Re: **Draft Proposed Decision, Schedule for Comments, and Notice of Hearing**
Notification of Truancy, 13-904133-I-13
Education Code Section 48260.5
Statutes 1983, Chapter 498
Fiscal Years 2007-2008, 2008-2009, and 2009-2010
Riverside Unified School District, Claimant

Dear Mr. Petersen and Ms. Kanemasu:

The draft proposed decision for the above-named matter is enclosed for your review and comment.

Written Comments

Written comments may be filed on the draft proposed decision by **November 18, 2015**. You are advised that comments filed with the Commission on State Mandates (Commission) are required to be simultaneously served on the other interested parties on the mailing list, and to be accompanied by a proof of service. However, this requirement may also be satisfied by electronically filing your documents. Please see <http://www.csm.ca.gov/dropbox.shtml> on the Commission's website for instructions on electronic filing. (Cal. Code Regs., tit. 2, § 1181.3.)

If you would like to request an extension of time to file comments, please refer to section 1187.9(a) of the Commission's regulations.

Hearing

This matter is set for hearing on **Friday, January 22, 2016**, at 10:00 a.m., State Capitol, Room 447, Sacramento, California. The proposed decision will be issued on or about January 8, 2016. Please let us know in advance if you or a representative of your agency will testify at the hearing, and if other witnesses will appear. If you would like to request postponement of the hearing, please refer to section 1187.9(b) of the Commission's regulations.

Sincerely,

A handwritten signature in black ink, appearing to read "Heather Halsey".

Heather Halsey
Executive Director

ITEM _
INCORRECT REDUCTION CLAIM
DRAFT PROPOSED DECISION

Education Code Section 48260.5
Statutes 1983, Chapter 498
Notification of Truancy
Fiscal Years 2007-2008, 2008-2009, and 2009-2010
13-904133-I-13
Riverside Unified School District, Claimant

EXECUTIVE SUMMARY

Overview

This incorrect reduction claim (IRC) challenges reductions made by the State Controller's Office (Controller) to reimbursement claims filed by the Riverside Unified School District (claimant) for fiscal years 2007-2008, 2008-2009, and 2009-2010 under the *Notification of Truancy* program. The issues in this IRC are whether the Controller may reduce the costs claimed (under audit finding 2) based on:

- Notifications sent for pupils with fewer than three unexcused absences while between the age of six and 18 because they were subject to the compulsory education requirements for only a portion of the school year.
- Notifications sent for pupils who accumulated fewer than three unexcused absences or tardiness occurrences during the school year, and;
- The use of statistical sampling and extrapolation.

For the reasons discussed in this analysis, staff finds that the Controller's reductions are correct.

The *Notification of Truancy* Program

Under California's compulsory education laws, children between the ages of six and 18 are required to attend school full-time, with a limited number of specified exceptions.¹ A pupil who accumulates a certain number of unexcused absences or instances of tardiness is deemed to be in violation of the compulsory education requirement, and is a truant.² Statutes 1983, chapter 498 added Education Code Section 48260.5, which specified as follows:

¹ Education Code section 48200.

² Education Code section 48260.

(a) Upon a pupil's initial classification as a truant, the school district shall notify the pupil's parent or guardian, by first-class mail or other reasonable means, of the following:

(1) That the pupil is truant.

(2) That the parent or guardian is obligated to compel the attendance of the pupil at school.

(3) That parents or guardians who fail to meet this obligation may be guilty of an infraction and subject to prosecution pursuant to Article 6 (commencing with Section 48290) of Chapter 2 of Part 27.

(b) The district also shall inform parents or guardians of the following:

(1) Alternative educational programs available in the district.

(2) The right to meet with appropriate school personnel to discuss solutions to the pupil's truancy.

On November 29, 1984, the Board of Control, the predecessor to the Commission on State Mandates (Commission), determined that Education Code Section 48260.5, as added by Statutes 1983, chapter 498, imposed a reimbursable state-mandated program to develop notification forms and provide written notice to the parents or guardians of the truancy.³

Accordingly, the Board of Control's test claim decision and the parameters and guidelines adopted by the Commission found that section 48260.5 imposed a state-mandated program requiring that upon a student's classification as a truant, the school must notify the pupil's parent or guardian. At the time of the test claim decision and adoption of the parameters and guidelines, section 48260, as enacted in 1976, which was found not to impose any mandated activities, provided that a truancy occurs when a student is "absent from school without valid excuse *more than three days* or tardy in excess of 30 minutes on each of *more than three days* in one school year..."⁴

The original parameters and guidelines were adopted by the Commission on August 27, 1987, and authorized reimbursement for the one-time activities of planning implementation, revising school district policies and procedures, and designing and printing the notification forms. Reimbursement was also authorized for ongoing activities to identify pupils to receive the initial notification and prepare and distribute the notification by first class mail or other reasonable means.

The Commission amended the parameters and guidelines on July 22, 1993, effective beginning July 1, 1992, to add a unit cost of \$10.21, adjusted annually by the Implicit Price Deflator, for each initial notification of truancy distributed, in lieu of requiring the claimant to provide documentation of actual costs to the Controller. The parameters and guidelines further provide that "school districts incurring unique costs within the scope of the reimbursable mandated

³ Exhibit X, Board of Control, Brief Written Statement for Adopted Mandate on the *Notification of Truancy* test claim (SB 90-4133).

⁴ Education Code section 48260 (Stats. 1976, ch. 1010).

activities may submit a request to amend the parameters and guidelines to the Commission for the unique costs to be approved for reimbursement.”⁵

As later amended by Statutes 1994, chapter 1023 (SB 1728) and Statutes 1995, chapter 19 (SB 102), section 48260 provided that a pupil would be classified a truant “who is absent from school without valid excuse *three full days* in one school year, or tardy or absent for more than any 30-minute period during the school day without a valid excuse on *three occasions* in one school year, or any combination thereof...”⁶ At the same time, the Legislature amended section 48260.5 to require the school to also notify parents that a pupil may be subject to prosecution under section 48264; that a pupil may be subject to suspension or restriction of driving privileges under section 13202.7 of the Vehicle Code; and that it is recommended that the parent or guardian accompany the pupil to school and attend classes with the pupil for one day.⁷ Those amendments were incorporated into the parameters and guidelines on January 31, 2008, effective July 1, 2006, at the Legislature’s direction.⁸ However, reimbursement for the program under the amended parameters and guidelines remained fixed at a unit cost of \$10.21, adjusted annually by the Implicit Price Deflator (\$19.63 for fiscal year 2013-14). These are the parameters and guidelines applicable to this claim.

Procedural History

Claimant signed its 2007-2008 reimbursement form on February 16, 2010,⁹ its 2008-2009 reimbursement form on February 16, 2010,¹⁰ and its 2009-2010 reimbursement form on February 15, 2011.¹¹ The Controller issued a draft audit report on December 19, 2012.¹² Claimant submitted comments on the draft audit report on January 18, 2013.¹³ The Controller issued the final audit report on February 22, 2013.¹⁴ Claimant filed this IRC on November 15, 2013.¹⁵ The Controller filed late comments on the IRC on October 3, 2014.¹⁶ On October 28, 2015, Commission staff issued the draft proposed decision.

Commission Responsibilities

Government Code section 17561(b) authorizes the Controller to audit the claims filed by local agencies and school districts and to reduce any claim for reimbursement of state-mandated costs that the Controller determines is excessive or unreasonable.

Government Code Section 17551(d) requires the Commission to hear and decide a claim that the Controller has incorrectly reduced payments to the local agency or school district. If the Commission determines that a reimbursement claim has been incorrectly reduced, section 1185.9 of the Commission's regulations requires the Commission to send the decision to the Controller and request that the incorrectly reduced costs be reinstated.

The Commission must review questions of law, including interpretation of parameters and guidelines, de novo, without consideration of legal conclusions made by the Controller in the context of an audit. The Commission is vested with exclusive authority to adjudicate disputes over the existence of state-mandated programs within the meaning of article XIII B, section 6.¹⁷ The Commission must also interpret the Government Code and implementing regulations in accordance with the broader constitutional and statutory scheme. In making its decisions, the Commission must strictly construe article XIII B, section 6 and not apply it as an "equitable remedy to cure the perceived unfairness resulting from political decisions on funding priorities."¹⁸

With regard to the Controller's audit decisions, the Commission must determine whether they were arbitrary, capricious, or entirely lacking in evidentiary support. This standard is similar to the standard used by the courts when reviewing an alleged abuse of discretion of a state agency.¹⁹

The Commission must also review the Controller's audit in light of the fact that the initial burden of providing evidence for a claim of reimbursement lies with the claimant.²⁰ In addition, sections 1185.1(f)(3) and 1185.2(c) of the Commission's regulations require that any assertions of fact by the parties to an IRC must be supported by documentary evidence. The Commission's ultimate findings of fact must be supported by substantial evidence in the record.²¹

rebuttal to an incorrect reduction claim shall not serve to delay the consideration of the claim by the Commission." However, in this instance, due to the backlog of IRCs, these late comments have not delayed consideration of this item and so have been included in the analysis and proposed decision.

²³ Education Code section 48200.

