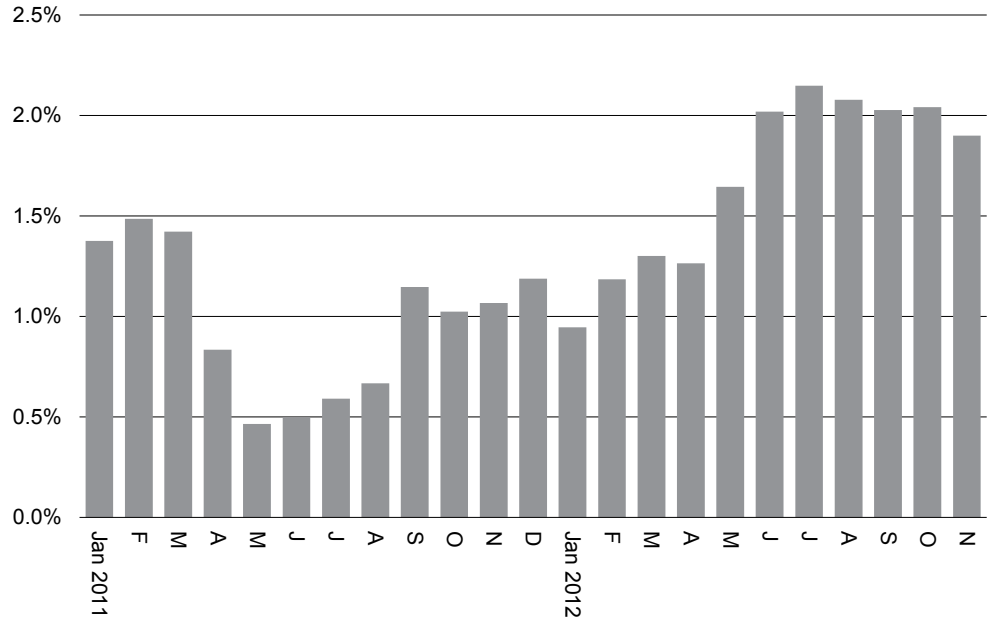
California—A Recovery for Housing

Similar to the nation, California is also in the midst of an economic recovery that is modest by historical standards. However, the state's recovery has also gathered momentum because of better real estate conditions, faster job growth, and improved consumer attitudes. The state's housing market recovery effectively began early in 2012. The median sales price of existing single-family homes sold during the first 10 months of 2012 rose nearly 9 percent from the same months of 2011. The pace of existing home sales also trended up during 2012. These gains were supported by significant reductions in foreclosure activity and limited inventories of homes available for sale. During the third quarter of 2012, the number of Notices of Default recorded on residential properties in California was down over 31 percent from a year earlier and was at the lowest level since the first quarter of 2007.

Employment gains improved in 2012, as shown in Figure ECO-02. During the first 11 months of the year, the state gained an average of 21,200 jobs per month, which is the strongest pace of job growth since 2005. Job growth came entirely from the private sector as government employment continued to decline throughout the year. Even though job gains included high-wage, high-technology industries such as computer systems design and scientific research and consulting, income growth moderated beginning with the last quarter of 2011. Total California personal income is projected to grow from $1,645 billion in 2011 to $1,728 billion in 2012. The growth in personal income included approximately $7 billion in additional wages from the Facebook Initial Public Offering, which accounts for more than 8 percent of personal income growth in 2012.

California personal income has historically grown slightly faster than the nation's as a whole. From 1980 to 2011, California's total personal income grew 6.1 percent per year on average, while the national income grew 6 percent. Over that time, California's personal income has become more concentrated. In 2010, the wealthiest 1 percent of income earners accounted for 21 percent of adjusted gross income compared to 10 percent in 1980.

Figure ECO-02
California Nonfarm Employment
Year-Over-Year Change in Nonfarm Employment



Source: California Employment Development Department

Consumer spending in California also improved in 2012. Taxable retail sales during the first half of 2012 grew 8.8 percent from the same period in 2011. New motor vehicle registrations issued during the first 10 months of 2012 increased over 25 percent from the same months of 2011.

Since the recovery began in 2009, California's economic growth has been dominated by high-technology and export-oriented industries located predominantly in major coastal metropolitan areas. However, in 2012, growth spread to other sectors and regions, thus improving economic conditions throughout the state. During the first 10 months of 2012, 23 of the state's 28 metropolitan areas added jobs. By contrast, only one area posted a job gain in 2010 and only 19 did in 2011. Home prices are recovering in most regions, including many of those that were hardest hit by the housing collapse, such as the Inland Empire and the Central Valley.

California's recovery was initially driven by growing business activity and investment. This trend slowed in 2012 due to China's economic slowdown, concerns about European economic troubles, and rising uncertainty about federal fiscal policies. This has been counterbalanced, however, by better consumer spending and attitudes that resulted from improvements in real estate conditions and modest but consistent job growth.

The Forecast

Both the national and state economies will continue to grow at moderate paces. This forecast assumes that a recession potentially caused by federal fiscal policies is avoided, economic growth in Europe stabilizes, and China and other emerging market economies improve.

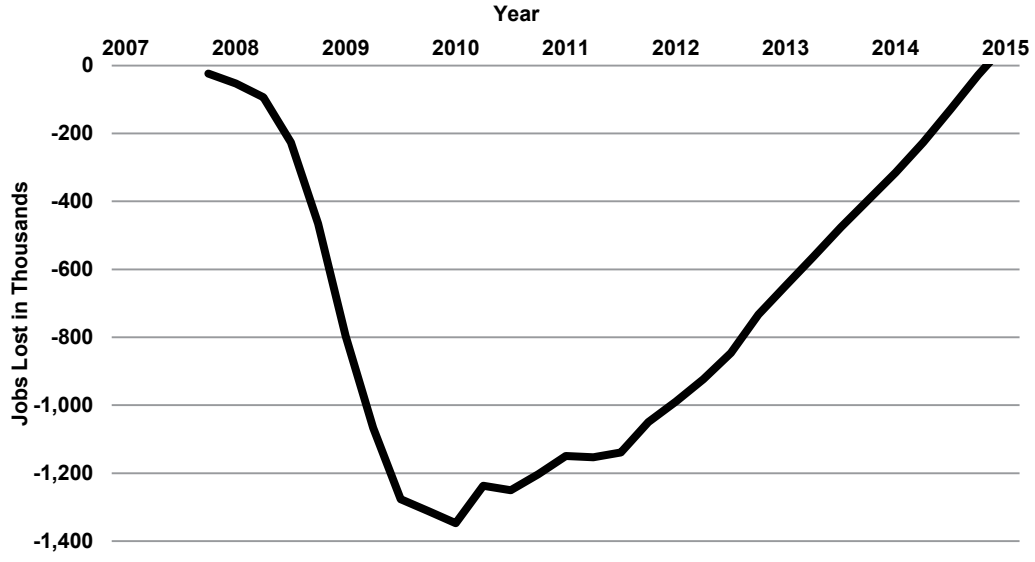
According to the Index of Leading Indicators, the economy should continue to expand at a moderate pace in the near future. The Index is a widely followed economic indicator based on the average of ten economic statistics used to predict the direction of the economy over the next six to nine months. It is generally considered to be a good predictor of recessions and recoveries.

The turnaround of the nation's housing markets coupled with accelerating job growth has strengthened the recovery. As uncertainty over fiscal policy lessens, national economic growth is expected to reaccelerate in the latter half of 2013. Real Gross Domestic Product is forecast to grow 1.8 percent in 2013, 2.8 percent in 2014, and 3.4 percent in 2015.

California's recovery is also expected to improve, with home building and job growth. Nonfarm employment is projected to grow 2.1 percent in 2013, 2.4 percent in 2014, and 2.5 percent in 2015. As shown in Figure ECO-03, California should recover the jobs lost during the recession in the second quarter of 2015, which is two quarters earlier than

Figure ECO-03

Jobs Lost During Recession Not Recovered Until 2015



projected in the prior forecast. Total California personal income is projected to grow by $83 billion or 5.1 percent in 2012.

The principal risk to this outlook is the potential impact of a series of automatic federal tax increases and spending cuts that were set to take effect early in 2013 and the effect of federal actions regarding the debt limit. The forecast, developed in early December, assumed that the federal income tax rate for households earning more than $250,000 per year would return to pre-tax cut levels in 2013 and that payroll tax rates would not be raised at the beginning of 2013. Any effects of federal actions in early 2013 will be incorporated in the May Revision.

See Figure ECO-04 for highlights of the national and California forecasts.

Revenue Estimates

Continued moderate growth in California's economy is expected to produce an improvement in General Fund revenue through the period covered by the Budget. In addition to improving economic conditions, the passage of Proposition 30, The Schools and Local Public Safety Protection Act of 2012, and Proposition 39, The California Clean Energy Jobs Act, increased revenue since the 2012 Budget Act. Together, Propositions 30 and 39 are expected to generate $3.2 billion of General Fund revenue in 2012-13, or 3.3 percent of total General Fund revenue, and a total of $5.8 billion of General Fund revenue in 2013-14, or 5.9 percent of total General Fund revenue.

- Proposition 30 is estimated to increase Personal Income Tax revenues by $3.2 billion in 2011-12, $4.8 billion in 2012-13, and $4.9 billion in 2013-14. It is estimated to increase Sales and Use Tax revenues by $611 million in 2012-13 and $1.3 billion in 2013-14.
- Proposition 39 is estimated to increase Corporation Tax revenue by $440 million in 2012-13 and $900 million in 2013-14.

Figure REV-01 displays the forecast changes between the 2012 Budget Act and the 2013 budget forecast. Revenue is expected to be $95.4 billion in 2012-13 and $98.5 billion in 2013-14. Over the budget window, this is an increase of $2.1 billion, due primarily to a higher forecast for Personal Income Tax. Sales Tax revenue is projected to increase slightly relative to the 2012 Budget Act, while expected Corporate Tax revenues have dropped, even with the additional revenue from Proposition 39. Three-Year Total			**$2,132**	

(a) For purposes of this table, and throughout this chapter, revenue raised through Proposition 30 and transferred into the Education Protection Account are counted as part of General Fund revenue.

(b) The Corporation Tax forecast for the Governor's Budget includes the impact of Proposition 39, which requires multi-state corporations to use the single sales factor method of apportionment. The proposition is expected to generate additional revenue of $440 million in 2012-13 and $900 million in 2013-14. This revenue was not included in the Budget Act forecast.

(c) Other Revenues includes revenue from the state's pick-up estate tax. The Federal Estate Tax, to which the state's tax is linked, was presumed to be reinstated on January 1, 2013. As such the estate tax was estimated to generate $45 million of General Fund revenue in 2012-13 and $290 million of General Fund revenue in 2013-14. However, given federal uncertainty, the Budget did not assume any net revenue from the estate tax.

is forecast to be lower than was previously forecast by $493 million. If the additional revenue from Proposition 39 is backed out, the 2012-13 General Fund revenue forecast is $933 million below the previous forecast. Revenue for 2013-14 is forecast to be about $2.4 billion greater than the amount forecast at the time of the 2012 Budget Act. When the revenue from Proposition 39 is backed out, the 2013-14 General Fund revenue forecast is $1.5 billion above the amount forecast for the 2012 Budget Act. The $98.5 billion in General Fund revenue forecast for 2013-14 is still $4 billion less than the General Fund revenue of $102.6 billion received in 2007-08, the state's peak revenue year.

The forecast includes a shift of capital gains, dividends, and wages from 2013 into 2012 as a result of the expected increase in federal tax rates. The Budget forecast was prepared in early December, before individuals and corporations made final withholding and estimated payments for the 2012 tax year, and before consumers completed their December purchases. The timing of these receipts, coupled with newly enacted changes to the tax system, including Propositions 30 and 39, can have a large impact on state revenues. Additionally, this forecast was finalized before any steps were taken at the federal level to address the pending automatic federal tax increases and automatic spending reductions. The manner in which that situation is resolved could have a significant impact on the nation's and the state's economic recovery, and on expected revenue. The May Revision forecast will reflect more current information, including April tax receipts.

Long-Term Forecast

Figure REV-02 shows the forecast for the three largest General Fund revenues from 2011-12 through 2016-17. Total General Fund revenue from these sources is expected to grow from $80.4 billion in 2011-12 to $113.2 billion in 2016-17. The average year-over-year growth rate for this period is 4.8 percent.

The economic forecast reflects modest but steady growth over the next five years. The projected average growth rate in Gross Domestic Product over the next five years is 2.7 percent, a slightly slower rate than normal for an economic expansion. With the exception of a decrease in the forecast of proprietors' income and national corporate profits, most key drivers of the revenue forecast, such as total personal income, unemployment rate, wages, and the S&P 500, are projected to be slightly improved in both the short- and long-term compared to projected levels or growth rates for the Budget Act forecast.

Figure REV-02
Long-Term Revenue Forecast - Three Largest Sources
(General Fund Revenue - Dollars in Billions)

	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	average year over year growth
Personal Income Tax	$53.8	$60.6	$61.7	$67.6	$72.0	$75.3	7.3%
Sales and Use Tax (a)	$18.7	$20.7	$23.3	$24.9	$26.7	$27.3	1.5%
Corporation Tax	$7.9	$7.6	$9.1	$9.7	$10.2	$10.6	2.3%
Total	**$80.4**	**$88.9**	**$94.1**	**$102.1**	**$108.9**	**$113.2**	4.8%
Growth	-6.5%	10.6%	5.8%	8.5%	6.6%	4.0%	

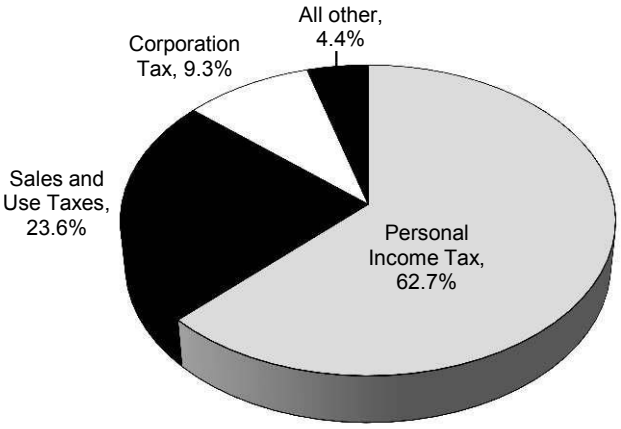
(a) Includes 2011 Realignment of General Fund revenues to locals.

The total revenue generated by these three sources has grown at an average annual rate of 4.5 percent since 1987. This forecast estimates an increase in General Fund revenue of 10.6 percent in 2012-13, 5.8 percent in 2013-14, 8.5 percent in 2014-15, and 6.6 percent in 2015-16. This year-to-year growth pattern reflects, in part, the expiration of temporary taxes and the potential behavioral impact of federal tax law changes, as well as the phase-in of recent tax law changes.

GENERAL FUND REVENUE

In 2013-14, General Fund revenues and transfers represent 71 percent of total revenues reported in the Budget. Figure REV-03 shows the breakdown of General Fund revenues by taxation type. The remaining 29 percent consists of special fund revenues dedicated to specific programs.

Figure REV-03
2013-14 General Fund Revenues and Transfers = $98.5 Billion



Personal Income Tax

The Personal Income Tax (PIT) is the state's largest single revenue source, accounting for 62.7 percent of all General Fund revenues and transfers in 2013-14.