	<p>distributed by elementary and secondary schools) during the audit period, with the calculation of the “sample size based on a 95% confidence level,” and determined that 79 of the notices were claimed beyond the scope of the mandate, as described above. The unallowable notifications within the sample for each fiscal year was then calculated as an error percentage and extrapolated to the total number of notices issued during the audit period (45,091) to approximate the number of unallowable notifications (3,900), which is less than 10 percent of the notices claimed. The number of unallowable notices was multiplied by the unit cost for each fiscal year to calculate the total reduction at \$68,410.</p> <p>Claimant argues that the use of statistical sampling and extrapolation methodology is an underground regulation and that the reductions should be upheld only for documentation for the notices that were actually reviewed and disallowed because they were beyond the scope of the mandate.</p>	<p>required to uphold the Controller’s audit conclusions absent evidence that the reductions are arbitrary, capricious or entirely lacking in evidentiary support. Moreover, there is no evidence that the Controller’s findings using sampling and statistical extrapolation are not representative of all notices claimed during the audit period.</p>
--	---	--

Staff Analysis

A. The Audit Reductions in Finding 2 for the 79 Notifications Included in the Sample Are Correct as a Matter of Law.

In the audit of fiscal years 2007-2008, 2008-2009, and 2009-2010, the Controller found that the claimant sent initial truancy notices for 67 pupils with fewer than three unexcused absences or

tardiness occurrences while between the ages of six and 18,²⁴ and for 12 pupils who had fewer than three total unexcused absences or tardiness occurrences during the school year.²⁵

Staff finds that the claimant's request for reimbursement to provide truancy notices for pupils who because of their age are not subject to compulsory education, or who have fewer than three unexcused absences or tardiness occurrences during the school year, is beyond the scope of the mandate and not reimbursable, so the Controller's reductions are correct as a matter of law.

1. Reimbursement is not required for truancy notices resulting from unexcused absences or tardies accumulated by pupils while under age six and over age 18, because they are not subject to compulsory education.

The Controller found that during the audit period, 67 of the pupils in the audit sample had accumulated fewer than three unexcused absence or tardy occurrences while between the ages of six and 18.²⁶

The claimant asserts that notifications of truancy sent to pupils under age six and over age 18 should be reimbursable because the Education Code provides that those students are statutorily entitled to attend school and that school districts are required by Education Code section 46000 to record, keep attendance, and report absences of all pupils.

Staff finds that providing initial truancy notices to pupils based on unexcused absences or tardiness occurrences accrued while under the age of six and over the age of 18 goes beyond the scope of the mandate so that the reduction is correct as a matter of law. Education Code section 48260(a) defines a truant as a pupil subject to compulsory full-time education. "Compulsory full-time education" is defined in Education Code section 48200 as "each person between the ages of 6 and 18 years." Even though schools are required by state law to report the attendance of all enrolled pupils, the truancy laws, including absences that trigger the notice of initial truancy required by this mandated program, apply only to pupils between the ages of six and 18.

Therefore, the Controller's reduction of costs for 67 initial truancy notices within the audit sample for pupils who did not accumulate three absences while subject to compulsory education is correct as a matter of law.

2. Reimbursement is not required for truancy notices for pupils with fewer than three unexcused absences or tardiness occurrences.

The Controller found that, during the audit period, 12 of the sampled notifications were distributed for pupils who accumulated fewer than three unexcused absences or tardiness occurrences during the school year and that reimbursement for these notifications is beyond the

²⁴ Exhibit A, Incorrect Reduction Claim, pages 242-243. For daily attendance accounting during the audit period, 50 notifications were sent for truant pupils not between the ages of six and 18. For period attendance accounting during the audit period, 17 notifications were sent for truant pupils not between the ages of six and 18, for a total of 67 notifications under both accounting methods.

²⁵ Exhibit A, Incorrect Reduction Claim, pages 242-243. All 12 absences were under daily attendance accounting: six in 2007-2008, five in 2008-2009, and one in 2009-2010.

²⁶ *Ibid.*

scope of the mandate.²⁷ The claimant has not rebutted these findings, and does not address these 12 notifications in the IRC.

Education Code section 48260²⁸ provides that a pupil who is absent or tardy from school without valid excuse “*on three occasions* in one school year” is a truant. The Commission amended the parameters and guidelines effective for costs incurred beginning July 1, 2006, to reflect that the mandate to provide a truancy notification is triggered by a pupil who is absent or tardy from school without valid excuse on three occasions in one school year and these parameters and guidelines apply to this IRC.

The claimant’s request for reimbursement to provide initial truancy notices for pupils with less than three unexcused absences or tardiness occurrences during the school year is beyond the scope of the mandate and is not reimbursable. Accordingly, staff finds that the Controller’s reduction of costs for the 12 notices provided for these pupils is correct as a matter of law.

B. The Audit Reductions in Finding 2 Based on Statistical Sampling and Extrapolation of Findings to All Notices Claimed Are Not Arbitrary, Capricious or Entirely Lacking in Evidentiary Support

In its audit, the Controller examined a random sample of 883 initial truancy notices distributed by the claimant for each year, out of a total of 45,091 claimed during the audit period, to determine the proportion of notifications that were unallowable for the Controller’s asserted legal reasons. The number of unallowable notifications within the sample for each fiscal year was then calculated as an error percentage, and extrapolated to the total number of notifications issued and identified by the claimant for each fiscal year to approximate the total number of unallowable notifications for elementary and secondary schools. The number of unallowable notices was then multiplied by the unit cost for each fiscal year to calculate the total reduction for the three fiscal years at \$68,410.²⁹ The methodology results in an estimate, based on statistical probabilities, of the amount of claimed costs that the Controller has determined to be excessive or unreasonable.

Claimant argues that the Controller cannot adjust claims by using a statistical extrapolation from an audit sample because: (1) the Controller’s use of this method constitutes an underground regulation; and (2) the sampling process was misapplied to this IRC, the conclusions may not be representative of the universe, and there is a possibility of sample error.

The Controller counters that sampling and extrapolation is an audit tool commonly used to identify error rates, that there is no law or regulation prohibiting that method, and that claimant misstates and misunderstands the meaning of an expected error rate and confidence interval. The Controller argues that its method is reasonable, and “the Administrative Procedures [*sic*] Act is not applicable.”³⁰

²⁷ Exhibit A, IRC, page 242. Exhibit B, Controller’s Late Comments on the IRC, page 18.

²⁸ As amended by Statutes 1994, chapter 1023 (SB 1728) and Statutes 1995, chapter 19 (SB 102).

²⁹ Exhibit A, IRC, final audit report, pages 242-243.

³⁰ Exhibit B, Controller’s Late Comments on the IRC, pages 12 - 19.

Staff finds that using sampling and extrapolation as a methodology in this case is not an underground regulation, and there is no evidence that the reduction is arbitrary, capricious, or entirely lacking in evidentiary support.

1. There is no evidence to support claimant’s argument that the statistical sampling and extrapolation method used in the audit constitutes an underground regulation.

Government Code section 11340.5 prohibits any state agency from issuing, utilizing, enforcing, or attempting to enforce any guideline or rule that fits within the definition of “regulation” unless it has been adopted pursuant to the Administrative Procedure Act (APA). Section 11342.600 provides a definition of “regulation,” including “...every rule, regulation, order, or standard of general application or the amendment, supplement, or revision of any rule, regulation, order, or standard adopted by any state agency to implement, interpret, or make specific the law enforced or administered by it, or to govern its procedure.”³¹ Therefore, if the Controller’s challenged audit methods constitute a regulation not adopted pursuant to the APA, the Commission cannot uphold the reductions.

Interpreting section 11342.600, the California Supreme Court in *Tidewater Marine Western v. Bradshaw* found that a regulation has two principal characteristics:

First, the agency must intend its rule to apply generally, rather than in a specific case. The rule need not, however, apply universally; a rule applies generally so long as it declares how a *certain class of cases* will be decided. Second, the rule must “implement, interpret, or make specific the law enforced or administered by [the agency], or ... govern [the agency’s] procedure.”³²

The question, then, is whether the challenged audit policy or practice is applied “generally,” and used to decide a class of cases; and whether the rule “implement[s], interpret[s], or make[s] specific” the law administered by the Controller. Here, that presents a close question, which turns on the issue of general applicability.³³

In *Clovis Unified*, the court held that the Controller’s contemporaneous source document rule, which was contained solely in the Controller’s claiming instructions and not adopted in the regulatory parameters and guidelines, was applied *generally* to audits of all reimbursement claims for certain programs, in that individual auditors had no discretion to judge on a case-by-case basis whether to apply the rule.³⁴ In the Medi-Cal audit cases, the courts found a sampling and extrapolation methodology was invalid solely because of the failure of the Department of

³¹ Government Code section 11342.600 (Stats. 2000, ch. 1060).

³² *Tidewater Marine Western v. Bradshaw* (1996) 14 Cal.4th 557, 571 (emphasis added) [Citing *Roth v. Department of Veteran Affairs* (1980) 110 Cal.App.3d 622, 630; Gov. Code § 11342(g)].

³³ See *Taye v. Coye* (1994) 29 Cal.App.4th 1339, 1345 [Finding that an auditor’s decision was not an underground regulation where it was “designed to fit the particular conditions that were encountered upon arrival at the audit site.”].

³⁴ *Clovis Unified School District v. Chiang* (2010) 188 Cal.App.4th 794, 803.

Health Services to adopt its methodology in accordance with the APA. However, the methodology was upheld after compliance with the APA.³⁵

Unlike *Clovis Unified* however, the sampling and extrapolation method is not published in the claiming instructions for this mandate; nor is it alleged that auditors were *required* to use the statistical methods at issue. Of the 42 completed audit reports for this mandated program currently available on the Controller's website, some do not apply a statistical sampling and extrapolation methodology to calculate a reduction.³⁶ Others apply a sampling and extrapolation method to determine whether the notifications issued complied with the eight required elements under section 48260.5;³⁷ and others use sampling and extrapolation methods to determine the proportion of notifications issued that were supported by documentation, including attendance records, rather than the proportion unallowable based on absences, as here.³⁸

Therefore, based on the case law discussed and the evidence in the record, staff finds that the Controller's sampling and extrapolation method, as applied in this case, is not a regulation within the meaning of the APA.

2. The Controller's audit findings must be upheld absent evidence that the reductions are arbitrary, capricious, or entirely lacking in evidentiary support.

The claimant argues that there is no statutory or regulatory authority for the Controller to reduce claimed costs based on extrapolation from a statistical sample.³⁹ The Controller counters that the law does not prohibit the audit methods used, and relies on Government Code section 12410, which requires the Controller to audit all claims against the state and authorizes the Controller to "audit the disbursement of any state money, for correctness, legality, and for sufficient provisions of law for payment."⁴⁰ The Controller also relies on Government Code section 17561, which permits the Controller to reduce any claim that is determined to be excessive or unreasonable. The Controller also cites to "*Government Auditing Standards*, as issued by the Comptroller General of the United States..." in support of its audit methods. Although the standards cited do not provide *expressly* for statistical sampling and extrapolation to be applied

³⁵ *Grier v. Kizer* (1990) 219 Cal.App.3d 422. *Union of American Physicians and Dentists v. Kizer* (1990) 223 Cal.App.3d 490.

³⁹ Exhibit A, IRC, page 11.

⁴⁰ Government Code section 12410 (Stats. 1968, ch. 449).

to mandate reimbursement, they do provide that "When a representative sample is needed, the use of statistical sampling approaches generally results in stronger evidence. ... "⁴¹

In accordance with the Controller's audit authority and duties under the Constitution and the Government Code,⁴² the Commission's determination is limited to whether the Controller's reduction of costs based on audit decisions (as opposed to questions of law) is arbitrary, capricious, or entirely lacking in evidentiary support.⁴³ Based on the standards and texts cited by the Controller, statistical methods are an appropriate and commonly-used tool in auditing. The claimant concedes that "[a] statistically valid sample methodology is a recognized audit tool for some purposes."⁴⁴

In fact, statistical sampling methods such as those employed here are used in a number of other contexts, including Medi-Cal reimbursement to health care providers, and have not been held, in themselves, to be arbitrary and capricious, or incorrect as a matter of law.⁴⁵

On that basis, and giving due consideration to the Controller's discretion to audit the fiscal affairs of the state,⁴⁶ staff finds that it must uphold the Controller's auditing decisions absent evidence that the audit reductions are arbitrary, capricious, or entirely lacking in evidentiary support.

3. There is no evidence in the record that the Controller's findings using the sampling and extrapolation methodology are not representative of all notices claimed during the audit period or that the findings are arbitrary, capricious, or entirely lacking in evidentiary support.

The claimant also challenges the qualitative and quantitative reliability and fairness of using statistical sampling and extrapolation to evaluate reimbursement, arguing that the risk of extrapolating findings from a sample is that the conclusions obtained from the sample may not represent the universe.⁴⁷ The claimant further contends that the sampling technique used by the Controller is quantitatively non-representative because less than two percent of the total number of notices were audited, the stated precision rate was plus or minus eight percent even though the sample size (ranging from 146 to 148) is essentially identical for all four fiscal years, and that the audited number of notices claimed for daily accounting (elementary schools) in fiscal year 2008-2009 (6,996) is 17 percent larger than the size in fiscal year 2009-2010 (5,995). According to the

⁴⁴ Exhibit A, Incorrect Reduction Claim, page 12.

⁴⁵ See *Grier v. Kizer*, *supra*, 219 Cal.App.3d 422. *Union of American Physicians and Dentists v. Kizer*, *supra*, 223 Cal.App.3d 490. The courts held that the sampling and extrapolation methodology was invalid solely because of the failure to adopt the methodology in accordance with the APA, although the methodology was upheld after compliance with the APA.

⁴⁶ Government Code section 12410 (Stats. 1968, ch. 449).

⁴⁷ Exhibit A, Incorrect Reduction Claim, page 15.

claimant, “[t]he expected error rate is stated to be 50%, which means the total amount adjusted \$68,410 [for the 3-year audit period] is really just a number exactly between \$34,205 (50%) and \$102,615 (150%).”⁴⁸

Staff finds, based on this record, that the extrapolation of the audit findings to all notifications is not arbitrary, capricious, or entirely lacking in evidentiary support. As discussed in the draft proposed decision, claimant’s concerns about the proportional size of the sample are unfounded, and the claimant’s conclusions about the “expected error rate” are mistaken. The Controller demonstrates that the absolute size of the sample is more important than the relative size under basic statistical sampling principles. Moreover, there is no evidence in the record that the results are biased or unrepresentative as asserted by claimant. There is no dispute that the samples were randomly obtained and reviewed by the Controller. According to the *Handbook of Sampling for Auditing and Accounting*, all notices randomly sampled have an equal opportunity for inclusion in the sample so the result is statistically objective and unbiased.⁴⁹ Moreover, absent evidence in the record to the contrary, the Commission must presume that schools in the claimant’s district complied with the mandate in the same way.

Based on the analysis, staff finds that there is no evidence that the Controller’s reduction of costs claimed, based on the statistical sampling method in this case, is unrepresentative of all notices claimed or that the Controller’s findings are arbitrary, capricious, or entirely lacking in evidentiary support.

Conclusion

Staff finds that the reduction of \$68,410 during the audit period, based on the Controller’s sampling and extrapolation methodology for initial notices of truancy distributed for pupils who had fewer than three unexcused absences or tardiness occurrences during the school year and for pupils who accumulated fewer than three absences while between the ages of six and 18 and so were not subject to the compulsory education laws, is correct as a matter of law, and is not arbitrary, capricious, or entirely lacking in evidentiary support.

Staff Recommendation

Staff recommends that the Commission adopt the proposed decision to deny the IRC, and authorize staff to make any technical, non-substantive changes following the hearing.

Notification of Truancy

DECISION PURSUANT TO
GOVERNMENT CODE SECTION 17500
ET SEQ.; CALIFORNIA CODE OF
REGULATIONS, TITLE 2, DIVISION 2,
CHAPTER 2.5. ARTICLE 7

(Adopted January 22, 2016)

DECISION

The Commission on State Mandates (Commission) heard and decided this incorrect reduction claim (IRC) during a regularly scheduled hearing on January 22, 2016. [Witness list will be included in the adopted decision.]

The law applicable to the Commission’s determination of a reimbursable state-mandated program is article XIII B, section 6 of the California Constitution, Government Code section 17500 et seq., and related case law.

The Commission [adopted/modified] the proposed decision to [approve/partially approve/deny] the IRC at the hearing by a vote of [vote count will be included in the adopted decision] as follows:

Member	Vote
Ken Alex, Director of the Office of Planning and Research	
Richard Chivaro, Representative of the State Controller, Vice Chairperson	
Mark Hariri, Representative of the State Treasurer	
Sarah Olsen, Public Member	
Eraina Ortega, Representative of the Director of the Department of Finance, Chairperson	
Carmen Ramirez, City Council Member	
Don Saylor, County Supervisor	

Summary of the Findings

This IRC challenges reductions of \$68,410 made by the State Controller’s Office (Controller) to reimbursement claims filed by the Riverside Unified School District (claimant) for fiscal years 2007-2008, 2008-2009, and 2009-2010 under the *Notification of Truancy* program.

At issue in this IRC is whether the Controller may:

- Reduce costs claimed for truancy notifications distributed for pupils who accumulated fewer than three unexcused absences or tardiness occurrences while between ages six and 18 because they were subject to the compulsory education requirements for only a portion of the school year.
- Reduce costs claimed for truancy notifications distributed for pupils who accumulated fewer than three total unexcused absences or tardiness occurrences during the school year; and,
- Use statistical sampling and extrapolation to reduce the costs claimed for truancy notices not included in the audit sample.

The Commission finds that the reduction totaling \$68,410, based on the Controller's sampling and extrapolation methodology, for initial notifications of truancy distributed for pupils who had fewer than three unexcused absences or tardiness occurrences during the school year and for pupils who accumulated fewer than three absences while between the ages of six and 18 and so were not subject to the compulsory education laws, is correct as a matter of law, and is not arbitrary, capricious, or entirely lacking in evidentiary support.

II. Background

The Notification of Truancy Program

Under California's compulsory education laws, children between the ages of six and 18 are required to attend school full-time, with a limited number of specified exceptions.⁵⁹ Once a pupil is initially designated a truant, as defined, state law requires schools, districts, counties, and the courts to take progressive intervention measures to ensure that parents and pupils receive services to assist them in complying with the compulsory attendance laws.

The first intervention is required by Education Code section 48260.5, as added by the test claim statute.⁶⁰ As originally enacted, section 48260.5 specified:

(a) Upon a pupil's initial classification as a truant, the school district shall notify the pupil's parent or guardian, by first-class mail or other reasonable means, of the following:

- (1) That the pupil is truant.
- (2) That the parent or guardian is obligated to compel the attendance of the pupil at school.
- (3) That parents or guardians who fail to meet this obligation may be guilty of an infraction and subject to prosecution pursuant to Article 6 (commencing with Section 48290) of Chapter 2 of Part 27.