Proposition 30 created three new income tax brackets for families with rates of 10.3 percent for taxable income above $500,000, 11.3 percent for taxable income above $600,000, and 12.3 percent for taxable income above $1,000,000. These new tax brackets are scheduled to be in effect for seven years—tax years 2012 to 2018. Modeled closely on the federal income tax law, California's PIT is imposed on net taxable income—gross income less exclusions and deductions. The tax rate structure is progressive over much of the income spectrum. For the 2011 tax year, the marginal rates ranged from 1 percent to 9.3 percent. From 2012 to 2018, the highest marginal rate will be 12.3 percent.

Income ranges for all tax rates are adjusted annually by the change in the California Consumer Price Index. This prevents taxpayers from moving into higher tax brackets because of inflation without an increase in real income. For the 2012 tax year, this adjustment was a 1.9 percent increase. For the 2013 tax year, the adjustment is projected to be an increase of 2.1 percent. The largest income source for the PIT is wages and salaries. In 2010, taxes attributable to wages and salaries accounted for over 63 percent of PIT revenues. Based on the economic forecast, wages and salaries are expected to rise by an average of 6.2 percent in 2012, followed by 4.6 percent growth in 2013, and 5.7 percent in 2014.

The highest income Californians pay a large share of the state's PIT taxes. For the 2010 tax year, the top 1 percent of income earners paid 40.9 percent of PIT taxes, down from the recent high of 48.1 percent in 2007. The share of total adjusted gross income for this top 1 percent group has increased from 13.8 percent in 1993, to 21.3 percent in 2010. Changes in the income of a relatively small group of taxpayers can have a significant impact on state revenues. In particular, capital gains income is concentrated among the high income earners and can fluctuate significantly from year to year. In the period from 2003 to 2007, capital gains realizations almost tripled from $45.6 billion to $132 billion. Over the next two years they fell to $28.8 billion. Gains from that low point increased 92 percent in 2010 and are estimated to have increased another 23 percent to $68 billion in 2011, just over half of what they were at the peak. Capital gains are expected to see continued growth in the coming years, rising to $83 billion by 2014. Figure REV-04 shows the portion of General Fund revenues from capital gains.

[p] Preliminary

[e] Estimated

Note: Totals may not add due to rounding and exclude revenues from economic recovery bonds.

Consistent with current law, the Budget reflects the potential behavioral impacts of federal tax law changes. The federal Economic Growth and Tax Relief Reconciliation Act of 2001 reduced taxes for dividend income, capital gains, and other income. These tax reductions were set to expire after 2010. However, late in 2010, they were extended through 2012. In addition, a 3.8 percent surtax on specified unearned income will go into effect on January 1, 2013. The Budget assumes that in 2012 some taxpayers will respond to the potential rate changes by accelerating 20 percent of 2013 capital gains into 2012. It is also assumed that 10 percent of 2013 dividends and 1.1 percent of wages will be accelerated to 2012. These changes are projected to increase 2012-13 revenues by $1.8 billion and to reduce 2013-14 revenues by a similar amount.

On May 18, 2012, Facebook, a California corporation, had an initial public offering (IPO) and began trading on the public market. As a result of the Facebook IPO, the Department of Finance prepared estimates for the California PIT revenues related to the sales of stock at the IPO by early investors, the exercise of options at the IPO, the vesting of restricted stock units beginning about six months following the IPO, and the potential exercise of certain stock options following the IPO. Revenues from these sources is estimated to be around $1.3 billion over the three fiscal years from 2011-12 to 2013-14, with the majority in 2012-13 and already received. Sales of stock by early investors, insiders, and employees occurring after the expiration of lock-up periods following the IPO are not included in this $1.3 billion estimate. Based on lower than expected share prices, this estimate is down from the $1.9 billion estimated at the time of the Budget Act.

A portion of PIT revenue is for dedicated purposes and deposited into a special fund instead of the General Fund. Proposition 63, passed in November 2004, imposes a surcharge of 1 percent on taxable income over $1 million. Revenue from the surcharge is transferred to the Mental Health Services Fund and used to fund mental health service programs. Revenues of $1.2 billion are estimated for the 2011-12 fiscal year. Annual revenues of $1.3 billion for 2012-13, and $1.2 billion for 2013-14 are projected. The General Fund and the Mental Health Services Fund shares of PIT revenues for 2011-12 through 2013-14 are shown in Figure REV-05.

Figure REV-05

Personal Income Tax Revenue

(Dollars in Thousands)

	2011-12 Preliminary	2012-13 Forecast	2013-14 Forecast
General Fund	$53,836,409	$60,647,000	$61,746,816
Mental Health Services Fund	1,188,026	1,349,000	1,194,000
Total	**$55,024,435**	**$61,996,000**	**$62,940,816**

Sales and Use Tax

The Sales and Use Tax (sales tax) is expected to generate General Fund revenues of $20.7 billion in 2012-13 and $23.3 billion in 2013-14. Receipts from the sales tax, the state's second largest revenue source, are expected to contribute 23.6 percent of all General Fund revenues and transfers in 2013-14.

- Beginning in fiscal year 2012-13, the figures include forecasted revenue related to the recent passage of Proposition 30, which increased the sales tax rate by 0.25 percentage point from January 1, 2013, to December 31, 2016.
- Effective September 15, 2012, the state modified the application of the use tax by expanding the definition of a "retailer engaged in business in this state". Specifically, this law imposes a use tax collection responsibility for certain out-of-state retailers, particularly internet retailers, who meet specified criteria. The Budget assumes $107 million in General Fund revenue for 2012-13, and $150 million for 2013-14 due to this law change.

Figure REV-06 displays total Sales and Use Tax revenues for the General Fund, and various special funds, for 2011-12 through 2013-14.

Figure REV-06
Sales Tax Revenue
(Dollars in Thousands)

	2011-12 Preliminary	2012-13 Forecast	2013-14 Forecast

Figure REV-07 displays the individual elements of the state and local sales tax rates.

Figure REV-08 shows combined state and local tax rates for each county including special rates for certain cities within those counties.

General Fund revenues beginning in 2010-11 do not include any sales taxes collected from the sale of gasoline because of the fuel tax swap implemented on July 1, 2010, which exempted fuel sales from the General Fund portion of the sales tax (see the Motor Vehicles Fuel Tax section).

Taxable sales, including sales of gasoline, increased by 7.7 percent in 2010-11. Based on preliminary data, it is estimated that taxable sales have increased by 8.3 percent in 2011-12. Growth is expected to continue at 6 percent in 2012-13, followed by 7 percent in 2013-14.

Through the first two quarters of calendar year 2011, the largest contributors to the sales tax base were wholesale trade at 11.5 percent, gasoline stations at 11 percent, and food services and establishments serving alcoholic beverages at 10.8 percent. Other significant contributors to the sales tax base include sales by motor vehicle and parts dealers at 10.5 percent and general merchandise stores at 8.8 percent.

Approximately two-thirds of the sales tax is related to consumer spending and paid by households. Such purchases are influenced by employment trends and interest rates. Given that much of the sales tax base is comprised of nonessential purchases that can be postponed or cancelled, consumer confidence can have a significant impact on sales tax revenues. The remaining approximately one-third of the sales tax is paid on purchases by businesses. This component, too, is governed by businesses' perceptions of economic

Figure REV-07

2012-13 State and Local Sales and Use Tax Rates (as of January 1, 2013)

State Rates		
General Fund	4.19%	The permanent rate of 3.94% may be temporarily reduced by 0.25% if General Fund reserves exceed specified levels. As of January 1, 2013, Proposition 30 temporarily adds 0.25 percent to the General Fund rate.
Local Revenue Fund 2011	1.06%	Revenues attributable to a rate of 1.0625 percent is dedicated to the Local Revenue Fund 2011.
Local Revenue Fund	0.50%	Dedicated to local governments to fund health and social services programs transferred to counties as part of 1991 state-local realignment.
Economic Recovery Fund	0.25%	Beginning on July 1, 2004, a temporary 0.25% state sales tax rate was imposed, with a corresponding decrease in the Bradley-Burns rate. These revenues are dedicated to repayment of Economic Recovery Bonds. Once these bonds are repaid, this tax will sunset and the Bradley-Burns rate will return to 1%.
Local Uniform Rates[1]		
Bradley-Burns	0.75%[2]	Imposed by city and county ordinance for general purpose use.[3]
Transportation Rate	0.25%	Dedicated for county transportation purposes.
Local Public Safety Fund	0.50%	Dedicated to cities and counties for public safety purposes. This rate was imposed temporarily by statute in 1993 and made permanent by the voters later that year through passage of Proposition 172.
Local Add-on Rates[4]		
Transactions and Use Taxes	up to 2.00%	May be levied in 0.125% or 0.25% increments[5] up to a combined maximum of 2.00% in any county.[6] Any ordinance authorizing a transactions and use tax requires approval by the local governing board and local voters.

[1] These locally-imposed taxes are collected by the state for each county and city and are not included in the state's revenue totals.

[2] The 1 percent rate was temporarily decreased by 0.25 percent on July 1, 2004, and a new temporary 0.25 percent tax imposed to repay Economic Recovery Bonds. Cities and counties will receive additional property tax revenues equal to the 0.25 percent local sales tax reduction.

[3] The city tax constitutes a credit against the county tax. The combined rate is never more than 1 percent in any area (or 0.75 percent during the period when Economic Recovery Bonds are being repaid).

[4] These taxes may be imposed by voters in cities, counties, or special districts. The revenues are collected by the state for each jurisdiction and are not included in the state's revenue totals.

[5] Increments imposed at 0.125 percent are only allowed when revenues are dedicated for library purposes.

[6] An exception to the 2 percent maximum is Los Angeles County, which may impose up to 2.5 percent.

conditions and the need for additional equipment acquisitions and other capital purchases. Sales and Use Tax revenues are forecast by relating taxable sales to economic factors such as income, employment, housing starts, new vehicle sales, and inflation.

Corporation Tax

Corporation Tax revenues are expected to contribute 9.3 percent of all General Fund revenues and transfers in 2013-14. Corporation Tax revenues were $7.9 billion in 2011-12 and are expected to decline by 4.6 percent to $7.6 billion in 2012-13. In 2013-14, they are expected to increase by 20.5 percent to $9.1 billion. The 2013-14 revenues show more growth, in part, because of the passage of Proposition 39 (discussed below). Corporation Tax revenue is significantly affected by various tax law changes – primarily tax credits and income apportionment rules – that have been adopted in the last 25 years.

Most recently, the ability of taxpayers to elect single sales factor apportionment became operative for tax years beginning on or after January 1, 2011. Multi-state businesses could determine California taxable income based on one of two methods that they deem most advantageous to them: (1) an apportioning formula which factors in their sales, property, and employees in this state, or (2) one based only on sales in California—frequently referred to as the single sales factor formula. The ability of corporations to use this election has had a significant negative impact on Corporation Tax revenue. Under Proposition 39, beginning in January 2013, most multi-state businesses are required to determine taxable income attributable to California using the single sales factor formula. Proposition 39 also removes a loophole that allowed some corporations to source their sales of services and intangibles to the state in which the majority of the work to produce that service or intangible was performed. Under Proposition 39, almost all taxpayers are required to source their sales of services and intangibles to the state into which the service or intangible is sold.

From 1943 through 1985, Corporation Tax liability as a percentage of profits closely tracked the corporation tax rate. Since 1986, increasing S-corporation activity and use of credits have been contributing to a divergence between profits and tax liability growth. Businesses that elect to form as S-corporations pay a reduced corporate rate, with the income and tax liability on that income passed through to owners and thus shifted to the personal income tax.

Enterprise Zone Regulatory Reform

The Budget includes savings relating to new regulations for the Enterprise Zone program. The proposed regulations will accomplish the following reforms:

- Limit retrovouchering by requiring all voucher applications to be made within one year of the date of hire.

- Require third party verification of employee residence within a Targeted Employment Area.
- Streamline the vouchering process for hiring veterans and recipients of public assistance.
- Create stricter zone audit procedures and audit failure procedures.

These regulatory reforms will primarily affect Corporation Tax revenue, but will also have an impact on Personal Income Tax revenue. The regulations, in total, are expected to increase General Fund revenue by $10 million in 2012-13 and $50 million in 2013-14. The Administration will be pursuing further Enterprise Zone reform through legislation.

Insurance Tax

Most insurance policies written in California are subject to a 2.35 percent gross premiums tax. This premium tax takes the place of all other state and local taxes except those on real property and motor vehicles. In general, the basis of the tax is the amount of "gross premiums" received, less return premiums.

To provide funding for the Healthy Families and Medi-Cal programs, Chapter 11, Statutes of 2011 (AB 21) expanded the 2.35 percent gross premiums tax to the Medi-Cal managed care plans through June 30, 2012. The Budget proposes to reauthorize this tax on Medi-Cal managed care plans permanently, retroactive to July 1, 2012. Additionally, the Budget proposes to extend the Hospital Quality Assurance Fee until December 31, 2016. The fee, which is set to expire on December 31, 2013, provides funds for supplemental payments to hospitals and also provides some funding to offset the costs of health care coverage for children in the Medi-Cal program.

Figure REV-09 displays the distribution of total Insurance Tax revenues from 2011-12 through 2013-14.

The Department of Finance conducts an annual survey to project insurance premium growth. Responses were received this year from a sample representing about 46 percent of the dollar value of premiums written in California.

In 2011, $120.2 billion in taxable premiums were reported, representing an increase of 5 percent from 2010. The most recent survey indicates that total premiums will increase by 2 percent and 2.8 percent in 2012 and 2013, respectively. Survey respondents also reported 10.6 percent and 6.4 percent growth for taxable premiums from workers'

compensation insurance in 2012 and 2013 respectively. The primary reason for the decline in the Insurance Tax revenue estimate from 2011-12 to 2012-13 is refunds that are expected to be paid pursuant to a Board of Equalization decision in the *California Automobile Insurance Company* case. These refunds are also expected to dampen 2013-14 revenue. The California Department of Insurance estimates that the refunds resulting from this decision will equal $233 million in 2012-13 and $149 million in 2013-14.

Figure REV-09

Insurance Tax Revenue

(Dollars in Millions)

	2011-12 Preliminary	2012-13 Forecast	2013-14 Forecast
General Fund	$2,165.0	$2,022.0	$2,198.0
Children's Health and Human Services Special Fund	251.1	364.3	484.7
Total	**$2,416.1**	**$2,386.3**	**$2,682.7**

Alcoholic Beverage Taxes

In addition to the sales tax paid by retail purchasers, California levies an excise tax on distributors of beer, wine, and distilled spirits. The tax rates per gallon are applied as follows: (1) $0.20 for beer, dry wine, and sweet wine, (2) $0.30 for sparkling wine, and (3) $3.30 for distilled spirits.

Alcoholic beverage revenue estimates are based on projections of total and per capita consumption for each type of beverage. Consumption of alcoholic beverages is expected to decline by about 7 percent in 2012-13 before returning to an almost 2 percent increase in 2013-14. Revenues from this tax were $346 million in 2011-12 and are forecasted to be $320 million in 2012-13 and $326 million in 2013-14.

Cigarette Tax

The state imposes an excise tax of 87 cents per pack of 20 cigarettes on distributors selling cigarettes in California. An excise tax is also imposed on the distribution of other tobacco products such as cigars, chewing tobacco, pipe tobacco, and snuff. The rate on other tobacco products is calculated annually by the Board of Equalization based on the wholesale price of cigarettes and the excise tax on cigarettes.