(b) The district also shall inform parents or guardians of the following:

- (1) Alternative educational programs available in the district.
- (2) The right to meet with appropriate school personnel to discuss solutions to the pupil's truancy.

On November 29, 1984, the Board of Control, the predecessor to the Commission, determined that Education Code section 48260.5, as added by Statutes 1983, chapter 498, imposed a reimbursable state-mandated program to develop notification forms and provide written notice to the parents or guardians of the truancy. The decision was summarized as follows:

The Board determined that the statute imposes costs by requiring school districts to develop a notification form, and provide written notice to the parents or guardians of students identified as truants of this fact. It requires that notification contain other specified information and, also, to advise the parent or guardian of

rebuttal to an incorrect reduction claim shall not serve to delay the consideration of the claim by the Commission.” However, in this instance, due to the backlog of IRCs, these late comments have not delayed consideration of this item and so have been included in the analysis and proposed decision.

⁵⁸ Exhibit C, Draft Proposed Decision.

⁵⁹ Education Code section 48200.

⁶⁰ Education Code section 48260.5, Statutes 1983, chapter 498.

their right to meet with school personnel regarding the truant pupil. The Board found these requirements to be new and not previously required of the claimant.⁶¹

The original parameters and guidelines were adopted on August 27, 1987, and authorized reimbursement for the one-time activities of planning implementation, revising school district policies and procedures, and designing and printing the notification forms. Reimbursement was also authorized for ongoing activities to identify pupils to receive the initial notification and prepare and distribute the notification by first class mail or other reasonable means.

The Commission amended the parameters and guidelines on July 22, 1993, effective for reimbursement claims filed beginning in fiscal year 1992-1993, to add a unit cost of \$10.21, adjusted annually by the Implicit Price Deflator, for each initial notification of truancy distributed in lieu of requiring the claimant to provide documentation of actual costs to the Controller. The parameters and guidelines further provide that “school districts incurring unique costs within the scope of the reimbursable mandated activities may submit a request to amend the parameters and guidelines to the Commission for the unique costs to be approved for reimbursement.”⁶²

The Legislature enacted Statutes 2007, chapter 69, effective January 1, 2008, which was sponsored by the Controller’s Office to require the Commission to amend the parameters and guidelines, effective July 1, 2006, to modify the definition of a truant and the required elements to be included in the initial truancy notifications in accordance with Statutes 1994, chapter 1023, and Statutes 1995, chapter 19.⁶³ These statutes required school districts to add the following information to the truancy notification: that the pupil may be subject to prosecution under Section 48264, that the pupil may be subject to suspension, restriction, or delay of the pupil’s driving privilege pursuant to Section 13202.7 of the Vehicle Code, and that it is recommended that the parent or guardian accompany the pupil to school and attend classes with the pupil for one day. The definition of truant was also changed from a pupil absent for “more than three days” to a pupil absent for “three days.” In 2008, the Commission amended the parameters and guidelines, for costs incurred beginning July 1, 2006, as directed by the Legislature.⁶⁴ However, reimbursement for the program under the amended parameters and guidelines remained fixed at a unit cost of \$10.21, adjusted annually by the Implicit Price Deflator (\$19.63 for fiscal year 2013-14). These are the parameters and guidelines applicable to this claim.

The Controller’s Audit and Summary of the Issues

The final audit report of February 22, 2013, determined that \$684,558 claimed costs for fiscal years 2007-2008 through 2009-2010 was allowable, and \$111,552 was unallowable for various reasons. The claimant only disputes the \$68,410 reduction in finding 2 of the audit report. With respect to that reduction, the Controller reviewed a sample of 883 notices issued by the district’s

⁶¹ Exhibit X, Brief Written Statement for Adopted Mandate issued by the Board of Control on the *Notification of Truancy* test claim (SB 90-4133).

⁶² Exhibit A, Incorrect Reduction Claim, page 69.

⁶³ Exhibit X, Controller’s Letter dated July 17, 2007 on AB 1698.

⁶⁴ Statutes 2007, chapter 69 (AB 1698).

elementary and secondary schools out of the 45,091 notices claimed for the audit period,⁶⁵ finding that 79 notices included in the sample were not reimbursable because the district claimed:

- 67 notifications sent for pupils with fewer than three unexcused absences while between the age of six and 18, because they were subject to the compulsory education requirements for only a portion of the school year.
- 12 notifications sent for pupils who accumulated fewer than three total unexcused absences or tardiness occurrences during the school year.⁶⁶

The Controller reached the total dollar amount reduced (\$68,410) by using an audit methodology known as “statistical sampling.” The Controller examined a random sample of initial truancy notices distributed by the claimant, calculating the “sample size based on a 95% confidence level,” and determined that 79 of those notices claimed were beyond the scope of the mandate, as described above.⁶⁷ The number of unallowable notifications within the sample for each fiscal year was then calculated as an error percentage and extrapolated to the number of notifications issued and identified by the claimant in those fiscal years, to approximate the total number of unallowable notifications claimed. The number of unallowable notices was then multiplied by the unit cost for each fiscal year to calculate the total reduction for the audit period.⁶⁸

III. Positions of the Parties

A. Riverside Unified School District

The claimant argues that the statistical sampling technique used by the Controller should be rejected and that the audit finding should only pertain to the documentation actually reviewed. The claimant states that the audit report cited no statutory or regulatory authority to allow reduction of costs claimed based on extrapolation of a statistical sample.

The claimant asserts that the standard in Government Code section 17561(d)(2) controls the audit (excessive or unreasonable) because it is specific to mandates claims, and that the standard in Government Code section 12410 (correctness, legality, and sufficient provisions of law) does not control the audit. Also, the audit report states that the audit was conducted according to generally accepted government accounting standards (GAGAS) that "recognize statistical sampling as an acceptable method to provide sufficient, appropriate evidence" but claimant states that the audit does not cite specific GAO or GAGAS language in support of the assertion.

Claimant also argues that the GAO auditing guide pertains to audits of federal funds that do not apply to state mandate reimbursement. And the district has no notice of the GAO guide because

⁶⁵ Exhibit A, Incorrect Reduction Claim, final audit report, pages 242-243; Exhibit B, Controller’s Late Comments on IRC, page 16.

⁶⁶ Exhibit A, Incorrect Reduction Claim, final audit report, page 242; Exhibit B, Controller’s Comments on the IRC, page 19.

⁶⁷ Exhibit B, Controller’s Late Comments on IRC, page 10.

⁶⁸ Exhibit A, Incorrect Reduction Claim, pages 242-243.

the Controller does not publish its audit standards. Nor has the GAO guide been adopted pursuant to the Administrative Procedure Act (APA).⁶⁹

Claimant further argues that the sampling process was misapplied in this IRC because the audit actually conducted a review for documentation rather than mandate compliance. According to the claimant, “testing to detect the rate of error within tolerances is the purpose of sampling, but it is not a tool to assign an exact dollar amount to the amount of the error which the Controller has inappropriately done . . . here.”⁷⁰

Claimant also states that the sample may not be representative of the universe because, for example, kindergarten students in the sample are more likely to be excluded because of the under-age issue, and the possibility of a special education student being under age or over age is greater than the entire student body.⁷¹

And according to claimant, the sampling technique used in the audit is non-representative because the sample size for the audit period is 1.93% of the universe. As the claimant states: “The expected error rate is stated to be 50%, which means the total amount adjusted of \$68,410 is really just a number exactly between \$34,205 (50%) and \$102,615 (150%). An interval of possible outcomes cannot be used as a finding of absolute actual cost.”⁷²

Claimant states that because the statistical sampling and extrapolation fails for legal, quantitative, and qualitative reasons, the audit findings should be limited to the 736 notices actually investigated. Claimant also cites statutory entitlements for pupils under age six or older than 18 to attend school and argues that truancy notifications for them should be reimbursed as “a product of the attendance accounting process and promotes compliance of the compulsory education law and *every pupil’s* duty to attend school regularly.”⁷³

B. State Controller’s Office

The Controller maintains that the audit is correct and that the IRC should be rejected. The Controller first states that the sample size for secondary schools within the claimant’s district was 443 for period attendance,⁷⁴ so its total sample size for both elementary and secondary schools was larger than the 736 cited by claimant. The Controller also states that both Government Code sections 17561(d) and 12410 (correctness, legality, and sufficient provisions of law) control the audit, and section 12410 applies to all claims against the state. And the district’s reimbursement claims were neither correct nor legal because costs were claimed for non-reimbursable notices issued. The Controller cites GAGAS section 7.55 that states, “When a representative sample is needed, the use of statistical sampling approaches generally results in

⁶⁹ Exhibit A, Incorrect Reduction Claim, pages 11-13.

⁷¹ Exhibit A, Incorrect Reduction Claim, page 15.

⁷² Exhibit A, Incorrect Reduction Claim, page 16.

⁷³ Exhibit A, Incorrect Reduction Claim, pages 22-23. Italics in original.

⁷⁴ Exhibit B, Controller’s Late Comments on the IRC, page 12. The 147 period-attendance initial truancy notifications sampled for 2009-2010 was not listed in the audit report, however. See Exhibit A, IRC, page 243.

stronger evidence. . . .” In response to claimant’s observation that the *Government Auditing Standards* have not been adopted pursuant to any state agency rulemaking, the Controller states that its “requirements” are applicable to auditors, not claimants, so state agency rulemaking is irrelevant and has no bearing on how mandate-related activities are performed or reimbursement claims are submitted.⁷⁵

The Controller also argues that its sampling and extrapolation methodology is appropriate and cites the *Handbook of Sampling for Auditing and Accounting*⁷⁶ to support its sampling of errors versus non-errors. According to the Controller, a tolerance factor advocated by the claimant is not applicable because estimation sampling was used in the audit. As to the claimant’s allegation that the sample is not representative of the universe, the Controller cites section 1185.1(f)(3) of the Commission’s regulations that requires assertions or representations of fact to be supported by testimonial or documentary evidence, and states that claimant has provided no such evidence. The Controller also states: “The fact that a particular student’s initial truancy notification might more likely be identified as non-reimbursable is irrelevant to the composition of the audit sample itself. It has no bearing on evaluating whether the sample selection is representative of the population.”⁷⁷ The Controller also defends its selection of a sample size as consistent with basic statistical sampling principles, citing the *Handbook* again for support. As the Controller argues: “While a statistical sample evaluation identifies a range for the population’s true error rate, the point estimate provides the best, and thus *reasonable*, single estimate of the population’s error rate.”⁷⁸

The Controller also points out that the test claim statute applies to pupils “subject to compulsory full-time education or to compulsory continuing education” and that Education Code section 48200 defines those pupils as “each person between the ages of 6 and 18 not exempted.” The Controller concludes that absences before age six or after age 18 are not relevant to determining whether a pupil is a truant.

IV. Discussion

Government Code section 17561(b) authorizes the Controller to audit the claims filed by local agencies and school districts and to reduce any claim for reimbursement of state mandated costs that the Controller determines is excessive or unreasonable.

Government Code Section 17551(d) requires the Commission to hear and decide a claim that the Controller has incorrectly reduced payments to the local agency or school district. If the Commission determines that a reimbursement claim has been incorrectly reduced, section 1185.9 of the Commission’s regulations requires the Commission to send the statement of decision to the Controller and request that the costs in the claim be reinstated.

The Commission must review questions of law, including interpretation of the parameters and guidelines, *de novo*, without consideration of legal conclusions made by the Controller in the

⁷⁸ Exhibit B, Controller’s Late Comments on the IRC, page 17.

A. The Audit Reductions in Finding 2 for the 79 Notifications Included in the Sample Are Correct as a Matter of Law.

In the audit of the fiscal year 2007-2008, 2008-2009, and 2009-2010 reimbursement claims, the Controller found that the claimant sent 67 initial truancy notices for pupils with fewer than three unexcused absences while between the age of six and 18, because they were subject to the compulsory education requirements for only a portion of the school year (i.e. they accrued one of more of the requisite absences while under age six or over age 18),⁸⁵ and sent truancy notices for 12 pupils who had fewer than three unexcused absences or tardiness occurrences during the school year.⁸⁶ The Controller reduced costs claimed for these notices within the audit sample because the costs for these notices go beyond the scope of the mandate and are not eligible for reimbursement. For the reasons below, the Commission finds that the Controller's reductions are correct as a matter of law.

1. Reimbursement is not required for truancy notices for pupils who are under age six or over age 18.

The Controller found that the district claimed 67 notifications that it distributed for pupils who had "accumulated fewer than three unexcused absences or tardiness occurrences while between ages 6 and 18" during the school year. The Controller made reductions for these 67 notifications because it found that distributing initial notices for pupils not subject to compulsory education is beyond the scope of the mandate.⁸⁷

In both its response to the audit and in the IRC, claimant maintains that the notification of truancy requirement applies to pupils younger than age six and older than age 18 because school districts are required to enroll pupils who are five years old at the beginning of the school year, as well as special education pupils through age 21.⁸⁸ Specifically, claimant argues that although Education Code sections 48200 and 48400 establish the legal attendance requirements for pupils aged six through 18, there is a statutory entitlement to attend kindergarten pursuant to section 48000, and to attend first grade pursuant to sections 48010 and 48011. Attendance cannot be denied by a school district. And special education pupils are statutorily entitled to education services from ages 3 to 22 pursuant to section 56026.⁸⁹ Section 46000 requires the district to keep attendance and record absences for all pupils for purposes of apportionment and compliance with the compulsory education law, subject to regulations by the State Board of

⁸⁵ Exhibit A, Incorrect Reduction Claim, pages 242-243. For daily attendance accounting during the audit period, 50 notifications were sent for truant pupils not between the ages of six and 18. For period attendance accounting during the audit period, 17 notifications were sent for truant pupils not between the ages of six and 18, for a total of 67 notifications under both accounting methods.

⁸⁶ Exhibit A, Incorrect Reduction Claim, pages 242-243. All 12 absences were under daily attendance accounting: six in 2007-2008, five in 2008-2009, and one in 2009-2010.

⁸⁷ *Ibid.*

⁸⁸ Exhibit A, Incorrect Reduction Claim, page 251.

⁸⁹ Exhibit A, Incorrect Reduction Claim, pages 18-20. Education Code section 56040 requires special education for pupils defined according to section 56026.

Education. Claimant states: “the initial notification of truancy is a product of the attendance accounting process and promotes compliance of the compulsory education law and *every pupil’s* duty to attend school regularly.”⁹⁰

The Commission finds that providing initial truancy notices for pupils who accumulated fewer than three unexcused absences or tardiness occurrences while between ages six and 18, who by definition were not subject to the compulsory education law when they accrued one or more of the requisite absences or tardiness occurrences, is beyond the scope of the mandate and is not eligible for reimbursement.

The claimant is correct that at the time these reimbursement claims were filed, school districts were required by state law to admit a child to kindergarten if his or her fifth birthday were on or before December 2 of that school year.⁹¹ School districts are also required by state and federal law to provide special education services to “individuals with exceptional needs” until the age of 21 if required by a pupil’s individualized education plan.⁹² And schools are required by state law to record the attendance of every pupil enrolled in school for apportionment of state funds and “to ensure the *general* compliance with the compulsory education law, and performance by a pupil of his duty to attend school regularly as provided in [California Code of Regulations, title 5] section 300.”⁹³

However, the truancy laws apply only to pupils who are subject to compulsory full-time education. Education Code section 48260(a) defines a truant as:

A pupil subject to compulsory full-time education or to compulsory continuation education [emphasis added] who is absent from school without a valid excuse three full days in one school year or tardy or absent for more than a 30-minute period during the schoolday [sic] without a valid excuse on three occasions in one school year, or any combination thereof, shall be classified as a truant. ...

Education Code section 48200 states: “Each person *between the ages of 6 and 18 years* [emphasis added] not exempted ... is subject to compulsory full-time education.”

Education Code 48260(b) further states that “[n]otwithstanding subdivision (a) [which defines a truant as a pupil subject to compulsory full-time education], it is the intent of the Legislature that school districts shall not change the method of attendance accounting provided for in existing law.” Therefore, even though schools are required by state law to report the attendance of all enrolled pupils, the truancy laws, including the notice of initial truancy required by this mandated program, apply only to pupils between the ages of six and 18.

⁹⁰ Exhibit A, Incorrect Reduction Claim, pages 22-23. Emphasis in original. Claimant cites California Code of Regulations, title 5, section 300.

⁹¹ Education Code section 48000(a), as last amended by Statutes 1991, chapter 381.

⁹² Title 20, United States Code, section 1401; Education Code section 56026.

⁹³ Education Code section 46000; California Code of Regulations, title 5, section 400. Section 300 of the regulations state in relevant part that “every pupil shall attend school punctually and regularly.”

Accordingly, the Controller's reduction of costs claimed for 67 truancy notices within the audit sample for pupils who accumulated fewer than three unexcused absences or tardiness occurrences while between ages six and 18, is correct as a matter of law.

2. Reimbursement is not required for truancy notices for pupils with fewer than three unexcused absences or tardiness occurrences.

Education Code Section 48260⁹⁴ defines a truant as a pupil who is absent from or tardy to school without valid excuse "on three occasions in one school year." The Commission amended the parameters and guidelines effective for costs incurred beginning July 1, 2006, to reflect that the mandate to provide a truancy notification is triggered by a pupil who is absent from or tardy to school without valid excuse on three occasions in one school year and these parameters and guidelines apply to this IRC.⁹⁵ If a pupil cannot be initially classified as a truant, as defined in section 48260, a notification is not required, and any notification sent to that pupil's parent or guardian, is not eligible for reimbursement.

The Controller found that, during the audit period, 12 of the sampled notifications were distributed for pupils who accumulated fewer than three unexcused absences or tardiness occurrences during the school year.⁹⁶ The claimant has not rebutted these findings, and does not address the 12 notifications in the IRC.

The claimant's request for reimbursement to provide truancy notices for pupils with fewer than three unexcused absences or tardiness occurrences goes beyond the scope of the mandate and is not reimbursable.

Accordingly, the Controller's reduction of costs claimed for the 12 truancy notifications provided for pupils with fewer than three unexcused absences or tardiness occurrences is correct as a matter of law.

B. The Audit Reductions in Finding 2 Based on Statistical Sampling and Extrapolation of Findings to All Notices Claimed Are Not Arbitrary, Capricious, or Entirely Lacking in Evidentiary Support.

In its audit, the Controller examined a random sample of initial truancy notices distributed by the claimant for each year to determine the proportion of notifications that were unallowable for the Controller's asserted legal reasons. The sample for all fiscal years totaled 883 notifications distributed by elementary and secondary schools, out of a total of 45,091 claimed for the audit period. The Controller selected its sample "based on a 95% confidence level, a precision rate of $\pm 8\%$, and an expected error rate of 50%."⁹⁷ The number of unallowable notifications within the sample for each fiscal year was then calculated as an error percentage, and extrapolated to the total number of notifications issued and identified by the claimant in each fiscal year to

⁹⁴ As amended by Statutes 1994, chapter 1023 (SB 1728) and Statutes 1995, chapter 19 (SB 102).