Revenues from the tax on cigarettes and other tobacco products are distributed as follows:

- Ten cents of the per-pack tax is allocated to the General Fund.

- Fifty cents of the per-pack tax, and an equivalent rate levied on non-cigarette tobacco products, goes to the California Children and Families First Trust Fund for distribution according to the provisions of Proposition 10 of 1998.
- Twenty-five cents of the per-pack tax, and an equivalent rate levied on non-cigarette tobacco products, is allocated to the Cigarette and Tobacco Products Surtax Fund for distribution as determined by Proposition 99 of 1988.
- Two cents of the per-pack tax is deposited into the Breast Cancer Fund.

Projections of Cigarette Tax revenues are based on projected per capita consumption of cigarettes and population growth, while revenue estimates for other tobacco products also rely on wholesale price data. The cumulative effect of product price increases, the increasingly restrictive environments for smokers, state anti-smoking campaigns funded by Proposition 99 Tobacco Tax and Health Protection Act revenues and revenues from the Master Tobacco Settlement, and the 2009 federal cigarette tax rate increase have reduced cigarette consumption considerably. This declining trend is expected to continue. Annual per capita consumption (based on population ages 18-64) declined from 123 packs in 1989-90 to 84 packs in 1997-98 and 41 packs in 2011-12. This forecast assumes an annual decline in total consumption of approximately 3.6 percent.

Figure REV-10

Tobacco Tax Revenue

(Dollars in Millions)

	2011-12 Preliminary	2012-13 Forecast	2013-14 Forecast
General Fund	$95.0	$91.0	$89.0
Cigarette and Tobacco Products Surtax Fund	283.4	272.0	264.0
Breast Cancer Fund	18.8	18.0	18.0
California Children and Families First Trust Fund	498.5	481.0	466.0
Total	**$895.7**	**$862.0**	**$837.0**

Figure REV-10 shows the distribution of tax revenues for the General Fund and various special funds for 2011-12 through 2013-14.

Property Taxes

Although the property tax is a local revenue source, the amount of property tax generated each year has a substantial impact on the state budget because local property tax revenues allocated to K-14 schools generally offset General Fund expenditures.

Assessed value growth is estimated based on twice-yearly surveys of county assessors and evaluations of real estate trends. Sales volumes and prices of new and existing homes and condominiums rose moderately from 2011 to 2012 (with activity in the 2012 calendar year driving fiscal year 2013-14 property tax revenues). This is the first time since 2005 that both sales volumes and prices have moved in a positive direction. This turnaround, coupled with a decline in the number of homes in foreclosure, indicates that the state's overall real estate market has stabilized, although there are still areas where sales volumes and property values continue to be flat or decline.

Statewide property tax revenues are estimated to increase 1 percent in 2012-13 and 2.5 percent in 2013-14. The base 1 percent rate is expected to generate roughly $48.2 billion in revenue in 2013-14, of which roughly half ($24.7 billion) will go to K-14 schools. Of this amount, approximately $1.5 billion is shifted from schools to cities and counties to replace sales and use tax revenues redirected from those entities to repay the Economic Recovery Bonds, and approximately $6.1 billion is shifted from schools to cities and counties to replace Vehicle License Fee (VLF) revenue losses stemming from the reduced VLF rate of 0.65 percent. The $24.7 billion figure does not include additional property tax revenue that schools are expected to receive in 2013-14 from the former redevelopment agencies pursuant to Chapter 5, Statutes of 2011 (ABx1 26).

Estate/Inheritance/Gift Taxes

Proposition 6, adopted in June 1982, repealed the inheritance and gift taxes and imposed a tax known as "the pick-up tax," because it was designed to pick up the maximum state credit allowed against the federal estate tax without increasing total taxes paid by the estate.

The federal Economic Growth and Tax Relief Reconciliation Act of 2001 phased out the federal estate tax by 2010. This Act reduced the state pick-up tax by 25 percent in 2002, 50 percent in 2003, 75 percent in 2004, and eliminated it beginning in 2005. The state "pick-up tax" was scheduled to resume in 2011. At the time the budget revenue forecst was developed, this issue was still being debated by Congress. There was substantial uncertainty as to whether the federal estate tax law would remain or be modified to eliminate or substantially reduce the state pick-up tax. The Budget does not reflect net revenues from the state pick-up tax.

Other Revenues

Indian Gaming

The Budget reflects General Fund revenues from tribal gaming of $369 million in 2011-12 and $337 million in 2012-13 and 2013-14. This revenue includes approximately $101 million that is transferred annually from a special deposit fund to the General Fund for certain transportation programs that would otherwise be funded with revenues from a bond sale yet to occur. Absent a bond sale, the Administration proposes to continue this funding arrangement through 2015-16.

Loans and Transfers from Special Funds

The Budget reflects the repayment of loans, based on the operational needs of the programs requiring these repayments. In 2012-13, repayments are expected to be $184.3 million, and repayments in 2013-14 are expected to be $561.4 million.

Special Fund Revenue

The California Constitution and state statutes specify into which funds certain revenues must be deposited and how they are to be spent.

Total special fund revenues are estimated to be $38.1 billion in 2013-14. Taxes and fees related to motor vehicles are expected to comprise about 31 percent of all special fund revenue in 2013-14. The principal sources are motor vehicle fees (registration, weight, and vehicle license fees) and motor vehicle fuel taxes. During 2013-14, it is expected that about $12 billion in revenues will be derived from the ownership or operation of motor vehicles. About 33 percent of all motor vehicle taxes and fees will be allocated to local governments, and the remaining portion will be used for state transportation programs.

Motor Vehicle Fees

Motor vehicle fees and taxes consist of vehicle license, registration, weight, driver's license, and other charges related to vehicle operation. Figure REV-11 displays revenue from these sources from 2011-12 through 2013-14.

The Vehicle License Fee (VLF) is imposed on vehicles that travel on public highways in California. This tax is imposed in lieu of a local personal property tax on automobiles and is administered by the Department of Motor Vehicles. Chapter 87, Statutes of 1991

(AB 758) required the Department of Motor Vehicles to reclassify used vehicles based on their actual purchase price each time ownership is transferred. Also under this chapter, VLF revenues, other than administrative costs and fees on trailer coaches and mobile homes, are transferred to the Local Revenue Fund for state-local program realignment. Between 1948 and 1998, the VLF was set at 2 percent of the assessed value of a vehicle. Beginning in 1999, vehicle owners received discounts on the amount of VLF. To maintain revenue for local governments, the General Fund made deposits to offset the revenue lost from the discount.

Figure REV-11

Motor Vehicle Fees Special Fund Revenue

(Dollars in Thousands)

	2011-12 Preliminary	2012-13 Forecast	2013-14 Forecast
Vehicle License Fees	$1,978,751	$1,934,821	$1,964,397
Registration, Weight, and Other Fees	3,836,019	3,829,317	3,920,648
Total	**$5,814,770**	**$5,764,138**	**$5,885,045**

Chapter 211, Statutes of 2004 (SB 1096) eliminated the VLF offset and established the VLF tax rate at 0.65 percent. Local governments now receive property tax revenue to compensate them for the loss of VLF revenue. In 2013-14 the estimated value of the VLF backfill to cities and counties is $6 billion. The value of the reduction from 2 percent to 0.65 percent is $4.1 billion.

The number of vehicles in the state, the ages of those vehicles, and their most recent sales price affect the amount of VLF collected. The total number of vehicles in California —autos, trucks, trailers, and motorcycles including vehicles registered in multiple states —is estimated to be 29,043,559 in 2012-13 and is expected to decline to 28,895,995 in 2013-14. The year-to-year decline is due primarily to the cyclical nature of trailer registrations which renew every five years. Consistent with expected increases in national new vehicle sales due to the availability of consumer credit, an improving employment picture, and projected increases to after-tax income, the forecast projects that there will be 1,744,766 new vehicles registered in 2012-13, increasing to 1,856,112 in 2013-14.

The Department of Motor Vehicles administers the VLF for trailer coaches that are not installed on permanent foundations. Those that are installed on permanent foundations (mobile homes) are subject to either local property taxes or the VLF. Generally, mobile homes purchased new prior to July 1, 1980, are subject to the VLF. All trailer coach license fees are deposited in the General Fund.

In addition to the VLF, commercial truck owners pay a fee based on vehicle weight. Due partly to the expected increase in truck sales reflecting an improving business climate, weight fee revenues are expected to be $932 million in 2012-13 and to increase by 1.5 percent to $946 million in 2013-14.

Motor Vehicle Fuel Taxes

The Motor Vehicle Fuel Tax, Diesel Fuel Tax, and Use Fuel Tax are the major sources of funds for maintaining, replacing, and constructing state highway and transportation facilities. Just over one-third of these revenues are apportioned to local jurisdictions for a broad range of local road projects, including both maintenance of existing roads and construction of new roads. In addition, some jurisdictions choose to spend a portion of their allocation on improvements to the state highway system in their region to decrease traffic congestion.

The gallons of gasoline consumed were down 1.1 percent in 2011-12 when compared to the prior fiscal year. However, gasoline consumption is expected to increase 1 percent in 2012-13 and then increase 1.3 percent in 2013-14. Because most diesel fuel is consumed by the commercial trucking industry, the gallons consumed are affected most significantly by general economic conditions. A recovering economy is expected to contribute to growth of 2.6 percent in diesel consumption in 2012-13 followed by 2.1 percent growth in 2013-14.

Motor Vehicle Fuel Tax collections are shown in Figure REV-12.

The Motor Vehicle Fuel Tax (gas tax) is collected from distributors when fuel is loaded into ground transportation for transport to retail stations. This fuel is taxed at a rate of 36 cents per gallon under current law. Fuels subject to the gas tax include gasoline, natural gas, and blends of gasoline and alcohol sold for use on public streets and highways.

Figure REV-12

Motor Vehicle Fuel Tax Revenue

(Dollars in Thousands)

	2011-12 Preliminary	2012-13 Forecast	2013-14 Forecast
Gasoline [1]	$5,179,071	$5,320,062	$5,736,243
Diesel	362,994	296,207	287,645
Total	**$5,542,065**	**$5,616,269**	**$6,023,888**

[1] Does not include jet fuel.

Distributors pay the Diesel Fuel Tax, which applies to both pure diesel fuel and blends, at the fuel terminal. Diesel fuel for highway use is taxed at a rate of 10 cents per gallon

in 2012-13. Dyed diesel fuel, which is used for off-highway purposes such as farm equipment, is not taxed.

Beginning in 2010-11, the fuel tax swap eliminated the General Fund portion of the sales tax on gasoline and replaced it with an excise tax of 17.3 cents per gallon. The Board of Equalization is required to adjust the excise tax rates for both motor vehicle fuel and diesel fuel annually so that the total amount of tax revenue generated is equal to what would have been generated had the sales and use tax and excise tax rates remained unchanged. To maintain revenue neutrality for gasoline, the excise tax rate for 2012-13 is set at 36 cents per gallon. The Budget forecasts that the excise tax on gasoline will be 38 cents per gallon in 2013-14.

Beginning in 2011-12, the fuel tax swap increased the sales tax add-on for diesel fuel to the statutorily mandated 1.87 percent, while it decreased the excise tax to 13 cents to maintain revenue neutrality. For 2012-13, to achieve neutrality, the excise tax rate was reduced by 3 cents and to 10 cents per gallon. However, under current law the sales tax rate add-on will increase to 1.94 percent in 2013-14, and the Budget forecasts that the excise tax on diesel fuel will be adjusted to 10.5 cents per gallon.

The Use Fuel Tax is levied on sales of kerosene, liquefied petroleum gas (LPG), liquid natural gas (LNG), compressed natural gas (CNG), and alcohol fuel (ethanol and methanol containing 15 percent or less gasoline and diesel fuel). These fuels are taxed only when they are dispensed into motor vehicles used on the highways. Current Use Fuel Tax rates are 18 cents per gallon for kerosene, 6 cents per gallon for LPG and LNG, 7 cents per 100 cubic feet for CNG, and 9 cents per gallon for alcohol fuel. Users of LPG, LNG, or CNG may elect to pay a flat rate of tax based on vehicle weight instead of the per-gallon tax.

An excise tax of 2 cents per gallon is levied on aircraft jet fuel sold at the retail level. This tax does not apply to commercial air carriers, aircraft manufacturers and repairers, and the U.S. armed forces.

Local transit systems, school and community college districts, and certain common carriers pay 1 cent per gallon on the fuel they use instead of the tax rates described above.

Summary of State Tax System

The state's tax system is outlined at the end of this section in Figure REV-13. Tax collections per capita and per $100 of personal income are displayed in Schedule 2 in

the Appendix. The revenue generated from each state tax from 1970-71 through 2013-14 is displayed in Schedule 3 in the Appendix.

Figure REV-13
Outline of State Tax System as of January 1, 2013

Major Taxes and Fees	Base or Measure	Rate	Administering Agency	Fund
Alcoholic Beverage Excise Taxes:				
Beer	Gallon	$0.20	Equalization	General
Distilled Spirits	Gallon	$3.30	Equalization	General
Dry Wine/Sweet Wine	Gallon	$0.20	Equalization	General
Sparkling Wine	Gallon	$0.30	Equalization	General
Hard Cider	Gallon	$0.20	Equalization	General
Corporation:				
General Corporation	Net income	8.84% [1]	Franchise	General
Bank and Financial Corp.	Net income	10.84%	Franchise	General
Alternative Minimum Tax	Alt. Taxable Income	6.65%	Franchise	General
Tobacco:				
Cigarette	Package	$0.87 [2]	Equalization	See below [2]
Other Tobacco Products	Wholesale cost	30.68% [3]	Equalization	See below [3]
Estate	Taxable Fed. Estate	0% [4]	Controller	General
Insurance				
Insurers	Gross Premiums	2.35% [5]	Insurance Dept.	General
Medi-Cal managed care plans	Gross Premiums	2.35%	Health Care Services	See below [6]
Liquor License Fees	Type of license	Various	Alc. Bev. Control	General
Motor Vehicle:				
Vehicle License Fees (VLF)	Market value	0.65%	DMV	Motor VLF, Local Revenue [7]
Fuel—Gasoline	Gallon	$0.360 [8]	Equalization	Motor Vehicle Fuel [9]
Fuel—Diesel	Gallon	$0.10 [10]	Equalization	Motor Vehicle Fuel
Registration Fees	Vehicle	$69.00	DMV	Motor Vehicle [11]
Weight Fees	Gross Vehicle Wt.	Various	DMV	State Highway
Personal Income	Taxable income	1.0-12.3% [12]	Franchise	General
Proposition 63 Surcharge	Taxable income > $1 million	1.0%	Franchise	Mental Health Services
Alternative Minimum Tax	Alt. Taxable Income	7.0%	Franchise	General
Retail Sales and Use	Sales or lease of taxable items	7.50% [13]	Equalization	See below [13]

[1] Minimum Tax is $800 per year for existing corporations. New corporations are exempt for the first two years.

[2] This tax is levied at the combined rate of 10 cents/pack of 20 cigarettes for the General Fund, 25 cents/pack for the Cigarette and Tobacco Products Surtax Fund, 2 cents/pack for the Breast Cancer Fund, and 50 cents/pack for the California Children and Families First Trust Fund.

[3] The surtax rate is determined annually by the BOE and is equivalent to the combined rate of tax applied to cigarettes, with funding for the Cigarette and Tobacco Products Surtax Fund and California Children and Families First Trust Fund. Effective July 1, 2012, through June 30, 2013, the rate is 30.68 percent of the wholesale cost.

[4] Since 2005 and through the end of 2012, federal estate tax law is structured such that California will receive none of the "state pick-up" estate tax for those years. However, under current law, starting in January 1, 2013, the federal estate tax will return to its pre-2011 structure and California will, again, begin to receive estate tax payments for estates for which the death occurred on or after January 1, 2013.

[5] Ocean marine insurance is taxed at the rate of 5 percent of underwriting profit attributable to California business. Special rates also apply to certain pension and profit sharing plans, surplus lines, and nonadmitted insurance.

[6] Insurance tax on Medi-Cal managed care plans through June 30, 2012, pursuant to Chapter 11, Statutes of 2011 (X1 AB 21), to provide interim funding for the Healthy Families and Medi-Cal programs. The Governor's Budget proposes to reauthorize this tax permanently, retroactive to July 1, 2012.

[7] For return to cities and counties. Trailer coach license fees are deposited in the General Fund.

[8] As part of the fuel tax swap implemented beginning July 1, 2010, this rate was increased from 18 cents and will be adjusted each year to maintain revenue neutrality with the elimination of the General Fund portion of the sales tax on gasoline.

[9] For administrative expenses and apportionment to State, counties and cities for highways, airports, and small craft harbors.

[10] As part of the fuel tax swap, this rate will be decreased by an estimated 3 cents on July 1, 2012, and will be adjusted each year thereafter to maintain revenue neutrality with the 2.17% increase in sales tax on diesel beginning July 1, 2012.

[11] For support of State Department of Motor Vehicles, California Highway Patrol, other agencies, and motor vehicle related programs.

[12] Proposition 30 (The Schools and Local Public Safety Protection Act of 2012) was passed by the California voters in November 2012. Proposition 30, for tax years 2012 through 2018, created three new income tax brackets with rates of 10.3 percent for taxable income over $250,000, 11.3 percent for taxable income over $300,000, and 12.3 percent for taxable income over $500,000.

[13] The 7.50 percent rate includes the rates for General Fund, Special Funds, and uniform local rates. Additionally, cities and counties may generally assess up to an additional 2.00 percent to the statewide rate. This rate includes the passage of Proposition 30 (The Schools and Local Public Safety Protection Act of 2012), effective beginning January 1, 2013.

Appendices and Schedules

Budget Process Overview

The Governor's Budget is the result of a process that begins more than one year before the Budget becomes law. When presented to the Legislature on January 10 of each year, the Governor's Budget incorporates revenue and expenditure estimates based upon the most current information available through mid December. In the event that the Governor wants to change the Budget presented to the Legislature, including adjustments resulting from changes in population, caseload, or enrollment estimates, the Department of Finance (Finance) proposes adjustments to the Legislature during budget hearings through Finance Letters. During late spring, usually in May, Finance submits revised revenue and expenditure estimates for both the current and budget years to the Legislature. This update process is referred to as the May Revision. Finance also prepares monthly economic and cash revenue updates during the fiscal year. Listed below are the key documents used in the budget process.

Title	Purpose	Prepared/Issued by	When
Budget Letters and Management Memos	Convey the Administration's guidelines for budget preparation to agencies and departments.	Governor/Finance	January through December
Budget Change Proposals	Documents that propose to modify or change the existing level of service, propose new programs, or delete existing programs.	Agencies and departments submit to Finance analysts	July through September
Governor's Budget	Governor's proposed budget for the upcoming fiscal year.	Governor/Finance	January 10
Governor's Budget Summary	A summary of the Governor's Budget.	Governor/Finance	January 10
Budget Bill	Requests spending authorization to carry out the Governor's expenditure plan (legislative budget decision document).	Finance/Legislature	January 10
Analysis of the Budget	Analysis of the Budget, including recommendations for changes to the Governor's Budget.	Legislative Analyst	February
May Revision	Update of General Fund revenues, expenditures, and reserve estimates based on the latest economic forecast and changes in population, caseload, or enrollment estimates.	Finance	Mid-May
Budget Act	The primary annual expenditure authorization as approved by the Governor and Legislature, including a listing of the Governor's vetoes.	Legislature/Governor	Late June or enactment of the Budget
Final Budget Summary	Update of the individual Budget Act items with changes by the Governor's vetoes, including certain budget summary schedules.	Finance	Late July - August or 1-2 months after Budget enactment
Final Change Book	Update of changes to the detailed fiscal information in the Governor's Budget.	Finance	Late July - August or 1-2 months after Budget enactment

Adjustments in Accounting Methods and Prior Year Fund Balances

AB 1487 (Chapter 343, Statutes of 2012) requires the Department of Finance (Finance) to clearly note in the Governor's Budget or related documents any adjustments of prior year fund balances and accounting methods. This requirement is to ensure the closest possible comparability of the Governor's Budget with the State Controller's Budgetary-Legal Basis Annual Report (Annual Report).

Accounting Methods

Main Funds for Caltrans—Beginning with the 2013-14 Governor's Budget (including 2011-12 actuals, 2012-13 revised, and 2013-14 proposed), the displays have changed slightly in budget documents for the following five funds administered by the Department of Transportation : State Highway Account, Public Transportation Account, Transportation Investment Fund, Transportation Deferred Investment Fund, and Traffic Congestion Relief Fund. Fund balances of these funds operate on a cash basis of accounting. The changes better reflect the adjustments to convert the modified accrual basis of revenues and expenditures into cash basis.

Other Funds—The year-end financial statements submitted to the State Controller's Office for several funds were not prepared in a manner that is consistent with the Budget's methods and basis. The fund administrators of these funds have been directed to prepare their year-end financial statements in a manner that ensures the Annual Report accounts for the funds on the same basis as the Governor's Budget and the Budget Act, as required by Government Code Section 12460. The major funds include the Mental Health Services Fund and the Fiscal Recovery Fund.

Revenue Accruals—Consistent with the 2012 Budget Act and current practice, the net final payment accrual methodology will be used to accrue revenues associated with ballot initiatives beginning with those passed by the voters in 2012 for the 2013-14 and future budgets.

Prior Year Fund Balances

As announced on August 3, 2012, Finance has implemented enhanced efforts to reconcile special funds between the Governor's Budget documents provided to Finance and the year-end financial statements provided to the State Controller's Office by departments. Departments that are the designated fund administrators continue to be primarily responsible for the reconciliation, and Finance works very closely with the departments to ensure this is completed for all special funds. Special fund balances were reconciled using the best information available. However, final balances for the Annual Report are not available during the preparation of the Governor's Budget. Therefore, there will be some remaining variances in the spring when final balances become available.

Statewide Financial Information

Provides various statewide displays of financial information included in the Budget that may be the most useful to the public, private sector, or other levels of government. Each statewide display includes a description of the information included.

Schedule 1 ***General Budget Summary*****—**Total statewide revenues and expenditures for the General Fund and special funds, and expenditure totals for selected bond funds.

Schedule 2 ***Summary of State Tax Collections*****—***S*tate tax collections per capita and per $100 of personal income.

Schedule 3 ***Comparative Yield of State Taxes*****—**Revenues for major state taxes from 1970-71 through 2013-14.

Schedule 4 ***Positions and Salary Cost Estimates*****—**Position data and corresponding dollar amounts.

Schedule 5A ***Statement of Estimated Accounts Payable and Accounts Receivable*****—**Actual payable and receivable amounts as of June 30, 2012, and estimated amounts for June 30, 2013, and June 30, 2014.

Schedule 5B ***Actual 2011-12 Fiscal Year Cashflow*****—**Actual receipts, disbursements, borrowable resources, and cashflow loan balances for the 2011-12 fiscal year.

Schedule 5C ***Estimated 2012-13 Fiscal Year Cashflow*****—**Projected receipts, disbursements, borrowable resources, and cashflow loan balances for the 2012-13 fiscal year.

Schedule 5D ***Estimated 2013-14 Fiscal Year Cashflow*****—**Projected receipts, disbursements, borrowable resources, and cashflow loan balances for the 2013-14 fiscal year.

Schedule 6 ***Summary of State Population, Employees, and Expenditures*****—**Historical data of state population, employees, personal income, revenues, and expenditures.

Schedule 7 ***General Fund Statement of Fund Balance*****—**Available upon request. Contact the Department of Finance, Budget Operations Support Unit at (916) 445-5332.

Schedule 8 ***Comparative Statement of Revenues*****—**Detail of General and special fund revenues by source for the past, current, and budget years within the following categories: (1) major taxes and licenses, (2) minor revenues, and (3) transfers and loans.

Schedule 9 ***Comparative Statement of Expenditures*****—**Detail of General Fund, special fund, selected bond fund, and federal fund expenditures included in the Governor's Budget by the following categories: (1) State Operations, (2) Local Assistance, (3) Capital Outlay, and (4) Unclassified.

Schedule 10 ***Summary of Fund Condition Statements*****—**A listing in alphabetical order of the beginning reserve, revenues, expenditures, and ending reserve for the General Fund and each special fund for the past, current, and budget years.

Schedule 11 ***Statement of General Obligation Bond and Commercial Paper Debt of the State of California*****—**List of all general obligation bonds including: maturity dates, authorized amount of bond issues, amounts of unissued bonds, redemptions, and outstanding issues, as well as authorized and outstanding commercial paper issued in-lieu of general obligation bonds.

Schedule 12A ***State Appropriations Limit Summary*****—**Summary of Schedules 12B through 12E provides a calculation of the appropriations subject to the State Appropriations Limit and the Limit Room or Surplus.

Schedule 12B ***Revenues to Excluded Funds*****—**List of revenues to special funds NOT included in the calculation of total appropriations subject to the State Appropriations Limit.

Schedule 12C ***Non-Tax Revenues in Funds Subject to Limit*****—**Total of non-tax General and special fund

revenues deposited in funds that are otherwise included in the calculation of total appropriations subject to the State Appropriations Limit.

Schedule 12D *State Appropriations Limit Transfer from Other Funds to Included Funds*—Detail of transfers between funds that are used in calculating the appropriations subject to the State Appropriations Limit.

Schedule 12E *State Appropriations Limit Excluded Appropriations*—Exclusions from appropriations subject to the State Appropriations Limit.

SCHEDULE 1
GENERAL BUDGET SUMMARY[1]
(In Thousands)

	Reference to Schedule	General Fund	Special Funds	Selected Bond Fund Expenditures	Expenditure Totals
2011-12

Reserves for Economic Uncertainties [4]		--	*6,145,526*		
Special Fund for Economic Uncertainties [4]		*167,248*	--		
2013-14					
Prior year resources available	10	$785,356	$6,145,526		
Revenues and transfers	8	98,500,613	40,173,951		
Expenditures	9	97,650,244	40,927,826	$7,248,480	$145,826,550
Fund Balance [2]	10	$1,635,725	$5,391,651		
Reserve for Liquidation of Encumbrances [3]		*618,108*	--		
Reserves for Economic Uncertainties [4]		--	*5,391,651*		
Special Fund for Economic Uncertainties [4]		*1,017,617*	--		

[1] The General Budget Summary includes the revenues and expenditures of all state funds that reflect the cost of state government and selected bond fund expenditures. The transactions involving other nongovernmental cost funds are excluded. The amounts included in this schedule for expenditures and revenues may not agree with those shown in Schedules 8, 9 and 10 due to rounding.

[2] The General Fund unencumbered balances of continuing appropriations at the end of the 2011-12, 2012-13, and 2013-14 fiscal years are $207,663; $172,215; and $102,449 (in thousands), respectively. The special funds unencumbered balances of continuing appropriations at the end of the 2011-12, 2012-13, and 2013-14 fiscal years are $16,534,945; $6,109,601; and $10,497,097 (in thousands), respectively. Unencumbered balances of continuing appropriations reflect remaining expenditure authorizations from these appropriations.

[3] The Reserve for Liquidation of Encumbrances represents an amount which will be expended in the future for state obligations for which goods and services have not been received at the end of the fiscal year. This reserve treatment is consistent with accounting methodology prescribed by Generally Accepted Accounting Principles (GAAP) and Government Code Sections 13306 and 13307.

[4] The Special Fund for Economic Uncertainties and the Reserves for Economic Uncertainties are reserve accounts for the General and special funds as provided by Section 5 of Article XIIIB of the California Constitution.

SCHEDULE 2
SUMMARY OF STATE TAX COLLECTIONS

(Excludes Departmental, Interest, and Miscellaneous Revenue)

Fiscal Year Beginning	Per Capita Personal Income [1, 2]	State Tax Collections (Dollars in Millions)		Taxes per Capita [1]		Taxes per $100 of Personal Income [3]	
		General Fund	Total	General Fund	Total	General Fund	Total
1967	$3,878	$3,558	$4,676	$185.55	$243.86	$4.78	$6.29
1968	4,199	3,963	5,173	203.94	266.21	4.86	6.34
1969	4,525	4,126	5,409	208.96	273.94	4.62	6.05

2012 *	31,116,286	61,996,000	7,580,000	862,000	45,000	2,386,348	320,000	5,618,575	5,792,244
2013 *	34,352,933	62,940,816	9,130,000	837,000	290,000	2,682,718	326,000	6,026,194	5,910,065

(a) Includes the 0.5 percent Local Revenue Fund, the 1.0625 percent Local Revenue Fund 2011, the 0.25 percent sales tax, effective July 1, 2004, for repayment of economic recovery bonds, and the state sales tax rate of 6 percent from April 1, 2009 to June 30, 2011. Additionally, these revenues include passage of Proposition 30, which increases the General Fund sales tax rate by 0.25 percent from January 1, 2013, to December 31, 2016.

(b) Includes the revenue for a 1-percent surcharge on taxable incomes over $1 million, with proceeds funding mental health programs. Also includes the 0.25 percent surcharge and reduced dependent exemption credit effective for tax years 2009 and 2010. Includes the impact of Proposition 30, which establishes three additional tax brackets for tax years 2012 through 2018.

(c) Includes the corporation income tax and, from 1989 through 1997, the unitary election fee. Also includes impact of Proposition 39 beginning in tax year 2012.

(d) Proposition 99 (November 1988) increased the cigarette tax to $0.35 per pack and added an equivalent tax to other tobacco products. The Breast Cancer Act added $0.02 per pack effective 1/1/94. Proposition 10 (November 1998) increased the cigarette tax to $0.87 per pack and added the equivalent of $1.00 tax to other tobacco products.

(e) Proposition 6, an initiative measure adopted by the voters in June 1982, repealed the inheritance and gift taxes and imposed instead an estate tax known as "the pick-up tax," because it is designed to pick up the maximum credit allowed against the federal estate tax. The Economic Growth and Tax Relief Reconciliation Act of 2001 phases out the federal estate tax by 2010. The Act reduced the state pick-up tax by 25 percent in 2002, 50 percent in 2003, 75 percent in 2004, and eliminated it beginning in 2005. The EGTRRA sunsets after 2010. The Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010, however, made changes to the estate tax for 2011 and 2012. One of those changes was an extension of the elimination of the state estate tax credit, which had been in effect since 2005, for 2011 and 2012.