⁹⁵ Exhibit A, Incorrect Reduction Claim, pages 31-35.

⁹⁶ Exhibit A, Incorrect Reduction Claim, page 242. Exhibit B, Controller's Late Comments on the IRC, page 18. All 12 absences were under daily attendance accounting: six in 2007-2008, five in 2008-2009, and one in 2009-2010.

⁹⁷ Exhibit A, Incorrect Reduction Claim, page 241.

approximate the total number of unallowable notifications for elementary and secondary schools. The number of unallowable notices was then multiplied by the unit cost for each fiscal year to calculate the total reduction for the audit period at \$68,410.⁹⁸

Since the Controller has not reviewed all 45,091 notifications and the records associated with those notices during these fiscal years, the Controller's methodology is an estimate based on statistical probabilities of the amount of costs claimed beyond the scope of the mandate and that the Controller has determined to be excessive or unreasonable. The Controller states that the estimated reduction of costs has an "adjustment range" with a 95 percent confidence level for all three fiscal years between \$37,420 and \$99,396, and the total reduction (\$68,410) for all three years falls within that range and best represents the point estimate from each audit sample's results.⁹⁹

Claimant argues that statistical sampling is misapplied in this IRC and that the audit findings should be limited to the notifications sampled. Claimant continues that the sampling process was misapplied in this IRC because the audit actually conducted a review for documentation rather than mandate compliance. According to the claimant, "testing to detect the rate of error within tolerances is the purpose of sampling, but it is not a tool to assign an exact dollar amount to the amount of the error which the Controller has inappropriately done . . . here."¹⁰⁰

Claimant also states that the sample may not be representative of the universe because, for example, kindergarten students in the sample are more likely to be excluded because of the under-age issue, and the possibility of a special education student being under age or over age is greater than the entire student body.¹⁰¹

And, according to claimant, the sampling technique used in the audit is non-representative because the sample size for the audit period (736 truancy notifications sampled; 440 notifications sampled for daily attendance (elementary schools) and 296 notifications for period attendance (secondary schools) is 1.93 percent of the universe. As the claimant states: "The expected error rate is stated to be 50%, which means the total amount adjusted of \$68,410 is really just a number exactly between \$34,205 (50%) and \$102,615 (150%). An interval of possible outcomes cannot be used as a finding of absolute actual cost."¹⁰²

The Controller explains, in response, that the district incorrectly identifies the population sample size for secondary schools as 296 truancy notifications, thus incorrectly identifying the total sample size at 736 truancy notifications for elementary and secondary schools. The correct number of period attendance truancy notifications sampled by the Controller for secondary schools was 443, rather than 296 as alleged by the claimant, bringing the total notifications sampled to 883.¹⁰³ The Controller explains that:

⁹⁸ Exhibit A, Incorrect Reduction Claim, final audit report, pages 242-243.

⁹⁹ Exhibit B, Controller's Late Comments on the IRC, pages 17 and 29-30.

¹⁰⁰ Exhibit A, Incorrect Reduction Claim, page 14.

¹⁰¹ Exhibit A, Incorrect Reduction Claim, page 15.

¹⁰² Exhibit A, Incorrect Reduction Claim, page 16.

¹⁰³ Exhibit B, Controller's Late Comments on the IRC, page 12.

The district did not identify the FY 2009-10 "Secondary Schools" statistical sample, i.e. period attendance population. We selected, and tested, 147 period attendance initial truancy notifications in FY 2009-10. Our audit found no instances of non-compliance from the FY 2009-10 period attendance testing."¹⁰⁴

The Controller also states as follows:

Based on the sampling parameters identified in the report and the individual sample results, our analysis shows that the audit adjustment range is \$37,420 to \$99,396 (**Tab 4**). While a statistical sample evaluation identifies a range for the population's true error rate, the point estimate provides the best, and thus *reasonable*, single estimate of the population's error rate. The audit report identifies a \$68,410 audit adjustment, which is a cumulative total of the unallowable costs based on point estimates from each audit sample's results.¹⁰⁵

The Controller further counters that sampling and extrapolation is an audit tool commonly used to identify error rates, and that there is no law or regulation prohibiting that method. The Controller also argues that claimant misstates and misunderstands the meaning of an expected error rate and confidence interval. The Controller argues that its method is reasonable, and "the Administrative Procedures [*sic*] Act is not applicable."¹⁰⁶

Based on the analysis herein, the Commission finds that the reductions in this case, determined based on the sampling method used and lack of any evidence to the contrary, are not arbitrary, capricious, or entirely lacking in evidentiary support.

1. There is no evidence to support claimant's argument that the statistical sampling and extrapolation method used in the audit constitutes an underground regulation.

The claimant challenges the statistical sampling and extrapolation methodology used by the Controller as an underground regulation not adopted pursuant to the APA, and argues that any findings and reductions extrapolated from the sample reviewed by the Controller should therefore be void.¹⁰⁷

Section 11340.5 of the APA states in pertinent part:

No state agency shall issue, utilize, enforce, or attempt to enforce any guideline, criterion, bulletin, manual, instruction, order, standard of general application, or other rule, which is a regulation as defined in Section 11342.600, unless [the rule] has been adopted as a regulation and filed with the Secretary of State pursuant to this chapter.¹⁰⁸

Therefore, if the Controller's challenged audit methods constitute a regulation not adopted pursuant to the APA, the Commission cannot enforce the methods by upholding the reductions.

¹⁰⁴ Exhibit B, Controller's Late Comments on the IRC, pages 12 and 16.

¹⁰⁵ Exhibit B, Controller's Late Comments on the IRC, pages 17, 29-30.

¹⁰⁶ Exhibit B, Controller's Late Comments on the IRC, pages 12 - 17.

¹⁰⁷ Exhibit A, Incorrect Reduction Claim, page 13-14.

¹⁰⁸ Government Code section 11340.5 (Stats. 2000, ch. 1060).

Section 11342.600 of the APA defines a regulation to mean “...every rule, regulation, order, or standard of general application or the amendment, supplement, or revision of any rule, regulation, order, or standard adopted by any state agency to implement, interpret, or make specific the law enforced or administered by it, or to govern its procedure.”¹⁰⁹ Interpreting this section, the California Supreme Court in *Tidewater Marine Western v. Bradshaw* found that a regulation has two principal characteristics:

First, the agency must intend its rule to apply generally, rather than in a specific case. The rule need not, however, apply universally; a rule applies generally so long as it declares how a *certain class of cases* will be decided. Second, the rule must “implement, interpret, or make specific the law enforced or administered by [the agency], or ... govern [the agency's] procedure.”¹¹⁰

The necessary inquiry, then, is whether the challenged audit policy or practice is applied “generally,” and used to decide a class of cases; and whether the rule “implement[s], interpret[s], or make[s] specific” the law administered by the Controller. Here, that is a close question that turns on the issue of general applicability: if it is the Controller’s policy that *all audits* of the *Notification of Truancy* program be conducted using the statistical sampling and extrapolation methods that claimant challenges, then that may meet the standard of a rule applied “generally, rather than in a specific case.”¹¹¹ On the other hand, if statistical sampling and extrapolation is only one of an auditor’s tools, and happens to be the most practical method for auditing claims involving a unit cost and many thousands of units claimed, and it is within the discretion of each auditor to use the challenged methods, then the APA does not bar the exercise of that discretion.¹¹²

In *Clovis Unified School District v. Chiang*, the court held that the Controller’s contemporaneous source document rule (CSDR), which was contained solely in the Controller’s claiming instructions and not adopted in the regulatory parameters and guidelines, was applied *generally* to audits of all reimbursement claims for certain programs, in that individual auditors had no discretion to judge on a case-by-case basis whether to apply the rule.¹¹³ As to the second criterion, the court found that the CSDR was more specific, and in some ways inconsistent with the parameters and guidelines for the subject mandated programs. Specifically, the court found that the CSDR defined “source documents” differently and more specifically than the parameters and guidelines, including relegating employee declarations to “corroborating documents, not source documents...”, and failing to recognize the appropriate use of a time study.¹¹⁴ The court

¹⁰⁹ Government Code section 11342.600 (Stats. 2000, ch. 1060).

¹¹⁰ *Tidewater Marine Western v. Bradshaw* (1996) 14 Cal.4th 557, 571 (emphasis added) [Citing *Roth v. Department of Veteran Affairs* (1980) 110 Cal.App.3d 622, 630; Gov. Code § 11342(g)].

¹¹² See *Taye v. Coye* (1994) 29 Cal.App.4th 1339, 1345. The court found that an auditor’s decision was not an underground regulation where it was “designed to fit the particular conditions that were encountered upon arrival at the audit site.”

¹¹³ *Clovis Unified School District v. Chiang* (2010) 188 Cal.App.4th 794, 803.