(f) Includes insurance tax on Medi-Cal managed care plans through June 30, 2012, pursuant to Chapter 11, Statutes of 2011 (X1 AB 21), to provide interim funding for the Healthy Families and Medi-Cal programs. The Governor's Budget proposes to reauthorize this tax permanently, retroactive to July 1, 2012. A Board of Equalization decision regarding the taxation of premiums on a cash versus accrued basis has resulted in refunds of $0 million in 2011-12 and estimated refunds of $233 million and $149 million in 2012-13 and 2013-14, respectively.

(g) Alcoholic beverage excise taxes were increased effective July 15, 1991.

(h) Motor vehicle fuel tax (gasoline), use fuel tax (diesel and other fuels), and jet fuel. As part of he fuel tax swap implemented beginning July 1, 2010, this rate on gasoline was increased from 18 cents and will be adjusted each year to maintain revenue neutrality with the elimination of the General Fund portion of the sales tax on gasoline. Also as part of the fuel tax swap, this rate on diesel was decreased to 10 cents on July 1, 2012, and will be adjusted each year thereafter to maintain revenue neutrality with the 2.17-percent increase in 2012-13 and various increases planned for the out-years.

(i) Registration and weight fees, motor vehicle license fees, and other fees. Beginning January 1, 1999, vehicle owners paid 75 percent of the calculated tax, and the remaining 25 percent (offset) was paid by the General Fund. Chapter 74, Statutes of 1999, increased the offset to 35 percent on a one-time basis for the 2000 calendar year. Chapters 106 and 107, Statutes of 2000, and Chapter 5, Statutes of 2001, extended the 35-percent offset through June 30, 2001, and provided for an additional 32.5-percent VLF reduction, which was returned to taxpayers in the form of a rebate. Beginning July 1, 2001, the VLF offset was set at 67.5 percent. From June 30, 2003, through November 18, 2003, the VLF reduction was suspended. On November 17, 2003, the suspension was rescinded, thereby reinstating the offset. Effective January 1, 2005, the VLF rate is 0.65 percent. In February 2009 the VLF rate increased to 1.15 percent from May 19, 2009, to June 30, 2011. Effective July 1, 2011, the VLF rate returned to 0.65 percent.

Finance Glossary of Accounting and Budgeting Terms

The following budgetary terms are used frequently throughout the Governor's Budget, the Governor's Budget Summary, and the annual Budget (Appropriations) Bill. Definitions are provided for terminology that is common to all publications. For definitions of terms unique to a specific program area, please refer to the individual budget presentation.

Abatement
A reduction to an expenditure that has already been made. In state accounting, only specific types of receipts are accounted for as abatements, including refund of overpayment of salaries, rebates from vendors or third parties for defective or returned merchandise, jury duty and witness fees, and property damage or loss recoveries. (See *SAM 10220* for more detail.)

Abolishment of Fund
The closure of a fund pursuant to the operation of law. Funds may also be administratively abolished by the Department of Finance with the concurrence of the State Controller's Office. When a special fund is abolished, all of its assets and liabilities are transferred by the State Controller's Office to a successor fund, or if no successor fund is specified, then to the General Fund. *(GC 13306, 16346.)*

Accrual Basis of Accounting
The basis of accounting in which transactions are recognized when they occur, regardless of when cash is received or disbursed. Revenue is recorded when earned, and expenditures are recorded when obligations are created (generally when goods/services are ordered or when contracts are signed).

Administration
Refers to the Governor's Office and those individuals, departments, and offices reporting to it (e.g., the Department of Finance).

Administration Program Costs
The indirect cost of a program, typically a share of the costs of the administrative units serving the entire department (e.g., the Director's Office, Legal, Personnel, Accounting, and Business Services). "Distributed Administration" costs represent the distribution of the indirect costs to the various program activities of a department. In most departments, all administrative costs are distributed. (Also see "Indirect Costs" and "SWCAP.")

Administratively Established Positions
Positions authorized by the Department of Finance during a fiscal year that were not included in the Budget and are necessary for workload or administrative reasons. Such positions terminate at the end of the fiscal year, or, in order to continue, must meet certain criteria under Control Section 31.00. *(SAM 6406, Control Section 31.00)*

Agency
A legal or official reference to a government organization at any level in the state organizational hierarchy. (See the *UCM* for the hierarchy of State Government Organizations.)

Or:

A government organization belonging to the highest level of the state organizational hierarchy as defined in the UCM. An organization whose head (Agency Secretary) is designated by Governor's order as a cabinet member. *(SAM 6610)*

Allocation
A distribution of funds or costs from one account or appropriation to one or more accounts or appropriations (e.g., the allocation of employee compensation funding from the statewide 9800 Budget Act items to departmental Budget Act items).

Allotment
The approved division of an amount (usually of an appropriation) to be expended for a particular purpose during a specified time period. An allotment is generally authorized on a line item expenditure basis by program or organization. *(SAM 8300 et seq)*

Amendment
A proposed or accepted change to a bill in the Legislature, the California Constitution, statutes enacted by the Legislature, or ballot initiative.

A-pages
A common reference to the Governor's Budget Summary. Budget highlights now contained in the Governor's Budget Summary were once contained in front of the Governor's Budget on pages A-1, A-2, etc., and were, therefore, called the A-pages.

Appropriated Revenue
Revenue which, as it is earned, is reserved and appropriated for a specific purpose. An example is student fees received by state colleges that are by law appropriated for the support of the colleges. The revenue does not become available for expenditure until it is earned.

Appropriation
Authorization for a specific agency to make expenditures or create obligations from a specific fund for a specific purpose. It is usually limited in amount and period of time during which the expenditure is to be recognized. For example, appropriations made by the Budget Act are available for encumbrance for one year, unless otherwise specified. Appropriations made by other legislation are available for encumbrance for three years, unless otherwise specified, and appropriations stating "without regard to fiscal year" shall be available from year to year until fully expended. Legislation or the California Constitution can provide continuous appropriations, and voters can also make appropriations by approving ballot measures. An appropriation shall be available for encumbrance during the period specified therein, or if not specified, for a period of three years after the date upon which it first became available for encumbrance. Except for federal funds, liquidation of encumbrances must be within two years of the expiration date of the period of availability for encumbrance, at which time the undisbursed (i.e., unliquidated) balance of the appropriation is reverted back into the fund. Federal funds have four years to liquidate. *(GC 16304, 16304.1)*

Appropriation Without Regard To Fiscal Year (AWRTFY)
An appropriation for a specified amount that is available from year to year until fully expended.

Appropriations Limit, State (SAL)
The constitutional limit on the growth of certain appropriations from tax proceeds, generally set to the level of the prior year's appropriation limit as adjusted for changes in cost of living and population. Other adjustments may be made for such reasons as the transfer of services from one government entity to another. *(Article XIII B, § 8; GC Sec. 7900 et seq; CS 12.00)*

Appropriation Schedule
The detail of an appropriation (e.g., in the Budget Act), showing the distribution of the appropriation to each of the categories, programs, or projects thereof.

Assembly
California's lower house of the Legislature composed of 80 members. As a result of Proposition 140 (passed in 1990) and Proposition 28 (passed in 2012), members elected in or after 2012 may serve 12 years in the Legislature in any combination of four-year state Senate or two-year state Assembly

terms. Prior to Proposition 28, Assembly members could serve two-year terms and a maximum of three terms. *(Article IV, § 2 (a))*

Audit
Typically a review of financial statements or performance activity (such as of an agency or program) to determine conformity or compliance with applicable laws, regulations, and/or standards. The state has three central organizations that perform audits of state agencies: the State Controller's Office, the Department of Finance, and the California State Auditor's Office. Many state departments also have internal audit units to review their internal functions and program activities. *(SAM 20000, etc.)*

Augmentation
An authorized increase to a previously authorized appropriation or allotment. This increase can be authorized by Budget Act provisional language, control sections, or other legislation. Usually a Budget Revision or an Executive Order is processed to implement the increase.

Authorized
Given the force of law (e.g., by statute). For some action or quantity to be authorized, it must be possible to identify the enabling source and date of authorization.

Authorized Positions

As reflected in the Governor's Budget (Expenditures by Category and Changes in Authorized Positions), corresponds with the "Total, Authorized Positions" shown in the Salaries and Wages Supplement (Schedule 7A).

In these documents, for past year, authorized positions represent the number of actual positions filled for that year. For current year, authorized positions include all regular ongoing positions approved in the Budget Act for that year, less positions abolished by the State Controller per Government Code 12439, adjustments to limited term positions, and positions authorized in enacted legislation. For budget year, the number of authorized positions is the same as current year except for adjustments for any positions that have been removed due to expiring limited positions. (GC 19818; SAM 6406.)

Availability Period
The time period during which an appropriation may be encumbered (i.e., committed for expenditure), usually specified by the law creating the appropriation. If no specific time is provided in financial legislation, the period of availability is three years. Unless otherwise provided, Budget Act appropriations are available for one year. However, based on project phase, capital outlay projects may have up to three years to encumber. An appropriation with the term "without regard to fiscal year" has an unlimited period of availability and may be encumbered at any time until the funding is exhausted. (See also "Encumbrances")

Balance Available
In regards to a fund, it is the excess of resources over uses. For budgeting purposes, the balance available in a fund condition is the carry-in balance, net of any prior year adjustments, plus revenues and transfers, less expenditures. For accounting purposes, the balance available in a fund is the net of assets over liabilities and reserves that is available for expenditure .

For appropriations, it is the unobligated, or unencumbered, balance still available.

Baseline Adjustment
Also referred as Workload Budget Adjustment. See Workload Budget Adjustment.

Baseline Budget
Also referred as Workload Budget. See Workload Budget.

Bill
A draft of a proposed law presented to the Legislature for enactment. (A bill has greater legal formality and standing than a resolution.)

OR An invoice, or itemized statement, of an amount owing for goods and services received.

Bond Funds
For legal basis budgeting purposes, funds used to account for the receipt and disbursement of non-self liquidating general obligation bond proceeds. These funds do not account for the debt retirement since the liability created by the sale of bonds is not a liability of bond funds. Depending on the provisions of the bond act, either the General Fund or a sinking fund pays the principal and interest on the general obligation bonds. The proceeds and debt of bonds related to self-liquidating bonds are included in nongovernmental cost funds. *(SAM 14400)*

Budget
A plan of operation expressed in terms of financial or other resource requirements for a specific period of time. (*GC 13320, 13335; SAM 6120)*

Budget Act (BA)
An annual statute authorizing state departments to expend appropriated funds for the purposes stated in the Governor's Budget and amended by the Legislature. *(SAM 6333)*

Budget Bill
Legislation presenting the Governor's proposal for spending authorization for the next fiscal year. The Budget Bill is prepared by the Department of Finance and submitted to each house of the Legislature in January (accompanying the Governor's Budget). The Budget Bill's authors are typically the budget committee chairpersons.

The California Constitution requires the Legislature to pass the Budget Bill and send it by June 15 each year to the Governor for signature. The Budget Bill becomes the Budget Act upon signature by the Governor, after any line-item vetoes. *(Art. IV. § 12(c); GC 13338; SAM 6325, 6333)*

Budget Change Proposal (BCP)
A proposal to change the level of service or funding sources for activities authorized by the Legislature, propose new program activities not currently authorized, or to delete existing programs. The Department of Finance annually issues a Budget Letter with specific instructions for preparing BCPs. *(SAM 6120)*

Budget Cycle
The period of time required to prepare a state financial plan and enact that portion of it applying to the budget year. Significant events in the cycle include:

- preparation of the Governor's proposed budget (usually prepared between July 1st and January 10)
- submission of the Governor's Budget and Budget Bill to the Legislature (by January 10)
- submission to the Legislature of proposed adjustments to the Governor's Budget
    - April 1 - adjustments other than Capital Outlay and May Revision
    - May 1 - Capital Outlay appropriation adjustments
    - May 14 - May Revision adjustments for changes in General Fund revenues, necessary expenditure reductions to reflect updated revenue, and funding for Proposition 98, caseload, and population
- review and revision of the Governor's Budget by the Legislature
- return of the revised budget to the Governor by June 15, as required by the California Constitution, for signature after any line-item vetoes
- signing of the budget by the Governor . *(Art. IV. § 10, GC 13308, SAM 6150)*

Budget—Program or Traditional
A program budget expresses the operating plan in terms of the costs of activities (programs) to be undertaken to achieve specific goals and objectives. A traditional (or object of expenditure) budget expresses the plan in terms of categories of costs of the goods or services to be used to perform specific functions.

The Governor's Budget is primarily a program budget but also includes detailed categorization of proposed expenditures for goods and services (Expenditures by Category) for State Operations for each department. *(GC 13336; SAM 6210, 6220)*

Budget Revision (BR)
A document, usually approved by the Department of Finance, that cites a legal authority to authorize a change in an appropriation. Typically, BRs either increase the appropriation or make adjustments to the categories or programs within the appropriation as scheduled. (*SAM 6533, 6542, 6545)*

Budget Year (BY)
The next state fiscal year, beginning July 1 and ending June 30, for which the Governor's Budget is submitted (i.e., the year following the current fiscal year).

CALSTARS
The acronym for the California State Accounting and Reporting System, the state's primary accounting system. Most departments currently use CALSTARS. *(GC 13300)*

Capital Outlay (CO)
A character of expenditure of funds to acquire land, plan and construct new buildings, expand or modify existing buildings, and/or purchase equipment related to such construction. (*CS 3.00)*

Carryover
The unencumbered balance of an appropriation that continues to be available for expenditure in years subsequent to the year of enactment. For example, if a three-year appropriation is not fully encumbered in the first year, the remaining amount is carried over to the next fiscal year.

Cash Basis of Accounting
The basis of accounting in which revenues and expenditures are recorded when cash is received or disbursed.

Cash Flow Statement
A statement of cash receipts and disbursements for a specified period of time.

Category
A grouping of related types of expenditures, such as Personal Services, Operating Expenses and Equipment, Reimbursements, Special Items of Expense, Unclassified, Local Costs, Capital Costs, and Internal Cost Recovery. *(UCM)*

Category Transfer
An allowed transfer between categories or functions within the same schedule of an appropriation. Such transfers are presently authorized by Control Section 26.00 of the Budget Act (and prior to 1996-97, by Section 6.50 of the Budget Act). The control section specifies the amounts of the allowable transfers and requirements for reporting to the Legislature.

Change Book System
The system the Department of Finance uses to record all the legislative changes (including changes proposed by the Administration and approved by the Legislature) made to the Governor's Budget and the final actions on the budget taken by the Legislature and Governor. A “Final Change Book” is

published after enactment of the Budget Act. It includes detailed fiscal information on the changes made by the Legislature and by the Governor's vetoes. (*SAM 6355)*

Changes in Authorized Positions ("Schedule 2")
A schedule in the Governor's Budget that reflects staffing changes made subsequent to the adoption of the current year budget and enacted legislation. This schedule documents changes in positions due to various reasons. Some examples are: transfers, positions established, and selected reclassifications, as well as proposed new positions included in BCPs for the current or budget year. (SAM 6406)

Chapter
The reference assigned by the Secretary of State to an enacted bill, numbered sequentially in order of enactment each calendar year. The enacted bill is then referred to by this "chapter" number and the year in which it became law. For example, *Chapter 1, Statutes of 1997,* would refer to the first bill enacted in 1997.

Character of Expenditure
A classification identifying the major purpose of an expenditure, such as State Operations, Local Assistance, Capital Outlay, or Unclassified. *(UCM)*

Claim Schedule
A request from a state department to the State Controller's Office to disburse payment from a legal appropriation or account for a lawful state obligation. The claim schedule identifies the appropriation or account to be charged, the payee(s), the amount(s) to be paid, and an affidavit attesting to the validity of the request.

COBCP
Capital outlay budgets are zero-based each year, therefore, the department must submit a written capital outlay budget change proposal for each new project or subsequent phase of an existing project for which the department requests funding. *(SAM 6818)*

Codes, Uniform
See "Uniform Codes Manual."

Conference Committee
A committee of three members (two from the majority party, one from the minority party) from each house, appointed to meet and resolve differences between versions of a bill (e.g., when one house of the Legislature does not concur with bill amendments made by the other house). If resolution cannot be reached, another conference committee can be selected, but no more than three different conference committees can be appointed on any one bill. Budget staff commonly refer to the conference committee on the annual budget bill as the "Conference Committee." *(SAM 6340)*

Continuing Appropriation
An appropriation for a set amount that is available for more than one year. *(SAM 8382)*

Continuous Appropriation
Constitutional or statutory expenditure authorization which is renewed each year without further legislative action. The amount available may be a specific, recurring sum each year; all or a specified portion of the proceeds of specified revenues which have been dedicated permanently to a certain purpose; or it may be whatever amount is designated for the purpose as determined by formula, e.g., school apportionments. Note: Government Code Section 13340 sunsets statutory continuous appropriations on June 30 with exceptions specified in the section and other statutes. Section 30.00 of the annual Budget Act traditionally extends the continuous appropriations for one additional fiscal year. *(GC 13340)*

Continuously Vacant Positions
On July 1, positions which were continuously vacant for six consecutive monthly pay periods during the preceding fiscal year are abolished by the State Controller's Office. The six consecutive monthly pay periods may occur entirely within one fiscal year or between two consecutive fiscal years. The exceptions to this rule are positions exempt from civil service and instructional positions authorized for the California State University. The Department of Finance may authorize the reestablishment of positions in cases where the vacancies were (1) due to a hiring freeze, (2) the department has diligently attempted to fill the position but was unable to complete all steps to fill the position within six months, (3) the position is determined to be hard-to-fill, (4) the position has been designated as a management position for the purposes of collective bargaining and has been held vacant pending the appointment of the director or other chief executive officer of the department as part of the transition from one Governor to the suceeding Governor, or, (5) late enactment of the budget causes the department to delay filling the position, and the Department of Finance approves an agency's written appeal to continue the positions. In addition, departments may self-certify reestablishments by August 15 for positions that meet specified conditions during the vacancy period.

By October 15 of each year, the State Controller's Office is required to notify the Joint Legislative Budget Committee and the Department of Finance of the continously vacant positions identified for the preceding fiscal year. *(GC 12439)*

Control Sections
Sections of the Budget Act (i.e., 1.00 to the end) providing specific controls on the appropriations itemized in Section 2.00 of the Budget Act. See more detail under "Sections."

Cost-of-Living Adjustments (COLA)
Increases provided in state-funded programs that include periodic adjustments predetermined in state law (statutory, such as K-12 education apportionments), or established at optional levels (discretionary) by the Administration and the Legislature each year through the budget process.

Current Year (CY)
A term used in budgeting and accounting to designate the operations of the present fiscal year in contrast to past or future periods. (See also "Fiscal Year.")

Debt Service
The amount of money required to pay interest on outstanding bonds and the principal of maturing bonds.

Department
A governmental organization, usually belonging to the third level of the state organizational hierarchy as defined in the Uniform Codes Manual. *(UCM)*

Department of Finance (Finance)
The Director of Finance functions as the Governor's chief fiscal policy advisor with emphasis on the financial integrity of the state. Finance is delegated the responsibility for preparation of the Governor's Budget. Primary functions of the department include:

- Prepare, explain, and administer the state's annual financial plan (budget), which the Governor is required under the State Constitution to present by January 10 of each year.
- Analyze legislation.
- Establish appropriate fiscal policies to carry out the state's programs.
- Develop and maintain the California State Accounting and Reporting System (CALSTARS), which is used by most state departments to record their accounting transactions.

- Monitor and audit expenditures by state departments to ensure compliance with the law, approved standards and policies.

- Develop economic forecasts and revenue estimates.

- Develop population and enrollment estimates and projections.

- Review expenditures for information technology activities of state departments.

- Support the Director or designee in their role as member of approximately 95 state boards and commissions.

(GC 13000 et seq.)

Detailed Budget Adjustments
Department Detailed Budget Adjustments are included in department budget displays to provide the reader a snapshot of proposed expenditure and position adjustments in the department, why those changes are being proposed, and their dollar and position impact.

The Detailed Budget Adjustments include two adjustment categories: workload and policy. Within the workload section, issues are further differentiated between budget change proposals and other workload budget adjustments. Below are the standard categories or headings including definitions: Additional categories or headings may be used as needed in any particular year.

- **Workload Budget Adjustments** - See "Workload Budget Adjustments."
- **Policy Adjustments** - See "Policy Adjustments."
- **Employee Compensation Adjustments** - See "Employee Compensation/Retirement."
- **Retirement Rate Adjustment** – See "Employee Compensation/Retirement."
- **Limited Term Positions/ Expiring Programs** - Reduction of the budget-year funding and positions for expiring programs or positions.
- **Abolished Vacant Positions** – Positions abolished that are vacant for six consecutive monthly pay periods, irrespective of fiscal years, per Government Code 12439.
- **One-Time Cost Reductions** - Reductions of the budget-year funding and positions to account for one-time costs budgeted in the current year.
- **Full-Year Cost of New/Expanded Programs** - Increases to the budget year funding and positions to reflect the full-year costs of programs authorized to begin after July 1 of the current fiscal year (does not include the full year effect of employee compensation adjustments that are displayed separately).
- **Carryover/Reappropriation** – See "Carryover" and "Reappropriation."
- **Legislation With an Appropriation** – New legislation with funding to carry out its purpose.
- **Expenditure Transfers** – Transfers of expenditures between two departments but within the same fund.
- **Lease Revenue Debt Service Adjustment** – Expenditures related to changes in lease revenue costs.
- **Miscellaneous Adjustments** – This category includes all workload budget adjustments not included in one of the aforementioned categories. This category may include Pro Rata and Statewide Costs Allocation Plan (SWCAP) adjustments. See Pro Rata and Statewide Cost Allocation.

Detail of Appropriations and Adjustments
A budget display, for each organization, that reflects appropriations and adjustments by fund source for each character of expenditure, (i.e., State Operations, Local Assistance, and Capital Outlay). (*SAM 6478)*

Element
A subdivision of a budgetary program and the second level of the program structure in the Uniform Codes Manual.

Employee Compensation/Retirement
Salary, benefit, employer retirement rate contribution adjustments, and any other related statewide compensation adjustments for state employees. Various 9800 Items of the Budget Act appropriate funds for compensation increases for most state employees (excluding Higher Education and some others), that is, they appropriate the incremental adjustment proposed for the salary and benefit adjustments for the budget year. The base salary and benefit levels are included in individual agency/departmental budgets.

Encumbrance
The commitment of all or part of an appropriation for future expenditures. Encumbrances represent commitments related to unfilled purchase orders or unfulfilled contracts. Outstanding encumbrances are recognized as budgetary expenditures in the department's budget documents and annual financial reports. For budgeting purposes, the Department of Finance makes a statewide adjustment to remove encumbrances from overall General Fund expenditures and show the amount as a reserve in the fund balance, in accordance with Government Code section 13307. For other funds, such encumbrance adjustments are not made, and encumbrances are treated as budgetary expenditures which decrease the fund balance.

Enrolled Bill Report (EBR)
An analysis prepared on Legislative measures passed by both houses and referred to the Governor, to provide the Governor's Office with information concerning the measure with a recommendation for action by the Governor. While approved bill analyses become public information, EBRs do not. Note that EBRs are not prepared for Constitutional Amendments, or for Concurrent, Joint, or single house resolutions, since these are not acted upon by the Governor. *(SAM 6965)*

Enrollment, Caseload, & Population Adjustments
These adjustments are generally formula or population driven.

Executive Branch
One of the three branches of state government, responsible for implementing and administering the state's laws and programs. The Governor's Office and those individuals, departments, and offices reporting to it (the Administration) are part of the Executive Branch.

Executive Order (EO)
A budget document, issued by the Department of Finance, requesting the State Controller's Office to make an adjustment in their accounts. The adjustments are typically authorized by Budget Act provision language, Budget Act control sections, and other statutes. An EO is used when the adjustment makes increases or decreases on a state-wide basis, involves two or more appropriations, or makes certain transfers or loans between funds.

Exempts
State employees exempt from civil service pursuant to subdivision (e), (f), or (g) of Section 4 of Article VII of the California Constitution. Examples include department directors and other gubernatorial appointees. *(SAM 0400)*

Expenditure
Expenditures reported on a department's annual financial reports and "past year" budget documents consist of amounts paid and accruals (including encumbrances and payables) for obligations created for the fiscal year. "Current Year" and "Budget Year" expenditures in budget documents are estimates. See "Encumbrances".

Expenditure Authority
The authorization to make an expenditure (usually by a budget act appropriation, provisional language or other legislation).

Expenditures by Category
A budget display, for each department, that reflects actual past year, estimated current year, and proposed budget year expenditures presented by character of expenditure (e.g., State Operations and/or Local Assistance) and category of expenditure (e.g., Personal Services, Operating Expenses and Equipment).

3-year Expenditures and Positions
A display at the start of each departmental budget that presents the various departmental programs by title, dollar totals, positions, and source of funds for the past, current, and budget years.

Feasibility Study Report (FSR)
A document proposing an information technology project that contains analyses of options, cost estimates, and other information. *(SAM 4920-4930)*

Federal Fiscal Year (FFY)
The 12-month accounting period of the federal government, beginning on October 1 and ending the following September 30. For example, a reference to FFY 2013 means the period beginning October 1, 2012 and ending September 30, 2013. (See also "Fiscal Year.")

Federal Funds
For legal basis budgeting purposes, classification of funds into which money received in trust from an agency of the federal government will be deposited and expended by a state department in accordance with state and/or federal rules and regulations. State departments must deposit federal grant funds in the Federal Trust Fund, or other appropriate federal fund in the State Treasury. *(GC 13326 (Finance approval), 13338 approp. of FF, CS 8.50)*

Feeder Funds
For legal basis accounting purposes, funds into which certain taxes or fees are deposited upon collection. In some cases administrative costs, collection expenses, and refunds are paid. The balance of these funds is transferable at any time by the State Controller's Office to the receiving fund, in most cases, the General Fund.

Final Budget
Generally refers to the Governor's Budget as amended by actions taken on the Budget Bill (e.g. legislative changes, Governor's vetoes). Note: Subsequent legislation (law enacted after the Budget Bill is chaptered) may add, delete, or change appropriations or require other actions that affect a budget appropriation.

Final Budget Summary
A document produced by the Department of Finance after enactment of the Budget Act which reflects the Budget Act, any vetoes to language and/or appropriations, technical corrections to the Budget Act, and summary budget information. (See also "Budget Act," "Change Book.") (*SAM 6130, 6350)*

Finance Conversion Code (FCC) Listing
A listing distributed by the State Controller's Office to departments each spring, which based upon departmental coding updates, will dictate how the salaries and wages detail will be displayed in the Salaries and Wages publication. *(SAM 6430)*

Finance Letter (FL)
Proposals made, by the Director of Finance to the chairpersons of the budget committees in each house, to amend the Budget Bill and the Governor's Budget from that submitted on January 10 to reflect a revised plan of expenditure for the budget year and/or current year. Specifically, the

Department of Finance is required to provide the Legislature with updated expenditure and revenue information for all policy adjustments by April 1, capital outlay technical changes by May 1, and changes for caseload, population, enrollment, updated revenues, and Proposition 98 by May 14. *(GC 13308)*

Fiscal Committees
Committees of members in each house of the Legislature that review the fiscal impact of proposed legislation, including the Budget Bill. Currently, the fiscal committees include the Senate Budget and Fiscal Review Committee, Senate Appropriations Committee, Assembly Appropriations Committee, and the Assembly Budget Committee. The Senate Budget and Fiscal Review Committee and the Assembly Budget Committee are broken into subcommittees responsible for specific state departments or subject areas. Both houses also have Revenue and Taxation Committees that are often considered fiscal committees.

Fiscal Impact Analysis
Typically refers to a section of an analysis (e.g., bill analysis) that identifies the costs and revenue impact of a proposal and, to the extent possible, a specific numeric estimate for applicable fiscal years.

Fiscal Year (FY)
A 12-month period during which income is earned and received, obligations are incurred, encumbrances are made, appropriations are expended, and for which other fiscal transactions are recorded. In California state government, the fiscal year begins July 1 and ends the following June 30. If reference is made to the state's FY 2013 , this is the time period beginning July 1, 2013 and ending June 30, 2014. (See also "Federal Fiscal Year.") *(GC 13290)*

Floor
The Assembly or Senate chambers or the term used to describe the location of a bill or the type of session. Matters may be referred to as "on the floor".

Form 9
A request by a department for space planning services (e.g., new or additional space lease extensions, or renewals in noninstututional) and also reviewed by the Department of Finance. *(SAM 6453)*

Form 22
A department's request to transfer money to the Architectural Revolving Fund (e.g., for building improvements), reviewed by the Department of Finance. *(GC 14957; SAM 1321.1)*

Fund
A legal budgeting and accounting entity that provides for the segregation of moneys or other resources in the State Treasury for obligations in accordance with specific restrictions or limitations. A separate set of accounts must be maintained for each fund to show its assets, liabilities, reserves, and balance, as well as its income and expenditures.

Fund Balance
For accounting purposes, the excess of a fund's assets over its liabilities. For budgeting purposes, the excess of a fund's resources over its expenditures.

Fund Condition Statement
A budget display, included in the Governor's Budget, summarizing the operations of a fund for the past, current, and budget years. The display includes the beginning balance, prior year adjustments, revenue, transfers, loans, expenditures, the ending balance, and any reserves. Fund Condition Statements are required for all special funds. The Fund Condition Statement for the General Fund is Summary Schedule 1. Other funds are displayed at the discretion of the Department of Finance.

General Fund (GF)
For legal basis accounting and budgeting purposes, the predominant fund for financing state government programs, used to account for revenues which are not specifically designated to be accounted for by any other fund. The primary sources of revenue for the General Fund are the personal income tax, sales tax, and corporation taxes. The major uses of the General Fund are education (K-12 and higher education), health and human service programs, and correctional programs.

Generally Accepted Accounting Principles (GAAP)
The accounting principles, rules, conventions, and procedures that are used for accounting and financial reporting. GAAP for governments are set by the Governmental Accounting Standards Board (GASB), the accounting and financial reporting standards setting body for state and local governments.

Governmental Cost Funds
For legal basis accounting and budgeting purposes, funds that derive revenue from taxes, licenses, and fees.