¹¹⁴ *Id.*, pages 803-805.

therefore held, “[g]iven these substantive differences...we conclude that the CSDR implemented, interpreted, or made specific...” the parameters and guidelines and the Controller’s statutory audit authority and was, therefore, an underground regulation.¹¹⁵

In the Medi-Cal audit context, the courts held the Department of Health Services’ statistical sampling and extrapolation methods used to determine the amount of over- or under-payment in reimbursement to health care providers to be an underground regulation, absent compliance with the APA. In *Grier v. Kizer*¹¹⁶ and *Union of American Physicians and Dentists v. Kizer*,¹¹⁷ (*UAPD*) “the Department conducted audits of Medi-Cal providers by taking a small random sample [to determine the frequency and extent of over- or under-claiming for services provided], then extrapolating that error rate over the total amount received by the provider during the period covered by the audit.”¹¹⁸ The courts found the sampling and extrapolation methodology in that case invalid, solely because of the failure of the Department of Health Services to adopt its methodology in accordance with the APA. The court in *Grier* concurred with an Office of Administrative Law (OAL) determination, made in a parallel administrative proceeding, that the challenged method constituted a regulation, and should have been duly adopted. The court observed that “the definition of a regulation is broad, as contrasted with the scope of the internal management exception, which is narrow.”¹¹⁹ The court rejected the Department’s argument that sampling and extrapolation was the only legally tenable interpretation of its audit authority: “While sampling and extrapolation may be more feasible or cost-effective,...[a] line by line audit is an alternative tenable interpretation of the statutes.”¹²⁰ The court also noted that the Department “acquiesced” in that determination and soon after it adopted a regulation providing expressly for statistical sampling and extrapolation in the conduct of Medi-Cal audits.¹²¹ Accordingly, the court in *Union of American Physicians and Dentists* assumed, without deciding, that having satisfied the APA, the statistical methodology could be validly applied to pending audits, or remanded audits.¹²² With respect to Medi-Cal audits, a statistical sampling methodology is provided for in *both* the Welfare and Institutions Code and in the Department’s implementing regulations.¹²³

¹²¹ *Ibid.*

¹²² *Union of American Physicians and Dentists*, *supra*, 223 Cal.App.3d 490, 504-505 [finding that the statistical audit methodology did not have retroactive effect because it did not alter the legal significance of past events (i.e., the amount of compensation to which a Medi-Cal provider was entitled)].

¹²³ See, e.g., Welfare and Institutions Code section 14170(b) (added by Stats. 1992, ch. 722 (SB 485); California Code of Regulations, title 22, section 51458.2 (Register 1988, No. 17).

In light of the *Clovis Unified*, *Grier* and *UAPD* cases, it is clear that an audit practice may be reasonable and otherwise permissible, yet still impose an illegal underground regulation. However, the Commission does not have substantial evidence in the record that the audit methodology complained of rises to the level of a rule of general application, and no clear “class of cases” to which it applies has been defined. In *Tidewater*, the Court held that a “rule need not, however, apply universally; a rule applies generally so long as it declares how a certain class of cases will be decided.”¹²⁴ And in the *Clovis Unified* case, the court explained that in the context of the Controller’s audits of mandate reimbursement claims:

As to the first criterion—whether the rule is intended to apply generally—substantial evidence supports the trial court’s finding that the CSDR was “applie[d] generally to the auditing of reimbursement claims ...; the Controller’s auditors ha[d] no discretion to judge [-]by[-]case basis whether to apply the rule.”¹²⁵

Here, unlike *Clovis Unified*, the sampling and extrapolation method is not part of the claiming instructions for this mandate. Nor is it alleged that auditors were *required* to use the statistical methods at issue. Of the 42 completed audit reports for this mandated program currently available on the Controller’s website, some do not apply a statistical sampling and extrapolation methodology to calculate a reduction;¹²⁶ others apply a sampling and extrapolation method to determine whether the notifications issued complied with the eight required elements under section 48260.5;¹²⁷ and some use sampling and extrapolation methods to determine the proportion of notifications issued that were supported by documentation, including attendance records, rather than the proportion unallowable based on absences, as here.¹²⁸

Therefore, in light of applicable case law and the evidence in the record, the Commission finds that the Controller’s sampling and extrapolation method, as applied in this case, is not an underground regulation within the meaning of the APA.

2. The Controller’s audit findings must be upheld absent evidence that the reductions are arbitrary, capricious, or entirely lacking in evidentiary support.

The claimant argues that there is no statutory or regulatory authority for the Controller to reduce claimed costs based on extrapolation from a statistical sample.¹²⁹ The Controller counters that the law does not prohibit the audit methods used. The Controller relies on Government Code section 12410, which requires the Controller to audit all claims against the state and “may audit the disbursement of any state money, for correctness, legality, and for sufficient provisions of law for payment.”¹³⁰ The Controller also relies on Government Code section 17561, which permits the Controller to reduce any claim that is determined to be excessive or unreasonable: “The SCO conducted appropriate statistical samples that identified a *reasonable* estimate of the non-reimbursable initial truancy notifications, thus properly reducing the claims for the *unreasonable* claimed costs.”¹³¹

The Controller correctly states that there is no express prohibition in law or regulation of statistical sampling and extrapolation methods being used in an audit. However, the Controller’s authority to audit is described in the broadest terms: article XVI, section 7 states that “Money may be drawn from the Treasury only through an appropriation made by law and upon a Controller’s duly drawn warrant.”¹³² Government Code section 12410 provides that the Controller “shall superintend the fiscal concerns of the state...” and “shall audit all claims against the state, and may audit the disbursement of any state money, for correctness, legality, and for sufficient provisions of law for payment.”¹³³

The Controller’s audit authority for mandates is more specifically articulated. Article XIII B, section 6 provides that “the State shall provide a subvention of funds to reimburse...local government for the costs of the program or increased level of service...” whenever the Legislature or a state agency mandates a new program or higher level of service.¹³⁴ Government Code section 17561, accordingly, provides that the state “shall reimburse each local agency and school district for *all* ‘costs mandated by the state,’ as defined in Section 17514...” At the time the audit of the subject claims began in 2012, section 17561 stated:

In subsequent fiscal years each local agency or school district shall submit its claims as specified in Section 17560. The Controller shall pay these claims from funds appropriated therefor except as follows: (A) The Controller may audit any of the following: (i) Records of any local agency or school district to verify the actual amount of the mandated costs. (ii) The application of a reasonable reimbursement methodology. (iii) The application of a legislatively enacted reimbursement methodology under Section 17573. (B) The Controller may

¹³³ Statutes 1968, chapter 449.

¹³⁴ California Constitution, article XIII B, section 6, Statutes 2004, chapter 133, SCA 4; Proposition 1A, November 2, 2004.

reduce any claim that the Controller determines is excessive or unreasonable. (C) The Controller shall adjust the payment to correct for any underpayments or overpayments that occurred in previous fiscal years.¹³⁵

The parameters and guidelines for the *Notification of Truancy* mandate predate the statutory authorization for a “reasonable reimbursement methodology,” as defined in sections 17518.5 and 17557. However, a unit cost, which was adopted for this program, is included within the definition of a “reasonable reimbursement methodology.”¹³⁶ Thus the Controller’s audit authority pursuant to section 17561 expressly authorizes an audit of a claim based on unit cost reimbursement. The statutes, however, do not address how the Controller is to audit and verify the costs mandated by the state.

Additionally, the Controller argues that the audit was properly conducted according to *Government Auditing Standards*, as issued by the Comptroller General of the United States. The Controller cites section 7.55 of the *Generally Accepted Government Auditing Standards* (GAGAS): “[a]uditors must obtain sufficient, appropriate evidence to provide a reasonable basis for their findings and conclusions,” in support of the use of statistical sampling.¹³⁷ Further the Controller cites section 7.56 of the GAGAS: “[a]ppropriateness is the measure of the quality of evidence...” and section 7.62: “[w]hen a representative sample is needed, the use of statistical sampling approaches generally results in stronger evidence....”¹³⁸

While the standards cited do not *expressly* provide for statistical sampling and extrapolation to be applied to mandate reimbursement, they do provide for statistical methods to be used to establish the sufficiency, or validity of evidence.¹³⁹ The Controller also cites the “Handbook of Sampling for Auditing and Accounting,” by Herbert Arkin, to support its contention that a sampling methodology to determine the frequency of errors in the population (i.e., notifications that were not reimbursable for an asserted legal reason) is a widely used approach to auditing.¹⁴⁰

In accordance with the Controller’s audit authority and duties under the Government Code, the Commission’s determination is limited to whether the Controller’s audit decisions and reduction of costs is arbitrary, capricious, or entirely lacking in evidentiary support.¹⁴¹ Based on the standards and texts cited by the Controller, the Commission finds that statistical methods are a commonly-used tool in auditing.

In fact, statistical sampling methods such as those employed here are used in a number of other contexts and have not been held, in themselves, to be arbitrary and capricious, or incorrect as a matter of law. As discussed above, the Department of Health Services has used statistical sampling and extrapolation to determine the amount of over- or under-payment in the context of Medi-Cal reimbursement to health care providers. In *Grier v. Kizer*¹⁴² and *UAPD*,¹⁴³ “the Department conducted audits of Medi-Cal providers by taking a small random sample [to determine the frequency and extent of over- or under-claiming for services provided], then extrapolating that error rate over the total amount received by the provider during the period covered by the audit.”¹⁴⁴ The methods used by the Department of Health Services were disapproved by the courts in *Grier* and *UAPD* only on the ground that they constituted a regulation not adopted in accordance with the APA (as discussed above), rather than on the substantive question whether statistical sampling and extrapolation was a permissible methodology for auditing.¹⁴⁵ Once the Department adopted a regulation in accordance with the APA – a reaction to the proceedings in *Grier* – the court in *UAPD* had no objection to the statistical methodology on its merits.¹⁴⁶ After *Grier*, the Department has both regulatory and statutory authority for its sampling and extrapolation audit process.¹⁴⁷

In addition to the Medi-Cal reimbursement context, the courts have declined to reject the use of statistical sampling and extrapolation to calculate plaintiffs’ damages in a class action or other mass tort action.¹⁴⁸ In a case addressing audits of county welfare agencies, the court declined to consider whether the sampling and extrapolation procedures were legally proper, instead finding that counties were not required to be solely responsible for errors “which seem to be inherent in public welfare administration.”¹⁴⁹

On that basis, and giving due consideration to the discretion of the Controller to audit the fiscal affairs of the state,¹⁵⁰ the Commission finds it must uphold the Controller’s auditing decisions absent evidence that the audit reductions are arbitrary, capricious, or entirely lacking in evidentiary support.