Governor's Budget
The publication the Governor presents to the Legislature, by January 10 each year. It contains recommendations and estimates for the state's financial operations for the budget year. It also displays the actual revenues and expenditures of the state for the prior fiscal year and updates estimates for the current year revenues and expenditures. This publication is also produced in a web format known as the Proposed Budget Detail on the Department of Finance website. *(Article IV, § 12; SAM 6120, et seq)*

Governor's Budget Summary (or A-Pages)
A companion publication to the Governor's Budget that outlines the Governor's policies, goals, and objectives for the budget year. It provides a perspective on significant fiscal and/or structural proposals. This publication is also produced in a web format known as the Proposed Budget Summary on the Department of Finance web site.

Grants
Typically used to describe amounts of money received by an organization for a specific purpose but with no obligation to repay (in contrast to a loan, although the award may stipulate repayment of funds under certain circumstances). For example, the state receives some federal grants for the implementation of health and community development programs, and the state also awards various grants to local governments, private organizations and individuals according to criteria applicable to the program.

Indirect Costs
Costs which by their nature cannot be readily associated with a specific organization unit or program. Like general administrative expenses, indirect costs are distributed to the organizational unit(s) or program(s) which benefit from their incurrence.

Initiative
The power of the electors to propose statutes or Constitutional amendments and to adopt or reject them. An initiative must be limited to a single subject and be filed with the Secretary of State with the appropriate number of voter signatures in order to be placed on the ballot. *(Article II, § 8)*

Item
Another word for appropriation.

Judgments
Usually refers to decisions made by courts against the state. Payment of judgments is subject to a variety of controls and procedures.

Language Sheets
Copies of the current Budget Act appropriation items provided to Finance and departmental staff each fall to update for the proposed Governor's Budget. These updated language sheets become the proposed Budget Bill. In the spring, language sheets for the Budget Bill are updated to reflect revisions to the proposed appropriation amounts, Item schedule(s), and provisions, and become the Budget Act.

Legislative Analyst's Office (LAO)
A non-partisan organization that provides advice to the Legislature on fiscal and policy matters. For example, the LAO annually publishes a detailed analysis of the Governor's Budget and this document becomes the initial basis for legislative hearings on the Budget Bill. *(SAM 7360)*

Legislative Counsel Bureau
A staff of attorneys who draft legislation (bills) and proposed amendments, and review, analyze and render opinions on legal matters for the legislative members.

Legislative Counsel Digest
A summary of what a legislative measure does contrasting existing law and the proposed change. This summary appears on the first page of a bill.

Legislative Information System (LIS)
An on-line system developed and used by the Department of Finance to maintain current information about all bills introduced in the Assembly and Senate for the current two-year session, and for other recently completed sessions. Finance analysts use this system to prepare bill analyses.

Legislature, California
A two-house body of elected representatives vested with the responsibility and power to make laws affecting the state (except as limited by the veto power of the Governor). See also "Assembly" and "Senate."

Limited-Term Position (LT)
Any position that has been authorized only for a specific length of time with a set termination date. Limited-term positions may be authorized during the budget process or in transactions approved by the Department of Finance. *(SAM 6515)*

Line Item
See "Objects of Expenditure."

Local Assistance (LA)
The character of expenditures made for the support of local government or other locally administered activities.

Mandates
See "State-Mandated Local Program." *(UCM)*

May Revision
An annual update to the Governor's Budget containing a revised estimate of General Fund revenues for the current and ensuing fiscal years, any proposals to adjust expenditures to reflect updated revenue estimates, and all proposed adjustments to Proposition 98, presented by the Department of Finance to the Legislature by May 14 of each year. (See also "Finance Letter.") (*SAM 6130 and GC 13308)*

Merit Salary Adjustment (MSA)
A cost factor resulting from the periodic increase in salaries paid to personnel occupying authorized positions. Personnel generally receive a salary increase of five percent per year up to the upper salary limit of the classification, contingent upon the employing agency certifying that the employee's job performance meets the level of quality and quantity expected by the agency, considering the employee's experience in the position.

Merit salary adjustments for employees of the University of California and the California State University are determined in accordance with rules established by the regents and the trustees, respectively.

Funding typically is not provided for MSAs in the budget; any additional costs incurred by a department usually must be absorbed from within existing resources. (GC 19832)

Minor Capital Outlay
Construction projects or equipment acquired to complete a construction project, estimated to cost less than $600,000 plus any escalation per Public Contract Code 10108.

Modified Accrual Basis
The basis of accounting in which revenues are recognized if the underlying transaction has occurred as of the last day of the fiscal year and the amount is measurable and available to finance expenditures of the current period (i.e., the actual collection will occur either during the current period or after the end of the current period to be used to pay current year-end liabilities). Expenditures are accrued when the obligations are created, except for amounts payable from future fiscal year appropriations. This basis is generally used for the General Fund and special funds.

Non-add
Refers to a numerical value that is displayed in parentheses for informational purposes but is not included in computing totals, usually because the amounts are already accounted for in the budget system or display.

Nongovernmental Cost Funds
For legal basis purposes, used to budget and account for revenues other than general and special taxes, licenses, and fees or certain other state revenues.

Object of Expenditure (Objects)
A classification of expenditures based on the type of goods or services received. For example, the budget category of Personal Services includes the objects of Salaries and Wages and Staff Benefits. The Governor's Budget includes an "Expenditures by Category" for each department at this level. These objects may be further subdivided into line items such as State Employees' Retirement and Workers' Compensation. *(UCM)*

Obligations
Amounts that a governmental unit may legally be required to pay out of its resources. Budgetary authority must be available before obligations can be created. For budgetary purposes, obligations include payables for goods or services received but not yet paid for and encumbrances (i.e., commitments for goods and services not yet received nor paid for). .

One-Time Cost
A proposed or actual expenditure that is non-recurring (usually only in one annual budget) and not permanently included in baseline expenditures. Departments make baseline adjustments to remove prior year one-time costs and appropriately reduce their expenditure authority in subsequent years' budgets.

Operating Expenses and Equipment (OE&E)
A category of a support appropriation which includes objects of expenditure such as general expenses, printing, communication, travel, data processing, equipment, and accessories for the equipment. (*SAM 6451)*

Organization Code
The four-digit code assigned to each state governmental entity (and sometimes to unique budgetary programs) for fiscal system purposes. The organization code is the first segment of the budget item/appropriation number. *(UCM)*

Out-of-State Travel (OST) blanket
A request by a state agency for Governor's Office approval of the proposed out-of-state trips to be taken by that agency's personnel during the fiscal year. *(SAM 0760-0765)*

Overhead
Those elements of cost necessary in the production of an article or the performance of a service that are of such a nature that the amount applicable to the product or service cannot be determined directly. Usually they relate to those costs that do not become an integral part of the finished product or service, such as rent, heat, light, supplies, management, or supervision. See also "Indirect Costs."

Overhead Unit
An organizational unit that benefits the production of an article or a service but that cannot be directly associated with an article or service to distribute all of its expenditures to elements and/or work authorizations. The cost of overhead units are distributed to operating units or programs within the department. (See "Administration Program Costs.")

Past Year
The most recently completed fiscal year. (See also "Fiscal Year.")

Performance Budget
A budget wherein proposed expenditures are organized and tracked primarily by measurable performance objectives for activities or work programs. A performance budget may also incorporate other bases of expenditure classification, such as character and object, but these are given a subordinate status to activity performance.

Personal Services
A category of expenditure which includes such objects of expenditures as the payment of salaries and wages of state employees and employee benefits, including the state's contribution to the Public Employees' Retirement Fund, insurance premiums for workers' compensation, and the state's share of employees' health insurance. See also "Objects of Expenditure." *(SAM 6403, 6506)*

Plan of Financial Adjustment (PFA)
A plan proposed by a department, approved by the Department of Finance, and accepted by the State Controller's Office (SCO), to permit the SCO to allocate costs paid from one item to one or more items within a department's appropriations. A PFA might be used, for example, to allow the department to pay all administrative costs out of its main item and then to transfer the appropriate costs to the correct items for their share of the costs paid. The SCO transfers the funds upon receipt of a letter (transaction request) from the department stating the amount to be transferred based on the criteria for cost distribution in the approved PFA. *(SAM 8715)*

Planning Estimate (PE)
A document used to record and monitor those current and budget year expenditure adjustments including budget change proposals approved for inclusion in the Governor's Budget. PEs are broken down by department, fund type, character, Budget Bill/Act appropriation number, and "lines"(i.e., expenditure groupings such as employee compensation, price increases, one-time costs). PEs are primarily used to record the incremental decisions made about changes to each base budget, are

updated at frequent intervals, and can be used for quick planning or "what if" analyses. PEs identify all proposed expenditure changes (baseline and policy) to the previous year's Budget Act, and once budget preparation is complete, PEs will tie to all other fiscal characterizations of the proposed Governor's Budget. (The term is sometimes used synonymously with Planning Estimate Line, which is one specific expenditure grouping.)

Planning Estimate Line
A separate planning estimate adjustment or entry for a particular expenditure or type. (See "Planning Estimate.")

Policy Adjustments
Changes to existing law or Administration policies. These adjustments require action by the Governor and/or Legislature and modify the workload budget.

Pooled Money Investment Account (PMIA)
A State Treasurer's Office accountability account maintained by the State Controller's Office to account for short-term investments purchased by the State Treasurer's Office as designated by the Pooled Money Investment Board on behalf of various funds.

Pooled Money Investment Board (PMIB)
A board comprised of the Director of Finance, State Treasurer, and the State Controller, the purpose of which is to design an effective cash management and investment program, using all monies flowing through the Treasurer's bank accounts and keeping all available monies invested consistent with the goals of safety, liquidity, and yield. *(SAM 7350)*

Positions
See "Authorized Positions."

Price Increase
A budget adjustment to reflect the inflation factors for specified operating expenses consistent with the budget instructions from the Department of Finance.

Prior Year Adjustment
An adjustment for the difference between prior year accruals and actual expenditures or revenues. The prior year adjustment amount is generally included in the Fund Condition Statements as an adjustment to realign the beginning fund balance to ensure accurate fund balances.

Pro Rata
The amount of state administrative costs, paid from the General Fund and the Central Service Cost Recovery Fund (e.g., amounts expended by central service departments such as the State Treasurer's Office, State Personnel Board, State Controller's Office, and Department Finance for the general administration of state government), that are chargeable to and recovered from special funds (other than the General Fund, Central Service Cost Recovery Fund, and federal funds) as determined by the Department of Finance. *(GC 11270-11277, 13332.03; 22828.5; SAM 8753, 8754)*

Program Budget
See "Budget, Program or Traditional."

Program Cost Accounting (PCA)
A level of accounting that identifies costs by activities performed in achievement of a purpose in contrast to the traditional line-item format. The purpose of accounting at this level is to produce cost data sufficiently accurate for allocating and managing its program resources. *(SAM 9200)*

Programs
Activities of an organization grouped on the basis of common objectives. Programs are comprised of elements, which can be further divided into components and tasks.

Proposed New Positions
A request for an authorization to expend funds to employ additional people to perform work. Proposed new positions may be for limited time periods (limited term) and for full or less than full time. Proposed new positions may be for an authorization sufficient to employ one person, or for a sum of funds (blanket) from which several people may be employed. (See also "Changes in Authorized Positions.")

Proposition 98
An initiative passed in November 1988, and amended in the June 1990 election, that provides a minimum funding guarantee for school districts, community college districts, and other state agencies that provide direct elementary and secondary instructional programs for kindergarten through grade 14 (K-14) beginning with fiscal year 1988-89. The term is also used to refer to any expenditures which fulfill the guarantee. *(Article XVI, § 8)*

Provision
Language in a bill or act that imposes requirements or constraints upon actions or expenditures of the state. Provisions are often used to constrain the expenditure of appropriations but may also be used to provide additional or exceptional authority. (Exceptional authority usually begins with the phrase "Notwithstanding...".)

Public Service Enterprise Funds
For legal basis accounting purposes, the fund classification that identifies funds used to account for the transactions of self-supporting enterprises that render goods or services for a direct charge to the user (primarily the general public). Self-supporting enterprises, that render goods or services for a direct charge to other state departments or governmental entities, account for their transactions in a Working Capital and Revolving Fund. *(UCM, Fund Codes—Structure)*

Reappropriation
The extension of an appropriation's availability for encumbrance and/or expenditure beyond its set termination date and/or for a new purpose. Reappropriations are typically authorized by statute for one year at a time but may be for some greater or lesser period.

Recall
The power of the electors to remove an elected officer. *(Article II, § 13)*

Redemption
The act of redeeming a bond or other security by the issuing agency.

Reference Code
A three-digit code identifying whether the item is from the Budget Act or some other source (e.g., legislation), and its character (e.g., state operations). This is the middle segment of the budget item/appropriation number.

Referendum
The power of the electors to approve or reject statutes or parts of statutes, with specified exceptions and meeting specified deadlines and number of voters' signatures. *(Article II, § 9)*

Refund to Reverted Appropriations
A receipt account to record the return of monies (e.g., abatements and reimbursements) to appropriations that have reverted.

Regulations
A rule, order, or standard of general application issued by a state agency to implement, interpret, or make specific the law enforced or administered by it, or to govern its procedures. With state government, the process of adopting or changing most regulations is subject to the Administrative Procedures Act and oversight of the Office of Administrative Law (OAL). The Department of Finance must also review and approve any non-zero estimate of state or local fiscal impact included in a regulation package before it can be approved by OAL. *(GC 13075, and Chapter 3.5 [commencing with section 11340], Part 1, Division 3, Title 2; SAM 6601-6616)*

Reimbursement Warrant (or Revenue Anticipation Warrant)
A warrant that has been sold by the State Controller's Office, as a result of a cash shortage in the General Fund, the proceeds of which will be used to reimburse the General Cash Revolving Fund. The Reimbursement Warrant may or may not be registered by the State Treasurer's Office. The registering does not affect the terms of repayment or other aspects of the Reimbursement Warrant.

Reimbursements
An amount received as a payment for the cost of services performed, or of other expenditures made for, or on behalf of, another entity (e.g., one department reimbursing another for administrative work performed on its behalf). Reimbursements represent the recovery of an expenditure. Reimbursements are available for expenditure up to the budgeted amount (scheduled in an appropriation), and a budget revision must be prepared and approved by the Department of Finance before any reimbursements in excess of the budgeted amount can be expended. *(SAM 6463)*

Reserve
An amount of a fund balance set aside to provide for expenditures from the unencumbered balance for continuing appropriations, economic uncertainties, future apportionments, pending salary or price increase appropriations, and appropriations for capital outlay projects.

Revenue
Any addition to cash or other current assets that does not increase any liability or reserve and does not represent the reduction or recovery of an expenditure (e.g., reimbursements/abatements). Revenues are a type of receipt generally derived from taxes, licenses, fees, or investment earnings. Revenues are deposited into a fund for future appropriation, and are not available for expenditure until appropriated. *(UCM)*

Revenue Anticipation Notes (RANs)
A cash management tool generally used to eliminate cash flow imbalances in the General Fund within a given fiscal year. RANs are not a budget deficit-financing tool.

Revenue Anticipation Warrant (RAW)
See Reimbursement Warrant.

Reversion
The return of the unused portion of an appropriation to the fund from which the appropriation was made, normally two years (four years for federal funds) after the last day of an appropriation's availability period. The Budget Act often provides for the reversion of unused portions of appropriations when such reversion is to be made prior to the statutory limit.

Reverted Appropriation
An appropriation that is reverted to its fund source after the date its liquidation period has expired.