3. There is no evidence in the record that the Controller's findings using the sampling and extrapolation methodology are not representative of all notices claimed during the audit period or that the findings are arbitrary, capricious, or entirely lacking in evidentiary support.

In addition to challenging the legal sufficiency of the Controller's sampling and extrapolation methodology, the claimant also challenges the qualitative and quantitative reliability and fairness of using statistical sampling and extrapolation to evaluate reimbursement. The claimant states that the risk of extrapolating findings from a sample is that the conclusions obtained from the sample may not be representative of the universe. For example, the claimant asserts that a kindergarten pupil is more likely to be under-age and a special education pupil is more likely to be over-age so that the extrapolation from the samples would not be representative of the universe.¹⁵¹ The claimant further contends that the sampling technique used by the Controller is also quantitatively non-representative because less than two percent of the total number of notices were audited, the stated precision rate was plus or minus eight percent even though the sample size (ranging from 146 to 148) is essentially identical for all four fiscal years, and that the audited number of notices claimed for daily accounting (elementary schools) in fiscal year 2008-2009 (6,996) is 17 percent larger than the size in fiscal year 2009-2010 (5,995). The claimant concludes by stating that "[t]he expected error rate is stated to be 50%, which means the total amount adjusted \$68,410 [for the 3-year audit period] is really just a number exactly between \$34,205 (50%) and \$102,615 (150%)."¹⁵²

The Controller disagrees with the claimant's assertions that the sampling is non-representative of all notices claimed. The Controller states "that a particular student's initial truancy notification might more likely be identified as non-reimbursable is irrelevant to the composition of the audit sample itself. It has no bearing on evaluating whether the sample selection is representative of the population" because the sample was random.¹⁵³ Citing to the *Handbook of Sampling for Auditing and Accounting*, page 9, the Controller states:

Since the [statistical] sample is objective and unbiased, it is not subject to questions that might be raised relative to a judgment sample. Certainly a complaint that the auditor had looked only at the worst items and therefore biased the results would have not standing. This results from the fact that an important feature of this method of sampling is that all entries or documents have an equal opportunity for inclusion in the sample.¹⁵⁴

The Controller further states that the district apparently reached the conclusion that the sampling was quantitatively non-representative because the sample sizes were essentially consistent, while the applicable population size varied. The Controller argues that the absolute size of the sample, not the relative size, is more important under "basic statistical sampling principles." The Controller explains that an "expected error rate" in this context is an assumption used to determine the appropriate sample size, rather than a measure of the ultimate accuracy of the

¹⁵¹ Exhibit A, Incorrect Reduction Claim, page 15.

¹⁵² Exhibit A, Incorrect Reduction Claim, page 16.

¹⁵³ Exhibit B, Controller's Late Comments on the IRC, page 15.

¹⁵⁴ *Ibid.*

result. In other words, when “the auditor has no idea whatsoever of what to expect as the maximum rate of occurrence or does not care to make an estimate...” an expected error rate of 50 percent as the beginning assumption will provide “the most conservative possible sample size estimate” in order to achieve the precision desired.¹⁵⁵ In addition, the desired accuracy of the result, which might be called a “margin of error,” is determined by the auditor before calculating the sample size (shown below as “SE = desired sample precision”). Therefore, the “margin of error” of the Controller’s resulting percentage is a known value. The Controller relies on the following formula outlined in Arkin’s *Handbook of Sampling for Auditing and Accounting* to calculate the sample size:

$$n = \frac{p(1 - p)}{\left(\frac{SE}{t}\right)^2 + \left(\frac{p(1 - p)}{N}\right)}$$

n = sample size

p = percent of occurrence in population (expected error rate)

SE = desired sample precision

t = confidence level factor

N = population size¹⁵⁶

Thus, applying the formula above to the population of elementary and secondary notices in this case, with a 50 percent expected error rate (the “most conservative sample size estimate” when an error rate is not known) and a desired eight percent margin of error, as stated in the audit report, shows that an appropriate sample size for each level of elementary and secondary schools is between 146 and 148 notices for populations ranging from 5,995 to 6,996 notifications issued annually by elementary schools, and 6,897 to 9,496 notifications issued annually by secondary schools during the audit period.¹⁵⁷

Moreover, there is no evidence in the record that the results are biased or unrepresentative “because a kindergarten pupil is more likely to be under-age and a special education pupil is more likely to be over-age,” as asserted by claimant. There is no dispute that the samples were randomly obtained and reviewed by the Controller. According to the *Handbook of Sampling for Auditing and Accounting*, all notices randomly sampled have an equal opportunity for inclusion in the sample so the result is statistically objective and unbiased.¹⁵⁸ Moreover, absent evidence, the Commission must presume that the schools within the claimant’s district complied with the mandate in the same way.

¹⁵⁵ Exhibit B, Controller’s Late Comments on the IRC, pages 16-17, Citing to Herbert Arkin, *Handbook of Sampling for Auditing and Accounting*, Third Edition, Prentice Hall, New Jersey, 1984, page 89.

¹⁵⁶ *Id.*, page 16. [Citing to Herbert Arkin, *Handbook of Sampling for Auditing and Accounting*, Third Edition, Prentice Hall, New Jersey, 1984, page 56].

¹⁵⁷ Exhibit B, Controller’s Comments on the IRC, page 29.

¹⁵⁸ Herbert Arkin, *Handbook of Sampling for Auditing and Accounting*, Third Edition, Prentice Hall, New Jersey, 1984, page 9.

In addition, the adjustment range for the population's true error rate within the 95 percent confidence interval is between \$30,986 to \$30,990, added or subtracted from the point estimate of \$68,410.¹⁵⁹ And, the adjustment range of \$30,986 to \$30,990 for the costs reduced represents less than four percent (3.8%) plus or minus of the total amount claimed in fiscal years 2007-2008, 2008-2009, and 2009-2010 (\$796,110).¹⁶⁰ Although there is a possibility that the \$68,410 reduction may result in more or less reimbursement to the claimant than the actual costs correctly claimed, the Commission finds that the application of statistical sampling and extrapolation in this instance is not arbitrary, capricious, or entirely lacking in evidentiary support.

Therefore, the Commission finds no evidence that the Controller's reduction of costs claimed, based on the statistical sampling method as applied in this case, is unrepresentative of all notices claimed or that the Controller's findings are arbitrary, capricious, or entirely lacking in evidentiary support.

V. Conclusion

The Commission finds that the reduction of \$68,410 for the audit period, based on the Controller's sampling and extrapolation methodology for initial notices of truancy distributed for pupils who had fewer than three unexcused absences or tardiness occurrences during the school year and for pupils who accumulated fewer than three absences while between the ages of six and 18 and so were not subject to the compulsory education laws, is correct as a matter of law, and is not arbitrary, capricious, or entirely lacking in evidentiary support.

Accordingly, the Commission denies this IRC.

¹⁵⁹ Exhibit B, Controller's Late Comments on the IRC, page 17. "Based on the sampling parameters identified in the report and the individual sample results, our analysis shows that the audit adjustment range is \$37,420 to \$99,396."

¹⁶⁰ Exhibit A, Incorrect Reduction Claim, page 236.

DECLARATION OF SERVICE BY EMAIL

I, the undersigned, declare as follows:

I am a resident of the County of Sacramento and I am over the age of 18 years, and not a party to the within action. My place of employment is 980 Ninth Street, Suite 300, Sacramento, California 95814.

On October 28, 2015, I served the:

Draft Proposed Decision, Schedule for Comments, and Notice of Hearing

Notification of Truancy, 13-904133-I-13

Education Code Sections 48260.5

Statutes 1983, Chapter 498

Fiscal Years: 2007-2008, 2008-2009, and 2009-2010

Riverside Unified School District, Claimant

by making it available on the Commission's website and providing notice of how to locate it to the email addresses provided on the attached mailing list.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct, and that this declaration was executed on October 28, 2015 at Sacramento, California.

Jill L. Magee

Commission on State Mandates

COMMISSION ON STATE MANDATES

Mailing List

Last Updated: 10/19/15

Claim Number: 13-904133-I-13

Matter: Notification of Truancy

Claimant: Riverside Unified School District

TO ALL PARTIES, INTERESTED PARTIES, AND INTERESTED PERSONS:

Each commission mailing list is continuously updated as requests are received to include or remove any party or person on the mailing list. A current mailing list is provided with commission correspondence, and a copy of the current mailing list is available upon request at any time. Except as provided otherwise by commission rule, when a party or interested party files any written material with the commission concerning a claim, it shall simultaneously serve a copy of the written material on the parties and interested parties to the claim identified on the mailing list provided by the commission. (Cal. Code Regs., tit. 2, § 1181.3.)