Revolving Fund
Generally refers to a cash account known as an office revolving fund (ORF). It is not a fund but an advance from an appropriation. Agencies may use the cash advance to disburse ORF checks for immediate needs, as specified in SAM. The cash account is subsequently replenished by a State

Controlloer's Office warrant. The size of departmental revolving funds is subject to Department of Finance approval within statutory limits. *(SAM 8100, et seq)*

SAL
See "Appropriations Limit, State".

Salaries and Wages Supplement
An annual publication issued shortly after the Governor's Budget, containing a summary of all positions by department, unit, and classification for the past, current, and budget years, as of July 1 of the current year. This publication is also displayed on the Department of Finance website.

Schedule
The detail of an appropriation in the Budget Bill or Act, showing its distribution to each of the categories, programs, or projects thereof. *OR*

A supplemental schedule submitted by departments to detail certain expenditures. *OR*

A summary listing in the Governor's Budget.

Schedule 2
See "Changes in Authorized Positions."

Schedule 7A
A summary version of the State Controller's Office detailed Schedule 8 position listing for each department. The information reflected in this schedule is the basis for the "Salaries and Wages Supplement" displayed on the Department of Finance website. *(SAM 6415-6419)*

Schedule 8
A detailed listing generated from the State Controller's Office payroll records for a department of its past, current, and budget year positions as of June 30 and updated for July 1. This listing must be reconciled with each department's personnel records and becomes the basis for centralized payroll and position control. The reconciled data should coincide with the level of authorized positions for the department per the final Budget. *(SAM 6424-6429, 6448)*

Schedule 10 (Supplementary Schedule of Appropriations)
A Department of Finance control document listing all appropriations and allocations of funds available for expenditure during the past, current, and budget years. These documents are sorted by state operations, local assistance, and capital outlay. The Schedule 10s reconcile expenditures by appropriation (fund source) and the adjustments made to appropriations, including allocation of new funds. These documents also show savings and carryovers by item. The information provided in this document is summarized in the Detail of Appropriations and Adjustments in the Governor's Budget. (*SAM 6484)*

Schedule 10R (Supplementary Schedule of Revenues and Transfers)
A Department of Finance control document reflecting information for revenues, transfers, and inter-fund loans for the past, current, and budget years. Schedule 10Rs are required for the General Fund and all special funds. Schedule 10R information for special funds is displayed in the Fund Condition Statement for that fund in the Governor's Budget.

Schedule 11
Outdated term for "Supplementary Schedule of Operating Expenses and Equipment."

Schedule of Federal Funds and Reimbursements, Supplementary
A supplemental schedule submitted by departments during budget preparation which displays the federal receipts and reimbursements by source. *(SAM 6460)*

Schedule of Operating Expenses and Equipment, Supplementary
A supplemental schedule submitted by departments during budget preparation which details by object the expenses included in the Operating Expenses and Equipment category. *(SAM 6454, 6457)*

Section 1.50
Section of the Budget Act that 1) specifies a certain format and style for the codes used in the Budget Act, 2) authorizes the Department of Finance to revise codes used in the Budget Act in order to provide compatibility with the Governor's Budget and records of the State Controller's Office, and 3) authorizes the Department of Finance to revise the schedule of an appropriation in the Budget Act for technical changes that are consistent with legislative intent. Examples of such technical changes to the schedule of an appropriation include the elimination of amounts payable, the distribution of administration costs, the distribution of unscheduled amounts to programs or categories, and the augmentation of reimbursement amounts when the Legislature has approved the budget for the department providing the reimbursement.

Section 1.80
Section of the Budget Act that includes periods of availability for Budget Act appropriations.

Section 8.50
The Control Section of the Budget Act that provides the authority to increase federal funds spending authority.

Section 26.00
A Control Section of the Budget Act that provides the authority for the transfer of funds from one category, program or function within a schedule to another category, program or function within the same schedule, subject to specified limitations and reporting requirements to the Legislature. (Prior to 1996-97, this authority was contained in Section 6.50 of the Budget Act.) *(SAM 6548)*

Section 28.00
A Control Section of the Budget Act that authorizes the Director of Finance to approve the augmention or reduction of items of expenditure for the receipt of unanticipated federal funds or other non-state funds, and that specifies the related reporting requirements to the Legislature. Appropriation authority for unanticipated federal funds is contained in Section 8.50. *(SAM 6551-6557)*

Section 28.50
A Control Section of the Budget Act that authorizes the Department of Finance to augment or reduce the reimbursement line of an appropriation schedule for reimbursements received from other state agencies. It also contains specific reporting requirements to the Legislature. *(SAM 6551-6557)*

Section 30.00
A Control Section of the Budget Act that amends Government Code Section 13340 to sunset continuous appropriations.

Section 31.00
A Control Section of the Budget Act that specifies certain administrative procedures. For example, the section subjects the Budget Act appropriations to various sections of the Government Code, limits the new positions a department may establish to those authorized in the Budget, requires Finance approval and legislative notification of certain position transactions, requires all administratively established positions to terminate on June 30 and allows for such positions to continue if they were established after the Governor's Budget was submitted to the Legislature, and prohibits increases in salary ranges and other employee compensation which require funding not authorized by the budget unless the Legislature is informed.

Senate
The upper house of California's Legislature consisting of 40 members. As a result of Proposition 140 (1990, term limits) and Proposition 28 (2012, limits on Legislators' terms in office), members elected in or after 2012 may serve 12 years in the Legislature in any combination of four-year state Senate or two-year state Assembly terms. Prior to Proposition 28, Senate members could serve a maximum of two four-year terms. Twenty members are elected every two years. (*Article IV, § 2 (a))*

Service Revolving Fund
A fund used to account for and finance many of the client services rendered by the Department of General Services. Amounts expended by the fund are reimbursed by sales and services priced at rates sufficient to keep the fund solvent. *(SAM 8471.1)*

Settlements
Refers to any proposed or final settlement of a legal claim (usually a suit) against the state. Approval of settlements and payments for settlements are subject to numerous controls. See also "Judgments." *(GC 965)*

Shared Revenue
A state-imposed tax, such as the gasoline tax, which is shared with local governments in proportion, or substantially in proportion, to the amount of tax collected or produced in each local unit. The tax may be collected either by the state and shared with the localities, or collected locally and shared with the state.

Sinking Fund
A fund or account in which money is deposited at regular intervals to provide for the retirement of bonded debt.

Special Fund for Economic Uncertainties
A fund in the General Fund (a similar reserve is included in each special fund) authorized by statute and Budget Act Control Section 12.30 to provide for emergency situations. *(GC 16418 , 16418.5)*

Special Funds
For legal basis budgeting purposes, funds created by statute, or administratively per Government Code Section 13306, used to budget and account for taxes, licenses, and fees that are restricted by law for particular activities of the government.

Special Items of Expense
An expenditure category that covers nonrecurring large expenditures or special purpose expenditures that generally require a separate appropriation (or otherwise require separation for clarity). *(SAM 6469; UCM)*

Sponsor
An individual, group, or organization that initiates or brings to a Legislator's attention a proposed law change.

Spot Bill
An introduced bill that makes non-substantive changes in a law, usually with the intent to amend the bill at a later date to include substantive law changes. This procedure provides a means for circumventing the deadline for the introduction of bills.

Staff Benefits
An object of expenditure representing the state costs of contributions for employees' retirement, OASDI, health benefits, and nonindustrial disability leave benefits. *(SAM 6412; UCM)*

State Fiscal Year
The period beginning July 1 and continuing through the following June 30.

State-Mandated Local Program
State reimbursements to local governments for the cost of activities required by legislative and executive acts. This reimbursement requirement was established by Chapter 1406, Statutes of 1972 (SB 90) and further ratified by the adoption of Proposition 4 (a constitutional amendment) at the 1979 general election. *(Article XIII B, § 6; SAM 6601)*

State Operations (SO)
A character of expenditure representing expenditures for the support of state government, exclusive of capital investments and expenditures for local assistance activities.

Statewide Cost Allocation Plan (SWCAP)
The amount of state administrative, General Fund costs (e.g., amounts expended by central service departments such as the State Treasurer's Office, State Personnel Board, State Controller's Office, and the Department of Finance for the general administration of state government) chargeable to and recovered from federal funds, as determined by the Department of Finance. These statewide administrative costs are for administering federal programs, which the federal government allows reimbursement. *(GC 13332.01-13332.02; SAM 8753, 8755-8756 et seq.)*

Statute
A written law enacted by the Legislature and signed by the Governor (or a vetoed bill overridden by a two-thirds vote of both houses), usually referred to by its chapter number and the year in which it is enacted. Statutes that modify a state code are "codified" into the respective Code (e.g., Government Code, Health and Safety Code). See also "Bill" and "Chapter". *(Article IV, § 9)*

Subcommittee
The smaller groupings into which Senate or Assembly committees are often divided. For example, the fiscal committees that hear the Budget Bill are divided into subcommittees generally by departments/subject area (e.g., Education, Resources, General Government).

Subventions
Typically used to describe amounts of money expended as local assistance based on a formula, in contrast to grants that are provided selectively and often on a competitive basis. For the purposes of Article XIII B, state subventions include only money received by a local agency from the state, the use of which is unrestricted by the statutes providing the subvention. (GC Section 7903)

Summary Schedules
Various schedules in the Governor's Budget Summary which summarize state revenues, expenditures and other fiscal and personnel data for the past, current, and budget years.

Sunset Clause
Language contained in a law that states the expiration date for that statute.

Surplus
An outdated term for a fund's excess of assets (or resources) over liabilities. See "Fund Balance."

Tax Expenditures
Subsidies provided through the taxation systems by creating deductions, credits and exclusions of certain types of income or expenditures that would otherwise be taxable.

Technical
In the budget systems, refers to an amendment that clarifies, corrects, or otherwise does not materially affect the intent of a bill.

Tort
A civil wrong, other than a breach of contract, for which the court awards damages. Traditional torts include negligence, malpractice, assault and battery. Recently, torts have been broadly expanded such that interference with a contract and civil rights claims can be torts. Torts result in either settlements or judgments. *(GC 948, 965-965.9; SAM 6472, 8712; BA Item 9670)*

Traditional Budget
See "Budget, Program or Traditional."

Transfers
As used in Schedule 10Rs and fund condition statements, transfers reflect the movement of resources from one fund to another based on statutory authorization or specific legislative transfer appropriation authority. See also "Category Transfer."

Trigger
An event that causes an action or actions. Triggers can be active (such as pressing the update key to validate input to a database) or passive (such as a tickler file to remind of an activity). For example, budget "trigger" mechanisms have been enacted in statute under which various budgeted programs are automatically reduced if revenues fall below expenditures by a specific amount.

Unanticipated Cost/Funding Shortage
A lack or shortage of (1) cash in a fund, (2) expenditure authority due to an insufficient appropriation, or (3) expenditure authority due to a cash problem (e.g., reimbursements not received on a timely basis). See Budget Act Items 9840 and 9850.

Unappropriated Surplus
An outdated term for that portion of the fund balance not reserved for specific purposes. See "Fund Balance" and "Reserve."

Unencumbered Balance
The balance of an appropriation not yet committed for specific purposes. See "Encumbrance."

Uniform Codes Manual (UCM)
A document maintained by the Department of Finance which sets standards for codes and various other information used in state fiscal reporting systems. These codes identify, for example, organizations, programs, funds, receipts, line items, and objects of expenditure.

Unscheduled Reimbursements
Reimbursements collected by an agency that were not budgeted and are accounted for by a separate reimbursement category of an appropriation. To expend unscheduled reimbursements, a budget revision must be approved by the Department of Finance, subject to any applicable legislative reporting requirements (e.g., Section 28.50).

Urgency Statute/Legislation
A measure that contains an "urgency clause" requiring it to take effect immediately upon the signing of the measure by the Governor and the filing of the signed bill with the Secretary of State. Urgency statutes are generally those considered necessary for immediate preservation of the public peace, health or safety, and such measures require approval by a two-thirds vote of the Legislature, rather than a majority. *(Article IV, § 8 (d))*. However, the Budget Bill and other bills providing for appropriations related to the Budget Bill may be passed by a majority vote to take effect immediately upon being signed by the Governor or upon a date specified in the legislation. (Article IV § 12 (e) (1)).

Veto
The Governor's Constitutional authority to reduce or eliminate one or more items of appropriation while approving other portions of a bill. *(Article IV, §10 (e); SAM 6345)*

Victim Compensation and Government Claims Board, California
An administrative body in state government exercising quasi-judicial powers (power to make rules and regulations) to establish an orderly procedure by which the Legislature will be advised of claims against the state when no provision has been made for payment. This board was known as the Board of Control prior to January 2001. The rules and regulations adopted by the former Board of Control are in the California Code of Regulations, Title 2, Division 2, Chapter 1.

Warrant
An order drawn by the State Controller directing the State Treasurer to pay a specified amount, from a specified fund, to the person or entity named. A warrant generally corresponds to a bank check but is not necessarily payable on demand and may not be negotiable. *(SAM 8400 et seq)*

Without Regard To Fiscal Year (WRTFY)
Where an appropriation has no period of limitation on its availability.

Working Capital and Revolving Fund
For legal basis accounting purposes, fund classification for funds used to account for the transactions of self-supporting enterprises that render goods or services for a direct charge to the user, which is usually another state department/entity. Self-supporting enterprises that render goods or services for a direct charge to the public account for their transactions in a Public Service Enterprise Fund.

Workload
The measurement of increases and decreases of inputs or demands for work, and a common basis for projecting related budget needs for both established and new programs. This approach to BCPs is often viewed as an alternative to outcome or performance based budgeting where resources are allocated based on pledges of measurable performance.

Workload Budget
Workload Budget means the budget year cost of currently authorized services, adjusted for changes in enrollment, caseload, population, statutory cost-of-living adjustments, chaptered legislation, one-time expenditures, full-year costs of partial-year programs, costs incurred pursuant to Constitutional requirements, federal mandates, court-ordered mandates, state employee merit salary adjustments, and state agency operating expense and equipment cost adjustments to reflect inflation. The compacts with Higher Education and the Courts are commitments by this Administration and therefore are included in the workload budget and considered workload adjustments. A workload budget is also referred to as a baseline budget. *(GC 13308.05)*

Workload Budget Adjustment
Any adjustment to the currently authorized budget necessary to maintain the level of service required to fund a Workload Budget, as defined in Government Code Section 13308.05. A workload budget adjustment is also referred to as a baseline adjustment.

Year of Appropriation (YOA)
Refers to the initial year of an appropriation.

Year of Budget (YOB)
The fiscal year revenues and expenditures are recognized. For revenues, this is generally the fiscal year when revenues are earned. For expenditures, this is generally the fiscal year when obligations, including encumbrances, have been created during the availability period of the appropriation. When the availability period of encumbrance of an appropriation is one year (e.g., most Budget Act items), YOB is the same as year of appropriation (YOA) and year of completion (YOC). However, when the availability period is more than one year, YOB may be any fiscal year during the availability period, including YOA or YOC, as appropriate. For example, an appropriation created in 2010-11 and is available for three years, the YOA is 2010 and the YOC is 2012. If an obligation is created in 2011-12, the YOB for this obligation is 2011. In CALSTARS, YOB is referred to as funding fiscal year (FFY).

The rules of recognition are not the same for all funds depending on the appropriate basis of accounting for the fund types or other factors.

Year of Completion (YOC)
The last fiscal year for which the appropriation is available for expenditure or encumbrance.
